P

Phanagoria. An ancient Greek colony on the Taman Peninsula at the site of present-day Sinna, Krasnodar krai, RF. It was founded in the middle of the 6th century BC by colonists from the Ionic city of Teos, and in the 5th century BC it became part of the *Bosporan Kingdom. Phanagoria flourished in the 5th to 2nd centuries and formed an independent state in the 1st century BC. Its inhabitants (Sindians, Maeotians, Sarmatians, and Greeks) engaged in agriculture, animal husbandry, fishing, various crafts, and trade with neighboring tribes and Mediterranean states. In the 4th century AD the city was razed by the Huns but was rebuilt by the end of the century. It died out in the 11th to 12th century. Excavations of Phanagoria began in the 19th century. More systematic digs conducted in the late 1930s and after the Second World War have uncovered the ruins of palaces, houses, wells, the city walls, a gymnasium, the acropolis, and the port.

Pharmacology. The science of drugs and their effect on or interaction with a living organism. In Kievan Rus' *Yevpraksiia Mstyslavna, the granddaughter of Volodymyr Monomakh, gathered information about medicaments and wrote the treatise *Mazi* (Salves). The preparation and administration of medicaments was largely in the hands of folk healers or sorcerers, of whom it was generally believed that they possessed magic powers (see *folk medicine). They prepared their concoctions mostly from *medicinal plants, infrequently from animal tissues, wine, or honey, and handed down their recipes shrouded in secrecy. After the Christianization of Ukraine the preparation of drugs was taken up by monasteries. Lviv pharmacists are mentioned in chronicles as early as the 14th century. By the 16th and 17th centuries handwritten books of remedies existed, called *travnyky*, *zeleinyky*, or *vertohrady*.

The first pharmacies in Left-Bank Ukraine were founded in major cities at the beginning of the 18th century by the decree of Peter I and were government-owned or privately operated. The Ukrainian obstetrician N. *Ambodyk-Maksymovych wrote an encyclopedic treatise on medical plants that is regarded as the first pharmacological textbook in the Russian Empire (1783). By the 19th century pharmacology was being taught in medical and veterinary institutes as well as at most universities. The foundations of experimental pharmacology in Ukraine were laid by V. Dybkovsky, H. Shkavera, O. *Cherkes, and Yu. Petrovsky.

After the 1917 Revolution the system of training pharmacologists resulted in the creation of related disciplines: pharmacy (the preparation and dispensation of drugs), pharmacognosy, pharmaceutical chemistry and technology, pharmacotherapy (the application of drugs in treating disease), toxicology (the study of drug poisoning), and veterinary pharmacology. Further evolution in pharmacology led to the establishment of its specialized subdivi-

sions: clinical pharmacology, immunopharmacology, chemotherapy, psychopharmacology, pharmacogenetics, and molecular and biochemical pharmacology. Research is conducted at the Kharkiv Chemico-pharmaceutical Research Institute and at the Kiev Scientific Research Institute of Pharmacology and Toxicology and in pharmacological laboratories at other medical and scientific research centers. The Scientific Pharmacological Society of Ukraine was founded in 1961 in Kiev and belonged to the All-Union Scientific Society of Pharmacologists. The collection *Farmakolohiia i toksykolohiia* is published in Kiev.

The Lviv Pharmacy Museum (on Rynok Square) is one of the city's oldest museums, with an exceptionally large collection of pharmaceutical items. It is located in the three-story premises of the original pharmacy (est 1735), and its collection includes scales, mortars, crucibles, manuscripts and incunabula, herbaria, and recipe books, totaling over 2,000 items.

In the diaspora, a department of pharmaceuticals existed at the *Ukrainian Technical and Husbandry Institute in Munich in 1945-51.

P. Dzul

Pheasant (*Phasianus*; Ukrainian: *pantarka*, *fazan*). Birds of the family Phasianidae that are related to the quail, partridge, peacock, and jungle fowl. Pheasants are long-tailed birds of open woodlands and fields, where they nest on the ground and lead a sedentary life. They were naturalized in Ukraine and raised for hunting as excellent game birds. They inhabit the regions of Kiev, Kherson, Mykolaiv, the Crimea, and Transcarpathia.

Philadelphia. A city and port (1991 pop 1,585,000) in southeastern Pennsylvania, at the junction of the Delaware and Schuylkill rivers. It has been one of the main centers of Ukrainian settlement: 28,000 of its residents claimed Ukrainian origin in 1980 but other estimates have put this figure as high as 52,740.

Ukrainians from the Lemko region began to settle in Philadelphia in the 1880s. Later arrivals came from Transcarpathia and then from Galicia. They were attracted to the city by jobs in locomotive plants, steelworks, sugar refineries, railway transport, and port facilities. Women worked mostly as domestic help. The earliest organized community structure in the city was a Transcarpathian congregation which established the parish of the Holy Spirit in 1891. Galician immigrants, who were displeased by the Hungarian influence in the parish, soon organized their own St Michael's parish. With the coming of Bishop S. *Ortynsky, the city developed into a religious and educational center. The Cathedral of the Immaculate Conception was opened in 1908. National Prosvita conferences were held in Philadelphia in 1905 and 1909, and a network of reading rooms and Ukrainian schools was set up. The first branch of the Ukrainian National Association was es-

Ukrainian Catholic Cathedral of the Immaculate Conception in Philadelphia

established in 1905, and in 1909 the Society of Ruthenian-American Citizens was founded and housed in its own building. The Basilian order of nuns set up an orphanage in 1911. St Paul's Institute (Minor Seminary) was founded by Bishop K. Bohachevsky in 1925 (transferred to Stamford, Connecticut, 1933). The *Providence Association of Ukrainian Catholics established its head office in Philadelphia in 1914, and the Ruthenian Bank was founded in 1915 on Ortynsky's initiative. When the Greek Catholic exarchate was divided into separate Ukrainian and Byzantine Catholic (Transcarpathian) jurisdictions in 1924, the former established its seat in Philadelphia. In 1958 it was raised to the status of a metropolity. Archbishop I. *Teodorovych moved the seat of the Ukrainian Orthodox Church in the USA from Chicago to Philadelphia in 1925.

During the interwar period Philadelphia's Ukrainian community developed rapidly. In October 1922 the founding conference of the United Ukrainian Organizations in America was held in Philadelphia, and until 1930 its head office was located there. In July 1936 the Ukrainian Catholic Youth League staged a Ukrainian-American Olympiad there. By 1936 there were two Ukrainian Catholic churches, one Byzantine Catholic church, one Orthodox church, six community halls, a regular parish school, a girls' secondary school (both schools run by the Basilian nuns), six evening schools of Ukrainian language and culture, four library-reading rooms, three printing presses, and over a dozen women's youth, fraternal, sports, and choral organizations. The Catholic triweekly *Ameryka*, the Transcarpathian weekly *Rusyn*, the Orthodox journal *Dni-pro*, the Catholic monthly *Misionar*, and the Russophile *Pravda* all came out in Philadelphia.

The founding of the *Ukrainian Congress Committee of America (UCCA) took place in 1940 in Philadelphia, which also is the site of the head office of the *United Ukrainian American Relief Committee since its establishment in 1944. In 1948 the *World Federation of Ukrainian Women's Organizations was founded in Philadelphia.

During the postwar years almost 6,000 Ukrainian refugees settled in Philadelphia. By 1981 the number of churches had increased to ten Catholic, three Orthodox,

two Evangelical-Baptist, and two Pentecostal. A host of new political, social, women's, veterans', professional, youth, and sports organizations appeared. The Trident sports club won six championships of the American Soccer League. Three financial institutions prospered: the Ukrainian Savings and Loan Association, the Self-Reliance Credit Union (est 1948), and the Trident Savings Association. Most of the local organizations were affiliated with the local branch of the UCCA till 1980, when the latter was split into two rival organizations. A number of national organizations had their head offices in Philadelphia, including the *Ukrainian National Women's League of America (1943-74), the *United Ukrainian War Veterans in America (1949-), the *Ukrainian Music Institute of America (1952-9), the *Ukrainian Patriarchal Society in the United States (1970-9), and the Saint Sophia Religious Association of Ukrainian Catholics (1977-). The main research and educational institutions in Philadelphia include *Manor Junior College (est 1947), the Ukrainian Art Studio (est 1952), the *Lypynsky East European Research Institute (est 1963), and a branch of the Ukrainian Catholic University (est 1977). The Ukrainian Educational and Cultural Center was established in 1980 to provide physical facilities for a wide range of community activities. It services over 40 organizations, including Saturday school, performing ensembles, professional groups, and youth organizations. In 1982 the UNR government-in-exile moved its head office to Philadelphia.

The city was home to the *Ukrainian Theater in Philadelphia (1949-57) and Teatr u Piatnytsiu (until 1974) under the direction of V. Blavatsky and V. Shasharovsky. In 1953 the Kobzar chorus, conducted by A. Rudnytsky, was founded. In the 1970s it was succeeded by the Prometheus chorus, under M. Dliaboha. A Ukrainian radio program has served the local community since 1939, followed by Blavatsky's Radio Hour (1951-), Holos Myrian (1971-), and the Ukrainian Hour (1973-).

Publications coming out of Philadelphia in the postwar period include the daily (since 1950) *Ameryka*, *Misionar*, and literary magazine *Kyiv* (1950-64); the quarterly *Ukrains'ka knyha* (1971-82); the women's monthly *Nashe zhyttia* (1944-74); the Catholic weekly *Shliakh - The Way* (1940-); and the art magazine *Notatky z mystetstva* (1963-). Since the beginning of the century Philadelphia has been an important Ukrainian publishing center.

Economic prosperity has enabled Ukrainians to move to residential areas in the suburbs. A few old community centers have survived in the inner city, most notably the Catholic community in the Franklin Street vicinity. It encompasses a new cathedral designed by Yu. Yastremsky, several religious institutions, and a senior citizen's home.

Philanthropic Society for Publishing Generally Useful and Inexpensive Books (Blagotvoritelnoe obshchestvo izdaniia obshchepoleznykh i deshevyykh knig). The Russian name adopted by the publishing society of the Ukrainian *Hromada in St Petersburg because of se-

vere censorship. The society was founded in 1898 on the initiative of Gen M. Fedorovsky. It was headed first by D. *Mordovets, then by O. *Rusov, and later by P. *Stebnytsky, who initially, together with O. *Lototsky, conducted all of the society's activities. Among its members were hundreds of Ukrainians from various provinces. By 1917 the society had published 80 popular Ukrainian brochures (more than a million copies) on agriculture, hygiene, and, particularly, history. In 1904–5 the society addressed petitions to the supreme imperial institutions demanding the annulment of restrictions on Ukrainian publishing. Together with the auxiliary Shevchenko Society in St Petersburg, the society published the first complete edition of T. Shevchenko's **Kobzar* in 1907.

Philately. See Ukraine-Philatelisten Verband, Ukrainian Philatelic and Numismatic Society, and Postage stamps.

Philipps, Tracy, b November 1890 in the United Kingdom, d 21 July 1959 in London. Journalist and international affairs expert. Educated at Oxford and Durham universities, Philipps was an enigmatic figure with connections to the British intelligence community. In addition to holding postings in East Africa and the Near East, he served as the British relief commissioner in Ukraine in 1921. Between the two world wars he was a foreign newspaper correspondent specializing in the Balkans and Eastern Europe. He came into contact with V. *Kaye-Kysilewsky in London during the 1930s, and in 1940 went to Canada, where he played an important role (together with Kaye-Kysilewsky and G. *Simpson) in establishing the *Ukrainian Canadian Committee (now Congress). In 1941–3 he was an adviser to the Canadian Department of War Services on European immigrant communities and their role in war industry. He was chief of planning, resettlement of displaced persons, United Nations Administration, in Washington and Germany in 1944–5. For a time (from 1939) he was married to L. *Kolessa, the daughter of O. *Kolessa. His writings included monographs and articles on zoology, Islam, ethnology, international affairs, and refugee and minority problems.

Philosophy. An intellectual discipline (literally, 'love of wisdom' in classical Greek) that, in the course of its history, has been variously defined as the study of the basic principles of being, the testing of the foundations of knowledge, the general guide to the good life, the analysis of basic scientific concepts and methods, and the examination of certain concepts of ordinary language. Unlike the specialized sciences, it does not have its own subject matter or distinctive method. Hence, only a vague definition, such as 'the critical and systematic reflection on questions of the greatest concern to man,' may be broad enough to cover the various forms assumed by philosophy.

Because it was adopted from other cultures to address certain pressing political or religious needs, philosophy in Ukraine has been preoccupied with practical rather than theoretical problems. The political calamities and attendant cultural disruptions in Ukraine's history account to a large extent for the lack of durable philosophical tradition in Ukraine and for the absence of a distinctively Ukrainian system or worldview. For this reason some important Ukrainian thinkers (eg, H. *Skovoroda) have been assigned mistakenly to Russia's more stable philosophical

culture; others (P. *Yurkevych, V. *Lesevych) did in fact work in a non-Ukrainian tradition. Lacking its own philosophical literature and institutions, Ukrainian culture could be considered to have been incomplete during some periods of its development. At such times writers and poets rather than philosophers were the propagators of philosophical ideas and theories among the Ukrainian public.

Medieval period. The period from the adoption of Eastern Christianity to the Mongol invasion (10th–13th centuries) was marked by vigorous intellectual development. The assimilation of Byzantine culture was not passive, but an active rethinking that gave rise to original speculation. Because of a common literary language and alphabet, the work of Bulgarian translators and thinkers was readily transferable to Rus'. The ideas of Greek philosophers and the Church Fathers entered Rus' through Bulgarian translations of Greek collections or original Bulgarian compilations, including the **Izbornik* of Sviatoslav (1073), *Zlatostrui*, *Pchela* (The Bee), the chronicles of John Malalas and Georgios Hamartolos, the Lives of ss Cyril and Methodius, the *Hexaëmeron* of Exarch John of Bulgaria, *The Source of Knowledge* of St John of Damascus, and apocrypha. The new, imported ideas, which themselves were not systematized and were often opposed, did not displace old popular beliefs, but were set alongside them. Thus, many conflicting answers to the same basic questions were found in different and even the same sources. Neither a single dogmatic scheme nor a unified worldview was worked out.

Since political motives played a decisive role in the religious conversion of Rus', the emergent philosophical thought was focused on political rather than religious questions. Authors of the first original works produced in Rus' were not concerned much with personal salvation or the defense of Christian doctrine, but with a higher justification of the political order. Metropolitan Ilarion's **Slovo o zakoni i blahodati* (Sermon on Law and Grace), the finest theoretical work written in Rus', shows how the Christianization of Rus' is the fulfillment of universal history. Grand Prince Volodymyr Monomakh's **Pouchenie ditiam* (Instruction for [My] Children) and the Rus' chronicles portray the ideal prince, a combination of the pagan warrior and the fatherly Christian ruler. Besides these works, the sermons of Bishop Cyril of Turiv, the letters of Metropolitan Klym Smoliatych (reputedly the best philosopher in Rus'), and the writings of Nestor the Chronicler contain philosophical ideas, but fall far short of the kind of articulated, systematic thinking characteristic of scholasticism. The worldview expressed in the literature and folklore of Rus' was practical, optimistic, and life-asserting. The Church Fathers' Christian Neoplatonism reinforced the sense of divine presence in the world and the expectation of happiness in this life that were characteristic of the earlier pagan outlook. The sharp opposition between God and nature, as well as the spirit and the body, and its attendant rejection of the joys of this world was confined to a relatively narrow class of ascetic works.

The Mongol invasion of the mid-13th century began a long period of political turmoil and cultural decline in Rus'. For almost three centuries nothing significant was added to the Kievan intellectual heritage. As a mood of historical pessimism set in, people turned to religion and mysticism for comfort. In the mid-14th century Hesy-

chasm, a form of monastic mysticism, spread from Bulgaria to Ukraine, and in the 15th century a rationalist sect of *Judaizers appeared in Kiev.

Renaissance period. Philosophical ideas and methods of argument gained a new importance in the period of religious struggle in Europe. At the end of the 15th century the ideas of *humanism were brought to Ukraine by foreign travelers and by Ukrainians studying at foreign universities. The *Reformation, which was carried into Galicia and Volhynia by rationalist sects, such as the *Socinians, was very different in origin and purpose from the humanist movement, yet their programs coincided and reinforced each other on many points: the extension of education and learning, the use of the vernacular, the right to individual opinion, and the need to return to the original sources and to reassess critically the traditions built on them. Protestant anticlericalism, public-mindedness, and national awareness had an important influence on the church *brotherhoods in Ukraine.

Although these two movements contributed to the cultural revival in Ukraine, it was the Counter-Reformation spearheaded by the *Jesuits that threatened the very existence of the Orthodox faith and Ukrainian culture and aroused the Ukrainian Orthodox nobility and burghers to vigorous organized action. At first the Orthodox adopted a defensive strategy: they turned inward toward their own Greco-Slavonic tradition and rejected anything belonging to the Latin-Polish tradition. Returning to the roots of their culture, they revived the use of Greek and Church Slavonic, translated the Bible, and studied patristic theology. The achievements of the Catholic West – scholastic theology, philosophy, and logic – were viewed with suspicion as a devilish ploy to lure believers away from the true faith. New institutions were set up toward the end of the 16th century to carry out this program: the Ostrih cultural center, consisting of the Ostrih Academy Press, a learned circle, and a string of brotherhoods modeled on the Lviv Dormition Brotherhood. The leading Orthodox proponents were I. *Vyshensky, V. Surazky, Kh. Filalet, H. Smotrytsky, Ostrozkyi Kliryk, Z. Kopystensky, K. Stavrovetsky, I. Kopynsky, and Y. Boretsky. To them philosophy was part of theology, and most of their ideas were derived from the same sources on which medieval thinkers had drawn – Pseudo-Dionysius, St John Chrysostom, St John of Damascus, and Exarch John of Bulgaria (see *Polemical literature).

This defensive strategy led to isolation from the larger society and from the dominant culture. Withdrawal from this world for the sake of another world did not appeal to the upper classes of the nobility, clergy, and burghers, who continued to drift away from the Orthodox faith and culture. The Orthodox countered by proposing to study and assimilate the tools (Latin, Polish, rhetoric, and logic) and ideas (scholasticism) of their rivals. This was a dangerous policy, for it diminished the differences between the competing cultures, but it was the only policy that offered some hope of success. The turn to scholasticism was a return to an outlived intellectual tradition, but it created the preconditions for the separation of philosophy from theology and the introduction of modern ideas into Ukraine. The chief proponents of the new strategy were M. Smotrytsky, K. *Sakovych, L. Zyzzanii, and P. Mohyla. The Kievan Mohyla College (later Academy) was the leading institution to carry out this program.

In spite of royal prohibition, philosophy began to be taught at the Kievan Cave Monastery School (1631), and the practice was continued when the school was reorganized into the Kievan Mohyla College, later Academy (1632–1817). The philosophy courses, read in Latin, usually required three years and covered three main fields, logic, physics (natural philosophy), and metaphysics. Each instructor prepared his own course; hence, the courses differed significantly in content and style. Some of the professors who offered philosophy courses at the academy were Y. *Kononovych-Horbatsky (1639–42), I. *Gizel (1645–7), Y. *Krokovsky (1686–7), S. *Yavorsky (1691–3), I. Popovsky (1699), Y. Turoboisky (1702–4), Kh. Charnutsky (1704–5), T. *Prokopovych (1707–8), Y. Volchansky (1715–18), I. Levytsky (1723–5), I. Dubnevych (1725–6), A. *Dubnevych (1727–8), S. Kalynovsky (1729–30), S. Kuliabka (1735–9), M. *Kozachynsky (1741–5), H. *Konysky (1749), T. *Shcherbatsky (1751–3), and D. *Nashchynsky (1753–5).

The general character of these courses was syncretic – the result of blending elements of Christian Neoplatonism with Aristotelian doctrines. The academy's professors drew ideas freely from the ancient philosophers (mostly Aristotle and Plato, but also the Stoics and Ptolemy), the patristic tradition (Origen, St Basil the Great, St Augustine, Pseudo-Dionysius), medieval scholasticism (Albertus Magnus, Thomas Aquinas, J. Duns Scotus, and William of Ockham), and neoscholasticism (T. Cajetan, F. Suárez, P. Fonseca, L. de Molina, R. de Arriaga, and F. de Oviedo). They often criticized Thomas Aquinas, using the arguments of his scholastic opponents. Aristotle was quoted more than any other thinker but was not treated as an infallible authority. The logic course, which consisted of an introductory part called dialectic or minor logic and a more sophisticated part called major logic, was based on Aristotle's *Organon* and supplemented with refinements introduced by scholastic logicians. On the central problem discussed in logic – universals – the academy's professors rejected Platonism and accepted some version of Aristotelian realism. In natural philosophy they adopted Aristotelian hylomorphism, but tended to stress the ontological primacy of prime matter over form. Shcherbatsky was the first to proffer the Cartesian concept of matter instead of Aristotle's. While accepting creation the Kiev thinkers tended to minimize God's subsequent intervention in the natural world. This deistic tendency contrasted sharply with their Neoplatonist metaphysics, which emphasized God's immanence in nature. A growing interest in modern science and philosophy is evident in their discussion of Copernican, Galilean, and Cartesian theories (Shcherbatsky first adopted the heliocentric theory and Descartes's vortex theory) and the rejection of Aristotle's distinction between celestial and sublunar bodies (Prokopovych, Kozachynsky, Konysky, Shcherbatsky). Some added ethics treatises to their courses (Prokopovych, Kalynovsky, Kuliabka, Kozachynsky, Konysky, Shcherbatsky). They tended to reject a narrow, ascetic view of life and to assert the desirability of happiness in this as well as the next life and its attainability in an active, rationally governed life. In style the courses looked much like scholastic treatises: the chief problems of philosophy were discussed one by one by proposing a thesis, listing objections, and replying to the objections.

Modern period. During the second half of the 18th century the Kievan Mohyla Academy and the colleges in

Chernihiv, Pereiaslav, and Kharkiv were gradually reduced to mere seminaries. At the beginning of the 1760s the Kiev metropolitan ordered philosophy at the academy to be taught according to C. Baumeister's texts based on C. Wolff's system, and thus discouraged any individual originality and intellectual independence.

Ukraine's loss of the last vestiges of political autonomy under Catherine II and its swift cultural decline account for the weak impression that the Enlightenment made on Ukrainian thought. Without royal encouragement or interest and without vigorous institutions of higher learning independent of church control, the Enlightenment could not grow into a full-fledged movement. It is represented by a few individual thinkers, such as Ya. *Kozelsky, P. *Lodii, I. *Rizhsky, and J. *Schad, and propagandists, such as V. *Karazyn, H. *Vynsky, O. Palytsyn, and V. Kapnist. A conservative form of Enlightenment based on G. Leibniz's and C. Wolff's ideas was propagated by the higher schools; the more radical form articulated by F. Voltaire, J.-J. Rousseau, D. Diderot, C.-A. Helvétius, P.-H. Holbach, and Montesquieu was cultivated and propagated by small circles of educated nobles. Some Ukrainians (H. *Kozytsky, S. *Desnytsky, Kozelsky, I. Vanslov, Ya. Kostensky, H. *Poletyka, V. Ruban, and I. Tumansky) belonged to a society in St Petersburg (1768–83) that translated and published books by several French thinkers. *Kantianism was propagated by the German thinker L. Jacob, who was a professor at Kharkiv University (1807–9), and by Rev V. Dovhovych, a member of the Hungarian Academy of Sciences in Budapest. Kant's moral theory made a strong impression on Schad.

Grounding a doctrine of natural rights in an ahistorical concept of human nature, the enlightened thinkers proposed to realize these rights (to individual freedom, equality before the law, and enjoyment of property) by restructuring society. All of them were opposed to serfdom, but apart from Kozelsky and Karazyn they urged the restriction of landowners' rights rather than abolition. Karazyn and Lodii preferred constitutional monarchy while Kozelsky preferred a republic. Following Rousseau, Kozelsky advocated not merely equality before the law, but limits to economic disparity. All of them believed in peaceful social reform through education and the moral improvement of the monarch and small elite. Karazyn pointed also to the importance of scientific and technological development for social progress.

In its practical (moral and social) consequences the philosophy of H. *Skovoroda is very close to the teachings of the *Philosophes*, although it has no direct tie with the Enlightenment. It is rooted not in the new natural sciences, but in the humanist tradition going back to the ancient philosophers and in Christian Neoplatonism. In his writings Skovoroda denounced the injustice and exploitation he observed around him, and in practice he renounced this society by turning down a career in the church. His ideal society, which can be realized only by individual moral rebirth, is based on the fulfillment of each member's inner nature. In this context equality is the full (hence equal) realization by all individuals of their unequal potentialities.

A number of Ukrainians played an important role in the growth of mysticism in the 18th-century Russian Empire. This trend of thought paved the way for the Romantic worldview and German idealism.

The development of Ukrainian culture, particularly literature and art, in the 19th century was influenced decisively by German *romanticism. The Romantic outlook attained its fullest philosophical expression in the German idealists – J. Fichte, F. *Schelling, and G. Hegel – and it was those thinkers who had a determining influence on philosophical thought in Ukraine during the first half of the 19th century.

Fichte's ideas were introduced at Kharkiv University by J. Schad (1804) and were spread to other educational institutions by his students. The first translation of Fichte was done at Kharkiv by one of Schad's students in 1813. Schad also acquainted his students with some of Schelling's doctrines, and his successor to the university's chair of philosophy, A. Dudrovych (1818–30), absorbed Schelling's mystical spirit and taught Schellingian psychology. J. Kroneberg, who taught classical philosophy at Kharkiv University (1819–37), attempted to construct his own esthetic theory using Schelling's ideas. M. *Maksymovych, the first rector of Kiev University, formulated his ideas on nature under the impact of Schelling's and L. Oken's doctrines and was inspired in his later ethnographic work by Schelling's views. K. Zelenetsky, who tried to reconcile Schelling and Kant, and N. Kurliandtsev, who translated Schelling and H. Steffens, taught at the Richelieu Lyceum in Odessa in the first half of the century. P. Arsenev followed C. Carus in his psychology lectures at the Kiev Theological Academy and Kiev University in the 1840s and probably had some influence on the Cyril and Methodius Brotherhood. But the most influential German thinker was Hegel, whose system encompassed all the diverse trends within romanticism (moral, religious, esthetic) and subsumed them all under reason. Hegel's historicism and dialectic made a strong impression on O. *Novytsky, O. *Mykhnevych, and S. *Hohotsky. They not only adopted some of his ideas but also tried to apply his methods of interpretation. Hegel's theory of history influenced a number of historians, such as M. Lunin, who in turn influenced M. Kostomarov, and P. Pavlov, some literary historians such as A. Metlynsky and M. Kostyr, and the philosopher of law P. Redkyn (see *Hegelianism).

The Christian Romantic ideology of the *Cyril and Methodius Brotherhood is the finest example of a creative response by young Ukrainian intellectuals to new ideas from the West. As expressed in the **Knyhy bytiia ukrains'koho narodu* (The Books of the Genesis of the Ukrainian People), their theory was a mixture of Enlightenment political ideals (equality, democracy, parliamentarism), pietist sentiment, and Romantic notions of historical providentialism and national messianism. A religiously colored faith in Ukraine's mission to unite the Slavs in a federation of free national republics inspired the writings of the leading Ukrainian writers of the mid-century and stimulated the growth of national consciousness.

As the prestige of the natural sciences rose, the Romantic Weltanschauung lost its credibility. But the ambition to unify all human experience in one all-embracing philosophical system remained strong throughout the second half of the century. P. *Yurkevych, probably the sharpest philosophical mind in Ukraine at the time, set out to reconcile idealism and materialism. Although he did not complete this project, his critique of materialism, interpretation of Platonism, and suggestions for an integrated concept of human nature were promising beginnings. A

unified metaphysical system was worked out by A. Kozlov, who taught at Kiev University from 1876. Influenced by Leibniz, I. Kant, and A. Schopenhauer, he proposed a theory of critical spiritualism that admitted a multiplicity of spirits and denied the reality of matter. A similar system of 'synechological spiritualism' was proposed later by A. *Giliarov, who viewed the universe as an infinite hierarchy of organisms.

Positivism was more popular among scientists than among philosophers in Ukraine. A Ukrainian positivist of particular note was V. *Lesevych. He accepted A. Comte's teachings at first, but later rejected them in favor of a stricter empiricism and worked out his own theory of knowledge, which was close to empiriocriticism. Some positivist ideas can be found in G. Chelpanov, who taught philosophy at Kiev University (1892–1906), P. *Linytsky, and N. Grot, who began his academic career at the Nizhen Lyceum and Odessa University (1883–6). All of them tried to make room for religious faith without weakening the authority of science. Following Kant they drew a clear line between knowledge and faith; they restricted the first to the realm of phenomena and accounted for it in empirio-critical terms. M. *Drahomanov developed his political and social theory in a positivist framework. The sociologist M. *Kovalevsky was influenced strongly by A. Comte, while B. *Kistiakovsky worked out a neo-Kantian foundation for the social sciences. F. *Zelenohorsky of Kharkiv University emphasized the importance of the inductive method without denying the role of deduction and imagination in scientific knowledge. *O. Potebnia's and D. *Ovsianiko-Kulikovsky's philosophy of language was based on associationist psychology.

After the First World War philosophy developed very differently in Western Ukraine under Polish rule, in Soviet Ukraine under the stifling restrictions of official ideology, and among Ukrainian émigrés. Denied their own university by the Polish authorities, Galicia's Ukrainians were unable to compete with the Poles in the quality of philosophical education and writing. Some philosophy was taught at the Lviv (Underground) Ukrainian University (eg, by S. *Balei) and at the Greek Catholic Theological Academy by Rev Y. *Slipy (scholasticism), M. *Konrad (ancient philosophy), and H. *Kostelnyk (epistemology). The Western Ukrainian and émigré proponents of different political ideologies, such as *conservatism, integral *nationalism, *socialism, and *Marxism, discussed, with varying sophistication and objectivity, the philosophical grounds of their outlook.

Soviet period. In Soviet Ukraine, for the first few years philosophical activity developed in a normal way: philosophers expressed their views freely, formed associations, and published their own journals. In 1922 the government dismissed some of its ideological opponents from their academic posts and banished them from the Ukrainian SSR, thus warning intellectual circles that it would no longer tolerate criticism of the official ideology. Gradually the regime imposed its control over ideas by dissolving all independent associations and publications and by establishing its own institutions for defining and propagating the approved ideology, *Marxism-Leninism. As political interference increased, philosophical debate degenerated quickly into servile dogmatism, invective, and denunciation. By 1931 all creative thinking on philosophical issues had been stifled.

The first philosophical institution in Ukraine set up by the Soviet regime was the Department of Marxism and Marxology in Kharkiv. It was established in the fall of 1921, and a year later it was reorganized into the Ukrainian Institute of Marxism, renamed the *Ukrainian Institute of Marxism-Leninism (UIML) in 1927. The institute had three divisions, each with three departments. The Philosophy-Sociology Division (chaired by S. *Semkovsky) consisted of the departments of Philosophy (headed by Semkovsky), Sociology (headed by V. *Yurynets), and, from 1928, Law (headed by Yu. Mazurenko). Members of the philosophy department included Ya. Bilyk, Z. Luzina, P. Demchuk, and T. Stepovy, who also lectured at other institutions in Kharkiv. Philosophical research was published in the institute's journal *Prapor marksyzmu* (1927–30). In 1927 the Ukrainian Society of Militant Materialists (later of Militant Materialists-Dialecticians) was organized at the institute. At the same time (from 1921) two departments of the Social-Economic Division of the VUAN – those of the History of Philosophy and Law (headed by A. *Giliarov) and Sociology (headed by S. Semkovsky) – functioned in Kiev. In 1931 they were replaced by the VUAN Philosophical Commission in Kharkiv, which was to prepare a philosophical dictionary. In 1926 the Kiev Scientific Research Department of Marxism-Leninism (headed by R. Levik and then O. Kamyshan) was set up under the VUAN. Its philosophical-sociological section (chaired by S. Semkovsky) formed special commissions devoted to scientific methodology, historical materialism, the sociology of law, the sociology of art, the methodology of the history of technology, and atheism. Leading associates of the department were V. Asmus, Ya. Rozanov, M. Perlin, O. Zahorulko, M. Nyrchuk, and V. Yurynets. In 1930 the department was turned into the Kiev branch of the UIML.

The UIML and the VUAN departments had two chief tasks: to articulate and propagate Marxism-Leninism and to train political specialists and propagandists for work in higher educational institutions. Besides translating the basic works of K. Marx, F. Engels, and V. Lenin and preparing anthologies and textbooks, their associates conducted prolonged discussions on the nature of philosophy, the place of the Hegelian dialectic in the physical world and the natural sciences, and the weight of Lenin's contribution to philosophy. Since dialectical materialism claimed to be both a scientific theory and a method of studying reality, its relation to the natural sciences and, particularly, the new theories of relativity and quantum mechanics aroused much interest (see *Philosophy of science). The third branch of philosophy to receive some attention was the history of philosophy, which was limited to the philosophical traditions from which Marxism-Leninism had sprung: B. Spinoza and the French materialists, Hegel and L. Feuerbach among the German philosophers, and N. Chernyshevsky, L. Tolstoi, and G. Plekhanov among the Russians. In 1930 P. Demchuk's book on Spinoza and V. Bon's book on 18th-century French materialism came out. Hegel's *Science of Logic* was translated in 1929. Although the philosophy department at the UIML had a special commission for the history of philosophy in Ukraine (chaired by S. Semkovsky), little was accomplished in this area. Only a collection of articles on H. Skovoroda (1923), some booklets, and a solid monograph on him by D. Bahalii (1926) were published.

The so-called philosophical discussion in Ukraine cul-

minated at a conference in Kharkiv in January 1931, where accusations of nationalism, mechanism, and Menshevik idealism were directed at the leading figures of the philosophical establishment. Despite the absurdity of the charges, everyone admitted his 'errors' in a published self-criticism. The Party was thus able to call for a reorganization of the institutional system of research and the eradication of the vestiges of 'bourgeois science.' In June 1931 the UIML was converted by Party decree into the *All-Ukrainian Association of Marxist-Leninist Scientific Research Institutes (VUAMLIN). The UIML's three divisions were turned into three VUAMLIN institutes – Philosophy and Natural Science, Economics, and History – of the six that were created. Each institute had a three-year graduate program. The Institute of Philosophy and Natural Science (directed by R. Levik and then O. Vasileva, and A. Saradzhev) was divided into four sectors: dialectical materialism (including a section on the history of philosophy in Ukraine), historical materialism, natural science (with the Association of Natural Science), and antireligion. It published the journals *Prapor marksyzmu-leninizmu (1931–3), Pid markso-lenins'kym praporom (1934–6), and Za marksysts'ko-lenins'ke pryrodoznavstvo (1932–3). Among its leading associates were S. Semkovsky, V. Yurynets, T. Stepovy, O. Bervytsky, Ya. Bilyk, and V. Bon. So-called Red Professors institutes (est 1932) assumed the responsibility of training research and teaching cadres within each of the VUAMLIN institutes. At the Philosophy Institute of Red Professors (directed by S. Bludov and then O. Adrianov), V. Yurynets held the chair of dialectical materialism, T. Stepovy the chair of historical materialism, and O. Bervytsky the chair of the history of philosophy. In 1936 the separate institutes were merged into one Institute of Red Professors, with six departments. The philosophy department was chaired by A. Saradzhev and then Yu. Olman and M. Yushmanov. Philosophical research at the VUAMLIN had been long extinct by the time it was abolished in 1937. Many of the aforementioned leading thinkers perished in the terror of the 1930s.

After the Second World War research and teaching continued to be assigned to two distinct types of institution: research to institutes, and teaching to higher educational institutions, including universities. In 1946 the AN URSS (now ANU) *Institute of Philosophy was established in Kiev. It published *Naukovi zapysky Instytutu filosofii* (1951–61, 7 vols) and the bimonthly *Filosofs'ka dumka* (est 1969), which in 1989 became the monthly *Filosofs'ka i sotsiologichna dumka*. Another research body – the Department of Philosophy of the AN URSS Presidium – was established in early 1950. It was headed by M. *Omelianovsky and then M. Ovander and I. Holovakha. Since any new work in dialectical and historical materialism was ruled out by Stalin's treatment of the topic in the official short course on the history of the Bolshevik party (1938), and since the methodology of the natural and social sciences remained an uncharted mine field, the history of philosophy in Ukraine became the most promising area in philosophy. A few monographs and numerous articles on the philosophical ideas of 19th-century scientists (M. Maksymovych, V. Danylevsky, and I. Mechnikov) and the so-called Russian and Ukrainian revolutionary democrats (A. Herzen, N. Chernyshevsky, N. Dobroliubov, D. Pisarev, T. Shevchenko, P. Myrny, I. Franko, M. Pavlyk, O. Terletsky, P. Hrabovsky, Lesia Ukrainka, and M. Kotsiubynsky) ap-

peared. In a crude and obvious manner their authors imposed a predictable interpretation on their subject: materialist, atheist, or social revolutionary. In the 1950s some work, which was equally tendentious, was done also on 17th- and 18th-century writers, such as I. Vyshensky, L. Baranovych, H. Skovoroda, and Ya. Kozelsky. Such studies proliferated in the 1960s; a collection of articles on the history of Ukrainian philosophy came out almost every year. The most important accomplishment of the period was the publication in 1961 of the first full and scholarly collection of Skovoroda's work. The Latin transcripts of philosophy courses taught at the Kievan Mohyla Academy began to be studied and translated, and excerpts appeared regularly in *Filosofs'ka dumka*. A Ukrainian translation of T. Prokopovych's courses was readied for publication, but appeared more than a decade later, in 1979–81. On the 250th anniversary of H. Skovoroda's birth a second, improved edition of his works (2 vols, 1973), a new biography by L. Makhnovets (1972), and several collections of articles on Skovoroda came out. The more important contributors in the field of Ukrainian philosophy were I. Ivano, D. *Ostriany, V. Dmytrychenko, A. *Brahynets, I. *Tabachnikov, V. Horsky, P. Manzenko, M. Rohovych, V. Yevdokymenko, and V. *Shynkaruk.

A wave of arrests throughout Ukraine in January 1972 launched a concerted campaign to suppress Ukrainian culture and language. At mid-year the Institute of Philosophy was purged: two of its associates, V. *Lisovy and Ye. *Proniuk, were imprisoned for criticizing the Party's policy, and a number of junior researchers and graduate students were expelled. The number and quality of the institute's publications declined: hardly anything was printed in Ukrainian, and the Ukrainian accomplishments had to be described as accomplishments of the three 'fraternal' (Russian, Ukrainian, Belarusian) peoples. The pace of publication picked up only in the 1980s. V. Nychyk's monograph on the philosophical tradition at the Kievan Mohyla Academy (1978) was followed by a series of related studies by Ya. Stratii (1981), I. Zakhara (1982), I. Paslavsky (1984), and V. Lytvynov (1984), and a catalogue of surviving transcripts of the rhetoric and philosophy courses at the academy (1982). The scope of research was broadened to include the medieval era, on which several collections of articles appeared (1983, 1987, 1988, 1990). Before his untimely death, Ivano finished his survey history of esthetics in Ukraine (1981) and his notable study of Skovoroda's thought (1983). Volumes 1 and 2 of the ANU multiauthor three-volume history of philosophy in Ukraine were published in 1987. The most significant recent achievement has been the publication of primary sources of Ukrainian thought of the 16th to 18th centuries in Standard Ukrainian translation: ethics courses at the Kievan Mohyla Academy (1987), the works of professors of brotherhood schools (1988), and H. Konysky's (1990) and S. Yavorsky's (1992) philosophy courses at the academy. Among the leading scholars in the field today are V. *Nychyk, M. Kashuba, V. Horsky, Ya. *Stratii, I. *Zakhara, V. *Lytvynov, I. Paslavsky, M. Luk, and A. *Paschuk.

Since 1972 the *Ukrainian Philosophical Society has promoted and co-ordinated philosophical studies in Ukraine.

Outside Ukraine. In the interwar period philosophy was taught in Prague at the Ukrainian Higher Pedagogical

Institute, at which the Skovoroda Philosophical Society (1925–30) was active, and at the Ukrainian Free University (UVU) by D. *Chyzhevsky, who established himself as the leading authority on the history of Ukrainian philosophy with his two monographs on philosophy in Ukraine, two books on Skovoroda, and a study of Hegel's influence in the Russian Empire. I. *Mirchuk, a historian of Ukrainian culture and philosophy, began his academic career at the UVU. M. *Shlemkevych, who completed his PH D under M. Schlick in Vienna, developed a philosophical genre of journalism dealing with fundamental psychological-cultural problems of Ukrainian society. After the Second World War Mirchuk continued his work on the history of philosophy. Some contributions were made by his colleagues at the UVU in Munich O. *Kulchytsky and V. *Yaniv. K. Mytrovych, a specialist in contemporary existentialism, has done some work on Skovoroda. Ye. Lashchuk, a professor of philosophy in the United States, has worked on V. Vynnychenko's 'concordism.' Among Ukrainian émigré scholars who have gained a world reputation are G. *Malantschuk, for his work on S. Kierkegaard's thought, and R. *Rozdolsky, for his interpretation of Marx's *Das Kapital*.

(For recent work in other fields of philosophy, see *Logic, *Marxism-Leninism, and *Philosophy of science).

Philosophy of science. A branch of philosophy dealing with the distinctive nature of scientific knowledge – its logical structure, its relation to experience, and its growth. Formerly discussed among more general problems of epistemology, these questions received increasing attention in the 19th century and are accepted today as a separate field of philosophy.

In Ukraine the first contributions to the subject were made by scientists rather than philosophers. V. *Vernadsky tried to define the key features of science in his extended article on the scientific worldview (1902), and B. *Lichkov discussed the fundamental issues of the field in his books in Russian on the limits of knowledge in the natural sciences (1914) and on description and explanation in science (1919). During the early period of the Soviet regime, philosophers tried to define the relation of the new official ideology, *Marxism-Leninism, to the natural sciences instead of exploring the nature of scientific knowledge for its own sake. Nevertheless, many questions that belong to the philosophy of science were discussed, and some variety of views was tolerated until the early 1930s. In the 1920s a special commission on scientific methodology was set up within the philosophy department of the *Ukrainian Institute of Marxism-Leninism in Kharkiv to study the implications of dialectical materialism for the natural sciences. Besides the philosophers S. Semkovsky (chairman), V. Berkovych, P. Biliarchyk, P. Demchuk, V. Yurynets, T. Stepovy, R. Levik, and V. Chuchmarov, the commission's membership included prominent scientists, such as I. Sokoliansky, D. Tretiakov, O. Korshykov, A. Paladin, L. Pysarzhevsky, O. Goldman, D. Syntsov, and D. Grave. In Kiev a special commission on scientific methodology was set up within the VUAN Scientific Research Department of Marxism-Leninism in 1926.

The All-Union Conference on the Philosophical Problems of Science in 1958 marked a turning point in the history of the subject: by condemning the imposition of ideological dogma on science, it permitted the philosophy of science to develop independently of dialectical materialism. In 1962 a new Department for the Logic of Scientific Knowledge was set up at the AN URSSR (now ANU) Institute of Philosophy. First chaired (1962–6) by the institute's director, P. *Kopnin, the department soon became one of the largest and most productive sections of the institute. Its first two collections of articles on logic and the methodology of science (ed P. Dyshlevy, 1964; ed M. Omelianovsky, 1967) and the multiauthor monograph on the logic of scientific research (ed P. Kopnin, 1965) outlined the depart-

ment's research program. The nature of scientific theory has been analyzed in a multiauthor monograph (ed P. Dyshlevy, 1965) and in individual monographs by P. Kopnin (1963), M. Popovych (1966, 1971), V. Ryzhko (1975), V. Kuznetsov (1977), and V. Khramova (1984). The distinctive character of scientific explanation has been defined by M. Rozhenko (1970), E. Bystrytsky (1986), and N. Depenchuk, P. Dyshlevy, and N. Kyvenko (1981). Books by M. Vilnytsky (1965), P. Dyshlevy (ed, 1966), V. Khramova (1974), and V. Kyzyma (1976) dealt with the nature of scientific experiment and its role in theory confirmation. The problem of scientific discovery and growth has been discussed in a book by S. Krymsky (1974) and a collection of articles edited by M. Popovych (1983). The influence of general philosophical ideas in science has been explored by V. Chornovolenko (1970), S. Krymsky and V. Kuznetsov (1983), and L. Ozadovska (1989), and the problem of values in science has been approached from different perspectives by V. Zahorodnyk (1984), P. Yolon, S. Krymsky, and B. Parakhonsky (1989), and M. Burgin and V. Kuznetsov (1991). A number of collections have been devoted to the special methodological problems of biology (1966, 1968, 1970) and ecology (1974). In the 1960s many of the collections and monographs in the philosophy of science came out in Ukrainian. Since the abrupt change in policy at the beginning of the 1970s, all of the department's publications have been published only in Russian. Thus, in spite of its USSR-wide reputation as a leading philosophy of science center, except for a few individuals among its members, the department stands strangely aloof and alienated from Ukrainian intellectual life.

T. Zakydalsky

Photography. In 1841, four years after the invention of the daguerreotype, Professor J. Gleister began making daguerreotypes in Lviv. In Kiev the first daguerreotype portraits were made in December 1844 or in early 1845 by a Prussian, K. Shchodrovitsky. In 1858 in Odessa, Y. Mihursky, a graduate of the Richelieu Lyceum and a member of the Parisian photographic society, tried to form a society of amateur photographers but was unable to do so because of the opposition of Governor-General A. Stroganov. In 1863, however, he managed to establish an institute of photography, where he taught the theory and practice of the art. In 1859 O. Pokorsky-Zhoravko, a noble from Mglin, Chernihiv gubernia, and the Kievan photographer Chekhovych tried unsuccessfully to launch a

photography journal in Kiev. In 1852–3 the Englishman J. Bourne was invited to photograph the new bridge in Kiev. The 13 large prints he produced were the first calotypes made in Kiev. L. Plakhov, a graduate of the St Petersburg Academy of Arts, worked in various cities in Ukraine with a camera obscura. The English photographer R. Fenton documented the Crimean War in 1855. O. Ivanov from Kharkiv captured images of the Russian-Turkish War in the Balkans in 1877–8 and compiled an album of nearly 170 photos. The Odessa photographer M. Raul took many photos of daily life in Kiev, Poltava, Chernihiv, and Katerynoslav gubernias throughout the 1870s and received awards at the 1875 Paris Geographic Exhibition and the 1878 World Exposition. Nineteenth-century portrait photographers in Kiev included I. Hudovsky (three portraits of T. Shevchenko in 1859), V. Vysotsky, Y. Kordysh, and F. de Mezer; H. Chuhaievych specialized in urban scenes. Y. Khmylevsky from Poltava left a substantial collection of photos of the folkways of the Poltava region in the 1880s and 1890s, an album entitled *Gogol' na rodine* ([N.] Gogol in His Homeland, 1902), a collection of photos taken at the unveiling of the I. Kotliarevsky monument in Poltava in 1903, and a large series of photos of the Poltava Zemstvo building (1908–9). Ethnographic albums were also produced by Kh. Parfenenko. A. *Fedetsky, the first filmmaker and tricolor photographer in Ukraine, worked in Kharkiv from 1884 to 1902.

The first commercial photography studios in Ukraine were established in the early 1870s in Balta, Berdychiv, Bila Tserkva, Kamianets-Podilskyi, Korsun, Lypovets, Skvyra, Uman, Vinnytsia, Yampil, and other Ukrainian towns. On the eve of the First World War there were approx 70 commercial studios, 40 of them in Odessa, and 6 photographic-equipment stores in Kiev.

At the end of the 19th century, technological innovations facilitated the growth of photographic arts. In 1891 the Odessa Photographic Society (headed by M. Balikhov) was formed. By 1900 it had 192 members. It issued the periodicals *Vestnik Odesskogo fotograficheskogo obshchestva* (1912–14) and *Russkii fotograficheskii vestnik* (1915–16). Photography sections of branches of the Russian Technical Society were formed in Kharkiv (1891), Odessa (1897), and Kiev (1899). The Daguerre Society (1901–17) was established in Kiev by M. Bobyr, the author of *Khudozhnia fotografiia* (Art Photography, 1907), and others. In 1906–12 its president was M. *Petrov; he later lectured at the Kiev State Institute of Art and Institute of Cinematography.

The only school of photography in the Russian Empire, the Art and Craft Printing Workshop, was opened in Kiev in 1903. It was founded by V. *Kulzhenko. It was also in Kiev that the first international photo exhibition in the empire took place, in December 1908. It displayed over 500 works, including examples of X-ray photography. Kiev was also the venue for the Second Congress of Russian Photographers (1908) and an international salon of art photography (1911). Technical advances were made by V. Favorsky, a pioneer in microphotography, and in the 1910s the Kiev journal *Iskusstvo i pechatnoe delo* documented developments in color photography.

Ukrainians who wrote theoretical pieces on art photography included M. *Biliashivsky and I. *Trush. In 1914 Biliashivsky proposed that a systematic photographic census of Kiev be conducted. Articles on photography were published in Ukrainian periodicals (eg, H. Kovalenko's

on domestic photography in *Literaturno-naukovyj vistnyk* [1899]), and photos of individuals were used as illustrations in works such as O. Shalatska's *Tajemnytsi mista Kyieva* (The Secrets of Kiev, 1904). Trush wrote about the relationship between painting and photography in 1905.

In Austrian-ruled Western Ukraine, Polish organizations, such as the Club of Photographic Art Amateurs in Lviv (1891–1903) and the Lviv Photographic Society (1903–14, 1924–39), were founded in Lviv, and a German Camera Club was created in Chernivtsi. Photography periodicals appeared in Lviv – *Przegląd Fotograficzny* (1895), *Kronika Fotograficzna* (1898–9), *Wiadomości Fotograficzne* (1903–6) and *Miesięcznik Fotograficzny* (1908–11). The pioneers of photography in Galicia were A. Karpiuk, V. *Shukhevych, and M. Petriv in Lviv; S. Dmokhovsky and Ye. Liubovych in Peremyshl; and F. Velychko in Stanyslaviv. Liubovych organized a photography club at the Peremyshl gymnasium in 1911. In 1912 the archeologist Ya. Pasternak called on photographers to document the ethnography and architecture (particularly wooden churches) of Galicia. At a combat photography exhibition held in Vienna in 1916, the Ukrainian Sich Riflemen's pavilion displayed photos of I. *Ivanets, M. *Uhryn-Bezhrishny, and others. In September 1918 the Riflemen's exhibit was brought to the National Museum in Lviv, becoming the first Western Ukrainian photographic exhibition.

In the interwar years of Soviet Ukraine the Kiev Photographic Institute enjoyed a brief existence, and in 1922 it organized an exposition. Original literature in Ukrainian emerged, the first example of which was L. *Skrypnik's photographer's guide (1927). The photos of S. Arshenevsky, D. *Demutsky, M. Lishchynsky, D. Sotnyk, and P. Yezersky were landmarks of creative achievement, and periodicals such as *Foto-kino* (Kharkiv 1922–3) and *Foto – sotsbudivnytstvu* (Kharkiv 1928–34) popularized the art.

During the terror of the 1930s, Soviet Ukrainian photography suffered the same tragic fate as other branches of Ukrainian culture. The first All-Ukrainian Exhibition of Photographic Art was held in 1936, but its catalog was suppressed soon afterward. The first all-Union photography exhibit was brought to Kiev in 1938.

Photography continued to develop in interwar Western Ukraine and in the Ukrainian émigré community. In October 1920 a photography circle headed by O. Balytsky was established in the Ukrainian internment camp in Liberec, Bohemia, and it held a show within a year. In November 1930 the first general meeting of the Ukrainian Photographic Society was held in Lviv, and S. Dmokhovsky was chosen to head it. The society, which had 216 members in 1936, held regular exhibitions and published illustrated catalogs of works by Yu. Dorosh, R. Myrovych, O. *Mokh, and D. Figol and the journal *Svitlo i tin'* (1933–9), edited by S. Shchurat and O. Mokh. The Polish journals *Miesięcznik Fotograficzny* (1925–31), *Kamera Polska* (1932–3), and *Przegląd Fotograficzny* (1935–9) were also published in Lviv, and the second (1928) and sixth (1932) international photographic salons were held there. The Ukrainians L. Yanushevych and Ya. Shalabavka had commercial studios in Lviv.

In 1957 a photographers' section of the Union of Journalists of Ukraine was formed. The more prominent photojournalists include Ya. Davydzon, M. Kozlovsky, M. Melnyk, and H. Uhrynovych. Professional portrait

First issue of the new Ukrainian photography magazine, *Svitlo i tin'* (1991)

studios have been under the supervision of the Ministry of Consumer Services. Until the late 1980s the activity of amateur clubs was limited by government policy and the lack of equipment. Nonetheless, talented photo artists such as R. Baran, Ye. Derlemenko, I. Kostin (who documented the Chernobyl nuclear disaster), I. Kropyvnytsky, S. Marchenko, and V. Lysenko have left their mark. I. Honchar has amassed a large collection of ethnographic photographs from all parts of Ukraine. The first museum of photography in Ukraine was opened as a division of the *National Museum in Lviv.

S. Bilokin

Physical anthropology. The study of the physical characteristics of the human race with respect to origin, development, classification, and distribution. The subject can be subdivided into somatology and paleontology. The first describes and measures discrete bodily members, skin color, height and weight, blood type, and the structure of the internal organs (see *Races). The second deals with early human history on the basis of archeological evidence. The earliest information about the physical characteristics of Ukraine's inhabitants is in Herodotus' and Hippocrates' accounts of the Scythians. Medieval Byzantine and Arab authors, such as Procopius, Zacharias Rhetor, Ibn Dast or Ibn Rosta, and Ibn Fadlan, provided further data on Ukraine's population. Descriptions of Ukrainians are also found in the works of 17th- and 18th-century travelers. From impressionistic descriptions of the population of Kievan Rus' two anthropological types can be distinguished. The princes, knights, and merchants possessed mostly Nordic traits, whereas the general population consisted of short-headed Trypilians (or Armenoids).

According to archeological excavations the following anthropological types once inhabited Ukrainian territories: Neanderthal (Upper to Middle Paleolithic period), Mediterranean (Middle Paleolithic period), Cro-Magnon (Upper Paleolithic period), Lapponoid (Upper to late Paleolithic period), Southern Mediterranean with Negroid features (late Paleolithic to early Mesolithic period), Nordic Cro-Magnon (Neolithic and Eneolithic period), Armenoid (beginning of the Bronze Age), and Mediterranean (Bronze Age). The intermingling of these chief types led to the development of the East European or Sub-Nordic type (from the Lapponoid and Nordic types), the Adriatic or Dinaric type (from the Nordic and Armenoid types), and the Alpine type (from the Sub-Nordic and Dinaric types). The inhabitants of protohistoric and early

historic Ukraine consisted of three main strata: people of the Trypilian culture, chiefly Armenoid in type; the Iranian (Sakian) people, chiefly Nordic and Mediterranean in type; and the Slavs, Nordic-Armenoid in type.

According to F. Vovk's findings at the beginning of the 20th century, the population of Ukraine can be divided into three anthropological belts: (1) the northern belt (southern Kursk, Chernihiv, northern Kiev, northern Volhynia, and Kholm regions); (2) the middle belt (southern Voronezh, Kharkiv, Poltava, and Kiev regions, northern Podilia, southern Volhynia, and eastern Galicia [excluding the Hutsul and Boiko regions]); and (3) the southern belt (Bačka [Yugoslavia], Transcarpathia, the southern Boiko and Hutsul regions, southern Podilia, and the Kherson, Zaporizhia, Tavriia, and Kuban regions). Most Ukrainians of the northern belt are of medium height, with fairly light hair and eyes, semiround heads with high foreheads, medium faces, and fairly wide noses, often snubbed. Ukrainians of the middle belt are mostly above medium height, with darker hair and eyes, round heads, high foreheads, medium-broad faces, narrow and straight noses. Most Ukrainians of the southern belt are tall with even darker hair and eyes, round heads, high foreheads, medium-broad and elongated faces, and narrow, mostly straight but sometimes curved and aquiline, noses.

| Racial types | Territories |
|--|---|
| Adriatic; East European, dark and light | Regions of Kharkiv, southwestern Poltava, southwestern and north-eastern Galicia; south and north Boiko region, Lemko region, Kholm region |
| Adriatic with an admixture of Armenoid Nordic | Hutsul region; north Podilia, Bačka, west Boiko, Kherson, and Odessa regions |
| Nordic with an admixture of Adriatic | Northern Kiev, Volhynia, Kuban |
| Adriatic, Mediterranean, dark Eastern European | Regions of Chernihiv, southern Voronezh, northeastern Poltava, central and southern Kiev, Katerynoslav, southern Podilia, central Galicia; central part of the Boiko region |

In R. *Yendyk's findings this classification is modified and replaced by four territorial areas (see table). V. Diachenko's data (1965) suggest four central and one peripheral anthropological area.

Physical education (PE). The system of organized instruction in hygiene, calisthenics, and organized sports.

Western Ukraine to 1914. Until the early 20th century,

PE in Western Ukraine left much to be desired. For adults it was limited to sporadic training in hunting, swimming, rowing, skating, sledding, and fencing (training in the last was given by the Sich and Rus' student societies in Vienna and Graz, respectively). In elementary and secondary schools PE was usually taught by poorly qualified instructors. Instruction improved somewhat in the years immediately preceding the First World War, thanks to the efforts of the Sokil society and individual promoters of PE, such as I. Bobersky. At first, one to two school hours per week was devoted to PE. Eventually, extracurricular groups for tennis, track-and-field sports, hiking, swimming, skiing, sledding, and skating were organized. PE for girls and women, which had been neglected previously, began receiving some attention.

In 1887, using Czech examples, V. Lavrivsky drafted the first charter for a Ukrainian gymnastics society in Lviv. The Austrian authorities, however, did not permit a Ukrainian PE society to be set up until 1894. That year the *Sokil society was established in Lviv, and branches were soon founded throughout Galicia. The first Ukrainian exercise manual, by O. Popovych, was published in Chernivtsi in 1889; it was followed by I. Bobersky's books on games (2 vols, 1904-5) and soccer (1906), T. Franko's book on tennis, and O. Tysovsky's handbook for the Plast Ukrainian Youth Association (1913). During Bobersky's presidency (1908-14) the central Sokil society in Lviv purchased its own stadium and trained many PE instructors and teachers. Paramilitary riflemen's units were organized and trained in 1912-14 by S. Goruk as part of the program of the Sokil societies in Lviv, Drohobych, and other towns; they formed the nucleus of the *Ukrainian Sich Riflemen during the First World War.

PE in Galicia was also promoted by the *Sich society, founded by K. Trylovsky in 1900. Its branches in Galicia and Bukovyna operated independently until 1912, when they were integrated into the Ukrainian Sich Union.

Ukraine under tsarist rule. As in Western Ukraine, PE in Russian-ruled Ukraine was sporadic and amateurish. In the early 20th century, interest in PE increased with the introduction of a Sokil-style gymnastics program and track-and-field meets as part of the secondary-school curriculum, as well as of the scouting movement. There was, however, no organized Ukrainian PE movement before the 1917 Revolution, although a number of sports clubs were established in Kiev, Odessa, and other cities. During the First World War, gymnastics in the secondary schools was replaced by military drills.

During the revolutionary period of 1917-20, PE continued to be part of the secondary-school curriculum. Sports activities were organized by various Ukrainian youth and school clubs and by the first Ukrainian boy scout troops that appeared in Kiev, Chernihiv, Bila Tserkva, and other cities. The *Free Cossack movement also promoted PE among its ranks. As a result, semimilitary, semiathletic youth detachments fought on the side of the UNR in many parts of Ukraine.

Western Ukraine, 1918-44. Under Polish, Czechoslovak, and Rumanian rule, the development of Ukrainian PE organizations was to some extent obstructed by the authorities. In the Polish-ruled territories, PE in the schools improved considerably over what it had been under pre-war Austrian rule. Besides calisthenics based on the Swedish, Danish, and German systems, the school pro-

grams included outdoor activities and games. Extracurricular sports, hiking, and camping activities were organized by Ukrainian groups such as the Plast Ukrainian Youth Association, branches of the revived Sokil and Sich societies, local branches of the Orly Catholic Association of Ukrainian Youth and the Union of Ukrainian Progressive Youth, and, after the Sich society was banned in 1924, the *Luh society. Many new Ukrainian sports societies were founded. In 1925 the sports section of Sokil central in Lviv, together with various sports societies, set up a central coordinating and planning agency, the *Ukrainian Sports Union (USS), which organized soccer tournaments, regional and provincial athletic competitions, PE courses, and training camps and introduced a general test culminating in a physical competence badge.

During the Second World War, PE in the German-occupied Generalgouvernement was co-ordinated by the Office of Physical Education of the Department for Youth Care of the Ukrainian Central Committee in Cracow. It organized a network of new clubs in the Lemko and Kholm regions. After the Germans occupied most of Ukraine, PE was able to develop only in Western Ukraine. In 1943 there were 124 PE societies there (including 22 in the Ternopil area, 16 in the Lviv region, 16 in the Stanyslaviv region, 13 in the Stryi region, 11 in the Peremyshl region, and 5 in the Kholm region) and 177 PE groups organized by Ukrainian educational societies, with a total membership of 11,000.

Soviet Ukraine. PE in Soviet Ukraine was part of the all-Soviet PE system. In the 1920s all existing sports organizations were quickly dissolved, and many of their leaders were persecuted. For most of the Soviet period, PE served the interests of the totalitarian state and was organized and controlled by it to prepare the masses for 'highly productive socialist labor' and for the defense of Soviet communism. All PE organizations and sports associations outside the school system created and controlled by the Communist Youth League or trade unions, themselves strictly subordinated to the Party and state. In 1918–19 the first PE teaching institutions were established, and PE became part of military training and the school curriculum. In the early 1920s special councils assumed control over PE on the local level. In 1930 centralized state control of PE in the USSR became official with the creation of the All-Union Council on Physical Culture, to which the existing Higher Council on Physical Culture of Ukraine was subordinated. In 1936 the All-Union Council was reorganized into the All-Union Committee on Physical Culture and Sports of the USSR Council of People's Commissars. Under this system all Komsomol and workers' sports organizations at educational institutions and industrial plants were subordinated to oblast councils of sports associations, and these are subordinated to councils of the central committees of the Komsomol or trade unions.

From 1931 Soviet PE was based on the so-called GTO (Ready for Labor and Defense of the USSR) mass fitness program introduced by the Komsomol. The revised program (1972) had five levels: (1) for children aged 10–13, (2) for adolescents aged 14–15, (3) for adolescents aged 16–18, (4) for men aged 19–39 and women 19–34, and (5) for men aged 40–60 and women 35–55. At each level certain physical testing was compulsory. All young people were taught and participated in cross-country running and skiing, in running obstacle courses, swimming, and gymnastics; other sports were elective. Testing reflected the

purpose of the program – to raise labor productivity and military readiness. According to official figures, approx 6.8 million people in Ukraine qualified for the GTO badge in 1982.

PE in nursery and elementary schools consisted of an approved program of lessons, exercises, and games. In elementary schools students were taught calisthenics and simple active games and were gradually introduced to gymnastics, track-and-field sports, swimming, skiing, and team sports. In Ukraine there were also over 800 'children's and youth sports schools,' at which more than 321,000 7- to 14-year-old children received preliminary training for future careers in sports. Selected for their athletic talents, the children usually specialized in one, two, or three of 43 sports. Those who went on received curricular and extracurricular training in sports proficiency schools (ages 16–18) and higher sports proficiency schools (ages 18 and over). Exceptionally promising children (ages 7–18) were sent to republican sports boarding schools (26 in the USSR), where they were trained to compete in the Olympic Games.

As sports contacts and competitions with the West increased after the Second World War, Soviet PE and sports training intensified. In 1959 the Committee on Physical Culture and Sports was replaced by the Union of Sports Societies and Organizations. Oblast, municipal, raion, and local PE councils supervised all existing *sports societies and clubs and physical-culture collectives at plants, factories, and collective and state farms. In 1981 there were in Ukraine approx 150,000 professional PE workers (65,000 of them with higher education) and 3,000 trainers, 2,500 registered referees, and over 315,000 GTO instructors. In 1987, training and sports facilities in the republic included 112,000 playing courts and fields, 13,600 gyms, 354 swimming pools, 600 skiing bases, 8,000 rifle ranges, 894 stadia, a swimming center in Kharkiv, and a rowing center in Kherson. PE instructors, trainers, referees, and coaches were educated at specialized secondary PE *tekhnikums* in Donetsk, Dniprodzerzhynske, and Ivano-Frankivske; at PE departments of the Lutske, Mykolaiv, Odessa, Ternopil, Kharkiv, Cherkasy, Chernihiv, Luhanske, Vinnytsia, Zaporizhia, Kamianets-Podilskyi, and Kirovohrad pedagogical institutes; and at the *Kiev, *Lviv, and Dnipropetrovsk institutes of physical culture. Sports medicine was taught at the Kiev Scientific Research Institute of the Medical Problems of Physical Culture (est 1969). Most recently, the Sokil society was revived in Lviv (1990).

Abroad. The Ukrainian interwar émigrés in Czechoslovakia had the best organized PE activities. These began in the internment camps and were continued by the Ukrainian Sokil and Sich unions abroad. PE was also part of the activities of the Sokil and Sich societies in the United States, Canada, and Argentina.

After the Second World War, refugees in Germany founded the *Ukrainian Council for Physical Culture in Augsburg (November 1945). Led by I. Lukiianenko, V. Blavatsky, I. Krasnyk, and S. Kikta, it introduced a physical fitness badge; organized skiing, volleyball, and basketball courses and a school for PE instructors in Mittenwald in 1947; and arranged soccer games and athletic competitions among sports clubs in the DP camps. PE among the postwar Ukrainian immigrants in North America, South America, and Australia has been part of the activities of Plast, the Ukrainian Youth Association, and the Ukrainian Democratic Youth Association. Competitions have been

sponsored by the *Ukrainian Sports Federation of the United States and Canada.

Physical-Mechanical Institute of the Academy of Sciences of Ukraine (Fizyko-mekhanichniy instytut ANU)

A research institute in Lviv, founded in 1951 as the Institute of Mechanical Engineering and Automation and renamed in 1964. It has 21 departments, a special designs office, an experimental construction plant, and a graduate program. Its chief areas of research are the physicochemical mechanics of the brittle destruction of construction materials, metal corrosion and its prevention, the theory of the perception and processing of information for the purpose of simple image searching and recognition, the design of special systems and devices for investigating submarine and subterranean depths, nondestructive tests for the reliability of materials, and the automation of scientific experimentation. Among its notable scientists are H. Karpenko, K. Karandeev, V. Mykhailovsky, and H. Savin. The institute publishes the journal *Fiziko-khimicheskaiia mekhanika materialov* and the collection *Otbor i pereдача informatsii*, both in Russian.

Physical-Technical Institute of the Academy of Sciences of Ukraine (Fizychno-tekhnichnyi instytut ANU)

A research institute in Kharkiv established in 1928. Until 1938 it was called the Ukrainian Physical-Technical Institute and was under the jurisdiction of the Supreme Council of the National Economy and the People's Commissariat of Heavy Industry. It now has approx 2,500 employees in 14 departments; sections devoted to physical materials science, nuclear physics, and plasma physics; a technological design office; and an experimental plant. Its main fields of research are the behavior of electrons in the normal and superconducting state, methods of obtaining superpure metals, solid-state physics, and controlled nuclear fusion. The institute's accomplishments include the first induced nuclear transmutation in the USSR (1932), the production of liquid hydrogen (1931) and helium (1932), and the construction of the first three-co-ordinate radiolocator in the USSR (1938) and of the torsatron (1970). The directors of the institute have been I. Obreimov (1928–32), A. Leipunsky (1932–7), O. Shpetny (1937–44), K. Synelnykov (1944–65), V. Ivanov (1965–80), and V. Zelensky (since 1980). Many other noted scientists have worked at the institute, including L. Landau, G. Latyshev, L. Vereshchagin, L. Shubnikov, A. Walter, O. Akhiezer, V. Bariakhtar, B. Lazarev, B. Verkin, O. Halkin, A. Prykhotko, V. Tolok, Ye. Borovyk, and O. Sytenko (see also *Physics).

L. Onyshkevych

Physics. Originally 'physics' referred to the study of all aspects of nature. In the mid-19th century it was still synonymous with 'natural philosophy.' The earliest extant Ukrainian source on natural philosophy is the retelling of Aristotelian ideas in the *Izbornik of Sviatoslav* (1073). In Ukraine attention was first devoted to quantitative problems in the Protestant schools, which appeared at the end of the 16th century (eg. Berestechko in Volhynia and Khmilnyk in Podilia). They produced mathematical and technical manuals for artisans and merchants, handwritten in the Ukrainian vernacular. Arithmetic and astronomy were taught in the *Ostrih Academy (est ca 1576), the first institution of higher learning in Ukraine. Considerable attention was devoted to the natural sciences in the *Kievan Mohyla Academy (est 1632). T. *Prokopovych's lectures on natural philosophy, physics, and mathematics at the academy were lucid treatments of much that was known on those subjects at the time.

From the 1730s, natural philosophy was taught at *Kharkiv College; in 1765 physics-related subjects, such as structural engineering, geodesy, and artillery and ballistics, became part of the curriculum; and in 1795, after the college merged with the Kharkiv Central Public College, physics was taught as a separate subject.

In the early 19th century, Kharkiv University was the center of physics research in Ukraine. The first professor of physics there was A. *Stojkovič (1805–13). T. *Osipovsky studied atmospheric optics and argued against the Kantian concept of space and time. His former student M. *Ostrohradsky was the first Ukrainian to contribute to the development of physics and mathematics on the international level. He copostulated the Gauss-Ostrohradsky theorem on the transformation of a volume integral into a surface integral, one of the cornerstones of continuum mechanics and electrodynamics, and solved a number of outstanding theoretical physics problems. In 1882 a Kharkiv University lecturer, M. *Pylchikov, investigating the polarization of light scattered by the atmosphere, found that blue light is scattered more than red, and corrected the prevailing view that the sky is blue because of air fluorescence. Fundamental discoveries in theoretical mechanics were made at the university in the last decade of the 19th century. By generalizing S. Kovalevska's 1889 theoretical studies of dynamical instabilities, A. *Liapunov provided a starting point for applied areas, such as radio technology and control theory. Recently, interest in his work was revived in studies of nonlinear dynamics and chaotic systems; the so-called Liapunov exponent is now an established indicator for determining if a motion is chaotic.

At Kiev University the basis for experimental physics research in Ukraine was laid by M. *Avenarius from 1866 on. Avenarius is best known for his discovery of the temperature dependence of the electromotive force of thermoelements (Avenarius's law) and for his systematic measurements of the critical temperatures of fluids. In 1884 the first chair of theoretical physics in Ukraine was founded at Kiev University. It was first held by N. *Shiller, who made important contributions to electrodynamics (highly regarded by J. Maxwell) and showed that differential equations describing the second law of thermodynamics contain an integrating factor that is a universal function of temperature. Shiller also founded the *Kiev Physics and Mathematics Society (1890); it played an important role in the development and popularization of physics in Ukraine.

Substantial contributions were also made by physicists working at the university in Odessa. There N. Umov introduced the concepts of energy density and the vector property of energy flow in 1874, and M. Pylchikov conducted the first measurements of radioactivity in Ukraine in 1900.

Soviet Ukraine

Kiev. From 1918 important work in mathematical physics, in particular on approximate integration of differential equations, was carried out in the Physical-Mathematical Division of the newly founded Ukrainian Academy of Sciences. Papers published in the 1920s in the academy's serials and subsequently abroad brought international recognition to those doing theoretical work in Ukraine. Of special significance was M. *Krylov and his student N. *Bogoliubov's (M. Boholiubov) development of modern nonlinear mechanics. Subsequently, Bogoliubov became world-renowned for his seminal contributions to statistical, nuclear, and particle physics and quantum-field theory.

The department of experimental physics organized in 1923 at the Kiev Polytechnical Institute by O. *Goldman was the first modern physics research center in Ukraine. Properties of dielectrics and semiconductors were investigated there. In 1929 the department was transformed into a multifaceted Physics Scientific Research Institute, which in 1936 was renamed the AN URSR (now ANU) *Institute of Physics. In 1927 Goldman started *Ukrains'ki fizychni zapysky* (later *Fizychni zapysky*, 1926–41), the first Ukrainian serial devoted exclusively to physics. By that time Ukrainian physics and other scientific *terminology had been largely codified. *Fizychni zapysky* contributed substantially to the further development of physics terminology. In 1926 N. Morgulis established, as part of the department of physics at Kiev University, a laboratory for physical electronics, where experimental and theoretical work was conducted on the ionization of surfaces. In 1930 the laboratory became part of the Physics Scientific Research Institute.

Ten other ANU physics-related research establishments have been based in Kiev: the *Institute of Mechanics (est 1919); the Institute of Hydromechanics (est 1926); the Main *Astronomical Observatory (est 1944); the *Institute of Electrodynamics (est 1947); the *Institute of Metal Physics (est 1955); the *Institute of Semiconductors (est 1960), where theoretical and applied laser physics is studied; the *Institute of Geophysics (est 1960), which also develops and improves geophysical methods for discovering new mineral deposits; the *Institute of Technical Thermophysics (est 1947), which directs its efforts at investigating alternative and renewable energy sources; the *Institute of Theoretical Physics (est 1966); and the *Institute for Nuclear Research (est 1970). The last two institutes have in short order acquired international renown, the former for its research in quantum-field theory (O. Parasiuk, P. Fomin, V. Miransky, O. Parasiuk, G. Zinovev), nuclear and plasma theory (O. Sytenko, I. Simenoh, V. Kharchenko, I. Yakymenko), condensed-matter physics (V. Bariakhtar, I. Dziub), and quantum biophysics (O. Davydov, V. Hachok, E. Petrov, I. Ukrainsky), and the latter for its experimental facilities and a strong theoretical group (V. Strutynsky, V. Fushchych, D. Petryna of the Institute of Mathematics). Some of the other scientists who have contributed significantly to the advance of physical knowledge are V. Stryzhak (neutron physics at Kiev University, 1960–76), M.

Brodyn, I. Horban, A. Lubchenko, M. Shpak (optical properties of solids), and S. Pekar (polaron theory).

In 1990 the founding congress of the Ukrainian Physics Society was held in Kiev; V. Bariakhtar was elected president.

Kharkiv. In many respects, scientific research output from Kharkiv has rivaled and even surpassed Kiev's. In 1919 D. Rozhansky established a radio-physics laboratory at Kharkiv University, and in 1924–5 magnetrons for radio-wave generation were developed at the Kharkiv Institute of People's Education (KhINO) by A. Slutskin and D. Shteinberg. The All-Ukrainian Association of Physicists was founded at the KhINO in 1926; headed by A. Zhelekhivsky, it also had branches in Kiev (headed by O. Goldman), Dnipropetrovske (by A. Malinovsky), and Odessa (by E. Kirilov). A department of physics was founded at the KhINO in 1927; it was directed by D. Rozhansky. In 1928 the Ukrainian Physical-Technical Institute (UPTI) was established. It developed rapidly into a major physics center for the entire USSR. The vigorous development of experimental nuclear physics at the institute was exemplified by the 400-KeV electrostatic accelerator brought on-line in 1932 and by the 3.5-MeV facility made operational in 1937 (the most powerful in Europe at the time). Soviet heavy-water production was first achieved there by A. Brodsky in 1934. Major contributions were also made to theoretical and experimental nuclear, high-energy, plasma, low-temperature, and solid-state physics. Important discoveries were made in the areas of antiferromagnetism, ideal diamagnetism of semiconductors, nuclear magnetism, dynamics of magnetic moments, interacting spin waves (magnons), and magnetoacoustic resonance.

In 1938 the UPTI was renamed the AN URSR *Physical-Technical Institute (PTI). Today substantive theoretical work on supersymmetry is conducted there (D. Volkov). Salient postwar experimental achievements are exemplified by the bringing on-line in 1964 of a 2-GeV electron accelerator (K. Synelnykov, I. Hrishaiiev), and by the breakthroughs in high-frequency and turbulent-plasma heating and in the confinement and control of thermonuclear plasma (Ya. Fainberg). Research in advanced fusion technology is pursued with the torsatron SATURN (1970, the world's first) and the Uran 1–3 series of stellarators (V. Tolok).

Notable scientists have been associated at one time or another with the UPTI and PTI. In 1932 A. Leipunsky, K. Synelnykov, A. Walter, and G. Latyshev were the first in the USSR to induce the disintegration of a stable nucleus (lithium) by means of accelerated protons. Leipunsky became internationally known in 1934 while working in England in E. Rutherford's laboratory; there he obtained the first experimental evidence for the existence of the neutrino. In 1930, while working at the UPTI, the Russian physicist V. Fock became well known in the atomic and nuclear physics community for his contribution to the Hartree-Fock self-consistent field approximation. The 1962 Nobel Prize winner L. Landau headed the UPTI theoretical department in 1932–7. His imprint has been strongly felt there to the present day. There he and his student E. Lifshits wrote the landmark ten-volume *Course of Theoretical Physics*, which is still used world-wide. I. Pomeranchuk, author of the Pomeranchuk theorem, worked at the PTI, as did O. Akhiezer and O. Sytenko, who are known for their theory of plasma fluctuations, I. Lifshits (theory

of metals), M. Asbel and E. Kahner, who discovered cyclotron resonance in metals, and V. Zelensky (materials science).

In 1960 the Physical-Technical Institute of Low Temperatures was founded as a PTI offshoot, where fundamental and applied investigations have been conducted in superconductivity, the electronic properties of solids, the molecular physics of heat exchange, macromolecules, and cryogenics (see L. *Shubnikov). Physics research has also been conducted at Kharkiv University; the Kharkiv Polytechnical (formerly Technological) Institute; the Kharkiv Astronomical Observatory; and the ANU *Institute of Radio Physics and Electronics (est 1955), known for the discovery of the 10.4-Hz acoustic laser. A recent outgrowth of the latter institute is the Radio Astronomy Institute (est 1986), directed by S. Braude. It has operated the decimeter-band radio telescope UTR-2, the largest in the world (in 1989) in the 10- to 25-MHz range, which has located some 60 new discrete decimeter sources. The UTR-2 is the main component of the new system of four decimeter-band interferometers (dubbed URAN, an acronym for Ukrainian Radiointerferometers of the ANU) with baseline lengths of between 40 and 900 km.

Lviv. Under Austrian rule, pioneering work was done at Lviv University in 1900–13 by Prof M. Smoluchowski on the theory of fluctuations. He contributed greatly to a microscopic understanding of the second law of thermodynamics. Under Polish rule, in 1935–6 L. Infeld worked there on general relativity and nonlinear electrodynamics. In the early 1960s strong spectroscopy and solid-state research groups were formed at Lviv University under the direction of A. Glauber, and Ukrainian textbooks on quantum mechanics and atomic physics were written. It was also at Lviv University that O. Vlokh discovered the phenomenon of electrogyration, and I. Stasiuk provided a theoretical explanation for it. In the 1970s and 1980s major research in statistical condensed-matter physics was carried out at the Lviv branch of the ANU Institute of Theoretical Physics (since 1991 a separate ANU institute) under the guidance of I. *Yukhnovsky. Yukhnovsky's school developed the collective-variable method for the study of electrolytes (the first microscopic treatment including all interparticle forces), was the first to model successfully second-order phase transitions in several areas of physics, and obtained significant results in the theory of metals and in crystal optics.

Physics research was also conducted by the All-Union Scientific Research Institute of the Metrology of Measuring and Control Systems (est 1977); the Lviv Astronomical Observatory (research in astrometry, solar physics, and theoretical astrophysics); the Lviv Polytechnical Institute, where the school of V. Milianchuk has worked on atomic spectroscopy, quantum electrodynamics, and general quantum-field theory; and the ANU Institute for Applied Problems in Mechanics and Mathematics (est 1978).

Odessa. As a professor (1918–22) at the Odessa Polytechnical Institute, the Soviet physicist L. Mandelstam made substantive contributions to the theory of and experiments on light scattering from crystals (Raman scattering, Brillouin-Mandelstam scattering). In 1926 a State Physics Scientific Research Institute was founded. There a group under E. Kirilov investigated photochemical and photoelectric reactions in the photographic process and obtained new and extensive data on the photoelectric effect

in semiconductors and on the luminescence of dyes and crystals. In 1933 the institute became part of Odessa University. In the late 1940s V. Fedoseev and D. Polishchuk conducted work at the university on evaporation, burning, and gas dynamics of liquid and solid fuels, which found applications in jet engines and rocket motors. Physics research is also done at the *Odessa Astronomical Observatory (est 1871), which operates five reflector and five refractor telescopes, a URAN-4 radio telescope (since 1981), and a synchronized satellite-tracking facility in co-ordination with additional observation stations in Kiev, Lviv, and Uzhhorod; the Odessa Electrotechnical Institute of Communications (est 1930); the Odessa Hydrometeorological Institute (est 1932); the Odessa Institute of Navy Engineers (est 1930); and the Odessa Technological Institute of the Refrigeration Industry (since 1970).

The Crimea. There are two important physics-related research institutions in the Crimea: the *Crimean Astrophysical Observatory (est 1945) near Bakhchesarai, with Europe's largest reflector telescope, a 22-m radio telescope, and a solar telescope (with which A. Severny discovered rapid solar pulsations), and whose research laboratories developed a solar telescope for the SALUT space laboratory and have collaborated with Canadian astrophysicists on very long baseline high-precision interferometry (ASTRON); and the ANU *Marine Hydrophysical Oceanographic Institute, based in Symferopol since 1963.

Donetske. At the ANU Physical-Technical Institute (est 1965), an offshoot of the ANU Physical-Technical Institute of Low Temperatures in Kharkiv, the main thrust of research has been in materials science (the effects of high pressures and intense magnetic fields at low temperatures on the magnetic and electronic properties of solids). O. *Halkin, director of the institute from its inception until 1982, V. Bariakhtar, and K. *Tolpyho are largely credited with establishing and maintaining the high scientific level. Among its significant achievements are the discovery of an intermediate state in ferromagnetics and the determination that the transition from fragility to plasticity constitutes a phase transition linked to the number of mobile dislocations. Applied physics research on nonlinear systems is conducted at the ANU *Institute of Applied Mathematics and Mechanics (est 1970).

Dnipropetrovske. Notable physics research dates back to G. Kurdiumov's school on phase transitions in metals at the Dnipropetrovske Physical-Technical Institute (1932–44). The ANU Institute of Technical Mechanics (est 1980) specializes in the dynamics of complex mechanical and hydromechanical systems. Of note is its research on high-speed transportation involving magnetic levitation. Dnipropetrovske University (est 1918) has an applied physics research laboratory.

Poltava. Since 1926 the Poltava Gravimetric Observatory has carried out high-precision measurement of the precession and nutation of the earth's rotational axis and of the tides of the earth's mantle and crust.

Chernivtsi. Research has been conducted at a branch of the ANU Institute of Semiconductors (interesting results on narrow-band semiconductors have been obtained by K. Tovstiyuk), at Chernivtsi University (theoretical solid-state physics), and at a branch of the Lviv-based Institute for Applied Problems in Mechanics and Mathematics.

Uzhhorod. Research in theoretical high-energy physics, axiomatic quantum-field theory (Y. Lomsadze), and ex-

perimental atomic physics (J. Zapesochny) has been carried out at Uzhhorod University and at a branch of the ANU Institute for Nuclear Research.

Serials. Physics research has been published in Ukraine mostly in VUAN and ANU serials: *Protokoly zasidan' Fizychno-matematychnoho viddilu Ukraïns'koi akademii nauk u Kyievi* (1918–19); *Dopovidi Akademii nauk Ukraïns'koi RSR, Serii 'A'* (since 1918); *Zapysky Fizychno-matematychnoho viddilu* (1923–31); *Trudy Fizychno-matematychnoho viddilu* (1923–9); *Zbirnyk prats' Instytutu tekhnichnoi mekhaniky* (1926–9); *Fizychni zapysky* (1932–41); *Physikalische Zeitschrift der Sowjetunion* (1932–8), published by the ANU Physical-Technical Institute in Kharkiv in German and English; *Visti Instytutu hidrolohii* (1938, 1940); *Visti Instytutu hidrolohii i hidrotekhniki* (1948–51, 1963); *Izvestiia Institutu gidrologii i gidrotekhniki* (1951, 1953–6, 1959–63); *Zapysky Kafedry matematychnoi fizyky* (1937–9); *Dopovidi Viddilu fizyko-khimichnykh i matematychnykh nauk* (1944); *Trudy Institutu fiziki* (1951–6); **Ukraïns'kyi fizychnyi zhurnal* (1956–78 and since 1989), *Ukraïns'kii fizicheskii zhurnal* (1978–88), *Fiziko-khimicheskaia mekhanika materialov* (since 1965), *Fizika nizkikh temperatur* (since 1975), *Visnyk Kyïvs'koho universytetu: Serii fizyky* (since 1962), *Visnyk Lvivs'koho universytetu: Serii fizyky* (since 1962), *Fizika mnogochastichnykh sistem* (since 1972), and *Fizika, khimia i mekhanika materialov* (since 1988). Starting in the 1930s Ukrainian physics periodicals came under strong government pressure to publish in Russian (see *Russification). The premier Ukrainian physics journal, *Ukraïns'kyi fizychnyi zhurnal*, which appeared in Ukrainian until 1972, had a parallel Russian edition from 1972 until 1978, and from 1978 was published in Russian only. Since 1989 this journal has published contributions in Ukrainian, Russian, and English.

Physiology. A discipline that employs anatomical, chemical, and physical means to inquire into the causes and mechanisms of the activities of all living things, particularly healthy humans. The first centers to study physiology in Ukraine were established in Kiev, Odessa, Kharkiv, and Lviv at their respective universities in the first half of the 19th century. In the second half of the 19th century departments of physiology were established at existing veterinary and agronomy institutes. Among the Ukrainian scientists active in the field of physiology were M. Biletsky, V. *Danylevsky, G. *Folbort, O. *Nahorny, Ye. *Prykhodkova, V. *Nikitin, and I. Shchelkov (in Kharkiv); V. *Bets, V. *Chahovets, O. *Bohomolets, A. *Yemchenko, A. *Walter, and D. *Vorontsov (in Kiev); and B. Babkin, P. *Spiro, and B. Verigo (in Odessa). The first journal of physiology in the Russian Empire was published by the brothers O. and V. Danylevsky in Kharkiv (1888–91).

Because of the human impact on the environment and the important question of world ecology, comparative physiology is regarded as one of the most pressing problems of our time on both medical and economic levels. The

Ukrainian Society of Physiologists, Biochemists, and Pharmacologists was founded in 1929, and split into three independent societies in 1961, including the Ukrainian Physiological Society (UFT). By 1984 the latter had 15 city chapters and 1,345 members. Physiological research in Ukraine is also conducted at the ANU *Institute of Physiology, co-ordinated by the UFT and the ANU Scientific Council for Problems of Animal and Human Physiology. Journals published in Ukraine include *Fiziologicheskii zhurnal* (since 1955) and *Neirofiziologiia*.

P. Dzul

Phytogeography. The study of the geographical distribution of plants. Like many other sciences, it developed into a formal science during the 18th century, although some elements of plant geography appeared in ancient writings. The botanical-geographical regionalization of Ukrainian flora has been studied by P. Pallas, S. Korzynsky, A. Kryshofovych, M. Maksymovych, N. Vavilov, M. Popov, M. Klokov, M. Kotov, Ye. Lavrenko, and others.

Piarists (piary). The popular name of the Order of Poor Clerics Regular of the Mother of God of the Pious Schools, a congregation of priest-teachers established in 1597 in Rome by J. Calasancius to provide free education for children. Piarists first appeared in the Polish-Lithuanian Commonwealth in 1682. They rapidly established a host of colleges, which they operated in competition with the Jesuits, particularly after the school reforms of 1754. In Polish-controlled Right-Bank Ukraine the Piarists maintained monasteries and schools in Kholm, Zolochiv, Lviv, Mezhyhiria, and other locations. The order was liquidated in Russian-controlled territories in 1832, following the Polish uprising.

Piasetsky, Andrii [Pjasec'kyj, Andrii], b 27 August 1909 in Reklunets, Zhovkva county, Galicia, d 25 November 1942 in Lviv. Forester, community figure, and an active member of Plast. A graduate in forestry engineering from the Lviv Polytechnical Institute, he was appointed inspector of forests in the Lviv archdiocese by Metropolitan A. Sheptytsky in 1935. Before the Second World War he purchased 150 ha of forests in Lozyna, near Yaniv (Horodok county), for a Ukrainian forestry research station. During the Soviet occupation he taught in the forestry department of the Lviv Polytechnical Institute (1939–41). In 1941 he was a member of the Ukrainian State Administration in Lviv. During the German occupation he published a work on the building and biological development of Ukrainian forests (1942), founded and ran a forestry institute, and acquired the Yaniv research station for it. He was arrested and shot by the Gestapo.

Piatakov, Georgii (Yurii) [Pjatakov, Georgij (Jurii)], b 6 August 1890 in Horodyshe, Cherkasy county, Kiev gubernia, d January 1937. Russian Bolshevik revolutionary

and Soviet leader. After the February Revolution Piatakov headed the Kiev Bolshevik Committee and represented it in the Central Rada. Although he opposed the Rada's separatist policies, for tactical purposes he co-operated with it and even sat on the Little Rada (August–November 1917). In September 1917 he became the chairman of the Kiev Council of Workers' Deputies, and after the Bolshevik coup he was called to Petrograd to oversee the State Bank. In April 1918, after returning to Ukraine, he became the first chairman of the Organizational Bureau of the newly founded CP(B)U and the CC secretary. To gain Ukrainian support for the Bolsheviks, he promoted, contrary to his principles, CP(B)U autonomy vis-à-vis the Russian Party. When the peasant uprising he had organized failed, Moscow loyalists (the Katerynoslav group) took control of the CP(B)U, and in September 1918 Piatakov was replaced as CC secretary. After the German retreat from Ukraine Piatakov headed the Soviet *Provisional Workers' and Peasants' Government of Ukraine (November 1918 to January 1919) and implemented some ultra-left social and economic policies. While he demanded military and political autonomy from Moscow, he waged war against the UNR Directory and an ideological struggle against the *Borotbists. In January 1919 he was replaced as head of the government by V. Lenin's supporter, Kh. Rakovsky.

From 1920 Piatakov supported L. *Trotsky's positions. As director of the mining industry in the Urals (1920) and the Donbas (1921) he restored order and production by 'militarizing' and thenceforth was considered a leading Soviet administrator and economic expert. A key figure in Soviet economic debates of the mid-1920s, Piatakov elaborated a five-year plan for capital accumulation that provided for the accelerated industrialization of Ukraine instead of the Urals.

After the defeat of the Left Opposition in 1927, Piatakov was removed from the USSR Supreme Council of the National Economy (VSNKh) and expelled from the Party. He recanted and in 1929 was readmitted into the Party and appointed chairman of the State Bank in Moscow. As a member of the VSNKh and deputy commissar of heavy industry, he was responsible for much of the industrial success of the Second Five-Year Plan. In the fall of 1936 he was arrested. At the second Moscow show trial of the 'anti-Soviet Trotskyist center' in January 1937, Piatakov 'confessed' to heading a 'Ukrainian Trotskyist center' whose goal was Ukraine's secession from the USSR. He was executed with 12 codefendants immediately after the trial.

V. Holubnychy, R. Senkus

Piatakov, Leonid [Pjatakov], b 4 October 1888 in Horodyshche, Cherkasy county, Kiev gubernia, d ca 7 January 1918 in Kiev. Bolshevik revolutionary; brother of G. *Piatakov. A graduate of the Kiev Polytechnical Institute (1908), he joined the Bolsheviks in 1915. After the February Revolution he helped organize the Red Guard in Kiev and was a member of the Kiev Bolshevik Committee, the Executive Committee of the Kiev Council of Workers' Deputies, and, briefly, the Central Rada. In December 1917 he was elected a candidate member of the Chief Committee of Social Democracy in Ukraine (the supreme Bolshevik body in Right-Bank Ukraine) and a member of the Bolshevik All-Ukrainian Central Executive Committee.

Piatnytska Church. See Good Friday, Church of.

Piatnytsky, Ihor [P'jatnyts'kyj], b 5 November 1910 in Kiev. Analytical chemist. A graduate of Kiev University (1937), he taught there and became a professor and chairman of the analytical chemistry department in 1960. He published over 80 papers on the reaction of metal complexes with oxyacids and their use in analytical chemistry, on the characterization of complexes derived from fatty acids and metal cations, and on their extractive behavior. He coauthored three textbooks on analytical chemistry, including *Analytical Chemistry of Cobalt* (English trans 1969).

Piatnytsky, Ivan [P'jatnyc'kyj], b 1856, d ? Church historian. A graduate of the St Petersburg Theological Seminary, in the 1890s he lectured at the Mahiliou Theological Academy (in Belarus) and edited the Mahiliou eparchial organ. He is the author of a history of sectarianism in the Russian Orthodox church (1884), *Ocherk istorii kievskoi mitropolii v period vremeni otdel'nogo ee sushchestvovaniia ot mitropolii moskovskoi, 1459–1686* (A Brief History of Kiev Metropolis during the Period of Its Separation from Moscow Metropolis in 1459–1686, 1891), and other works. He also edited and published the sermons of H. Konytsky (1892).

Piatnytsky, Porfyrii [P'jatnyc'kyj, Porfyrii], b 15 September 1859 in Riga, d 30 December 1940 in Kiev. Geologist. After graduating from Kharkiv University (1896) he lectured there (1903–20) and served as rector (1918–20) of the university. He worked as a geologist in Krasnodar (1920–2), Moscow (1922–6), and Leningrad (1926–32) before returning to Ukraine in 1932 to become a research associate at the Ukrainian Geological Administration and the AN USSR (now ANU) Institute of Geological Sciences (from 1938). His major research interests included Precambrian crystalline schists of Ukraine, particularly of the Kryvyi Rih Iron-ore Basin.

Piatnytsky, Serhii [P'jatnyc'kyj, Serhij], b 15 March 1905 in Kharkiv gubernia, d 2 May 1971 in Kharkiv. Silviculturist; corresponding member of the All-Union Academy of Agricultural Sciences. He graduated from the Kharkiv Agricultural Institute (1925), and from 1934 he headed the selection department at the Ukrainian Scientific Research Institute of Forest Management and Agroforest Amelioration in Kharkiv. From 1949 he was also a professor at the Kharkiv Agricultural Institute. He wrote on the theoretical foundations of agroforest amelioration, silviculture, and forest selection and genetics and developed new varieties of oak trees able to survive in a steppe environment.

Piatykhatsky [P'jatyxatky]. v-14. A city (1989 pop 21,600) and raion center in Dnipropetrovske oblast. The town arose ca 1886 as a railway junction and attained city status in 1938. It is now an industrial and communications center with railway servicing enterprises, a clothes factory, and a food industry.

Pich. See Stove.

Picheta, Volodymyr [Pičeta] (Vladimir), b 22 October 1878 in Poltava, d 23 June 1947 in Moscow. Historian and

Volodymyr Picheta

Slavist of Serbian and Ukrainian descent; full member of the Academy of Sciences of the Belorussian SSR from 1928 and of the USSR from 1946. A graduate of Moscow University (1901), he taught in secondary schools in Moscow (1901–2, 1905–10), Korostyshiv (1902–3), and Katerynoslav (1903–5) and was a member of the Katerynoslav Learned Archival Commission. He was a privatdocent at Moscow University (1910–11) and then taught at Moscow's School of Higher Courses for Women and Practical Academy of Commercial Sciences. He received his PHD in 1918.

Under Soviet rule Picheta was a lecturer and professor at Moscow University (1918–21) and the first rector of the Belarussian University in Minsk (1921–30). He was arrested by the OGPU in September 1930, tried on fabricated charges of belonging to counterrevolutionary and Belarussian bourgeois nationalist organizations, and exiled in August 1931 to Viatka. He was released in 1934 after E. Beneš, then Czechoslovakia's foreign minister, told J. Stalin he wanted to meet Picheta while he visited Moscow. Picheta then taught at two Voronezh institutes (1934–6) before returning to Moscow to become a senior associate of the USSR academy's Institute of History (1937), a professor at Moscow's university and pedagogical institute (1938), a corresponding member of the academy and chairman of the Institute of History's Sector of Slavic Studies (1939), and chairman of the department of the history of the Western and Southern Slavs at Moscow University (1943). From 1946 he was one of two deputy directors of the academy's Institute of Slavic Studies.

Picheta's works in Slavic history include a historical survey of the Slavs (1914) and monographs on Bulgaria's struggle for national unification (1915), the agrarian reform of King Sigismund II Augustus in the Lithuanian-Ruthenian state (master's and doctoral diss, 2 vols, 1917; 2nd edn 1958), Russian historiography (1922), the beginnings of industrialization and the disintegration of the serf economy in Russia (1923), peasant wars in Russia (1923), the history of Belarus (1924), the history of agriculture and land ownership in Belarus to the late 16th century (1927), principal moments in the history of Western Ukraine and western Belarus (1940), the history of Bohemia (1947), and 15th- and 16th-century Belarus and Lithuania (1961). Some of his studies were published in *Letopis' Ekaterinoslavskoi uchenoi arkhivnoi komissii*, *Ukraïns'kyi naukovi zbirnyk* (1915), *Ukraïnskaia zhizn'* (1915, 1917), and *VUAN* collections. He wrote numerous articles on the history of the Cossack period, a brochure about the 17th- to 18th-century Cossack state in Ukraine (1945), and a survey of

Ukrainian history (1947). A bibliography of his works was published in Minsk in 1978.

A. Zhukovsky

Pid markso-lenins'kym praporom. See *Prapor marksizmu-leninizmu*.

Pid praporom leninizmu (Under the Flag of Leninism). A semimonthly journal of political propaganda and agitation published by the CC CPU in Kiev in 1941 and from 1944 to 1991. Its previous names were *Na dopomohu ahitatoru* (1941) and *Bloknot ahitatora* (1944–69). A Russian-language version of the journal, *Pod znamenem leninizma*, was published from 1953. In 1980 the circulation of the Russian edition was 229,000, and of the Ukrainian edition, 230,000.

Piddubny, Hryhorii [Piddubnyj, Hryhorij] (real surname: Tovmachiv), b 1882 in Teteleha, Pryluka county, Poltava gubernia, d 3 November 1937 in the Solovets Islands. Journalist, writer, and political activist. He emigrated to Austria before the First World War and returned to Ukraine in 1917. After joining the Ukrainian Party of Socialist Revolutionaries he coedited its organ *Trudova respublika* (1918–19). In 1919–20 he belonged to the External Group of the Ukrainian Communist party in Vienna and contributed to its weekly *Nova doba*. Then he worked for Soviet intelligence and as a correspondent of the Kiev daily *Proletars'ka pravda*. In 1928 he returned to Ukraine, and in 1935 he was imprisoned in the Solovets Islands. His writings include political and historical works, such as *Za Radians'ku Ukraïnu* (For Soviet Ukraine, 1921) and *Bukovyna: ĭi mynule i suchasne* (Bukovyna: Past and Present, 1928), short stories, and translations of A. Chekhov, G. Sand, and H.G. Wells.

Ivan Piddubny

Volodymyr Pidhaietsky

Piddubny, Ivan [Piddubnyj], b 8 October 1871 in Krasenivka, Zolotonosha county, Poltava gubernia, d 8 August 1949 in Yeiske, Krasnodar krai, RSFSR. Wrestler. From 1898 he performed as a strongman and wrestler in circuses that toured the Russian Empire and, later, the USSR. In 1905–9 he won six world championships in professional wrestling. In 1926–7 he fought in the United States. In his 40-year career he did not lose a single championship fight, and he became known around the world as the 'champion of champions.' A museum in his honor was opened in Yeiske in 1971.

Piddubyyk-Sushchevsky, Petro [Piddubyyk-Suščevs'kyj], b 1756 in the Chernihiv region, d 4 September 1811 in Chernihiv. Orthopedist and traumatologist. A graduate of Chernihiv College and the medico-surgical school at the St Petersburg Military Hospital, he served as an army medic and in 1788 obtained the rank of staff physician. From 1797 he worked on the Little Russia Medical Board.

Pidhaichyky Yustynovi. A multi-occupational archeological site near Pidhaichyky, Terebovlia raion, Ternopil oblast. Excavations by W. Demetriewicz in 1900 uncovered a Neolithic stone burial vault, a Trypilian settlement, a cache of Roman coins from the 1st to 2nd century, and a 4th- to 5th-century early Slavic burial ground.

Pidhaietsky, Volodymyr [Pidhajec'kyj], b 23 July 1889 in Kamianets-Podilskyi, Podilia gubernia, d 3 November 1937. Hygienist and civic leader. He was a member of the Central Rada in 1917–18, a professor of occupational hygiene at the Kiev Medical Institute (1921–30), director of the Institute of Physical Culture in Kiev, and a senior research associate of the All-Ukrainian Academy of Sciences. Accused of being a member of the *Union for the Liberation of Ukraine, he was sentenced in 1930 to eight years' confinement and three years' deprivation of personal rights. In October 1937 an NKVD tribunal sentenced him to death. The Ukrainian SSR Supreme Court rehabilitated him in 1989.

Bohdan Pidhainy

Semen Pidhainy

Pidhainy, Bohdan [Pidhajnyj], b 2 January 1906 in Polonchna, Kaminka-Strumylova county, Galicia, d 1 September 1980 in Toronto. Mechanical engineer and political and civic activist. A graduate of the Danzig Polytechnic, he joined the Ukrainian Military Organization and in the 1930s became operations chief in the home executive of the OUN in Galicia. He was sentenced in 1935 to life in prison in connection with B. *Pieracki's assassination and in 1936 to 15 years as a member of the OUN Home Executive. During the Second World War he took part in the eastward march of the OUN expeditionary groups and in the operations of the Division Galizien. Later he was interned as a POW in Rimini, and served on the executive of the OUN (Bandera faction). After emigrating to Canada in 1956, he became a member of the Political Council of the OUN Abroad and Canadian president of the Brotherhood of Former Soldiers of the First Ukrainian Division of the Ukrainian National Army.

Pidhainy, Leonyd [Pidhajnyj], b 1899 in Yabluniv, Kaniv county, Kiev gubernia, d 15 December 1950 in Kiev. Literary scholar and critic. From 1931 to 1941 he was a docent at the Kiev Institute of People's Education (Kiev University from 1934). He was first published in 1928. His monographs are *Lesia Ukraïnka* (1929), *Literaturnye komentarii k proizvedeniiam M. Kotsiubynskogo* (Literary Commentaries on the Works of M. Kotsiubynsky, 1931), *Franko i Zolia* (Franko and Zola, 1936), and *Lesia Ukraïnka* (1941).

Pidhainy, Oleh [Pidhajnyj], b 1933 in Kharkiv. Historian; son of S. *Pidhainy. He graduated from McGill University in Montreal (1962) and taught at Auburn University in Alabama. He has published works on the history of Ukraine in 1917–20, including *The Formation of the Ukrainian Republic* (1966) and *The Ukrainian Republic in the Great East-European Revolution: A Bibliography* (coeditor, 2 pts, 1971, 1975).

Pidhainy, Semen [Pidhajnyj], b 17 April 1907 in Novomynska Stanytsia, Kuban, d 14 November 1965 in Toronto. Historian, writer, civic and political activist. A graduate of the Kiev Institute of People's Education and the Kharkiv Scientific Research Institute of Material Culture, he worked at the Museum of Slobidska Ukraine and the Kharkiv Institute of People's Education and was a research associate of the All-Ukrainian Academy of Sciences. From 1933 to 1941 he was an inmate of Soviet labor camps, mostly in the Solovets Islands. He fled from the USSR in 1943 and emigrated to Canada in 1949. He was deputy secretary of the Ukrainian Revolutionary Democratic party and a member of the Ukrainian National Council. He organized and headed the *Ukrainian Association of Victims of Russian Communist Terror and the World Federation of Ukrainian Former Political Prisoners and Victims of the Soviet Regime. He wrote a number of works on Soviet terror, including *Ukraïns'ka inteligentsiia na Solovkakh* (The Ukrainian Intelligentsia in the Solovets Islands, 1947) and *Nedostriiliani* (Those Left Unshot, 2 vols, 1949; Eng trans *Islands of Death* 1953), and edited *The Black Deeds of the Kremlin: A White Book* (2 vols, 1953). He also published the *New Review*.

Pidhaitsi [Pidhajci]. IV-6. A city (1973 pop 3,277) on the Koropets River in Berezhany raion, Ternopil oblast. The town is first mentioned in historical sources in 1463. It was granted the rights of Magdeburg law in 1539. When Podilia was annexed by Poland, the town became part of Halych county in Rus' voivodeship. It was owned by the Buczacki and then the Potocki magnate family. In the 17th century it was the site of many battles among the Cossacks, Poles, and Turks and Tatars. The Tatars destroyed Pidhaitsi in 1667 and again in 1675. After the partition of Poland in 1772, the town came under Austrian rule. In 1919 it was acquired by Poland, and in 1939, by the Ukrainian SSR. Today Pidhaitsi has a canning, a mixed-feed, and a metalworking factory. Its historical monuments are a Roman Catholic church built in the Renaissance style in 1634, the Dormition Church, built in the 1650s, and the remnants of a castle from the 16th and 17th centuries.

Hunczak, T. (ed). *Pidhaitsi'ka zemlia* (New York–Paris–Sydney–Toronto 1980)

Mariika Pidhirianka

Pidhirianka, Mariika [Pidhirjanka, Marijka] (pseud of Mariia Lenert), b 29 March 1881 in Bili Oslavy, Nadvirna county, Galicia, d 20 May 1963 in Rudno (now part of Lviv). Writer and teacher; wife of A. *Dombrovsky. A teacher from 1900, in the 1920s and early 1930s she taught in Transcarpathia. From 1902 until the Second World War her poetry, stories, fables, and plays appeared in Galician, Transcarpathian, and émigré periodicals and children's magazines, primers, and chrestomathies. She is the author of the poetry collections *Vidhuky dushi* (Echoes of the Soul, 1908) and *Zbirnychok virshiv dlia ditei* (A Small Collection of Verse for Children, 1920); the plays *Son na mohyli* (A Dream at the Grave, 1916), *Vertep* (1921), and *V chuzhim pir'iu* (In Someone Else's Feathers, 1922); the narrative poem *Maty-stradnytsia* (The Mother-Martyr, 1922, 1929; repr in *Duklia*, 1984, no. 1); and three books of poetry, folklore, and translated literature for schoolchildren, *Lastivochka* (The Little Swallow, 1925–7). Her Ukrainian translation of *Robinson Crusoe* (1925) was widely read in Western Ukraine. Three collections of her poetry for children appeared posthumously, in 1970, 1978, and 1981.

Pidhiriany settlement. A multi-occupational archeological site near Pidhiriany, Terebovlia raion, Ternopil oblast. Excavated by W. Demetrikiwicz (1899) and by Ya. *Pasternak (1931, 1937), it yielded the remains of a *Trypilian settlement, late *Bronze and *Iron Age burials (the latter containing Daco-Thracian pottery fragments), a 2nd- to 3rd-century AD burial ground (containing mainly cremated bodies), and a Rus' settlement.

Pidhirny, Mykola [Pidhirnyj] (Podgorny), b 18 February 1903 in Karlivka, Kostiantynohrad county, Poltava gubernia, d 11 January 1983 in Moscow. Soviet official and Party leader. A graduate of the Kiev Technological Institute of the Food Industry (1930), he worked as an engineer at sugar refineries in Ukraine and rose to the position of deputy people's commissar of the food industry in Ukraine (1939–40, 1944–6) and the USSR (1940–2). At the same time (1944–6) he oversaw the *resettlement of Ukrainians from the bo derlands retained by Poland. After serving as permanent representative of the Ukrainian Council of Ministers in Moscow (1946–50) he advanced quickly in the Party from the positions of first (1950–3) and second (1953–7) secretary of the CPU Kharkiv Oblast Committee to those of second (1953–7) and first (1957–63)

secretary of the CC CPU. In spite of Pidhirny's failure to increase farm production N. Khrushchev promoted him to the Presidium of the CC CPSU (1960–77) and to the office of secretary of the CC CPSU (1963–5). After helping L. Brezhnev to overthrow N. Khrushchev Pidhirny was removed from the center of power by being appointed chairman of the Presidium of the USSR Supreme Soviet (1965) and member of the CC CPSU Politburo (1966). In 1977 he was retired from those positions.

Pidhirny, Volodymyr [Pidhirnyj], b 4 October 1928 in Verkhnobohdanivka, Luhanske okruha. Composer and pedagogue. After graduating from the Kharkiv Conservatory (1956) he began lecturing at the Kharkiv Art Institute. His works include a symphony (1956), chamber pieces, vocal works, and songs for children.

Samiilo Pidhirsky

Pidhirsky, Samiilo [Pidhirs'kyj, Samijlo], b 20 September 1888 in Liublyntsi, Kovel county, Volhynia gubernia, d 1945. Lawyer and civic and political leader. After graduating from St Petersburg University (1914) he practiced law in Kiev and founded a society of Ukrainian lawyers. A year later he moved to Zhytomyr, where he was active in local government and was elected president of the gubernial zemstvo and the Volhynian Prosvita society. In 1917 he edited *Hromadianyn*, the first Ukrainian newspaper in Volhynia, and then *Volyns'ka hazeta* (1918–19) and *Hromada* (1920) in Lutske. A radical populist by conviction, he was a member of the Central Rada and of the Labor Congress in Kiev. In 1922 he was elected to the Polish Sejm, where he served as chairman of the Ukrainian Parliamentary Representation. He also acted as defense counsel in many political trials. At the end of the Second World War Pidhirsky was executed by the Soviets.

Pidhirtsi [Pidhirci]. IV-5. A village (1972 pop 1,400) in Zolochiv raion, Lviv oblast. It is first mentioned, as Plisnesk or Plisnysk, in chronicles in 1188 and 1233. The town's ruins – a complex of ramparts and moats covering nearly 160 ha – are the largest and finest of old Rus' fortifications to survive. In the 12th and 13th centuries Plisnesk was one of the largest cities of the Halych and Galician-Volhynian principalities and an important trade center. It was destroyed in 1241 by the Mongols, and had disappeared by the mid-15th century. The village of Pidhirtsi was founded close by. It is first mentioned in historical documents in 1432. The Polish grand hetman S. Konicpolski built a fortified Renaissance palace there in 1635–40. Besides the palace a number of architectural

Pidhirtsi palace (17th century)

monuments, including a Basilian monastery from 1659 and an Orthodox church from 1726, have been preserved.

Pidhirtsi settlement. A settlement of the 5th to 4th century BC near Pidhirtsi, Obukhiv raion, Kiev oblast. Excavations in 1950 unearthed an early *Iron Age settlement where weaving, bronze casting, and iron working were well developed. A hoard of artistic bronze objects from the same era and a cache of objects of Caucasian origin ca 9th to 8th century BC were found nearby.

Borys Pidhoretsky

Pidhoretsky, Borys [Pidhorec'kyj], b 6 April 1873 in Lubni, Poltava gubernia, d 19 February 1919 in Moscow. Composer, music critic, folklorist, pedagogue, and conductor. He graduated from the Warsaw Institute of Music, and from 1900 lived in Moscow, working as a teacher and studying composition with A. Ilinsky. In 1912 he was sent by the Russian Geographical Society's ethnomusicological commission to study folk music in Ukraine, where he collected over 120 folk songs. From 1915 he taught choral singing at the Moscow Conservatory and was a music critic for several newspapers, among them *Golos Moskvy* and *Izvestiia*. His works include the operas *Kupal'na iskra* (The Kupalo Spark, 1901) and *Poor Liza* (1916); choral pieces; and music to words of T. Shevchenko, I. Franko, and Ye. Hrebinka. His biography, by K. Cherpukhova (1968), and

a collection of his writings on musical themes (1970) were published in Kiev.

Pidhorney, Anatolii [Pidhorney, Anatolij], b 5 April 1932 in Andrushivka, Kiev oblast. Mechanics and machine scientist; corresponding member of the AN URSR (now ANU) since 1973. He studied and taught at the Kharkiv Polytechnical Institute. He headed the Kharkiv branch of the ANU Institute of Thermodynamics (from 1971) and became director of the ANU Institute for Problems of Machine Building (in 1972). His main contributions are in the fields of dynamics and the strength of machines. He has developed mathematical methods of solving nonlinear equations in the theory of plastic deformation and creep, which helped in the understanding of failure mechanisms in loaded structures. He has worked also on methods of hydrogen utilization in engines.

Pidhoroddia. A multi-occupational site near Pidhoroddia, Rohatyn raion, Ivano-Frankivske oblast. Excavated intermittently from 1882 to 1951, the site yielded the remains of a Neolithic settlement, several early Slavic settlements, a large number of Roman coins, the foundations of six medieval churches, and the remains of boyar and merchant homes, which at one time made up a suburb of princely *Halych.

Pidhorodetsky, Vasyl [Pidhorodec'kyj, Vasyl'], b 1926. Freedom fighter and political prisoner. A soldier in the UPA, he was captured in 1951 and sentenced to 25 years in Siberian labor camps. In 1955 he was one of the organizers of the prisoners' revolt in the Taishet camp, for which he was sentenced to an additional 15 years in 1956. He continued to participate in the strikes and protests of the political prisoners, and in 1975 he renounced his Soviet citizenship. In the late 1960s or early 1970s he was transferred to a camp in Perm oblast. He was released in 1981, but was once again arrested and incarcerated in 1982-3 and 1984-5.

Pidhorodne. v-16. A city (1966 pop 16,500) on the Kilchen River in Dnipropetrovske raion. The earliest settlement arose at the beginning of the 17th century through the merging of several Cossack homesteads. In 1688 a fortress was built to protect the village from Tatar raids. After the destruction of the Zaporozhian Sich (1775) the Cossacks of Pidhorodne served in the Katerynoslav Cossack Army. After its abolition in 1796, many of them emigrated to the Kuban. Today, near the suburbs of Dnipropetrovske, the city is known for its fruit growing and hothouse farming.

Pidkarpats'ka Rus' (Subcarpathian Ruthenia). A monthly journal of regional studies and pedagogy, published by the Pedagogical Society of Subcarpathian Ruthenia in Uzhhorod from 1923 to 1936. Until 1935 it was called *Podkarpatska Rus'*. The chief editors were P. Yatsko, V. Hadzhega, and A. Shtefan, but the de facto editor was I. *Pankevych. The journal published source materials on the history, literature, geography, and economics of Transcarpathia and many articles on local folklore, ethnography, and dialectology, written mostly by village teachers and students. The main contributors were Pankevych, A. Voloshyn, M. Lelekach, O. Markush, L. Demian, and I. Kondratovych.

Pidkarpatskii holos (Subcarpathian Voice). A weekly newspaper published by the Ukrainian Social Democratic party in Drohobych in 1907–11. Edited by S. Vityk, it was the first Ukrainian-language newspaper in the city. It published articles on the workers' movement in Galicia and abroad, political commentary, and valuable descriptions of the lives of workers in Drohobych. It was succeeded by the weekly *Holos Pidkarpattia* (1911–13).

Pidkomorskyi court. A type of land court in medieval Poland, the Grand Duchy of Lithuania, and Right-Bank Ukraine. *Pidkomorski* courts were based on the Second (1566) and Third (1588) *Lithuanian Statute, and functioned in Ukraine until 1654. Initially they consisted of representatives of each of the sides in a land dispute, but eventually they were reduced to a single judge (*pidkomorii*) appointed by the king. The judge could choose an assistant. They were closely connected with the *land courts and their verdicts could be appealed to the *marshal-commissioner courts. After a one-century interval these courts were re-established by Hetman K. Rozumovsky in 1763. Each regiment of the Hetman state set up its own court, consisting of the *pidkomorii*, *komornyk*, and scribe, who were elected by the landowners and regimental *starshyna*. The courts were again abolished, by Catherine II, in 1783, and again re-established in 1796. Renamed boundary courts in 1834, they continued to function until 1840.

Ivan Pidkova

Pidkova, Ivan (Moldavian: Potcoavă, Ioan), b ? , d 16 June 1578 in Lviv. Cossack otaman and Moldavian hospodar. In 1577 Pidkova and Otaman Ya. Shakh led a force of 1,200 Zaporozhian Cossacks into Turkish-controlled Moldavia, defeated the forces of Hospodar Peter Șchiopul, and occupied Iași on 29 December. There Pidkova was proclaimed the new hospodar, but soon thereafter the Cossacks were forced to retreat to Ukraine by the Turkish-Wallachian army. Pidkova was seized through treachery in Nemyriv by J. Zbaraski, the voivode of Bratslav. He was executed by order of King Stephen Báthory. His exploits were glorified in Cossack songs, and he is the hero of T. Shevchenko's narrative poem 'Ivan Pidkova' (1840) and two novels by the Rumanian writer M. Sadoveanu, *Șoimii* (The Victors, 1904) and *Nicoară Potcoavă* (1952).

Pidliashia. See Podlachia.

Pidlute [Pidljute]. A village under the jurisdiction of the Osmoloda rural council, in Rozhniativ raion, Ivano-Frankivske oblast. The village is situated on the Limnytsia River in the heart of the Gorgany Mountains. Before 1939 it was the site of a small health resort with sulfur-iodic mineral springs, the summer residence of the Greek Catholic metropolitan, and the camping grounds of the *Plast Ukrainian Youth Association.

Valerian Pidmohylny

Ivan Pidoplichko

Pidmohylny, Valerian [Pidmohyl'nyj, Valerijan], b 2 February 1901 in Chapli, Katerynoslav county, d 3 November 1937 in the Solovets Islands. Writer and translator. He graduated from high school in Katerynoslav in 1918 and then continued his studies at Kiev University. In 1921 he began working with various publishing houses and joined the editorial board of *Zhyttia i revoliutsiia*. The first of his stories to be published were 'Vania' and 'Haidamaky' (Haidamakas), which appeared in 1919 in *Sich*, a journal in Katerynoslav. He also contributed to the almanac *Vyr revoliutsii* (1921). He was a member of the literary organization Lanka (see *MARS). His published collections of stories include *Tvory* (Works, vol 1, 1920), *V epidemichnomu baratsi* (In the Quarantine Ward, 1922), *Povstantsi i ynshi opovidannia* (The Insurgents and Other Stories, 1923), *Viis'kovyi litun* (Army Pilot, 1924), and *Problema khliba* (The Problem of Bread, 1927, 1930). He also wrote the novelette *Ostap Shaptala* (1922). Pidmohylny's early works focus on various pre- and postrevolutionary realities, such as the famine of 1920–1. His most notable work is the novel *Misto* (The City, 1928), one theme of which captures the relationship between the city and the village against the backdrop of the New Economic Policy. His last published work was *Nevelychka drama* (A Little Drama), a novel about people in the 'era of socialist reconstruction,' which was serialized in *Zhyttia i revoliutsiia* in 1930 but first released separately in Paris in 1956. It appeared in translation as *A Little Touch of Drama* (trans by G.S.N. and M. Luckyj, 1972). Pidmohylny's translations, particularly those of the works of H. de Balzac, D. Diderot, A. France, G. de Maupassant, and Stendhal, significantly influenced the development of Ukrainian literature in the 1920s. Pidmohylny's early works were subjected to severe official criticism. Some were even attacked for 'romanticizing Makhnovism' (A. Khvyliia). The novel *Misto* was also denounced. Pidmohylny was expelled from his editorial position in 1930 and was arrested in 1934. He was incar-

cerated in various prisons and concentration camps until he was shot, along with many other Ukrainian writers. He was rehabilitated in 1956. *Misto* and some other stories were republished in Ukraine in 1989. A selection of stories, including some previously never published, appeared in 1991 as *Istoriia pani Ivhy* (The Story of Mrs Ivha).

B. Kravtsiv

Pidoima (Lever). An organization that represented Ukrainian landholders in the *Drohobych-Boryslav Industrial Region and negotiated royalties paid by the government for extracting oil and gas from their land. Centered in Drohobych, the organization was founded in 1917 but began to function only in 1923, when it was recognized by the Polish government. From then until 1939, Ukrainian landholders were paid almost 10 million dollars in royalties. Pidoima collected a commission of 1 percent, which it used for its own needs and to support Ukrainian cultural and social causes. The directors of the organization were V. *Ilnytsky, M. Terletsky, R. Savoika, and S. Sasyk. V. Patslavsky and then P. Ilkiv headed the advisory board.

Pidoplichko, Ivan [Pidopličko], b 2 August 1905 in Kozatske, Zvenyhorodka county, Kiev gubernia, d 20 June 1975 in Kiev. Zoologist and paleontologist; full member of the AN URSR (now ANU) from 1967. A graduate of the Leningrad Institute of Applied Zoology and Phytopathology (1927), he was a longtime associate of the ANU Institute of Zoology (department head in 1935–41 and 1947–73 and director in 1965–73), a lecturer and professor at Kiev University (1939–59), associate editor of *Ukraïns'ka radian-s'ka entsyklopediia* (The Ukrainian Soviet Encyclopedia, 1958–67), and director of the ANU Central Scientific Museum of Natural History (1973–5). Pidoplichko took part in research excavations at several late Paleolithic sites, notably in Mezhyrych and Mizyn, and wrote *Materialy do vyvchennia mynulykh faun URSR* (Materials for the Study of Past Fauna of the Ukrainian SSR, 2 vols, 1938, 1956), *Korotka istoriia Zemli* (A Short History of Earth, 1958), and *Okhorrone pryrody na Ukraïni* (Protecting Nature in Ukraine, 1958).

Pidoplichko, Mykola [Pidopličko], b 3 April 1904 in Kozatske, Zvenyhorodka county, Kiev gubernia, d 27

Mykola Pidoplichko

Yaroslav Pidstryhach

March 1975 in Kiev. Botanist and mycologist; corresponding member of the AN URSR (now ANU) from 1957. He completed study at the Kiev Institute of People's Education (1929) and then worked at the ANU Institute of Microbiology and Virology, where he founded and directed the mycology division (from 1933). He wrote over 100 works dealing with the systemization and flora of fungi, including the world's first field guide to fungi (1938), and compiled Ukrainian mycological terminology.

Pidpaly, Volodymyr [Pidpalyj], b 13 May 1936 in Lazirky, Orzhytsia raion, Poltava oblast, d 24 November 1973 in Kiev. Poet of the *shestydesiatnyky. After graduating from Kiev University (1962) he worked as an editor at the Dnipro and Radianskyi Pysmennyk publishing houses. He began publishing in 1958 and wrote the collections *Zelena hilka* (The Green Branch, 1964), *Povesinnia* (After Spring, 1964), *Trydtsiate lito* (The Thirtieth Summer, 1967), *V dorohu – za lastivkamy* (On the Way – After Swallows, 1968), and *Vyshnevyi tsvit* (Cherry Blossoms, 1970). His collections *Syni troiandy* (Blue Roses, 1979) and *Poezii* (Poems, 1982, 1986) were published posthumously.

Pidriz, Apollinariï (Podrez), b 30 November 1852 in Kupianka county, Kharkiv gubernia, d 22 November 1900 in Kharkiv. Surgeon and urologist. A graduate of Kharkiv University (1875), he was a lecturer (from 1884) and professor (from 1887) at the university. He wrote over 50 works on field surgery, heart surgery, urology, and bone and joint tuberculosis, including the first urology textbook in Russian. He was the first in the Russian Empire to perform a spleen removal operation (1887) and to remove a foreign body from the heart (1897).

Pidstryhach, Yaroslav [Pidstryhač, Jaroslav] (Podstrygach), b 25 May 1928 in Samostrily, Rivne county, Volhynia voivodeship. Mechanics scientist; full member of the AN URSR (now ANU) since 1972. He graduated from Lviv University (1951) and worked at the ANU Institute of Physical Mechanics. He headed the Lviv branch of the ANU Institute of Mathematics (1972–8) and became director of the ANU Institute of Applied Problems in Mechanics and Mathematics (in 1978). He made contributions in theoretical mechanics, particularly in the field of the thermomechanics of amorphous solids, and in hydroacoustics. His mathematical models of the deformation of solids under stress are widely used in engineering design.

Pidsudky. Members of *land courts in the 14th to 18th centuries in the Grand Duchy of Lithuania, Poland, and the Hetman state. *Pidsudky* were elected by the nobility of a county in Lithuania and Poland and by the officers of a regiment in the Hetman state, and were confirmed by the king or hetman.

Pidsukha, Oleksander [Pidsuxa], b 16 October 1918 in Nizhylovychi, Radomyshl county, Kiev gubernia, d 1990. Socialist-realist writer. He graduated from the Kharkiv Pedagogical Institute of Foreign Languages (1939), and after the Second World War he taught at the Donetsk Industrial and Kiev Pedagogical institutes. He was managing editor of the journal *Dnipro* (1953–8) and then editor in charge of novels at the Dnipro publishing house. From 1973 to 1979 he headed the *Ukraina Society for Cul-

tural Relations with Ukrainians Abroad. Between 1948 and 1980 he published many poetry collections, the novel in verse *Polis'ka trylohiia* (Polisian Trilogy, 1962), the prose collection *Vich-na-vich: Nevyhadani istorii* (Face to Face: Uncontrived Histories, 1962), the four-play collection *Komu kuiut' zozuli* (For Whom the Cuckoos Cry, 1973), and the plays *Nespodivana pisnia* (Unexpected Song, 1973), and *Zhyvy, Krutoiare* (Live, Krutoiar, 1975). A two-volume edition of his selected works was published in 1978.

Pidsusidky. See Landless peasants.

Pidtychenko, Mariia [Pidtyčenko, Marija], b 6 June 1912 in Chornohlazivka, Pavlohrad county, Katerynoslav gubernia. Pedagogue; full member of the USSR Academy of Pedagogical Sciences from 1968. After graduating from Kharkiv University in 1934, she taught at various educational institutions in Dnipropetrovske, where she held several important Party positions. In 1956–70 she was rector of and from 1970 a professor-consultant at the *Kiev Pedagogical Institute. She is the author of works dealing with the socialization of young people in a communist spirit.

Pidvolochyske or **Pidvolochysk** [Pidvoločys'ke or Pidvoločys'k]. IV-7. A town smt (1986 pop 8,300) on the Zbruch River and a raion center in Ternopil oblast. The town is on the site of an ancient settlement dating from the 3rd and 4th centuries AD. In the 15th century two villages, both called Volochyshe, arose on opposite banks of the Zbruch. One of them, mentioned in documents in 1463, was renamed Pidvolochyske in the mid-17th century. A road linking Pidvolochyske with Ternopil was built in 1786, and contributed to the growth of the local economy. After the partition of Poland in 1772, the town was acquired by Austria. In 1919–39 it was under Polish rule. Today the town has a plastics factory and food industry.

Pidvysotsky, Kost [Pidvysoc'kyj, Kost'], b 28 June 1851 in Korzhova, Pidhaitis county, Galicia, d 12 June 1904 in Medukha, Stanslaviv county, Galicia. Actor, stage director, and dramatist. He acted in O. Bachynsky's troupe (1875–81 and 1882–5) and acted and directed in the Ruska Besida Theater (1881–2, 1886–9, 1893–7, and 1900–2), in M. Kropyvnytsky's and M. Starytsky's troupes (1889–92), and in M. Yaroshenko's and O. Sukhodolsky's troupes (1898–1902). As a director Pidvysotsky first staged I. Franko's *Ukradene shchastia* (Stolen Happiness), in which he acted the part of Mykola, and staged M. Kropyvnytsky's *Nevol'nyk* (The Captive), I. Karpenko-Kary's *Burlaka* (The Vagabond), and M. Arkas's opera *Kateryna*. He wrote the comedy *Pidshyvaniets'* (The Impostor, 1888) and adaptations of J. Korzeniowski's *Pomsta hutsula* (A Hutsul's Revenge, 1893) and *Hal'ka* (1899, based on W. Wolski; music by S. Moniuszko).

Pidvysotsky, Volodymyr [Pidvysoc'kyj], b 5 June 1857 in Maksymivka, Borzna county, Chernihiv gubernia, d 4 February 1913 in St Petersburg. Pathologist, microbiologist, and endocrinologist. A graduate of Kiev University (1884), he was a professor at Kiev (1887–1900) and Odessa (1900–5) universities and directed the Institute of Experimental Medicine in St Petersburg (1905–13). His publications dealt with the microscopic structure of the pancreas,

Volodymyr Pidvysotsky

Fedir Pigido

regeneration, and the etiology of malignant tumors. He wrote one of the first textbooks in general and experimental pathology (1891–4, 1905). Among his followers were I. Savchenko, O. Bohomolets, L. Tarasevych, F. Omelchenko, D. Zabolotny, and S. Shchasny.

Pieracki, Bronisław, b 28 May 1895 at Gorlice, d 15 June 1934 in Warsaw. Polish politician and government official. One of the leading activists of the *Sanacja regime, he headed the Nonparty Bloc of Co-operation with the Government. He supported 'strong-arm' tactics with respect to national minorities and the introduction of the so-called active policy with regard to the Ukrainians. In 1930 he directed the *Pacification in Lviv and then (as minister of the interior) was responsible for similar actions in Lisko county in 1931 and in Volhynia and Polisia in 1932. In 1931 he made some concessions in economics and education to the Ukrainian minority. In June of that year he held several meetings with UNDO leaders and Metropolitan A. Sheptytsky. He was assassinated by H. Matseiko, an OUN follower. The assassination was used by the Polish government to justify the creation of a concentration camp for political prisoners at Bereza Kartuzka. The organizers of the assassination, with the exception of Matseiko, who managed to escape, were tried from September 1935 to January 1936 at the so-called Warsaw OUN Trial. A study of the trial by Z. Knysh appeared in Toronto (2 vols, 1986).

Pietros, Mount. One of the higher peaks (elevation, 2,020 m) in the Ukrainian Carpathian Mountains. It is located in the northwestern part of the Chornohora Massif. Its slopes, marked by glacial deposits, are covered with brush, forests, and upland meadows. The mountain is a popular tourist site.

Pigido, Fedir (Pihida), b 18 September 1888 in Stoiky, Kiev county, Kiev gubernia, d 11 November 1962 in Munich. Economist, publicist, and civic and political activist. After graduating from an industrial institute in 1921, he worked in various building-materials concerns in Ukraine. He became active in politics only after emigrating to Germany in 1944: in 1949 he joined the Ukrainian Revolutionary Democratic party (URDP) and was admitted to its Central Committee, and in 1953 he represented a faction of the URDP on the Ukrainian National Council. From 1957 he served as vice-president, press and information

secretary, and finance secretary in the council's executive. In addition to articles in *Ukrains'ki visti*, *Prometei*, and *Nashipozytsii* he wrote a number of books, such as *8,000,000* (1951), *The Stalin Famine* (1954), and *Materials Concerning Ukrainian-Jewish Relations during the Years of the Revolution, 1917–1921* (1956).

Pihrov, Kostiantyn (Pigrov, Konstantin), b 7 November 1876 in Malaia Dzharga, Stavropol gubernia, d 22 December 1962 in Odessa. Choir conductor and pedagogue. In 1901 he completed his studies in conducting with the St Petersburg court kapelle and began working in various cities as a pedagogue and conductor of church choirs. In 1920 he started teaching choral conducting at the school which later became the Odessa Conservatory. In 1930 he founded an independent Moldavian choral ensemble that in 1936 became the Doina Choir. His students included the conductors A. Avdiievsky, M. Hrynshyn, Ye. Dushchenko, and D. Zahretsky. He is the author of textbooks on choral conducting (1956) and solfeggio (1970).

Yerotei Pihuliak

Yustyn Pihuliak (self-portrait, 1885)

Pihuliak, Yerotei [Pihuljak, Jerotej] (Pihuleak, Hierotheus), b 1851 in Novi Mamaivtsi, Chernivtsi county, Bukovyna, d 1924 in Chernivtsi. Political and civic figure. He was one of the leaders of Bukovyna's Ukrainian populist movement and National Democratic party. As a member of the Bukovynian provincial diet (1890–1918), the Austrian parliament (1898–1918), and Bukovyna's Provincial Executive and School Council he defended the interests of the Ukrainian community and Orthodox church. Thanks to his efforts Bukovyna's Ukrainian Orthodox were granted religious equality with the Rumanians on the eve of the First World War. Pihuliak was elected the first president of the People's Home society in Chernivtsi (1884) and president of the Ruska Besida (1884) and Ruska Rada (1885) societies there. He participated in the Ukrainian takeover in Bukovyna in November 1918. He contributed articles on cultural and religious affairs to Bukovyna's Ukrainian and German press and wrote two brochures in German on the religious question (1909, 1914), as well as some poetry and prose.

Pihuliak, Yustyn [Pihuljak, Justyn], b 1845 in Novi Mamaivtsi (now Novosilka), Bukovyna, d 2 June 1919 in Chernivtsi. Painter; brother of Ye. *Pihuliak. After gradu-

ating from the Vienna Academy of Arts in 1874, he taught painting at the Higher Realschule in Chernivtsi until 1906. He did genre paintings (eg, *Hutsuls*, *Bukovynian Girl*, *Love and Fidelity*), landscapes, paintings inspired by T. Shevchenko's poems, and portraits of Yu. Fedkovych (1886), I. Vorobkevych (1887), Shevchenko (1889), and O. Kobylanska (1916).

Pike perch (*Lucioperca* or *Stizostedion*; Ukrainian: *sudak*). A genus of fish resembling the pike that belongs to the Percidae family. Pike perch have greenish gray, small-scaled bodies up to 130 cm in length; they weigh 12–20 kg. The common pike perch (*L.* or *S. lucioperca*) is the largest and most commercially important perch species in Europe; a minimum catch size has been established at 35–40 cm for the *fishing industry. In Ukraine pike perch inhabit the Black Sea and the Sea of Azov and occasionally enter the waters of the Dnieper and Buh rivers. Common pike perch are also cultivated in fisheries and stocked in natural and man-made lakes. Other species found in Ukraine are the European pike perch or zander (*L.* or *S. marina*; Ukrainian: *sudak morskyi*) and the smaller Volga pike perch (*L.* or *S. volgensis*).

Pikhno, Dmitrii [Pixno, Dmitriij], b 13 January 1853 near Chyhyryn, Kiev gubernia, d 11 August 1913 in Kiev. Economist, statistician, publisher, and politician. After graduating from Kiev University (1874) he taught economics and law there (1877–1902). He was an adviser to the Russian Ministry of Finance and a member of the State Council from 1907. As an economist he was a follower of the English classical school and a believer in market competition and the capitalist rationalization of industry and agriculture. His theories and research were summarized in several monographs and articles. From 1878 he was the publisher of the reactionary monarchist and anti-Ukrainian newspaper **Kievlianin*, the leader of the Union of the Russian People in Kiev, and a member of the **Kiev Club* of Russian Nationalists.

Pilger, Martin-Heinrich (Pilher, Fedir), b 5 June 1761 in Wetzlar, Germany, d 25 April 1828 in Kharkiv. German veterinarian. A graduate of Erlangen University (1779), he was one of the first professors of veterinary medicine in Ukraine, where he headed the veterinary department at Kharkiv University (from 1806). In 1817 he established *Ukrainskii domovod*, the first veterinary journal in the Russian Empire. He wrote *Systematisches Handbuch der theoretisch-praktischen Veterinärwissenschaft* (2 vols, 1801–3).

Pilgrimage. Travel to sacred places became fairly common among Ukrainians after the introduction of Christianity and has remained a prominent public manifestation of faith. Individual pilgrimages to the Holy Land from Ukraine were known to have taken place as early as the 11th century (eg, by Hegumen Varlaam in 1062). *Danylo, the hegumen of a Chernihiv monastery, left an account of the pilgrimage he made in 1106–8, and St Anthony of the Caves traveled to Mount Athos in the early 12th century. The shrines of Rome and the relics of St Nicholas in Bari, Italy, also attracted pilgrims from Ukraine. Such treks became so common that some churchmen even warned against the exaggeration of their spiritual significance. Pilgrimages to the Holy Land, especially

*Jerusalem, continued' despite the fall of Constantinople, and accounts of these trips were widely read in Ukraine. Particularly valuable descriptions of pilgrimages in the 18th century were left by V. *Hryhorovych-Barsky and the monk Serapion of the Motronynskiy Trinity Monastery.

The most popular pilgrimage destinations in Ukraine have been the many churches and monasteries in Kiev, particularly the *Kievan Cave Monastery. Although the Soviet authorities actively discouraged pilgrimages, ruined many shrines, and turned others into museums, factories, or administrative buildings, this repression did not stem the annual flow of thousands of pilgrims. The greatest flow of pilgrims occurred on days of particular celebration at the shrines, such as the feast of Yov Zalizo (10 September [28 August OS]) and the festival of the Dormition (28 August [15 August OS]) in Pochaiv. Pilgrimages to the *Pochaiv Monastery began in the 18th century, and it remains the second most popular destination, although it too had been subjected to depredations under Soviet rule. In Galicia the more prominent holy sites are Zaryanytsia in Podilia, Hoshiv in the Carpathian foothills, and the Krekhiv Monastery in the Buh region. Others include Chernecha Hora, near Mukachiv, in Transcarpathia, and Suceava and Khreshchatyk in Bukovyna. In the 1930s in Turkovychi, in the Kholm region, some Ukrainian Orthodox pilgrimages became national, patriotic demonstrations against Polish persecution. In recent times, particularly during the celebrations of the millennium of the Christianization of Rus'-Ukraine, many pilgrims gathered around the monument to St Volodymyr the Great in Kiev, and in Galicia large gatherings were held at the Church of the Three Saints in Hrushiv, in the Boiko region near Drohobych, where people were said to have witnessed apparitions of Mary. Emigré Ukrainians (esp Catholics) frequently travel on pilgrimages to Rome and Lourdes, France, the site of the Dormition Church for pilgrims.

Pilhuk, Ivan [Pil'huk], b 20 December 1899 in Reshetylivka, Poltava county, d 18 July 1984 in Kiev. Literary scholar and writer. From 1932 he lectured on the history of Ukrainian literature in institutions of higher learning, and from 1948 he was a professor at the Kiev Pedagogical Institute. He is the author of a series of textbooks for high schools and philological faculties. Pilhuk began to publish his work in 1929. He produced the collections of short stories *Sutsil'ni lany* (Undivided Grainfields, 1931), *Nazustrich strumovi Dnioprohesu* (Welcoming the Current of the Dnieper Hydroelectric Station, 1932), and *Atanas Kyrylo Fedorovych Peichov* (1932). His major scholarly works are on Yu. Fedkovych (1943), I. Kotliarevsky (1943, 1954), M. Kotsiubynsky (1950), T. Shevchenko (1950, 1951, 1954, 1958, 1961, 1965), S. Rudansky (1956), and M. Kropyvnytsky (1960). He is also the author of the novels *Hrozovyi ranok* (Stormy Morning, 1968) and *Povii, vitre* (Blow, Wind, 1969).

Pillipiw, Ivan. See Pylypiv, Ivan.

Piłsudski, Józef, b 5 December 1867 in Zulavas, Švenčionys county, Lithuania, d 12 May 1935 in Warsaw. Polish military leader and statesman. Before coming to power Piłsudski had advocated the dismemberment of the Russian Empire and an East-European federation of Poland, Ukraine, Lithuania, and Belarus. Although his scheme

served a dominant role for Poland, it did not receive much Polish public support. Consequently, after coming to power, Piłsudski actively backed Polish revanchist territorial claims to Western Ukraine. In April 1919 he sent J. *Haller's army into Galicia (see *Ukrainian-Polish War in Galicia). To counter the Red Army offensive against Poland he concluded the Treaty of *Warsaw with the UNR government in April 1920. After the allied Polish-UNR forces were forced to retreat from Ukraine and Belarus, he organized a successful counteroffensive in which the UNR Army played a major role (see *Ukrainian-Soviet War). Piłsudski's signing of the Peace Treaty of *Riga, which partitioned Ukraine and Belarus between Poland and Soviet Russia, put an end to his dreams of East European 'federalism.'

Resistance to the Polish occupation of Galicia and Volhynia continued after the war: in September 1921 S. Fedak, a member of the Ukrainian Military Organization, tried to assassinate Piłsudski. With the election of the new Polish president, G. Narutowicz, in December 1922, Piłsudski remained chief of the Polish General Staff. When a right-wing government took power in May 1923, he retired. Disturbed by the political and economic chaos in Poland, he came out of retirement in May 1926 to lead a military coup d'état. Thenceforth Piłsudski, as defense minister, controlled Poland, while preserving the trappings of parliamentary rule. Western Ukrainians remained suspicious of Piłsudski's new regime, supported as it was by the conservative Polish nobility in Western Ukraine. Although some of Piłsudski's closest associates (eg, T. Hołówko, P. Dunin-Borkowski) sympathized with Western Ukrainians, and his government subsidized the UNR government-in-exile, nothing was done to stem Polonization and the administration's anti-Ukrainian policies in Western Ukraine. The Ukrainian-Polish conflict grew steadily and assumed mass proportions in the 1930 *Pacification of Galicia. In September 1934 Piłsudski proposed an agreement protecting Poland's national minorities, but his foreign minister, J. Beck, would not endorse it. The political unrest that followed Piłsudski's death considerably weakened the Polish state. (See also *Poland.)

B. Budurowycz

Mariia Piltser

Piltser, Mariia [Pil'cer, Marija], b 27 November 1912 in Nyzhnia Hrabivnytsia, Transcarpathia, d 21 March 1976 in Uzhhorod. Stage actress; wife of H. Ihnatovych. She studied drama in Uzhhorod (1934–6) and then worked as an actress in the National Drama Theater in Prague (1936–7). From 1946 she was the leading actress and one of the founders of the Transcarpathian Ukrainian Music and Drama Theater in Uzhhorod.

Pinchuk, Vadym [Pinčuk], b 28 December 1930 in Poltava. Oncologist; corresponding member of the AN URSS (now ANU) since 1973. A graduate of the Kiev Medical Institute (1954), he was the first deputy director (1971, director since 1979) of the ANU Institute for Problems of Oncology. His publications deal with the mechanisms of carcinogenesis.

Pine (*Pinus*; Ukrainian: *sosna*). A genus of the family *Pinaceae*, normally tall evergreen conifers (up to 50 m high) and occasionally spreading shrubs. Pines occupy about 2.5 million ha of land in Ukraine, 34 percent of all forest land. Predominantly pine forests are widely spread in the forest and forest-steppe belts and in the mountain forest zones of Ukraine (Polisia and the Buh and Sian valleys). Pines rarely grow in the steppe zone. Of the nine species of *Pinus* found in Ukraine, the most prevalent is the common or Scots pine (*P. silvestris*). The trees live hundreds of years and require full sun and clean air. Pinewood is used for making masts, poles, interior construction lumber, furniture, plywood, and paper, and is burned as fuel. Pine yields a gum used in the production of turpentine, pitch, tar, and resin. Pine needles yield vitamin C and essential oils. Mountain pine (*P. mugo*) is used as a cover for rocky spills, to strengthen steep slopes, to prevent washouts and landslides, and to protect against flash floods. Chalk pine (*P. cretaceae*) is found along the Donets River; European cedar pine (*P. cembra*) and *juniper grow in the Carpathian Mountains; and *P. pallasiana*, *P. stankevici*, *P. zerovii*, and *P. rostellata* are common on the Crimean peninsula.

Pinot-Rudakevych, Yaroslav [Rudakevyč, Jaroslav], b 22 June 1910 in Zakomaria, Zalochiv county, Galicia. Stage actor. He began his theatrical career in Y. Stadnyk's troupe (1931–3) and then worked in the Zahrava Theater (1933–8), the Kotliarevsky Theater (1938–9), the Lesia Ukrainka Theater (1939–41), and the Lviv Opera Theater (1941–4). Having fled from Ukraine during the Second World War, he acted in the Ensemble of Ukrainian Actors in West Germany (1945–9) and, after emigrating to the United States, in the Ukrainian Theater in Philadelphia (from 1963).

Pinsk. See Pynske.

Pinzel, Johann (Pinsel, Pincel, Pintsel), b and d ? Eighteenth-century sculptor. In the 1750s and 1760s he worked in Galicia. The most famous of his surviving works are the rococo stone statues of ss Louis, Athanasius, and George on the façade of St George's Cathedral in Lviv (1759–61) and the wood statues of the side altars in the Roman Catholic church in Monastyryska (1761). The stone carvings on the façade of the Buchach town hall, the figures and bas-reliefs in the Buchach Holy Protectress Church, and the sculpted church decorations in Horodets are attributed to him. He carved several crucifixions, the most interesting

Johann Pinzel: *St Felix Holding a Child* (painted wood, 1760s)

of which was in St Martin's Roman Catholic Church in Lviv.

Pioneer Organization of Ukraine (Pionerska orhantzatsiia Ukrainy). A communist mass organization in Soviet Ukraine for children aged 10 to 15. It was an integral part of the All-Union Pioneer Organization; its direction was assigned by the CPSU to the All-Union Communist Youth League (Komsomol). The Republican Council of the All-Union Pioneer Organization formed the leadership of the organization in Ukraine, under the control of the *Communist Youth League of Ukraine.

The precursors of the Pioneer organization were youth groups established in 1920–1 by various CP(B)U branches, such as the Children's International in Kiev and the Soviet of Children's Deputies in Katerynoslav. In addition groups of Young Communist Scouts or Young Communists were organized in many cities in Ukraine. Modeled on the Boy Scouts organization, they were disbanded by a 1919 decree of the Second All-Russian Congress of the Komsomol. Because those diverse children's groups often did not address the political priorities of the communist leadership, in 1922 the Komsomol called for the fusion of all children's and youth groups into a single organization. In Ukraine the organization was called Yunyi Spartak

(Young Spartacus), and published a newspaper by that name. Under the leadership of the Komsomol its groups participated in the rebuilding of the ruined economy, in spreading atheist propaganda, and in helping the large number of orphans left homeless by the Ukrainian-Soviet War. In July 1922 the CC of the Komsomol of Ukraine approved the statute of a new children's organization, and in January 1923 it created the Central Bureau of the Communist Children's Movement, with bureaus at the gubernial level. In 1924 the Yunyi Spartak groups were renamed Young Pioneers, and a centralized organizational structure was established, with 360,000 members in Ukraine. The First All-Ukrainian Rally of Young Pioneers took place in Kharkiv in 1929. That year the organization had 550,000 members.

Following the April 1932 resolution of the CC of the All-Union Communist party, which criticized the Pioneer organizations for their tendency to merge completely with the schools, the Pioneers were given responsibility for intensifying school discipline and actively promoting industrialization and collectivization. Between 1930 and 1940, Pioneers were encouraged to co-operate with the police and the *NKVD in exposing 'enemies of the people' and reporting their parents' opposition to collectivization. Military defense training was also introduced in Pioneer groups. During the Second World War many Pioneers were active in the Soviet underground and war effort. Following the Soviet occupation of Western Ukraine in 1939, the Pioneer organization was established there. (In the 1920s and 1930s there existed a small illegal organization called the Red Pioneers of Western Ukraine. In 1938 it was dissolved by the Comintern, together with its parent organization, the *Communist Party of Western Ukraine.)

All schoolchildren of appropriate age were eligible to join their local Pioneer organization at their school or apartment building, and virtually all did so. Entrants took the Pioneer oath, observed Pioneer laws, and wore a red Pioneer neckerchief, the three corners of which represented the unity of the Pioneers, the Komsomol, and the Party. Pioneers held regular meetings to discuss organizational matters and films, books, and other subjects; they also paraded on numerous occasions, visited local places of communist or military significance, formed honorary guards at war memorials, and attended summer camps. Military rituals were widely used, especially from the 1960s, to develop positive identification with Soviet state symbols and to foster Soviet patriotism. Although Pioneers were eligible to join the Komsomol upon reaching the age of 14, a significant number of them chose not to do so. Most children, prior to joining the Pioneers, were members of the Young Octobrists (Zhovteniata), an affiliated organization for children aged seven to nine.

The Ukrainian Pioneers had their own newspapers (*Zirka and the Russian *Iunyi leninets), journals (*Pioneriia and, for younger children, *Barvinok and *Maliatko), daily radio program ('Pioneer Ukrainy'), and television program ('Vpered, orliata').

In the 1980s, Pioneer membership declined (in 1981 there were some four million members). In 1986 there were over 3.5 million Pioneers in Ukraine. That year the Pioneer organization ran 16,700 summer camps. With the erosion of communist power an increasingly large number of parents (especially in the western oblasts) refused to enroll their children in the Pioneer organization. The Pio-

neers' militarism and veneration of Soviet state symbols were criticized, and the organization was enjoined to focus more on pedagogical and humanistic goals. With the dissolution of the USSR and the disbanding of the CPU the Pioneer organizations ceased to function, although they were not officially liquidated. Many of their functions were taken over by newly formed youth organizations.

I. Bakalo, D. Goshko, B. Krawchenko

Pioneer palaces and houses (*palatsy i budynky pioneriv i shkoliariv*). Centers of extramural education and activities for schoolchildren in Soviet Ukraine. They were under the jurisdiction of the various republican ministries of education in the USSR. The first such palace was opened in Moscow in 1923-4. In Ukraine the role of the palaces was filled by children's clubs in the 1920s, and the first Pioneer palaces were opened only in 1934-5 in Kharkiv, Kiev, Poltava, and Donetske. Palaces existed in almost all urban centers. They operated under the supervision of the appropriate organs of public education, the Communist Komsomol Youth League, and the Pioneer organization. Their primary function was to support the school system, to inculcate communist values, and to prepare children for membership in the Pioneers and, eventually, the Komsomol. The Pioneer palaces organized classes in industrial arts, art, and physical education and sports and organized trips and tours. They hosted large concerts and celebrations, sporting meets, artistic competitions, and meetings with important or interesting citizens. Children's choirs, orchestras, dance and drama troupes, and the like were based at palaces. The largest Pioneer palace in Ukraine was in Kiev. In 1980 there were 804 Pioneer palaces and houses in the Ukrainian SSR, 135 more than in 1959. They served a total of 573,000 children. In 1987 there were 820 palaces and houses, which served 935,000 children.

Pioneriia (Pioneering). A monthly children's magazine published by the Communist Youth League of Ukraine and the *Pioneer Organization of Ukraine from 1931 to 1992. It succeeded the magazines *Chervoni kvity and Bil'shovycheniata. It appeared in Kharkiv until the outset of the Second World War and was renewed in March 1950 in Kiev in parallel Ukrainian and Russian editions. *Pioneriia* included articles on the lives of Pioneers and schoolchildren and on artistic and popular-science topics, games, songs, riddles, and so on. Each year one issue of the magazine was prepared by children.

Piontek, Liutsiana, b 1899 in Lubni, Poltava gubernia, d 25 September 1937. Ukrainian writer of Jewish descent; wife of I. *Kulyk. She lived in Canada with her husband (1924-7), where she took part in Ukrainian community life and belonged to the Canadian branch of the proletarian writers' group *Hart. Upon her return to Ukraine in 1927 she joined the All-Ukrainian Association of Proletarian Writers. Her first published work appeared in 1917. Her works were printed in the Kharkiv journals *Hart* and *Chervonyi shliakh*. She also published collections of verse, *Tykhym dysonansom* (In Quiet Dissonance, 1927), and of short stories, *Balaklava* (1929). She was arrested during the Stalinist terror and eventually shot.

Piotrków Trybunalski (Ukrainian: Petrykiv). A city (1989 pop 80,500) and voivodeship center in Poland. In 1921 it was the site of an internment camp for soldiers of the UNR Army. As in other internment camps, the Ukrainian administration in Piotrków organized cultural and educational programs, including literacy, foreign language, and history classes, a students' club, and a choir.

Pip Ivan. v-5. One of the highest Carpathian peaks (elevation, 2,022 m) in Ukraine, located in the southeastern part of the Chornohora mountain group. The slopes are covered with mixed-fir forest to approx 1,200 m and then with fir to approx 1,550 m. Above that point pines and green alders, brush, and subalpine vegetation can be found.

Pipeline transportation. Pipeline transportation is the most modern and economical way to transport gases, liquids, and slurries from the source to the point of processing or consumption. The transportation system consists of many complex components, such as pipelines, reservoirs, compressor stations, controls, and pumping stations. The pipeline network has three major parts: (1) the main lines, to carry the material over long distances; (2) the local lines, to collect the material and deliver it from the source to the main lines and then to distribute it from the main lines; and (3) the internal lines, to carry the material for short distances within a city, enterprise, or building. Pipeline transportation is operational all year round and is nonpolluting.

In Ukraine the first pipeline was built in 1924 to carry natural gas from Dashava to Stryi (14 km). In 1940 the line was extended to Lviv (72 km), and in 1948 to Kiev. At that time it was the longest gas pipeline in Europe. In 1951 the Dashava line reached Moscow: 851 km of it ran through Ukrainian territory. Another 477 km of pipeline were added as feeders to more than 20 Ukrainian cities along its route.

With the exploitation of the *Shebelynka gas fields in the mid-1950s, three gas lines were constructed: the first reached Kharkiv and was extended later to Briansk (RF) and joined to the Dashava-Moscow line; the second ran to Kiev via Dykanka and then to Western Ukraine; and the third ran to Dnipropetrovske, Kryvyi Rih, and Izmail. Besides those major lines, shorter lines, such as the Shebelynka-Belgorod (RF) and the Shebelynka-Slovianske, were built.

In the 1960s, additional gas pipelines were built from the Subcarpathian deposits at Stryi and Bilche-Volytsia to Minsk, Belarus (approx 665 km), and to Poland. In 1967 a main line was laid from Dolyna to Šala, Czechoslovakia. In 1966-70, 8,700 km of new gas line were built in Ukraine, including the long Yefremivka-Kiev-Kamianka-Buzka and the Dykanka-Kryvyi Rih lines.

In the 1970s two international gas lines were laid through Ukraine: the Soiuz line, originating at Orenburg and stretching to Chop, Transcarpathia oblast (annual capacity: 28 billion cu m), and the Urengoi-Uzhhorod line, carrying gas from western Siberia to several European countries (annual capacity: 32 billion cu m).

In the 1940s and 1950s, when significant petroleum deposits were discovered in western Ukraine at Dolyna, Oriv, and Bytkiv, in Poltava oblast at Hlynske, and in Chernihiv oblast at Leliaky, Hnidyntsi, and Kachanivka, oil pipelines were laid from Dolyna to Drohobych (80 km)

Basic indexes of pipeline transportation in Ukraine, 1960-86

| Category | 1960 | 1970 | 1980 | 1986 |
|---|------|-------|-------|-------|
| 1. Length of main lines (in 1,000 km) | | | | |
| Gas | 9.8 | 10.9 | 18.6 | 24.0 |
| Oil | - | 1.2 | 2.0 | 3.0 |
| 2. Output of oil and oil products (in billion Tkm)* | 0.1 | 11.2 | 54.6 | 56.5 |
| 3. Volume of oil and oil products (in million t) | 1.3 | 22.4 | 101.6 | 124.2 |
| 4. Average trip distance per t (in km) | 76.9 | 500.0 | 537.4 | 454.9 |
| 5. Share of oil pipeline output in total transportation output (percentage) | 0.05 | 1.8 | 7.0 | 6.0 |

*Tkm = tonnes per kilometer.

and from Hnidyntsi to Kremenchuk (approx 200 km) and to Michurinsk (RF). Most oil lines, including the Kremenchuk-Kiev (330 km), Kremenchuk-Cherkasy (260 km), Kherson-Rozdilna (340 km), Lysychanske-Mariupil-Berdianske (300 km), and Drohobych-Stryi (30 km) lines, transport both oil and oil products. In 1981-5 work began on the longest petroleum pipeline, from Lysychanske to the Crimean Peninsula. Several branch lines will serve the neighboring industrial centers.

All pipelines were under the control of the central government and were built according to Union plans. Some matters, such as personnel, the regulation of flow, and timetables, were in the hands of local management. In recent years pipeline transportation growth has been spectacular: output in tons per kilometer grew fivefold between 1970 and 1986. Although the volume of goods carried by pipeline is rising faster than in other modes of transportation, its share of the total volume transported is low, because relatively few substances can be transported by pipeline. Basic indexes of pipeline transportation are given in the table.

E. Bej

Piradov, Volodymyr, b 14 February 1892 in Warsaw, d 20 April 1954 in Kiev. Opera conductor. He graduated from the Tbilisi music school and from 1914 worked in the opera theaters of Tbilisi, Baku, Minsk, and Moscow. In 1936-41 he was a conductor at the Kiev Theater of Opera and Ballet, and in 1950-4 its main conductor. In 1944-7 he conducted the Kharkiv Opera. From 1950 he also served as a professor at the Kiev Conservatory. The K. Dankevych opera *Bohdan Khmel'nyts'kyi* was his last work, mounted by the Kiev Opera in 1953.

Pirogov, Nikolai, b 25 November 1810 in Moscow, d 5 December 1881 in Vyshnia, Vinnytsia county, Podilia gubernia. Russian surgeon, anatomist, educator, and civic figure; corresponding member of the Russian Academy of Sciences from 1847. A graduate of Moscow (1828) and Dorpat (1832) universities, he was a professor of surgery at the latter (1836-40) and then a professor at the hospital surgery clinic at the St Petersburg Medico-Surgical Academy (1841-56). During the Crimean War (1853-6) he made a classic description of hemorrhagic and traumatic shock and proposed a conservative management of gunshot fractures of extremities. As superintendent of the Odessa (1856-8) and Kiev (1858-61) school districts he expanded the school system, initiated the founding of Odessa University, and encouraged the opening of Sunday schools in

the Kiev district and the use of Ukrainian in them. He opposed early specialization and discrimination based on class or nationality and was released from his post because of his liberal educational policy. From 1866 he lived on his estate in Vyshnia, and there he worked as a consultant on military medicine and surgery during the Franco-Prussian (1870–1) and Russo-Turkish (1877–8) wars. He wrote on anesthesia, the foundations of bone and plastic surgery, and surgical technique. Pirogov's estate was converted into a museum in 1947, and his collected works were published in Moscow (8 vols, 1957–62). The medical institutes in Odessa and Vinnytsia were named after him.

Hryhorii Pisetsky

Pisetsky, Hryhorii [Pisec'kyj, Hryhorij], b 12 February 1907 in Korniv, Horodenka county, d 20 July 1930 near Bibrka, Galicia. Nationalist revolutionary; member of the Ukrainian Military Organization and of *Plast. He participated in an expropriation raid on a Polish postal wagon, in which he was killed. His unintended participation in the raid while wearing the Plast uniform gave Polish authorities a pretext for banning the organization in Polish-ruled Galicia.

Pishchane [Piščane]. A village in Zolotonosha raion, Cherkasy oblast near which remains of a Black Sea merchant were buried. Discovered by chance in 1960–1, the find revealed that the individual was buried in a dugout canoe and with 15 pieces of bronze. From the bronze items, many of them vessels for storing and serving wine, the burial is dated late 6th to early 5th century BC.

Pishchanka [Piščanka]. v-9. A town smt (1986 pop 6,400) and raion center in Vinnytsia oblast. It was first mentioned in historical documents in 1734, under the name Pishchana. In 1784 it was renamed. At the Second Partition of Poland in 1793, the town was acquired by Russia. It became part of Yampil county in Podilia gubernia. Until the early 19th century it was owned by the Lubomirski family. Today the town has a food industry and a limestone quarry.

Piskivka. III-10. A town smt (1986 pop 7,700) in Bori-dianka raion, Kiev oblast. Piskivka was founded at the beginning of the 17th century. In 1760 a foundry was built there. Today the town has a forest industry and a glass factory.

Kostiantyn Piskorsky: *Kozak-Mamai* (watercolor, 1920)

Piskorsky, Kostiantyn [Piskors'kyj, Kostjantyn], b 18 May 1892 in Kiev, d 9 March 1922 in Kiev. Painter; son of V. *Piskorsky. In 1919–20 he studied under H. *Narbut. His paintings (mostly watercolors) evolved from flatly rendered, simplified, natural forms to abstract compositions. They ranged from bold, stylized ornamental forms, highly reduced symbolist images, and geometricized landscapes marked by repetitions of figurative patterns (eg, *Forest Fire*, 1919) to nonrepresentational geometric paintings (eg, *White World*, 1919). His works are preserved at the Archive-Museum of Literature and Art in Kiev.

Piskorsky, Volodymyr (Vladimir) [Piskors'kyj], b 10 August 1867 in Odessa, d 16 August 1910 in Kazan, Russia. Historian; father of K. *Piskorsky. He studied at Kiev University (1896–90) under I. Luchytsky and was a privat-docent there (1893–5) and a professor of world history at the Nizhen Historical-Philological Institute (1895–1906) and Kazan University (1906–10). A specialist in the history of medieval Spain, Portugal, and Italy, he wrote monographs in Russian on the Castilian Cortes in 1188–1520 (master's thesis, 1897; Spanish trans 1930, 1977), F. Ferruccio and his era (1891), the meaning and origin of the six 'bad customs' in Catalonia (1899; Spanish trans 1929), and serfdom in medieval Catalonia (doctoral diss, 1901). He is also the coauthor of a Russian-language history of Spain and Portugal (2nd rev edn 1909).

Piskunov, Fortunat, b and d ? Ukrainian lexicographer and ethnographer of the second half of the 19th century. He compiled the 8,000-word Ukrainian-Russian *Slovnytsia ukrains'koi (abo iuhovo-rus'koi) movy* (Dictionary of the Ukrainian [or South Ruthenian] Language, 1873), and its revised, 15,000-word second edition, *Slovnyk zhyvõi narodnei, pis'mennoi i aktovõi movy rus'kykh iuhivshchan Rossiis'koi i Avstriis'ko-Vengers'koi tsesarii* (Dictionary of the Current Folk, Literary, and Chancery Language of the Ruthenian Southerners of the Russian and Austro-Hungarian Empires, 1882), much of it taken from M. Zakrevsky's 1861 dictionary of 'Little Russian' idioms. The lexicon was printed in a Cyrillic phonetic orthography but in the order of the letters in the Latin alphabet (ie, a, b, c, d, e, je, f, g [in the Latin grapheme], h, x, etc) and consisted of many archaisms, little-used dialectal words, garbled loanwords,

and even Piskunov's neologisms (eg, *bylynar* 'botanist', *vsedijma* 'history', *hojnyk* 'surgeon', *hnita* 'print'). Many of the definitions were incorrect. In their time the two editions of the dictionary were sharply criticized and rejected by B. *Hrinchenko and K. Sheikovskyy, and today they have only a historical value. Piskunov also published *Chaika* (The Seagull, 1876), an album of Ukrainian songs, dumas, tales, fables, and poems (including several of his own); a collection of articles about T. Shevchenko (1878); and a posthumous edition of Ya. Kukhareno's works (1880).

Pislanets' pravdy (Messenger of Truth). An evangelical Baptist journal published bimonthly in Łódź (1927–31) and then Rava Ruska (to 1939). It was edited by S. Bilynsky and then V. Peretiako, and in 1930 it appeared in a pressrun of 1,000 copies. The journal was renewed in the United States in 1949 as the organ of the All-Ukrainian Evangelical Baptist Fellowship. It was published in Chester, Pennsylvania (ed L. Zhabko-Potapovych), and later, from 1966, in Evanston, Illinois (ed O. Harbuziuk).

Pisniachevsky, Dmytro [Pisnjačevs'kyj], b 22 January 1898 in Podilia gubernia, d 12 January 1966 in Paris. Economist and co-operative leader. He left Ukraine in 1920 and lived as an émigré in Poland, Czechoslovakia, and France (from 1927). Until 1939 he was the representative in France of the *Audit Union of Ukrainian Co-operatives. He wrote articles on economic and co-operative topics for the Ukrainian, French, and Czech press. He also wrote the monograph *Vid kapitalizmu do kooperatyizmu* (From Capitalism to Co-operativism, 1945).

Viktor Pisniachevsky

Pisniachevsky, Viktor [Pisnjačevs'kyj], b 1883 in Podilia gubernia, d 11 October 1933 in Bratislava, Czechoslovakia. Physician, journalist, and civic leader. As a student at the Military Medical Academy in St Petersburg he took part in organizing the Ukrainian caucus in the First State Duma and in founding and editing its organ *Ridna sprava – Dums'ki visti* (1907). Under the pseudonym A. Horlenko he contributed to the Kiev daily *Rada*. While working as a physician and lecturer at Odessa University, he founded and edited the Russian-language daily *Odesskii listok* in 1917 and *Molodaia Ukraina* in 1918. In the following two years he published and edited the weekly **Volia* in Vienna. Having exhausted his financial resources he moved to Bratislava and confined himself to practicing medicine. Besides articles on political and social issues he wrote several dozen scientific articles on medicine.

Pisochyn [Pisočyn]. IV-17. A town smt (1986 pop 12,400) on the Udy River in Kharkiv raion, Kharkiv oblast. It was founded in 1732. Today it lies just outside Kharkiv on the Kharkiv–Kiev highway and railway line. Its factories produce furniture, rubber toys, and metal goods.

Pisotsky, Anatol. See Richytsky, Andrii.

Pit-Grave culture. A Copper–Bronze Age culture of the late 3rd to early 2nd millennium BC that existed along the Dnieper River, in the steppe region, in the Crimea, near the Danube Estuary, and in locations east of Ukraine (up to the Urals). Sites have been excavated since the mid-19th century, and the culture was classified by V. *Gorodtsov in the early 20th century. This culture took its name from pit graves used for burials in family or clan kurhans. Corpses were covered with red ocher and laid either in a supine position or on their sides with flexed legs. Grave goods included egg-shaped pottery containing food, stone, bone, and copper implements, weapons, and adornments. The culture's major economic occupation was animal husbandry, with agriculture, hunting, and fishing of secondary importance. Excavations at Pit-Grave sites also revealed primitive carts that were pulled by oxen and stelae bearing images of humans. The people of this culture usually lived in surface dwellings in fortified settlements. They had contacts with tribes in northern Caucasia and with Trypilian tribes in Ukraine. Significant culture sites include the *Mykhailivka settlement and *Storozhova Mohyla.

Pitschmann, Josef, b 1758 in Trieste, Italy, d 1 September 1834 in Kremianets, Volhynia gubernia. German painter. He graduated from the Vienna Academy of Art and became a member of it in 1787. After working as a portraitist in Lviv (1794–1806) he settled in Kremianets and taught painting at the lyceum there. He produced over 500 portraits, including ones of King Stanislaus II Augustus Poniatowski (ca 1792), T. Czacki, and Counts J. and F. Tarnowski, and many paintings on mythological and biblical themes, such as *Adam and Eve in Paradise*, *Sleeping Nymph and Satyr*, and *Achilles over Patroclus's Corpse*.

Pitted-Comb Pottery culture. A Neolithic archeological culture which existed in northeastern Ukraine during the mid-4th to 3rd millennium BC. It was first studied in the early 20th century by V. *Gorodtsov, M. *Rudynsky, and others. The people of this culture generally settled along river banks or terraces near lakes. Their major defining feature was slightly oval pottery decorated in the upper portions (and occasionally on the inside near the crown) with bands of pit marks and combed lines. The pottery was usually well-fired and thin-walled. The culture was adept with microlithic and macrolithic flint technology. Studies at sites have revealed a variety of implements, including axes, chisels, cutters, arrowheads, and awls. Several epochs of the culture have been identified. Scholars believe that the Pitted-Comb culture may have been a predecessor of the *Marianivka culture.

Pittsburgh. The second-largest city in Pennsylvania and the center of Allegheny County. The population in 1980 was 423,938 (metropolitan area, 2.3 million). An estimated 34,000 Ukrainians live in the greater Pittsburgh area.

The first Ukrainian immigrants to the city were four

St George's Ukrainian Catholic Church in Pittsburgh

young men from the Lemko region, who arrived in 1878. More emigrants followed in the 1880s and 1890s, most of them from the Lemko village of Hanchova and Klymkivka of Gorlice county, Galicia. The first Ukrainian church in Pittsburgh, the Ruthenian Greek Catholic Church of St John the Baptist, was established in 1891. It is now known as St John the Baptist Ukrainian Catholic Church. Other Ukrainian churches include a second St John the Baptist church (1900), St George's Ukrainian Catholic Church (1918), and St Volodymyr's Ukrainian Orthodox Church (1926), which served as a cultural and social center during the depression years. In 1903 the Ukrainian Presbyterians also established a church, which was later incorporated into the presbytery of Pittsburgh.

The earliest secular organizations to appear were mutual aid and fraternal associations. The first and oldest fraternal organization was the *Ukrainian National Association, whose Branch 53 was organized in 1888 and officially established in 1892. Today the local branches of the larger fraternal associations include four branches of the Ukrainian National Association, three branches of the *Ukrainian Fraternal Association (1911), and three branches of the *Providence Association (1912). In 1914 the Pittsburgh Ukrainians organized a fraternal benefit and insurance association, the *Ukrainian National Aid Association of America (UNAAA). The UNAAA, with its headquarters in Pittsburgh in 1921-81, publishes the newspaper *Ukrains'ke narodne slovo*. In 1910 the Ukrainian Bookstore (Knyharnia Novostei) was opened. The Ukrainian Beneficial Union was organized in the south side in 1919, and moved in 1962 to a new location, where it be-

came known as the Ukrainian Home. In 1974 the Self-Reliance Association of American Ukrainians of Western Pennsylvania was affiliated with the Ukrainian Home. The Ukrainian women of Pittsburgh are organized into the Ukrainian Women's League (Branch 27), the Ukrainian Gold Cross, and numerous church sisterhoods.

The first Ukrainian school was organized in 1895 at St John the Baptist Church. In the late 1920s a Ukrainian school was established by St Volodymyr's Ukrainian Orthodox Church. In 1933 an all-day school was instituted at St John the Baptist Church, and in the 1970s a Saturday Ukrainian heritage school was founded in the city. The first youth organization, Zaporizska Sich, originated in 1908 and endured throughout the First World War. Since 1930 the University of Pittsburgh has had an active Ukrainian Club, which initiated the monthly *Trident* (later the club became the League of Ukrainian Catholics). During the 1940s, branches of the Ukrainian Catholic Youth League and the Ukrainian Orthodox League were formed. Drama and choir ensembles of note include the Western Pennsylvania Regional Choir. Among the early newspapers to appear in Pittsburgh were *Amerikanskaia Rus'* (1909-14), *Rusyn* (1911-17), and the weekly *Soiuz* (1911-15), which in time became affiliated with the Ukrainian Presbyterian Movement in Pittsburgh and then the Ukrainian Evangelical Alliance of North America.

In the post-Second World War era approx 3,500 new immigrants came to Pittsburgh. This influx helped launch numerous organizations, including the Organization for the Defense of Four Freedoms for Ukraine, the United Ukrainian-American Organizations of Western Pennsylvania, the Ukrainian Youth Association of America, the Ukrainian-American Citizens' Club, the Ukrainian Theological Society, the Ukrainian Students' Organization of Michnovsky, the Ukrainian Beneficial Society, and the Pittsburgh Ukrainian Festival Committee.

Pittsburgh is also the home of two Ukrainian art and book stores, Dniester (1946) and Howerla (1956); two general-interest Sunday Ukrainian radio programs; and two Ukrainian religious programs (Baptist and Catholic).

A. Lushnycky

Pittsburgh metropolity. A Byzantine rite Catholic church province in the United States that primarily consists of emigrants (and their descendants) from the Transcarpathia region (Hajdudorog, Mukachiv, and Prešov eparchies) and Yugoslavia (Križevci eparchy). In general the members of the church do not consider themselves to be Ukrainian and have a weakly developed sense of their national origin, most viewing themselves as Ruthenians (Rusyns). Although initially united with Galician Ukrainians in a single Greek Catholic church in the United States (the first bishop, S. *Ortynsky), the priests and leading activists of the community demanded a separate eparchy after 1916. It was granted them by the Vatican in 1924, with the creation of the Pittsburgh exarchate under Bishop V. *Takach. The exarchate was reconstituted as an eparchy in 1963, when another eparchy centered in Passaic, New Jersey, was formed. In 1969 Pittsburgh eparchy was raised to the status of an archeparchy and metropolitan see, and a new eparchy in Parma, Ohio, was formed. Finally, in 1981 a fourth eparchy was established in Van Nuys, California.

The Pittsburgh metropolity has approx 80 priests and

153,000 faithful. Bishop Takach was succeeded by D. Ivancho (1948–54), N. Elko (1954–67), S. Kotsisko [Kocisko] (1968; from 1969 to 1991 as metropolitan), and metropolitan T. Dolinay (since 1991). Passaic eparchy, headed by Bishops S. Kotsisko (1963–8) and M. Dudyk (since 1968), has approx 115 priests and 87,000 faithful. Parma eparchy, headed by Bishops E. Mihalik (1969–84) and A. Pataki (since 1984), has approx 60 priests and 26,000 faithful. Van Nuys eparchy, headed by Bishop T. Dolinay (1981–1991), and G. Kuzma (since 1991), has approx 25 priests and 9,000 faithful.

The metropolity maintains the Cyril and Methodius Seminary in Pittsburgh to train priests for all of the eparchies. The official organ of Pittsburgh eparchy in 1924–55 was the monthly **Nebesnaia tsaritsa*. Since then the church's official paper has been the weekly **Byzantine Catholic World*, while the official paper of Passaic eparchy has been *The Eastern Catholic Life* (since 1964). Several monastic orders are active in the metropolity.

Although most of the church's adherents identify themselves as Ruthenians, Rusyns, or Carpatho-Rusyns, there are also some Hungarian and Slovak faithful. In general the church has been subjected to strong Latinizing (all parishes have adopted the Gregorian calendar) and Americanizing influences (English has been used widely in liturgies since 1964). In 1963 a special commission was established to standardize observances and to translate liturgical books into English. The Pittsburgh metropolity maintains no formal relationship with the *Ukrainian Catholic church. Dissension over the Latinization of the church, especially the introduction of compulsory celibacy, led several parishes and priests to leave the church and create the separate American Carpatho-Russian Orthodox Greek Catholic church in 1937.

Pitukhivka settlement. A village and archeological site in Ochakiv raion, Mykolaiv oblast. Excavations in 1940–50 revealed a 4th- to 3rd-century BC Scythian settlement containing fine examples of metalwork. Nearby on the Boh Estuary a 2nd-century BC to 4th-century AD town was unearthed. Its spacious houses were solidly built with stone foundations and walls of unbaked brick.

Bohdan Piurko

Piurko, Bohdan [Pjurko], b 4 July 1906 in Nemyriv, Rava Ruska county, Galicia, d 23 October 1953 in Detroit. Conductor and teacher. He studied with V. Barvinsky at the Lysenko Higher Institute of Music in Lviv, and then graduated from the Prague Conservatory in 1930. He was concertmaster at the Kiev Opera Theatre in 1930–2 and director of the Music Institute and Boian choir in Drohobych from 1933. He emigrated after the Second World War, conducted the Ukrainian Opera Ensemble in Germany in 1947–9, and then settled in Detroit, where he worked as a teacher.

Pius IX (secular name: Giovanni Maria Mastai-Ferretti), b 13 May 1792 in Senigallia, Italy, d 7 February 1878 in Rome. Pope of the Catholic church in 1846–78. During his lengthy tenure he elevated the Galician metropolitan M. *Levytsky to the rank of cardinal (1856), founded the *Congregation for Eastern Churches (1862), enacted a *concordat regulating relations between Ukrainian and Polish Catholics in Galicia, established canonical chapters (capitula) in Lviv and Peremyshl eparchies (1867), and protested the liquidation of the Ukrainian Catholic church in the Kholm and Podlachia regions by the Russian authorities (1864–75).

Pius X (secular name: Giuseppe Melchiorre Sarto), b 2 June 1835 in Riese, Italy, d 20 August 1914 in Rome. Pope of the Catholic church in 1903–14. He appointed Ukrainian bishops for the United States (1907) and Canada (1912) and granted Metropolitan A. *Sheptytsky authority over Ukrainian and Belarusian territories formerly within the jurisdiction of the Kievan metropolity (liquidated by the Russian government in 1839).

Pius XI (secular name: Ambrogio Damiano Achille Ratti), b 31 May 1857 in Desio, Italy, d 10 February 1939 in Rome. Pope of the Catholic church in 1922–39. As papal nuncio in Poland (1919–21) he intervened against Polish assaults on the Ukrainian Catholic church following the occupation of Galicia. Later he oversaw the conclusion (1925) of a concordat to regulate relations between Ukrainian and Polish Catholics in Galicia; this agreement, however, did not extend to Volhynia, and the Ukrainian hierarchy had no authority there. He also sought to shore up the Ukrainian church hierarchy in Czechoslovakia, Rumania, Canada, Brazil, and the United States. Other initiatives during his papacy included the building of *St Josaphat's Ukrainian Pontifical College in Rome (1931), the transfer of the Basilian order's administrative center to Rome and the addition of Hungary and Rumania to its jurisdictions, and the establishment of a pontifical commission for the codification of Eastern rite canon law (1935).

Pius XII (secular name: Eugenio Pacelli), b 2 March 1876 in Rome, d 9 October 1958 in Castel Gandolfo. Pope of the Catholic church in 1939–58. He issued an encyclical to the Catholic church in 1946 on the occasion of the 350th anniversary of the Church Union of Berestia in which he protested Soviet repressions against the Ukrainian Catholic church. In the postwar period he helped Ukrainian refugees and the *Division Galizien and worked to prevent their forcible repatriation to the USSR. He created metropolities for the Ukrainian Catholic church in Canada (1956)

and the United States as well as exarchates in Great Britain, Brazil, and Australia (in 1958).

Pivdendiprobudm (full name: Derzhavnyi instytut po proektuvanniu pidpriemstv promyslovosti budivelnnykh materialiv pivdennykh raioniv krainy, or State Institute for the Design of Enterprises of the Building-Materials Industry in the Southern Regions of the Country). A planning office of the Chief Administration of Scientific Research and Design Organizations of the former USSR Ministry of the Building-Materials Industry, located in Kiev. Founded in 1944, the office designed factories and other enterprises of the *building-materials industry, including mineral enrichment factories and mines. It also studied problems of production planning and plans for the rationalization of production. The institute has 17 departments and a branch in Kharkiv.

Pivdendipronaftoprovid (full name: Derzhavnyi instytut po proektuvanniu naftoprovodiv, naftoproductoprovodiv i naftobaz, or State Institute for the Design of Oil Pipelines, Oil Products Pipelines, and Oil Storage Bases). A design office of the former USSR Ministry of the Petroleum Industry, founded in 1972 in Kiev. Organized in 21 departments with 7 subdepartments, the office planned and designed oil pipelines and other facilities of the oil industry in Ukraine.

Pivdendiprosklo (full name: Derzhavnyi instytut po proektuvanniu pidpriemstv sklianoi promyslovosti, or State Institute for the Design of Enterprises of the Glass Industry). A planning office of the Chief Administration of Scientific Research and Design Organizations of the former USSR Ministry of the Building-Materials Industry, located in Kiev. It was founded in 1960 as a branch of Diprosklo in Leningrad, and assumed its current name in 1975. The institute designed factories and other enterprises for the glass industry and prepared plans for remodeling, reconstructing, and upgrading existing facilities. It also designed systems for improving production.

Pivdenna pravda (Southern Truth). A daily newspaper of the Mykolaiv oblast and city CPU committees and soviets. It began publication in Mykolaiv in Russian in 1917 as *Proletarskoe znania*. After several name changes it became *Krasnyi Nikolaev* in 1921. From 1930 it was published in Ukrainian as *Cherovnyi Mykolaiv*, *Shliakh industrializatsii* (1930–7), and *Bil'shovyts'kyi shliakh* (1937–41, 1943–4), and *Pivdenna pravda* (1944–91). From 1959 it appeared also in a parallel Russian edition, *Iuzhnaia pravda*.

Pivdenne. IV-17. A city (1989 pop 10,400) in Kharkiv raion, Kharkiv oblast. The city was formed in 1963 by the amalgamation of the towns of Komarivka, founded in the 17th century, and Pivdenne, founded in 1906, and was granted city status. Its yards service the railway industry, and its factories manufacture plastic goods and textiles. There are some health resorts on its outskirts.

Pivnichne siaivo (Northern Lights). A miscellany of literature and art, five issues of which were published in Edmonton from 1964 to 1971 by Ya. *Slavutych.

Pivustav script. A Cyrillic script used in East and South Slavic manuscripts from the 13th century on and in early Cyrillic printed books. It was freer and more minuscule than the older *ustav script, the letters were quite often slanted and more irregular, and spacing was unequal. Abbreviations, superscripts, accents, and aspirates were used more frequently. The *pivustav* evolved in the second half of the 15th century into the *skoropys* script – the foundation of unified 19th-century Cyrillic handwriting – which omitted the etymological jers, the *jus* vowel (ѣ), Greek letters, and accents and aspirates; had more rounded letters with ascending and descending strokes; and was more cursive. Forms of the *skoropys* varied according to chancery school and local tradition, particularly in the 16th and 17th centuries.

Serhii Plachynda

Mykola Plakhotniuk

Plachynda, Serhii [Plačynđa, Serhij], b 18 June 1928 on Shevchenkove *khutir*, near present-day Kirovohrad. Writer, journalist, and literary critic. He graduated from Kiev University (1953), did graduate work at the Institute of Literature of the AN URSS (now ANU), and worked for the paper *Literaturna Ukraïna* (contributing editor) and the Molod publishing house. He is the author of the novels *Tania Solomakha* (1959), *Syn'ooka sestra* (Blue-Eyed Sister, 1962), *De lany shyrokopoli* (Where the Broad Fields, 1963), *Duma pro liudynu* (Duma about a Person, 1974), *Stepova saha* (Steppe Saga, 1977), *Vziaty na sebe* (To Take upon Oneself, 1981), *Shuhai* (The Shuhais, 1986), and *Revuchyi* (The Roaring [Dnieper], 1988). He has also written the historical prose collections *Neopalyma kupyra* (The Burning Bush, coauthor, 1968) and *Kyïvs'ki fresky* (Kievan Frescoes, 1982), several collections of essays, a collection of fairy tales (1967), two books about the works of Yu. Yanovsky (1957, 1969), a book about O. Dovzhenko (1964), the biographical novels *Oleksandr Dovzhenko* (1980) and *Iurii Ianov's'kyi* (1986), and a biography of P. Zhytetsky (1987).

Plague (*chuma*). An infectious, often fatal disease caused by the microbe *Pasteurella pestis*. There are two main forms: (1) the bubonic plague, characterized by swollen glands in the groin, armpit, or neck, which is transmitted by fleas from rodents to humans and kills 50–80 percent of the infected victims within 10 days; and (2) the rare pneumonic plague, which is transmitted directly from human to human and kills all infected victims within 3 days. Before the exact cause was identified in 1894, the various

forms of plague were treated as different diseases.

Reports of plague epidemics in Ukraine date from as early as the 11th century: in 1090 over 10,000 people in Kiev died of plague within two weeks. The Black Death that killed off a quarter of Europe's population in the mid-14th century was brought to the Crimea in 1346 and then through Poland to Ukraine and Russia in 1351; it killed off all the inhabitants of Pereiaslav. There were widespread epidemics affecting Ukraine and Russia in 1414, 1420, and 1423. Epidemics broke out in Kiev in 1630, in Right-Bank Ukraine in 1654, 1709–12, 1738–9, and 1770–2, in Southern Ukraine in 1783–4, and in Volhynia in 1798. In the 19th century plague was imported to Odessa from Turkey and Persia (1812–13, 1828–30, 1837) and to Ukraine from Russia (1878 and 1896). The last outbreaks occurred in Odessa in 1901–2 and 1910.

One of first detailed clinical accounts of the disease in the Russian Empire was written by D. *Samoilovych. He also proposed treatment methods and preventive measures, which were tested in his fieldwork. D. *Zabolotny did extensive research on the disease and proposed a hypothesis about the natural breeding grounds of plague. At the beginning of the 20th century several scientists, among them V. Vysokovych, I. Mechnikov, and M. Hamaliia, devoted some attention to plague.

H. Schultz

Plai (Mountain Path). A regional-studies and hiking society, founded in Lviv in 1924. Until 1939 it also had branches in Peremyshl, Sambir, Stryi, and Ternopil. In 1931, after the Polish authorities banned the Plast scouting organization, two sports sections, Plai and Chernyk, were set up as part of the Lviv society to carry on Plast activities. The society published a special page in the Lviv paper *Novyi chas* in 1925 (ed I. Krypiakevych) and the 1930s (ed Ye. Pelensky); its own magazine, *Nasha bat 'kivshchyna* (1937–9); and hiking guides to the Opir i Stryi valleys by Ye. Pelensky and the Lemko Beskyd by Yu. Tarnovych. The presidents of Plai were S. Starosolsky, D. Korenets, and K. Pankivsky.

Plakhotniuk, Mykola [Plaxotnjuk], b 8 May 1936 in Fosforit, Shchigry raion, Kursk oblast. Dissident. A physician working near Kiev, he published an article in the samvydav journal *Ukrains'kyi visnyk* (no. 2, 1970) defending several political prisoners and analyzing Russification in Dnipropetrovske. For this he lost his position at the Kiev Medical Institute. He was arrested in January 1972 for his involvement in *Ukrains'kyi visnyk* and sentenced in November to an indefinite term in psychiatric prisons in Dnipropetrovske, Kazan, and Smila. After being released in March 1981, he was rearrested in September and sentenced in 1982 to four years in labor camps. He was released soon afterward.

Plaksii, Borys [Plaksij], b 21 August 1937 in Smila, now in Cherkasy oblast. Painter and sculptor. He studied at the Dnipropetrovske Art School and graduated from the Kiev State Art Institute (1965). In the 1960s, together with A. Horskha and V. Zaretsky, he created decorative murals for various restaurants and buildings in Kiev. Because of his

Borys Plaksii: sculpture in the Mykhailo Kotsiubynsky Memorial Museum in Chernihiv

unorthodox depictions and because he signed a political petition in 1968, he was denied membership in the Union of Artists. His murals at the Khreshchatyi Yar café, which depicted historical events and contemporary writers in a powerful, expressionist manner, were destroyed by the authorities in 1971. Plaksii survived by ghost-painting for officially recognized artists, painting portraits on commission, and working in Siberia. His oils are distinguished by a dark palette and tragic subject matter. They include *Shackles* (1971), *He Who Is Coming* (1973), *Female Friends* (1981), *Chornobyl* (1986), *Anathema* (1989), and *Pain* (1990). Plaksii's murals and many wood sculptures can be found at the Mykhailo Kotsiubynsky Memorial Museum in Chernihiv. Over half of his more than 1,000 works are in private collections. The first solo exhibition of his works was held in Toronto in 1991.

Plaksii, Oleksandr [Plaksij], b 13 August 1911 in Kursk, Russia. Theatrical designer. In 1936 he completed study at the Kharkiv Art Institute (pupil of O. Khvostenko-Khvostov and S. Prokhorov). He worked in the Kharkiv Young Spectator's Theater (1937–40) and then in the Chernivtsi Oblast Ukrainian Music and Drama Theater (from 1947 as principal designer). His notable designs were for the Chernivtsi Theater's productions of O. Korniiichuk's *Zahybel' eskadry* (The Destruction of the Squadron), M. Andriievych's *Lesia*, and B. Brecht's *Mutter Courage und ihre Kinder*.

Plamenytsky, Anatolii [Plamenyc'kyj, Anatolij], b 19 November 1920 in Yagodnoe, Orenburg gubernia, d 10 September 1982 in Kiev. Painter. A graduate of the Kiev State Art Institute (1953), he taught there from 1963. He did genre paintings, portraits, and landscapes, such as *Evening* (1957), *Rain* (1960), *Mother* (1961), and *Election Day* (1971).

Planning. See Economic planning, Five-year plan, and State Planning Committee of the Ukrainian SSR.

Plant cultivation. See Crop cultivation.

Plant physiology. The processes governing the life of plants: the ways they absorb water and minerals, the ways they grow, develop, and bear fruit, photosynthetic processes, respiration, biosynthesis and storage of the necessary substances, and so on. Knowledge of plant physiology provides a basis for the rational planting of crops, their acclimatization, and the maintenance of proper ecological balance.

The founder of the Ukrainian school of plant physiologists was Ye. *Votchal, who investigated the relationship between photosynthesis and water metabolism. His students and followers include V. *Zalensky (who studied water balance regulation in plants), V. Kolkunov (who studied the correlation between the anatomic structure of beet roots and their sugar content), and V. *Liubymenko (who discovered that the chlorophyll present in chloroplast is bound to proteins and does not exist in a free state). Other Ukrainian plant physiologists include M. *Kholodny (auxins), A. Nychypurovych (the composition of the organic substances produced by a plant and its relationship to the conditions of photosynthesis), Y. *Baranetsky (the water regimen of plants and their resistance to drought), D. *Hrodzinsky (plant biophysics), R. Butenko (the physiology of plant morphogenesis), A. *Manoryk, F. *Matskov, A. *Okanenko, K. Sytnyk, and A. *Zaikevych.

The principal center for plant physiology studies in Ukraine has been the AN URSS (now ANU) Institute of Plant Physiology in Kiev. It has published the journal *Fiziologija i biokhimiia kul'turnykh rastenii* since 1969.

I. Masnyk

Plantain (*Plantago*; Ukrainian: *podorozhnyk*). A plant of the family Plantaginaceae, a perennial grass with a rosette of leaves and leafless stalks bearing a terminal spike of small flowers, usually found in temperate zones. In Ukraine it grows in meadows, in steppes, among weeds, and along country roads. The most common species are the greater plantain (*P. major*), the hoary plantain (*P. media*), and the ribwort (*P. lanceolata*). Widely used in folk medicine to treat cuts and boils and to stop bleeding, the plants were also used as laxatives and expectorants, as agents to improve digestion, and as a treatment for gastritis and enteritis.

Plast Ukrainian Youth Association (Plast, Orhanyzatsiia ukrainskoi molodi). A Ukrainian scouting organization, based on universal Scout principles adapted to the needs and interests of Ukrainian young people. Its main goals include nurturing skills (particularly camping and outdoor activities), developing moral character and leadership qualities, and fostering a sense of Ukrainian patri-

Emblem of the Plast Ukrainian Youth Association

otism among its members. The organizational name Plast is derived from the Ukrainian word *plastun*, a scout of the Zaporozhian Cossacks.

History to 1945. Ukrainian scouting organizations emerged almost simultaneously in both the Russian and the Austro-Hungarian empires not long after Lord Baden-Powell introduced the scouting concept to the world in 1907. After the struggle for Ukraine's independence, however, they survived only in Western Ukraine. In the Ukrainian SSR scouting was suppressed and replaced by the Pioneer and Komsomol organizations.

The driving force behind scouting in Western Ukraine was O. *Tysovsky, the founder of Plast. In 1911 he formed an extracurricular scouting group at the Academic Gymnasium of Lviv, where he was a teacher. Similar groups were formed concurrently by P. *Franko and I. *Chmola. The Plast scouting movement spread quickly to other cities and towns. By 1913 an organizational framework had begun to evolve, and two organizational handbooks had been published, Tysovsky's *Plast* and Franko's *Plastovi hry i zabavy* (Plast Games and Activities). With the outbreak of the First World War Plast activities decreased considerably, as many older members volunteered for military duty with the *Sich Riflemen and later the *Ukrainian Galician Army. In 1915 a girls' Plast organization arose.

Scouting groups emerged in Russian-controlled Ukraine as early as 1909 and included up to 50,000 adherents by 1917. The activity was initially unstructured, but it started to organize according to the Baden-Powell model with an institutional base when officials of the Kiev educational district, led by a Russian, A. Anokhin, began promoting scouting as an extracurricular program. Specifically Ukrainian scouting troops were first formed in 1917, when Ye. *Slabchenko organized a scouting troop in Bila Tserkva. Similar groups were formed shortly thereafter in Kaniv, Kiev, Katerynoslav, Vinnytsia, and other locations. After the establishment of Soviet rule in Ukraine, these groups were disbanded. In some locations (Kiev, Odessa, Chernihiv) former scout leaders re-established their troops nominally as 'young Communist' scout groups, but these were judged by the authorities to be apolitical and were disbanded. The socializing of young people carried out by scouting was eventually taken over by the *Pioneer Organization of Ukraine.

After the First World War Plast entered its most active phase in Western Ukraine. For a short period (1918–20) Plast activities were carried out under the auspices of the

legally sanctioned *Ukrainian National Society for Child and Adolescent Care. By 1920–1 Plast had resumed operations under its own name. It soon developed a network of groups affiliated with secondary schools in Galicia and with *Prosvita societies in Volhynia. A highly successful Plast movement was started in Transcarpathia in 1921, but it remained independent of the Plast mainstream. The organization's core group, Ulad plastovoho yunatstva, or UPYu, for 12- to 18-year-olds (equivalent to Scouts and Guides), was supplemented with Ulad plastovoho novatstva, or UPN, for 7- to 12-year-olds (equivalent to Cubs and Brownies) in 1924; with Ulad starshykh plastuniv, or USP, for 18- to 30-year-olds (Rovers), in 1924–5; and with Ulad plastovykh senioriv, or UPS, for those over 30 years of age (Senior Scouts), in 1930. Organizational journals began to be published, including **Molode zhyttia*, which also had a general circulation. Special courses for training group leaders were organized, and an organizational handbook, *Zhyttia v Plasti* (Life in Plast), was prepared by Tysovsky in 1921. Support materials for group leaders often appeared in specialty publications, such as **Plastovyi shliakh*, *Plastovyi provid*, and *Ukrains'kyi Plast*. Organizers were designated to provide assistance in forming new groups. Finally, an economic co-operative was formed under the Plast name.

Plast members and Metropolitan Andrei Sheptytsky

Plast failed to develop in Bukovyna during the interwar period because of the suppression of Ukrainian cultural activities by the Rumanian authorities. Some furtive attempts were made in the early 1930s to establish semilegal Plast groups at a number of secondary schools and gymnasiums, and individuals and clubs maintained ties with Plast in Galicia.

By 1930 Plast had developed a wide-ranging organizational structure, with over 6,000 members in 10 regional districts, and was able to sponsor diverse programs, including a series of highly successful summer camps, for young people. Even more significant, Plast was becoming a popular movement with support emerging from beyond urban educational circles and slowly developing among the working class and at the village level throughout Western Ukraine. It had developed a definite group ethos, part of which included a strong Ukrainian consciousness. Concern about Plast's growing influence on Ukrainian young people, as well as the tendency for nationalist organizations to recruit Plast members after they left the ranks, led the Polish government to bar the organization from

forming in state schools (1924), from operating in Volhynia (1928), and finally from operating altogether in Polish-controlled territory (1930). With most of its assets confiscated, its publications banned, and a number of its leading members arrested, Plast was forced underground. Throughout the 1930s it operated illegally or through other bodies, such as the *Ukrainian Hygienic Society (in organizing summer camps) and the *Plai hiking society, and thus managed to maintain certain aspects of its program. More routine Plast activities were continued in Transcarpathia (until it was occupied by Hungary in 1939) and in individual Central and Western European cities in which Plast units had been formed. The latter were organized into the Prague-based Union of Ukrainian Plast Emigrants, or SUPE, in 1931.

In October 1939 under German occupation, M. Ivanenko revived Plast in Sianik (Sanok), but soon thereafter the German authorities ordered the organization to disband. Still, during the Second World War Ukrainian scouting activities in Western Ukraine continued to be carried out through other agencies, the *Ukrainian Youth Educational Societies. The Soviet occupation of Western Ukraine in 1944 brought an end to all Plast activity there.

Development in the West. Plast re-established itself in the West after the Second World War. The groundwork for the new wave of activity was laid in 1945–8 in the *displaced persons' camps of Germany. In October 1945 a gathering in Karlsfeld (near Munich) revived SUPE and developed general guidelines for conducting organizational activity in the camps. Plast attracted a membership of approx 4,800, renewed programs, and resumed its publishing activity (**Iunak*, *Plastovyi shliakh*, **Hotuis'*). Subsequent gatherings in 1947 and 1948 established more formal organizational structures (specifically the Plast International Council, or HPR, and the International Executive, or HPB) and guidelines for developing Plast branches (*stanytsi*) in the West. After the mass resettlement of displaced Ukrainians in 1948–52, Plast branches were established in Australia, Argentina, Canada, Great Britain, Germany, and the United States. The First National Plast Conference was held in Toronto in 1949. In 1954 the first Conference of Ukrainian Plast Organizations, or KUPO (which replaced SUPE), was organized in order to elect new members to the HPR and HPB. Since that time KUPO elections have taken place every three years.

The HPB co-ordinates the program and gives directives to Plast National Executives, which in turn direct their respective local branches. Methodological training for scouting leaders is also governed by the HPB. Training of scoutmasters for the UPN is organized by *Orlynniy kruh*. Notable members include L. Bachynsky, T. Bilostotsky, T. Samotulka, A. Horokhovych, L. Khraplyva, and Ye. Hoidysh. Training of leaders of the UPYu is carried out by *Lisova shkola* (for males) and *Shkola bulavnykh* (for females). Notable organizers of *Lisova shkola* have included M. Rakovsky, Yu. Kryzhanivsky, and P. Sodol. Organizers of *Shkola bulavnykh* have included O. Kuzmovych, T. Boiko, and D. Horbachevska. Specialty camps have been organized by specific *kurini* (companies) of USP and UPS: the *kurin Pershi stezhi*, for example, organizes the *Stezhky kultury* (Paths of Culture) camp; the *Burlaky* (Vagabonds) specialize in ski and mountain-climbing camps; and the *Chornomortsii* (males) and *Chornomorski khvyli* (females) organize special water-sports camps. In 1991 there were 27

different *kurini* of USP and UPS: *Kurin im. Tysovskykh, Ti shcho hrebli rout, Lisovi Chorty, Kharakternyky, Chervona Kalyna, Zakarpattsi, Kurin im. A. Voinarovskoho, Kurin im. H. Orlyka, Chornomortsi, Dubova Kora, Burlaky, Pershi Stezhi, Chota Krylatykh, Khrestonostsi, Buryverkhky, Karpatski Vovky, Khmelnychenky, Chortopolokhy, Kniahyni, Verkhovynky, Siro-mantsi, Blyskavky, Vovkulaky, Stepovi Vidmy, Braty Movgli, Shostokryli, and Pobratymy*; as well as three that are still waiting registration, *Spartanky, Chornomorski khvyli, and Lisovi Mavky*.

1957 Plast jamboree at the Plast camp near Grafton, Ontario

The titular head of the whole Plast movement is the *Nachalnyi Plastun* (Head Scout). To date, two have been elected, S. *Levytsky (1947–62) and Yu. *Starosolsky (1972–91).

In 1990 Plast was legally restored in Ukraine as the Plast Ukrainian Scout Association; it is currently active in the cities of Kiev, Lutske, Lviv, Ternopil, and Zhytomyr. The movement is spreading rapidly to other cities and towns. Plast has been restored also among Ukrainians in Poland and in the Prešov region of Slovakia.

Plast in the diaspora has remained active to the present day. Activities include weekly meetings of UPN and UPYu, lectures, sports events and competitions, hikes and tours, and winter and summer camps. In August 1991 Plast was still independent of the International Scouting Organization and other national scouting movements.

Yu. Starosolsky

Plastovyi shliakh (Plast Way). An ideological and programmatic journal of the *Plast Ukrainian Youth Association. The first three issues appeared in Lviv in 1930 under the editorship of S. *Levytsky. The journal stopped appearing when Plast was outlawed by the Polish government in that year, but it was renewed in Munich in 1950. Four issues appeared there until 1954. Since 1966 the journal has been published in Toronto. In Germany and Canada the journal has been edited by an editorial board, members of which have been L. Onyshkevych, A. Horokhovych, O. Kuzmovych, Yu. Piasetsky, O. Tarnavsky, and V. Sokhanivsky. *Plastovyi shliakh* publishes articles on Ukrainian émigré community life, on political, historical, and cultural topics, and, especially, on the ideals and activities of Plast.

Plastun (Scout). The first Ukrainian scouting journal in Transcarpathia, published in Uzhhorod in 1923–31 and Sevlush (now Vynohradiv) in 1934–5. In 1923–7 *Plastun-Junák-Cserkesz* appeared in Ukrainian, Czech, and Hungarian one to six times a year as the joint publication of the three national scouting associations in the Czechoslovak Republic. From 1928 *Plastun* appeared eight times a year as the independent organ of the Plast Ukrainian scouting organization. It was edited by O. Vakhnianyn (1923–4), L. Bachynsky (1924–9), Yu. Revai (1929–32), and A. Voron (1934–5). Among the contributors were S. Cherkasenko, V. Grendzha-Donsky, V. Pachovsky, M. Pidhirianka, B. Zaklynsky, and Yu. Borshosh-Kumiatsky.

Plateau landscape. One of several landscape types in Ukraine, characterized by wide plains dotted with hills and dissected by deep valleys formed by water erosion. It is found in the *Podolian, *Volhynia-Kholm, and *Pokuttian-Bessarabian uplands as well as the *Roztochia region.

Platonov, Khariton, b 1842 in Vorona, Yaroslavl gubernia, Russia, d 5 September 1907. Painter. A graduate of the St Petersburg Academy of Arts (1870), he was elected its full member in 1893. He lived in Kiev from 1879 and taught at the *Kiev Drawing School (1880–1900). In his work he was close to the *Peredvizhniki. He produced genre paintings, such as *Beggar* (1874), *Servant Girl* (1887), *Little Nurse* (1881), and *Berries for Sale* (1888), and also painted a portrait of the kobzar O. Veresai (1885).

Platonov, Kostiantyn, b 30 October 1877 in Kharkiv, d 8 August 1969 in Kharkiv. Psychoneurologist. A graduate of Kharkiv University (1904), he worked in V. Bekhterev's psychiatric clinic in St Petersburg (1909–12), Kharkiv University (1919–28, from 1921 the Kharkiv Medical Institute), and the Kharkiv Railway Psychoneurological Clinic. From 1920 he conducted research at the Ukrainian Psychoneurological Scientific Research Institute. The founder of the Kharkiv school of psychotherapists, he published works dealing with the treatment of neuroses using hypnosis, and with painless childbirth. His *Slovo iak fiziologichnyi i likuval'nyi faktor* (The Word as a Physiological and Therapeutic Factor, 1957) has been translated into many languages.

Plaviuk, Mykola [Plavjuk], b 5 June 1925 in Rusiv, Sniatyn county, Galicia. Economist and political leader. He

Mykola Plaviuk

joined the OUN during the war and fought in its partisan units. After the war he studied economics at the University of Munich and was an executive member of the Central Union of Ukrainian Students (1947–9). After emigrating to Canada in 1949, he was active in the *Zarevo Ukrainian Student Association and the *Ukrainian National Federation. As president of the latter organization (1956–66) he played a key role in organizing the *World Congress of Free Ukrainians and served as its general secretary (1967–9), vice-president (1973–8), and president (1978–81). At the same time he was vice-president of the Ukrainian Canadian Committee (now Congress, 1966–71). The head of the OUN Melnyk faction since 1979, he was elected vice-president of the *Government-in-exile of the Ukrainian National Republic in June 1989 and served as its last president (1990–92).

Pleiada (Pleiad). A literary group established in 1888 by Lesia Ukrainka and her brother, M. Kosach, in Kiev. It was modeled on the French school of poetry the *Pléiade*. Its members included M. Bykovska, H. Hryhorenko, M. Komarov, A. Krymsky, V. Samiilenko, M. Slavinsky, L. Starytska-Cherniakhivska, I. Steshenko, and Ye. Tymchenko. Their meetings took place in various homes and were attended by M. Lysenko, P. Kosach, K. Mykhalchuk, M. Starytsky, and others. The group also held literary evenings and contests and translated the works of non-Ukrainian authors, such as H. Heine, Dante, P. de Béranger, Molière, and V. Korolenko. The members prepared three collections for publication, 'Vesna' (Kiev), 'Desna' (Chernihiv), and 'Spilka' (Odessa), but all three were banned by the Russian censor. Pleiada was active until 1893.

Iarion Pleshchynsky: *The Shevchenko Memorial Preserve in Kaniv* (pencil, 1937)

Pleshchynsky, Iarion [Pleščyns'kyj], b 28 April 1892 in Dokshitsy, Vitsebsk gubernia, Belarus, d 6 February 1961 in Kiev. Graphic artist. After graduating from the Kazan Art Institute (1921) he moved to Kiev and taught at the Kiev State Art Institute (1925–34, 1944–61) and the Kiev Civil-Engineering Institute (1934–44). His works consist of prints depicting landscapes, posters, and book illustrations. He produced many series of etchings and drawings,

such as 'Boats on the Dnieper' (1925), 'Kiev: Landscapes on the Dnieper's Banks' (1927), 'Dnieper Motifs' (1947–61), and 'Ukrainian Landscapes' (1935–9). A book about him was published in Kiev in 1964.

Pleshkan, Olha [Pleškan, Ol'ha], b 15 June 1898 in Chorotovets, Horodenka county, Galicia, d ? Painter. She studied at the Novakivsky Art School in Lviv (1925–32) and exhibited her works at shows organized by the Ukrainian Society of Friends of Art. She painted landscapes, portraits, and genre paintings, such as *Self-Portrait* (1928), *Apple Tree in V. Stefanyk's Orchard* (1927), *Washerwoman* (1932), *Corn Cleaning* (1961), and *View of Tulova* (1963).

Pleshkevych, Omelian [Pleškevyč, Omeljan], b 1897 in Makovysko, Jarosław county, Galicia, d 7 July 1960 in Chicago. Conductor. In 1931–7 he conducted the Banduryst male student choir in Lviv, and in 1937–44 the St George's Cathedral choir and Surma male choir. He continued as conductor of the émigré Surma choir in Germany (1945–9) and Chicago (1951–4), helping to make it one of the most important Ukrainian choral ensembles in the United States. He also arranged a number of UPA songs.

Archimandrite Yelysei Pletenetsky

Pletenetsky, Yelysei [Pletenec'kyj, Jelysej], b 1550 in Pletenytsi, near Zolovchiv, Lviv region, d 29 October 1624 in Kiev. Orthodox churchman and cultural leader. He was archimandrite of a monastery in the Pynske region (1595–99) and participated in the church sobor of Berestia (1596). He then became archimandrite of the Kievan Cave Monastery (1599–1624) and secured the right of stauropegion for it. With the assistance of the Cossacks and Hetman P. *Sahaidachny he reclaimed the monastery's valuables that had been given to the Uniates by the Polish king Sigismund III in 1614. He sought to reform monastic life, organized a women's monastery near the Cave Monastery, and restored the Church of the Caves. He also established a hospital for the poor at the monastery.

Pletenetsky attracted a group of notable church and cultural figures at the monastery, including P. and S. Berynda, Y. Boretsky, H. Dorofeievych, Z. Kopystensky, T. Zemka, and L. Zyzanii. He also founded the *Kievan Cave Monastery Press, wrote introductions to many of its earliest publications, and established a paper factory in Radomyshl to provide paper for it. His introductions were published in Kh. Titov's *Materiialy dlia istorii knyzhnoi spravy na Vkraïni v XVI–XVIII vv.* (Materials for the History of Publishing in Ukraine in the 16th–18th centuries, 1924).

Mykola and Oleksander Plevako

Plevako, Mykola, b 9 December 1890 in Dvorichna, Kupianka county, Kharkiv gubernia, d 25 May 1941 in Vishneva raion, Kazakhstan. Literary scholar and bibliographer. He studied under M. Sumtsov at Kharkiv University, from which he graduated in 1916. He was a professor of Ukrainian literary history at the Kamianets-Podilskyi Ukrainian State University (1919–21), a professor at the Kharkiv Institute of People's Education (from 1921), and director of the bibliography cabinet of the Taras Shevchenko Scientific Research Institute in Kharkiv (1926–33). In 1938 he was exiled to Kazakhstan, where he died in unknown circumstances.

Plevako published studies of L. Hlibov and M. Shashkevych, *Zhyttia ta pratsia B. Hrinchenka* (The Life and Work of B. Hrinchenko, 1911), *O stile i iazyke povesti G.F. Kvitky 'Marusia'* (The Style and Language of H. Kvitka's Novellette *Marusia*, 1916), *Shevchenko's shchodennyk* (Shevchenko's Diary, 1924), *Shevchenko i krytyka* (Shevchenko and Criticism, 1924), *Shevchenko v tsyfrakh* (Shevchenko in Numbers, 1926), and other works. He edited a number of readers, including *Khrestomatiia po ukrains'kii literaturi* (An Anthology of Ukrainian Literature, coedited by M. Sumtsov, 1918) and *Khrestomatiia novoi ukrains'koï literatury* (An Anthology of Modern Ukrainian Literature, 2 vols, 1923, 1926; includes biographies and comprehensive bibliographies of 75 writers, from I. Kotliarevsky to M. Khvylovy). He also edited *Tvory L. Hlibova* (The Works of L. Hlibov, 1927, with I. Kapustiansky) and T. Shevchenko's *Kobzar* (1930, with Ya. Aizenshtok). His *Bio-bibliografichnyi slovnyk ukrains'kykh pys'mennykiv* (Biobibliographical Dictionary of Ukrainian Writers), which he worked on for 10 years (1924–34), has been lost. A compilation of his works was published posthumously, *Mykola Plevako: Statti, rozvidky, i bio-bibliografichni materialy* (Mykola Plevako: Articles, Studies, and Biobibliographic Materials, 1961).

I. Koshelivets

Plevako, Oleksander, b 9 May 1899 in Dvorichna, Kupianka county, Kharkiv gubernia, d 14 February 1990 in Kamianske (former Dniprodzerzhynske), Dnipropetrovske oblast. Economic historian; brother of M. and P. Plevako. After graduating from the Kiev Institute of the National Economy in 1922, he worked as a research associate of the VUAN and in 1925–7 published lengthy articles on the history of the sugar industry in Ukraine. He was arrested in 1928 and exiled to the Urals and Siberia. After returning to Ukraine he wrote short stories about animals, which came out in four collections (1960, 1964, 1969, and 1978). In 1954 he was rehabilitated.

Petro Plevako

Paul Plishka

Plevako, Petro, b 21 December 1888 in Dvorichna, Kupianka county, Kharkiv gubernia, d 4 February 1986 in Paris. Political, civic, and church leader; brother of M. *Plevako. A legal assistant of M. Mikhnovsky, he became a member of the Central Committee of the Ukrainian Party of Socialist Revolutionaries and of the Central Rada. He was appointed department director in the UNR Ministry of Roads and vice-chairman of the Ukrainian Committee of Railwaymen (1918–19). After emigrating to Vienna in 1919 and then to Paris in 1925, he was active in émigré affairs. In 1953 he became a member of the Metropolitan's Council of the Ukrainian Autocephalous Orthodox church in Europe, and for many years he was chairman of the board of directors of the Petliura Library in Paris. He published his brother's works in 1961.

Pliatsko, Hryhorii [Pljacko, Hryhorij], b 14 April 1928 in Ostrovok (Ostriv), Sokal county, Galicia. Mechanics scientist. He graduated from the Lviv Polytechnical Institute (1950) and worked at the AN URSS (now ANU) Physical-Mechanical Institute (from 1957) and the Lviv branch of the Institute of Mathematics (since 1973, and since 1975 as department head). He has made contributions in the fields of thermal conductivity and thermoelasticity and in various areas of solid state physics. He has studied and developed theoretical models of the behavior of solids under conditions in which very high energy flows through them.

Plisetsky, Marko [Plisec'kyj], b 14 January 1909 in Chernihiv. Literary scholar and folklorist. A graduate of Kiev University (1937), he worked in journalism and publishing and lectured at Kiev University and other higher

schools. A specialist in Ukrainian and Russian folklore studies, particularly in the development of the Slavic folk epos, he wrote a book on Ukrainian lyrical folk poetry (1941), on dumas and historical songs (1944), and on the ties between Russian and Ukrainian epos (1963).

Plishka, Paul [Pliška], b 28 August 1941 in Old Forge, Pennsylvania. American opera and concert singer (bass) of Ukrainian descent. He studied under A. Bohajian and at Montclair State College. Plishka's lyrical singing bass extends easily into the baritone range. In 1967 he made his New York Metropolitan Opera (Met) debut as the Monk in A. Ponchielli's *La Gioconda*. Plishka's main roles include Sarastro, Figaro, and Leporello in W. Mozart's *Die Zauberflöte*, *Le Nozze di Figaro*, and *Don Giovanni*; Colline in G. Puccini's *La Bohème*; Oroveso and Sir George in V. Bellini's *Norma* and *I Puritani*; Ramfis and Procida in G. Verdi's *Aida* and *I Vespri siciliani*; Mephistopheles in C. Gounod's *Faust*; Varlaam and Pimen in M. Mussorgsky's *Boris Godunov*; and Prince Gremin in P. Tchaikovsky's *Eugene Onegin*. Altogether he has sung more than 40 roles at the Met. Plishka performed leading parts in recordings of Bellini's *Norma* and *I Puritani*, G. Puccini's *Turandot*, Massenet's *Le Cid*, and G. Donizetti's *Gemma di Vergy*. He has been a guest performer at the opera houses of Chicago, San Francisco, Dallas, and Philadelphia; since 1974 he has toured major European theaters, including Milan's La Scala, the Vienna State Opera, the Paris Grand Opera, and Covent Garden. He is frequently heard in the United States as a concert soloist with leading symphony orchestras, performing works by C. Monteverdi, D. Scarlatti, F. Schubert, R. Schumann, S. Rachmaninoff, and J. Niles. In 1978–9 Plishka included in his recitals Ukrainian art songs and folk song settings by M. Lysenko (texts by T. Shevchenko), V. Barvinsky, K. Stetsenko, L. Revutsky, M. Verykivsky, M. Fomenko, and I. Sonevytsky. He recorded an album titled *Songs of Ukraine*.

R. Savytsky

Plisnesk. A fortified Rus' settlement located on the banks of the Buh River near Pidhirtsi, Brody raion, Lviv oblast, and excavated in 1880–3 and 1940–54. Mentioned in medieval chronicles and in *Slovo o polku Ihorevi* as an important center of the Principality of *Galicia-Volhynia, Plisnesk was founded in the 7th to 8th century as an unfortified settlement. By the 11th century it had grown into a major trading center (with a total area of 160 ha) surrounded by moats and walls with towers. Its inhabitants engaged in metalworking, weaving, jewelry and pottery making, and woodworking. The town was sacked by the Mongols in 1241 and it never recovered. It disappeared completely in the 14th century.

Pliuiko, Serhii [Pljujko, Serhij], b 20 November 1887 in Dykanka, Poltava county, d ? A professor of zootechnology and dean of the Kamianets-Podilskyi Agricultural Institute (from 1923), he was arrested by the GPU during the early 1930s and sentenced to a five-year term of hard labor on the White Sea Canal. Although his subsequent fate cannot be confirmed, it is believed that he was given a second term after his sentence was completed, and that he died in a Soviet prison camp.

Pliukfelder, Rudolf [Pljukfel'der, Rudol'f], b 6 September 1928 in Novorlivka, Shakhtarske raion, Donetsk oblast. Light-heavyweight weight lifter. He won the 1964 Olympic gold medal in his class; the world championship in 1959 and 1961; and the European championship in 1959, 1960, and 1961. He set 13 world records in weight lifting. At the end of the 1970s he was the trainer of the USSR weight-lifting team.

Leonid Pliushch

Pliushch, Leonid [Pliušč] (Pliouchtch), b 26 April 1939 in Naryn, Kirgizia. Ukrainian mathematician, dissident, and literary critic. He completed his studies at the University of Kiev with a degree in mathematics in 1963 and worked at the Institute of Cybernetics of the AN URSS (now ANU) until 1968. In 1969 he joined the Initiating Group for the Defense of Human Rights. He was dismissed from his job in 1969 and arrested in 1972 for writing articles and signing letters of protest against the violation of human rights. He was declared mentally ill and incarcerated in the Dnipropetrovske psychiatric prison. Pressure from various groups in the West, most notably from French mathematicians, led to his release and his summary expulsion from the Soviet Union to France in 1976, where he has resided since then. In 1977 his autobiography appeared, *Na karnavali istorii* (At the Carnival of History; also in English as *History's Carnival*, and in French, Italian, and German translations). Fascinated by the Tartu structuralist school (Iu. Lotman) and the Moscow mythologists (V. Ivanov), Pliushch turned to the study of literature. His approach to literature, somewhat influenced also by M. Bakhtin's notions of the 'carnival,' permits free-ranging associative interpretations. He made his debut as a literary scholar and critic with an insightful study of T. Shevchenko as mythologizer, *Ekzod Tarasa Shevchenka: Navkolo 'Moskalevoi krynytsi' dvanadtsiat' stattiiv* (Taras Shevchenko's Exodus: Twelve Essays apropos 'The Soldier's Well,' 1987). This was followed by a similarly stimulating examination of the most influential writer of the 1920s, M. *Khvylovy, in *Ioho taiemnytsia* (His Secret, 1990). Pliushch is active in the External Representation of the Ukrainian Helsinki Union and publishes in various Ukrainian and Russian newspapers and journals on literary and political subjects.

D.H. Struk

Pliushch, Oleksii [Pljušč, Oleksij] (pseud: O. Dafnenko, O. Dafne-Hederenko, Smutnenko), b 25 May 1887 in Olenivka, Borzna county, Chernihiv gubernia, d 26 May 1907. Writer. He studied at the Nizhen Historical-Philo-

logical Institute. From 1905 his populist stories, poems, and plays appeared in Ukrainian literary miscellanies and periodicals. His collected works (2 vols, 1911, 1912) and novelette *Velykyi v malim i malyi u velykim* (The Great in the Small and the Small in the Great, 1930) were published posthumously. A selection of his works appeared as *Spoivid'* (The Confession, 1991).

Pliushch, Pavlo [Pljušč], b 31 December 1896 in Volodkova Divytsia, Nizhen county, Chernihiv gubernia, d 4 March 1975 in Kiev. Linguist and pedagogue. After graduating from the Nizhen Pedagogical Institute (1923) and the Dnipropetrovske Institute of Social Education (1931) he completed his graduate studies under A. Krymsky and from 1937 taught Ukrainian at Kiev University, where he became head of the Ukrainian language department (1955). He published over 100 works, including a collection of exercises in syntax and punctuation (with O. Sarnatsky, 1938; 8th edn 1954); his doctoral dissertation on the history of the Ukrainian language (1958); books on I. Kotliarevsky's humorous linguistic devices in *Eneida* (1959) and on the language of T. Shevchenko's *Kobzar* (1964); a history of the Ukrainian literary language (1971); and articles on the history, periodization, and development of the Ukrainian language and on the language and style of the Peresopnytsia Gospel, M. Kotsiubynsky, I. Tobilyevych, and V. Stefanyk.

Vasyl Pliushch

Vladyslav Ploshevsky

Pliushch, Vasyl [Pljušč, Vasył'], b 10 January 1903 in Warsaw, d 16 November 1976 in Munich. Physician and political figure; full member of the Shevchenko Scientific Society. A graduate of the Kiev Medical Institute (1928), he directed an interraion tuberculosis dispensary in Rivne and conducted research at the Odessa Scientific Research Institute for Tuberculosis. He began to work as a specialist in tuberculosis at the Ukrainian Scientific Research Institute for Tuberculosis in Kiev in 1932 and at the Kiev Institute for the Upgrading of Physicians. In 1938 he helped organize the Ukrainian Scientific Society of Phthysiatrists and became its first scientific secretary. During the Soviet occupation of Western Ukraine he was sent as a tuberculosis inspector to Lviv, where he implemented a plan for a network of dispensaries and organized and directed the Lviv Tuberculosis Institute. A postwar refugee, he worked in West Germany and was president (1951–3) of the Supreme Council of the *Central Representation of the Ukrainian Emigration in Germany, and founder and pres-

ident of the Association for the Liberation of Ukraine abroad. His scientific publications include papers and monographs, such as *Klinika gematogenno-disseminirovanogo tuberkuleza legkikh* (Clinic of Hematogenetically Disseminated Lung Tuberculosis, 1938) and *Narysy z istorii ukrains'koi medychnoi nauky ta osvity* (Outlines of the History of Ukrainian Medical Science and Education, 2 vols, 1970, 1983). He contributed medical articles to *Entsyklopediia ukrainoznavstva* (Encyclopedia of Ukraine, 10 vols, 1955–84) and wrote publicistic articles in Ukrainian, English, and German.

Pliushch, Yefrem [Pljušč, Jefrem], 1872–? Civil engineer and specialist in bridge and rail construction. During the rule of Hetman P. Skoropadsky he served as an inspector of roads in the Ministry of Transportation, and in 1919 he was director of railroads for the UNR government. After the war he worked as a railway construction engineer in Poland. A prolific inventor, he developed new construction methods, among them methods of building concrete structures under water, laying rail lines over swamps, and preventing derailing on bridges.

Plokhii, Serhii [Ploxij, Serhij], b 23 May 1957 in Gorky (now Nizhnii Novgorod), Russia. Ukrainian historian. He graduated from Dnipropetrovske University (1980) and received his doctorate in history from Kiev University (1990). He has headed the department of general history at Dnipropetrovske University (as a professor from 1990) and directed a study of German and Mennonite settlements in Southern Ukraine. Since 1992 he has been head of a department in the ANU Institute of Ukrainian Archeography in Kiev. Among his published works are *Osoboditel'naia voina ukrainskogo naroda v latinoiazychnoi istoriografii serediny XVII v.* (The Liberation War of the Ukrainian People in the Latin-Language Historiography of the Mid-17th Century, 1983) and *Papstvo i Ukraina: Politika rimskoi kurii na ukrainskikh zemliakh (XVI–XVII vv.)* (The Papacy and Ukraine: The Policy of the Roman Curia in Ukrainian Lands [16th–17th Centuries], 1989).

Plokhynsky, Mykhailo [Ploxyns'kyj, Myxajlo], b 1864 in Kursk gubernia, d 1906 in Kharkiv. Historian and archivist. He graduated from Kharkiv University, taught history at a Kharkiv gymnasium, and managed the archive of the Kharkiv Historical-Philological Society (1888–97). In its *Sbornik Khar'kovskogo istoriko-filologicheskogo obshchestva* he published studies on the social history of Left-Bank Ukraine, trapping and hunting, Hetman I. Mazepa as a Russian gentry landowner, and T. Kaplonsky's voyage to Italy in the late 17th century. He also wrote monographs on the archives of Chernihiv gubernia (1899) and on Greeks, Gypsies, and Georgians in Old Little Russia (1905).

Ploshchansky, Venedykt [Ploščans'kyj], b 1834, d 1902. Galician historian and publicist; corresponding member of the Moscow Archeological Society from 1874. He was the last editor of the Lviv Russophile newspaper *Slovo* (1871–87). In 1882 he was a codefendant in the Lviv trial of Russophile leaders accused of treason. In 1887 he emigrated to the Russian Empire and worked in the Vilnius Commission for the Analysis of Ancient Documents and as a government censor. He wrote articles

about Galician towns and villages (published mostly in the collections of the Halytskyo-Ruska Matytsia society), books about several Galician villages (1872) and the history of the Kholm region according to archival documents and other sources (2 vols, 1899, 1901), an account of the 1882 trial (1892), and a study of the acts of the 16th- and 17th-century Kholm courts (1895).

Ploshevsky, Vladyslav [Ploševs'kyj] (Płoszewski, Władysław), b 1853 in Nyzhankovychi, Peremyshl county, Galicia, d 29 January 1892 in Lviv. Actor and scenery designer of Polish origin. He began his career in the Lviv Polish Theater (1873) and then was a leading actor in the Ruska Besida Theater (1874–80, 1882–3, and 1886–92). He also designed scenery for those theaters' productions. He played Peter the Great in Y. Barvinsky's *Pavlo Polubotok* and sang Gaspar in R. Planquette's *Les Cloches de Corneville*. His acting talents, particularly his natural pathos in tragedies, were praised by I. Pelekh and M. Yatskiv. After his portrayal of Franz Moor in F. von Schiller's *Die Räuber* he became insane; he died days later.

Plotkin, Hryhorii, b 22 December 1917 in Odessa, d 9 February 1986 in Kiev. Socialist-realist writer of Jewish origin. From 1936 to 1941 he headed the Odessa branch of the Writers' Union of Ukraine. He began publishing in 1931. He wrote over 10 poetry collections, a novelette in verse about the Decembrists, *Visnyky svobody* (Heralds of Liberty, 1955), publicistic accounts of his travels to Israel (1959) and India (1963), over 10 plays, opera librettos, and documentary-film scripts. A two-volume edition of his selected poetry and plays was published in 1987.

Plotnikov, Vladimir, b 19 May 1873 in Orel, Russia, d 11 September 1947 in Kiev. Physical chemist; full VUAN/AN URSR (now ANU) member from 1920 and corresponding member of the USSR Academy of Sciences from 1932. A graduate of Moscow University (1895), he worked at the Kiev Polytechnical Institute (1899–1941), from 1910 as a professor, and directed the ANU Institute of Chemistry (1931–41) and the Laboratory of Nonaqueous Solutions of the ANU Institute of General and Inorganic Chemistry (1945–7). Plotnikov's research focused on inorganic chemistry, notably of aluminum salts and complexes, and on nonaqueous electrochemistry. He established the close relationship between electrolytic dissociation and complex formation in solutions; was the first to obtain aluminum at room temperature through electrolysis in nonaqueous solvents; and introduced an original theory of electrochemical resonance to account for electrochemical conductivity.

Plow (*pluh*). The most important farm implement for working the soil in preparation for planting. The first plow was no more than a digging stick pushed or pulled to break the surface of the ground. In Ukrainian territories the plow evolved over many centuries through the same stages as in other countries. During the 1st millennium BC and the first few centuries AD the wooden plow (Ukrainian *ralo*) was widely used among the East Slavs. It consisted of a wooden draft beam, to which a draft animal was tied, a wooden (later iron-tipped) share beam, which cut into the soil, and a tail handle, which the plowman used to control the motion of the plow. Unlike later types of plow

the wooden plow merely cut the earth without turning it over or breaking it up. The furrow it produced was symmetrical, narrow, and shallow. Because of its lightness and the shallow incision it made the wooden plow could be drawn by one or two oxen or horses.

The true plow, which is characterized by its ability to undercut and overturn the soil, appeared in Ukraine only at the end of the 17th century. In addition to an iron share it possessed an asymmetrical moldboard which turned the soil over and pushed it to one side. The addition of wheels made for heavier plows that were capable of working the heavier and deeper chernozem of the steppe.

The introduction of the tractor made still larger and heavier plows possible. The first serial plows in the USSR were built in Odessa in 1925. Today plows of different construction – disk, chisel, rotary, combination – are adapted to various soils and special functions.

Members of the Pluh writers' association in Kharkiv (1923)

Pluh. An all-Ukrainian peasant writers' union based in Kharkiv, with branches throughout Ukraine, founded in 1922 by H. *Koliada, A. *Paniv, S. *Pylypenko, I. *Senchenko, and I. *Shevchenko. Other members included S. Bozhko, D. Humenna, H. Epik, A. Hai-Holovko, I. Kyrylenko, O. Kopylenko, V. Mynko, P. Panch, V. Mysyk, P. Usenko, and N. Zabala. Its stated aim was to 'educate its members and the broad peasant masses in the spirit of proletarian revolution and to draw them into active creative work in this vein.' With that goal in mind, its chief ideologue, Pylypenko, made an orientation to the masses the principal objective for the whole organization. His doing so resulted in sharp polemical exchanges with M. Khvylovy in the *Literary Discussion of 1925–8. Khvylovy was harshly critical of the organization's provincialism and simplistic didacticism. In the course of the discussions many members left Pluh. Usenko, along with other Komsomol writers, departed to form Molodniak. A. Dyky, Kyrylenko, Zabala, and others joined the All-Ukrainian Association of Proletarian Writers. In 1931, in connection with the new collectivization drive, the organization changed its name to the Proletarian Collective-Farm Writers' Union. A year later, by decree of the Central Committee of the Communist Party (Bolshevik) of Ukraine, issued on 23 April 1932, the union was dissolved. Its leaders were either shot or imprisoned (Bozhko, Epik, V. Gzhytsky, Paniv, Pylypenko, and others). Its official organ was the journal *Pluzhanyn*, renamed **Pluh* in 1928.

First almanac of *Pluh* (1924)

Pluh (Plow). A monthly journal of literature and the arts of the *Pluh writers' association. It was published in Kharkiv and edited by S. *Pylypenko, I. Senchenko, A. Holovko, I. Kyrylenko, D. Zahul, and others. It was established in 1925 as *Pluzhanyn*, but its name was changed to *Pluh* in 1928, and as such it was known until 1932. In 1933 its last two issues appeared, as *Kolhospna Ukraina*. *Pluh* is also the name of a collection of essays, writings and statutes of Pluh, edited by Pylypenko, which was issued in 1922. Pluh also issued three almanacs bearing the same title (1924–7, edited by Pylypenko). They included M. Yashek's bibliographical index of the Literary Discussion of 1925–8 and another bibliography, 'Pluzhans'ka tvor-chist'' (The Works of Pluh).

Plum, European (*Prunus domestica*; Ukrainian: *slyva domashnia*). A fruit plant of the family Rosaceae that grows as a tree or shrub. Plums grow in all regions of Ukraine, especially the Podilia, Pokutia, Transcarpathia, Kharkiv, and Kiev regions, and account for 15.5 percent of all fruit trees planted in Ukraine (or 50 million trees).

Pluzhanyn. See *Pluh*.

Yevhen Pluzhnyk

Pluzhnyk, Yevhen [Pluzhnyk, Jevhen], b 26 December 1898 in Kantemyrivka, Bohuchar county, Voronezh gubernia, d 2 February 1936 in the Solovets Islands. Writer. In the years 1923–8 he belonged to the Kiev writers' groups *Aspys and Lanka (see *MARS) and contributed poetry to several Soviet Ukrainian journals. During his life-

time he published only two poetry collections, *Dni* (Days) in 1926 and *Rannia osin'* (Early Autumn) in 1927; a third, *Rivnovaha* (Equilibrium), first appeared posthumously in an émigré edition in Augsburg in 1948. He also wrote the novel *Neduha* (Illness, 1928), which was banned from circulation shortly after its publication. Two of his plays, *Profesor Sukhorab* and *U dvori na peredmisti* (In the Courtyard in the Suburb), appeared in *Zhyttia i revoliutsiia* in 1929; a drama in verse, 'Shkidnyky' (Wreckers), was never published. He also translated Russian literature into Ukrainian and compiled (with V. Pidmohylny) a dictionary of Ukrainian official phraseology (1926) and (with V. Atamaniuk and F. Yakubovsky) an anthology of Ukrainian poetry (1930–2).

Although Pluzhnyk was one of the finest Ukrainian poets of the 1920s (he has been compared to R.M. Rilke), Party criticism was hostile to his contemplative, laconic, and frequently gloomy lyricism and depiction of revolutionary atrocities and Soviet reality. After his novel was banned from circulation, he published very little. In December 1934 he was arrested together with many other Ukrainian figures, and in March 1935 he was sentenced by a military tribunal to death by firing squad. The verdict was commuted to 10 years' imprisonment in the Solovets Islands in the White Sea, where he soon died of the tuberculosis that had afflicted him since 1926. He was rehabilitated posthumously in 1956, and editions of his collected poems were published in Kiev in 1966 and 1988. An uncensored edition appeared in Munich in 1979.

R. Senkus

Plyhunov, Oleksandr (Pligunov, Alexandr), b 26 May 1904 in Verkhnie, Starobilske county, Kharkiv gubernia, d 26 October 1975 in Kiev. Chemist. After graduating from the Kiev Polytechnical Institute (1930) he worked there and became a professor and rector (1943–52, 1955–72). His research dealt with optimizing technological processes and using novel resources for producing cement and other construction materials.

Plykhanenko, Sava [Plyxanenko], b ?, d 1768 in Kodnia, Zhytomyr region. Peasant leader during the *Koliivshchyna rebellion. In the spring of 1768 he organized peasants in and around the village of Malopolovetske, near Fastiv (Khvastiv), into a haidamaka contingent. Under his leadership and with the help of the Zaporozhian Cossacks the rebels fought in the Bila Tserkva district. Plykhanenko was captured and executed by Polish forces.

Pneumoconiosis. A disease of the lungs caused by the habitual inhalation of inorganic, organic, or chemical irritants. It is an occupational disease, and in Ukraine an overwhelming number of cases are found in the Donbas and Kryvyi Rih regions, where there is an extraordinary concentration of mining and heavy industry. The least severe forms of pneumoconiosis occur when coal dust is inhaled by coal workers (anthracosis or black lung disease); iron dust by welders and hematite and magnesite by miners (siderosis); and tin, barium chromate, and clay by miners. The inhalation of dust containing silicon is far more serious in effect and is widespread among those with occupations in mining, sandblasting, and pottery making. Known as silicosis, it is the most common form of pneumoconiosis. The generally old, dilapidated, and

poorly ventilated condition of factories and mines in Ukraine increases the frequency of its occurrence. The Kiev Scientific Research Institute of Tuberculosis and Pulmonary Surgery (founded in Kharkiv in 1922 on the basis of a local tuberculosis clinic and moved to Kiev in 1930) works on problems pertaining to cases of pneumoconiosis, silicosis, and other lung diseases from the Donbas and Kryvyi Rih regions. The solutions lie not only in the treatment of those who already have the disease, but even more in the elimination of the heavy *pollution which now plagues Ukraine.

P. Dzul

Po, Lina (pseud of Polina Horenshtein), b 18 January 1899 in Katerynoslav (now Dnipropetrovske), d 26 November 1948 in Moscow. Sculptor and dancer. She studied sculpture at E. Blokh's studio in Kharkiv and at the Higher Artistic and Technical Workshop in Moscow (1920–4). At the same time she studied ballet in Moscow, and from 1924 she performed in Kiev. In 1934 she lost her eyesight, and from then on she devoted herself to sculpture. Her work consists of plasticine and clay statuettes on dance themes (eg, *Dance Suite* [1937], *Dance with a Scarf* [1937], and *Dances of the Peoples of the USSR* [1946–7]), portraits, and thematic scenes.

Poale Zion (Workers of Zion). A moderate Jewish socialist movement that originated in Ukraine (Katerynoslav, Odessa, and Poltava), Vilnius, and Vitebsk at the beginning of the 20th century and spread to the Austrian Empire, Britain, the United States, Palestine, and Argentina. Although it did not advocate Ukrainian independence, Poale Zion maintained strong contacts with Ukrainian activists, particularly with the Ukrainian Social Democratic Workers' party, and later entered the Central Rada and the UNR Directory. Some of its members, such as S. *Goldelman, were strong supporters of the Ukrainian national movement. The party split into factions after the October Revolution and was banned by the Soviet government in 1928.

Pobedonostsev, Konstantin [Pobedonoscev], b 2 June 1827 in Moscow, d 23 March 1907 in St Petersburg. Russian government official and chief procurator of the *Holy Synod. After graduating from the Moscow School of Jurisprudence (1846) he worked in the civil service and was a professor of civil law at Moscow University (1859–65). Over time he was granted the posts of senator (from 1868), member of the Council of State (from 1872), and lay director (procurator) of the Holy Synod of the Russian Orthodox church (1880–1905). He also had considerable influence as a personal adviser to Emperor Alexander III, particularly after the assassination of Alexander II in 1881.

Pobedonostsev was a relentless propagator of the concepts of a state based on Orthodoxy, autocracy, and Russian identity. He played a central role in the campaign launched during the 1880s to Russify the empire's Baltic holdings and in efforts to contain the Poles and Polish influences. He instigated the conversion of Uniates in the Kholm region to Russian Orthodoxy in 1875 and established numerous restrictions on Greek and Roman Catholics. He did not allow Russian sermons in Roman Catholic churches or the translation of the Bible into Ukrainian. He also supported anti-Semitic legislation that restricted the

social mobility and access to education of Jews and continued their confinement within the *Pale of Settlement.

Pobedonostsev harbored aspirations for the annexation of Galicia and Transcarpathia, believing the predominantly Uniate Ukrainian inhabitants there to be Orthodox Russians who would have been part of the empire and church if not for centuries of Polish and Catholic oppression. He arranged for generous subsidies to *Russophile currents in both regions and maintained personal contacts with figures such as I. Naumovych and A. Dobriansky. He caused the Holy Synod to underwrite Russian Orthodox mission work among Ukrainian immigrants in Canada and the United States, in the belief that inroads there would assist similar efforts in Western Ukraine. A collection of his ideological essays was published in Moscow in 1896 as *Moskovskii sbornik* (Moscow Collection; trans edn pub as *Reflections of a Russian Statesman*, 1965).

A. Makuch

Poberezny, Paul [Poberežnyj, Pavlo], b 14 September 1921 in Fort Leavenworth, Kansas. American pilot and aviation promoter, of Ukrainian descent; member of the Society of Experimental Test Pilots (1978), the Fédération Aéronautique Internationale, and the Wisconsin Air National Guard Hall of Fame (1988). The son of Ukrainian immigrants from Galicia, he became the only person in the US armed forces to attain all seven aviation wings before retiring at the rank of colonel in 1970. During his flying career Poberezny piloted 378 types of flying craft, accumulated 29,000 hours of flight time, and designed and built 13 different airplanes. In 1953 he founded the Experimental Aircraft Association (EAA), which promotes amateur aircraft building and sport aviation. In 1991 the EAA numbered over 125,000 members in 100 countries. Poberezny also initiated the EAA's international Fly-In Convention in Oshkosh, Wisconsin, the largest event of its kind in the world (1 million people and 13,000 aircraft annually). The publisher of five EAA monthly magazines and numerous technical manuals, Poberezny received the US Federal Aviation Administration Award for Extraordinary Service (1972) and the first-ever Charles A. Lindbergh Award for lifetime contribution to aviation (1990).

Pobodailo, Stepan [Pobodajlo] (Podobailo), b ? in the Chernihiv region, d 1654. Cossack officer. He served in the private forces of A. Kysil until 1648 and then joined B. Khmelnytsky's forces, with which he took part in numerous battles, as captain (1651) and colonel (1651–4) of Chernihiv regiment and as the hetman's deputy for Left-Bank Ukraine (1652). He was an opponent of the Treaty of Bila Tserkva. He fought Polish-Lithuanian forces in the Chernihiv region in 1652, and he participated in negotiations for the Pereiaslav Treaty of 1654. He was killed during the Belarusian campaign at Stare Bykhovo and was buried in the Trinity–St Elijah's Monastery in Chernihiv (the restoration of which he had funded).

Pobut (Way of Life). An organ of the *Ethnographic Society, published in Kiev in 1928–30 (seven issues altogether). It contained reports on the society's activities and ethnographic expeditions and articles on ethnographic

methodology and Ukrainian folk culture. The journal was edited by a committee that included O. Malynka, A. Onyshchuk, and N. Malecha.

Pobuzke [Pobuz'ke]. V-11. A town smt (1986 pop 7,000) on the Boh River in Holovanivske raion, Kirovohrad oblast. The town was founded in 1959. It produces building materials and fruit preserves.

Pochaiv [Počajiv]. III-6. A city (1989 pop 11,000) in Kremenets raion, Ternopil oblast. It is first mentioned in historical documents in 1450 and was known as Yerofeivka until the 16th century. In that century an Orthodox monastery was founded there, and at the beginning of the 17th century the monastery acquired a printing press. In 1795 Pochaiv was annexed by Russia. Its monastery was raised to the status of *lavra* in 1833. In the interwar period the town belonged to Poland, and since 1939 it has been part of Ukraine. In 1978 it was granted city status. Its main industry is food processing. Pochaiv's architectural monuments include the monastery complex and the wooden Church of the Holy Protectress, from 1643.

Pochaiv Monastery (Pochavska lavra). The largest monastery in Volhynia, and the second largest men's monastery in Ukraine, after the Kievan Cave Monastery. Initially called the Pochaiv Dormition Monastery, it was founded, according to some accounts, by monks who fled from the Kievan Cave Monastery at the time of the Tatar invasion of 1240. The first written mention of it dates to 1527. In 1597, the noblewoman A. Hoiska donated a large estate to the monastery, as well as a miracle-working icon that had been brought to Volhynia by a Greek metropolitan in 1559. The cloister flourished during the tenure of Hegumen St Yov *Zalizo in the early 17th century. In 1649 F. and Ya. Domashevsky funded the construction of the monastery's Holy Trinity Church. In 1675 the monastery was attacked by Turks and Tatars but was reputedly

Fedir and Yavdokha Domashevsky, benefactors of the Pochaiv Monastery (1649)

saved by an apparition of the Mother of God; this event has been immortalized in many songs, including 'Oi ziishla zoria vecherovaia' (Oh the Evening Star Appeared). In 1713 the monastery officially joined the Uniate church and became a center of the Basilian monastic order, which developed it into an important cultural and publishing center and founded the *Pochaiv Monastery Press in 1730. In 1771-83, the Holy Trinity Church was demolished and replaced by the Dormition Cathedral, funded by M. Potocki.

In 1831, the Russian government gave the monastery to the Russian Orthodox church on the pretext that its monks supported the Polish Insurrection of 1830-1. It also raised its status to that of a *lavra*. In 1833-41 the monastery was the see of the bishop of Volhynia, and after that its archimandrites were named Bishop of Ostrih. In the late 19th century an icon painting workshop and a historical museum were established, and many buildings were rebuilt or expanded. In the 18th to 19th centuries the monks of the monastery developed a distinctive style of liturgical singing. A number of hermitages were controlled by the monastery.

In the 20th century, under the Volhynian archbishop A. *Khrapovitsky, the Pochaiv Monastery became a strategic center of Russification, reactionaryism, and anti-Ukrainianism. The archimandrite V. Maksymenko was an influential supporter of the *Black Hundreds movement and of publications such as *Pochaevskii listok*. During the interwar period, its archimandrite was the metropolitan of Warsaw of the Polish Autocephalous Orthodox church, but now he is the bishop of Lviv and Ternopil. After western Volhynia was incorporated into the Ukrainian SSR following the war, the Pochaiv area was annexed to Ternopil oblast, and the hierarch of Lviv-Ternopil served as archimandrite. The monastery lost its estates, falling victim to the antireligious policies of the Soviet regime. The number of monks declined sharply, from 200 in 1939 to 74 in 1959 and approx 12 in 1970. Nonetheless, efforts by the Soviet authorities to close the monastery outright in 1964 were met by protests of local Ukrainians and of the international community. The monastery remained open, but many of its artifacts were confiscated and housed in the Pochaiv Museum of Atheism, located at the monastery.

Before the revolution, the Pochaiv Monastery was a popular destination for religious pilgrims, tens of thousands of whom came to celebrate the feasts of the Dormition (28 August) and of St Yov Zalizo (10 September). Among its most revered artifacts are a 'footprint' of the Mother of God, a miracle-working icon, and the relics of St Yov.

Architecturally, the Pochaiv Monastery appears as a complex of buildings uniquely adapted to the natural environment. The buildings are set on a cliffside, rising to a three-story terrace with a parapet. The terrace is the site of the central Dormition Cathedral, built in 1771-83 in the Rococo style by the Silesian architect G. Hoffman. The vast cathedral (it can accommodate 6,000 people) has eight large and seven smaller cupolas, and two large arches at the front. The sculptures within were created by M. Poleiovsky (1781-6), and the fresco on the dome was rendered by P. Preniatytsky. L. *Dolynsky painted the icons for the iconostasis, the 'Miracle of Christ' cycle, and 50 other smaller works, all in the classical style, and L. and I. Bernakevych crafted the engravings for the church. The cathedral suffered a fire in 1869, and only four of Dolyn-

The Dormition Cathedral (1771–91) at the Pochaiv Monastery

sky's works were saved, but the original appearance of the interior has been preserved in a drawing by T. Shevchenko (1846). The cathedral was renovated in 1876 by local icon painters. Other buildings in the Pochaiv Monastery complex include the monks' cells (1771–80), which surround the cathedral, the bishop's residence (1825), built in the classical style, and a large bell tower (1861–71). The Trinity Church, constructed in 1910–13 after a design by A. Shchusev, was built in the Novgorod style of the 12th to 13th centuries, and differs markedly from other structures in the complex.

Pochaiv Monastery Press (Pochaivska drukarnia). An important early press in Ukraine, established at the Pochaiv Monastery in 1730 after it became a Basilian monastic center. Granted royal charters in 1732 and 1736, the press was subsidized by Bishop T. Rudnytsky-Liubienitsky of Lutske. Between 1731 and 1800 it published over 355 books, most of them liturgical ones, but also didactic, theological, and polemical works, literary works in Polish and Latin, collections of documents on Ukrainian church history, primers, textbooks, and educational works. Some

of its editions – eg, **Narodovishchanie* (1756), a collection of catechismal and didactic literature, and **Bohohlasnyk* (1790), a collection of poems and religious songs – were among the highest achievements of Ukrainian publishing and literature of the time.

The press's publications were known for their artistic ornamentation and the quality of their paper and print. Many were printed in the so-called Pochaiv cursive, a typeface based on Ukrainian calligraphy of the 16th to 18th centuries. Illustrations and engravings were done by well-known artists, such as N. Zubrytsky, A. and Y. Hochemsky, A. Holota, and F. Strilbytsky.

After the Pochaiv Monastery was taken over by the Russian Orthodox church in 1831, the press continued printing religious and secular books, including several on the history of Volhynia. It printed the eparchial newspaper of Volhynia gubernia (1867–1915) and the reactionary newspaper *Pochaevskii listok*, later a major organ of the Union of the Russian People. The press was closed down in 1918, and part of its equipment was moved to Kiev and thence to Moscow and finally Warsaw.

Pochapy settlement. A multilayered archeological site near Pochapy, Zolochiv raion, Lviv oblast. The site was excavated by Ya. *Pasternak and T. Sulimirski in 1931–2. Paleolithic flint remains, traces of a Mesolithic settlement, an early Bronze Age burial site, and indications of an early Iron Age settlement were found there.

Pochasky, Sofronii [Počas'kyj, Sofronij] (secular name: Stefan), b and d ? Church activist, pedagogue, and writer of the first half of the 17th century. He studied at the Kiev Epiphany Brotherhood School and possibly abroad before becoming a preacher at the Kievan Cave Monastery and a professor of rhetoric at the monastery school (1631–2). He was a professor at and rector of (1638–40) the Kievan Mohyla College (later Academy) and cofounded an Orthodox school in Iași (Moldavia). From 1640 until his death he was hegumen of the Three Hierarchs Monastery in Iași. He edited and published a collection of panegyric poems by the students of the Kievan Mohyla College, entitled *Eucharisterion ...* (1632), dedicated to Metropolitan P. *Mohyla.

Pochatkova shkola (Primary School). A pedagogical organ of the Ukrainian Ministry of Education, published monthly in Kiev since 1969. The journal addresses questions of the organization of education and upbringing in primary schools and contains materials to aid teachers, educational administrators, and parents. It also prints articles about artists, authors, and composers whose works

are studied in the elementary school program. In 1982 it appeared in a pressrun of 82,000.

Pochep [Počep]. I-14. A town (1959 pop 15,700) on the Sudost River and a raion center in Briansk oblast, RF. It was first mentioned in historical documents in the 15th century. In 1503 it was transferred from Lithuanian to Muscovite control, and in 1616, to Polish control. From the mid-17th century it was a company center of Starodub regiment in the Hetman state. In 1686 it came under Russian rule, and during the 19th century it was a trading town in Mglin county, Chernihiv gubernia. In 1917 it became a county center. According to the census of 1926, Ukrainians accounted for 11.7 percent of the population in Pochep county.

Pochynok, Tymotei [Počynok, Tymotej], b 26 February 1885 in Uhryn, Chortkiv county, Galicia, d 3 November 1962 in Detroit. Pioneer of the Ukrainian socialist movement in the United States. Influenced by the writings of M. Drahomanov, he supported the *Ukrainian Radical party in his youth. He emigrated to the United States in 1908. The following year he organized a Ukrainian branch of the Socialist party and the Volia society in Scranton, Pennsylvania. After moving to Detroit in 1910, he set up another branch there. The Ukrainian Federation of the Socialist Party (est 1912) appointed him editor of its paper *Robitnyk* in 1914. A consistent defender of Ukrainian independence, Pochynok resigned from the federation when it assumed a communist orientation in 1917. He joined the Federation of Ukrainians in the United States and then *Oborona Ukrainy* (1923). In 1930 he began to publish the paper *Pora* (later called *Ukrains'ka hromads'ka pora*), which supported the policies of the Ukrainian Radical party. After the dissolution of *Oborona Ukrainy* in the 1940s, he joined the Ukrainian Free Society of America.

Pochynok, Viktor [Počynok], b 1 May 1915 in Kiev. Organic chemist. After graduating from Kiev University (1939) he worked there and became a professor (1962) and chairman of the monomers and polymers department (1963). His work on heterocyclics, polymers, and monomers was directed at the chemistry of photographic processes (in particular at silver-free photographic emulsions) and biologically active polymers. He discovered the azido-tetrazole tautomerism and was the first to introduce long chain-substituted aromatic triazenes as alkylating agents.

Poděbrady. A city (1985 pop 15,000) in Czechoslovakia on the Laba River approx 50 km east of Prague. The city was the site of the *Ukrainian Husbandry Academy (UHA, 1922–35) and the *Ukrainian Technical and Husbandry Institute (1932–45). In 1926 there were 800 Ukrainians there. It also served as a center for 52 Ukrainian organizations, of which 38 were connected to the UHA. Among the latter were the Academic Hromada of the UHA, the Community of Students of the UHA, an academic choir of 50 singers, a writers' group, a drama group that staged over 30 productions, a banduryst association, and a sporting club. The Academic Hromada published a journal, *Nasha hromada*. Poděbrady was the center for the *League of Ukrainian Nationalists (headed by M. Stsiborsky) in 1925–9. Local branches of the Plast Ukrainian Youth Association and Sokil were also active there.

Poderviansky, Serhii [Poderv'jans'kyj, Serhij], b 15 July 1916 in Kiev. Painter. After graduating from the Leningrad Institute of Painting, Sculpture, and Architecture (1952) he began teaching at the Kiev State Institute of Art. His watercolor and tempera works consist of portraits and genre paintings, such as *Valia* (1958), *Abandoned* (1961), *Behind a Living Wall* (1965), and *In the Days of Occupation* (1980), and posters.

Podgorny, Nikolai. See Pidhirny, Mykola.

Podil district in Kiev (lithograph, 1862)

Podil (originally Podoliie, or 'lower part'). The northern part of the old city of Kiev, situated on the lower terrace of the Dnieper's right bank between the mouth of the Pochaina River and the slopes of the Starokyivska, Zamkova, Khorevytsia, and Shchekavytsia hills. During the Princely era, beginning in the 9th century, Podil was the heart of commerce and artisanry in Kiev. Separate districts of potters, pitch makers, and tanners and the town's harbor and customs house were located there. At the center was a large marketplace, Torzhyshe. After the sack of Kiev's upper town by the Mongols in 1240, Podil became the central part of Kiev. In the 16th century the town hall, the *Kiev Epiphany Brotherhood and its monastery and school, and the *Kievan Mohyla Academy were built there, and from 1798 the annual *Kiev Contract Fair was held there. Much of Podil was destroyed in the great fire of 1811, but the district was rebuilt, and new streets were created. In the 19th and early 20th centuries Podil was the main commercial district of Kiev. Today it is located in Kiev's Podilskyi raion.

Mykhailo Podilchak

Podilchak, Mykhailo [Podil'čak, Myxajlo], b 14 August 1919 in Korovytsia, Liubachiv county, Galicia. Surgeon. A graduate of Prague University (1942), he worked at a pediatric surgery clinic in Lviv and was a professor at the Lviv Medical Institute and from 1961 head of the hospital surgery department. His more than 170 publications include *Vplyv mikrobnoi infektsii na rak* (The Influence of Microbe Infection on Cancer, 1950) and *Khronicheskoe vospaleniie i opukholevyi rost* (Chronic Inflammation and Tumor Growth, 1965).

Podilia (Podolia). A historical-geographical upland region of southwestern Ukraine, consisting of the western part of the forest-steppe belt. Podilia is bounded in the southwest by the Dniester River, beyond which lie the Pokutian-Bessarabian Upland and Subcarpathia. To the north it overlaps with the historical region of Volhynia, where the Podolian Upland descends to Little Polisia and Polisia. In the west it is bounded by the Vereshytia River, beyond which lies the Sian Lowland. To the east Podilia passes imperceptibly into the Dnieper Upland, with the Boh River serving as part of the demarcation line, and in the southeast it descends gradually toward the Black Sea Lowland and is delimited by the Yahorlyk and the Kodyma rivers. The Podilia region thus coincides with the Podolian Upland, which occupies an area of approx 60,000 sq km.

The name Podilia has been known since the mid-14th century, but it did not originally refer to the aforementioned geographical region or to a single administrative-territorial unit. It usually meant the land between two left-bank tributaries of the Dniester, the Strypa River in the west and the Murafa River in the southeast, and the Boh River in the east, an area of approx 40,000 sq km. Podilia voivodeship, established at the beginning of the 15th century, encompassed only the central part of Podilia. During the Polish-Lithuanian Commonwealth Podilia was understood to include not only Podilia voivodeship but also Bratslav voivodeship and the northeastern part of Rus' voivodeship. Its southern and southeastern areas, however, remained unsettled, and the border between the commonwealth and the Ottoman Empire marked by the Kodyma and the Syniukha rivers was only conventional. In the 19th century eastern Podilia often meant Podilia gubernia, which consisted approximately of the former Podilia and Bratslav voivodeships, whereas western Podilia meant the eastern part of Galicia. At the beginning of the 20th century the name Podilia was applied to lands as far west as the Zolota River. Today Podilia encompasses Ternopil oblast (although the Kremianets area historically belonged to Volhynia), almost the whole of Khmelnytskyi and Vinnytsia oblasts, and small parts of Lviv and Ivano-Frankivske oblasts.

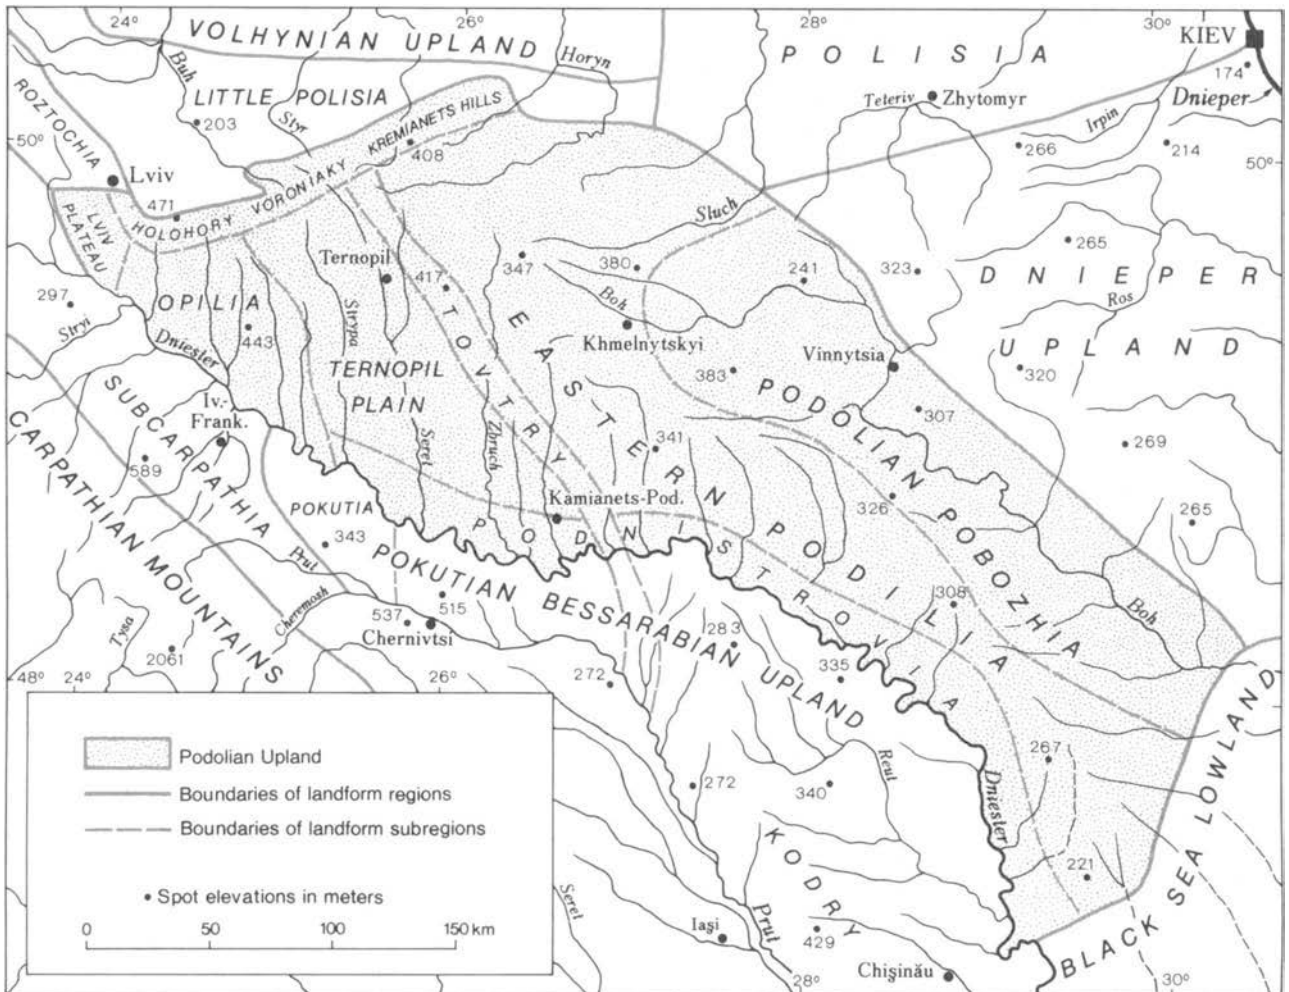

The history of Podilia was strongly influenced by its proximity to the steppe, for centuries the source of nomadic raids. For a long time much of Podilia was under the control of the Pechenegs, Cumans, and Tatars. From the mid-15th century Podilia was the favorite target of Tatar raids. When they diminished, the fertile region attracted Polish colonists from the northwest, who filled the political power vacuum.

Physical geography. Structurally, Podilia is connected to the following tectonic regions: the western slope of the *Ukrainian Crystalline Shield, the *Volhynia-Podilia

Plate, and the Galician-Volhynian Depression. The Precambrian foundation of Podilia is exposed in the east by the Boh River, which has eroded the thin Tertiary deposits. To the southwest the shield dips (down to 6,000 m) below Paleozoic deposits of Silurian limestones and sandstones and Devonian red Terebovlia sandstones, marls, and dolomites, which constitute the bedrock of 'Paleozoic Podilia' between the Zolota Lypa and the Murafa. Jurassic deposits appear on the surface only in western Podilia along the Dniester. Thick deposits of Cretaceous chalk and marl (exposed in western Podilia and in deep ravines) and of middle Miocene sands, sandstones, marls, and limestones are found throughout Podilia. They are covered with layers of Quaternary clays, silts, and loess (up to 20 m thick).

Podilia is a plateau dissected by valleys that has an elevation of 300–400 m above sea level. The region may be differentiated into a number of landscapes according to geological formation, elevation, distance from the baseline of erosion (for most of Podilia, the Dniester), and tectonic movement. The highest part of Podilia is its northern rim, known as the *Holohory-Kremianets Ridge, approx 350–470 m above sea level (Kamula, 473 m). From there elevations drop sharply (150–200 m) to Little Polisia. The western part of Podilia, west of the upper reaches of the Zolota Lypa, the Koropets, and the mouth of the Strypa, is known as Opilia Upland. With elevations ranging from 350 to 470 m, Opilia has a foundation of soft gray Cretaceous marl, which was eroded vertically and laterally by rivers to produce a hilly landscape. East of Opilia, Podilia is divided from the northwest to the southeast by a low ridge, the *Tovtry, into western and eastern Podilia. Western Podilia consists of the Ternopil Plain in the north and the gullied fringe along the Dniester in the south. The Ternopil Plain is characterized by relatively flat interfluges and broad, often swampy river valleys (now containing many artificial ponds) in the soft chalk bedrock. Farther south, as the rivers cut into the Devonian sandstones and then into the Silurian shales, their profile becomes steeper, white water and waterfalls appear, and the valleys turn into deep ravines. The deepest and most spectacular ravine is that of the Dniester: it is carved approx 100–150 m below the adjacent uplands, sometimes in a straight line but more frequently in tightly twisting meanders. The upland between the ravines is a gently undulating plateau. Wherever chalk deposits come close to the surface along the Dniester, karst phenomena abound – sink holes, temporarily or permanently filled with water, and caves, notably at Bilche Zolote and Kryvche.

The mostly featureless plain of Podilia proper is interrupted by the Tovtry or Medobory. East of them lies eastern Podilia, of which the northern and southern parts are different. The northern part, which encompasses the headwaters of the tributaries of the Prypiat and the Dniester rivers as well as the drainage basin of the upper Boh River, resembles the Ternopil Plain. Reaching 360 m above sea level, the upland consists of broad intervalley crests rising slightly above broad, often swampy and ponded valleys. The highest elevations occur along the watersheds between the Prypiat drainage basin to the north and the Dniester and the Boh drainage basins to the south and between the Boh and the Dniester drainage basins. The southern fringe of eastern Podilia is a continuation of the Dniester region, a zone of ravines and gullies

PODILIA'S LANDFORM REGIONS

flanking the northern bank of the Dniester River. Near Yampil the deep Dniester Gorge exposes the granite foundation of the Ukrainian Crystalline Shield.

The easternmost part of Podilia, often called the Podolian Pobozhia region, is a transition zone between Podilia and the Dnieper Upland, from a plateau to a granitic landscape. Elevations there reach 300 m above sea level, and the rivers cut deep ravines and valleys (500–570 m), especially to the south.

The climate of Podilia is temperate continental. The continentality increases from the northwest to the southeast, as is evident in the increasing annual temperature range, from 23°C in Opilia to 25.5°C in the east. The number of days with temperatures above 15°C also increases, from 100 in the west to 120 in the southeast. The greatest precipitation occurs in Opilia and along the northern rim, where it exceeds 700 mm per year, and along the Tovtry, and the lowest, along the southern slopes, where it is approx 475 mm. Most of the precipitation occurs in the summer, often in the form of downpours. There is a marked difference in temperature between northern and southern Podilia: whereas in Ternopil the average January temperature is -5.5°C, in Zalishchyky (100 km south, on the Dniester), it is -4.7°C; and the corresponding average July temperatures are 18.3°C and 19.4°C. The growing season is

203 and 215 days. The warmest areas are the sheltered, south-facing slopes in the Dniester Gorge.

The river network of Podilia is fairly dense. The densest drainage network consists of the numerous south-flowing streams that empty into the Dniester River. The drainage system of the Boh River Basin and the network contributing to the Prypiat River are less dense. Only the Dniester River can be navigated by shallow-water rivercraft. The hydroelectric potential of the rivers has not been fully exploited. In the south the rivers provide some water for irrigation.

The most common soils in Podilia are (1) the moderately fertile gray and light gray podzolized soils on loess, mostly in the southeast, (2) the hilly, fertile degraded chernozems and dark gray podzolized soils on loess, mostly in the west, and (3) the highly fertile, low-humus typical chernozems on loess, mostly in the northeast. The soil types are frequently interspersed among one another, especially in the deeply sculpted and therefore highly varied Dniester region.

The vegetation of Podilia is influenced by its transitional location, between the Carpathian Mountains in the southwest, Polisia in the north, and the steppe in the south, and by its special morphology and soils. Most of Podilia belongs to the forest-steppe belt. Forests cover less

than 10 percent of the region: substantial tracts are found only in the Tovtry, in the Dniester Gorge and its tributaries, and along the Boh River. The distribution limits of a number of eastern and western plant species run through Podilia. The eastern limits of the beech, yew, fir, and spruce lie in western Podilia. The most common trees found in central and eastern Podilia, therefore, are the oak and hornbeam, with admixtures of ash, maple, elm, and cherry. By human intervention mixed oak groves are being replaced by uniform woods of hornbeam. The underbrush is dominated by hazel, snowball tree, buckthorn, and red bilberry. Some of the eastern species, such as the common maple, do not penetrate farther west. A peculiar vegetation complex is found in the ravines of Podilia and on the rock outcrops and detritus. The meadow steppes of Podilia are fully cultivated. At the end of the 19th century, the last remnant of the steppe, between the Seret and the Strypa rivers, was known as the Pantalykha Steppe. It contained a great variety of herbs and broad-leaved grasses typical of the meadow-steppe, including the lungwort, nettle, and madder.

The transitional nature of Podilia also determines its fauna. The more densely forested western part is inhabited by the fox, the rabbit, two kinds of marten, the squirrel, and the now-rare wolf and boar. Valuable fur-bearing animals, such as the mink and otter, lived along the rivers. Among forest birds the goldeneye, and in the meadows the partridge and quail, were common. In western Podilia near Subcarpathia the typical animals were the ermine, weasel, wildcat, boar, and muskrat; among the ungulates, the chamois and deer; in wet areas, the salamander; and among the birds, the bullfinch. The peripheral location of western Podilia was suited to some West European fauna, including certain varieties of bat, vole, and insect. At the same time some steppe fauna, such as the mole-rat, polecat, field vole, gopher, steppe lark, black-headed yellowhammer, and, less frequently, the bustard, the steppe snake, the green lizard, the boa, and a variety of mollusks, insects (including beetles), and spiders, intruded into Podilia. In the southeast most of the steppe fauna was adapted to wide open spaces and a rather dry climate. As farming spread, so did various mice, field voles, and other small rodents, as well as various insect pests.

Prehistory. The oldest traces of human habitation in Ukraine are found in Podilia and the Crimea. The site at Luka-Vrublivetska belongs to the Acheulean culture (400,000–100,000 years ago) of the Lower Paleolithic Period. From that time Podilia was continuously inhabited, by Neanderthal humans of the Mousterian culture of the Lower Paleolithic Period, by Cro-Magnon humans of the Aurignacian, Solutrean, and Magdalenian cultures of the Upper Paleolithic Period, and finally by humans of the Campignian culture of the Mesolithic Period.

History. According to Herodotus the forest-steppe belt, including Podilia, was inhabited by Scythian farmers, whose way of life differed from that of Scythian nomads in the steppe. Beginning in the 2nd century BC the Scythian nomads were displaced by the Sarmatians, who often raided the Podolian settlements. At the end of the 1st millennium BC the warlike Venedi and the Celtic Bastarnae crossed Podilia, but neither left a significant cultural impact on its population, which continued to grow grain and sell its surplus to the Greek colonies on the Black Sea and the Roman merchants in Dacia. From the 1st to the 4th

century the Cherniakhiv culture prevailed in the Ukrainian forest-steppe belt, including Podilia. The early Slavic tribes, known as the *Antes in Byzantine sources, were the most likely bearers of that culture. They survived the invasion of the Goths (4th century) and the Huns (5th century) and finally collapsed under the onslaught of the Avars (7th century).

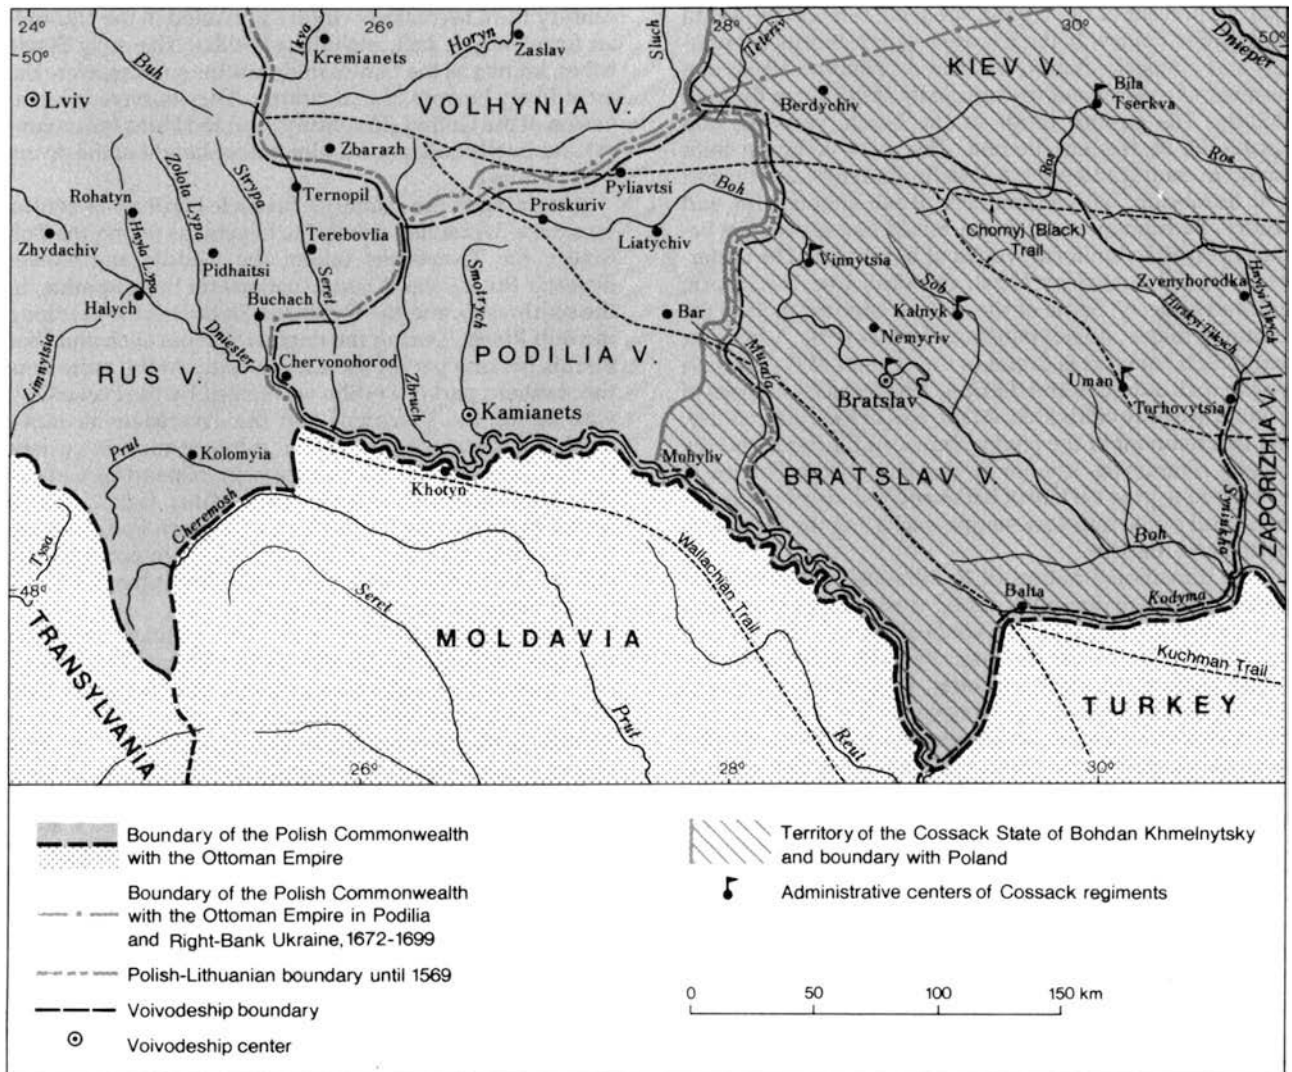

According to the Primary Chronicle Podilia was settled by several Ukrainian tribes: the Ulychians (along the Boh River), the Tivertsians (along the Middle and Lower Dniester River), the White Croats (in Subcarpathia, in the southwest), and the Dulibians (in the northwest along the Buh River). During the reign of Princes Oleh and Ihor Podilia became part of the Kievan state. At the same time the southern part of Podilia was seized by the Pechenegs, who forced the Ulychians and the Tivertsians to move north. As Kiev's power waned, it lost interest in eastern Podilia, and the region became a marchland of Galicia. The Tatar Burundai's campaign against Galicia (1259) sealed Podilia's fate for a century. Western Podilia along with Galicia remained under the Romanovych dynasty, and middle and eastern Podilia was administered directly by the Tatars of the Golden Horde.

Under Lithuanian-Polish rule. The political situation changed radically in the mid-14th century. The Lithuanian grand duke Algirdas defeated the Tatars at Syni Vody (1363), captured middle Podilia, and granted it as a fiefdom to his relatives, the Koriiatovych family. The new masters built fortified towns, including Smotrych, Bakota, and Kamianets-Podilskyi. After the death of the last Galician prince, Yurii II Boleslav, Casimir III annexed Galicia (1349) and western Podilia (1366), which was integrated with Poland in 1387. The conflict between Poland and the Lithuanian grand duke Vytautas over middle Podilia and its principal town, Kamianets-Podilskyi, led to the expulsion of F. Koriiatovych in 1393. Vytautas kept eastern Podilia (the Bratslav and Vinnytsia regions) and ceded middle Podilia to Jagiełło of Poland (1395) but later reclaimed it (1411). After the duke's death the pro-Polish gentry of middle Podilia declared it Polish and turned it into *Podilia voivodeship. Western Podilia was incorporated into *Rus' voivodeship.

Polonization in Podilia was promoted not only by the Polish administration but also by the Roman Catholic church, which established a diocese in Kamianets-Podilskyi. Ukrainians became a minority among the nobility, and eventually only the petty gentry, who served in the borderland forts, remained Ukrainian. Meanwhile the population of Podilia grew, because the fertile soil and the relatively undemanding corvée attracted peasants. The towns attracted mainly Poles and Jews as well as some Germans and Armenians.

After 1430 only eastern Podilia, with the towns of Bratslav and Vinnytsia, remained under Lithuania. The Poles made every effort to annex that part and succeeded in doing so in the Union of Lublin (1569). From then, Polish magnates swarmed into eastern Podilia, where they set up enormous estates and seized key administrative positions. Eastern Podilia became *Bratslav voivodeship.

Crimean Tatar raids, which began in the second half of the 15th century, crippled Podilia's developing economy. The Crimean Horde regarded Podilia not only as an object of prey but also as a gateway, via the Kuchmanskyi Route and the Black Route, to the more populous lands of Vol-

PODILIA, 16TH AND 17TH CENTURIES

hynia, Galicia, Kholm, and Poland proper. At the beginning of the 16th century southeastern Podilia became deserted, and the advances in colonization made during the 15th century were lost. Colonization resumed in the mid-16th century. As the demand for grain rose in Western Europe, the large landowners in Podilia developed commercial farming and raised the corvée obligations of the peasants. The Cossacks and the alienated Ukrainian burghers came to the defense of the peasantry. The Cossack state set up by B. Khmelnytsky encompassed only a part of Podilia; namely, Bratslav and Kalnyk regiments. When Poland and Muscovy divided Ukraine into the Right-Bank and Left-Bank hetmanates in 1667, Podilia became part of Right-Bank Ukraine. Hetman P. Doroshenko's attempt to reunify Left-Bank and Right-Bank Ukraine with Turkey's help ended with Turkey's annexation of Podilia voivodeship (1672). Although Doroshenko retained control of the Bratslav region, continuous warfare, Tatar raids, and Turkish oppression caused mass migration into Left-Bank Ukraine. In 1699 Podilia was taken by Poland. In 1712, after an unsuccessful rebellion, the Cos-

sack regiments were disbanded. In the first half of the 18th century Podilia was colonized intensively. Peasants, mostly from Rus' voivodeship and Volhynia but also from Left-Bank Ukraine, Moldavia, and Poland proper, poured into the depopulated territory. By the mid-18th century Podilia voivodeship had the highest population density in the Polish Commonwealth. Although Tatar raids had ceased, there was no lasting peace in the region. National and religious oppression along with increasing corvée provoked the so-called haidamaka uprisings against the Polish nobility. Centered in the southern part of the Kiev region and the southeastern part of the Bratslav region, they encompassed all of eastern Podilia.

The modern period. With the First Partition of Poland (1772) western Podilia, east to the Zbruch River, was annexed by Austria, and with the Second Partition (1793) eastern Podilia was transferred to Russia. A portion of Austrian-ruled Podilia (Ternopil and Zalizhchyky counties) was held briefly (1809-15) by Russia. After the division each part of Podilia developed differently. In eastern Podilia the intensification of serfdom gave rise to peasant

PODILIA, 1861-1917

discontent and U. *Karmaliuk’s revolts. Kamianets-Podilskyi became the administrative center of *Podilia gubernia and *Podilia eparchy. The Ukrainian national and cultural movement developed slowly in Podilia, mainly at the end of the 19th century. Its centers were Kamianets-Podilskyi and Vinnytsia. Social and economic progress in the gubernia was also slow: a zemstvo was set up only in 1911

In western Podilia, as in all Galicia, the Polish population continued to increase and to dominate the administration of the land. Nevertheless western Podilia, along with the rest of Galicia and Bukovyna, became the base of the modern Ukrainian national and political movement. Because of their proximity to Lviv the towns of western Podilia (Ternopil, Berezhany, Buchach, and Chortkiv) did not develop into great cultural and political centers.

During the struggle for Ukrainian independence (1917-20) Podilia was a battleground for the Ukrainian, Polish, Russian, and Bolshevik armies. In the interwar period western Podilia was ruled by Poland and was known as Ternopil voivodeship. Eastern Podilia, meanwhile, was part of the Ukrainian SSR. After the Second World War all Podilia became part of the Ukrainian SSR. It consisted of three oblasts: Ternopil, Khmelnytskyi (formerly Proskuriv), and Vinnytsia. It remains one of the most agricultural and least industrialized regions of Ukraine.

Population. Since the middle of the 18th century Podilia, together with Pokutia and Subcarpathia, has been the most densely populated part of Ukraine. Today those regions as well as lowland Transcarpathia have the highest rural population densities. In 1860 western Podilia was settled more densely (63 persons/sq km) than eastern Podilia (43 persons/sq km), but eventually the gap narrowed (in 1897 the figures were 96 and 75, and in 1932, 99 and 98). With a low level of urbanization (approx 10 percent) Podilia, especially its western part, was one of the most land-hungry regions of Ukraine. The peasants of western Podilia responded to the problem of employment with mass emigration (over 200,000 people between 1890 and 1913) to the New World and a reduced rate of natural increase. Emigration from eastern Podilia was smaller, partly because there was local employment in the sugar industry. Sizable population losses occurred in eastern Podilia during collectivization and in all of Podilia during the Second World War (1940-6). By 1959 the population of Podilia was still 14.5 percent smaller than in 1926. The process of urbanization was slower there than anywhere else in Ukraine. The changes in the composition and density of the population in the three Podilia oblasts (Ternopil, Khmelnytskyi, and Vinnytsia) are given in table 1. Podilia’s migration balance has continued to be negative. In the six years from 1963 to 1968 the region’s natural in-

Traditional dress of Podilia

crease was 210,000, and its net population increase only 20,000. Despite a positive natural increase the population of Podilia has declined since 1970. Population distribution, expressed as rural population density, does not vary greatly from one raion to another. Rural population densities range from 50 to 80 persons per sq km but usually lie between 60 and 70.

The settlements in Podilia are concentrated along rivers in the valleys or wide canyons, and the interflaves of the plateau are occupied by cropland. Only where the ravines are too narrow to accommodate them are villages built along the rim of the plateau.

Before industries developed, the towns of Podilia were administrative and trading centers. The smaller towns en-

gaged in local trade and services for farming. Now all the more important towns of Podilia have industries, but in comparison to other parts of Ukraine they are relatively small. In 1989 only four cities had over 100,000 residents: Vinnytsia (374,000), Khmelnytskyi (237,000), Ternopil (205,000), and Kamianets-Podilskyi (102,000). In Opilia, the westernmost part of Podilia, the smaller towns (1980 population estimates) include Berezhany (13,500), Bibrka (3,100), Khodoriv (10,000), Monastyrska (5,100), Peremyshliany (4,100), Pidhaitsi (3,300), and Rohatyn (5,500). The southwestern gullied part includes the towns of Borschiv (8,600), Buchach (11,400), Chortkiv (20,000), Kopychyntsi (7,500), Terebovlia (10,700), and Zalishchyky (8,400), and the flat northern part of western Podilia includes Ternopil, Zalistsi (2,200), Zbarazh (8,400), and Zboriv (3,900). On the northwestern rim are Brody (13,500), Kremianets (20,500), and Zolochiv (13,100). The more important economic and cultural centers are Ternopil, Berezhany, Buchach, Chortkiv, and Kremianets. In eastern Podilia, along the Dniester, the main center is Kamianets-Podilskyi; it is followed by Mohyliv-Podilskyi (26,000), Yampil (8,000), and Rybnytsia (32,300, in Moldova). The northern plain of eastern Podilia is dominated by Khmelnytskyi and, to a lesser extent, by Starokostiantyniv (22,000). On the northern border with Volhynia are Iziaslav (14,700), the rail hub Shepetivka (39,100), and Polonne (22,400). Along the Boh River Vinnytsia predominates among the small towns, such as Liatychiv (or Letychiv, 9,100), Lityn (5,300), Tulchyn (14,300), Bratslav (4,400), Bar (13,500), Khmilnyk (18,500), Derazhnia (7,900), Medzhybizh (2,800), the important railway hub Zhmerynka (36,200), and a smaller hub, Vapniarka (7,500). To the southeast are located Bershad (11,400), Balta (20,000, although in the mid-19th century it was, after Kamianets-Podilskyi, the second-largest town in Podilia), Kotovske (34,300), and Ananiv (18,900).

In past centuries there was a steady flow of Poles (particularly in the first half of the 18th century) and Jews into Podilia. The Jews constituted a majority in most of the towns. The Poles were concentrated in the north, on both sides of the Zbruch River. Some of the Poles living among the Ukrainians became linguistically assimilated and retained only their Roman Catholic faith.

During the 19th and 20th centuries interethnic relations evolved very differently in western (under Austria and Poland) and eastern Podilia (under Russia and in the Ukrainian SSR). In the eastern region the Polish and Roman Catholic element was deprived of government support and reinforcements from the west, and began to succumb to Ukrainization and, in the cities, to a degree of Russification. Most Roman Catholics were Ukrainian-speaking (in 1926, 50 percent; by 1959, up to 85 percent). The proportion of Jews in the population grew until the end of the 19th century and then began to decline. Russians were a small minority (7 percent in towns and cities, 1 percent in the villages). In southern Podilia along the Dniester (within today's Moldova) some 50,000 Moldavians were concentrated in one area. As a result of the Second World War the Jewish population fell drastically, the Polish element declined, and the Russian element increased substantially (see table 2).

In western Podilia for two centuries, particularly after the mid-19th century, the proportion of Poles increased at the expense of Ukrainians. There was a continuous flow of

TABLE 1
Population changes in Podilia, 1926-89

| Year | Total population | | Urban population | | Rural population | |
|------|------------------|-------------------|------------------|---------------|------------------|-------------------|
| | (1,000s) | Density/ sq km | (1,000s) | % of total | (1,000s) | Density/ sq km |
| 1926 | 5,690 | 93.4 | 690 | 12.1 | 5,000 | 82.1 |
| 1959 | 4,840 | 79.5 | 850 | 17.6 | 3,990 | 65.5 |
| 1970 | 4,900 | 80.5 | 1,240 | 25.3 | 3,660 | 60.1 |
| 1989 | 4,628 | 76.0 | 2,057 | 44.4 | 2,571 | 42.2 |

TABLE 2
Ethnic composition of Khmelnytskyi and Vinnytsia oblasts, 1897–1989 (percentages)

| Nationality | 1897 | 1926 | 1959 | 1979 | 1989 |
|-------------|------|------|------|------|------|
| Ukrainian | 75.3 | 85.1 | 91.3 | 91.4 | 92.4 |
| Jewish | 12.3 | 7.8 | 1.8 | 1.3 | 1.0 |
| Polish* | 8.8 | 3.7 | 2.4 | 1.5 | 1.1 |

*Including Ukrainian-speaking Roman Catholics

Poles from the western (Polish) part of Galicia to the towns dominated by a Polish administration and to farmlands sold off by Polish landowners. Emigration to the New World, which drew proportionally more Ukrainians than Poles, and the Polonization of Ukrainians through conversion from the Uniate (Greek Catholic) faith to Roman Catholicism were less significant. The changes in the composition of the population according to religion are shown in table 3. The greatest loss of Ukrainians occurred in a zone extending from Lviv to the Zbruch River, where the Poles and the Ukrainian-speaking Roman Catholics represented about one-third of the population. Most of the residents in the towns of western Podilia were Jewish; in number they were followed by Poles or Ukrainians. By contrast, in eastern Podilia one-half of the urban population was Ukrainian, over one-third was Jewish, and an insignificant proportion was Polish. As a result of the Second World War the ethnic composition of western Podilia changed dramatically, and today it resembles that of eastern Podilia. In Ternopil oblast the ethnic composition for 1959 and 1979 indicates the persistent growth of the Ukrainian element: Ukrainians made up 90.2 and 96.6 percent, Russians, 2.5 and 2.2 percent, Poles, 2.2 and 0.9 percent, and Jews and others, 5.1 and 0.3 percent.

TABLE 3
Religious affiliation in western Podilia, 1857–1931 (percentages)

| Religion | 1857 | 1880 | 1900 | 1910 | 1921 | 1931 |
|----------------|------|------|------|------|------|------|
| Uniate | 63.0 | 62.0 | 61.0 | 60.3 | 59.2 | 54.9 |
| Roman Catholic | 25.4 | 24.1 | 26.6 | 28.4 | 32.2 | 37.2 |
| Jewish | 10.9 | 13.3 | 11.9 | 11.2 | 8.3 | 7.7 |
| Other | 0.7 | 0.6 | 0.5 | 0.1 | 0.3 | 0.2 |

Economy. Agriculture has always been the foundation of the Podilian economy. In the 1920s nearly 80 percent of the population was employed in farming and less than 10 percent worked in the trades and industry. Until the mid-1930s only the food industry, consisting of the sugar industry and liquor distilling, was developed. The sugar industry was limited to eastern Podilia, because Czech competition and Polish competition after the war blocked its growth in western Podilia. During the Soviet period industrialization was speeded up, but Podilia remains one of the least industrialized regions in Ukraine.

Agriculture. Most of the land in Podilia is tilled (72 percent). The rest is devoted to hayfields, meadows and pastures (7 percent), orchards and berry plantings (3 percent), and forests (nearly 15 percent). The sown area in the three

oblasts of Podilia in 1987 totaled 4,187,000 ha, of which 2,014,000 ha (48.1 percent) were devoted to grain. As in the rest of Ukraine the share of the grain area has declined, from about 75 percent in the 1920s, and the share of land given to industrial crops (especially in Galician Podilia) and fodder crops has increased. Sugar beet is Podilia's predominant industrial crop; it occupies 489,000 ha (88 percent of all industrial-crop land, or 12 percent of all crop land) and represents 23 percent of the sugar-beet area in Ukraine. The sugar-beet area has increased by almost two and a half times since 1940 (especially in western Podilia). Other industrial crops include sunflower (50,000 ha, mostly in Vinnytsia oblast), rape, tobacco, hemp, aromatic oil seeds, and medicinal herbs. The area of feed crops has increased by 2.45 times since 1940; it amounted to some 1,305,000 ha, or 31.2 percent of the sown area, in 1987. Besides perennial and annual grasses, corn and other feed crops are raised. The sown area in potatoes and vegetables has declined from 424,000 ha in 1940 to 314,000 ha (7.5 percent of the sown area), a reflection of the falling demand for potatoes. After Southern Ukraine Podilia is the second most important fruit-farming region in Ukraine. Orchards in Podilia occupy over 200,00 ha, and vineyards, over 5,000 ha. The most common fruit trees are apple, plum, pear, cherry, morello cherry, apricot, peach, and walnut.

In animal husbandry the leading branches are dairy and beef farming and hog raising (see table 4).

TABLE 4
Livestock and livestock products in Podilia in 1975

| | Land productivity | |
|-------------------------|---------------------------------|----------------|
| | Per 100 ha of agricultural land | % of Ukraine's |
| <i>Livestock (head)</i> | | |
| Cattle | 3,157,000 | 67.5 |
| of which cows | 1,207,000 | 25.8 |
| Hogs | 2,950,000 | 63.0 |
| Sheep and goats | 713,000 | 15.2 |
| <i>Products (t)</i> | | |
| Meat and fat | 471,000 | 10.10 |
| Pork only | 235,000 | 5.00 |
| Milk | 2,733,000 | 58.40 |
| Wool | 1,800 | 0.04 |

Podilia produces commercial surpluses of sugar beets, which are processed locally, fruits, and animal products. There is little regional specialization in agriculture, but the region south of Ternopil is known for its tobacco, and the regions along the Dniester in eastern Podilia, to the south of Khmelnytskyi and to the southwest of Vinnytsia, are known for their fruits and vegetables.

Industry. Podilia lags considerably behind other parts of Ukraine in industrial development. Its main industry is food processing, which accounts for about 60 percent of the value of its industrial output; food processing is followed by machine building and metalworking (15 percent), light industry (13 percent), and the building-materials industry (6 percent). The dominant branch of the food industry in Podilia is sugar refining (39 enterprises in Vinnytsia oblast alone); in 1987 that branch produced some 2.1 million t, or 28 percent of Ukraine's output of

sugar. Liquor distilling is another important branch. Its raw materials are molasses (a by-product of the sugar industry), potatoes, and grain. Over 30 enterprises in the region produce alcohol. Their subsidiary operations include the production of feed yeast and vitamins. The largest distilleries are located in Bar and Kalynivka, in Vinnytsia oblast. The meat-processing industry is highly developed. Large meat packing plants are located in the three oblast centers. The dairy industry, which produces 42,000 t of butter per year (14 percent of the republic's total), is widely distributed. Its largest plant is in Horodok. The largest urban (fluid milk) dairies are located in the oblast centers. Podilia contributes about 12 percent of the republic's canned fruits and vegetables. Oil pressing, flour milling, baking, confectionery manufacturing, brewing, and tobacco processing are mostly of regional or local significance.

The machine-building and metalworking industries arose in Podilia mostly in the 1950s and 1960s, along with related electrotechnical and chemical industries, and continue to grow in importance. Their main products are electrotechnical equipment, tractor assemblies and bearings, equipment for sugar refineries, transformer substation equipment, foundry equipment, and sheet-metal presses, tractor parts, electrical equipment, and agricultural machinery. The Vinnytsia Chemical Plant, which produces granulated superphosphate with manganese, was one of the largest fertilizer plants in the Soviet Union. Podilia's light industry manufactures textiles, garments, and footwear. Its textile plants produce nearly 12 percent of the cotton cloth and 7 percent of the woolen cloth manufactured in Ukraine.

The building-materials industry includes the quarrying and finishing of granite and marble blocks, the mining and processing of limestone and chalk, brick-making, and tile manufacturing. Wood, mostly from Polisia, is used to make cellulose and paper in Poninka and paper in Slavuta, Polonne, and Rososha. Altogether the industry contributes nearly 23 percent of Ukraine's paper production.

The fuel and power industries of Podilia depend on coal, petroleum products, and natural gas brought in from the Donbas, Subcarpathia, and Shebelynka respectively. Electricity is generated principally at small thermal stations in Vinnytsia, Mohyliv-Podilskyi, Khmelnytskyi, Kamianets-Podilskyi, Shepetivka, Ternopil, and Kremianets, but their output has not met the needs of the region. It is supplemented by the new Ladyzhyn thermal-electric station on the Boh River, the Dniester Hydroelectric Station, and the Khmelnytskyi Nuclear Power Station. Most of the power from Ladyzhyn and the other new generating stations is slated for export to Hungary, Rumania, and Bulgaria.

Transport. Railways, which carry up to nine-tenths of the freight, are Podilia's most important means of transportation. Podilia has 2,542 km of track, about 11.5 percent of the republic's network, and a density of 42 km per 1,000 sq km, or 112 percent of the mean density of Ukraine. A three-pronged trunk line forms the skeleton of the railway system: it joins Lviv with Odessa through Ternopil and Khmelnytskyi and branches off at Zhmerynka through Vinnytsia to Kiev. The other major lines that pass through Podilia and are connected to the trunk are: Zhmerynka-Mohyliv-Podilskyi-Chernivtsi, Koziatyn-Shepetivka-Rivne, Shepetivka-Ternopil-Chortkiv-Chernivtsi, and

Korosten-Shepetivka-Khmelnytskyi-Kamianets-Podilskyi. The most important railroad junctions are Zhmerynka, Koziatyn, Shepetivka, and Vapniarka as well as the major cities of Ternopil, Khmelnytskyi, and Vinnytsia. Highways are of less importance, although they are necessary for truck transport, which serves agriculture and the food-processing industries. Podilia has 22,800 km of roads, of which 16,300 km are hard surface. Those figures represent 14 percent and 12 percent of the republic's road networks respectively. The principal highway from Kiev and Zhytomyr to Chernivtsi crosses Podilia running through Vinnytsia, Khmelnytskyi, and Kamianets-Podilskyi. Several other major highways cross Podilia from west to east - Kremianets-Koziatyn, Lviv-Ternopil-Khmelnytskyi-Vinnytsia-Uman, Ivano-Frankivske-Buchach-Chortkiv-Dunavtsi-Mohyliv-Podilskyi - and from north to south - Lutske-Kremianets-Ternopil-Chortkiv-Zalishchyky-Chernivtsi and Novohrad-Volynskyi-Shepetivka-Khmelnytskyi.

Three major gas trunk lines cross Podilia from east to west. The Dashava-Kiev-Moscow line supplies natural gas to Khmelnytskyi, Vinnytsia, and other towns in Podilia. The newer pipelines, such as the Soiuz line (1978), from the southern Urals to Czechoslovakia, and the Urengoi-Czechoslovakia line (1983-4), are used exclusively for exporting gas. (See *Pipeline transportation.)

Transport on the Boh River is negligible, and on the Dniester River, limited. Recent completion of the Dniester Hydroelectric Complex has extended navigation on the Dniester.

Podilia Church Historical-Archeological Society (Podil'ske tserkovne istorichno-arkheolohichne tovarystvo). A scholarly society established in 1903 in Kamianets-Podilskyi. Its forerunner, the Podilia Eparchial Historical-Statistical Committee (est 1865), published several volumes of *Trudy* (12 vols, 1876-1916) containing valuable historical, statistical, geographic, and ethnographic studies of Podilia and Podilia eparchy's parishes and monasteries. Under its permanent president, Rev Yu. Sitsynsky, the society ran the Kamianets-Podilskyi Church Museum of Antiquities (now the Kamianets-Podilskyi Historical Museum and Preserve). In 1919 it was amalgamated with the Podilia Society. The society was forced to dissolve in late 1920. It was replaced by the Kamianets-Podilskyi Committee for the Protection of Ancient, Artistic, and Natural Monuments, under the direction of P. Klymenko, and, in 1925, by the VUAN-affiliated Kamianets-Podilskyi Scientific Society, headed by V. Chuhai, O. Polonsky, Sitsynsky, and V. Zborovets. The latter soci-

ety was abolished in the early 1930s, and many of its 70 members suffered Stalinist repression.

Podilia eparchy. An Orthodox eparchy comprising the territory of Podilia gubernia, with its see in Kamianets-Podilskyi. It was established in 1795, after the partitions of Poland, out of territory that had formerly belonged to the eparchy of Kiev and then Halych. Initially the see was in Bratslav, so afterward the eparchy was often referred to as Podilia-Bratslav eparchy. At the turn of the 20th century the eparchy had almost 1,700 parishes and 5 men's and 5 women's monasteries. In 1917, in addition to the titular bishop, the eparchy had two vicar bishops (in Vinnytsia and Balta). The Podilia Church Historical-Archeological Society published several volumes of materials on the history of the eparchy, and Yu. Sitsinsky published several histories and descriptions of the eparchy in the 19th and early 20th centuries. The eparchial organ, *Podol'skie eparkhial'nye vedomosti*, appeared from 1863 to 1917.

In the 1920s the *Ukrainian Autocephalous Orthodox church established a church okruha in Podilia, which, under Bishop I. *Teodorovych, was for some time the largest eparchy in the church. Part of the Podilia eparchy was included in the Khmelnytskyi eparchy created by the Russian Orthodox church after 1945.

Podilia gubernia. An administrative-territorial unit created in Russian-ruled Right-Bank Ukraine in 1797 out of 7 counties of Podilia vicegerency, 9 counties of Bratslav vicegerency, and 4 counties (3 in part) of Voznesenske vicegerency. Its territory (42,017 sq km) was subdivided into 12 counties: Balta, Bratslav, Haisyn, Kamianets-Podilskyi, Letychiv, Lityn, Mohyliv-Podilskyi, Olhopil, Proskuriv, Vinnytsia, Nova Ushytsia, and Yampil. The capital was Kamianets-Podilskyi. In 1811 the gubernia had 1,297,800 inhabitants. In 1897 it had 3,018,300, of whom only 7.5 percent were urban. Ukrainians constituted 80.2 percent of the total population but only 1 percent of the urban population. The major ethnic minorities were Jews (12.2 percent), Russians (3.3), Poles (2.3), and Rumanians (0.9). The gubernia was an economically backward, predominantly agricultural region. Its main industry was sugar refining. In 1914 only 8.8 percent of the population was urban. The gubernia was devastated during the First World War and Ukrainian-Soviet War and suffered many human losses. In 1923, 11.5 percent of its 3,457,000 inhabitants were urban; 31 percent of the urban population was Ukrainian, 55 percent was Jewish, and 9 percent was Russian. That year the counties were replaced by Haisyn, Kamianets-Podilskyi, Mohyliv-Podilskyi, Proskuriv, Tulchyn, and Vinnytsia okruhas, and in 1925 the gubernia was abolished.

Podilia regiment. See Mohyliv-Podilskyi regiment.

Podilia vicegerency. An administrative territory in Right-Bank Ukraine, set up in 1783 after the partition of Poland. It consisted of the former Podilia voivodeship, and its administrative center was Mohyliv-Podilskyi. In 1797 the vicegerency was abolished, and its territory was divided between Podilia and Volhynia gubernias.

Podilia voivodeship. An administrative territory formed under Polish rule in the mid-15th century. It incor-

porated most of western Podilia and consisted of Kamianets, Letychiv, and Chervonohorod counties. Its administrative center was Kamianets-Podilskyi. The Poles were expelled from the territory for a brief period during the Cossack-Polish War (1648–57) and the Turkish occupation (1672–99). During the partitions of Poland the voivodeship was divided between Austria, which annexed Chervonohorod county in 1772, and Russia, which took the rest of the territory in 1793.

Podilian dialects. The eastern group of the *southwestern dialects, bordering on the *South Volhynian dialects to the north, the *steppe dialects to the east, the *Dniester dialects to the west, and the *Bukovyna-Pokutia dialects to the southwest. They are used on the territories of what are today the southern parts of Khmelnytskyi and Vinnytsia oblasts, the northern part of Odessa oblast, the northwestern part of Mykolaiv oblast, and the western part of Kirovohrad oblast. The eastern Podilian dialects share common traits with the South Volhynian dialects, while the western dialects are most akin to the Dniester dialects, particularly in morphology.

In the Podilian dialects the pronunciation of consonants before *i* (from *ǫ*) is hard (except in the east where, eg, Standard Ukrainian [SU] *stil* 'table' is pronounced *s't'il/s'c'il*; and in sing fem adjectives in the dat and loc cases and in pl adjectives in the nom case, eg, *čorn'i koróvi*, *čorn'i kón'i* [SU *čornij koróvi*, *čorni kóni*] 'to/on the black cow, black horses'). The pronunciation of unstressed *o*, *e*, *u* is raised to *u*, *y*, *i*, particularly before a syllable with (unstressed) *u*, *i* (eg, *bujitės'a*, *pišit*, *vis'il'a* [SU *bojیتésja*, *pyšít'*, *vesillja*] 'you are afraid [pl], write [pl imperative], wedding'). Some typical pronunciations are *mn'áso* (SU *m'jásó*) 'meat', *rýbl'acyi* (SU *rýbjacyj*) 'fishy', *rímnyj* (SU *rívnyj*) 'straight', *pýsan'a* (SU *pysánnja*) 'writing', *fist* (SU *xoist*) 'tail', *lőška* (SU *lőška*) 'spoon', *zorá* (SU *zorjá*) 'star'. A prothetic *h-* is used, eg, *hyndýk* (SU *indyk*) 'turkey' (except in the west, where a prothetic *v-* is used instead, eg, *vóstryj* [SU *hóstryj*] 'sharp', and partly in the east, where SU *ískra* 'spark' is pronounced *ýskra*). There are Western Ukrainian-type pronunciations and stress; eg, *xustyný* (SU *xustýny*) 'kerchiefs', *jamý* (SU *jámy*) 'pits', *čýtan'a* (SU *čytánnja*) 'reading', *xódžu/xód'u* (SU *xodžú*) 'I go', *byrém* (SU *beremó*) 'we take', *byréty* (SU *bereté*) 'you take', *pjéty* (SU *p'jeté*) 'you drink'. In nouns there is a definite influence of the hard nominal declension on the soft; eg, *kon'óvi* (SU *konévi*) 'horse' dative, *nožóm* (SU *nožém*) 'with a knife', *pál'c'om* (SU *pál'cem*) 'with a finger', *pól'om* (SU *pólem*) 'field' instrumental, *tyl'óm* (SU *teljám*) 'cal' instrumental, *na čórnim/-omu kon'óvi/zyml'i* (SU *na čórnomu koni/zemli*) 'on the black horse/earth', *c'óju zyml'óju* (SU *cijéju zemléju*) 'with this black earth', *móju t'in'uju* (SU *mojéju tinnju*) 'with my shadow', *picuju* (SU *picčju*) 'with the stove', *d'ityj* (SU *ditéj*) 'of the children'. In the Vinnytsia region forms such as *na pál'c'ox*, *v dýn'ox* (SU *na pál'cjax*, *v dýnjax*) 'on the fingers, in the melons' are used, and the dual form of feminine and neuter nouns, eg, *dvi s'c'in'i*, *jábluc'i* (SU *stinýj*, *jábluka*) 'two walls, two apples', has been preserved. Adjectives are only of the hard type (eg, *sýnyj* [SU *sýnij*] 'blue'), except in the east, where the soft type prevails in adjectives in which the stress is on the stem (eg, *čórn'ij*, *sývij*, *l'úc'k'ij* [SU *čórnij*, *sývyj*, *ljúds'kyj*] 'black, gray, human'), and where the suffix forming the comparative degree of adjectives is *-iščyj* (SU *-išyj*), eg, *bil'iščyj* 'whiter'. In pronoun declension there are forms such as

mohó, móji, móju (SU *móho, mojęji, mojęju*) 'of my (masc, neut), of my (fem), with my (fem)', *jakýs* (SU *jakýjs*) 'some sort of' (masc), *totá, toté* (SU *ta/te*) 'that' (fem, neut), *sys'á, sysé* (SU *cja, ce*) 'this' (fem, neut).

Some typical verbal forms are *pyktý* (SU *pektý*) 'to bake', *falytys'a* or (in the east) *falytys'* (SU *xvalýtysja*) 'to boast, be proud of', *xódžu* or (in the east and southeast) *xód'u, xódyt/xódy, xód'at* (SU *xodžú, xódyt', xódjat'*) 'I walk, he walks, they walk', *nysém* (SU *nesemó*) 'we carry', *xod'im* (SU *xodim[ol]*) 'let's go', *xodit* (SU *xodit'*) 'you go' (imp), *robýjsem, robýjjes', robýlys'mo, robýlys'te* (SU *ja robýv, ty robýv, my robýly, vy robýly*) 'I made, you (sing) made, we made, you (pl) made', *búdu robýju* (SU *búdu robýty*) 'I will make', *ja s'a zabúu* (SU *ja zabúvsja*) 'I forgot', gerunds such as *xódžyn'a* (SU *xódžennja*) 'walking', and participles such as *zróbl'anyj* (SU *zróblenyj*) 'made' and (in the east) *kúpynyj, výkosynyj* (SU *kúplenyj, výkošenyj*) 'bought, mown'.

In the southwest along the Dniester, the influence of the Pokutia and Dniester dialects is evident in pronoun forms, eg, *t'ijt'a* (SU *tebé*) 'you' accusative, and in the partial retention of soft-type endings in nouns; eg, *xlópec, xlópecvy/xlópcovy, xlópcá* (SU *xlópec', xlópcevi, xlópcja*) 'boy' nominative, dative, accusative, *na zymlyjk'inc'ípól'u* (SU *na zemli/kinici/póli*) 'on the land/end/field', *v hrúdex* (SU *v hrúdjax*) 'in the chest', *toú doróhoú* (SU *tóju doróhoju*) 'that road' instrumental (in the northwest, *tom doróhom/zeml'óm/kós't'om* [SU *tóju doróhoju/zemléju/kístju*] 'that road/land/bone' instr).

Elements of the Podilian dialects, particularly lexical ones, can be found in the works of writers such as A. Svydnytsky, S. Rudansky, M. Kotsiubynsky, H. Zhurba, M. Stelmakh, and Ye. Hutsalo. Articles on the dialects have been written by H. Holoskevych, V. Ostrokovsky, A. Sorochan, V. Zborovets, B. Yatsymyrsky, Ye. Rudnytsky, M. Khrashchevsky, Ye. Hrytsak, O. Melnychuk, I. Hrytsiutenko, A. Derdiuk, T. Babina, A. Ocheretny, H. Pelykh, L. Tereshko, and K. Batsenko.

O. Horbach

Podil's'ka volia (Podilian Freedom). A weekly and later semiweekly newspaper published in Vinnytsia from July 1917 to 1918. It was nonpartisan but supported the Central Rada. The editor was D. Markovych.

Podil's'ke slovo (Podilian Word). A weekly and later semimonthly newspaper published from January 1909 to 1912 in Ternopil. It was edited by P. Chubaty and then Y. Kovalsky, who was also the publisher.

Podil's'kyi holos (Podilian Voice). A newspaper published semimonthly, then weekly, and from 1906 monthly in Ternopil from January 1904 to 1908. The organ of the Ternopil People's Organization, it was edited and published by S. Holubovych and O. Postryhach.

Podil's'kyi holos (Podilian Voice). A semimonthly newspaper published in Ternopil in 1928–30 by S. Baran. Edited by V. Bachynsky, it printed articles on politics, popular enlightenment, and farming and supported the Ukrainian National Democratic Alliance. In 1930 it had a pressrun of 1,200.

Podkarpatska Rus'. See *Pidkarpats'ka Rus'*.

Podlachia (Ukrainian: *Pidliashshia*; Polish: *Podlasie*). A historical-geographical region along the middle stretch of the Buh (Bug) River between the Kholm region in the south and the Narva River (the Belarus border) in the north and between Mazovia in the west and Volhynia and Polisia in the east. A part of the region consists of the Podlachian Lowland.

The Ukrainian name is derived from the word *liakh* 'Pole' and means 'near Poland,' whereas the Polish name is derived from *las* 'forest,' and means 'near the forest.' The name was first used in 1520 to designate Podlachia voivodeship, which extended at that time as far north as the sources of the Borba River. In the 19th century the name was applied generally to the part south of the Buh River and within the Kingdom of Poland. The northern part of Podlachia, approx 2,700 sq km, constituted Bielsk county in Hrodna gubernia. Southern Podlachia was often assigned to the Kholm region, because it lay within Kholm eparchy and (from 1912) within Kholm gubernia. The region had an area of approx 5,350 sq km and included Biala Podlaska, Volodava, and Kostiantyniv counties.

Because of its peripheral location Podlachia did not develop strong ties with other parts of Ukraine or a sharp sense of national identity. In the northern part the national distinctions between Ukrainians and Belarusians did not crystallize. Podlachia's proximity to the Polish heartland facilitated Polish expansion into the region. Flanked by Prussia on one side and the marshlands of Polisia on the other, Podlachia served as a corridor between Poland and Lithuania (the Warsaw–Vilnius route), Belarus, and Russia.

Physical geography. The geological foundation of the region consists of white chalk, which comes to the surface only near Melnyk and Volodava, in the Buh River Valley. The chalk is overlain with thick layers of glacial and alluvial deposits and here and there with thin Paleogene deposits. The landscape is typically a uniform plain. The Bielsk, Dorohychyn, and Siedlce-Janów uplands, which reach an elevation of 200 m, are separated by broad river valleys formed by meltwaters and covered with thick alluvial deposits. The rivers are sluggish and lined with marshes. The highest parts of the region consist of terminal moraines: a northern belt runs from Siedlce through Melnyk to Vysoke, and a southern belt, from Lubartów to Volodava. Southeastern Podlachia, west of Volodava, with its marshes, peat bogs, sandy soils, and numerous small lakes, resembles Polisia in landscape and is known as Volodava Polisia. The most varied topography in all Podlachia is found in the Buh Valley, which cuts deeply (up to 80 m) into the elevated plains. Podlachian soils are poor, mostly gray loamy or gray sandy soils and sometimes bog soils. The rivers draining the region, the Buh with its tributaries (the Volodavka, the Krzna, the Mukhavets, the Nurets, the Narva, and the Lisna) and the Vepr (or Wieprz), empty into the Vistula River.

Podlachia has a transitional climate between a continental and an oceanic one. Winters are mild (the average January temperature is between –3.5 and –4.5°C), and summers are cool (the average July temperature is between 18 and 18.5°C). The spring and the fall are long. Temperatures dip below the freezing point for 60 to 80 days of the year, and snow cover lasts for 80 to 100 days. The annual precipitation is approx 500 to 600 mm. The vegetation is typical of the northern forest belt, although

PODLACHIA

the southwestern part of Podlachia borders on the Central European forest belt. The eastern limit of the beech, spruce, larch, and hornbeam and the southwestern limit of the fir run through Podlachia.

History. The earliest signs of human habitation in Podlachia date back to the Upper Paleolithic and Mesolithic periods. In the Neolithic Period the region was occupied by carriers of the Pitted-Comb Pottery culture and the Buh culture. During the Bronze Age it was invaded from the west by bearers of the Lusatian culture and then,

toward the end of the Iron Age, by the Venedi. Later evidence of cremation shows that by the beginning of the modern era Podlachia was settled by Slavs from the Dnieper region. It can be assumed that by the 3rd century the region was being crossed by the Goths en route to the Dnieper region. The earliest signs of trade between Podlachia and the Kiev region date back to the 4th century.

In the 9th and 10th centuries most of the territory was settled by the Derevlians. The Drehovichians occupied the land to the north beyond the Narva River, and the Dulibians, probably the land to the south. By that time a major trade route from Poland and the Baltic countries to Ukraine and the Near East ran through Podlachia.

The medieval period. In the 10th century Podlachia became a part of Kievan Rus'; it constituted the western portion of Berestia land and then the separate Dorohychyn land. It was annexed to Volhynia principality in the 11th century and then to Turiv-Pynske principality (1088–1157). In 1238 Prince Danylo Romanovych added it to Halych principality. Until 1340 it belonged to the Principality of Galicia-Volhynia. The border between the Kievan state (Volhynia principality) and the Polish state (Mazovia principality) ran west of Briansk and Dorohychyn-Międzyrzec territories and remained stable during the period. Mazovian attempts to annex the region succeeded only for a brief period in the 1230s. Because of their security from Tatar raids and their lively trade with the Poles and the Teutonic Knights, Dorohychyn and Berestia lands played an important role in the Galician-Volhynian state in the 13th and 14th centuries. They served as launching sites of Danylo Romanovych's and his successors' campaigns against the Yatvingians. In 1253 Danylo's coronation took place in Dorohychyn. Podlachia was one of the most heavily populated regions of Ukraine at that time.

As the Galician-Volhynian state declined, the Lithuanian grand duke Gediminas occupied the Berestia region, in 1320, and then Kęstutis annexed all Podlachia, which he passed on to his son, Vytautas. During the territorial struggle between Lithuania and Poland Dorohychyn land came under Mazovian rule only briefly, in 1391–2 and 1440–3. Polish influence in the region was nevertheless strong. The influx of Polish colonists, particularly of the petty gentry, began in the second half of the 14th century. By the 15th century the local wealthy nobility of Ukrainian origin had been Polonized, and the petty gentry had lost its influence. In 1501 Polish law was introduced for the Polish gentry in the north (Bielsk land), and in 1516 it was extended to all the gentry in Dorohychyn land. In 1516 Grand Duke Sigismund restricted the right to stand for election to the land and city courts to Catholic inhabitants of the region. Latin replaced Ruthenian as the official language in the Ukrainian territories of the Grand Duchy of Lithuania. In 1520 Podlachia, consisting of the lands of Dorohychyn, Bielsk, and Berestia, was established as a separate voivodeship with its center in Dorohychyn. In 1566 Berestia land was amalgamated with Turiv-Pynske land into the new Berestia-Lithuanian voivodeship, and in 1569 the remaining Podlachian territory was divided into Dorohychyn, Bielsk, and Melnyk lands and incorporated into Poland. Podlachia, particularly Dorohychyn land, prospered in the 15th and 16th centuries, because the Cracow-Vilnius and Warsaw-Vilnius trade routes merged there. The Polish offensive against the Ruthenian faith and

the Orthodox clergy persisted even after the Church Union of Berestia in 1596.

During B. Khmelnytsky's uprising the Cossacks briefly captured southern Podlachia, in 1648. Col M. Krychevsky was a native of the region. In 1657 Col A. Zhdanovych's Cossack force, which took part in a joint Ukrainian-Swedish-Transylvanian campaign against Poland, operated in Podlachia.

19th and 20th centuries. After the partition of Poland in 1795, southern Podlachia (up to the Buh River) was annexed by Austria, the northern part by Prussia, and the Berestia region by Russia. During the Napoleonic Wars the northern part was transferred to Russia, and the southern part to the Grand Duchy of Warsaw and then, in 1815, to the Congress Kingdom of Poland. In 1842 the northern part (Bielsk county and the Berestia region) was assigned to Hrodna gubernia, and the southern part ended up in Warsaw general gubernia. The two regions developed very differently.

The history of southern Podlachia was closely linked with that of the *Kholm region. The two regions even became known by one name, Kholm Rus', Transbuh Rus', or simply Kholm region. Both were subjected to the same oppression by the Poles. In 1829 the Uniate Kholm eparchy was removed from the jurisdiction of Halych metropoly and subjected to long-term Latinization. The linguistic Polonization of the clergy and local population gathered momentum. The abolition of the Uniate and the imposition of the Orthodox church by the Russian authorities in 1874 only reinforced the Polonization process, because most Uniates clung to Catholicism and, after the edict of toleration (17 April 1905), adopted the Roman Catholic faith. In 1905-8 the Orthodox church in Podlachia lost 58 percent of its members (compared to 22 percent in the Kholm region). Thus a *Kalakut community arose in Podlachia. To limit Polish influence Kholm gubernia was set up in 1912 out of those parts of Podlachia and the Kholm region where Ukrainians constituted a majority. The end of the 19th century marked the beginning of the Ukrainian national revival in Podlachia, particularly among young teachers.

During the First World War Ukrainians in Podlachia suffered heavy losses. In 1915 over 80 percent of them were evacuated by the retreating Russians. For Ukrainians left behind under the German occupation, the *Union for the Liberation of Ukraine organized at the beginning of 1917 a string of Ukrainian schools taught by POWs from the Bluecoats. The Ukrainian Hromada, a central organization for Podlachia, and the Ukrainian School Council were set up in Biala. In June 1917 the first Ukrainian newspaper in Podlachia, *Ridne slovo*, appeared. From early 1918 the cultural work continued under the leadership of O. Skoropys-Yoltukhovsky and V. Dmytriuk and spread to the Berestia and Pynske regions.

According to the terms of the Peace Treaty of Brest-Litovsk all Kholm gubernia was to belong to the UNR, but by the end of 1918 that region had been occupied by the Poles. Podlachia was subsequently incorporated into Lublin (Biala, Kostiantyniv, Volodava, and Radzyń counties) and Białystok (Bielsk county) voivodeships. The Berestia region became part of Polisia voivodeship. In 1918-23 only some of the evacuated Ukrainians returned. Ukrainian political and cultural life in Podlachia revived in spite of Polish interference. Some Ukrainian candidates were

elected to the Sejm and Senate in 1922. The Ridna Khata society headed the educational and cultural movement. In the 1930s, however, all Ukrainian activities were banned by the authorities. They resumed only in 1939-44, when Podlachia became part of the Generalgouvernement. Under the German occupation Ukrainian mutual aid committees, schools, co-operatives, cultural societies, and churches were organized. The major centers of Ukrainian life were Biala and Volodava.

The northern part of Podlachia (Bielsk county) did not experience the change in national consciousness or the religious strife that occurred in the south in the 19th and 20th centuries. In the 1830s the Ukrainian and Belarusian population converted from the Uniate to the Orthodox faith without much opposition and escaped Polonization. There were no Ukrainian organizations there, however. Only in 1941-4, when northern Podlachia became a part of the German Reich, was a branch of the Ukrainian National Alliance formed in Bielsk.

After the Second World War Podlachia was restored to Poland and was divided among Lublin, Warsaw, and Białystok voivodeships. Most Ukrainians were resettled in the Soviet Union or in the newly acquired lands in western or northern Poland. (For 20th-century history see also *Kholm region and *Kholm eparchy.)

Population. In 1931 Podlachia's population density was 46 people per sq km (45 in 1964). Then, as now, the highest density was in the fertile southwest near the Kholm border, and the lowest was in the marshy area of Bilovezha Forest and Volodava Polisia. Most of the population was rural: in 1931 only 15 percent (in 1964, 20 percent) of the population was urban. The larger towns in the central and southern regions are Volodava, Biala, Międzyrzec, and Parczew, and the smaller ones are Vyshnytsi, Slaviatychi, Janów, Kostiantyniv, and Terespil. In the north Bielsk, Melnyk, Dorohychyn, and Semiatyce are the larger settlements. The city of Brest (Berestia), on the border between Podlachia and Polisia, can be considered the main center of eastern Podlachia.

TABLE 1
Orthodox inhabitants of Podlachia, 1905-31 (thousands;
percentage of total inhabitants in parentheses)

| Year | County | | |
|------|----------------|-------------|-------------|
| | Biala Podlaska | Volodava | Radzyń* |
| 1905 | 69.0 (57.0) | 71.4 (58.0) | 52.2 (32.0) |
| 1908 | 27.7 (23.2) | 46.5 (37.5) | 6.1 (3.8) |
| 1921 | 12.0 (14.2) | 22.5 (26.8) | 2.9 (1.4) |
| 1931 | 18.1 (15.6) | 30.6 (27.0) | 3.1 (1.4) |

*Including parts of Siedlce and Sokołów

TABLE 2
Religious composition of Podlachia, 1905-31 (thousands;
percentage of total in parentheses)

| Year | Roman Catholics | Orthodox and Greek Catholics |
|------|-----------------|---------------------------------|
| 1905 | 140 (34.3) | 194 (47.5) |
| 1908 | 256 (62.5) | 79 (19.3) |
| 1921 | 232 (72.5) | 37 (11.6) |
| 1931 | 280 (71.9) | 52 (13.3) |

At the beginning of the 20th century almost half (47.5 percent) of Podlachia's population was Greek Catholic or Orthodox. Roman Catholics accounted for a third (34.3 percent), and Jews for a sixth (16.8 percent). Resettlement and government policy brought about a dramatic change. By 1931 the Uniates and Orthodox constituted only 13.3 percent of the population, Roman Catholics, 71.9 percent, and Jews, 13.8 percent (see table 2). The predominantly Ukrainian territory shifted 20 to 30 km east of the Puhachiv–Parchiv–Międzyrzec–Dorohychyn line. Until 1945, Ukrainians formed a majority only in a narrow strip along the Buh River. West of that strip lay a mixed zone, with a Polish and *Kalakuty* majority, and then a zone containing only small islands of Ukrainians. In southern Podlachia (excluding the western zone) the ethnic composition was 20.4 percent Ukrainians, 29.2 percent *Kalakuty*, 35 percent Poles, and 13.7 percent Jews.

In northern Podlachia no comparable religious or demographic shift was experienced. In Bielsk county the ethnic mix of the population remained about the same as in 1931: Ukrainians, 70.9 percent, Poles, 21.5 percent, and Jews, 6.5 percent.

Before the Second World War the Ukrainian population of Podlachia could be divided into three main groups, the Podlachians proper (*Pidliashany*), the Buhians (*Buzhany*), and the Khmaks (*Khmaky*). The first group inhabited the northwestern part of the region and were distinguished by their somber dress and manner. The second occupied a wide strip of land on the west bank of the Buh River and were noted for their tall stature, light features, and love for elaborate dress, music, and dancing. The Khmaks settled the southwestern part of Podlachia around Volodava and were known for their archaic dress. Their name was derived from their use of *-khmo* instead of *-s'mo* for the past tense ending of 'to be' (eg, *bulyxmo* instead of *bulys'mo* 'we were').

Economy. Before the Second World War Podlachia was an agricultural region, in which almost 80 percent of the population was occupied in farming. Some industrial development began to occur outside the Ukrainian parts of the region. The towns engaged in trade and the crafts.

The old forests of Podlachia survived only in the northeastern part around Bilovezha Forest. In general only small pockets of forest are left. Much of the southeastern region (Volodava Polisia) consists of wasteland and hayfields. Arable land accounts for 47 percent of the land area, forests, for 23 percent, meadows and pastures, for 21 percent, and other land, for 9 percent. The main crops are rye (42 percent of the seeded area), potatoes (17 percent), oats (14 percent), animal feed (12 percent), wheat (7 percent), and barley (4 percent). The region produces a surplus of pork and dairy products.

Podlachian dialects. The westernmost group of the *Polisian dialects, spoken by the inhabitants of Podlachia

and a small number of pockets in the Kholm region. East of the Buh and Lisna rivers they merge with the western Polisian dialects. During the past century their territory has drastically decreased, particularly in southern Podlachia, and has been transformed into linguistic islands in a Polish environment. Intense Polonization pressures resulted in the emergence of several transitional mixed Ukrainian-Polish dialects, which have gradually become Polish ones. The mixed dialects in the vicinity of Siemiatycze and Bielsk Podlaski, for example, absorbed *mazurzenie*, ie, the Polish dialectal substitution of dental stops and affricates for alveolar stops and affricates (eg, *káze, súsył, xóce, sadzáje* [SU *káze, súšyt', xóce, sadžáje*] 'he says, he dries, he wants, he seats'), the Polish change of *t', d'* into *c', dz'* (eg, *nedz'iel'a* [SU *nedilja*] 'Sunday'), and forms without *l'* after labials before once iotated vowels (eg, *kupjú, kúpljat* [SU *kupljú, kúpljat'*] 'I/they will buy').

North of the Narew River certain typical Ukrainian features (eg, hard consonants before *e, i*) have given way to Belarusian ones, such as palatalization and sporadic *dze-kan'e* (eg, *ós'en', n'e xócu, kos'ic'i* [SU *ósin', ne xócu, kosýty*] 'autumn, I don't want, to mow'). Others – diphthongs with *o, e, ě, a* softened *c'* – have been retained (eg, *s'ieno, mied, pryv'uož, p'játn'ic'a* [SU *sino, med, pryviz, p'jaternycja*] 'hay, honey, I transported, Friday'). The influence of the *South Volhynian dialects is evident in the Buh valley. Under the impact of Polish, hard dentals before *e* and *i* did not develop in the western and northwestern dialectal belts (eg, *pól'e, hovoryl'i, zobácyt'i, s'élam'i* [SU *póle, hovoryly, zobácyty, sélamy*] 'field, they said, to see, villages' instr). In the west and north the diphthongs *uo, ue, uy, uý, ýy, ie* from *ō, ē, ě* appear in a stressed position (eg, *hnuoj, zam'juol, s'ieno, jačm'ien'* [SU *hnij, zamív, síno, jačmín'*] 'manure, he swept, hay, barley'). In the southeast they have been simplified into *ý, ýe* (eg, *hnýj, sobjé* [SU *hnij, sobí*] 'manure, to myself') and, in the unstressed position, *u, y/i* (eg, *puđrusl'i, jáščurka, pópyl, žýncy* [SU *pidrosly, jáščirka, pópil, žínci*] 'grew-up, lizard, ashes, to the woman'). In the west, *e, i* appear in place of *a* from *ę* in an unstressed position (eg, *pametáju, kolódz'iz'a* [SU *pam'jatáju, kolódjazja*] 'I remember, of the well'). Unstressed *o, e* are articulated high as *u, y* (eg, *purubýú* [SU *porobýv*] 'I made'). The groups *ky, gy, hy, xy*, are articulated high as *k'i, g'i, h'i, x'i* (eg, *kolosk'i, x'itry* [SU *koloský, xýtryj*] 'grain stalks, sly'), and the unstressed groups *ča, ža, ša, r'a* are articulated as *č'ja...* around Biała Podlaska (eg, *š'jápka* [SU *šápka*] 'hat') and as *č'e* in the south (eg, *č'es* [SU *čas*] 'time'). Sporadically *e* changes into *o* (eg, *viet'or, byróza, ukrad'óny* [SU *viter, beréza, ukrádenyj*] 'wind, birch, stolen'). Initial *o-, i-* are preceded by a prothetic *h-* (eg, *hórut, hinyj* [SU *orjút', inej*] 'they plow, frost'). The soft *r'* became hard (eg, *výradýú* [SU *výrjadýv*] 'he equipped'), the cluster *st'* is pronounced *s'c'* (eg, *šers'c', s'c'iény* [SU *šerst', stíny*] '[animal] hair, walls').

Declension forms are of the type *kon'óm* (SU *koném*) 'with a horse', *kón'um* (SU *kónjam*) 'to the horses', *na kón'ux* (SU *na kónjax*) 'on the horses', *zeml'óju* (SU *zemléju*) 'with the earth', *na muludómu kun'óvy* (SU *na molodómu koni*) 'on a young horse', *tel'át'a* (SU *teljátý*) 'of the calf', *tel'át'ovy* (SU *teljátý*) 'to the calf', *tel'át'om* (SU *teljám*) 'with the calf', *mórovoy* (SU *mórju*) 'to the sea', *noč'íej* (SU *noč'ej*) 'of the nights'. In certain nominal cases both hard and soft masculine, feminine, and neuter nouns, in which the stress is on the stem, have the same endings; eg, *nóhi, zémli* (SU *nóhy, zémli*) 'legs, lands', *zúby, kóny* (SU *zúby, kóni*) 'teeth,

horses', *na koróvy, v néby* (SU *na koróvi, v nébi*) 'on the cow, in the sky'. Dual forms are also present; eg, *2 ukn'í, styn'í, pól'í, kon'íe* (SU *2 vkná, stíný, pólja, kóni*) '2 windows, walls, fields, horses'. In adjectives, long forms are used; eg, *molodý, -ája, -úju, -óje, -ýji* (SU *molodýj, -á, -ú, -é, -í*) 'young' masculine and feminine nominative singular, feminine accusative singular, neuter nominative singular, nominative plural. Short forms are used when the stress is on the root; eg, *žýtny, -na, -ne, -ny* (SU *žýtnij, -nja, -nje, -ni*) 'rye' masculine, feminine, neuter nominative singular, nominative plural. *Naš* 'our' has both long and short forms; eg, *náša/-aja* feminine nominative, *nášu/-uju* feminine accusative, *náše/-oje* neuter nominative. Pronouns have forms such as *ton, tája, téje, týji, vsen'* (SU *toj, ta, te, ti, uvés'*) 'that one' masculine, feminine, neuter singular, 'those ones', 'all'. Postprepositional third-person forms omit *n-*, eg, *v jóho, na jýj, z jýmy* (SU *v n'óho, na níj, z nýmy*) 'in him, on her, with them'. The influence of soft-type endings is evident in possessive and demonstrative pronouns; eg, *méji, téji, méju, téju* (SU *mojéji, tijéji, mojéju, tijéju*) 'of my, of that, with my, with that' feminine.

In conjugation, forms such as *napečý* (SU *napekty*) 'to bake' and infinitives ending in *-ie*, eg, *itíe, pečýe* 'to go, to bake' in the northwest along the Buh are, perhaps, evidence of a Yatvingian substratum. Typical verbal forms are *xódyt, budúť, pytájec'c'a, žn'iem, id'iete, púojd'um, búd'omo, búdu/máju nočováť'i, kupývem, kupýves', kupýl'is'mo* (SU *xódyt', budúť', pytájetsja, žnemó, ideté, pídemo, búdemo, búdu/máju nočovoáťy, ja kupýv, ty kupýv, my kupýly*) 'he walks, they will be, he asks, we reap, you (pl) go, we will go, we will be, I will be spending/am supposed to spend the night, I (masc) bought, you (masc sing) bought, we bought'. In the northwest the reflexive particle *-sja* is used separately from the verb.

The lexicon of the Podlachian dialects has many Polishisms, as well as expressions unknown elsewhere that are etymologically identical with Polish ones; eg, *knjážyč* 'the moon', *divosnúby* 'matchmaking'. The dialects have been studied by M. Yanchuk, I. Bessaraba, J. Polívka, P. Rastorguev, I. Zilynsky, W. Kuraskiewicz, Ja. Tarnacki, M. Lesiv (Łesiów), and G. Vinokur.

O. Horbach

Podolchak, Ihor [Podol'čak], b 9 April 1962 in Lviv. Artist. He graduated from the Lviv Institute of Applied and Decorative Arts in 1984. His graphic works have received recognition at international expositions in Spain (1988) and Canada (1989). He won second prize at the International Ex Libris Exhibition in Germany (1987) and the Johnson Graphic Prize in the United States (1990). He has exhibited in group shows since 1985 and has had one-man shows in Łódź, Poland (1988); Cadaqués, Spain, Paris, and London (1990); and Lviv, Haifa, and Moscow (1991).

Podoliak, Borys. See Kostiuk, Hryhorii.

Podoliaka, Ivan [Podoljaka], b and d? Haidamaka leader from Kropyvna, Pereiaslav regiment. During the 1730s he worked at the Zaporozhian Sich, and in the late 1740s he joined a haidamaka rebel group that was active in the Smila, Chyhyryn, and Cherkasy districts. After forming his own rebel detachment in 1750, he conducted raids in the Hornostaipil, Chornobyl, and Khabne districts, and even as far as Radomyshl. He was captured by a Polish

punitive expedition and handed over to the tsarist authorities; his further fate is unknown.

Podolian Upland or Podolian Plateau. An upland in the *Podilia region of southwestern Ukraine on the left bank of the Dniester River. Elongated in shape, the upland has declining elevations along its length from 380 to 320 m in the northwest and from 220 to 130 m in the southeast. Its relatively flat surface is dissected by many parallel, canyonlike valleys joining the Dniester River valley to the south. The upland is underlain by limestones, marls, sandstones, and shales, and in its eastern part by granites and gneisses covered with layers of loess. As a result of intensive erosion its northern rim is a hilly escarpment, rising to over 400 m. The Dniester side is deeply incised by rivers, and the changing base levels of erosion are reflected in a series of steplike terraces. Once covered by a varied forest-steppe vegetation, the surface of the Podolian Upland is now extensively cultivated. Together with the Volhynia-Kholm Upland to the west-northwest, it forms the Volhynia-Podilia Upland.

Podolianochka. A group dance for girls, accompanied with song. Traditionally a spring rite, the dance was performed by girls in a circle with one girl in the middle. While the girls in the circle sang, the 'Podolian girl' in the middle illustrated the song by mimicry or gesture. Then she chose someone else to be in the middle. The dance music is in 4/4 time with an extra beat at the end of each stanza. The *podolianochka* melody has been used by L. Revutsky and A. Kos-Anatolsky in their compositions.

Podolinsky, Andrei [Podolinskij, Andrej] (Podolynsky, Andrii), b 13 July 1806 in Kiev, d 16 January 1886 in Kiev. Russian Romantic poet of Ukrainian descent; father of S. Podolynsky. In the 1820s his long poems, particularly 'Div i Peri' (Div and Peri) and 'Smert' Peri' (Peri's Death), and the novelette in verse *Borskii* were well received by Russian critics and readers. From 1839 to 1854 he did not publish. By the 1860s he was considered old-fashioned. His posthumously published novelette *Zmei* (The Dragon) is based on Ukrainian folkways and folklore. Editions of his works were published in 1837, 1885, and 1936.

Podolinsky, Sergei. See Podolynsky, Serhii.

Podolynsky, Mykhailo [Podolyns'kyj, Myxajlo], b 1844 in Dolyna county, Galicia, d 1894. Publicist, translator, and community activist; son of V. *Podolynsky. He was a founder and leader (1868–9) of the Sich student society in Vienna. He taught in gymnasiums in Lviv and Brody and contributed to the newspapers *Pravda, Dilo*, and *Zoria*. He wrote pedagogical essays, literary and art criticism, travelogs, and translations of Russian, Italian, and French works.

Podolynsky, Serhii [Podolyns'kyj, Serhij] (Podolinsky, Sergei), b 31 July 1850 in Yaroslavka, Zvenyhorod county, Kiev gubernia, d 12 July 1891 in Kiev. Socialist theoretician and activist, and physician. Podolynsky studied science and medicine in Kiev, Paris, Zurich, and Breslau (now Wrocław). He published a number of works on medical topics, including a long study titled *Zhyttia i zdorovia liudei na Ukraïni* (The Life and Health of People in

Ukraine, 1879). He worked as a physician in Ukraine in the mid-1870s, but in 1878 he settled in Montpellier, France, where he continued to practice medicine and also lectured at the famous Montpellier medical school. In the early 1870s he became involved both with the Russian populist P. Lavrov's *Vpered!* group and with the *Hromada of Kiev, particularly with the Hromada's most radical members, the socialist M. *Drahomanov and the Marxist M. *Ziber. To the end of his active life Podolynsky combined a revolutionary socialist perspective with devotion to the Ukrainian nation.

In 1875 he broke with the Russian Lavrovists over the national question and spoke of the formation of a separate 'Ukrainian social-democratic party.' In the same year he wrote two brochures that were the first works in the Ukrainian language to advocate socialism, *Parova mashyna* (The Steam Engine) and *Pro bidnist'* (On Poverty). Podolynsky produced more popular socialist literature in Ukrainian over the next few years as well as some longer tracts on agrarian problems and the development of Ukrainian industry. He co-operated closely with Drahomanov and his journal *Hromada*, to which he contributed several articles and of which he formally became coeditor in 1881. He was also involved in the international socialist movement, contributed to German-, Italian-, and especially French-language socialist journals, and reported on international socialist affairs in *Vpered!* and *Hromada*.

Podolynsky made an important contribution to theory in his article 'Socialism, or Human Labor and the Unity of Physical Forces,' which was published in several versions and four languages in 1880–3. Although the theory was rejected by F. Engels and then long forgotten, it came to light again in the 1970s and 1980s. The Ukrainian dissident M. *Rudenko drew on Podolynsky's ideas for his *Ekonomichni monolohy* (Economic Monologues). Podolynsky has also come to be regarded as a precursor of energy economics or socioenergetics. His activities were cut short in January 1882 when he suffered a mental collapse, from which he never recovered.

J.-P. Himka

Podolynsky, Vasyl [Podolyns'kyj, Vasył'], b 14 or 15 January 1815 in Bilych, Sambir circle, d 24 August 1876 in Maniv, Lisko county, Galicia. Priest and publicist; father of M. *Podolynsky. As a student at the Greek Catholic Theological Seminary in Lviv (1837–41) he belonged to the Polish clandestine Union of Sons of the Homeland. He was ordained in 1843, and served as a priest in Vetlyn, Peremysl circle. During the Revolution of 1848 he published in Sianik a Polish brochure, *Słowo przestrogi* (A Word of Warning), in which he analyzed the pro-Polish, pro-Russian, pro-Austrian, and pro-Ukrainian political orientations among Galicia's Ukrainians, defended the use of Ukrainian as a separate language, and substantiated the idea of an independent, united Ukrainian state and

a federation of free Slavic peoples. The brochure influenced the politics of the *Supreme Ruthenian Council. Podolynsky was arrested while on his way to join the Hungarian revolutionaries. After the revolution he was persecuted by the church hierarchy. He was a pastor in Maniv from 1852, and he established an elementary school there in 1859.

Podushko, Zinovii [Poduško, Zinovij], b 29 October 1887 in Ocheretyne, Izium county, Kharkiv gubernia, d 3 March 1963 in Łódź, Poland. Painter. A graduate of the Kiev Art School (1911) and St Petersburg Academy of Arts (1917), from 1919 he lived in Poland. In Łódź he worked as a scenery designer for local theaters and as a draftsman for the city planning bureau. His early works were exhibited in Lviv, Cracow, Warsaw, and Lublin. He was known for his many realist oil landscapes, such as *Sunset*, *Evening in the Steppe*. Most of them perished during the Second World War.

Podvezko, Mykhailo [Podvez'ko, Myxajlo] (Podvesko), b 14 November 1901 in Riabushky, Lebedyn county, Kharkiv gubernia, d ? Lexicographer. A graduate of the Ukrainian Institute of Linguistic Education in Kharkiv (1935), he taught in secondary and postsecondary schools in Kiev until 1941. From 1945 he worked as an editor and lexicographer. He compiled the first Soviet English-Ukrainian dictionaries (50,000 words, 1948; 25,000 words, 1955; 65,000 words, with M. Balla, 1974) and, with the help of K. Hryhorenko, the first Soviet Ukrainian-English dictionary (60,000 words, 1952; rev edn 1957).

Podvorniak, Mykhailo [Podvornjak, Myxajlo], b 24 December 1911 in Khotovytsia, Kremianets county, Volhynia gubernia. Writer. A postwar refugee, he settled in Winnipeg in 1949. There he has edited the Baptist monthly *Khrystyians'kyi visnyk* and been secretary of the Research Institute of Volyn. He is the author of the story collections *Na shliakhu zhyttia* (On Life's Road, 2 vols, 1951, 1953), *Zelenyi hai* (The Green Grove, 1959), *Bozhyi spokii* (Divine Tranquility, 1966), *Vidpavshi* (Those Who Fell Away, 1968), *Zapashnist' polia* (The Field's Fragrance, 1971), *Zolota osin'* (Golden Autumn, 1974), *Daleki berehy* (Distant Shores, 1975), *Odnoho dnia* (One Day, 1977), and *Stezhky i dorohy* (Paths and Roads, 1981); the novels *Nedospivana pisnia* (The Unfinished Song, 1967), *Brat i sestra* (Brother and Sister, 1979), and *Persha liubov* (First Love, 1986); and the memoirs *Daleka doroha* (The Long Road, 1963), *Nebesnyi dim* (The Celestial Abode, 1965), and *Viter z Volyni* (Wind from Volhynia, 1981). He has also translated Russian religious literature into Ukrainian.

Pody (aka *pady*, *zapadyny*, or *chapl'i*). Flat-bottomed depressions commonly found in Ukraine on the loessial plains of the forest-steppe and steppe zones. They are circular, oval, or elongated in form and range from 0.2 to 10 km across and 0.5 to 17 m in depth. They are particularly numerous between the Dnieper and the Molochna rivers and also between the Dnieper and the Boh rivers. In the spring *pody* collect meltwater and frequently form seasonal lakes. They thereupon accumulate a greater quantity of moisture and support rich meadows for use as pastures or hayfields. One of the larger *pody* contains part of the Askaniia-Nova Nature Reserve.

The origins of *podly* in Ukraine have been associated with various processes. P. Tutkovsky considered that they were formed by means of wind deflation. M. Dmytriiev associated their genesis with karst phenomena in the underlying Pontic Sea limestones that caused a subsidence of the surface loess. V. Bondarchuk, however, correlated their formation with the late Pliocene epoch surface of the area, after the Pontic Sea had receded but before the accumulation of loess. Expanding on that idea P. Zamorii considered the large *podly* as remnants of bays from the receding sea; the smaller ones he accounted for as loessial subsidence that resulted from differentiated leaching or loessial karst. A. Mulika suggested a mix of the aforementioned factors and added that some *podly* were actually dried-up lakes.

Related to the *podly* are small depressions in the loessial plains known as *bliudtsia*. Common in nearly all of the steppe and forest-steppe zones of Ukraine, they are often considered to be small *podly*. They range from a few meters to several hundred meters across and may be from 0.5 to 4 m deep.

I. Stebelsky

Podzhio, Aleksandr [Podžio] (Poggio), b 8 May 1798, d 18 June 1873 in Voronky, Kozelets county, Chernihiv gubernia. Russian nobleman and Decembrist of Italian origin; son of an early architect of Odessa. He became a member of the Northern Society in 1821 while serving as an officer in the Preobrazhenskii Regiment. In 1823 he retired as a reserve colonel of the Dnieper Regiment and moved to his mother's estate in Kiev gubernia. There he joined the *Southern Society and became a close associate of P. *Pestel. After the revolt of the Chernihiv Regiment failed, Podzhio was arrested, tried for treason, and sentenced to death. The verdict was commuted to 20 years of hard labor in Siberia. After his release in 1859, he lived abroad (mostly in Switzerland) for several years and became a close friend of A. Herzen. Podzhio's memoirs of the Decembrist movement were published in 1930.

Podzhio, Borys [Podžio], b 1875? d 1920. UNR Army general. A brigadier general in the Russian army, in 1917 he commanded a division. Upon joining the UNR Army he was assigned to command a division in the Second Ukrainian Corps. In 1918 he commanded the Third Kherson Corps, and in 1919, briefly, the Zaporozhian Corps.

Poetics (from Greek *poietike*). The term, in its broadest sense, refers to works on the theory of literature and esthetics, the first such being Aristotle's renowned treatise *Poetics*. More specifically, poetics embraces that segment of literary studies which is concerned with the structure of a work of literature, its language, its tropes, and so on. In its narrowest sense the term is used to describe a work devoted to the nature and laws of poetry.

In Ukraine the heyday of poetics occurred in the 17th and 18th centuries and was closely tied to developments in education and the curriculum of the *Kievan Mohyla Academy. At the academy poetics, together with rhetoric and philosophy, was a compulsory subject taught in Latin. It was not customary to publish the texts for the courses, but as many as 15 exist in manuscript form, mainly from the end of the 17th century. The first such manuscript, *Liber artis poëticae ... anno Domini 1637*, is dated five

years after the establishment of the academy. Even earlier, some rules of versification were included in the grammars of L. Zyzanii (1596) and M. Smotrytsky (1619). Both Zyzanii and Smotrytsky, as well as all of the later school poetics, tried to impose Greek and Latin versification rules on Ukrainian verse. Not until the poetics of M. Dovhalevsky (1736) and H. Slomynsky (1744–5) was any attention given to contemporary Ukrainian verse. Another important work of the 18th century was the *De arte poëtica libri tres ...* of T. Prokopovych, written in 1705–6 but published only in 1786 by H. Konysky, as a textbook.

In the 19th century no new poetics were written, but interest in the subject appears toward the later part of the century, in some works of O. Potebnia, M. Drahomanov, and I. Franko and especially in K. Luchakovsky's *Nacherk stylistyky, poetyky i retoryky* (Outline of Stylistics, Poetics, and Rhetoric, 1894), which was part of the high school curriculum in Galicia at that time. A renewed interest in the more narrow sense of poetics occurred in the 20th century, during the 1920s; several works appeared in the new Soviet Ukraine: S. Haievsky's *Teoriia poezii* (Theory of Poetry, 1921), B. Yakubsky's *Nauka virshuvannia* (Study of Versification, 1922), D. Zahul's *Poetyka* (Poetics, 1923), and B. Navrotsky's *Mova ta poeziia* (Language and Poetry, 1925). Other more broadly defined works on poetics also appeared: H. Maifet's collection *Teoriia literatury* (Theory of Literature, 2 vols, 1931–2), M. Yohansen's *Iak buduiet'sia opovidannia* (How a Story Is Constructed, 1928), and several works on various aspects of creativity by such scholars as M. Zerov and P. Fylypovych. Western Ukraine also saw a revival in the study of poetics, in such works as V. Dombrovsky's *Ukrains'ka stylistyka i rytmika* (Ukrainian Stylistics and Rhythmics, 1923), M. Rudnytsky's *Mizh ideieiu i formoiu* (Between the Idea and the Form, 1932), and several works by F. Kolessa. Work on poetics continued among émigrés after the Second World War: S. Hordynsky's *Ukrains'kyi virsh* (The Ukrainian Poem, 1947), I. Koshelivets's *Narysy z teorii literatury* (Outlines of the Theory of Literature, 1954), and I. Kachurovsky's *Strofika* (Strophes, 1967), *Fonika* (Phonics, 1984), and *Narys komparatyvnoi metryky* (Outline of Comparative Metrics, 1985).

Work on poetics became revitalized in Ukraine in the 1960s, when several studies appeared: V. Kovalevsky's *Rytmichni zasoby ukrains'koho literaturnoho virsha* (The Rhythmic Devices of Ukrainian Literary Verse, 1960) and *Ryma* (Rhyme, 1965), H. Sydorenko's *Virshuvannia v ukrains'kii literaturi* (Versification in Ukrainian Literature, 1962), and P. Volynsky's *Osnovy teorii literatury* (Fundamentals of the Theory of Literature, 1962). Structuralist theory found its proponent in the work of M. Laslo-Kutsiuk in Rumania, in *Pytannia ukrains'koi poetyky* (Studies of Ukrainian Poetics, 1974).

I. Kachurovsky, D.H. Struk

Poetry (from Greek *poiesis*, meaning creativity). In its original sense the term 'poetry' is synonymous with creative artistic literature. In a stricter and more conventional sense 'poetry' refers to that genre of literature which is written in verse as opposed to *prose. Although poetry is a highly developed genre in classical and modern Ukrainian literature, it nonetheless shares general outlines of development with all Ukrainian literature, especially in the first two periods, the Kievan and the Cossack (see *Literature for periodization).

The Kievan period. Like all of the other literary genres poetry was at first imported in translations together with liturgical material. It consisted mainly of Byzantine and Old Bulgarian hymns as well as poetic introductions to the Gospels, such as 'Pokhvata tsariu Symeonu' in the *Izbornik* of Sviatoslav of 1073, or the prologue to the didactic Gospel of K. Preslavsky, the so-called 'alphabet prayer.' Those and other church-related poems (introductions, praises, alphabet poems – the latter often used to teach the Slavonic alphabet) as well as numerous Byzantine liturgical hymns played an important role in the formation of original Ukrainian poetry. Such hymns were compiled in menaia, triodia, octoechos, and psalters and had a profound influence on poetic perception. The translated corpus of hymns served as a source for the imagery, comparisons, and epithets in the literary monuments of the period. The first known original Ukrainian poem is the song of praise to ss Boris and Hlib from the chronicle **Povist' vremennykh lit.* The work, written by an anonymous author (some say Metropolitan Ioann I), is poetically similar to various Byzantine hymns of praise, and its verse elements are derived from a syntactical parallelism based on the repetition of the word 'rejoice.' Similar syntactical versification is found in another original work, 'Slovo v novu nediliu po Pastsi' (A Word on the First Sunday after Easter, ca 1170), by the noteworthy 12th-century sermonizer Bishop Cyril of Turiv. Many translated texts lost their graphic designation of verse and were written out in proselike lines, but there seems little doubt that the old Rus' scribes and translators were familiar with Greek poetics and the rules governing the structure of hymns. It is not surprising, therefore, that quite complicated poetic forms have been found, where lines of various syllables exist, and where no rhyme is present. The unifying poetic structure emanates from a contextual semantic line, syntactical parallelism, and various other poetic or rhetorical devices. Such free nonsyllabic verse is derived from Byzantine models, the original of which go back to biblical verse. A sample of such a semantically structured poem is found in *Molennii Danyla Zatochnyka* (Supplication of Daniel the Exile, end of the 12th or beginning of the 13th century), in the anonymous 'Slovo pro pohybel' rus'koï zemli' (The Tale of Disintegration of the Rus' Lands, ca 13th to 14th century), and in the anonymous 'Slovo o Lazarevim voskresinni' (Tale of Lazarus's Resurrection). In the multisyllabic line and the recitative nature of those poems there is much similarity to various samples of folk poetry.

Both the Byzantine and the native folk influence found their reflection in the most outstanding poetic work of the Kievan period, the epic poem **Slovo o polku Ihorevi* (The Tale of Ihor's Campaign, ca 1187). I. *Franko pointed out (1907) that the versificatory underpinnings of the epic and other 'slovos' were based on church hymns, and at the

same time coincided with the syllabic and syntactic structures found in folk songs. His claim that there existed a 'retinue-chivalrous' (*druzhynno-lytsars'ka*) school of poetry to which all those and many nonextant works belong is unverifiable precisely owing to the paucity of existing examples. As with other genres there are no samples of poetry from the 14th and 15th centuries.

The Cossack period. Although there are some poems from the beginning of the 16th century (eg, P. *Rusyn's songs from 1509), most of the poetry begins in the second half of the century, since it is closely tied to the establishment of *brotherhood schools. As the numerous extant copies of *poetics attest, versification was a compulsory subject in the schools, and all pupils were taught poetic models based first and foremost on Polish syllabic verse and even on ancient Greek and Latin models (eg, M. Smotrytsky's *Gramatiki ...*). The other major influence on early Ukrainian poetry was the poetic structure inherent in folk songs – a syllabic versification with determined ictuses, and thereby readily congenial to both the syllabic verse imported from Poland and the individual modulations which later became the basis for the emergence of the tonic principle of versification. The 'school poetry,' as the vast production of the period is called, although often imitative and stilted, varies in the language used (Latin, Polish, Old Ukrainian, or Church Slavonic) and can be roughly divided into three groups: (1) strict school-type poems, written in accordance with poetic rules, often in Latin, Polish, or Church Slavonic, as well as various trick-poems, acrostics, and the like; (2) poems that took their cue from folk poetry and even became part of the folk repertoire (some poems by H. *Skovoroda and S. Klymovsky's 'Īkhav kozak za Dunai' [The Cossack Rode beyond the Danube], which was made eternal by L. van Beethoven's variations on the song); and (3) humorous and satiric poems and travesties. Into the first group fall the Latin hexameters of Klymovych, S. Pekalid, and H. Vyshnevsky as well as the Old Ukrainian, Polish, and Church Slavonic syllabic verses of L. Baranovych, M. Smotrytsky, O. Mytura, K. Sakovych, and S. Pochasky. Interesting are A. Kalnofoisky, the author of *Teraturhima* (1638), for his epitaphs written in Polish, I. Maksymovych for his 25,000-line hymn to the Virgin (*Bohorodytse Divo* [Virgin Mother of God, 1707]), and T. *Prokopovych for the sheer variety of his creativity.

The poems belonging to the second group are more stimulating in that they pushed the confines of school poetics to the limits and thus paved the way for the poetry which was to follow in the 19th century. Skovoroda is the best known and most gifted of the group. Interesting verses with a syllabic structure approaching folk styles are found among the poems of I. Velychkovsky, I. Pashkovsky, Z. Dziubarevych, and, especially, K. *Stavrovetsky-Tranquillon (*Perlo mnohotsinnoie* [A Priceless Pearl, 1646]), who uses lines of irregular syllables close to those of folk *dumas. P. *Berynda's use of poetic dialogue in 1611 is expanded further by S. Divovych in 'Razhovor Velikorossii s Malorossiei' (The Conversation of Great Russia with Little Russia, 1762). The most notable works of the third group are, for their sheer number (369), the opinionated poems of K. Zynoviev, written sometime at the beginning of the 18th century; the Polish verses of D. Bratkovsky; the satiric poems of the monk Yakiv; and the facile and loquacious verses of I. Nekrashevych.

Although no major poet emerged, and few of the poets have any consistency in their writings, many wrote poetry which could fit all three of the aforementioned categories. Poetry was more an adjunct of an educated man than a creative art; hence, it was used for various purposes – religious, polemical, humorous, and as a means of expressing gratitude (the numerous panegyrics, heraldic poems, and epigrams). Few works were published, and many remained in manuscript form; they are unknown except to specialists in the period. A notable place is occupied by the folk *dumas composed during the period; their influence on later Romantic poets was profound.

The vernacular period. Classicism with its strict dicta on use of language, together with the nascent tonic versification in Russia, contributed to the birth and the nature of vernacular Ukrainian poetry. I. *Kotliarevsky wrote a travesty of Virgil's *Aeneid* in contemporary spoken Ukrainian and composed the *Eneida* in a 10-line strophe of four-foot iambs, thereby giving a start to syllabo-tonic metrics in Ukrainian literature. Two poets who still wrote within the classicist dicta were P. *Hulak-Artemovsky, with his translations and travesties, and Ye. *Hrebinka, who wrote versified fables (*Malorossiiskie prikazki* [Little Russian Proverbs, 1834]). Other poets of the first half of the 19th century were already under the influence of romanticism, the tenets of which were highly propitious to the development of literature in the vernacular and to an intensification of the influence of folk poetry. Members of the *Kharkiv Romantic School, most notably L. *Borovykovsky, with his ballads, and A. *Metynsky, full of nostalgia for the heroic past of the Cossacks and pessimism for the future, were soon followed by a more ideological group in Kiev, the *Cyril and Methodius Brotherhood.

By far the greatest poet of that group and the greatest poet in Ukrainian literature, T. *Shevchenko, led Ukrainian poetry firmly out of travesty and burlesque and established its canons by skillfully blending the popular **kolomyika* syllabic structure (two lines of 4 + 4 + 6 syllables, variously rhymed) and other folk syllabic structures with a tonic system of various metric feet. Overshadowed by Shevchenko but more conscious of his poetic role was M. *Kulish, who experimented with language (the conscious introduction of Church Slavonic into the vernacular) and with structure (the attempt to domesticate various ancient and canonical strophes). Another prominent member of the Kiev group was the historian M. *Kostomarov, who wrote historical ballads under the pseudonym Yeremiia Halka.

The symbiotic relationship between folk poetry and literary creation is seen in the works of several poets whose poems have entered the folk-song repertoire: S. Pysarevsky ('De ty brodysh moia dole?' [Where Do You Wander, My Fate?]), M. Petrenko ('Dyvliush' ia na nebo' [I Gaze at the Sky]), K. Dumytrashko ('Chornii brovy, kariii ochi' [Black Eyebrows, Hazel Eyes]), and P. Nishchynsky ('Zakuvala ta syva zozulia' [The Gray Cuckoo Has Called]), to name just the most famous. Poetry played a key role in spreading the vernacular to other parts of Ukraine. The *Ruthenian Triad of I. Vahylevych, Ya. Holovatsky, and M. *Shaskevych (the most gifted poet of the three) introduced the vernacular to Galicia in their *Rusalka Dnistrovaia* (Dniester Nymph, 1837). Yu. *Fedkovych's ballads and soldier poems did the same for Bukovyna (first collection in 1862), and O. *Dukhnovych's poems for

Transcarpathia. Other poets of note in the first half of the 19th century were the Galician A. *Mohylnytsky, S. *Vorobkevych, V. *Mova, the sensitive lyricist L. *Hlibov, and S. *Rudansky, known chiefly for his collection of verse based on folk humor and wisdom, *Spivomovky*.

The second half of the century saw a decline in poetry, partly because of the overwhelming weight of Shevchenko's influence, which encouraged a proliferation of epigones, but mainly because of the dominance of realism and naturalism, the esthetic programs of which lent themselves to prose. No small part in the decline of the quality of poetry and of literary activity in general was played by the tsarist prohibitions of Ukrainian letters, the Valuev circular (see P. *Valuev) and the *Ems Ukase. What poetry appeared was mainly directed to the advancement of the struggle of the downtrodden – the peasant, the artisan, the worker, or the Ukrainian people in general. A major part of the poetic output by such populist writers as Ya. Shchoholiiv, B. *Hrinchenko, P. *Hrabovsky, and I. Manzhura consisted of rather standard quatrains with regular meters and rhymes, devoted thematically to 'realistic' depiction of the difficult conditions, and of exhortations to persevere and to struggle for a better future. Somewhat more lyrical were the poems of V. Shchurat, S. Yarychevsky, M. Kichura, and the feminist U. Kravchenko.

The unfavorable climate for poetry was overcome by Franko and Lesia *Ukrainka. Franko's mastery of form and wealth of themes (from revolutionary hymns such as 'Ne pora ...' [It Is Not Time Now ...] to the exquisite personal lyricism in *Ziv'iale lystia* [Withered Leaves, 1896]) greatly advanced the development of Ukrainian poetry. Similarly, Lesia Ukrainka enhanced the Ukrainian poetic tradition by her poetic dramas, in which she skillfully domesticated world themes and revealed a masterful command of iambic pentameter.

The influences of Western *symbolism, supported by similar developments in Russia and in Poland, gave rise toward the end of the century to a new esthetic perception. M. *Vorony launched Ukrainian modernism by issuing a manifesto (1901) calling for 'broader esthetic horizons' and publishing an almanac, *Z nad khmar i dolyn* (From above the Clouds and from Valleys, 1903), which attempted, with little success, to publish only 'modern' works.

Neither Vorony's poetry nor that of other modernist poets was exceptional. Such poets as P. *Karmansky, V. *Pachovsky, S. Tverdokhlib, O. Lutsky, S. Charnetsky (all part of *Moloda Muza in Lviv) and K. *Alchevska, M. Sribliansky (Mykyta *Shapoval), who contributed to the modernist journal **Ukrains'ka khata*, pursued the idea of 'art for art's sake,' often embraced the *fin-de-siècle* despair in pessimistic outpourings, and, in general, greatly expanded the borders of the acceptable in Ukrainian poetry. M. *Cherniavsky, a poet from an older generation, V. *Samiilenko, with his satiric verse, and A. *Krymsky, with his exoticism, all contributed to the revival of lyrical poetry. Symbolism, especially P. Verlaine's notion of 'music above all else,' found many adherents, especially O. *Oles, by far the most popular lyricist of the time, and H. *Chuprynka. Poetry also expanded into prose in the miniatures of M. *Yatskiv and in some works of poetic prose by O. Kobylanska ('Bytva' [The Battle]), V. Stefanyk ('Moie slovo' [My Word] and 'Moia doroha' [My Road]), and M. Kotsiubynsky ('Intermezzo').

The literary renaissance of the 1920s was all-embracing, but poetry was a dominant genre. P. *Tychyna's unique poetic expression, a revitalized, skillfully structured folk idiom imbued with contemporary symbols and tropes, placed Ukrainian poetry on the first truly new course since Shevchenko. Out of the hundreds of poets who appeared, many were excellent, but none were as influential with respect to the development of Ukrainian poetry as Tychyna. The poetry of other symbolists, such as Ya. *Savchenko, O. *Slisarenko, M. *Tereshchenko, D. *Zahul, and V. *Svidzinsky, was close to Tychyna's. More unconventional poetry was written by the proponents of *futurism M. *Semenko, G. *Shkurupii, and O. *Vlyzko. Deriving from futurism but original and forceful was the poetry of M. *Bazhan. French Parnassian poetry influenced several poets, including M. *Zerov, M. *Rylsky, M. *Drai-Khmara, P. *Fylypovych, and Yu. *Klen, who were unofficially united in the group of *Neoclassicists. More traditional and without a specific 'ism' was the poetry of V. *Blakytyn, V. *Polishchuk, V. *Chumak, D. *Falkivsky, M. *Yohansen, and Ye. *Pluzhnyk. Lyrical, prolific, and popular was the poet V. *Sosiura. The mass phenomenon in the literature of the period did not bypass poetry, and there were multitudes of 'poets' who wrote contemporary verses singing the praises of the proletariat. Better examples of such poetry can be found in the works of T. Masenko and V. Mysyk. But the renaissance was short-lived. Few of the many poets and writers managed to survive the terror of the 1930s and the difficult years that followed until the death of J. Stalin. Some, such as T. *Osmachka, I. *Bahriany, and V. *Barka, not only survived but managed to emigrate and thus provide a continuity between the poetry of the 1920s and that of later decades.

Western Ukraine in the interwar period produced one major poet, B.I. *Antonych. Whereas Tychyna brought a fresh new sound to Ukrainian poetry, Antonych refurbished its imagery. During and immediately after the struggle for national independence, certain poets wrote poetry celebrating the movement and exploits of the *Sich Riflemen. Much of it was written in the genre of folk songs, by R. *Kupchynsky, L. Lepky, Yu. Shkrumeliak, and others. Other poets in Western Ukraine grouped themselves around various journals according to ideological or esthetic conviction. Antonych was the main poet of the Catholic journal *Dzvony*. The pro-Soviet *Novi shliakhy* and *Vikna* featured A. *Kolomyiets and V. *Bobytsky. Bobynsky and O. Babii also wrote for *Mytusa*, and S. *Hordynsky and V. *Lesych contributed to *Nazustrich*, both of which journals espoused art above ideology. The majority of poets were in the nationalist camp and grouped themselves around *Vistnyk*, whether in Lviv (eg, B. *Kravtsiv), Prague (eg, Yu. Darahan, O. *Liaturynska, L. *Mosendz, O. *Stefanovych, O. *Olzhych, and O. *Teliha), or Warsaw (eg, Yu. *Lypa, N. *Livytyska-Kholodna, and Ye. *Malaniuk). Their poetry, often written in regular meters and strophes and employing heroic imagery, was aimed chiefly at furthering the struggle for national liberation. Somewhat apart geographically but not ideologically or in matters of form were the poets of Transcarpathian Ukraine, among whom the most noted were V. *Grendzha-Donsky, I. *Irliavsky, and A. *Harasevych.

Rylsky, Bazhan, and Tychyna were the few great poets who survived the purges and continued writing through the artistically barren years of the 1940s and 1950s. They

were joined by other, younger poets, such as A. *Malyshko, P. *Voronko, O. Pidsukha, R. *Bratun, and D. *Pavlychko, whose talents could not always develop freely in the difficult political circumstances. Through the 1940s and 1950s they, like everyone else, wrote what was demanded and expected of them by the Party. Rarely did their verse have anything to do with poetry. Others, from both Soviet and Western Ukraine, such as Osmachka, Bahriany, Barka, Klen, Malaniuk, Mosendz, Kravtsiv, Lesych, Liaturynska, Hordynsky, and M. *Orest, emigrated and continued to write after the Second World War. Some new poets appeared during the literary heyday that took place after the war in the displaced persons' camps. Poets such as Ya. *Slavutych, L. *Lyman, P. *Karpenko-Krynytsia, and H. *Cherin remained true both thematically and stylistically to the nationalistic poetry of the preceding generation. Somewhat different were the symbolistic and hermetic poetry of O. *Zuievsky, the philosophical sonnets of O. *Tarnavsky, and the introspective lyricism of B. *Oleksandriv and V. *Skorupsky. All continued to write after resettling outside of Europe, mostly in Canada (Slavutych, Zuievsky, Oleskandriv, Skorupsky, and others) or the United States (Tarnavsky, Cherin, Lyman, Hordynsky, and others). There are Ukrainian poets in every country to which Ukrainians emigrated. In Australia the best known are Z. Kohut, P. Vakulenko, and V. Onufrienko; in Great Britain, B. Bora, H. Mazurenko, and A. Lehit; in France, M. Kalytovska; in Germany, E. *Andiievska, I. *Kachurovsky, and the more recent émigré from Ukraine, M. Fishbein; and in Belgium, R. Baboval.

When the émigrés resettled in North America after the Second World War, they found a poetic tradition cultivated by the earlier émigrés, especially in Canada. Most of the poetry written in the first half of the 20th century consisted of folksy verses expressing longing for the homeland and the hardships of pioneer life. Such were the poems of P. Bozhyk, S. Palamariuk, T. *Fedyk, and others. More imbued with interwar nationalism were the poems of V. Kudryk, M. Gowda, I. Novosad, T. Kroiter, and, later, M. *Mandryka. (For fuller lists see *Canada.)

A major shift in Ukrainian poetry occurred in the late 1950s. After the death of Stalin in 1953 and the 'de-Stalinization' speech by N. Khrushchev at the 20th Party Congress in February 1956, literature, especially poetry, revived. The so-called *shestydesiatnyky* were able to overcome the destruction wrought by Stalinism for three decades and proceeded with the development of poetry where it had left off in the 1920s. A vitality and freshness permeates their lyricism. More than 60 new poets appeared; others, such as Pavlychko, were able to show their real talent for the first time. The foremost poets of that generation were L. *Kostenko, I. *Drach, V. *Korotych, M. *Vinhranovsky, and V. *Symonenko. Although new repressions occurred in the 1970s, a second generation of poets managed to appear. Among them the most noted were I. *Kalynets, V. *Stus, V. *Holoborodko, and I. *Zhylenko. Kalynets gave promise of moving Ukrainian poetry, as Tychyna had done before him, onto a new plane, in his synthesis of elemental Ukrainian spirituality and modern versification, but the repressions of L. Brezhnev prevented his doing so. The almost-official poet of Ukraine of the 1980s was B. *Oliinyk, although Drach, Pavlychko, and Kostenko retained their prominence. Some younger poets who showed promise in the 1980s were V. Zatuliy-

viter, O. Slonovska, S. Yovenko, N. Davydovska, N. Bilotserkivets, and M. Barandii.

Almost simultaneously with the appearance of the *shestedysiatnyky* a modernization occurred in Ukrainian poetry outside of Ukraine. The *New York Group embraced younger poets who rejected the nationalist poetry of their predecessors and were searching for a new synthesis and expression capable of absorbing their peculiar situation as permanent émigrés. Their methods varied, from the surrealism of Andrievska to the deopotizations of G. *Tarnawsky, the sensuality of B. *Boychuk, the exoticism of V. Vovk, the intellectualism of B. *Rubchak, and the estrangement of P. Kylyna (*Warren).

A decade later the Prague Spring also brought a revival in the poetry of Ukrainians living in Czechoslovakia, most notably that of S. *Makara and S. *Hostyniak. Of interest also is the poetry of P. Romaniuk in Rumania.

Despite various political intrusions the writing of poetry continues to be the major Ukrainian literary activity. Among the émigrés there are many versifiers but few poets. There is some promise, however, in the youngest generation, namely, M. Revakovich, L. Gavur, and Dzhavah [A. Wynnickyj] in North America. In Ukraine in the late 1980s a most interesting phenomenon was the appearance of new poetic groupings, such as the avant-garde Bu-Ba-Bu, with the satiric, often parodic verses of V. Neborak, Yu. Andrukhovych, and O. Irvanets; LuHoSad, embracing the neofuturistic wordplay of I. Luchuk, N. Honchar, and R. Sadlovsky; and Propala Hramota, composed of the equally verbally daring and playful poets of Kiev O. Semenchenko (pseud: Semen Lybon), Yu. Lysenko (pseud: Yurko Pozaiak), and V. Lapkin (pseud: Viktor Nedostup). Under the new conditions of literary freedom some poets of previous generations were finally published (eg, M. *Vorobiov and T. *Melnychuk). Among the many younger poets of interest who appeared in the 1980s are V. Herasymyuk, I. Malkovych, I. Rymaruk, L. Taran, O. Lysheha, and O. Zabushko.

Pogodin, Mikhail, b 22 November 1800 in Moscow, d 20 December 1875 in Moscow. Russian historian, philologist, and journalist; corresponding member of the Russian Academy of Sciences from 1841. He graduated from Moscow University (1823) and taught there from 1826 to 1844. He advocated the *Normanist theory and opposed M. Kachenovsky's theory of the Khazar origin of Rus'. Pogodin published the nationalist journals *Moskovskii vestnik* (1827–30) and *Moskovitianin* (1841–56). During the reign of Nicholas I he developed and defended the reactionary theory of official nationality. Pogodin was an ideologue of tsarist *Pan-Slavism and the spiritual mentor of Galician *Russophiles (eg, D. Zubrytsky). He visited Lviv in 1835 and 1839–40, after which a 'Pogodin colony' was established there. From 1844 he worked for the Ministry of Education.

In three articles (1856–7) on the language of ancient Rus' Pogodin argued that before the Mongol invasion the Dnieper River Basin was inhabited by Russians, that Ukrainians (migrants from Subcarpathia) did not settle in the evacuated territories until the 16th century, and that the Cossacks were a separate Slavic-Turkic tribe. His views (later echoed by A. *Sobolevsky) provoked a debate, in which they were proved unfounded and unscholarly by prominent historians (M. Maksymovych, V. Antonovych, M. Vladimirovsky-Budanov, M. Dashkevych, M. Hrushevsky) and philologists (O. Kotliarevsky, P. Zhytetsky, V. Jagić, A. Krymsky). Pogodin did pioneering research on the Rus' chronicles. He wrote books on Nestor the Chronicler and the origin of the Rus' chronicles (his PHD diss, 1839), the Norman period of Russian history (1859), and pre-Mongol Rus' history (3 vols, 1871), and studies, notes, and lectures on pre-Mongol Rus' (7 vols, 1846–57). His letters to M. Maksymovych were published in 1882, and a biography of him and his works were published by N. Barsukov (22 vols, 1888–1910).

Pogrom. In its widest meaning the term refers to a violent attack on the persons and property of any weaker ethnic, religious, or national group by members of a dominant group. The measures taken against the Ukrainian population during the Russian occupation of Galicia in 1914–15, for instance, sometimes figured as the 'Galician pogroms' in contemporary accounts. In its most common sense, however, the term 'pogrom' refers to the attacks accompanied by looting and bloodshed against the *Jews of the Russian Empire in the late 19th and early 20th centuries. More precisely the term refers to three waves of widespread assault on the Jewish population that occurred in 1881–4, 1903–6, and 1918–21 as offshoots of larger crises in the Russian Empire as a whole. The first disturbances of the sort actually occurred in 1859, following the Crimean War (1853–6), and in 1871 in Odessa, when Greeks and Jews clashed over the grain trade.

The first major series of pogroms took place after members of *Narodnaia Volia assassinated Alexander II on 13 March 1881. The attacks began in Yelysavethrad at the end

of April and spread to the gubernias of Chernihiv, Katerynoslav, Kherson, Kiev, Odessa, Poltava, and Tavriia in early May. In July and August they flared anew in Poltava and Chernihiv provinces. Pogroms also took place in Warsaw, Balta, and several towns of Belarus and Lithuania. Pogrom activity largely ceased after a decree issued by the new interior minister, D. Tolstoi, on 21 June 1882, although there were isolated outbreaks in the spring of 1883 in Rostov and Katerynoslav and in the summer of 1884 in Nizhnii Novgorod.

In Ukraine the attacks were carried out largely by urban dwellers, mainly seasonal workers in factories, railways, and ports who had migrated from Russia. They did not spread to the villages in a significant way. Destruction and looting of property and beatings were characteristic of the pogroms. A relatively small number of people were killed. The pogroms had an electrifying effect on the Jewish population and provided an impetus for the *Zionist movement as well as emigration to the New World. Ironically the imperial Russian government responded to the attacks by instituting further legislative restrictions on the Jews within and outside the *Pale of Settlement and expelling Jews en masse from Moscow in 1891–2. A common explanation offered for that wave of pogroms has been that a spontaneous uprising resulted from rumors that Jews had been instrumental in the tsar's assassination. A more likely explanation is that alienated (and commonly migrant) workers were venting personal and economic frustration. The attacks were not officially condoned, although the imperial authorities showed their duplicity by failing to maintain public order.

The pogroms of 1903–6 had a different character. Faced with growing unrest (see *Revolution of 1905) and hoping to divert discontent arising from the empire's losses in the Russo-Japanese War, the imperial authorities granted reactionary newspapers and ultraconservative loyalist groups known as *Black Hundreds a free hand to agitate against 'Jewish machinations' as the cause of the social upheavals of the time. The pogroms followed as an intensification of that campaign. The first in a series of attacks occurred in Chişinău (Kishinev), in Bessarabia, during Passover in 1903, and the next in Homel, in Belarus, in September. In the fall of 1904 army recruits and local rabble perpetrated a series of pogroms in Ukraine, in Oleksandriia, Rivne, Smila, and elsewhere. As the revolutionary movement gained strength in 1905, the attacks intensified. In February a pogrom took place in Teodosiia, in April in Melitopol, and in May in Zhytomyr. The severest pogroms followed the proclamation of the October Manifesto, particularly in the first week of November 1905, when the non-Jewish intelligentsia was also attacked. In Ukraine major pogroms occurred in Kamianets-Podilskyi, Katerynoslav, Kiev, Kremenchuk, Mykolaiv, Odessa, Romen, Chernihiv, Symferopil, and Yelysavethrad. Altogether about 700 pogroms were recorded. The scope of the attacks went beyond the wholesale destruction of property seen in 1881–2, to include rape and the killing of several hundred Jews. Again the most prominent participants were industrial and railway workers, small shopkeepers, and artisans. Peasants mostly joined in order to loot property. The second wave of pogroms intensified the desire of Jews to emigrate from the Russian Empire.

The last wave of pogroms took place in connection with the Revolution of 1917 and the chaos that accompanied the *Ukrainian-Soviet War of 1917–21. Those pogroms far

exceeded the earlier outbreaks in both size and severity. According to somewhat conservative (but wide-ranging) estimates made in the 1920s by N. Gergel, 887 major pogroms and 349 less severe attacks against Jews took place in Ukraine in 1918–20 and resulted in the death of 31,071 people and the injury of tens of thousands of others. Other estimates have put the number of dead as high as 60,000. The Gergel figures put the annual figure for pogroms at 80 in 1918, 934 in 1919, and 178 in 1920. Most (80 percent) were perpetrated in Right-Bank Ukraine, where the majority of the Jewish population in the Russian Empire lived. The pogroms began with the slaughter of Jews by Bolshevik units in the spring of 1918 in Hlukhiv and Novhorod-Siverskyi. In time, however, the Red Army was able to restore military discipline (and curb pogrom activity) among its troops, and it eventually established itself in the minds of Jews as the only force capable of protecting them. The Army of the UNR, under the command of S. Petliura, was unable to control its troops in the same manner. A decree from Petliura in January 1919 to stem a growing wave of violence was ineffectual, and several of his commanders carried out a series of violent attacks against Jews in Berdychiv, Gvardiiske, Zhytomyr, (particularly) Proskuriv, and other locations. In spite of petitions from Jewish representatives Petliura remained silent on the pogrom issue until April. By that time Jewish leaders had lost faith in the Directory. Gergel's figures attributed 40 percent of the pogroms carried out in 1918–20 (355) to Directory troops, as well as nearly 54 percent of the resulting deaths (16,706). Various independent leaders of the *partisan movement in Ukraine (known commonly as otamans) also perpetrated pogroms (estimated at 28.8 percent of the total number of pogroms, and 26 percent of the total mortalities). They included otamans N. Hryhoriiv (who led the bloodiest of the pogroms), Anhel, and D. Terpylo (Zeleny). The Russian Volunteer Army commanded by Gen A. Denikin, often inspired by a Black Hundreds ideology, perpetrated numerous pogroms. In Ukraine alone it was responsible for 183 pogroms (20.6 percent of that country's total) and an estimated 5,235 deaths (nearly 17 percent). Its largest action took place in Khvastiv in September 1919 and claimed approx 1,500 lives.

Because the majority of Jews within the Russian Empire lived in Ukraine, the majority of pogroms in the Russian Empire were perpetrated there. Their number and intensity there has given rise to the assumption that they were carried out by the local population, and to a stereotypical image of the Ukrainian as an inherently anti-Semitic *pogromchik*. The notion became particularly widespread in the West as a result of the public sensation caused in France by the *Schwartzbard Trial, which followed the assassination of Petliura in Paris in 1926. Petliura was assassinated by a Bessarabian Jew on the grounds that Petliura personally was responsible for the horrors of the pogroms in Ukraine.

P. Potichnyj

Pohlmann, Friedrich, b 1805, d 16 August 1870 in Lviv. Scenery designer of German origin. He was the first designer in the Ruska Besida Theater, for which he created scenery for the productions of *Marusia* (1864, based on H. Kvitka-Osnovianenko), T. Shevchenko's *Nazar Stodolia* (1865), and H. Yakymovych's *Roksoliana* (1865). In 1842-70 he worked in F. Skarbek's Polish theater in Lviv.

Mykhailo Pohoretsky

Oleksii Pohorielov (Aleksei Pogorelov)

Pohoretsky, Mykhailo [Pohorec'kyj, Myxajlo] (Pohorecky, Michael), b 21 December 1899 in Hadynkivtsi, Kopychyntsi county, Galicia, d 26 July 1964 in Winnipeg. Journalist. A former officer in the *Ukrainian Sich Riflemen, he studied in Lviv at the underground university and at the Ukrainian Free University. Pohoretsky emigrated to Canada in 1927 and edited *Zakhidni visti* in Edmonton with V. *Kaye-Kysilewsky before establishing **Novyi shliakh* and serving as its longtime editor (1930-54, 1960-4). He was a founding member of the *Ukrainian National Federation and its president in 1936. For many years he was on the presidium of the Ukrainian Canadian Committee (now Congress).

Pohorielov, Oleksii [Pohorjelov, Oleksij] (Pogorelov, Aleksei), b 3 March 1919 in Korocha, rsk gubernia, Russia. Mathematician; full member of the AN URSR (now ANU) since 1961 and of the USSR (now Russian) Academy of Sciences since 1976. After completing his studies at the Military-Aviation Academy in 1945, he worked at the Central Aerohydrodynamics Institute (1945-7) and then

at Kharkiv University (professor from 1950). He also headed a department at the ANU Physical-Technical Institute of Low Temperatures in Kharkiv (since 1960) and the Northeast Scientific Center of the ANU (1978-81). Pohorielov's fundamental and lasting contributions are in the field of geometry in large. V. Drinfeld, one of the scholars from Pohorielov's school, was awarded the Fields Medal in 1990. He solved completely a number of outstanding problems, including the classical problem of the unique determination of a convex surface by its internal metric, the external regularity of convex surfaces with regular internal metric, the celebrated Hilbert's fourth problem, the Minkowski multidimensional problem, and the problem of Weil concerning the isometric immersion in the large of a two-dimensional Riemannian manifold into a three-dimensional one. He developed the nonlinear theory of elastic shells and obtained fundamental results regarding such difficult problems as the regularity of convex surfaces under various conditions and infidecimal bending of convex surfaces. His work has had a great impact on the theory of partial differential equations.

W. Petryshyn

Pohorilivka archeological site. A late Neolithic (mid to late 3rd millennium BC) site near Pohorilivka, Krolevets raion, Sumy oblast. Excavations since the 1920s have revealed a variety of hunting and fishing utensils and remains of pottery decorated by pitting and combing.

Pohost (Russian: *pogost*). An administrative term, dating from the time of Kievan Rus', denoting a territorial unit that usually encompassed a rural community. Under the Hetman state (17th-18th centuries) in Starodub regiment a resettled colony of Russian Old Believers was called a *pohost*. In other regions during the 15th to 17th centuries, particularly Novgorod, a *pogost* signified a village with a church and cemetery or simply a rural cemetery. The term was used in the latter sense in folk literature at the end of the 19th century.

Pohrebennyk, Fedir, b 29 June 1929 in Rozhniv, Stanyslaviv county, Galicia. Literary scholar. He completed a degree in literature at Chernivtsi University and since 1959 has worked at the Institute of Literature of the AN URSR (now ANU). Except for some articles on T. Shevchenko, Pohrebennyk has concentrated on the turn-of-the-century writers from his native region. He coedited *Pys'mennyky Bukovyny* (Writers of Bukovyna, 1958) and edited a book on M. Cheremshyna (1975) and a book on O. Kobylianska (1982). He wrote *Osyp Makovei: Krytyko-biografichnyi narys* (Osyp Makovei: A Critical-Biographic Sketch, 1960). The majority of his works, however, are devoted to V. *Stefanyk: besides the three-volume collection of Stefanyk's works, which he coedited with V. Lesyn in 1964, he edited *Spivets' znedolenoho selianstva* (The Singer of the Unfortunate Peasantry, 1974) and wrote *Vasyl' Stefanyk u slov'ians'kykh literaturakh* (Vasyl Stefanyk in Slavic Literatures, 1976), *Vasyl' Stefanyk: Seminarii* (Vasyl Stefanyk: Seminars, 1979), and his doctoral study, *Storinky zhyttia i tvorchosti Vasylia Stefanyka* (Pages from the Life and Creativity of Vasyl Stefanyk, 1980). Pohrebennyk's approach, like that of the majority of Soviet literary scholars, avoided the ideological pitfalls of interpretive reading and concentrated on biographical details.

D.H. Struk

Pohrebinsky, Solomon [Pohrebins'kyj], b 19 March 1924 in Kiev. Computer scientist. He graduated from the Kiev Polytechnical Institute (1949) and worked at the AN USSR (now ANU) institutes of Exact Mechanics and Computing Technology (1949–56), Mathematics (1956–7), and Cybernetics (since 1957). His main contributions are in the field of computer theory. He was a member of the teams which designed the earliest Soviet computers, including the *MEOM and MIR.

Pohrebniak, Petro [Pohrebniak], b 10 July 1900 in Volokhiv Yar, Chuhuiv county, Kharkiv gubernia, d 25 July 1976 in Kiev. Forester and soil scientist; full member of the AN USSR (now ANU) from 1948. He graduated from the Kharkiv Agricultural Institute (1924) and worked for the Ukrainian Scientific Research Institute of Forest Management and Agroforest Amelioration (1931–3). He was a department head at the Kiev Institute of Forest Management (1933–41), taught at Kiev University (1944–56), headed the ANU Institute of Forestry (1945–56), and served as vice-president of the ANU and chairman of its Economic Production Studies Committee (1948–50). He was an acting department head of the Central Republican Botanical Garden (1956–60) and the geography division of the ANU, and of the Institute of Botany (from 1964). Pohrebniak's major scholarly interests included forest typology and the physiology of trees and shrubs, forest hydrology, plant ecology, forest soil study, and forestation techniques in sandy soils. He undertook pioneering work in the field of phytocology and is known for his classifications of soil systems, particularly his articulation of the idea of a soil continuum. He wrote numerous works, including *Osnovy lesnoi tipologii* (The Foundations of Forest Typology, 1955) and a book coauthored with N. Remezov and translated as *Forest Soil Science* (1969). He also served as head of the Ukrainian Society for the Protection of Nature in 1950–62.

Pohrebniak, Yakym [Pohrebniak, Jakym], b ? in Nova Vodolaha, in the Kharkiv region, d ? Eighteenth-century master builder. He built cruciform wooden churches with pyramidal roofs, including the five-cupola churches in Merefá and Artemivka (1761, destroyed by the Soviets) and the largest wooden structure in Ukraine of the 18th century – the Trinity Cathedral in Novomoskovske, with nine frames and nine cupolas almost 65 m in height (1773–8).

Pohrebyshe [Pohrebyšče]. IV-10. A city (1989 pop 11,700) on the Ros River and a raion center in Vinnytsia oblast. In the 12th century the town of Rokytnia stood at the site. After its destruction by the Tatars in 1240, the new settlement was called Pohrebyshe. At the beginning of the 16th century it came under Polish rule. In the 1580s a fortress was built there, and in 1595 it was captured by rebellious peasants and Cossacks. The town's inhabitants took part in B. Khmelnytsky's uprising, and in 1648 Pohrebyshe became a company center in Bratslav regiment. By the Treaty of Andrusovo (1667) it was ceded to Poland, and after the partition of Poland in 1793, to Russia. It attained city status in 1984. Today it produces sugar, powdered milk, animal feed, reinforced concrete, brick, and construction materials.

Pohribniak, Mykola [Pohribniak], b 5 December 1885 in Kozatske, Zvenyhorodka county, Kiev gubernia, d 30 May 1965 in Dnipropetrovske. Painter and graphic artist. He studied under O. Slastion at the Myrhorod Applied Arts School (1903–8) and later taught at the Dnipropetrovske Art School. His work consists of genre paintings and landscapes, such as *After the Rain* (1912), *In the Kiev Region* (1913), *Evening* (1937), and *Snowstorm* (1945), and illustrations for children's books and school texts. He amassed a large collection of Ukrainian decorative designs.

Pohribny, Mykola [Pohribnyj], b 13 May 1920 in Mochalyshe, Kozelets county, Chernihiv gubernia. Lexicographer. A graduate of the Zaporizhia Pedagogical Institute, he taught secondary school and worked as a radio announcer. He compiled the first dictionary of stresses in Standard Ukrainian (1959, 1964), an orthoepic dictionary (1984), and a dictionary of proper names (unpublished). His studies of current usage are published in the methodological collection *Teleradiovisnyk Ukrainy* (Television-Radio Herald of Ukraine), and his column on norms appears in the radio magazine *Slovo*.

Poiarkov, Yurii [Pojarkov, Jurij], b 10 February 1937 in Kharkiv. One of the best volleyball players in the history of the sport. He played on more winning teams of world, Olympic, and European championships than any other male player. A regular player on the Kharkiv Burevisnyk team, he played on the USSR teams that won the 1964 and 1968 Olympic gold medals, the 1972 bronze medal, the 1960 and 1962 world championships, and the 1967 and 1971 European championships.

Poida, Dmytro [Pojda], b 3 November 1908 in Bordaivski Khutory, Verkhnodniprovske county, Katerynoslav gubernia. Soviet Ukrainian historian. He graduated from the Kharkiv Pedagogical Institute (1936), and from 1937 he taught in Dnipropetrovske at the higher CP school, the Mining Institute, and (from 1965) the university, as head of the department of the history of the USSR and the Ukrainian SSR. He wrote *Krest'ianskoe dvizhenie na Pravovertzhnoi Ukraine v poreformennyi period (1866–1900 gg.)* (The Peasant Movement in Right-Bank Ukraine in the Post-Reform Period [1866–1900], 1960) and *Z istorii borot'by ukrains'koho selianstva proty dukhivnyctva v dorevoliutsiyni chas* (On the History of the Struggle of Ukrainian Peasants against the Clergy in the Prerevolutionary Period, 1961).

Pokalchuk, Volodymyr [Pokal'čuk], b 1 July 1897 in Velyka Fosnia, Ovruch county, Volhynia gubernia, d 5 January 1985 in Lutske. Philologist and teacher; father of Yu. Pokalchuk. During the 1920s he studied at the Kiev Institute of People's Education (1923–8) and was active there in the Group for the Culture of the Ukrainian Word (HuKUS). In 1928 he began postgraduate studies under M. Zerov at the Taras Shevchenko Scientific Research Institute. His book reviews and articles on 19th-century Ukrainian writers were published in *Zhyttia i revoliutsiia*. Pokalchuk was one of the many Ukrainian intellectuals arrested by the GPU in 1930 in preparation for the show trial of the so-called *Union for the Liberation of Ukraine. He was released from a Kiev prison in 1932 but was barred from pursuing a scholarly career. After a few years he was

allowed to teach, and lectured at the pedagogical institutes in Poltava and Kremianets (1939–41). After the Second World War he taught at the Lutske Pedagogical Institute and researched the dialects, ethnography, and regional history of Volhynia. Until his retirement in 1980, he suffered occasional persecution by the Soviet authorities, including dismissal from the Lutske institute for one year.

Pokalchuk, Yurii [Pokal'čuk, Jurij], b 24 January 1941 in Kremianets, Ternopil oblast. Writer, literary scholar, and translator; son of V. *Pokalchuk. He graduated from Leningrad University (1964) and did graduate work at the AN URSR (now ANU) Institute of Literature. After receiving a candidate's degree in 1969, he worked as a scholarly associate of the institute (until 1977) and wrote books about postwar American literature (1972) and contemporary Latin American prose (1978). He began writing fiction in 1965 and is the author of the prose collections *Khto ty?* (Who Are You?, 1979), *Kol'orovi melodii* (Colored Melodies, 1984), *Velykyi i малыi* (The Big and the Small, 1986), and *Kava z Matagal'py* (Coffee from Matagalpa, 1987) and of the novels *I zaraz, i zavzhdy ...* (Now and Forever, 1981), *Shablia i strila* (The Sword and the Arrow, 1988), and *Moderat* (1990).

Pokhodenko, Vitalii [Poxodenko, Vitalij], b 9 January 1936 in Komunarske, Luhanske oblast. Physical chemist; AN URSR (now ANU) corresponding member since 1973 and full member since 1985. After graduating from Kiev University (1958) he joined the ANU Institute of Physical Chemistry and became its deputy director in 1971 and director in 1983. He has studied the effects of structure on the spectral properties, kinetics, and mechanism of free radical reactions; determined the electronic structure of various free radicals, proving the radical mechanism of many reactions; discovered a new reaction type involving single electron transfers; and determined the effect of a reagent's electronic structure on free radical redox reactions.

Pokhodnia, Ihor [Poxodnja], b 24 January 1927 in Moscow. Ukrainian metallurgist; full member of the AN URSR (now ANU) since 1976. He graduated from the Kiev Polytechnical Institute (1949) and since 1952 has worked at the ANU Institute of Electric Welding. In 1970 he became chief academic secretary of the ANU. He headed the developmental effort in the area of vacuum welding, which was later successfully used in space, particularly during the flight of the satellite Soiuz-6.

Pokhozhi peasants (*pokhozhi seliany*). A category of formally free peasants who lived on and utilized state-owned lands in the 14th- to 16th-century Lithuanian-Ruthenian state. In exchange they paid tribute or taxes in cash or kind and fulfilled basic agricultural and labor obligations to the state (eg, plowing and harvesting land on the grand duke's estates and around castles, delivering hay and wood to castles, building roads, bridges, and fortifications, hunting and fishing for the grand duke). Those obligations were collectively called *tiahlo* ('draft,' from the use of draft animals; thence the term *tiahlo* peasants). The *pokhozhi* ('mobile') peasants had the right to move to other places. Their personal property, and their inheritance rights, which were regulated by customary law, were diminished over time. *Pokhozhi* peasants who moved onto

lands owned by feudal lords, or who lived on lands granted by the grand duke to such lords, no longer had obligations to the state, but paid quitrents to and performed corvée for the lords. Their freedom to leave was subject to restrictive loan agreements with the lord and excessive penalties for breaking their contracts. After 10 years they became **nepokhozhi* peasants; that is, they lost their freedom to move and were partially enserfed.

Dmytro Pokhylevych

Pokhylevych, Dmytro [Poxylevyč], b 22 September 1897 in Vodotni, Zhytomyr county, Volhynia gubernia, d 29 May 1974 in Lviv. Historian. A graduate of the Kiev Institute of People's Education (1924), he taught in postsecondary institutes in Ukraine and Russia. From 1946 he was in charge of medieval history at Lviv University, and in 1952–73 he chaired the department of South and West Slavic history there. Pokhylevych wrote numerous articles, mainly on agrarian relations and the history of the peasantry of Ukraine, Belarus, Lithuania, and Poland, and monographs on the 16th- to 18th-century Belarusian and Lithuanian peasantry (1957), Poland in the feudal era (1965), and the Belarusian and Lithuanian peasantry in the second half of the 18th century (1966).

Pokhylevych, Lavrentii [Poxylevyč, Lavrentij], b 1816, d 1893. Regional historian. He worked as a clerk in the Kiev Consistory and wrote books in Russian on tales about the populated places of Kiev gubernia (1864) and the populated places of Kiev and Radomyshl counties (1887). They contain a wealth of topographic, statistical, economic, religious, ethnographic, and historical information, not all of which is accurate.

Pokhytonov, Ivan [Poxytonov], b 8 February 1850 in Motronivka, Oleksandriia county, Kherson gubernia, d 12 December 1923 in Liège or Brussels. Painter; full member of the St Petersburg Academy of Arts from 1904. From 1876 he lived in France and Belgium and was influenced by the Barbizon school. In 1891 he joined the *Society of South Russian Artists. In 1903–5 he worked in Belarus, and in 1905 he became a member of the *Peredvizhniki society. In 1913 he returned to the Kherson region. From 1919 he lived as an émigré in Belgium. He is known for his small but masterly landscapes, including many of Ukraine, such as *Peasant Wedding*, *In the Reeds*, *Winter Dusk*, *Potato Gathering*, *Evening in Ukraine*, and *Harvest*. A catalog of his works was published in Moscow in 1963.

Ivan Pokhytonov: *Winter Dusk in Ukraine* (oil, 1886)

Pokotylivka. IV-17. A town smt (1986 pop 10,800) in Kharkiv raion, Kharkiv oblast. The town was formed in the 1959 by the amalgamation of two villages, Karachivka and Pokotylivka. Many of its residents work in Kharkiv, which is only 8 km away. Pokotylivka has a fruit-canning factory and a reforestation station.

Pokotylo, Mykhailo, b 21 June 1906 in Borshna, Pryluka county, Poltava gubernia, d 1 September 1971 in Kiev. Stage and film actor and director. He studied in the Kiev (1927–8) and Kharkiv (1928–30) music and drama institutes and then worked in the Kharkiv Chervonozavodskiy Ukrainian Drama Theater (1931–3), the Kharkiv Ukrainian Drama Theater (1934–61), and the Kiev Ukrainian Drama Theater (1961–71). He acted in the films *Pedahohichna poema* (A Pedagogical Poem, 1955, based on A. Makarenko's novel) and *Shel'menko-denshchuk* (Shelmenko the Orderly, 1957, based on H. Kvitka-Osnovianenko's comedy).

Pokrovsk. See Engels.

Pokrovske [Pokrovs'ke]. VI-17. A town smt (1986 pop 11,900) on the Vovcha River and a raion center in Dnipropetrovske oblast. It developed out of a Cossack homestead (est in 1760) into a military settlement. Today it has a food industry.

Pokrovsky, Andrii [Pokrovs'kyj, Andrij], b and d ? Navy admiral. A vice-admiral in the Russian navy during the First World War, in 1918 he served the UNR as commander of Black Sea ports and was promoted to admiral by the Hetman government. In November–December 1918 he was minister of the navy in the Hetman government of S. Gerbel.

Pokrovsky, Mikhail, b 29 August 1868 in Moscow, d 10 April 1932 in Moscow. Russian Marxist historian. Pokrovsky studied at Moscow University (1887–91) under P. Vinogradov and V. *Kliuchevsky. A member of the Bolshevik party from 1905, he was an important organizer of Soviet historical scholarship after the revolution until the Stalin period. He headed the Institute of Red Professors and edited the journal *Krasnyi arkhiv*. One of his major

works, *Russkaia istoriia s drevneishikh vremen* (A History of Russia from the Earliest Times, 5 vols, 1910–13), had a long chapter titled 'The Struggle for Ukraine.' It interpreted Ukrainian history from the 16th through the 18th century as essentially social strivings under the guise of national or national-religious struggle. The chapter was omitted from the authorized English translation, *A History of Russia*, prepared by J.D. Clarkson and M.R.M. Griffiths in 1931. Pokrovsky's work was marked by an absence of Russian nationalism. He respected the historiographical contributions of M. *Kostomarov and M. *Hrushevsky and considered that Ukraine had been in a colonial relationship to tsarist Russia. Pokrovsky's historical methods had a major influence on the Ukrainian Marxist historian M. *Yavorsky. A collection of Pokrovsky's articles on Ukraine, edited by M. Popov, was published in Kiev in 1935. A critical edition of Pokrovsky's selected works appeared in Moscow in 1965–7. R. Szporluk edited a collection of Pokrovsky's articles in English translation in 1970. J.-P. Himka

Pokrovsky, Mykola [Pokrovs'kyj], b 28 October 1901 in Tulchyn, Bratslav county, Podilia gubernia, d 16 July 1985 in Odessa. Opera conductor. A graduate of the Kiev Institute of Music and Drama (1925), Pokrovsky studied under M. Leontovych. In 1924–6 he was music director of the Bezil theater and then conducted opera in Odessa (1926–33, 1944–75), Kharkiv (1934–40, 1941–4), and Lviv (1940–1). He premiered B. Yanovsky's *The Black Sea Duma* (1929), V. Kostenko's *Karmeliuk* (1930), and K. Dankevych's *Bohdan Khmelnytsky* (1951). From 1947 he taught at the Odessa Conservatory.

Pokrovsky, Vasilii [Pokrovskij, Vasilij], b 1839 near Kaluga, Russia, d 31 January 1877 in Kiev. Russian physician. A graduate of the St Petersburg Medico-Surgical Academy (1861), from 1867 he was a professor at Kiev University, where he taught in the fields of pediatrics, skin diseases, otolaryngology, and nervous and psychic disorders. He was also director of the internal medicine clinic at the Kiev Military Hospital; he died directing efforts to control an outbreak of typhus in Kiev.

Pokrovsky, Yosyp [Pokrovs'kyj, Josyp], b 5 September 1868 in Hlukhiv county, Chernihiv gubernia, d 14 May 1920 in Moscow. Legal scholar. After graduating from the law faculty of Kiev University and the seminar on Roman law at Berlin University, he lectured at Yurev (now Tartu) (1894–6), Kiev (1896–1902), St Petersburg (1902–17), and Moscow (1918–20) universities. A specialist in Roman and civil law, Pokrovsky accepted the concept of natural law and defended the absolute freedom of the individual. His chief books are *Pravo i fakt v rimskom prave* (Law and Fact in Roman Law, 1898) and *Osnovatel'nye problemy grazhdanskogo prava* (Fundamental Problems of Civil Law, 1917).

Pokukhovne. A tax on liquor sales under the Hetmanate. It was introduced during B. Khmelnytsky's uprising (1648–57) and was collected from innkeepers according to the number of casks (*kufy*) sold. Monasteries and certain estates were exempted from the tax. The income generated was divided among the regimental *starshyna*. The tax was abolished in the 1780s, when the tsarist regime reorganized the administrative system in Ukraine.

Pokutia (Rumanian: Pokucia). A historical-geographic upland region bounded by the Dniester River and the Podolian Upland to the north, the Prut River and Subcarpathia to the south, the Stanyslaviv Depression to the west, and the Kitsman Depression and the Sovytsia River to the east. Extending up to 100 km from east to west and 25–40 km from north to south, Pokutia covers about 3,000 sq km and has a population of about 400,000. Users of the Pokutian dialects (see *Bukovyna-Pokutia dialects) also inhabit a portion of Subcarpathia. Because of their presence there, the term Pokutia has been used to refer to the entire southeastern corner of Galicia between historic Hungary to the southwest and Moldavia to the southeast. Occasionally the term even included a part of Bukovyna.

Physical geography. Pokutia is the northwestern part of the Pokutian-Bessarabian Upland. Tectonically, it is the southwestern branch of the Ukrainian Crystalline Shield. The old Paleozoic sedimentaries lie far below the Miocene marls, limestones, shales, and gypsum, which in turn are covered by thick layers of loess. At the end of the Tertiary period Pokutia was a flat lowland crossed by the meandering Dniester River. At the end of the Pliocene and the beginning of the Pleistocene epoch an uplift caused the Dniester and the Prut to cut deeply into the sediments, thereby setting off subsequent erosion by their tributaries and the dissection of the Prut-Dniester interfluvium. At that time a relative downwarping formed the Stanyslaviv Depression and caused the Bystrytsia River to change direction and to flow into the Dniester instead of the Prut.

Today Pokutia is a gently undulating plain sloping to the southeast. Elevations range from 300 to 350 m above sea level. In general the western part is more dissected than the eastern part. The landscape is divided into a number of alternating rises and shallow basins. Widespread gypsum deposits account for the abundance of karst features, such as sink holes, dolines, caves, karst lakes, disappearing rivers, and bare gypsum cliffs, particularly in the Tovmach-Horodenka Basin.

The Dniester region, a narrow (10–15 km) band along the right bank of the Dniester River, has a different landscape. It is as deeply dissected as the opposite bank on the Podilia side. In the south the long Kolomyia-Chernivtsi Depression forms a terraced alluvial lowland along the Prut River.

The river network of Pokutia has a radial character. Short rivers flow northward into the Dniester River, longer ones flow southward into the Prut River, and a few join Bystrytsia (tributary of the Dniester) to the west. The network is poorly developed because of the karst landscape. The rivers are short, shallow, and deeply incised in the soft, relatively soluble rock.

The climate of Pokutia is temperate continental: the average annual temperature ranges from 6.9°C to 7.6°C, the average January temperature, from –4.8°C to –5.1°C, and the average July temperature, from 18.2°C to 18.8°C. The number of days with temperatures above 15°C ranges from 96 to 110. Precipitation is adequate to fairly abundant, from 550 to 640 mm per year, depending on the elevation of the region. Soils are mostly podzolized chernozems (with up to 4 percent humus). In western Pokutia there are also gray forest podzolized soils (1–3 percent humus). The natural vegetation is typical of the Central European broad-leaved forest zone and the East European forest-steppe. Very little of Pokutia's original

vegetation has survived. The forests have been reduced to barely 10 percent of the land area in western Pokutia and 7 percent in the east. The forests usually consist of hornbeam and oak, and the groves along the rivers, of alder. Remnants of steppe vegetation include wormwood, esparto grass, thistle, and sage.

History. Greek and Roman accounts of widespread Slavic settlement have been confirmed by archeological finds in Pokutia. In the 4th and 5th centuries the Slavs of Pokutia were members of the Antes tribal alliance, in the 6th and 7th centuries, of the Dulebian alliance, and in the 8th and 9th centuries, of the Tivertian alliance. In the 10th century Pokutia was part of Kievan Rus', and after the *Liubech congress of princes it became part of the Halych principality. Although it was sparsely settled, there were some towns, such as Sniatyn (known since 1158) and Kolomyia (since 1240), in the region. In the second half of the 14th century Poland annexed Galicia, including Pokutia, which was claimed by the emerging principality of Moldavia. The name Pokutia was first mentioned in 1395 in a Moldavian charter, and again in a 15th-century Polish chronicle by J. Dlugosz. In 1388, for a loan of 3,000 gold coins Jagiello of Poland placed Pokutia under the administration of the Moldavian voivode P. Muşat. *Stephen III of Moldavia (1457–1504) led two campaigns to Pokutia (1498, 1502) and pushed the Poles back beyond the Bystrytsia. His son, Bogdan III (1504–17), disclaimed Pokutia and then occupied it briefly, in 1509–10. Voivode P. Rareş's attempts to recapture Pokutia (1531, 1535) failed. The last Moldavian attempt to seize Pokutia was made by John the Terrible in 1572. The Moldavian-Polish wars caused the local population much suffering. Many Pokutians were captured and resettled in Moldavia and Bukovyna, where they strengthened the Ukrainian element.

Along with western Ukraine Pokutia remained under Polish rule until 1772, when it became part of the Austrian Empire. In the 17th to 19th centuries the Ukrainian *opryshoks were active in the region. When the Austrian Empire collapsed, most of Pokutia became part of the Western Ukrainian National Republic (1919). Except for the eastern extremity (east of Sniatyn), which was taken by Rumania, Pokutia was occupied by Poland in 1919–39 and then incorporated into Soviet Ukraine. Most of its territory lies in Ivano-Frankivske oblast. The eastern part lies in Chernivtsi oblast.

Population. Along with Subcarpathia Pokutia belongs to the most densely populated part of Ukraine. The average density approaches 130 people per sq km, and the rural density, 100 people per sq km. The highest densities occur in southern Pokutia along the Prut River. Less than 30 percent of the population is urban. Cities such as Ivano-Frankivske and Chernivtsi lie outside the region. The Pokutian cities of Kolomyia (1989 pop 63,000), Sniatyn (7,300), and Zabolotiv (4,200) are all located on the Prut River. The former county towns of Horodenka (8,100) and Tovmach (5,100) and the urban-type settlements of Ober-tyyn (3,700), Hvizdets (1,500), and Otynia (3,900) are located in the upland.

At the end of the 18th century Pokutia was inhabited by Ukrainians, who constituted nearly 90 percent of the population, some Jews, and a small number of Poles and Armenians. With time more Poles settled in the region, especially in the 1920s and 1930s. A small number of Ger-

mans lived in Kolomyia and its vicinity. In 1939, Ukrainians constituted 74 percent of Pokutia's population, Poles, 9 percent, Ukrainian-speaking Roman Catholics, 7 percent, and Jews, 9 percent. In the 1990s Ukrainians account for 97 percent, Russians, 2 percent, Poles, less than 1 percent, and Jews, 0.2 percent of the population.

Economy. Pokutia was and remains predominantly agricultural. Nearly 76 percent of the land is cultivated, 9 percent is hayfield and pasture, and 9 percent is forest. The sown area is distributed approximately as follows: grains occupy 44 percent, including some 20 percent occupied by wheat, 10 percent by corn, 7 percent by barley, 4 percent by rye, 2 percent by oats, and 1 percent by millet and buckwheat; potatoes and vegetables together take up 15 percent; technical crops another 14 percent, including 10 percent occupied by sugar beets; and feed crops, the remaining 27 percent. The area devoted to corn, sugar beets, and tobacco increases toward the east. Livestock husbandry is concentrated on meat and milk production.

Industry does not play an important role in the region. Only Kolomyia, the largest city, has a broad base of light industries (cotton textiles, knitting, clothing, curtain-making, and footwear), food processing (meat packing, meat canning, dairying, grist milling, distilling), woodworking (furniture and paper manufacturing), and agricultural machine building. Traditional handicrafts are maintained, such as wood carving, embroidery, and kilim weaving. Other towns have a food industry: sugar refining in Kostyryzhivka and dairying (butter, cheese, and milk products) in Horodenka and Sniatyn. The deposits of phosphorites, gypsum, and limestone have not been exploited on a large scale by the chemical or building-materials industries.

Pokutian-Bessarabian Upland. The southwesternmost section of the Ukrainian uplands, situated between the Prut River and the Stanyslaviv Depression to the west, the Dniester River (bordering on the Podolian Upland) to the east, and the Black Sea Lowland to the south. It lies on the southwestern border of the Ukrainian Crystalline Shield. Paleozoic and Upper Mesozoic strata are found in the upland only in the Dniester Valley. The rest of it consists of middle Miocene strata (Pokutian clay, gypsum, and limestone) covered by strata of later Miocene (sands, limestone, and clay). In the south the latter are covered with layers of Pliocene sand and clay. The entire upland is covered by a deposit of loess up to 30 m in depth.

The average elevation of the upland is 300–400 m; the upland forms an undulating plateau that is dissected by valleys and ravines and bears certain characteristics of foothills. It is commonly divided into (from north to

south) the Pokutian Upland, the Berdo-Horodyshche Elevation, the Khotyn-Soroky Divide, the Beltsi (Bălți) Plain, and the Kodry Hills. The northern and northeastern sections of the upland are settled by Ukrainians, and the rest by Rumanians. The region was formerly a part of Galicia, Bukovyna, and Bessarabia, but now it forms parts of Ivano-Frankivske and Chernivtsi oblasts and Moldova.

The Pokutian Upland is a plateau (elevation 300–350 m) with karst features and few intersections. The Berdo-Horodyshche Elevation in northern Bukovyna is covered with beech forest and rises to over 516 m in places. It extends into the Khotyn-Soroky Divide (also known as the Khotyn or Khotyn-Sadhorod Elevation), the watershed between the Dniester and the Prut rivers, which descend from 460 m near Khotyn to 300 m in the southeast. The Rumanian portions of the upland have a few pockets of Ukrainian settlement.

V. Kubijovyč

Pokutian-Bukovynian Carpathians. See Hutsul Beskyd.

Pokuts'ke slovo (Pokutian Word). A semimonthly newspaper published in Stanyslaviv (now Ivano-Frankivske) and then Kolomyia in 1926–7 by the Ukrainian Socialist Radical party (see *Ukrainian Radical party).

Pokuts'kyi vistnyk (Pokutia Herald). An organ of the Kolomyia regional council of the Ukrainian National Rada. It was published twice and then three times a week from November 1918 to May 1919 and was edited by Ya. Navchuk and, after the fourth issue, O. Karashkevych.

Oleksander Pol

Pol, Oleksander [Pol'], b 1 September 1832 in Malooleksandrivske, Verkhnodniprovske county, Katerynoslav guberniia, d 7 August 1890 in Katerynoslav. Entrepreneur and collector of historical artifacts. The grandson of a German settler, Pol recognized the potential of the *Kryvyi Rih Iron-ore Basin deposits and played an important role in their development. His true passion, however, was regional history – possibly because his mother was Hetman P. Polubotok's granddaughter. After finishing law studies at Dorpat (now Tartu) University, he travelled throughout the Katerynoslav region, learning its history, taking part in archeological digs, and collecting artifacts. He pursued this hobby to the point of near financial ruin. Eventually he gathered a collection of 5,000 artifacts from prehistoric to Cossack times, estimated to be worth 200,000

rubles. After his death, Pol's collection was donated to the Katerynoslav Museum of Antiquities, which was subsequently named in his honor; it is now the *Dnipropetrovske Historical Museum.

Pol, Wincenty, b 20 April 1807 in Lublin, d 2 December 1872 in Cracow. Polish Romantic poet, geographer, ethnographer, and founder of the anthropogeographic method in ethnography. After graduating from Lviv University in 1827, he lectured at Vilnius University (1830–2). In 1849 he became the holder of the first chair of geography in Poland at Cracow University. He was the first professor in Poland to give a course in general ethnography. His books about his travels in Ukraine (1835), the philosophy and proverbs of the people in Poland (1836), episodes from his life and travels (1846), the northern slopes of the Carpathians (1851), and the natural environment of northeastern Europe (1851) contain much information about Ukrainian folklore and folkways. He also wrote a book on the Hutsuls (1847) and published a collection of Ukrainian songs in German translation (1853). Many of his manuscripts have been preserved at the Tatr Museum in Zakopane and Cracow University. Some of them, including several articles on the Hutsuls, Lemkos, and Boikos, were published in *Wincenty Pol: Prace z etnografii północnych stoków Karpat* (Wincenty Pol: Works in the Ethnography of the Northern Slopes of the Carpathians, 1966).

Poland. A country extending south to the Sudety and western Carpathian mountains, which separate the area of Polish settlement from that of the Czechs and Slovaks and the Polish state from the Bohemian and Hungarian kingdoms (as of 1526 the Habsburg monarchy, as of 1918 Czechoslovakia), north to the Baltic sea, west to Prussia (as of 1871 Germany, as of 1949 the German Democratic Republic, as of 1991 Germany), east to Ukraine and Belarus, and northeast to Lithuania and Eastern Prussia (as of 1945 Kaliningrad oblast of the RSFSR, as of 1992 the Russian Federation). The ethnic and state borders of Poland have remained stable in the south; in the north Poland did not always extend to its natural boundary, the Baltic. Poland's western and eastern borders underwent great changes over the centuries. A Polish state existed from the mid-10th century until 1795; it was restored in 1918, dismantled in 1939, and restored once again in 1945. The Polish state incorporated Ukrainian ethnic territory from the middle of the 14th century, when it annexed the Principality of Galicia. In 1569 it acquired a major part of Ukraine, from Lithuania. In the mid-17th century it lost Left-Bank Ukraine to the Hetman state (which was subsequently subsumed by the Russian Empire), and in the late 18th century it lost Galicia to Austria and the remainder of its Ukrainian holdings to Russia. As restored after the First World War, Poland included much of Western Ukraine (Galicia, Volhynia, Polisia); as restored after the Second World War, it included only part of the westernmost extensions of Ukrainian ethnic territory.

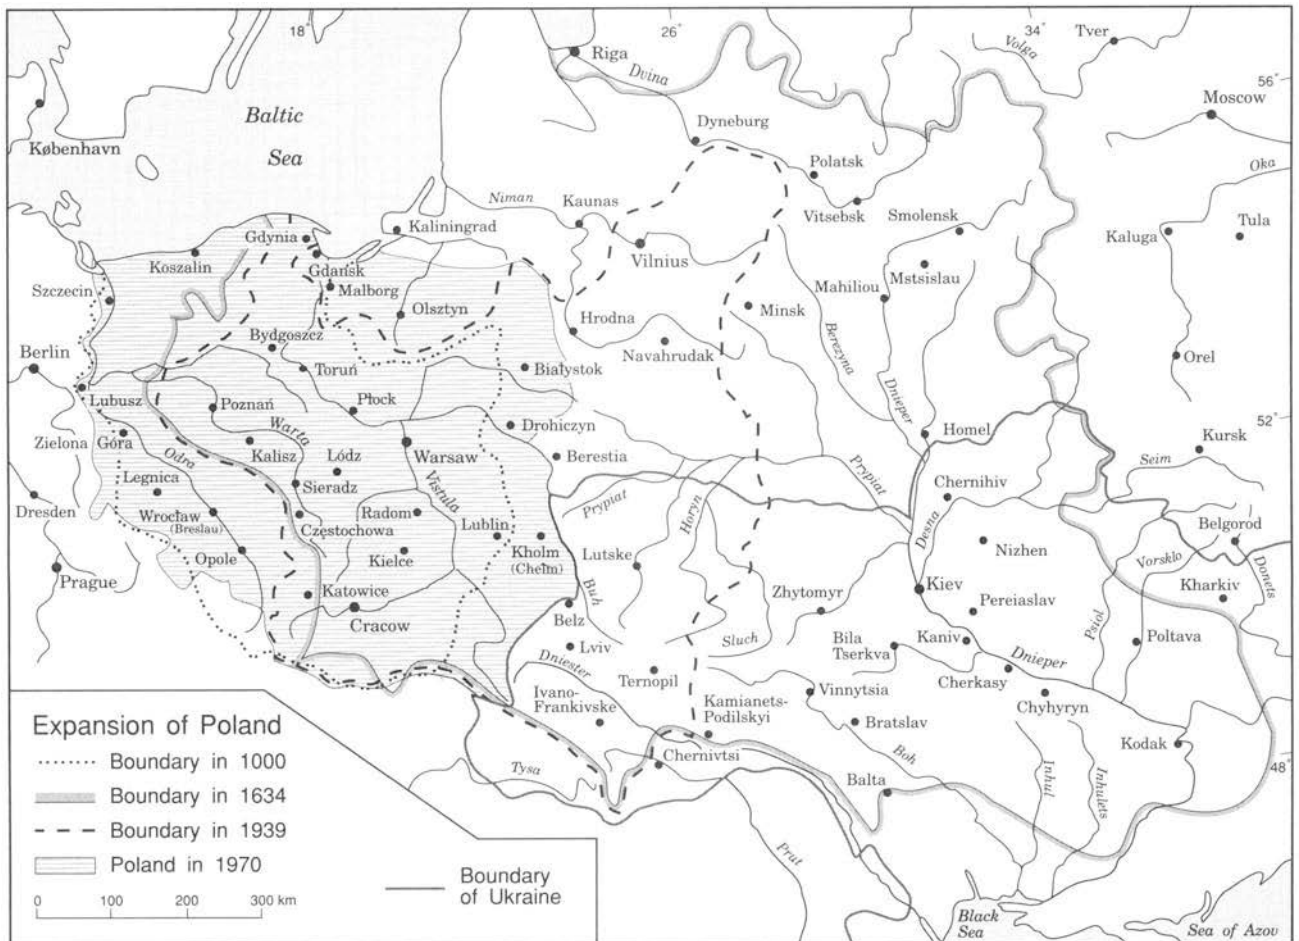

History. Both Poland and Ukraine emerged as political entities at approximately the same time in the 9th and 10th centuries. The relationship between Poland and *Kievan Rus' was marked by occasional military intervention as each party pursued its own aims or threw its support to a feuding faction in the neighboring state as well as by routine dynastic marriages formed for purposes of achieving

diplomatic security. Each faced ongoing warfare with external foes (the Germans and the steppe nomads respectively) that made all-out hostilities between them (aimed at territorial aggrandizement) an unlikely prospect. The two powers lived in a state of approximate equilibrium (although Rus' remained the greater power), and for nearly 300 years the borders dividing them did not change significantly.

The Mongol invasion in the mid-13th century devastated the Ukrainian principalities of Rus', which already faced serious problems due to internecine strife. The Grand Duchy of *Lithuania was soon able to incorporate large tracts of Ukrainian territory into its realm and establish a joint *Lithuanian-Ruthenian state. Poland was held off by the continued existence of the Principality of *Galicia-Volhynia. With the demise of that principality in 1340, the Polish king Casimir III the Great initiated an extended period of territorial expansion eastward, taking most of the principality by 1349. Poland's acquisitions in Ukraine subsequently were realized through more peaceable means. The Union of *Krevo (1385), which established a dynastic link between the Lithuanian grand duke Jagiełło and the Polish queen Jadwiga, allowed Poland to extend its cultural and political influence into the affairs of the Lithuanian state as well as to consolidate its control over Galicia and expand into Podilia. For several centuries the *history of Ukraine, particularly that of *Galicia, was inextricably bound to that of Poland. The growing influence of Poland resulted finally in the Union of *Lublin (1569), which united Poland and Lithuania into a single Commonwealth (*Rzeczpospolita*). In practical terms the union was dominated by the Poles, who now took direct control over most of Ukraine.

The Polish influence on Ukraine was profound. Most of the Ukrainian nobles, granted equal rights with their Polish counterparts, were quickly Polonized, and Ukraine was thus bereft of its own social elite. The last vestiges of the Rus' state disappeared as the Ukrainian lands were divided into six voivodeships, or provinces. Large tracts of land were granted to Polish nobles, who established sizable estates (*filvarky*) that could produce effectively for the booming European grain trade. Some of the largest estates (*latifundia*) in the Commonwealth were situated in Ukraine. Greater demands were placed on the Ukrainian peasantry, which was being reduced to serfdom. The religious tolerance in the Commonwealth, phenomenal for its times, also had an impact in Ukraine, as the Reformation period saw the influence of Protestant groups, such as the Socinians and Lutherans, spread into Ukraine through Poland. Nevertheless pressure was put on the predominantly Orthodox population of Ukraine to convert to Catholicism, and it resulted indirectly in the establishment of the *Ukrainian Catholic church by the Union of *Berestia (1596). At the same time Ukraine experienced a tremendous revival. Theological and secular education, literature, and the fine arts all began to flourish, and printing was introduced. The ideas of the Renaissance began to work their way into Ukraine through Poland as the 'Golden Age' of 16th-century Polish culture left its mark.

The situation in Ukraine under Polish rule became increasingly more volatile in the first half of the 17th century as socioeconomic, religious, and national tensions grew. The most obvious sources of dissatisfaction lay with the peasantry, which historically had not been tied to manor-style economies; the Orthodox, who were relegated to a

second-class status within the Commonwealth; and the *Cossacks, who defended the borderlands of the Polish state against Crimean Tatar and Turkish attack but were granted few of the privileges of a military class. The Cossacks were regarded as troublesome and problematic by the ruling elite of the Commonwealth, and constant attempts were made to control them. Tensions peaked in 1648, when a full-scale uprising led by B. *Khmelnysky erupted in Ukraine and engulfed the Commonwealth in the *Cossack-Polish War.

The uprising represented a fundamental turning point. Ukraine might have re-entered the Polish state on the basis of equality within a tripartite Commonwealth (that was an option favored by Khmelnysky and others), but the instability of the times prevented even a serious discussion of the possibility. Unable to assert full independence alone, Khmelnysky turned to the Russian tsar Aleksei Mikhailovich for assistance and concluded the *Pereiaslav Treaty of 1654 with the Russians. That treaty set in motion the gradual process by which most of Ukraine moved from the Polish sphere of influence into the Russian. An attempt was made to abrogate the Pereiaslav agreement with the Treaty of *Hadiache (1658), which would have brought Ukraine back into the Commonwealth as an autonomous administrative unit. Ultimately approved by the Commonwealth diet, the agreement was opposed by a large segment of the Cossacks, who did not wish to return to the Polish sphere of

influence. At the same time the Russians invaded Ukraine, and their invasion signaled the start of a period of protracted fighting and political instability known as the *Ruin. Turkey even entered the fray by occupying a large section of the Right-Bank region. A preliminary agreement to resolve the situation was made between Poland and Russia in 1667 with the Treaty of *Andrusovo. The division of Ukraine into Right and Left banks was confirmed (with a provision for Moscow's control of Kiev) in the *Eternal Peace of 1686.

Poland had regained full control of Right-Bank Ukraine by 1714, after an extended period of occupation of the region by Ottoman forces and Cossacks. The largely devastated region once again saw the return of large estates and increased corvée obligations for the peasantry, of which the consequence was a series of *haidamaka uprisings. The Polish Commonwealth, by now rendered largely ineffectual because of the weakness of its elected kings and the chaotic state of its parliament, was forced to rely on Russian assistance in quelling the worst of the uprisings. The Russian intervention in Poland's internal affairs culminated in that country's active role in the partitioning of Poland (1772, 1793, and 1795), whereby Russia acquired all of Poland's Ukrainian possessions other than Galicia and Bukovyna (which were annexed by the Austrian Empire).

Russian Empire, 1795–1917. For some time after Poland's incorporation into the Russian Empire the Ukrainian

POLAND'S GROWTH IN THE 15TH-18TH CENTURIES

lands west of the Dnieper were treated as Polish territory. The socioeconomic order inherited from Poland, with its domination by Polish magnates and gentry, remained intact, and serfdom became even more intensive. The Russian monarchs Paul I (1796-1801) and Alexander I (1801-25) preserved the hegemony of the Polish nobility in the region. Polish culture and education in Volhynia and Right-Bank Ukraine developed more dynamically under tsarist rule than it had under Poland owing to the establishment of the *Kremianets Lyceum and the Vilnius (Wilno) School District, which co-ordinated Polish cultural self-government in Russia throughout the formerly Polish territories.

The *Polish Insurrection of 1830-1, the leadership of which called for the restitution of Poland in its boundaries of 1772, was primarily based in the *Congress Kingdom of Poland, but Polish gentry and clergy from Ukraine also participated. Gen J. Dwernicki's campaign of April 1831 failed to spread the insurrection to Podolia and Volhynia. Punitive policies implemented by the Russian government in Ukrainian territories after the suppression of the insurrection included the liquidation of Polish educational institutions and the removal of many Poles from the local administration. Nevertheless the Polish nobility's economic domination was unaffected, and its cultural he-

gemony, though weakened, was not eradicated.

With the defeat of the 1831 insurrection Polish political life became centered in the emigration, particularly in Paris. Two broad currents developed: a conservative one headed by Prince A. *Czartoryski, who sought the fulfillment of Polish aspirations primarily through the aid of some foreign power, and a democratic one, which urged another insurrection that would aim for social reform as well as Polish independence and thereby attract popular support. Both currents essentially considered the Ukrainian question an internal Polish one, but each in its own way also contributed to the development of the Ukrainian national revival. Czartoryski fostered various schemes aimed at enlisting Ukrainian support, including the creation of a Cossack legion in Turkey during the *Crimean War (which fought under the command of M. *Czajkowski). The democrats founded conspiratorial groups in Right-Bank Ukraine that aimed at the restoration of Poland to its boundaries of 1772 and the establishment of an egalitarian social order in which serfdom was abolished. The most significant of the groups were connected with the Association of the Polish People (Stowarzyszenie Ludu Polskiego), led in Ukraine in 1835-8 by S. Konarski. The groups, which sometimes wrote revolutionary literature in the Ukrainian language and appealed to Cossack

traditions, spurred the development of a Ukrainian political consciousness.

Russia's defeat in the Crimean War of 1853–6 saw a resurgence of Polish political activity in Ukraine. Polish young people founded secret patriotic societies, particularly in Kiev. The movement in Poland and Ukraine culminated in the *Polish Insurrection of 1863–4, in which Poles from Ukraine played a prominent part. Partisan warfare encompassed the Right Bank and Volhynia. The brutal and systematic repressions that followed the defeat of the insurrection (as well as the abolition of serfdom prior to the insurrection in 1861) destroyed Polish hegemony in Ukrainian lands under Russian rule. Although Poles continued to be active in Ukrainian political life (Polish socialists organized workers' circles in Ukraine in the 1870s, for example), the real revival of Polish political life was toward the end of the 19th century and particularly after 1905. Of the various Polish political currents only the Polish Socialist party declared its support for the Ukrainian movement.

The commercial agreements of Russia with Austria and Prussia in 1818 included Right-Bank Ukraine in the Polish customs territory, and the tariff of 1819 separated Right-Bank Ukraine and the Congress Kingdom from the rest of the Russian Empire. The Right Bank remained an important market for the Polish textile industry, even after the abolition of the Polish-Russian customs border in 1850. With the construction of railroads commercial relations between the Congress Kingdom and Ukraine expanded considerably. In 1895 Ukraine began to export iron ore to Poland; it became the main raw material for Polish metallurgy. Ukraine also exported to Poland rails, agricultural

machines, grain, flour, cattle, salt, sugar, tobacco, flax, and wool. From Poland Ukraine imported woolen and cotton textiles, paper, chemical products, soap, and leather. Ukrainian and Polish coal competed intensively for the central Russian market. Poland maintained a favorable balance of trade vis-à-vis the rest of the Russian Empire.

Austrian Empire, 1772–1918. After its third partition in 1795, Poland ceased to exist as a political polity. The mainstay of Polish national consciousness remained until the 20th century with its nobility, the *szlachta*, and the geographical center of hope for a national revival became those Polish territories within the Austrian Empire, specifically the Crownland of Galicia, which Austria acquired from Poland in 1772. Galicia, however, consisted of two historically and ethnically distinct regions: the west, which was largely Polish, formed from the former Cracow and Sandomierz voivodeships, and the east, which was largely Ukrainian, formed from the former Rus' voivodeship (originally the Principality of Halych), with parts of the Belz, Volhynia, and Podilia voivodeships. Galicia also became a focal point of Ukrainian national aspirations during the 19th century.

Until the mid-19th century no specifically contentious issues emerged between the Ukrainians and the Poles in Galicia. Only with the respective national revivals of the two nations did antagonism begin to grow. In 1848, Ukrainians started organizing themselves politically (with the *Supreme Ruthenian Council), achieving recognition as a separate people, and demanding a division of Galicia into two crownlands along ethnic lines. The Poles maintained, however, that, historically, Galicia in its entirety belonged to Poland. They established the pro-Polish *Ruthenian

Congress, which published the newspaper *Dnewnyk Ruskij* and worked to counter Ukrainian claims.

The subsequent political realignment of the Austrian Empire exacerbated Polish-Ukrainian tensions. The appointment of A. Gołuchowski as governor of Galicia in 1849 (his tenure lasted until 1875, with only minor interruptions) heralded a political understanding between the central government and the Poles that the Poles would, by and large, have control of the Galician provincial administration. Such control was solidified after the reorganization of the empire into a dual monarchy in 1867. The perception among Poles that Galicia was the most likely base for a Polish national revival grew after the failure of the Polish Insurrection of 1863-4. For Ukrainians, after the *Ems Ukase banned Ukrainian publications in the Russian Empire, the center of Ukrainian national life moved to Galicia - now called the 'Piedmont' of Ukraine. Until the outbreak of the First World War both Ukrainians and Poles maintained aspirations for statehood and took many steps toward that goal within their respective territories under Austro-Hungarian rule. In some cases the efforts of the one were mirrored by those of the other (for example, in the creation of sporting or paramilitary groups as the precursors of a national army).

20th century. With the end of hostilities in 1918 and the collapse of the Habsburg Empire Poland moved to re-establish its historical state, as much as possible in accordance with its pre-1772 borders. The effort brought Poland into conflict with Ukrainians, who had proclaimed the *Western Ukrainian National Republic (centered around the territory of Galicia). The rival territorial ambitions finally erupted in the *Ukrainian-Polish War in Galicia (1918-19), which commenced with the *November Uprising in Lviv. Poland benefited in its efforts because of Entente fears of a Bolshevik offensive westward: on 28 June 1919 the Supreme Council of the Paris Peace Conference allowed Poland to occupy all of eastern Galicia (subject to a review of its international status).

After the Ukrainian Galician Army was pushed out of Galicia in the summer of 1919, the newly restored Polish state occupied the region. On 18 March 1921 Poland, Soviet Russia, and Soviet Ukraine signed the Peace Treaty of *Riga, which ended the Soviet-Polish War and established the Soviet-Polish border. The agreement ceded Galicia as well as Polisia and western Volhynia (formerly within the Russian Empire) to Poland. On 15 March 1923 the *Conference of Ambassadors also recognized that border. Ukrainians protested with a mass demonstration in front of St George's Cathedral in Lviv on 24 March 1923. Galicia, Polisia, and Volhynia remained within the boundaries of the Polish state until September 1939, when Poland was divided between Germany and the Soviet Union.

In order to win recognition of Poland's eastern boundaries by the Council of Ambassadors, the Polish Sejm had passed a law on 26 September 1922 which provided for autonomous government for Galicia, prohibited Polish colonization there, and projected the establishment of a Ukrainian university; those remained paper declarations. On 28 June 1919 Poland had agreed at Versailles to respect the national and religious rights of its national minorities, but it unilaterally repudiated that agreement, which it had never honored, on 13 September 1934.

When the former socialist Marshal J. *Piłsudski took power in a coup in May 1926 and established the *Sanacja

CHANGES IN THE UKRAINIAN-POLISH BOUNDARY

regime, the national minorities looked forward to an improvement in their situation. In fact Piłsudski and his successors continued the previous governments' policies of denationalization and Polonization.

The rights of the Ukrainian language in the administration, the judiciary system, and the school system were severely restricted, and in Kholm region and Podlachia even the minimal legal norms existing in Galicia, Volhynia, and Polisia were bypassed. Most Ukrainian-language schools that had existed from Austrian times were changed into bilingual Polish-Ukrainian schools, and in the Kholm region and Podlachia only Polish-language schools existed. Not only did the Polish government prevent the establishment of a Ukrainian university, but it closed down all the Ukrainian-language chairs that had existed at Lviv University under Austrian rule.

The Orthodox church in Poland was completely dependent on a government which tried to Polishize it and convert Orthodox Christians to Roman Catholicism. Orthodox churches in the Kholm region and Podlachia were destroyed en masse in 1938, and in Volhynia (notably the village of *Hrynky) there were instances of forcible conversion from Orthodoxy to Roman Catholicism. Another Polish initiative was the *neunion campaign, which sought to spread Eastern rite Christianity (under Latin rite jurisdiction) among Ukrainians outside Galicia.

In spite of agrarian overpopulation the Polish government and voluntary associations implemented a program of colonization in Western Ukraine by Poles. In 1920–3, state lands in Volhynia and Polisia were distributed to Polish veterans, most of whom were not even peasants. During implementation of the land reform some great estates were subdivided in Western Ukraine (so called 'parcelation'), but most of the 800,000 ha thus obtained were sold to Poles.

The Polish state pursued a policy of 'divide and rule' in Ukrainian territories, and established the *Sokal border as part of that effort. In the Kholm region and Podlachia it denied local Ukrainians any cultural rights whatsoever. In Polisia it tried to cultivate a purely local, non-Ukrainian consciousness by encouraging the population to define itself only as *tuteishi*, or 'people who live here.' In Volhynia it sought out local Ukrainian leaders willing to collaborate with the Polish authorities (they helped to establish the *Volhynian Ukrainian Alliance), and in particular it sought to isolate Ukrainian institutions there from contacts with their Galician counterparts. In Galicia, where Ukrainian national consciousness was most intense, the authorities tried overtly to curb Ukrainian political, social, cultural, and economic activities; they also made efforts to divide Ukrainians there by supporting the otherwise moribund *Russophiles, by encouraging the formation of separate national identities for *Lemkos and *Hutsuls, and by seeking to draw Roman Catholic Ukrainians (**latynnyky*) and Ukrainian *petty gentry into the Polish nation.

The failure of the interwar Polish state to accommodate Ukrainian interests in even the slightest way helped to provoke a militant backlash. In the 1920s the *Ukrainian Military Organization carried out a number of sabotage actions against the regime, and in the 1930s its work was continued on an even broader scale by the *Organization of Ukrainian Nationalists. The Polish government attempted to cow its Ukrainian population by carrying out the *Pacification in 1930. That action prompted the Ukrainian political mainstream to attempt a rapprochement with the government – the so-called *Normalization. But it proved to be a fiasco. Ukrainians by and large remained extremely dissatisfied with the Polish regime.

After Poland was once again divided, in September 1939, that time by Germany and the Soviet Union, most of the Ukrainian territories of the interwar Polish state fell under Soviet control in 1939–41, with a small westerly strip remaining in the Generalgouvernement. In 1941 the remainder fell to the Germans. Throughout the war Poland maintained the recovery of eastern Galicia as one of its territorial imperatives. That goal proved a stumbling block for effective co-operation between Ukrainian resistance forces and the underground *Polish Home Army.

With the reoccupation of Western Ukrainian lands in 1944 and the establishment of a Soviet satellite regime in Poland after the Second World War, Poland's relationship to Ukraine changed fundamentally. The borders between the two states were re-established, and a subsequent resettlement of populations between the two states, in which Ukrainians in Poland were moved to the Ukrainian SSR and Poles in the Ukrainian SSR moved to Poland, was completed in 1947 with *Operation Wisla, which cleared the Polish-Ukrainian borderland area of most Ukrainians.

The extensive Ukrainianization of Galicia in the post-war era and the specter of a common foe, the Russian-dominated Soviet Union, resulted in improved relations between Ukraine and Poland after 1945. Official relations were conducted largely under the rubric of Eastern Bloc institutions and state-sanctioned cultural exchanges. On a more informal level political dissenters found a common cause, and Poland, with a somewhat more relaxed political atmosphere, served as a conduit for (among other things) political ideas and literature to Ukraine. Poland was the first state to recognize Ukrainian independence after the referendum of 1 December 1991.

Ukrainians in Poland. Although many Ukrainians lived within Polish national territory before the 20th century, relatively few of them were located within ethnic Polish lands. A substantial number of Ukrainians lived in the borderland Lemko, Sian, Podlachia, and Kholm regions, but only approx 20,000 lived in Poland proper. Many of that group left Poland during the First World War. They were replaced in the interwar period with a very different type of Ukrainian community. After the Second World War the nature of the Ukrainian presence in Poland again changed drastically.

Pre-1914. Within the Polish territories of the Austro-Hungarian Empire *Cracow was the only city with a large concentration of Ukrainians. A Ukrainian Catholic parish had been established there in the late 18th century, and by 1910 there were approx 1,500 Ukrainians living in the city. Within Polish territories under the Russian Empire *Warsaw was the main center. Even within the Rzeczpospolita the city attracted a substantial number of Ukrainian gentry, merchants, and Cossacks. In 1721 a Ukrainian Basilian monastery was established there. By the early 20th century there were some 5,000 to 10,000 Ukrainians living there. Many were civil servants, members of the Russian imperial bureaucracy, or students at Warsaw University and other postsecondary institutions. Smaller numbers of Ukrainians lived in Lublin and Siedlce, the administrative centers of the Kholm region and Podlachia. On the eve of the First World War there were up to 50,000 Ukrainians living in Poland proper (not including the Kholm region). The majority of those left in 1915 during the general Russian evacuation before the advancing German and Austro-Hungarian armies.

Interwar era. A new Ukrainian community emerged in Poland in the interwar period. With the final defeat of the UNR Army approx 30,000 Ukrainians, mostly military personnel, remained or were interned in Poland. Camps were situated in *Kalisz, Łańcut, *Szczepiórno, Piotrków, *Strzałków, *Tarnów, *Wadowice, and other locations until 1923. Thereafter most of the internees left for France or Czechoslovakia, but a group remained and settled throughout the country. Poland became a major center of Ukrainian émigré political activity until 1939, and Warsaw emerged as an important cultural center. Poland served as the home base of the UNR government-in-exile until 1923, and Ukrainians pressed their case for independence through bodies such as the Warsaw-centered *Promethean movement. Important scholastic work was undertaken by the *Ukrainian Scientific Institute in Warsaw and other bodies. By the late 1930s there were about 20,000 Ukrainians living in central Poland, of whom most were in Warsaw (ca 3,000), Cracow (ca 2,000), and smaller centers, such as Katowice, Kielce, Łódź, *Lublin, *Poznań, Radom, and Rzeszów. That number included political émigrés, students, and several thousand professionals and laborers who had migrated from Western Ukraine to central Poland in search of employment.

During the early part of the Second World War (1939–41) the number of Ukrainians in Poland increased dramatically as a result of the influx of refugees from the Bolshevik-occupied territories to the German-controlled Generalgouvernement. Cracow became the new hub of Ukrainian life, with a community numbering approx 3,000 (compared to Warsaw's 5,000 and Lublin's 1,000). Ukrainian community life became more vibrant as a result of the work of the *Ukrainian Central Committee. After the Germans occupied Western Ukraine, a substantial number of the refugees returned there.

Post-Second World War. Ukrainian life in Poland changed completely in the postwar period. Most Ukrainians who lived in central Poland left for the West before it was occupied by Soviet forces in 1944–5, and most of those remaining were resettled in ethnic Ukrainian territory as a result of the final alignment of borders between the Polish People's Republic (PPR) and the Ukrainian SSR. Approx 500,000 Ukrainians living in the PPR were resettled in the Ukrainian SSR. Nevertheless a substantial Ukrainian minority remained within the newly drawn Polish border in northwestern Galicia, the Sian region, Podlachia, and particularly the Lemko region, which was controlled by the UPA in 1946–7. In April–July 1947 the Polish government mounted Operation Wisła, a wholesale forced deportation of Ukrainians from their ethnographic territory. They were resettled in the so-called regained lands (Ziemie Odzyskane), the former territories of eastern and northern Germany and East Prussia acquired by Poland after the Second World War. A very small number of Ukrainians managed to stay in Ukrainian ethnographic territory, mostly in Podlachia.

The hostility afforded Ukrainians as individuals was also evident in official and general societal attitudes toward them (there was a general refusal to recognize Ukrainians in Poland as a distinct national minority) and made it extremely difficult for Ukrainians to organize and present their demands. Only in 1956, after a liberalization of the communist regime, were Ukrainians granted certain rights and allowed to form their own organization,

the *Ukrainian Social and Cultural Society (USKT; since 1990 the Alliance of Ukrainians in Poland [OUP]).

In spite of numerous petitions by the resettled Ukrainians the Polish government continued to enforce a ban on their return to their former homelands. In 1957–8 up to 11,000 requested permission to resettle. Approx 2,000 to 3,000 managed to do so (mainly back to the Lemko region), but at their own risk. Ironically, large sections of the Lemko region continued to be sparsely settled (in the 1960s there were 27 inhabitants/sq km, whereas in 1939 there had been 70), and the Boiko region remained virtually depopulated.

The exact number and distribution of the Ukrainian population in postwar Poland can only be estimated, as census figures did not record information regarding ethnic background or language use. Official estimates put the total number of Ukrainians at 180,000; unofficial figures commonly range as high as 300,000. The largest single concentration of Ukrainians is found in the Olsztyn voivodeship, in northern Poland, where they number 50,000 to 60,000 and constitute approx 6 percent of the region's population. Other major areas of Ukrainian settlement in Poland include the voivodeships of Koszalin in the northwest (30,000), Wrocław in the west (approx 20,000), Szczecin in the west (over 10,000), and Zielona Góra in the west (approx 10,000). Another 2,000 live in the south-central voivodeship of Opole.

The Lemko region, the Sian region, and northwestern Galicia are now part of Nowy Sącz, Krosno, and Peremyshl voivodeships. The Lemko region was inhabited by about 10,000 Ukrainians in the 1960s, and in some districts (such as Komańcza, Mokre, and Morochów) they even constitute a majority. In the Sian region a substantial number of Ukrainians live in the Peremyshl (in the city and in Ukrainian villages, such as Pozdiacz and Kalników) and Jarosław districts. There were approx 20,000 Ukrainians in what are now Zamość, Kholm, Biała Podlaska, and Biały-stok voivodeships, mainly in the Biała Podlaska and Volodova regions of Podlachia, particularly in the area of Siemiatycze, Bielsk Podlaski, and Hainivka (Hajnówka). They are officially considered Belarusians, however. Relatively few Ukrainians live in central Poland, and those who do live in cities.

Nearly 90 percent of Ukrainians lived in rural areas in the 1960s. Since then there has been a degree of urbanization. The largest urban concentrations of Ukrainians are in Cracow, Legnica, Lublin, Peremyshl, Szczecin, Warsaw, and Wrocław.

Conditions for community life. In 1956, Ukrainians were permitted to form the OUP, the single Ukrainian institution allowed to educate and encourage cultural activity among Ukrainians. It also served as a representative body and assisted the authorities in deciding questions regarding the Ukrainian minority in Poland. Its headquarters were in Warsaw. It was under the direct control of the Polish Communist party (formally named the Polish United Workers' party) and the government and was a semiofficial organization. In 1958 it was given authority over 8 voivodeship and 34 district administrations, which oversaw 270 communities, of which some were in cities and some in the countryside. Its membership was 7,000. In 1970 the OUP had 5 voivodeship executives, 14 district administrations, 205 groups, and 4,750 members.

The Ukrainian community, however, faced consider-

able hostility from virtually all segments of Polish society, particularly Poles resettled from the Ukrainian SSR. Local officials were commonly the ones who immediately made community work difficult among Ukrainians, although the upper reaches of the Polish government also fomented hatred and distrust of Ukrainians by issuing publications and films about the 'bestial acts' of the UPA and the 'Banderites' (using that term in a specifically pejorative manner), the 'collaboration' of Ukrainians with the Nazis, and the alleged participation of Ukrainians in the suppression of the Warsaw Uprising of 1944.

Many Ukrainians, particularly those in cities, concealed their national identity. The loss of a traditional territorial base, their wide dispersal, and the small size of the intelligentsia resulted in widespread denationalization among Ukrainians, particularly the younger generation. The situation was exacerbated by the policy of Russification within the USSR and the total indifference of the government of the Ukrainian SSR to the fate of Ukrainians in Poland; Ukrainian diplomatic representation in Poland, visits by official or semiofficial delegations, and the sponsorship of summer camps for Ukrainian children in Poland or of instructional sessions for teachers were all either minimal or nonexistent.

Church life. Ukrainians in Poland adhere to the Ukrainian Catholic and Orthodox faiths in roughly equal numbers. Both traditional churches have been beset with a wide range of problems in the post-Second World War period. In the immediate postwar period the *Ukrainian Catholic church was not formally liquidated as it was in the Ukrainian SSR at the Lviv Sobor of 1946. Its institutional structure, however, was effectively dismantled with the deportation of its spiritual head, Bishop Y. Kotsylovsky of Peremyshl, and other priests to the USSR. After Operation Wisła the church hierarchy was physically eliminated. Many priests were incarcerated in the Jaworzno prison. Those priests remaining free were forbidden to practice in their rite. Pope Pius XII responded to those developments by rejecting the dissolution of the Ukrainian Catholic church in Poland. He appointed A. Hlond (primate of Poland) and then (after Hlond's death) S. Wyszyński (archbishop and later primate) as ordinary of the Eastern rite Catholics in Poland.

Wyszyński, himself imprisoned by the Polish authorities in 1953–6, was incapable of assisting the Ukrainian church: he recommended that Eastern rite priests save themselves by converting to the Latin rite. It was in that spirit that the Basilian monastery in Warsaw converted to the Latin rite. Meanwhile the Polish (Roman Catholic) church proceeded with numerous claims on the properties of the paralyzed Ukrainian Catholic church. After the liberalization of 1956, Ukrainian Catholics were finally allowed liturgies in their own rite but not separate parishes: they could maintain only priests who would be subservient to a Roman Catholic hierarchy. In some instances (one notable example being in Katowice under Bishop H. Bednorz) the arrangement worked well, and the local hierarch actively promoted the development of the Ukrainian church; in many, however, problems arose through both misunderstandings and deep-rooted prejudices. Some church communities converted to Orthodoxy. By 1977 the Ukrainian Catholic church, however, had developed a network of 77 centers. Several religious orders have been formed since the 1950s, and in 1969 an Eastern rite theo-

logical seminary was established in Lublin. In 1989 I. Martyniak was consecrated the first Ukrainian Catholic bishop in Poland, and in 1991 he assumed the re-established see of Peremyshl. Estimates of the number of Greek Catholics in Poland range as high as 400,000, although many Ukrainians have identified themselves as Roman Catholics in order to avoid harassment.

The *Polish Autocephalous Orthodox church (PAOC) emerged in the 1920s as a body serving the needs of the approx four million Ukrainian, Belarusian, and (to a lesser extent) Russian and Polish adherents of Orthodoxy. The majority of them were located in the areas of interwar Poland that had been in the Russian Empire (notably the Kholm region). In the interwar era the PAOC maintained a strong Ukrainophile current, and during the Second World War PAOC bishops played an important role in the establishment of the Ukrainian Autocephalous Orthodox church. Nevertheless a strong Russophile current existed within the church hierarchy. The Poles maintained their efforts to convert the Orthodox population to Catholicism, in some cases by force and in general through the launching of the neounion campaign.

After the Second World War the PAOC, under pressure from the Soviet authorities, lost its independence. In 1945 Metropolitan D. *Valedinsky was removed from his post; it was filled in 1951 by a Russian Orthodox hierarch. More significant, the 1924 *Tomos* issued by the Patriarch of Constantinople, which provided the PAOC with its autocephaly, was revoked in 1948 by the Patriarch of Moscow, who now brought the church under his jurisdiction. Since then the Russian language has occupied a more prominent position in ecclesiastical affairs, and much of the Ukrainian character of the church has been muted. At present the PAOC has approx 500,000 faithful (primarily Ukrainians and Belarusians) and is centered in Bialystok voivodeship, with smaller concentrations in the other voivodeships.

The Ukrainian Millennium choir from Koszalin, Poland (artistic director and conductor: Yaroslav Poliansky)

Schools, education, press, publishing houses. After the liberalization of 1956 the Polish educational administration, in association with the OUP, began introducing Ukrainian language courses in elementary schools. Since then primary education in Ukrainian has been available in schools numbering from two to nine (reaching a maximum of 583 pupils in 1960–1). Ukrainian was also introduced as a sub-

ject and taught in as many as 152 schools (1958–9) and to as many as 2,711 pupils (1963–4). Ukrainian-language education was also introduced into two secondary schools (Legnica and Górowo Iławskie). A department of Ukrainian philology was established at Warsaw University in 1953, and for a period university-level Ukrainian courses were offered in Szczecin (1957–65) and Olsztyn (1965–7). Ukrainian has also been taught at the pedagogical institute in Bartoszice. The proportion of Ukrainian students receiving instruction in their native language has been very low, and the number of fully qualified Ukrainian teachers assigned to Ukrainian classes has also been small (commonly the authorities refused to appoint them to schools where Ukrainian courses are offered).

Extracurricular education is weakly developed. The OUP organized about 18 clubs and 60 independent choir, drama, and dance groups, with a membership of about 600. In 1967, the OUP began organizing annual festivals of Ukrainian music and song (first held in Sianik [Sanok]). In 1959 a section of the OUP devoted to the preservation and development of Lemko culture was formed.

The only Ukrainian newspaper in Poland is the weekly *Nashe slovo* (est 1956), which is published by the central administration of the OUP along with its supplements *Lemkivs'ke slovo* and *Svitankok* (for children) and the monthly journal *Nasha kul'tura* (from 1958). *Nasha kul'tura* provides some information about cultural life in what was Soviet Ukraine and in the diaspora. Since 1957 the OUP has also published the almanac *Ukrains'kyi kalendar*, in a press-run of 9,000. In the 1980s the students of Ukrainian philology at Warsaw University began to publish an irregular journal named *Zustrichi*, which over time has expanded its format and begun to address broad issues of community concern. The respective Ukrainian religious dominations now publish Orthodox (since 1986) and Catholic (since 1987) church almanacs in Ukrainian.

In Olsztyn and Rzeszów weekly Ukrainian radio programs are transmitted regionally; in the 1960s and 1970s programs existed in Koszalin and Lublin. There are few titles published in Ukrainian other than the almanacs and texts for elementary schools issued by the OUP. The demand for Ukrainian publications was only partially satisfied by Soviet Ukrainian production.

Literature, art, and scholarship. The Ukrainian poets in Poland include Ya. Dudra, Ya. Hudemchuk, O. Lapsky, I. Reit, Ye. Samokhvalenko, O. Zhabsky, and I. Zlatokudr. The prose writers include H. Boichuk, D. Halytsky, S. Kozak, K. Kuzyk, I. Sheliuk, and A. Serednytsky (Verba). An anthology of works by those authors was published by the OUP in 1964 as *Homin* (Echo). The Ukrainian artists in Poland include J. *Nowosielski and V. Savuliak (who were professors at the art academy in Cracow), *Nykyfor, L. Gets, A. Mentukh, V. Pankiv, H. Petsukh, Z. Podushko, M. Smerek, V. Vaskivsky, and T. Venhrynovych. Other noted cultural figures include S. Cherhoniak, Ya. Konstantynovych, and V. Hodys, who are art scholars; T. Demchuk, a theater critic; Ya. *Poliansky, a composer of music and organizer of choirs; and D. Denysenko, A. Matsihanovska, M. Shchutka, and O. Tabachnyk, Ukrainian actors who appeared on the Polish stage.

Centers of Ukrainian scholarship in Poland are the Ukrainian departments (language and literature) at the Institute of Slavic Studies of the Polish Academy of Sciences, the department of Ukrainian philology at Warsaw

University, and departments of Slavic studies at other universities. Among Ukrainian scholars in Poland are the historians A. Serednytsky and Ya. Yurkevych; the linguists and literary scholars M. Lesiv, S. Kozak, V. Mokry, and W. Witkowski; the psychologists S. *Balei and V. Shevchuk; and the musicologist J. *Chomiński.

Polatsk principality. A principality founded in the 10th century on the territory of present-day northern Belarus, inhabited by the Slavic Polochanians (*Krivichians). The capital was Polatsk. Other important towns were Minsk, Vitsebsk, Iziaslav, Drutsk, Lahoisk, Lukoml, Svislach, Braslau, and Barysau. The principality's economic importance derived from its connection via the West Dvina and the Neman rivers to the centers of Baltic trade. Grand Prince Volodymyr the Great of Kiev conquered the principality in the late 10th century, killed its ruler, Rogvolod (Rahvolod), and married Rogvolod's daughter, *Rohnida (Rahned, Rogned). The principality's population was subsequently Christianized, and a bishopric was established in Polatsk. Volodymyr and Rohnida's son, Iziaslav, inherited the principality. Iziaslav's son, Briachyslav (Brachyslav, 1001–44), attained independence from Kiev in 1023, but struggle for control of the principality with Kiev continued. Briachyslav's son, Vseslav (Usiaslav, 1044–1101), began a war with Kiev in 1065, but he was routed by Iziaslav Yaroslavych and imprisoned in Kiev. In 1068 Kiev's inhabitants rebelled against Iziaslav and installed Vseslav on the Kievan throne, but a year later Vseslav was forced to abandon Kiev by the forces of Iziaslav and his cousin Boleslav II of Poland and to return to Polatsk. Thereafter Polatsk principality remained independent of Kiev. Internecine struggles among Vseslav's six sons arose after his death, however, and the principality was consequently divided among them and their many sons into feuding appanages. *Mstyslav I Volodymyrovych was the last Kievan grand prince to attempt to annex the principality. He conquered it in 1130, but soon thereafter it regained its independence. In the second half of the 12th century the principality came under the domination of the northern Rus' princes of Smolensk. In the 13th century it suffered invasions by the Livonian Knights and the Grand Duchy of Lithuania, which asserted its political control over Polatsk and annexed it in 1307. Under Lithuanian rule the principality retained a measure of autonomy until 1385.

Polcha-Mizoch Upland. A rolling upland located in Volhynia between the Styr and the Horyn rivers. The upland consists of Cretaceous and Tertiary strata with Devonian outcrops and has a maximum elevation of 342 m. It is dissected by the tributaries of the Ikva and the Horyn rivers, and its terrain is somewhat reminiscent of foothills.

Poleiovsky, Matvii [Polejovs'kyj, Matvij], b ca 1720, d ca 1800. Sculptor; brother of P. *Poleiovsky. He created the

rococo sculptures in the Franciscan church in Peremyshl (1760–6), the main altar figures in the Roman Catholic cathedral in Lviv (1766–70) and in the church of the Pauline monks in Volodava (ca 1776), and many statues at the Pochaiv Monastery (1790–4).

Poleiovsky, Petro [Polejovs'kyj], b ?, d ca 1780. Architect; brother of M. *Poleiovsky. He worked in Poland and Ukraine. His chief works include the reconstructed Roman Catholic cathedral in Lviv (1765–76) and the Dormition Cathedral in Pochaiv (1771–83, with three other architects).

Polek, Johann, b 27 February 1843 in Bautsch (Budišov nad Budišovkou), Moravia, d 10 January 1920 in Vienna. Austrian historian and bibliographer. He studied at Vienna University (1865–8; PH D, 1871) and was custodian (1882–1900) and director (1900–13) of the Chernivtsi University library, a member of the board of trustees of the Bukovynian Provincial Museum, and a member of the editorial board of *Jahrbuch des Bukowiner Landesmuseums*. From 1913 he lived in Vienna. Together with F.A. Wickenhauser and R.F. Kaendl Polek pioneered the Austrian study of Bukovynian history, ethnography, and bibliography. His works include *Die Erwerbung der Bukowina durch Österreich* (1889) and articles, mostly in the *Jahrbuch*, titled 'Die Anfänge des Volksschulwesens in der Bukowina' (1891), 'Repertorium der landeskundlichen Literatur der Bukowina' (1892), 'Ortschaftenverzeichnis aus der Bukowina aus dem Jahre 1775' (1893), 'Die Lipowaner in der Bukowina' (1894–97), 'Josefs II. Reisen nach Galizien und der Bukowina und ihre Bedeutung für letztere Provinz' (1895), 'Religion und Kirchenwesen in der Bukowina' (1898), 'Die Vereinigung der Bukowina mit Galizien im Jahre 1786' (1901), and 'Die Zigeuner in der Bukowina' (1905–6). Polek is also the author of chapters in the volume *Bukowina* of *Die österreichisch-ungarische Monarchie in Wort und Bild* (1899).

Polemical literature. Publicistic and literary writings on religious and church issues and on national politics. In Ukraine and Belarus polemical literature dates back to the religious denominational struggles of the 16th and 17th centuries, especially those in conjunction with the 1596 Church Union of *Berestia, but also those that were part of the general European processes of the Reformation and the Counter-Reformation. Polemical writings were written in Old Ukrainian and in Old Polish, rarely in Church Slavonic. The stormy religious and political polemics were initiated by the Polish Jesuits P. *Skarga and B. *Herbest, who harshly criticized the institutional and spiritual 'vices' of the Orthodox church. In *O jedności kościoła Bożego pod jednym pasterzem* (On the Unity of God's Church under One Shepherd, 1577) Skarga outlined the ideological basis and the program of a church union. In response the Orthodox published H. *Smotrytsky's book (1587), which was composed of two treatises, 'Kliuch tsarstva nebesnoho ...' (The Key to the Heavenly Kingdom ...) and 'Kalendar rymskyi novyi' (The New Roman Calendar). Also written in reply was V. Surazky's *Knyzhystsia u shosty viddilakh: O edynoi ystynnoi pravoslavnoi viri* (A Book in Six Parts: On the Only True and Orthodox Faith, 1588). Those works defended the dogmas of the Eastern church and simultaneously criticized Catholic teachings, the deeds of the Roman popes, and the new Gregorian calendar. Along

with the Ostrih polemicists, I. *Vyshensky, the most outstanding publicist in Ukrainian literature, stepped into the fray against the Catholics. Another active Orthodox polemicist was S. *Zyzanii, who was the author of the *Malyi katekhizys* (The Short Catechism, 1596) and other polemical works.

The development of polemical literature was notably influenced by the letters and epistles of Prince K. *Ostrozky, who opposed the church union. I. *Potii, a leading Uniate polemicist, wrote many theological and polemical works, including the well-known *Antiryzis* (Antidiscourse), published in Vilnius in Old Ukrainian in 1599 and in Polish in 1600. Further polemics between the Catholics and the Orthodox were sparked by the publication of Skarga's treatise 'Synod brzeski i jego obrona' (The Berestia Synod and Its Defense, 1596), published after the Uniate synod in Berestia and translated and published by Potii in Old Ukrainian in 1597. The writings of Potii also played a significant role. The Orthodox replied to the attack with a series of writings, the more important of which are the brochure 'Ekthesis' (1597), about the Orthodox Synod in Berestia; *Apokrysis* (1597), purportedly written by the Protestant M. Broniewski under the pseudonym K. *Filalet; 'Otpys na lyst ... Potiia' (Reply to the Letter ... of Potii, 1598–9) by *Ostrozkyi Kliryk; the anonymous pamphlet *Perestoroha* (A Warning, ca 1606); the theological and polemical lecture *Palinodiia*, written by Z. Kopystensky in 1621; and the pamphlet *Antidot ...* (Antidote ..., 1629) by A. Muzhylovsky.

M. *Smotrytsky, the author of *Trenos ...* (Threnody ..., 1610) and other polemical treatises, played a prominent role. He first directed his polemics against the Catholics (the Uniates) but then changed his allegiance to the Uniate church, in 1627, and figured prominently once again as the author of several treatises against the Orthodox. On the side of the Uniates were L. Krewza-Rzewuski, Y. Rutsky, and A. Seliava, who polemicized against the Orthodox after the synods in Berestia. In the early 1640s, following a brief interval of peace, the polemical battle intensified owing to the appearance of the writings of K. *Sakovych, especially his treatise *Epanorthosis, albo perspektiwa ...* (Epanorthosis, or Perspectives ..., 1642). The Orthodox replied with 'Lithos abo kamien ...' (Litos, or Stone ..., 1644), of a collective authorship, although P. *Mohyla is regarded as its main author and initiator.

In the second half of the 17th century Orthodox and Uniate polemical literature took on a more theological nature and concerned itself with disagreements on matters of dogma or theology. A sharper tone characterizes the writings of the Vilnius Jesuit P. Boima, *Stara wiara* (The Old Faith, 1668), and the Uniate T. Rutka, *Goliat swoim mieczem porażony ...* (Goliath Wounded by His Own Sword ..., 1689). Orthodox writers replied in kind, particularly L. *Baranovych, in his treatise *Nowa miara starej wiary* (A New Measure for the Old Faith, 1676), and I. *Galiatovsky, who also initiated polemical writings concerned with Judaism and Islam (*Labędź ...* [The Swan ..., 1679] and *Alkoran Machometów* [The Muslims' Koran, 1683]). Putting aside the rancor of the polemicists, the harsh words, the rebukes and the slander, the manipulation of texts and facts to one's advantage, polemical literature produced a legacy of many fine works. The writings hold an important place in the church and political history of their period as well as in the history of Ukrainian literature.

Poles in Ukraine. The first Poles in Ukraine were probably merchants engaged in transit trade with the Orient. Others began arriving in the retinues of Polish princesses who married Rus' nobles. A larger contingent was made up of prisoners of war, who were commonly assigned places of settlement. The first such group were taken by Yaroslav the Wise in his campaign against Poland in 1030–1 and placed in the Ros region. They became farmers and assimilated with the local population. By the early 12th century the needs of the numerous Polish settlers in Rus' (and the desire of the Vatican to expand the influence of the Roman Church) had given rise to the establishment of a Catholic mission in Kiev. It remained open until 1233. The greatest number of Poles, however, were concentrated in the borderlands of the Kievan state – Galicia, Volhynia, the Kholm region, and Podlachia. They played a substantial role in the development of those regions, particularly after the Tatar invasion of 1240–1. They even formed a significant element in the courts of Galician and Volhynian princes. The strongest Polish presence in the Galician-Volhynian state came during the reign of the last Ukrainian prince, Yuriï II Boleslav.

1340–1569. Many Poles came to Ukraine after the demise of the Galician-Volhynian state and the takeover of Galicia, western Podilia, and the Kholm and Belz regions by King Casimir III. In order to secure Poland's hold on the territories, Casimir and his successors confiscated the estates of Ukrainian boyars and granted generous domains to their Polish counterparts. Among the Polish nobility given holdings in Galicia and Volhynia were the Habdank, Odrowąż, Pakosław, Tarnowski, Herburt, Buczacki, Potocki, Jazowiecki, Lanckoroński, and Sieniawski families. Villages were often given to Polish nobles on a military tenure basis. Many new villages were established and populated with relocated Ukrainian and Polish peasants. Existing cities were expanded, and most of them were granted *Magdeburg law. New towns and cities were developed, and German, Polish, and Armenian craftsmen and merchants were enticed to settle there. Voluntary immigrants, particularly from Little Poland, were attracted by the sparsely populated land, fertile soil, warmer climate, and wide range of fauna found in Galicia. They were also given incentives, such as exemptions from taxes and corvée duties.

Most of the Ukrainian boyar families, including the Churyła, Kyrdei, Strus, Volodyiovsky, and Yarmolynsky,

were quickly Polonized. By the 16th century the urban communities of Germans, Armenians, and (in part) Ukrainians were also Polonized. In contrast the Polish peasantry, who lived among the Ukrainian population, were largely Ukrainianized. Ultimately nationality came to be identified through religious affiliation, Roman Catholicism with the Poles and Orthodoxy (and later Greek Catholicism) with the Ukrainians. A comparable situation existed in *Podlachia, where a considerable number of petty gentry had resettled from neighboring Mazovia.

Polish influence in the region became stronger still after the establishment in Halych in 1375 of a Roman Catholic archdiocese, which was moved to Lviv in 1412. Dioceses were also introduced in Peremyshl, Kholm, and Volodymyr-Volynskiy (moved to Lutske in 1428). The Latin rite clergy and monastic orders were also granted substantial estates. The Polish element was weaker in Volhynia and the Kiev and Bratslav regions, which had been annexed by the Grand Duchy of Lithuania. But various restrictions notwithstanding, some Poles established themselves there by buying or leasing lands. They generally maintained cordial relations with the surrounding population. In the 15th century, Polish Catholic bishoprics were formed in Kiev and Kamianets-Podilskiy. In the same period the colonization (both Ukrainian and Polish) of those regions and Podilia was halted and even rolled back because of the increasing frequency of Tatar attacks. A line of defensive fortifications was built to stem the attacks; the fortifications were, in part, inhabited by Poles.

While the Ukrainian political and economic situation generally was becoming weaker, Polish life and culture was developing vibrantly in major Ukrainian centers, such as Lviv, Peremyshl, Jarosław, and Kamianets-Podilskiy. The estates of Polish magnates also became the focus of cultural and artistic development. Among the leading Polish writers and cultural figures who emerged in Ukraine (some of them of Ukrainian background) were Grzegorz (Hryhorii) of Sianik (1407–77), one of the first Polish humanists and poets and a Catholic archbishop of Lviv; Grzegorz (Hryhorii) of Sambir (literary pseudonyms, Roxolanus and Ruthenus) a panegyrist and educator; the humanist Paweł of Krosno (also known as Pavlo Rusyn, d. 1517), a writer and teacher of classical literature at Cracow University; and M. *Rej, a writer and Calvinist polemicist who was one of the founders of Polish literature. Those who belonged to the first Ukrainian school in Polish literature include S. Orzechowski (1513–66), a writer and polemicist who initially defended the Orthodox in Ukrainian lands, and S.F. Klonowicz (1545–1602), one of the first writers to deal with Ukrainian themes in Polish (*Roxolania*, 1584).

1569–1700. As a result of the annexation of Volhynia and the Bratslav and Kiev regions by Poland following the Union of *Lublin, Polish magnates and noblemen began settling in Right-Bank Ukraine. They were lured by fertile lands and a sparse population: in 1572 the population density of central Poland stood at 16 persons/sq km, of the Rus' and Belz voivodeships, at 9 persons/sq km, and of Volhynia and Podilia, at 6.4 persons/sq km. The Kiev region had less than half the density of Volhynia and Podilia. The colonization of Left-Bank Ukraine did not begin until the late 16th and early 17th centuries.

The colonization campaign was started in earnest by King *Stephen Báthory, who decreed that the 'wastelands'

in Podilia, Bratslav, and Volhynia voivodeships be distributed in perpetuity to Polish magnates and the nobility. The policy was given further impetus under *Sigismund III Vasa. Among the beneficiaries were the Jablonowski, Kalinowski, Koniecpolski, Potocki, Sieniawski, Zamoyski, and Żółkiewski families. In taking control of their new holdings the magnates settled them with serfs, estate managers (commonly from the petty gentry), and leaseholder-tavern keepers (often Jews). In 1619 the Chernihiv region, acquired by Poland in 1618, was parceled out in reward for military service largely to settlers from central Poland. In the 1630s and 1640s officers from the Grand Duchy of Lithuania were granted holdings in the Siversk region.

A number of so-called kinglets were created in Ukraine in the period as large tracts of land were consolidated into latifundia as a result of petitions to the king or Sejm, purchase for a nominal price, or seizure by force. Peasants were induced to settle there by the promise of 'freedoms,' specifically an exemption (for 20–30 years) from serfdom. Most of those settlers were Ukrainian peasants fleeing from northwestern Ukraine and Galicia, although peasants from central Poland also joined in. A significant number of those from central Poland later became Cossacks and even led Cossack armies, particularly in the early days of the movement. The private armies of magnates were made up largely of Poles, particularly the petty gentry. The magnates themselves were the unchallenged rulers of their domains and had considerable influence on the conduct of Polish internal and external affairs. Two magnates from Ukraine became Polish kings (*Michael Korybut Wiśniowiecki, 1669–73, and *Jan III Sobieski, 1674–96), and others (S. *Czarniecki, S. *Żółkiewski) were important political and military leaders. The Polish estates in Galicia and Volhynia were more numerous than those in central Ukraine, but they tended to be much smaller. One of the largest estates in Ukraine was owned by J. Wiśniowiecki, who ruled (in the 1640s) over 38,000 households and 230,000 subjects.

The Roman Catholic church began to expand its influence in Ukraine considerably, largely through the work of monastic orders, particularly the Polish *Jesuits. The Jesuit schools attracted not only Polish magnates and nobility but also the wealthier and more talented Ukrainians, who thus were frequently assimilated to Polish culture and converted to the Catholic faith.

The spread of education and the growth of general economic prosperity were accompanied by a remarkable flowering of Polish culture, notably in architecture, painting, and engraving. In Ukraine Polish spiritual and cultural life was concentrated in (although not limited to) Galicia. The writers S. Szymonowicz, S. *Twardowski, and S. *Zimorowicz; the historians B. *Paprocki and J. *Zimorowicz; and the bishop of Kiev, J. Wereszczyński (Y. *Vereshchynsky), all lived in Ukraine. In the 17th and 18th centuries a number of ornate fortified castles were built there, together with magnate estates that housed large art collections, libraries, and archives. Polish centers in Ukraine rivaled, and in some cases even surpassed, their counterparts in central Poland.

Polish political and economic expansion eastward into Ukraine was slowed in the early 17th century by a series of Cossack uprisings and then brought to a standstill in 1648 by the Khmelnytsky uprising. The attacks on land-

lords resulted in an exodus of Poles from Left-Bank Ukraine and the eastern reaches of Right-Bank Ukraine. Some magnates, including such Polonized Ukrainian families as the Wiśniowiecki and Zasławski, fought the uprising with their own armies and inflicted widespread retribution on local populations, thereby increasing the hostility of the peasantry toward themselves.

A number of landowners, some of them even Polonized Ukrainian gentry, remained in central Ukraine and participated in the war against Poland in 1648–57. Several thereafter secured high positions in the Cossack state. Some Polish noblemen began returning to Ukraine in the last years of the Cossack-Polish War and during the tenure of Hetmans I. *Vyhovsky (particularly after the signing of the Treaty of *Hadiache) and P. *Teteria. The influx was halted once again during the period of the *Ruin, when Cossack and peasant attacks resulted in the death of a number of Polish nobles. At the end of the hostilities, however, *Right-Bank Ukraine retained its Polish orientation. The Polish presence in Left-Bank Ukraine, however, was virtually eliminated. Nevertheless the Polish influence on Ukrainian culture remained widespread until the middle of the 18th century, as Polish continued to be taught and books to be published in Polish by the printing houses of Kiev, Novhorod-Siverskyi, and Chernihiv.

18th century. After years of devastation due to ongoing fighting during the Ruin and massive depopulation due to large-scale migration to Left-Bank Ukraine, Right-Bank Ukraine saw a new wave of Polish colonization at the beginning of the 18th century. Magnates began returning to their former estates or settling new lands. They established latifundia with separate administrations and armies that occasionally numbered 4,000 to 5,000. The latifundia were settled by the landless gentry (as tenants) as well as by peasants and burghers from other Polish territories. This massive wave of colonization in Podilia and the Kiev and Bratslav regions was stemmed in part by the popular rebellions, known as the *haidamaka uprisings, that broke out in response to religious and social oppression, the re-enservment of the population, and the suppression of the Orthodox church. The uprisings, which culminated in the Koliivshchyna rebellion of 1768, destabilized the region and resulted in the death of many Polish landlords and their stewards.

During a period of uninterrupted rule in the 17th and 18th centuries, the local Polish population grew in size and importance in Galicia, the Kholm region, Podlachia, and Volhynia. At that time the Polish educational system in Western Ukrainian territories reached its broadest state of development, largely through the work of the Jesuits. After the order was abolished in 1773, the educational system in Volhynia and Right-Bank Ukraine was administered by the Polish Commission of National Education, which transferred control of some Jesuit schools and colleges to the *Basilian order. Access to those schools was restricted to those of noble birth, and the students were educated to conform to Polish ways (although instruction in Old Church Slavonic was provided). The schools of the *Piarists raised pupils to be Polish patriots, as did branches of the Cracow Academy.

Polish printing houses also contributed to general Polonization. They were run privately in various centers as well as by the Jesuits in Lviv and Peremyshl, the Basilians in Pochaiv, the Dominicans in Lutske, and the Carmelites

in Berdychiv. Most printing houses, especially those of the Jesuits, had substantial libraries. The estates of magnates became cultural centers in the 18th century, especially those of the Jabłonowski, Wiśniowiecki, Potocki, Sanguszko, Rzewuski, Ostrozky, and Lubomirski families.

A number of leaders of the Polish Commonwealth in the 18th century originated from Ukrainian territories, public figures with names such as Branicki, Czartoryski, Jabłonowski, Lubomirski, Potocki, Rzewuski, and Wiśniowiecki. Most of the leaders of the Confederation of Bar (such as A. Krasieński, the bishop of Kamianets-Podilskyi) and the *Torhovytsia Confederacy (S. Potocki, K. Branicki, S. Rzewuski) were from Ukraine, as were many of the participants in the Four-Year Sejm (1788–92). The hero of the rebellion of 1794, T. Kościuszko, was from Volhynia.

Among notable Poles from Ukraine were the philosopher, educator, and coauthor of the Polish constitution of 3 May 1791 H. Koliłataj, the historian T. Czacki, the historian and bishop of Lutske A. Naruszewicz, and the writer and reformer I. Krasicki.

Russian Empire, 1795–1917. The Ukrainian lands annexed by the Russian Empire after the partitions of Poland in 1793–5 (Volhynia, Podilia, and the Kiev region) were home to approx 240,000 Roman Catholics, who constituted 11–12 percent of the total population. Another 60,000 lived in the Kholm region, Podlachia, and Polisia. Most of the Roman Catholic population were Poles with the exception of those peasants and petty nobles who became Ukrainianized through the years and became part of the *latynnyky.

Polish magnates and aristocrats maintained their estate privileges and even increased their power over serfs. Polish landowners prospered economically as the latifundia in Right-Bank Ukraine played a leading role in the production and export of grain (mainly wheat). Polish culture continued to dominate its Ukrainian counterpart in the region, even under Russian control, and the *Kremianets Lyceum (est 1805) became a leading center of Polish education and culture. Polish was the official language of education, administration, and the courts. The predominantly Polish Roman Catholic church went about its affairs without harassment, even though its largely Ukrainian Greek Catholic counterpart came under close official scrutiny. Poles were also allowed to settle and acquire estates in Kiev, the Left Bank, and Southern Ukraine without restriction.

The Polish elite consisted of a small contingent of magnates; they were followed in size by middle and lesser landowners, and a large number of petty gentry. Commonly impoverished, the petty gentry on the magnates' estates paid cash rents. They also provided the cadres for service as estate managers, administrators, and the like. Most of the magnates were loyal to the Russian Empire, even after the Polish insurrections. They readily identified with the Russian gentry, and many moved to St Petersburg. The middle nobility was left as the local bulwark of Polish patriotism aiming to restore Poland to its pre-1772 borders. About half of the Poles in Ukraine were immigrants who had arrived in the first half of the 18th century and settled among Ukrainians or, more rarely, in separate hamlets. Relatively few Poles lived in urban areas.

The enterprises established by the Branicki, Czartoryski, Lubomirski, Potocki, and Sanguszko families made the Right Bank the most industrially developed region in

Ukraine until the mid-19th century. Their prosperity enabled the Polish estate owners to weather the reactions to the failed insurrections of 1830–1 and 1863, including the confiscation of the assets of the participants and a discriminatory land policy. It also helped tide them over through the reforms of 1861. In fact the Polish landowners maintained considerable economic strength and influence until the outbreak of the Revolution of 1917.

But the privileges afforded the Polish nobility in Right-Bank Ukraine were rolled back during the 19th century, and their domination of the Right Bank was diminished. After the *Polish Insurrection of 1830–1, thousands of participants were exiled to the Kuban and the Urals, and their properties were seized. Their serfs became state peasants. Among the exiles was S. Konarski, who returned in 1835 and organized the Society of the Polish People in Ukraine, an underground group that was later uncovered, and of which 200 members were arrested. The Kremianets Lyceum was closed down, and its library was transferred to Kiev for use by the newly formed Kiev University. The initial intention of the new academic body was to assist in the Russification of Ukraine.

A relaxation in Russian policy after the Crimean War resulted in renewed activity among Polish secret societies, such as the Trojnicki Union (among whose organizers was V. *Antonovych). By 1861 the Polish political movement had developed to the point that it could organize patriotic demonstrations in Kiev, Zhytomyr, and Berdychiv. Memorandums were addressed to the Russian authorities demanding agrarian reforms, the establishment of Polish schools in Podilia, the teaching of Polish at Kiev University, and (by certain figures in Podilia) even the return of Right-Bank territories to the administrative realm of the Congress Kingdom of Poland.

In the first half of the 19th century some currents of Ukrainophilism appeared among Poles as well as a territorial Polish-Ukrainian patriotism that sought to merge the nascent Ukrainian movement with efforts to create a new, possibly federative, Polish Commonwealth. In the 1820s W. Rzewuski organized on his estate a camp modeled on the Zaporozhian Sich as well as a school for lirnyks. The poet T. *Padura, whose Ukrainian-language dumas urged an uprising against Russia, stayed there for a time. A number of Polish writers were active in Right-Bank Ukraine, including J. *Słowacki, the poets of the *Ukrainian school in Polish literature (A. Malczewski, B. Zaleski, S. Goszczyński, and others), M.*Czajkowski (pseud: Sadyk Pasza), A. Feliński, J. Korzeniowski, H. Rzewuski, L. Sowiński, and the historian M. Grabowski. J. Kraszewski's work, like that of others, dealt with Ukrainian themes.

During the Crimean War Czajkowski, emulating the traditions of Hetman P. Doroshenko, organized a Cossack detachment to support the Turks. In the late 1850s a group of Polonized Ukrainian noblemen created the populist **khlopoman* movement. It was led by Antonovych, and sought a return to the Ukrainian folk life. The members' quest took them to the point that in 1863 Antonovych and several close associates (T. *Rylsky, B. *Poznansky, and others) renounced any support for Polish claims to non-Polish territories and adopted an openly Ukrainian national perspective. Most Polish circles, even Ukrainophiles, were incapable of such a radical break with the ethos of their social traditions.

On the eve of the *Polish Insurrection of 1863 there

were 471,000 Roman Catholics in Right-Bank Ukraine, constituting 9 percent of the total population. The failure of the rebellion resulted in harsh repercussions and a significant decline in Polish political and cultural influence. In addition to numerous executions, deportations, and confiscations or forcible sales (to non-Poles) of assets there was a total ban on the Polish spoken and printed word (even in Roman Catholic religious instruction) and the abolition of all Polish associations and organizations. Polish landowners by and large were forced to relinquish their political and cultural activities and concentrate strictly on economic undertakings. The Polish clergy diminished in size and was also forced to limit its field of action. Even the *zemstvo* system of municipal self-administration was not introduced into the Right-Bank gubernias for nearly half a century because of imperial mistrust of the Poles. Advances in agriculture in the 1870s in Ukraine gave the Poles a foothold for their limited reascent to strength, first economically and then culturally and even politically.

From the 1870s the distribution and social structure of the Polish population in Ukraine underwent substantial changes. The Poles' rate of natural increase fell behind that of other segments of the population. In Volhynia (1901 statistics) Roman Catholics registered a natural growth rate of 18 percent, compared to 21 percent for the Orthodox. The same trend was evident in Podilia (14 and 17 percent respectively) and in the Kiev region (11 and 17 percent). Assimilation and immigration also came into play. As Ukraine became more industrialized in the later part of the century, a new wave of Poles from central Poland arrived. A growing number of professionals and industrial workers gravitated to the cities. With the abolition of serfdom Polish peasants came to Volhynian Polisia seeking lands being distributed through parcelation. A substantial number of dispossessed Poles from Right-Bank Ukraine and recent arrivals from Poland proper settled in larger cities, such as Kiev, Odessa, Kharkiv, and Mykolaiv. The extent of the influx was not clear in official statistics as population gains were offset by the linguistic and religious assimilation of Polish peasants who had settled on Ukrainian territories. Imperial law also required that all children of mixed marriages be baptized in the Orthodox church.

Table 1 gives the number of Roman Catholics (among whom there were a small number of Germans and Czechs) and Polish speakers in the Ukrainian gubernias according to the census of 1897.

TABLE 1
Roman Catholics and Polish speakers in the Right-Bank Ukrainian gubernias, 1897 (thousands; percentage of the total population in parentheses)

| Gubernia | Roman Catholics | Polish speakers |
|----------|-----------------|-----------------|
| Volhynia | 291 (10.0) | 185 (6.2) |
| Podilia | 261 (8.7) | 72 (2.3) |
| Kiev | 104 (2.9) | 68 (3.4) |

A large percentage of (linguistic) Poles were urban dwellers. In 1897, 30.3 percent of all Poles in Ukraine lived in cities. Kiev had the largest concentration of Poles, and their number there increased rapidly. There were 10,400 Poles in the city (8.2 percent of its total population) in

1874, 16,700 (6.8 percent) in 1897, and 44,400 (9.8 percent) in 1909. In Right-Bank Ukraine they settled in Berdychiv, Kamianets-Podilskyi, and Zhytomyr; in Southern Ukraine they lived in Katerynoslav (13,000), Kherson, Mykolaiv, and Odessa (in 1914, 26,000); and in Slobidska Ukraine they had their largest concentration in Kharkiv (6,000). According to Russian governmental statistics for 1909, there were 424,000 Poles living in the three Right-Bank gubernias (3.8 percent of the total population). Church statistics for 1909 provide a figure of 802,000 Roman Catholics (6.3 percent of the total) in the same territories. Officially the numbers of Roman Catholics and Poles in Russian-controlled Ukraine outside of the Right Bank were as given in table 2.

TABLE 2
Roman Catholics and Poles in the Ukrainian territories of the Russian Empire outside the Right Bank, 1909 (thousands; percentage of the total population in parentheses)

| Gubernia/region | Roman Catholics | Poles |
|---|-----------------|------------|
| Hrodna and Minsk (Ukrainian regions) | 130 (11.0) | 100 (8.5) |
| Kholm region and Podlachia | 371 (44.0) | 201 (24.0) |
| Other Ukrainian regions | 230 (0.9) | 180 (0.7) |

The most significant concentration of Roman Catholics in the Right-Bank region was found in a strip generally 80–100 km wide running north from Kamianets-Podilskyi to Novohrad-Volynskyi and then curving eastward past Lutske. There the Poles constituted up to 20 percent or more of the local population. Imperial Russian figures note that there were 1,390,000 Roman Catholics and 809,000 Poles in the Ukrainian gubernias in 1914.

Polish landowning magnates continued to exert considerable influence. Russian statistics for 1909 note that in the Right Bank they controlled 2,306,000 desiatins (2,540,000 ha) of land, representing 46 percent of all private holdings and 15.4 percent of the entire area of the three Ukrainian gubernias. Combined with the holdings of smaller-scale landowners, the figure for Polish-controlled lands stood at nearly 3 million ha. The Poles were leaders in the development of sugar refining in Right-Bank Ukraine, and Polish factories (primarily in Kiev) supplied machinery and supplies for refineries. Other skilled Poles worked in distilleries, breweries, smelters, mines, and glassworks. Poles also constituted a sizable contingent among those engaged as independent craftsmen and in the free professions.

Polish economic, cultural, and political life became more active in the late 19th century owing in part to the relaxing of tsarist controls. Three main currents of Polish political thought in Ukraine emerged: conservative, represented by the large landowners, whose press organs were the weeklies *Kraj* (published in St Petersburg) and *Kresy* (published in Kiev); national democratic, represented by R. Dmowski's National League and *Przegląd Wszepolski*; and socialist, represented by the Polish Socialist party's (PPS) underground paper *Robotnik*, published in Kiev in 1901–2. The *Ukrainian Socialist party was modeled on its Polish counterpart and led by a Polonized Ukrainian, B.

*Yaroshevsky, before eventually joining with the Revolutionary Ukrainian party.

Polish conservatives considered the Ukrainian question an internal Russian matter, and the national democrats denied that Ukrainians had legitimate national aspirations. Only the leaders of the PPS expressed any support for the Ukrainian movement, and they did so cautiously. In exception to the general lack of support was the formation of a group of 'Ukrainians of Polish culture,' or 'Roman Catholic Ukrainians,' led by V. *Lypynsky. Other members included L. Siedlecki, F. *Volska, and Y. Yurkevych. Their press organ was the biweekly *Przegląd Krajowy*, published in Kiev in 1909. Lypynsky and his associates adopted a Ukrainian national and even independentist platform. Others who switched from Polish to Ukrainian nationality included M. *Tyshkevych and J. *Tokarzewski-Karaszewicz. Ukrainophilism and territorial patriotism also continued to manifest itself in Right-Bank Ukraine.

Polish political and community life intensified after the Revolution of 1905. In Kiev the Ognio club and the gymnastic club Sokół were established. The first Polish daily, *Dziennik Kijowski*, which had a national-democratic orientation, began publication through the efforts of a group of Polish landowners. Other Polish periodicals issued in Kiev included *Nasza Przyszłość*, the literary weekly *Kłosy Ukrainiëskie*, and the socio-political weekly *Przedświt*. Ukrainian-Polish literary co-operation resulted in the publishing of the bilingual journal *Novorichnyk avtoriv pol's'kykh i ukrains'kykh* in 1908. In 1906 Poles in Ukraine elected five representatives to the First State Duma and three to the State Council. Polish parliamentarians co-operated with the Ukrainian caucus and in the Autonomists' Union (formed at Polish initiative). Poles exercised considerable influence in the administrations of municipal governments and of gubernial and district zemstvos, after they were established in the Right-Bank gubernias in 1911.

In addition to underground schools several Polish educational groups were active in Ukraine before 1905, notably the Society for Popular Education (est 1897) and the Society for National Education (est 1904). After 1905 Oświata and other educational organizations could operate legally. A network of private Polish schools was established and overseen by the Polska Macierz Szkolna society. By 1917 the group had 103 schools, with an enrollment of 8,880.

Polish literary, musical, and artistic activity grew considerably from the mid-19th to the early 20th centuries in centers such as Kiev, Zhytomyr, Berdychiv, Kamianets-Podilskyi, and certain landowners' estates. A number of important figures in Polish culture either lived or worked in Ukraine, including the poet T.T. Jeż (Z. Miłkowski) and the writer L. *Sowiński; the painters H. Siemiradzki and W. Kotarbiński; and the composers and musicians J. Zarębski, I. Paderewski, and K. Szymanowski. J. Conrad (J. Korzeniowski) was born in Ukraine, where he lived until his parents were exiled for revolutionary activity. Polish stagecraft was much in evidence in Kiev, where in 1911 F. Rychłowski organized a permanent dramatic theater. It became particularly successful after many leading Polish actors joined it in 1916–18. L. Idzikowski established a bookstore and publishing house in Kiev (1857–1920s) that issued over 200 titles by Polish authors, mainly those who lived in or were active in Ukraine. It also became a major publisher of music by Ukrainian (M. Lysenko) and Polish composers.

Polish scholars who were born or lived in Ukraine included E. *Rulikowski and T. Stecki (regional studies); L. Białkowski, F. Gawroński, A. *Jabłonowski, T. Michalski, and A. Rolle (history); J. *Talko-Hryniewicz (anthropology); J. Bartoszewicz (economics); H. Ułaszyn (Slavic studies); and W. Klinger (classical philology). Ukrainian scholars of Polish background included A. *Skalkovsky (history), K. Bolsunovsky (numismatics and archeology), and V. *Horodetsky (architecture).

Poles in Ukraine generally maintained their own distinct communities even though they generally were fluent in Ukrainian and Russian. Large Polish landowners and their attendant administrators tended to regard Ukrainian peasants as a lower caste and treated them with a fair amount of contempt. In cities Poles lived in their own ghettos, and their contact with Ukrainians was minimal. The relations between Poles and the imperial authorities were usually restrained.

Although the Poles were usually either unsupportive of (even antagonistic to) or neutral to Ukrainian political and national strivings, they played a significant and overall positive role in the development of Ukraine in the 19th and early 20th centuries. The substantial Polish presence in Right-Bank Ukraine served as a counterpoint to Russian political domination and cultural Russification. Although neither the Russians nor the Poles would concede that Ukrainians should be treated as equals, the tension between the two helped to crystallize a conviction among Ukrainians that they were culturally and politically distinct. Moreover, certain people raised in a Polish cultural milieu (V. Antonovych, V. Lypynsky, T. Rylsky, and others) contributed significantly to the formation of the modern Ukrainian nation.

Galicja, 1772–1918. In 1914 there were 1,240,000 Roman Catholics living in eastern *Galicja (including the Lemko region, but not the ethnic Polish borderland districts), where they constituted 23.1 percent of the total population. About two-thirds of them were ethnic Poles, and most of the rest were *latynnyky*. About 25 percent of Roman Catholics (virtually all of them Poles) lived in cities, compared to 8 percent of Greek Catholics. Such differences were also common in the respective occupational profiles. In 1910 fewer Roman Catholics were engaged in agriculture than Greek Catholics (68 compared to 90 percent), and more were active in industry (16 compared to 3 percent), trade and transport (8.5 compared to 2.5 percent), and the civil service and free professions (7.5 compared to 4.5 percent).

Changes in ethnic and religious demography reflected a growth in the number of Roman Catholics. They constituted 21.4 percent of the total Galician population in 1857 (Greek Catholics, 66.5 percent), 22.2 percent in 1880 (Greek Catholics, 63.4 percent), 23.5 percent in 1900 (Greek Catholics, 62.8 percent), and 25.3 percent in 1910 (Greek Catholics, 61.7 percent; the figures do not include the Lemko region, but include the Polish border districts). The rise was due largely to the eastward migrations of people from central Poland (35,000 in 1891–1900). Other possible factors were the greater number of Galician Ukrainians emigrating to North and South America and the Polonization of Ukrainians, Germans, and Jews, particularly in large cities. The highest concentrations of Poles lived in large pockets around Lviv, Mostyska, Sambir, and Ternopil and in a swath of territory reaching from Peremyshl and Sambir in the west to the Zbruch River in the east.

The core of the Polish community in Galicia was composed of the landowners, civil servants, professionals, industrial workers, and other urban elements. The reforms of *Joseph II of Austria limited the powers of Polish magnates and nobles over the peasantry, but after Joseph's death in 1790 they began taking control of the local bureaucratic apparatus. Poles were able to influence the Austrian administration by lobbying senior Austrian officials on the one hand and by filling lower-echelon positions with Polish petty noblemen on the other. Poles became the ruling elite of municipal governments and of the Galician Estates Diet (1817–45). A number of former royal Austro-Hungarian estates in Galicia were sold to Polish magnates, who thus increased their holdings.

Polish revolutionary democrats contributed considerably to the awakening of national consciousness among the Galician clerical intelligentsia in the 1830s and 1840s. Activists such as K. Cięglewicz and M. Popel circulated propaganda in Ukrainian and sought to disseminate it among Greek Catholic peasants and students in seminaries. The events of 1848–9, however, underlined the deep divisions between Ukrainians and Poles.

The appointment of Count A. Gołuchowski as governor of Galicia in 1849 and a political understanding reached with the Austrian government in 1867 consolidated the Poles' status as the ruling group in Galicia. They now dominated the crownland's bureaucracy; by the early 20th century virtually all upper-rank civil servants and county heads were Poles. In 1912 there were 112 Poles with senior positions in the central Viennese administration, compared to only 5 Ukrainians.

Poles also owned much of the land in Galicia. In 1892 the holdings of large landowners, virtually all of whom were Poles, constituted 43 percent of the total landholdings. Polish settlements also expanded in eastern Galicia as the result of a sustained colonization effort. In 1852–1912, Polish immigrants from the western part of the crownland received 237,000 ha of land earmarked for parcelation in eastern Galicia, in comparison to 38,000 ha given to Ukrainians. Gymnasiums and postsecondary educational institutions were also predominantly Polish in character. The postsecondary institutions were all Polish, and there were 39 Polish state gymnasiums in eastern Galicia, compared to 3 Ukrainian.

The antagonism between Poles and Ukrainians was further exacerbated by the almost universal anti-Ukrainian stance of the major Polish political parties in the late 19th and early 20th centuries. The most influential Polish party of the 1870s and 1880s, the Cracow-based group of western Galician conservatives commonly known as the *Staniczyk* group (Ukrainian: *stanchyky*), controlled the higher offices of the crownland and many senior posts in the Viennese government; one of their number was always appointed Austrian minister for Galicia, and some of them managed to become premier. In 1907 they formed the National Right party. The leading figures of the group included K. *Badeni, L. Biliński (Austrian minister of finance), M. *Bobrzyński, and A. Potocki. Another group of Polish conservatives, based in Lviv, included D. Abrahamowicz, W. Dzieduszycki, Gołuchowski, and K. Grocholski. That group was particularly vociferous in combating Ukrainian interests (even more so than the Cracow group). In the early 20th century the liberal-nationalist National Democratic party, popularly known as the *En-*

decja, was a chauvinistic group; it supported Russia in its foreign policy, and its members therefore were often considered Russophiles. Its ideologist was R. *Dmowski, and its leaders were S. Głabiński, S. *Grabski, A. Skarbek, and others, who published the daily *Stowo Polskie*. The group influenced such large community organizations as Sokół and the Society for Public Schools.

The Polish political faction most receptive to Ukrainian political aspirations was the socialist camp, which worked closely with its Ukrainian counterpart. Its leaders included I. Daszyński, H. Diamand, H. Lieberman, and B. Limanowski. Polish and Ukrainian socialists also collaborated within unions to which members of both groups belonged.

On the eve of the First World War the Polish political world in Galicia was divided into two camps. On the one hand were the Cracow conservatives and democratic groups (liberals, socialists, and populists), and on the other, the Podolians and the National Democrats. The former group eventually managed to reach a comprehensive Ukrainian-Polish rapprochement, which was never put into practice owing to the outbreak of the First World War.

Along with political power came disproportionate benefits to Polish cultural concerns. In 1902, 333,050 crowns were dispensed for Polish cultural aims by the Galician provincial diet; Ukrainians were issued 35,900 crowns. Lviv continued to be an important center of Polish political and cultural life, at times more important than Cracow and even Warsaw. Alongside the university and the polytechnical school were a number of Polish scholarly institutions, including the *Ossolineum, the Polish Historical Society, the Polish Society of Naturalists, and various libraries, museums, theaters, book clubs, and journal reading clubs. Peremyshl, Stanyslaviv, Ternopil, and other centers also boasted considerable Polish cultural activity.

Many Poles of eastern Galicia (including a substantial number of immigrants from central Poland and Right-Bank Ukraine) influenced the development of Ukrainian cultural, academic, and political life. Among them were the writers A. Fredro, Z. Kaczkowski, J. Lam, K. Ujejski, T. *Zaborowski, and J. *Zachariasiewicz (who frequently touched on Ukrainian matters and themes in their works); the literary scholars A. Brückner, W. Feldman, J. Kleiner, and M. Mochnacki; the painters and sculptors A. Grottger, J. *Kossak, and K. *Sichulski; the composers and musicians J. Gall, H. Jarecki, and M. Sołtys; many actors who performed at the Lviv Theater; the historians A. Bielowski, F. *Bujak, W. *Łoziński, A. *Prochaska, and K. Szajnocha; the economists L. Caro and S. Szczepanowski; the statistician J. Buzek; and the geographer E. *Romer.

Central Ukraine, 1917–20. After the outbreak of the First World War (particularly in 1915) there was a large influx of Polish refugees from territories occupied by the Central Powers. Most of them settled in Kiev; by 1917 their number in that city had reached 42,800 (or 9.5 percent of the city's total population). The Polish Society for Relief of Victims of War (with about 50 branches) and the Central Civilian Committee were established to assist them.

After the February Revolution of 1917 a number of Polish political and community organizations were established, including the Polish Executive Committee in Ruthenia (PKW), headed by J. Bartoszewicz. Polish national democrats and landowners were the dominant forces in

that organization, whose leaders also included J. Zdziechowski.

In July 1917 an all-Ukrainian congress of Poles was convened in Kiev. It split into two groups after a democratic faction, influenced by the PPS and the Polish Army Organization, seceded. The PPS itself later split into left and right factions. The mainstream Polish group, the Polish Democratic Center party, was led by such figures as S. *Stempowski, R. Knoll, and M. *Mickiewicz. Both Polish political camps were receptive to the Ukrainian national revival, but the PKW opposed the Central Rada's policies. Therefore, on 24 July 1917, only representatives of the Democratic Center party joined the Central (20 deputies) and Little Radas (W. Matuszewski and W. Rudnicki). Mickiewicz served as one of the advisers on nationality affairs to the General Secretariat, and after the Third Universal (20 November 1917) he was appointed head of the newly formed Ministry of Polish Affairs. The Central Rada's radical agrarian policies alienated many Poles from the cause of Ukrainian statehood.

In accordance with legislation on personal national autonomy passed on 24 January 1918 the Polish minority in Ukraine had the right to establish a separate national union with rights of autonomy. The projected elections for its first congress, however, never took place (as war with invading Soviet forces broke out). Most Poles in Ukraine continued to support the PKW and shunned the UNR's Ministry of Polish Affairs because it was left-wing. Despite the adverse conditions the ministry had some achievements in the fields of education, social services, and the defense of Polish interests. The Polish educational organization, *Związek Macierzy Polskiej*, was also active in 1917–18.

All nationality ministries were abolished after the Hetman coup, and Polish schools were placed under the jurisdiction of the Ukrainian Ministry of Education. P. Skoropadsky's support of the interests of Polish landowners garnered him their loyalty, however. During his regime the PKW continued to be active.

In 1917–18 there were over 1,300 Polish schools in Ukraine, with 84,000 pupils and 1,800 teachers. There were 13 secondary schools in Kiev, 2 in Zhytomyr, and 2 in Odessa. In November 1917 the Polish University College was established in Kiev, with L. Janowski as its first rector. In 1917–18 it had an enrollment of 718.

In 1919 the chaos in Ukraine and the occupation of most of its territory by Bolshevik forces set in motion a massive Polish emigration to the newly established Polish state. The conclusion of the subsequent Soviet-Polish War and the signing of the Peace Treaty of *Riga precluded the possibility of a return to Ukraine for many Polish landowners and members of the intelligentsia and prompted the emigration of many of those who had remained. Some of the new emigrants assumed senior positions in the Polish government and maintained relations with associations of refugees from Ukraine.

Ukrainian SSR, 1920–1930s. According to the census of 1926 there were 476,400 Poles in Soviet Ukraine (1.6 percent of the total population). Of those, 230,400 (48.4 percent) listed Ukrainian as their mother tongue (15.7 percent in the cities, 56.9 percent in rural areas). They were probably *latynnyky*. A large majority (86 percent) of the Poles in Ukraine (408,000) lived in territories that had belonged to the Polish state until the late 18th century. Their distribution remained similar to the distribution recorded in 1897. They were most highly concentrated in Volhynia (Zhyto-

myr) and Proskuriv okruhas, where they formed 12.5 percent and 10.2 percent of the respective total populations. The only region with a Polish majority was Marchlewski raion (*Dovbysh), where 69.2 percent of the people were Poles by nationality, and approx 33 percent, Poles by language. There were also small Polish communities in the steppe regions. A large number of Poles lived in larger urban centers, such as Kiev (13,700, or 2.7 percent of the population), Odessa (11,600), Kharkiv (7,000), Kherson (4,500), and Dnipropetrovske (4,000).

The process of assimilation of the Polish peasantry in Right-Bank Ukraine continued, as the data of the 1897 and 1926 censuses testify. In general the category of Roman Catholic included those who gave Polish as their nationality, that is, both true Poles and *latynnyky*. That means that the Polish community in Ukraine contracted by 38 percent in 30 years (1897–1926). The percentage of the Polish population in cities also declined, from 3.1 percent of Ukraine's urban population to 1.9 percent. In 1897, 30 percent of Ukraine's Poles lived in cities; in 1926, 15 percent. Prior to the revolution their social distribution was different from that of Ukrainians. By 1926 it had become the same. The community suffered far more than after the revolts of 1830–1 and 1863–4. It became a small minority, and its elite virtually ceased to exist.

In the 1920s Poles in the Ukrainian SSR were regarded and treated as a distinct national minority. Under the Bolshevik regime, however, Polish political, community, and cultural organizations either were abolished or dissolved themselves, and schools were brought under the control of the Soviet educational system. Of the political parties only some cells of the left wing of the Polish Democratic Center party remained, and they were co-opted by the CP(B)U. The CP(B)U maintained Polish bureaus in the Central Committee as well as in municipal and oblast committees. In the 1920s those bureaus oversaw Polish community life in the Ukrainian SSR. Nationality councils were also established in areas where Poles were concentrated (139 in May 1927). A total of six courts presided over cases in Polish.

On 1 January 1927 there were 281 Polish labor schools (134 in 1936). In 1928, 38 Polish books were published in Ukraine; in 1934, 63. There were 17 newspapers published in Polish, including the daily *Sierp* (renamed *Głos Radziecki* in 1935). The People's Commissariat of Education of the Ukrainian SSR had a Polish Central Bureau. In Kiev there was also the Central Polish Library and a Polish department in the State Publishing House. In 1931 the Institute of Polish Proletarian Culture was established at the All-Ukrainian Academy of Sciences. It did not manage to undertake any serious work, however, because it was liquidated soon thereafter. The Polish section of the Kiev Central Historical Archive met a similar fate.

In the early 1930s, relations between Poland and the USSR worsened. In late 1933 P. *Postyshev declared that an 'underground' Polish Army Organization had been uncovered. He accused Polish members of the CP(B)U of being leaders of the organization and had them shot as spies. Thereafter Marchlewski raion was liquidated. Senior party and government members in the Ukrainian SSR of Polish or Polish-Jewish background (including F. *Kon, J. Kosior, and S. *Kosior) made virtually no effort in the sphere of Polish affairs.

Ukrainian territories under Poland, 1919–39. The course of ethnic relations was different in every region of

Western Ukraine. In Galicia, despite pressures exerted by the local Polish population and those who arrived seeking parceled land, the percentage of Roman Catholics rose only from 24 to 25 percent (Polish statistics cite 30 percent). The small growth was due to the larger rate of natural population increase among Greek Catholics, a reduced rate of emigration to the Western Hemisphere, and a reduced rate of migration from central Poland (the Poles there gravitated more to cities in Silesia, in the Poznań region, and along the Baltic Sea coast). Many senior Polish officials, scholars, activists, artists, and others left Lviv for Warsaw, Poznań, and Vilnius.

In western Volhynia and Polisia Poles and *latynnyky* constituted 9 and 4.5 percent respectively of the population in 1897. Their numbers doubled in the interwar period owing to a strong influx of Poles into the cities (particularly as administrators) and to rural areas (military personnel and parcelation recipients). In the Kholm region and Podlachia the number of Ukrainians diminished because many former Uniates (since Uniatism had been outlawed in 1875–6) and Orthodox converted to Roman Catholicism (and became known as **kalakuty*). In addition only a portion of the Poles who had been evacuated eastward during the First World War (in 1915) returned to the region.

In Galicia in 1931, agriculture occupied 69.9 percent of Roman Catholics (88.1 percent of Greek Catholics); industry, 11 percent (5.8 percent of Greek Catholics); trade, 5.8 percent (1.5 percent of Greek Catholics); the civil service, 5.6 percent (1.2 percent of Greek Catholics); and other activities, 7.7 percent (3.4 percent of Greek Catholics).

Lviv continued to be the focus of considerable Polish activity in scholarship and culture. Less important, but active nevertheless, were Peremyshl, Stanyslaviv, Lutske, Ternopil, Brest, and other locales. Poles continued their pre-eminence in publishing. In 1929, of 313 periodicals issued in the eastern voivodeships of Poland (including German and Jewish publications) only 77 were Ukrainian. Of the 16 dailies, only 2 were Ukrainian.

Polish writers active in the region included M. Jastrun, K. Makuszyński, J. Paradowski, L. Staff, and S. Vincenz. Those active in music included L. Bronarski, A. Sołtys, and T. Szeligowski; in linguistics, J. Janów, J. Kuryłowicz, and T. *Lehr-Splawiński; in ethnography, A. *Fiszer; in law, A. Halban; in geology, W. Rogala and W. *Teisseyre; in botany, S. Kulczyński; in anthropology, J. Czekanowski; in mathematics, S. *Banach and K. Bartel; and in chemistry, I. Mościcki (later the president of Poland).

Among Polish cultural figures born in Right-Bank Ukraine (outside Galicia) were the writers M. Choromański, J. Iwaszkiewicz, Z. Kossak-Szczucka, J. *Łobodowski, and W. *Słobodnik; the composers M. Kondracki and K. Szymanowski; and the architect T. Tolwinski. Polish political leaders active in Western Ukraine included H. *Józewski, J. Wołoszynowski, and W. Biernacki-Kostek.

Everyday relations between Ukrainians and Poles in the Western Ukrainian districts varied. In general, relations between Ukrainian peasants and *latynnyky* were good and neighborly, particularly with those Poles who had settled there long before. There was, however, hostility to newcomers from the city, such as teachers and police, forestry department, and manorial officials. Contacts between the Ukrainian and Polish rural intelligentsia were mostly official. Ethnic relations in the cities also tended to be official, regardless of social standing.

After 1939. After the Soviet occupation of Western Ukraine in 1939, Polish influence in that region declined immediately. Large and middle-sized Polish estates were liquidated, and many Polish colonists and administration officials were deported. A large number of refugees from German-occupied Poland arrived in Lviv, including Communist leaders, such as W. Gomułka and Z. Kliszko. There was a Polish theater of drama and satire in the city as well as a number of Polish-language newspapers and journals.

After the new border was established between the Ukrainian SSR and Poland (on 16 August 1945), a massive exchange of borderland population ensued. In 1946 virtually all Poles were deported from Western Ukraine to territories recently acquired by Poland from Germany (the so-called regained lands). Large numbers of Ukrainians were moved from borderland regions into newly opened lands. Many of the Ukrainians who had remained in Ukrainian ethnic territory ceded to Poland (northwestern Galicia and the Lemko, Kholm, and Sian regions) were deported westward by the Polish authorities. As a result the ethnic boundaries between Ukrainian and Polish areas of settlement came to correspond roughly with the political borders, and the Polish element in Ukraine was reduced to a relatively insignificant minority.

According to the census of 1959 there were 363,000 Poles and *latynnyky* in the Ukrainian SSR, representing 0.9 percent of the total population. In 1933 there had been 2,100,000 (or 5 percent of the total) within the same boundaries (inclusive of Western Ukraine). In 1959 only 68,000 Poles in Ukraine spoke Polish (19 percent), whereas 69 percent spoke Ukrainian, and 12 percent (mostly urban dwellers) spoke Russian. Of the 1,570,000 Poles and *latynnyky* who had lived in Western Ukraine (21.9 percent of the local population) only 37,000 remained. The majority of Poles (approx 209,000, representing 57 percent of the total Polish population of Ukraine) lived in Right-Bank Ukraine, from which fewer had been resettled; only 23,700 of them spoke Polish. They were concentrated in Zhytomyr (103,000) and Khmelnytskyi (70,000) oblasts. Approx 45 percent of Poles lived in cities, and 55 percent in the countryside. About 15,000 lived in Lviv, and 8,400 in Kiev.

By 1970 the number of Poles in Ukraine had dropped to 295,000, or 0.6 percent of the total population; in 1989 the figure stood at 219,000 (0.4 percent).

Polish academic institutions, including libraries and museums, were all merged with Ukrainian ones. Only some were permitted to transfer to Poland, among them the Ossolineum. Polish community and cultural organizations ceased to exist. A few Roman Catholic parishes and schools continued to be active, mainly in Lviv.

(See *Poland for bibliography.)

B. Kravtsiv, V. Kubijovyč, O. Ohloblyn, I.L. Rudnytsky

Poetyka. A family of Cossack *starshyna* in Left-Bank Ukraine (possibly of Right-Bank origin). The founder was Ivan, a Cossack of Lubni regiment in 1649. His descendant Pavlo was a fellow of the banner in Lubni regiment who died in the 1709 Battle of Poltava. Pavlo's son, Andrii (1692–1773), was mayor of Romen (1727–9) and a fellow of the banner and fellow of the standard (1749–57) in Lubni regiment. Andrii had five sons, among them Andrii *Poetyka, Hryhorii *Poetyka, and Ivan *Poetyka. In the 18th and 19th centuries Hryhorii's son, Vasyl *Poetyka, Ivan's sons, Mykhailo *Poetyka and Petro *Poetyka, and their cousin, Hryhorii *Poetyka, were civic and cultural fig-

ures. Their descendant Volodymyr (1886–?) was a zemstvo official, marshal of the nobility in Myrhorod county, and senior secretary of the Hetman government's mission in Vienna in 1918–19.

Andrii Poetyka

Hryhorii Poetyka

Poetyka, Andrii, b ca 1739–41?, d ca 1798. Civic figure; brother of H. and I. *Poetyka. In 1758 he became a chancellor in the Hetman state's General Military Chancellery. He was appointed a notable military fellow in 1763 and a fellow of the standard in 1767. Later, as marshal of the nobility in Romen county (1784, 1797–8) and of all Chernihiv gubernia (1785–8), he was an advocate of granting imperial noble status and privileges to the largest number of Cossack *starshyna*. From 1787 he had the rank of court counsel in the Russian imperial civil service. Poetyka's diary of Catherine II's visit to Kiev in 1787 was published in *Pamiatnaia knizhka Kievskoi gubernii na 1858 g.* (Memorial Book of Kiev Gubernia for 1858).

Poetyka, Hryhorii, b 1725 in Romen, Lubni regiment, d 8 December 1784 in St Petersburg. Civic leader and writer; brother of I. *Poetyka. He completed his studies at the Kievan Mohyla Academy (1745) and then worked in St Petersburg as a translator of Latin and German works.

Poetyka entered Ukrainian public life as the replacement for the Lubni regimental representative to Catherine II's Legislative Council of 1767–9. He emerged as a leading proponent of Ukrainian interests at the landmark gathering following the sudden resignation of K. Rozumovsky. Poetyka articulated a view of Ukraine ruled as a gentry democracy in the manner of the Polish Commonwealth. His views differed markedly from those of Rozumovsky regarding the restoration of the Cossack institutions that had been abolished in 1764 and the role of the hetman in Ukrainian society. The viability of his arguments and the passion of his defence of Ukrainian autonomy won him the support of Ukrainian delegates at the council. Catherine's administrative changes in Ukraine disregarded the positions of Poetyka and the petitions of hundreds of Ukrainians. Nevertheless the exercise had brought forth a clear articulation of perceived rights, and it played an important role in the development of a Ukrainian historical consciousness in modern times.

In addition to items submitted to the Legislative Council Poetyka prepared works regarding the origins of the Kievan Mohyla Academy and the development of education in Russia, as well as Russian translations of Aristotle

and a six-language dictionary (Russian, Greek, Latin, French, German, and English). Some historians credit him (or him and his son, Vasyl) with writing **Istoriia Rusov* (History of the Rus' People).

V. Omelchenko

Poletyka, Hryhorii, b ca 1735, d 1798. Historian and diplomat; cousin of A., H., and I. *Poletyka. He graduated from the Kievan Mohyla Academy, Moscow Academy, and St Petersburg University. He served as translator in the Russian College of Foreign Affairs (1755–62), secretary of the Russian legation at the royal court of the Holy Roman Empire (from 1762), and adviser to the Russian embassy in Vienna (from 1770). He translated Latin works and wrote an article about the Zaporozhian Cossacks, which was published in *Wiener Taschenkalender zum Nutzen und Vergnügen* (1788). In 1777 Joseph II granted him Austrian noble status.

Poletyka, Ivan, b 29 August 1726 in Romen, Lubni regiment, d 3 May 1783 in Vasylkiv, Kiev gubernia. Physician; brother of H. *Poletyka. A graduate of the Kievan Mohyla Academy (1746), he studied at the Kiel Medical Academy in Germany (1746–52) and wrote his doctoral dissertation at Leiden University on hereditary diseases (1754). He taught at the Kiel Academy (1754–6) and then went to Russia to direct the St Petersburg Military Hospital and teach at its medical school (1756–9). His quarrelsome character led to his demotion, and he was transferred to Ukraine and placed in charge of the Border Quarantine Service in Vasylkiv (1763–83). His publications dealt with infectious diseases.

Poletyka, Mykhailo, b 28 September 1768, d 17 December 1824. Philosopher; son of I. *Poletyka and brother of P. *Poletyka. A graduate of the First Cadet Corps, he served as secretary to Empress Maria Fedorovna. After retiring from service in 1807, he wrote *Essais philosophiques sur l'homme, ses principaux rapports et sa destinée, fondés sur l'expérience et la raison, suivis d'observations sur le beau*, which was published anonymously in Halle (1818) and again in St Petersburg (1822).

Poletyka, Petro (Pierre de Poletica), b 27 August 1778 in Vasylkiv, near Kiev, d 7 February 1849 in St Petersburg. Career diplomat; son of I. *Poletyka and brother of M. *Poletyka. In 1798 he became a translator in the Russian College of Foreign Affairs. Later he served as a chancellor in the Russian diplomatic missions in Stockholm (1802–3) and Naples (1803–5), adviser to the missions in Philadelphia (1809–11), Rio de Janeiro (1811–12), Madrid (1812–14), and London (1816–17), and Russian special envoy and minister plenipotentiary in the United States (1818–22). He was the minister who negotiated and signed the 1824 Russian-US agreement regarding the Russian American Company and the Russian-US (1824) and Russian-British (1825) conventions on trade, fishing, and navigation in the Pacific. In 1825 he was appointed a privy councillor and senator. Poletyka is the author of *A Sketch of the Internal Conditions of the United States and Their Political Relations with Europe* (Baltimore 1826). Excerpts from his memoirs

of 1778–1849 were published in *Russkii arkhiv* (vol 3, 1885). He was elected a member of the American Philosophical Society in Philadelphia in 1822. A mountain on the British Columbia–Alaska border was named after Poletyka in 1923, and M. Hutsuliak's book about him was published in Vancouver in 1967.

Vasyl Poletyka

Liudmyla Polevska

Poletyka, Vasyl, b 1765 in St Petersburg, d 1845 in Korovyntsi, Romen county, Poltava gubernia. Historian and civic figure; son of H. *Poletyka the elder. After studying at Vilnius University he served in the Russian army (1786–90), from which he retired with the rank of second major to his estate in Korovyntsi. In 1802 and 1805–12 he was marshal of the nobility in Romen county. His study of the history of ancient Egypt and the Assyrians, Medes, and Persians was published in St Petersburg in 1788, and a few of his shorter works were printed in various publications of the period. He collected many materials for a history of Ukraine he planned to write. According to O. Lazarevsky, V. Horlenko, L. Maikov, E. Borschak, and other scholars Poletyka was the author, alone or with his father, of **Istoriia Rusov*.

Polevska, Liudmyla [Polevs'ka, Ljudmyla] (née Tymoshenko), b 1893 in Kharkiv, d 19 December 1975 in New York. Cellist and teacher; spouse of M. Polevsky. She studied cello at the Kharkiv and Moscow conservatories and then performed as a soloist with the Kiev, Kharkiv, and Moscow philharmonic orchestras under S. Rachmaninoff, S. Koussevitzky, and others. She was a member (with her husband) of the Ukrainian State Trio (Kharkiv) from 1926, and also a professor of cello at the Kharkiv Conservatory in 1928–41. A postwar émigré, from 1952 she was a faculty member of the Ukrainian Music Institute of America in New York. She appeared as a soloist in Western Europe, Canada, and the United States.

Polevska, Zoia [Polevs'ka, Zoja], b 1925 in Kharkiv. Concert cellist; daughter of L. Polevska and M. Polevsky. She studied at the Kharkiv Conservatory in the class of her mother and graduated from the Vienna Academy of Music (*Meisterschule*). She then concertized successfully and extensively throughout Europe and appeared as soloist with the Vienna Philharmonic under W. Furtwängler. She was also a soloist with the Radio Italiano Orchestra and in

Zoia Polevska

Mykola Polevsky

numerous other radio recitals. Since the 1950s she has performed in Canada and the United States. Her repertoire includes J.S. Bach, A. Vivaldi, G. Frescobaldi, A. Dvořák, P. Tchaikovsky, G. Fauré, M. Ravel, and L. Revutsky.

Polevsky, Mykola, b 27 December 1894 in Gori, Georgia, d 4 January 1969 in New York. Pianist and teacher. A student of S. Rachmaninoff, he graduated in 1918 from the Moscow Conservatory. From 1919 he taught piano and lectured on musicological subjects at the Kharkiv Conservatory, as professor during 1928–41. From 1926 he was also a member of the Kharkiv-based Ukrainian State Trio, which championed an extensive Ukrainian chamber repertoire. He subsequently taught at the Vienna (1943–5) and Rome conservatories, and from 1952 was a faculty member of the Ukrainian Music Institute of America in New York and Philadelphia. Among his students were noted pianists and teachers, including L. Sahalov, Z. Chernenka, L. Ostrin, G. Oransky, and V. Sechkin.

Polferov, Yakov [Polfjorov, Jakov], b 13 April 1891 in Ilinskaia stanitsa, Krasnodar krai, d 30 September 1966 in Kharkiv. Musicologist and conductor. After graduating from the St Petersburg Conservatory in 1911, he studied composition at the Odessa Conservatory. He worked as a conductor at various theaters in St Petersburg and other cities, lectured at the Odessa Conservatory (1918–21), directed a music tekhnikum in Petrograd (1921–4), and edited the journal *Ezhenedel'nik petrogradskikh gosudarstvennykh akademicheskikh teatrov* (1922–3). From 1924 he lived in Kharkiv, where he served as rector of the Music and Drama Institute (1924–5), artistic director of Ukrainian radio broadcasting (1927–9), and head of the music department of the Kharkiv State Library. His scholarly works include *Zvukovi i muzychni elementy v tvorakh ukrains'kykh prozaikiv* (Sound and Musical Elements in the Works of Ukrainian Prose Writers, 1929), *Orhanika* (Organ Music, 1930), and a bibliographic reference book, *Rosits'ka muzyka 19 ta 20 stolit'* (Russian Music of the 19th and 20th Centuries, 1935).

Poliakov, Illia [Poljakov, Illja], b 16 September 1905 in Kharkiv, d 4 November 1976 in Kiev. Biologist; corresponding member of the AN URSR (now ANU) from 1948. A graduate of the Kharkiv Institute of People's Education (1926), he was a department head at Kharkiv University (1932–48) and worked at the ANU Institute of Genetics and

Selection (1947–56). He was later associate director and director (from 1968) of the Ukrainian Scientific Research Institute of Plant Cultivation, Selection, and Genetics. He wrote on experimental botany, Darwinism, and the historical and theoretical problems of biology and obtained significant results in the fertilization of flowering plants.

Poliakov, Mykola [Poljakov], b 18 May 1903 in Katerynoslav (now Dnipropetrovske). Mining scientist and geologist; full member of the AN URSR (now ANU) since 1967. He studied and taught at the Dnipropetrovske Mining Institute and worked at the ANU Institute of Mining (from 1945). He headed the Dnipropetrovske branch of the ANU Institute of Mechanics (from 1962) and became director of the ANU Institute of Geotechnical Mechanics (1967–75). He was involved in the development of new technology for mining the extensive deposits of manganese ore and brown coal in Ukraine, and in the reconstruction of the Ukrainian mining industry after the Second World War.

Poliakov, Petro [Poljakov], b 15 November 1907 in Odessa, d 5 October 1973 in Kiev. Composer, conductor, and pedagogue. A graduate (1931) of the Lysenko Music and Drama Institute, he studied composition with B. Liatoshynsky and conducting with V. Berdiaiev. He then served as conductor and artistic director of the Kiev Radio Orchestra (1933–53), the Ukrainian State Symphony Orchestra (1953–6), and the Kiev Theater of Musical Comedy (1956–61). His works include the musical comedy *Koho ia kokhau?* (Whom Do I Love?, 1959); the cantata *Zhyvy Ukraino* (Long Live Ukraine, 1942); symphonic suites; music for radio and film; orchestrations of works by M. Lysenko, K. Stetsenko, P. Sokalsky, and others; and editions of M. Kropyvnytsky's stage music. He taught at the Kiev Conservatory (1951–8).

Poliana [Poljana]. v-3. A town smt (1986 pop 3,500) in Svaliava raion, Transcarpathia oblast. It is first mentioned in historical documents in the 12th century. Poliana is a balneological health resort with two sanatoriums that are open all year. The mineral waters provided by its four springs are used to treat chronic gastritis, ulcers, and liver and kidney ailments.

Polianians (*poliany*). A Slavic tribe (a tribal alliance, according to M. Braichevsky) that lived on the right bank of the middle reaches of the Dnieper River, between the tributaries Ros and Irpin. They are mentioned in the earliest, undated section of the Rus' Primary Chronicle as living in the Kievan hills alongside the *Varangian route to the Greeks. The last mention of them is under the year 944, where they are referred to as among Prince Ihor's warriors. Their name is derived from the fields (*polia*) they inhabited. The location of the Polianians' territory at the intersection of important trade routes contributed to their economic and cultural development as organizers of the Kievan state. In the 9th and 10th centuries they were already known as the Rus', a name that was soon applied to all the tribes that made up *Kievan Rus'. The Polianians' principal city was Kiev. Other important centers were Bilhorod, Bohuslav, Vyshhorod, and Zvenyhorod. Archeological evidence and the chronicles indicate that the Polianians engaged in agriculture (they used the hoe and plow), animal husbandry, hunting, beekeeping, and fishing and were skilled artisans. The chronicles state that

they were socioeconomically more advanced than the neighboring Slavic tribes.

A. Zhukovsky

Polianovka Peace Treaty. A treaty ending the Polish-Muscovite War of 1632–4, concluded on 4 June 1634 at the Polianovka River in the Smolensk region. The Polish-Lithuanian Commonwealth agreed to remove its forces from Muscovite territory, and King Władysław IV Vasa renounced his claim to the Muscovite throne in exchange for 20,000 rubles. Muscovy relinquished its claim to most of the lands, including the Chernihiv and Novhorod-Siverskyi regions, that it had been forced to cede to the Commonwealth by the Deulin Treaty of 1618.

Polianska-Karpenko, Olha [Poljans'ka], b 1869 in Novocherkassk, Don Cossack region, d 1943. Stage actress and singer (contralto). She worked in the troupes of M. Kropyvnytsky (1884–8 and 1894–8), M. Sadovsky (1888–93), and O. Suslov and P. Saksahansky (1898–1905) and in Sadovsky's Theater (1906–14), the Society of Ukrainian Actors (1915–16), the Ukrainian National Theater (1917–18), the State People's Theater (1918–19), and the Shevchenko First Theater of the Ukrainian Soviet Republic. In 1925 she retired from the stage. Among her roles were Lymerykha in P. Myrny's *Lymerykha* (The Saddler's Daughter) and Hordylia in M. Starytsky's *Tsyhanka Aza* (The Gypsy Aza).

Poliansky, Fedir (Teodor) [Poljans'kyj], b ?, d after 1783 in Lviv. Bell founder. His best-known works are the clock bell in the tower of the Kamianets-Podilskyi city hall (1753) and the Kyrylo Bell at the Dormition Church in Lviv (1783). He also cast the bells for churches in Shchyrets (1753), Susidovychi (1759), Turyinka (1761), and Krakovets, in the Lviv region; Kozyna (1759) and Mykhailivka (1764), in the Peremyshl region; the Peremyshl cathedral (1766); and the Bernardine (1743), Carmelite (1753), Franciscan (1769), and Armenian (1782) churches in Lviv.

Poliansky, Oleksander [Poljans'kyj], b 1890 in Veriatsia, now in Vynohradiv raion, Transcarpathia, d 1952 in Prague. Pedagogue and political activist. He was a member of the Ukrainian Social Democratic party and head of the Prosvita society in Mukachiv. He was also a founding member of the Teachers' Hromada of Subcarpathian Ruthenia and editor of the monthly *Uchytel's'kyi holos* (1929–39). Poliansky wrote textbooks for elementary schools and cofounded the literary almanac *Trembita*.

Poliansky, Toma [Poljans'kyj], b 1794 in Bartne, Sianik circle, Galicia, d 11 November 1869 in Peremyshl. Greek Catholic bishop. He graduated from the Greek Catholic Theological Seminary in Lviv (1818) and then served as

prefect there (1820–9) and completed a D TH at Lviv University (1826). He was canon of Peremyshl eparchy before being consecrated bishop of Peremyshl in 1860. He played a key role in the negotiations with the Vatican that led to the establishment of the Concordat of 1863 guaranteeing the equality of the Byzantine and Roman rites in Galicia. Poliansky also served as a deputy to the Galician and Viennese diets (1861–8).

Poliansky, Toma [Poljans'kyj], b 1822 in Felshtyn, Sambir circle, Galicia, d 3 June 1886 in Peremyshl. Greek Catholic priest, pedagogue, and political activist. He studied theology in Vienna and was ordained in 1845. In 1846 he began to teach religion at the Peremyshl gymnasium. From 1847 he also served in the Peremyshl cathedral, and he was the first priest to deliver a sermon in Ukrainian there (previously only Polish had been used). During the Revolution of 1848–9 he campaigned for Ukrainian rights in Galicia and wrote an open letter calling for the increased use of Ukrainian and equal rights for Ukrainian schools and other institutions. He also served as secretary of the Ruthenian Congress in Peremyshl. In 1859 he was a member of the commission working for the adoption of the Latin alphabet for Ukrainian (see *Alphabet war). From the 1850s he worked as a school inspector or director of gymnasiums in Rzeszów and Peremyshl. He was elected a deputy to the Galician Diet in 1867 and to the Viennese parliament in 1868, where he served on the education commission. Gradually Poliansky adopted a Russophile position and withdrew from Ukrainian affairs.

Yaroslav Poliansky

Poliansky, Yaroslav [Poljans'kyj, Jaroslav], b 15 August 1930 in Poliany, Nowy Sącz county, Galicia. Conductor, composer, folklorist, and community activist. He was deported to western Poland along with his family in 1947. He studied at the Chopin Academy of Music in Warsaw (1961–6) and in Kiev and Lviv (1964). In 1972 he founded the *Zhuravli men's choir, and he served as its conductor until 1982. In 1977 he established a Ukrainian chamber choir at the Church of the Basilian Order in Warsaw, and since 1987 he has conducted the Ukrainian Millennium youth choir. He has written many compositions on works by Ukrainian poets in Poland, including Ya. Hudemchuk, O. Lapsky, V. Nazaruk, I. Reit, and Ye. Samokhvalenko; scored more than 200 arrangements of folk songs; transcribed over 5,000 Ukrainian (primarily Lemko) folk songs, over 800 of which have been published in *Nashe slovo*; and written scholarly studies on choral conducting and Lemko music.

Yurii Poliansky

Poliansky, Yurii [Poljans'kyj, Jurij], b 6 March 1892 in Zhovtantsi, Zhovkva county, Galicia, d 19 July 1975 in Buenos Aires. Geologist and geographer; member of the Shevchenko Scientific Society from 1927 and honorary member of the Argentine Geological Society. He graduated from Lviv University in 1914. During the First World War he served in the Austrian army and then joined the Ukrainian Galician Army as an artillery officer. After the war he taught at the Academic Gymnasium of Lviv (1920–30), worked at the State Geological Institute (1927–8), and, at the same time, completed his doctoral dissertation on the morphology of Podilia (pub in *Zbirnyk Matematychno-pryrodopysno-likars'koï sektsii NTSh*, 1929). In the 1930s he taught anthropology at the Greek Catholic Theological Academy in Lviv. During the first Soviet and German occupation of Western Ukraine (1939–44) he taught at Lviv University and was director of the reorganized Natural Science Museum of the AN URSR (now ANU). After fleeing to Austria and Germany, where he taught at the Ukrainian Free University (1945–7), he emigrated to Argentina. There he worked as a geologist and taught geology at the state university in Buenos Aires (1956–67). In the 1920s and 1930s he published several studies of the geology and archeology of Galician Podilia, many of them in the serial publications of the Shevchenko Scientific Society. He also prepared a geological map of southern Polisia (1934) and general geological surveys of Ukraine. In Argentina he wrote several articles on the geology of Argentina.

S. Trofimenko

Polianych, B. See Luzhnytsky, Hryhorii.

Police (*politsiia*, *zhandarmeriia*, *militsiia*). A branch of the state responsible for keeping civil order and ensuring the security of citizens. Under totalitarian regimes the police, especially the branch responsible for state security, are able to violate civil rights with impunity because there is no rule of law.

The autocratic tsarist regime, ever fearful of political opposition, developed a complex police structure. In 1697 Peter I created a central *prikaz* (agency) and chancellery in Preobrazhenskoe, near Moscow, that served as a political police directorate. Its work was aided by a network of government agents known as *fiskaly*, who specialized in surveillance and informing. Peter I also instituted a higher security organization, the Chancellery for Secret Investigation. Those police organizations played a major role in rooting out 'Mazepists' after the defeat of Hetman I. *Mazepa at the Battle of Poltava in 1709.

The police structure of the Russian Empire underwent several reorganizations. At the beginning of the 20th cen-

tury there existed a Police Department and a Gendarmery Corps subordinated to the minister of internal affairs. At the gubernia level the highest representative of police authority was the governor; at the county level the highest authority was the **ispravnik*. From 1826 the gendarmes served as anti-riot troops in the cities and as a posse in rural areas and were given wide-ranging political powers of summary arrest, trial, and exile of persons suspected of political offenses. In 1881 Sections for the Protection of Public Security and Order (known as the **Okhrana*) were created to serve as a secret police. The *Okhrana* had rights to enter without warrant, to deport persons to Siberia without trial, to carry out surveillance of anyone, and, in important cases, to impose the death penalty without trial. It actively persecuted the Ukrainian national movement.

In Western Ukraine under Austrian rule, police were subordinated to the Ministry of Internal Affairs. In Galicia and Bukovyna the highest local police authority was the viceroy. In Lviv and Chernivtsi there existed police commissions, to which the commissions in smaller towns were subordinated. A gendarmery organized along military principles served as a security service. The gendarmery, especially in the Hungarian parts of the Austro-Hungarian Empire, actively persecuted the Ukrainian national movement.

After the Revolution of 1917 the police, gendarmery, and *Okhrana* were abolished and replaced with a militia (*militsiia*). Police functions were performed by municipal and rural county militias under the Central Rada and the UNR Directory, and by the **National Guard* under the Hetman government. In 1917–18, units of **Free Cossacks* also patrolled villages and protected them from attacks by bands. In 1919 a battalion for the Protection of the Republican Order also performed policing duties, and in 1920 the UNR organized a gendarmery in the territories it controlled.

In the Western Ukrainian National Republic (ZUNR) the police was organized on the Austrian model. The main police force was the State Gendarmery Corps, whose structure underwent several reorganizations during 1918–19. In 1919 the corps had 23 units, staffed by 31 senior officers, 1,000 professional gendarmes, 400 trainees, and 3,000 militiamen. In July 1919, after the ZUNR forces and government were forced to retreat into central Ukraine, the corps was renamed the People's Guard. Its eight units served as a state security service and as an auxiliary force of the Ukrainian Galician Army (see also **Field gendarmery*).

In interwar Western Ukraine under Polish rule, the state police was under the jurisdiction of the Ministry of Internal Affairs and was organized along the lines of the Austrian gendarmery. It persecuted most manifestations of Ukrainian national and cultural life. In interwar Transcarpathia under Czechoslovak rule, the police and gendarmery were also organized along Austrian lines. In Bukovyna under Rumanian rule, the rural gendarmery had public security and criminal investigation functions. There was also a political police.

The German police apparatus in Ukraine under the Nazi occupation during the Second World War was complex and all-pervasive. It consisted of the Sipo (*Sicherheitspolizei*), the SS security police; the SD (*Sicherheitsdienst*), the SS security and intelligence service, which controlled the notorious *Einsatzgruppen*; the **Gestapo* (state security police); and the Kripo (criminal police). Those police for-

mations had sweeping powers and carried out mass repression. *Schutzmannschaften* – local militias and auxiliary police units under German supervision – were created in the Reichskommissariat Ukraine; in Galicia they were called the *Ukrainian Auxiliary Police.

In Soviet Ukraine the functions of the tsarist regular police were assumed by the so-called militia, established in Ukraine in February 1919 by the Council of People's Commissars. From 1931 it was controlled by the *GPU, and later, by the *NKVD, *MGB, and *MVD. The militia's main tasks have been criminal investigation and prevention, for which they have had powers to demand identification, to enter buildings, and to arrest; the maintenance of public order; the enforcement of the internal *passport system; licensing the possession of firearms, explosives, and photocopyers; and traffic control, including the administration, licensing, and inspection of motor vehicles. Militia departments have consisted of uniformed police, criminal detectives, a passport section, a state automobile inspection unit, and a prosecuting section, which acts when investigation is not undertaken by the State Procurator's Office or the KGB. The MVD also maintained its own infantry units, which were called upon to quell serious outbreaks of protest or disorder. In 1990 the strength of the MVD infantry in the USSR was increased from 36,000 to 350,000, the additions coming from among soldiers withdrawn from Eastern Europe and Afghanistan. A special transportation unit was subordinated to both the regular militia and the appropriate state transportation organization. The political administration within the militia was the major vehicle of Party control. *Narodni druzhyny*, civilian volunteer detachments that patrolled communities, helped the militia maintain public order and combat drunkenness. In the M. Gorbachev period the militia was criticized for its history of human rights abuses and suppression of legitimate public protest, and calls were made for the disbanding of its political administration. In 1990 the USSR Supreme Soviet considered adopting a new law on the militia, which was to provide the first comprehensive legislative framework for the operation of the police. Although according to Ukraine's 1990 proclamation of sovereignty the militia was to come under the control of the government of Ukraine, it and the MVD remained under the central control of Moscow until the demise of the USSR in late 1991.

The *KGB and its forerunners, the *Cheka, GPU, NKVD, and MGB, were the state security police and the main organizations of Soviet intelligence and espionage. They also commanded special troops for quelling domestic disturbances and guarding borders. The Soviet security or secret police was the primary instrument of totalitarian social control through mass *terror from 1918 until the mid-1950s and of the persecution of internal opposition and the *dissident movement in the post-Stalin period. From 1930 it also ran the notorious network of Soviet *concentration camps. In the late 1980s the KGB initiated a public relations campaign to try to distance itself from its sordid past and to convince the population that it was now a reformed organization operating within the law. With the rise of the democratic and national movement in the USSR, however, calls for the abolition of the KGB were increasingly heard, and it was outlawed together with the Party in 1991. It was not liquidated, but transformed into the National Security Service (Sluzhba Natsionalnoi Bezpeky, or SNB).

I. Kozak, B. Krawchenko

Polikarp. An early 13th-century writer and monk at the Kievan Cave Monastery. His writings about various Kievan monks constituted the basis of the *Kievan Cave Patericon.

Polikarpov, Gennadii, b 16 August 1929 in Bolshaia Glushitsa, Samara oblast, Russia. Hydrobiologist; full member of the AN URSS (now ANU) since 1990. A graduate of Saratov University (1952), he worked at the ANU Institute of the Biology of Southern Seas (from 1956, as department head from 1963) and the International Laboratory of Marine Radioactivity in Monaco (1975–9). His 1964 monograph was published in English as *Radioecology of Aquatic Organisms* (1966).

Polinska, Vira [Polins'ka], b 13 October 1913 in Irkutsk, Siberia. Stage actress. She completed study at the Kiev Theater Institute (1936) and then worked in the Zaporizhia Ukrainian Drama Theater (from 1944 the Lviv Ukrainian Drama Theater). Her repertoire has varied from world classics to contemporary Ukrainian plays.

Polish Autocephalous Orthodox church (PAOC). Following the Peace Treaty of Riga (1921), some 4 million Orthodox believers, including about 2.5 million Ukrainians, found themselves in the newly established Polish state. They lived primarily in Belarusian and Ukrainian (Volhynia, the Polisia and Kholm regions) territories that had been part of the Russian Empire and where the only church permitted had been the Russian Orthodox church. In January 1922 the Polish government issued an order recognizing the Orthodox church and placing it under the authority of the state. At the same time a Ukrainian, Yu. *Yaroshevsky, was appointed metropolitan and exarch by the patriarch of Moscow. When Yaroshevsky began to reject the authority of the Moscow patriarch, he was assassinated by a Russian monk. Nonetheless, his successor, D. *Valedinsky, continued to work for the *autocephaly of the Polish Orthodox church, which was finally granted by the patriarch of Constantinople in his *Tomos* of 1924.

From that time the PAOC was independent of the canonical authority of the Moscow patriarch and claimed the right to administer its internal affairs. The church was divided into five eparchies – Warsaw-Kholm, Polisia, Volhynia, Hrodna, and Vilnius – and the Council of Bishops (Synod) became the highest authority in the church. Ad-

ministrative affairs were the responsibility of the Holy Synod, headed by the metropolitan. In practice, however, the church was controlled by the Polish Ministry of Confessions and Education. The authorities did not permit the convening of a sobor, and instead promulgated two decrees in 1938 – the Internal Statutes of the POAC and the Presidential Decree on the Relations of the State to the Polish Orthodox Church – which defined the nature of the church and its organization. The government reserved the right to review all ecclesiastical appointments (ensuring that two Poles were consecrated as bishops) and insisted on the introduction of Polish as the official language of the church. The government also destroyed Ukrainian churches in the Kholm region and supported efforts by the Roman Catholic church forcibly to convert Orthodox believers. At the same time the PAOC was influenced by Russophile elements in the leadership, who sought to Russify church life despite the preponderance of Ukrainian and Belarusian believers.

These obstacles notwithstanding, some aspects of Ukrainian Orthodoxy thrived in the PAOC. The vernacular was used for sermons and the Ukrainian pronunciation of Church Slavonic for services in Ukrainian regions, and two Ukrainian hierarchs were consecrated (P. *Sikorsky and O. *Hromadsky). Moreover, Ukrainian scholars (O. Lototsky, V. Bidnov, D. Doroshenko, I. Ohienko) taught at the Faculty of Theology at Warsaw University, several Ukrainian religious journals were published (*Tserkva i narid*, *Dukhovnyi stiach*, *Za sobornist'*, and *Shliakh*), and groups such as the *Mohyla Society researched and popularized the Ukrainian Orthodox rite.

During the Second World War, bishops of the PAOC played an important role in the re-establishment of the *Ukrainian Autocephalous Orthodox church (UAOC). Metropolitan Valedinsky sanctioned the organization of the church and appointed Bishop Sikorsky as the UAOC administrator in the *Reichskommissariat Ukraine. At the same time he consecrated I. Ohienko and P. Vydybida-Rudenko as bishops for Ukrainian territories (the Kholm and Lemko regions) in the *Generalgouvernement. Under their leadership new statutes stressing the Ukrainian character of the church were adopted, and much was done to introduce Ukrainian religious practices. At the end of the war all the Ukrainian hierarchs and most prominent clergy and lay leaders of the church fled to the West. Valedinsky was removed from his post in 1945 under Soviet pressure and replaced in 1951 by M. Oksiiuk of the Russian Orthodox church. In 1948 the Moscow patriarch annulled the 1924 *Tomos* of the patriarch of Constantinople granting autocephaly and replaced it with his own grant reasserting Moscow's control over the PAOC.

Today the PAOC unites about 500,000 faithful, primarily Ukrainians and Belarusians, as well as a small number of Russians, Poles, and others. Nearly 70 percent of them live in Białystok voivodeship, and slightly under 10 percent reside in other voivodeships (ie, in territories that were part of interwar Poland). Others live in the western and northern voivodeships to which they were forcibly moved from the Kholm, Podlachia, and Lemko regions after the war. Most Orthodox Ukrainians live in northern Podlachia in Białystok voivodeship (where they are often considered Belarusian); others are dispersed throughout Poland (communities are found in the Biała Podlaska, Kholm, Krosno, Nowy Sącz, Olsztyn, Suwałki, and Zamość voivodeships).

The metropoly, with its see in Warsaw, has been successively headed by M. Oksiiuk, T. Szreter, S. Rudyk, and (since 1970) V. Doroshkevych. Its highest authority is the Synod of Bishops, which consists of the metropolitan and all active bishops. The metropoly is divided into six eparchies: Warsaw-Bielsk (the archeparchy headed by the metropolitan, with 98 parishes), Lublin-Kholm (carved in 1988 out of the Warsaw-Bielsk archeparchy, with its see in Lublin), Białystok-Gdańsk (47 parishes), Łódź-Poznań (15 parishes), Wrocław-Szczecin (45 parishes), and Peremyshl-Nowy Sącz (17 parishes, est 1983 with its seat in Sianik). In total, the PAOC has some 250 parishes, 350 churches, and 300 priests, most of whom are graduates of the theological seminaries in Warsaw and Jabłeczna or the Orthodox section of the Christian Theological Academy in Warsaw. The PAOC has two monasteries for men, the *Yablochyn St Onuphrius's Monastery (Biała Podlaska voivodeship) and the Suprasl St Mary's Monastery (Białystok voivodeship), and one monastery for women, SS Martha and Mary (Białyskok voivodeship).

The church leadership is often hostile toward Ukrainian or Belarusian national causes, and as recently as 1990 Metropolitan Doroshkevych denounced the goal of Ukrainian independence. The official language of the church is Polish, but Russian is frequently used in administration (this has led to charges that the PAOC is purposely Russifying or Polonizing its Ukrainian followers). The monthly *Tserkovnyi vestnik* (est 1954) appears in Russian, but the annual *Pravoslavnyi kalendar* has some material in Ukrainian and Belarusian, as well as in the Lemko dialect. In 1961 and 1968–77 P. Domanchuk edited the Ukrainian-language *Tserkovnyi kalendar*, which was revived in 1985 as a publication of the new Peremyshl-Nowy Sącz eparchy.

Liturgies are conducted in Old Church Slavonic with Russian, sometimes Ukrainian or Belarusian, pronunciation. Sermons are usually delivered in Ukrainian or Belarusian. Relations with Polish Catholic chauvinists and the Polish regime are often strained. Many Orthodox churches – unique historical, artistic, and architectural artifacts graced by valuable icons – have been destroyed in areas from which the Orthodox were deported after the war. The regime continues to hinder the PAOC's development and places restrictions on its activity.

Polish Historical Society (Polskie Towarzystwo Historyczne). A scholarly society in Austrian-ruled Galicia, established in 1886 by Polish historians in Lviv. Until 1924 it was called the Historical Society. The society's first presidents – K. Liske (1886–91), T. Wojciechowski (1891–1914), L. Finkel (1914–23), S. Zakrzewski (1923–32, 1934–6), F. Bujak (1932–4, 1936–7), L. Kolankowski (1937–47) – were professors at Lviv University, and until 1939 Lviv was the society's hub and executive seat. Under Austrian rule its membership (mostly Poles in Galicia) grew from 216 to 314 in 1895, but then dropped to 264 in 1905 and 163 in 1906. From 1890, circles were founded in many Galician towns, such as Drohobych, Sniatyn, Ternopil, Buchach,

and Chortkiv, and in Poland, notably in Cracow (est 1902; 124 members in 1914). In interwar Poland and in Ukraine under Polish rule the society adopted a national mandate, and in 1924 it adopted its current name. Its membership grew from 423 in 1923 to 1,329 in 1933. Branches with at least 20 members each were founded in Warsaw (1925), Vilnius (1925), Poznań (1925), Cracow (1925), Lviv (1925), Lublin (1927), Łódź (1927), Peremyshl (1928), Katowice (1929), Kielce (1933), Brest, Hrodna, and, after the Second World War, other Polish cities. Since 1950 the society has been centered in Warsaw. The society has sponsored the second (Lviv, 1890), third (Cracow, 1900), fourth (Poznań, 1925), fifth (Warsaw, 1930), sixth (Vilnius, 1935), and subsequent congresses (every five years since 1948) of Polish historians. Its serials *Kwartalnik Historyczny* (Lviv 1887–39; Cracow 1947–50; Warsaw since 1950) and *Ziemia Czerwienińska* (Lviv 1935–9) contain many studies, reviews, and other materials pertaining to Ukrainian history.

Polish Home Army (Polish: Armija Krajowa [AK]). The main partisan organization in Poland during the Second World War. It emerged as a coalition of anti-German underground groups called the Union of Armed Resistance. In 1941 it became affiliated with the Polish government in London, and eventually it was renamed. The AK carried out extensive intelligence and sabotage operations in Poland. In the spring of 1944 it organized a general military uprising (code name: Burza) against the Germans in advance of the Red Army offensive into Western Ukraine and Poland. When the Red Army arrived, many of the AK leaders were jailed or executed, while rank-and-file members were pressed into pro-Soviet military service. The organization was disbanded in 1945 but resurfaced in 1947 as the Freedom and Independence movement. In spite of their having a common enemy, the Home Army did not collaborate with the Ukrainian resistance forces. Its partisans terrorized Ukrainian villages in the Kholm region and attacked Samoobrona units and UPA forces. AK ambitions to restore Polish rule in Galicia could not but arouse Ukrainian hostility. Relations between the UPA and the reconstituted AK improved after the Soviet occupation of Poland, and several joint Polish-Ukrainian operations were carried out against the Soviets.

Polish Insurrection of 1830–1. An armed Polish revolt against Russian rule which encompassed the Kingdom of Poland, Lithuania, Belarus, and Right-Bank Ukraine. The insurrection broke out in Warsaw on 29 November 1830 (hence it is often called the November Insurrection) and lasted until October 1831. Although the immediate cause of the outbreak was a reaction to reports that Emperor Nicholas I was planning to dispatch Polish troops to fight a rebellion in France, it quickly escalated into an effort to restore a Polish state within its pre-partition borders (inclusive of Right-Bank Ukraine and Galicia).

The insurrection spread to Right-Bank Ukraine in April and May 1831. Leaders of the revolt in Volhynia gubernia included Gen. J. Dwernicki, K. Różycki, and S. Worcell (deputy to the Sejm from Volhynia); B. Kołyszko led 5,000 insurgents in Podilia and Kiev gubernias. The insurgents

were composed almost exclusively of the Polish gentry. They hoped that the Ukrainian population would support them, but both the Orthodox clergy and the Ukrainian peasantry were indifferent or hostile to the revolt. The lack of popular support sealed the fate of the insurrection in the Right Bank, where it was defeated by tsarist forces in May. Although the insurrection did not spread to Galicia, Poles there helped equip the insurgents, and some Galician Poles fought as volunteers.

In the aftermath of the insurrection's suppression the tsarist authorities took measures to eliminate Polish influence in the Right-Bank region. They confiscated the estates of nobles who had participated in the insurrection, liquidated the Polish educational system, founded 'Russian' institutions (such as Kiev University), and abolished the Uniate church in Belarus and the Right-Bank (1839). The radical Polish gentry responded to the defeat of the insurrection and to the tsarist government's repressive policies by forming conspiratorial groups to prepare a new insurrection. Such groups existed in both the Right Bank and Galicia, where they sometimes developed a pro-Ukrainian character and, in Galicia, even won adherents among Greek Catholic seminarians.

J.-P. Himka

Polish Insurrection of 1863–4. An armed uprising against Russian rule that sought independence for Poland and social reforms. It began in Warsaw in January 1863 and was centered in the Congress Kingdom of Poland and Lithuania, with relatively minor activity in Right-Bank Ukraine beginning in early May. Poles living in Austrian-ruled Galicia and Prussia supported the revolt, organized volunteer detachments, and gave financial aid to the insurgents. Despite some successes the Poles were never able to form a regular army; their military activities were largely uncoordinated, and the insurgents generally fought in small, partisan detachments. By mid-1864 the rebellion had died out, although some military engagements continued into 1865.

Support for the uprising was strong among Poles in Right-Bank Ukraine, who were largely from the nobility. But appeals to Polish patriotism could not sway the largely peasant Ukrainian population to join the revolt. In an attempt to gain Ukrainian support the Polish provisional government issued two proclamations in Ukrainian shortly after the insurrection began, 'Zolota hramota' and 'Ruskyi narode!' In them the provisional government made some national and cultural concessions and promised more favorable emancipation terms to the peasantry than the tsarist government had offered. The attempts were on the whole unsuccessful: most peasants continued to associate the Poles with the lords and the system of serfdom. The Ukrainian intelligentsia largely refused to cooperate, for it could not accept the program to re-establish the borders of the old Polish Commonwealth. Already on the eve of the insurrection a small group of young, largely Kiev University students (known as **khlopomany*), many of whom were Polonized descendants of the old Ukrainian nobility, had split from the Polish secret societies of Kiev (which were in favor of the insurrection) to join the Ukrainian national movement. All the same a small num-

ber of Ukrainian peasants and intellectuals supported the rebellion.

The repercussions of the insurrection and its failure were immense. Russian chauvinists, led by M. Katkov, took advantage of the tense circumstances to frighten the government and to discredit liberals and radicals, who were largely sympathetic, at least initially, to Polish claims for more autonomy. Peasant disturbances and the rise in discontent among the radical intelligentsia further frightened the regime. Those factors served to strengthen conservative, chauvinistic, and reactionary tendencies in Russian government and society. They also hastened the decline of Polish influence in the Right Bank and, consequently, of the ties of that region to ethnic Poland. During and following the insurrection the regime determined to extend the practice it had begun after the failed insurrection of 1830–1 of weakening Polish influence in the Right Bank and to Russify the region thoroughly.

The insurrection had repercussions on the nascent Ukrainian national movement. Despite its general antipathy toward the Poles the Ukrainian movement was called a 'Polish intrigue' and labeled 'separatist,' and some Ukrainian activists were accused of fomenting discontent among the peasantry. Those sorts of charges contributed to the issuing of the Valuev circular of 1863, which forbade publication of popular religious and educational texts in Ukrainian, and the repression of individual Ukrainian activists. The Uniate church, which had been banned in Right-Bank Ukraine following the 1830–1 Polish insurrection, was abolished in the Kholm and Podlachia regions in 1875 after an extended period of persecutions that began in the aftermath of the insurrection.

B. Klid

Polish Liquidation Commission (Polska Komisja Likwidacyjna, or PKL). A Polish provisional government established in Cracow on 28 October 1918 on the initiative of Polish deputies to the Austrian national parliament in Vienna. The commission created a civil administration, security forces, and an army; it claimed to be the supreme authority over all historical Polish lands in the Austrian realm, but in reality it governed only western Galicia. The socialists in the commission tried to achieve a compromise with the Ukrainians regarding power-sharing, and on 1 November 1918 a local Polish-Ukrainian agreement was signed in Peremyshl. As a result of the outbreak of armed combat, it was never realized.

The majority of the commission members treated Eastern Galicia as part of the Polish state and demanded that the government in Warsaw provide intensive armed aid for Poles there. After the departure of the Ukrainian forces from Lviv the city was ruled by the Temporary Governing Committee (Tymczasowy Komitet Rządzący, or TKR), from 23 November 1918. The committee annulled all the Ukrainian acts and embarked upon repressions of the members of the *Ukrainian National Rada who stayed behind in Lviv. On 10 January the PKL and TKR merged into the Governing Commission for Galicia, Cieszyn Silesia,

Orava, and Spiš (48 members). The Warsaw government treated it as an autonomous organ which had partial legislative competence. As eastern Galicia was taken over by Polish forces, the commission organized the administration but had no power regarding foreign policy and military matters. On 26 March 1919 the commission was dissolved, and its functions were taken over by the general delegate of the government in Galicia (K. Gałęcki).

A. Chojnowski

Polish language in Ukraine. The influence of Ukrainian on the development of standard Polish came from Poles who settled in Ukraine from the 14th century on and from Polonized Ukrainians. This process, which began with the medieval linguistic contacts of Galicia with Little Poland and of Volhynia and Podlachia with Mazovia, intensified after the 1596 Union of *Lublin, when the influence of the Polish nobility and burghers in Ukraine began to rise. The Polonized Ukrainian nobles and magnates introduced into their speech phonetical, lexical, and grammatical Ukrainianisms. Consequently, literary Polish differs from all Polish dialects in phonology (eg, the disappearance of the phoneme $\hat{a} < \bar{a}$ in the 17th century) or from most of them (eg, the absence of *mazurzenie*, and attempts until the 1930s to eliminate the 'vulgar' pronunciation of \bar{l} as u and certain stresses). During the period of greatest Ukrainian (and Belarusian) linguistic influences (16th–19th centuries), Ukrainian grammatical features that were limited to particular times and authors or that have endured (the nominal endings *-ów* and *-am*, the pluperfect, the object in the accusative case after a negative predicate, the patronymic suffixes *-owicz* and *-ewicz*, and truncated verbal forms, eg, *depczę* 'I trample'), as well as lexical borrowings and semantic equivalents, were absorbed into the Polish language.

The language of the Poles living in Ukraine in the 19th and 20th centuries (excluding the Ukrainian dialects of the so-called **latynnyky*) can be divided into three distinct sociolinguistic layers. (1) The educated Polish nobility, clergy, *intelligentsia, and civil servants developed a characteristic pronunciation. The vowel \bar{a} became denasalized (eg, *chódzo* instead of *chodzą* 'they walk'). Differentiation of the consonants $h:x$ occurred, and l' was used instead of l . Typical pronunciations were *svuj* instead of *sfuj* for *swój* 'one's own', *nog'e* for *nogę* 'leg' accusative singular, *xl'ip* for *chleb* 'bread', *ml'iko* for *mleko* 'milk', and, in Right-Bank Ukraine, *kreu* instead of *kref* for *krew* 'blood', *rżyka* for *rzeka* 'river', and *mogłem* for *mugem/mukem* 'I could'. Many lexical Ukrainianisms and common Ukrainian-Polish lexemes were used. (2) The lower urban strata developed a similar pronunciation, as well as many slang words. Particularly in Lviv, the typical pronunciation of unstressed o, e was $u, y/i$, and of stressed $o-\bar{u}o$ (light diphthongization), as in adjacent Ukrainian dialects. (3) Polish peasants who settled in Galicia and Podilia also developed their own speech. Only the dialects spoken around Komarne (15th–16th centuries) and Zaliztsi (17th century) in Galicia have been systematically studied. As a result of centuries-old bilingualism the dialects absorbed Ukrainian features in their phonetics (eg, the absence of *mazurzenie* – the Mazovian dialectal substitution of dentals for postdentals [$\check{c}, \check{z}, \check{s} > c, z, s$], the hardening of soft labials, prothetic sounds before initial vowels, the change $\bar{o} > y$ [eg, *vyn* instead of *on* 'he']), morphology (eg, types of end-

ings in nominal declension, *-mo/-mu* ending of 1st per pl verbs [eg, *musimo* instead of *musimy* (cf Ukrainian *musymo* 'we must'), and syntax (eg, the absence of special endings indicating male persons in the nom case of pl adjectives and in verbs). The Polish peasant dialects of Podlachia and the Kholm region developed out of the Polonization of originally Ukrainian villages (see *Podlachian dialects).

Many Polish writers who were born or lived in Ukraine phonetically assimilated Ukrainian words and phrases in their writings (eg, M. Rej, S. Orzechowski, S. Szymonowicz, J. Zimorowicz, S. Trembecki, H. Rzewuski, J. Słowacki, J. Zaleski, A. Malczewski, S. Goszczyński, J. Korzeniowski, M. Grabowski, M. Czajkowski, Z. Miłkowski, J. Kraszewski, A. Fredro, W. Łoziński, J. Lam, K. Ujejski, J. Parandowski, and J. Iwaszkiewicz). Others (eg, W. Potocki, H. Sienkiewicz) used Ukrainianisms for local color in their works on Ukrainian-Polish themes. (See also *Poles in Ukraine.)

Polish law. From the 15th century to the partitions of Poland, and in the interwar period of the 20th century, Ukrainian territories under Polish rule were governed by Polish law. The law was introduced in the 1430s in Rus' and Podilia voivodeships and parts of Bratslav voivodeship, and from 1501 in the Kholm region. It was used along with older laws, such as *Rus', Armenian, *Wallachian, and *Germanic law. The Jewish community, meanwhile, had its own system. The sources for Polish law were primarily customary law and, later, written statutes. There were many attempts to codify the law, but the first comprehensive effort was made by Casimir III the Great. His Wislica Statute of 1347 was translated partly into Ukrainian and was used mostly in Western Ukraine. A second, superior code, called the Łaski Statute, was ratified by the Sejm in 1506. In 1522 the Sejm decided to have all customary laws codified, but this project was later reduced to codifying only private, criminal, and procedural law. A special commission prepared the so-called *Correctura Irium*, but the Sejm rejected it (1534). The Constitution of 1791 reformed political law and provided for the publication of a new legal code, but this was not carried out be-

cause of the partitioning of Poland. Thus, Poland had been governed only by statutes and, apart from procedural law, lacked any legal codes. Various territories had their own provincial statutes, which they defended jealously.

The fundamental characteristics of Polish law were reliance on custom, unevenness, particularism, and insufficient codification. The guiding legislative principle was the protection of the privileges of the nobility and the interests of the state and the church; the Catholic hierarchy was particularly influential. Until the 16th century the legal system was distinctively Polish, with few borrowings from foreign sources. Then, many elements of Roman law were adopted. It was only at the end of the 18th century that some modern ideas from Western Europe were imported into Polish law.

After the partitions of Poland, Polish law was replaced by Austrian and Prussian law, the Napoleonic Code in the Kingdom of Poland, and the *Lithuanian Statute, which was more sophisticated than any of the Polish projects. The statute remained in force in Right-Bank Ukraine until 1840, when it was replaced by Russian law.

During the Polish occupation of Western Ukraine in 1919-39, the former Austrian and Russian laws were gradually replaced by new Polish laws: the constitutions of 1921 and 1935, the law on the justice system (1928), the law on criminal and civil procedure (1930), a criminal code (1932), and part of a civil code (1933). The development of the Polish law in this period was marked by an increasing tendency toward authoritarianism. Compared with the liberal Constitution of 1921, the Constitution of 1935 was restrictive: it limited the rights of civil society, abolished juries in criminal trials, and introduced emergency courts (1932) and concentration camps (1934).

Polish Second Corps. An Allied military formation during the Second World War. It comprised approx 45,000 Polish nationals, including some 2,000 Ukrainians who had been interned in Soviet prisons or labor camps following the 1939 partition of Poland. The Soviet government agreed to set up this force during negotiations with the London-based Polish government-in-exile in August 1941. Gen W. *Anders was chosen as commander. After many delays and prolonged political wrangling, the corps was assigned, finally, to the British army and in 1942 sent to northern Iran. By the end of 1943 it had joined the British forces in the Italian campaign, and it distinguished itself in the Battle of Monte Cassino (11-12 May 1944). Many of its veterans later emigrated to the West.

Polishchuk, Klym [Poliščuk] (pseud: Volyniak, K. Lavrynovych, Ivan Mecheslavenko, O. Cherednychenko, and others), b 25 November 1891 in Krasnopil, Zhytomyr county, Volhynia gubernia, d 1937? Writer. He studied at the St Petersburg Academy of Arts (1909-12) and then worked for the Volhynia gubernia zemstvo. During the Revolution of 1917 he worked as an editor of *Ukrains'kyi holos* and *Narodna volia* and as a member of the editorial boards of *Narodna sprava*, *Mystetstvo*, and other periodicals. In 1919 he joined the symbolist group *Muzahet. In 1920 he moved to Galicia, where most of his works were published. He returned to Kiev in 1925. Polishchuk was arrested in 1935 and imprisoned in the Solovets Islands in the White Sea; he was last heard from in 1937. He began writing poetry early in his life, and his first poems ap-

Klym Polishchuk

Valerian Polishchuk

peared without his knowledge in the paper *Volyn'*. He published his first story in 1909. In 1913 he published a collection of Ukrainian songs. Most of his stories and his three novels are about the revolutionary years in Ukraine. Polishchuk was a prolific writer, with numerous collections of short stories, such as *Daleki zori* (Distant Stars, 1914), *Sered mohyl i ruin* (Among Graves and Ruins, 1918), *Tini mynuloho: Volyn's'ki legendy* (Shadows of the Past: Volhynian Legends, 1919), *Vesele v sumnomu* (The Joyful in the Sad, 1921), *Zhmenia zemli: Halyts'ki legendy* (A Handful of Earth: Galician Legends, 1921), *Zoloti zerniatka* (Golden Kernels, 1921), *Skarby vikiv: Ukrain's'ki legendy* (Treasures of the Ages: Ukrainian Legends, 1921), *Anhel's'kyi lyst* (The Angel's Letter, 1923), and *Zhertva* (The Sacrifice, 1923). He also wrote the novels *Otaman Zelenyi* (1922), *Svit chervonyi* (The Red World, 1923), and *Huliaipil's'kyi 'bat'-ko'* (The Huliai Pole 'Father,' 2 vols, 1925); the poetry collections *Spivv v poliakh* (Singing in the Fields, 1917), *Poezii* (Poems, 1919), and *Zvukolirnist'* (Sound-Lyricalness, 1921); the drama *Trivozhni [sic] dni* (Turbulent Days, 1924); and memoirs about literary life in Kiev in 1919, *Z vyru revoliutsii* (From the Vortex of the Revolution, 1925).

R. Senkus

Polishchuk, Petro [Poliščuk], b 23 December 1913 in Nosivtsi, Ternopil county, Galicia, d 17 June 1987 in Zürich. Educator and Jungian psychoanalyst. From 1933 he studied law at Lviv University and helped edit *Iuni druzi*. In 1937 he worked in Tsentrobank. During the first Soviet occupation of Western Ukraine he was in charge of the youth section of the Ukrainian Central Committee in Cracow. Following his arrest by the Gestapo in 1941, the rest of his war years were spent in concentration camps. After the war he worked for the Ukrainian Medical-Charitable Service in Munich (1945), the Ukrainian Relief Committee in Rome (1945–8), and the Shevchenko Scientific Society in France. He also served as general secretary of the Union of Ukrainian Workers in France. Upon graduating from the Jung Institute in Zürich (1967) he practiced psychotherapy and lectured at that institution.

Polishchuk, Valerian [Poliščuk, Valerijan] (pseud: Vasyl Sontsetsvit, Mykyta Volokyta), b 1 October 1897 in Bilche, Dubno county, Volhynia gubernia, d 11 November 1937 on Solovets Islands. Writer and literary critic and theorist. His first published work appeared in 1918. In 1923

he joined Hart and in 1925 in Kharkiv he founded the organization *Avanhard, which advanced a program of constructivist dynamism (or spiralism) and relied heavily on Russian (I. Selvinsky), Western European (E. Wergarn), and American (W. Whitman) avant-garde literature. Polishchuk aimed to sing the praises of modern civilization and its technological revolution. He wrote poetry, prose, and children's literature. Initially he wrote historical fiction, such as *Skazannia davniece pro te, iak Ol'ha Korosten' spalyla* (An Ancient Account of How Olha Burned *Korosten, 1919), but then he began to praise the Bolshevik regime and the world communist revolution. His communism is most evident in pieces such as *Lenin* (1922), *Duma pro Barmashykhku* (A Duma about a Barmash Woman, 1922), *Zhmutok chervonoho* (A Shred of Red, 1924), *Evropa na vul'kani* (Europe on a Volcano, 1925), *Metalevyi tembr* (The Metal Timbre, 1928), and *Elektrychni zahravy* (Electric Dawns, 1929). In his theoretical writings he conceived of the idea of *khvylady*, or 'wave cycles,' a form of free verse used in his works. Polishchuk was arrested in the 1930s, and died in a prison camp. He was posthumously rehabilitated, in the late 1950s. Editions of his selected works were published in 1960 and 1987.

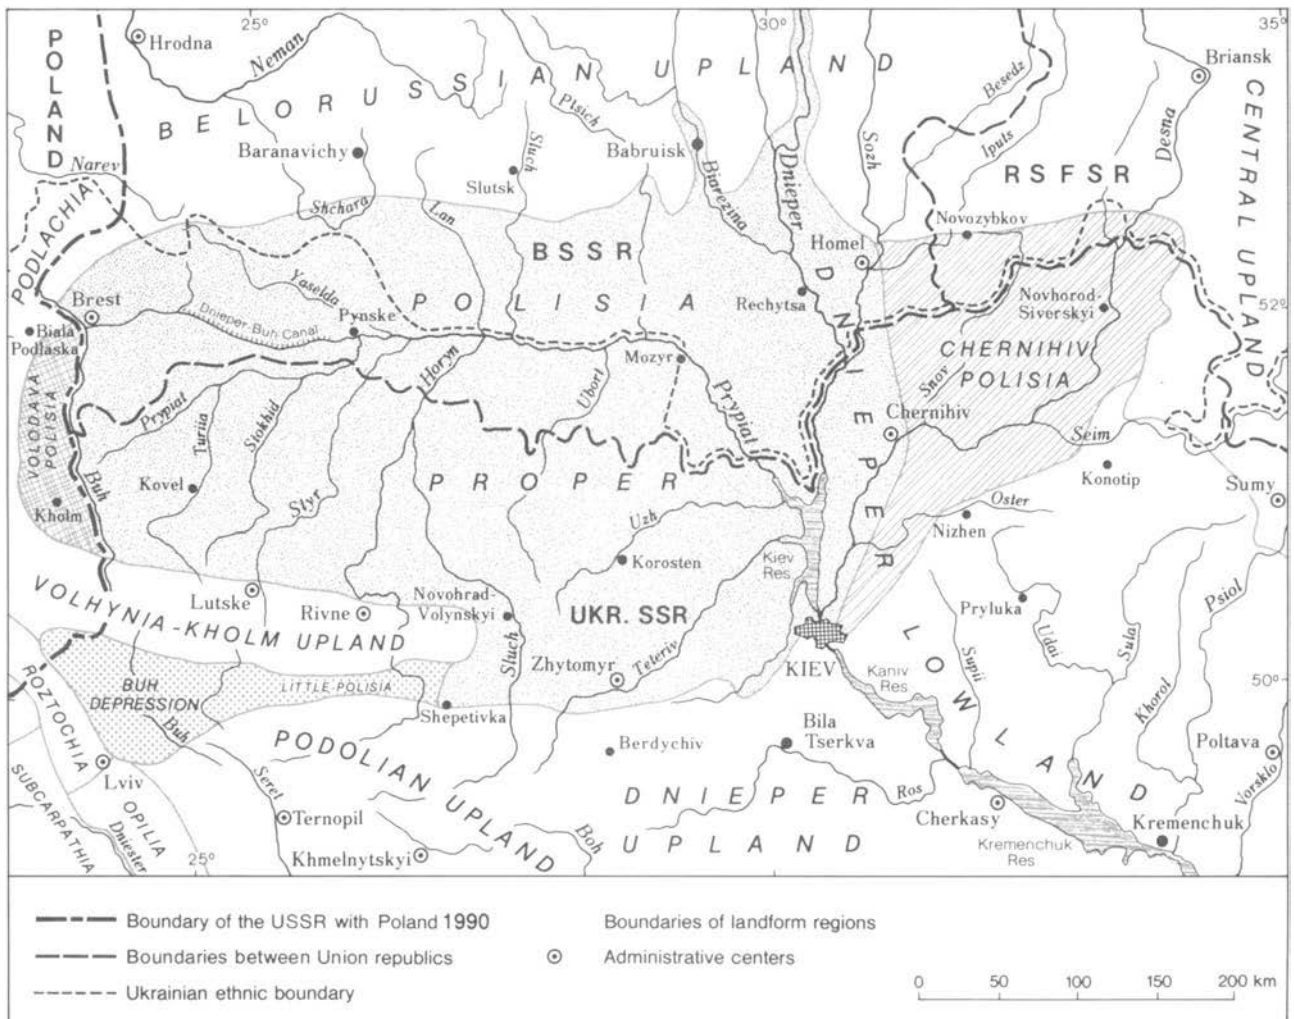

I. Koshelivets

Polishchuk, Vasyl [Poliščuk, Vasyl'], b 25 May 1918 in Mikhailovskoe, now in Novosibirsk oblast, Russia, d 19 July 1979 in Uzhhorod. Writer and journalist. He graduated from the Communist Institute of Journalism in Kharkiv (1940) and the Higher Party School of the Central Committee of the CPSU in Moscow (1955). He worked on the editorial board of the oblast newspapers *Chervone Zapozhzhia* and *Radians'ke Zakarpattia* and was a correspondent for *Pravda Ukrainy*, covering Transcarpathia. He published prose, including *Dzoveniat' strumochky* (The Bubbling Brooks, 1958), *Zustrinemos' na Menchuli* (We Will Meet on the Menchul, 1959), *Entuziiasty* (The Enthusiasts, 1964), *Kazky karpats' koho lisu* (Tales of the Carpathian Forest, 1968), and *Lisova povist'* (The Forest Story, 1971).

Polishchuk, Vitalii [Poliščuk, Vitalij], b 6 April 1931 in Kiev. Metallurgist. He graduated from the Kiev Polytechnical Institute (1954) and has worked at the AN URSR (now ANU) Institute for Problems of Casting (since 1958). He specializes in the area of metal casting, and his main contributions are in applications of magnetohydrodynamics to the casting process.

Polisia (Polish: Polesie). A physical-geographical region of lowlands and mixed forests lying between the Belarusian Upland to the north, the Volhynia-Kholm Upland and the Dnieper Upland to the south, the Buh River and Podlachia to the west, and the Dnieper Lowland to the east. Polisia is a large, flat lowland covered with glacial, fluvioglacial, and alluvial deposits. Low river gradients and shallow groundwater levels account for extensive marshes. Large areas are occupied by sands. The entire region is well forested.

Boundaries. Under the broad definition Polisia covers a territory of over 200,000 sq km. Under the narrow definition, which excludes Chernihiv Polisia, Little Polisia, and Volodava Polisia, Polisia proper occupies about 160,000 sq km (see map). Unlike its northern boundary, Polisia's southern boundary is sharply defined. It extends from Kholm in the west through Volodymyr-Volynskyi,

POLISIA

Lutske, Rivne, and Korets. East of Korets the southern boundary shifts southward to Shepetivka and then continues through Zhytomyr to Kiev. On the left bank of the Dnieper the southern boundary of Chernihiv Polisia runs through Nizhen, Komarivka, Baturyn, Krolevets, and Hlukhiv but is not as sharply defined.

The Ukrainian-Belarusian ethnic border crosses Polisia from west to east approx along the line Pruzhany–Bereza Kartuzka–Vyhonivske Lake, down the Bobryk and along the Prypiat to Mozyr, south to the Slovechna River and east along the Ukrainian-Belarusian border to the Dnieper, and then north along the Dnieper. In the west the political-administrative border between Ukraine and Belarus does not correspond to the ethnic border, because the Soviet regime ceded the northwestern portion of Ukrainian ethnic territory (approx 27,000 sq km) to the Belorussian SSR.

Today Ukrainian Polisia is defined as Ukraine's forest belt (including Little Polisia and Chernihiv Polisia), which covers approx 100,000 sq km. Ukrainian Polisia encompasses most of Volhynia and Rivne oblasts, about two-thirds of Zhytomyr oblast, the northern third of Kiev oblast, and the Ukrainian-settled parts of Brest oblast (over one-half) and Homel oblast (about one-sixth) in Belarus.

Geology and geomorphology. The oldest geostructural region of Polisia is the northwestern part of the Ukrainian Crystalline Shield, which is most prominent in Zhytomyr oblast. The region consists of Precambrian rocks, whereas the adjacent Ovruch Ridge is built mostly of quartzites and Proterozoic pyrophyllitic schists. The Precambrian foundation supports thin deposits from the Cretaceous and Paleocene periods here and there and a thin Quarternary overburden almost everywhere. The northwestern part of Polisia consists of the Brest Depression, which is filled to some 2,500 m with old Paleozoic, Jurassic, Cretaceous, and Tertiary sedimentaries, covered with a layer of Quarternary deposits. It is separated from the Prypiat Trough by the Polisia Arch, built on Precambrian and Devonian deposits. The arch runs northward toward the Belarussian Anticline and comes to the surface at several points. In earlier geological periods it separated two large troughs, the North Ukrainian from the Mazovian.

Continental glaciers, which twice covered parts of Polisia, left stretches of ground and terminal moraines with erratics (boulders), thus smoothing out the preceding stream-eroded relief. Meltwaters carrying large quantities of sand and silt were joined by renewed small rivers that

flowed to the north. The Styr-Slovechna spillway was formed along the edge of the glacier and carried the meltwaters to the Dnieper River. As the glacier receded to the Mozyr stage, the Prypiat River resumed its function and took up the waters of the Buh River, which was still blocked by the ice sheet to the northwest. Thus, the wide Old Buh–Prypiat spillway was formed. Glacial meltwaters and river waters washed away the moraines, which now occupy only small areas, and formed large lakes, because the flow of the Prypiat River was impaired by terminal moraines and the Ukrainian Crystalline Shield. The subsidence of Polisia's axis also led to widespread ponding. After the Prypiat broke through the terminal moraines between Mozyr and Yurevychi, the Polisian lakes were partially drained, and turned mostly into swamps. But the Prypiat lacked the power to remove the sands and alluviums that filled its valley, for the Buh River was captured by the Vistula, the base level of erosion of which, with the emergence of the Baltic Sea, was lower than that of the Dnieper. Consequently, large areas of Polisia, both valleys and interfluvial lowlands, remained covered with marshes and sands. The fluctuation of glacial and interglacial periods, the epeirogenic movements, such as the subsidence of Polisia's axis and the isostatic recovery and rise of its southern rim, and the alternation of erosion and accumulation resulted in the appearance of terraces in the river valleys. There are also small pockets of loess which belong to the Quaternary deposits.

Generally Polisia is a uniform lowland plain, broken here and there by a few higher elevations, hills, or ridges of glacial, fluvioglacial, eolian, or denudational origin and by valleys.

The axial part of Polisia is the broad, low floodplain that extends along both sides of the Prypiat River and its tributaries. Its relief does not exceed 5 m, and its width varies from 5 to 35 km. Flooded by meltwaters each spring, the bottomlands consist of thick layers of alluvial deposits, mud, sand, and peat. The river terraces are low there, rising to 7 m above the bottomlands, but to the south their relief increases to 15 m or more. The alluvial-outwash deposits in Little Polisia between Shepetivka and Zhytomyr and along the lower Teteriv River, and the outwash plain along the Ubort River, are related to those alluvial-accumulation lowlands.

A Polisia landscape

The southern, elevated part of Polisia, as well as Kiev Polisia, is less swampy. The swamps alternate with dry land, and the valleys are lightly incised. Those denudational plains are covered with a thin layer of outwash sands. In the southwest the relief of Volhynian Polisia is broken occasionally by chalk ridges. To the northeast the lowland is disrupted here and there by long and narrow ridges up to 60 m above the plain, including the Ovruch and Ozeriany ridges.

Another kind of elevation consists of hills of terminal moraines. The best example of the formation is the Volhynian moraine ridge, which extends from the west through Liuboml, Kovel, Dubrovytsia, and Stolyn to the northeast. Small moraines occur on the Mozyr and Chornobyl 'islands.'

Large areas of Polisia are covered with sand dunes, wind-blown sands, and blowouts. In some places the sand dunes form chains or entire dune fields. On wide sandy plains and floodplains the sand dunes stand out as the highest points of relief and are called mountains by the local inhabitants. They were formed at the end of the Pleistocene Epoch, when large quantities of sand accumulated in front of the terminal moraines under conditions of a dry climate and prevailing easterly winds. Many of them were later partially covered by marshes and peat bogs. Sand dunes influence not only the landscape but also the river network and the way of life of the people. Lowland rivers can penetrate dune fields only with great difficulty. Because they are rarely flooded, dunes have long served as sites for settlement and roads. In more recent times the dunes were cleared for plowland and were quickly turned into a sandy wasteland by the wind.

Climate. Polisia has a temperate continental climate with a warm and humid summer and a mild, cloudy winter. The Atlantic air mass dominates during the winter, and a modified continental air mass prevails in the summer. Continentality increases from west to east. The average annual temperature varies from 6.5°C to 7.5°C; the average January temperature decreases from -4°C in the west to -7°C in the east, and the minimum temperature drops from -32°C to -39°C. Summer temperatures are nearly the same: the average temperature is 18°C in the northwest and 19°C in the southeast. The frost-free period is 170 days in the northeast and 180 days in the southwest. The annual precipitation varies from 600 to 650 mm, although in any year it may vary from 300 to 950 mm. The maximum is obtained in June and July, when heavy rains and even downpours are frequent. The snow cover lasts from 90 to 100 days, and its depth varies from 15 cm in the west to 30 cm in the east. Fogs occur often - 60 to 70 days per year, mostly from October to January.

Water resources. Polisia is well supplied with water. It has a dense network of rivers, lakes, and marshes and large reserves of groundwater. Nearly all of Polisia lies within the Dnieper drainage basin. Only a small western segment is drained by the Buh, which flows into the Vistula. The main artery of Polisia is the Prypiat River. Its system is asymmetric: the northern tributaries (the Pyna, the Yaselda, the Lan, the Sluch, and the Ptsich) are short and small in volume, whereas the southern tributaries (the Turiiia, the Stokhid, the Styr, the Horyn, the Stvyha, the Ubort, the Slovechna, the Zholon, and the Uzh) are mostly long and voluminous. The Teteriv and the Irpin are direct tributaries of the Dnieper. Polisia is rich in groundwater,

which is found at various levels according to the geological structure. Quarternary deposits contain shallow groundwater. The best potable water in Kiev Polisia is obtained from Paleocene deposits, and in Volhynia, from Cretaceous deposits.

Polisia, especially its western part, contains more lakes (nearly 550) and ponds (nearly 1,000) than any other region of Ukraine. The largest lake in Polisia, Chervone (area, 38.5 sq km; maximum depth, 9 m), formerly known as Kniazhe and Zhyd, belongs to Belarus. In Ukrainian Polisia the largest lakes are Svytiaz (area, 27.5 sq km; maximum depth, 58 m) and Vyhonivske (area, 26.5 sq km; depth, 2.7 m). About one-third of Polisia is covered with bogs and marshes. The flat terrain, the shallow depth of the groundwater, and the low gradient of the rivers account for the poor drainage. The marshes are concentrated along the Prypiat and the Horyn rivers.

Soils. Nearly 70 percent of Polisia is covered with podzolic soils. Their natural fertility is low and proportional to their clay content. The least fertile sandy podzols are most common, the more fertile sandy loams cover the interfluves, and the most fertile loams cover small areas in Volhynian and Zhytomyr Polisia. Muck and bog soils occupy 15 percent of Polisia, mostly river valleys and depressions. With melioration they become the most fertile soils in Polisia. The most fertile natural soils are the rendzina soils, which occur on the chalk and marl deposits of Volhynian Polisia, the gray forest soils, which form 'islands' in the loessial loam deposits near Ovruch, Zhytomyr, Novohrad-Volynskyi, and Mozyr, and tiny areas of degraded chernozems on the border between Polisia and the forest-steppe.

Vegetation. Polisia belongs to the mixed forest subzone of the East European broad-leaved forest zone. In the past the whole of Polisia was completely covered with forest and marshland. As a result of deforestation, mostly in the second half of the 19th century, and the growth of swamps, forests now occupy scarcely one-third of the land area. Plowland accounts for over one-quarter of the land, and hayfields, pastures, and meadows for about one-fifth. Generally the forests alternate with the marshes. The most widespread tree is the pine (*Pinus silvestris*, 58 percent); it is followed by the oak (*Quercus robur*, 15 percent), birch (*Betula verrucosa*, 12 percent), and black alder (*Alnus glutinosa*). Small areas are occupied by the aspen (*Populus tremula*), hornbeam (*Carpinus betulus*), and rare silver fir (*Abies alba*), only in northern and Volhynian Polisia.

Marshy forest near the Lva River in Polisia

The wetlands vegetation displays pronounced differentiation. The greatest variety occurs on the lowland swamps enriched with mineral salts. The prevalent plants belong to the sedge complex, the hypnum mosses-sedge complex (some with willow and birch brush), and the cereal-sedge-hypnum mosses complex. The vegetation of the upland bogs is considerably poorer: it consists of various kinds of peat (notably sphagnum), scattered dwarf pines, and shrub containing heather, bilberry, and several grasses. A considerable area is occupied by meadows, either floodplains or deforested tracts.

Fauna. Part of the Eurasian forest zone, Polisia contains a richer complex of fauna than the forest-steppe or the steppe of Ukraine. Among the forests of Polisia the richest fauna is found in the mixed forests, which contain the lynx, wolf, forest marten, chamois, fox, squirrel, weasel, ermine, wild boar, and bear and are visited by the elk (*Alces alces*, now very rare) from the marshy forest.

The rivers support the valuable fur-bearing beaver (in the nature preserves), otter, and mink. Two other fur-bearing animals were successfully introduced, the muskrat and the nutria. The most common waterfowl species are ducks, snipes, black-headed gulls, mallards, bank swallows, and blue kingfishers. The rivers are full of various species of the carp family, such as the carp, gardon, chub, bream, roach, tench, and crucian carp, as well as the pike, sheatfish, loach, perch, and ruff. The eel from the Baltic Basin has entered the Prypiat river system through canals.

In the 17th century bison and aurochs still inhabited Polisia; in the 18th century, the flying squirrel; and in the 19th century, numerous wolverines, bears, and elk. Overhunting, the impact of human activities, and the reduction of the natural habitat have contributed to the extinction of some species or their displacement to the north.

History. Evidence of human habitation in Polisia dates back to the Upper Paleolithic Period (10,000–8000 BC). Considerably more evidence from the Mesolithic Period (8000–5000 BC) has been found on sand dunes along the rivers.

In the 9th century Polisia was inhabited, according to the Primary Chronicle, by the following tribes: along both sides of the Buh River to the Yaselda in the north lived the Dulibians (later known as the Volhynians); to the southeast and south of the Prypiat River were the Derevliaus (their main towns, Iskorosten and Ovruch); and to the north along the Prypiat were the Drehovichians (main towns, Turiv and Mozyr). Thus the Yaselda–Prypiat line, which now forms the ethnic border between Ukrainians and Belarusians, marked off tribal territories long ago.

In the 10th century Polisia became part of the Kievan state. *Turiv-Pynske principality, which occupied the central part of Polisia, became part of Kievan Rus' at the end of the 10th century and regained independence at the beginning of the 12th. A century later it was divided into a number of small principalities, Pynske, Turiv, Dorohobuzh, Peresopnytsia, Davyd-Horodok, and others, which were dominated alternately by Kiev and Volhynia principalities. Eastern Polisia belonged to Kiev principality, southwestern Polisia to Volhynia principality, and the Brest land to Turiv-Pynske principality and later to Volhynia principality. After the Tatar invasion almost the whole of Polisia became part of the Principality of Galicia-Volhynia. At the beginning of the 14th century northern

and Prypiat Polisia were annexed by the Lithuanian grand duke Gediminas. After the collapse of the Galician-Volhynian state the whole of Polisia became part of Lithuania. In the middle of the 15th century most of Polisia was administered by the Olekovich princes of Kiev. From 1519 the Pynske land belonged to Queen Bona, the wife of the Polish king Sigismund I. She settled it with Polish peasants and petty gentry and made the first major attempt to drain the Polisian marshes. After the Union of Lublin (1569) Polisia was divided: the northern part remained in the Grand Duchy of Lithuania (all of Brest, part of Minsk, and slices of Novhorod voivodeships), whereas the southern part was acquired by Poland (parts of Kiev and Volhynia voivodeships and the Kholm land). The major cities and the more populated parts of those territories, with the exception of Brest, were located beyond Polisia or on its periphery. Polisia gained importance in Ukraine's history during the Tatar conquest of the forest-steppe in the 13th century and the Crimean Tatar raids after the mid-15th century. A large proportion of the Ukrainian population of the forest-steppe sought refuge in Polisia, which was less vulnerable to attack.

After the partitions of Poland the whole of Polisia was incorporated into the Russian Empire. The southern part was assigned to Volhynia and Kiev gubernias (which formed a part of the Southwestern krai), and the central and northern parts were incorporated into Hrodna and Minsk gubernias (part of the Western krai). A large part of Ukrainian Polisia was thereby incorporated into gubernias with a Belarusian majority. Polisia was the most neglected and poorest part of Ukrainian territories within the Russian Empire. Conditions improved somewhat when the I. Zhilinsky expedition drained some parts of the region, although its work was confined mostly to state and nobles' estates. Railroads brought a significant improvement in Polisia's economy.

According to the Peace Treaty of Brest-Litovsk the whole of Ukrainian Polisia became part of the Ukrainian state. In 1917–18 the same Ukrainian national movement encompassed western Polisia and Podlachia. It was spearheaded by the Bluecoats Regiment and the Ukrainian administration. The Prosvita society, with its head office in Brest, organized 150 reading rooms. Ukrainian schools, co-operatives, and the newspaper *Ridne slovo* were established. The Peace Treaty of Riga resulted in the partition of Polisia between Poland and the USSR. Almost the whole of eastern Polisia, settled by Ukrainians, became part of the Ukrainian SSR. Only a small portion of it around Mozyr (6,400 sq km) was made part of the Belorussian SSR. Most of western Polisia, which was acquired by Poland, was formed into Polisia voivodeship, with its center in Brest; its southern part was joined to Volhynia voivodeship.

Taking advantage of the low level of national consciousness among both Ukrainian and Belarusian Policians, the Polish administration tried to Polonize them and to increase the Polish population in the region, which in 1920 accounted for under 5 percent of the total. Poland did not recognize Ukrainians or Belarusians in Polisia but set up the artificial category of 'local people' (*tuteshni*). In the 1931 census 62.4 percent of the inhabitants were registered as speakers of the 'local language,' 6.7 percent as Belarusian, and only 4.8 percent as Ukrainian. Moreover, the Ukrainian language in Polisia received no recognition.

Polish was the only language taught in schools, and eventually it became the official language of the Orthodox church. No Ukrainian political, social, or cultural life was permitted: Ukrainian institutions, such as the Brest Prosvita and Ukrainian schools, were closed down. All Ukrainian activities were strictly controlled by the local administration, the police, and, in border counties, the military. The policy was enforced from 1932 by Voivode W. Barnacki-Kostek. In 1920–31 about 40,000 Poles, mostly colonists and military settlers, were resettled on former Russian nobles' estates and state lands. In the years just before the Second World War the authorities attempted to Polonize and Catholicize the petty Orthodox gentry in Polisia. The 'Polish Holland' that was to be created on drained wetlands was to attract a new influx of Polish peasants, but the plan was defeated by the Polish general staff, who wanted to use Polisia as a buffer zone with the USSR.

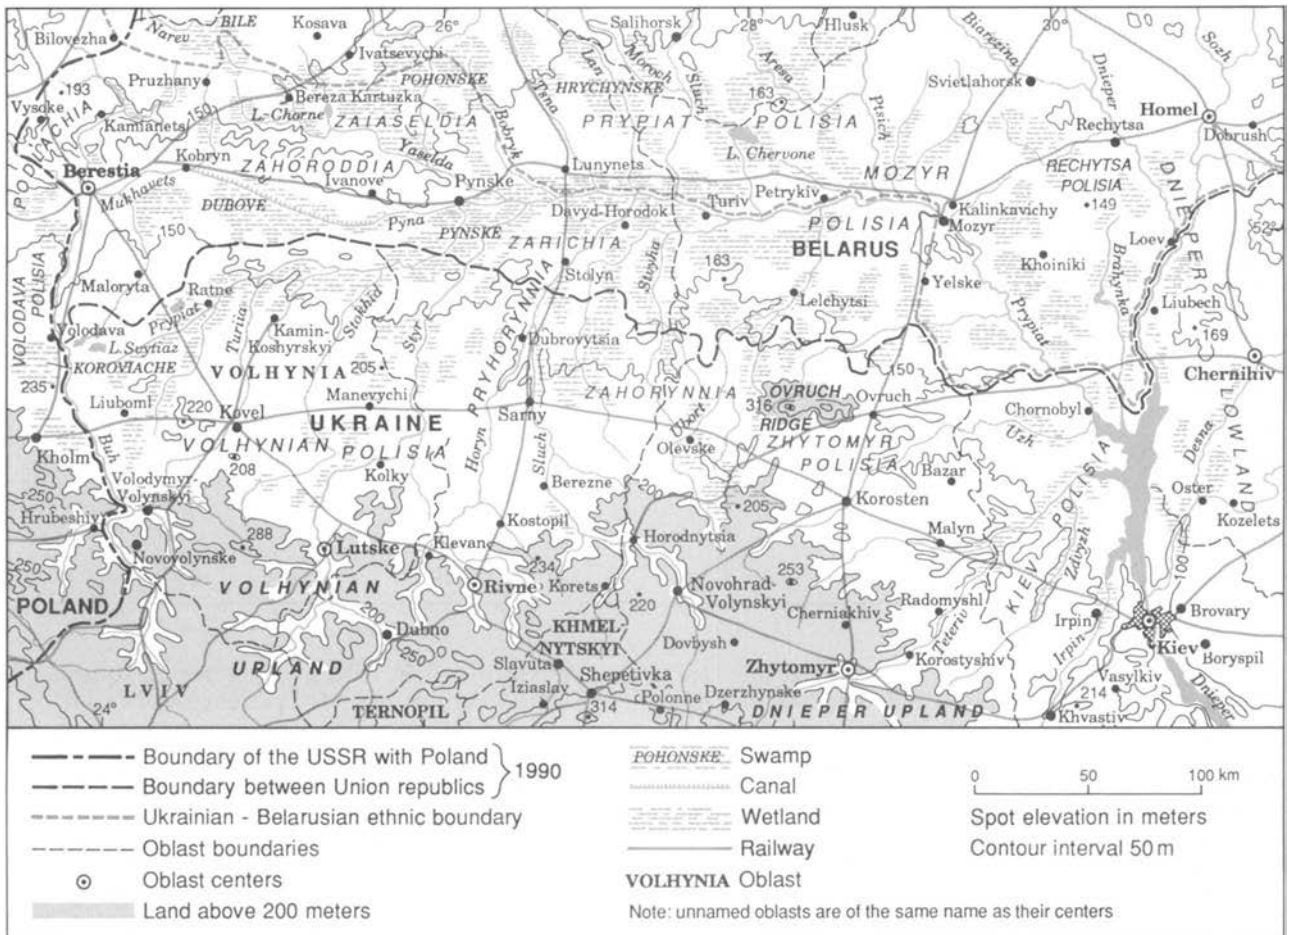

In September 1939 western Polisia was occupied by the Soviet Army. Only a small part of the former Polisia voivodeship (7,200 sq km) settled by Ukrainians was attached to the Ukrainian SSR; most of it (20,500 sq km) was assigned to the Belorussian SSR. The partition occurred according to the 'will' of the people's deputies of western Belarus, expressed by their convention in Bialystok on 28 October 1939. The demands of rural delegations to oblast centers in Brest and Pynske for union with the Ukrainian SSR were of no avail. Belarusian, or even Russian, was imposed as the language of instruction in schools, which the local population had started to Ukrainize. In the first months of the German occupation (summer 1941) Ukrainian life in Polisia revived, only to be stifled by the Nazis. Taking advantage of the swampy, wooded terrain the Ukrainian resistance became active, in the form of the *Polisian Sich, which later became part of the Ukrainian Insurgent Army. Soviet partisan groups also operated in the region.

After the Soviets reoccupied Polisia, the previous borders were renewed. The Ukrainians (approx 800,000), who live compactly in Brest oblast and on the southern fringe of Homel oblast, are officially considered Belarusian. Ukrainian has not been recognized in the government or schools and is not used in print. Ukrainians in Belarus are threatened with assimilation to the Belarusian culture in the rural areas and to the Russian culture in the cities.

Population. The distribution of the population and the way of life were strongly affected by the geographical conditions in Polisia. Its inaccessible terrain protected the inhabitants from invasion and isolated them from foreign influences. Polisian people retained the ancient wooden

A village in Volhynian Polisia

UKRAINIAN POLISIA

architecture, the ancient dress with traces from the Princely era, and a rich store of customs, traditions, and folklore, which are closely related in content and style with those of the rest of Ukraine. The people preserved many carols with ancient themes and old ritual songs, some of which have been adopted by the Belarusians. Since the end of the 19th century, however, the accelerated pace of change, improved transportation, the two world wars, and, especially, Soviet integration policies have forced out the ancient forms.

Because of their isolation the inhabitants of Polisia never had a strong sense of national identity. They always felt and continue to feel that they are different from their neighbors the Poles, Russians, and Jews, and usually referred to themselves as 'locals' (*tuteshni*), 'simple folk' (*prosti*), or 'Orthodox' (*pravoslavni*). The names *polishchuk* and *pynchuk*, derived from place-names, were usually used by outsiders. The distinction between Ukrainian and Belarusian Polisiens is not settled but can be drawn more or less along the linguistic border. The Polisiens themselves recognize the difference in the hard and soft pronunciation of similar words (eg, the Ukrainian *khodyty* or *khodity*, and the Belarusian *khadzity* 'to walk') and distinguish Ukrainians from Belarusians without any difficulty. Ukrainian Polisiens called the Belarusians *lytvynny* or *lytvsynny* (Lithuanians) and sometimes *hedyky* or, pejora-

tively, *lapatsony*. The Belarusians, in turn, called the Ukrainians *hiduni* or *hetuni*. The Ukrainians of Polisia regarded themselves as different from the Belarusians and the Ukrainians of Volhynia and the Kiev region. Their pilgrimages to the Kievan Cave Monastery and especially to the Pochaiv Monastery in Volhynia contributed to that sense of affinity.

There is no agreement on the demarcation of Ukrainians from Belarusians in Polisia. The Russian census of 1897 recognized the inhabitants of Brest and Kobryn counties, in Hrodna gubernia, as Ukrainians but regarded the people of Pynske and Mozyr counties as Belarusians, although specialists on Polisia, such as K. Mykhalchuk, E. Karsky, D. Shendryk, and M. Dovnar-Zapolsky, clearly claimed that they were Ukrainian. The Soviet censuses of 1926 and 1959 took the border between the two republics as the Ukrainian-Belarusian demarcation line. The Polish censuses of 1921 and 1931 treated the nationality and language questions quite arbitrarily: the 1921 census, for example, 'discovered' a sizable Polish population in Kobryn county, which disappeared from the 1931 census by its being merged with the 'locals.' There were marked differences between the Ukrainians and Belarusians of Polisia in their folklore, dress, anthropological features, and psychology. The differences in their economic life and material culture were considerably smaller. Furthermore, the

Land use and population density by natural region in Polisia, 1931

| Natural region | Area (1,000 sq km) | Land use (% of area) | | | | Population | |
|-----------------------|--------------------------|----------------------|-------------------------|---------|-------|-------------------|----------------------------|
| | | Plowland | Hayfields & pastures | Forests | Other | Total (1,000s) | Density (persons/sq km) |

line of ethnic demarcation is not always sharp: there are transitional dialects as well as 'islands' of Belarusian settlers on Ukrainian territories. Nor is the Ukrainian population ethnically homogeneous: it is divided into a number of tribes distinguished by geographical conditions (history, and distance from developed Ukrainian lands and from Belarus). Those tribal differences have not been studied and are quickly disappearing.

Because of its poverty Polisia did not attract foreigners. By the 1860s no more than 20 percent of the population consisted of Jews, Poles, Ukrainian-speaking Roman Catholics, and a few Russians, concentrated in the cities. Among the Ukrainians the petty gentry constituted a separate group. After the abolition of serfdom the landowners in southern Polisia sold off some of their land to Polish and German colonists. The proportion of Ukrainians in Ukrainian Polisia declined to 71 percent, the Jews made up 15 percent (the highest in all Ukrainian lands), the Poles and Roman Catholics, 7 percent, the Russians, 4 percent, and the Germans, 3 percent. As a result of the hostilities during 1914–20 and postwar adjustments the share of the Jewish population declined to 13 percent, and the German and Russian, to 2 percent each, whereas the Polish and Roman Catholic increased to 9 percent in western Polisia and declined in eastern Polisia, and the Ukrainian increased to 74 percent. As a result of the Second World War and the population exchange between the USSR and Germany, the Germans were no longer registered (in the 1959 census), the Jews declined to 2 percent, and the Poles, to 2.5 percent (only 1 percent in western and 3–4 percent in eastern Ukrainian Polisia), whereas the Russians increased to 5 percent, and the Ukrainians, to 90.5 percent. Belarusians numbered less than 0.4 percent in 1959.

Polisia, especially its marshy part, is the least populated region of Ukraine. The population density in Ukrainian Polisia is 43 persons per sq km, and in rural areas as low as 25 (in 1987). In the early 1930s the population density in dry Polisia was 51 persons per sq km; in marshy Polisia it was 26. In dry Polisia plowland occupied 36 percent of the land area, hayfields and pastures, 18 percent, and forests,

33 percent. In marshy Polisia, by contrast, the corresponding figures were 18, 24, and 33 percent (see the table).

A unique pattern of temporary settlement arose in marshy, forested Polisia. With their arable land scattered on small 'islands' remote from the village, the farmers moved there for the spring fieldwork and the harvesting and lived there in primitive shelters. Haying required a stay of two to three weeks. The harvest was brought in when the marshes froze over, and the snow made sleigh transportation possible. Shepherds and fishermen spent even longer periods away from the village. As the population grew, groupings of seasonal shelters developed into permanent settlements.

The population of Ukrainian Polisia grew rapidly in the decades before the First World War. From 1856 to 1914 it increased by 180 percent. The increase was a result not only of natural growth but also of the heavy influx of Ukrainians, Poles, Germans, and Belarusians, who bought up partitioned estates. At the same time nearly one-third of the forests were cleared for farming. After the war the population continued to grow rapidly: in western Polisia, despite some emigration overseas, it increased by 51 percent in 1921–31, as a result of a high rate of natural increase (2.6 percent), the return of wartime evacuees, and the influx of Polish colonists. During the Second World War the population dynamics in Polisia was the same as in other parts of Ukraine. By 1956 the population of Polisia had reached its 1939 level. Because jobs were scarce, people left Polisia in 1963–8. Polisia's net population increase amounted to only 35 percent of the natural increase. The population of Ukrainian Polisia was estimated at 4.5 million in 1970 and at almost 4.7 million in 1987.

Polisia had and still has the lowest level of urbanization in Ukraine: in 1914 scarcely 10 percent of its population was urban, and in 1989, under 50 percent. In the same period the urbanization of Ukraine as a whole rose from 34 to 67 percent. Urban centers developed only in dry Polisia or on the dry 'islands' of marshy Polisia. Lacking large manufacturing enterprises, the cities of Polisia until the 1930s were dependent on trade, crafts, and administrative

jobs. Jews comprised 60 percent of their population. Today all the larger cities have manufacturing enterprises.

Economy. For centuries most inhabitants of Polisia lived off the forest and wetlands resources. Farming was important economically only in dry Polisia. The forests supported beekeeping and pitch-, potash-, and charcoal-making. Wood was the basic material for various implements, from plow to bastshoes. Flax, hemp, and wool were the raw materials for cloth-making, and clay was the basis for pottery. Even iron was smelted locally from bog ores, using charcoal. Forest products, such as furs, honey, potash, pitch, tar, and lumber, were exported.

Agriculture in Polisia had a number of distinctive features: deep furrows were used to drain the soil, haystacks were raised on poles, and grain was dried on separate, high palings. In the second half of the 19th century the plow replaced the hooked plow (*sokha*) and wooden plow (*ralo*). In dry Polisia the tiny, scattered parcels of farmland began to be consolidated before 1914. After the war the process was accelerated in western Polisia. In eastern Polisia collectivization resulted in consolidation on a large scale. The main crops in Polisia were rye (41 percent of the sown area), potatoes (16 percent), oats (13 percent), buckwheat (6 percent), barley (6 percent), and millet (3 percent). Among technical crops the most important was flax; hemp and hops were less important. The grain yields averaged only 7–10 centners per ha and the potato, 70–100.

Forest products were Polisia's most valuable exports. Lumber became an important export at the end of the 18th century, when the canals connecting Polisia to the Baltic Sea were completed, and even more so when the railways were built in the 1880s.

Polisia was one of the poorest agrarian regions of Ukraine. Although its peasants had more land than the peasants of the forest-steppe, the soil was poor, and the yields low. Farming, especially in wet Polisia, was primitive and backward and had little connection with the markets. It produced a small surplus in cattle and forest products (mushrooms, berries). Home-manufactured goods were seldom marketed, except for clay pottery from Horodnytsia and baskets from Khliaby. The forest industry provided many jobs. Other industries were poorly developed and along with trade were controlled by foreigners. Many peasants emigrated to Asia (from eastern Polisia) or to America (from western Polisia). The inflow of Polish colonists into western Polisia under the Polish regime only added to the hardships of the Ukrainian peasants.

Industry is still relatively weak in Polisia, although it has grown considerably since the 1960s. Most of it is involved in processing local agricultural, forest, and mineral raw materials. The food industry accounts for the largest share of the gross production. Its main branches include alcohol distilling, butter- and cheese-making (Kovel, Radomyshl, Olevske), meat packing (Kovel, Brest, Pynske, Kobryn, Sarny), fruit canning (Ovruch, Zhytomyr), grain milling, and brewing. The lumber, woodworking, furniture, and paper industries are widespread. Their main plants are in Pynske, Kobryn, Kovel, Kyvertsi, Tsuman, Orzhiv, and Kostopil. Prefabricated houses are manufactured in Kostopil and Irpin. Furniture factories are found in Malyn, Zhytomyr, Kostopil, and Brest; paper plants, in Malyn, Korostyshiv, Myropil, Poninka, Chyzhivka, Slavuta, and Mokvyn; wood-chemicals plants, in Korosten, Ovruch, and Slavuta; and a match factory, in Pynske.

Light industry in Polisia includes the linen manufacturing complex in Zhytomyr (the largest in the former USSR) and a similar one in Rivne; smaller linen plants in Kovel, Korostyshiv, Novohrad-Volynskiy, Yemilchyne, and Ovruch; sewing factories in Zhytomyr, Korosten, Novohrad-Volynskiy, Rivne, Lutske, Kovel, Brest, Kobryn, and Pynske; cotton-textiles factories in Brest and Korostyshiv; and leather footwear factories in Zhytomyr, Lutske, and Brest.

The machine-building and metalworking industries have been established in Polisia since the 1960s. Their more important enterprises include agricultural machinery plants in Kovel, Rozhyshe, Rivne, Zdolbuniv, and Novohrad-Volynskiy; the tractor factory at Olevske; the automobile plant in Lutske; the electrotechnical factories in Brest, Lutske, and Rivne; the instrument-making factories in Lutske and Zhytomyr; the chemical machinery and highway machinery plants in Korosten; and a boat-building plant in Pynske. The chemical industry is also new to Polisia. Its representative enterprises are the fertilizer plant in Rivne, the petroleum refinery in Mozyr, the petrochemical refinery and the synthetic-fiber factory in Zhytomyr, the plastics plants in Lutske and Mozyr, and the paint and dye factories in Pynske.

Various building materials are mined and processed in Polisia: pink granites and black labradorites, kaolin (for ceramics, tiles) and quartzites (for glass), and basalts on the Horyn River. Bricks and tiles are manufactured from clay in many towns, and cement from marl in Zdolbuniv. Because of the abundance of kaolin the porcelain and faience industries in Polisia are more developed than in other regions of Ukraine. Their major enterprises are located in Baranivka, Horodnytsia, Korosten, and Dovbysh. The glass industry, with a large plant in Zhytomyr, is based on local deposits of quartzite sands.

Energy for Polisia's industries comes from imported coal and oil (some from Rechytsa, in Belarussian Polisia) and from the unified electric grid, which encompasses some power plants in Polisia: the Chernobyl (at Prypiat) and the Rivne (at Kuznetsovsk) atomic power stations and the thermal power stations in Zhytomyr, Novohrad-Volynskiy, Korosten, Bereza, and Mozyr.

Polisia has the lowest density of roads and railways in all Ukraine. In 1880–5 a railway line from Homel to Brest through Kalinkavichy and Pynske was built. In 1902 a second parallel line through southern Polisia, Kiev–Korosten–Sarny–Kovel–Kholm, was added. Of the two perpendicular lines, which connect Volhynia with the Belarussian Upland, the first was built in 1885 from Baranavichy through Lunynets and Sarny to Rivne, the other during the First World War from Zhlobin through Kalinkavichy, Mozyr, Korosten, and Zhytomyr to Berdychiv and Shepetivka. During the Soviet period the lines Chernihiv–Ovruch and Khvastiv–Zhytomyr–Novohrad-Volynskiy were built. Many narrow-gauge lines, built mostly during the First World War, are used for moving timber and cordwood. The major railway junctions are Brest, Lunynets, Kalinkavichy, Zhytomyr, Korosten, Sarny, and Kovel. Most all-weather roads in Polisia were built during the Soviet period. The main east–west highways are the Kiev–Brest highway (Kiev–Zhytomyr–Novohrad-Volynskiy–Rivne–Lutske–Kovel–Brest) and the Brest–Homel highway through Pynske and Kalinkavichy. The major north–south highways are the Kiev–Chernihiv–Homel stretch of the Odessa–St Petersburg highway,

which essentially bypasses Polisia in the east, and the Zhytomyr–Korosten–Ovruch–Mozyr–Babruisk stretch of the Vinnytsia–Minsk highway. An all-weather road connects Rivne with Pynske through Sarny and Stolin, and a perpendicular all-weather road from Kholm to Kiev follows the railway line through Kovel, Sarny, Korosten, and Malyn. The waterways in Polisia are an important part of the transport network. Navigable routes include the Dnieper, the Prypiat (and its tributaries), the Styr, and the Horyn rivers, and the Dnieper–Buh Canal. Many other rivers are used for rafting timber.

Polisia Nature Reserve (Poliskyi zapovidnyk). A state nature reserve set up in 1968 to preserve the characteristic landscape, vegetation, and animal species of Polisia. It covers 20,100 ha of land in Olevske and Ovruch raions of Zhytomyr oblast. Its forests and wetlands are inhabited by species such as the lynx, moose, beaver, forest marten, black stork, and hazel grouse. The reserve's research laboratories, museum, and administrative offices are located in Selezivka.

Polisian dialects. The Polisian dialects constitute, together with the *Podlachian dialects in northwestern Ukraine, the archaic group of the *northern dialects spoken north of the Kholm–Kiev–Putyvl line. As a result of the unequal northward spread of Ukrainian phonetic traits (ie, hard consonants before *e, i*) and the expansion of Belarusian traits to the south and southeast (ie, *akan'e* [pronunciation of unstressed *o* as *a*, eg, *nahá* (Standard

POLISIA'S LINGUISTIC BOUNDARIES

Ukrainian [SU *nohá*] 'leg' and *džekan'e* [eg, *dziéci*, cf SU *dity* 'children'), a belt of transitional (in places, mixed) Ukrainian-Belarusian dialects developed.

The main feature of the dialects is the use of diphthongs (*uo*, *ijö*, *uy*, *ie*) or the vowels *u*, *y* (*y* in the south) in place of *o* and *e* before the lost **jer*, and also in place of a stressed *e*, and the use of *o*, *e*, *e/y* in unstressed positions (eg, *duom* – *domký* [SU *dim* – *dimký*] 'house – little houses', *jačmién'* – *pópel* [SU *jačmin'* – *pópil*] 'barley – ashes', *miésec* – *mysec'ie* [SU *misjac'* – *misjací*] 'moon – moons'). Dual reflexiveness is characteristic of *ę* and *ja-*, alternating with 'a, *ja-* in a stressed position and *e*, *je-* in an unstressed position (eg, *pjat'* – *petá* [SU *p'jat'* – *p'jatá*] 'five – heel', *jak* – *jek'í* [SU *jak* – *jakýj*] 'as – which', particularly in the east).

The Polisian dialects are divided into (1) the eastern, or Left-Bank/Chernihiv, dialects (EPD), east of the Dnieper River; (2) the middle, or Right-Bank, dialects (MPD), between the Dnieper and Horyn rivers; and (3) the western, or Volhynian, dialects (WPD), between the Horyn and Buh/Lisna rivers. Most of them share the following traits: (1) traces of the semipalatalized pronunciation of several consonants before *i*, *e* (eg, *d'ěuka*, *pl'ěten'* [SU *dívka*, *pletín'*] 'girl, wattle' in the EPD, *sv'et* [SU *svit*] 'world' in the MPD), particularly of the sibilants *č*, *ž*, *š* (eg, *š'est'*, *mež'ěju* [SU *šist'*, *mež'ěju*] 'six, along the boundary'), and, in the WPD, in the form of *j* before a stressed *a* (eg, *žjába*, *čas*, *šjápka* [SU *žába*, *čas*, *šápka*] 'frog, time, hat'); (2) a hard *r* (eg, *zorá* [SU *zorjá*] 'star') and, except in most WPD, a hard *c* (eg, *úlyca*, *zájec*, *tancovát'* [SU *vúlycja*, *zájac'*, *tancjuvátý*] 'street, hare, to dance', and, in the north EPD, *ž'en'icca* [SU *ženýtysja*] 'to marry'); (3) aphaeresis of the initial vowel in a word following a preposition ending in a vowel (eg, *do dnohó* [SU *do odnohó*] 'to one'); (4) eastern-Ukrainian stress types in word formation (eg, *začíska* [SU *záčíska*] 'hairdo') and in verbs (eg, *xvaljú:* *xvályš* [SU *xvaljú:* *xvályš*] 'I praise: you praise', (po)nestý, (po)neslá, (po)nesló, (po)neslý 'to carry, she/it/they carried', *nošú:* *prynóšu*, *prynósyty* [SU *nošú:* *prynóšu*, *prynósyty*] 'I carry: I bring, to bring', cf WPD *nesémo*, *neséte* [SU *nesemó*, *neseté*] 'we/you [pl] carry'); (5) no stress shift in pronouns after prepositions (eg, *do meně*, *pry sobí*, *do tohó* [SU *do méne*, *pry sóbi*, *do toho*] 'to me, with oneself, to that'); (6) a weaker morphological use of stress in juxtaposing plural and singular nouns, particularly in the EPD (eg, *xáty*, *xátam*, *xátax* [SU *xatý*, *xatám*, *xatáx*] 'houses' nom, dat, loc); (7) noun forms of the type *žyt't'é*, *pysán'n'e* (SU *žyttjá*, *pysánnja*) 'life, writing'; (8) the ending *-u* in the dative singular of masculine and neuter nouns (eg, *brátu*, *kon'ú* [SU *brátovi*, *koněvi*] 'brother, horse'), and, in the WPD, also *-ovy* (eg, *xlópc'ovy/xlópc'u* [SU *xlópc'evi*] 'boy'); (9) the use of the collective-plural ending *-á* in the nominative plural of some masculine nouns, particularly in the EPD (eg, *xolodá* [SU *xolodýj*] 'cold weather'); (10) the ending *-(an)je* in the nominative plural of other nouns (eg, *sel'áne*, *l'úde* [SU *seljány*, *ljúdy*] 'peasants, people'); (11) frequent use (less so in the WPD) of the ending *-ěj* in the genitive plural of nouns (eg, *xleběj*, *storožěj*, *polěj*, *xatěj* [SU *xlibív*, *storožív*, *polív*, *xat*] 'breads, guards, fields, houses'); (12) long forms of adjectives and pronouns (eg *tája*, *nášaja*, *molodája* [SU *ta*, *náša*, *molodá*] 'that, our, young' fem), in the WPD mostly in adjectives only with stressed endings; (13) the loss of *-j* (except in the WPD) in the nominative singular masculine adjectives (eg, *vesély*, *l'ietn'i* [SU *vesélyj*, *l'itnij*] 'happy, summery'); (14) postprepositional forms of the personal pronoun without the prothetic *n-* (eg, *do její*, *na jýj* [SU *do néji*, *na níj*] 'to her, on her'), as well as old plural

forms of the type *t'ix*, *t'im*, *t'imy* (SU *tyx*, *tym*, *tymy*) 'those' genitive, dative, instrumental; (15) in verbs, infinitives ending in *-ovaty* (*-ovat'* in the EPD, *-ovat'*/*-ovat* in the MPD), second person imperative plural ending in *-ite* (eg, *nes'iete*, *xod'iete* [SU *nesít'*, *xodít'*] 'carry, walk'), and two forms of the future tense, eg, *búdu robýty/-ýt'* and *robýtymu* 'will do' (particularly in the MPD and WPD, in which the form *máju robýty* 'I am supposed to do' is also used); (16) sporadic use in certain expressions of a soft *n* after *y/i* (eg, *pín'a*, *slýn'a* [SU *pína*, *slýna*] 'foam, saliva').

The EPD north of the Desna River have retained archaic diphthong forms and some phonetic features similar to Belarusian (semipalatalized consonants before *e* and *y* [also from *vi*, which can sound like *i*]). The southern Desna dialects use sporadic *akan'e* (eg, *nášaha*, *kan'óm* [SU *nášoho*, *koném*] 'of our, with a horse') and a palatalized *č'*. In conjugation endings of the third person singular and plural, *e* influences *y/ji* in verbs with the stress on the root (eg, *xóde*, *xód'ut'* [SU *xódyt'*, *xódjat'*] 'he walks, they walk'). In the southeast there are dual forms for feminine nouns in the instrumental singular in which the stress is on the root (eg, *xátuju/xátój* 'with a house'), pronominal forms such as *sej*, *s'ája*, *seje* (SU *cej*, *cja*, *ce*) 'this' masculine, feminine, neuter, and a number of lexical features.

In the MPD the following forms are more frequent: *pójes*, *predút'*/*predút* (SU *pójas*, *prjadút'*) 'belt, they spin [yarn]'; *akan'e* (eg, *vadá* [SU *vodá*] 'water'), including the syncopated pronunciation of unstressed *a* as *o* (eg, *storúxa* [SU *starúxa*] 'old woman'); a hard *-t'* in verbal endings (eg, *róbyt'*/*róbyty*, *robýt'*/*robýt* [SU *róbyt'*, *robýtý*] 'he does, to do'; endings in the instrumental singular of the type *kon'óm*, *dušóju* [SU *koném*, *dušéju*] 'horse, soul'; differentiation of *tej/toj* (SU *toj/voin*) 'that one, he'; constructions of the type *ja berú serpá*, *mení bolýt'* *holová* (SU *ja berú serp*, *u méne bolýt'* *holová*) 'I take the sickle, I have a headache'; lexical parallels with south Belarusian dialects; and mostly monophthongized diphthongs (eg, *vuz* [SU *viz*] 'wagon', but *pjýjena*, *obyéd* [SU *pína*, *obíd*] 'foam, dinner').

The distinctive features of the WPD are the labial-labial (and labial-dental) pronunciation of postvocal *v* (eg, *dav*, not *daŭ* [SU *dav*] 'I gave'); prothetic consonants (eg, *húlyc'a*, *hynáčyj* [SU *vúlytsja*, *ináčyj*] 'street, different'); hard consonants before unstressed *-y* from *-b* (thence forms of feminine nouns in the dat-loc such as *xáty*, *klúny* [SU *xáti*, *klúni*] 'house, threshing barn', and of nouns in the nom pl such as *kóny* [SU *kóni*] 'horses'); the influence of soft pronominal endings on feminine singular adjectives in which the stress is on the root (eg, *měji*, *bíleji*, *bíleju* [SU *mojěji*, *bíloji*, *bíloju*] 'of my, of white, with white'); endings of feminine nouns in the instrumental singular of the type *t'in'n'u*, *mýšju*, *kostěju* (SU *tínnju*, *mýšju*, *kístju*) 'shadow, mouse, bone'; endings of neuter singular nouns of the type *tel'á*, *-áta*, *-átovy*, *-átom*, *-átyj*/*-átovy* (SU *teljá*, *-játy*, *-játi*, *-jám*, *-jáci*) 'calf' nominative, genitive, dative, instrumental, locative, or *v uxóvy* (SU *u vúsi*) 'in the ear'; endings of masculine and neuter nouns in the dative and locative plural of the type *-am/-om* and *-ax/ox* (particularly in the northeast, eg, *na vozáx/-óx*, *vozám/-óm* 'on the wagons, to the wagons'); verbal forms of the type *bixčy*, *pečý* (SU *bíhty*, *pektý*) 'to run, to bake'; adverbs of degree of the type *horíej*, *dályj* (SU *hirše*, *dál'še*) 'worse, farther'; the prefix *ny-* (eg, *nyxtó* [SU *nixtó*] 'nobody'); the suffixal particle of indefiniteness *-s'a* (eg, *kotrýjs'a* [SU *kotrýjs'*] 'some'; and lexical connections with the Podlachian and Volhynian dialects.

Traits of the EPD can be found in the works of I. Nekra-

shevych, P. Kulish, B. Hrinchenko, P. Tychyna, and other writers. The Polisian dialects have been studied by V. Hantsov, P. Hladky, V. Kaminsky, E. Karsky, W. Kurasz-kiewicz, O. Kurylo, P. Lysenko, T. Nazarova, L. Ossowski, P. Popov, P. Rastorguev, S. Smal-Stotsky, J. Pauls, O. Syniavsky, J. Tarnacki, Yu. Vynohradsky, and others.

Polisian Sich (Poliska sich). A Ukrainian insurgent formation, organized in June 1941 by T. *Borovets under the aegis of the UNR government-in-exile. Its earliest anti-Soviet activities in Sarny county consisted of attacking NKVD jails and Red Army mobilization centers and capturing arms and ammunition. In July 1941 the Sich was recognized by the German authorities as a local militia, whose primary mission was to clear Polisia of the remnants of the Soviet army before they regrouped into partisan detachments. In August Borovets obtained the support of the OUN (Melnyk faction) and, assisted by a cadre of UNR Army officers, expanded his force to several thousand men. The Sich's chief of staff was P. Smorodsky, a lieutenant colonel of the UNR Army. After defeating a Soviet force at Olevske on 21 August, Borovets established his headquarters there. With the elimination of the Soviet partisan threat, the Germans forced the Polisian Sich to demobilize (15 November 1941). In March 1942 Borovets reactivated it, this time as an anti-Nazi insurgent force, and renamed it the Ukrainian Insurgent Army (UPA). The five-company army began its anti-Nazi activities in late April 1942. Its best-known operation took place at Shepetivka on 19 August. In the autumn of 1942 Borovets signed an armistice with Soviet partisans, but failed to reach an agreement with the Germans, and hostilities with the Soviet partisans and the Germans resumed in February 1943. By that time, partisan units controlled by the OUN (Bandera faction) had become the dominant Ukrainian force. The two Ukrainian insurgent forces shared a common name, the UPA, without merging into one army. The steady loss of men to the rival UPA and the decline in peasant support prompted Borovets to rename his force the Ukrainian People's Revolutionary Army. On 18 August 1943 the force was surrounded and disarmed by the UPA. Borovets and his staff escaped and remained active until November 1943.

Poliske [Polis'ke]. II-10. A town smt (1986 pop 11,300) on the Uzh River and a raion center in Kiev oblast. The town, which is first mentioned in historical documents in 1415, was called Khabne until 1958. In the 16th century it was

owned by King Sigismund I of Poland. When Right-Bank Ukraine was acquired by the Russian Empire in 1793, Khabne became part of Radomyshl county, Kiev gubernia. At the beginning of the 19th century the town belonged to the Radziwiłł family, who built a cloth factory there in 1809. Today the town manufactures textiles as well as furniture, hemp, lumber, and building materials.

Poliszczuk, Orest [Poliščuk], b 7 January 1942 in Lviv. Painter, graphic artist, and sculptor. A refugee in the United States since 1949, he studied at the University of Maryland. Since 1960 he has taught at Montgomery College in Rockville, Maryland. Solo exhibitions of his works have been held in Detroit (1975, 1979), New York (1976), Toronto (1978), Baltimore (1980), and Rockville (1982).

Politburo (abbreviation for *Politychne biuro*). The top policy-making body of the CC CPSU and of the central committees of the republican organizations of the Party. The first Politburo of the CC CP(B)U was set up on 6 March 1919. In Ukraine it was called the Bureau of the CC CPU (1952–3), the Presidium of the CC CPU (1953–66), and then by its original name of Politburo. Until its dissolution in the wake of the M. Gorbachev reforms, the Politburo consisted of 10 to 11 full (voting) and 3 to 7 candidate members, who were elected by the CC CPU. These were secretaries of the CC, the head of the Presidium of the Supreme Soviet, the president of the Council of Ministers and some of his deputies, the commander of the Kiev Military District, and sometimes several first secretaries of oblast Party committees. The body was controlled directly by the Politburo of the CC CPSU and oversaw all political work in Ukraine. It worked closely with the *Secretariat of the CC CPU, which was responsible for organizational matters, and there was usually some overlap in their membership.

Political commissar (*politychnyi komisar*). The political representative of the Communist party in the Soviet armed forces. Political commissars began to be appointed at the higher levels of the army in 1918 and at units smaller than a battalion (where they were called *politruky*) at the end of 1919. These officers came under the chief political administrations of the army and navy, and functioned as representatives of the Communist party conducting propaganda and ensuring that Party policy was followed. Until 1924 the commissars and *politruky*, who usually lacked military competence, were equal in rank to the military commander of the unit and could even veto his orders. This state of affairs caused much tension in the armed forces, because professional officers resented heavy-handed political interference. Then a system of unitary command was adopted, and the commissars were subordinated to the military commanders. In 1937–40, following the massive purges that swept the military in the mid-1930s, and again in 1941–2, following the Soviet entry into the Second World War, political commissars were restored to the rank of co-commander. In October 1942 the unitary command system was reinstated, and the political officers were redesignated deputies to the commanding officers (*zampolity*). After the Second World War political commissars were recruited from among serving officers and were men of superior ability and achievement. They were given a military rank but were exempt from normal military activities.

Political crime. A violation of the law for a political reason. Faced with oppressive foreign regimes which ruled out any legal form of opposition, Ukrainians were forced to resort sometimes to illegal means in the struggle for their national, political, and social rights.

In the Princely era, such political crimes were recognized as treason and conspiracy against the state and public order. Under the influence of Western law the criminal law of the Grand Duchy of Lithuania recognized certain political crimes, of which the most important were (1) crimes against the duke's authority, such as *lèse-majesté*, treason, and conspiracy; (2) military crimes, such as desertion and collaboration; and (3) crimes against the social order, such as counterfeiting documents and currency. Usually, political crimes were punished severely, by death, corporal punishment, confiscation of property, or imprisonment.

The Cossack state built on the tradition of Lithuanian law and, under the influence of Western and Russian legislation, expanded the list of political crimes and the forms of punishment. The third section of the Code of Laws of 1743 includes political crimes, such as killing, injuring, or insulting a foreign diplomat.

The law on political crimes in the countries that ruled Ukrainian territories in the 18th to 20th centuries reflected the political and ideological profile of their regimes. Under some regimes (the Russian, for example), simple membership in Ukrainian parties or participation in the Ukrainian national movement was considered a political crime and punished by judicial or administrative means.

Soviet law and judicial and administrative practice recognized a wide range of political crimes. During the struggle for Ukraine's independence and the first years of Soviet rule in Ukraine, a large number of decrees and laws on political crimes were enforced. Most political crimes were described as 'counterrevolutionary,' and they were punished severely by judicial and extrajudicial process. Political crimes were handled by revolutionary and military-revolutionary tribunals and by the Cheka.

The Criminal Code of the Ukrainian SSR of 1927 classified political crimes into counterrevolutionary crimes and crimes against administrative order. The revised code of 1960 listed as 'especially dangerous crimes against the state' (arts 56–65) treason, espionage, terrorism, wrecking, sabotage, and anti-Soviet propaganda. 'Other crimes against the state' (arts 66–80) included the following: violation of national and racial equality, divulging of state secrets, banditry, smuggling, mass disorder, evasion of call-up for military service, evasion of mobilization, evasion of wartime services and of payment of taxes, illegal exit from and entry into the USSR, infringement of international air regulations, infringement of regulations governing traffic and operation in transport, damaging of communications and means of transport, preparation and issuing of counterfeit money or securities, infringement of currency regulations, and failure to report crimes against the state (the latter is especially characteristic of Soviet law). For 11 different crimes the maximum punishment was death. Some types of political crime (eg, treason, anti-Soviet propaganda, and membership in anti-Soviet organizations) were not clearly defined and were open to arbitrary interpretation. According to the criminal law of Ukraine, political crimes came under Union jurisdiction, and the law on crimes against the state, passed by the USSR Supreme Soviet, was included in the Criminal Code of the Ukrainian SSR.

The concept of crimes against the state was much broader in the USSR than in Western democracies; it included even some economic crimes. In the Soviet Union and in Ukraine only some political trials were widely publicized – the show trials. Most were held in camera, although this practice was contrary to the procedural law on publicity. (See also *Political prisoners and *Concentration camps.)

V. Markus

Political economy. A social science dealing with the theoretical foundations of economic studies. It is based on ethical, normative, or methodological principles that define schools, doctrines, and currents in economic thought and reflect particular economic interests (eg, national, class, state, private-sector, consumer, or trade-union). In Ukraine the origins of political economy (PE) can be traced back to the first written comments on economic problems found in medieval religious teachings (ie, the church's views on money and usury) and to the earliest legal documents of Kievan Rus', which reflect economic activity and establish norms for it (eg, *Ruskaia Pravda*).

Political economy as a discipline, however, begins in Ukraine with the physiocratic school which developed there in the early 19th century, later than it did in Western Europe (in Russia proper, it barely developed at all). Ukrainian physiocrats, such as V. Karazyn, differed from their Western counterparts by their radical critique of serfdom. They were simultaneously influenced by the classical school of PE, which reached Ukraine in the early 19th century. The first Russian translation of A. Smith's *Wealth of Nations* was done by the Chernihiv vice-governor N. Poltkovsky and published in 1802–6. The first abridged Ukrainian translation, by O. Mykhalevych, was not published until 1913.

For many years Kharkiv University was the center of classical PE in Ukraine and in the Russian Empire. The German scholar L.H. von Jacob, a disciple of Smith, J.B. Say, and J. Bentham, was the first professor of PE there (1806–10) and in Ukraine in general. One of his successors, T. Stepanov (1832–47), wrote the first PE textbook (2 vols, 1844, 1848, in Russian) using the concepts of D. Ricardo and Smith. It was at Kharkiv that S. Pakhman wrote one of the first theoretical works on stock companies (1861); K. Gattenberger convincingly criticized the historical school, by proving that it added nothing to the classical approach; N. Kossovsky tried to develop a theory of liberal socialism based on the PE of Smith and Ricardo; and, in the early 20th century, P. Fomin and A. Volsky elaborated the foundations for a syndicate economy.

A second center of classical PE developed at Kiev University under I. Vernadsky (1846–50) and N. Bunge (1850–80). Bunge and his pupil H. Tsekhanovetsky (at Kiev in 1859–72 and at Kharkiv in 1873–98) advocated capitalism, the industrialization of Ukraine, and the development of cheap bank credit. In their writings on the steel and sugar industries and the railways, they emphasized the superiority of free trade and competition. It was at Kiev University that M. *Ziber translated into Russian Ricardo's *Principles of Political Economy and Taxation* in 1873 and published works on J.S. Mill and J.K. Rodbertus; and A. Antonovych wrote a book on the theory of value (1877) and a PE textbook (1886). In the early 20th century a 'Kievan school' of Russian PE (D. Pikhno, A. Bilimovich, V. Zheleznev) arose. Although it was politically reactionary, it advocated freedom of competition and of enterprises.

At Odessa University L. Fedorovych, the professor of economics (1884–1905), published books on the theory of monetary and credit circulation (1888) and the history of PE before Smith (1900).

In the early 20th century a capitalist PE prevailed among Ukraine's agrarian theorists (V. Kosynsky, P. Liashchenko, Yu. Meindorf, and others). The peculiar Germano-Russian PE school that arose in the 19th century in St Petersburg and Moscow (like the Russian Slavophiles, populists, and utopian socialists) were hostile to liberalism and rejected capitalist competition as incompatible with conditions prevailing in the Russian Empire. In contrast, because industrial and agricultural capitalism were being developed much more intensively in Ukraine than elsewhere in the empire, most economists there and those who had left Ukraine for St Petersburg or Moscow (M. Baluhiansky, Vernadsky, Bunge, I. Yanzhul, and others) were antietatist and advocated economic freedom and competition. In the late 19th and early 20th centuries socialist and Marxist thought became widespread in the Russian Empire and there engendered widely accepted predictions of an inevitable general crisis and the demise of capitalism. At the same time, however, M. *Tuhan-Baranovsky developed the classical principles of Ricardo and Say. An opponent of the views of V. Lenin and R. Luxemburg, he proposed his own theory of the market (1898), according to which capitalism could continue evolving without economic crises as long as there was a rational division of resources, because the cyclical decrease in popular consumption would be compensated for by the growth of productive capital investments by the private sector and the state. To some extent Tuhan-Baranovsky's views anticipated the modern theories of planned and regulated capitalism.

The Romantic, historical, and institutional schools of PE had virtually no adherents in Ukraine, nor did F. List's nationalist school. In ethnic Russia, however, those schools were widespread (eg, S. Witte's nationalism).

Ukrainian *socialism differed substantially from its ethnic Russian counterpart in that it was influenced primarily by French rather than German thinkers. For example, Ukrainian socialist M. Drahomanov considered himself a disciple of P.-J. Proudhon, while Tuhan-Baranovsky wrote favorably about him. The evolution of Ukrainian socialist PE from Drahomanov's communalism to Tuhan-Baranovsky's co-operativism and market socialism (and even to the Workers' Opposition in the CP(B)U in the 1920s) was marked by the retention of programmatic traits, such as (1) the socialization, but not *nationalization, of property; (2) democratic self-management by socialist enterprises (peasant *hromady*, artels, co-operatives, worker-controlled factories); and (3) free market relations among socialist enterprises. Even as late as the 1920s Ukrainian thinkers did not advocate centralized state planning – which distinguished them from Russian socialist thinkers. The economic theory of co-operation, which was first elaborated in the Russian Empire by Ziber (1869) and was further developed by Ye. *Slutsky and others in Ukraine, was characteristic of Ukrainian socialist PE. It was refined by Tuhan-Baranovsky in his program for a 'co-operative society' (1918), which influenced even Lenin's thinking. Finally, Ukrainian socialist PE was primarily ethical, not materialist. For Ukrainian political economists, such as S. *Podolynsky, M. *Levytsky, Ziber (in his early

works), and, in Austrian-ruled Galicia, I. Franko and V. Navrotsky, the central concerns were the well-being of the masses, poverty, health care, and social security, not the development of productive forces as with Russian thinkers.

Until the late 1920s, Marxist PE was disproportionately weaker in Ukraine than was liberal or non-Marxist socialist PE. Although Ziber was recognized (even by K. Marx) as the first Marxist economist in the Russian Empire, he, along with Podolynsky, Yu. Bachynsky, and other Ukrainian Marxists, belonged to the school of 'legal Marxism' or 'economism' (to which Tuhan-Baranovsky was assigned later), which believed in the evolution of socioeconomic relations and opposed *populism and *Leninism.

The Austrian psychological school of PE, the theory of marginal utility, marginalism, and mathematical economics were introduced in Ukraine in the late 19th century. Tuhan-Baranovsky was the first to popularize the Austrian school in the Russian Empire (1890). His own attempt at synthesis of the theories of labor surplus and marginal utility, later proved to be incorrect, was mathematically substantiated in Kiev by N. Stoliarov. In Odessa R. Orzhentsky elaborated a theory of marginalism well before the Russian economist V. Dmitriev did. British and American neoclassical PE came too late to become widespread in Ukraine. (It did gain some currency in Soviet Russia during the period of the *New Economic Policy.) In contrast, the works of Kiev's Slutsky on the consumption function (1915), the rational behavior of consumers, and cyclical processes were published in Italian, German, and English, and influenced British neoclassical economists (J. Hicks, R. Allen) and American econometricians (eg, K. Arrow, G. Debreu, H. Houthakker) from the 1930s on.

In the second half of the 19th century *statistics began to develop in Ukraine. By the beginning of the 20th century a unique Ukrainian school of territorial (regional) econometrics had evolved, decades ahead of similar schools in other multinational states. Distinguished by its methodology of constructing and differentiating Ukraine's territorial economic balances from the statistical indicators for the Russian Empire as a whole, the school arose from M. *Yasnopolsky, M. Porsh, and P. Maltsiv's estimates of the imperial revenues and expenditures in Ukraine and was developed further in the 1920s by the Soviet Ukrainian economists M. Shafir and V. Dobrohaiev. Supplementary statistical research on Ukraine's external trade balance (by H. Kryvchenko, M. Shrah, K. Kobersky, and others) and *national income (by Myshkis and, in relation to the USSR as a whole, L. Litoshenko) showed that Ukraine was financially exploited by the tsarist and Soviet centralized systems of taxation. On the basis of these studies and the Marxist-Leninist theory of imperialism, M. *Volobuiev concluded that Ukraine had been and continued to be a Russian colony. Consequently he was repressed and vilified by the Stalinist regime as the founder of a Ukrainian nationalist PE.

In the 1920s and 1930s certain Soviet Ukrainian economists (V. Akulenko, Ya. Dimanshtein, I. Lando) analyzed Ukraine's development and growth. They showed that the productivity of labor and capital in Ukraine was higher than in central and eastern Russia, and that it was therefore necessary to give Ukraine priority in Soviet economic planning. A certain continuation of that view was evident in the analytical studies of the effectiveness of capital investments done by Soviet economists of the 1960s.

Dogmatic Stalinist PE dates from 1930, when a postsecondary textbook of PE edited by B. Radzikovsky was published in Kharkiv. Soon afterward the textbook was banned as 'Bukharinist' and withdrawn from circulation. No other textbook was available until 1954. Since the 1930s instruction in PE has been primitive. With minor changes, distorted presentations, particularly of the PE of Soviet socialism, remained normative in Soviet economics. Since the 1960s the number of critical studies of contemporary Western PE published in Kiev has grown considerably, but their scholarly value has been little. No synthetic monograph on the history of Ukrainian PE has appeared. Articles on Ukrainian PE have been published in two collections (1956, 1961), the monthly *Ekonomika Radians'koi Ukraïny*, Kiev University's bimonthly *Pytannia politychnoi ekonomii*, and the annual *Istoriia narodnoho hospodarstva ta ekonomichnoi dumky Ukraïns'koi RSR* (since 1970).

Analyses by émigré economists (Ye. Glovinsky, K. Kononenko, D. Solovei, M. Vasylyv, B. Wynar, V. Holubnychy, Z. Melnyk, V. Bandera, I. Koropec'kyj, M. Maksudov) of compulsory Soviet *agricultural and *grain procurements and the export of agricultural products and raw materials from Ukraine to Russia, particularly during the period of *War Communism and the artificial *famine of 1932–3, laid the foundations for a new, mostly Western, school of Ukrainian PE, whose members also consider Ukraine a Russian economic colony. Another émigré scholar, R. *Rozdolsky, made a major contribution to the methodological reconsideration of Marx's economic theory in the 1950s and 1960s.

Political prisoners. Persons imprisoned for their political beliefs or activities or for committing a *political crime. Imprisonment for political reasons is a modern phenomenon connected to the introduction of criminal and criminal-procedure codes, state courts, and limitations on monarchical absolutism. The first such political prisoners in Ukraine were incarcerated under Austrian rule in the early 19th century and under Russian rule in the later 19th century. Up to that time, particularly during the period of unchecked absolutism, the concept of political prisoner was unclear, and imprisonment and *exile matters of

the monarch's discretion rather than consequences of proven guilt. P. *Polubotok, P. *Kalnyshchynsky, and other representatives of the Cossack *starshyna* became political prisoners by tsarist fiat. T. Shevchenko was exiled as a result not of a judicial process but of an administrative decision. Political trials and an increase in the number of political prisoners often occur after 'illegal' means are used to combat a government. Political trials were rare in Ukraine prior to 1914.

Ukrainian SSR. From the beginning of Soviet rule, the authorities and their terroristic apparatus sought to liquidate or isolate persons they did not trust because of their social origins or because of their attitudes to the state's economic and cultural plans. Such people were considered counterrevolutionaries and 'wreckers.' Rarely were people repressed for actions that were truly contravenions of state laws. In fact most Soviet political prisoners did not violate any law.

In 1918 the *Cheka was established in Russia to combat political crime, and the first revolutionary tribunals were set up. Their enemy was anyone who opposed Soviet rule or was a potential opponent. The definition of the 'enemy' changed as the Soviet state evolved, and in the 1930s it subsumed even the social class that ostensibly supported the Soviet regime, the poor peasantry. The Cheka was succeeded in 1922 by the *GPU, which was replaced in 1934 by the *NKVD.

In 1934 J. Stalin's decrees 'On the Investigation and Examination of Cases of Terrorist Organizations and Terrorist Actions against the Workers of Soviet Power' and 'On the Examination of Actions of Counterrevolutionary Sabotage and Diversions' were included in the criminal-procedure codes of all Soviet republics. Those decrees allowed the trial and sentencing of persons 24 hours after their being officially accused, or in absentia. No provisions were made for appeals, and death sentences were carried out immediately. Such trials were conducted by oblast courts or military tribunals. All that was required as proof of guilt was a coerced confession or the secret testimony of a state operative. Trials were conducted without the accused's being allowed even the most elementary rights and without the participation of either a prosecutor (the court itself had that function) or a defense counsel. The prosecution had unlimited rights to re-examine earlier trials and to 'correct' verdicts that had been handed down. Consequently, political prisoners in the 1920s and 1930s were often reincarcerated for the very same 'offense,' and Soviet concentration camps were soon filled with innocent people or those whose offenses were trivial.

Ukrainian political prisoners in camps included both those who actively opposed the Soviet regime and those whom the Bolsheviks simply disliked or distrusted: peasants or agronomists opposed to collectivization, religious leaders, priests, believers, writers, artists, soldiers who were captured by or surrendered to the Germans during the Second World War, anyone suspected of having nationalist views, and, after 1944, members or supporters (however marginal) of the Organization of Ukrainian Nationalists or the Ukrainian Insurgent Army.

Although political trials took place in the Ukrainian SSR from its inception, it has been impossible to obtain reliable information about most of them because they were secret or closed. The actual number of such trials has never been determined. Until recently the only available information

was drawn from the testimonies and reminiscences of émigrés about the persecution of the Ukrainian Autocephalous Orthodox church in the 1920s; the trials of the alleged members of the *Union for the Liberation of Ukraine in 1930; the trials of D. *Falkivsky, H. *Kosynka, A. *Krushelnytsky and his sons, and O. *Vlyzko in December 1934; the *Trial of the 59 in January 1941; and samvydav accounts of the trials of members of the *dissident movement of the 1960s and 1970s.

After the 20th CPSU Congress in 1956, N. Khrushchev declared that there would no longer be political prisoners, and that only those who truly committed crimes against the state would remain in *labor camps. In fact, however, far from everyone imprisoned under J. Stalin was freed, and in the ensuing years the number of political prisoners grew as the dissident movement gained momentum. In the 1950s, 1960s, and 1970s they included not only members of underground nationalist organizations but also those who publicly defended Ukrainian language rights and spoke out against Russification and political and religious persecution. From the 1960s on most political prisoners were charged with 'malicious hooliganism' or fabricated criminal offenses. The concept of political prisoner thus remained fluid, and it was not defined in the criminal code. The investigation of all 'political' cases was conducted by the *KGB, and the courts were subordinated to it. Thus, one could say that anyone whose case was handled by the KGB was a political prisoner. Many trials continued to be held in camera or with a 'selected' audience.

In April 1991 over 1,100 former political prisoners gathered in Lviv to form the Association of Ukrainian Political Prisoners. I. Hubka was elected chairman of the new organization. In June 1991 the First World Congress of [former] Ukrainian Political Prisoners was held in Kiev. Attended by some 1,000 participants from Ukraine and the West, it elected as its head the president of the recently created All-Ukrainian Society of the [Politically] Repressed, Ye. Proniuk.

The brutal treatment of political prisoners has been documented in the writings of former prisoners, such as V. Moroz, P. Grigorenko, L. Pliushch, M. Osadchy, S. Pidhainy, D. Shumuk, H. Kostyuk, and L. Kopelev. The most comprehensive account is provided by A. Solzhenitsyn in *The Gulag Archipelago*.

Western Ukraine. In interwar Ukraine under Polish rule, the first political prisoners were former active participants in the Ukrainian-Polish War of 1918–19, civic and community leaders, and members of the underground *Ukrainian Military Organization (UVO) and *Communist Party of Western Ukraine (KPZU). During the *Pacification of Galicia in 1930, many members of legal Ukrainian political parties were imprisoned. In the 1930s many members of the KPZU and OUN were tried and imprisoned. Hundreds of OUN members were confined in the *Bereza Kartuzka concentration camp in 1934–9. Altogether in the interwar period, there were some 1,000 Ukrainian political prisoners under Polish rule. Several dozen were executed.

Persons accused of political crimes were tried by jury in Galicia and by regular courts in northwestern Ukraine until 1939. Extraordinary and emergency courts were convened in some cases, as, for instance, in the trials of V. *Bilas and D. *Danylyshyn in 1932. Membership in the

UVO and OUN was punishable by up to several years of imprisonment, and from the mid-1930s by up to 15 years.

Political prisoners organized their own hierarchically structured communities in the Polish prisons and camps. They maintained internal communications, conducted political training, and co-ordinated activity (eg, hunger strikes and demands for Ukrainian newspapers, the rights to correspond, privacy, separate cells, and indictments written in Ukrainian). Such communities were illegal, but prison authorities knew about them and often negotiated directly with their leaders. Those who were sentenced to longer terms were sent to prisons in Poland proper (eg, in Tarnów, Rawicz, Wronki, Katowice, and Siedlce), where they were placed in cells with common criminals.

Political prisoners in Rumanian prisons in the interwar period were mostly OUN members, but there were also some members of some public Ukrainian organizations.

In Transcarpathia political prisoners became a widespread phenomenon during the Hungarian occupation of 1939–44, and hundreds of people were interned in concentration camps without trial. In 1942 in Mukachiv, a military tribunal sentenced in camera over 150 OUN members to terms in the Sátorajújhely and Vác prisons. Many Communist underground members and partisans were also imprisoned.

During the Second World War hundreds of OUN members were imprisoned in German concentration camps, notably in *Oświęcim (Auschwitz) and *Sachsenhausen.

A. Bilynsky, M. Prokop

Political sections. Local organs under the CC CPSU intended to enforce Party discipline and central control over particularly important or strategic institutions and bodies. They were established first in the Red Army in the second half of 1918. In 1933 political sections were established at machine-tractor stations (MTS) and at state farms to further Party control in the countryside. In 1934 the political sections at the MTS were reorganized into regular Party committees and merged with the raion Party committees. In 1940 the political sections at state farms were also abolished. They were renewed in 1941–3 to tighten central control during the war. From 1933 to 1956 political sections also functioned in institutions of the transportation industry.

In Ukraine political sections at MTS and state farms played an important role in the *collectivization of agriculture and the famine of 1932–3. Starting in January 1933 thousands of Party members from Russia or the Russified cities of Ukraine were assigned to political sections in the countryside to organize grain requisitions and press the peasants into collective farms. Many of them were armed, and they used violence with complete impunity. After the Second World War political sections were established at MTS throughout Western Ukraine. They were placed under the jurisdiction of the political department of Ukraine's Ministry of Agriculture, and their purpose was to speed up collectivization in the newly acquired territories. In 1953 political sections at MTS and state farms in the USSR were abolished.

Politkovsky, Fedir [Politkovs'kyj], b 1756 in Chernihiv regiment, d 25 July 1809 in Moscow. Physician and scientist. A graduate in philosophy and medicine of Moscow University (1778), he defended a doctoral dissertation at Leiden University on putrefaction (1781) and studied nat-

ural science and clinical medicine in Paris. From 1784 he lectured on natural history at Moscow University, and in 1802 he was appointed to the chair of applied medicine and chemistry. He was also director of the university's museum of natural history. He was one of the first medical theorists to propose that most diseases were caused by external factors. He introduced a new method for examining patients and collecting case histories.

Polityvdav Ukrainy. A publishing house of political literature in Soviet Ukraine. Founded in Kharkiv in 1922 as the Proletar publishing house, it was located in Kiev from 1934 and had several names before assuming its present one in 1964. It published collections of official Party and government documents; books by Party leaders and prominent Communists; works on the history of the CPSU and CPU; works in Marxist-Leninist theory, philosophy, 'scientific' atheism, politics, economics, law, and sociology; books reflecting the Party line on the history of Soviet Ukraine and the USSR; and Ukrainian-language editions of the collected works of V. Lenin (55 vols) and K. Marx and F. Engels (50 vols). It released over half of all political and socioeconomic books published in the Ukrainian SSR.

Polityka (Politics). A semimonthly political journal published in Lviv from October 1925 to March 1926 by V. Paneiko. Edited by S. Tomashivsky, it propagated conciliatory relations between Poles and Ukrainians in Western Ukraine, criticized extremists in both camps, and supported the Ukrainian National Democratic Alliance. Among its contributors were V. Bachynsky, Rev T. Halushchynsky, I. Krypiakievych, V. Kuchabsky, and O. Nazaruk.

Poliota, Heorhii (Yurii) [Poljuta, Heorhij], b 1820 in Hrodna, Belarus, d 27 April 1897 in Kharkiv. Veterinary pharmacologist. A graduate in pharmacology of the Vilnius Medico-Surgical Academy (1839) and the veterinary school (1844) and medical faculty (1849) of Kharkiv University, he taught pharmacology and internal medicine at the Kharkiv Veterinary School (1851-9) and the Kharkiv Veterinary Institute (1859-81). He wrote a textbook in veterinary pharmacology (1878) and was a member of the Kharkiv, Warsaw, Vilnius, and Viatka medical societies and the Paris Botanical Society.

Polivanova, Galina, b 1 April 1929 in Krasne Selo, near Leningrad. Opera singer (lyric soprano). She graduated from the Odessa Conservatory (1953; student of I. Raichenko) and then was a soloist of the Odessa Theater of Opera and Ballet. Her operatic roles included the name-parts in G. Puccini's *Madame Butterfly* and G. Verdi's *Aida*, and Oksana in S. Hulak-Artemovskyy's *Zaporozhian Cossack beyond the Danube*. Since 1977 she has headed the vocal department at the Odessa Conservatory.

Polívka, Jiří, b 6 March 1858 in Enns, Austria, d 21 March 1933 in Prague. Czech philologist and founder of comparative Slavic folklore studies, member of the Shevchenko Scientific Society from 1914, the All-Ukrainian Academy of Sciences from 1924, and the Prosvita society in Uzhhorod. After studying at Prague, Zagreb, and Vienna (PH D, 1882) universities he taught at Prague University. Having visited the Russian Empire in 1889-90, he became interested in Ukrainian affairs and began to corre-

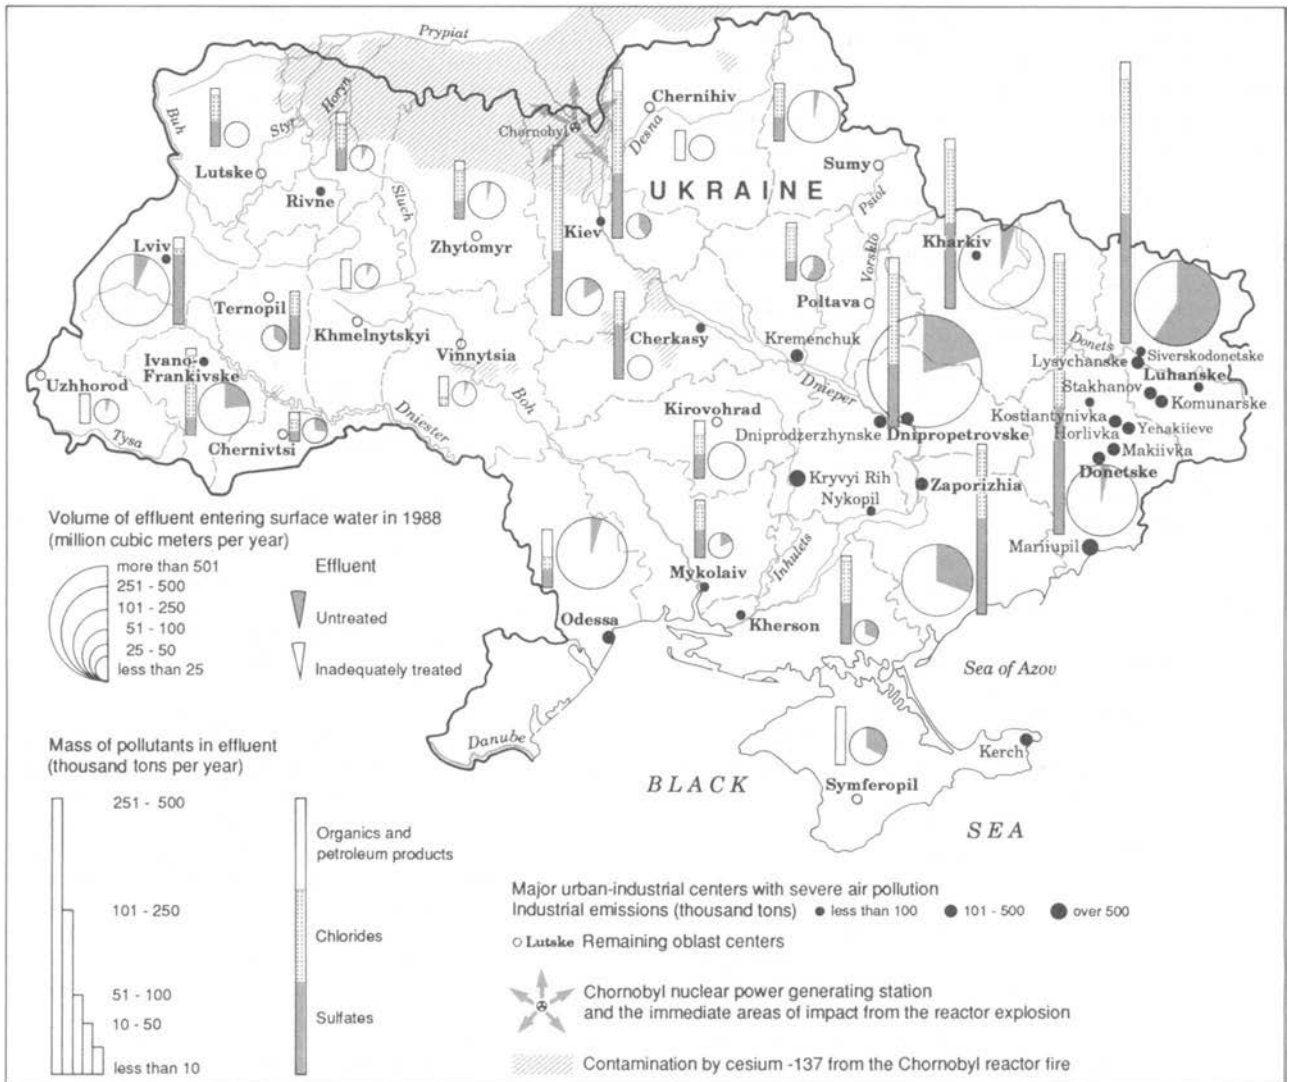

spond with I. Franko, M. Hrushevsky, V. Hnatiuk, and V. Shcherbakivsky. His comparative studies of Slavic folktales, such as *Anmerkungen zu den Kinder- und Hausmärchen der Brüder Grimm* (5 vols, 1913-32), *Výber ruských pohádek* (A Selection of Ruthenian Tales, 3 vols, 1924-5), *Slovanské pohádky* (Slavic Tales, vol 1, 1932), and *Lidové povídky slovanské* (Slavic Folk Stories, 2 vols, 1929, 1939), show his wide knowledge of Ukrainian folktales. His *Soupis slovanských rozprávok* (Catalog of Slavic Tales, 5 vols, 1923-31) included Ukrainian tales from Transcarpathia. As secretary of the Czechoslovak Ethnographic Society and president of the State Folk Songs Institute he played an important role in collecting Ukrainian folklore and ethnographic material in Transcarpathia and eastern Slovakia. His articles appeared in Kiev, Lviv, and Uzhhorod periodicals, and his reviews of publications in Ukrainian folklore were printed in German and Czech journals.

Polka. A Bohemian folk pair dance that originated in the middle of the 19th century and spread throughout Europe. Its music is quick and has two beats to a bar. In Ukraine it took on some national characteristics in music and choreography and often was named according to places where a variant was popular: 'Poltavska,' 'Poliska,' 'Sanzhary,' 'Pleskach,' and the like.

Poll tax (Russian: *podushnaia podat'*). The basic form of direct taxation in the Russian Empire during the 18th and 19th centuries. It was levied on every male (*dusha* 'soul'), except members of the nobility, clergy, and government administration. The poll tax was introduced by Peter I in 1724 and was extended to Slobidska Ukraine in 1776, to Left-Bank Ukraine in 1783, and to Right-Bank Ukraine in 1796. In 1863 urban residents and tradesmen were exempted from the tax, and only the peasantry was left subject to it. The tax was rescinded in Ukraine and European Russia in 1887.

Pollution. The contamination of the environment, including air, water, and land, with undesirable amounts of material or energy. Such contamination originates from human activities that create waste products. An industrial and intensively farmed republic, Ukraine contains some of the most polluted landscapes in Eastern Europe. Pollution became evident in Ukraine with industrial development in the 19th century. The Soviet drive for rapid industrial development during much of the 20th century greatly intensified pollution at the expense of the environment and society.

Air pollution is especially severe in many of the heavily industrialized cities and towns of southeastern Ukraine, notably in Kharkiv, Luhanske, Donetske, Dnipropetrovske, and Zaporizhia oblasts. Coal-using industries, such as metallurgical coke-chemical plants, steel mills, and thermal power plants, are major point-sources of high levels of uncontrolled emissions of sulfur dioxide, dust, unburned hydrocarbons, and other harmful substances. In particular the air quality in the cities of Dnipropetrovske, Dniprodzerzhynske, Kryvyi Rih, Mariupil, and Zaporizhia is reported to be among the worst in the entire former USSR. Farther to the east the atmosphere over the cities of Lysychanske and Siverskodonetske has the highest phenol and formaldehyde concentration of any city in the former USSR. Lead-zinc smelting in Kostiantynivka pro-

POLLUTION

duces the largest emissions of heavy metals and their subsequent precipitation and pollution of soils. In what used to be the USSR three Ukrainian cities, Kremenchuk, Rivne, and Cherkasy, rank among the worst 15 cities with regard to increased incidence of human illness, presumably related to air pollution. Other Ukrainian cities with major chronic air pollution problems include Donetsk, Kiev, Komunarske, Makiivka, and Odessa.

Despite official claims that approximately 75 percent of all harmful substances potentially discharged from stationary point-sources in Ukraine are being intercepted and neutralized, uncontrolled or poorly controlled smokestacks dot the republic's industrial landscape and make the claims seem far too optimistic.

Over one-third of the emissions into the atmosphere originate from automobile transport. That source, which attains overwhelming proportions in cities with little industry, such as Uzhhorod (91 percent), Yalta, Poltava, and Khmelnytskyi (88 percent each), is aggravated by the use of leaded gasoline and inefficient engines as well as a lack of catalytic converters.

Almost all surface waters of Ukraine belong to the Black Sea and the Sea of Azov drainage basins. The high population density, heavy industrial development, and relatively low freshwater endowment of those basins, and the low governmental priority placed upon environmental protection until very recently, have given rise to chronic and serious levels of water pollution throughout Ukraine. Although a reported 81 percent of Ukraine's industrial water needs are being met by recirculating water-supply systems, in 1988 over 18.7 billion cu m of waste water were being discharged into bodies of surface water in the republic, over 2.6 billion cu m of which were highly polluted. Of those highly polluted waters, 2.145 billion cu m received inadequate purification, and the remaining 489 million cu m were discharged without any treatment whatsoever.

According to Goskompriroda (the Soviet State Committee on the Environment) the Dniester and the Danube are included among the most polluted bodies of water in the territory of the former Soviet Union. Hundreds of small rivers supply water for three-quarters of the villages

and half of Ukraine's cities. Widespread fear is growing in Ukraine that a substantial fraction of those water arteries are so polluted as to pose fatal health risks to the people who depend on them. Recent published accounts indicate that serious chronic water pollution levels exist along many stretches of the Azov and Black Sea coasts and estuaries, including many of the popular resort beaches in the Crimea. Groundwater pollution by industrial waste is another major problem in the Crimea. Severe pollution of the Dniester, the Inhulets, and the Donets, as well as the Dnieper and (especially since the 1986 Chernobyl accident) its tributaries, the Prypiat and the Desna, has been acknowledged. About one-half of the chemical fertilizers, herbicides, and pesticides applied in the fields are washed off into rivers. Moreover, surface runoff from industrial territories is highly contaminated and has been reported to be equivalent to 6–12 percent of the surface runoff in Donetske and Kharkiv oblasts. Finally, municipalities and industries still discharge untreated or inadequately treated waste water.

One of the areas suffering most from serious and chronic coastal water pollution is the Sea of Azov. That shallow and previously biologically rich and commercially productive body of water has experienced serious problems of industrial and municipal waste-water contamination and increased levels of salinity since the early 1970s. A primary cause of the sea's ecological deterioration has been the diversion for purposes of irrigation (up to 80 percent) of fresh, but not necessarily pure, water inflow from the Don and the Kuban rivers. As a result the sea's salinity has increased by more than 40 percent since the 1950s. Combined with pollution that increase has resulted in a dramatic drop in fish catches (by 60–90 percent). Despite repeated warnings and special government antipollution resolutions, the conditions in the Sea of Azov continue to deteriorate. Swimming beaches have now been closed along the entire shoreline in Donetske oblast.

Contamination by various radioactive isotopes, such as cesium-137, iodine-131, strontium-90, plutonium-239, and plutonium-240, from the Chernobyl nuclear accident have affected the air, land, and water of Ukraine and vast areas beyond it. Recorded but unreported radiation levels in Kiev a few days after the accident exceeded the maximum allowable levels by a hundredfold. Press reports claim that significant numbers of deaths by radiation sickness and elevated levels of spontaneous abortions, stillbirths, and birth defects and highly elevated rates of childhood leukemia have occurred in the affected areas. Those claims and other concerns are being researched by a host of scientists and medical professionals from Ukraine and other countries. Recent detailed field studies indicate that significant areas of agricultural and forest lands of Ukraine, Belarus, and Russia will remain unsafe for human occupancy and food production for upwards of eight thousand years. Nevertheless, thousands of people who were evacuated after the accident have returned to live and farm in these highly contaminated regions. Thus, the Chernobyl region, in fact, has become something of a living laboratory for the study of nuclear contamination.

Polohy. VI-17. A city (1989 pop 24,300) on the Konka River and a raion center in Zaporizhia oblast. It arose at the end of the 19th century as a workers' settlement during the construction of a railway line. In 1928–37 the town was called Chubarivka. It was granted city status in 1938. Polohy is a railway junction, and many of its enterprises service the railway. It also has a building-materials plant, a feed factory, an oil-extraction plant, and a metal-stamping plant.

Polohy kaolin and refractory-clay deposit (Polohivske rodovyshche kaoliniv i vohnetryvkykh hlyn). A deposit located on the banks of the Konka River in Polohy raion, Zaporizhia oblast. It covers an area 30 km in length and 5 km in width. The kaolin and clay are found in seams that are 1.5–15 m wide and 3–25 m deep. The estimated extractable reserves are 11 million t of kaolin and 44 million t of refractory clay (1981). The deposit was discovered in 1891 and surveyed in the 1950s. The clay is used to manufacture refractory and ceramic products.

Polonisms. Borrowings from the Polish language. They are found in Ukrainian phonetics (the sporadic Western Ukrainian pronunciation of *ŷ* instead of *l*), morphology (eg, *dobre, zle* instead of *dobri, zli* 'good, evil' pl, the southwestern dialectal form *tom dôbrom rukóm* [SU *tóju dôbroju rukóju*] 'with that good hand'), syntax (eg, the Western Ukrainian *rozzódyt'sja o xátu* [SU *jdét'sja pro xátu*] 'it concerns the house'), semantics (eg, *místo/hórod* 'town'), and, in a narrower sense, vocabulary, particularly as loanwords and calques in the 16th to 17th and 19th to 20th centuries. The number and character of Polonisms differed in the various Ukrainian dialects and periods of development of literary Ukrainian. They were absorbed through the printed medium from literary Polish (especially as calques by educated bilingual speakers) and through personal contacts with the politically and culturally dominant Poles (and, to a lesser extent, Polish agricultural colonies) in Galicia in the 14th to 20th centuries, in Right-Bank Ukraine and Volhynia in the 16th to 18th centuries, and in Left-Bank Ukraine in the 16th and 17th centuries.

The extent of Polish influence on the Ukrainian dialects varied with the time a given region spent under Polish political and cultural domination. The largest number of lexical Polonisms is found in the northern *Lemko dialects, where, as early as the 14th and 15th centuries, *-an/-am-* replaced the Polish nasal vowels *o, e* [eg, *gám̄ba, pljántátysja* (Polish [P] *gęba, płatać się*) 'mouth (vulgar), to get tangled'], and *Sian and *Podlachian-Kholm dialects; in those dialects many Ukrainian sound substitutions for Polish lexemes also developed (eg, *vórha, četyrdésjat, ton, kolotyťysja, hadáty* [P *warga, czterdzieści, ten, kłócić się, gadać*] 'lip, forty, this, to argue, to talk'). Polonisms were also used in dialects to mystify vulgarisms (eg, the curse *psjakrev* [P *psiakrew*] 'dog's blood!' [ie, 'damn!']). Traces of class- and religious-based Polonisms are evident in certain dialects; the largest number is found in the speech of the Podilian *latynnyky (eg, *popjélec* [P *popielec*] 'Ash Wednesday') and Subcarpathian petty gentry (eg, *vášec* [P *Waszec*] 'Your

Grace') suburban and small-town artisans and merchants (eg, *pidogónnja*, *korčmar* [P *podogonie*, *karzmarz*] 'crupper, innkeeper'). A particularly high percentage of Polonisms developed in the urban argot and slang of Western Ukraine (eg, *žlob* [P *źłób*] 'unpleasant/stupid person').

In literary Ukrainian the earliest Polonisms were social and political terms used in Galicia and Volhynia (eg, *kmet'*, *zemjane*, *potreba* [P *kmieć*, *ziemianie*, *potrzeba*] 'peasant, landed nobility, need'). Their number increased considerably in the period of the Lithuanian-Ruthenian state and until the second half of the 17th century, particularly in publicistic literature and in chancery documents. In the literary and official language of the 17th century, phonetic Polonisms assumed the stylistic function of Church Slavonicisms – to create word forms different from those used by commoners (eg, *bronjúj*, *krwávuj* [P *brońić*, *krwawy*] 'I defend, bloody'); perhaps the poetic use of certain Polonisms in songs (eg, *zlóto*, *grěčnyj* [P *złoto*, *grzeczny*] 'gold, polite') is a remnant of that use. In 19th- and 20th-century literary Ukrainian many Polish scientific and journalistic calques (eg, *parystokopýtnyj*, *objátý katédru* [P *parzystokopytny*, *objąć katedrę*] 'cloven-hoofed, to take up a [university] chair') superseded Church Slavonic and Latin terms; many of the calques were taken from Latin or German (eg, *vplyv*, *lystonósha* [P *wplyw*, *listonosz*] from the German *Einfluss*, *Briefträger*] 'influence, mailman'). Most German, Latin, Italian, and French and some Czech loanwords entered literary Ukrainian and the dialects via Polish (eg, *lýcar*, *ratús(a)*, *cex*, *vuxnál'*, *pljáška*, *kóštuvátý* [P *rycerz*, *ratusz*, *cech*, *hufnal*, *flaszka*, *kosztować*] 'knight, town hall, guild, horse-shoe nail, bottle, to cost' from the German *Ritter*, *Rathaus*, *Zeche*, *Hufnagel*, *Flasche*, *kosten*; *rácija*, *krókis*, *burják*, *kóliř* [P *racja*, *krokus*, *burak*, *kolor*] 'reason, crocus, beet, color' from the Latin *ratio*, *crocus*, *borago*, *color*; *škarpétka* [P *skarpetka*] 'sock' from Italian *scarpa*; *etažérka* [P *etażerka*] 'bookshelf' from French *étagère*; *vłasnyj*, *bráma* [P *własny*, *brama*] 'one's own, gate' from Czech *vlastní*, *brama*).

Polonisms can be recognized by the phonetic features distinguishing them from words of Ukrainian origin, especially by stress (eg, *xlópec'*, *krílyk*, *vydélka*, *kovádlo*, *skárha*, *partáč*, *sejm*, *léps'kyj*, *nikčémnyj*, *krévnyj*, *zvómpyty*, *pónčyk*, *ks'onáz*, *pýsar* [P *chłopic*, *królik*, *widelec*, *kowadło*, *skarga*, *partacz*, *łebski*, *nikczemny*, *krwony*, *zwąpčić*, *pączek*, *ksiądz*, *pisarz*] 'boy, rabbit, fork, anvil, grievance, tinker, parliament, fine, despicable, relative, to despair, doughnut, priest, scribe/writer'). They should be distinguished from common Polish-Ukrainian lexemes in the Western Ukrainian dialects (eg, *zdumítysja*, *nadarážátysja*, *xovstátý*, *dídýč*, *perejá* 'to be astonished, to laugh/scoff at, to whip, heir, row of houses').

Western Ukrainian purists waged a struggle against the use of non-calque Polonisms and tried to eliminate the use of old eastern-Ukrainian Polonisms (eg, *doščéntu*, *dopíru*, *závše* [P *do szczytu*, *dopiero*, *zawsze*] 'totally, just now, always'). In the 1930s there was an official campaign in Soviet Ukraine to expurgate Polish calques that entered the Ukrainian language in the 19th and 20th centuries. They were replaced by Russianisms or by loanword equivalents that had entered the Russian language (eg, *bihún* [P *biegun*] was replaced by the Russian *póljus* [from the Greek *polos*] 'pole'). In contemporary Standard Ukrainian most Polonisms that were absorbed centuries ago and are used in the Left-Bank dialects have been retained (eg, *pévnyj*, *mic'*, *obicjátý*, *gedz'*, *kepkuvátý*, *pánstvo* [P *pewny*,

moc, *obiecać*, *giez*, *kiepkować*, *państwo* 'certain, strength/power, to promise, gadfly, to deride/mock, Mr and Mrs/ladies and gentlemen').

Polonisms in the Ukrainian language have been studied by P. Rastorguev, I. Ohiienko, I. Zilynsky, A. Martel, Z. Stieber, K. Dejna, J. Tarnacki, R. Richhardt, G.Y. Shevelov, L. Humetska, M. Khudash, F. Tkach, V. Witkowski, F. Nepyivoda, D. Hrynchysyn, V. Akulenko, M. Łesiów (Lesiv), T. Hołyńska-Baranowa, T. Lehr-Splawiński, O. Horbach, M. Onyshkevych, V. Anichenko, and V. Rusanivsky.

The Transfiguration Church in Polonne (1612)

Polonne. III-8. A city (1989 pop 21,700) on the Khomora River and a raion center in Khmelnytskyi oblast. It is first mentioned in historical documents in 996, when Prince Volodymyr the Great granted it to the Church of the Tithes. In the second half of the 12th century a fortress was built there by the Kievan princes to defend the settlement against nomadic raids. In the 13th century the town was attacked by the Tatars. Kievan and Volhynian princes competed for Polonne before it became part of the Principality of Galicia-Volhynia. In the second half of the 14th century it was annexed by Lithuania. It received the rights of Magdeburg law in the 16th century. After the Union of Lublin in 1569, it was acquired by Poland, and in 1648 it was seized by the Cossacks and local peasants. It was recaptured by the Poles, and remained under their rule until the partition of Poland in 1793. Under Russian rule it was part of Novohrad-Volynskyi county, Volhynia gubernia. The town became a center of the porcelain industry in Ukraine and has a museum based on a porcelain factory

built in 1889. Today Polonne continues to produce porcelain and decorative ceramics, as well as bricks and building materials.

Nataliia Polonska-Vasylenko

Simeon Polotsky

Polonska-Vasylenko, Nataliia [Polons'ka-Vasylenko, Natalija], b 12 February 1884 in Kharkiv, d 8 June 1973 in Dornstadt, near Ulm, Germany. Historian and archeologist; full member of the Historical Society of Nestor the Chronicler from 1912, the Tavriia Learned Archival Commission from 1916, the Shevchenko Scientific Society from 1947, and the Ukrainian Free Academy of Sciences from 1948; daughter of D. *Menshov and wife of M. *Vasylenko and O. *Morhun. A graduate of the Kiev school of Higher Courses for Women and Kiev University (1913), she was a privatdocent at the university (1916–20) and director of its archeological museum. Under Soviet rule she was a professor at the Kiev Institutes of Geography, Archeology (1918–25), and Art (1927–30) and a research associate at the VUAN (1924–33), the Kiev Central Archive of Old Documents (1925–7), and the AN URSR (now ANU, 1937–41). In 1940 she defended her doctorate and became a professor at Kiev University (1940–1). During the Nazi occupation she directed the Kiev Central Archive of Old Documents (1942–3). As an émigré she was a professor at the Ukrainian Free University (UVU) in Prague (1944–5) and Munich (1945–73; dean of its philosophy faculty from 1966) and at the Theological Academy of the Ukrainian Autocephalous Orthodox church in Munich (1946–52). From 1965 she was vice-president of the Ukrainian Historical Association.

Polonska-Vasylenko is the author of numerous studies in Ukrainian archeology and history and of reminiscences about Ukrainian civic figures and scholars. They include a Russian cultural history atlas (3 vols, 1913–14); booklets on Kiev during the reigns of Princes Volodymyr the Great and Yaroslav the Wise (1944) and the theory of the Third Rome in 18th- and 19th-century Russia (1952); a history of the VUAN and AN URSR (2 vols, 1955, 1958); a monograph (her revised doctoral diss) titled *The Settlement of the Southern Ukraine (1750–1775)* (vol 4–5 [1955] of *The Annals of the Ukrainian Academy of Arts and Sciences in the US*); a book-length article on Soviet Ukrainian historical scholarship in the 1920s and Stalinist repression of Ukrainian historians (*Zapysky NTSh*, vol 173 [1962]); a book on the historical foundations of the Ukrainian Autocephalous Orthodox church (1964); booklets titled *Ukraine-Rus' and Western Europe in 10th–13th Centuries* [sic] (1964) and *Two Conceptions of the History of Ukraine and Russia* (1968); many studies on

the history of the 18th-century Zaporizhia and Southern Ukraine, 14 of which were republished as *Zaporizhzhia XVIII stolittia ta ioho spadshchyna* (The 18th-Century Zaporizhia and Its Legacy, 2 vols, 1965, 1967); a book about Ukraine's prominent women (1969); and a general history of Ukraine (2 vols, 1972, 1976), which appeared in an abridged German translation as *Geschichte der Ukraine von den Anfängen bis 1923* (1988). The fullest bibliographies of her works appear in I. Gerus-Tarnavetska's booklet *Nataliia Polons'ka* (1974) and in *Jahrbuch der Ukrainekunde* (1987).

A. Zhukovsky

Polonsky, Fedir [Polons'kyj], b 27 February 1887 in Reshetylivka, Poltava county, Poltava gubernia, d ? Geologist and mining engineer. In the 1920s he headed the Department of Useful Minerals at the Ukrainian Scientific Research Institute of Geology and oversaw the VUAN Geology Cabinet. He compiled *Slovnnyk pryrodnychoi terminolohii* (Dictionary of Natural Science Terminology, 1928). He was arrested during the Stalinist terror and in 1937 was sent to Siberian labor camps, where he disappeared.

Polonsky, Yoanikii [Polons'kyj, Joanikij], b 1742 in Polonne, Volhynia, d 7 February 1819 in Kamianets-Podilskyi. Orthodox churchman. He studied at the Kievan Mohyla Academy and then taught in theological seminaries and served as rector of the Smolensk Theological Seminary. He was consecrated as the first bishop of Bratslav-Podilia (1795). In 1797 he founded the eparchial seminary in Sharhorod, which in 1806 was transferred to Kamianets. He was elevated to the rank of archbishop in 1801.

Polonyk, Vasyl, b 13 February 1930 in Pryvillia, Iziium okruha. Sculptor. He studied at the Voroshylovhrad Art School (1945–50) and under M. Lysenko at the Kiev State Art Institute (1950–6). He has sculpted statues and portraits, such as *At the Mine Face* (1956), *Miner* (1961), *Sapper* (1965), *Female Construction Worker* (1967), and *Portrait of a Worker* (1970), and the Victory monument in Dmytrivka (1976) in the socialist realist style.

Polonynian Beskyd. The highest and most compact section of the Ukrainian *Carpathian Mountains. Running northwest to southeast in a ridge situated between the Inner Carpathian Valley and Maramureş Basin on the southwest and the Middle Carpathian Depression to the northeast, the Polonynian Beskyd reaches heights of over 2,000 m. It connects with the Low Beskyd in the northwest and the East Bukovynian Beskyd in the southeast.

Polotniuk, Daryna. See Vilde, Iryna.

Polotsky, Simeon [Polockij] (secular name: Samuil Petrovsky-Sitnianovich), b December 1629 in Polatsk, Belarus, d 4 September 1680 in Moscow. Churchman and writer; originator of Russian syllabic verse and a pioneering educational and cultural westernizer in Russia. He graduated from the Kievan Mohyla College (1651–2) and also studied at the Vilnius Jesuit college. After taking monastic vows at the Polatsk Epiphany Monastery in 1656, he became a teacher at the brotherhood school there. Having moved to Moscow in 1663, he taught Latin at the Zaikonospasskii Monastery school from 1665. As a teacher, court

poet, and homilist in Moscow he was an erudite representative of Belarusian and Ukrainian culture and of Kievan scholarship. Applying what he had read and studied in Kiev, he wrote many works; they include the scholastic polemical tract *Zhezl' pravleniia ...* (Scepter of Rule ..., 1667), the compendium of knowledge *Venets very kafolicheskoi* (The Crown of the Catholic Faith, 1670), the encyclopedic primer in verse *Vertograd' mnogotsvetnyi* (The Multiflorous Orchard, 1678), the large panegyric poetry collection *Rifmologion* (1680), a versified translation of the Psalms of David (1680), two volumes of homilies (1681, 1683), and two of the first Russian school dramas. His collected works were published in Moscow in 1953.

Polous, Fedir, b and d ? Zaporozhian Cossack leader. He led a garrison of registered Cossacks at Khortytsia Island and directed their campaign at Budzhak against the Turks. He joined S. Nalyvaiko and M. Shaula in battling Polish-Lithuanian forces in 1594–6, and they advanced as far as Mozyr, in Belarus. In 1597–8 Polous was the Zaporozhian otaman; his further fate is unknown.

Polovets, Semen [Polovec'] (Połowiec), b and d ? Cossack officer. He was colonel of Bila Tserkva regiment (intermittently in 1653–8) and a supporter of I. Vyhovsky. He served as an envoy to Moscow in 1655. He later became a general quartermaster under P. Teteria (ca 1664), an envoy of the Korsun Council to Turkey (1669), and a general judge under P. Doroshenko (ca 1671). Polovets's daughter, Anna (the widow of S. Frydrykevych, colonel of Bila Tserkva regiment in 1664), married Hetman I. Mazepa ca 1668–9.

Polovko, Ivan, b 12 July 1886 in Ichnia, Borzna county, Chernihiv gubernia, d 24 April 1967 in Kiev. Meteorologist and climatologist. He graduated from Kiev University (1912) and remained there to teach and conduct scientific work. He was instrumental in establishing the first meteorological service in Ukraine and worked in the Hydro-meteorological Service of the Ukrainian SSR (1919–57). He contributed significantly to the study of climate in Ukraine, as well as of actinometry, thermal systems in the air and ground, and ground radioactivity.

Polovtsians. See Cumans.

Polovy, Vasyl [Pol'ovyj, Vasyl'], b 22 April 1936 in Kryvyi Rih. Painter. Expelled from the Leningrad Institute of Applied Art in 1963 for 'avant-gardism,' he found work as a muralist in Moscow, where he became a member of the Union of Artists and began using Ukrainian themes in his still lifes, landscapes, and figural compositions (eg, *Carolers* [1968] and *Wedding Train* [1968]). He moved to Lviv in 1970. In 1980 he was expelled from the Union of Artists for his religious beliefs. He was reinstated in 1988, but emigrated to the United States in 1990.

Polovyk [Pol'ovyk]. A minor deity in charge of the fields in Ukrainian folk mythology. He was portrayed as a demon of human form, covered with hair, with large claws, calflike ears, a tail, and batlike wings. He lived in holes, ravines, or open grave pits. During harvest festivals a sheaf of uncut wheat twisted into a 'beard' symbolizing future harvests was left in the cleared fields to appease *Polovyk*.

Poloz, Mykhailo (Polozov), b 1890, d 3 November 1937 on Solovets Islands. Political figure. A leading member of the Ukrainian Party of Socialist Revolutionaries, in 1917 he sat on the Central Rada and served as its representative at the war ministry of the Provisional Government. In 1918 he attended the Peace Conference in Brest-Litovsk with the Ukrainian delegation and helped organize an abortive left Socialist-Revolutionary coup against the Central Rada. An advocate of collaboration with the Bolsheviks, he joined Kh. Rakovsky's government in 1919 and served as chairman of the Supreme Council of the People's Economy. As one of the founders of the Ukrainian Communist party (of Borotbists), he opposed its dissolution and absorption in the CP(B)U. On V. Lenin's recommendation he was appointed representative of the Soviet Ukrainian government to the Russian Soviet government, and then served as Ukraine's people's commissar of finance. He was elected to the CC CP(B)U in 1927 and 1930. He was arrested for allegedly belonging to the Ukrainian Nationalist Organization (1930) and tried for plotting with the Bukharin opposition to separate Ukraine from the USSR. He was imprisoned in the Solovets Islands in 1934 and shot a few years later.

Polozhii, Heorhii [Položij, Heorhij], b 23 April 1914 in the Transbaikal region, Russia, d 26 November 1968 in Kiev. Mathematician; corresponding member of the AN URSS (now ANU) from 1967. After completing his studies at Saratov University (1937), he taught there and at Kiev University (1949–68). He obtained important results in the theory of functions of complex variables, approximation theory and numerical methods, mathematical physics, applied mathematics, elasticity, and the theory of filtration. In 1962–6 he developed the theory of the new class of (p,q) -analytic functions and the domain of its application. He also proposed a method for summary representation of numerical solutions of problems in mathematical physics.

Polozov, Viacheslav, b 1952 in Mariupol, Donetsk oblast. Opera singer (dramatic tenor). He was the principal soloist of the Minsk Opera and appeared as a guest performer at the Bolshoi and Kiev opera and ballet theaters. In Italy he appeared at La Scala, the Arena di Verona, and the Opera Roma. After defecting from the Soviet Union he made his American debut (the summer of 1986) in a concert performance of G. Puccini's *Tosca* with the Pittsburgh Symphony. Since then he has performed in New York, Washington, DC, Chicago, and San Francisco opera theaters. His debut with the Metropolitan Opera (January 1987) was in the part of Pinkerton in G. Puccini's *Madame Butterfly*.

Poltava, Leonid, b 24 August 1921 in Poltava gubernia, d 19 April 1990 in New York. Writer. As a postwar émigré he lived in Germany, Paris, Madrid, and the United States (from 1958). He directed the Ukrainian section of Spanish National Radio (1952–3) and was an editor of émigré periodicals, such as *Ukrains'ki visti*, *Ukrainets'-Chas*, *Svoboda*, *Vyzvol'nyi shliakh*, *Krylati*, and *Ukrains'ke narodne slovo*. He is the author of the poetry collections *Za muramy Berlinu* (Behind the Walls of Berlin, 1946), *Zhovti karuseli* (Yellow Carousels, 1948), *Ukrains'ki baliady* (Ukrainian Ballads, 1952), *Ryms'ki sonety* (Roman Sonnets, 1958), *Bila trava*

Leonid Poltava

Petro Poltava

(White Grass, 1963), *Valtorna* (1972), *Iz espans'koho zshytka* (From a Spanish Notebook, 1978), *Smak sontsia* (A Taste of Sun, 1981), and *Poemy* (Poems, 1983); the epic poem *Eneida moderna ...* (The Modern Aeneid ..., 1955); the plays *Choho shumliat' duby* (Why the Oaks Rustle, 1950) and *Zametil'* (The Blizzard, 1967); the story collection *U vyshnevii kraïni* (In the Cherry Land, 1952); the adventure novella *Chy ziïde zavtra sontse?* (Will the Sun Rise Tomorrow?, 1955); the historical novel *1709* (1960); several longer poems ('Slovo pro Ukraïnu' [A Word about Ukraine, 1970]) and poems and stories for children; four opera librettos; and a study of the image of S. Bandera in literature and art (1979). He edited the poetry anthology *Slovo i zbroïa* (The Word and Arms, 1968) and an anthology of articles and poetry about Kiev (1984).

Poltava, Petro (nom de guerre of Petro Fedun), b 1919 in Brody county, d 23 December 1951 in Stanyslaviv oblast. UPA political officer and OUN publicist. He served on the National Executive of the youth wing of the OUN (Bandera faction) and on the editorial board of *Iunak* (1941–3). Then he was chief of political education for UPA-West (1944–6), chief political officer of UPA (1946–9), chief of the press bureau of the Ukrainian Supreme Liberation Council (UHVR), vice-chairman of its General Secretariat (1950–1), and member of the OUN leadership (1948–51). His articles on the national state, the concept of an independent Ukraine, and the battle plan for Ukrainian independence make him one of the leading ideologists of the UPA. A selection of his works was published under the title *Zbirnyk pidpil'nykh pysan'* (Collection of Underground Writings, 1959). He was awarded the highest UPA decorations: the Gold Cross of Combat Merit and the Medal for Combat in Extreme Circumstances.

Poltava. IV-15. A city (1990 pop 317,000) on the right bank of the Vorskla River and the administrative center of Poltava oblast. It is also a major industrial and communications center.

History to 1914. The archeological evidence shows that the city site was inhabited as early as the 7th or 6th century BC. The city is first mentioned, as Ltava, in the Hypatian Chronicle under the year 1174. In 1240 it was captured by the Tatars, and from the second half of the 14th century it belonged to the Grand Duchy of Lithuania. After a long si-

lence its name appears in a charter of Grand Duke Vytautas in 1430. In 1569 Poltava became part of the Polish Commonwealth. In the Hetman state set up by B. Khmelnytsky it served as a regimental center (1648–1775) and flourished as a trading town. It obtained the rights of *Magdeburg law in the 17th century. The town suffered losses in 1658, when its colonel, M. Pushkar, rebelled against Hetman I. Vyhovsky, and in the 1690s, when it was attacked by the Crimean Tatars. During the Russian-Swedish War (1708–9) it withstood the two-month siege by Swedish and Ukrainian forces and witnessed the allies' defeat by Peter I on 8 July 1709. With the abolition of the Hetman state Poltava became a county center of New Russia gubernia (1775–83), Katerynoslav vicegerency (1784–95), and Little Russia gubernia (1796–1802). Then, for over a century, it served as the administrative center of Poltava gubernia.

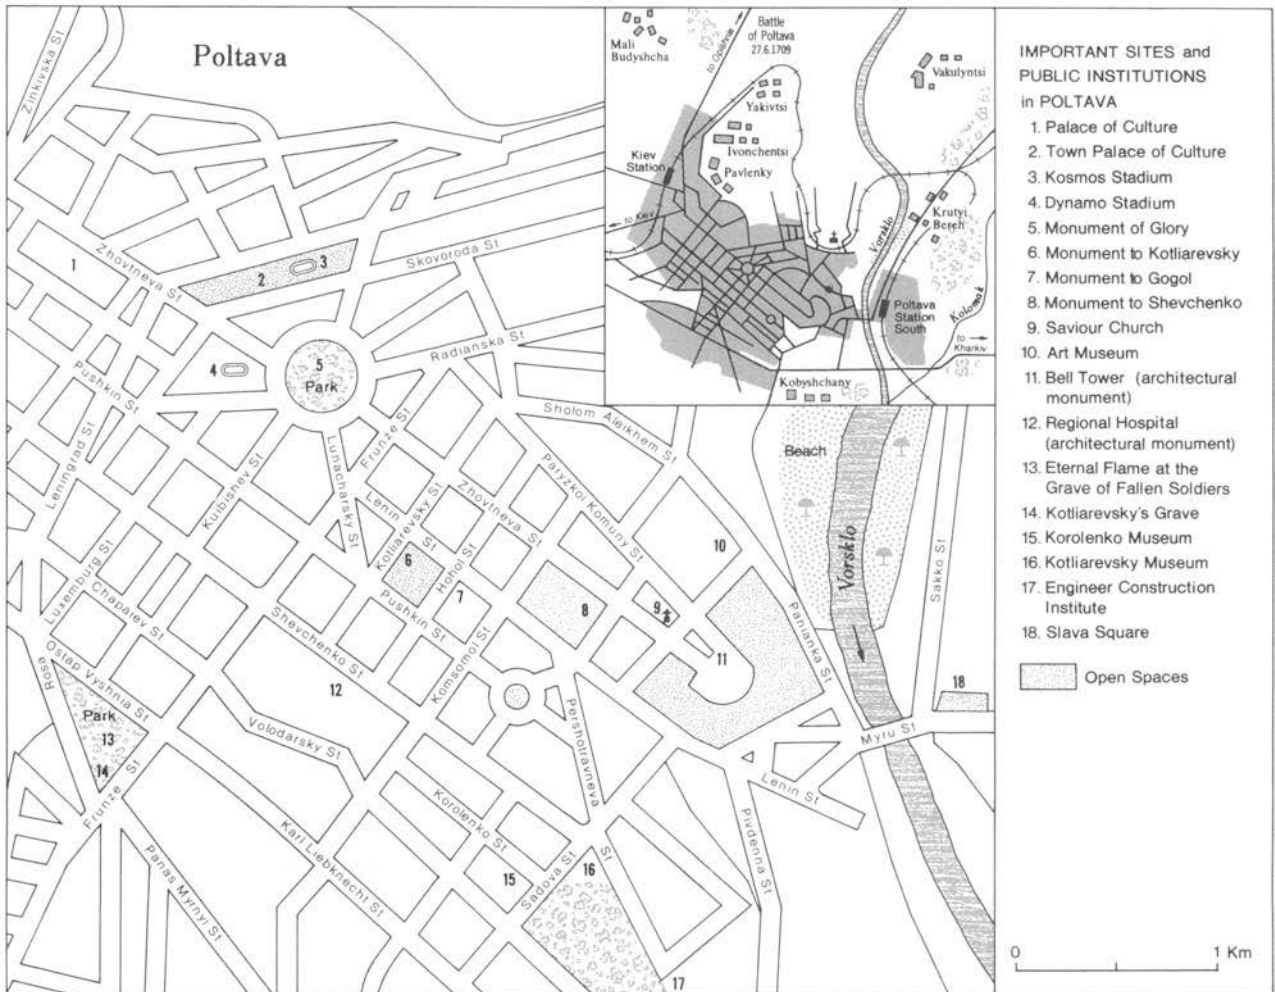

Poltava in the 18th century (painting by Angelstein)

At the end of the 18th century Poltava covered a flat plateau that descended abruptly to the Vorskla River and was dissected by several ravines. In the southeastern corner of the plateau stood a fortress, the earthworks and moats of which encircled the administrative buildings, cathedral, and other churches. The Monastery of the Elevation of the Cross was built in 1650 by Pushkar outside the town walls. In 1798–9 Poltava's population reached 7,200.

Cathedral of the Elevation of the Cross (1689–1709) in Poltava

In the 19th century Poltava, as the gubernia capital and the seat of the governor-general of Little Russia, was completely rebuilt according to a general plan approved by the imperial government in St Petersburg on 10 February 1803. The old fortifications were leveled, and the new town was designed around Kruhla Square, a circular plaza 345 m in diameter. Eight streets radiated at equal angles from the square to the other districts. At the center of the square the Column of Glory was erected in 1811 to commemorate the Russian victory over the Swedish-Ukrainian allies. The main avenue of the town was Oleksandrivska Street (later Radianska). In the 1830s the central square was planted with trees and converted into a public park. The establishment of Poltava eparchy in 1803 contributed to the town's importance, although the bishop's seat was not transferred from Pereiaslav to Poltava until 1847. Prince A. Kurakin, the governor-general of Little Russia, fostered the town's growth.

A textile (woolen-cloth) industry was established in the town by German families, who settled there in 1808. In 1852 the St Elijah Fair, one of the largest wool and horse fairs in Ukraine, was transferred to Poltava from Romeni. In 1863 alone, 16.9 million rubles' worth of goods was sold at the fair. New railways built in the 1870s and 1890s provided a stimulus to the town's economy. Toward the end of the 19th century, however, competition from Kharkiv

undercut Poltava's economic position. It became a provincial administrative-commercial town with manufacturing limited mostly to cottage industry. The more important branches were food processing (brewing, dairying, flour milling, and tobacco processing) and light industry (hosiery-making). The larger enterprises employed only about 2,000 people. The population grew quite rapidly, from 8,000 in 1802 to 15,500 in 1858, 29,500 in 1863, 53,700 in 1897, and 60,100 in 1902. Despite its population growth and physical expansion, at the beginning of the 20th century Poltava was still a semirural town. In 1882 scarcely 9.4 percent of the buildings were stone, and in 1910 barely 8 percent of the roads were hard surface. The houses in the low-lying suburbs, mostly Cossack homesteads, were completely rural in character. At the end of the 19th and the beginning of the 20th century, a number of graceful, mostly public, buildings, such as the Poltava Zemstvo Building (1903-7), were constructed.

Cultural and political life. In the last quarter of the 18th century Poltava began to develop into an important cultural center. The sons of some regimental officers (Paskevych, Hnidych, and others) studied at German universities. In the 1770s P. Paskevych, a fellow of the standard, opened a bookstore and sold Russian and other foreign publications. The Poltava Slavonic Seminary (1770-80) contributed to the town's cultural life. In the

first quarter of the 19th century Poltava continued to develop, and its culture became increasingly Ukrainian. The Ukrainian autonomists, including V. *Kapnist and V. *Lukashevych, were active in the local Masonic lodge, which called itself Love of Truth, and in the *Little Russian Secret Society. D. *Bantysh-Kamensky wrote his *Istoriia Maloi Rossii* (A History of Little Russia, 1822) in Poltava. In the 1840s the local members of the Cyril and Methodius Brotherhood, such as V. Bilozersky, Yu. Andruzky, and D. Pylchikiv, spread its ideas in the region. In 1861 a hromada of about 60 members, including D. Pylchikiv, O. Konysky, V. Loboda, V. Kulyk, M. Zhuchenko, and Ye. Myloradovych, arose in Poltava. It conducted educational and cultural work until the authorities launched their reactionary policies against Ukrainian culture in 1863.

In the 19th century Poltava was an important educational center: a gymnasium was opened (1805), an institute for the daughters of the nobility and a clerical school (1818), a cadet school (1840), and a theological seminary (1797–1819 and 1862–1917). Many Ukrainian cultural figures graduated from the town's schools: M. Drahomanov, M. Ostrohradsky, L. Hlibov, and M. Starytsky were graduates of its gymnasium, and V. Hohol-Yanovsky, O. Bodiatsky, L. Borovykovsky, and S. Petliura attended its seminary. N. Gogol studied at the Poltava county school in 1818–19. Later in the century, the Poltava Gubernia Zemstvo played a leading cultural and scientific role: it published over 110 scholarly volumes on the Poltava region, including a collection of materials for assessing the land in the gubernia, a collection of economic statistics, and a series of yearbooks. In 1891 the zemstvo administration established a museum. From 1903 the Poltava Gubernia Learned Archival Commission took the lead in organizing research on the region.

Poltava played a prominent role in the Ukrainian literary renaissance of the 19th century. The writers I. *Kotliarevsky, Borovykovsky, Starytsky (1850s), Konysky, and P. Myrny (1871–1920) and the Russian writer of Ukrainian

origin V. Korolenko (1903–21) lived and worked in Poltava. In 1838 the weekly *Poltavskie vedomosti* and in 1863 *Poltavskie eparkhialnye vedomosti* began to appear there. After the Revolution of 1905 the Ukrainian weekly *Ridnyi kraj* was published by H. Markevych, who established himself as a publisher in Poltava.

Poltava has a long theatrical tradition. One of the first theaters in Ukraine was built there in 1808. Kotliarevsky wrote and staged his plays there in 1818–21. The first professional performances of his plays were done in Poltava by O. Kalynovsky and J. Stein's touring company and involved the actors M. Shchepkin and K. Nalotova. Then K. Solenyk performed in Poltava with Stein's and L. Mlotkovsky's companies. The famous troupes of M. Kropyvnytsky, M. Sadovsky, and P. Saksahansky, with stars such as M. Zankovetska, H. Zatyrevych-Karpynska, I. Tobilevych, and M. Sadovska, visited Poltava. In 1906 Sadovsky organized a company and prepared a repertoire in Poltava for his first permanent theater, which he set up in Kiev in 1907.

In the early 19th century, concerts in Poltava were performed by serf orchestras and choirs. The composers A. Jedlička (from 1848) and P. Shchurovsky (early 1870s) worked there. In the 19th century the sculptor L. Pozen and at the beginning of the 20th century the painters M. Yaroshenko, S. Vasylykivsky, V. Krychevsky, P. Martynovych, and M. Havrylko lived and worked in Poltava.

By the early 20th century the Ukrainian movement was well entrenched in Poltava. The dedication of the Kotliarevsky monument on 30 August 1903 drew to Poltava representatives of the national movement from all parts of Ukraine. In 1906 the Prosvita society was set up. In 1900 a circle of the Revolutionary Ukrainian party was formed in Poltava. Later the Society of Ukrainian Progressives (TUP) was active there.

History after 1914. During the brief period of Ukrainian independence Poltava was an important locus of Ukrainian political and cultural activity. In May 1917 TUP organized a conference of 600 delegates from the Poltava region. A. Livytsky was appointed the UNR gubernia commissioner, and V. Andriievsky, education commissioner. *Vistnyk Poltavs'koho huberniial'noho komitetu* was published in Ukrainian and Russian.

Under the Soviet regime Poltava became an okruha (1925–30), a county (1930–7), and finally an oblast center. During the Second World War it suffered extensive destruction, particularly in 1943, but it was rebuilt in the late 1940s and early 1950s. In 1957 a plan of development for the city was worked out. The city is built up more densely than before: it covers an area of 8,341 ha, of which 2,543 ha are open space and 5,100 are built up. New building ensembles have appeared near Teatralna and Pryvokzalna squares. New residential districts have been developed in the northwest near the Kiev–Kharkiv highway, in the northeast near the Poltava battlefield, and in the valley along the Vorskla River. The city was divided into three administrative raions.

Poltava's population grew from 60,100 in 1912 to 92,600 in 1926, 128,500 in 1939, 143,100 in 1953, and 220,000 in 1970. Of the larger cities in Ukraine Poltava has the highest percentage of Ukrainians. In 1926, 68.3 percent of its residents were Ukrainian, 20.1 percent were Jewish, and 8.9 percent were Russian. In 1959, 80 percent were Ukrainian, 15 percent were Russian, and 3 percent were Jewish.

Ivan Kotliarevsky's home in Poltava (now a state preserve)

The population growth can be attributed largely to the change in the structure of Poltava's economy: since the end of the 1920s, industrial development has been emphasized. Today 34.8 percent of the city's jobs are in industry, 11.1 percent are in transportation, and 8.3 percent are in construction. There are over 50 large industrial enterprises in Poltava. The largest branch is the food industry, which accounts for 40 percent of the industrial output. It includes an oil-, lard-, and meat-processing complex, a poultry packing complex, flour mills, and a confectionery factory. Light industry, which includes a cotton-spinning plant, a sewing factory, a knitwear and glove factory, an embroidery factory, and a leather footwear factory, accounts for about 20 percent of the industrial output. About 25 percent of the output is produced by the machine-building and metalworking industries, which include a locomotive repair yard, machine building for chemical industry, a turbine plant, an electrical machinery factory, an engine foundry, and a meat and dairy machinery plant. The chemical industry produces glass and plastics. The building-materials industry and the printing industry are also important in the local economy.

Education and culture. The Ukrainian Learned Society for the Study and Preservation of Historical and Artistic Monuments of the Poltava Region was founded in 1919. It managed to publish the first volume of its proceedings. In the 1920s it was reorganized into the Poltava Scientific Society of the All-Ukrainian Academy of Sciences; its membership included N. Mirza-Avakians, V. Shcherbakivsky, D. Solovei, M. Rudynsky, V. Shchepotiev, P. Klepatsky, and M. Buzhynsky. Owing to the efforts of the Prosvita society and the support of D. Bahalii, M. Sumtsov, and other faculty members of Kharkiv University, the historical-philological faculty was set up in 1918. In 1920 it was merged with the Pedagogical Institute (the former Teachers' Institute) to form the Poltava Institute of People's Education, which in 1934 was turned into the Poltava Pedagogical Institute. The Soviet pedagogue A. *Makarenko worked in Poltava in 1914–20. Today Poltava has four higher educational institutions besides the pedagogical institute: a civil-engineering institute, an agricultural institute, a co-operative institute, and a medical stomatological institute. There are 11 special secondary schools and 9 vocational schools. The chief research institutes are the Poltava Gravimetric Observatory, the Poltava Agricultural Research Station, and the Poltava Scientific Research Institute of Hog Raising.

The city supports two theaters (the Ukrainian Music and Drama Theater and the puppet theater), a philharmonic orchestra, and six music schools. It has six major museums: the Regional Studies Museum, the Art Museum, the Museum of the Battle of Poltava, and the Kotliarevsky, Korolenko, and Myrny literary memorial museums.

Architecture. A small proportion of the city's historical monuments have been preserved. Only the baroque cathedral (1689–1709) and its four-tier bell tower (1786, restored in 1954–5) remain of the Monastery of the Elevation of the Cross. Of the churches that were once within the town fortifications, only the wooden Transfiguration Church (1705–9), in a stone encasing, and the bell tower (1801) of the destroyed town cathedral (1748–70) survive. The building ensemble on Kruhla Square designed by A. Zakharov in 1805–11 is a fine example of classicism. It includes the residences of the governor-general, governor

A modern residential district in Poltava

(now the building of the oblast trade unions), and vice-governor, the gubernia office building (now the building of the oblast executive committee), the nobles' assembly building (now the Kotliarevsky Cinema), designed by M. Onyshchenko, and the municipal hospital, built by M. Amvrosimov. The Column of Glory at the center of the square was built by T. de Tomon and sculpted by F. Shchedrin. All those buildings were heavily damaged in 1943 and restored in 1950. The building of the Poltava Gubernia Zemstvo (now of the Poltava Regional Studies Museum), designed by V. Krychevsky in 1903–7, painted by S. Vasylykivsky, and ornamented by P. Yukhymenko, embodies the traditional forms of Ukrainian folk architecture. Modern ensembles have been built on Pryvokzalna, Teatralna, and Dzerzhynsky squares. One of the better examples of contemporary styles is the Ukrainian Music and Drama Theater (1952–7), designed by O. Malysenko and O. Kralova. The more important monuments in Poltava are those to Kotliarevsky (1903, by L. Pozen), Gogol (1915, by L. Pozen), Myrny (1951, by M. Vronsky and O. Olinyk), and T. Shevchenko (1926, by I. Kavaleridze).

Poltava is one of the greenest cities in Ukraine. Its largest park is Petrovsky. Since 1960 the city has been supplied with natural gas. Its public transportation system uses buses and streetcars.

Poltava, Battle of. The turning point in the Great Northern War (1700–21) between Sweden and Russia. When Hetman I. *Mazepa learned that Tsar *Peter I intended to abolish the autonomy of the Hetmanate, he began secret negotiations with *Charles XII of Sweden to ensure that Ukraine would not be annexed by Poland in the event of a Swedish victory. After the main Swedish army entered Ukraine, Mazepa openly sided with Charles against Peter.

Because of the harsh winter of 1708–9 and a series of military defeats the situation of the Swedish army in Ukraine became precarious. The assistance Charles expected from Turkey and the Crimean Khanate did not materialize, and the Polish army of King Stanislaus I Leszczyński and a Swedish corps were forced to remain in

Battle of Poltava (18th-century engraving)

Poland to fight the supporters of Augustus II. Charles's only success at that time was enlisting the support of Otman K. *Hordiienko and his army of 8,000 Zaporozhian Cossacks in April 1709. Semienircled by the Russians, Charles chose not to retreat to Volhynia (as his generals counseled) but to advance to the Vorskla River and thence on to Moscow via Kharkiv and Kursk. Several fortified cities on the way encumbered Charles's advance. One such city was Poltava, situated at the intersection of important routes to Southern, Right-Bank, and Slobidska Ukraine and the Don region. It was defended by a garrison of 4,300 Russian soldiers and 2,600 Ukrainian volunteers commanded by Gen A. Kelin.

In early May 1709, on Mazepa's advice, Charles decided to capture Poltava. Having failed to take it by storm, he besieged and bombarded the hungry city. Peter arrived to relieve Poltava and decided his army of 42,500 soldiers and 102 cannons would attack the Swedes on 10 July. Cossack forces loyal to Peter under the command of Hetman I. Skoropadksy cut off possible Swedish retreat to the Dnieper between Pereiaslav and Kremenchuk. Charles had 31,000 men but only 4 cannons; 6,000 of his soldiers were engaged in maintaining the siege or guarding the Vorskla rear. Mazepa's small force was held in reserve to protect the Swedish western flank and ensure that Kelin would not attack from the fortress.

When Charles learned, during the night of 7 July, that a Kalmyk army of 40,000 would arrive to reinforce the Russians in two days, he decided to act first and destroy the Russian encampment in a lightning blow. At 5 AM on 8 July the Swedish infantry advanced on Russian positions but was repelled by cavalry. The Swedish cavalry successfully engaged its counterpart but was forced to retreat under heavy fire. The Swedish infantry attacked once more and captured two Russian redoubts, but failed to hold them. As the Swedes attempted to bypass the redoubts, Prince A. Menshikov's troops encircled them and inflicted heavy casualties. Fifty to seventy meters from Russian positions the Swedes met a hail of deadly artillery fire. Panic ensued in their ranks, but they managed to retreat into the nearby Budyshcha forest, where Charles was able, with considerable difficulty, to restore order.

At around 9 AM, having regrouped their forces, both

Peter and Charles ordered their troops to advance. Intense Russian artillery fire again created chaos in the Swedish ranks, their center buckled, and a disorderly retreat ensued to the Swedish encampment, which by then had been captured by Russian forces. By 11 AM the Swedes had been routed. Over 9,300 died, and nearly 2,900 were taken prisoner, including Field Marshal K.-G. Rehnskjold and the first minister, C. Piper. The Russian army suffered 1,345 dead and 3,290 wounded. Swedish units that were not captured were led by Gen A.L. Lewenhaupt along the Vorskla River to Perevolochna, whence Charles, Mazepa, and Hordiienko and a contingent of 3,000 Swedes and Cossacks crossed the Dnieper and fled into Turkish-occupied territory. Lewenhaupt's army of 16,000 was forced to capitulate and surrender to Menshikov. According to the fifth provision of the capitulation agreement Cossacks under Swedish command were handed over to the Russians. Most of them were executed on the spot, and the rest were exiled to Siberia.

The Battle of Poltava resulted in Russian military rule in the Hetmanate and increasing curtailment of its autonomy. The Museum of the History of the Battle of Poltava was opened at the battle site in 1950.

Poltava Agricultural Institute (Poltavskiy silsko-hospodarskyi instytut). An institution of higher learning, under the jurisdiction of the Ministry of Agriculture. Founded in 1920 on the basis of a horticultural tekhnikum, the institute has departments of agronomy, zoology-engineering, economics, and the mechanization of agriculture, a correspondence school, and a preparatory section for foreign students. It also maintains an experimental farm, encompassing 3,161 ha, where high-quality plant strains are developed for collective farms in Poltava oblast, and a livestock-breeding station. The library has 325,000 volumes. The student enrollment in 1986-7 was over 4,000. The institute has published scholarly works in both Ukrainian and Russian and grants advanced graduate degrees.

Poltava Agricultural Research Station (Poltavska derzhavna oblasna silsko-hospodarska doslidna stantsiia). One of the oldest agricultural research stations in Ukraine. It was formed in 1956 on the basis of the Poltava Experimental Field (established in 1884), the Poltava Agricultural Research Station (1910), the Ukrainian Scientific Research Institute of Fodder Crops (1931), and the Ukrainian branch of the All-Union Scientific Research Institute of Fodder Crops (1938). The station has developed new techniques for farming and animal husbandry and conducted experiments in selection. Considerable emphasis has been placed on improving feed crops. In the 1950s the station covered 4,200 ha.

Poltava Art Museum

Poltava Art Museum (Poltavskiy khudozhnii muzei). A museum in Poltava, established in 1919. Until 1940 it was called the Poltava Picture Gallery. Originally it consisted of 60 paintings by M. Yaroshenko and the nationalized private collections of the Kochubei, Galagan, Kapnist, and Reprin families. The museum is housed in a building built in 1912 and designed by P. Aloslyn. During the Second World War over 25,000 objects were removed by the Nazis. Today the museum's departments of 16th- to 19th-century European art, 17th- to early 20th-century Ukrainian and Russian art, and Soviet art contain over 8,000 works, including ones by painters such as J.-B. Greuze, E. Delacroix, L. Cranach, P. Lely, G. van Eyck, V. Borovykovsky, D. Levitsky, O. Orlovsky, P. Levchenko, M. Yaroshenko, S. Vasylykivsky, I. Repin, O. Slastion, I. Hrabar, M. Burachek, F. Krychevsky, M. Hlushchenko, K. Bilokur, N. Onatsky, M. Derehus, O. Shovkunenko, and T. Yablonska.

Poltava Chervonyi Perets Theater (Poltavskiy ukrainskyi peresuvnyi teatr satyry Chervonyi perets). A touring theater established in 1929. Its repertoire consisted of Russian comedy plays and of satirical sketches, songs, and dances united in programs such as *Vohon' po boliachkakh* (Fire on Sore Spots) and *Dobneiu po holovi* (Clubbed on the Head). Chervonyi Perets toured the Poltava, Kharkiv, and Sumy regions until 1941.

Poltava Civil-Engineering Institute (Poltavskiy inzhenerno-budivelnyi instytut). An institution of higher learning, under the jurisdiction of the Ministry of Higher and Specialized Secondary Education, founded in 1930 on the basis of the agricultural construction engineering faculty of the Poltava Agricultural Institute. The institute has faculties of industrial and civil construction, agricultural construction, sanitation engineering, architecture, and

technology, and a correspondence school. The library has over 370,000 volumes. The student enrollment in 1986-7 was 5,000.

Poltava Co-operative Institute (Poltavskiy kooperatyvnyi instytut). An institution of higher learning, under the jurisdiction of the Central Union of Consumers' Societies, founded in 1974. The institute has departments of economics, trade, procurement, and engineering technology. The library has 280,000 volumes. In 1985-6 the student enrollment was 5,000.

Poltava eparchy. An Orthodox eparchy created at the turn of the 18th century. It comprised the territory of Poltava gubernia, much of which had formerly been a part of *Pereiaslav eparchy (hence, the eparchy was also known as Poltava-Pereiaslav eparchy). *Poltavskie eparkhial'nye ведомosti* was the official eparchial organ from 1863 to 1917. At the turn of the 20th century Poltava-Pereiaslav eparchy had over 1,100 parishes and 4 men's and 5 women's monasteries. In 1917, in addition to the titular bishop, the eparchy had one vicar bishop (in Pryluka). In the 1920s Poltava was the center of a church okruha of the Ukrainian Autocephalous Orthodox church. An eparchy was re-established there during the Second World War, under Bishop I. Huba.

Poltava Free Theater (Poltavskiy vilnyi teatr). A theater organized in Poltava in 1817 with a partial cast of the Kharkiv Russian professional troupe of J. Stein and Y. Kalinovsky. Its artistic director was I. *Kotliarevsky. P. Barsov was stage director, and among the actors were M. Schepkin, K. Nalotova, and I. Ugarov. There being little Ukrainian theatrical repertoire at the time, the theater performed Russian works with only scant Ukrainian reference, such as S. Davidov's *Dneprovskaia rusalka* (The Dnieper Nymph) and the opera-vaudevilles *Udacha ot neudachi* (Fortune from Misfortune) by P. Semenov and *Kazak-stikhovorets* (The Cossack Poet) by A. Shakhovskoi. Exasperated by the distorted Ukrainian language used by Shakhovskoi, I. Kotliarevsky wrote the plays *Natalka Poltavka* (Natalka from Poltava) and *Moskal'-charivnyk* (The Muscovite-Sorcerer) in 1819 and so founded Ukrainian drama. The Poltava Free Theater was active until 1821.

Poltava Gravimetric Observatory (Poltavska hravimetrychna observatoriia). A research institution founded in Poltava in 1926. Originally it was funded by the Ukrainian Supreme Chamber of Weights and Measures, and conducted studies of the force of gravity in 500 Ukrainian locales. In 1936 it came under the jurisdiction of the AN URSR (now ANU), and since 1964 it has been part of the Institute of Geophysics. The observatory has a staff of approx 60 in two departments and four laboratories, who study the earth's rotation and gravity and the physics of its core and mantle. It operates two zenith telescopes, an AVR-2 refractor, and a prism astrolabe and publishes in Russian a serial devoted to the earth's rotation and tidal deformations. The observatory has been directed by O. (A.) Orlov (1926-34, 1939-51), Z. Aksenteva (1951-69), and M. Panchenko.

Poltava gubernia. An administrative-territorial unit created in Russian-ruled Left-Bank Ukraine in 1802 after the abolition of *Little Russia gubernia. Its territory

(45,894 sq km) was subdivided into 15 counties: Hadiache, Khorol, Kobeliaky, Kostiantynohrad, Kremenchuk, Lokhvytsia, Lubni, Myrhorod, Pereiaslav, Pyriatyn, Poltava, Pryluka, Romen, Zinkiv, and Zolotonosha. In 1803 the gubernia had 1,343,000 inhabitants. A predominantly agricultural, economically backward region, 90 percent of its 2,778,151 inhabitants were peasants in 1897 and 93.6 percent were Ukrainian. The main ethnic minorities were Jews (3.7 percent), Russians (2.4 percent), and Germans (0.7 percent). The gubernia's main commercial centers were Poltava, Kremenchuk, and Romen. The major non-agrarian occupations were brewing, distilling, wine making, flour and lumber milling, sugar refining, and tobacco processing. Because of rural poverty, nearly 200,000 peasants emigrated from the gubernia to Siberia and the Far East in the years 1906–12. As a result of the deaths and emigration that occurred during the First World War and Ukrainian-Soviet War and the transfer of Pereiaslav county to Kiev gubernia in 1920, the gubernia's population dropped from 3,792,100 (only 10.6 percent urban) in early 1914 to 3,566,800 in 1924. In 1924, only 12 percent of the population was urban; 68 percent of the urban population was Ukrainian, 25 percent was Jewish, and 5 percent was Russian. That year the counties were replaced by the seven okrugas of Krasnohrad (formerly Kostiantynohrad), Kremenchuk, Lubni, Poltava, Pryluka, Romen, and Zolotonosha, and in 1925 the gubernia was abolished.

Poltava Gubernia Learned Archival Commission (Poltavska huberniialna vchena arkhivna komisiia). An institution founded in Poltava in 1903 to research the archeology, history, ethnography, and culture of Poltava gubernia and to protect ancient monuments there. Funded by membership dues and the Poltava Gubernia Zemstvo, it soon broadened its scope to include Kharkiv and Kamianets-Podilskiy gubernias and became an important center of Ukrainian regional studies. Its members (eg, I. Pavlovsky, L. Padalka, V. Parkhomenko, V. Vasylenko, V. Modzalevsky, M. Makarenko, V. Shchepotiev, O. Slastion, V. Myloradovych, V. Shcherbakivsky, M. Rudynsky, P. Klepatsky, H. Kovalenko, V. Buchnevych, I. Zaretsky, M. Astriab, I. Zubkovsky, P. Hniedych) produced many monographs and articles. The commission itself published their research and documentary and archival materials in its serial *Trudy Poltavskoi uchenoi arkhivnoi komissii* (15 vols, 1905–17). Separately it published Buchnevych's book on Poltava and its monuments (1902); Pavlovsky's book on 19th-century Poltava (1907), biographical dictionary of the scholars and writers of Poltava gubernia (1912; supplement 1913), and description of Poltava gubernia's archives (1915); the records of the 17th-century Poltava municipal government (ed Modzalevsky, 3 vols, 1911–14); a systematic index to the journal *Kievskaiia starina* (1911); Zubkovsky's history of Myrhorod (1912); Padalka's books on the history of Poltava eparchy (1914) and the Poltava region and its colonization (1914); materials on the oral folk literature of Romen county compiled by Hniedych (4 vols, 1915–16); and Makarenko's book on the fortified settlements and kurhans in Poltava gubernia (1917). It operated its own library, initiated the creation of a museum of church antiquities in Poltava, and in 1909 opened the Museum of the Battle of Poltava (the director was Pavlovsky). In 1918 the commission was succeeded by the Ukrainian Scientific Society for the Research and Protection of Mon-

uments of Antiquity and Art in the Poltava Region, which published one volume of *Zapysky* (1919). In 1922 it was renamed the VUAN Poltava Scientific Society, and under that name it published another volume of *Zapysky* (1928). In the early 1930s many of its 70 members were repressed, and the society was abolished.

R. Senkus

Poltava Medical Stomatological Institute (Poltavskiyi medychnyi stomatolohichnyi instytut). Established in 1931 as the Kharkiv Medical Stomatological Institute on the basis of the *stomatology faculty of the *Kharkiv Medical Institute, it was relocated and renamed in 1967. Under the Ukrainian SSR Ministry of Health, in 1987 it had medical dental faculties and over 5,000 students. Its library houses 240,000 volumes. Among its prominent scholars during the Kharkiv period were V. *Vorobiov and V. *Danylevsky.

Poltava oblast. An administrative region (1990 pop 1,757,000) along the Dnieper River, formed on 22 September 1937. It covers an area of 28,800 sq km and is divided into 25 raions, 15 cities, 21 towns (smt), and 410 rural councils. The capital is *Poltava.

Physical geography. The oblast lies on a plain sloping in a southwestern direction from the Poltava Plateau (170–202 m high) in the northeast toward the Dnieper River in the south. Most of the plain consists of the Dnieper Lowland (elevation, 60–100 m), which is dissected by river valleys and ravines. The main rivers are the Sula, the Psol, and the Vorskla, which flow southward to the Dnieper. The climate is moderate continental, with an average January temperature of -6.8°C and July temperature of 20.9°C . The annual precipitation is 430–500 mm. In the south the oblast is bounded by the Kremenchuk and Dni-prodzerzhynske reservoirs.

Low and moderate humus chernozems account for 65 percent of the oblast's soils. Saline chernozems, gray loess, and bog soils are common in the southern parts, and gray podzolized soils line the river valleys. The oblast lies at the southern edge of the forest-steppe belt. Forests, consisting mainly of oak, ash, elm, and maple, cover 7.1 percent of the land area.

History. The territory of Poltava oblast was settled as early as the Paleolithic Period. In the 10th and 11th centuries it belonged to Kievan Rus' and in the 11th to 13th centuries to Pereiaslav principality. The Tatars controlled the region from the mid-13th century. In the 14th century it was annexed by the Grand Duchy of Lithuania. As part of the Hetman state (1648–1775) it was divided into Myrhorod, Poltava, and Lubni regiments. Under Russian rule the territory was part of Little Russia gubernia (1775–83, 1796–1802), Katerynoslav vicegerency (1784–95), and Poltava gubernia (1803–1925).

Population. The population of the oblast is predominantly Ukrainian (91.3 percent in 1970 and 87.9 percent in 1989). The main minorities are the Russians (7.2 and 10.2 percent) and the Jews. The population density is over 60 persons per sq km: the highest density (approx 93/sq km) is in Poltava and Karlivka raions, and the lowest (40/sq km), in Hlobyne, Mashivka, and Kotelva raions. In 1989, 57 percent of the population was urban. The largest cities are Poltava, Kremenchuk, Lubni, Myrhorod, and Komso-molske.

Industry. The oblast's main industries are machine building and metalworking (34.2 percent of the industrial output), food processing (24.9 percent), fuel (18.3 percent), light industry (7.6 percent), and ferrous metallurgy (5.1 percent). The largest machine-building enterprises are in Poltava (turbines, electric motors, and chemical, meat-packing, and dairy machinery), Kremenchuk (motor vehicles and railway cars), Lubni (machine tools and adding machines), and Karlivka (food-processing machinery). The main branches of the food industry are meat packing (Poltava, Kremenchuk, Lubni, Myrhorod, Pyriatyn, and Hadiache), sugar refining (Lokhvytsia and Kobeliaky), dairying (Poltava and Kremenchuk), fruit canning (Poltava, Myrhorod, and Pyriatyn), vegetable oil and lard (Poltava), distilling (Lokhvytsia), and tobacco products (Kremenchuk). Oil refining is concentrated in Kremenchuk, and there is a large chemical and pharmaceutical plant in Lubni. The largest factories of light industry are in Poltava (cotton spinning, knitwear, and footwear) and Kremenchuk (knitwear). Ferrous metallurgy is concentrated in Kremenchuk. The building-materials industry is well developed in Poltava, Kremenchuk, Lubni, Lokhvytsia, and Kobeliaky. The oblast is well known for its handicrafts: pottery and ceramics (in Opishnia and Myrhorod), kilim weaving (in Poltava and Myrhorod), and embroidery (in Poltava and Reshetylivka).

Agriculture. In 1983 there were 391 collective farms and 73 state farms in the oblast. Of the 2,193,000 ha of farmland in the oblast, 85.6 percent was cultivated, 6.8 percent was hayfield, and 6.6 percent was pasture. Almost 41,000 ha were irrigated, and 37,000 ha were drained. The main crops are grains, such as winter wheat, barley, and corn; industrial crops, such as sugar beets and sunflowers; vegetables and melons; and feed crops. Fruit orchards are commonly found on farms, and vegetable gardening is popular near the large cities. The oblast also supplies 14 percent of the herbs grown in Ukraine. Animal husbandry concentrates primarily on the raising of beef and dairy cattle and swine; in 1990 it produced 225,000 t of meat. Secondary enterprises in that branch include poultry and rabbit raising, beekeeping, and fishing. The total value of the oblast's agricultural output in 1990 was 2,625,900,000 rubles (at 1983 prices) or 5.4 percent of Ukraine's total.

Transportation. In 1989 there were 853 km of railroad in the oblast. The main railway lines are the Kiev–Poltava–Kharkiv, Kiev–Poltava–Donetske, Bakhmach–Romodan–Kremenchuk, and Poltava–Kremenchuk–Odessa. Poltava, Kremenchuk, Romodan, and Hrebinka are the main rail junctions. There are 7,900 km of highways, of which 6,600 are paved. The main highways crossing the oblast are the Kiev–Kharkiv, Kiev–Sumy, Poltava–Kremenchuk, Poltava–Dnipropetrovske, Kremenchuk–Cherkasy, Poltava–Hadiache, and Rozbyshivka–Kremenchuk–Khorol–Myrhorod. River transport on the Dnieper and the Sula (navigable for 146 km) is an economical means of freight transportation. Kremenchuk is the largest river port. The Shebelynka–Kremenchuk–Odessa gas pipeline and the Kremenchuk–Kherson oil pipeline run through the oblast. The main airport is in Poltava.

Poltava Pedagogical Institute (Poltavskiy pedahohichnyi instytut im. V.H. Korolenka). An institution of higher learning, under the jurisdiction of the Ministry of Education, that prepares teachers for the elementary and

secondary school system. Founded in 1914 as a teachers' institute, in 1919 it was transformed into a pedagogical institute. It became an institute of people's education in 1921 and was progressively Ukrainized. In 1925 there were 267 students and 32 lecturers. In 1930 it was transformed into an institute of social training, and finally, in 1933, it again became a pedagogical institute. The institute has (1981) six faculties – philology, history, physics-mathematics, natural sciences, pedagogy, and general technical arts – a library with over 380,000 volumes, and a total student enrollment (1986–7) of 5,140.

Poltava regiment (Poltavskiy polk). A military and administrative-territorial unit of the Hetman state in 1648–1775. Originally the regiment had 6 companies, 3 in Poltava and 1 each in Kobeliaky, Balakliia, and Bahachka. By October 1649 it had grown to 19 companies: 3 each in Poltava and Hadiache, 2 in Burky, and 1 each in Bahachka, Balakliia, Kobeliaky, Kovalivka, Kuzemyne, Liutenka, Lukomlia, Opishnia, Rashivka, Vepryk, and Zinkiv. In 1654 there were 19 cities and towns in the regiment. Because of territorial changes, the creation of new regiments, and the interregimental transfer of companies the number of companies in Poltava regiment changed to 14 in 1660, 20 in 1667, and 25 in the 1670s. In the 1670s the regiment's population grew considerably because of the influx of refugees from Right-Bank Ukraine fleeing from Turkish and Crimean Tatar depredations. In the 18th century the number of companies remained stable, at 18 or 19: 2 in Poltava (3 from the 1730s), and 1 each in Bilyky, Budyshcha, Keleberda, Kobeliaky, Kyshynka, Kytaihorod, Maiachka, Nekhvoroshcha, Novi Sanzhary, Orly, Perevolochna, Reshetylivka, Sokolets, Stara Samara, Stari Sanzhary, and Tsarychanka. The regiment had a male population of 13,244 (6,497 Cossacks) in 1649, 13,839 (5,135 Cossacks) in 1721, and 76,499 (12,982 Cossacks) in 1764.

Poltava regiment was the first regiment of the Hetmanate to be abolished. In 1764 most of its companies were disbanded, their Cossacks were transformed into four Russian *lancer regiments, and their territory became part of *New Russia gubernia. The remaining 5 companies (3 in Poltava, 1 each in Budyshcha and Reshetylivka) were abolished in 1775 and also incorporated into New Russia gubernia. Notable colonels of the regiment were M. *Pushkar (1648–58, with interruptions), F. *Zhuchenko (1659–61, 1670–2, 1679–80, 1686–91), P. Hertsyk (1675–7, 1683–6, 1692–5), I. *Iskra (1696–1700), I. Levenets (1701–9, 1725–9), V. Kochubei (1729–43), and A. Horlenko (1743–74).

A. Zhukovsky

Poltava region. A historical-geographic territory in Left-Bank Ukraine. The region is bounded to the southwest by the Dnieper River, to the northeast by the Central Upland and Slobidska Ukraine, to the south by the Dnipropetrovske region (in Steppe Ukraine), and to the north by the Chernihiv region (coinciding with the edge of the forest-steppe and forest zones). Until the 1770s it was part of the Hetmanate, and in the 19th and early 20th centuries it corresponded roughly with the territory of *Poltava gubernia. It included 45,900 sq km (with 3 million inhabitants) of Poltava gubernia, and currently includes 29,000 sq km (1.7 million inhabitants) of *Poltava oblast as well as parts of Cherkasy, Chernihiv, Kharkiv, Kiev, and Sumy oblasts.

Physical geography. The Poltava region lies in the southern section of the forest-steppe reaches of the Dnieper Lowland. It is an undulating plain that descends to the Dnieper from an elevation of 170–200 m in the northeast to 60–100 m in the southwest. Its major rivers include the Dnieper and its tributaries, the Psol, the Sula, and the Vorskla. Its soils are mainly chernozem, although near the Dnieper podzolized chernozem as well as solonchak and solonetzic soils can be found. The region's natural steppe flora has largely disappeared and been supplanted by cultivation. Its forests are mainly oak, but also contain stands of ash, maple, elm, and hornbeam. On the sandy terraces formed by rivers there are also pine, birch, and alder. The climate is continental, with average January temperatures of -5.5° to -7.5° C and July temperatures of 20.9° to 21.7° C. The average annual precipitation is 430–560 mm, and the average growing season is 168 days.

Typical landscape in the Poltava region

The region has deposits of iron ore (in the Kremenchuk district), natural gas and petroleum, peat, clay, and stone suitable for construction. There are also sources of mineral water in the Myrhorod region.

History. At one time the Poltava and Chernihiv regions were the territory of the Siverianians. After the reign of Yaroslav the Wise the Poltava region became part of Pereiaslav principality, which came under the control of the Golden Horde in 1240. In 1360 Lithuania established its hegemony over the area, and then Poland (after the Union of Lublin) incorporated it into Kiev voivodeship. Waves of attacks by Polovtsians and then by Tatars depopulated the region. Resettlement began in the 15th century and reached the Sula River before it halted again in the 16th century. It resumed in the early 17th century, at which time it reached the Vorskla and the Orel rivers.

Under the Cossack Hetman state the territory was divided into Poltava, Pereiaslav, Myrhorod, Lubni, Pryluka, and (partially) Kiev regiments. After the abolition of the regimental system the region became part of Kiev, Chernihiv, and Katerynoslav vicegerencies and New Russia gubernia. After 1796 it was briefly in Little Russia gubernia. Poltava gubernia was formed in 1802, and existed until

1925. In 1914 the gubernia had 15 districts, with an area of 45,893 sq km.

Throughout the 19th century and until 1914 the population of the region increased steadily, particularly after the abolition of serfdom. In 1851 it stood at 1,669,000; by 1897 it had reached 2,778,000, an increase of 67 percent; and in 1914, it was 3,790,000 (36.5 percent higher than the previous level and more than double the 1851 figure). Its natural growth rate was one of the highest in Ukraine and in the Russian Empire. In 1887–97 it stood at 18.8 per 1,000 inhabitants (48.3 births and 29.5 deaths).

At the same time migration out of the region was more substantial than in any other Ukrainian gubernia; it proceeded at about a third of the rate of natural growth. It was prompted mainly by severe rural overpopulation and a lack of industry. Initially most emigrants headed for Southern Ukraine and the Kuban, then, to eastern Transcaucasia, and from the late 19th century, beyond the Urals to Siberia and the Far East. By 1897 an estimated 443,000 people (representing approx 16 percent of the region's remaining population) had left. In 1897–1914 over 360,000 more people left (about 22 percent of all emigrants from the nine Ukrainian gubernias). Another 100,000 to 200,000 Poltavians worked seasonally outside the region as agricultural laborers or as miners in the Donbas. The names of certain settlements in Subcaucasia and Asia (Poltava, Poltavka, Novopoltava) bear witness to the presence there of Ukrainians from the Poltava region.

In 1897 approx 90 percent of the population of the Poltava region was rural. The largest cities were Kremenchuk (pop 58,600), Poltava (the gubernial center, 53,000), Romen (22,500), and Pryluka (19,100). The district towns included Hadiache, Lubni, Myrhorod, Pereiaslav, Pyriatyn, and Zolotonosha. The region had the highest proportion (93 percent) of Ukrainians of all Ukrainian territories. The minority groups included Jews (4 percent, mainly in Kremenchuk and Poltava), Russians (2.6 percent, mainly in the cities and some towns of Kostiantynohrad county), and Germans (0.2 percent). In all of the cities except Kremenchuk Ukrainians constituted a majority of the population.

Three-quarters of the gross domestic product of the region was tied to agriculture, and it supported 90 percent of the population. After the abolition of serfdom peasants owned 50 percent of the land, and landowners controlled 47 percent. Although peasants gradually bought up most of the arable land, population growth offset their gains. In 1877 the average size of a private holding was 10.9 desiatins; in 1905 it was 9.6. In 1910 there were 450,000 agricultural households in the region, of which 23,900 were landless and 189,200 had very little land (less than 3 desiatins). It is estimated that on the eve of the First World War 47.3 percent of households in the Poltava region could not subsist on the revenues and produce generated by the land they controlled.

Agricultural methods in the region were outdated (most farmers used the three-field system). Seventy-five percent of the territory's area was under cultivation. Peasants plowed 75 percent of their holdings, and the larger landowners plowed 57 percent of theirs. Grains were the dominant crop, although tobacco was also raised extensively (the Poltava and Chernihiv regions being major tobacco producers in the Russian Empire in the 19th century). In 1913, 27.1 percent of the land was used for

growing spring wheat, 25.8 percent for rye, 13.7 percent for barley, 13.4 percent for oats, 5.3 percent for winter wheat, 3.1 percent for millet, 3 percent for potatoes, 1.1 percent for hemp, 1.1 percent for sugar beets, and 0.5 percent for flax. The average grain yield per harvest in 1883–1900 was 7–8 centners per ha. Through the efforts of zemstvos in introducing new methods, yields increased steadily, and by 1913 they ranged from 10.7 to 12.7 centners per ha. Zemstvos also set up breeding stations for the improvement of livestock strains (particularly cattle). Peasant livestock, however, was both quantitatively (in 1913 there were 14 horses, 22 cattle, 20 sheep, and 13 pigs per 100 inhabitants) and qualitatively deficient. Nevertheless the region enjoyed a large agricultural surplus (about 25 percent of its grain production, less for livestock).

Local industry was geared primarily to the refining of raw materials to satisfy the needs of the local population. Enterprises were small and employed a total of about 40,000 people (1913). Eighty-five percent of industrial production of the area was connected with foods (milling, various oils, distilling, brewing, sugar refining, etc). Kremenchuk and Poltava were the principal centers. Local crafts were highly developed (about 6,000 establishments) and included pottery (in Opishnia), basket-weaving, carpet-weaving, embroidery (Reshetylivka, Dihtiari), tanning, and woodworking. Zemstvo administrations encouraged the development of such craftsmanship through special schools, courses, and workshops and the work of itinerant instructors. In 1913 zemstvos spent 419,000 rubles on such a program in the Poltava region (49.7 percent of the total zemstvo expenditures in the field for the nine Ukrainian gubernias).

The Poltava region played an important role in the history of the Ukrainian people in the 19th and early 20th centuries. From 1825 it took the lead in Ukrainian civic affairs away from the Chernihiv region, which had been the culturally and politically dominant region of the Hetmanate in the 18th and early 19th centuries. Several factors played a role in the change. The geography of the region made it particularly suitable for agricultural development. The colonization of Southern Ukraine, the growth of trade routes to the Black Sea and Sea of Azov, and the shift of marketplaces southward in the early 19th century accelerated the region's rise to economic pre-eminence. The economic security and estate privileges enjoyed by the larger landowners and the presence of a number of Cossack officers' families afforded them the independence to preserve Ukrainian traditions in ideology and everyday life and to preserve the Ukrainian character of the people who lived on their estates.

The fact that the headquarters of the Russian imperial administration for Left-Bank Ukraine (the Little Russian general governorship) was in Poltava from 1800 until the 1830s also came into play. Some of its leading officials, including Princes A. Kurakin and N. *Repnin, were sympathetic to Ukrainians and assisted the local gentry in furthering their careers and in securing local social and political influence. The leading Ukrainian noblemen of the imperial establishment either had landholdings or served as administrators in the Poltava region. Their position helped to cushion the region from the anti-Ukrainian campaign waged by the imperial authorities in the late 19th century.

In addition to Poltava itself the regional cultural and

political centers included cities such as Hadiache, Lubni, Myrhorod, and Pryluka as well as the estates of nobles in Kybyntsi (D. *Troshchynsky), Obukhivka (V. *Kapnist and his heirs), Khomutets (*Muravev-Apostol family), Yahotyn (Repnin family, formerly of the *Rozumovskys), Trostianets (*Skoropadsky family), Sokyryntsi (*Galagan family), and Kachanivka (*Tarnovsky family). The society of these families proved to be receptive to the ideas of T. *Shevchenko and the *Cyril and Methodius Brotherhood. It also helped to establish the Ukrainophile nature of the region's zemstvo administration, which until 1917 was perhaps the most nationally conscious and active body in community and cultural life in central and eastern Ukraine.

Many notable 19th- and 20th-century Ukrainian cultural and political figures were born or were active in the Poltava region. They include the scholars D. Bantysh-Kamensky, P. Chubynsky, M. Drahomanov, V. Horlenko, V. Lesevych, I. Luchytsky, M. Makarenko, M. Maksymovych, M. Markevych, M. Nomys, M. Ostrohradsky, I. *Pavlovsky (who focused much of his work on the Poltava region in particular), O. Potebnia, V. Shchepotiev, Ya. Shulhyn, M. Storozhenko, and M. Tuhan-Baranovsky; the writers B. Antonenko-Davydovych, P. Biletsky-Nosenko, M. Drai-Khmara, N. Gogol, L. Hlibov, V. Hohol-Yanovsky, Ye. Hrebinka, V. Kapnist, V. Korolenko, I. Kotliarevsky, Lesia Ukrainka, A. Metlynsky, P. Myrny, O. Pchilka, V. Samiilenko, M. Starytsky, O. Storozhenko, A. Teslenko, O. Vyshnia, and L. Yanovska; the composers V. Borovykovsky and M. Lysenko; the kobza players O. Slastion and O. Veresai; the religious activists P. Levytsky and O. Yareshchenko; and the political activists O. Markovych, B. Martos, M. Mikhnovsky, S. Petliura, M. Porsh, and O. Shlikhter.

After the Revolution of 1917 the Poltava region was vitally important to the new Ukrainian state. Many of the state's governmental leaders (A. Livytsky, Martos, Petliura, Porsh) were born there and became active there. In 1917 the Ukrainian Democratic Agrarian party was formed in the region. Other local political activists of the period included V. Lypynsky, Mikhnovsky, and S. and V. Shemet.

After the transition to centralized Soviet rule the Poltava region no longer played the special role it had held in Ukrainian affairs. In 1925, upon the abolition of the gubernias, the region was divided into five okruhas (Poltava, Kremenchuk, Lubni, Pryluka, and Romen). In 1932 it was divided between Kiev and Kharkiv oblasts. In 1937 Poltava oblast was established and divided into 25 districts. It incorporated approx 62 percent of the area of the former Poltava gubernia. (See *Poltava oblast.)

Poltava Regional Studies Museum (Poltavskyi kraieznavchyi muzei). One of the oldest and richest museums in Ukraine, established in 1891 as the Poltava Zemstvo Natural Science and History Museum and renamed the

Poltava Regional Studies Museum

Poltava Gubernia Zemstvo Museum in 1893. In 1905 it acquired K. Skarzhynska's valuable collection of manuscripts, books, and historical documents. Later the museum was housed in part of the famous zemstvo building designed in the Ukrainian Moderne style by V. *Krychevsky and built in 1903–6. Decorated on the inside by S. Vasykivsky and M. Samokysh, it was destroyed during the Second World War and rebuilt in the 1960s. In 1920, reorganized into the Central Proletarian Museum of the Poltava Region, it took over the museum, library, and archives of the former Poltava eparchial depository of antiquities, part of the collection of the Poltava Theological Seminary, and many valuable objects from local churches and monasteries. Renamed the Poltava State Museum in the 1920s (directed by N. Onatsky in 1933–7), it got its present name in the late 1940s, when its collections were rebuilt. The museum has departments of natural science (based originally on V. *Dokuchaev's chernozem collections), prerevolutionary history, and Soviet history. The Chornukhy and Dykanka historical-regional museums and the Mate Zalka Literary-Memorial Museum in Bilyky, Kobeliaky raion, are its departments, and the Panas Myrny, Vladimir Korolenko, and Ivan Kotliarevsky literary memorial museums in Poltava, the Lokhvytsia and Myrhorod regional museums, and the David Guramishvili Literary Memorial Museum in Myrhorod are its branches. (In 1986 there were plans to open Anton Makarenko, Yurii Kondratiuk, and Sydir Kovpak memorial museums and a ceramics museum in Opishnia as new departments.) The museum contains over 180,000 objects, including some of the most valuable collections in Ukraine of archeological objects, historical documents and manuscript books, kilims, folk dress, embroidery, and carvings, Opishnia ceramics, and weapons; a permanent exhibition of the Poltava region's folkways and folk art; and a diorama of the Poltava region's animal world. A large collection of articles about the history of the museum and its holdings was published in 1928, and guidebooks to the museum were published in 1915 and 1978.

Poltava Scientific Research Institute of Hog Raising (Poltavskyi naukovo-doslidnyi instytut svynarstva). The major center co-ordinating research in *hog raising in Ukraine. It was founded in 1930 on the basis of the animal husbandry section of the Poltava Agricultural Research Station and was under the jurisdiction of the All-Union Academy of Agricultural Sciences. In 1982 it had seven departments and three laboratories. The institute develops new hog breeds (including the Myrhorod hog), feeds, medicines, and farming techniques. It also offers graduate courses in hog raising and qualification upgrading programs, and publishes the scientific collection *Svynarstvo* (Hog Raising).

Poltava Ukrainian Drama Society. See Poltava Zhovten Theater.

Poltava Ukrainian Music and Drama Theater

Poltava Ukrainian Music and Drama Theater (Poltavskyi ukrainskyi muzychno-dramatychnyi teatr im. M. Hoholia). A theater founded in 1936 on the basis of the former Kharkiv Komsomol Ukrainian Music and Drama Theater, which itself emerged from an opera studio. Its first artistic director was V. Skliarenko, and among the actors were Ye. Khutorna, Ye. Zolotarenko, V. Varetska, and P. Kolesnyk. During the Second World War the theater was located in Zirianovsk, in Kazakhstan; it returned to Poltava in 1944. In 1969 the theater celebrated the bicentenary of I. Kotliarevsky's birth by staging an adaptation of his *Eneida* (Aeneid). In 1987 its artistic director was V. Miroshnychenko, and V. Herashchenko was its principal stage designer.

Poltava Zhovten Theater (Teatr Zhovten u Poltavi). Originally the Poltava Ukrainian Drama Society, established in 1914 to popularize classical Ukrainian drama among workers and peasants. It was a touring theater in 1917–24, serving the oblast and local Soviet army divisions. In 1924 it was reorganized into the Rukh Theater and toured the Donbas. In the fall of 1924 a group of its actors under H. Vanchenko formed the Zhovten Theater, which was active until 1925.

Ivan Poltavets-Ostrianytsia

Poltavets-Ostrianytsia, Ivan [Poltavec'-Ostrjanycja], b 26 September 1890 in Subotiv, Chyhyryn county, Kiev gubernia, d 1957. Military and political activist. A graduate of the cadet school in Chuhuiv (1912), he served in the Russian army during the First World War. After the Revolution of 1917 he was one of the organizers of the Free Cossacks, and in April 1918 he became general chancellor in the Hetman government. From 1919 he lived in Munich, where he founded the *Ukrainian Free Cossacks (initially as the Ukrainian National Cossack Union) and published the paper *Ukrains'kyi kozak* (1923–4). He tried to obtain German financial support for his organization by claiming to represent 150,000 members in Ukraine and abroad but was regarded as an opportunist and adventurer. He consorted with the Nazis and supported A. Hitler even before the unsuccessful 1923 Beer Hall Putsch.

Poltavochka. A folk dance similar to the polka. It originated in the Poltava region.

Poltavska. The former name of Krasnoarmeiskaia Stanitsa, Krasnodar krai, the Kuban. Almost all its inhabitants perished in the famine of 1932–3. The survivors were later deported.

Poltavs'kyi kooperator (Poltava Co-operator). A semi-monthly organ of the Poltava Association of Consumer Co-operatives, published in Poltava in 1918–22. It contained articles on political, cultural, social, and economic developments, and reports on co-operative affairs.

Poltavs'kyi selianyn (Poltava Peasant). A semimonthly popular agricultural journal published in Poltava in 1925–9 by the Poltava Agricultural Research Station. It was edited by O. Tutkevych. In 1930 it was called *Za nove selo*.

Poltoratsky, Marko [Poltorac'kyj], b 28 April 1729 in Sosnytsia, Chernihiv regiment, d 24 April 1795 in St Petersburg. Singer (baritone) and choir conductor. After studying at the Latin School in Chernihiv and the Kiev Bursa he was recruited as a singer for the imperial court by O. Rozumovsky and brought to St Petersburg in 1745. He became a member of the court choir in 1746 and later its conductor (from 1753) and director (1763–95). His debut in 1750 with the Italian opera company, imported to the Russian court in 1730, marked the first time a non-Italian appeared on stage with the troupe, and is commonly regarded as the beginning of 'Russian' opera. He contin-

ued to appear as a soloist in Italian operas until 1770. His students included M. Berezovsky and D. Bortniansky.

Poltoratsky, Oleksii [Poltorac'kyj, Oleksij], b 1 December 1905 in Chernihiv, d 15 March 1977 in Kiev. Writer, publicist, and critic. He graduated from the Kiev Institute of People's Education in 1926. Together with M. Semenko he edited the Kharkiv futurist journal **Nova generatsiia* from 1927 to 1930. After the war he was editor in chief of **Ukraina* (1948–52), **Vitchyzna* (1948–52), and **Vsesvit* (1958–71). As a theoretician of Ukrainian futurism in the 1920s he was often harshly attacked by official criticism until he conformed to the Party line. His *Literaturni zasoby* (Literary Devices, 1929) was one of the first vulgarizations of the sociological method in Ukrainian literary criticism. In the 1930s he published a few travelogues, including *Ostanni dni burkhaniv* (The Last Days of the Storms, 1930) and *Ataka na Gobi* (Attack on the Gobi, 1936). He also wrote a few stories about N. Gogol (1941, 1954, 1957), which were in line with the official interpretation of Ukrainian-Russian friendship. After the Second World War he published a number of essays concerning his travels outside the USSR, as well as the war novel *Liudy idut' u vohon'* (People Go into the Fire, 1965). He abetted the KGB's quest for the destruction of Ukrainian culture by writing pamphlets against Ukrainian political émigrés (eg, *Ukrains'ki burzhuzni natsionalisty – nailitishi vorohy ukrains'koho narodu* [Ukrainian Bourgeois Nationalists, the Fiercest Enemies of the Ukrainian People, 1953]), apologia for Russification and for the repression of defenders of Ukrainian culture, and attacks on dissidents, such as S. Karavansky, V. Chornovil, and I. Dziuba.

I. Koshelivets

Poltva Land Drainage and Melioration System. An aqueduct system covering 2,800 ha around the Poltva River near Lviv. It drains the floodplains of the Poltva and carries treated sewage from Lviv. The water is used for irrigating and fertilizing the land.

Polubotok. A family of Cossack *starshyna* in the Chernihiv region, probably of burgher origin. Yarema (Jeremia) Polubotok was a member of Chernihiv's *magistrat* in 1637–42, and Artem was a burgher there in the mid-17th century. Artem's son was Leontii *Polubotok, and his son was Pavlo *Polubotok. For most of I. Mazepa's hetmancy Leontii and Pavlo, who had been removed from their military-administrative posts, concentrated on developing trade and industry (glassworks, mining) on their estates. Pavlo's sons, Yakiv (d 15 April 1734 in Brody, Galicia) and Andrii (d 28 November 1744), were fellows of the standard from 1726 and 1728 respectively, as was Pavlo's grandson, Vasyl (d 29 June 1768), from 1752. In the 18th century the Polubotoks were the wealthiest *starshyna* family in the Left-Bank Hetman state, where they owned 3,200 peasant households. The last male Polubotok died in the second half of the 18th century, and the family's properties were inherited by the *Myloradovych and Lashkevych families.

Polubotok, Leontii, b ?, d ca 1695. Cossack officer; father of P. *Polubotok. He was a supporter (and an indirect relation) of I. Samoilovych. He served as Chernihiv regimental chancellor (1668), company captain (1671–2), gen-

eral standard-bearer (1672–7), and general osaul (1678–81); later he became colonel of Pereiaslav regiment (1683–7 and 1689–90). Polubotok was one of a number of *starshyna* officers opposed to I. Mazepa's increasingly unilateral exercise of power during the 1680s, and he was a major player in an intrigue against the hetman which involved the Crimean khan. After his plans were exposed in 1688, Polubotok was forced to resign his commission, but he retained his freedom under the protection of Muscovy and spent his remaining days on his estate.

Hetman Pavlo Polubotok

Polubotok, Pavlo, b ca 1660, d 29 December 1724 in St Petersburg. Cossack statesman; son of L. *Polubotok. A graduate of the Kievan Mohyla College (1679), he became a *notable military fellow in 1689. Because of his involvement in Cossack *starshyna* conspiracies against Hetman I. Mazepa, he was barred from government positions until 1706, when he was appointed colonel of Chernihiv regiment. After Mazepa's defeat at the Battle of Poltava in 1709 and flight abroad, Polubotok submitted his candidacy for the position of hetman, but Emperor Peter I did not trust him and supported I. Skoropadsky's candidacy instead. In compensation Polubotok was given many properties (including the town of Liubech and over 2,000 peasant households) in the Hetmanate and Slobidska Ukraine, which gift made him the wealthiest member of the Cossack *starshyna*. After Skoropadsky's death in 1722, Polubotok became acting hetman. Peter, however, forbade the election of a new hetman and created the *Little Russian Collegium to rule in the Hetmanate in place of the General Military Chancellery. Polubotok's repeated appeals to Peter to abolish the collegium, fully restore the *starshyna*'s privileges, and allow the election of a new hetman, coupled with D. Apostol's submission of the *Kolomak Petitions, angered the emperor and resulted in the arrest of Polubotok and his closest associates in November 1723. Polubotok was imprisoned in St Petersburg's Peter and Paul Fortress, where he died a year later, and his properties were confiscated and redistributed.

Polubotok had an abiding interest in Ukrainian history and wrote a chronicle describing the events of 1452–1715, which was included in the diary of his son-in-law, Ya. *Markovych. His defense of Ukrainian (albeit *starshyna*) rights and his tragic fate made him a hero in the eyes of his contemporaries and subsequent generations of Ukrainians. He was lionized in **Istoriia Rusov* and by such early 19th-century Ukrainian historians as D. Bantysh-Kamensky and M. Markevych. In 1917 the Ukrainian Central Rada named the *Polubotok Regiment in his honor. Pop-

ulist (O. Lazarevsky, A. Yefymenko) and Soviet historians, however, have presented him in a harsh light by concentrating on his personal ambitions and overt class interests. V. Modzalevsky and M. Vasylenko have offered a more objective assessment. Non-Soviet 20th-century Ukrainian historians, though admitting that he was primarily a spokesman for the Cossack elite and its privileges, have viewed Polubotok as a defender of the principles of Ukrainian autonomy articulated in the Pereiaslav Treaty of 1654.

Polubotok has been depicted in T. Shevchenko's poems 'Son' (Dream) and 'Velykyi l'okh' (Great Vault) and in K. Burevii's historical drama *Pavlo Polubotok*. His great wealth and traditional popularity gave rise in the 1860s to the legend that he had deposited a massive amount of gold in Lloyd's Bank in London. The legend caused a stir before the outbreak of the First World War and still reappears occasionally in the press.

O. Ohloblyn

Polubotok Regiment (Polk im. hetmana P. Polubotka). A Ukrainian military unit which sprang up spontaneously in June 1917 at the Russian army distribution depot in Kiev. Its elected commander was Lt Romanenko. The Central Rada attempted unsuccessfully to send the regiment out of Kiev to the front. During the night of 17–18 July 1917 the regiment, on its own initiative and without informing the Central Rada or the Ukrainian Military Committee, tried to take control of Kiev by driving out representatives of the Russian Provisional Government. The action was not supported by the Central Rada, which allowed Russian troops in Kiev to disarm the regiment and send it on 27 July to the combat zone. Some of its soldiers were arrested and imprisoned for several months. The episode remains controversial and unclear.

Poludenny, Mykola [Poludennyj], b 10 April 1938 in Dnipropetrovske. Opera singer (baritone). A graduate of the Kiev Conservatory (1961), he sang as a soloist with the Kuibysheve (1966–74) and Dnipropetrovske opera theaters. His repertoire spans over 30 roles, including the name-parts in A. Rubinstein's *The Demon*, P. Tchaikovsky's *Eugene Onegin*, G. Verdi's *Rigoletto*, and W. Mozart's *Don Giovanni*, and Figaro in G. Rossini's *The Barber of Seville*, Koshovy in Yu. Meitus's *The Young Guard*, and Babushkin in L. Kolodub's *Dnieper Rapids*.

Poluektov, Nikolai, b 13 October 1910 in Odessa, d 15 April 1986 in Odessa. Analytical chemist; AN URSR (now ANU) full member from 1972. A graduate of the Odessa Medical-Analytical Institute (1931), he worked at the Odessa Rare Metals Institute (1932–41, 1945–58), headed the Odessa laboratories of the ANU Institute of General and Inorganic Chemistry (1958–77), and from 1977 headed a department at the new ANU Physical-Chemical Institute in Odessa. His research dealt with physical-chemical methods of determining rare elements by flame photometry, atomic absorption, and spectrophotometric and lumi-

nescence techniques. He also studied the chemistry and spectroscopy of lanthanide complexes and introduced several novel organic reagents for their detection and determination. His monograph *Techniques in Flame Photometric Analysis* (1961) was published in English translation.

Polyclinic. A *clinic with multiple services or departments, in which many types of diseases are treated, and preventive *public health measures are organized. Usually associated with a *hospital, equipped with x-ray apparatus, and designed to be the primary clinical resource for the population, polyclinics attended to over 80 percent of the medical complaints in the former Soviet Union. There may be separate polyclinics for children, students, women, or adults, and they may be divided by medical field or occupation. In 1980 there were over 8,000 clinics and polyclinics in Ukraine.

Polygraphic industry. See Printing industry.

Polymetallic ores. Ores which combine a basic metal, such as lead or zinc, with others, such as silver, gold, cadmium, and so forth. They are found in Ukraine most commonly in the Donbas, in the southeastern and southern reaches of the Ukrainian Crystalline Shield, and in Transcarpathia and Subcarpathia.

Polyphonic singing (Ukrainian: *partesnyi spiv*, from the Latin *partes*, parts, voices). A form of a cappella church singing prevalent in Ukraine in the 16th to 18th centuries. Works for polyphonic singing were composed for 4 to 12 voices, in some instances even for more than 20. The most widespread form was the polyphonic concerto, in which a full choir (*tutti*) alternated with individual voices of the choir or groups within it. The form developed in Kiev and spread to other Ukrainian cities, such as Lviv, Lutske, and Ostrih. The compositions of M. *Dyletsky, S. Pekalytsky, and others who wrote works for polyphonic singing were in the repertoire of many choirs.

Polytechnical education (*politekhnichna osvita*). Instruction in the basics of science and technology, particularly in their practical application to industry and agriculture. Introductory polytechnical education was said to be fundamental to the Soviet general education schools, and was implemented through classroom instruction, visits to agricultural and industrial enterprises, and practical experience developed in school workshops. The mandate of polytechnical education is to familiarize students with the theory and practice of the main sectors of production and to provide a medium in which students can become proficient in the use of basic equipment and tools. This kind of education differs from vocational education in that no attempt is made to prepare pupils for any particular occupation. Polytechnical education was considered to be a central component of the Marxist-Leninist theory of education, as set forth in the 1919 Eighth Congress of the CPSU.

In the early years of Soviet rule the Ukrainian People's Commissariat of Education placed little emphasis on polytechnical education in general education schools; instead it focused on professional and social education in the *seven-year schools. Ukrainian educational authorities argued that polytechnical education was a utopian ideal, given the economic devastation and ruin of the re-

public. They maintained that the path to an eventual polytechnical education system lay in specific professional and vocational training. In 1928, however, a Plenum of the CPSU Central Committee decreed the unification of the system of technical education, and the Ukrainian People's Commissariat of Education introduced a differentiated seven-year school: in rural areas it entailed agricultural training, and in urban centers, experience in factories. Hence, schools for collective-farm youth (see *Schools for peasant youth) and *factory seven-year schools were established. In 1930–1 the 1,088 schools for collective-farm youth accounted for 53.4 percent of rural schools, and the 900 factory seven-year schools represented 78 percent of all urban seven-year schools in Ukraine. In general, however, the combination of schooling and industry retained a purely formal character: polytechnical education in elementary and secondary schools consisted only of basic industrial arts and home economics, components which were entirely removed from the regular schooling process.

In 1937 industrial instruction in the schools was terminated, school workshops were closed, and polytechnical education was essentially discontinued. Following the Nineteenth Congress of the CPSU (October 1952) industrial training courses were reintroduced into the school curriculum. Under N. Khrushchev an attempt was made to unify general and polytechnical education with industry (as outlined in the December 1958 law 'On the strengthening of the ties between school and life, and on the further development of public education in the country'). The new scheme introduced a massive polytechnical component into the curriculum, with practical orientation of subject matter, the teaching of manual skills, involvement of pupils in the production processes and manual jobs, and the creation of direct school-enterprise links. To accommodate the extra activities the complete secondary education program was extended by one year (from 10 to 11), and work activities were added to the school holiday period. The reform met with considerable opposition from educators, parents, and enterprise managers, and schoolchildren failed to develop an interest in the program. Financial and administrative difficulties as well as a shortage of equipment contributed further to the failure of the program. In November 1966 a new law on the general school system, which downplayed the polytechnization of education, was enacted. Subsequently a December 1977 education decree, which strongly emphasized the need for a 'link with life' (in order to meet the growing labor shortage), represented a move toward the greater development of vocational schools rather than a move toward polytechnical education.

The difficulties encountered in the polytechnization of the general schools were again addressed by the 1985 school reform, which emphasized the need to acquaint pupils, in theory and practice, with all the main branches of production. In 1988, however, a report to the CPSU Central Committee noted that little progress had been made in this endeavor. Instead of polytechnical education, schools were providing primitive vocational training in highly inadequate school facilities.

More advanced polytechnical instruction is conducted through polytechnical and industrial institutes, higher-level educational establishments which train engineers for various industrial enterprises, and other institutions of

higher learning. In 1984 there were 6 polytechnical institutes and 2 industrial institutes, and 44 other technical institutions of higher learning in Ukraine.

Polyvaniv Yar settlement. A fortified Trypilian settlement of the mid-3rd to early 2nd millennium BC near near Polyvaniv Yar, Kelmentsi raion, Chernivtsi oblast. Excavations in 1949–51 by T. *Passek revealed the remains of surface and semi-pit dwellings, flint workshops, a variety of tools, copper items, earthenware cult statues of women, and tableware decorated with designs in red, white, and black.

Pomeranchuk, Isaak [Pomerančuk] (Pomeranczuk, Izaak), b 20 May 1913 in Warsaw, d 14 December 1966 in Moscow. Theoretical physicist; full member of the USSR Academy of Sciences from 1964. A graduate of the Leningrad Polytechnical Institute (1936), he began his scientific career in 1935 in Kharkiv at the AN URSS (now ANU) Physical-Technical Institute under the tutelage of L. *Landau and in co-operation with O. *Akhiezer. In the two years Pomeranchuk spent in Kharkiv, he made breakthrough contributions to the theory of the scattering of light by light and on the role of electron-electron interactions in the resistivity of pure metals at low temperatures. In 1937 he followed Landau to Moscow and went on to become one of the most productive and internationally known Soviet physicists.

Pomeranian culture. An archeological culture of the 6th to 2nd century BC found in eastern Poland and adjacent borderlands in Ukraine and Belarus. The people of this culture lived in unfortified settlements in surface and semi-pit dwellings with post construction. Their major activities were agriculture and animal husbandry. They practiced a distinctive burial rite of placing cremated remains into earthenware urns decorated with facial images. The urns were placed usually into stone vaults in the ground and not covered with a kurhan. Scholars believe the Pomeranian culture to have been an early Slavic grouping.

Pomichna [Pomična]. V-12. A city (1989 pop 13,200) in Dobrovelychkivka raion, Kirovohrad oblast. It originated as a workers' settlement in 1868 during the construction of a railway line. It received city status in 1957. Most of its inhabitants work in enterprises servicing the railway and in farming. It produces building materials and canned fruits.

Pomology. See Orcharding and fruit farming.

Pomyanky. Commemorative rites for a deceased person held by his or her relatives and connected with a church requiem (*panakhyda* or *parastas*). One form of *pomyanky*, the *tryzna*, was observed in Ukraine and among other Slavs into the 10th century. It was held right after the burial and consisted of warrior games and contests followed by a banquet. The custom of the commemorative meal was

condemned by the church because of the pagan elements in it, but it became well established among the common people and, known as *tryzna*, *stypa*, *parastas*, *umerlyny*, and *komashnia*, exists to this day. Usually the funeral meal takes place right after the burial at the home of the deceased or at the grave. The 40th day after death (*sorochyny*, *shestyny*) is observed with special solemnity: a *panakhyda* is conducted in church or at home, and then the guests are hosted generously. The dead are commemorated also on specific days during the year, particularly on *provody* (the Tuesday of St Thomas's Week, right after Easter, or the first Sunday after Easter). After the liturgy everyone goes (sometimes in procession) to the cemetery, where each family symbolically shares the blessed Easter meal with its deceased members. In more recent times, especially in towns, the funeral meal has become an occasion for speeches, funeral dirges, and expressions of condolence. The Soviet authorities attempted to substitute a 'day of community remembrance' for the folk and church *pomyanky*. On this day the relatives and friends of the deceased go in procession to the cemetery, make speeches, and decorate the grave.

B. Medwidsky

Mykola Ponedilok

Ponedilok, Mykola, b 24 September 1922 in Novomyrhorod, Yelysavethrad county, Kherson gubernia, d 25 January 1976 in New York. Writer. Having been displaced by the Second World War, Ponedilok found himself in Germany in 1943 and the United States in 1949. Although his literary career began in 1947 with the publication of a short story, he devoted himself at first to writing and translating dramas for the V. Blavatsky and Y. Hirniak theaters in DP camps. He translated the *Antigone* and *Médée* of J. Anouilh and some farces by J. Priestley and wrote *Znedoleni* (The Misfortunate), *Liaitenant Fliaiev* (Lieutenant Fliaiev), and *A my tuii chervonu kalynu ...* (And We Will [Raise] That Red Viburnum ..., 1957). Ponedilok's forte as well as his fame, however, was in humor and satire. His short stories and feuilletons about émigré life and life under the Soviet regime were tinged with lyricism and filled with a good-natured love for his characters in particular and humanity in general. They appeared in the collections *Vitaminy* (Vitamins, 1957), *Sobornyi borshch* (Pan-Ukrainian Borshch, 1960), and *Smishni sl'ozyny* (Funny Tears, 1966; Eng trans 1982). Progressively, however, humor and satire gave way to nostalgia, and Ponedilok wrote lyrical reminiscences of his lost native land and youth. He began the trend with *Hovoryt' lyshe*

pole (Only the Field Speaks, 1962) and continued it with *Zorepad* (Shooting Stars, 1969), *Riatuite moiu dushu!* (Save My Soul!, 1973), and the posthumous *Dyvo v resheti* (A Marvel in the Sieve, 1977).

D.H. Struk

Poniatenko, Prokip [Ponjatenko], b 1880 in Poltava, d ? Civic and political activist. He was active in the Poltava and Katerynodar branches of the Revolutionary Ukrainian party and an editor of its Lviv publications (1905) and the journal *Vil'na Ukraina* in St Petersburg (1906). In 1917, under the Central Rada, he served as UNR consul in Katerynodar. Under the UNR Directory he was a member of the diplomatic mission to Warsaw (1919–20). His fate after his return to the Kuban in 1920 is unknown.

Poniatowski, Stanisław. See Stanislaus II Augustus Poniatowski.

Rev Petro Poniatyshyn

Poniatyshyn, Petro [Ponjatyšyn], b 15 July 1877 in Semeniv, Terebovlia county, Galicia, d 4 February 1960 in Skokie, Illinois. Ukrainian Catholic church and community leader in the United States. Upon ordination (1902) he emigrated to the United States and became involved in Ukrainian religious and civic life there. After the death of Bishop S. Ortynsky he was appointed administrator of the Greek Catholic diocese in the United States (1916–24). During the First World War he chaired the *Ukrainian National Committee (1918–22) and organized support for the independence struggle in Ukraine and relief for Ukrainian war victims. His articles appeared in almanacs and collections published by the Ukrainian National Association.

Poninka. III-8. A town smt (1981 pop 8,700) in Polonne raion, Khmelnytskyi oblast. It was founded in the 18th century. Its cardboard and paper factory, which was established in 1858, is the largest of its kind in Ukraine.

Ponomarenko, Anatolii, b 2 February 1922 in Katerynopil, Zvenyhorodka county, Kiev gubernia. Scenery designer and graphic artist. A graduate of the Kiev Art School (1946), he has designed scenery for the Kiev Artistic Film Studio, the Kiev Young Spectator's Theater, and the Kiev Ukrainian Drama Theater; books, such as the Ukrainian translation of J. Reed's *Ten Days that Shook the World* (1958) and T. Shevchenko's works in three volumes (1963); and the Ukrainian section of the USSR pavilion at Expo '67 in Montreal.

Ponomarenko, Yevhen, b 9 March 1909 in Kherson. Actor. He began his theatrical career in the Odessa Derzhdrama studio in 1926 (pupil of L. Hakkebush and V. Vasylo), and he stayed with the theater until 1936, when he joined the Kiev Ukrainian Drama Theater. He played over 100 roles on stage and in films; he had a large creative range in the contemporary Ukrainian and non-Ukrainian repertoire. His biography by L. Sydorenko appeared in Kiev in 1979.

Ponomarev, Stepan, b 15 August 1828 in Konotip, Chernihiv gubernia, d 13 November 1913 in Konotip. Philologist and bibliographer; corresponding member of the Russian Academy of Sciences. He graduated from Kiev University (1852) and became a teacher in Poltava and in Konotip (from 1872). Using S. Zhelezniak and 41 other known pseudonyms, he contributed to *Kievskaiia starina*, *Kievlianin*, and many Russian scholarly journals and newspapers, in which he published articles about, bibliographic guides to, and the correspondence of various Ukrainian and Russian scholars and writers, including T. Shevchenko, M. Maksymovych, L. Borovykovsky, O. Lazarevsky, and N. Gogol. He compiled biobibliographic dictionaries of Ukrainian writers born in Kiev, Poltava, Volhynia, Podilia, and Chernihiv gubernias; only the one for Chernihiv gubernia, *Zemliaki* (Countrymen, 1898), was published. Among his many other works are a booklet on Maksymovych (1872), books of materials for the biography of Metropolitan E. Bolkhovitinov (1867) and for a dictionary of pseudonyms (1881), biobibliographic dictionaries of Bolkhovitinov and Archbishop F. Gumilevsky, a volume of Gogol's letters to Maksymovych (1877), and a bibliography of works about Gogol (1882). A complete bibliography of his 688 works (1913) and a volume of letters written to him (1915) have been published.

Pontic Kingdom (Pontus). A Hellenized Persian state in northeastern Anatolia founded ca 364–302 BC. It reached its zenith under its last king, Mithridates VI Eupator (ca 115–63 BC), who annexed the *Bosporan Kingdom (107 BC) and the *ancient states on the northern Black Sea coast. Pontus became a Roman province in the 1st century AD.

Ponyrka, Denys, b 1746 in Poloshky, Hlukhiv county, Chernihiv gubernia, d ca 1790. Physician. A graduate of the Kievan Mohyla Academy (1766) and the Moscow Medico-Surgical School (1771), he received a doctoral degree from Strasburg University (1780) and then worked at the St Petersburg Admiralty Hospital and at the Border Quarantine Service in Vasylykiv (1783–9). His publications dealt with the treatment of syphilis, smallpox, and the plague.

Ponyzia [Ponyzzja]. According to the Galician-Volhynian chronicle, a land in the middle Dniester Basin. Some historians believe that it extended from southern Galicia to the Black Sea (P. Hrytsak), others limit it to central Podilia along the Dniester (I. Krypiakevych), and Soviet historians define it as the territory between the Boh and the Dniester rivers. It is likely that Ponyzia already belonged to Halych principality during the reign of Yaroslav Osmomysl. It was definitely part of that principality during the reign of Mstyslav Mstyslavych, who ceded Galicia in 1227 to his son-in-law, Prince Andrew of Hungary, but

remained ruler of Ponyzia. As the power of Halych waned, it lost control of Ponyzia.

Ponyzia's population consisted primarily of settlers from Galicia engaged in farming, fishing, and river transportation from Galicia to the Black Sea. Semisedentary *Chorni Klobuky and *Cumans who had come as mercenaries of Galician princes also lived there. The region's main towns were Ushytsia (its original center), Bakota (which became the center), Kamianets-Podilskyi, Kalius, Onut, and Vasyliv. After the Mongol invasion of 1239–41 Ponyzia was dominated by the Tatars. Beginning in the late 13th century its name no longer appears in historical sources. In the 14th century *Podilia emerged as the name of the region that encompasses the former Ponyzia. (For a bibliography, see *Galicia-Volhynia, Principality of.)

Poor Cossacks. See *Holota*.

Popadia [Popadj]. v-4. A peak (elevation, 1,740 m) in the Gorgany Mountains of Transcarpathia oblast. Situated near the sources of the Limnytsia and the Teresva rivers, the mountain is marked by deposits of fallen rock. It is covered with fir and fir-beech forests on its lower elevations and brush in its upper reaches.

Zorian Popadiuk

Stepan Popel

Popadiuk, Zorian [Popadjuk, Zorjan], b 21 April 1953 in Sambir, Lviv oblast. Dissident. A student at Lviv University, he was arrested in March 1973 and sentenced to seven years' imprisonment and five years' exile for his human rights activities and for editing an unofficial student journal, *Prohres*. He served his term in the Vladimir prison and in labor camps in the Mordovian ASSR, where he participated in hunger strikes and other protests in defense of prisoners' rights. Exiled to Yakutia in 1980 and Kazakhstan in 1981, he was arrested there in September 1982 and sentenced in March 1983 to 10 more years in labor camps and 5 years' exile. He was released in the spring of 1987. That year he became a founding member of the Ukrainian Initiative Group for the Release of Prisoners of Conscience.

Popasna. v-19, DB II-4. A city (1989 pop 31,100) and raion center in Luhanske oblast. It arose in 1878 when the Donetsk railway was being built. In 1938 it was granted city status. Today Popasna is a railway junction and industrial city. Most of its machine-building and metalworking in-

dustry serves the railway. It also has a glass plant and a sewing factory.

Popel, Antin [Popel'] (Popiel, Antoni), b 1865 in Szczakowa, Poland, d 1910 in Lviv. Sculptor. A graduate of the Cracow School of Fine Art (1884) and the Vienna Academy of Art (1888), he taught painting and sculpture at the Lviv Polytechnic and worked as a sculptor. He sculpted some of the decorative statues at the Lviv Opera Theater, the composition *Justice* for the Palace of Justice in Lviv, and several monuments, including the A. Mickiewicz monument in Lviv (with M. Parashchuk, 1905–6), the J. Korzeniowski monument in Brody, and the T. Kosciuszko monument in Washington, DC.

Popel, Markel [Popel'], b 1825, d 1900. Russophile church figure. As a Greek Catholic priest in Galicia, he published religious textbooks, edited the newspaper *Nedilia*, and taught catechism in Ternopil and Lviv. In 1867 he arrived in Kholm with other Russophile clergymen from Galicia. There he lectured in liturgics and served as pastor of the Kholm cathedral. In 1871 he became administrator of the *Kholm eparchy. Popel favored the conversion of the Uniates to Orthodoxy. In May 1875 he headed a delegation to the tsar that petitioned for the transfer of 120 parishes in the eparchy to the Orthodox church. For this he was consecrated bishop of Lublin; later he served as bishop of Podilia and then of Polatsk and Vitebsk. From 1889 he was also a member of the Holy Synod of the Russian Orthodox church.

Popel, Mykhailo [Popel', Myxajlo] (Popiel, Michał), b 1817 in Kulchytsi, Sambir circle, Galicia, d 1903 probably in Sambir. Polonized Galician Uniate petty noble and politician. He studied at the Sambir gymnasium, and in 1836 he was leader of a clandestine circle of Ukrainian students there. He wrote, in mixed Polish and Ukrainian, an anti-Austrian, anti-*szlachta*, pro-Polish-independence poem, 'Rusyn na praznyku' (A Ruthenian at the [Religious] Festival), which was circulated and hand-copied (and published in *Zhytie i slovo* in 1896). In 1837 Popel and 18 other members of the circle were arrested and put on trial. Popel was imprisoned from December 1839 to August 1843. During the Revolution of 1848 he joined the Polonophile *Ruthenian Congress, organized the National Guard in Sambir, and published the pamphlet *Adzov k bratiam* (Appeal to [My] Brothers), calling for Polish-Ukrainian solidarity to fight Austrian and tsarist oppression. That year he was elected to the first Austrian parliament, where he spoke out for the abolition of serfdom without cash indemnity payments to the landlords. He also advocated abolishing all the peasantry's traditional rights to forests and pastures. From 1853 he practiced law in Sambir; he served as the town's mayor (1861–7) and a member of the Galician Diet (1867–82) and the Sambir County Council (1867–73, 1879–90). In the diet he opposed the notion of the national equality of Poles and Ukrainians, on the ground that they were two branches of one nation, and he objected to the claims of the Uniate clergy to represent the Ruthenians.

Popel, Stepan [Popel'], b 15 August 1907 in Komarnyky, Turka county, Galicia, d 27 December 1987 in Fargo, North Dakota. Chess champion and philologist. He grad-

uated from Lviv University (M PHIL, 1931; M JUR, 1938), taught French and Latin in a Lviv gymnasium (1930–9), and was a professor at the Lviv Pedagogical Institute (1939–41) and Lviv Technical Institute (1941–4). He was personal secretary to Metropolitan A. *Sheptytsky (1929–44). In 1928 he won the Galician chess tournament in Lviv and became the champion of Lviv (1930) and Ukraine (1944). He wrote *Pochatky shakhista* (Beginnings of a Chess Player, 1943). As a postwar refugee in France (1946–55) Popel won first prize in 14 of the 18 international Western European chess tournaments in which he took part, and was a three-time champion of Paris and four-time champion of England. After emigrating to the United States in 1956, he was a chess champion in the states of Michigan, Minnesota, Illinois, Nebraska, and North Dakota (five times).

Popilnia [Popil'nja]. IV-10. A town smt (1986 pop 5,700) and raion center in Zhytomyr oblast. It arose in the 1860s during the construction of a railway line. It has a stone quarry, an asphalt factory, and a food industry.

Rev Oleksander Popiv

Popiv, Oleksander, b 24 August 1891 in Kupievakha, Kharkiv gubernia, d 6 May 1958 in Fort Wayne, Indiana. Pedagogue, literary scholar, and church activist. A graduate in history and philology of Kharkiv University (1915), he was a lecturer in pedagogy there (1918–25) and then a professor and dean of the Faculty of Social Education of the Kharkiv Institute of People's Education (1925–33), head of its department of pedagogy (1925–9), and director of the Ukrainian Scientific Research Institute of Pedagogy (1926–30). In 1933 he was arrested and expelled from all of his posts. He was ordained a priest of the Ukrainian Autocephalous Orthodox church (UAOC) by Archbishop N. Abramovych in 1943 and made pastor of St Andrew's Cathedral in Kiev. He fled to Lviv in 1944, then to Prague, and finally to Germany, where he was a refugee in Aschaffenburg (1945–8) and Leipheim (1949–50). In 1950 he emigrated to the United States, where he was curate of parishes in Hamtramck, Michigan (1950–2), and Fort Wayne (1952–8).

Popiv was one of the founders of the *Ukrainian Autocephalous Orthodox Church (Conciliar), which split from the UAOC in 1948, and in the United States he served on the church's council. He also helped found and edited (to 1954) its organ, *Pravoslavnyi ukrainets'*. In the 1920s he published studies in pedagogy, Ukrainian literary studies,

and a series of Ukrainian classics, and edited the journal *Ridna shkola*.

Popko, Hryhorii, b 1852 in Timashevka Stanytsia, the Kuban, d 1883 near Nerchinsk, Transbaikalia oblast, Siberia. Populist revolutionary. He studied at a seminary in Stavropol (1870), an agricultural school in Moscow (1874), and the University of Odessa, where he met and worked with Ye. Zaslavsky. In 1876 he represented Odessa at the gathering of Lavrovist populists in Paris, and he traveled to Lviv, Vienna, and Geneva before returning to Ukraine. He later became involved with V. *Osinsky and the terrorist actions of the (Southern) Executive Committee of the Russian Socialist Revolutionary party. Popko assassinated the adjutant of the Kiev police, Baron Geiking, in May 1878, and was sentenced to hard labor for life.

Popko, Ivan, b 1819, d 1893. Historian and ethnographer. After graduating from the Moscow Theological Academy in 1841, he joined the Black Sea Cossacks and eventually attained the rank of lieutenant general. He wrote several books on the Cossacks, including *Statisticheskoe opisaniie Chernomorskogo voiska* (A Statistical Description of the Black Sea Host, 1840) and *Chernomorskie kazaki v ikh grazhdanskom i voennom bytu* (The Black Sea Cossacks in Their Civilian and Military Life, 1858).

Poplar (*Populus*; Ukrainian: *topolia*, *osyka*, *osokir*). A rapid-growing, deciduous tree of the family Salicaceae, valued for its pulp, shade, and beauty. Many species of poplar are known, and found in the temperate zone of the Northern Hemisphere. In Ukraine three species grow wild – the European aspen (*P. tremula*; Ukrainian: *osyka*), the black poplar (*P. nigra*; Ukrainian: *osokir*), and the white poplar (*P. alba*; Ukrainian: *topolia*) – on the floodplains of large rivers, along lakefronts, in dried-up riverbeds, or as protective screens along roads and fields. Some poplars are cultivated as ornamentals; pollution-resistant *P. italica*, *P. deltoides*, and *P. balsamifera* provide green foliage in cities. The wood is light, soft, and easily worked, and is used in the manufacture of paper, matches, plywood, and packing crates, in construction, and in the production of rayon. Poplars figure frequently in Ukrainian folk songs and literary works.

Poplechnyk. A personally free but *landless peasant in the Lithuanian-Ruthenian state during the 14th to 16th centuries. The social status of *poplechnyky* was similar to that of the later *state peasants. They lived on the estates of the grand duke and paid monetary taxes or performed various feudal obligations in exchange for the use of arable plots. When the estates were granted to feudal lords (see *feudalism), the *poplechnyky* there became enserfed.

Popluzhne (from *pluh* 'plow'). The oldest form of land tax in Kievan Rus', based on a unit of plowed land. Payment was made in kind.

Popov, Fedir, b 13 March 1857 in Kharkiv, d 19 January 1921 in Kharkiv. Veterinary toxicologist. A graduate of the Kharkiv Veterinary Institute, he taught there, as a professor from 1913. At the institute he set up the first chair of forensic veterinary medicine and toxicology in the Russian Empire and wrote the only textbook in the field before the revolution, *Kratkii kurs sudovoi veterinarii dlia*

studentov i vrachei (A Short Course in Forensic Veterinary Science for Students and Physicians, 1907).

Mykhailo Popov: *The Day Is Mine, the Age Is Mine* (oil, 1989)

Popov, Mykhailo, b 15 September 1946 on the *khutir* Yahly, near Kharkiv. Painter. He graduated from the Kharkiv Industrial Design Institute in 1976. At first he painted only watercolors, mostly of landscapes (eg, *Pale Blue Sakhalin*, 1979). Since the early 1980s he has worked in oils and painted figures in an expressionist manner. Popov finds inspiration in nature and Ukrainian folklore. He transforms reality into extraordinary images defying rationalization, using rich and intense colors and fluid and spontaneous brush strokes that convey his enjoyment of the medium (eg, *The Years of Youth Have Passed*, 1990). People and animals exist in harmony in his canvases, which are colorfully lush and rhythmically vibrant (eg, *Cuckoo Birds*, 1989). Popov's first solo exhibition was held in Kharkiv in 1986, and the second in Toronto in 1990.

Popov, Nikolai, b 5 January 1891 in Kutaisi, Georgia, d 10 February 1938. Russian Bolshevik leader, propagandist, and historian. He was active in Kharkiv and Moscow as a Menshevik revolutionary from 1906. He was arrested in 1911 and exiled to Siberia in 1912. He joined the Bolshevik party in 1919 and served in Ukraine as deputy editor and editor of the Bolshevik daily, *Kommunist* (Kharkiv and Kiev 1920–1), as CP(B)U first secretary of Kharkiv gubernia (1921–3), and as the chief of the CP(B)U Agitation Department. He was promoted to the CC CP(B)U and became editor of its organ, *Komunist* (1925–8). From 1928 he worked in Moscow as a senior CP propagandist, member of the Executive Committee of the Comintern and the CC of the Communist Party of Western Ukraine, and later also editor of *Pravda*. He returned to Ukraine in 1933 with P. Postyshev to serve as CC CP(B)U secretary in charge of propaganda and the press, as well as a Politburo candidate (1933–6) and member (1936–7). Popov wrote official histories of the Bolshevik party in the Soviet Union (1926; 15th edn 1933; English trans 1934) and in Ukraine (1928; 5th edn 1933), a book on Soviet nationality policy (1927), and booklets on the October Revolution in Ukraine (1927, 1934). He also edited collections of writings on Ukraine by M. Pokrovsky (1935) and V. Lenin (1936). Although he was a major Stalinist critic of M. Skrypnyk, M. Khvylovy,

V. Yurynets, and the Ukrainian national-Communists and intelligentsia in general and thus facilitated the Stalinist terror and purges in Ukraine, he himself was arrested with other CP(B)U leaders in June 1937, accused of being a member of a fascist conspiracy, and executed.

Popov, Nikolai, b 7 August 1927 in Yastrebovka, Kursk oblast, Russia. Printmaker. He studied at the Kiev State Art Institute (1950–6) and has taught there since in 1961. He has produced over 20 print series, such as 'Motifs from T. Shevchenko's *Kobzar*' (1961–4), 'Years of the Occupation' (1961–8), 'My Childhood' (1970–2), 'Skovoroda' (1972), and 'Winter Sedniv' (1977–80).

Popov, Oleksander, b 24 October 1885 in Tulchyn, Bratslav county, Podilia gubernia, d ? In the 1920s he was a professor at the Kiev Agricultural Institute and an associate of the VUAN. He wrote articles on Ukrainian foreign trade, including Ukrainian economic relations with Russia, and the history of Ukrainian industry. He was arrested in the terror of the 1930s, and disappeared.

Pavlo Popov

Popov, Pavlo, b 28 July 1890 in Mykolaivka, Putyvl county, Kursk gubernia, Russia, d 4 April 1971 in Kiev. Literary scholar, fine arts scholar, and folklorist. He graduated from the historical-philological faculty at Kiev University (1916). From 1934 he was a professor at Kiev University and a corresponding member of the AN URSS (now ANU). Among his scholarly works are *Drukarstvo, ioho pochatok i poshyrennia v Evropi* (Printing: Its Beginnings and Growth in Europe, 1925), *Materiialy do slovnyka ukrains'kykh graveriv* (Materials for a Dictionary of Ukrainian Engravers, 1926), *Pro deiaki pytannia teorii narodnopoetychnoi tvorchosty* (On Some Theoretical Issues of Folk Poetry, 1955), *Hryhorii Skovoroda: Zhyttia i tvorchist'* (Hryhorii Skovoroda: His Life and Works, 1960), *Shevchenko i Kyiivs'kyi universytet* (Shevchenko and Kiev University, 1964), and *M. Kostomarov iak folkl'oryst i etnograf* (M. Kostomarov as Folklorist and Ethnographer, 1968).

Popov, Valentyn, b 16 April 1894 in Rylsk, Kursk gubernia, Russia, d ? Geographer and climatologist. He headed the department of agricultural meteorology at the Mliiv Orchard Research Station (1921–30) and worked at the Ukrainian Scientific Research Institute of Orchard Research (1931–41). After the war he taught at Kiev University, where he was appointed professor in 1949. He specialized in the moisture content of different soils and agroclimatic and physical regionalization in Ukraine. He invented a

type of vaporizer that was widely used in meteorological stations in the Soviet Union and other countries.

Popov, Yevgenii, b 8 March 1899 in Putyvl, Kursk gubernia, Russia, d 9 June 1961 in Moscow. Psychiatrist; full member of the USSR Academy of Medical Sciences (AMN SSSR) from 1957. A graduate of the Kharkiv Medical Institute (1924), he taught at the Kharkiv (1934–8, 1943–51) and Moscow (1951–60) medical institutes and directed a psychiatric clinic in Kharkiv (1932–41). In 1961 he was appointed research director of the AMN SSSR Institute of Psychiatry. He proposed a new theory of hallucination and a biological conception of schizophrenia.

Popova, Lidiia, b 17 February 1925 in Kharkiv. Art scholar and critic. A graduate of Moscow University (1947), she has specialized in the history of Ukrainian art. She has written books on S. Svitoslavsky (1955) and L. Zhemchuzhnikov (1961) and is the coauthor of books on Soviet Ukrainian art of the 1920s and 1930s (1966), T. Yablonska (1968), and Soviet Ukrainian satire (1971).

Popova, Liubov, b 24 February 1925 in Minusinsk, Krasnoiarsk krai, RSFSR. Opera singer (mezzo-soprano). In 1950 she graduated from the Kharkiv Music School. From 1948 she appeared as a soloist with the Kharkiv Theater of Opera and Ballet. Her main roles include Odarka in S. Hulak-Artemovsky's *Zaporozhian Cossack beyond the Danube*, the Mother in M. Arkas's *Kateryna*, Stekha and Solomiia in K. Dankevych's *Nazar Stodolia* and *Bohdan Khmelnytsky*, the Countess and Olga in P. Tchaikovsky's *Queen of Spades* and *Eugene Onegin*, Carmen in G. Bizet's *Carmen*, and Amneris in G. Verdi's *Aida*.

Matthew Popovich

Popovich, Matthew [Popovyč, Matvij] (Popowich), b 1890 in Lubianky, Zbarazh county, Galicia, d 19 August 1943 in Grimsby, Ontario. Communist leader and journalist. He emigrated to the United States in 1910 and then to Canada in 1911. He became involved with the Ukrainian Social Democratic party of Canada and its newspaper *Robochyi narod*. In 1919 he took part in organizing the Winnipeg General Strike. He played an important role in the formation of the *Ukrainian Labour-Farmer Temple Association (ULFTA) and the Workers' Benevolent Association and was a founding member of the Communist Party of Canada (CPC). He served on the executive of the ULFTA

and was a member of the Central Committee of the CPC, for which he edited the Ukrainian-language journal *Za bil'shovyzatsiuiu*. Popovich was arrested with other CPC leaders in 1931 under the provisions of the Criminal Code of Canada and was imprisoned for over two years. In 1940, while in failing health, he was again interned, under the War Measures Act; he was virtually an invalid when released.

Popovsky, Ivan [Popovs'kyj], b and d ? 18th-century singer (bass). He sang at the court of Hetman I. Skoropadsky in Hlukhiv before he was appointed precentor of the singing kapelle at the royal court in St Petersburg in 1714. He came to Ukraine in 1718 to recruit singers for his kapelle. In 1725 he copied a collection of 18th-century church hymns; his text has been preserved to this day.

Popovtsy. See Old Believers.

Popovych, Dmytro [Popovyč], b 7 November 1899 in Velyki Komiaty, Transcarpathia, d 3 October 1968 in Khust, Transcarpathia oblast. Greek Catholic priest, educator, and civic leader. After completing his theological studies in Budapest he served as a catechist in Khust, edited religious periodicals, and wrote a number of religious textbooks. He took part in the populist movement and opposed communist and Russophile influences in Transcarpathia. In 1938–9 he was principal of the Ukrainian Greek Catholic gymnasium in Khust and president of the Society of Ukrainian Greek Catholic Priests. In 1949 he was arrested (for a second time) by the Soviets and sentenced to 25 years of hard labor. He returned to Khust in 1956, crippled after years in the mines of Irkutsk.

Ilko Popovych

Popovych, Ilko [Popovyč, Il'ko], b 1883 in Chernivtsi, d 1 July 1955 in Munich. Engineer and civic and political leader; son of Omelian *Popovych. He was an organizer of Sich societies and, from 1906, of the Ukrainian Radical party in Bukovyna. He helped edit the party's paper *Hromadianyn* in Chernivtsi (1909–10). When Ukrainians took control of Bukovyna in November 1918, he served briefly as military commander of Chernivtsi and then fled from the invading Rumanian troops to Galicia. There he became a member of the Ukrainian National Rada, and in 1919 he attended the Labor Congress in Kiev. In the inter-war period he lived in Galicia, where he was a member of the Central Committee of the Ukrainian Socialist Radical party. He was arrested and deported during the first Soviet occupation of Galicia. He emigrated to Germany after the Second World War, where he served as acting president of the Ukrainian National Council.

Popovych, Ivan [Popovyč], b ? in Khodorkiv, Pavoloch regiment, d 1663. Cossack officer. He was a distinguished veteran of the Cossack-Polish War, particularly the battle for Homel (1651). He served as acting colonel of Pavoloch regiment in 1663. He opposed the pro-Polish policies of the Right-Bank hetman, P. Teteria, and was arrested early in 1663 for organizing a rebellion. Fearing the potential repercussions of executing Popovych, Teteria allowed him to leave the Cossacks quietly and enter the priesthood. Popovych, however, sparked a rebellion a few months later and took over Pavoloch. When the city was besieged by Polish forces, he was captured, tortured, and executed.

Popovych, Matvii. See Popovich, Matthew.

Myroslav Popovych

Oksana Popovych

Popovych, Myroslav [Popovyč], b 12 April 1930. Philosopher. A graduate of Kiev University, he has been a senior researcher at the AN URSR (now ANU) Institute of Philosophy since 1963, a doctor since 1967, and chairman of the institute's Department for the Logic of Scientific Knowledge since 1969. In December 1986 he was elected president of the Ukrainian Branch of the USSR Philosophical Society. He has written books in Russian on the philosophical analysis of scientific language (1966), in which he reviews the development of syntactic and semantic methods of analysis in order to clarify the relation of theory to reality; on the philosophical questions of semantics (1975); and on the development of logical ideas in a cultural-historical context (1979). He has also edited several books on the logic of scientific methodology and research. He cultivated an interest in the general history of ideas and has published articles on writers such as F. Dostoevsky and N. Gogol and a book on the worldview of the ancient Slavs (1985). In Ukrainian he has published a defense of Marxist materialism (1964), a biographical novel about H. Skovoroda (with I. Drach and S. Krymsky, 1984), and a novel with an essay about N. Gogol (1989). Since 1989 he has been active in the leading organs of the Popular Movement of Ukraine (Rukh).

Popovych, Oksana [Popovyč], b 2 February 1926 in Horodenka, Galicia. Freedom fighter, human rights activist, and political prisoner. She was incarcerated in labor camps in the Soviet Arctic in 1944–54 for her participation in the resistance in Western Ukraine during the Second

World War. After her release she organized aid to Ukrainian political prisoners and was active in the Ukrainian human rights movement. She was rearrested in October 1974, and in February 1975 she became the first woman prisoner of conscience tried by the Soviet authorities during International Women's Year. Despite the fact that she was handicapped as a result of her previous imprisonment, she was sentenced to eight years in labor camps in the Mordovian ASSR and five years' exile. In the camps she vigorously protested against her treatment and that of other political prisoners, and in February 1979 she joined the *Ukrainian Helsinki Group. She was released from Siberian exile in 1987.

Popovych, Oleksander [Popovyč] (pen name: Rudolf Oskar von Waldburg), b 1828, d 1867. Orthodox priest and Bukovynian civic activist and writer; father of Omelian *Popovych. He contributed poetry, short stories, novels, and ethnographic studies to German newspapers and journals. His fiction portrayed mostly the life of Ukrainians in Bukovyna.

Popovych, Oleksander [Popovyč], b 1879 in Chernivtsi, Bukovyna, d 1 November 1936 in Drohobych, Galicia. Bukovynian pedagogue and translator; son of Omelian Popovych. He translated into German works by T. Shevchenko, M. Vovchok, I. Franko, and other Ukrainian writers and wrote the article 'Deutsche Art im Spiegel ukrainischer Dichtung' in *Ostdeutsche Monatshefte* (Berlin 1927, no. 12). With V. Kushnir he coedited the book *Taras Schewtschenko, der grösste Dichter der Ukraine* (1914), which included his translations of Shevchenko's works.

Popovych, Oleksander [Popovyč], b 1895, d 29 January 1918 near Kruty, Nizhen county, Chernihiv gubernia. Civic figure. During the First World War he was a student leader in Kiev and a peasant organizer in the Kiev region. He belonged to the Ukrainian Party of Socialist Revolutionaries. As the Bolsheviks invaded Ukraine at the beginning of 1918, he helped organize the Student Kurin, and he died in its ranks at Kruty.

Omelian Popovych

Popovych, Omelian [Popovyč, Omeljan], b 18 August 1856 in Vatra Dornei, Bukovyna, d 22 March 1930 in Zalishchyky, Galicia. Community activist, pedagogue, and publicist. He graduated (1876) from the teachers' college in Chernivtsi and then taught in the city until 1892. He was the commissioner of elementary schools for the Buko-

vynian Provincial School Board in 1895–1906. Popovych was designated as the first provincial inspector of Ukrainian elementary schools and teachers' colleges in Bukovyna in 1906, and remained at this post until 1912.

Popovych was a leading Ukrainian civic figure in Bukovyna. He was the long-standing secretary (from 1878) and then head of *Ruska Besida* and was involved in *Ruska Shkola*, *Narodnyi Dim*, and other societies. He served as a coeditor or editor of the newspaper **Bukovyna* (1885–92), the *Biblioteka dlia molodezhy, selian i mishchan* (Library for Youths, Peasants, and Burghers, 1885–94), later *Lastivka* (Swallow) series, and the almanacs (1885–1918) of *Ruska Besida*. A member of the Bukovynian Diet in 1911–18, Popovych emerged in October 1918 as head of the Ukrainian Regional Committee, and then as president of the short-lived Ukrainian Bukovynian state. He was also the Bukovynian representative and then a vice-president of the *Ukrainian National Rada of the Western Ukrainian National Republic and head of its school commission. After the occupation of Bukovyna by Rumanian forces late in 1918, Popovych emigrated to Galicia, where he was an inspector of elementary schools and teachers' colleges for the *Ridna Shkola* society.

Popovych wrote a number of readers and grammars, most notable among which were *Hramatyka dlia shkil narodnykh* (A Grammar for Elementary Schools, 3 vols, 1893–4) and *Ruthenisches Sprachbuch für Mittelschulen* (3 vols, 1897–1902). In the 1920s he wrote four Ukrainian grammar texts for Galician schools, which were approved by the Polish educational authorities. He edited *Gesetz und Verordnungsblatt für bukowiner Schulwesen* and headed the Ukrainian section of *Bukowiner Schule*. He wrote numerous articles on pedagogy and literature, published the poetry collections *Bukovyna* (1875) and *Dumka* (Thought, 1886), and translated various works. He compiled the *Rus'ko-nimets'kyi slovar* (Ruthenian-German Dictionary, 1904), whose second edition appeared in 1911 under the title *Ruthenisch-deutsches Wörterbuch*, with 25,000 entries. His memoirs, *Vidrodzhennia Bukovyny* (The Rebirth of Bukovyna), were published in 1933.

A. Zhukovsky

Popovych, Orest [Popovyč], b 18 January 1933 in Lviv. Chemistry professor and chess player. A postwar refugee in the United States since 1949, he graduated from Rutgers University (BSC, 1955) and the Massachusetts Institute of Technology (PHD, 1959). Since 1963 he has taught at Brooklyn College. He became a US chess master in 1957 and a senior master in 1972 and was ranked 13th in the United States. He won the 1959, 1961, 1965, and 1986 New Jersey state championships; the 1984 Atlantic Open Tournament; and five tournaments of the Ukrainian Sports Federation of the USA and Canada.

Popovych, Pavlo [Popovyč], b 5 October 1930 in Uzyn, Bila Tserkva raion (now in Kiev oblast). Astronaut and pilot. He studied at the Soviet Military Aviation School and the Air Force Engineering Academy. He was appointed general-major in the Soviet Air Force and joined the first group of prospective cosmonauts in 1960. Popovych flew in Vostok-4 from 12 to 15 August 1962. He was the first Ukrainian in space, the fourth person in orbital spaceflight, and a member of the first group flight of satellites, together with A. Nikolaev in Vostok-3. From 3 to 19 July

Pavlo Popovych

1974 Popovych commanded the spacecraft *Soiuz-14*, which docked successfully with the space station *Saliut-3*. Popovych is active among Ukrainians living in Moscow and heads the Ukrainian *Slavutych* Society there.

Popovych, Vasyl [Popovyč, Vasyl'], b 12 September 1796 in Velyki Komiaty, Ugochs komitat, Transcarpathia, d 19 October 1864. Greek Catholic bishop. In 1820, after obtaining a PHD in philosophy from the University of Pest, he became a priest and secretary to the bishop of Prešov, H. Tarkovych. In 1837 he was consecrated bishop of Mukachiv eparchy, following a six-year vacancy. His attempts to undo the Latinizing work of his Rumanian predecessor, A. Pocsy, led to a renewal of national and religious life in the eparchy, including the revival of Eastern rite observances and the use of the Ukrainian language by the clergy. He also improved education in the eparchy, launched an extensive renovation and building program, took steps to ensure the material well-being of the clergy, and sought to provide each parish with trained cantors and an adequate supply of liturgical books. Popovych became increasingly conservative and Magyarophile, after the defeat of the Hungarians (whom he supported) in the Revolution of 1848–9.

Popovych, Volodymyr [Popovyč], b 7 December 1922 in Vilshany, Peremyshl county, Galicia. Doctor and community leader in Belgium. He studied at Lviv (1942–4) and Leuven (1945–50) universities. In 1951–86 he headed the Ukrainian Relief Committee (UDK) in Belgium and edited its *Visti* (1972–89). A collector of Ukrainian art, he is also author of the catalogs *Sofiia Zarytska* (1967), *Mykhailo Andriienko* (1969), *Gregor Kruk – Plastik* (Hryhorii Kruk – Sculptor, 1969), *Mariia Dol'nyts'ka* (1978), and with S. Hordynsky, *Halyna Mazepa* (1982); and of articles about Ukrainian artists in journals such as *Notatky z mystetstva*, *Suchasnist'*, and *Avangard*.

Popovych, Yevhen [Popovyč, Jevhen], b 25 June 1930 in Mezhyrich, Cherkasy okruha. Writer and translator. He graduated from the philological faculty of Kiev University (1956) and then worked in the fields of publishing and editing. He has translated works of German authors into Ukrainian, including those of H.E. Lessing, E.T.A. Hoffmann, H. Heine, F. Herschteker, T. Mann, E.M. Remarque, M. Frisch, H. Hesse, and M. von der Grün.

Popovych-Boiarska, Klementyna [Popovyč-Bojars'ka], b 3 February 1863 in Veldizh (now Shevchenkove), Stryi circle, Galicia, d 7 May 1945 in Babyntsi, Borshchiv raion, Ternopil oblast. Galician writer and elementary school teacher. She was active in the Galician women's movement. In the 1890s and 1900s she taught in Bukovyna. Beginning in the 1880s her poems and stories about the Galician intelligentsia and about women appeared in *Zoria*, *Dilo*, and *Literaturno-naukovyi vistnyk*, in Galician women's periodicals, in *Pershyi vinok*, and in other literary anthologies and miscellanies. She also wrote reminiscences about I. Franko and N. Kobrynska and an ethnographic study of Ukrainian embroidery. Her poems were republished in a 1968 Kiev anthology of 30 Ukrainian women poets.

Poppy (*Papaver*; Ukrainian: *mak*). Annual and perennial plants of the family Papaveraceae, with lobed or dissected leaves, nodding buds on solitary stalks, and four- to six-petaled bright-colored or white flowers. The fruit is a rounded capsule containing many small seeds used for food, in baking, flavoring food, and for its oil. In Ukraine the opium poppy (*P. somniferum*), cultivated for its seeds and oil, was used in the past by Ukrainian peasants to keep their infants pacified while they worked in the fields. Poppy seeds are edible; they contain 45–55 percent high-quality oil and up to 20 percent protein. The high-quality oil is used in the confectionery and canning industries, in the production of perfume, and in the manufacture of paints. Poppy-seed cakes are valuable fodder for livestock. Ukraine was the leading producer of poppy seeds in the former USSR; optimal seed harvests have reached 2 t per ha. Two varieties of poppy, Voronezh 1042 and Novynka 198, are especially popular. A wild variety, *P. rhoeas* (Ukrainian: *mak dykyi, samosii*), grows as a weed among many crops in Ukraine.

Popular Movement of Ukraine (Narodnyi rukh Ukrainy), popularly known as Rukh (the Movement). The most important noncommunist, grass-roots organization created in Ukraine during the period under M. Gorbachev. It was initially called the Popular Movement of Ukraine for Restructuring (*perebudova*; Russian: *perestroika*). Its initiative group was formed in November 1988 and published the Rukh draft program in February 1989.

Rukh's stated main objectives were the full attainment of human, political, and religious rights and freedoms; the moral rejuvenation of society; the democratization of Soviet society and the Soviet state; the political and economic sovereignty of Ukraine; constitutional reform; economic renewal; social justice; environmental safety and protection (including the shutdown of all nuclear reactors in Ukraine); the restructuring and improvement of social security and the public health system; the protection of the Ukrainian language and minority rights; and world peace.

The CPU media campaign against Rukh that lasted until September 1989 merely served to increase Rukh's popularity and membership. Rukh succeeded in becoming an umbrella organization uniting almost all **neformaly* and new political **parties* in Ukraine. It gained the support of the revived Ukrainian Catholic and Ukrainian Autocephalous Orthodox churches and most members of the Writers' Union of Ukraine (writers and intellectuals have played leading roles in Rukh). Rukh sponsored many ini-

tiatives designed to break the power monopoly of the CPU, including an independent Ukrainian Communist party, the Yednist free trade union (which held its founding congress in February 1990 in Kharkiv), the Union of Free Journalists, and the Ukrainian Olympic Committee.

The first national Rukh congress was held in Kiev in September 1989. It was attended by 1,109 delegates, representing 280,000 registered, dues-paying members in branches throughout Ukraine, a delegation from the Polish Solidarity movement led by A. Michnik, representations from the Baltic states, Belarus, Moldova, the Transcaucasian peoples, and Moscow, and three observers from Ukrainian communities in the West. Elected to senior leadership positions were I. *Drach, chairman; S. Konev, first vice-chairman; V. *Yavorivsky, vice-chairman in charge of the 81-member Council of [Regional] Representatives; V. Cherniak, vice-chairman in charge of the 93-member Council of Collegiums, which co-ordinates, through commissions, the development and implementation of the political, juridical, social, economic, cultural, scientific, educational, and ecological objectives of Rukh as stated in its program and decided by the congress; and M. *Horyn, vice-chairman in charge of the Secretariat, the executive and administrative organ in Kiev that implements the decisions of the Rukh congress and councils, and chairman of the Great Council, a body consisting of the aforementioned officers and the members of the Councils of Collegiums and Representatives, which meets at least three times a year and supervises and determines Rukh's activity in between its national congresses.

After the congress Rukh concentrated its efforts on the campaign for the March 1990 elections to the Supreme Soviet of Ukraine. In September and October 1989, together with members of the Ukrainian Club of Deputies in the USSR Congress of People's Deputies, Rukh co-ordinated public demands for a more democratic electoral law in Ukraine.

By 1990 Rukh had become the largest public organization in Ukraine, with an estimated 5 million supporters and over 50 different periodicals. On 21 January 1990 it sponsored the successful 500-km chain of people linking hands from Kiev to Lviv and on to Ivano-Frankivske in

Part of the human chain linking Lviv and Kiev on 21 January 1990 that was organized by the Popular Movement of Ukraine to commemorate the 1919 proclamation of Ukraine's independence

commemoration of the 1918 and 1919 proclamations of Ukrainian independence and the union of Western and central Ukraine. In February 1990 the first issue of *Narodna hazeta*, the chief Rukh organ, appeared in a pressrun of 10,000 copies.

Although the CPU ensured that Rukh was unable to register as an organization in time to field its own candidates for the Supreme Soviet elections, candidates supporting Rukh formed a Democratic Bloc to contest 30 percent of the seats. In June 1990 the elected pro-Rukh candidates and those representing the 'democratic' wing of the CPU (who later left the CPU and formed the Ukrainian Democratic Party of Renewal, in December 1990) jointly constituted the People's Council – the opposition to the CPU, representing 35 percent of the seats in the Supreme Soviet. The People's Council was instrumental in the adoption of the 16 July 1990 declaration of Ukrainian sovereignty by the Supreme Soviet. In September 1990 a joint Rukh–People's Council press center began operating in Kiev.

The October 1990 second national Rukh congress in Kiev was attended by over 2,125 delegates, representing nearly 633,000 members and 44 civic and political organizations. The congress adopted the full independence of Ukraine as the chief goal of Rukh and disallowed the membership of Communists. Elected to the senior leadership were Drach, chairman; Horyn, first vice-chairman in charge of the Political Council (the body in charge of political policy and strategy); O. Lavrynovych, vice-chairman in charge of agitation and propaganda; M. Porovsky, head of the Co-ordinating Council; I. Zaiets, head of the Council of Collegiums; O. Burakhovsky, head of the Council of Nationalities; and V. Burlakov, head of the Secretariat. In the fall of 1991 Rukh played a key role in promoting the 'yes' vote in the 1 December referendum on Ukrainian independence.

The creation of a Rukh faction headed by Horyn in the Ukrainian parliament was officially declared on 8 February 1992. The third national Rukh congress (held from 28 February to 1 March 1992), which was attended by 800 delegates, reflected factional divisions within the movement and acute differences over political strategy and orientation. A compromise was reached by electing the factional leaders V. *Chornovil, Drach, and Horyn as co-chairmen of Rukh. At the fourth congress (4–6 December 1992) Rukh was transformed into a political party headed by Chornovil.

Population genetics. The study of the genetic structure and dynamics of the genetic makeup of populations, including changes in the genotype and in the frequency of individual genes, the nature of crossings within a population, interpopulation migrations, and natural and random fluctuations. A study of genes in animal populations provides information on past migrations, evolutionary relationships, the extent of mixing among different species, and methods of adaptation to the environment. It is a relatively recent science, whose pioneering steps in the USSR

were made in the 1920s and 1930s by S. Chetverikov. The biologist I. *Shmalhauzen postulated that from the evolutionary standpoint genetic heterogeneity is a peculiar 'mobilization reserve' used by populations during gradual or sudden changes in environmental conditions.

Population of Ukraine. Ukraine's territory has been inhabited by humans since the Paleolithic period (see *History of Ukraine). The East Slavic tribal groups living there developed in the 8th and 9th centuries AD into a proto-Ukrainian people, out of which the *Ukrainians evolved in the 14th and 15th centuries. By the 16th century they constituted a modern, independent ethnos in the Dnieper and Dniester basins. The consolidation and unification of the ethnos took place in struggle against Polish-Lithuanian and Hungarian feudalism and Tatar-Turkish invasions. In the 17th century the ethnos began evolving into a nation. The evolution sharply decelerated after the partition of Ukraine between Poland and Russia by the 1667 Treaty of Andrusovo and again after the defeat in 1708–9 of Hetman I. Mazepa's attempts to establish a more independent Hetman state.

The regrouping of the Ukrainian ethnic territories as a result of the 18th-century Russo-Turkish wars and partitions of the Polish Commonwealth created favorable conditions for the development and the formation of a modern Ukrainian nation. The landmarks in the process were the emancipation of the peasantry in Western Ukraine in 1848 and the abolition of serfdom in Russian-ruled Ukraine in 1861, and the consequent industrial transformations and rise of an independent Ukrainian literature, standard language, and nationally conscious intelligentsia. In the years 1920–85, however, the process of national consolidation was substantially retarded, because the area of compact habitation by the Ukrainians was subjugated by the Soviet totalitarian state, which actively pursued a policy of *Russification and engaged in various forms of genocide.

Ukraine's population can be determined for the 17th century and later. In 1629 it was between five and six million. In the feudal period population growth was hampered by frequent, devastating wars, epidemics, and famines. The Ukrainian people suffered particularly great population losses as a result of Crimean Tatar raids and Turkish military invasions, during which many captives were taken and sold into *slavery or transformed into *janissaries. Ya. Dashkevych has estimated that from the 15th to the mid-17th century approx 2 to 2.5 million Ukrainians were killed or taken from Ukraine as slaves. As a result Ukraine's urban and rural social-class structure lost its most intellectually developed inhabitants, that is, the requisite potential for the development of a more socially and economically advanced population and for the transformation of the Ukrainian ethnos into a nation.

In 1764–74 Ukraine had over eight million inhabitants. A significant contribution to the development of the nation was made by the colonization of *Slobidska Ukraine in the 17th century and of *Southern Ukraine and the *Kuban in the 18th century. As a result of that colonization the *territory of compact habitation by the Ukrainians was considerably enlarged. By 1870 the present territory of Ukraine had a population of 18.7 million. As a market economy developed in the following years, the population grew rapidly, to reach 28.4 million in 1897 and 35.2

million in 1913. At the same time rural overpopulation induced mass *emigration. In the years 1896–1914, 1.6 million inhabitants of the nine Russian-ruled gubernias emigrated to the Siberian, Central Asian, and Far Eastern regions of the Russian Empire. Emigration from Austrian- and Hungarian-ruled Western Ukraine to the New World was also significant; it totaled 413,000 in the years 1895–1913. In the interwar period an additional 196,500 Ukrainian political refugees and economic emigrants left Ukraine.

In the late 19th and early 20th centuries Ukraine's demographic development was distinguished by high fertility and mortality rates. According to R. Kuczynski, at the end of the 19th century Ukraine had the highest fertility rate in Europe – an average of 7.5 children per woman. According to M. Ptukha's calculations, in 1896–7 life expectancy at birth in Ukraine was 36 years for males and 37 years for females. Such indicators were characteristic of a population with a traditional way of life, that is, marriage at an early age, practically no use of birth control, high infant mortality, and a rapid generational shift.

Global changes in the development of Ukraine's population have occurred in the 20th century. They were brought about by a demographic revolution – the shift from high fertility and mortality rates and underdeveloped demographic relations to low rates and regulated demographic relations – and by extraordinary, cataclysmic events that significantly altered the normal course of demographic processes.

During the years of the Ukrainian-Soviet War (1918–20) mortality in Ukraine was greater than during the First World War. Large subsequent losses were caused by the famine that ravaged Southern Ukraine in 1921–2 and by various *epidemics that occurred after the collapse of the health-protection system during the Ukrainian-Soviet War. The total population losses between 1914 and the early 1920s in Ukraine, both direct and indirect (ie, the number of children not born because of the death of potential marriage partners or because of the temporary decline in marriages caused by military mobilization), have been estimated at between three and four million.

In the mid-1920s a significant change in Soviet Ukraine's demographic development began. The aggregate birthrate kept steadily decreasing from a high of 5.2 children per woman in 1926. In 1926–7 life expectancy was 44 years for males and 48 years for women – an increase over the preceding 30 years of 8 years for males and 11 years for females. The figures for the population's age structure in the 1926 Soviet census indicate that the social convulsions of the 1920s brought about a break in Ukraine's demographic development. There was a significant gap in the 5–9 age cohort; its number was lower by 366,000 persons than that of the 10–14 age cohort. Those two cohorts most reflected the disastrous consequences of the First World War, the Ukrainian-Soviet War, and the social transformations of the 1920s. The scale of the impact of those events is reflected in the change in the mortality rate in interwar Soviet Ukraine. According to A. Khomenko, the mortality rate was 26.7 per 1,000 inhabitants in 1914, 31.9 in 1915, 36.1 in 1916, 27.5 in 1917, 28.9 in 1918, 38.5 in 1919, 40.3 in 1920, 28.8 in 1921, and 35.2 in 1922.

After 1926, demographic transformations in Soviet Ukraine affected the evolution of the age structure. The profound social convulsions during the period under J.

Stalin acutely disturbed normal demographic processes. The change in population size after 1926 was caused by evolutionary factors and crises and was reflected in the change in the age structure (the significant decline in the number of children and the increase in the demographic weight of the elderly) and its substantial deformation. The period of the New Economic Policy of the 1920s had been characterized by a high fertility rate and a decline in the mortality rate in Soviet Ukraine. During the Stalinist period of forced collectivization and industrialization, which began in 1929, the fertility rate decreased substantially. The demographic decline rapidly turned into a demographic cataclysm, caused by the mass deportation of Ukrainian peasants (see *Kulaks) to other parts of the USSR, the totalitarian state's man-made *famine of 1932–3, and the political repression and destruction of hundreds of thousands of Ukrainian citizens, primarily members of the nationally conscious intelligentsia, during the *terror of the 1930s. The total losses of interwar Soviet Ukraine's demographic potential caused solely by the Stalinist social convulsions of the late 1920s and the 1930s numbered approx seven to nine million persons.

In the 1940s Ukraine again suffered huge population losses as a result of the large-scale Soviet deportation of Western Ukrainians to Siberia in 1940–1, the deaths wrought by the German-Soviet War of 1941–5, the migration of conscripted laborers, *Ostarbeiter, and political refugees to the West, postwar population transfers between Ukraine and Poland, the famine of 1947, and the organized 'voluntary resettlement' of Ukrainian peasants in Siberia and the Soviet Far East. Those losses continued into the 1950s, when many Ukrainians were resettled in Kazakhstan's virgin lands.

Ukraine's losses totaled 8.8 million persons in the period 1939–59 and anywhere from 15.8 to 17 million in the period 1929–59. The demographic cataclysms of the first half of the 20th century seriously distorted both the quantitative and qualitative indicators of Ukraine's demographic reproductivity and age structure, and hindered the republic's social and economic development. The capacity to reproduce a social-class structure declined following the destruction and deportation of the intelligentsia class in Ukraine. The absence of an actively creative segment of society resulted in socioeconomic and political retardation and helped accelerate the growth of the power of the bureaucracy and military-industrial complex. The immense population losses substantially reduced the population's labor potential, facilitated the economic coercion and exploitation of the remaining labor force, sharply reduced Ukraine's demographic potential, retarded urbanization processes within the Ukrainian ethnos, and accelerated the in-migration of Russians and other non-Ukrainians.

National composition. The dynamics of Ukraine's national composition have reflected not only changes in the socioeconomic conditions affecting demographic reproductivity, but also changes in political borders and migration patterns (including the deportation of Ukrainians, Poles, Germans, and Crimean Tatars and the mass emigration of Jews) and the consequences of the demographic cataclysms. After the Second World War the various ethnic groups inhabiting Ukraine quickly attained the same birthrate. Consequently, postwar changes in the national composition have occurred mainly as a result of the

BR = birth rate, DR = death rate, NI = natural increase, GR = gross reproduction ratio (the number of females born per number of women of reproductive age), NR = net reproduction ratio (the number of females born who survive to reproductive age [20 years] per number of women of reproductive age), LEW = life expectancy of women at birth

*In 1,000s

changes in ethnic identification and through *migration. The regional distribution of the ethnic Ukrainian population in Ukraine is unequal. Its demographic weight is highest in the western oblasts but significantly lower in several southern oblasts and in the Donbas. On the whole, however, ethnic Ukrainians make up the majority of Ukraine's population (72.7 percent in 1989). In 1989 there were 44.2 million Ukrainians in the USSR, 84.7 percent of them in Ukraine.

Until the 20th century, ethnic Ukrainians constituted minorities in Ukraine's towns. In 1897 they constituted only 32.5 percent of the urban population of the territory that became interwar Soviet Ukraine. Their share of the urban population rose to 46 percent in 1926, and they were recognized as the majority in their cities – 58.1 percent – for the first time only in the 1939 Soviet census. Since 1939 the ethnic Ukrainian share of the urban population in Soviet Ukraine has grown very slowly. In 1959, 61.5 percent of city dwellers were Ukrainian; in 1970, 63.0 percent; in 1979, 64.1 percent; and in 1989, 65.8 percent.

Only in 1965 did Ukraine's population become predominantly urban. Because of the intensive influx of non-indigenous, primarily Russian, migrants into Ukraine's urban centers, however, the weight of urban inhabitants within the ethnic Ukrainian population has grown much more slowly than that within the population in general. Thus the urbanization of the Ukrainian nation had been substantially delayed. It was not until the 1970s that the ethnic Ukrainians themselves became predominantly urban. In 1979, 53 percent of them were urban inhabitants; at the same time 86.4 percent of the Russians in Ukraine were urban inhabitants. By 1989 the urbanization indicator for Ukrainians had risen to 60.3 percent, compared to 87.6 percent for Russians.

In 1989 Ukraine had between 51.4 and 51.7 million inhabitants, which number made it the sixth most populous country in Europe. Its population is now characterized by low fertility and mortality levels, insignificant growth, a positive migratory balance through interrepublic exchange, nuclear families with few children, and high mobility. Analyses indicate that population reproductivity with a net coefficient close to one and an age structure close to the structure of a stable population with a zero coefficient of natural increase is being replaced by reduced reproductivity, in which generations of mothers are not being replaced by generations of daughters. The present state arose as a result of the steady maintenance of an aggregate birth coefficient at fewer than two children per woman and an increase in deaths since 1986. In 1989, life expectancy at birth in Ukraine was 66.1 years for males and 75.2 for females; those are significantly lower indicators than the corresponding indicators in the advanced Western countries. In other words, in the late 1980s Ukraine entered a prolonged period of yet another demographic crisis, the consequences and duration of which are difficult to ascertain. At the same time it is evident that a reduced mortality rate is not likely to occur in the future, given the effects of the Chernobyl nuclear accident, the ecological destruction of many of Ukraine's regions, and the consequent contamination of the food chain and food products.

Population registers and censuses. Medieval chronicles indicate that in 9th- and 10th-century Kievan Rus' various units, such as the *dym* and *pluh* (*rало*), were applied, according to the level of socioeconomic development, to calculate the size of family properties for taxation purposes. Those calculations testify to the significant influence of the Byzantine taxation system and in several cases were directly adopted from it. Data before the 15th century do not, however, exist. From the 16th century on, large-scale enumerations of peasant properties were conducted in Polish- and Lithuanian-ruled Ukraine. The development of productive forces and population growth

brought about a new form of census taking based on household property rather than the land occupied.

The first national statistics were gathered during the Cossack-Polish War of 1648–57. The earliest extant example is the 1649 Zboriv Register of Ukrainian Cossacks, which enumerated all adult Cossack warriors and family heads able to bear arms at their own expense. In 1666 the Muscovite administration in Left-Bank Ukraine conducted a property enumeration of 'commoners' (urban merchants and craftsmen, as well as peasants) for purposes of imposing taxes that would directly enter the tsar's treasury. The census was incomplete: it did not include commoners living on monastery-owned lands or on lands set aside for the support of the hetman. The first mixed household census in Ukraine, which registered not only properties but also adult males, Cossacks, commoners, and representatives of several other population categories, was conducted in Slobidska Ukraine in 1732. A similar census was conducted in the Left-Bank Hetman state in 1763. From 1782 to 1857, censuses of males and females were conducted for *poll tax purposes in Russian-ruled Ukraine. The first all-Russian imperial one-day census took place in 1897. Succeeding all-Soviet censuses were conducted in 1926, 1937, 1939, 1959, 1979, and 1989. In the 20th century other specialized censuses of individual population categories were conducted in the Russian Empire and the USSR, including Ukraine: the 1916–17 all-Russian agricultural census, the 1923 Soviet census of the urban population, and the 1931 all-Union enumeration of the Soviet urban population.

In the Western Ukrainian lands not ruled by Russia the first census was conducted in 1818 by the Austrian state. One-day population censuses in the Austro-Hungarian Empire were conducted in 1857, 1869, 1880, 1890, 1900, and 1910. In the interwar period the population of Western Ukraine was enumerated in the Polish censuses of 1921 and 1931, the Czechoslovak censuses of 1921 and 1930, and the Rumanian censuses of 1920 and 1930. During the Second World War, in 1941 the Hungarians enumerated the population of Transcarpathia and the occupying Rumanians conducted a census of Transnistria, and in 1943 the Germans conducted censuses in the *Distrikt Galizien* of the *Generalgouvernement* and in the occupied Ukrainian oblasts of the *Reichskommissariat Ukraine*, except those directly abutting the German-Soviet front.

The mass registration of marriages, births, baptisms, and deaths in Ukraine has taken place since 1646, when Metropolitan P. Mohyla of Kiev made *church registers compulsory. His initiative, however, was neglected during the succeeding upheavals of the 17th century. The church register of the Orthodox population in Right-Bank and Western Ukraine was revived by Bishop Y. Shumliansky of Lviv. Under Hetman I. Mazepa such registers were introduced in the parishes of his capital, Baturyn, in the early years of the 18th century. In Russian-ruled Left-Bank and Slobidska Ukraine they were introduced in 1722.

Throughout Ukraine's history demographic data have been used as an object of political insinuation and economic struggle, and under Soviet rule they were subject to official falsification. The 1666 census of the population of Left-Bank Ukraine, for example, was one of the causes of the popular uprising against the tsarist administration there, because the inhabitants feared that the census

would be used to implement a tax increase. The enumeration of 1782 gave impetus to the mass flight of peasants and Cossacks to the southern borderlands. And the 1931 all-Union enumeration of the Soviet urban population was used to deny city status to dozens of urban settlements in Ukraine and thus the guarantee of food coupons to their inhabitants, who were thereby condemned to hunger.

For nearly six decades the Communist party denied the existence of the man-made famine of 1932–3 and its millions of victims. Because the 1937 Soviet census indicated a population decline in the USSR in general and in Ukraine and Kazakhstan in particular, the Stalinist regime annulled it, banned publication of its results for many decades, and repressed its organizers as 'enemies of the state.' Because the 1939 census also showed a population decline, its data were falsified by the directors of state statistics, and publication of the data was initially restricted to newspaper notices. To cover up the massive Soviet population losses of the Second World War the first postwar census was postponed until January 1959. Beginning with the Soviet censuses of the 1930s, national-composition data for individual republics and regions were repeatedly falsified. Thus, in the 1939 census the Ukrainian population of the Don region, the Kuban, and Stavropol krai almost entirely 'disappeared,' to hide the fact that countless Ukrainians there had died during the 1932–3 famine or been deported as kulaks to Siberia. The chief reason, however, for the decline in the number of Ukrainians in those and several other regions was the decision of the local authorities to falsify national-composition data. Thus, many Ukrainians living in Belarus's Brest oblast 'disappeared' because they were registered en masse as Belarusians in the 1959 census. In Crimea oblast the practice of 'de-Ukrainianizing' the population survived until the 1989 census.

Population studies. The first population data about Ukraine's regions were provided in statistical-geographic descriptions written by 18th-century Ukrainian, Russian, and foreign authors. The first demographic studies of Ukraine were written by the 18th-century scholars F. Tumansky, M. Antonovsky, A. Rigelman, and Ya. Ruban. In the first half of the 19th century interest in the reproductivity of individual social groups, primarily the peasantry, grew. V. Karazyn published the first study of that phenomenon in 1820. D. Zhuravsky developed the first schema for the study of population reproductivity; N. Bunge elaborated the concept of the demographic crisis of the peasantry in the Russian Empire; O. Roslavsky-Petrovsky drew attention to the need to study the movement of the population according to its social indicators without limiting research to the general number of births and deaths; and I. Vernadsky initiated the study of national composition and the history of the interdisciplinary problems of political economy and demography. In the second half of the 19th century the leading demographers of Ukraine were M. Ziber, S. Podolynsky, T. Rylsky, V. Rapatsky, and V. Navrotsky. I. Franko played a notable role by showing, in several articles on emigration from Galicia, the interconnectedness of mortality, fertility, and the quality of the population with economic (including property and distribution) relations and living standards. Important contributions were made by specialists on public health, such as I. Barzhitsky, I. Pantiukhov, T. Makovetsky, P. Diatrop-

tov, and O. Korchak-Chepurkivsky. Concrete general demographic research was limited to regional, local, and municipal studies (eg, by A. Skalkovsky, O. Rusov, and A. Borynevych).

The most politically significant research was on the national composition of Ukraine and of its individual social groups. Pioneers in the area were V. Barvinsky, S. Dnistriansky, V. Okhrymovych, Rusov, and M. Porsh.

A new stage in *demography began after the creation of the VUAN Demographic Institute (headed by M. Ptukha) in 1919, the *Central Statistical Administration (headed by A. Khomenko) in 1920, and a demographic center under the jurisdiction of the People's Commissariat of Public Health. As a result of their work Ukraine led the way in Soviet demographic research and was a major contributor on the international level. Studies in the field of historical demography were conducted by VUAN scholars (eg, M. Hrushevsky, M. Ptukha, O. Baranovych, P. Klymenko, V. Romanovsky, I. Lebedynsky). In the late 1930s, however, the Stalinist state banned all demographic research and suppressed many of its practitioners. Demography in Ukraine was not revived until the 1960s. Since that time important empirical studies have been conducted, and many works by the pioneers of Soviet Ukrainian demography have been published. Beginning in the 1970s, however, Marxist-Leninist dogma began playing an excessive role in the demographic research of certain scholarly collectives. They began elaborating the concept of the 'self-reproductivity' of the population and a corresponding 'law of population,' which in the late 1980s was 'replaced' by the concept of the 'socialist self-reproductivity' of the population. Such theories have hampered the development of demography as a science. In the early 1990s a new revival of demography began in Ukraine. The field's parameters have been substantially broadened, the understanding of the mechanism of demographic processes has improved, the population indicators during the cataclysms of the 1930s and 1940s have been reconstructed, and Ukrainian and Western scholars have begun collaborating on the major scholarly and practical questions of Ukraine's population.

Populism, Russian and Ukrainian. Ukrainian and Russian populism (*narodnytstvo* in Ukrainian; *narodnichestvo* in Russian) had certain common traits. Ukrainian and Russian populists idealized the people (*narod*), which, practically speaking, meant the peasantry. Populists believed that their theories reflected the interests of the peasantry, and that it was their duty to try to help them. Neither Russian nor Ukrainian ideologues developed a doctrine to which all populists of either nationality adhered; within both ideologies and movements there were various trends, sometimes similar, at other times opposed, to one another. Neither was successful in forming modern political parties, although the Ukrainian populist M. *Drahomanov is considered to be the father of the peasant-based *Ukrainian Radical party of Galicia. Therefore both Ukrainian and Russian populism were essentially ideologies and movements of the intelligentsia.

Classic Ukrainian and Russian populism began to crystallize following the *Crimean War during the reign of the Russian tsar Alexander II, when the Russian government began enacting fundamental reforms to prepare the groundwork for the modernization of Russia. The relaxation of censorship allowed society to express itself more freely. Discussion of the reform program was at times acrimonious, especially over the terms of the emancipation of the peasantry from serfdom. In that debate the Russian radicals A. *Herzen and N. *Chernyshevsky laid the intellectual foundations of Russian populism; for Ukrainian populists the intellectual heritage of the *Cyril and Methodius Brotherhood, especially of M. *Kostomarov and T. *Shevchenko, was of primary importance. The era of classical populism came to a close around the beginning of the 20th century, with the birth of modern political parties, many of which were rooted in the populist tradition.

The main tenets of Ukrainian populism were federalism, the emancipation of the peasantry, and the recognition of the cultural distinctiveness of the Ukrainian people (as initially espoused by the Cyrillo-Methodians, especially Kostomarov). Study of the Cossacks induced romantic visions of rebellions against landlords and national oppressors and of the existence of a Cossack republic based on equality and brotherhood. Those ideas, reinforced by the fiery poetry of Shevchenko, inspired a younger generation of Ukrainophiles (see *Ukrainophilism), some of whom were also influenced by Western European utopian socialists as well as Herzen, Chernyshevsky, and the anarchist M. Bakunin.

Russian populism, as ideology, was socially more radical and utopian than Ukrainian populism. Idealizing

peasant traditions, especially communal farming, Russian populist thinkers came to believe that the *obshchina* (peasant commune) could serve as the foundation of a future socialist Russia. By modernizing and building on the commune, Russia could bypass capitalist development and move directly to the next, higher stage, socialism. That belief served as the populists' solution to economic backwardness; the proposed reorganization of society would also end economic injustice and the exploitation of the peasantry.

The Ukrainian populist movement began with the return of the old Cyrillo-Methodians from exile, the appearance of the **khlompoman* movement, and the organization of **hromadas* in the late 1850s. The Cyrillo-Methodians were the first to formulate a populist political platform based on social and national emancipation, albeit couched in religious and romantic terms. The organization was broken up by the authorities in 1847, and its leading members were exiled. In Kiev V. **Antonovych*, leader of the *khlompomany*, issued a typically populist manifesto, 'Moia ispoved' (My Confession), published in **Osnova* in 1862. In it he called on the Polish lords to renounce their privileges and work for the benefit of the people among whom they lived, the Ukrainian peasantry. The *khlompomany* eventually merged with other young Ukrainians to form the **Hromada* of Kiev. *Hromadas* were organized in several cities at that time. Members, both liberals and radicals, organized **Sunday schools* to teach literacy to peasants and workers, supported and contributed to Ukrainian populist journals, and promoted Ukrainian scholarship. Some became involved in revolutionary activities, although the dominant trend was for peaceful change. Ukrainian populists were generally known by their contemporaries as Ukrainophiles, and the Ukrainian populist movement has been called national populist. The most prominent among them were Antonovych and Drahomanov, both of whom came to represent two basic trends within the movement; cautious (even apolitical) cultural work (Antonovych) and radical (activist) socialism (Drahomanov).

The fact that Ukrainian populists were involved primarily in cultural work did not protect them from repressions. Ukrainian populists were accused of being separatists, of supporting the Poles, of fomenting discontent among the peasantry, and of socialism. Some were exiled, and the Sunday schools were closed, but the biggest blow was the enactment of P. **Valuev's* circular in 1863, which forbade the publication of popular, educational, and religious literature in the Ukrainian language. An assassination attempt on the tsar in 1866 reinforced the reactionary tendencies of the government. In those conditions the *hromadas* became less active, but scholarly work proceeded.

The early 1870s were especially fruitful for Ukrainian scholarship. The period also saw the renewal of *hromadas*. Ukrainian populists in Kiev, many of whom were also scholars, helped found the **Southwestern Branch of the Imperial Russian Geographic Society* in 1873 and developed it into an unofficial Ukrainian academy of sciences. By late 1874 they had gained control of the newspaper **Kievskii telegraf*. Also in 1874, Ukrainophiles organized and hosted the Third Archeological Congress in Kiev, which devoted much of its program to Ukrainian topics. Closer ties were established with Western Ukrainian populists in the early 1870s, and cultural activists from central

and eastern Ukraine helped to found the Shevchenko (later Scientific) Society and published their uncensored articles in the organ of the Galician national populists, **Pravda*.

The Ukrainophiles suffered major setbacks during a reaction in 1875-6. Drahomanov was removed from his position at Kiev University and forbidden to teach in Ukraine; the Southwestern Branch was disbanded, and its organizer, P. **Chubynsky*, was exiled; *Kievskii telegraf* was shut down. The most crippling blow, however, was the proclamation of the **Ems Ukase* by the tsar in May 1876, which forbade (with few exceptions) the printing of all Ukrainian-language material in the Russian Empire and its importation.

A Russian revolutionary populist movement had also activated itself by the 1870s. In all its phases the Russian movement was well represented in Ukraine as part of a general all-Russian current. Nevertheless it had its own distinctiveness in Ukraine, where objective conditions were different than in Russia. In addressing the national question some Russian populists felt that national differences would be resolved by reorganizing the empire according to federal principles. Yet the federalist concept was weakly developed, and most Russian populists did not consider the national question important. The language issue was likewise not openly addressed, although some revolutionary propaganda work was conducted in Ukrainian.

The revolutionary populist movement in Ukraine was also particularly strong. The **Kharkiv-Kiev Secret Society*, founded in 1856, was one of the first revolutionary populist groups established in the Russian Empire. One of its founders, P. **Yefymenko*, was a well-known Ukrainophile. Ukraine was one of the regions of intense activity on the part of the 'going to the people' movement of 1874-5. The first working-class organization in the Russian Empire, the **South Russian Union of Workers*, was founded by revolutionary populists in Odessa. That city was a center of intense activity on the part of populist groups, as well as Kiev and Kharkiv. The Bakuninist trend in revolutionary populism, as exemplified by the **Southern Rebels*, was particularly strong in Ukraine. **Narodnaia Volia* was also very active there.

In certain instances there was co-operation between *hromada* members and Russian groups; some members of the revolutionary groups had strong ties with or were among the radical members of *hromadas*. A. Zheliabov had attended meetings of the Odessa *Hromada*. The radical Ukrainophile S. **Podolynsky* helped establish L'vov's émigré journal, *Vpered*, an important organ of Russian revolutionary populism. He later argued that Ukrainians needed to establish their own socialist party. Attempts were made to establish Ukrainian revolutionary groups. V. Malovany of the Odessa *Hromada* was arrested and exiled for attempting to establish a Ukrainian social-revolutionary party in the early 1880s.

An attempt to form an émigré Ukrainian radical or socialist center was made by Drahomanov. After he was removed as a professor, Drahomanov emigrated. In Geneva he was joined by Podolynsky, and M. **Ziber*. With the financial support of the Kiev *Hromada* and later of Podolynsky Drahomanov established a Ukrainian printing press and published a radical Ukrainophile journal called **Hromada*. The journal was smuggled into Ukraine, where

it had some influence among radical Ukrainophiles. Drahomanov initially maintained close ties with Russian revolutionaries, although a few years after emigrating he came to condemn their terrorism, centralism, and disregard of the national question.

Whereas Drahomanov was deeply involved, at least initially after emigrating, in radical politics, the Kiev Hromada was becoming more cautious. The government's repressive policies acted to reinforce those in favor of retrenchment and strictly apolitical, cultural work. Following Alexander II's assassination in 1881 by Narodnaia Volia members, repression intensified. By the mid-1880s the Kiev Hromada had decided to break with Drahomanov and cease subsidizing him. Drahomanov criticized their action and maintained that it was precisely such apoliticism that caused many young radicals to forsake the struggle for Ukrainian rights and join the Russian movement instead.

The hromadas thus limited themselves primarily to cultural work. In 1882 the Kiev Hromada was instrumental in founding *Kievskaia starina*, which became an important journal of Ukrainian studies. Significant work was done on various projects, such as a Ukrainian dictionary, completed by B. *Hrinchenko as *Slovar ukrains'koi movy* (1907-9).

Populist ideals had a profound impact on Ukrainian literature in the second half of the 19th century. Early populist trends were most clearly represented by Shevchenko and M. Vovchok. By the end of the 1870s P. Myrny and I. Nechui-Levytsky had written some of their most important works, and I. Franko had made his literary debut; in the 1880s M. Kotsiubynsky and the poet P. Hrabovsky began their literary careers. Despite the ban on the Ukrainian language Ukrainian literature had become established in its own right by the 1880s, that is, during the period when it was most evidently populist in orientation. Populist writers began to examine new, previously unexplored, themes in Ukrainian literature, such as the role of the intelligentsia and the women's question, in addition to the well-worn theme of the fate of village folk. To avoid censorship writers from Russian-ruled Ukraine published extensively in Galicia. Ukrainian theater, also populist in orientation, was established with the formation in 1882 of the first Ukrainian professional troupe in the Russian empire, by M. Kropyvnytsky.

Populist ideas had a great influence on Ukrainian historiography. The most important early Ukrainian populist historian was Kostomarov, but Antonovych, as founder of the Kiev school of populist historiography, had a great impact as well. In addition to making his own contributions he influenced a whole generation of historians, including M. Hrushevsky and D. Bahalii. Ukrainian populist historians emphasized the role of common folk and popular institutions in their works, wrote much on the Cossacks and haidamaka uprisings, and promoted regional studies. To a large degree theirs was a natural response to the stateless condition of the Ukrainian nation as well as to the statist and official schools in Russian historiography.

Populism, Western Ukrainian. A cultural and then political movement initiated in the 1860s by the young Ukrainian intelligentsia in Galicia (known commonly as *narodovtsi*, or populists). It arose in counterpoint to the clerical conservatism of the older intelligentsia, who had become disillusioned with the possibility of independent Ukrainian national development after the failure of efforts to secure full national emancipation and had begun to orient itself increasingly (both culturally and politically) to Russia (see *Old Ruthenians and *Russophiles).

The *narodovtsi* sought to help Ukrainians better themselves through their own resources. They identified themselves with Ukrainians in the Russian Empire and insisted on the use of vernacular Ukrainian in literature and education. Their movement, deeply influenced by the writings of T. Shevchenko, M. Shashkevych, P. Kulish, M. Kostomarov, M. Vovchok, and others, built on the traditions of the Ukrainian national revival of the 1830s and 1840s as represented by the *Cyril and Methodius Brotherhood in Kiev, the *Ruthenian Triad, and the *Supreme Ruthenian Council in Lviv.

Ukrainophiles in the Russian Empire had a determining influence in the establishment and development of the populist movement in Galicia, particularly the **khlopomanii* of the 1850s, who propagated the idea of unity with the common folk and working among them. In the early stages of the movement contacts with Ukrainian students and the works of Ukrainian writers in the Russian Empire had a significant impact on it.

The populist movement in Galicia initially included students, teachers, writers, and young clergymen. The earliest focus of its activity was literary, and many of its activists organized themselves around journals. Because of a shortage of funds, those publications (including *Vechermytsi*, *Meta*, *Nyva*, and *Rusalka*) commonly died out and were then revived under new names. The *narodovtsi* also established contacts with the young Ukrainian intelligentsia in central Ukraine that was grouped around *hromadas, and organized similar bodies (largely composed of students) in Berezhany, Drohobych, Kolomyia, Lviv, Peremyshl, Sambir, Stanyslaviv, and Ternopil. Some older community leaders and writers, including I. Borysykevych, S. Kachala, Yu. Lavrivsky, K. Ustianovych, and S. Vorobkevych, joined them. The younger generation of writers active in the movement included K. Horbal, K. Klymkovych, and V. Shashkevych; O. Partytsky and D. Taniachkevych served as the principal ideologues and organizers of the early hromadas.

The proscription of the Ukrainian printed word by the Russian authorities in 1863 and 1876 forced certain writers, including M. *Drahomanov, O. Konysky, P. Kulish, I. Nechui-Levytsky, and M. Starytsky, to publish their

works in Galicia. Their doing so stimulated literary and scholarly activity among the populists there, and in 1867 the literary journal *Pravda* was established as the main voice of the populists (until *Dilo* emerged in 1880).

The populists took advantage of the new Austrian constitution by forming a number of new organizations, including the Ruska (later *Ukrainska) Besida society (1861) and an attendant full-time theater (1864) and the *Prosvita society (1868), whose branches and reading rooms played a critical role in the Ukrainian national movement. In 1873, financial backers from central Ukraine helped to establish the Shevchenko Literary Society, which in 1893 was renamed the *Shevchenko Scientific Society. Those community and scholarly organizations helped to shape a new populist national identity, worldview, and political outlook among Western Ukrainians. The ideas of *Drahomanov were particularly influential, although not everyone in the populist movement agreed with his offerings. The crystallization of a populist viewpoint was further aided by the *Sich student society of Vienna (est 1868), which acted as a conduit for transmitting Western European ideas to Galicia.

The poor showing of the largely Russophile Ruthenian Council in the Viennese parliamentary elections of 1879 (it elected only three delegates) prompted the populists to participate more directly in politics. Their activity initially took the form of publishing political newspapers for the peasantry (*Bat'kivshchyna*, from 1879) and the intelligentsia (*Dilo*, from 1880). In 1880 the populists organized the first Ukrainian all-people's meeting in Lviv, at which various addresses on political and economic themes were delivered. In 1885 they established their own political organization, the *People's Council, which soon became the strongest Ukrainian party in Galicia. The leading populists of the period included O. Barvinsky and his brother, V. Barvinsky (editor of *Dilo*), the economist V. Navrotsky, D. Hladylovych, O. Ohonovsky, Yu. Romanchuk (editor of *Bat'kivshchyna*), and the composer A. Vakhnianyn.

In the course of its evolution the populist movement lost its element of social radicalism and dropped its opposition to the Greek Catholic hierarchy; eventually it became quite conservative, loyal to the Austrian government, and dominated by the clergy. The shift was a result of the aging of its membership and its co-operation with clerics who had broken with the Russophiles. A new radical populist movement arose in reaction. That group, which looked to Drahomanov as a mentor, included I. *Franko, T. *Okunevsky, M. *Pavlyk, and O. *Terletsky. It finally established definite structures in 1890 with the creation of the *Ukrainian Radical party and the newspaper *Narod*.

In 1890 the Austrian government, in conjunction with the Polish provincial administration of Galicia, attempted to appease Ukrainian cultural and political demands by establishing the *New Era policy. The populists in particular were courted for their support. Although the New Era provided some concessions, it lacked substance and was largely unpopular among the Ukrainian people. Opposed by such leading populists as Ye. Olesnytsky, the New Era lasted only until 1894. That year a schism emerged in the populist contingent of parliamentary delegates between a progovernment faction led by O. Barvinsky and A. Vakhnianyn and an opposition faction led by Yu. Romanchuk. In 1899 the majority of populists joined with the right wing of the Ukrainian Radical party to form

the *National Democratic party. O. Barvinsky's faction, centered around the offices of the newspaper *Ruslan*, continued to support New Era policies and later formed the Catholic Ruthenian People's Union (later the *Christian Social Movement).

Influenced by its counterpart in Galicia, the populist movement in Bukovyna emerged initially in literature. In 1869 O. Fedkovych came out in favor of using the Ukrainian vernacular, as did the brothers H. and S. Vorobkevych. In the mid-1880s the populists overcame the influence of local Russophiles and took control of leading community organizations, such as Ruska Besida (1884) and the Ruthenian Council (1885). The newspaper *Bukovyna* was formed in 1885 as the voice of the local populists, who included Fedkovych, Ye. Pihuliak, O. Popovych, I. Tyminsky, and V. Volian. A schism among populists did not occur in Bukovyna until after 1900, when they broke off into the National Democratic party, the Radical Party, and the Social Democratic party.

Ukrainian populism was slowest to develop in Transcarpathia, where it was initiated in the 1880s by L. Csopcy in literature and language education. It became more widespread in the 20th century as a result of the efforts of A. Voloshyn, H. Strypsky, and Yu. Zhatkovych. The Ukrainian national revival in Transcarpathia in the 1920s and 1930s was marked largely by a populist ideology.

Poputchik (Russian for 'fellow traveler'; Ukrainian: *poputnyk*). A term in early Soviet literature for those writers who were neither Party members nor actively involved in imposing Soviet rule yet were sympathetic to some degree of co-operation. In Ukraine *poputchiki* were usually writers who did not belong to the 'proletarian' literary organizations (such as Hart, later the All-Ukrainian Association of Proletarian Writers). At first the term *poputchiki* even included writers in futuristic literary organizations, such as Fliamingo (1919), the *Association of Panfuturists (1922-5), *Nova Generatsiia (1927-31), and *Avanhard (1926-9). As *poputchiki*, however, those writers were often politically inconsistent, in that some eventually moved to the extreme left wing, such as the onetime theoretician of Ukrainian futurism O. *Poltoratsky. At first the most typical of the *poputchiki* were the writers belonging to Kiev literary circles who grouped around the journal **Knyhar* (1917-20) and then around the Kiev publishing house Slovo (out of whom the group of *Neoclassicists emerged). The Kiev writers in the group Lanka (1924-6, renamed *MARS in 1926) can also be classed as *poputchiki*. A few literary critics were *poputchiki*, such as B. *Yakubsky, A. *Lebid, O. *Doroshkevych, H. *Maifet, and M. *Dolengo, who mainly grouped around the journals *Chervonyi shliakh*, *Zhyttia i revoliutsiia*, and, later, *Literaturnyi iarmarok*. In the 1930s the majority of the *poputchiki* were arrested and deported to labor camps, where they died (M. Zerov, P. Fylypovych, M. Drai-Khmara, H. Kosynka, Ye. Pluzhnyk, D. Falkivsky, H. Brasiuk, B. Teneta, and

others). Some died during the Second World War in German labor camps (Ya. Kachura); others, after years of leading a wretched existence in exile, were rehabilitated (B. Antonenko-Davydovych). The most vocal critics against the *poputchiki* were V. Koriak, D. Zahul, Ya. Savchenko, O. Poltoratsky, and B. Kovalenko. The writers' organization *Vaplite worked with the *poputchiki* and defended them, and later some *poputchiki* joined Vaplite. The term *poputchik* was officially discarded after the Party's decree in 1932 that all writers should unite in a single Writers' Union of Ukraine.

M. Stepovy

Pora. See *Ukrains'ka hromads'ka pora.*

Poraiko, Vasyl [Porajko, Vasyl'], b 12 November 1888 in Ustia, Sniatyn county, Galicia, d 25 November 1937. Soviet political figure. During the First World War he was captured and deported by the Russians to Astrakhan, where he joined the Bolsheviks. Upon returning to Galicia he became a member of the CP(B)U and commander in chief of the Red Ukrainian Galician Army (March–August 1920). He served on the All-Ukrainian Central Executive Committee (1920–5) and then held important posts in the Ukrainian government – chief procurator, commissar of justice (1927–30), and deputy head of the Council of People's Commissars (1930–7). At the same time he was a member of the Organizational Bureau of the CP(B)U. He was arrested in August 1937 during the purge of the Ukrainian government and Party and shot a few months later.

Porcelain and china industry. A branch of the fine ceramics industry manufacturing household and artistic porcelain, faience and *majolica, and laboratory, medical, insulation, radio, and sanitary porcelain. Good-quality plastic and refractory white clays, kaolins, feldspar, and quartz are mixed to form porcelain paste. The pottery formed from the paste is fired at different temperatures and with different additives to produce white hard porcelain (at a temperature of up to 1,400°C), soft porcelain (1,300–1,350°C), and special porcelain (above 1,450°C), which is impervious to water and gas. Porcelain or china is usually finished with a transparent glaze and decorated with ceramic paints. For faience more clay and less feldspar is used, and the ware is porous and of a light cream color. It is usually covered with a colored glaze.

Ukraine provides favorable conditions for the development of the porcelain and china industry. Deposits of the best sorts of kaolin are found mostly in the Ukrainian Crystalline Shield, and the porcelain and china factories are therefore located mostly in that belt, particularly in the Zhytomyr region. The industry began to develop in Ukraine in the first half of the 18th century. The first china and faience factories in Ukraine were set up by Polish magnates to compete with foreign imports. Such factories appeared in Biała Podlaska, in Podlachia (1738–42), Zhovkva, in Galicia, and Chudniv, in Volhynia. All of them were managed by German craftsmen. J. Czartoryski established a large factory in Korets (1783–1832), which became famous for its china and faience. It was managed by craftsmen from Sèvres, the brothers F. and M. Maser. Until 1790 it manufactured faience, and afterward, china as well. In 1793 about 1,000 workers and 73 painters were employed at the factory, which was run by Sobinski. Its

monthly output was 20,000 units of domestic, decorative, and pharmaceutical ware. At first its products imitated the rococo and Empire styles of the china manufactured in Meissen, Sèvres, and Vienna. Eventually, original motifs appeared on the Korets china. Blue in all its shades was the most frequently used color. In 1815 polychromatic ornamentation was introduced, consisting mainly of vegetative motifs derived from the local flora; miniature landscapes of French design but taken sometimes from the local region; and transparent incisions. Count Zamoyski's factory in Tomaszow, in the Kholm region (1795–1834 and 1842–96), produced ware that was popular in Ukraine, Poland, Hungary, and Moldavia. It was decorated by M. Maser and, beginning in 1842, by Wender. The factory produced 20,000 pieces annually. From 1806 it produced china mostly in the Empire style. One of the largest china and earthenware factories (at first 100 workers, then 500) was located in Baranivka on the estates of the Walewski family from 1802. The factory was owned by F. Maser and the members of his family and, from 1895, by the Hrypari family. It manufactured mostly household china that was decorated with polychromatic and sometimes monochromatic floral designs and, from the 1820s, with miniature landscapes. The yellow color was one of the factory's inventions. Smaller china and faience factories were located in Horodets, Emelchyn, Dovbysh, Kamiany Brid, Polonne, Romaniv, Patsykyv, and Korosten.

Beyond Volhynia a large earthenware factory was located near Kiev, the *Mezhyhiria Faience Factory (1798–1874). The influence of Ukrainian folk art is evident in the forms and decorations of its products. A. Myklashevsky owned a china factory in the village of Volokytyne, in the Chernihiv region (1839–62). Its products consisted mostly of expensive dining sets, sculptures emulating French models, and Empire fireplaces in the baroque style with a touch of Ukrainian folklore.

In the second half of the 19th century the porcelain and china industry in Ukraine declined, mostly because of foreign competition. By 1895 there were only eight porcelain factories in Ukraine, employing 430 workers and producing 75,000 rubles' worth of goods. In 1913 there were 9 enterprises, compared to 27 in Russia. The largest faience factory, established in 1887, was located in Budy, near Kharkiv. It employed over 1,000 wage and salary workers. In 1913 it produced 11 million units of various earthenware.

After the 1917 Revolution the porcelain and china factories in Ukraine were nationalized, and at the beginning of the 1920s they resumed production. Eventually most of them were rebuilt, and most of the manual labor was mechanized. Production increased dramatically: the largest factory in Budy had turned out 44 million items by 1940. At first the porcelain and china factories used the old patterns. With time they adopted some standard patterns for mass production. Besides household china, the factories in Baranivka, Dovbysh, and, particularly, Horodets produced statuettes of animals and of Soviet life designed mostly by the craftsmen Yu. Havryliuk and R. Marchuk. In 1929–41 vegetative motifs instead of geometric folk ornamentation were increasingly used to decorate tea sets. Mechanized methods of decoration with hackneyed scenes of Soviet life designed by such artists as M. Kotenko and V. Panashchatenko were adopted.

After the Second World War and the collapse of the in-

dustry in 1941–4, it was rebuilt; by the beginning of the 1950s it had reached the 1940 level of production. New techniques and technology were introduced, production was expanded, new factories were built, and the assortment of products was increased. The main porcelain and china factories are located in Kiev, Baranivka, Horodets, and Korosten. The Kiev Experimental Ceramic and Artistic Plant (est 1945) does research on the technology of porcelain making. New porcelain designs are invented there for the porcelain factories in Ukraine. The Kiev factory applied the motifs of Ukrainian folk wall-painting to the decoration of china. Artists such as O. Sorokin, O. Zhnykrup, S. Bolzan, O. Rapai-Markish, H. Moldavan, and V. Shcherbyna specialize in table sculpture. The porcelain factory in Baranivka has the largest assortment of goods. The decoration process is mechanized. The most common ornament is floral, based on Ukrainian folk art. Its porcelain figures depict characters from Ukrainian literature and folktales and representatives of social groups in folk costumes. About 20 painters under the direction of M. Kryvorukova and sculptors under the direction of V. Pokosovska and D. Hoch were employed at the plant. In 1976, 39.4 million articles were produced. The Horodets Porcelain Factory specializes in tea sets, table sets, and decorative china. Its production in 1968 was 18 million pieces of china. The factory in Korosten specializes in dining sets, drinking china, and jugs. Since 1960 it has also produced statuettes. Its chief artist was H. Malysky, and its chief sculptor was T. Tokarenko. At the Polonne factory the chief artist was P. Ivanchenko, and at the Dovbysh factory, O. Yarosh. Both factories specialize in tea sets, gift mugs, cups, and toy dining sets. The *Budy Faience Factory is the largest and most modern porcelain plant in the former Soviet Union. Besides dishes the factory manufactures medical, sanitary, and decorative faience. In 1976 there were 16 porcelain and china factories in Ukraine. The factories at Slovianske, Pervomaiske, and Olevske made porcelain insulators. Ukraine's output of household china and porcelain was 6,000 t in 1940, 7,400 t in 1950, 21,700 t in 1960, 39,500 t in 1970, and 57,900 t in 1979. Ukraine's output accounted for about 30 percent of the USSR output. Some of it was exported to the other Soviet republics and beyond the Soviet Union. Nevertheless, there is an acute shortage of household china in Ukraine.

Ceramic artists are trained at the Odessa Industrial Arts School, the Myrhorod Ceramics Tekhnikum, and the Lviv Institute of Applied and Decorative Arts.

V. Kubijovyč, O. Ohloblyn

Porfirev, Vladimir [Porfirjev], b 8 July 1899 in Viatka, Russia, d 30 January 1982 in Kiev. Geologist; full member of the AN URSR (now ANU) from 1957. He graduated from

the Leningrad Geological Institute in 1926. He then worked in geological institutes in Leningrad and in 1938 joined the ANU Institute of Geological Sciences. He served as chairman of its petroleum department (1944–50) and became director of the ANU institutes of the Geology and Geochemistry of Fossil Fuels (1951–63) and of Geological Sciences (1963–8). He conducted petroleum explorations in Central Asia, Caucasia, and Ukraine, especially in the Dnipropetrovske-Donetske and Carpathian regions, and published extensively on the origin of fossil fuels. He proposed theories on the origins of petroleum, ozocerite, and coal.

Porohy (Rapids). A monthly magazine of literature and art, published in Buenos Aires in 1949–57 (a total of 79 issues). Edited by A. Halan and I. Kachurovsky, it published works and translations by Ukrainian émigré writers. Among the contributors were K. Buldyn, L. Poltava, M. Sytnyk, M. Orest, V. Derzhavyn, V. Chaplenko, Ye. Onatsky, and O. Drahomanova.

Porokhivsky, K. See Zyblivych, Yevhen.

Porpoise (Ukrainian: *morska svynia, delfin*). A marine mammal of the order Cetacea, suborder Odontoceti, which also includes the whale (Ukrainian: *kyt*). The porpoise (family Delphinidae) is the only cetacean found in Ukrainian waters, in the Black Sea and Sea of Azov. It grows to up to 2 m in length and weighs about 90 kg. Previously important commercially, it was hunted for its meat, skin, and oil. Since 1965 hunting for porpoises has been banned.

Mykola Porsh

Porsh, Mykola [Porš], b 19 October 1879 in Lubni, Poltava gubernia, d 16 April 1944 in Berlin. Economist and civic figure of German-Jewish descent and a leading member of the *Revolutionary Ukrainian party and of the *Ukrainian Social Democratic Workers' party. In the late 1890s he conducted revolutionary work in the Lubni region, and from 1904 he worked in the political underground in Kiev and Nizhen. During the revolutionary period he was a member of the Central Rada and its Little Rada. In January 1918 he was appointed UNR minister of defense and labor. After serving as UNR envoy to Germany in 1919–20, he stayed abroad and turned away from political activity. His studies of Ukraine's agrarian and economic problems demonstrated, by an examination of issues such as land use and ownership, the labor market, and Russian state budget

policies, how Ukraine was exploited by Russia. Methodologically, Porsh was one of the first economists to separate the statistical data on Ukraine from the data on the Russian Empire. Under the pseudonym Hordiienko he engaged in polemics with P. Struve on the question of Ukraine's national economy. He also translated K. Marx's *Zur Kritik der politischen Ökonomie* into Ukrainian (1923).

Port Arthur. See Thunder Bay.

Portraiture. The artistic depiction of one or more particular persons. The oldest form of secular art in Ukraine, it dates back to the 4th-century BC portraits found in burial sights in Chersonese Taurica. Medieval examples are the depictions of Grand Prince Yaroslav the Wise and his family (1044) in the frescoes of the St Sophia Cathedral in Kiev and the depictions of Grand Prince Sviatoslav II Yaroslavych and his family in the illuminations of the *Izbornik* of Sviatoslav (1073). Prince Yaropolk Iziaslavych and his wife, Kunigunde-Irina, are shown in the Trier Psalter (1078–87).

Although portraiture did not emerge as a separate genre until the 16th century, its existence may be traced back to the canonical renderings of ss Anthony and Theodosius of the Caves in the *Holy Protectress of the Caves* icon (ca 1288), where they have been given individualized features. In the late 15th and early 16th centuries the rendering of icon countenances became more realistic as a result of Renaissance influences (eg, the *Krasiv Mother of God*). In the 17th century, realistic portrayals of patrons were part of the composition of icons, such as the *Crucifixion*, with a portrait of L. Svichka, by Y. Ivanovych, the *Holy Protectress*, with a portrait of Hetman B. Khmelnytsky, and the fresco *Supplication* (1644–6), with Metropolitan P. Mohyla, in the Transfiguration Church in the Berestove district of Kiev.

Late 16th- to 18th-century religious and secular portraits at first had some characteristics of the icon, such as flattened forms, static frontal composition, and hieratic figural representation. With time, under the influence of Renaissance painting, they became three-dimensional and were painted with a linear and aerial perspective. Many portraits of patrons of shrines and churches were painted and displayed inside churches. In one of the earliest surviving portraits of this type, that of J. Herbut (ca 1578), only the face and hands show signs of modeling. The later portrait of K. Korniyak (1630s) is more three-dimensional, but its composition is static. A portrait of T. Palii (ca 1711), however, is rendered rather flatly and hieratically, her garments decoratively silhouetted against a shallow backdrop.

Memorial portraits of members of the upper classes were painted on wood or metal and attached to the lids of their coffins. One of the most sensitive and beautifully modeled was that of V. Lanhysh (1635), found in the Lviv Dormition Brotherhood's portrait collection. Thought to be by M. Petrakhnovych, it was painted in oils on a metal oval. Portraits were also painted on banners used at funerals; the one of K. Korniyak (1603) is an outstanding example. Small votive pictures with unsophisticated portrayals of deceased individuals, such as F. Stefanyk (1618), S. Komarnytsky (1654), and I. Vysotsky (1677), were also popular.

The rich also commissioned sculptural depictions of de-

ceased family members, which were set atop tombstones; notable cemetery sculptures were those of K. Ostrozky (1579), O. Lahodovsky (1573), the Syniavsky family (ca 1573–1642) in Berezhany, K. Romultova (1572) in Drohobych, and A. Kysil (1653) in Nyzkynychi, Volhynia.

Secular portraits of nobles, Cossack and peasant leaders, and rich burghers gained currency in the 16th century and grew in popularity through the 17th and 18th centuries. A portrait of the Polish king Stefan Batory (ca 1578) painted by the Lviv guild artist V. Stefanovsky during the king's visit to Lviv was a realistic depiction without the compositeness and idealization prevalent in portraits of that time. A special type of portrait painting developed in Ukraine, the *parsunnyi* (from the Latin *persona*), depicting notable figures in rich attire and formal poses against a background reaffirming their official status; included in this category are portraits of K. Zbarazky (1620s), Hetman I. Samoilovych (1674), M. Myklashevsky (ca 1700), V. Darahan (1760s), and H. Hamaliia (1750s).

During the baroque period of the late 17th and early 18th centuries many official portraits of Cossack hetmans, including B. Khmelnytsky, I. Mazepa, I. Skoropadsky, D. Apostol, and P. Polubotok, were painted depicting the regalia of office. Church leaders were also well represented in portraiture (eg, I. Krokovsky, 1718; D. Postovsky, 1752). Family portraits mirrored social and historical changes in their composition and the manner in which the subjects were painted. The portrait of Col S. Sulyma and his wife (1754), for example, depicts them in the elaborate dress of Cossack leaders, whereas that of their son and his wife (1780s) portrays them as typical courtiers.

Until the 18th century, artists rarely signed their works. Of the few names of portraitists that are known, F. *Senkovych, M. *Petrakhnovych, *Vasyl of Lviv, I. *Rutkovych, O. *Lianytsky, Master Samuil, and Master Andrii deserve mention. The development of regional styles gave rise to the Kievan, Galician, and Volhynian schools of portrait painting. Portraits were also made by engravers, such as L. and O. *Tarasevych (K. *Klokotsky*, 1685), I. *Shchyrsky (V. *Yasynsky*, 1707), O. Irkliivsky, and H. *Levytsky (portrait of R. Zaborovsky, 1739). L. Tarasevych was the most prominent portraitist of royalty and nobility (eg, *Princess Sofiia Alekseevna*, 1689; K.-S. *Radziwit*, 1692). D. Galakhovskiy was the author of the engraving of I. Mazepa printed in a scholarly tract.

The tsarist abolition of Ukrainian autonomy in the 18th century coincided with the establishment of the St Petersburg Academy of Arts (1758), which attracted many Ukrainian artists. D. *Levytsky of Kiev became a professor at the academy and the greatest portraitist in the Russian Empire of his time. V. *Borovykovsky, another outstanding portraitist, also worked in St Petersburg in the classical, academic manner favored by the imperial court. In the 19th century many portraits were painted in Ukraine by trainees of the academy (V. Tropinin, A. *Mokrytsky, K. *Pavlov, H. *Vasko) and of guild workshops (H. Hanetsky, H. Kushliansky) as well as by self-taught artists (M. Dyrov, I. Sliusarenko) and amateurs (O. Berdiaev, H. *Psol). Among the many portraits painted, *Portrait of My Wife* (1835) by Mokrytsky and *Portrait of a Young Man* (1847) by Vasko stand out. Portraits were also painted by wandering artists (P. Orlov, K. Yushkevych-Stakhovskiy) and by artists who were former serfs, such as D. Malarenko, I. *Shapovalenko, P. Zaitsev, I. Zasidatel, and T.

This page intentionally left blank

*Shevchenko, whose contribution to the Ukrainian art has often been underrated. Shevchenko's portraits displayed a broad social range of subjects, from peasants (*The Kazakh Girl*, 1856) to nobility (*Princess E. Keikutova*, 1847), and sensitive three-dimensional modeling with light. He painted over 150 portraits, 43 of them self-portraits.

Portraits remained popular throughout the 19th century. They were done by most artists, including M. Murashko (*Portrait of M. Ge*, 1906), M. Kuznetsov (*Portrait of P. Tchaikovsky*, 1893), M. Pymonenko (*Portrait of the Wife in Green Dress*, 1893), H. Tsyss (*V. Mahdenko*, 1910), and K. Kostandi (*Portrait of M. Kniazeva*, 1898). P. Martynovych created strong images of Ukrainian peasants (*H. Honchar, Portrait*, 1870s), and S. Vasylykivsky specialized in historical portraits, including ones of B. Khmelnytsky, P. Mohyla, and I. Gonta. Women artists who painted portraits included M. *Raievska-Ivanova (*Self-Portrait*, 1866) and M. *Bashkirtseva (*Portrait of a Parisienne*, 1883), who worked mostly in France.

In the 20th century, artists have created portraits in a variety of styles. O. *Murashko, famous for his *Girl in a Red Hat* (1902–3), experimented with impressionist light effects (*Zhorzh and Oleksandra Murashko*, 1904–8; *Portrait of a Peasant Family*, 1914). F. *Krychevsky's interest in impressionism, postimpressionism, and cubo-futurism can be seen in his *Girl in Pale Blue* (1904), *H. Pavlutsky* (1922), and *P. Krychevska* (1926) respectively. In the 1930s he turned to more realistic depictions (*Happy Dairymaids*, 1937). M. *Zhuk painted a variety of portraits, including some with cubist analysis of space (*P. Tychyna*, 1919). Among the followers of M. Boichuk, O. *Pavlenko devoted considerable time to self-portraits and portraits of women (*Mariika*, 1920; *Self-Portrait*, 1925, 1930, 1970). A. *Petrytsky, who explored cubo-futurism, deserves special mention for creating, between 1928 and 1933, 150 portraits of Ukrainian cultural figures; tragically, most disappeared or were destroyed during the Stalinist terror.

With the imposition of *socialist realism by the Soviet regime in the early 1930s, all open explorations in modernism came to a standstill. Thenceforth most portraits created in Soviet Ukraine portrayed Party leaders, revolutionary figures, and workers, peasants, and soldiers in an idealized manner. Among the more versatile portraitists working within the framework of socialist realism were O. *Shovkunenko (*M. Rylsky*, 1944–5), V. *Kostetsky (*P. Voronko*, 1945), and the graphic artist V. *Kasian (a series of etchings of V. Lenin, 1947; and the often-reproduced portrait of T. Shevchenko, 1960). M. *Bozhii painted several portraits of Lenin and of Shevchenko.

In Western Ukraine under Austro-Hungarian and Polish interwar rule, portraitists painted in the styles popular in Western Europe. I. *Trush painted prominent Ukrainian writers, such as I. Franko (1897), V. Stefanyk (1897), and Lesia Ukrainka (1900). The best-known portraitist in Lviv was O. *Novakivsky, who painted numerous portraits in a modified impressionist (*Portrait of My Wife*, 1906) and later an expressionist manner (*Self-Portrait*, 1927; *O. Dovbush*, 1931). O. *Kulchytska also used an impressionist palette in her early works (*Portrait of My Sister Olha*, 1912). In 1920 she rendered a series of linocut portraits of Ukrainian literary figures.

After Western Ukraine became part of the USSR in 1944, artists were required to produce socialist-realist portraits (eg, V. Manastyrsky's *Highlander*, 1949). During the

Khrushchev cultural thaw, however, many Lviv artists returned to exploring a variety of figural styles. Portraits of women in Hutsul dress have been painted by V. *Manastyrsky (*Marichka*, 1973) and H. *Smolsky (*The Fiancée*, 1960). M. *Selska has painted several portraits in a semiabstract manner, using flattened areas of color and heavy textures (*R. Selsky*, 1968). D. Dovboshynsky has worked with heavy impasto and vibrant hues (*R. Turyn*, 1984); V. *Patyk's portraits have been rendered in an expressionist manner (*Woman from Rusiv*, 1971). Of the younger artists L. *Medvid has painted portraits in a superrealistic manner without any details (*Portrait of My Wife*, 1968; *S. Liudkevych*, 1980).

Of the portrait painters in Transcarpathia, A. *Erdeli painted *Young Woman* (1940) and *Engaged Couple* (1953) in bold, vibrant colors and with the subjects wearing folk dress, as did A. *Kotska (*Highland Woman*, 1956, 1970).

In Soviet Ukraine from the 1930s, most sculptural portraits were of Communist party leaders, revolutionaries, and workers rendered in a heroic, idealized manner (P. *Ulianov's *October Hero*, 1931; I. Yakunin's *V. Lenin*, 1968). Busts and full-length figures of writers and artists have also been popular (I. Severa's *I. Franko*, 1947; E. *Mysko's *Portrait of a Young Architect*, 1972). Most were commissioned for public display. Officially favored sculptors included M. *Lysenko, I. *Znoba, Ya. *Chaika, I. *Severa, H. *Kalchenko, Yu. *Synkevych, H. Redko, and D. *Krvavych.

Not all postwar Soviet Ukrainian artists adhered strictly to socialist realism, however. In sculpture M. Hrytsiuk modeled sensitive and intimate portraits (*Rostropovich; Valia*, 1969), and in painting O. Zalyvakha chose subjects not sanctioned officially (*Hetman Kalnyshesky*, 1964) and a manner of depiction labeled as formalist.

In Kiev I. *Marchuk turned to portraiture in the 1980s and painted several starkly modeled, intimate portraits against fantastically rendered backgrounds (*S. Pavlychko*, 1982) and neutral settings (*R. Selsky*, 1982). One of the more impressive portraitists of a classical style is B. *Plaksii. Among the Kiev women artists T. *Yablonska, V. Vyrodova-Gotie, and V. Kuleba-Barynova have painted portraits of children and adults.

Ukrainian portraitists also worked outside their homeland. M. *Parashchuk, a sculptor who modeled expressive busts of V. Stefanyk and S. Liudkevych in 1906 while still in Lviv, worked in Sofia, Bulgaria, from 1922. The world-renowned sculptor A. *Archipenko left Kiev in 1908 and worked thereafter in France, Germany, and the United States. He created several busts of Shevchenko as well as portraits of his wife, Angelica. V. *Masiutyn, who lived in Berlin from 1921, created 63 medallions of Ukrainian political and cultural leaders and busts of P. Doroshenko and I. Mazepa. H. *Kruk, who worked in postwar Munich, modeled and carved memorable heads of children (*Portrait of Peter*) and intimate portraits of his contemporaries (A. Zhuk, V. Kubijovyč, and V. Yaniv).

Several postwar émigré artists in North America have devoted considerable time to painting portraits in a variety of figurative styles: J. *Hnizdovsky (*K. Antonovych*, 1972), M. *Dmytrenko (*Romtsia Savchuk*, 1966), P. *Andrusiv (*The Painter's Wife*, 1955), P. *Mehyk (*The Sculptor V. Simiantsev*, 1978), L. *Hutsaliuk (*Renata*, 1958) in the United States, and K. *Antonovych (*Woman from Bukovyna*, 1956), M. *Levytsky (*Self-Portrait*, 1948, 1951, 1960), and A.

Babych (*Vera*, 1979) in Canada. L. Molodozhany (Mol), who settled in Winnipeg, gained an international reputation for his sculptural portraits of famous people. Emigré sculptors who have worked in the United States are M. *Chereshnovsky (*Y. Hirniak, Lesia Ukrainka*), S. *Lytvynenko (*E. Andrievska*, 1962), and V. *Simiantsev (*Prof. A. Shtefan*, 1948).

Among the postwar generation of artists of Ukrainian origin born in North America, portraiture has been central to the work of L. Bodnar-Balahutrak, who paints close-up likenesses in a photorealist manner (*The Madonna Complex*, 1981).

Posad. The trading and manufacturing district of a town in Kievan Rus'. Such districts were usually located outside the town walls; hence, the *posad* was a suburb. Since fortified towns were built as a rule on higher ground, the suburbs were below (*pod*) them and were known as *podil* (pl *podoly*). In the 13th century *posad* became the prevalent term in northeastern Rus'; gradually it was extended to whole towns that were inhabited mostly by merchants and tradesmen. By the end of the 18th century, when the difference between the merchant and the artisan classes became sharper, the term *posad* ceased to be used of town districts. It was brought to Ukraine from Russia in the second half of the 17th century to designate certain kinds of settlements and was used mostly in Starodub and Nizhen regiments, Slobidska Ukraine, and Southern Ukraine.

Poshtuchne (from *shtuka*, from German *Stück* 'piece'). A tax in kind imposed on state peasants under Lithuanian, Polish, and Moldavian rule from the 14th to 17th centuries. It was proportional (from 1:10 to 1:30) to the number of cattle or meters of woven cloth owned by a family.

Poshyvailo [Pošyvajlo]. A family of ceramicists from Opishnia, Poltava oblast. The first renowned potter in the family was Taras, who lived in the second half of the 19th and in the early 20th century. His works consisted of enameled pots, bowls, cups, and pans. His wife, Kylyna (?–1930), was known for her ceramic toys, and their son, Nykyfor (b late 1880s, d October 1936), specialized in

enameled dishware. Nykyfor's son, Havrylo (b 7 April 1909), has made functional earthenware and small decorative pieces, which were painted with floral or animal designs by his wife, Yevdokhiia (b 14 March 1910). Their son, Mykola (b 27 May 1930), besides plates, toys, ashtrays, and candle holders, has produced sculptural compositions, such as *Farmer* (1974) and *Natalka and Petro* (1974). The family's work has been displayed in France, Belgium, and Bulgaria and can be found in museums in Kiev, Poltava, and Vilnius.

Posiada, Ivan [Posjada], b 9 April 1823 in Zinkiv, Poltava gubernia, d 24 October 1894 in Korostyshiv, Radomyshl county, Kiev gubernia. Pedagogue and political activist. A student in the philosophy faculty of Kiev University from 1843, in 1846 he joined the *Cyril and Methodius Brotherhood. When this society was suppressed by the authorities in 1847, he was arrested and exiled to Kazan, where he finished his university studies. Afterward he worked in the state administration and in schools in Russia before being allowed to return to Ukraine in 1869 as director of the Korostyshiv Teachers' Seminary (until 1879).

Poslannyk (Messenger). A semimonthly Catholic journal published in Berezhany, Lviv, Ternopil, and Peremyshl in 1889–1911. The publisher and editor was Rev L. Dzhulynsky; he was assisted at various times by Yu. Nalsky and L. Nesterovych. Dzhulynsky also published the *Knyzhochky myssiiny book series.

Pospelov, Volodymyr [Pospjelov] (Pospelov, Vladimir), b 22 March 1872 in Bogoroditsk, Tula gubernia, Russia, d 1 February 1949 in Kiev. Zoologist and entomologist; full member of the AN URSR (now ANU) from 1939. After graduating from Moscow University (1896), he worked at the Moscow (1896–1904), Voronezh (1913–20), and Leningrad (1930–40) agricultural institutes and the Kiev Entomological Station (1904–13), taught at Saratov (1927–30) and Kiev (1944–5) universities, and headed the laboratory at the All-Union Institute of Plant Conservation (1929–40). He became a member of the ANU presidium in 1939 and director of the ANU Institute of Entomology and Phytopathology in 1946. He initiated the creation of the first plant quarantine service in the USSR, pursued ecologically safe methods of biological and chemical control of agricultural pests, and discovered the infertility of butterflies in certain ecological conditions.

Pospolyti. The general name for the majority of the peasant population in the Hetman state and in Slobidska Ukraine in the 17th and 18th centuries. Initially, under Polish rule, the name also included city dwellers – in general, all non-nobles; during the Hetman state it included all non-Cossacks. Single men often joined the Cossack host and married men took up farming. The *pospolyti* did no military duty, except in emergencies. They supported the Cossack host by paying taxes and providing services, such as road maintenance, fortification construction, and troop quartering. There was no sharp division between the Cossacks and *pospolyti*: the richer peasants could readily acquire Cossack privileges, and the poorer Cossacks could become farmers. The *pospolyti* fell into several groups, depending on whose land they inhabited, and

what their relations and obligations were to the local administration or landowners: peasants inhabiting free military villages (under the hetman's administration); *ratushni* peasants (under the administration of the local company and town councils); rank peasants (living on lands ceded for temporary rule to the *starshyna* for military service rendered); monastery peasants; and peasants living on lands owned outright by the Cossack *starshyna*. The obligation of the *pospolyti* peasants varied from monetary taxes to taxes in kind to various duties. The burden of those increased with time. A certain subgroup of the *pospolyti* was formed by the *landless peasants. The *pospolyti* were enserfed in 1783.

Possessional peasants (*posesiini seliany*). That category of peasants in the Russian Empire who during the 18th and 19th centuries were attached to factories and could not be separated from specified industrial enterprises. The category emerged in response to the need for a labor force to serve developing manufacturing enterprises. An imperial decree issued on 7 January 1736 legally bound to enterprises those workers who had been trained in specialized skills, and who had been laboring in them at the time the law was enacted. Thus, possessional peasants were considered the property of a manufacturing firm as opposed to a particular landowner. In Ukraine possessional peasants were usually employed in sugar-processing plants. In the 19th century, owners of manufacturing firms steadily replaced possessional peasants with hired workers. By 1840, legislation had abolished possessional relations, and the laws leading to the emancipation of serfdom in 1861–3 abandoned the category altogether.

Postage stamps. Shortly after the first stamps for the prepayment of letter postage were issued in Great Britain (1840), postage stamps appeared in Ukrainian territories under Austro-Hungarian rule (1850) and Russian rule (1857). In 1864, laws were promulgated in the Russian Empire allowing for *zemstvo* or local issues. From their appearance in 1865 until their discontinuance in 1917, a total of about 790 *zemstvo* stamps were issued in Ukraine at 39 locations.

The first definitive stamps issued by an independent Ukrainian government were the five-value *shah* issues. The 10- and 20-*shah* stamps were designed by A. Sereda and the 30-, 40-, and 50-*shah* stamps by the noted Ukrainian graphic artist H. Narbut. Authorized by the government of the UNR, the stamp set was released on 18 July 1918 by the government of the Ukrainian State under Hetman P. Skoropadsky. All *shah* postage stamps were issued imperforate. They were widely used for postage in Ukraine until the end of 1920. Three months earlier (18 April 1918) a five-value set of *currency stamps was printed and released from the same plates as the *shah* issues. The currency stamps (perforated 11 ½ and printed on card stock) were used in place of coins owing to the shortage of metals and were inscribed on the reverse with a trident and words in Ukrainian that translate as 'circulates in lieu of coins.' The stamps were neither intended nor authorized for postal purposes.

After the proclamation of Ukraine's independence in January 1918, the postage stamps of tsarist Russia remained valid for postal use. In order to minimize Russian influence, provide postage stamps in more denomina-

tions, and save treasury funds, the Ministry of Postal and Telegraph Services issued an order on 20 August 1918 'to overprint with the national emblem of the Ukrainian State (ie, the trident) all postage stamps of Russian origin, which are at the present time used for postage in the territory of Ukraine.' The first trident overprints on postage stamps appeared in circulation even before the official decree, on 8 August 1918; on postal cards they date from 16 July 1918. After 1 October 1918 all Russian stamps without the overprint became invalid. Ukrainian territory at that time was divided into the postal districts of Kiev, Poltava, Katerynoslav, Kharkiv, Odessa, and Podilia. In order to comply with the overprint directive, each postal district prepared one or more overprinting devices. The trident overprint provisionals thus prepared were of different size, color, and form in each of the districts. To date, researchers have identified about 60 overprints, including some produced by local postal authorities. In addition to trident overprints on tsarist stamps, trident overprints also appeared on 8 August 1919 in Zhmerynka on stamps issued by the 1917 Russian Provisional Government.

Provisional trident overprints remained in use for some time after the withdrawal of the Directory of the UNR. The latest authenticated date of usage is on an Odessa postal card from Pryvilne (near Mykolaiv) to Kharkiv, dated 8 February 1926. Forgeries of provisional trident postage stamps began to appear in southern Ukraine toward the end of 1918. Later, counterfeits were produced by speculators outside the borders of Ukraine who forged overprints and postal cancels and created nonexistent values.

Realizing the need for a wider range of postal values, Postal and Telegraph Services of the Ukrainian State set about preparing a second definitive issue. Made up of values greater than 50 *shahy*, it was to replace the trident overprint provisionals and supplement the first five *shah* values. The stamps of the second issue were printed in Kiev during the fall of 1918. When the supply of the high-value trident overprint provisionals was exhausted in Volhynia and Podilia, the Ministry of Posts released only the 20-*hryvnia* value to ease the shortage. No other values of the second definitive set were ever placed in postal use. By the time the 20-*hryvnia* stamps became available in January 1919, the Hetman government, which had authorized their production, had been replaced by that of the UNR. At that time 100 *shah* equaled one *hryvnia*, and two *hryvni* equaled one *karbovanets* (ruble). Because of the high value of the 20-*hryvnia* stamp, its use was limited to the prepayment of postal money orders, particularly those for very high sums.

On 27 August 1920 the Government-in-exile of the UNR, meeting in the Polish city of Tarnów, resolved to replace all existing postage stamps then in use on Ukrainian territories with a new 14-stamp definitive issue containing values from 1 to 200 *hryvni*. Designed and printed by the Military Geographical Institute in Vienna, the beautiful stamp set, now known as the Vienna Issue, was never circulated despite published reports claiming otherwise. Some stamps of the Vienna Issue were overprinted, in anticipation of a military expedition into Ukraine in 1923, but the mission was not carried out, and the stamps (approx 300,000 sets) were never used for postal purposes. The Government-in-exile of the UNR also issued several stamps (labels) in 1935 (designed by P. Kholodny), com-

Postage stamps. 1st row: UNR *shah* issues; 2nd row: five examples of trident overprints and the 20-hryvnia stamp of the Ukrainian State (Hetman government); 3rd row: five values of the UNR Vienna Issue; 4th row: the Ukrainian SSR famine relief set; 5th row: the Western Ukrainian National Republic's Lviv octagonal overprint, Kolomyia 50-soty registration stamp, and stamps from the 3rd and 4th Stanyslaviv issues; 6th row: Carpatho-Ukraine's overprinted 3-korona Czechoslovakian stamp, UNC overprint, and UNC definitive

memorating the 10th anniversary of the assassination of S. Petliura and the 950th anniversary of Christianity in Ukraine, as well as a 1939 stamp commemorating the 60th birthday of President A. Livytsky.

In June 1923 the government of the Ukrainian SSR issued a set of four semipostal stamps in Ukrainian, *Ukraina v borotbi z holodom* (Ukraine Battles the Famine), *Selianyn obezbroiuie smert'* (The Peasant Disarms Death), *Portret T. Shevchenka* (Portrait of T. Shevchenko), and *Dopomoha holoduiuchym* (Aid to the Starving); the surcharge on the stamps was intended for famine victims. Designed by O. Makarenko and B. Porai-Koshyts, the set circulated briefly in six cities from 25 June to 15 July 1923 and remained the only postal issue ever released by the government of the Ukrainian SSR.

After seceding from the Austro-Hungarian Empire (1 November 1918) the Western Ukrainian National Republic (ZUNR) issued stamps as overprints of Austrian issues. The first stamps, with an octagonal overprint showing a Galician lion emblem and the full name of the ZUNR, appeared in Lviv on 20 November 1918; subsequent stamps were produced in Kolomyia, and a series of four issues was released in Stanyslaviv. Two additional stamp sets, printed for the ZUNR in Vienna, became available after the Polish occupation of Galicia (July 1919) but never entered postal circulation.

The first regular airmail service anywhere in the world was the Vienna–Cracow–Lviv line, which functioned from 31 March to 11 October 1918. An extension of the line to Kiev via Proskuriv (from late June 1918) made the route the world's first 'international' airmail line. Another service, the Budapest–Vienna–Cracow–Lviv line, functioned briefly from 4 July to 23 July 1918, and a few letters from Budapest were also carried as far as Kiev. For both of those *postal services, special airmail stamps were issued by the overprinting of existing Austrian postal designs with *Flugpost* and of Hungarian stamps with *Repülő Posta*.

During the interwar period the various regions of Western Ukraine were occupied by Poland, Rumania, and Czechoslovakia. The stamps issued by those states often depicted Ukrainian images and landmarks, such as the Pidhirtsi castle, the Lviv Polytechnical Institute, the Khotyn fortress, and Bukovynian folk motifs.

In 1941 Germany overprinted its 18-stamp definitive set with the single-line black overprint *Ukraine* for use in the Reichskommissariat Ukraine. The overprints were in postal circulation until late 1944, when those Ukrainian territories were recaptured by Soviet troops. Attempts were also made by local Ukrainian authorities under the German occupation to issue postage stamps. Local stamps appearing in Sarny, Horokhiv, and Kamianets-Podilskyi were soon banned by the German authorities.

On the day Carpatho-Ukraine declared its independence from Czechoslovakia (15 March 1939), it issued a single stamp, consisting of the overprint *Karpatska Ukraina* on the 3-koruna Czechoslovak stamp depicting a wooden church in Yasinia. After Carpatho-Ukraine's short-lived independence the territory was administered by Hungary, during which time Hungarian stamps were used. By the fall of 1944 the eastern provinces of Carpatho-Ukraine were being administered by Czechoslovakia, and in the areas to the west the Ukrainian National Committee (UNC) had taken control. Both jurisdictions issued overprinted Hungarian stamps and the UNC released a series of defini-

itive issues in 1945. After the Second World War the Ukrainian POW camp in Rimini, Italy, and the DP camps in Germany organized their own postal services, issued postage stamps and stationery, and prepared their own cancellations. Semipostals and commemoratives were also issued to generate revenue for camp administrations. Definitive issues were released by the Rimini (1946), Regensburg (1947), and Bayreuth (1948) camps.

The only stamps used in the Ukrainian SSR were those of the USSR. A Shevchenko series was issued in 1939; a large Ukrainian-language series was issued in 1954 to commemorate the tricentenary of the 'reunification' of Ukraine with Russia; and other series with Ukrainian themes were periodically released, including poets and writers, scenery, folk art, industrial plants, and cultural landmarks. After the dissolution of the USSR, the newly re-established Ukraine issued provisional stamps (consisting of meter mail markings on white paper) for several months in 1992. Ukraine's first commemorative stamps were issued in March of that year (500 years of Ukrainian Cossackdom, 100 years of Ukrainian settlement in Canada, and the M. Lysenko anniversary) and a definitive series honoring H. Narbut in May. Local trident overprints on Soviet stamps appeared in Kiev during March–April.

The first two postage stamps released in newly independent Ukraine in 1992

In the diaspora the Ukrainian National Council continued to issue stamps (more properly termed labels), souvenir sheets, and postal stationery through the 1970s. Postage stamps featuring Ukrainian themes have also been issued by countries with an émigré Ukrainian community. The Canadian government, for example, issued stamps to commemorate the millennium of Christianity in Ukraine (a Byzantine icon, 1988) and the centenary of Ukrainian immigration to Canada (paintings by W. Kurelek, 1991). Semipostal and souvenir stamps and postal stationery have also been issued by Ukrainian organizations in the diaspora, such as the Plast scouting association. The *Ukraine-Philatelisten Verband in Berlin has promoted Ukrainian philately since 1920. The *Ukrainian Philatelic and Numismatic Society is based in the United States; it publishes the semiannual journal **Ukrain-s'kyi filatelist/Ukrainian Philatelist*, as well as a bimonthly newsletter, *Trident/Visnyk*.

Postage stamps issued in Ukraine in 1992, including a USSR stamp overprinted with a trident

I. Kuzych-Berezovsky

Postal services. Little is known of the earliest postal services on the territory of present-day Ukraine. In the 1st millennium BC, letters were carried between Greece and the Greek city-states on the Black Sea littoral, and traders carried messages up and down the Dnieper River. The Scythian kings used mounted messengers. The first recorded organized mail service in Ukraine dates from the 13th century AD, during the period of Kievan Rus', when mounted messengers conveyed letters among the rulers, princes, noblemen, and traders. The system continued until the 15th century, when the messengers were known as *putni* boyars since they were minor noblemen who chose that type of service rather than carrying arms for the prince.

A regular postal service in the modern sense was established in Western Ukraine in 1629 by the Italian R. Bandinelli. The service connected the city of Lviv with Poland;

regular weekly mail deliveries were made by mounted postmen known as *kursory*. The Cossacks in Ukraine at various times during their history had their own messenger system. Certain sources report that Hetman B. Khmelnytsky's minister of the treasury, O. Atamanenko, organized a wide-ranging system of mails; that a formal postal service was established in 1669 by Hetman D. Mnohohrishny, which connected such cities as Kiev, Nizhyn, and Baturyn; and that messages were sent by the otaman of the Zaporozhian Sich, I. Sirko, to Hetman P. Doroshenko in 1675.

In 1674 the Russians, as part of the process of annexing Ukraine to Muscovy, began establishing a separate postal service of their own in Ukraine. The system linked Kiev with Moscow and was financed primarily out of the Ukrainian state treasury. By 1768 the Russian governors of New Russia and Kiev vicegerencies had established an elaborate system of mounted messengers. The Zaporozhian Sich was required to establish a network of messenger lines (by 1775 amounting to eight separate lines of communication), with hundreds of messenger stations, horses, and trained Cossack couriers at the ready.

During the Cossack era an interesting 'telegraph' system was set up on the borderlands between Ukraine and Crimean Tatar lands, consisting of a line of tall towers (*khvyhury*) manned by sentinels. Pitch barrels on the towers were set ablaze if a Tatar raiding party was sighted. By 1723 the whole southern frontier was dotted with the towers, spaced every 200–300 m. Another informal messenger service during the period of Cossack wars with the Poles and Russians (16th–18th centuries) was the network of kobzars who carried messages from village to village throughout the occupied portions of Ukraine.

By the mid-18th century regular mail services had been established almost everywhere in Ukraine, and gradually they became a monopoly of the occupying powers. The first postage stamps appeared in Western Ukraine (under Austria) in 1850 and in Eastern Ukraine (under Russia) in 1857. In Left-Bank Ukraine a system of semiautonomous *zemstvo* local mails came into being in 1865, which ran their own local post offices and issued their own postage stamps – the first postage stamps made in Ukraine (see *Postage stamps).

The independent Ukrainian government of 1917–20 established the *All-Ukrainian Postal-Telegraph Union, which became a member of the worldwide Universal Postal Union (UPU) in 1918. The ministers of postal and telegraph services in independent Ukraine were M. Shapoval (January 1918), H. Sydorenko (spring of 1918), V. Kuliabko-Koretsky (during the Hetman government), I. Shtefan (spring of 1919), I. Palyvoda (summer of 1919), and I. Kosenko (1920). The Western Ukrainian National Republic had its own mail system (minister of posts, O. Pisetsky) until it voluntarily merged with the UNR. Both governments issued postage stamps, and in June 1918 an airmail service was established between Austria and Ukraine (Vienna–Cracow–Lviv–Proskuriv–Kiev). It was the first regular and the first international airmail service in the world. Carpatho-Ukraine, during its brief existence in 1939, issued its own stamp. The Ukrainian Insurgent Army had its own postal service. Various local mail services were briefly in operation during the interwar and Second World War periods; local mail services were also established in various postwar Ukrainian refugee and POW camps.

The postal service of the Ukrainian SSR at first operated autonomously and issued its own stamps. In the early 1920s the service was subordinated to the All-Union Soviet Post, although it remained a separate member of the UPU. With the dissolution of the USSR, Ukraine once again has an independent postal service.

L. Onyshkevych

Postel, Oleksander [Postel'], b 1 May 1904 in Odessa, d 19 January 1989 in Odessa. Painter and printmaker. He studied at the Odessa Art Institute (1920–9) and taught at various art schools in Odessa (1931–67). In the 1920s he was a member of the Association of Revolutionary Art of Ukraine. He created paintings, such as *Odessa Environs* (1939), *Sun in a Halo* (1948), and *The Snow Has Melted* (1955), and print series, such as 'Uzbekistan Landscapes' (1942–5), 'Seasons of the Year' (1956–60), 'Odessa Landscapes' (1945–70), and 'Flowers' (1965–6). He also illustrated books and designed film sets.

Poster. An art form that emerged in the latter part of the 19th century, mainly as a result of advances in lithography. Although posters have been used mainly for advertising purposes, there are strong links between their design and developments in modern art. Many prominent artists, including H. de Toulouse-Lautrec, P. Picasso, and H. Matisse, have designed them. Posters were first used as propaganda tools during the First World War, and they have been widely used in this way by the Soviet, Nazi, and other totalitarian regimes.

The first Ukrainian-language posters in Ukraine appeared after the February Revolution of 1917. The prominent Ukrainian artists H. Narbut and M. Boichuk designed posters promoting the commemoration of T. Shevchenko in 1920. Both incorporated Ukrainian graphic and folk-art traditions into their designs. Narbut also developed a new typeface based on a synthesis of old Ukrainian engravings and modern simplification. In the 1920s, avant-garde artists, such as V. Yermilov, B. Sylkin, and O. Khvostenko-Khvostov, created bold poster designs promoting communism and the proletariat. Film posters were designed by O. Dovzhenko, M. Ivasiuk, I. Litynsky, O. Syrotenko, K. Bolotov, and other artists. A. Marenkov designed posters denouncing nationalist leaders, such as S. Petliura ('The Hireling Petliura Sold Ukraine to [His] Polish Masters,' 1920). Other posters glorified the Soviet regime and warned against famine ('Famine Is Threatening the Soviet Republics ...,' 1920). Posters exalting the Red Army and the Bolshevik Revolution were common and continued to be used extensively by the Communist party to promote its ideology and goals and to glorify its leaders. Hackneyed slogans often accompanied stereotypical images, as in A. Strakhov's 'Let Us Fulfill the Coal Five-Year Plan in Three' (1931). During the Second World War well-known graphic artists, such as V. Kasiian, O. Dovhal, K. Ahnit-Stedzevsky, and V. Fatalchuk, were asked to design posters promoting the Soviet war effort against Nazi Germany. In 1944 V. Lytvynenko produced the poster 'Ukraine Is Free!' showing a map of Western Ukraine in red behind a striding Red Army soldier.

During the cultural thaw after Stalin's death, particularly in the early 1960s, the officially promoted folklorization of all Ukrainian art also affected poster design. T. Liashchuk designed posters using highly stylized ethno-

graphic elements (eg, 'Soviet Ukraine, May You Be Glorified from Generation to Generation,' 1967). Poster design was stimulated by various competitions sponsored by the Union of Artists of Ukraine.

In interwar Western Ukraine, posters designed in the 1930s were more varied than in Soviet Ukraine because artists were able to make use of the latest trends in art. Their works were not mass-produced, however, because most were designed for use by private enterprises or community organizations.

Ukrainian émigré artists, especially after the Second World War, have produced posters to mark anniversaries and celebrate events. Some of the more interesting ones have been designed by V. Tsymbal in Argentina, M. Levytsky in Canada, and J. Hnizdovsky in the United States. V. Bednarsky has designed several posters for the World Congress of Free Ukrainians, and the World Federation of Ukrainian Women's Organizations has commissioned several artists to produce posters marking its activities. V. Buchko of Toronto has designed a number of art exhibition posters, using reproductions of paintings by J. Hnizdovsky, A. Solomukha, F. Humeniuk, and V. Makarenko.

Many innovative, often satirical posters appeared in Soviet Ukraine in the late 1980s, in the period of glasnost and perestroika. They satirized the Soviet system, warned of ecological and cultural disasters, and promoted various organizations, such as the Ukrainian Language Society, Zelenyi Svit, and the Popular Movement of Ukraine, and the ideal of Ukrainian independence.

D. Zelska-Darewych

Posternak, Stepan, b 9 May 1880 in Stepanivka, Nizhen county, Chernihiv gubernia, d ? Pedagogue, library scientist, and bibliographer. He headed the history of Ukrainian education section of the Educational and Pedagogical Commission of the All-Ukrainian Academy of Sciences (VUAN) and was secretary of the VUAN Commission for the Compilation of an Encyclopedic Dictionary in 1921–2. He then served as director of the National Library of Ukraine in 1923–9 and coedited its periodicals *Biblioteknyi zbirnyk* and *Zhurnal bibliotekoznavstva ta bibliografii*. He wrote *Vsenarodna biblioteka Ukraïny* (The National Library of Ukraine, 1923), *Z istorii osvity oho rukhu na Ukraïni za chasy revoliutsii 1917–19* (From the History of the Educational Movement in Ukraine during the Time of Revolution, 1917–19, 1920), and articles on the theory of bibliography and library science. He fell out of favor in the early 1930s and was persecuted by the authorities. His ultimate fate is unknown.

Postnikov, Ivan, b 10 September 1906 in Ershovo, Kostroma gubernia, Russia, d 7 August 1990. Russian electrician

cal engineer; corresponding member of the AN URSR (now ANU) from 1967. He graduated from the Leningrad Polytechnical Institute and taught at the Kiev Polytechnical Institute (from 1950). He worked at the ANU Institute of Electric Technology and headed the ANU Institute of Electrodynamics (from 1963). His technical contributions were in the theory, design, and applications of electric machinery.

Postnikov, Vladimir, b 1844, d 1908. Russian economist and statistician. He worked for the Ministries of Agriculture and State Domains and published several major studies of agriculture in the Russian Empire, including *Iuzhno-russkoe krest'ianskoe khoziaistvo* (South-Russian Peasant Economy, 1891), which is rich in factual information on agriculture in the Ukrainian steppe gubernias. He advocated the large-scale use of machinery in agriculture and predicted the emergence of commercial farming in the empire, especially in Southern Ukraine.

Petro Postoliuk

Antin Postolovsky

Postoliuk, Petro [Postoljuk], b 10 July 1894 in Storonybaba, Zolochiv county, Galicia, d 27 September 1978 in Newark, New Jersey. Civic activist and publisher. He enlisted in the Legion of Ukrainian Sich Riflemen in 1914 and fought in its ranks until 1920. After completing his university studies in Vienna (1923) he worked as a manager in I. Tyktor's *Ukrainska Presa* publishing house and as a director of the *Chervona Kalyna publishing co-operative, which he had founded with a group of veterans. He was also a member of the board of directors of the *Izmarahd* publishing house in Lviv. During the Second World War he was a director of the *Ukrainske Vydavnytstvo* publishers in Cracow. After emigrating to the United States in 1949, he revived the *Chervona Kalyna* publishing house there and served as its president until the end of his life. He also worked with the *Svoboda* Press.

Postolovsky, Antin [Postolovs'kyj], b 1889 in eastern Podilia gubernia, d 1990. Civic and military leader. He was active in the Ukrainian Party of Socialist Revolutionaries. In November 1917 he was elected to the All-Ukrainian Council of Military Deputies, and then served as secretary of the Central Rada and as a member of its Little Rada (1917–18). A postwar refugee, he emigrated to Argentina in 1949.

*Postup* (Kolomyia)

Postup (Progress). A weekly newspaper for peasants, published from January 1903 to December 1905 in Kolomyia by O. Kulchytsky. Edited by V. Bachynsky, it contained popular articles on history, science, hygiene, medicine, politics, and prose and poetry.

Postup (Progress). A Catholic monthly journal of literature, culture, and philosophy, published in Lviv from 1921 to 1930. Until 1927 it was a 'student herald' funded by Bishop H. Khomyshyn. Thereafter it was directed at a more general readership, supported the conservative hetmanite movement, and was funded by Metropolitan A. Sheptytsky and edited by O. Mokh, H. Luzhnytsky, and I. Hladylovych.

Postup (Progress). A monthly pro-Soviet journal for students, published in Prague from December 1931 to March 1933. Initiated by the Transcarpathian Regional Committee of the Czechoslovak Communist party, it was published by P. Dobrovsky, often in double and triple issues, and edited by I. Horvat and M. Tsuperiak. It contained articles on political and economic developments in Transcarpathia, criticized the 'bourgeois' circles there, and reprinted works by Soviet Ukrainian and other writers.

Postup (Progress). A weekly organ of the Winnipeg archeparchy of the Ukrainian Catholic church in Canada, published since February 1959. It contains articles on religious, cultural, and historical topics and reports on church affairs in Canada, Ukraine, and elsewhere. Since 1960 the paper has included a separate English-language section, and since 1968 it has published the supplement *Mii pryiatel'* for children. The first editor of *Postup*, R. Danylyevych, was succeeded by S. Izhyk in 1962.

Postyshev, Pavel [Postyšev], b 18 September 1887 in Ivanovo-Voznesensk, Vladimir gubernia, Russia, d 26 February 1939 in Kuibyshev, Russia. Communist party functionary. In 1923 he was recalled from the Far Eastern Republic to oversee organizational work on the Party's Kiev gubernia committee, and a year later he was elected secretary of the committee. By the end of 1925 he had become secretary of the CC CP(B)U. Then he became a member of its Politburo and Organizational Bureau (1926–30). As secretary of the Kharkiv district and city Party committees he played a leading role in the purge of Trotskyists and Ukrainian national-Communists and in the industrialization and collectivization campaigns in the Kharkiv region. From July 1930 he was secretary of the CC of the All-Union Communist Party (Bolshevik) in charge of propaganda and organization. In January 1933 he was

Pavel Postyshev

sent back to Ukraine as J. Stalin's personal representative, accompanied by thousands of political cadres from Russia. He was immediately elected second secretary of the CC CP(B)U and first secretary of the Kharkiv city and oblast Party organizations. From July 1934 to January 1937 he was in charge of the Kiev oblast Party organization. As second secretary he was the real power in Ukraine, overshadowing S. *Kosior, the first secretary. During the man-made *famine in Ukraine Postyshev's mission was to eliminate all opposition to collectivization and the forcible requisition of grain and to crush the Communists who defended Ukrainization and the republic's economic, political, and cultural rights. He oversaw a major *Russification drive in Ukraine: the Ukrainian intelligentsia was decimated, and scores of Ukrainian cultural and educational institutions were closed. In the mass purge of the CP(B)U (1933-4) some 100,000 members were expelled from the Party, many of whom were subsequently arrested on trumped-up charges and executed. In the 1930s Postyshev became popularly known as the 'hangman of Ukraine.' Having acquired a taste for power Postyshev began to develop his own cult of personality and to consolidate his position in the republic by making some concessions to Ukrainian national sentiments in 1935-6. This development raised Stalin's suspicions. In 1937 Postyshev was removed from Ukraine and appointed first secretary of the Kuibyshev Oblast Party Committee. He was arrested in January 1938, executed a year later, and rehabilitated in 1956.

K. Hohol, B. Krawchenko

Potapenko, Ignatii, b December 1856 in Fedorivka, Kherson gubernia, d 17 May 1929 in Leningrad. Russian writer of Ukrainian descent. He studied at the Odessa Theological Seminary, Odessa University, and the St Petersburg Conservatory. His frequently humorous stories, which depicted Ukrainian folkways and peasant life, appeared in many Russian periodicals from 1881 on. He also wrote novels about the rural intelligentsia and clergy (*Na deistvitel'noi sluzhbe* [In Real Service, 1890; Ukrainian trans by A. Borkovsky serialized in *Zoria* in 1897], *Ne geroi* [Not a Hero, 1891], and *Otstuplenie* [The Retreat, 1915]) and several plays. Some of his works were translated into Ukrainian by M. Kotsiubynsky, O. Makovei, and H. Kovalenko.

Potapenko, Viacheslav (pseud: V. Bezbrezhny, Chornomor), b 2 January 1864 in Veselyi Kut, Odessa county, Kherson gubernia, d 20 October 1942 in Krasnodar, Kuban. Writer and actor. From 1883 to 1890 he performed in M. Kropyvnytsky's and M. Sadovsky's theater troupes, and from 1890 he worked as a director in M. Vasyliiev-Sviatoshenko's troupe. From 1888 his peasant stories appeared in *Zoria*, *Literaturno-naukovyi vistnyk*, and other periodicals. I. Franko likened his talent to that of M. Kotsiubynsky and considered his story 'Na novi hnizda' (To New Nests, 1899) one of the best stories depicting peasant emigration. Potapenko also wrote about 40 plays, including *Za druha* (For a Friend, 1887, written with M. Starytsky). From 1904 he lived in Katerynodar (Krasnodar), where he published the newspaper *Novaia zaria*.

Potapova, Olena, b 16 February 1930 in Samara (Kuibyshev), Russia. Ballerina. In 1948 she completed study in the choreography studio at the Kiev Theater of Opera and Ballet. She danced there as a soloist until 1976 and performed the title parts in K. Dankevych's *Lileia* and A. Svechnikov's *Marusia Bohuslavka*. In 1977 she became the theater's ballet master.

Potash industry. Potash is made by washing wood ashes with water and evaporating the resulting solution. The process produces various potassium compounds, chiefly crude potassium carbonate, which are used extensively in making soap, glass, and paint, for cleaning wool, and for coloring and bleaching cloth.

Potash was made in Ukraine in the medieval period and became widespread beginning in the 16th century. Wood was burned in piles (called *budy*) wherever large stands of forest were found. The first major center of the potash industry was the Polisia region, where Polish and Ukrainian magnates produced potash (as well as charcoal, tar, and other products) for export to Western Europe. Potash making spread throughout Volhynia, the Kiev region, the Chernihiv region (in the 17th and 18th centuries), and the Carpathian Mountains. It was common in the Hetman state, where it was controlled by the hetman, the *starshyna*, and monasteries. Eventually merchants, wealthy Cossacks, and local potash producers (called *budnyky*) became active in the industry. From the 18th century the Russian government tried to control the industry with the help of Russian merchants by restricting the production and export of potash. From then on it was used primarily in the domestic glass industry.

The potash industry declined drastically in the 19th century. The number of workers involved in potash production in Volhynia, for example, fell from 804 in 1795 to 279 in 1859. In the second half of the century the industry was completely displaced by other modern industries. Unfortunately the wanton burning of wood to produce potash almost completely destroyed the forest resources of Ukraine, especially in the forest-steppe belt.

Potato (*Solanum tuberosum*; Ukrainian: *kartoplia*, also *barabolia* or *bulba*). A plant the edible tuber of which is a major food crop of the world. Potatoes were first cultivated in the northwestern reaches of South America and were introduced into Europe in the late 16th century. They made their way into Ukraine in the late 17th and early 18th centuries via Poland. The potato remained a nov-

elty in Ukraine – a garden crop eaten mainly as a snack by burghers or the Cossack *starshyna* – until the large-scale immigration of Germans into Ukraine starting in the 1760s. Then the potato became a field crop eaten as a staple by all social classes, including the peasantry, and eventually a key ingredient in Ukrainian traditional *foods. By the mid-19th century the potato rivaled bread as a mainstay of the Ukrainian peasant diet. Shrinking plot sizes and the use of potatoes as fodder and in alcohol distillation made the potato an attractive crop for peasant agriculture. The amount sown grew dramatically in the late 19th century and by 1913 had reached 1.1 million ha (3.9 percent of arable land) in Russian-ruled Ukraine.

The most common areas in Ukraine for potato cultivation include southern Polisia, the forest-steppe belt, and the Carpathian and Transcarpathia regions, where approx 20 percent of arable land is used for their cultivation. In 1978, 1.7 million ha were sown and yielded 24.1 million t of potatoes. The Ukrainian Scientific Research Institute of Potato Cultivation in Nemishaieve (Borodianske raion, Kiev oblast) was established by R. *Shekhaiev in 1968 on the basis of the local selection research station (est 1932). It publishes the periodical *Kartopliarstvo* (19 issues by 1988) and manages two research stations, in Polisia and Chernihiv.

Hordiienko, H. *Istoriia kul'turnykh roslin* (Munich 1970)

Potebnia, Andrii [Potebnja, Andrij], b 31 August 1838 in Perekopivka, Romen county, Poltava gubernia, d 4 March 1863 near Piaszczysta Skala, Cracow circle, western Galicia. Political activist and revolutionary; brother of O. *Potebnia. While studying at the Cadet Corps in St Petersburg (1856) he came in contact with Polish revolutionary democrats. He obtained a commission with the Schlüsselburg Regiment and was stationed in Poland, where he formed the underground Committee of Russian Officers in Poland (1861) that linked up with the clandestine revolutionary organization Zemlia i Volia (1862). Potebnia was mortally wounded while taking part in the Polish insurrection. A biography of him (with bibliography) was published in Kiev in 1957.

Potebnia, Andrii [Potebnja, Andrij], b 23 May 1870 in Kharkiv, d 7 March 1919. Botanist; son of O. *Potebnia. After working at the *Nikita Botanical Garden, he lectured at Kharkiv University (from 1903) and led the phytopathology department at the Kharkiv Oblast Agricultural Research Station (from 1913). His research centered on the biology, morphology, and systemization of parasitic fungi (especially ascomycetes).

Potebnia, Oleksander (Aleksandr) [Potebnja], b 22 September 1835 on his family's *khutir* near Havrylivka (now Hryshyne), Romen county, Poltava gubernia, d 11 December 1891 in Kharkiv. Linguist, folklorist, and literary scholar; from 1875 a corresponding member of the Russian Imperial Academy of Sciences; brother of A. Potebnia and father of A. and O. Potebnia. He studied law, history, and philology at Kharkiv University (PH D, 1874). In the early 1860s he was active in the Ukrainophile Kharkiv Hromada, wrote a Ukrainian primer for Sunday schools, and took part in folklore expeditions in Poltava

Oleksander Potebnia

and Okhtyrka counties. In 1874 he was appointed professor of Russian language and literature at Kharkiv University. He also presided over the *Kharkiv Historical-Philological Society (1877–90) and was a member of the Czech Scientific Society (from 1887). In the 1880s he edited collections of H. Kvitka-Osnovianenko's, P. Hulak-Artemovskyy's, and I. Manzhura's works and began a Ukrainian translation of Homer's *Odyssey*.

As a linguist Potebnia specialized in four areas: the philosophy of language, the historical phonetics of the East Slavic languages, etymology, and Slavic historical syntax. His major works on the philosophy of language are *Mysl' i iazyk* (Thought and Language, 5 edns, 1862, 1892, 1913, 1922, 1926); *O sviazi nekotorykh predstavlenii v iazyke* (On the Relation among Some Representations in Language, 1864); his doctoral dissertation, *Iz zapiskov po russkoi grammatike* (From Notes on Russian Grammar, vol 1, 1874; repr 1958); and the posthumously published 'Iazyk i narodnost'' (Language and Nationality, in *Vestnik Evropy*, 1895). He was particularly interested in the relations among language, thought, and reality. Language for him was primarily the means by which the mind ordered the influx of impressions and stimuli. Words carry not only a meaning, but also the past experience of the individual and the nation, through which all new experience is filtered. Thus a word usually has three aspects: an external form, a meaning, and an internal form. It is through the internal form that the objective world is subjectivized. In many cases the internal form is rooted in myth and, hence, acts as a bridge between language and folklore (with its symbols). These ideas constitute the framework of Potebnia's master's thesis, *O nekotorykh simvolakh v slavianskoi narodnoi poezii* (On Some Symbols in Slavic Folk Poetry, 1860; expanded edn 1914), and his monumental work *Obiasneniia malorusskikh i srodnykh narodnykh pesen* (Explanations of Little Russian and Related Folk Songs, 2 vols, 1883, 1887). With time the consciousness of a word's internal form fades, and one of the tasks of literature is to restore this consciousness. According to this theory, literature is a hierarchy of genres; the simplest ones (the proverb, riddle, and fable) directly recall or renew the word's internal form, and the other genres do so in a more complicated, sometimes hardly detectable, way through a complex system of subjective (in poetry) or seemingly objective (in the novel) images. Potebnia's principal works on this subject were published posthumously: *Iz lektsii po teorii slovesnosti: Basnia, poslovitsa, pogovorka* (From Lectures on the Theory of Literature: The Fable, the Adage, the Proverb, 1894; repr 1970; Ukrainian trans 1930), *Iz zapiski*

sok po teorii slovesnosti: Poeziia i proza, tropy i figury, myshlenie poeticheskoe i mificheskoe, prilozheniia (From Notes on the Theory of Literature: Poetry and Prose, Tropes and Figures, Poetic and Mythical Thought, Addenda, 1905; repr 1970), and 'Chernovyiia zametki ... o L.N. Tolstom i F.M. Dostoevskom' (Preliminary Remarks ... on L. Tolstoy and F. Dostoevsky) in *Voprosy teorii i psikhologii tvorchestva* (vol 5 [1914]). Regarding language as an individual's or a nation's only possible means of perceiving the world and of thinking, Potebnia protested vehemently against denationalization in general and the Russification of Ukrainians in particular, and equated this process with spiritual and intellectual disintegration. Potebnia's philosophy of language is rooted in W. Humboldt's romantic idealism, but he was also influenced by J. Herbart's and H. Lotze's associative psychology, and particularly by H. Steinthal's psycholinguistic writings.

Potebnia viewed the history of a language as the history of its dialects and used the concept of phonetic law, although he often tried to find a psychological basis for the concept. He recognized the existence of a proto-Rus' language, but located the beginning of its disintegration into dialects back in prehistoric times. He made many discoveries in Ukrainian historical phonetics, such as the primordial *dž < dj* alteration, the so-called second pleophony, and the conditions for the alternation *e: o*. He was the first to propose the theory that diphthongs were a transitional stage between Old Ukrainian *o, e, ѣ* and Modern Ukrainian *i*.

As an etymologist, Potebnia paid much attention to semantic development and the history of words against an expansive historical, folkloric, and psychological background. His major etymological writings were collected in *K istorii zvukov russkago iazyka* (Toward a History of the Sounds in the Russian Language, vols 2–4, 1880–1, 1883). His annotations to *The Tale of Thor's Campaign* (1878; repr 1914) are a brilliant synthesis of the etymological, folkloristic, and historical approaches.

From the 1870s Potebnia concentrated on the study of the historical syntax of the Slavic languages against a comparative Indo-European background. His *Iz zapiskov po russkoi grammatike* contains his writings on predicate forms and the participle (vol 2, 1874; rev edn 1888; repr 1958), the noun and the adjective (vol 3, 1899; repr 1968), and the verb and indeclinable words (vol 4, 1941; rev edn 1978). Before his work the field of Slavic historical syntax consisted mostly of inventories of constructions collected from literary monuments of various periods. He revised it to create a broadly drawn picture of category and construction changes tied to changes in ways of thinking, by integrating historical, dialectal, and folkloric materials. His comparative analysis uncovered remnants of prehistoric syntax in later constructions and reinterpretations of archaic constructions in later syntactic systems; that is, it demonstrated the historical character of syntactic categories and parts of speech. A. Budilovich equated Potebnia's contribution to the field of historical syntax with C. Darwin's contribution to the study of the origin of species.

Potebnia was far ahead of his contemporaries and not very popular during his lifetime. In the field of historical syntax his only immediate followers were A. Popov and, to a certain extent, D. *Ovsianiko-Kulikovskiy (in his outline of Russian syntax). His ideas on literature were adopted as a theoretical framework by the 'Kharkiv school' (B.

Lezin, V. Khartsiev, A. Gornfeld, T. Rainov, O. Vetukhiv, and others) grouped around the serial *Voprosy teorii i psikhologii tvorchestva* (8 vols, 1907–23). They also had a significant impact on the esthetics of the Russian Symbolists (particularly A. Bely) and an indirect influence on the Ukrainian Symbolists. In 1945 the AN URSR (now ANU) Institute of Linguistics was named after Potebnia. Collections of his works on accentology (1973) and esthetics and poetics (1976, 1985) have been published.

Potebnia, Oleksander [Potebnia], b 24 December 1868 in Kharkiv, d 16 November 1935 in Kharkiv. Scientist in the field of electric technology; son of O. *Potebnia. He graduated from the Kharkiv Technological Institute (1900) and taught in Tomsk and Kharkiv. He was a professor at the Kharkiv Electrotechnical Institute from 1923. He served as a consultant under *GOELRO during the planning of the major electrification of Ukraine, particularly for the Dnieper Hydroelectric Station at Zaporizhia, and made technical contributions in the field of electric machinery theory.

Potelych. See Potylych.

Potelych Church of the Holy Ghost (Tserkva sv. Dukha). A monument of 16th-century Ukrainian wooden architecture in Potelych (aka Potylych; now in Nesterov raion, Lviv oblast). A typical Boiko church, it consists of three frames with a tiered pyramidal top (built in the 18th century) over the central frame. The interior walls of the nave and the southern wall of the vestibule were decorated with religious paintings done in the 1620s to 1640s by masters of a single school. The artists applied tempera directly to the walls and did not adhere closely to the traditional rules: they added a 'national' flavor to some of the scenes by replacing ss Constantine and Helen with Prince Volodymyr the Great and Princess Olha, and depicting warriors as Cossacks and the Pharisees as Galician Jews of the period. The paintings are preserved in the National Museum in Lviv and have been described in monographs by L. Miliiaeva (1969, 1971).

Potemkin, Grigorii, b 24 September 1739 in Chizhevo, near Smolensk, Russia, d 16 October 1791 near Iași. Rus-

Potelych Church of the Holy Ghost

sian general, count, and statesman. As the former lover, trusted adviser, and favorite of Empress Catherine II he was appointed supreme commander of New Russia in 1774, governor-general of New Russia, Azov, and Astrakhan gubernias in 1776, and viceroy in 1777. He oversaw the suppression of the Pugachev rebellion in 1774, the destruction of the *Zaporozhian Sich in 1775, and the annexation of the *Crimea and Georgia in 1783. For his achievements he received the title of prince of Tavriia (1783) and the 'grand hetmancy' of the Katerynoslav and Black Sea Cossack armies (1790). From 1774 until his death Potemkin had unlimited power in the territories under his rule and was the most influential man in the Russian Empire. In *Southern Ukraine and the Crimea he implemented a broad program of Ukrainian, Russian, and foreign (Serbian, Greek, German, Vlach) peasant and gentry colonization and urban development so as to transform those regions into well-populated and economically powerful parts of the Russian Empire. He founded the cities of Katerynoslav (now *Dnipropetrovske), *Kherson, *Mykolaiv, *Mariupol, and *Sevastopol, supervised the development of the *Black Sea Fleet, encouraged mineral exploration (particularly in the Donets Basin), and established schools and presses.

N. Polonska-Vasylenko

Potemkin (full name: *Kniaz Potemkin Tavricheskii* [Prince Potemkin of Tavriia]). A battleship of the Russian Black Sea Fleet, built in 1904 and named after Prince G. Potemkin, aboard which a famous mutiny occurred during the *Revolution of 1905. On 27 June, while on maneuvers in Tendriv Bay, the ship's sailors – most of them

Ukrainians – refused to eat borsch made with rotten meat. When the ship's commander ordered the guards to shoot 30 of the suspected instigators of the insubordination, the outraged sailors shot him and 6 other officers and arrested the remaining officers. They then proclaimed their ship on the side of the people against tsarist despotism and elected a 15-man revolutionary committee headed by P. Matiushenko. The mutiny spread to the nearby torpedo boat 267, after which both ships made for Odessa, where an armed workers' rebellion had erupted on 26 June in response to the mass arrest and shooting of over 1,000 general strikers and rioters by the police.

On 30 June the crews of 12 warships of the Black Sea Fleet sent from Symferopol to apprehend the *Potemkin* expressed solidarity with the *Potemkin* upon arrival. The sailors of the battleship *Georgii Pobedonosets* arrested their officers and remained with the *Potemkin* until a petty officer ran their ship aground in Odessa harbor. The *Potemkin* and 267 then set course for the Rumanian port of Constanța. On 1 July the *Potemkin's* sailors were refused fuel and provisions in Constanța, and on 3 July they issued appeals to 'the civilized world' and 'all European states' explaining why they had rebelled against tsarist autocracy. The 267 surrendered in Sevastopol, and the *Potemkin* returned to Constanța. There on 8 July the sailors surrendered their ship. The *Potemkin* was returned to Sevastopol, where it was disarmed and renamed the *Panteleimon*. A major manifestation of military opposition to tsarist rule, the *Potemkin* mutiny has been the subject of many Soviet books and memoirs and a famous film by S. Eisenstein.

R. Senkus

Peter Potichnyj

Metropolitan Ipatii Potii

Potichnyj, Peter (Petro), b 2 June 1930 in Pavlokoma, Brzozów county, Galicia. Political scientist. Potichnyj left Ukraine with a westward-bound company of the *Ukrainian Insurgent Army (UPA). He emigrated to the United States in the 1950s and served with the US forces in Korea. He studied at Temple (BA, 1958) and Columbia (MA, 1961; PH D, 1966) universities. Since 1964 he has taught political science at McMaster University in Hamilton, Ontario, and since 1985 he has been a consultant to Heilongjiang University in Harbin, China. He is the author of *Soviet Agricultural Trade Unions, 1917–70* (1972), a coauthor of *The Ukraine and the Czechoslovak Crisis* (1970) and *Jewish-Ukrainian Relations: Two Solitudes* (1983, 1987), the editor of sev-

eral collections of articles on the USSR and Soviet Ukraine, and a coeditor of the multivolume *Litopys Ukraïns'koi povstans'koi armii* (Chronicle of the Ukrainian Insurgent Army, 18 vols, 1976–90) and *Political Thought of the Ukrainian Underground, 1943–51* (1986).

Potii, Ipatii [Potij, Ipatij] (secular name: Adam), b 12 April 1541 in Rozhanka, Podlachia region, d 1613. Churchman and Uniate metropolitan of Kiev. The son of a nobleman, he was raised at the Polish royal court, and attended a Calvinist school run by the Lithuanian chancellor A. Radziwiłł. After attending Cracow University he entered the service of King Sigismund II August. He then served in Brest as a zemstvo judge, tax collector, and castellan and senator.

Potii was continually involved in religious affairs. Having adopted Calvinism under the influence of Radziwiłł, he reconverted to Orthodoxy in 1574. At the initiative of Prince K. Ostrozky he was made bishop of Volodymyr and Brest in 1593. As bishop he began formal negotiations with Roman Catholic representatives, and in 1595 he was sent to Rome, with K. Terletsky, as a representative of the church in Ukraine, to set forth its confession of faith before Pope Clement VIII. They returned to lead the sobor that culminated in the Church Union of *Berestia. After the proclamation of the union Potii was one of its leading supporters, both in defending it against Orthodox opposition and in seeking equal rights with Roman Catholics in the Polish-Lithuanian Commonwealth. After the death of Metropolitan M. Rahoza in 1599, Potii became the second Uniate metropolitan of Kiev and Halych (1600–13).

Potii was a noted polemicist and wrote in Ukrainian, Polish, and Latin. Several anonymous works have been attributed to him, including *Uniia, al'bo vyklad predneishykh artykulov ...* (The Union, or an Exposition of the Articles ..., 1595) on the terms of the Union of Berestia, *Antyrysis* (Anti-Discourse, 1599; Polish trans 1600), *Oborona ś. Synodu Florentskiego ...* (A Defense of the Council of Florence ..., 1603), and *Harmoniiia, al'bo sohlasie very ...* (Harmony, or the Agreement of Faiths ..., 1608). He also founded a theological seminary in Vilnius and a Greek Catholic school in Brest.

Potienko, Vasyl [Potijenko, Vasyl'], b 9 April 1898 in Sosnytsia, Chernihiv gubernia, d 12 April 1945 in Weimar, Germany. *Ukrainian Autocephalous Orthodox church (UAOC) activist. He studied at Kiev University and was ordained as an archdeacon. In 1924–6 he headed the *All-Ukrainian Orthodox Church Council and assisted in organizing 20 UAOC parishes in the Sosnytsia region. He was imprisoned briefly by the Soviet authorities in 1926, and then rearrested in 1934 and exiled for five years. He returned to Ukraine after serving his term. In 1941–3 he was an organizer of the renewed UAOC in Slobidska Ukraine and headed the church's administrative offices in Kharkiv. He emigrated to the West in 1943. He was killed during a bombing raid.

Potochyska settlement. A multi-occupational archaeological site near Potochyska (Potochyshe), Horodenka raion, Ivano-Frankivske oblast. Excavations ca 1880 yielded the remains of a Trypilian culture village, a stone Nordic burial vault, a cache of 1st-century BC bronze items, and Thracian ceramics.

Potocki. A Polish noble family. It originated in the 14th century in the Cracow region; its name derives from the village of Złoty Potok, near Częstochowa. The family became prominent in the late 16th and early 17th centuries as a result of the patronage of Chancellor J. Zamoycki and King Sigismund III Vasa and dynastic ties with the Movilă family of Moldavian hospodars. In that period the Potockis became owners of many towns (eg, Brody, Krystynopil, Nemyriv, Stanyславiv, Zbarazh), hundreds of villages, and huge latifundia in Galicia, Podilia, and Right-Bank Ukraine. Thenceforth they were one of the wealthiest and most influential magnate families in the Polish Commonwealth.

The Potockis played a significant role in Ukrainian history as Polish starostas (eg, of Belz, Halych, Kolomyia, Mostyska, Sambir, Sniatyn, Vinnytsia), voivodes, and military leaders. Jakub (b ca 1554, d 26 January 1613 in Smolensk) was castellan of Kamianets-Podilskyi from 1609 and voivode of Bratslav voivodeship from 1611. His brother, Jan (b ca 1552, d 22 or 25 April 1611), was general of the lands of Podilia from 1592 and voivode of Bratslav voivodeship from 1608; he led an army into Moldavia in 1607 to help his brother-in-law, C. Movilă, ascend the Moldavian throne. Jakub's son Mikołaj *Potocki was grand hetman of the Polish royal army; he suppressed the 1637–8 rebellions led by P. Pavliuk and D. Hunia and commanded the Polish army during the Cossack-Polish War of 1648–57. Mikołaj's brother Stanisław (b 1607, d 20 March 1647) was a cavalry colonel and the Polish commissioner for Cossack affairs. Another brother, Andrzej (d before 19 May 1663 in Lviv), was royal quartermaster from 1655 and voivode of Bratslav voivodeship; he commanded the Polish cavalry that aided Hetman I. Vyhovsky in 1658–60. Mikołaj's son, Stefan (b ca 1624, d 19 May 1648), was starosta of Nizhen and a military commander during the Battle of Zhovti Vody. Jakub and Jan's nephew, Stanisław Rewera *Potocki, was grand hetman in 1654–67. His son, Andrzej (d 30 August 1691 in Stanyславiv), was voivode of Kiev voivodeship (1668–8) and grand hetman (1684–92); he founded the town of Stanyславiv (now Ivano-Frankivske) in 1662, defeated the Crimean Tatars at Kalush in 1675, regained a large part of Podilia from Turkey in 1683, and participated in the unsuccessful Moldavian campaigns of Jan III Sobieski in 1684–5. Andrzej's son, Józef (d 17 May 1751), was voivode of Kiev voivodeship (1702–9) and grand hetman (1735–43); he suppressed the 1703 popular rebellion led by S. *Palii. Józef's son Stanisław (b 1698 near Stanyславiv, d 8 February 1760) was in charge of defending the Commonwealth's border with the Ottoman Empire from 1738, fortified Stanyславiv and Kamianets-Podilskyi, and was voivode of Kiev voivodeship in 1744–6. His brother, Franciszek Salezy (b 1700, d 22 October 1772 in Krystynopil), was voivode of Volhynia voivodeship from 1755 and Kiev voivodeship from 1756; he owned 70 towns and several hundred villages. Franciszek's son, Stanisław Szczesny (b 1751 in Krystynopil, d before 15 March 1805 in Tulchyn), was voivode

of Rus' voivodeship (1782–8), general of the royal artillery (1788–92), and marshal of the *Torhovytsia Confederacy (1792).

A few Potockis played a role in the economic life of Ukraine. Wincenty (?–1825), the royal chamberlain and a lieutenant general from 1773, applied modern management methods to the numerous enterprises he created in Nemyriv. Antoni Protazy (aka Prot, b 11 September 1761, d 1801), a Warsaw banker and the owner of Chudniv, organized several factories in the village of Makhnivka, near Berdychiv, directed the Polish Black Sea Trading Company, and ran an import-export business in Russian-ruled Kherson.

Under Austrian rule three Potockis distinguished themselves in Galician politics: Count Adam (b 24 February 1822, d 15 June 1872), a proponent of Polish-Ukrainian co-operation, Galician autonomy, and the transformation of the Austrian Empire into a federated state; Count Alfred (b 29 July 1822, d 18 May 1889), the Austrian minister of agriculture (1867–70), prime minister (1870–1), and viceroy of Galicia (1875–83); and his son, Andrzej *Potocki, the viceroy of Galicia (1903–8).

A. Zhukovsky

Potocki, Andrzej, b 10 June 1861 in Krzeszowice, Cracow circle, western Galicia, d 12 April 1908 in Lviv. Polish count and conservative politician. He was one of the wealthiest land, mine, and factory owners in Galicia as well as the Russian-ruled Kholm region and Podilia and Kiev gubernias. He was a former Austrian diplomat, and from 1890 he held various public offices in Cracow. In 1895 he was elected a member of the Austrian parliament and the Galician Diet. Potocki became an influential member of the Austrian Reichsrat (from 1901) and marshal of the Galician Diet (1901–3). In the aftermath of the 1902 *peasant strikes in Galicia he was appointed Austrian viceroy of Galicia (1903) with the support of other large Polish landowners. Potocki was hostile to the Ukrainian peasants and hindered their attempts at emigration. He used the police to suppress public manifestations of solidarity with the Revolution of 1905 in the Russian Empire. He was an opponent of electoral reforms, and during the 1907–8 electoral campaigns he spoke out against the Ukrainian Radicals, Social Democrats, and National Democrats and supported the conservative Russophiles. Under Potocki's authoritarian rule the Polish-controlled Galician government's corruption, electoral abuses, and police repression (especially during the 1906 peasant strikes and 1907–8 elections) were aimed at maintaining Polish superiority. He was assassinated by the student M. *Sichynsky.

Potocki, Jan, b 8 March 1761 in Pykiv, near Vinnytsia, Podilia voivodeship, d 2 December 1815 in Uladivka, Lityn county, Podilia gubernia. Polish count, historian, geographer, and writer. A pioneer in Slavic archeology, he was one of the first to propound the autochthonous theory of the origin of the Slavic peoples. His major works were published in French: *Essai sur l'histoire universelle et recherches sur la Sarmatie* (4 vols, 1789–92), *Chroniques, mémoires et recherches pour servir à l'histoire de tous les peuples slaves* (2 vols, 1793), *Voyage dans quelques parties de la Basse Saxe pour la recherche des antiquités slaves* (1795), *Fragments historiques et géographiques sur la Scythie, la Sarmatie et les Slaves* (4

vols, 1796), *Histoire primitive des peuples de la Russie* (1802), *Histoire ancienne du gouvernement de Cherson* (1804), *Histoire ancienne du gouvernement de Podolie* (1805), and *Atlas archéologique de la Russie européenne* (1805; 3rd edn 1829). He also wrote accounts of his voyages, a collection of six one-act plays, and a fantasy novel, *Manuscrit trouvé à Saragosse* (pub 1958).

Potocki, Mikołaj, b 1594, d 20 November 1651 in Khmilnyk, Podilia. Polish magnate and military leader in Ukraine. He was captured by the Turks during the 1620 Battle of Cecora but was released in 1621. A colonel from 1624, he commanded Polish troops in battles with the Crimean Tatars, the Zaporozhian Cossacks (eg, the 1625 Battle of Kurukove, the 1630 Battle of Pereiaslav), and, in 1626–9, the Swedes. He was appointed general of the Polish forces in Podilia, starosta of Liatyshiv, and full crown secretary in 1633; starosta of Nizhen and voivode of Bratslav voivodeship in 1636; field hetman (deputy commander in chief) of the Polish royal army in 1637; starosta of Oster after 1642; starosta of Cherkasy before 1643; and starosta of Bar, castellan of Cracow, and grand hetman (commander in chief) of the Polish royal army in 1646. He commanded the Polish army that fought and suppressed the Cossack-peasant uprisings led by P. Pavliuk, K. Skydan, D. Hunia, and Ya. Ostrianyn in 1637–8. For his achievements the king awarded him with huge latifundia in Ukraine. During the Cossack-Polish War of 1648 Potocki's army was defeated at the Battle of *Korsun, and he was captured by the Cossacks. Hetman B. Khmelnytsky handed him over to the Crimean khan, who released him in 1650. In 1651 Potocki commanded the Polish army during the Battle of *Berestechko and negotiated the Treaty of *Bila Tserkva with Khmelnytsky. He died soon afterward.

A. Zhukovsky

Potocki, Stanisław Rewera, b 1579, d 27 February 1667 in Pidhaisi, Galicia. Polish magnate and military leader. He was appointed chamberlain of Podilia in 1621, castellan of Kamianets-Podilskyi in 1628, voivode of Bratslav voivodeship in 1631, voivode of Podilia voivodeship in 1636, field hetman (deputy commander in chief) of the Polish royal army in 1652, voivode of Kiev voivodeship in 1653, grand hetman (commander in chief) of the army in 1654, and voivode of Cracow voivodeship in 1658. He commanded the Polish troops that fought against the Cossack rebellion led by T. Fedorovych in 1630 and in the battle against the Crimean Tatars at Kamianets-Podilskyi in 1633, and troops during the Cossack-Polish War, in the battles of Zboriv, Berestechko, and Bila Tserkva. Under his supreme command the Polish army fought the Cossacks and Muscovites in the Battle of *Okhmativ in 1655 and the Muscovites in the Battle of Chudniv in 1660. Among the towns he owned were Kytaihorod and Panivtsi, in Podilia, and Pidhaisi, in Galicia. He was starosta of Halych from 1627, Bar from 1651, and Dolyna from 1659.

Potocki, Wacław, b 1621 in Wola Łużańska, near Gorlice, western Galicia, d July 1696 in neighboring Łużna. Polish noble; poet. He took part in Polish campaigns against the Cossacks in Ukraine in 1638 and 1651. Motifs from Ukrainian folklore can be found in his collections of emblematic and epigrammatic, anecdotal, and humorous poems *Poczet herbów szlachty Korony Polskiej ...* (Enumera-

tion of Crests of the Nobility of the Polish Crown, 1696) and *Ogród fraszek* (Garden of Trifles, pub 1907). In his epic poem *Transakcyja wojny chocimskiej* (The Transaction of the Khotyn War, 1670; pub 1850) he portrayed sympathetically the participation of the Cossacks under Hetman P. Sahaidachny in the 1621 Battle of Khotyn against the Turks.

Pottery. See Ceramics.

Poturaev, Valentin, b 18 January 1922 in Gustomoi, Lgov county, Kursk gubernia, Russia. Mechanics scientist; AN URSR (now ANU) corresponding member from 1976 and full member from 1979. A graduate of the Dnipropetrovske Institute of Railway-Transport Engineers (1948), he worked at the Dnipropetrovske Mining Institute (1953–74), where he served as prorector (1962–72) and rector (1972–3). In 1967 he became a department head at the ANU Institute of Geotechnical Mechanics, and in 1975 he was appointed the institute's director. Poturaev has made contributions in the areas of the stability of heavy-mining machinery, mining mechanics, vibration calculations in heavy machinery, and the damping of vibrations in machines with heavy loading. He developed mathematical methods of assessing the effects of and predicting behavior under heavy loading of machine components constructed of rubber.

Fedir Potushniak

Potushniak, Fedir [Potušnjak] (pseuds: Teodor Berehovsky, F. Vilshytsky, F. Pasichnyk), b 27 February 1910 in Osii, Bereg komitat, Transcarpathia, d 12 February 1960 in Uzhhorod. Writer, ethnographer, and archeologist. He graduated from Prague University in 1937 and worked as a village teacher in Transcarpathia. From 1941 to 1944 he edited the publications of the Subcarpathian Scientific Society. From 1946 he taught archeology, ethnography, and Czech at Uzhhorod University. His modernist poetry appeared in Transcarpathian periodicals from 1928. He is the author of the poetry collections *Daleki vohni* (Distant Fires, 1934), *Khvylyny vichnomy* (Moments of Eternity, 1936), *Taiennychi vechory* (Mysterious Evenings, 1938), *Mozhlyvosti* (Possibilities, 1939), *Na bilykh skalakh* (On the White Cliffs, 1942), *Krystaly* (Crystals, 1943), and *Terezy vichnomy* (The Scales of Eternity, 1944); the realistic prose collections *Zemlia* (Land, 1938), *Opovidannia* (Stories, 1943), *Hrikh* (A Sin, 1944), *V dolyni syn'oi riky* (In the Valley of the Blue River, 1957), *Maty-zemlia* (Mother Earth, 1962), and *Chest' rodu* (The Clan's Honor, 1973); a novel about interwar

Transcarpathia, *Povin'* (The Flood, 1959; pt 3, 1965); a monograph on archeological finds from the Bronze and Iron ages in Transcarpathia (1958); and many articles on the Transcarpathian language, folklore, archeology, and other subjects. A collection of his works was published in 1980.

R. Senkus

Potylych or Potelych [Potylyč or Potelyč]. III-4. A former Galician town, now a village (1968 pop 2,950) in Nesterov raion, Lviv oblast. In 1498 it was granted Magdeburg law. The zenith of Potylych's development occurred in the 16th and 17th centuries, when it was noted for its pottery and glassworks. Notable examples of wooden church architecture in Potylych are the *Potelych Church of the Holy Ghost, the fortified Trinity Church (built 1593), and the Church of the Nativity of the Mother of God (1607). The latter two churches were destroyed during the Second World War, but 50 works of religious art from all three churches are preserved at the National Museum in Lviv.

Poucheniie ditiam (Instruction for [My] Children). An original literary work written by Grand Prince *Volodymyr Monomakh of Kiev ca 1117. Several incomplete parts of it were preserved in the Laurentian redaction of the Primary Chronicle; certain scholars consider them to be individual works. The *Poucheniie* is an example of the didactic genre that was widespread in medieval literature, and is the first autobiographical narrative in Old Ukrainian literature by a grand prince. It consists of a religious and moral introduction with many scriptural quotations, a section dealing with the duties and obligations of a ruler, and a section describing the author's own life as an illustration of those duties and obligations. In setting an example for his sons the erudite Volodymyr portrays himself as the embodiment of the idea of a unitary Rus' state, a brave warrior, an ethical and just Christian ruler, and a learned man. His psychological characterizations, colorful expressions, and imagery are outstanding features of the work. The text, written in a combination of Church Slavonic and the vernacular, was first published in St Petersburg in 1793.

Poultry farming. The raising of chickens, geese, ducks, turkeys, and other fowl for eggs, meat, feathers, and down. Poultry farming is one of the most efficient branches of *animal husbandry. It gives a high output of nutritious food for relatively little investment in labor and feed. Poultry farming has always been practiced throughout Ukraine, especially in Galicia, on the Right Bank, and in the Kuban. Prior to the collectivization of agriculture, poultry farming provided peasants with a good return, and even the poorest households could afford to keep fowl. Before the First World War there were some 70 million poultry in Ukraine, although there was little intensive poultry farming. Eggs, meat, and down were commonly exported: before 1914 the Ukrainian gubernias of the Russian Empire exported almost 70 million eggs annually, almost a half of the empire's egg export. Eggs were also exported from Galicia (30 million in 1929–30).

After the collectivization of agriculture most poultry farming in Ukraine was still practiced by individual peasants, and most eggs, meat, and down were sold privately.

TABLE 1
Number of poultry in Ukraine, 1960–83 (in millions)

| | 1960 | 1975 | 1983 |
|---------------------|-------|-------|-------|
| Total | 135.1 | 185.3 | 246.0 |
| On private farms | 103.6 | 99.5 | 106.0 |
| On collective farms | 25.8 | 42.1 | 51.0 |
| On state farms | 5.7 | 43.7 | 89.0 |

TABLE 2
Number of eggs produced in Ukraine, 1960–87 (in millions)

| | 1960 | 1970 | 1980 | 1987 |
|---------------------|-------|-------|--------|--------|
| Total | 7,103 | 9,141 | 13,695 | 16,266 |
| On private farms | 6,122 | 5,696 | 5,963 | 6,000 |
| On collective farms | 726 | 1,854 | 2,381 | 2,330 |
| On state farms | 255 | 1,591 | 5,351 | 7,936 |

In recent years the government has made intensive, large-scale poultry farming by specialized state farms a priority. Table 1 summarizes changes in the number and distribution of poultry in Ukraine and illustrates the increased importance of state poultry farming. In 1971 there were 52.2 million chickens (including 30.2 million layers), 237,000 geese, 3.8 million ducks, and 237,000 turkeys in Ukraine, accounting for 24 percent of all the poultry in the former USSR. Since then the significance of chickens has increased relative to that of other poultry.

The importance of poultry as a food source is summarized in table 2. The table also underscores the growing importance of state farms in egg production. The total production of poultry meat increased from 255,000 t in 1960 to 673,000 t in 1987. The greatest problem facing the industry is lack of feed.

Various hybrid breeds of poultry are farmed in Ukraine. The Ukrainian Scientific Research Institute of Poultry Farming, established in 1932 and currently located in Birky, Kharkiv oblast, develops new breeds of poultry and new techniques for poultry farming.

Povarennykh, Aleksandr [Povarennyx], b 3 February 1915 in Petrograd, d 4 March 1986 in Kiev. Geologist; full member of the AN USSR (now ANU) from 1973. He graduated from the Central Asian Industrial Institute in Tashkent (1940) and taught at the Kryvyi Rih Mining Institute (1949–60). Then he chaired a department of the ANU Institute of Geological Sciences (1960–9) and worked at the ANU Institute of the Geochemistry and Physics of Minerals. His major works deal with the chemistry of crystals and minerals, the history of mineralogy, and the philosophy of science. He is the author of *Kristallokhimicheskaia klassifikatsiia mineral'nykh vidov* (The Crystallochemical Classification of Mineral Types, 1966).

Povarnitsyn, Vladimir [Povarnicyn], b 27 July 1899 in Viatka, Russia, d 21 October 1962 in Kiev. Botanist; corresponding member of the AN USSR (now ANU) from 1948. After completing studies at the Leningrad Forestry Institute (1925) he worked in Leningrad at the Forestry Technology Academy (1925–35) and the university (1935–7) and in Krasnoïarsk at the Siberian Forestry Technical School (1937–45). He then moved to Kiev. From 1945 he

headed the forestry and dendrology departments at the Ukrainian Agricultural Academy and worked for the ANU Institute of Botany. Povarnitsyn's major research interests included forest typology and classification, the acclimatization of tree species, and geobotanical regionalization. He undertook several research expeditions to Western Ukraine, edited *Roslynnist' Zakarpats'koi oblasti URSR* (The Vegetation of the Transcarpathia Oblast of the Ukrainian SSR, 1954), and wrote *Lisy Ukrain's'koho Polissia* (The Forests of Ukrainian Polissia, 1959).

Povazhenko, Ivan [Považenko], b 4 August 1901 in Boiarka, Zvenyhorodka county, Kiev gubernia. Veterinary surgeon. A graduate of the Kiev Zootechnical-Veterinary Institute (1925) and the Kiev Medical Institute (1930), in 1937 he was appointed head of the surgery department of the Kiev Veterinary Institute (now a faculty of the Ukrainian Agricultural Academy). He wrote *Osnovnye voprosy veterinarnoi voenno-polevoi khirurgii* (Fundamental Questions of Veterinary Military-Field Surgery, 1944) and *Obshchaia veterinarnaia khirurgiia* (General Veterinary Surgery, 1961).

Povist' o Akiri premudrom (The Tale of Akir the All-Wise). An Assyro-Babylonian didactic tale taken from *The Thousand and One Nights* and translated in Kiev from Greek in the 11th century, during the reign of Grand Prince Yaroslav the Wise. Many of the expressions and proverbs found in it became part of Ukrainian oral folklore. A. Grigorev's monograph about the tale appeared in Moscow in 1913.

Povist' vremennykh lit (The Tale of Bygone Years). A chronicle of events in Kievan Rus' in the 12th century, under the editorship (in the opinion of most scholars) of *Nestor the Chronicler. A valuable historical source and an excellent example of medieval Rus' literature, it begins with an account of the Flood and Noah's division of the world among his sons; then it proceeds to a description of the dispersal of the Slavic tribes in Eastern and Central Europe and a recounting of the apocryphal sermon of St Andrew on the banks of the Dnieper. The history of Kiev and the *Polianians is central to the narrative. After an account of the founding of Kiev by Kyi, Shchek, Khoryv, and their sister, Lybed, the chronicle deals with the question of who first ruled Rus'; it ascribes the origin of Rus' to the summoning of the *Varangians and the establishment of the *Riurykide dynasty. Subsequent events in Rus' history are described in annal form to the year 1110.

The *Povist'* is based on earlier Kievan and Novgorodian *chronicles, mainly the Primary Chronicle written (possibly by the monk *Nykon) at the Kievan Cave Monastery, in which events are described to 1093. It draws on contemporary Byzantine chronicles, such as that of Georgios Harmatolos, and includes the texts of Rus'-Byzantine treaties of 907, 912, and 972. Folk legends, such as the accounts of Princess Olha's revenge on the Derevljanians, Kozhemiaka's defeat of a Pecheneg champion, and the 997 Pecheneg siege, are recounted.

Three redactions of the *Povist'* were compiled. The first, now-inextant redaction was completed in 1113 by Nestor the Chronicler, who edited the Primary Chronicle and supplemented it with descriptions of events of the late 11th and early 12th centuries. The detailed account of the

Kievan Cave Monastery in the years 1094–1110 supports the view that Nestor was the chronicle's compiler. The redaction provides eyewitness accounts of internecine conflicts among the sons of Grand Prince Yaroslav the Wise, the blinding of Prince Vasylko of Terebovlia in 1097, and the Liubech, Vytychiv, and Dolobsk Congresses of princes.

The second redaction was completed in 1116, at the behest of Grand Prince Volodymyr Monomakh, at the Vydubychi Monastery by the hegumen *Sylvestr. Sylvestr added, among other things, Monomakh's speech at the Dolobsk Congress of princes in 1103. The redaction was preserved in the later *Laurentian Chronicle and *Radziwiłł Chronicle. The third redaction was composed in 1118 at the Kievan Cave Monastery by an unknown author. The text focuses on the events pertinent to the Monomakhovych line (Volodymyr Monomakh, his father, Vsevolod Yaroslavych, and his son, Mstyslav I Volodymyrovych the Great). The redaction was preserved in the *Hypatian Chronicle of ca 1425.

The central idea of the *Povist'* is the unity of the Rus' land and state, as symbolized by the Riurykide dynasty in Kiev. The *Povist'* served as the basis of most later Rus' chronicles (eg, the *Kiev Chronicle and the *Galician-Volhynian Chronicle). Until the 16th century all of them began with the text of the *Povist'*. The language of the *Povist'* is a combination of Old Church Slavonic and the contemporary Rus' vernacular.

The *Povist'* has been translated and published in French (by L. Leger, 1884), Swedish (by A. Norrback, 1919), German (by R. Trautmann, 1931; and D. Chyzhevsky, 1969), Rumanian (by G. Popa-Lisseanu, 1935), Russian (by D. Likhachev and B. Romanov, 1950), English (by S.H. Cross and O.P. Sherbowitz-Wetzor, 1953), Czech (by K. Erben, 1954), Polish (by F. Sielicki, 1968), and Ukrainian (by V. Blyznets, 1982; L. Makhnovets, 1990; and V. Yaremenko, 1990).

A. Zhukovsky

Povit'. see County.

Povkh, Ivan [Повх], b 11 November 1909 in Myropillia, Sudzha county, Kursk gubernia, Russia. Scientist in the fields of mechanics and hydromechanics; corresponding member of the AN URSR (now ANU) since 1961. He graduated from the Leningrad Industrial (now Polytechnical) Institute (1936). He worked at the ANU institutes of Mining and Ferrous Metals in Donetske (1961–4) and held a chair at Donetske University (from 1964). His main contributions are in the fields of physical hydrodynamics, aerohydrodynamics, turbine design, ore purification, and the theory of friction.

Povoroznyk, Hnat, b 25 December 1895 in Zhovtantsi, Zhovkva county, Galicia, d 25 January 1979 in Hamilton, Ontario. Businessman and community activist. During the war he served in the Ukrainian Galician Army. In 1927 he emigrated to Canada, where he established Essex Packers in southern Ontario. He was active in the Ukrainian War Veterans' Association of Canada and the Ukrainian National Federation. He was president of the Novyi Shliakh publishers and a generous patron of Ukrainian organizations.

Povstanets' (Insurgent). A journal published by the Supreme Command of the UPA for its soldiers. The first issue appeared in November 1944 and contained on its cover page the 'Oath of a UPA Soldier.' Planned as a 16-page monthly, it sometimes came out in 24-page bimonthly issues. The editor was Capt M. Duzhy (1944–5). The last issue appeared in August–September 1946.

Oleksa Povstenko

Povstenko, Oleksa, b 25 February 1902 in Khashchova, Haisyn county, Podilia gubernia, d 15 January 1973 in Washington, DC. Architect and art scholar; member of the Ukrainian Academy of Arts and Sciences in the USA. A graduate of the Volhynian Industrial Polytechnic (1927), he completed his studies at the Kharkiv Institute of Industrial Construction, taught at the Kharkiv Construction Tekhnikum and Civil-Engineering Institute, and worked as an architectural engineer and, from 1935, an architect for the People's Commissariat of Education in Kiev. During the German occupation (1941–3) he directed the *St Sophia Museum in Kiev. A postwar émigré, he settled in the United States in 1950 and worked in the architecture department of the Capitol in Washington. He designed a number of residential and public buildings, including the Kharkiv Pedagogical Institute, the Kharkiv Astronomical Observatory, and the Holy Trinity Cathedral in Winnipeg

(1949, codesigner). He compiled a dictionary of Ukrainian architectural terminology (1939–41) and wrote books on the historical maps of Kiev (1946, with P. Kurinny), the history of Ukrainian art (1948), and Kiev's history and architecture (1954) and *The Cathedral of St. Sophia in Kiev* (1954).

Powder metallurgy. See Metallurgy.

Leonid Pozen: the monument to Ivan Kotliarevsky in Poltava (1903)

Pozen, Leonid, b 22 July 1849 in Obolon, Khorol county, Poltava gubernia, d 8 January 1921 in Petrograd. Sculptor; full member of the St Petersburg Academy of Arts from 1894. He began exhibiting his work in 1880 and joined the *Peredvizhniki society in 1891. His numerous small-scale compositions depicted the folkways and history of the Ukrainian people. They include *Kobzar* (1883), *Beggar* (1886), *Zaporozhian Scout* (1887), and *Plowed Field in Ukraine* (1897). He also sculpted portraits (eg, of M. Yaroshenko) and the monuments to I. Kotliarevsky (1896–1902) and N. Gogol (1913–15) in Poltava. P. Vladych's monograph about Pozen was published in Kiev in 1961.

Pozharna Balka settlement. An early 7th- to 5th-century BC Scythian settlement near Pozharna Balka, Poltava raion. Excavations in 1949 uncovered several ash pits, the bones of domesticated animals, the remains of a fireplace in a surface dwelling, large amounts of ceramic tableware, and a variety of tools.

Pozharsky, Petro [Požars'kyj], b 2 February 1878 in Hvozdiv, Kiev county, d ? Economist and co-operative

leader. He contributed to the co-operative newspapers *Slovo* (1907–9) and *Nasha kooperatsiia* (1913–14). In 1917–18 he was a delegate to the Central Rada and an organizer of the Ukrainian Central Co-operative Committee. He also helped organize and direct the Tsentral agricultural co-operative. A professor of co-operative studies in the 1920s at the Kiev Co-operative Institute, he was arrested in connection with the trial of the *Union for the Liberation of Ukraine in 1929, and his subsequent fate is unknown. Pozharsky wrote *Narysy z istorii ukraïns'koï kooperatsii* (Outlines from the History of Ukrainian Co-operation, 1919) and articles on the history and theory of the Ukrainian co-operative movement.

Pozharsky, Serhii [Požars'kyj, Serhij], b 1900, d 1970 in Moscow. Graphic artist. In the early 1920s he studied under V. Krychevsky, M. Boichuk, and H. Narbut at the Ukrainian State Academy of Art in Kiev and then worked mostly in Russia. He specialized in book graphics, using a Narbut-esque style. His work was displayed at the 1932 exhibition of Ukrainian graphic art organized in Lviv by the Association of Independent Ukrainian Artists.

Pozmogov, Anatolii, b 16 April 1921 in Tashkent, Uzbek SSR. Roentgenologist and oncologist. A graduate of the Tashkent Medical Institute (1943), he was prorector and head of the roentgenology and radiology department of the Kiev Medical Institute (1963–6), assistant director of the Kiev Scientific Research Institute of Experimental and Clinical Oncology (1966–71), and director of the Kiev Roentgenological-Radiological and Oncological Scientific Research Institute (from 1971). His most important works deal with the X-ray diagnosis of tumors.

Poznań. A provincial capital and industrial center (1989 pop 589,000) in western Poland. A small Ukrainian community has existed in Poznań since the 1920s. In the inter-war period it consisted of about 300 émigrés from central and eastern Ukraine, who established a branch of the Ukrainian Central Committee; about 100 students, with their own organizations; and some Ukrainians from Galicia. In 1940–5 a branch of the Ukrainian National Alliance in Germany was active in the city. After the war a branch of the Ukrainian Social and Cultural Society and an Orthodox parish attended by Ukrainians were established there.

Poznanska, Mariia [Poznans'ka, Marija], b 15 July 1917 in Petrashivka (now Haivoron), Tarashcha county, Kiev gubernia. Children's poet. She graduated from the Kiev Pedagogical Institute in 1949. Since 1946 she has published over 30 collections of poetry for children. An illustrated edition of her selected works, *Zhorzhynny tsvitut'* (The Dahlias Are Blooming), was published in 1987.

Poznansky, Borys [Poznans'kyj], b 7 May 1841 in Starodub, Chernihiv gubernia, d 27 September 1906. Ethnographer and civic figure. As a student at Kiev University (1859–61) he belonged to a **khlopoman* circle. Later he was a member of the Old Hromada of Kiev. For several years he worked among the peasants of the Kaniv and Katerynoslav regions to raise their educational level and studied their traditions and folklore. In 1865 he was arrested and exiled to the Voronezh region, where he continued his ethnographic research among the Ukrainian inhabit-

ants. He contributed ethnographic and historical materials and fiction to Ukrainian journals, such as *Osnova*, *Kievskaia starina*, and *Zoria*. His major contribution was a study of Ukrainian dress (1905).

Pozychaniuk, Yosyp [Pozyčanjuk, Josyp] (noms de guerre: Shakhai, Shuhai), b 1911 near Dashiv, Lypovets county, Kiev gubernia, d 21 December 1944 in Yushkivtsi, near Zhydachiv, Galicia. Writer and nationalist revolutionary. During the Second World War he organized detachments of the Ukrainian Insurgent Army (UPA) in central Ukraine, edited the UPA newspapers *Za Ukraïnu* and *Za ukraïns'ku derzhavu*, and was chief of the political education section of the UPA Supreme Command in Volhynia, under the command of Lt Col R. Shukhevych. In November 1943 he took part in the First Conference of Subjugated Peoples, and in June 1944 he was elected to the *Ukrainian Supreme Liberation Council and was appointed head of the Information Bureau at its First Grand Assembly. He is the author of many short stories about the UPA and life under Soviet rule (published in underground and émigré periodicals) and of an internal UPA memorandum about tactics vis-à-vis the Russian people (1944). He died in battle against Soviet security forces.

Praca (Work). A Polish socialist newspaper published in Lviv from July 1878 to 1892. Founded and edited by J. Daniluk and Z. Mańkowski, it was at first intended for the printers and other artisans of Lviv. Under the influence of M. Pavlyk and especially I. *Franko, who was one of the most frequent contributors to the paper and its leading theoretician, *Praca* tried to appeal to a broader readership of proletarians and peasants. It advocated political freedoms, printed the first socialist program in Galicia, and promoted co-operation among Polish, Ukrainian, and Jewish socialists there. Frequently censored by the authorities – over half of its issues in 1881–3 were confiscated – *Praca* appeared irregularly until 1890, when it became a semimonthly.

Prach, Ivan [Prač] (Práč, Johann Gottfried), b ca 1750 in Silesia, d ca 1818 in St Petersburg. Composer, pianist, teacher, and ethnographer. A Czech by birth, he moved to St Petersburg in the late 1770s to teach piano. He became one of the first collectors and arrangers of Russian and Ukrainian folk songs, and published the landmark *Sobranie russkikh narodnykh pesen s ikh golosami* (A Collection of Russian Folk Songs with Vocal Parts) in 1790 (with subsequent editions in 1806, 1815, and 1896). This work, containing Ukrainian folk songs in separate sections subtitled 'Songs of Little Russia,' interpreted folk music in a Western style rather than using traditional harmonies, and provided subsequent Russian composers (including P. Tchaikovsky, M. Mussorgsky, and N. Rimsky-Korsakov) with a source of musical themes for their works. L. van Beethoven, who owned a copy of the 2nd edition, used the melody of S. Klymovsky's song 'The Cossack Rode beyond the Danube' in two of his chamber works.

Prague. The capital of and largest city in Czechoslovakia (1989 pop 1,211,000), situated on the Vltava River. It is an important center for interaction between Slavs, and home to approx 3,000 Ukrainians.

Trade relations between the city and Ukrainian territo-

ries were established in the 10th century along a route that originated in central Europe, passed through Prague, and then went on to Cracow, Kiev, and, eventually, Asia. In the 11th century, Prague established direct relations with Kievan Rus'. In the 14th century, Ukrainian students began traveling to Prague to study at Charles University (est 1348), and many of them quartered in a residence established in the late 14th century for Lithuanian, Belarusian, and Ukrainian students. F. Skoryna's Ruthenian Bible, which drew upon the earlier Czech Bible, was published in Prague in 1517–20 and had a profound effect on cultural life in Ukraine. O. Khlopytsky, an emissary of the Zaporozhian Sich, visited Prague in 1594–5.

During the Czech national revival in the early 19th century, there were scholars and writers in Prague who took an active interest in Ukraine; of note were F. Čelakovský, J. Dobrovský, K. Havlíček-Borovský, J. Koubek, P. Šafařík, and K. Zap. Translations of Ukrainian literary works appeared in literary and academic periodicals, as did articles on Ukrainian culture and customs, particularly those written by Ya. Holovatsky and I. Vahylevych. The presence of O. Bodiansky (1837–8) and I. Sreznovsky (1839–41) in Prague greatly spurred the growth of local interest in Ukraine, as did the participation of a delegation from Galicia at the *Slavic Congress of 1848. In the 1850s and 1860s a number of Ukrainian cultural and political activists visited Prague, such as V. Bernatovych, I. Bilozersky, O. Bodiansky, M. Kostomarov, P. Kulish, M. Lysenko, M. Maksymovych, and O. Potebnia. The gifts and parcels of books they had been sending from Ukraine for some time served as the basis for the rich Ukrainian collections in local libraries. In 1876 a two-volume edition of T. Shevchenko's works that included previously censored poems was published in the city through the efforts of O. Rusov. I. Franko made several significant presentations at the first Congress of Progressive Slavic Youth, held in May 1891. F. Řehoř, who lived in the city from 1891, established a substantial Ukrainian collection at the Prague Museum with his generous donations of Ukrainian books and folk art items. I. Horbachevsky and I. Puliui, two eminent Ukrainian scholars, taught in postsecondary institutions in the city.

Ukrainian students studying in Prague established a hromada (1902); O. Bochkovsky, I. Bryk, and L. Hankevych were active members. At the outbreak of the First World War many Ukrainian refugees came to Prague. A primary school was opened for their children in the nearby town of Nusle. The UNR government maintained a mission, headed by M. Slavinsky, to the newly established Czechoslovak Republic in Prague, which later became a legation. It was superseded by an embassy of the Ukrainian SSR, headed by M. Levytsky.

Prague became the most important center of Ukrainian émigré cultural and political life in the 1920s, following a major influx of Ukrainian immigrants in 1920–1. It retained this position into the 1930s, even though a section of the emigration (particularly students) left the city. Many UNR officials and military figures settled in Prague; among them were A. Makarenko, M. and I. Omelianovych-Pavlenko, V. Petriv, S. Shelukhyn, F. Shvets, and A. Yakovliv. Other political activists to arrive were members of the Ukrainian Social Democratic Workers' party (O. Bochkovsky, P. Fedenko, B. Matiushenko, and Isaak Mazepa) and an important group of Socialist Revo-

lutionaries (N. Hryhoriiv and Mykyta Shapoval), which published the journal *Trudova Ukraina*. Prague was the birthplace of the Ukrainian nationalist movement. The Group of Ukrainian National Youth, led by S. Nyzhankivsky and Yu. Vassyian, was centered there, as was the League of Ukrainian Nationalists. The second conference of Ukrainian nationalists took place in Prague in 1928. Sovietophile elements gathered in the city in the 1920s around the T. Shevchenko reading room, the Association of Citizens of the Ukrainian SSR, and the Zhovtneve Kolo literary association.

The Prague-based *Ukrainian Citizens' Committee oversaw the interests of Ukrainian émigrés in 1921–5. Many Ukrainian academic organizations were centered in Prague, the *Ukrainian Academic Committee, the *Ukrainian Scholarly Association, the *Ukrainian Historical-Philological Society (est 1923), the Ukrainian Pedagogical Society, and the *Ukrainian Society of Bibliophiles. Local museums and archives included the *Museum of Ukraine's Struggle for Independence (1925–45, then 1945–8 as the Ukrainian Museum) and the Ukrainian Cabinet of History. Local Ukrainian secondary and postsecondary schools consisted of the *Ukrainian Free University (1921–45), the *Ukrainian Higher Pedagogical Institute (1923–33), the *Ukrainian Studio of Plastic Art (1923–45), and the Ukrainian Real Gymnasium (1925–7). The youth association Plast and the Union of Ukrainian Plast Emigrés were also active in the city. The Ukrainian Academic Hromada was founded in 1919 as an organization of Ukrainian students; by March 1924 it had 1,255 members. There was also a wide range of other student and professional organizations. The *Central Union of Ukrainian Students was located there in 1922–35, and it held several congresses and two academic conferences in the city. Prague was also the residence of many Ukrainian writers (O. Babii, M. Chyrsky, Yu. Darahan, M. Irchan, I. Irlivsky, I. Krushelnytsky, O. Liaturynska, Ye. Malaniuk, I. Narizhna, O. Oles, O. Olzhych, A. Pavliuk, U. Samchuk, O. Stefanovych, and O. Teliha), artists (M. Brynsky, M. Butovych, V. Kasiian, V. Khmeliuk, I. Kulets, R. Lisovsky, H. Mazepa, and V. Sichynsky), and scholars (D. Antonovych, L. Biletsky, D. Chyzhevsky, S. Dnistriansky, D. Doroshenko, O. Kolessa, I. Panas, I. Pankevych, S. Rudnytsky, S. Rusova, S. Siropolko, S. Smal-Stotsky, A. Yakovliv, and I. Zilynsky).

Prague was also an important Ukrainian publishing center; the Siiach (1924–33), Proboiem (1939–43), Kolos, Yu. Tyshchenko, and Ye. Vorony publishing houses were active there. Periodicals published in Prague included *Nova Ukraina* (1922–8), *Students'kyi visnyk* (1923–31), *Rozbudova natsii* (1928–34), *Proboiem* (1933–43), *Nastup* (biweekly, 1934–44), and *Ukrains'ka diisnist'* (biweekly, 1940–5).

Ukrainian émigré scholars maintained healthy relations with their Czech counterparts, and their works were printed in Czech academic journals. From 1926 Ukrainian language and literature were taught at Charles University. The visits of Ukrainian writers and artists in the 1920s also stimulated interest in Ukrainian creative work: O. Dosvitny, V. Polishchuk, and P. Tychyna in 1925; M. Boichuk, L. Kurbas, and V. Sedliar in 1927; O. Kobylinska, O. Kopylenko, A. Liubchenko, and V. Pidmohylny in 1928; and O. Dovzhenko in 1930.

During the Second World War a large number of Ukrainians arrived from Transcarpathia as well as Western

Ukraine to enroll in Prague's schools. In mid-1939 the government of Carpatho-Ukraine, led by A. *Voloshyn, moved to Prague. In 1944 a large contingent of scholars from central Ukraine reached the city.

With the arrival of Soviet armies in 1945, the number of Ukrainians in the city declined sharply, since most had fled to Germany. Others came, however, including soldiers from Czech units in the Soviet Army and students from Prešov. Nevertheless, Ukrainian organizations and institutions were disbanded and closed. The last to go were the Ukrainian Museum (1948) and I. Kulets's painters' school (1952). In 1946–8 the Russophile journals *Kostér* and *Karpats'kaia zvezda* came out. Currently there is only a small group of independent artists and a choir led by O. Prykhodko and P. Shchurovska-Rosinevych active in the city. In 1968 the Greek Catholic parish was reopened. The Czechoslovak Autocephalous Orthodox church metropolis is centered in Prague.

Prague has also become an important translation center for Ukrainian literature. Since the war nearly 300 titles have been translated and published, and the Czech artists' union has a section devoted to translation of Ukrainian literature, headed by R. Hůlka and M. Marčanová. Charles University had a department of Ukrainian language and literature, headed by I. *Zilynsky and I. *Pankevych, where Z. Genyk-Berezovska, J. Moravec, and V. Židlický worked. A Ukrainian language-instruction textbook for Czechs was published in Prague, as were a number of texts on Ukrainian literature (including anthologies) and history. The Slavic Library in Prague, which contains nearly 50,000 Ukrainian titles, is an important storehouse of Ukrainian culture. Its holdings include valuable religious manuscripts, such as the *Apostol* by I. Fedorovych, P. Mohyla's *Trebnyk*, and the Ostrih Bible. The city's archives also contain many valuable Ukrainian materials. The celebrations of T. Shevchenko's anniversaries in 1951, 1961, and 1989, with their attendant exhibitions, were of cultural importance, as was a Franko festival held in 1956, at which a commemorative plaque was unveiled. Today in Prague there is an association of Ukrainians in the Czech Republic headed by B. Zilynsky, and a Ukrainian student club at the university.

Prakhov, Adrian [Praxov, Adrian], b 16 March 1846 in Mstislau, Belarus, d 14 May 1916 in Yalta, Crimea. Art scholar, archeologist, and critic. A graduate of St Petersburg University (1867), he taught art history and theory there (1873–87, 1897–1914) and at the St Petersburg Academy of Arts (1875–87) and Kiev University (1887–97). He wrote studies on ancient Egyptian and Greek art, the artistic masterpieces of Kievan Rus', medieval church architecture in Volhynia (1886), and T. Shevchenko's artworks, and served as art editor for the journals *Pchela* (1875–8) and *Khudozhestvennyia sokrovishcha Rossii* (1904–7). Having discovered the 12th-century frescoes of St Cyril's Church in Kiev in 1881–2, he invited M. Vrubel to restore them, and he oversaw the construction and interior deco-

Adrian Prakhov

Bishop Ivan Prashko

ration work of *St Volodymyr's Cathedral in Kiev (1895–6).

Prapor (Flag). A publishing house in Kharkiv. It was established in 1945 as the Kharkiv Oblast Book-Journal-Newspaper Publishing House and assumed its present name in 1964. It publishes the journal **Prapor*, prose, poetry, and works on historical, political, scientific, arts, and economic topics. In the period 1971–5 it issued 505 titles.

Prapor (Flag). A monthly journal for Ukrainian Catholic priests published in Peremyshl in 1897–1900. It was edited by T. Kormosh.

Prapor (Flag). A pedagogical journal published semi-monthly (1908–9) and then three times a month (1910–12), briefly in Lviv and then in Kolomyia. It was concerned primarily with organizing Ukrainian elementary-school teachers in Galicia and publishing teaching materials, curricula, and book and journal reviews. *Prapor* was edited by L. Lototsky, I. Petryshyn, M. Baran, and Ye. Kulchytsky.

Prapor (Flag). A bimonthly Catholic paper published in Curitiba (nos 1–21) and Prudentópolis (nos 22–5), Brazil, from January 1910 to early 1911. It was edited by S. Petrytsky and K. Gutkovsky.

Prapor (Flag). A literary and publicistic monthly of the Writers' Union of Ukraine, published in Kharkiv since January 1956. Its contributors are mostly writers and critics living in eastern Ukraine. The journal regularly published translations of literature from the other Soviet republics. From 1959 to 1971 it serialized a Russian-Ukrainian phraseological dictionary compiled by I. Vyrhan and M. Pylinsky and edited by M. Nakonechny. Its chief editors have been Yu. *Shovkopliias, Yu. Makhnenko, M. Okan, N. Cherchenko, Yu. Stadnychenko, and, since 1981, I. Maslov. The journal's name was changed to *Berezil'* in 1991.

Prapor komunizmu (Flag of Communism). An illegal underground organ of the Central Committee of the *Communist Party of Western Ukraine, published in Lviv in 1932 (a total of four issues). It succeeded *Komunistychnyi prapor* (1930–1).

Prapor marksyzmu-leninizmu (Flag of Marxism-Leninism). The first Ukrainian philosophical journal, published from 1927 in Kharkiv by the *Ukrainian Institute of Marxism-Leninism and then by the *All-Ukrainian Association of Marxist-Leninist Scientific Research Institutes (VUAMLIN). Until the end of 1930 (nos 1–14) it was called *Prapor marksyzmu*. Then it was renamed *Prapor marksyzmu-leninizmu* (1931–3, 14 issues). In 1934 the journal was merged with *Ekonomist-marksyst* and renamed *Pid markso-lenins'kym praporom* (Under the Marxist-Leninist Flag, 14 issues, 1934–6). In 1935–6 it was published in Kiev. The journal served as a vehicle for the development of Marxist-Leninist thought, and published articles on the history and relation of Marxist-Leninist thought to current developments in science, literature, art, and social life. Its editorial board included M. Skrypnyk, M. Popov, V. Yurynets, M. Yavorsky, and Yu. Mazurkevych. After M. Skrypnyk's suicide in 1933, the journal was denounced by Stalinist critics, and all members of its editorial board suffered political persecution.

Prapor peremohy (Flag of Victory). A newspaper of Luhanske oblast's CPU Committee and Soviet, published five days a week in Luhanske from February 1946. Its pressrun was increased from 25,000 in 1960 to 50,000 in 1970 and 60,000 in 1980; in respective years the pressrun of its Russian-language equivalent, *Voroshilovgradskaia pravda*, was increased from 53,000 to 205,000 and 252,000.

Prashko, Ivan [Praško], b 1 May 1914 in Zbarazh, Galicia. Ukrainian Catholic bishop; full member of the Shevchenko Scientific Society since 1965. After being ordained in 1939 and completing theological studies in Rome and a dissertation on the Uniate church in the 17th century (1944), he did pastoral work in Italy. He was sent to Australia in 1950 and has been active there in establishing churches and community organizations. He was consecrated a bishop in 1958 and served as exarch until 1982, when he was elevated to the office of bishop of Australia, New Zealand, and Oceania. Upon retirement in 1993 he was replaced by Bishop P. Stasiuk.

Pratsia (Work). A semimonthly newspaper published in Chernivtsi from April to December 1897 (a total of 17 issues). Edited by V. *Budzynovsky, it supported the Ukrainian Radical party and was merged with that party's paper in Lviv, **Hromads'kyi holos*. V. *Stefanyk published some of his earliest stories in *Pratsia*.

Pratsia (Work). An irregular organ of the clandestine *Revolutionary Ukrainian party. Published in Lviv in 1904 (10 issues) and 1905 (4 issues) as a successor to *Dobra novyna* (1903–4), it was edited by Ye. Holitsynsky and K. Holitsynska, and then by D. Antonovych and M. Porsh, and smuggled into Russian-ruled Ukraine.

Pratsia (Work). A bimonthly organ of the Foreign Group of the clandestine Ukrainian Social Democratic Workers' party. It was published in Lviv in 1909–10 and smuggled into Russian-ruled Ukraine. The editors were D. Dontsov, V. Doroshenko, A. Zhuk, and V. Sadovsky.

Pratsia (Work; in local transcription: *Pracia*). A Brazilian-Ukrainian newspaper published by the Basilian fathers in

Prudentópolis since 1912. Initially a fortnightly, it became a weekly in 1915. It carried mainly regional news and religious articles. It was closed down by the Brazilian authorities in 1917–19 and 1940–6. Annual almanacs have been published (with interruptions) by the paper since 1919. In 1966 it added a regular children's section. The pressrun has been estimated at approx 1,700 in the 1930s and 2,300 to 3,000 in the postwar period. *Pratsia* editors have included O. Martynets, Y. Martynets, M. Nychka, I. Vihorynsky, K. Korchagin, V. Burko, and V. Zinko.

***Pratsia* (Work).** A semimonthly organ of the Ukrainian Social Democratic party (USDP) in Galicia, published in 1914 in Lviv by P. Buniak and edited by I. Kushnir and V. Temnytsky. Issues of the journal were frequently censored and confiscated by the authorities. Another journal with the same title was published in Vienna in 1918 by S. Vityk and other supporters of the left faction of the USDP.

***Pratsia* (Work).** A weekly organ of the *Ukrainian Party of Labor (1927–32) and the Ukrainian Peasant Alliance (1933–4), a front organization of *Sel-Rob. Published in Lviv and edited by R. Skazynsky (to 1930) and A. Maletsky, it initially supported Ye. Petrushevych but later became pro-Soviet, for which stance it was eventually closed down by the Polish authorities. Its circulation in 1930 was 1,500.

***Pratsiuiucha molod'* (Working Youth).** An organ for Transcarpathian youth sponsored by the Communist Party of Czechoslovakia. The first issue was published in Prague in November 1926. From the second issue (December 1926) it was published monthly to February 1927 and then biweekly by I. Mondiuk in Uzhhorod. The managing editors were A. Zapototsky (1926), E. Klima (1926–8), M. Zhupnyk (1928–9), and, from October 1929, O. Borkaniuk, who moved it to Mukachiv. The journal was censored by the authorities, the editors were persecuted and even imprisoned, and publication from 1931 on was infrequent. Many issues were confiscated, and in 1934 the journal was closed down.

Prava, po kotorym suditsia malorossiiskii narod. See Code of Laws of 1743.

***Pravda* (Truth).** A literary, scholarly, and political journal published in Lviv three times a month in 1867, four times a month in 1868–70, semimonthly in 1872–8 (in 1878 it also issued a miscellany in 2 vols), monthly in 1879, as a miscellany in 1880 (1 vol) and 1884 (1 vol, ed V. Barvinsky and I. Franko), and again as a monthly in 1888–93 and a semimonthly in 1894–6. It was initiated by intellectuals in Lviv and elsewhere in Galicia, but was funded by the writers P. Kulish and O. Konysky from Russian-ruled Ukraine. Until the establishment of the newspaper **Dilo* in 1880, *Pravda* was the main organ of the Galician populists and the most important journal of the time. Its contributors included many writers and scholars in both Austrian- and Russian-ruled Ukraine, among them O. Ohonovsky, I. Franko, O. Partytsky, I. Verkhtsky, O. and V. Barvinsky, Yu. Fedkovych, S. Vorobkevych, V. Navrotsky, M. Podolynsky, O. Terletsky, O. Konysky, P. Kulish, H. Barvinok, Marko Vovchok, P. Myrny, M. Starytsky, I. Karpenko-Kary, I. Nechui-Levytsky, Š. Rudansky, and O. Storozhenko. In

this period the chief editors of the journal were I. Mykyta, A. Vakhnianyn (1869–70), O. Ohonovsky (1872–6), L. Lukashevych (1876), and V. Barvinsky (1876–9). Beginning in the early 1870s it was openly criticized by M. Drachomanov, a regular contributor, who in 1873 submitted an open letter on behalf of 76 noted Ukrainians in the Russian Empire complaining about the conservative orientation of the journal. An index to the first volumes appeared in the 1884 issue.

After a four-year interruption *Pravda* resumed publication in 1888 on the initiative of V. Antonovych and O. Konysky. In the 1890s it was the chief organ of the populist right and supported the politics of the *New Era. The publishers were Ye. Olesnytsky (1888), I. Stronsky (1889), P. Kyrchiv (1890–1), and A. Berezynsky (1891–6), but the main force behind it was O. Barvinsky. *Pravda* strongly criticized the Russophiles and the new Ukrainian Radical party; it engaged in spirited polemics with the leaders of that party, I. Franko and M. Pavlyk, who until then had co-operated closely with it. Literary contributors in this period included B. Hrinchenko, M. Kotsiubynsky, A. Krymsky, M. Komarov, O. Makovei, and Yu. Romanchuk.

***Pravda* (Truth).** An organ of the Russian Brotherhood Organization of America, a Russophile organization whose members are primarily immigrants from Transcarpathia and their descendants. It has appeared since 1902, at first semiweekly, then weekly, and now monthly. *Pravda* has been published in New York, Olyphant, and (now) Philadelphia. The language of the paper is mostly English, with some Russian.

***Pravda* (Truth).** A monthly organ of the clandestine Ukrainian Social Democratic **Spilka*, edited by P. Tuchapsky and P. Kanivets. It was published in Lviv in early 1905 and smuggled into Russian-ruled Ukraine. In the summer of 1905 it was printed for a brief time in Russian by an underground press in Odessa.

***Pravda* (Truth).** A daily Russian-language organ of the CC CPSU. It appeared from May 1912 to July 1914 and from March 1917 (with frequent interruptions and under different names) in Petrograd. Since March 1918 it has been published in Moscow. Some of its early editorial board members and contributors were Ukrainian Communists, such as M. Skrypnyk and Yu. Kotsiubynsky, especially in the so-called preconference Party discussions. With J. Stalin's consolidation of power the paper became the normative organ of the CC CPSU: its materials reflected the official line of the Politburo on all issues, both domestic and foreign. Its articles on the nationality question in the USSR and on Ukrainian affairs were no exception. Printed from matrices prepared in Moscow and flown to the major cities, the paper often reached the newsstands before the local papers. For these reasons *Pravda* enjoyed wide circulation, over 11 million in 1981. In Ukraine it was an important instrument of Russification. Under perestroika, *Pravda's* circulation declined drastically, as the Party lost its authority in society. Suspended briefly in 1991, it resumed publication as a newspaper of conservative orientation.

***Pravda* (Truth).** A weekly newspaper of literary, cultural, and community affairs published in Lviv in 1927–39. It supported the Ukrainian Christian Organization and was

edited by V. Yatsenko, A. Lototsky, and R. Haiduk. A supplement for children, *Vinochok*, was published in 1932–7. In 1930 *Pravda* appeared in a pressrun of 5,000 copies. Its popularity grew, mainly because of its lively style and illustrations, and by 1939 it had over 30,000 subscribers.

Pravda (Truth). A Ukrainian-language organ of the Rumanian Agrarian party, published irregularly in Chernivtsi in 1930–6. It printed sharp attacks on the Ukrainian national movement in Rumanian-ruled Bukovyna and on prominent Ukrainian leaders and institutions there. The editor was H. Andriiashchuk.

Pravda (Truth). A farmer-worker newspaper in Canada. It appeared weekly and then semimonthly in Winnipeg from February 1936, and then continued as a weekly in Toronto from 1938 to June 1940 under the title *Vpered*. It was published by breakaway members of the Ukrainian Labour-Farmer Temple Association, including D. Lobai, M. Khvalyboha, T. Kobzei, and N. Handziuk. Although the paper retained its socialist perspective and supported the Co-operative Commonwealth Federation (CCF) in Canadian politics, it openly criticized Soviet policies and gradually moved toward a compromise with Ukrainian nationalist organizations in Canada. The chief editor of both *Pravda* and *Vpered* was D. *Lobai.

Pravda i volia

Pravda i volia (Truth and Liberty). A newspaper published weekly and then semimonthly in Winnipeg from January 1929 to early 1932. Initially the organ of the Ukrainian People's Home and then of the Ukrainian Labor Alliance in Canada, it published articles on political affairs and the labor movement. Although socialist in profile and perspective, the paper criticized Stalinism and the USSR and especially the pro-communist Ukrainian Labour-Farmer Temple Association. The editor of *Pravda i volia* was M. *Mandryka. Contributors included D. Hunkevych, N. Baran, S. Kovbel, and such leading members of the Ukrainian Party of Socialist Revolutionaries in Europe as N. Hryhoriiv, S. Borodaievsky, and S. Dovhal.

Pravda Ukrainy (Truth of Ukraine). A daily Russian-language organ of the CC CPU and the Ukrainian Supreme

Soviet and Council of Ministers until 1992. It began to appear in Kiev in January 1938 as *Sovetskaia Ukraina*. During the Second World War it was published in Kharkiv, Moscow, Saratov, and Luhansk. In 1944 it was renamed, and returned to Kiev. The paper is a parallel edition to the Ukrainian-language **Radians'ka Ukraina*, although not all articles appear in both versions. In practice *Pravda Ukrainy* contains more articles on the economy, science, and technology than its more propagandistic-ideological counterpart. Both papers, however, are inferior in content and style to such central papers as *Pravda* and *Izvestiia*. The paper's pressrun increased from some 300,000 copies in 1950 to 477,000 in 1970 and 550,000 in 1975, and fell to 220,000 in 1991.

Pravdych-Nemynsky, Volodymyr [Pravdyč-Nemyns'kyj], b 1879 in Kiev, d 17 May 1952 in Moscow. Physiologist. After graduating from Kiev University with degrees in physics and mathematics (1907) and medicine (1917) he became a lecturer of physiology there. He also worked for the VUAN (1923–9) and with the Institute of Health Care for Mothers and Children (1929–49), and directed the physiology and EEG laboratory at the USSR Academy of Medical Sciences. Much of his research was devoted to electroencephalography.

Pravnychy i vistnyk (Legal Herald). A quarterly published in Lviv in 1910–13 by the *Society of Ukrainian Lawyers. It was edited by S. Dnistriansky, and its contributors included V. Verhanovsky, M. Voloshyn, H. Hankevych, D. Nasada, T. Voinarovsky-Stolobut, Ye. Erlikh, and M. Liskevych.

Pravoslavna Volyn' (Orthodox Volhynia). An official publication of the Volhynian Orthodox eparchial council, edited by V. *Bidnov. The decision to publish this Ukrainian-language successor to *Volynskie eparkhial'nye vedomosti* was made at a church council in Pochaiv in October 1921. It started to appear in 1922 in Kremianets, but soon ran into trouble for supporting the Ukrainianization of the church. Bidnov was transferred out of Kremianets, and publication ceased soon after.

Pravoslavnaiia Bukovina

Pravoslavnaiia Bukovina (Orthodox Bukovyna). A Russophile newspaper published semimonthly from March 1893 to 1905, initially in Vienna but after the first few issues in Chernivtsi. The successor to **Russka pravda*, it published attacks on the Ukrainian national movement and its leaders in Western Ukraine. It devoted considerable attention to the Orthodox church in Bukovyna; promoted the growth of Russophile organizations, such as

the Russian People's Home and the Society of Russian Women in Bukovyna; and supported the politics of tsarist Russia. The paper's publisher and longtime editor was K. Kozaryshchuk.

Pravoslavnaia Rus' (Orthodox Rus'). A weekly organ of the Russophile Narodnaia Rada society in Bukovyna. Published in Chernivtsi from February 1909 to July 1910 (a total of 71 issues) by Rev K. Bohatyrets and edited by A. Olshevsky and then K. Smerechynsky, it attacked the Ukrainian national movement and its leaders in Bukovyna and Galicia and strongly criticized Ukrainian 'separatists' in the Russian Empire. It also reported extensively on political developments in Eastern Europe. When the Austro-Hungarian authorities cracked down on the Russophile movement and forced the newspaper to cease publication, it was replaced by **Russkaia pravda*.

Pravoslavnyi rus'kyi kalendar (Orthodox Ruthenian Calendar). An annual almanac of the **Ruska Besida* society in Bukovyna, published from 1874 to 1918 in Chernivtsi. From the 1890s it appeared as *Bukovyns'kyi pravoslavnyi kalendar* or *Ilustrovanyi bukovyns'kyi pravoslavnyi kalendar*. It contained poetry, prose, and much information on the history of Bukovyna and especially the Orthodox church there. The editors included S. and H. Vorobkevych, Ye. Kalytovsky, and O. Popovych. In 1890 it had a pressrun of 1,500.

Pravoslavnyi ukrainets' (Orthodox Ukrainian). A non-periodic organ of the Ukrainian Autocephalous Orthodox Church (UAOC) (Conciliar) in the United States. Published in Chicago since 1952, it includes church news and accounts of the UAOC in the 1920s.

Pravoslavnyi visnyk (Orthodox Herald). The only official Ukrainian-language publication of the Russian Orthodox church. It appeared in Lviv from 1946 as a monthly, initially as *Eparkhiial'nyi visnyk* (Eparchial Herald). Edited by Rev H. **Kostelnyk* and other advocates of the submission of the Ukrainian Catholic church to Russian Orthodox control, it was distributed until 1963 in Western Ukraine only. It then ceased publication until 1968, when it was revived in Lviv. In 1971 it was moved to Kiev and put out by Kiev metropolity as the official organ of the Ukrainian exarchate, since 1990 the Ukrainian Orthodox church. The publication is popular in tone and, unlike the organ of the Moscow patriarchate, publishes little of a scholarly nature.

Pravoslavnyi visnyk. See *Visnyk*.

Precentor (*diak*). A layman in Ukrainian Orthodox and Catholic churches whose function is to assist in church services. In the Orthodox church precentors are also called psalmists (*psalomshchyky*). Their duties include reading responses and singing (during the Divine Liturgy and other services), directing the church choir, and assisting the priest in the fulfillment of his pastoral duties. Sometimes precentors have the privilege of wearing a surplice during church services. This custom is no longer practiced in the Catholic church.

In Kievan Rus' precentors were considered **church* people. From the beginning they were supported materi-

ally by their parishes, and their position was defined by local common law; thus the precentor was more dependent on the people than was the priest. Precentors usually lived in the church buildings, were allowed to farm a portion (approx one-third to one-half) of the church lands, and were entitled to one-third of the customary payments made by parish members. In Russian-ruled Ukraine these norms were regulated by the church reforms of 1869 and 1885. In some areas precentors received an annual income (*rokivshchyna*), paid either in cash or in goods, from each parish family. The better precentors were sometimes ordained as deacons or priests, particularly during the period when theological training was lax. In the 18th century these priests were known as 'little precentors' (*diachky*) in Galicia.

In some areas, mainly in Russian-ruled Ukraine, precentors had some seminary training or attended a **brotherhood* school, but little is known of their specialized training. In the 17th and 18th centuries many Cossacks became precentors, and a special school for them was established at the monastery school of the Zaporozhian Sich. In the 19th and 20th centuries there were special courses for Orthodox and Greek Catholic precentors at eparchial chancelleries and monasteries, which usually lasted two or three years but sometimes only several months. Practice in church singing and church rites were emphasized, but brief courses in dogma, church history, and pastoral theology were also taught. These courses were under the authority of the local bishops, and in some places there were boarding schools for the students. There was a precentors' school at the Orthodox metropolitan's residence in Chernivtsi. In 1817 an institute for training Greek Catholic precentors was established in Peremyshl; graduates were also qualified to teach catechism. The institute's director was Rev I. **Mohylnytsky*. A similar school existed in Lviv, and qualified precentors were trained at the Greek Catholic seminary in Uzhhorod. In all cases this training was concluded with formal examinations conducted by special eparchial commissions, and graduates received diplomas; smaller and poorer parishes, however, had a large number of amateur peasant precentors. Especially in Western Ukraine, the number of qualified precentors increased steadily, and by the 1930s more than 60 percent of them had diplomas.

A special function of the early precentors was the teaching of reading and writing. As early as the 11th century they were teaching children on an elementary level, either privately or in church-affiliated schools. Precentor-teachers in the 14th to 18th centuries were called *dydaskaly* (pedagogues) or *bakaliari* (tutors). During the 16th and 17th centuries **Itinerant* tutors were widely known throughout Ukraine. These were usually former students of the Kievan Mohyla Academy or other colleges who taught the children of priests, Cossack officers, or burghers. They were also known for their carousing and were facetiously dubbed *pyvorizy* (beer guzzlers); many sang songs and composed verses satirizing the church and other institutions. A Russian order of 1782 abolished the itinerant tutors; thereafter they had to remain in one place and fulfill their church duties there. Until the end of the 19th century most teachers in **parochial* schools were precentors; their schools operated in parallel with the state schools established at the end of the 18th century.

The shortage of teachers in Western Ukraine led the

government to allow precentors to teach in elementary church schools. Many nobles, however, opposed popular education even in this primitive form and pressed precentors into military service, despite a 1788 decree exempting precentor-teachers from such service. In the first half of the 19th century the elementary education of Ukrainians under Austria-Hungary (especially in Transcarpathia) still depended almost exclusively on the priest and the precentor-teacher. The precentors also did beneficial social work in the villages. Since many were among the best-educated peasants, they were usually the village scribes, and they maintained the parish register; they also organized choirs and made other contributions to cultural and educational life.

In Galicia there was a separate professional organization, the Precentors' Mutual-Aid Society, based in Lviv. The society, headed for many years by Revs Ye. Dutkevych and V. Lonchyna, published the journal **Diakivs'ki vidomosti* (1923–39). The first vocational publication for Galician precentors was *Diakivs'kyi hlas* (Precentor's Voice, 1895–1910), later *Holos diakiv* (Voice of the Precentors, 1910–14), published in Stanyslaviv (Ivano-Frankivske). In Bukovyna the Orthodox precentors published *Diakivs'ki vidomosti* (Precentors' News) from 1910 to 1914. In the United States, the Society of Ukrainian Greek-Catholic Precentor-Teachers of America was founded in 1913, and in 1918–19 it published the journal *Ridna shkola*.

Today most church parishes outside Ukraine have their own precentor, but there are no formal organizations for precentor training or affiliation.

A. Zhukovsky

Precht, Joseph, b 1737 in Vienna, d 1799 in Brailiv, Vinnytsia county, Podilia gubernia. Painter. He studied at the Vienna Academy of Arts and in 1757 entered a Trinitarian monastery in Berestechko, Volhynia. His works include frescoes in the Roman Catholic church in Brailiv, paintings in St John's Cathedral in Kamianets-Podilskyi, frescoes and 16 paintings in the Trinitarian church in Berestechko, paintings in a Roman Catholic church in Stanyslaviv, and murals in the Czacki palace in Boremel, Volhynia.

Predslavych, Leonyd [Predslavyč], b 1897, d 25 March 1960 in Kharkiv. Stage director, writer, and actor. He was an actor in Molodyi Teatr and Kyidramte (1917–21) and then organized and directed workers' and peasants' theaters in Odessa (1924), Yelysavethrad (1926), and Kharkiv (1927) and published *Peresuwnyi robitnycho-selians'kyi teatr* (Touring Workers' and Peasants' Theater) in 1928. In 1945–50 he directed in the Transcarpathian Ukrainian Music and Drama Theater. He adapted I. Franko's *Boryslavs'ki opovidannia* (The Boryslav Stories, 1956) and wrote the libretto to K. Dankevych's opera *Nazar Stodolia* (1959).

Preschool education (*doshkilne vykhovannia*). Formal preschool education was first offered in Ukraine in the 19th century. In earlier times children of what would now be considered preschool age were sometimes communally cared for by monasteries and other institutions. In the 19th century, preschool education was provided by local **zemstvo* authorities, the church, and private individuals and societies. These last two groups offered preschool educa-

tional facilities for various reasons. Owners of large estates provided preschool care in order to free women for fieldwork during peak times; philanthropic societies offered preschool care for working-class and peasant children; urban middle-class activists organized preschool education for their own children; Ukrainian groups provided Ukrainian preschool education as part of the separate Ukrainian social infrastructure they were building.

The first nursery in Russian-ruled Ukraine, opened in Poltava in 1839, offered care from 7 AM to 9 PM to children two years old and older. In other cities similar institutions were established by local *zemstvo* authorities. Like their counterparts in the rest of Europe, these first nurseries were run as charities and were more concerned with providing rudimentary child-care than with offering a structured educational program. The first private nursery school in Ukraine was opened in 1872 in Kiev by S. *Rusova, a prominent preschool education activist. Ukrainian supporters of the pedagogical theories of F. Froebel and M. Montessori, who formed the Froebel Kiev Pedagogical Society in 1908 in Kiev, established private nurseries based on Froebel and Montessori techniques. Societies for the protection of the poor opened people's nurseries, which provided care for children of the lower classes and were maintained chiefly through charitable donations. Preschool teachers were trained at the Froebel Pedagogical Institute and the Froebel Courses in Kiev and through similar classes in Kharkiv. Because most urban nurseries in Russian-ruled Ukraine operated in Russian, members of the Ukrainian intelligentsia organized private schools in the homes of Ukrainian families, including the *Lysenko and the *Starytsky family homes. In 1917 the Children's House society was formed in Kiev, and established the first formal Ukrainian nursery in that city, with Rusova as its director. In that year for the first time, Ukrainian classes were offered at the Froebel Pedagogical Institute in Kiev. In 1916 there were 47 nurseries in Russian-ruled Ukraine (16 percent of the 288 nursery schools in imperial Russia). Between 1917 and 1919, nurseries were opened throughout Ukraine which were funded by local governments. Teachers applied Froebel and Montessori techniques and the suggestions contained in *Poradnyk*, a handbook for preschool teachers published in 1919 by the children's division of the UNR Ministry of Education, headed by Rusova. Important preschool education activists in this period include Rusova, O. Petrushevska, E. Panych, N. Krasina, L. Dovbnia, I. Chechil, M. Sheiko, O. Idiasevych, L. Kepkalo, O. Doroshenko, and M. Yurkevych.

Under Soviet rule the number of nursery schools in central and eastern Ukraine increased. The provision of day-care was fundamental in the Bolshevik attempt to incorporate women into the work force and to create alternatives to the traditional family. In 1924 there were 136 nurseries in Ukraine, which cared for 6,000 children; in 1928 there were 431, with 17,836 children; in 1936 there were 4,609, with 216,000 children; in 1940 there were 3,384 nurseries, with 10,827 teachers and 172,208 children. Nursery teachers were trained at preschool education faculties at pedagogical institutes in Kiev, Poltava, Odessa, and Kharkiv.

By the end of the 1920s a policy of Russification had been imposed on the education system in Ukraine; it extended to preschool education (see *Education). A journal

devoted to preschool education, *Za komunistychnye vykhovannia doshkil'nyka* (1931–41), was published in Soviet Ukraine in the interwar period by the Commissariat of Education. The journal was a tribunal for the Stalinist forces, which purged those educators in Ukraine who had created an independent education system and advocated Ukrainization in the early years of Soviet rule.

The original idea for organizing a community association which would promote and support day-care centers was voiced by N. Kobrynska in the 1880s; in 1893 she published a model set of bylaws for such a society in *Nasha dolia*, an almanac she edited and published in Stryi. There had been initial opposition to the day-care centers owing to fear that they would supplant the family as the primary care-giver for children. Women promoting child-care were accused of destroying the family. But the arguments for day-care in Galicia were bolstered by the fact that child mortality in the eastern part of the Habsburg Empire was second only to that in the Russian Empire. Children were most at risk during harvest, when mothers, along with other adults, left them in charge of other children. Some clergy supported the women and defended day-care centers for children and the education such centers would provide. Rev K. *Seletsky established the first Ukrainian official day-care center in 1892, in Zhuzhil, Sokal county. The day-care centers fostered the use of Ukrainian, helped alleviate malnutrition, and came to be seen as a means of strengthening the Ukrainian nation physically and intellectually. The first urban nursery was opened in Lviv in 1902 by the Ruska Zakhoronka society (later renamed *Ukrainska Zakhoronka). The Ukrainian Pedagogical society (see *Ridna Shkola society), in conjunction with local groups, organized seasonal nurseries in villages to provide care for children during seeding and harvest. The Women's Hromada and the *Myronosytsi sisterhood established the first nursery in Bukovyna in 1896, in Chernivtsi, and later founded other nurseries throughout the province. By 1914, in Chernivtsi alone there were four nurseries.

In response to the government's Polonization policies in Western Ukraine after the First World War, the Ukrainian Nursery society extended its work beyond Lviv. The Ridna Shkola society, working in co-operation with *Prosvita, organized a network of seasonal nurseries in rural Galicia. In 1936–7, 29,885 children were being cared for at 768 seasonal nurseries affiliated with Ridna Shkola. Almost all of the children cared for during the two to four months that these nurseries operated were of peasant origin. Ridna Shkola established the nurseries with the dual purpose of ensuring that young children were not left alone during peak farming periods and of fostering literacy and patriotism. Nurseries were usually housed in Prosvita reading rooms and libraries or in buildings belonging to Ukrainian co-operatives, because government permission was often denied to groups wishing to open Ukrainian nurseries.

Before the outbreak of the Second World War 16 permanent nurseries, providing care for 500 children, existed in Galicia. Preschool educational theorists in Galicia included I. Blazhkevych, K. Malytska, N. Selezinka, S. Fedorchak, M. Pasternak, P. Bilaniuk, S. Kondar, Ya. Kondar, S. Rakova, I. Pavlykovska, and M. Dontsova. Prominent preschool educators included M. Yavorska, M. Hanushchakova, M. Kozlovska, Iu. Mytsyk-Teslia, and E. Vyniarska.

In Volhynia the dismantling of the Ukrainian school system by the Polish government hampered the development of nurseries. Even so, in the 1930s several permanent nurseries operated by Ukrainian societies existed in the region. In Transcarpathia nurseries prospered under Czechoslovak rule. By 1931 there were 102 nurseries, of which 45 were Ukrainian, and by 1938 the number had risen to 252, of which 132 were Ukrainian.

During the Soviet occupation of Western Ukraine in 1939–40, civic societies, such as the Ukrainian Zakhoronka and Ridna Shkola, were closed, and all nurseries were brought under the jurisdiction of the Soviet authorities. During the German occupation of Western Ukraine in 1941–4, the *Ukrainian Central Committee took over responsibility for preschool education in all of the Ukrainian territories of the *Generalgouvernement. In the summer of 1943 there were 241 permanent nurseries, which cared for 13,875 children, and 1,696 seasonal nurseries, which cared for 114,091 children. Courses to train preschool teachers were also organized – 3 classes for preschool education instructors, with 300 students, and 160 classes for preschool teachers, with 4,500 students.

After the Second World War the Soviet system of preschool education was established in all of Ukraine. The system consists of three types of institutions which provide preschool care: *iasla*, providing care for children from 2–3 months to 3 years old (established in 1959); *sadky*, providing care for children from 3 to 7 years old; and *iasla-sadky*, providing care for children from 2–3 months to 7 years old. Seasonal preschool care is organized in rural areas, and some summer camps accept preschool children. Preschool institutions provide care for 9, 10, 12, or 24 hours of the day.

Preschool education methodology is overseen by the central scholarly-methodological bureau of the Ministry of Education of Ukraine and administered by the oblast and raion branches of the ministry. The Ministry of Education has published the journal **Doshkil'ne vykhovannia* since 1951.

In 1990, 2,428,000 children, of whom 23 percent were rural residents, were cared for, at 24,500 nurseries, of which 51 percent were rural.

In 1979 a decree of the Ministry of Education of the Ukrainian SSR made Russian-language instruction obligatory for all children cared for at nurseries beginning at age five. Such instruction is no longer obligatory, but until 1991 there were no laws requiring nurseries to instruct children in Ukrainian. In 1987 in Ukraine, only one-quarter of the children receiving public preschool care were cared for in nominally Ukrainian-language institutions. In Kiev in 1987, although 201 of the 730 kindergartens in the city were officially considered to be Ukrainian-language kindergartens, instruction was not provided exclusively in Ukrainian at a single one of these schools. In response the T. Shevchenko Ukrainian Language Society was established, to foster and safeguard the Ukrainian language in the educational institutions of Ukraine.

In 1990 in Ukraine, according to official data, 182,000 children were on nursery school waiting lists. This figure does not include children whose parents have been forced by the shortage of nurseries to make other arrangements for them and are no longer applying for public preschool care. Nurseries are overcrowded and unsanitary, and as a consequence children cared for at nurseries are often ill. In

1987, 167,000 children were cared for at nurseries which were overcrowded according to government norms.

The first Ukrainian preschool organized outside of Ukraine was established in the United States before the First World War, by Bishop S. *Ortynsky. Early nurseries in Canada and in the United States were often run by nuns. Today Ukrainian preschool education exists in Canada, the United States, Germany, France, Belgium, Austria, Brazil, Argentina, and Australia. In Canada the provision of *Ukrainian bilingual education through the public school system has improved the level and availability of Ukrainian preschool education.

Preservation of historical and cultural monuments. To ensure the preservation of the representative and outstanding cultural objects of a given nation or people, state and public measures are often enacted. The process commonly requires the identification of such objects, their designation as having a special legal status, their restoration and ongoing conservation, and an interpretation of their cultural or historical significance for a broader public. To a certain extent those functions are carried out by museums and archives. In a more specific sense the status of a historical or cultural monument is usually attributed to public buildings, cultural objects, and sites with particular significance to the country or region in which they are located. *Architecture plays an especially prominent role.

The preservation of historical and cultural monuments over the course of centuries is a difficult feat even under ideal circumstances. The situation in Ukraine was complicated first by numerous wars and invasions, such as the ongoing Tatar attacks, the *Cossack-Polish War and the *Ruin, and the German invasion and occupation during the Second World War. A second difficulty was posed by centuries of Russian rule, which resulted in the destruction of key sites of Ukrainian Cossack history, including the hetman's capital at *Baturyn and the *Zaporozhian Sich, as well as the removal of many national treasures to St Petersburg and Moscow. Finally, the establishment of Bolshevik power in Ukraine proved extremely damaging as the Soviet regime consciously and deliberately destroyed numerous Ukrainian cultural monuments.

No systematic efforts at preservation were made in Ukraine until the late 17th and early 18th centuries. At that time Hetman I. Mazepa restored approx 20 churches, and other patrons followed his example. As Ukraine became increasingly integrated into the Russian Empire, it began to be influenced by imperial laws and trends regarding historical preservation. The earliest of those was invoked by Peter I, who established restrictions on the demolition of structures constructed before the 18th century. Throughout the 19th century Ukraine, and other parts of the Russian Empire, witnessed a phenomenal in-

crease of interest in the study of antiquities and regional history. New bodies, such as the *Odessa Society of History and Antiquities and the *Kiev Archeographic Commission, were formed. The work carried out by such associations helped to establish basic schemes of history and to underscore the significance of specific cultural monuments in various regions. The Third Archeological Congress, held in Kiev in 1874, dealt extensively with Ukrainian matters. A notable event at the gathering was M. *Levchenko's widely publicized address which focused on the devastation of Ukrainian cultural artifacts. Among the others who disseminated such information were Ye. Kuzmin, G. Lukomsky, and V. Riznychenko. In 1910 the *Kiev Society for the Preservation of Ancient and Artistic Monuments was formed. Its members were active in various parts of Ukraine, where they studied and preserved monuments of Ukrainian antiquity.

The preservation of monuments became a national question during the Ukrainian struggle for independence and the construction of a nation-state. In May 1917, at the initiative of I. *Svietsitsky, the Ukrainian Committee for the Protection of Historical Monuments was formed under the direction of M. Biliashivsky. In late 1917, matters of preservation and attendant staff were taken over by the Ministry of Education. Under the Hetman government monuments were the responsibility of the General Administration of Artistic Affairs and National Culture, headed by P. Doroshenko.

After the establishment of a Soviet regime in Ukraine in 1919, all national and community institutions were abolished, and responsibility for matters of preservation was assumed by the All-Ukrainian Committee for the Protection of Ancient and Artistic Monuments (Vukopmys). Although headed by obscure and inexperienced Party functionaries, the committee's staff included notable figures, such as Biliashivsky, F. Ernst, Yu. Mykhailiv, A. Sereda, and D. Shcherbakivsky. The staff rescued numerous valuable collections and individual artifacts during a general process of state nationalization and expropriation. Their work was limited, however, by the committee's overall mandate, which was to concentrate less on actual preservation work than on acquisition and inventory. No immediate measures were enacted to stop the indiscriminate destruction of historical treasures or their export. Owing to a general outcry, a moratorium on the exporting of artifacts of historical value was declared in 1924, but it was rescinded in 1926.

In spite of such difficulties in the 1920s, some concrete measures were taken to ensure the preservation of major cultural artifacts. In 1924 the territory of the ancient Greek colony at *Olbia was declared a national treasure, and in 1925 the grave site of T. Shevchenko was established as a state preserve. On 16 June 1926 landmark legislation, 'Regarding Monuments of Culture and Nature,' was enacted. It contained a comprehensive outline of institutions and measures for preservation. The territory of Ukraine was divided into four inspectorates, headed by S. Dlozhevsky, Ernst, P. Kozar, and S. Taranushenko (V. Dubrovsky was to be chief inspector). In that period the *Kievan Cave Monastery (1926), the Carmelite Monastery in Berdychiv (1928), the fortress in Kamianets-Podilskyi (1928), and the Ostrozyk castle in Starokostiantyniv (1929) were declared state historical-cultural preserves.

The Ukrainian Committee for the Protection of Cultural

Monuments, headed by a staunch Communist, I. Kulyk, was struck by the People's Commissariat for Education in 1929. Twelve district preservation commissions were established, which were to be staffed by 121 volunteer associates. The potential activity of the group was stemmed by the political ramifications of the show trial of the so-called *Union for the Liberation of Ukraine and the growing entrenchment of Stalinism in Ukraine. The wholesale destruction of the Ukrainian intelligentsia that began in 1929 rendered the preservation of historical sites highly unlikely. The 1930s saw major losses of Ukrainian cultural monuments. Numerous churches were either sacked or closed down and left to the elements, and the estates of Ukrainian notables, such as the Muravevs and D. Troshchynsky, suffered a comparable fate. One of the most notorious actions was the leveling of a series of notable architectural monuments in Kiev in 1933-4, including some of the churches restored by P. Mohyla, ostensibly for the purpose of providing room for the relocation of the government of the Ukrainian SSR from Kharkiv to Kiev.

The battles of the Second World War caused extensive damage to much of Ukraine; moreover, Ukrainian museums and art collections were savaged by the Nazi occupiers.

No specific relief was afforded to Ukrainian cultural monuments in the immediate postwar period, notwithstanding simultaneous all-Union and republican decrees on 30 December 1948 regarding 'the improvement of the protection of cultural artifacts on the territory of the Ukrainian SSR.' The regeneration of Ukrainian scholarly activity in the 1950s helped to establish a new base for preservation activity. Not until the 1960s, however, were any substantive results seen. On 28 August 1965 the Council of Ministers of the Ukrainian SSR passed a resolution allowing for the establishment of the *Ukrainian Society for the Protection of Historical and Cultural Monuments (the founding meeting took place in December 1966). The increase in serious efforts to preserve artifacts and monuments in the years following is attributable to the society's longtime head, P. *Tronko, the deputy leader of the Council of Ministers at that time. On 21 July 1965 the Council of Ministers ratified a list of monuments designated as under state protection. This list included 115 artistic, 117 historical, and 142 archeological items. On 20 February 1967 the council stated that those artifacts were in a state of unacceptable deterioration; that conclusion was considered grounds for a reaffirmation of the aforementioned society's statutes in June 1967. But in spite of those measures (and additional legislation in the 1970s), an attitude of official neglect toward Ukrainian cultural monuments was maintained.

The postwar period also saw the growth of efforts by the Soviet regime to buttress its position by creating a host of official 'cultural' monuments commemorating its history. In 1955-8 three resolutions were passed by the Central Committee of the CPU and the Council of Ministers of the Ukrainian SSR calling for the placing of plaques celebrating the achievements of the regime throughout Ukraine. Thirteen were to commemorate events of the Revolution of 1905-7, 78 were to mark the victory of Bolshevism of 1917-20, and 4 were to note the history of the CPU. A resolution passed by the Central Committee and the council on 28 February 1968 called for a massive campaign of distribution of plaques, plates, stones, monuments, and the

like; oblast legislative and executive councils were held responsible for its success.

The muted hostility of Soviet state institutions toward the protection of Ukrainian cultural monuments created a situation in which most of the work was carried out by voluntary societies and amateur enthusiasts, such as I. *Honchar, O. *Kompan, and O. Sylyn. It also rendered cultural activism in the realm of Ukrainian historical preservation a subtle form of political opposition. An additional problem was afforded by the fact that the political climate in the USSR did not allow preservation work to be carried out in all areas of Ukrainian history. Some fields, such as Kievan Rus' and medieval Ukraine, could be dealt with within a politically acceptable framework. Others, notably the Ukrainian Cossack past, were regarded as suspect and as a result were seriously neglected. Those dealing with Ukrainian's struggle for independence were strictly taboo. With the gradual disintegration of the Soviet regime from the mid-1980s, a phenomenal upsurge of interest in Ukrainian historical preservation took place, particularly with respect to Cossackdom and the struggle for independence.

Presniakov, Aleksandr [Presnjakov], b 3 May 1870 in Odessa, Kherson gubernia, d 30 September 1929 in Leningrad. Russian historian; corresponding member of the USSR Academy of Sciences from 1920. He graduated from St Petersburg University and taught there from 1907 (professor from 1918). His *Kniazhoe pravo v drevnei Rusi* (Princely Law in Ancient Rus', 1909) remains one of the foremost works in the history of Kievan Rus'. His major work is considered to be *Obrazovanie Velikorusskogo gosudarstva* (PH D diss, 1918; English trans as *The Formation of the Great Russian State*, 1970). He also wrote important monographs on the tsardom of Muscovy (1918; English trans 1978), Alexander I (1923), Nicholas I (1925; English trans 1974), and the Decembrist revolt (1926). Presniakov was one of the few Russian historians to give some credit to M. Hrushevsky's critique of the traditional scheme of Russian history and to accept to some degree the notion of the independent evolution of Ukrainian history. An edition of his lectures on Russian history (2 vols, 1938-9) was published posthumously.

Prešov (Ukrainian: Priashiv). A city (1989 pop 85,000) in eastern Slovakia, situated on the Torysa River, with approx 2,000 Ukrainian inhabitants. In 1935 its population was 22,000, of whom 2,500 were Ukrainians. A transit point for trade between Galicia and Hungary from the Middle Ages on, it was mentioned in a document of 1247 as an important city. It later became the center of the Sáros (Šariš) komitat. Although not within Ukrainian ethnographic territory, the city has developed as a Ukrainian center. In 1816 it became the capital of a Greek Catholic eparchy, of which the first bishop was H. Tarkovych. The city's cultural significance for Ukrainians grew in 1850, with the establishment of the Prešov Literary Society by

O. *Dukhnovych. Active until 1853, the group had 72 members and published nine books (including textbooks and three issues of the almanac *Pozdravlenie rusynov*, 1850–2). The John the Baptist Society, a charitable and educational organization, was founded in the city in 1862. A hostile attitude toward minorities by local authorities and the prevailing Russophilism or Magyarophilism of the local intelligentsia (particularly among the clergy) retarded Ukrainian cultural growth for decades. It was given new impetus only when the Prešov region joined Czechoslovakia in 1919. Nevertheless, because no administrative ties were established with Ukrainian regions of Transcarpathia, cultural development continued to proceed slowly. There were a number of Russophile organizations and institutions active in the city, including the Russian People's Council, the Russian People's Home, the Russian Club, the Russian Museum, the Dukhnovych Society (est 1933), the Union of Russian Women, and the Union of Russian Teachers.

View of Prešov, with the monument to Oleksander Dukhnovych to the right (1933)

Russophile newspapers included the clerical *Russkoe slovo* (1924–39), *Narodnaia gazeta* (1924–35), and *Russkaia narodnaia gazeta* (1937–8). *Slovo naroda* was published in Ukrainian in 1931–2 and edited by I. Nevytska.

A Greek Catholic theological seminary (est 1880), teacher's college (1895), and gymnasium (est 1936) were also active. A Ukrainian radio program began broadcasting locally in 1934 and has continued serving the region to this day.

In 1945 Prešov was recognized as the official center of the Ukrainian population in Czechoslovakia, and the Ukrainian People's Council of the Prešov Region was established there. The new body sponsored several publications, including the newspaper *Priashivshchyna*. In 1946 the *Prešov Ukrainian National Theater, which has staged over 300 productions in Ukrainian and Russian, was established. In 1951 the *Cultural Association of Ukrainian Workers was formed, and succeeded the Ukrainian People's Council. After the Velvet Revolution in 1990, it changed its name to Union of Ruthenian-Ukrainians of Czechoslovakia. In 1951 *Priashivshchyna* was replaced by the weekly *Nove zhyttia*, the illustrated monthly *Druzhno vpered*, and the literary quarterly (now a bimonthly) *Duklia*. In 1952 a Ukrainian branch of the Slovak Writers' Union was established in Prešov. A department of Ukrai-

nian language and literature at the Prešov division of Košice University, an Orthodox theological seminary, a Ukrainian elementary and primary school, and the Duklia Ukrainian Folk Ensemble are also found there. Greater numbers of Ukrainians have entered Prešov's intelligentsia in recent years. Since 1950 the city has been the center of an Orthodox bishopric, and in 1969 it became an ordinariate of the revived Greek Catholic church. The Ukrainian department of the Slovak pedagogical publishing house annually publishes 12 to 15 Ukrainian works of literature or scholarship and a comparable number of textbooks. The local Ukrainian intelligentsia was particularly active in the latter 1960s, but after the 1968 invasion by the Soviet Union a number were dismissed from their posts, including Yu. Bacha, Ye. Biss, I. Matsynsky, M. Mushynka, P. Murashko, and Y. Shelepets. Most were rehabilitated in 1990. In 1989 the Ukrainian gymnasium was renamed the Shevchenko Gymnasium.

In the 1960s to 1980s, a number of conferences on the works of O. Dukhnovych, I. Franko, F. Lazoryk, I. Pankevych, I. Pavlovych, T. Shevchenko, and other Ukrainian cultural figures were held in the city. An academic society in Prešov is affiliated with the Union of Ruthenian-Ukrainians of Czechoslovakia. Ukrainian departments are situated at the regional pedagogical institute and the Pedagogical Research Institute.

Ukrainian editions of the monthly (Orthodox) *Zapovist Kyryla i Mefodiia* and (Greek Catholic) *Blahovisnyk* are published along with the Slovak versions. (See also *Prešov region.)

M. Mushynka, O. Zilynsky

Prešov eparchy. A Byzantine rite Catholic eparchy in western Transcarpathia, with its see in Prešov, now located in eastern Czechoslovakia. Prešov eparchy was proposed in 1816 by the Austrian emperor Francis Joseph I and was formally erected by Pope Pius VII in 1818. Encompassing 194 parishes with approx 150,000 faithful, it consisted of the Košice Greek Catholic vicariate (est 1787) of Mukachiv eparchy. The eparchy's bishops have included H. Tarkovych (1821–41), Y. Gaganets (1843–75), N. Tovt (1876–82), I. Valii (1883–1911), S. Novak (1913–20), D. Niaradi (1922–7, as apostolic administrator), P. Goidych (1927–60), and suffragan V. Hopko (1947–76). Among the institutions established in Prešov were an eparchial seminary (est 1880), a seminary for precentors and teachers (1895), and a Greek Catholic gymnasium (1936). Most religious orders active in the eparchy – the Redemptorists, the Basilians, and the Sisters Servants of Mary Immaculate – were established under Bishop Goidych; the Basilian Sisters were active there from 1922.

Several major swings in national orientation have marked the history of Prešov eparchy. By the turn of the century many of the clergy, in particular the hierarchy, displayed a marked Magyarophilism and favored the Latinization of the church. In reaction the Russophiles of the region launched a concerted effort to establish a (Russian) Orthodox church in Transcarpathia, which they hoped would lead most of the Prešov parishes away from Greek Catholicism. Under Bishops Niaradi and Goidych, however, the church stressed its Ukrainian and eastern character and successfully countered most of the Russophile efforts.

During the Second World War, Prešov eparchy gained

jurisdiction over several new areas, and by 1948 it included Prešov eparchy proper (143,000), the Mukachiv administration (80,600), and the Czech and Moravian administrations (68,400), for a total of 292,600 faithful. On 28 April 1950 the eparchy was forcibly converted by Communist authorities to Orthodoxy at the so-called Prešov Sobor. This action was accompanied by the formal liquidation of the Greek Catholic church, the closing of monasteries, the arrest of both bishops, and the arrest and imprisonment in labor camps of most of the clergy. Authority over the eparchy was claimed by the patriarch of Moscow, who established four administrative jurisdictions in Czechoslovakia: the archeparchy of Prague and the eparchies of Brno-Olomouc, Michalovce (including parts of the Mukachiv administration), and Prešov (virtually intact territorially). On 23 November 1951 these were united into the Autocephalous Orthodox Church of Czechoslovakia, and E. Vorontsov, a Russian, was placed at the head of the church by the Moscow patriarch. Since 1964 the church has been led by the Transcarpathian-born D. Fylyp.

In 1968, during the Prague Spring, the government allowed the restoration of the Greek Catholic church in Czechoslovakia. In Prešov eparchy 204 of 246 churches and 69 priests returned to Eastern rite Catholicism. Bishop Hopko, who had assumed leadership of the eparchy after Goïdych's death in 1960, returned to Prešov to assume his post. A struggle for control over the eparchy erupted, however, between Slovak and Ukrainian Greek Catholics. One of the Slovaks, I. Hirka, emerged as administrator of the eparchy in 1969 and launched a campaign for the Slovakization of the eparchy, in which effort he was supported by the Slovak authorities. In response many Ukrainian Catholic and even some Slovak villages returned to the Orthodox church, where the Church Slavonic language was used, and the Eastern rite adhered to. Hirka was ordained bishop in 1990. Today the bishop of Prešov eparchy does not retain any formal ties to the *Ukrainian Catholic church and does not participate in the church's synods.

Prešov Literary Society (Priashvskoe literaturnoe zavedenie). An organization established by O. *Dukhnovych, with the aim of publishing books in the Transcarpathian dialect and raising the educational level of Transcarpathia's Ukrainian population. It functioned semilegally from 1850 to 1853 out of Dukhnovych's home in Prešov. Its several dozen members were from the local nationally conscious literati (eg, A. and V. Dobriansky, A. Baludiansky, A. Popovych, M. Nod, O. Homichkov, O. Pavlovych, H. Sholtys, M. Mykhalych, I. Vyslotsky, P. Yanovych, A. Rubii, O. Labants, A. Yankura, A. Fedorovych, A. Kryher-Dobrianska, T. Podhaietska, M. Nevytska, I. Churhovych); there were a few Czech and Slovak sympathizers among them (eg, J. Moravčik). The society issued 12 publications, including the first Transcarpathian

Ukrainian schoolbooks, calendars, and two literary miscellanies, and the first published Transcarpathian Ukrainian play, Dukhnovych's *Dobroditel' prevyshaiet bohatstvo* (A Philanthropist Transcends Wealth, 1850). Under its auspices Dukhnovych collected materials in the region for a future national museum and organized the recording of folklore. In 1853 the society failed to receive support from the local church hierarchy, and finally it was banned by the Austrian government, which considered its activities subversive.

Prešov Mountains. See Slanské Mountains.

Prešov region (Priashivshchyna). An area within the northeastern part of Slovakia inhabited by Ukrainians. The region has never had a distinct legal or administrative status, so the term Prešov region – also Prešov Rus' – is encountered only in writings about the area. The name derives from the city of *Prešov (Ukrainian: Priashiv), which since the early 19th century has been the religious and cultural center for the region's Ukrainians. The alternate term, Prešov Rus', reflects the fact that until the second half of the 20th century the East Slavic population there referred to itself exclusively by the historic name Ruthenian (Rusyn), or by its regional variant, Rusnak.

At present the Prešov region is administratively part of Slovakia. The part of Slovakia inhabited by Ukrainians consists of about 300 villages located within the northernmost portions of the counties (Slovak: *okresy*) of Stará Ľubovňa, Bardejov, Svydnyk (Svidník), Prešov, and, in particular, Humenné. Before 1918 the area made up the northernmost portions of the historical Hungarian komitats (*megye*) of Spiš (Hungarian: Szepes), Sáriš (Sáros), Zemplin (Zemplén), and southwestern Už (Ung). According to official Czechoslovak census data Ukrainians form a majority in none of the present-day counties. In 1991, 32,400 inhabitants in the Prešov region designated their national identity as Ruthenian (Rusyn) or Ukrainian, although unofficial sources estimate their number could be as high as 130,000 to 140,000.

The Ukrainians inhabit a small strip of territory that somewhat resembles an irregular triangle bounded by the crests of the Carpathians in the north. Starting from the west at a point in the valley of the Poprad River, the Prešov region gradually widens in an eastward direction until it reaches as far south as the outskirts of Uzhhorod, near the border with Ukraine.

The Prešov region forms an ethnographic unit with the *Lemko region on the adjacent northern slopes of the Carpathian crests. Scholars therefore often refer to the Prešov region as the southern Lemko region. The region's inhabitants, however, have never, with rare exceptions, designated themselves Lemkos, and their political separation from the north (which eventually fell under Polish control) has allowed them to follow a distinct historical development.

Geography and climate. The Prešov region makes up about 3,500 sq km of territory. It sits in some of the lowest elevations of the Carpathians within the Lower Beskyd and Western Beskyd ranges; most of the Ukrainian villages are situated only 450–900 m above sea level. The generally low Beskyd ranges (highest 1,289 m) are broken by several passes – Tylych (683 m), Duklia (502 m), Lupków (657 m), Ruskyi (797 m) – which historically have played

PREŠOV REGION

an important role in the movement of people and goods to and from Poland.

Several river valleys connect the region southward into the Slovak lowland and the Hungarian plain. The major rivers, the upper reaches of which flow southward through the Prešov region toward the Tysa, include (from west to east) the Poprad (which unlike the others flows northward) and the Hornád, the Torysa, the Topľa, the Laborets, the Ondava, and the Chirokha. The north–south flow of the rivers has until recently made it easier for Ukrainians to reach Slovak-inhabited towns at the southern end of their several valleys than to reach the valleys immediately to the east or west inhabited by their fellow Ukrainians.

The climate is basically continental, although somewhat warmer than in the neighboring Transcarpathian region to the east. At lower elevations the temperature averages 21°C (July) to –3°C (January), with an annual rainfall of 580 mm. At higher elevations the temperature averages drop to 14°C (July) and –8°C (January), with rainfall increasing to 1,100 mm annually. The Prešov region today remains an agricultural and pastoral land which, owing to the mountainous and forested terrain, at best affords a subsistence-level economy. Lumbering is the only other viable economic pursuit.

Early history. There is much disagreement concerning the early history of the Prešov region and of the Ukrainians (Ruthenians) living south of the Carpathian Mountains. Archeological evidence suggests that the region was already inhabited during the late Stone Age. From the 3rd century BC to the 5th century AD a series of peoples – Celts, Dacians, Goths, Huns, and Avars – passed through, set-

ting there briefly and leaving behind remnants of their way of life. Linguistic and archeological evidence indicates that by the 6th or 7th century AD the region's inhabitants were Slavs, although there is no consensus on whether they were West Slavs ('ancestors' of the Slovaks) or East Slavs (*White Croats, 'ancestors' of the Ruthenians [Ukrainians]). It seems that the first permanent settlers in the Prešov region arrived from north of the Carpathians sometime between the 6th and 11th centuries, which date would suggest that they were East Slavs. Slovak scholars contend, however, that there was a continuous settlement of West Slavs from the 7th century, and that the ancestors of the Ukrainian-Ruthenians did not arrive in the area until their migration from Galicia beginning in the 14th century (a view also held by Hungarian scholars). It has also been debated whether the Prešov region received Christianity in the Byzantine form from the Bulgarian Empire in the 9th century or from Kievan Rus' in the 11th century. What is certain is that the first parishes in the Prešov region, for which there are documents beginning only in the 14th century, were initially under the jurisdiction of the Orthodox bishop of Peremyshl and then (after the 15th century) the bishop of Mukachiv.

Throughout its early history the Prešov region was a sparsely settled border area between the Hungarian Kingdom to the south and the Kievan Rus' principality of Galicia to the north. In the 11th and 12th centuries the Hungarian kings pushed northward toward the crest of the Carpathians and even beyond, into parts of Galicia, where they ruled intermittently until the end of the 14th century. To ensure their control of that northern border region the Hungarian kings granted, during the 14th centu-

ry, large tracts of land to princes (mostly from southern Italy and therefore related to Hungary's new ruling House of Anjou), such as the Drugeth family in Zemplin county and the Perényi family in Šariš county. Thus from the 12th century until 1918 the Prešov region was to remain within the political and socioeconomic framework of the Hungarian Kingdom.

The first consistent documentation about the Prešov region dates from the 14th century, thereby coinciding with the increasing settlement of the area. Ukrainian colonization came from two directions, southeast and north. The colonization from the southeast was related to the movement of *Vlachs (Wallachians) northward and westward through the Carpathians. By the time they reached Transcarpathia, the Wallachians had assimilated with the local population. When they moved farther westward into the Prešov region, they were for the most part ethnically Ukrainians, even though they retained the name Wallachians. The colonization from the north consisted of Ukrainian peasants who fled the spread of the feudal system in Galicia. The heaviest immigration from the north dates from the 16th century, when many new villages in the Prešov region were established. Peasants were attracted to the sparsely settled Prešov region because of the special privileges granted to new colonists, including limited taxes and duties, a certain degree of self-rule and judicial authority over minor crimes, and the right to buy and sell land.

The 16th and 17th centuries. Hungarian control over the Prešov region increased during the 16th century, after Hungary's Christian princes were forced to retreat to the northern part of the kingdom in the wake of their defeat at Ottoman hands in 1526. As a result the feudal duties required of Ukrainian peasants and Wallachian shepherds increased. The princes themselves were soon embroiled in a dynastic struggle for the Hungarian crown.

The Hungarian rivalries assumed a religious dimension in the second half of the century, when the Reformation pitted Hungarian Protestant princes in Transylvania against Catholic princes in the rest of the non-Ottoman-ruled kingdom. The Orthodox Ukrainians found themselves caught in the middle. The Prešov region came under Catholic Habsburg control, and Transcarpathia, including the Orthodox eparchial see of Mukachiv, came under Protestant Transylvania. The Ukrainians in the Prešov region were now cut off from their brethren just to the east. The situation strengthened their contact northward with the diocese of Peremyshl, from which Orthodox church books, icons, and other religious materials now came in greater numbers. The contact grew after 1596, when the Uniate (Greek Catholic) church came into being in Ukraine. Following that example, Prince G. Drugeth III (d 1620) of Humenné, who owned numerous villages in the Prešov region, tried in 1614 to introduce a church union on his lands. As part of his effort he established the Jesuit College in Humenné (1613), the first secondary school for the Prešov region. Although Drugeth's efforts failed, his desires were realized with the *Uzhhorod Union of 1646. Backed by pro-Habsburg Hungarian rule, the union took hold in the Prešov region, and most of the Orthodox Ukrainian villages there became Uniate. Among the exceptions were a few villages that became Protestant (Lutheran and Calvinist). The Protestant presence, however, was short-lived. By the mid-18th century

all the Ukrainian villages had become Uniate (later Greek Catholic); they remained so, with few exceptions, until 1918.

Dynastic and religious wars between pro- and anti-Habsburg forces broke out in the wake of the Uzhhorod union and ravaged the Prešov region. The Ukrainians in the region sometimes joined in the military conflicts, most notably in the last of the major anti-Habsburg revolts, led by F. Rákóczi. With the restoration of order (and Habsburg rule) came an increase in the feudal dues imposed on the peasantry. Many Ukrainian peasants fled to southern Hungary (in the Bačka-Vojvodina region of present-day Serbia), to Slovak territory farther west, or across the mountains northward to Galicia. In Šariš and Zemplin counties as many as one-third of the villages were deserted by the beginning of the 18th century.

The renewal of Habsburg authority. The marked decline in the number of Ukrainian inhabitants in the Prešov region was made up for during the 18th century by natural demographic increases that resulted from political stability and economic prosperity under Habsburg rule as well as new immigration from Galicia, especially after the 1730s. Since local Hungarian landlords were anxious to repopulate their villages in the Prešov region, they welcomed the newcomers with reduced taxes and other temporary privileges. The period also saw an influx of Galician Jews, who were often contracted by the lords to collect rents, tolls, and other duties and granted the right to brew and sell liquor.

The 18th century also witnessed an improvement in the status of the Uniate clergy following an imperial decree of 1692 that had freed them from all duties previously owed to local landlords. Before long the priests themselves became village landlords.

The prosperity of the 18th century encouraged significant cultural development. Numerous churches were constructed throughout the Prešov region; those built entirely of wood still represent some of the finest achievements of Ukrainian church architecture. The first publications for Ukrainians also date from the period, including the *Bukvar* (Primer, 1770) attributed to Bishop I. *Bradach. Elementary schools were established at the rural monasteries of Bukovská Hôrka and Krásny Brod, the latter including an advanced philosophical and theological school, where monks such as A. Kotsak prepared grammars and other texts that in part used the local Ukrainian (Ruthenian) vernacular. The second half of the 18th century also saw the appearance of the first histories of Ukrainians, the most extensive being a three-volume work by Y. *Bazylovykh, a native of the Prešov region.

In 1771, under Bishop Bradach, the Habsburgs granted the eparchy of Mukachiv equal status with the Roman Catholic church and accepted a change in the name of the church from Uniate to Greek Catholic. In 1787 the Mukachiv eparchy established a vicariate for Greek Catholics in the Prešov region with a seat in Košice (in 1805 it was transferred to Prešov). Finally, in 1815 an Austrian imperial decree, confirmed three years later by the Apostolic See, raised the Prešov vicariate to the status of an independent eparchy. The new eparchy under its first bishop, H. Tarkovych, consisted of 193 parishes, with 149,000 faithful. With the creation of the eparchy Ukrainians in the Prešov region were for the first time made jurisdictionally distinct from their brethren just to the east in Transcar-

pathia, who remained within the eparchy of Mukachiv. That development also brought about the rise of Prešov as the region's cultural center and the establishment of an eparchial library, a cathedral church, an episcopal residence, and, eventually, a seminary (1880) and teacher's college (1895).

The Greek Catholic church remained the only choice for Ukrainians of the Prešov region who wished to pursue a career other than agriculture. For those few who obtained an education but wished to enter secular professions without having to become assimilated to the increasingly dominant Hungarian culture of the kingdom in which they lived, one possibility was emigration abroad. By the beginning of the 19th century Ukrainians had begun to emigrate eastward from the Prešov region, some to neighboring Galicia, but most to the Russian Empire, where they were to become leading figures in the recently reformed tsarist educational system – M. *Baluhiansky, P. *Lodii, and I. *Orlai. Only Orlai continued to maintain contact with his homeland. He published a history of the Carpatho-Ruthenians (1804), which contended that Hungary's 'Russians' were related to other 'Russians,' especially those living in Little Russia (Ukraine).

The socioeconomic structure in the Prešov region changed little during the first half of the 19th century. Nor did the national consciousness of the Ukrainians in the region (and in Transcarpathia) manifest itself in the same manner as among their Slavic neighbors during what was a general period of national awakening. They had no newspapers, no cultural organizations, and no standard language. Their secular intelligentsia emigrated abroad (mostly to the Russian Empire), and the few Greek Catholic clergymen who thought in national terms expressed at best vague ideas of unity with Russia. Most, nevertheless, adapted to the new conditions in Hungary, where a vibrant Hungarian national movement called upon all its citizens – of whatever ethnolinguistic background – to learn Magyar and to adopt it as the cultured medium for communication. That state of affairs made the growth of Ukrainian national life that began with the Revolution of 1848 all the more remarkable.

The national awakening and decline. With the outbreak of the *Revolution of 1848–9 in the Habsburg monarchy the Greek Catholic clergy and seminarians in the Prešov region immediately expressed support for Hungary. In sharp contrast to them, the secular leader A. *Dobriansky formulated a political program calling for the unity of Ukrainians in Hungary with their brethren north of the mountains in Galicia. He then played an important role in the suppression of the Hungarian revolt as Austrian liaison with the Russian army, which Tsar Nicholas I sent in response to Vienna's request for aid. After Hungary was defeated in August 1849, the kingdom was reorganized under direct Austrian military control. Dobriansky became administrator of the Uzhhorod civil district (Uzh, Bereg, Ugocsa, and Maramureş counties), where he implemented policies for Ukrainian national autonomy. Ukrainians in the Prešov region demanded to be united with the 'Rusyn' Uzhhorod district, but that ambition was not realized before the district was abolished in March 1850.

More lasting than political gains were the cultural achievements of the Ukrainians of Hungary. Again, they were associated with an activist from the Prešov region,

the Greek Catholic priest O. *Dukhnovych. In 1850 he organized the first Ukrainian cultural organization in the region, the *Prešov Literary Society. In 1862 he worked with Dobriansky to establish the Society of St John the Baptist in Prešov, whose purpose was to educate young people in a national spirit. Dukhnovych also wrote several histories of his people and newspaper accounts of their current affairs.

Despite the achievements of Dobriansky and Dukhnovych in stimulating the political and cultural renaissance of their people, the majority of the Greek Catholic clergy and young seminarians remained immune to the Slavic aspects of their culture. They preferred to speak Magyar, to adopt Magyar mannerisms, and to strive to be loyal citizens of Hungary – even at the expense of surrendering their national identity.

The political changes that resulted from the 1867 *Ausgleich* that created the Austro-Hungarian dual monarchy had a profound effect on Ukrainian life in the Prešov region. The Magyars now had full control over all national minorities living in Hungary, including (1870) approx 450,000 Ukrainians (18 percent of whom lived in the Prešov region). Magyarized Ukrainians had little difficulty in adjusting to the new situation. Dukhnovych and his generation, however, were now in a more tenuous position. Their situation was exacerbated by the fact that they had never resolved the question of a standard literary language (often resorting to a jargonish **yazychiie* viewed as superior to the 'peasant vulgarism' of vernacular speech) and the closely related problem of national identity. Increasingly they began to identify with the Russian nationality as a way of preventing the disappearance of their people and became *Russophiles.

By the 1870s no Ukrainian institutions or publications remained in the Prešov region. Literary production continued, although local writers were forced to work in isolation and to publish whenever possible in Uzhhorod or in Lviv in neighboring Galicia. Of the best-known Ukrainian writers in Hungary of that period four were natives of the Prešov region: O. Pavlovych, A. *Kralytsky, Yu. Stavrovsky-Popradov, and I. Danylovych-Korytniansky. All were Greek Catholic priests, who through their poetry, prose, and plays tried to instill pride and patriotism by describing the physical beauties of their Carpathian homeland and the supposed greatness of its historical past. Their message, however, was for the most part not in the vernacular speech of the local populace, but in the *yazychiie*.

More problematic for the survival of Ukrainians was the fact that the educational system was not producing any new cadres of leaders with some form of national consciousness. The few secondary schools in Prešov were administered by the Greek Catholic church, and all taught exclusively in Magyar. At the lower level there were elementary schools sponsored by the church, village, or state, where students received at least rudimentary training in the Cyrillic alphabet and therefore some exposure to their native culture. That situation was to change rapidly, however. In 1874 the Prešov region had 237 elementary schools using some form of Ukrainian; three decades later, in 1906, that number had decreased to only 23, with 68 more offering Ukrainian-Magyar bilingual instruction.

Those decades saw the economic situation of the Prešov region decline substantially, as farm holdings diminished in size owing to a growing population, and the need for

agricultural laborers decreased owing to mechanization. Those factors forced Ukrainians to emigrate, in particular to the United States. The first few individuals left in the late 1870s, and by 1914 an estimated 150,000 Ukrainians had left Hungary, approx half of them from the Prešov region. The departing emigrants not only helped to relieve the immediate pressures on the local economy but also contributed to it by means of the remittances they forwarded from the New World. Some later returned home to buy up as much land as possible.

The Hungarian authorities maintained and intensified their policy of Magyarization in the early 20th century. All Greek Catholics were now considered 'Magyars of the Greek Catholic faith,' and people were compelled to Magyarize their family and given names. A new school law took effect in 1907, as a result of which the 68 Magyar-Ukrainian bilingual schools in the Prešov region were fully Magyarized by 1912, and the number of schools using some form of Ukrainian declined from 23 to 9. The government's policy was more often than not implemented by local Magyarone teachers, priests, and officials of Ukrainian background. Foremost in such efforts was the Magyarone Greek Catholic bishop of the Prešov eparchy, I. Novak, who in 1915 introduced the Latin alphabet into school and liturgical texts and dropped the traditional Julian calendar in favor of the Gregorian.

At the time of the First World War Ukrainian national life in the Prešov region had reached its lowest point. There were no secondary schools and only a few elementary schools where the native language was used; there were no national institutions, and the only publication was a weekly (*Nase otecsestvo*, 1916–19) written in a Magyar-based Latin alphabet and devoid of Ukrainian patriotism. Finally, the hierarchy and many priests in the Greek Catholic church, as well as the secular and lay intelligentsia, had been completely Magyarized.

The impact of the First World War. In the months immediately following the end of the war the implications of the contemporary political upheavals for Ukrainians living south of the Carpathians were unclear. The first movement toward change came from Ruthenian immigrants living in the United States. Under the leadership of a young Ruthenian-American lawyer, H. Zhatkovych, the *American National Council of Uhro-Rusins was established in the summer of 1918. By the end of the year its members were actively pursuing efforts to incorporate their European homeland into the new Czechoslovakian state as an autonomous region. Meanwhile Ukrainians in the Transcarpathian region began holding a series of meetings (councils) to discuss their political future. The first was the *Ruthenian People's Council in Stará L'ubovňa, held on 8 November 1918. The gathering concluded that continued life under Hungary was unacceptable, but it could reach no consensus on an alternative. When a group of Ukrainians met in Uzhhorod on 9 November 1918 and pledged their loyalty to Hungary, the Ruthenian People's Council reconvened in Prešov. Several months of contradictory political activity followed: national councils were convened farther east in Subcarpathia, and called for union with Ukraine; the Hungarian government (republican and communist) attempted to restore its rule in the area; and the Carpatho-Ruthenian-American delegation arrived with its proposal for union with Czechoslovakia. The developments culminated on 8

May 1919, when some 200 Ukrainian delegates met in Uzhhorod to form the *Central Ruthenian People's Council. The council unequivocally endorsed the option of autonomy within a Czecho-Slovak state, albeit at the cost of dropping plans for union with the Lemkos to the north.

The establishment of the territory of *Subcarpathian Ruthenia (Czech: Podkarpatská Rus) created a 'temporary' boundary along the Uzh River, which left Ukrainians of the Prešov region separated administratively from their brethren farther east for the first time. Within a decade the boundary, with slight changes, became permanent. The Prešov region remained outside Subcarpathian Ruthenia and under Slovak administration.

The interwar years. Ukrainian life in Czechoslovakia experienced a notable renaissance during the interwar era. The Hungarian authorities had had an active policy of assimilation, but the Slavic state was generally sympathetic to the Ukrainians' language and culture. The situation did not entirely hold for the Ukrainians of the Prešov region, however, for whereas their kinfolk in Subcarpathian Ruthenia were established as one of the state nationalities, in the Prešov region they constituted only a national minority with no political or administrative autonomy.

The political status of the Prešov region remained uncertain until 1928. All Ukrainian leaders had maintained from the earliest negotiations with Czechoslovak leaders in the United States and Europe that the Ukrainian-inhabited Prešov region would have to become part of an autonomous Subcarpathian Ruthenia. Slovak leaders, however, remained completely opposed. The question of unification with their brethren to the east became the basic goal of the Russophile *Ruthenian People's party, established in 1921 in Prešov by the brothers K., N., and A. *Beskyd. The matter was finally resolved in 1928, when the national parliament passed a law dividing the Czechoslovak Republic into four provinces (Bohemia, Moravia-Silesia, Slovakia, and Subcarpathian Ruthenia) and making permanent with only slight changes the formerly temporary boundary between Slovakia and Subcarpathian Ruthenia. Despite that decision the Ruthenian People's party and its organs, *Rus'* (Prešov 1921–3) and *Narodnaia gazeta* (Prešov 1924–36), continued in vain to demand unification.

Separated from Subcarpathian Ruthenia, the Ukrainians of the Prešov region were subject to the policies of a Slovak administration unsympathetic to them. The Slovakization of the school system began in 1922, when the minister of education in Bratislava adopted a policy whereby Greek Catholic elementary schools that had taught in Magyar before 1919 should now use Slovak. In spite of guarantees in the Czechoslovak constitution that (theoretically) required at least 237 elementary schools to provide Ruthenian-Ukrainian vernacular instruction, only 95 elementary schools in the Prešov region were doing so in 1923–4. Slovak authorities defended that state of affairs by citing census statistics. But the statistics had been manipulated by local officials who had urged Ruthenian Ukrainians to identify themselves as 'Czechoslovaks' on census questionnaires and thereby caused a drop in the number of Ukrainians officially noted as such, from 111,280 (1910) to 85,628 (1921). The resulting census dispute added to the friction between Slovaks and Ukrainians that continued to grow (especially among political

leaders) throughout the interwar period.

The economic situation of the Ukrainian population deteriorated as well. Eastern Slovakia, particularly the Prešov region, remained one of the most underdeveloped sections of Czechoslovakia. Lumber mills in about a dozen locations (the largest being Medzilaborce and Udavské) employed only approx 3.3 percent of the work force in 1930. The vast majority of the Ukrainians (89.6 percent in 1939) remained agriculturalists. Their already precarious situation worsened in the 1930s as a result of a bad harvest in 1931–2, coupled with the Depression. The ensuing bankruptcies and foreclosures prompted several significant disturbances and strengthened the support of antigovernment political parties.

Despite serious political and economic problems there were notable social and cultural developments in the Prešov region during the period. Continued protests by the Ruthenian People's party and the Prešov Greek Catholic eparchy resulted in an increase in the number of schools teaching in some variant of the local dialect of Ukrainian, so that by 1938 there were a total of 168 of such elementary schools and 43 others in which some Ruthenian-Ukrainian was taught. A gymnasium (albeit Russian-language) was opened in Prešov in 1936.

The Orthodox church began making greater inroads in the region during the interwar era. Pro-Orthodox sentiment had arisen in the area for the first time in centuries in the 1890s, as an outgrowth of Russophile tendencies and a response to tsarist propaganda and the return of emigrants from the United States (who had converted during their sojourn abroad). It had been kept in check, however, by the Hungarian authorities. Now, from a base in the village of Ladomirová, near Svydnyk, the church grew to include 18 parishes, with more than 9,000 adherents, by 1935. The initial success of the Orthodox movement was in part related to a crisis in the Greek Catholic eparchy of Prešov resulting from the earlier Magyarone sympathies of Bishop Novak and other church hierarchs. The growing shift of Greek Catholics to Orthodoxy was stemmed somewhat by Bishop D. Niaradi, the church's apostolic administrator in 1922–7. The situation of the Greek Catholic church finally stabilized with the appointment of a new bishop, P. *Goidych, who provided the active leadership needed to revive it.

The greater freedom of Ukrainians under Czechoslovak than under Hungarian rule made possible a broader discussion concerning national identity. The residents of the region, having had no experience comparable to the blossoming of Ukrainian civic culture in Galicia during the 19th century or to the cathartic Revolution of 1917 in central Ukraine, largely rejected a Ukrainophile orientation. The local intelligentsia urged the people instead to identify themselves as Ruthenians (*Rusyny* or *Rusyns*). Characteristically that orientation was manifested in one of two forms, Russian or regional, although it was often difficult to distinguish between the two, as both groups claimed they were Carpatho-Ruthenians (*karpatorusskii*) maintaining the tradition of 19th-century leaders such as Dukhnovych and Dobriansky. The Russophiles were initially represented by A. Beskyd and his supporters in the Ruthenian People's party, who demanded the introduction of the Russian language into local schools and touted the notion of one 'Russian' people 'from the Poprad River to the Pacific Ocean.' The regional Ruthenian orientation was

represented by the Greek Catholic hierarchy and by the Prešov branch of the *Dukhnovych Society. Their views commonly appeared in the unofficial organ of the Greek Catholic eparchy, *Russkoe slovo* (Prešov 1924–38). They were marked by a strong attachment to local culture and institutions as well as to the language used in the area, one of the *Transcarpathian dialects that they regarded virtually as a separate Subcarpathian Ruthenian language.

In 1930 D. Zubrytsky and I. Nevytska set up in Prešov a branch of the Ukrainianophile Prosvita society, which was also based in Uzhhorod. The group published a few issues of a Ukrainian-language newspaper, *Slovo naroda* (Prešov 1931–2), but failed to develop a broad network of village affiliates.

A modest renaissance in literature also took place in the Prešov region during the interwar years. The older generation, best represented by I. Kyzak, was joined by new writers, such as I. Nevytska, D. Zubrytsky, F. Lazoryk, A. Farynych, and M. Horniak. Several other natives of the Prešov region, such as the poet S. *Sabol and the playwright P. Fedor, lived and published in nearby Subcarpathian Ruthenia. Among the most prolific scholars at the time was N. Beskyd. With the exception of Nevytska, Zubrytsky, and Sabol, most other representatives of the intelligentsia of the Prešov region wrote in Russian and for the most part supported a Russophile national orientation.

The decade of international crises, 1938–48. Following the signing of the *Munich Agreement in September 1938 the state of Czechoslovakia was redrawn and transformed into a federal republic. As a result both Slovakia and Subcarpathian Ruthenia received their long-awaited autonomy. In October the Ukrainians of the Prešov region, now living in an autonomous Slovakia, formed a national council led by parliamentary deputies I. Peshchak and P. Zhydovsky. The council called for greater autonomy for the Prešov region and its eventual incorporation into Subcarpathian Ruthenia. The Subcarpathian autonomous government in Uzhhorod included Peshchak as a state secretary representing the Prešov region.

In early November the Ukrainophile A. *Voloshyn became head of the government of *Carpatho-Ukraine. Voloshyn's government demanded union with the Prešov region, but the local population and their predominantly Russophile leaders now rejected association with what they considered an alien 'Ukrainian' government. On 22 November the national council in Prešov voted against unification with Carpatho-Ukraine. Instead it urged participation in the December elections to the Slovak Diet. The issue of unification soon proved a moot point. On 15 March 1939 Hitler made Bohemia and Moravia protectorates of the Third Reich, Slovakia became an independent state allied to Germany, and Hungary forcibly annexed Carpatho-Ukraine as well as a section of eastern Slovakia that included 36 Ukrainian villages (20,000 people) from the Prešov region.

For the duration of the war most of the Prešov region was under the control of a state governed by Slovaks in Bratislava. The government aimed to Slovakize all aspects of the country and targeted the Ukrainians of the Prešov region, since immediately after the Munich crisis they had expressed a desire to unite with Subcarpathian Ruthenia. The national council was banned, and the activity of the Dukhnovych Society restricted. Ukrainians were allowed

three deputies to the Slovak Diet, and they were expected to support the government's policy. One newspaper was permitted to operate. Only the Greek Catholic church under Bishop Goidych was able to defend the national interests of the Prešov region's Ukrainians; he did so particularly by assuming responsibility for teaching in elementary schools.

The Ukrainians were among the first in Slovakia to organize an underground resistance, the Carpatho-Ruthenian Autonomous Union for National Liberation (Karpatorusskii Avtonomnyi Soiuz Natsionalnogo Osvozhdeniia, or KRASNO). They also received assurances from the underground Slovak National Council that the restored state would be 'a fraternal republic of three equal nations' – Czechs, Slovaks, and Carpatho-Ruthenians. Almost immediately after the withdrawal of German troops village and town councils were formed throughout the Prešov region. On 1 March 1945 their representatives met in Prešov to form the *Ukrainian People's Council of the Prešov Region. That was the first time that the name Ukrainian had been used in the title of an organization in the Prešov region. The People's Council also reiterated the long-standing desire for unification with their Transcarpathian brethren, who had been calling for 'unification with the Soviet Union' since November 1944. That decision worried the Slovak leaders, who urged Ukrainians in the Prešov region to remain within Czechoslovakia. To that end they guaranteed full rights for the Prešov region Ukrainians as a national minority. By May 1945 the Prešov council finally declared its intention to support the new Czechoslovak government headed by the pre-1938 president, E. *Beneš, but only on the condition that political and cultural autonomy be granted. On 26 June 1945 the area of Transcarpathian Ukraine became part of Soviet Ukraine, and the Ukrainians of the Prešov region were left territorially divided from their Transcarpathian brethren.

According to an agreement on population transfers signed in July 1946 between Czechoslovakia and the Soviet Union, Prešov region Ukrainians were given a chance to emigrate to the Ukrainian SSR if they wished to. More than 8,000 local Ukrainians did so, largely for economic reasons. They settled mainly near Rivne in lands abandoned by Volhynian Czechs who had gone to Bohemia.

The Communist party emerged as the strongest political group in postwar Czechoslovakia. In the Prešov region the Communists obtained 45.9 percent of the vote in the open elections of 1946. Communists also dominated the Ukrainian People's Council, which continued to demand that it be recognized as a political body representing Ukrainians. The demand was rejected by the Slovak National Council in 1947, and the rejection highlighted the fact that Ukrainians would have no special autonomous or corporate political status in the restored Czechoslovak republic. The People's Council was more successful in matters of culture: it sponsored the Ukrainian National Theater, a publishing house, an office for schools, a youth organization, and the influential newspaper *Priashkevshchyna* (1945–52). In spite of the People's Council's Ukrainian name, much of its business was conducted in Russian.

1948 to 1968. In 1948 the plurality of Czech political life was replaced by communist domination. Major political and social transformations were then undertaken, three of

which were to have a profound impact on the Ukrainians in the Prešov region: collectivization, de-Catholicization, and Ukrainianization. Those occurred more or less simultaneously between 1949 and 1953. By 1960 an average of only 63 percent of the farmland in the Prešov region was collectivized. The process of de-Catholicization went much more quickly. The Greek Catholic church was liquidated at a church council in Prešov on 28 April 1950, and all 239 former Greek Catholic parishes, as well as 20 Orthodox parishes, were reorganized into the Orthodox eparchies of Prešov and Michalovce within the Russian Orthodox Patriarchate of Moscow. In November 1951 the two Prešov region eparchies became part of the newly created Autocephalous Orthodox church of Czechoslovakia.

The question of national identity was also settled by administrative fiat. Following the Soviet model in Transcarpathia, the regime decided to promote a Ukrainian identity and cultural orientation. Standard Ukrainian was introduced in schools as a subject in 1949. In June 1952 the Slovak Communist party in Bratislava decreed that Ukrainian should be used in all schools of the Prešov region, and the following year it became the language of instruction for all subjects. The local Russophile intelligentsia were compelled to Ukrainianize or lose their positions, and the local population was expected to identify itself as Ukrainian. Most of the new postwar organizations, whether or not they were Russophile in orientation, were liquidated between 1949 and 1952, including the People's Council.

In 1951 a new nonpolitical and acceptably socialist organization was created, the *Cultural Association of Ukrainian Workers (KSUT). It became the dominant representative association for Ukrainians in Czechoslovakia, until it was succeeded in 1990 by the Union of Ruthenian-Ukrainians of Czechoslovakia. The KSUT sponsored a variety of publications, organized lectures throughout the Prešov region, supported (by 1963) 242 local folk ensembles, and sponsored annual drama, sport, and folk festivals, the largest of which has been held annually since 1956 in Svydnyk. The Czechoslovak government also provided funds to establish the *Svydnyk Museum of Ukrainian Culture (1956), a department of Ukrainian language and literature at Šafárik University in Prešov, and the *Duklia Ukrainian Folk Ensemble as part of the Ukrainian National Theater in Prešov.

While the Prešov region's Russophile intelligentsia was adjusting to the new cultural order, some Ukrainian activists from Transcarpathian Ukraine, such as I. *Hryts-Duda and V. *Grendzha-Donsky, helped to fill the gap. Also of importance were Ukrainian scholars from Prague, among them I. *Pankevych and I. and O. *Zilynsky. Former Russophiles from Subcarpathian Ruthenia who were active in the Prešov region's cultural organizations included F. *Ivancho, Y. *Kostiuk, O. Liubymov, and O. *Rudlovchak. Several younger Prešov region intellectuals were sent to Kiev to supplement their Ukrainian education. Since the 1960s the Prešov region has had a growing number of talented native-born Ukrainian leaders. They include belletrists and publicists, such as Yu. *Bacha, V. *Datei, S. *Hostyniak, F. *Lazoryk, I. *Matsynsky, M. *Shmaida, and V. *Zozuliak; the theatrical director I. Ivancho; and scholars, such as the linguists P. Bunganych, V. *Latta, M. *Shtets, the literary historians F. *Kovach and A. Shlepetsky, the historians I. Baitsura, A. Kovach, M.

Rychalka, O. Stavrovsky, and I. Vanat, the ethnographers M. *Mushynka and M. Hyriak, and the musicologist Yu. Tsybora.

Despite the continued and substantial funding by the Czechoslovak government for the cultural development of the Ukrainian minority, considerable assimilation (to the Slovak nationality) has taken place. Some scholars believe the assimilation is the result of the local population's unwillingness to accept a Ukrainian identity seemingly imposed upon it by external forces. The response is most graphically revealed in the census figures (Prešov inhabitants were asked to identify themselves as Rusnak/Russian/Rusyn/Ukrainian or Hungarian/Czech/Slovak) and school statistics. The census data reveal a decline in the number of people who identify themselves as Ukrainians in the 20th century despite a natural increase in their numbers (from 88,010 in 1880 to 111,280 in 1910 and 37,179 in 1980).

The number of schools teaching Ukrainian (including the regional Transcarpathian dialect) declined during the period 1948–66 from 275 to 68 elementary schools, from 41 to 3 municipal schools, and from 4 to 1 gymnasiums. In many cases Slovak instruction replaced Ukrainian.

The Prague Spring and after. During the political thaw under the regime of A. Dubček, Ukrainians began raising the issue of their status within the country. In March 1968 the KSUT called for a national congress to reconstitute the People's Council, and the newspaper *Nove zhyttia* burst forth with a series of articles demanding political, economic, and cultural autonomy for Ukrainians. The discussion regarding territorial autonomy for the Prešov region that was raised in the debate, however, overstepped the bounds that the Party would tolerate, and the proposed national congress was abruptly called off by the authorities. Greater success was realized in religious affairs when the Greek Catholic church was again legalized, in June 1968. It failed, however, to assume its historic role as a unifying force for Ukrainian interests when it became embroiled in disputes with the Orthodox church over property division and with the church's Slovak clergy over language and leadership issues. Other demands centered on the old question of national identity. Meetings, letters, and newspaper articles reflected a popular desire to do away with the 'artificial' Ukrainian orientation of the 'little band of intellectuals' and return to 'our own' schools and cultural leaders. The people were once again officially referred to as Ruthenians – which term had been forbidden since the introduction of Ukrainianization in 1952 – and the proposed national council was to be called the Council of Czechoslovak Ruthenians (*Rada Chekhoslovatskykh Rusyniv*).

The discussions and plans for change were cut short on 21 August 1968 when the invasion of more than half a million Warsaw Pact troops led by the Soviet Union put an end to the Prague Spring. The shock of external intervention was compounded for Ukrainians of the Prešov region by the protracted Catholic-Orthodox religious struggle and an increasingly hostile attitude toward them on the part of the Slovaks, who were openly critical of their political and cultural demands and even accused Ukrainians of collaboration with the Soviets.

In those circumstances Ukrainian villagers often tried to demonstrate their loyalty by demanding Slovak schools. By 1970 there was only one elementary school us-

ing Ukrainian exclusively and 29 with some degree of instruction. That year only 42,146 (out of a potential 130,000 to 140,000) Ukrainians identified themselves as such in the census, in spite of a campaign to do so by the Ukrainian intelligentsia. Beginning in 1970 a policy of 'political consolidation' removed supporters of the Prague Spring from the Communist party. Many also lost their jobs, among them the more vocal leaders in the Prešov region. Supporters were also expelled from the Ukrainian Writers' Union and forbidden to publish for periods of time that in some cases lasted two decades. Nonetheless, belletristic and scholarly books and serial publications have continued to appear, and Ukrainian cultural institutions, such as KSUT, the museum in Svydnyk, and the university department in Prešov, maintain about the same level of activity with even greater financial backing than they had before 1968.

Since the Second World War there have been substantial socioeconomic developments in the Prešov region, with the establishment of a communications system, the building of new roads, and the setting up of several industrial enterprises. The development has drastically changed the region's social structure. By 1970 only 30.1 percent of Ukrainians were engaged in agriculture and forestry, and another 24.3 percent in nonindustrial pursuits (probably related to agriculture) whereas 27 percent worked in industry, 9.9 percent in the building trades, 4.5 percent in stores and restaurants, and 2.9 percent in transport. In spite of such improvements the average income of Ukrainians in 1968 was almost three-fifths of the all-Czechoslovak average. The discrepancy has spurred many young people to emigrate to Slovak cities in the eastern part of the country, or westward to the industrial regions of northern Moravia, where wages are much higher; their migration has caused labor shortages on the farms and turned many Ukrainian villages into little more than havens for older people.

That state of affairs has raised some questions about the future of Ukrainians in the Prešov region as a group. For many years assimilation was staved off by the area's economic backwardness and geographic isolation. Social and economic mobility has now altered the physical base of Ukrainian life and increasingly brought younger Ukrainians into the mainstream of a largely Slovak world. Slovakization is further facilitated by the advent of television that is exclusively in Czech or Slovak, the similarity in language and religion between the two groups, and increasing interethnic marriage in which Slovak becomes the dominant medium of the household.

Czechoslovakia's Velvet Revolution of November 1989 profoundly changed life throughout the country, including the Prešov region. Communist rule came to an end and pluralism was rapidly implemented in political, cultural, religious, and economic affairs. Since that time the Ukrainian intelligentsia of the Prešov region has split into two factions, each with its own organization and publications. Those who eschew the name Ukrainian and insist on calling themselves by the historical name Ruthenian formed the Ruthenian Renaissance society (*Rusynska Obroda*) in March 1990. It began publishing its own newspaper (*Narodny novynky*) and magazine (*Rusyn*) using the local Ruthenian dialect of Ukrainian. Together with the newly created World Congress of Ruthenians (established in March 1991) it promotes the idea that the population of

the Prešov region together with that of the neighboring Lemko region and Transcarpathia comprise a 'distinct fourth' East Slavic nationality. The Oleksander Dukhnovych Theater (formerly the *Prešov Ukrainian National Theater) has joined the Ruthenian Renaissance Society's orientation and now stages plays in the local dialect of Ukrainian. The Union of Ruthenian-Ukrainians of Czechoslovakia (SRUCH), since February 1990 the successor of KSUT, continues to publish in Ukrainian and to favor a Ukrainian self-identification and closer ties with the newly independent Ukraine. The factiousness which effectively splits the Ukrainian minority in the Prešov region has been recognized and supported since 1990 by the Czechoslovak federal and the Slovak republic governments.

Scene from a performance of Ivan Franko's *Ukradene shchastia* (Stolen Happiness) at the Prešov Ukrainian National Theater

Prešov Ukrainian National Theater (Ukrainskyi natsionalnyi teatr). A professional musical-drama *touring theater organized in 1946 for the Ukrainian minority in Czechoslovakia. Also known as the Ukrainian People's

Theater, in 1957 it became a drama theater, and in 1961 a resident theater. Since its first production, of M. Starytsky's *Oi ne khody, Hrytsiu ...* (Don't Go to the Party, Hryts ...) in 1946, the Ukrainian National Theater has staged over 300 plays. Its repertoire spans the works of local Ukrainian authors, classical Ukrainian dramatists, Czech and Slovak authors, and world classical dramatists as well as the works of modern Western, Eastern European, and Soviet dramatists. Yu. Sherehii, V. Bavoliar, Yu. Felbaba, and Ya. Sysak have worked as directors, and M. and T. Symko, Y. and M. Korba, Yu. Yakub, and A. Lutsyk as actors. Since 1985 its artistic director has been I. Ivancho. In 1990 it was renamed the Dukhnovych Theater.

Ukrains'kyi natsional'nyi teatr na sluzhbi narodu (Prešov 1976)

Press, Iryna, b 10 March 1939 in Kharkiv. Champion hurdler and pentathlete. She won Olympic gold medals in the women's 80-m hurdles in 1960 and in the pentathlon (world and Olympic record) in 1964, and set 12 world records in the women's 80-m hurdles. She has lived in Leningrad and Moscow since the late 1950s, and has received a candidate's degree in pedagogy.

Press, Tamara, b 10 May 1937 in Kharkiv. Women's shot put and discus champion. She was the 1958 European discus champion, won Olympic gold medals in the shot put (1960 and 1964) and discus throw (1964), and set a total of 11 world records in the shot put (1959-68) and discus throw (1960-7). She lives in St Petersburg and has received a candidate's degree in pedagogy.

Press. The development of the Ukrainian press is closely connected to that of organized Ukrainian cultural, economic, and nation-building activity and political thought. In general, until the end of the first half of the 19th century in Austrian-ruled Ukraine and 1905 in Russian-ruled Ukraine, conditions were such that a Ukrainian-language press could not freely develop. Ukrainian-language periodicals were established through the efforts of individual Ukrainians, and despite inadequate financing, a limited readership, and constant *censorship and administrative restrictions, they grew in number, content, and circulation, gradually encompassing all facets of national life.

Western Ukraine. The first periodical published in Ukraine was a French-language weekly in Austrian-ruled Lviv, **Gazette de Léopol* (1776). The first daily newspapers were published in Polish in Lviv: *Dziennik patryjotycznych polityków* (1792-3, 1794-8), edited by the Ukrainian Rev M. Harasevych, and *Gazeta Lwowska* (1811-1918), which became a state-owned paper in 1847 and from 1890 carried a Ukrainian-language supplement, **Narodna chasopys*.

During the Revolution of 1848-9, the first Ukrainian-language papers in Western Ukraine - **Zoria halytska* (1848-57), the pro-Polish **Dnewnyk Ruskij* (1848), the Russophile *Novyny* (1849) and **Pchola* (1849), and the Austrian government's **Halycho-ruskii vistnyk* (1849-50) - were founded in Lviv. The first Ukrainian women's periodical, *Lada*, was published in Lviv in 1853 (15 issues).

With the introduction of the 1860 Austrian constitution, the Western Ukrainian press was able to develop much more freely. Between 1862 and 1866 the Galician *populists in Lviv published the journals **Vechernytsi*, **Meta*,

**Nyva*, and **Rusalka*; then they put out **Pravda* (1867–80, 1884, 1888–96), a journal that assumed a national importance, and the semiweekly *Osnova* (1870–2). The *Russophiles also issued their own periodicals, notably the paper **Slovo* (1861–87) in Lviv and the journal **Nauka* (1872–1902) in Kolomyia. Other periodicals also appeared, such as the satirical magazine **Strakhopud* (1863–8, 1872–3, 1880–2, 1886–93), the agricultural-economic papers **Nedilia* (1865–6) and **Hospodar* (1869–72), the women's semi-monthly **Rusalka* (1868–70), the children's magazine **Lastivka* (1869–81), the religious semi-monthly **Ruskii Sion* (1871–83), the student journal **Druh* (1874–7), and the educational gazette **Hazeta shkol'na* (1875–9). Outside Lviv the first Ukrainian-language periodical in Galicia was **Holos narodnyi* (1865–8) in Kolomyia. In Bukovyna the first Ukrainian periodical was the weekly *Bukovynskaia zoria*, published by I. Hlibovyt'sky in Chernivtsi in 1870 (16 issues).

With the imposition of the *Ems Ukase in 1876 in Russian-ruled Ukraine, moderate and conservative Ukrainian-language newspapers in Galicia and Bukovyna – notably **Bat'kivshchyna* (1879–96), **Dilo* (1880–1939), **Svoboda* (1897–1919, 1922–39), **Ruslan* (1897–14), **Narodne slovo* (1907–11), and **Nove slovo* (1912–14) in Lviv, and **Bukovyna* (1885–1918), **Ruska rada* (1898–1908), and **Narodnyi holos* (1909–14) in Chernivtsi – fulfilled the role of 'national' organs. At the same time they were forced to compete with a persistent Russophile press – eg, **Russkaia rada* (1871–1912) in Kolomyia; **Prolom* (1880–2), **Vistnyk Narodnoho doma* (1882–1924), *Novyi prolom* (1883–7), *Chervonaia Rus'* (1888–91), **Russkoe slovo* (1890–1914), **Halytskaia Rus'* (1891–2), **Halychanyin* (1893–1913), **Zhivaia mysl'* (1902–5), **Prikarpatskaia Rus'* (1909–15, 1918–20), and *Holos naroda* (1909–14) in Lviv; **Russka pravda* (1888–92) in Vienna; and **Pravoslavnaiia Bukovina* (1893–1905), *Bukovynski vidomosti* (1895–1909), **Pravoslavnaiia Rus'* (1909–10), and **Russkaia pravda* (1910–14) in Chernivtsi. In Hungarian-ruled Transcarpathia the press either was Russophile – eg, **Karpat* (1873–86) and **Listok* (1885–1903) in Uzhhorod – or reflected a regional identity using the Transcarpathian dialect – eg, **Nauka* (1897–1914) in Uzhhorod and *Nedilia* (1898–1918) in Budapest.

In the late 1870s, under the influence of M. *Drahomanov's ideas, the Galician populists split into moderates and socialists, and the first Ukrainian socialist miscellanies – I. Franko and M. Pavlyk's **Hromads'kyi druh*, **Dzvin*, and **Molot* in Lviv in 1878, and Drahomanov's influential **Hromada* (1878–82) in Geneva – were published. Franko edited the first socialist monthly, **S'vit* (1881–2), but it was only after the creation of the *Ukrainian Radical party (URP) in 1890 that a truly viable Ukrainian radical and socialist press appeared in Galicia and Bukovyna: the URP organs **Narod* (1890–5), **Hromads'kyi holos* (1892–1939), **Khliborob* (1891–5), **Radykal* (1895–6), *Narodna sprava* (1907–10), and **Hromadianyn* (1909–11), and the *Ukrainian Social Democratic party (USDP) organs **Volia* (1900–7), **Zemlia i volia* (1906–13, 1919–20, 1922–4), **Chervoniy prapor* (1906–7), *Borba* (1908–14), **Nash holos* (1910–11), and **Vpered* (1911–13, 1918–24). In addition, organs of the underground *Revolutionary Ukrainian party and *Ukrainian Social Democratic Workers' party (USDRP) in Russian-ruled Ukraine – **Haslo* (1902–3), **Pratsia* (1904–6), **Selianyn* (1903–6), **Pratsia* (1909–10), **Robitnyk* (1910), and **Nash holos* (1910–11) – were printed in Chernivtsi or Lviv and smuggled into Russian-ruled Ukraine.

The first Ukrainian-language academic periodicals were published in Lviv: the Halytsko-Ruska Matytsia society's *Naukovyi zbornyk* (1865–8) and the Shevchenko Scientific Society's (NTSh) **Zapysky Naukovoho tovarystva im. Shevchenka* (est 1892) and **Chasopys pravnycha* (1889–1906, 1912). The first major Ukrainian literary-cultural and scholarly journals were also published there: the NTSh's **Zoria* (1880–97), which became a pan-Ukrainian literary forum in the 1890s, and I. Franko's more radical **Zhytie i slovo* (1894–7). The latter two journals ceased publication to allow M. Hrushevsky to establish **Literaturno-naukovyi vistnyk*, a journal published in Lviv (1898–1906), then in Kiev (1907–14), and again in Lviv (1922–32) that until 1919 played a seminal role in the development of Ukrainian literature. Also published in Lviv were the pedagogical periodicals *Uchytel'* (1889–1914) and *Nasha shkola* (1909–14, 1916–18); the modernist journals **Ruska khata* (1905–6), **S'vit* (1906–7), and *Buduchyna* (1909–10); the first Ukrainian arts magazine, *Artystychnyi vistnyk* (1905–7); the progressive women's paper **Meta* (1908); the legal journal **Pravnychiy vistnyk* (1910–13); the first Ukrainian sports papers, *Sokol's'ki visty* (1909–10) and **Visty z Zaporozha* (1910–14); the first Ukrainian-language medical journal, **Zdorovlie* (1912–14); and the popular cultural magazine **Iliustrovana Ukraina* (1913–14). Many other periodicals were also published (see *Agricultural periodicals, *Children's magazines, *Economic press, *Humoristic and satiric press, *Legal press, *Pedagogical periodicals, *Religious press, *Student press, and *Women's press).

Russian-ruled Ukraine. The first periodicals in Russian-ruled Ukraine were published in Russian in the cultural and academic center, Kharkiv: the weekly magazine *Khar'kovskii ezhenedel'nik* (1812), the cultural-cum-scholarly journals **Ukrainskii vestnik* (1816–19) and **Ukrainskii zhurnal* (1824–5), the satirical magazine **Khar'kovskii Demokrit* (1816), the agricultural magazine **Ukrainskii domovod* (1817), and the weekly newspaper **Khar'kovskie izvestiia* (1817–23). Others appeared in French and Russian in Odessa: the biweekly newspapers *Messenger de la Russie méridionale* (1820) and *Vestnik Iuzhnoi Rossii* (1821), the semiweekly paper *Journal d'Odessa* (1824–81), and the semiweekly (from 1864 daily) **Odesskii vestnik* (1827–94).

Elsewhere in Russian-ruled Ukraine, it took nearly two decades for the first periodicals to appear. In Kiev the first was the contract-fair paper *Kievskie ob'iavlennia* (1835–8). From 1838 official Russian-language newspapers titled *Gubernskie vedomosti* were published weekly and later more often (eg, daily in Kharkiv from 1874) in every gubernial capital.

Although some Ukrainian prose and poetry appeared in the Kharkiv periodicals in 1817, thereafter the publication of Ukrainian-language belles lettres was limited to nonserial miscellanies (see *Almanacs). Nearly half a century passed before Ukrainian materials reappeared in a periodical published in the Russian Empire – the literary and scholarly monthly **Osnova* (1861–2) in St Petersburg. Despite its brevity *Osnova* had a decisive impact on the development of a Ukrainian national consciousness in both the Russian and the Austrian empires. After its suppression the only periodical to publish material in the Ukrainian language in the Russian Empire was L. Hlibov's briefly published weekly, **Chernigovskii listok* (Chernihiv, 1861–3). The first Ukrainian newspaper – in spirit though not in language – was **Kievskii telegraf* (1859–76), the unofficial organ of the *Hromada of Kiev. Repeatedly denounced by

the Russian tsarist paper **Kievlianin* (1864–1919), it was shut down in 1876, the year that the **Ems Ukase* forbade all printing in Ukrainian in the Russian Empire. During the next three decades the journal **Kievskaiia starina* (1882–1907) was the only periodical promoting Ukrainian culture and Ukrainian studies in Russian-ruled Ukraine.

From the 1860s on, *Eparkhial'nye vedomosti*, official newspapers of the Russian Orthodox church, were published semimonthly and later more frequently in every eparchial see. No legal newspapers in Russian-ruled Ukraine – including dailies founded in Kiev, Mykolaiv, Kharkiv, Katerynoslav, Odessa, Zhytomyr, Kamianets-Podil'skyi, and Yelysavethrad from the 1860s on – were allowed to print independent political accounts and editorials; instead they reprinted news provided by the official St Petersburg press.

Scholars and scientists were able to contribute to Russian-language academic periodicals published in Ukraine, including the Imperial Agricultural Society of Southern Russia's *Zapiski* (est 1832), **Zapiski Imperatorskogo Odesskogo obshchestva istorii i drevnostei* (est 1844), and **Zapiski Imperatorskogo Novorossiiskogo universiteta* (est 1853) in Odessa; **Trudy Kievskoi dukhovnoi akademii* (est 1860) and *Kievskie universitetskie izvestiia* (est 1861) in Kiev; the *Zapiski* published by branches of the Imperial Russian Technical Society in Kiev (from 1871), Kharkiv (from 1881), and Odessa (from 1885); and **Zapiski Imperatorskogo Khar'kovskogo universiteta* (est 1874) in Kharkiv.

During the Russian Revolution of 1905–6, restrictions and censorship were relaxed, and the Ukrainian-language press flourished. The first periodical to appear was the newspaper **Khlitorob* in Lubni, five issues of which were published briefly in 1905 before it was shut down. Many periodicals were published in Kiev, among them the influential dailies **Hromads'ka dumka* (1905–6) and **Rada* (1906–14); the literary monthlies **Nova hromada* (1906), **Ukrains'ka khata* (1909–14), **Dzvin* (1913–14), and **Siaivo* (1913–14); the satirical weekly **Shershen'* (1906); the children's magazine **Moloda Ukraina* (1908–12, 1914); the weekly papers **Slovo* (1907–9), *Selo* (1909–11), **Zasiv* (1911–12), and **Maiak* (1913–14); the scholarly **Zapysky Ukrain's'koho naukovohto tovarystva u Kyievi* (1908–13); the pedagogical monthly **Svitlo* (1910–14); and the semimonthly co-operative magazine *Nasha kooperatsiia* (1913–14). Thirty-odd Ukrainian-language periodicals were published elsewhere. Notable were the weekly **Ridnyi krai* (1905–12, 1914–16) in Poltava, Kiev, and Hadiache; the farmers' weekly **Svitova zirnytsia* (1906–13) in Mohyliv-Podil'skyi, Penkivka (Podilia gubernia), and Kiev; the beekeeping magazine *Ukrains'ke bzhil'nytstvo* (1906–10) in St Petersburg and Kiev; the illustrated semimonthly **Dniprovi khvyli* (1910–13) in Katerynoslav; and the weekly **Snip* (1912–13) in Kharkiv. Plagued with financial difficulties and subjected to official bans, restrictions, and new strict censorship laws, most periodicals were short-lived.

Outside Ukraine to 1914. The first Ukrainian-language periodicals outside Ukraine were published in Vienna by the Austrian government – **Vistnyk* (1850–66), *Vistnyk zakonov derzhavnykh i pravytel'stva* (1854–8), and *Vistnyk zakonov derzhavnykh dlia korolevstvo i kraev ...* (1872–1916). At the turn of the 20th century, Ukrainians published in Vienna two German-language periodicals – **Ruthenische Revue* (1903–5) and **Ukrainische Rundschau* (1905–15) – to inform the Western public about the Ukrainian question.

The first periodical to serve Transcarpathia's Ruthenians was a religious weekly published in Budapest, **Tserkovnaia gazeta* (1856–8). Later another weekly, *Nedilia* (1898–1918), was published there.

In the Russian Empire, after the aforementioned *Osnova* (1861–2), the first Ukrainian-language periodicals outside Ukraine, **Ukrainskii vestnik* (1906), *Nasha Duma* (1907), and **Ridna sprava – Dums'ki visty* (1907), were published in St Petersburg as the organs of the Ukrainian caucus in the Russian State Duma. The USDRP monthly **Vil'na Ukraina* (1906) was also published there. A short-lived weekly, **Zoria* (1906), and an influential Russian-language monthly dealing with Ukraine, **Ukrainskaia zhizn'* (1912–17), were published in Moscow.

The immigrant press in the New World. Overseas the first wave of immigrants from Western Ukraine established their own periodicals. In the United States the first Ukrainian newspaper, **Ameryka* (1886–90), was published in Shenandoah, Pennsylvania. The first major paper, the Ruthenian (now Ukrainian) National Association's **Svoboda*, was founded in New York City in 1893 and has remained the most important Ukrainian newspaper in the United States. Other papers were founded in the 1900s and 1910s, among them the still extant **Narodna volia* (est 1911) in Olyphant, Pennsylvania (now in Scranton), and **Ameryka* (est 1912) in New Britain, Connecticut (now in Philadelphia).

In Canada the first Ukrainian newspaper, **Kanadiiskyi farmer*, supported by the Canadian Liberal party, was founded in Winnipeg in 1903. It was followed by a similar but short-lived paper, *Slovo* (1904–5), supported by the Conservative party. A still-extant weekly, **Ukrains'kyi holos*, was founded in Winnipeg in 1910. Many other newspapers with differing political and religious views were published in the United States and Canada between 1907 and 1914 and in the interwar years. The first Ukrainian newspaper in Brazil, **Zoria*, was published in Curitiba in 1907–10.

TABLE 1
Newspapers published in Ukrainian in selected years, 1848–1913

| | 1848 | 1861 | 1881 | 1890 | 1900 | 1906 | 1913 |
|------------------------|------|------|------|------|------|------|------|
| Within Russian Empire | – | 1 | – | 1 | 1 | 17 | 19 |
| Outside Russian Empire | 2 | 3 | 28 | 32 | 39 | 80 | 122 |
| Total | 2 | 4 | 28 | 33 | 40 | 97 | 141 |

In 1913, 141 Ukrainian-language periodicals were published throughout the world. Only 19 of them were in the Russian Empire, as compared to 234 periodicals in Polish, 13 in Yiddish, and 21 in Armenian. At the same time, in Russian-ruled Ukraine 226 Russian periodicals were published. Eighty Ukrainian periodicals were published in Austria-Hungary: 66 in Galicia, 8 in Bukovyna, 2 in Transcarpathia, and 4 in Vienna or Budapest. Although publications of the Ukrainian press at home and abroad grew in number, there was not often a corresponding rise in quality. Of the newspapers published there were only three dailies and very few weeklies, and their editors for the most part lacked professional training. Most periodicals were financially unstable: few had private benefactors,

none had state or municipal subsidies, and all had little advertising revenue and a limited readership.

1914–17. The First World War was catastrophic for the Ukrainian press. The tsarist authorities banned and closed down most Ukrainian-language periodicals the day after Russia entered the war, and on 3 January 1915 all Ukrainian publications were prohibited within the Kiev Military District. Only *Ridnyi krai*, published in 1915–16 in Hadiach by O. Pchilka, was allowed to appear in the *yaryzhka alphabet. The literary monthly **Osnova*, published by A. Nikovsky in Odessa in 1915, was shut down after three issues, and other periodicals in Russian-ruled Ukraine that began legal publication in 1915 and 1916 met with the same fate. The only surviving sanctioned Ukrainophile organ in the Russian Empire was *Ukrainskaia zhizn'* in Moscow. In these circumstances only clandestine publications, such as *Borot'ba* of the *Ukrainian Party of Socialist Revolutionaries (UPSR) and the Ukrainian Radical Democratic Association's *Vil'na dumka*, were circulated secretly in Kiev in 1915.

During the Russian military occupation of Galicia and Bukovyna, all Ukrainian publications there were closed down and banned, and only Russophile and Polish ones were allowed. Following the Russian retreat from Lviv in June 1915, however, the Western Ukrainian press was revived (eg, the new paper **Ukrains'ke slovo* [1915–18] and **Shliakhy* [1913–18], which became an organ of the Ukrainian Sich Riflemen). Propaganda promoting the Ukrainian cause was disseminated in newspapers published by the Austrian government for Ukrainian soldiers serving in the Austrian army in **Vidrodzhennia Ukraïny* (1918), and for Ukrainian soldiers interned by the Russian army in Austrian POW camps in the Russian-language *Nedelia* (1916–18). The newspapers *Dilo*, *Svoboda*, and *Bukovyna* were published in Vienna during the war. There they played an important part in Ukrainian journalism, as did the separatist newspaper **Vistnyk Soiuzu vyzvolennia Ukraïny* (1914–18) of the *Union for the Liberation of Ukraine (SVU). The SVU also published **Ukrainische Nachrichten* (1914–18) in Vienna and *La Revue ukrainienne* (1915, 1917) in Lausanne, and it laid the groundwork for newspapers published in POW camps holding Ukrainians in Austria and Germany, such as **Prosvitnyi lystok* (1915–16) and *Hromads'ka dumka* (1917–18) in Wetzlar, *Rozvaha* (1915–18) in Freistadt, **Rozsvit* (1916–18) in Rastatt, and **Vil'ne slovo* (1916–18) and *Selianyn* in Salzwedel.

A few other Ukrainian periodicals were published in other languages to disseminate information about Ukraine and the Ukrainian cause: the General (later Supreme) Ukrainian Council's **Ukrainische Korrespondenz* (1914–18) in Vienna, the monthly *L'Ukraine* (1915–20) in Lausanne, and the government-sponsored *Negyilya* and **Ukránia* (1916–17) in Budapest.

1917–20. The February Revolution in Russia, the collapse of Austria-Hungary, and the establishment of Ukrainian statehood created favorable conditions for the development of the Ukrainian press. Several partisan dailies came into being in Kiev in March and April 1917, notably **Nova rada* (1917–19), **Robitnycha hazeta* (1917–19), **Narodnia volia* (1917–19), and **Borot'ba* (1917–20). Later the dailies *Hromads'ke slovo* (1917) and *Promin'* (1917), the nonpartisan daily **Vidrodzhennia* (1918), and the semi-official organ of the UNR Directory **Trybuna* (1918–19) appeared, as well as *Trudova respublika* (1918) and many

other Ukrainian, Russian, Jewish, and Polish newspapers.

Ukrainian newspapers published in gubernial and county centers in 1917 and 1918 were also predominantly partisan, a reflection of the political division of Ukrainian society. Thus, for example, the USDRP published *Robitnyk* in Kharkiv, *Holos robitnyka* and *Nasha sprava* in Katerynoslav, *Vil'nyi holos* in Poltava, and *Borot'ba* in Kamianets-Podilskyi; the UPSR published *Rukh* in Kharkiv, *Sotsialist-revoliutsioner* in Poltava, and *Zemlia i volia* in Katerynoslav; the Union of Autonomists-Federalists published *Vil'na Ukraïna* in Uman; and the Ukrainian Party of Socialists-Independents published *Samostiinyk* in Kiev and, later, the daily *Ukraïna*. The Peasant Union, Prosvita societies, co-operative associations, and gubernial people's councils (former zemstvos) also published a great number of newspapers.

In Kiev new literary, scholarly, and art journals appeared: **Knyhar* (1917–20), **Teatral'ni visty* (1917), the revived *Literaturno-naukovyi vistnyk* (1917–19, transferred from Moscow to Kiev in 1918), *Universal'nyi zhurnal* (1918), **Nashe mynule* (1918–19), **Mystetstvo* (1919–20), **Muzahet* (1919), and the satirical *Gedz'*, *Rep'iakhy*, and *Budiak*.

Specialized and professional periodicals also appeared, most of them in Kiev: eg, in education, *Vil'na ukrains'ka shkola*, *Osvita* (Kamianets-Podilskyi), and *Nova shkola* (Poltava); for children, *Sterno*, *Kamienar*, *Voloshky*, and *Iunak* (Pereiaslav); for women, *Zhinochyi vistnyk*; the military periodical *Ukrains'ka viis'kova sprava*; the medical semi-monthly *Ukrains'ki medychni visty*; the legal journal **Zakon i pravo*; and the Zemstvo Union's organ *Vistnyk hromads'koi agronomii*.

A number of official publications appeared in Kiev under the Central Rada, the Hetman government, and the UNR Directory: **Visty z Ukrains'koi Tsentral'noi Rady*, **Vistnyk Heneral'noho Sekretariatu Ukrains'koi Narodnoi Respubliky*, and bulletins of various government ministries, bureaus, and trade unions. Under the Hetman government, the monthly **Viis'kovo-naukovyi vistnyk Heneral'noho shtabu* was published. After the Directory abandoned Kiev, some of its publications came out in Vinnytsia and Kamianets-Podilskyi, and new newspapers also sprang up there, eg, **Nova Ukraïna*, **Respublikans'ki visty*, **Zhyttia Podillia*, *Trudova Ukraïna*, *Trudovyi shliakh*, **Nash shliakh*, and *Slovo*.

In the 1918–19 Western Ukrainian National Republic, 59 Ukrainian-language periodicals were published. After the Polish occupation of Lviv in November 1918, a new daily, *Ukrains'kyi holos*, appeared in Ternopil as the organ of the State Secretariat. The Ukrainian-held city of Stanyславiv (today Ivano-Frankivske) served as the main center of Ukrainian publishing, however. Published there were *Svoboda* (moved from Lviv as the organ of the National Committee), **Narod*, **Republika*, **Nove zhyttia*, *Volia*, *Republikanets'*, and nine other papers. Other weekly and less frequent papers were published in county centers.

Over 20 Bolshevik Russian-language newspapers were published in Ukraine in 1917–18. The most important were *Donetskii proletarii*, *Proletarii*, and *Kommunist* in Kharkiv; *Proletarskaia mysl'* in Kiev; *Odesskii kommunist* in Odessa; and *Zvezda* in Katerynoslav. The only Bolshevik paper published in Ukrainian at that time was *Vistnyk Ukrains'koi Narodnoi Respubliky* (Kharkiv and Kiev, Janu-

ary–March 1918), the organ of the Central Executive Committee of the All-Ukrainian Soviet of Workers', Soldiers', and Peasants' Deputies.

Ukrainian newspapers were also published in 1917 and 1918 in other parts of the Russian Empire: **Promin'* (1916–17) in Moscow, *Ukraïns'ki visty Zakaŭkazu* and *Ukraïns'ka Narodnia Respublika* in Tbilisi, *Ukraïns'ka amurs'ka sprava* in Blagoveshchensk, *Zasiv* in Harbin, *Ukraïnets' na Zelenomu Klyni* in Vladivostok, *Khvyliia Ukraïny* in Khabarovsk, *Ukraïnets' na Sybiri* in Omsk, *Chornomorets'* in Katerynodar, *Ukraïns'kyi holos* in Riga, *Pratsia i volia* in Voronezh, and *Chornomors'ka rada* and *Chornomors'kyi Ukraïnets'* in Novorossiisk.

The growth of the Ukrainian press during the 1917–20 struggle for independence was much greater than that of education, scholarship, or even book publishing. Although only 10 Ukrainian-language periodicals had appeared in Russian-ruled Ukraine in 1916, after the February Revolution of 1917 there were 106. By 1918 their number had reached a maximum of 218, and then it dropped to 173 in 1919 and 79 in 1920. Despite paper shortages, newspapers were printed in large quantities. The chaos in transportation and communications provided the impetus for establishing numerous newspapers and journals in the provinces. From 1917 until 1919 most periodicals appeared fairly regularly. In 1919, however, because of the Ukrainian-Soviet and Ukrainian-Polish wars, they were often forced to change location and to suspend publication. Although functioning primarily as a source of information, the Ukrainian press of this period was also an important factor in the formation of political opinion, particularly in the countryside, where there was a shortage of books and schools.

The UNR Ministry of Propaganda, the State Press Bureau, and the Ukrainian Telegraph Agency, the latter two of which were established in May 1918 by the Hetman government and headed by D. Dontsov (by V. Kalynovych under the UNR Directory), played an important part in the development of the press. The Hetman government's Ministry of International Affairs published a weekly bulletin on the foreign press, *Vistnyk zakordonnoi presy*, in Kiev in 1918. Ukrainian *press and information bureaus were active abroad in 1918–20. They were attached to the Ukrainian legations in Berlin, Paris, London, Rome, Washington, Prague, Copenhagen, and Vienna and published information bulletins. The Ukrainian governments also sponsored foreign-language journals, such as *Die *Ukraine* in Berlin (1918–26), **Ukrainische Blätter* in Vienna (1918), *L'Ukraine* in Lausanne (1919), *France et Ukraine* in Paris (1920), *La Voce dell Ukraina* in Rome (1919), and newspapers published in Greek in Athens and in Bulgarian in Sofia (1919–20).

Soviet Ukraine, 1919–41. The first major Bolshevik dailies in Ukrainian were **Bil'shovyk* (1919–25) in Kiev, **Visti VUTsVK* (1920–34) in Kharkiv and Kiev (1934–41), and *Selians'ka bidnota* (est 1920) in Kharkiv. Important communist newspapers and journals were **Visti TsK Komunistychnoi partii (bil'shovykiv) Ukraïny* (est 1921) in Kharkiv and, in Russian, *Kommunist* (est 1918 in Moscow and published in Kharkiv from 1919), the CC CP(B)U journal *Kommunist* (1920–1), and *Proletarskaia pravda* (1917–24) and *Kievskii proletarii* (1920–31) in Kiev. Upon establishing their control over Ukraine the Bolsheviks gradually discontinued all noncommunist publications in 1919–20. A

temporary respite was granted only to their allies, the *Borotbists and *Ukrainian Communist party, who were allowed to continue publishing their organs *Borot'ba* and *Trudove zhyttia* in Kiev, *Chervonyi prapor* (1919–24) in Kiev and later Kharkiv, and *Chervonyi shliakh* in Kamianets-Podilskyi. In 1920, of 151 periodicals published in Soviet Ukraine, only 82 were in Ukrainian. By 1922 there were no noncommunist periodicals in Ukraine, and only 69 Ukrainian-language publications.

With the introduction of the policy of *Ukrainization in 1923, a new stage began in the development of the Ukrainian press. For the first time in Ukrainian history, the majority of newspapers and journals in Ukraine, even outside Kiev and Kharkiv (eg, in Odessa and Katerynoslav), were published in Ukrainian. The number of periodicals increased significantly. The literary rather than political press played the leading role in Soviet Ukrainian intellectual life, after V. Blakytny, the editor in chief of *Visti VUTsVK*, introduced the supplement *Kul'tura i pobut* and published therein M. Khvylovy's polemics on literature and culture, and the major literary-political monthly **Chervonyi shliakh* (1923–36) was begun in Kharkiv.

The Soviet Ukrainian political press was controlled by Moscow, and served primarily as a tool of Party propaganda, often criticizing and condemning the literary journals for their 'nationalist deviations.' The newspapers of this period with the largest circulation were the republican dailies *Kommunist* (published in Ukrainian from 1926) and *Visti VUTsVK*. Other major dailies were **Proletars'ka pravda* (1924–43) and *Kievskii proletarii* (1925–31) in Kiev, *Kharkovskii proletarii* (1924–30) in Kharkiv, *Izvestiia* (1920–9) and **Chornomors'ka komuna* (est 1929) in Odessa, the republican Komsomol paper *Komsomolets' Ukraïny* (1925–43), the republican trade-union papers **Proletarii* (1923–35) and **Robitnycha hazeta Proletar* (1926–32), *Diktatura truda* (1920–32) in Staline (now Donetsk), *Zvezda* (1917–29) in Dnipropetrovske, and the organs of the Ukrainian Military District *Chervona Armiia* (1926–38) and *Oborona*. Newspapers for the peasants, with their own distinctive character, appeared during this period, eg, **Selians'ka pravda* (1921–5) and **Radians'ke selo* (1924–32). In general the Soviet Ukrainian newspapers of this time were not yet carbon copies of their Russian counterparts. They devoted attention to Ukrainian topics and issues in both Soviet and Western Ukraine; their focus, however, was usually determined by the Party line.

Party control over the *literary and art journals was also quite firm, but not complete. Even *Chervonyi shliakh* sometimes published veiled critiques of the regime. A new major literary monthly, **Zhyttia i revoliutsiia* (1925–33) in Kiev, was less communist in orientation and solicited contributions from various writers' groups, including *MARS and the *Neoclassicists. It also devoted much attention to the promotion of Ukrainian traditions and cultural ties with the West. Another seminal journal was the bimonthly **Vaplite* (1926–7), published by M. Khvylovy's coterie. After it was forced by the Party to close in 1927, direct criticism of the Party and of Soviet life was no longer possible; and the contributors to *Vaplite's* successor, the innovative monthly **Literaturnyi iarmarok* (1928–30), employed Aesopian language to express their anti-Stalinist views.

Other important literary journals published during the Ukrainization period were: in Kharkiv, the Futurists' *Gong komunkul'ta* (1924) and **Nova generatsiia* (1927–30),

the Pluh association's *Pluzhanyin* (1925–7) and **Pluh* (1925–33), the Sovietophile Western Ukrainian émigré writers' **Zakhidna Ukraina* (1927–33), the journal of the All-Ukrainian Association of Proletarian Writers (VUSPP) **Hart* (1927–32), the Proletfront group's **Proletfront* (1930), and the popular **Universal'nyi zhurnal* (1928–9); in Kiev, the Komsomol journal **Molodniak* (1927–37) and the popular semimonthly **Nova hromada* (1923–33); in Odessa, **Shkval* (1924–33) and *Metalevi dni* (1930–3); in Dnipropetrovske, **Zoria* (1925–34); and in Artemivske and then Luhanske, **Zaboi* (1923–32).

There were a few periodicals devoted exclusively to literary criticism and literature studies. They included the bibliographical journals *Knyha* (1923–4) and **Nova knyha* (1924–5), the scholarly bimonthly **Literaturnyi arkhiv* (1930–1), and the Marxist journal *Krytyka* (1928–32), renamed *Za markso-lenins'ku krytyku* (1932–5) and **Literaturna krytyka* (1935–40).

Ukrainian scholarly and scientific periodicals flourished in the 1920s and early 1930s. Most were published by the All-Ukrainian **Academy of Sciences* in Kiev, including the journal of Ukrainian studies **Ukraina* (1924–33), edited by M. Hrushevsky. New periodicals in the arts were published in the 1920s and 1930s: **Shliakhy mystetstva* (1921–3), **Nove mystetstvo* (1925–8), **Radians'ke mystetstvo* (1928–32), **Mystets'ka trybuna* (1930–1), and *Maliarstvo i skul'ptura* (1935–9), renamed **Obrazotvorche mystetstvo* (1939–41). New **music journals* were also published, as were theater periodicals, such as *Teatr–Muzyka–Kino* (1925–7), *Sil's'kyi teatr* (1926–30), renamed **Masovyi teatr* (1931–3), and *Radians'kyi teatr* (1929–31), and film periodicals, such as **Kino* (1925–33) and *Radians'ke kino* (1935–8).

Popular illustrated magazines in this period were **Hlobus* (1923–35), **Znannia* (1923–35), **Vsesvit* (1925–34), *Dekada* (est 1930, merged with *Vsesvit* in 1933), the atheist **Bezvirnyk* (1925–35), *Molodyi bil'shovyk* (1925–33), *Selians'kyi zhurnal* (1929–31), and, for women, *Komunarka Ukrainy* (1920–34) and *Selianka Ukrainy* (1924–31), renamed **Kolhospnytsia Ukrainy* (1931–41). There were numerous publications for children in the 1920s and 1930s. Among the more important were **Chervoni kvity* (1923–31), *Bil'shovycheniata* (1924–31), *Oktiabr'skie vskhody* (1924–30), **Tuk-tuk* (1929–35), **Pioneriia* (1931–41), **Vesela bryhada* (1931–7), **Zhovtenia* (1928–41), and, for 'activist children,' *Na roboti* (1930–3). Among satirical magazines the semimonthly **Chervonyi perets'* (1927–34) was notable.

During the Stalinist terror of the 1930s most Ukrainian scholarly and literary periodicals were abolished. Scholarly institutions and editorial staffs were thoroughly purged in the early 1930s, and trusted Party members – usually nonprofessional dilettantes in journalism and literature – were appointed chief editors. Nearly all non-newspaper periodical publications in Soviet Ukraine were discontinued in 1933–4, and Ukrainian magazines published elsewhere in the USSR (eg, *Chervona hazeta* in Rostov, *Novym shliakhom* in Krasnodar, and *Sotsialistychna perebudova* in the Far East) were closed down.

The mid-1930s marked the beginning of the total centralization of the press. An extensive network of raion newspapers, factory and plant broadsheets, and organs of political departments of machine-tractor stations and state farms was established. By 1940 there were 1,672 newspapers with a combined single pressrun of 6.9 mil-

lion copies. Because of strict censorship, however, they provided little information about what was really happening in Ukraine or abroad. Instead they served as propaganda tools aimed at increasing labor productivity and fostering a love for Russia, Stalin, and the Party. Most newspapers were one-page sheets; 85 percent of them were printed in Ukrainian in 1930, 84.9 percent in 1933, and 80 percent in 1934, as compared to 10 percent printed in Russian in 1933, 15.8 percent in 1934, and over 22 percent in 1940. *Komunist* and *Visti* had the largest circulations, approx 305,000 and 375,000 respectively. More than 50 newspapers were published in each of Kiev, Kharkiv, and Odessa.

The Ukrainization policy was abandoned during the terror, and **Russification* of the press ensued; it affected not only Ukrainian periodicals but also those in Polish, Yiddish, Bulgarian, and Greek, most of which were suspended. By 1938 the number of Russian-language newspapers and magazines in Ukraine had increased substantially. A new republican newspaper, *Sovetskaia Ukraina* (now *Pravda Ukrainy*), and new oblast dailies in Russian were introduced.

After the Soviet occupation of Galicia, Volhynia (1939), and Bukovyna (1940) all existing Ukrainian periodicals there were closed down. New Soviet periodicals were introduced, eg, the daily **Vil'na Ukraina* (est 1939) and the magazine *Literatura i mystetstvo* (1940–1) in Lviv, the daily **Radians'ka Bukovyna* (est 1940) in Chernivtsi, and 15 oblast and 49 raion newspapers.

Western Ukraine, 1918–39. In Polish-occupied Lviv the authorities prohibited the revival of *Dilo*. The publisher circumvented the ban by bringing out the paper under the titles *Ukrains'ka dumka*, *Hromads'ka dumka*, *Ukrains'kyi vistnyk*, *Hromads'kyi vistnyk*, and *Svoboda* until 1923, when permission to publish *Dilo* was granted. It remained the leading Ukrainian daily in interwar Western Ukraine.

Under Polish rule Ukrainian periodicals were plagued by official prohibitions, strict censorship, confiscations of entire pressruns, the imposition of strict fines on and the imprisonment of editors, and financial instability. Conditions were particularly difficult for periodicals published in Volhynia, the Kholm region, Polisia, and Podlachia, which were artificially separated from Galicia by the so-called Sokal border. In 1930 new censorship regulations effectively abolished freedom of speech in those regions. Nonetheless many periodicals did appear. Newspapers published in Lutske, the primary publications center, included *Ukrains'ke zhyttia* (1922–4); **Selians'ka dolia* (1923–4) and *Nash shliakh* (1924–5), organs of the Ukrainian Social Democratic Club in the Polish Sejm; **Hromada* (1924–6) and **Ukrains'ka hromada* (1926–9), organs of the **Ukrainian National Democratic Alliance* (UNDO); and the pro-UNDO **Volyns'ka nedilia* (1928–34) and *Nova doba* (1936). Another pro-UNDO paper, **Narid* (1926–8), was published in Warsaw and distributed in Volhynia. Several Sovietophile, pro-communist papers were published in Kholm, among them **Nashe zhyttia* (1920, 1922–8), **Nove zhyttia* (1928–30), and **Selians'kyi shliakh* (1927–8). The weekly **Nove selo* (1930–9) was published in Lviv but distributed primarily in Volhynia. Papers subsidized by and supportive of the Polish government and its policies included *Dosvitnia zoria* (1923–7) in Volodymyr-Volynskyi; *Dzvin* (1923–7) in Rivne; **Ukrains'ka nyva*, originally published

in Warsaw (1926–8) and then moved to Lutske (1929–36); and *Volyns'ke slovo* (1937–9) in Lutske.

One of the first magazines published in Volhynia was the Orthodox semimonthly **Pravoslavna Volyn'* (1922) in Kremianets. Most magazines were published in Lutske, eg, the agricultural-cum-civic semimonthly **Sil's'kyi svit* (1929–31) and monthlies *Nova skyba* (1933–5) and *Ridnyi kolos* (1933–9), the popular Orthodox monthlies *Za sobornist'* (1932–5) and **Shliakh* (1937–9), and the Sel-Rob monthly *Postup* (1929–30). Orthodox magazines – **Na varti* (1924–6), *Ridna tserkva* (1927–8), and *Dukhovnyi siiach* (1928–31) – were published by the Orthodox Consistory in Volodymyr-Volynskyy. Another, **Tserkva i narid* (1935–8), was published in Kremianets. Other popular Orthodox bi-weeklies, *Dukhovna besida* (1924–5) and *Nasha besida* (1926–7), were published in Warsaw and distributed in Volhynia, as was the illustrated weekly **Nash svit* (1924–5), later published in Lutske (1935–6). The children's semimonthly *Sonechko* (1936–9) was published in Rivne.

Conditions were more favorable, although also constrained, in Galicia. All Ukrainian political parties there had their own organs. The USDP revived *Vpered* (1918–24), which served as a national newspaper while *Dilo* was banned and was later itself banned, and *Zemlia i volia* (1919–20, 1922–4). It also published the semimonthly *Sotsialistychna dumka* (1921–4), the monthly *Nova kul'tura* (1923–4), and the semimonthly **Svit* (1925–9). The UNDO continued publishing the weekly *Svoboda* until 1939. It was supported by the journal **Polityka* (1925–6). The Ukrainian Socialist Radical party revived the weekly **Hromads'kyi holos* (1921–39) and published the journals **Protty khvyl'* (1928–9) and *Zhyve slovo* (1939) in Lviv. The radical nationalist **Ukrainian Party of National Work* published the semimonthly **Zahrava* (1923–4). The monarchist nationalist weekly **Ukrains'kyi holos* (1919–32) in Peremyshl became an OUN organ in 1929. The OUN also published the Lviv weeklies **Nash klych* (1933), **Visty* (1933–4), **Holos natsii* (1936–7), and *Holos* (1937–9). The **Ukrainian Labor party* had **Nash prapor* (1923–4) and *Prapor* (1924). The *Ukrainian People's Labor party* had *Ukrains'ka rada* (1924–5) and **Rada* (1925–34). In 1927 *Rada* became the organ of the **Ukrainian Party of Labor*, which also published **Pratsia* (1927–34) until 1933, when it became an organ of the clandestine Communist Party of Western Ukraine (KPZU). Other pro-OUN papers were *Ridnyi grunt* (1935–7) and *Frontom* (1936–7) in Lviv, *Proryv* (1936–7) in Peremyshl, *Homin baseinu* (1937) and *Homin kraiu* (1937–8) in Drohobych, and *Avangard* (1937–8) in Kolomyia. The moderate nationalist **Front of National Unity* published the daily **Ukrains'ki visty* (1935–9), the weekly *Bat'kivshchyna* (1934–9), and the quarterly **Peremoha* (1933–9). Conservative Catholic and nationalist views were expressed in **Nova zoria* (1926–39) in Lviv and **Beskyd* (1928–33) and **Ukrains'kyi Beskyd* (1933–9) in Peremyshl. The weekly **Meta* (1931–9) represented a more liberal Catholic outlook. Galician supporters of the hetmanite movement published the monthly *Khliborobs'kyi shliakh* (1932–5). A pro-Polish conciliatory viewpoint was represented by **Ridnyi kraj* (1920–3) and **Seliamyn* (1929–34). The Sovietophile and pro-communist press was particularly strong in the 1920s; it published the newspapers **Svitlo* (1925–8), **Syla* (1930–2), **Nasha zemlia* (1930–2), **Sel'-Rob* (1927–32), and the clandestine **Volia naroda* (1921–8) and **Zemlia i volia* (1925–9). Russophile newspa-

pers, eg, *Zemlia i volia* (1928–39) and the moribund **Russkii golos* (1922–39), had a declining influence.

Nonpartisan newspapers included the family weekly **Nedilia* (1928–39); the daily *Chas* (1931–2), edited by M. Holubets; and particularly the newspapers and magazines *Novyi chas* (1923–39), **Narodna sprava* (1928–39), **Nash prapor* (1932–9), and **Nash lemko* (1934–9), published by I. Tyktor's publishing house, **Ukrainska Presa*.

Much of the women's press also developed along partisan lines. Notable periodicals were the pro-UNDO **Zhinocha dolia* (1925–39), the organ of the **Union of Ukrainian Women* **Zhinka* (1935–8), the radical **Zhinochyi holos* (1931–9), and the housekeeping magazine **Nova khata* (1925–39).

Ukrainian literary, art, and scholarly periodicals reached a high level of development in interwar Galicia. The first literary journal to appear in Lviv after the First World War was **Mytusa* (1922). *Literaturno-naukovyi vistnyk* was re-established in 1922. Edited by D. Dontsov, it united all outstanding Western Ukrainian and émigré writers and even published Soviet contributions. After being renamed **Vistnyk* in 1933, it served until 1939 as the main forum for Dontsov's integral nationalist ideology and exerted considerable influence on the views of the 1930s generation in Western Ukraine and abroad. The magazines **Dazhboh* (1932–5), **Obrii* (1936–7), and **Naperedodni* (1937–8) were ideologically akin to *Vistnyk*. Catholic writers contributed to **Dzvoony* (1931–9). The semimonthly **Nazustrich* (1934–8) was an important moderate magazine. Marxist and Sovietophile writers contributed to the monthlies *Nova kul'tura* (1923–6), which was renamed **Kul'tura* (1927–31), and **Vikna* (1927–32), **Novi shliakhy* (1929–32), and *Krytyka* (1933). Notable journals in the arts were *Ukrains'ke mystetstvo* (1926) and the avant-garde **Mystetstvo* (1932–6), the music journal **Ukrains'ka muzyka* (1937–9), the photography journal **Svitlo i tin'* (1933–9), and the theater journals **Teatral'ne mystetstvo* (1922–4) and **Masovyi teatr* (1930–2).

A number of scholarly periodicals were published in Lviv: the theology and church history quarterly **Bogosloviia* (1923–39), the cultural history magazine **Stara Ukraina* (1924–5), the Slavic studies journal **Slovo* (1936–8), the journal of Ukrainian studies **S'ohochasne i mynule* (1939), the jurisprudence quarterly **Zhyttia i pravo*, and the bibliographical monthly *Ukrains'ka knyha* (1937–9). The widely read monthly magazine **Litopys Chervonoï kalyny* (1929–39) was devoted to the history of the Ukrainian Sich Rifleman and the Ukrainian Galician Army. Other popular magazines were the Prosvita society's monthly **Zhyttia i znannia* (1927–39) and the regional studies magazines *Litopys Boikivshchyny* (1931–9) and **Nasha bat'kivshchyna* (1937–9).

The religious press also flourished in Western Ukraine. Notable Catholic periodicals were the quarterly **Dobryi pastyr* (1931–9) in Stanyslaviv, the quarterly *Katolyts'ka aktsiia* (1934–9) in Lviv, the Basilian monthly **Misionar* (est 1897) in Zhovkva, **Sivach* (1936–9), and the very popular weekly (circulation 85,000) *Khrystos nasha syl'a* (1936–9) in Lviv. The co-operative press and agricultural periodicals were also popular. Particularly so were the weekly **Hospodars'ko-kooperatyvnyi chasopys* (1921–44), the magazine **Sil's'kyi hospodar* (1926–39, 1940–4), the theoretical monthly of the Ukrainian co-operative movement **Ko-*

operatyvna respublika (1928–39), the educational monthly **Kooperatyvna rodyna* (1934–9), and the dairyman's monthly **Kooperatyvne molocharstvo* (1926–39). Several *pedagogical periodicals were also published. Adult education was promoted in the Prosvita society's revived **Pys'mo z Prosvity* (1921–2) and **Narodna prosvita* (1923–7), and in **Samoosvitnyk* (1937–9).

Children's magazines were popular in interwar Western Ukraine, especially because the regime restricted the activities of Ukrainian schools. The most important were **Svit dytyny* (1919–39); **Moloda Ukraina* (1923–6), for teenagers; **Dzvinochok* (1931–9); the Catholic **Nash pryiatel'* (1922–39); the Plast scouting organization's **Molode zhyttia* (1921–30); and, following the prohibition of Plast, the monthly *Vohni* (1931–8). Notable student periodicals were the Union of Ukrainian Nationalist Youth's **Smoloskypy* (1927–8); the Catholic **Postup* (1921–30), **Ukrains'ke iunatstvo* (1933–9), and *Lytsarstvo Presviatoi Divy Marii* (1936–9); and the Union of Progressive Youth's **Kamienari* (1932–9). With the political ascendancy of the OUN in the 1930s, the centralist student organs **Students'kyi shliakh* (1931–4) and **Students'kyi vistnyk* (1935–9) promoted its ideology. Periodicals promoting sports and an athletic lifestyle were **Visty z Luhu* (1926–39), **Sokil's'ki visty* (1928–38), *Sportovi visty* (1931), *Hotovi* (1934–5), *Sport* (1936–7), and **Zmah* (1937–9).

Altogether, in the years 1918–39, 834 Ukrainian periodicals and 138 calendar-almanacs were published under Polish rule. Despite adverse political conditions they improved considerably, grew stronger financially, and became more popular and varied in political orientation and subject matter. Some newspapers and magazines reached relatively high circulation figures. The number of dailies increased from one to three. Weeklies were the most widespread publications, and their largest readership was in rural areas. But the absence of a Ukrainian press agency and the shortage of professionally trained journalists contributed to shortcomings in the Ukrainian press, such as inadequate news coverage and an excess of patriotic zeal, by comparison with the numerous Polish papers and the Jewish daily *Chwila*.

Conditions were highly unfavorable in Rumanian-ruled Bukovyna. The only Ukrainian daily there was **Chas* (1928–40) in Chernivtsi. Other newspapers were the Social Democratic *Volia naroda* (1919–21), **Robitnyk* (1919–23), *Vpered* (1923), *Hromada* (1923), and *Zemlia i volia* (1927); the Sovietophile *Narod* (1923); the *Ukrainian National party's **Ridnyi kraj* (1926–30) and **Rada* (1934–8); and the pro-OUN **Samostiinist'* (1934–7). The Rumanian regime was supported in **Khliborobs'ka pravda* (1924–38) and *Pravda* (1930–6). Other, short-lived newspapers were **Narodnyi holos* (1921, 1923), **Zoria* (1923–5), *Zemlia* (1925–6), *Narod* (1926), and *Narodnia syla* (1932–4). Journals published were the pro-OUN literary monthly **Samostiina dumka* (1931–7), which had many émigré contributors; the student literary monthly **Promin'* (1921–3); and *Ukrains'ka lastivka* (1933–9), for children. Only 10 Ukrainian periodicals were published in Bukovyna in 1936. Bessarabia had no Ukrainian periodicals.

In Transcarpathia, Czechoslovakia's democratic government did not hinder the development of the Ukrainian press. Overcoming the region's underdeveloped national consciousness, the press, gradually displacing Russophile

periodicals, became stronger and more influential; it numbered 23 periodicals by 1936. The leading Ukrainophile newspaper was the revived weekly *Nauka* (1919–22), which was renamed **Svoboda* (1922–38) as the organ of the Christian People's party, and then **Nova svoboda* (1938–9) as the daily of the Ukrainian National Alliance in Carpatho-Ukraine. Other important papers were the semiofficial **Rusyn* (1920–3), the Ruthenian Agrarian party's **Rus'ka nyva* (1921–4), the Subcarpathian Social Democratic party's **Narod* (1920–1) and **Vpered* (1922–38), the Czechoslovak Agrarian party's **Selo* (1920–4) and *Zemlia i volia* (1934–8), the independent **Ukrains'ke slovo* (1932–8), the 'Rusynophile' **Nedilia* (1935–44), and the pro-OUN **Narodnia syla* (1936–8) and **Nastup* (1938–9). The Russophile papers **Russkaia zemlia* (1919–38), **Russkii vestnik* (1923–38), and **Karpatorusskii golos* (1932–4, 1938–44); the communist *Karpats'ka pravda* (1920–33, 1935–8); and lesser Ukrainophile, Russophile, and Magyarophile papers also appeared. The most important paper in the Prešov region was **Russkoe slovo* (1924–39). Other important periodicals in Transcarpathia were the Sovietophile monthly **Nasha zemlia* (1927–9); the ethnographic-pedagogical journal **Pidkarpats'ka Rus'* (1923–36); the pedagogical periodicals **Uchytel'* (1920–36), **Zoria* (1921–31), **Narodnaia shkola* (1921–38), **Uchytel'skyi holos* (1930–8), and **Nasha shkola* (1935–8); the Mukachiv Prosvita society's **Svitlo* (1933–8); the religious monthlies **Dushpastyr* (1923–41) and **Blahovistnyk* (1921–44, 1946–9); the children's magazines **Pchilka* (1923–34) and **Nash ridnyi kraj* (1922–38); and the scouting journal **Plastun* (1923–31, 1934–7).

In interwar Transcarpathia 62 periodicals were published in Ukrainian, 25 in the *yazychiie*, 39 in Russian, 34 in Hungarian, 13 in Czech, and 4 in Yiddish. In 1938–9 in Carpatho-Ukraine, there were 11 Ukrainian periodicals, 3 Russian, 1 Czech, and 1 Czech-Ukrainian.

The émigré press in Europe, 1920–40. The development of the Ukrainian press in interwar Western and Central Europe was connected directly to the mass emigration from Soviet-occupied Ukraine. Under the difficult conditions of émigré life, publications were widely dispersed and short-lived. They still managed, however, to exert considerable influence on developments in foreign-occupied Western and Soviet Ukraine, which they reached through both legal and illegal means.

The main centers of the Ukrainian émigré press were Berlin, Warsaw, Prague, and Paris. Published in Berlin were *Nove slovo* (1920), the organ of the Ukrainian People's party; **Ukrains'ke slovo* (1921–3), a pro-hetmanite weekly and then daily; and the weekly *Litopys polityky, pys'menstva i mystetstva* (1923–4). The newspaper **Ukrains'kyi prapor* was published in Vienna (1919–23) and then in Berlin (1923–32); it represented the views of the Government-in-exile of the Western Ukrainian National Republic. Also published in Vienna were the UPSR's **Boritiesia – poborete!* (1920–2), the Sovietophile monthly **Nova hromada* (1923–4), the Foreign Group of the Ukrainian Communist party's journal **Nova doba* (1920–1), and the nonpartisan *Volia* (1919–21). Published in Prague were *Sotsialistychna dumka* (1921–3) of the Ukrainian Socialist Democratic Workers' party and **Trudova Ukraina* (1932–9) of the UPSR. In Warsaw, Ye. Lukasevych, with the help of the Government-in-exile of the UNR, published the daily **Ukrains'ka trybuna* (1921–2). The semiofficial weekly of the UNR government-in-exile **Tryzub* (1925–40), the Sovietophile semimonthly,

later weekly, **Ukrains'ki visti* (1926–9), and the nationalist weekly **Ukrains'ke slovo* (est 1933) were published in Paris.

Publications for covert distribution in Western Ukraine included the newspaper of the underground *Ukrainian Military Organization, **Surma*, in Berlin (1927–8) and in Kaunas, Lithuania (1928–34); the ideological organ of the OUN, **Rozbudova natsii* (1928–34) in Prague; and the KPZU organ **Nasha pravda* in Vienna (1921–3) and Czechoslovakia (after 1934).

The literary journals *Na perelomi* (1920) and *Vyzvolennia* (1923) were published in Vienna. The most prominent and influential literary and political journal, **Nova Ukraina* (1922–8), was published in Prague, as were a number of scholarly serials and the student journals *Ukrains'kyi student* (1920–4) and **Students'kyi visnyk* (1923–31), the organ of the *Central Union of Ukrainian Students. A literary and arts bimonthly, **My* (1933–9), was published in Warsaw, as were I. Ohiienko's scholarly-literary **Nasha kul'tura* (1935–7) and philological **Ridna mova* (1933–6). Military affairs were the subject of the journal **Tabor*, published in Kalisz (1923–4, 1927–30) and in Warsaw (1930–9).

New Ukrainian *press and information bureaus abroad published many periodicals in several Western languages, to inform the European public about the Ukrainian question. Altogether, 55 émigré periodicals – 6 newspapers and 49 journals – were published in Europe in 1936. Two others appeared in Manchuria. By 1939 the number had dropped to 37.

Non-Soviet newspapers published in Ukraine during the Second World War

The Second World War. Following the Soviet occupation of Western Ukraine in 1939, all Ukrainian periodicals were closed down, and many journalists were repressed. Only in the Nazi-occupied Generalgouvernement in Poland and abroad could the Ukrainian 'national' press function. The new Ukrainske Vydavnytstvo publishing house in Cracow published the daily **Krakovs'ki visti* (1940–5) and a weekly version, the monthly *Illustrovani visti* (1940–1), and the weekly *Kholm's'ka zemlia* (1942–4). These newspapers were distributed mainly in the Ukrainian parts of the Generalgouvernement – the Lemko, Sian, Kholm, and Podlachia regions – and in Galicia after the expansion of the Generalgouvernement in 1941. In Cracow and later in Lviv, Ukrainske Vydavnytstvo also published a magazine for teenagers, **Dorooha* (1940–4), the literary magazine **Vechirnia hodyna* (1942–4), the popular monthly **Nashi dni* (1941–4), the co-operative monthly *Sil's'kyi hospodar* (1940–4), and the children's magazine *Mali druzi* (1940–4). After the Nazi authorities banned the new Lviv daily *Ukrains'ki shchodenni visti* (1941), **L'vivs'ki visti* (1941–4) served as the official daily in Galicia. A weekly, **Ridna zemlia* (1941–4), was also published. These

newspapers were not allowed to circulate outside the Generalgouvernement.

The early phase of the German occupation of central and eastern Ukraine in 1941 saw a great upsurge in nationalist publishing activity. Soviet newspapers had ceased publication or were banned, and new newspapers were founded in virtually every oblast and raion center. After the creation of the *Reichskommissariat Ukraine and the transfer of power to Nazi civilian authorities, however, they were either shut down or turned into provincial and local Nazi organs, which were strictly controlled and censored. The editors of the nationalist Kiev daily **Ukrains'ke slovo* (1941) and literary magazine **Litavry* (1941), for example, were arrested and later executed, and *Ukrains'ke slovo* became the pro-Nazi **Nova ukrains'ke slovo* (1941–3). The initially independent weekly *Volyn'* (1941–4) in Rivne was curtailed (see *Volyn). Greater freedom of publication was allowed in areas close to the battlefield. Kharkiv, for example, had the nationalist daily **Nova Ukraina* (1941–3) and the literary journal *Ukrains'kyi zasiv* (1942–3).

No Ukrainian press was allowed in Rumanian-occupied *Transnistria. The weekly **Nashe zhyttia* (1940–4), however, was published in Bucharest. Most Ukrainian periodicals published in Nazi-occupied Europe, including Warsaw and Paris, were suspended. Those allowed to continue publishing in Berlin and Prague, including **Ukrains'kyi visnyk* (1936–45), **Ukrains'ka diisnist'* (1939–45), *Natsiia v pokhodi* (1939–41), **Proboiem* (1933–43), and **Nastup* (1937–44), were banned in the Generalgouvernement and Reichskommissariat Ukraine.

The millions of Ukrainian laborers, *Ostarbeiter*, and prisoners of war in Germany proper were served by several state-controlled periodicals: the biweekly **Holos* (1940–5), which had a circulation of 250,000 in 1944; the weeklies **Ukrainets'* (1942–5), **Visti* (1942–5), **Na shakhti* (1942–5), **Zemlia* (1942–5), and **Nova doba* (1941–5); and the magazine *Dozwillia* (1942–5). Ukrainian units in the German forces – the Ukrainian Liberation Army and the Division Galizien – had their own newspapers, *Ukrains'kyi dobrovolets'* (1942–5), *Za Ukrainu* (1943), and *Do peremohy* (1943–5). Altogether, over 300 Ukrainian periodicals, most of them local papers, were published in German-occupied Ukraine and Europe. The only truly free Ukrainian press during the Second World War consisted of 20-odd clandestine political, military, children's, and satirical publications of the OUN (eg, **Ideia i chyn* [1942–6]), the Ukrainian Insurgent Army (eg, *Do zbroi* and *Vil'na Ukraina*), and the Ukrainian Supreme Liberation Council.

During the German occupation several Soviet Ukrainian newspapers and journals, eg, *Radians'ka Ukraina*, *Pravda Ukrainy*, and *Literatura i mystetstvo*, were evacuated and published in Bashkiria or in Moscow. A number of Soviet underground and partisan papers and bulletins were distributed in German-occupied Ukraine during the war.

Soviet Ukraine since 1945. The postwar Soviet Ukrainian press continued developing according to the parameters set in 1938: centralization, Party control, and Russification. The press remained basically a tool of the Communist party, although some concessions to Ukrainian patriotism were made, and new Ukrainian-language periodicals were introduced during a short period of relative liberalization in 1945–6 and during a longer period after Stalin's death in 1954. Newspapers – usually limited to

four pages per issue – were not allowed to give readers objective information about external or domestic developments, but merely reprinted official statements and accounts. Articles and reviews were censored to ensure conformity with the Party line. All sanctioned periodicals were official publications of the Party, the government, Komsomol, individual ministries, trade unions, or other state or public organizations. The entire press was until around 1990 under the jurisdiction of the Department of Propaganda and Agitation of the CC CPU and the Press Committee of the Council of Ministers of the Ukrainian SSR. Party and government press editors in chief acted as censors and were appointed exclusively from among loyal Party members and trained at special journalism schools run by the Party.

In the last years under Stalin, in the late 1940s and early 1950s, many Ukrainian-language periodicals were discontinued. At the same time Russian-language equivalents of certain Ukrainian-language newspapers and journals were established. Usually they were allotted larger pressruns than their Ukrainian counterparts; their greater availability and, therefore, greater popularity served as a justification for discontinuing the Ukrainian-language editions. After Stalin's death many new newspapers – including republican and Komsomol oblast ones – and academic, scientific, and cultural journals and other serials were established. Many of the latter in the pure, applied, technical, and medical sciences, however, were published only in Russian. Between 1950 and 1960 the number of Ukrainian-language journals increased from 27 to 54, while Russian-language journals increased from 5 to 26. From late 1959 on, existing separate Ukrainian- and Russian-language Party newspapers in oblast centers were amalgamated, and single newspapers that were published in parallel Ukrainian and Russian editions thereby created. In 1962 it became possible for someone living outside Ukraine in the USSR to subscribe to republican-level periodicals, something that until then had not been allowed.

Because of Soviet nationality policy, in which Russification had been the key component, the Ukrainian-language press was not accorded the same status or privileges as the Russian-language press in Ukraine. In 1959 the population of Soviet Ukraine was 77 percent Ukrainian and 17 percent Russian. Between 1954 and 1960, however, the combined pressrun of Ukrainian-language journals doubled, whereas that of Russian-language journals increased 2.5 times while being allotted over 36 times the number of printed sheets. The number of Ukrainian-language newspapers increased from 784 to 814, while Russian-language newspapers increased from 226 to 378; their combined pressruns increased 168 percent and 154 percent respectively. In 1965 the combined pressrun of Ukrainian-language newspapers was 72 percent of the single-issue total and 71 percent of the annual total in Ukraine, while that of Russian-language newspapers was 27 and 28 percent respectively.

The situation of the Ukrainian-language press worsened in the 1970s and 1980s. As a result of official all-Soviet policies, the number of Ukrainian-language journals increased from 54 in 1960 to 63 in 1970 and then dropped to 51 in 1988, while Russian-language journals in Ukraine increased from 26 in 1960 to 39 in 1970, 44 in 1975, and 55 in 1988. The number of Ukrainian-language newspapers

Postwar Soviet Ukrainian newspapers, journals, and magazines

(excluding collective-farm papers) increased from 919 in 1959 to 1,261 in 1988, while Russian-language newspapers increased from 381 in 1959 to 520 (29 percent) in 1988. From the mid-1970s on, many Ukrainian and other non-Russian periodicals in the USSR were not granted annual increases in their pressruns or subscription allotments, and by 1980 most of them had circulations that had declined in absolute terms from their 1975 levels. Between 1969 and 1980 the percentage of journals published in Russian by the AN URSR (now ANU) increased from 19 to 76.2, while the proportion of the Ukrainian-language journals decreased accordingly, and had fallen to 16.3 percent by 1989. By 1984 the pressruns of most Ukrainian-language literary and scholarly journals were nearly half of what they were in 1975. In 1988 the combined pressrun of the Ukrainian-language newspapers was 66 percent of the single-issue total and 64 percent of the annual total in Ukraine, while that of the Russian-language papers was 33.4 and 35 percent respectively.

This discrimination was even more apparent when statistics for the Russian and Ukrainian populations of the USSR are compared with those of the Soviet press. In 1989 the USSR population was 50.8 percent Russian and 15.4 percent Ukrainian. In 1988, however, 65.7 percent of all Soviet newspapers were published in Russian, but only 14.7 percent (1,261 newspapers) were published in Ukrainian. The pressruns of the Russian-language newspapers comprised 79.6 percent of the single-issue total and 83.5 percent of the annual Soviet total, while Ukrainian-language papers comprised 7.4 percent and 6.0 percent respectively. Although millions of Ukrainians – over 6.7

TABLE 2
Newspapers published in Ukraine in selected years, 1955–90, by language (excluding collective-farm publications)

| Year | All newspapers | Ukrainian | Russian | Others |
|------|----------------|-----------|---------|--------|
| 1955 | 1,192 | 972 | 205 | 15 |
| 1960 | 1,206 | 814 | 378 | 14 |
| 1965 | 1,104 | 742 | 353 | 9 |
| 1970 | 1,347 | 936 | 400 | 11 |
| 1975 | 1,266 | 878 | 377 | 11 |
| 1980 | 1,274 | 874 | 389 | 11 |
| 1985 | 1,367 | 910 | 445 | 12 |
| 1990 | 1,476 | 991 | 473 | 12 |

million in 1989 (11 million, according to V. Kubijovyč) – lived in other Soviet republics, not one Ukrainian-language periodical was published in the USSR outside Ukraine.

Newspapers. In 1980, 19 Ukrainian republic-level newspapers for the general public or for specific occupational or social groups were published. Not one was a daily. (The only daily in the entire USSR was *Pravda* in Moscow.) Five came out six times a week; 2, five times a week; 3, three times a week; 4, twice a week; and 5, once a week. Their total single printing was nearly 8.1 million copies, approximately the same as that of a single edition of an average all-Union daily newspaper. Their circulation ranged from 380,000 for a paper published three times a week to 4.1 million for a weekly. The republican newspapers were: the CC CPU, Supreme Soviet, and Council of Ministers or-

gans **Radians'ka Ukraïna* (est 1926, called *Komunist* until 1943 and *Demokratychna Ukraïna* since 1991) and its Russian counterpart, **Pravda Ukraïny* (est 1938, called *Sovetskaïa Ukraïna* until 1944); the CC CPU papers **Robitnycha hazeta* (est 1957), *Rabochaïa gazeta* (in Russian, est 1957), and **Sil's'ki visti* (est 1924, called *Radians'ke selo* until 1933, then *Kolhospane selo* until 1939 and in 1949–65); the Komsomol's **Molod' Ukraïny* (est 1925, called *Komsomolets' Ukraïny* until 1943) and *Komsomol'skoe znamia* (in Russian, est 1938, called *Stalinskoe plemia* until 1956); the Writers' Union of Ukraine's **Literaturna Ukraïna* (est 1927, called *Literaturna hazeta* until 1962); the Ministry of Culture's **Kul'tura i zhyttia* (est 1945, called *Radians'ke mystetstvo* until 1955, then *Radians'ka kul'tura* until 1965); the Ministry of Education's **Radians'ka osvita* (est 1940, renamed *Osvita* in 1991); the Pioneer Organization's **Zirka* (est 1943) and *Iunyi leninets* (in Russian, est 1922, called *Iunyi Spartak* until 1923 and *Iunyi pioner* in 1938–41); the Physical Culture and Sport Committee's **Sportyvena hazeta* (est 1934, called *Radians'kyi sport* until 1964); the Voluntary Society for Assistance to the Army, Air Force, and Navy's **Patriot Bat'kivshchyny* (est 1939); the State Publishing, Printing, and Book Trade Affairs Committee's **Druh chytacha* (est 1960); the Ukraina Society's **News from Ukraine and Visti z Ukraïny* (est 1960); the Ukrainian Hearing Society's *Nashe zhyttia* (est 1967); the Ministry of Internal Affairs' *Radians'kyi militsioner* (est 1955) and *Sovetskii militsioner* (in Russian, est 1974), now replaced by *Militseï 'kii kur'ier*; and the Chief River Fleet Administration's *Vodnyk* (est 1919).

The number of oblast newspapers grew from 53 in 1950 to 78 in 1990. In 1975, 37 were oblast Party committee and

soviet organs, and 25 were Komsomol committee organs. They resembled the republican newspapers in form and content, but also covered oblast affairs and local news. None could be sent abroad. Thirteen came out six times a week; 27, five times a week; 30, three times a week; 1, twice a week; and 1, once a week. Their total single printing was nearly 7.3 million.

The oblast Party newspapers were published in parallel Ukrainian and Russian editions in Crimea, Dnipropetrovske, Donetsk, Luhanske, Lviv, Mykolaiv, Odessa, Transcarpathia, and Zaporizhia oblasts. In 1980 the pressruns of the Russian editions were substantially higher than those of the Ukrainian in the most populous and urbanized oblasts of Ukraine – Donetsk (by 614 percent), Luhanske (by 417 percent), Odessa (by 299 percent in 1975), Dnipropetrovske (by 219 percent), Zaporizhia (by 215 percent), and Kharkiv (by 212 percent). The oblast papers with the five largest single-issue pressruns were published in Russian: *Sotsialisticheskii Donbass* (362,000 copies) in Donetsk, *Krymskaia pravda* (280,000) in Symferopil, *Industrial'noe Zaporozh'e* (257,000) in Zaporizhia, *Voroshilovgradskaia pravda* (250,000) in Voroshylivhrad (Luhanske), and *Znamia kommunizma* (236,000) in Odessa. The next largest was the Ukrainian-language *Vil'na Ukraina* (230,500) in Lviv. The papers with the smallest pressruns were, with the exception of the Hungarian-language *Karpati igaz szo* (38,000) in Uzhhorod and the Moldavian-language *Zorile Bucovinei* (26,000) in Chernivtsi, the Ukrainian-language editions in Donetsk (59,000), Voroshylivhrad (60,000), and Kharkiv (62,000).

In 1980, 23 of the 26 oblast Komsomol papers were published in Ukrainian three times a week. Only those in Crimea and Donetsk oblasts were published in Russian, and the latter, *Komsomolets Donbassa*, was the only one published five times a week. The Komsomol paper of Transcarpathia oblast also appeared in a parallel Hungarian-language edition.

The number of 'city' newspapers – organs of Party committees in municipalities officially classified as cities (*mista*) – grew from 55 in 1950 to 60 in 1960, 80 in 1970, 108 in 1980, and 153 in 1990. Their news coverage was limited to their own cities, and they are not sold outside them or available abroad. In 1980, 40 of the 108 city papers were in Russian; they were published in Voroshylivhrad (11 of 13 city papers), Dnipropetrovske (2 of 8), Donetsk (14 of 19), the Crimea (all 7), Odessa (4 of 5), Kharkiv (1 of 5), and Sumy (1 of 5) oblasts. In 1980, 62 of the city papers appeared four times a week; 29, three times a week; 11, five times a week; and 6, six times a week. Those published two or three times a week had single-issue pressruns in the 10,000 to 30,000 range. Thirteen papers published five or six times a week – eight of them in Russian – had much higher pressruns. They were **Vechnii Donetsk* (230,000 copies in 1980) in Donetsk, **Vechnii Kyiv* (200,000) in Kiev, *Dnepr vechnii* (162,900; formerly the Ukrainian-language *Dnipro vechnii* [1972–6]) in Dnipropetrovske, *Prapor komunizmu* (133,000) in Kiev (renamed *Kyivs'kyi visnyk* in 1990), **Vechniaia Odessa* (123,000) in Odessa, *Chervonyi hirnyk* (116,000) in Kryvyi Rih, *Priazovskii rabochii* (107,000) in Zhdanov (Mariupol), *Makeevskii rabochii* (85,000) in Makiivka, **Vechnii Kharkiv* (84,000) in Kharkiv, *Slava Sevastopolia* (75,000) in Sevastopol, *Kochegarka* (64,500) in Horlivka, *Dzerzhynets'* (53,000) in Dniprodzerzhynske, and *Kerchenskii rabochii* (41,500) in Kerch. Two oblasts, Chernivtsi and Ternopil, did not have any

city papers, but only oblast and raion organs. Only Kiev had two city papers, both appearing in a Ukrainian and a Russian version.

Raion newspapers were published by the Party committee in each raion. Usually two pages long, they contained materials of interest to the Party organization and some local news, and were not available outside the raion. Most appear three times a week in a pressrun of approx 5,000 to 20,000 copies. In 1980, of the 480 raion papers in Ukraine, 58 were published in Russian: all 14 raion papers in Crimea oblast, 12 of 19 in Donetsk oblast, 12 of 19 in Voroshylivhrad oblast, 9 of 27 in Odessa oblast, 4 of 18 in Sumy oblast, 3 of 18 in Zaporizhia oblast, 3 of 27 in Kharkiv oblast, and 1 of 22 in Chernihiv oblast. Three of 13 raion papers in Chernivtsi oblast and one in Odessa oblast appeared in Moldavian, and 3 of 16 in Transcarpathia oblast appeared in Hungarian.

Collective-farm bulletins were also published in Ukraine, mostly as monthlies. Their number grew from 146 in 1956 to 2,203 in 1959, and then declined to 2,074 in 1960, 1,271 in 1970, 763 in 1975, and 311 in 1990. Like the bulletins (781 in 1988) of individual local industrial enterprises and higher educational institutions, they were not listed in official registers of the Soviet press.

Moscow's all-Union Russian-language newspapers were distributed widely in Ukraine, where they were teleaxed and printed in Kiev, Kharkiv, and other cities. In 1962, for example, when the 934 Soviet Ukrainian newspapers had a combined single-issue pressrun of over 10 million copies, an additional 10 million copies of the all-Union papers were also circulated daily in Ukraine.

Newspapers were published in every raion of Ukraine. In terms of their combined single-issue pressrun, however, in 1988 the top five producers were the city of Kiev, with 35.6 percent; Donetsk oblast, with 7.3 percent; Dnipropetrovske oblast, with 4.9 percent; Lviv oblast, with 4.0 percent; and Odessa oblast, with 3.9 percent.

In 1988, 4.1 percent of all non-newspaper periodicals in the USSR were published in Ukraine. Of the 107 Soviet Ukrainian journals – 7.5 percent of all journals published in the USSR – 1 was a weekly, 3 were semimonthlies, 61 were monthlies, 1 was a semiquarterly, 39 were bimonthlies, and 2 were quarterlies.

Journals and serials. *Literary journals constituted the journal category with the largest combined pressrun; in 1988 there were nine with a combined pressrun of over 55.5 million copies, or 32 percent of the total pressrun of all non-newspaper periodicals published in Ukraine. The journals were the Writers' Union's monthlies **Vitchyzna*, **Dnipro*, **Vsesvit*, **Kyiv*, and, in Russian, **Raduga* (formerly *Sovetskaia Ukraina* [1951–63]) in Kiev, **Prapor* (renamed *Berezil'* in 1990) in Kharkiv, **Zhovten'* (renamed *Dzvin* in 1990) in Lviv, **Donbas* in Donetsk, and the Komsomol's monthly *Ranok* (formerly *Zmina* [1953–65]) in Kiev.

Journals dealing with politics, society, and the economy had the second largest combined pressrun; in 1988 there were 21 such journals with a combined pressrun of over 47.1 million copies, or 27.3 percent of the total pressrun of all non-newspaper periodicals. The major political journals were published by the CC CPU in parallel Ukrainian and Russian editions: the ideological monthly *Komunist Ukraïny/Kommunist Ukrainy* and the agitation and propaganda biweekly **Pid praporom leninizmu/Pod znamenem leninizma* (formerly *Bloknot ahitatora* [1944–69]), renamed *Polityka i chas/Politika i vremia* in 1991.

TABLE 5
Annual circulation of periodicals and journals in Ukraine in selected years, 1955–1990, by language

| Year | All periodical publications | | | Journals | | | Copies (per 100 population) |
|------|-----------------------------|-----------|---------|----------|-----------|---------|-----------------------------------|
| | Total | Ukrainian | Russian | Total | Ukrainian | Russian | |
| 1955 | 22,983 | 19,153 | 3,773 | 12,398 | 11,417 | 981 | 59 |
| 1960 | 44,809 | 37,775 | 6,918 | 22,769 | 20,832 | 1,937 | 106 |
| 1965 | 77,710 | 67,588 | 10,122 | 53,393 | 49,782 | 3,611 | 172 |
| 1970 | 187,321 | 167,347 | 19,929 | 144,953 | 125,864 | 19,044 | 398 |
| 1975 | 222,981 | 202,291 | 20,623 | 177,710 | 157,322 | 20,328 | 456 |
| 1980 | 211,442 | 193,373 | 17,830 | 174,412 | 156,751 | 17,433 | 423 |
| 1985 | 169,767 | 151,309 | 18,218 | 140,254 | 122,209 | 17,818 | 334 |
| 1990 | 165,706 | 149,622 | 15,884 | 139,366 | 123,514 | 15,652 | 320 |

In 1988 the remaining pressrun of all non-newspaper periodicals was divided among the 5 children's magazines (15 percent); the Republican Council of Trade Unions and Writers' Union's monthly for women, **Radians'ka zhinka* (renamed *Zhinka* in 1991; 15 percent); 6 journals dealing with culture or education (3.9 percent); 5 devoted to the arts (3.1 percent); 4 journals for young people (1.8 percent), the most important of which was the monthly **Znannia ta pratsia* (renamed *Nauka-fantastyka* in 1990); the organ of the Russian Orthodox church in Ukraine, **Pravoslavnyi visnyk*, and a monthly of atheist propaganda, **Liudyna i svit* (formerly *Voiovnnychi ateist* [1960–4], 1.2 percent in 1965); 5 agricultural journals (0.7 percent; see **Agricultural periodicals*); 20 technical journals (0.6 percent); the only sports magazine, the monthly **Start* (formerly *Fizkul'tura i sport* [1957–65], 0.6 percent); 7 medical journals (0.3 percent); 1 each in linguistics and literature studies (0.2 percent); and 25 natural science journals (0.1 percent).

The ANU has published a monthly informational journal, **Visnyk Akademii nauk Ukrain's'koi RSR*. It also published several academic journals in the humanities and social sciences: the history monthly **Ukrain's'kyi istorychnyi zhurnal*; the literature studies monthly **Radians'ke literaturoznavstvo* (renamed *Slovo i chas* in 1990); the jurisprudence monthly **Radians'ke pravo* (renamed *Pravo Ukrainy* in 1991) – the most widely distributed ANU journal – copublished with the Ministry of Justice and Supreme Court; the economics monthly **Ekonomika Radians'koi Ukrainy* (renamed *Ekonomika Ukrainy* in 1991) and its Russian parallel, *Ekonomika Sovetskoï Ukrainy* (*Ekonomika Ukrainy*); the folklore, folk art, and ethnography bimonthly **Narodna tvorchišt' ta etnografii*; the linguistics bimonthly **Movoznavstvo*; and the philosophy bimonthly *Filosofs'ka dumka*, which in 1989 became the philosophy and sociology monthly *Filosofs'ka i sotsiologichna dumka*, also published in a parallel Russian edition, *Filosofskaia i sotsiologicheskaiia mysl'*. An annual (now semiannual) serial, *Nauka i kul'tura: Ukraïna*, has been copublished since 1967 by the ANU and the Znannia Society. Znannia has also published three popular monthlies, **Nauka i suspil'stvo* (formerly *Nauka i zhyttia* [1951–65]), the aforementioned *Liudyna i svit*, and *Trybuna lektora* (renamed *Trybuna* in 1990).

Journals published by Ukraine's governmental bodies have included the weekly organ **Vidomosti Verkhovnoi Rady URSR* (renamed *Vidomosti Verkhovnoi Rady Ukrainy* in 1991), which also appeared in a parallel Russian edition; the Ministry of Culture's cultural-educational monthly,

**Sotsialistychna kul'tura* (renamed *Ukrain's'ka kul'tura* in 1991), and, since 1970, bimonthlies devoted to Ukrainian art, music, and theater, **Obrazotvorche mystetstvo* (formerly **Mystetstvo* [1954–69]), **Muzyka*, and **Ukrain's'kyi teatr*; four pedagogical monthlies in Ukrainian – **Radians'ka shkola* (renamed **Ridna shkola* in 1991), **Doshkil'ne vykhovannia*, **Ukrain's'ka mova i literatura v shkoli*, and **Pochatkova shkola* – and a bimonthly in Russian, *Russkii iazyk i literatura v shkolakh USSR* (est 1976; renamed *Russkii iazyk i literatura v srednikh uchebnykh zavedeniakh USSR* in 1984), published by the Ministry of Education; and a monthly devoted to film, **Novyry kinoekranu*, published by the State Cinematographic Committee and the Union of Cinematographers.

Among technical and scientific journals, most were published by the institutes and divisions of the ANU. Since the late 1970s only two of them, **Dopovidi Akademii nauk Ukrain's'koi RSR* (renamed *Dopovidi Akademii nauk Ukrainy* in 1991) and the botany bimonthly **Ukrain's'kyi botanichnyi zhurnal*, had been published in Ukrainian. In 1990, ANU journals published in Russian were the monthlies *Avtomaticheskaia svarka*, *Fizika nizkikh temperatur*, *Poroshkovaia metallurgiiia*, *Prikladnaia mekhanika*, *Problemy prochnosti*, *Ukrainskii fizicheskii zhurnal*, and *Ukrainskii khimicheskii zhurnal*; the bimonthlies *Avtomatika*, *Biopolimery i kletka*, *Ekspiermental'naia onkologiiia*, *Elektronnoe modelirovanie*, *Fiziko-khimicheskaiia mekhanika materialov*, *Fiziologicheskii zhurnal*, *Fiziologiiia i biokhimiiia kul'turnykh rastenii*, *Geofizicheskii zhurnal*, *Geologicheskii zhurnal*, *Gidrobiologicheskii zhurnal*, *Khimicheskaiia tekhnologiiia*, *Khimiia i tekhnologiiia vody*, *Kibernetika*, *Kinematika i fizika nebesnykh tel*, *Metallifizika*, *Mikrobiologicheskii zhurnal*, *Mineralogicheskii zhurnal*, *Morskoi gidrofizicheskii zhurnal*, *Neirofiziologiiia*, *Promyshlennaia teplotekhnika*, *Sverkh'tverdye materialy*, *Teoreticheskaiia i eksperimental'naia khimiia*, *Tekhnicheskaiia elektrodinamika*, *Tsitologiiia i genetika*, *Ukrainskii biokhimicheskii zhurnal*, *Ukrainskii matematicheskii zhurnal*, *Upravliaiushchie sistemy i mashiny*, and *Vestnik zoologii*; and the quarterlies *Kriobiologiiia* and *Problemy spetsial'noi elektrometallurgii*.

Also published in Russian were the State Construction Committee and Union of Architects' monthly *Stroitel'stvo i arkhitektura* (originally also published in Ukrainian as *Arkhitektura i budivnytstvo* [1953–7] and *Budivnytstvo i arkhitektura* [1957–9]); the Ministry of the Coal Industry's monthly *Ugol' Ukrainy*; and the Ministry of Health Protection's monthlies *Vrachebnoe delo* and *Klinicheskaiia khirurgiiia*, semiquarterly *Oftal'mologicheskii zhurnal*, and bimonthly *Zhurnal ushnykh, nosovykh i gorlovykh boleznei*. The only medical journals published in Ukrainian have

been the latter ministry's bimonthlies *Pediatrica, akusherstvo i hinekologhiia* and *Farmatsevtichnyi zhurnal*.

Several important Ukrainian journals were not readily available outside the USSR: **Ridna pryroda*, the State Committee for Environmental Protection's quarterly; **Arkhivoy Ukrainy*, the Chief Archival Administration's bimonthly; *bibliographic journals published by the Book Chamber of the Ukrainian SSR; *Zhurnalyst Ukrainy*, the monthly of the Union of Journalists; and **Pam'iatky Ukrainy*, the quarterly of the Ukrainian Society for the Protection of Historical and Cultural Monuments.

In 1975 the journals with the 10 largest annual press-runs were **Perets*, an illustrated biweekly of humor and satire (68,400,000 copies); *Radians'ka zhinka* (22,768,700); **Ukraina*, the only weekly and a popular illustrated political, cultural, and literary magazine (17,284,800); **Barvinok*, the Komsomol's literary monthly for children, published in parallel Ukrainian and Russian editions (16,517,900); *Pid praprom leninizmu/Pod znamenem leninizma* (11,946,200); **Maliatko*, the Komsomol's illustrated monthly for preschoolers (9,432,000); **Pioneriia*, the Komsomol's illustrated monthly for children, published in parallel Ukrainian and Russian editions (3,840,200); *Komunist Ukrainy/Kommunist Ukrainy* (2,451,600); *Ranok* (2,040,000); and *Liudyna i svit* (2,022,300).

Of the 208 non-newspaper periodicals published in Ukraine in 1988, 188 (90 percent) were published in Kiev, 9 in Kharkiv, 6 in Odessa, 2 in Lviv, and 1 each in Dnipropetrovske, Donetsk, and Sumy.

Most recent times. With the introduction of glasnost and perestroika in 1985, Party control of the press gradually diminished. As a result the 'blank spots' in the Soviet past and present – repression, terror, collectivization, destruction of the kulaks, the 1932–3 famine in Ukraine, the Party purges, the physical annihilation of almost an entire generation of Ukrainian intelligentsia, the Second World War, the postwar famine, the suppression of dissent in the postwar period, Russification, national and religious oppression, and current social and economic ills – were openly discussed, and opinions and writings that were or would previously have been banned or suppressed were published. Many journalists and editors resigned from the CPU, and in October 1990 an independent union of journalists was founded. Hundreds of 'unofficial' periodicals – including organs of political groups and parties opposed to the CPSU and advocating its abolition, the dissolution of the USSR, and independence for its republics – were founded, particularly after a law guaranteeing freedom of

NOTE: Figures in parentheses are not included in the total.

speech, the press, and other mass media and abolishing censorship was introduced in the fall of 1990. The new law did not permit advocating the violent overthrow of the Soviet state, war, racism, national and religious intolerance, hatred, any form of violence, criminal activity, or immorality, or revealing state secrets.

Most of the new alternatives to the communist press in Ukraine were 4- to 12-page monthly papers with press-runs of 1,000 to 10,000 copies. Some were printed in the Baltic republics because of the shortage of paper and the lack of access to printing presses in Ukraine. At least 10 'thick' journals appeared.

The main rival of the CPU, the umbrella organization *Popular Movement of Ukraine – or Rukh – has published over 50 periodicals since its founding congress in September 1989. Twelve, including Rukh's central organ *Narodna hazeta, Ohliadach, Ekspres novyny*, and *Svit* (formerly *Visnyk Rukhu*), were published in Kiev; 22, in other central, southern, and eastern Ukrainian cities, including 3 in Kharkiv (*Slobids'ka Ukraina, Na splokh, Visti – Vil'na presa*); and 15 in western Ukraine, including 4 in Lviv (*Viche, Vybory, Iednist', Zaspiv*) and 2 in Ivano-Frankivske (*Halychyna, Poklyk*). Pro-Rukh periodicals have also been published by Ukrainians living or studying in Moscow (*Pora*), Riga (*Trybuna, Dzherelo*), Vilnius (*Prolisok*), and Tallinn (*Struny*).

The independentist Ukrainian Republican party (URP, called in 1988–90 the Ukrainian Helsinki Association – the successor to the *Ukrainian Helsinki Group) has published over 25 periodicals. Foremost among them have been the 'thick' journal **Ukrains'kyi visnyk* (est 1987, continuing a *samvydav journal circulated in 1970–4); its chief organ, *Samostiina Ukraina* (formerly *Holos vidrodzhennia*); and *Tsentral'na rada* and *Na ruiini* in Kiev, *Volia* in Chernihiv, *Lvivs'ki novyny* and *Respublikanets'* in Lviv, and *Ternystyi shliakh* in Ternopil. The URP has also published 4 other periodicals in Kiev, 2 others in Chernihiv, and 1 other in Lviv, as well as 2 organs in Ivano-Frankivske and in Kherson, 1 each in Lutske, Rivne, Chernivtsi, Kamianets-Podilskiy, Kharkiv, Kherson, Zaporizhia, Dnipropetrov-

Some of the new newspapers published in Ukraine in 1992

ske, and Cherkasy; and *Ukrainskii vopros* and *Natsional'nyi vopros*, in Russian, in Moscow.

Other new political organs have been the Lviv Social Democratic Organization's *Reforma* and *Al'ternatyva* in Lviv; *Demokratychnyi vybir* and, in Russian, *Demokraticheskii vybor* of the Democratic Platform in the CPU; the Ukrainian Democratic party's *Holos* in Kiev; the Ukrainian Christian Democratic party's *Voskresinnia* in Ivano-Frankivske and *Za viru i voliu* in Ternopil; the Ukrainian National party's *Visnyk* in Lviv; the Ukrainian Popular Democratic League's *Nezalezhnist'* in Kiev; the Lviv Electors' Club's *Vyborche pravo*; the Ukrainian Independence and Statehood party's *Poklyk voli* and *Samostiinist'* in Lviv; the nonpartisan nationalist *Zoloti vorota* in Kiev; the Radical Group's *Za i proty* in Lviv; the Social Democratic Federation of Ukraine's Russian-language papers *Sotsial demokrat Ukrainy* and *Osvobozhdenie* and journal *Dialog* in Kiev; the Ukrainian Peasant Democratic party's *Zemlia i volia* in Lviv; and the anarcho-syndicalist *Nabat* in Russian in Kharkiv.

Over 30 new periodicals for young people and students have appeared, mostly in Lviv or Kiev. The URP-affiliated Association of Independent Ukrainian Youth (SNUM) has published *Molodyi natsionalist* in Lviv, *Smoloskyp* in Chernivtsi, *Surma* in Stryi, and several other organs. A more integral-nationalist splinter group, SNUM-Nationalists, took over *Zamkova hora* from SNUM and has also published the journal *Rada* in Kiev and a few other periodicals. The PROUN Association of Ukrainian Youth has published organs in Chernivtsi, Kosiv, and Kharkiv.

Other notable alternative periodicals are the Ukrainian Association of Independent Creative Intelligentsia's literary journals *Kafedra* and *Ievshan zillia* in Lviv, *Karby hir* in Ivano-Frankivske, *Porohy* in Dnipropetrovske, and *Snip* in

Kharkiv; the All-Ukrainian Prosvita Society's (formerly Ukrainian Language Society) papers *Slovo* in Kiev and *Prosvita* in Lviv; the Ukrainian Autocephalous Orthodox church's *Nasha vira* in Kiev and *Svitlo viry* in Lutske; the Ukrainian Ecological Association's *Zelenyi svit* in Kiev; the *Lev Society's *Postup* and children's magazine *Svit dytyny* in Lviv; the *Memorial society's *Dzvin* in Ternopil and *Poklyk sumlinnia* in Lviv; the Ternopil Vertep society's *Posvit*; the independent papers *Vil'ne slovo* in Kiev, *Ukrain-s'kyi chas* in Dnipropetrovske and Lviv, *L'vivs'kyi visnyk*, *Nova doba*, and *Zhyttia i pratsia* in Lviv, and *Al'ternatyva* in Pavlohrad; the Ukrainian Independent Press Agency's *Polityka*, *Perspektyva*, and, in Russian, *Puti* in Kiev; the Kiev student Hromada's *Dzvin* (1988–9); the Lviv Student Brotherhood's paper *Bratstvo* and journal *Vikno*; the independent (formerly SNUM) nationalist youth paper *Moloda Ukraina* in Lviv; and the Kiev Ukrainian Student Association's paper *Svoboda*.

Some of the new newspapers published in Ukraine in 1992

More frequently published alternative newspapers were established in 1990. They include the Lviv Oblast Council's *Za vil'nu Ukrainu* (over 345,000 copies 3 times a week in 1992) and weekly *Frankova krynytsia*; Lviv oblast's paper *Moloda Halychyna* (until 1990 the Komsomol paper *Lenins'ka molod'*, 232,000 copies 3 times a week in 1992); the Lviv City Council's evening paper *Ratusha* (20,000 copies 3 times a week); and the Ukrainian Culture Fund's weekly *Zapovit* (50,000 copies) in Ternopil. Since 1991 the Ukrainian Supreme Council has published an official organ, *Holos Ukrainy*, 5 times a week in both Ukrainian and Russian editions (363,000 copies in 1992).

In 1992 there were 2,263 registered newspapers (290 republic-level) and 346 registered journals (262 republic-level) in Ukraine.

In 1992 the most widely circulated national newspapers in Ukraine were *Sil's'ki visti* (2,268,000 copies 5 times a week); *Nezavisimost'* (1,323,000 copies 1 to 4 times a week); *Molod' Ukrainy* (713,000 copies 3 times a week); *Holos Ukrainy*; *Robitnycha hazeta/Rabochoia gazeta* (300,000 copies 3 times a week); *Sportyvna hazeta* (243,000 copies 3 times a week); *Pravda Ukrainy* (220,000 copies 5 times a week); *Osvita* (164,000 copies once a week); *Demokratychna Ukraina* (112,000 copies 3 times a week); and *Literaturna Ukraina* (105,000 copies once a week). Influential regional newspa-

pers were *Vechirnyi Kyïv/Vechernii Kiev* (546,000 copies 5 times a week); *Lviv's Za vil'nu Ukraïnu* (345,000 copies 3 times a week) and *Moloda Halychyna* (232,000 copies 3 times a week); Ternopil's *Zakhidna Ukraïna* (100,000 copies once a week); and Ivano-Frankivske's *Halychyna* (134,000 copies 3 times a week).

Other new notable newspapers include Kiev's *Khreshchatyk* (5 issues per week), *Kyïvs'ka pravda* (3 issues per week), and weekly *Andriïvs'kyi uzviz*, *Dilova Ukraïna/Delovaia Ukraina*, *Rada*, *Ukraïna-Business*, *Finansovyi Kyïv*, and *Fortune*; Lviv's *Vysokyi zamok* (3 issues per week), *Dilo* (semiweekly), and *Post-Postup* (weekly); Dnipropetrovske's biweekly *Vil'na dumka*; Ternopil's *Vil'ne zhyttia* (5 times a week) and semiweekly *Ternopil' vechirniï*; Uzhhorod's *Novyny Zakarpattia* (3 to 4 issues per week); and Rivne's weekly *Rivne*. New journals include the Volhynian cultural quarterly *Volyn'* (Lutske); the bimonthly *Kyïvs'ka starovyna*; the bibliological bimonthly *Knyzhnyk*; the Lviv monthlies *Literaturno-naukovyi visnyk* and *Litopys Chervonoï kalyny*; the Kiev monthlies *Dilove zhyttia Ukraïny/Delovaia zhizn' Ukrainy*, *Bytyi shliakh*, *Nova heneratsiia*, *Polityka i chas/Politika i vremia*, *Trybuna*, *Tryzub*, and *Viche/Veche*; the children's monthly *Soniasnyk*; and the Ternopil bimonthly *Ternopil'*.

The postwar émigrés and refugees. After the Second World War the approx 200,000 Ukrainian refugees and émigrés in the non-Soviet occupation zones of Germany and Austria, as well as soldiers of the Ukrainian National Army (UNA) interned by the British near Rimini, Italy, began publishing their own newspapers, bulletins, and journals. In the years 1945–50 at least 327 noncommunist periodicals reflecting a wide spectrum of partisan opinion and interests appeared, two-thirds of them in the US zone in Bavaria. They included mimeographed bulletins in 19 displaced persons camps; 17 intercamp papers, 5 dealing with resettlement issues; and 18 church, 20 student, 14 literary, 13 organizational, 11 women's, 11 humorous, 11 satirical, 21 *Plast*, 6 OUN (Bandera faction), 4 OUN (Melynk faction), 5 Ukrainian Youth Association (SUM), 4 Ukrainian Revolutionary Democratic party (URDP), 3 hetmanite, 3 health, 3 sports, 2 socialist, 25 specialized, and many unclassified periodicals, with a total combined pressrun of 15 million copies. Many of the periodicals were mimeographed. The largest number appeared in the years 1946–8, before the German currency reform and the mass emigration of the majority of the refugees.

In the US zone only the semiweekly and later weekly paper *Ukrains'ki visti* (Neu-Ulm, 1945–78), the weekly papers **Chas* (Fürth, 1945–9), **Nashe zhyttia* (Augsburg, 1945–8), **Nedilia* (Schweinfurt, Aschaffenburg, and Augsburg, 1945–56), and *Na chuzhyni* (Vilsbiburg, 1947–8), the semi-weekly paper **Ukrains'ka trybuna* (Munich, 1946–9), the *Plast* magazines *Plastun* (Augsburg, 1945–7) and **Molode zhyttia* (Munich, 1946–50), the literary-cultural journal **Orlyk* (Berchtesgaden, 1946–8), and the illustrated magazine **Pu-hu* (Augsburg, 1947–50) received publishing licenses from the military government and free paper from the International Refugee Organization. The hundreds of other periodicals were sublicensed or published as supplements by them, or mimeographed on paper bought on the black market.

Widely read periodicals published in the US zone were, in addition to the aforementioned, the weeklies **Slovo* (Regensburg, 1945–6), *Khrystyians'kyi shliakh* (Munich, Karlsruhe, and Mittenwald, 1945–7), and *Ukrains'ka dumka*

Ukrainian émigré journals published in Germany in 1945–50

(Augsburg, 1946–8); the OUN journals **Vyzvol'na polityka* (Munich, 1946–9), *Za samostiïnist'* (Munich, 1946–8), *Nasha dumka* (Munich, 1947–8), and **Surma* (Munich, 1949); the URDP journal *Nashi pozytsii* (Neu-Ulm, 1945–9); the Hetmanite journal *Ukrains'kyi litopys* (Augsburg, 1946–8); the military journal *Do zbroï* (Munich 1946–5); the literary almanacs of **MUR* (Munich, 1946–7) and the literary-cultural journals *Ridne slovo* (Munich, 1945–6), **Zahrava* (Augsburg, 1946), and **Arka* (Munich, 1947–8); the women's magazine *Hromadianka* (Augsburg, 1946–50); the SUM journal **Avangard* (Munich, 1946–51); the satirical biweeklies

Dzhak (Ellwangen, 1946), *Komar-izhak* (Munich, 1946–9), and **Lys Mykyta* (Munich, 1947–9); the children's monthly *Mali druzi* (Augsburg, 1947–8); the political journal **Problemy* (Munich, 1946–8); and the religious weekly **Khrystyians'kyi holos* (Munich, est 1949).

Notable periodicals in the more controlled and censored British zone were the mimeographed camp dailies *Biuletyn' taboru im. M. Lysenka* (Hannover, 1945–7), *Radio-novyny* (Braunschweig, 1945–7), and *Ostanni visti* (Heidenau, 1947–8); the printed weeklies *Luna* (Heidenau, 1946), *Nasha poshta* (Heidenau, 1946–7), *Ukrains'ke slovo* (Blomberg, 1948–9), and **Ranok* (1948–51); the journal *Na chuzhyni* (Korigen, 1946–8); and the scholarly-literary magazine **Ukraina i svit* (Hannover, 1949–69). In Austria there were the camp daily *Taborovi visti* (Landeck, 1945–7); the weekly papers **Ostanni novyny* (Salzburg, 1945–9), *Nedil'ni visti* (Landeck, 1945–7), *Novi dni* (Salzburg, 1945–8), and **Promin'* (Salzburg, 1946–9); the satirical weekly *Proty shersty* (Landeck, 1946–7); and the literary-cultural journals *Kerma* (Salzburg, 1946–7), **Zveno* (Innsbruck, 1946–7), and **Litavry* (Salzburg, 1947). At the POW camp near Rimini, Italy, the daily *Zhyttia v tabori* (1945–6), the weekly *Bat'kivshchyna* (1945–7), and five other camp periodicals appeared.

Because of the mass emigration of Ukrainian refugees to other Western countries, by 1951 there were only 7 newspapers and 16 other periodicals in West *Germany, and none in Austria. Dozens of Ukrainian newspapers and journals and hundreds of bulletins have been established in the new host countries since the late 1940s, how-

B. Kravtsiv, R. Senkus

Press and information bureaus abroad. In the second half of the 19th century, Ukrainian émigrés (M. *Drahomanov and his Geneva circle), Galician and Bukovynian parliamentarians in Vienna, and I. Franko and other Galician publicists began informing the Western press and public about Ukrainian affairs, the national oppression of the Ukrainians, and the goals of the Ukrainian national movement. In the Russian Empire, members of the St Petersburg Ukrainian Hromada and later the State Duma, particularly M. Kostomarov, P. Kulish, D. Mordovets, O. Lototsky, P. Stebnytsky, M. Mohyliansky, M. Hrushevsky, O. Salikovskiy, M. Slavinsky, S. Petliura, P. Chyzhevsky, V. Shemet, and I. Shrah, played a similar role by contributing articles to influential Russian publications and later issuing their own periodicals, such as **Ukrainskii vestnik* (1906) in St Petersburg and **Ukrainskaia zhizn'* (1912–17) in Moscow.

From 1900 to 1920 the principal foreign center of information about Ukraine was Vienna. There R. *Sembratovych edited the Ukrainian affairs journals *X-Strahlen* (1901–2) and **Ruthenische Revue* (1903–5), and V. *Kushnir edited **Ukrainische Rundschau* (1906–14). In 1907 Kushnir established the first independent Ukrainian press bureau in Vienna. Elsewhere in Europe similar efforts were made by Ya. *Fedorchuk in Geneva and Paris, V. *Stepankivsky and G. *Raffalovich in London, O. Bochkovskiy in Prague, and L. Drahomanova and her husband, I. Shishmanov, in Sofia. In 1912 a short-lived Ukrainian Information Committee was initiated by A. *Zhuk in Lviv.

During the First World War the *General Ukrainian Council in Vienna published in German the information weeklies *Ukrainisches Korrespondenzblatt* (1914–16) and **Ukrainische Korrespondenz* (1917–18). The Vienna-based *Union for the Liberation of Ukraine (SVU) published

**Ukrainische Nachrichten* (1914–18) and **Ukrainische Blätter* (1916–18) in Vienna, *La Revue Ukrainienne* (1915–17) in Lausanne, Switzerland, and pro-Ukrainian propaganda in 11 European languages. Also in Lausanne, Stepankivsky organized a Ukrainian Bureau and published *L'Ukraine* (1915–20) and, irregularly, *The Ukraine*. The bureau disseminated the latest news about Ukraine, which it received from I. Nimchuk and I. Krevetsky, who worked for the Press Bureau of the Austrian Ministry of War. In Berlin a Ukrainian Press Bureau was organized by D. Dontsov and funded by the Ukrainian Parliamentary Representation; it published *Nachrichten des Ukrainischen Pressbüros* and political brochures in 1914–16. In 1916 Dontsov moved to Bern, Switzerland, where until March 1917 he headed the Bureau of Nationalities of Russia and published in German, French, and English the bulletin *Korrespondenz der Nationalitäten Russlands*, funded by V. Stepankivsky. In Budapest H. Strypsky published, in cooperation with the SVU, the Hungarian-language monthly **Ukránia* (1916–17). In the United States two organizations – the Ukrainian National Council (later Committee) and the Federation of Ukrainians – published a number of information bulletins and brochures.

After the creation of the Ukrainian Central Rada in 1917, and particularly after the proclamation of Ukrainian independence in January 1918, information services became the responsibility of government agencies, notably of Ukrainian consulates and missions abroad, which were allotted funds for this purpose from the state budget. In addition a private Ukrainian press bureau functioned in Vienna under the direction of V. Biberovych and M. Bardakh briefly in 1917. The 1918 Hetman government's Ministry of Internal Affairs established a Ukrainian Telegraph Agency (UTA) and State Press Bureau; headed by D. Dontsov, the UTA systematically published press bulletins in various European languages. In Vienna in 1918, V. Kalynovych published *Ukrainische Blätter*, and late that year the UNR Directory established a Ukrainian Press Service (UPS) there. Headed by V. Bryndzan and O. Kushchak, the UPS was financed initially by the Western Ukrainian National Republic (ZUNR) mission in Vienna and in 1919–20 by the UNR mission. It was the main Ukrainian information agency in Europe at the time. In addition press bureaus attached to UNR missions in London, Sofia, The Hague, Copenhagen, Berlin, Budapest, Helsinki, Paris, Bern, Lausanne, Athens, and New York issued bulletins in the official languages of their host countries. Particularly comprehensive press and information activities were conducted by the UNR and ZUNR delegations at the Paris Peace Conference, to countervail the Polish and Russian émigré lobbies there.

In the interwar period the Government-in-exile of the ZUNR established a press bureau in Vienna; headed by V. Biberovych, it functioned from early 1920 to March 1923. Until 1939 the *Government-in-exile of the UNR conducted an intensive information campaign through its various representatives employed by foreign press agencies (eg, M. Kovalevsky, M. Yeremiiv) and through its missions, primarily that in Paris, which subsidized the periodicals *L'Europe orientale* (1919–20), *France et L'Ukraine* (1920), *Prométhée* (1924–38), *L'Ukraine nouvelle* (1927–9), *Bulletin du Bureau de Presse ukrainienne* (1934–9), *La *Revue de Prométhée* (1938–40), and other publications. In Switzerland M. Yeremiiv's *Ofinor agency issued press bulletins

A bulletin published by the Ukrainian Press Service in Geneva (1930)

in German, French, and Ukrainian in Geneva (1928–44); in French (1929–39) and Spanish (1932–6) in Paris; and in Italian in Rome (1929–43). In Berlin a government-supported *German-Ukrainian Society published the journal *Die *Ukraine* (1918–26). Other news and information periodicals were also published there: *Deutsch-Ukrainische Zeitung* (1920), edited by H. Kliuk; *Osteuropäische Korrespondenz* (1926–34), edited by Z. Kuzelia and R. Jary; and **Ukrainische Kulturberichte* (1933–40), published by the Ukrainian Scientific Institute in Berlin. In London the Ukrainian Bureau, headed by V. Kaye-Kysilevsky, published several bulletins from 1930 to 1939, and a group of hetmanite supporters published the bulletin *The Investigator* (1932–4), edited by V. Korostovets. In Prague **Ukrains'ka korespondentsiia* (1930–1) and *Ukraina* published information in Czech, and M. *Hekhter wrote on Ukrainian affairs in the journals *Prager Presse* (1921–38) and **Slavische Rundschau* (1929–40). In Warsaw the Ukrainian question in Poland was illuminated in *Natio* (1926–7), a monthly edited by P. Lysiak and published in English, French, German, and Polish, and in the weekly **Biuletyn Polsko-Ukraiński* (1932–8) and monthly *Problemy Europy Wschodniej* (1939), edited by W. Bączkowski.

In the 1930s the OUN developed its own press and information network in Europe. Its *Ukrainian Press Service in Berlin published the bulletin *Ukrainischer Pressedienst*, edited by M. Seleshko (1931–4) and V. Stakhiv (1937–41). In New York City the OUN ran a Ukrainian Press Service

from 1938 to 1941 under the direction of Ye. Skotsko. It also issued *Bulletin d'informations ukrainiennes* (ed M. Kushnir) in Geneva, a bulletin in English (ed Ye. Liakhovych [1933–5] and S. Davidovich [1938–9]) in London, and bulletins in other languages in Rome, Prague, Kaunas, Paris, Vienna, and Madrid.

Since the Second World War, information about Ukraine has been disseminated in the West by various Ukrainian political and community organizations in Western Europe and the New World. Information in several languages has been released by the Munich-based Ukrainian Supreme Liberation Council (UHVR) and Ukrainian National Council. English-language news and analyses of developments in Ukraine have been published in Jersey City, New Jersey, in the Ukrainian National Association's **Ukrainian Weekly* (est 1933); in New York City in the Ukrainian Congress Committee of America's **Ukrainian Quarterly* (est 1944) and biweekly *Ukrainian Bulletin* (1951–70), in the **Prolog Research Corporation's *Digest of the Soviet Ukrainian Press* (1957–77) and *Prolog* (1957–61), and, in the early 1980s, in the *Herald of Repression in Ukraine* (ed N. Svitlychna) of the External Representation of the Ukrainian Helsinki Group; in Munich in the Anti-Bolshevik Bloc of Nations' *ABN Correspondence* (est 1950) and the quarterly **Problems of the Peoples of the USSR* of the League for the Liberation of Ukraine; in London in the Association of Ukrainians in Great Britain's **Ukrainian Review* (est 1954) and, in the mid-1980s, in the Prolog-funded *Focus on Ukraine* and *Soviet Nationality Survey*; in Baltimore, Maryland, in the **Smolokyp* information service's *Smolokyp* (est 1974); and in Toronto in the World Congress of Free Ukrainians' *Ukrainian Newsletter* (est 1980). In the late 1980s the London-based Ukrainian Press Agency, directed by T. Kuzio, issued press releases about developments in Ukraine. Information has appeared in German in **Ukraine in Vergangenheit und Gegenwart* (1952–7, 1962–8) in Munich; in Portuguese in *Boletim informativo* (1946–9), a monthly published in Curitiba, Brazil, by a UHVR-affiliated Ukrainian Press Service; in Spanish in *Ucrania Libre*, published in the 1950s by a Ukrainian Information Bureau in Buenos Aires, and in a Spanish version of *Smolokyp* (est 1975); in Italian in *Ucraina* (1954–6, ed V. Fedoronchuk) and in press releases issued by a Ukrainian Press Bureau (est 1985) monitoring religious affairs in Ukraine, in Rome; and in French in *L'Est européen* (est 1960), **Echoes d'Ukraine* (1962–9), *Bulletin Franco-Ukrainien* (1959–70), and **Echanges: Revue franco-ukrainienne* (est 1971) in Paris.

Notable non-Ukrainian institutions that have issued information on and analyses of developments in Ukraine are **Radio Liberty* and the **Institute for the Study of the USSR* in Munich, Vatican Radio, and Keston College in England.

V. Markus

Press Office of the Supreme Command of the Ukrainian Galician Army (Presova kvatyrna Nachalnoi komandy UHA). A press and information department that from January 1919 to January 1920 organized education and entertainment for the soldiers of the Ukrainian Galician Army (UHA) and civilians and publicized the army's activities and the cause of Ukrainian independence. Headed by I. Erdenberger, I. Herasymovych, and, from November 1919, O. Levytsky, it published the newspapers *Kozats'kyi holos* (68 issues, 1919–20) and **Strilets'*, the al-

manac *Ukrains'kyi prapor*, pamphlets, and leaflets and organized lectures, plays, concerts, public meetings, and libraries on wheels. The office had information bureaus in the three UHA corps and representatives in all the brigades. UHA officers attached to the press office included writers and journalists, such as I. Krevetsky, V. Pachovsky, R. Kovshevych, R. Kupchynsky, L. Lepky, and V. Bobynsky.

Ivan Bobersky at the Press Office of the Ukrainian Sich Riflemen in Sosniv in 1916. From left: Osyp Kurylas, Lev Lepky, Mykhailo Haivoronsky, Roman Kupchynsky, Bobersky, Ivan Ivanets

Press Office of the Ukrainian Sich Riflemen (Presova kvatyrna Ukrainskykh Sichovykh Striltsiv). The information department of the Ukrainian Sich Riflemen (USS). Established in the fall of 1914, it published prose, poetry, manuals, and songbooks for the USS; the newspaper *Vistnyk Presovoi kvatiry*; the humor magazines *Samokhotnyk* (35 issues, 1915–19) and *Samopal* (1916, 10 issues); and an almanac (1917). The office's first heads were T. Melen and O. Nazaruk. They were succeeded by I. Ivanets, who headed its work at the front (1916–18), and M. Uhryn-Bezhrishny, who directed the work at headquarters. Many writers, artists, and musicians were attached as USS to the office, among them L. Lepky, R. Kupchynsky, M. Haivoronsky, A. Babiuk (M. Irchan), L. Lutsiv, L. Gets, Yu. Butsmaniuk, M. Havrylko, M. Holubets, and O. Kurylas. The office also maintained a written and photographic chronicle of the USS, and organized education for the soldiers.

Pretvych, Yov [Pretvyč, Jov], b ?, d (probably) 29 October 1571. Architect, military engineer, and builder. One of the outstanding Ukrainian Renaissance architects, he worked on various castles and fortifications, notably in Cracow and Vilnius. He is particularly famous for his complete reconstruction of the fortress at Kamianets-Podil'skyi, where he rebuilt and strengthened the defensive walls and five of the main towers, and erected many new structures, including the so-called Polish gate system with towers and other fortifications.

Pretwicz, Bernard, b ca 1500, d ca 1563. Silesian noble and Polish military figure. From 1525 he served King Sigismund I as an envoy in Europe. As the Polish cavalry commander in Podilia from 1538 and starosta of Bar (1540–51) Pretwicz became famous for his defense of the Polish Commonwealth's steppe frontier in Ukraine. His force of Polish cavalry and registered Cossacks fought Tatar raiders in Podilia and Right-Bank Ukraine; it defeated them 70 times, and 3 times (1541, 1542, 1545) it attacked the Ottoman fortress in Ochakiv. His troops released many Tatar captives and took many horses and prisoners. In his apologia (pub 1866) presented to the Polish Sejm in 1550, Pretwicz reported on the border war and defended himself against the sultan's grievances. He was relieved of his command and appointed starosta of Terebovlia in 1552.

Priashvshchina (The Prešov Region). A semiweekly (1945) and then weekly organ of the pro-Soviet Ukrainian People's Council of the Prešov Region, published in Prešov from March 1945 to August 1951. It was supported primarily by Russophiles and appeared mostly in Russian, although some articles and feuilletons and humor were published in the Prešov dialect, especially after 1949. The paper contained pro-communist articles on political and community affairs in the Prešov region. The chief editors were I. Pieshchak and F. Lazoryk.

Přibík, Josyf (Pryibik, Yosyp), b 11 March 1855 in Příbram, Bohemia, d 20 October 1937 in Odessa. Conductor, composer, and pedagogue of Bohemian descent. After graduating from the Prague Piano Academy (1875), he moved to Smolensk (1878) to teach at the Russian Musical Society school. He subsequently worked as an opera conductor (1880–94) in Kharkiv, Lviv, Kiev, Moscow, and Tbilisi before becoming principal conductor of the Odessa Opera (1894–1937). From 1919 he served as a professor at the Odessa Conservatory. His works include eight one-act operas, symphonic and vocal pieces, and articles on music theory.

Prices. The amounts of money for which things are exchanged. From 1917 the Soviet government in Ukraine implemented price-stabilizing policies as an integral part of economic planning. During the period of War Communism hyperinflation made the currency worthless. Transactions between state enterprises were made on the basis of bookkeeping entries. Food was requisitioned from the peasantry by the government, and workers were paid in kind. The *New Economic Policy announced in 1921 restored private trade and monetary transactions. Hyperinflation continued because of the dearth of goods on the market. To control the situation the *chervonets*, backed by gold, was introduced in 1922 alongside the rapidly depreciating *radznak*, which was abolished in early 1924. In autumn 1923 the so-called Scissors Crisis occurred as a result of falling agricultural prices and rising industrial prices. Based on an index of 100 for 1 November 1923, wholesale industrial prices in Kharkiv reached 4740.6 by 1 March 1924. State-enforced selling of industrial products eventually brought about price stability.

During the late 1920s price controls were used increasingly as an instrument of economic policy. State enterprises and co-operatives were required to undercut prices

found in the private retail sector. That measure led only to shortages, speculation, and the payment of low grain prices by the state to the peasants. With the onset of collectivization and the First *Five-year Plan the private sector was eliminated, the peasantry was forced to sell its produce to the state at fixed prices, and price controls were imposed on all goods. In Ukraine in 1928 the price paid by the state for wheat was set at 8.05 *karbovantsi* per 100 kilograms. It remained fixed until 1935, when a 10 percent increase was allowed. From 1928 to 1940 economic policy emphasized industrialization at the expense of price stability. A turnover tax was introduced in 1930, and thereafter price increases became a function of increases in tax. Different prices were introduced for the same commodity: retail prices for goods sold by ration coupons, state 'commercial' prices for goods sold by special authorization at higher prices, and market prices found in quasi-legal bazaars and the black market. Prices in state and co-operative stores were eventually raised to obviate the need for rationing.

The immediate postwar period saw a return to the system found in the early 1930s. Large subsidies kept industrial prices down, rationing and high 'commercial' prices emerged, and eventually rationing, which had been preceded by large price increases, was abolished. Price reductions were introduced between 1947 and 1954, but the measure resulted only in large-scale shortages. After 1954 the Soviet government embarked on a rigid policy of price stabilization, which halted inflation and resulted in continual shortages in state stores and in a flourishing black market. Although officially denied, some degree of inflation continued, because factories replaced low-priced old products with slightly modified higher-priced new products.

Price formation was highly centralized, and prices were set by the USSR State Planning Committee (Gosplan) and its affiliated section, the State Committee on Prices. Factory wholesale prices were determined by the average cost of production plus a certain profit margin (usually 3–5 percent). Industrial wholesale prices were prices at which goods were transferred to users outside the industry, and they included a turnover tax. Retail prices were also set by the state, and included a turnover tax. In practice prices were set quite arbitrarily. Many industrial and agricultural products were heavily subsidized, and many industries operated at a continuous loss. Bread and meat prices did not change for decades, whereas vodka prices went up by large jumps. There were also regional price differences, although the differences within a republic were small. It has been calculated that food prices in Ukraine were 13 percent lower than the Union average. Arbitrary prices were also a means of achieving capital transfers between republics. Ukraine, as an exporter of predominantly low-priced raw materials and semiprocessed goods, such as grain, coal, and metal products, and an importer of high-priced finished products, such as machinery, manufactures, and textiles, effectively exported its national income regardless of its interrepublican trade balance.

Complete price revisions, such as the 1967 and 1982 changes, were political decisions. From 1987 price reform reduced the number of commodity prices fixed by the Central State Planning Committee and delegated more responsibility to territorial boards and self-financing enterprises. Large-scale price reform based on market supply

and demand was actively discussed and continually delayed until the decline of the USSR in 1991.

B. Somchynsky

Priiatel' ditei (Children's Friend). An illustrated magazine for children, edited and published in 1881–3 in Kolomyia monthly and then semimonthly (a total of 25 issues) by I. Trembytsky.

Prikarpatskaia Rus' (Subcarpathian Ruthenia). A Rusophile daily newspaper published in Lviv in 1909–15 by the Russian People's Organization and edited by S. Labensky. Renewed after the First World War (December 1918 to December 1920) as the organ of the *Russian Executive Committee under the editorship of K. Valnytsky, it supported the White forces in the Russian Civil War and welcomed Hetman P. Skoropadsky's proclamation of Ukraine's federation with Russia. Falling circulation caused the newspaper to close; it was succeeded by **Volia narodu*.

Prikaz. A Russian term for a government office or chancellery, from the Russian word for order or command. In the 16th, 17th, and early 18th centuries *prikazy* were agencies of the Muscovite central government. Each *prikaz* had specific responsibilities and its own budget and staff. Their number was not constant; altogether there were 80 of them. Each *prikaz* was headed by a *sudia* (judge) appointed, usually from among the boyars, by the tsar. Day-to-day operations were conducted by *diaki* (secretaries), *podiachie* (undersecretaries), and their support staff. *Prikazy* that dealt with Ukrainian matters were the Foreign Office (Posolskii prikaz); the *Little Russian Office; the War Office (Razriadnyi prikaz), which supervised the towns of the Hetman state where Muscovite garrisons were stationed; and the Office of Great Russia (Prikaz Velikoi Rossii), which supervised the administration of Slobidska Ukraine's regiments in 1687–1700. In 1718–20 Emperor Peter I replaced the *prikazy* with fewer but more efficient *kollegii* (collegiums) modeled on Swedish counterparts (see *Little Russian Collegium).

Primary Chronicle. See *Povist' vremennykh lit.*

Primary education. See Education and Elementary schools.

Primary party organizations (PPO). The lowest units in the structure of the CPSU. Their major goal was to recruit new members and to ensure adherence to Party policy at every level of economic activity. They were formed in places of employment, such as factories, collective farms, institutions, military units, and schools, or in specific housing districts or settlements. Until 1939 these organizations were referred to as 'cells.' At an annual meeting members elected a secretary and deputy. If a PPO had more than 15 members, a larger bureau was elected to run its day-to-day affairs. If there were more than 150 members, full-time Party workers were hired. A PPO was required to hold monthly meetings. The minimum size of a PPO was 3 members. In factories with over 50 Party members PPOs could be established in individual departments. In factories with over 300 Party members, or in some cases over 100 members, a Party committee could be formed to

co-ordinate the work of the PPOs in the departments. In all instances smaller Party groups could be formed in the various work brigades. Funding for a PPO was provided by the CPU. In 1986 there were 70,900 PPOs in Ukraine, with an average membership of 107 per PPO.

Primitive art. Pictures by artists without professional training who work in a way that differs from the traditional or avant-garde with respect to manner of depiction and techniques of paint application. Such pictures show an idiosyncratic naïveté in the treatment and depiction of the subject matter and the use of the medium. Icons on glass popular from the late 18th to the early 20th centuries in Western Ukraine are charming examples of primitive art, as are folk icons on panels created by artists who took inspiration from professionally painted models. The most prominent Ukrainian primitive artist is *Nykyfor, who rendered churches, other buildings, saints, and people in captivating compositions. Others whose work was influenced by Ukrainian folk art and ornamentation include K. *Bilokur, who painted flower fantasies, and M. *Prymachenko and H. *Sobachko-Shostak, both of whom portrayed fantastic creatures and plant motifs in vivid colors. Of the Ukrainian primitive artists working outside their homeland, D. *Stryjek in Canada has received the greatest recognition.

Primore krai. See Far East.

Primorsko-Akhtarsk [Primorsko-Axtarsk] (Ukrainian: Prymorsko-Akhtarske). VII-19. A port city (1974 pop 28,000) on the Sea of Azov and a raion center in Krasnodar krai, RF. According to the Soviet census of 1926, Ukrainians accounted for 64.5 percent of the city's population.

Prince (*kniaz*). The title of the ruler among many Slavic peoples. In medieval Ukraine the first princes were the rulers of the various Slavic *tribes. Their authority was usually restricted to military defense of the tribal territory and a few administrative and judicial functions. The various lands, districts, and village communities had their own organs of self-government. After the establishment of the *Riurykide dynasty and the creation of the Kievan Rus' state in the 9th century, the authority of the prince gradually increased and became more monarchical in nature. Most of the East Slavic lands came under the rule of the so-called grand prince of Kiev. In the late 11th century the Kievan state began breaking up into separate independent principalities. Thenceforth the various Rus' princes were no longer the sole bearers of executive power, but ruled alongside the *Boyar Council and the popular assembly, or **viche*. The prince had supreme military, legislative, and judicial authority within his principality. He collected taxes and tribute from the population and represented it at various congresses of princes (*snemy*).

The order of princely succession was complex. The guiding principle was genealogical seniority, according to which the oldest member of the dynasty ascended the Kievan throne, and the younger members, according to their age and place on the genealogical tree, became the rulers of various appanages that were themselves ranked hierarchically. All Riurykides had the right to rule a principality, and in the event of the death of one of the senior princes they acquired a higher-ranking appanage. At the

1097 *Liubech congress of princes genealogical seniority was abandoned in favor of the principle of primogeniture. Both principles, however, were at times disregarded by the *viche*, which elected another prince as their ruler after expelling (and even killing) a prince who had neglected his responsibilities or abused his office. Often the principles were violated by the more powerful princes themselves, who would seize the thrones of their weaker counterparts.

In addition to princes who ruled there were also servitor (*sluzhebni*) princes, who did not inherit domains, or were forced to cede the ones they had, and entered the service of ruling princes. After the Mongol-Tatar invasion the princes' role was dramatically reduced. The khan of the Golden Horde influenced succession to the various thrones by conferring his patent (*iarlyk*) only on princes who were sufficiently obeisant and brought him tribute. After the annexation of most of Ukraine by the Grand Duchy of Lithuania in the 14th century, the Ukrainian princes became its vassals. In the 15th and 16th centuries they gradually ceased being rulers and became influential landowning magnates who retained only a few of their ancient privileges, such as the right to maintain a small, private military force (*korohva*). Essentially, however, they became the upper echelon of the Lithuanian-Ruthenian landed nobility.

Princely era (*kniazha doba*). The term used by non-Soviet Ukrainian historians, and some Russian historians, to designate a 500-year period in the Middle Ages when the East Slavic *princes held political power over the territory of present-day Ukraine. The princely era encompasses (1) the period from the creation of the independent *Kievan Rus' state in the 9th century to its disintegration after the Mongol-Tatar invasion of 1240, and (2) the contiguous period of the independent Principality of *Galicia-Volhynia, which disintegrated after the death of its last prince, Yuri II Boleslav, in 1340.

Most modern non-Soviet Ukrainian historians have adhered to M. *Hrushevsky's scheme of Eastern Slav history, in which the princely era is treated as an integral part of Ukrainian history. According to Hrushevsky 'the Kievan [Rus'] state, law, and culture were the creation of a single nationality – the Ukrainian-Rus' [nationality]' and 'the Kievan period merged with the Galician-Volhynian period in the 13th century.' Most Russian and some Western

PRINCELY ERA IN THE 11TH-13TH CENTURIES

historians have viewed the era as belonging solely to Russian history. The term 'princely era' was not used at all in Soviet historiography. Instead Soviet historians used the term 'period of feudalism' and propounded the officially sanctioned view that an 'ancient Rus' people' and the 'ancient Rus' state' were the cradle of three 'fraternal' peoples, the Russians, Ukrainians, and Belarusians. Ukrainian historians in the West have rejected the appropriation of the princely era by Russian historians and the Soviet fraternal peoples theory, viewing it as a veiled version of the Russian imperialist interpretation.

A. Zhukovsky

Printing. The earliest books printed in the Ukrainian re-daction of Church Slavonic and in the Cyrillic alphabet in general – the Orthodox hymnal *Oktoikh* (Octoechos) and *Chasoslovets'* (Horologion) – were produced in 1491 by S. Fiol, a Franconian expatriate in Cracow. These were followed by liturgical books produced in the Lithuanian-Ruthenian state by short-lived presses on Belarusian territory, such as F. Skoryna's in Vilno (now Vilnius in Lithuania, 1525), I. Fedorovych and P. Mstislavets's in Zabludove (now Zabłudów in Poland, 1568–70), and V. Tsiapinsky's itinerant press (ca 1565–70).

The first press on Ukrainian ethnic territory was founded by I. *Fedorovych in Lviv (1573–4). Its equipment and assets were used to found the *Lviv Dormition Brotherhood Press (1591–1788), which played a key role in the history of early Ukrainian printing. Thereafter Lviv remained a major printing center. Established there were Polish (1592–1602, 1670–3, 1684–93), Calvinist (1608–11), and Armenian (1616–18) presses; Cyrillic presses owned by Y. Sheliha (1618–20, 1626–36), M. *Slozka (1638–67), Bishop A. *Zhelyborsky (1644–6), and Bishop Y. *Shumliansky at St George's Cathedral (1687–8); a press at the Polish Jesuit college (1642–1773); and the Polish presses of P. Golczewski (1735–51), J. Filipowicz (1753–67), and the Szlichtyn family (1755–85). Under Austrian rule the Pillar family press (1772 to 19th century) printed books in Latin, Gothic, Hebrew, Greek, and Cyrillic. Other early Cyrillic presses in Galicia were Bishop H. Balaban's *Striatyn Press (1602–6), his press in Krylos (1605–6), Y. Sheliha's press in Dobromyl (1611–17), P. *Liutkovych-Telytsia's press in Uhortsi (1617–21), and the *Univ Monastery press (1648–1770), founded by Bishop Zhelyborsky. A Jewish press founded by U. Foebus Halewy operated in Zhovkva (1693–1782); smaller ones existed in Sambir and Turka.

Printing in Volhynia began after Fedorovych entered the service of Prince K. Ostrozky and founded what became the important *Ostrih Press (1577–1612). Other Cyrillic presses were founded by Prince Ostrozky at the *Derman Monastery (1602–5); by K. *Stavrovetsky in Rokhmaniv (1618–19); by P. Liutkovych-Telytsia in Chetvertnia (1624–5), Lutske (1625–8), and Chorna (1629); and at the Epiphany Monastery in Kremianets (1637–8). Later the important *Pochaiv Monastery Press (1730–1918) was founded.

In Right-Bank Ukraine the Polish Protestant Panivtsi Press (1608–11) functioned briefly in Podilia. In Kiev, printing began with the founding of the *Kievan Cave Monastery Press (1615–1918). It remained the largest press in Ukraine until the mid-19th century. Other presses in Kiev were founded by T. *Verbytsky (1624–8) and S. Sobol (1628–31). In 1787 a press was founded at the Kiev-

an Mohyla Academy; later it became the press of the Kiev Theological Academy.

In Left-Bank Ukraine the first presses were those of K. Stavrovetsky in Chernihiv (1646) and Archbishop L. Baranovych in Novhorod-Siverskyi (1674–9), which was moved to Chernihiv and became the important *Chernihiv printing press (it was later housed, until 1785, at the *Trinity-St Elijah Monastery).

In 1720 Tsar Peter I subordinated the presses in Kiev and Chernihiv to the Russian Orthodox church and forbade the printing of all but church books sanctioned by church censors in St Petersburg. From 1721 all books printed in Ukraine were strictly controlled and censored by the Holy Synod, and all Ukrainianisms were consequently banned in imprints of liturgical texts. Secular printeries founded in the second half of the 18th century printed mostly tsarist decrees and government instructions and Russian books of minor importance. Under tsarist rule a Polish-Russian press operated at the Carmelite monastery in Berdychiv (1760–1840). Gubernial government presses were founded in Kremenchuk (1765, 1788–9, 1791), Zhytomyr (1783–1918), Katerynoslav (1793–1918), Kharkiv (1793–1918), Chernihiv (1797–1918), Mykolaiv (1797–1918), Kamianets-Podilskyi (1798–1918), Kiev (1799–1918), and, in 1807, all other gubernial capitals. Jewish presses were founded in several Volhynian and Podilian towns, and Polish presses existed in Yaryshiv (1790–2), Minkivtsi (1792–1829), Mohyliv (1797), Yaniv (1812–20), and Kamianets-Podilskyi (1811–49) in Podilia.

In the early 19th century, metal and mechanical printing was introduced into Ukraine, and the modern *printing industry evolved there. A Museum of Book Printing was opened in Lviv in 1977.

Printing industry. A branch of industry that produces various types of printed goods: books, newspapers, journals, maps, posters, tickets, brochures, and so forth. Under the official Soviet system of economic classification the printing industry includes printing enterprises and manufacturing associations, typesetters, bookbinders, and enterprises that produce printing equipment and dyes. Printing as a modern industry emerged in the early 19th century with the development of new printing processes. (For the early history of the industry, see *Publishers and publishing and *Printing.)

The invention of lithography in the 1790s marked an important turning point in the printing industry, as it was cheaper than old-style printing methods and made better prints (see *Graphic art). The first lithographic press in Ukraine was established in Lviv in 1822; soon afterward such presses were set up in Kiev (1828), Odessa, Kharkiv, and elsewhere. The introduction of automated rotary printing presses in the second half of the 19th century made possible a rapid increase in the speed and ease of

printing. The presses were developed primarily to meet the demands of newspaper publishing. Wide-circulation newspapers were published for almost every gubernia in the Russian Empire after the 1860s. In addition there were several eparchial newspapers, some privately owned papers, journals, and other publications (see *Press). Most of those publications appeared in Russian, because of the official ban on the Ukrainian language. The ban especially hindered the development of *book publishing in Ukraine. By 1897 there were 22 printing houses in Kiev, 55 in Odessa, 27 in Kharkiv gubernia, 36 in Poltava gubernia, and 27 in Volhynia gubernia. In Galicia the number of presses increased from 25 in 1851 to 85 in 1890; most of them were located in Lviv. At that time hardly any printing machinery or equipment was produced in Ukraine, and everything was imported from abroad (mostly Germany). Innovations such as monotype, linotype, and offset printing also came from Western Europe or the United States. In 1917 in Kiev there were 154 printing houses, employing over 1,700 workers. They owned 14 rotary, 182 offset and flatbed, 35 lithographic, and 152 cast presses, and 9 linotypes and 5 monotypes.

In the 1920s literacy spread rapidly throughout the country, and the Communist party placed great emphasis on the development of printing, primarily for the purpose of agitation and propaganda. At the beginning of 1922 there were 230 printing enterprises, employing over 12,000 people, in Ukraine. By 1932 every raion (390 altogether) had a printing press, and oblast capitals and other major cities had several. The major printing enterprises were concentrated in Kharkiv, the capital of Ukraine at the time. They included the Dzerzhinsky, Blakytyn, and Communist printing houses, which specialized in newspaper printing, and the Frunze factory, which concentrated on journals and books. Other large printing houses were in Kiev, Kremenchuk, Luhanske, Donetsk, and Odessa. The larger presses were administered by the republican authorities; smaller ones were under oblast, city, raion, or other administration. On the eve of the Second World War there were some 140 small printing houses in Lviv and many in other cities of Western Ukraine. Those privately owned presses were nationalized by the Soviet regime after the occupation of Western Ukraine. By 1940 throughout the Ukrainian SSR there were 885 printing houses, including 30 republican, 24 oblast, 58 city, 743 raion, and 30 other presses. In total some 20,000 workers were employed in the industry. In 1941, printing establishments in Ukraine contained 250 linotypes, 9 monotypes, and 1,041 flatbed, 45 newspaper rotary, 2 book rotary, and 12 offset presses.

The printing industry continued to expand after the Second World War. Kiev emerged as its most important center. Printing technology improved, and greater capacity was concentrated in fewer printing houses. In 1970 there were 857 printing houses in Ukraine – 27 republican, 18 oblast, 9 Party, 104 city, and 408 raion presses – employing some 35,000 workers. Those enterprises operated 1,639 typesetting machines (monotypes, linotypes, etc), and 28 book rotary, 206 newspaper rotary, 2,828 flatbed, and 267 offset presses. In recent years the concentration of printing facilities has continued, as has the increase in capacity. In 1984, 544 enterprises of the printing industry came under the authority of the Ukrainian SSR State Committee for Publishing, Printing, and Book Trade: 23 under

republican, 11 under oblast, 90 under city, and 420 under raion jurisdiction. Other presses were under the direct control of the Communist party or government ministries or agencies. In general, however, the industry was still much more poorly developed than in other parts of the USSR; in 1967, for example, per capita book production in Ukraine was 33 percent of that in the RSFSR, and per capita newspaper production was 57 percent. The industry was highly centralized. The mass production of Russian-language publications served to further Russification in Ukraine. The postwar trends in the three main branches of the industry, book, newspaper, and journal printing, are summarized in the table. But the capacity of the printing industry has increased. In general a relatively small number of mostly political and propagandistic works were printed in very large pressruns.

The printing of books, journals, newspapers, and bulletins in Ukraine, 1960–87

| <i>Newspaper and bulletin titles</i> | 3,280 | 2,618 | 1,737 | 1,784 |
| Annual circulation (in millions) | 1,624 | 3,478 | 4,497 | 4,718 |

The largest printing facilities today are the Demokratychna (formerly Radianska) Ukraina Printing Complex in Kiev, which has printed the publications of the *Radianska Ukraina publishing house and many other periodicals; the Kiev Polihrafknyha Manufacturing Association, whose 12 printing houses (including 6 in Kiev) print books, especially colored and illustrated books; the Kharkiv Frunze Book Factory, which specializes in textbooks; and the Lviv Atas Manufacturing Association, which concentrates on children's books. The Zoria and Polihrafist manufacturing associations print mostly packaging and labeling materials and writing paper.

Printing and typesetting machinery was built in the USSR from the 1920s. The first linotype was made in Lenin-grad in 1930. Increasingly the industry has adopted offset technology. By 1983 some 46 percent of the output of enterprises under the State Committee for Publishing was being done on offset printing presses. The development of phototypesetting and the adoption of computers in the printing industry has been very slow in comparison with Western Europe and North America.

The problems of the printing industry are studied at the *Ukrainian Scientific Research Institute of the Printing Industry. Technical personnel are trained at the *Ukrainian Printing Institute in Lviv.

Printmaking (*estamp, stankova graviura*). The process and art of imprinting or stamping an engraved image onto paper, cloth, or leather. Unlike engravings or lithographs, prints are not necessarily made to be printed in books but are works of art that exist independently of textual material. In practice early Ukrainian artists did not make this distinction. They often glued prints into books, and some reprinted illustrations on loose sheets and hung them as prints. Modern prints are individually signed by the artist in pencil and are printed in small quantities (usually 25 to 100 copies). According to established tradition some engravers often carve their name or initial in the bottom right-hand corner of the engraving block.

Early Ukrainian wood engravings of the 16th century are not prints in the strict sense of the word, because they were all printed in books. They could, however, function as prints (eg, the picture of the Evangelist Luke in the *Apostol* printed in Lviv in 1574). The first prints executed on individual sheets of paper were the early-17th-century portrayals of the four Evangelists printed by P. Berynda at the Striatyn Press. During the 17th and 18th centuries prints of folk icons and folk drawings became popular throughout Ukrainian society because they were much less expensive than paintings or painted icons.

Professional printmaking of the 17th and 18th centuries holds a special place in Ukrainian art. At that time it was developed more fully than painting, sculpture, or graphic art. Not only religious but also secular portrait, landscape, and still-life printmaking developed fully. Synthetic genres particular to the art of printmaking were created – the address of welcome, the thesis frontispiece, the calendar of saints, the genealogical tree, and the heraldic crest. Ukrainian printmaking generated variations of European styles (Renaissance, baroque, rococo, classical, and Romantic). The print styles spread to other art forms. Thus printmaking was the innovator among the art forms. The greatest printmakers of the Cossack era were *Illia, *Prokopii, D. *Sinkevych, N. *Zubrytsky, O. and L. *Tarasevych, I. *Shchyrytsky, I. *Myhura, A. *Kozachivsky, H. *Levytsky, D. *Haliakhovsky, and Ya. Konchakivsky.

During the 19th century printmaking underwent great changes. The technique of engraving was perfected, and lithography was introduced. Prints acquired characteristics of painting, because painters desired to popularize their works by 'translating' them into graphic art. The secularization of art had a negative effect on printmaking: it reduced its subject matter and diluted the force of its spiritual expressiveness and the unique national character achieved during the preceding centuries. Only T. *Shevchenko can be included among those artists who raised the level of printmaking, in both subject matter and technique. Many foreign masters of printmaking worked in Ukraine during the 19th century.

Ukrainian printmaking was reborn in the 20th century in the works of original graphic artists, such as O. *Kulchytska, V. *Zauze, H. *Narbut, M. *Zhuk, L. *Levytsky, V. *Kasiian, and M. *Derehus. Emigré graphic artists also made their contributions. The most famous is J. *Hnizdovsky, who made his best prints in postwar New York. Postwar printmakers in Soviet Ukraine have worked mostly in the linocut (eg, H. Yakutovych, V. *Kutkin, I. Batechko, and H. Malakov) and in plastic (M. Stratilat and V. Lopata). The art of miniature printmaking in

the *bookplate has become popular, and there is continued interest in the traditional techniques of engraving, such as woodcut, copper engraving, watermarking, and *lithography (O. Danchenko, O. *Fishchenko, and V. *Lytvynenko).

Pripisnye peasants (*prypysni seliany*). Literally, 'assigned peasants,' referring to a large segment of the state peasantry who, during the 18th and until the mid-19th century, lived on crownlands and were assigned to work in state or private enterprises in lieu of paying quitrent or a poll tax. In Ukraine the *prypisnye* peasants were usually employed in state rather than private industries, often in those oriented to manufacturing and river transport. During the late 18th century the state gradually began to cease the practice of assigning peasants to factories, and by 1822 in Ukraine the *prypisnye* peasants had been redesignated as 'indispensable workers' and incorporated into the category of *possessional peasants; the latter category disappeared with the emancipation of the serfs in 1861–3.

Prisoner of war camps. Camps interned persons captured by a belligerent power during war. Until the beginning of the 20th century there were no effective multilateral agreements regulating prisoner of war (POW) camps. Serious attempts to forge such agreements were made at the First and Second Hague peace conventions of 1899 and 1907. The 1929 Geneva Convention of Land Warfare elaborated on the principle of protecting the welfare of POWs. That pact was signed by, among others, Germany, but not the USSR.

During the First World War Ukrainians were held in camps in Germany, Austria-Hungary, Russia, and Italy. Approx 300,000 of the 1.4 million prisoners from the Russian Empire held in German camps in October 1918 are said to have been Ukrainian. Through the intervention of the *Union for the Liberation of Ukraine some 50,000 Ukrainian prisoners were shifted to three special camps (*Rastatt, *Salzwedel, and *Wetzlar); from those, two Ukrainian divisions, the so-called *Bluecoats, were later created. An estimated 200,000 Ukrainians were among the 1.1 million Russian army personnel held as prisoners in Austria-Hungary. The *Graycoats division was formed from Ukrainian POWs interned at the Freistadt camp in 1918.

There were about 120,000 Ukrainians among the 1.7 million or so POWs from Austria-Hungary in the Russian Empire. Although Russia was a signatory to the Hague conventions, the camps spread across the empire are said to have been the worst of all POW camps during the First World War. Generally, prisoners of Slavic origin were put in camps in the European parts of the empire, and those of other origins were interned in the most distant regions. Prisoners were engaged in various types of labor, but very soon POW camps became recruiting bases for armies in the later stages of the war and during the revolution. The Czechoslovak Legion, for instance, initiated under the auspices of the Russian government and the Czechoslovak National Council, was formed in Ukraine from POWs.

Both the Whites and the Bolsheviks drafted remaining POWs into their armies. The Sich Riflemen was also a unit created from former POWs.

In Italy some 40,000 to 60,000 Ukrainians who had fought in the Austro-Hungarian army were interned in POW camps on the island of Asinara and near Cassino and Arquata. Attempts in 1919 by delegates of the Western Ukrainian National Republic to have them repatriated proved fruitless. They were freed only in 1921.

In Poland up to 100,000 Ukrainians were interned in POW camps in 1919–20 following the Polish occupation of Galicia. Many of them were soldiers of the Ukrainian Galician Army (UHA) and of the forces of the Ukrainian National Republic. They were incarcerated in camps at Strzałków, Brest, Wadowice, and Dąbie. About 15,000 of those prisoners died from poor nourishment and unsanitary conditions. The majority of the survivors were freed in 1920. Soldiers of the UHA were also interned in Rumania during 1919. During the Ukrainian Revolution of 1917–21 Ukrainian combatants were interned in camps across Russia. Among them was the camp of Kozhukhov, near Moscow.

Between 1939 and 1945 hundreds of thousands of Ukrainians serving in the Polish, the Soviet, and other armies were interned. After the Hungarian occupation of Transcarpathia in 1939, several hundred members of the Carpathian Sich were interned in camps in Dryva (near Khust) and Varju-Lapos (near Nyiregyháza). When the Germans advanced into Poland in 1939, approx 700,000 officers and soldiers from the Polish army were captured and interned, among them 60,000 to 70,000 Ukrainians. The 1929 Geneva Convention was generally observed by the Germans in the case of those prisoners, and from 1940 many of the inmates were freed and allowed to return home or to work in the factories of the Reich. A number of Ukrainians were among those Polish combatants captured and interned by the Red Army during the Soviet invasion of Poland in 1939.

The largest capture of enemy soldiers in history took place during the German invasion of the Soviet Union in 1941. An estimated 1.3 million Ukrainians were among the 3.6 million Soviet POWs held by the Germans in 1941. The Soviets, who had not formally ratified either the 1899 or the 1907 Hague convention or signed the Geneva Convention of 1929, considered Soviet POWs traitors and rejected International Red Cross overtures to assist them. Soviet POWs were therefore outside the protection of international law and at the mercy of captors, who considered them 'subhuman.' Scattered across camps from Ukraine itself to the region of Lorraine (annexed by Germany), many of the Ukrainian Soviet POWs perished as a result of the inhuman treatment they suffered. The treatment of Soviet POWs often depended upon the attitudes of German district commanders, and thus the fate of prisoners varied from camp to camp. For instance, whereas in the POW camp located in Jarosław Ukrainian inmates were set free very quickly, at Ban-St-Jean in the Moselle department of France, the vast majority of the approx 24,000 inmates perished during the course of the war owing to multiple privations, or even as a result of having been buried alive. Famine, disease, and mass executions were the rule in other camps where Ukrainians were interned (Khyriv, Kholm, and elsewhere).

The Germans did not have a well-defined or precon-

ceived policy toward Soviet POWs. For a while, particularly in August–October 1941, a number of Ukrainians were released from some camps, especially those in Right-Bank Ukraine, and put to labor in German-occupied Ukraine. But the releases ceased in November 1941. Ukrainian POWs were also interned in *concentration camps along with other inmates targeted for destruction. From the spring of 1942 the treatment of many POWs improved, when the Germans began to use them in larger numbers for labor in the war economy.

Few Ukrainian POWs were able to escape; some of those who did were aided by compatriots living in the vicinity of the camps. The Germans discouraged local Ukrainians, at gunpoint, from visiting or coming to the aid of inmates. That, along with the atrocities committed in the camps, contributed to the stiffening of anti-Nazi sentiment among the Ukrainian people. Altogether some 5.8 million Soviets were captured by the Germans between 1941 and 1945. According to a German report of 1 May 1944, of the 5,160,000 Soviet POWs interned to that date 1,981,000 had perished in the camps, 818,000 had been released to civilian or military status, 67,000 had escaped, and 1,241,000 were 'unaccounted for' (disappeared or killed). Some 875,000 of the surviving 1,053,000 inmates were engaged in construction and other labor. Toward the end of the war a number of Ukrainians were among the POWs drafted into German armies. Because the Kremlin never acknowledged formally the surrender and desertion of Red Army soldiers, the crimes committed in the POW camps have largely gone unpunished, even though the death of the Soviet POWs constitutes one of the largest wholesale murders of the Second World War.

Those Ukrainians who served in Allied (specifically US or Canadian) or Axis military formations and fell into enemy hands generally shared the fate of their captured colleagues in those armies in enemy camps.

In 1945–7 some 10,000 members of the *Division Galizien were interned by the British in POW camps near Bellaria and Rimini, in Italy. In some cases Ukrainians published their own periodicals in POW camps. *Chervona Ukraina*, for instance, was published by Ukrainian POWs in Hungary between March and August 1919, and the weekly *Nova doba* by Soviet Ukrainian POWs in Berlin in 1941–5. The Ukrainian SSR was among the signatories of the 1949 Geneva Convention on POWs.

Pritsak, Omeljan [Pricak], b 7 April 1919 in Luka (now Ozerne), Sambir county, Galicia. Historian; member of the Shevchenko Scientific Society since 1951, the Ukrainian

Omeljan Pritsak

Academy of Arts and Sciences, and foreign member of the AN URSR (now ANU) since 1990. He studied at Lviv University (1940), the ANU Institute of History (under A. Krymsky), and the universities of Berlin (1943) and Göttingen (PH D, 1948). He taught at the University of Hamburg (as a professor from 1957) before moving to the United States in 1961. Since 1964 he has been a professor at Harvard University and the first holder of the Hrushevsky Chair of Ukrainian History. In 1967 he proposed the establishment of a center for Ukrainian studies in the United States, which proposal led to the formation of the *Harvard Ukrainian Research Institute in 1973, with Pritsak as its first director (a position he held until 1989). Pritsak's interest in incorporating Arabic, Turkish, and Persian sources into Ukrainian historiography led him to specialize in Oriental studies. His scholarly work has focused on a reinterpretation of the origins of Kievan Rus' using Oriental, Scandinavian, and other source materials. To that end he has worked on the compilation of a six-part magnum opus, *The Origin of Rus'*, the first volume (*Old Scandinavian Sources Other Than the Sagas*) of which was published in 1981. In 1991 he became the first director of the new ANU Institute of Oriental Studies in Kiev. Two festschrifts in his honor, *Eucharisterion* and *Adelphotes*, were published by the Harvard Ukrainian Research Institute in 1979–80 (2 vols) and 1990.

Private enterprise. Production and service enterprises under private, not state, control and ownership. Private enterprise has existed in Ukraine since medieval times. It was not uncommon for the boyars of Kievan Rus', unlike the landowning nobility of Western Europe, to engage in trade. Besides a substantial merchant class there were many skilled craftsmen producing goods for the domestic market. About 50 trades were practiced in Kiev, including carpentry, blacksmithing, pottery, and leather working. Under Polish-Lithuanian rule during the 14th through 16th centuries, private enterprise flourished in the towns of Western Ukraine. Lviv supported 14 different *guilds and 500 master craftsmen. As discrimination against Ukrainians grew stronger in the towns, private enterprises became increasingly dominated by minorities, such as Germans, Jews, Poles, and Armenians.

In Cossack times the *starshyna* and the gentry engaged in milling, distilling, glass manufacturing, and ironworking, and monasteries were involved in paper manufacturing. Manufacturing enterprises were small; they usually employed 15 to 20 workers and were located mostly on

the owner's estates in the countryside. Towns continued to be centers for the trades. Large manufacturing enterprises were owned by the imperial government.

During the 19th century discriminatory tariff policies on the part of the tsarist government were detrimental to native Ukrainian capital. In 1900, for example, out of 93 enterprises in Kiev only 6 were owned by Ukrainians. Private enterprise was largely stimulated by foreign investment. In the 1840s and 1850s Polish landlords introduced large-scale capitalist farming and sugar refineries in southwestern Ukraine. In 1857–77 a liberal customs policy encouraged German entrepreneurs to invest in agricultural machinery assembly plants. With the abolition of serfdom in 1861 a mass of cheap labor was made available for capitalist enterprises. From 1880 Ukraine experienced an industrial boom: foreign capital, mostly French and Belgian, flowed into Ukraine to set up large-scale coal, iron and steel, rail, and sugar-refining companies. The industrial development was concentrated in the Kryvyi Rih and the Donbas regions. Foreign ownership was exercised directly or through industrial investment banks nominally controlled by large *cartels and syndicates.

After the 1917 Revolution the Soviet regime in Ukraine nationalized the large-scale private enterprises. Under the *New Economic Policy in the 1920s, private manufacturing enterprises were permitted, but they were restricted mostly to light industry, and employed fewer than 20 workers each. Although nearly a quarter of the factories in the mid-1920s were privately owned, their share in the gross output was only 8.7 percent, and their share of the work force was only 2.5 percent. In Ukraine the private sector played a marginally more significant role than in other regions of the former USSR because of the importance of flour milling, which was largely in private hands. With the introduction of restrictive credit and labor policies in the summer of 1926, the private sector declined rapidly. In 1926–7 only 11.9 percent of the factories were private. They employed 0.8 percent of the work force and produced 2.3 percent of the gross output. Under the First Five-year Plan all private enterprises were nationalized.

In recent years, as a result of the crisis in the Soviet economy, the private sector has been allowed to re-emerge. Its role, however, has been severely circumscribed by law and bureaucratic interference. Until 1990 the term 'private enterprise' was avoided, and private businesses were called 'co-operatives.' In 1989 there were 13,534 such co-operatives, employing 248,800 people and producing goods and services valued at 900 million rubles. Further privatization plans were announced in 1990 but were not realized prior to the dissolution of the USSR.

B. Somchynsky

Private plot (*prysadybne hospodarstvo*). A small piece of land with a cottage and farm buildings allotted in the Soviet system to collective farmers, workers, and office workers in rural areas for their private use. Farming on private plots was carried out by means of individual labor and initiative, and added significantly to the overall agricultural output. It was an important source of foodstuffs and supplementary income for the farmer and an addi-

tional source of food supplies for the cities. Although private farming did not fit into the socialist economic model, it became solidly established in the USSR. In spite of many attempts to abolish it, private farming grew in importance.

In 1918 V. Lenin nationalized all landholdings. Legally, land became the property of society and could not be sold or exchanged. The forced collectivization of 1929–33 was to put an end to all private farming. It was only when the agricultural system approached collapse that J. Stalin permitted small plots of land (usually one-sixth of a hectare) to be allotted to farmers, provided they still worked on collective farms. The decision was viewed as a temporary palliative and concession to the peasants.

After the Second World War attempts were made to abolish private plots, but economic difficulties and international tensions were not conducive to the eradication of this vestige of 'capitalism.' N. Krushchev's attempt in the early 1950s to create 'agrocities' and to transform peasants into state workers was a failure. Except for the brief thaw in 1956–9, Soviet agriculture fared poorly. Beset by bad weather, poor harvests, and bureaucratic mismanagement, it could not afford to abolish private plots. During his regime L. Brezhnev did not try to do away with private plots. The 1977 Constitution sanctioned supplementary private farming as a derivative form of socialist property. Article 13 stated that personal property is based on one's labor, and that the right to possess a private plot is based on one's individual toil. The article required that citizens make rational use of the allotted land, and that collective farms provide the necessary assistance.

The legal status and the size of private plots were defined in Paragraph 42 of the Collective-Farm Statute Model (1969) and by decrees of the Union and republican governments. The size of the plot, including the cottage, could not exceed 0.5 ha and in the irrigated regions 0.2 ha. The actual size of the plot was to be determined by the collective-farm assembly according to one's work record and the size of one's family. If one left the collective, the plot was to be reduced to an area adjacent to the house. According to Article 77 of the Land Code of the Ukrainian SSR, plots could be allotted to state-farm and office workers in the rural areas. Recently, plots of 0.15 ha had become accessible to urban residents, who unlike rural residents were charged a minimal rent and required to pay for various services. At the end of the 1980s the size of the Ukrainian household plot was between 0.3 and 0.5 ha, depending on the size and location of the collective farm,

| Average size of private plot (in ha) | 0.32 | 0.38 | 0.4 | 0.46 |

¹USSR figures include reserve or fallow land.

²Includes collective farms, state farms, and other state enterprises.

its work force, soil, and fertility, and other factors. The share of land allotted to private farming is given in table 1.

In most cases private farming has proved to be much more productive than collective farming. Its share in the agricultural output exceeds its share of the cultivated land by several factors (see table 2). In table 2 only major crops, for which there are published data, are shown. Some vegetables, such as onions, garlic, and parsley, are produced mostly by the private sector and do not normally appear in statistical yearbooks. They are constantly in demand, since the socialized sector delivers an inferior product and distribution service. Depending upon the season, prices on the farmer's market can be three or even four times higher than in the state stores.

As the Ukrainian economy is restructured following independence, the system of private plots is expected to be replaced, eventually, with the private ownership of land.

E. Bej

Private property. The property belonging to an individual, a family, or a legal entity, not to a state or local government. The owner of private property has the right to possess and dispose of it freely by selling, trading, renting or mortgaging it, or giving it away.

Before the Revolution of 1917 there were various forms of private property in Ukraine, including individual, joint, collective, and co-operative. Furthermore there was municipal, communal, and state property; 70 percent of the railways were owned by the state.

TABLE 2
Output of selected farm products in Ukraine, 1973 and 1983 (percentage of total in parentheses)

| | Socialized sector | | Private sector | |
|-------------------------|-------------------|-----------------|-----------------|-----------------|
| | 1973 | 1983 | 1973 | 1983 |
| Meat (in 1,000 t) | 1,782.0 (62.5) | 2,438.0 (66.3) | 1,068.0 (37.5) | 1,239.0 (33.7) |
| Milk (in million t) | 12.5 (67.8) | 16.5 (74.0) | 6.2 (33.2) | 5.8 (26.0) |
| Eggs (in million t) | 3,506.0 (39.1) | 9,979.0 (61.9) | 5,696.0 (61.9) | 6,143.0 (38.1) |
| Wool (in 1,000 t) | 23.6 (95.2) | 26.3 (93.6) | 1.2 (4.8) | 1.8 (6.4) |
| Potatoes (in 1,000 t) | 7,894.0 (33.3) | 6,060.0 (29.2) | 15,830.0 (66.7) | 14,670.0 (70.8) |
| Vegetables (in 1,000 t) | 6,221.0 (75.7) | 5,315.0 (75.5) | 1,992.0 (24.3) | 1,723.0 (24.5) |
| Fodder (in 1,000 t) | 22,300.0 (79.8) | 18,805.0 (82.2) | 5,634.0 (20.2) | 4,068.0 (17.8) |
| Fruits (in 1,000 t) | 1,490.0 (45.6) | 1,524.0 (45.2) | 1,775.0 (54.4) | 1,846.0 (54.8) |
| Grapes (in 1,000 t) | 1,035.0 (82.5) | 594.0 (78.1) | 219.0 (17.5) | 167.0 (21.9) |

The concentration of property in the hands of a small number of private owners resulted in a highly uneven distribution of wealth and income. The propertyless class was much larger in Ukraine than in Western Europe, and its size was one of the principal reasons for the eventual revolution.

Legislation introduced by the Central Rada and the Directory (1917–19) placed some limits on private property, particularly in land, and socialized it. After a brief period of virtually total nationalization of all property under *War Communism and another brief *New Economic Policy (NEP) period, permanent forms of property were introduced in the Ukrainian SSR and the entire USSR, during 1929–32.

Soviet jurists denied that any form of private property existed in the Soviet Union but conceded that there was 'personal property.' It consisted of consumer items and objects of personal use, such as clothes, housing, furniture, livestock, motor vehicles, money, copyrights, and patents that belonged to a person or a person's family. All such property had to be acquired through personal labor. Personal property was permitted by the constitutions of the USSR and the Ukrainian SSR and was protected by law. The Criminal Code of the Ukrainian SSR provided punishment of 1 to 6 years' imprisonment for theft and burglary, 3 to 12 years' imprisonment for robbery, and a half to 1 year's imprisonment for the arbitrary seizure, purchase, or sale of land. Despite protestations there was no fundamental difference between 'personal' and private property. Under Soviet law personal property could be bought and sold, inherited, and rented. There were open markets in the cities and villages, where various things could be purchased, including some means of production. The so-called collective-farm market, which was officially sanctioned, sold produce grown on *private plots. Every larger city also had a *tovkuchka* or flea market, where used goods were sold. There was also a semilegal black market, on which virtually everything was bought and sold, including construction materials, fuel, precision instruments, foreign currency, bank drafts, and almost any items generally in short supply. There was a rural black market also, where livestock, grain, agricultural produce, and farm machinery were sold. There are no data on the dimensions of those free markets.

Many laws outlawed or regulated the free markets, but they were ineffective. Soviet law did not recognize private ownership of land. Collective farms gave members private plots of land, but they were for 'personal use' and could not be sold. People could sell their houses and their movable belongings, however, because they were considered to be personal property. In cities the municipal government granted lots for the construction of new private houses, which were limited by law to five rooms or 60 sq m, regardless of family size. A family could have no more than one such house and one dacha. When a private house was sold, the house became the personal property of the new owner, but the lot was only transferred to his or her use. In 1940, 49.6 percent of the urban housing in Ukraine was personal property, in 1960, 50.0 percent, and in 1969, 43.2 percent. Rural housing was almost exclusively personal property.

About 450 million rubles per year was invested by the population in private housing in the 1960s. Families in the rural areas were also allowed to own livestock. Money was always an important category of personal property.

Savings were kept in banks or converted into government bonds that usually yielded 2–3 percent annually.

The right of inheritance, as contrary to the principles of Marxism, was initially abolished in the Ukrainian SSR by the decree of 21 March 1919, but it was reintroduced in 1922 under the NEP as long as the inheritance did not exceed 10,000 rubles in value (amounts in excess were prohibitively taxed). In 1926 the value limit on inheritance was abolished, and on 14 March 1945 an all-Union law removed all limits from inheritance.

The sum of personal property increased as the standard of living rose. Ukraine's new law on property, adopted on 7 February 1991, did not extend the right of private ownership to land. It stated, however, for the first time in Soviet history, that private ownership is equal to all other types of ownership, and that the state will support all types of ownership. Furthermore, it expanded private ownership to include not only private dwellings, personal belongings, and livestock but also the means of production, the results of any production, means of transport, stocks, and any other valuable possessions.

Privet (*Ligustrum*; Ukrainian: *byriuchyna*). An evergreen or deciduous plant of the family Oleaceae that grows as a shrub or small tree. In Ukraine the common privet (*L. vulgare*), a shrub with shiny leaves, white flowers, and black berries, grows wild in the southern forest-steppe, in the steppe, and in Transcarpathia. It is cultivated all over Ukraine, in hedges, in screens, and as an ornamental plant in parks. It is also used to protect fields and ravines from erosion. The wood is strong and suitable for turning. The berries are used in the manufacture of dyes. Glossy privet (*L. lucidum*) is cultivated in the Crimea and around the Black Sea.

Prizes and awards. In Ukraine, as elsewhere in the world, persons who have made prominent scientific, scholarly, cultural, technological, and economic contributions have been rewarded with various monetary awards, citations, *orders, medals, and honorific titles. Under the tsarist regime monetary awards were granted by the state for economic achievements. Beginning in 1866, for example, 3,000 rubles were awarded for every steam locomotive made in the empire from domestic materials. From 1831 the Imperial Academy of Sciences granted monetary prizes from private endowments and donations, including the annual 1,420-ruble P. Demidov Prize (1831–65) for contributions to Russian scholarly literature; the S. Uvarov Prize (est 1855) for works in Russian language, literature, and history; the triannual T. Ber Prize for contributions in the biological sciences; the 500-ruble G. Gelmersen Prize (est 1879), awarded every five years for contributions to imperial geology, paleontology, or physical geography (by other than full members); the A. Pushkin Prize (est 1881) for works on the history of Russian literature and language, Russian belles lettres, or literary criticism; the triannual 150- to 800-ruble D. Tolstoy Prize (est 1882) for privately published works in all fields; the triannual 1,000-ruble A.(O.) Kotliarevsky Prize (est 1883)

for works in Slavic philology and archeology published in Russian; and the 1,000-ruble M. Lomonosov Prize for works in Russian or Slavic philology and history.

Under the Soviet regime prizes and awards in Ukraine were granted by state bodies and official institutions on the recommendation of selection committees. The highest Soviet award was the Lenin Prize (granted in 1926–35 and from 1957). From 1967, 25 such prizes in science and technology and 6 in literature, art, and architecture were awarded biannually by the USSR Council of Ministers. Their recipients (laureates) each received 10,000 rubles. In 1967 the USSR Council of Ministers also began awarding annual USSR State Prizes worth 5,000 rubles each: 50 in science and technology, 10 in literature, art, and architecture, and (since 1974) 25 for exemplary contributions to the Soviet economy by workers and farmers (see *Socialist competition).

In 1969 the Ukrainian SSR Council of Ministers began awarding annual Ukrainian SSR State Prizes worth 2,500 rubles each: 17 in science and technology (2 of which were awarded from 1972 to authors of secondary or postsecondary textbooks), and (jointly with the Ukrainian Republican Council of Trade Unions) 2 (from 1974) to 4 (from 1977) to leaders in 'socialist competition' or for prominent labor achievements. In addition, 8 T. Shevchenko State Prizes (established in 1961 as the Shevchenko Republican Prize and renamed in 1969) were awarded, one each in the fields of literature, fine art, music, theater, cinematography, architecture, performance, and (since 1980) journalism.

In addition to state prizes Ukrainian scholars and scientists have been eligible for prizes awarded by the AN URSR (now ANU) presidium: since 1946, the O. Bohomolets Prize (physiology and theoretical medicine); since 1964, the M. Krylov Prize (mathematics, mathematical physics, and theoretical cybernetics), Ye. Paton Prize (metallurgy), L. Pysarzhevsky Prize (chemistry and chemical technology), and V. Yuriev Prize (genetics and advancements in agricultural science); since 1967, the D. Zabolotny Prize (microbiology, virology, epidemiology, and zoology); since 1972, the O. Dynnyk Prize (mechanics and machine building), M. Kholodny Prize (botany and plant physiology), D. Manuilsky Prize (history, philosophy, political science, and law), O. Shlikhter Prize (economics), and V. Vernadsky Prize (geology, geochemistry, geophysics, and hydrophysics); since 1973, the O.(A.) Palladin Prize (biochemistry and molecular biology); since 1974, the H. Proskura Prize (energetics) and K. Synelnykov Prize (physics); since 1976, the S. Lebedev Prize (computer technology); since 1977, the M. Yanhel Prize (applied and technical mechanics); since 1979, the I. Franko Prize (philology, ethnography, and art history); since 1980, the L. Symyrenko Prize (orcharding); and since 1982, the V. Hlushkov Prize (cybernetics and computer science). Each prize has been awarded to one laureate per year and has a monetary value of 1,200 rubles.

Various literary prizes have been awarded in Ukraine besides the coveted Shevchenko State Prize. The Ukrainian Council of Ministers established the Lesia Ukrainka Prize (best works for children) in 1971 (awarded jointly with the CC CPU), the M. Rylsky Prize (best translations of foreign works into Ukrainian) in 1972, and the P. Tychna Prize (best works depicting the friendship and unity of the Soviet peoples) and the Republican Prize (best works in

socialist-realist theory) in 1973. The Writers' Union of Ukraine established the A. Holovko Prize (best novel) in 1979. With the paper *Literaturna Ukraïna* it established the V. Sosiura Prize (best poetry collection, long poem, or substantial selection of poetry in a periodical) in 1982; with the journal *Vitchyzna*, the Yu. Yanovsky Prize (best short prose) also in 1982; and, with the Radianskyi Pysmennyk publishing house, the Ostap Vyshnia Prize (best humorous or satirical work) in 1983. The Communist Youth League of Ukraine established the N. Ostrovsky Prize (literature, art, architecture, performance) in 1958 and awarded it every two years from 1968. It also established four annual prizes: with the Molod publishing house, the P. Usenko Prize (best works on Komsomol themes) in 1976; with the journal *Barvinok*, the O. Kopylenko Prize (best didactic art works or book illustrations for students and youths) in 1978; with the journal *Pioneriia*, the M. Trublaini Prize (best literary works or illustrations for children) in 1979; and, with the journal *Dnipro*, the A. Malyshko Prize (best prose, poetry, publicism, or literary criticism) in 1982. The Union of Journalists of Ukraine also sponsored a literary award, the Ya. Halan Prize, from 1964 (for the most antinationalist works).

A notable feature of the granting of awards and prizes in Ukraine (and throughout the USSR), particularly in non-scientific fields, was the consideration afforded 'politically correct' recipients. With the political changes of the late 1980s, awards in Ukraine began to be granted to persons who previously had been shunned because of the nature of their work or views. Also, new prizes were named in honor of hitherto-ignored personalities: the V. Symonenko Prize (from 1987, for the best book of poetry by a young author) and the V. Stus Prize from the Writers' Union of Ukraine; and the V. Vynnychenko Prize (two awards for charitable work by an individual or group in the field of Ukrainian literature or theater, one given in Ukraine and the second outside its borders) and the M. Hrushevsky Prize (for work in Ukrainian history, folklore, or ethnography) from 1991 by the Ukrainian Culture Fund.

In North America various literary prizes and scholarships have been awarded by Ukrainian community organizations and scholarly bodies for many years. Only since the early 1980s, however, have such awards been granted on a regular basis. The most notable ones are the 5,000-dollar Antonovych prizes, two of which have been awarded each year since 1982 by the O. and T. Antonovych Foundation in Washington, DC, for the best Ukrainian literary work and best work in Ukrainian studies, and the M. Cenko Prize in Ukrainian bibliography. Since 1981 the Canadian Foundation for Ukrainian Studies has awarded the 5,000-dollar Award for Scholarly Excellence in Ukrainian Studies to several scholars.

Prnjavor. A town (1961 pop 2,800) in Banja Luka county, Bosnia. With its 1,100 Ukrainian inhabitants and strategic location near a cluster of Ukrainian villages, it has been the chief Ukrainian center of Bosnia. The bulk of Ukrainian immigrants came there in 1897–1914. A Greek Catholic parish was founded in Prnjavor in 1900, and the Church of the Transfiguration was built in 1912. In 1942 about half of the town's Ukrainian inhabitants moved to the Srem and Bačka regions. The Shevchenko Cultural and Educational Society maintained a children's choir and an active drama group.

Problems of the Peoples of the USSR. A quarterly organ of the League for the Liberation of the Peoples of the USSR (the *Paris Bloc), published in Munich in 1958–67. It contained articles on the history of the USSR and reports and analyses of current developments, particularly in national relations in the USSR, and studies of the interaction between communism and nationalism in other countries, especially in Africa and Asia. The contributors were Soviet émigrés, reporters, political commentators, and scholars, including R. Pipes, R. Conquest, H. Seton-Watson, W. Leonhard, and W. Laquer. Among the Ukrainian contributors were F. Haienko, Ye. Glovinsky, V. Borysenko, B. and P. Fedenko, M. Dobriansky-Demkovich, I. Koshelivets, O. Yurchenko, and S. Dovhal (the editor).

Problemy (Problems). A monthly journal of politics, edited and published in Munich from 1946 to March 1948 (a total of 14 issues) by M. Dobriansky-Demkovich.

Proboiem

Proboiem ([Let's] Force Through). A monthly journal published in Prague from December 1933 to January 1944 and edited by S. Rosokha. The organ of the *Union of Subcarpathian Ukrainian Students, it fostered Ukrainian national consciousness among Transcarpathian students. From 1939 it was an overtly nationalist literary and scholarly journal. Contributors included prominent writers and critics. The Proboiem publishing house also issued some 40 books in several series. The publishing house and journal were closed by the Nazi occupational authorities.

Procedural law. See Civil procedure and Criminal procedure.

Proch, Don [Proč], b 5 May 1943 in Asessippi, Manitoba. Ukrainian-Canadian sculptor, assemblage artist, and printmaker. His fiberglass masks and sculptures have established him as one of Canada's most innovative artists. The masks are three-dimensional objects covered by two-dimensional drawings that are a depiction in themselves and a feature of the sculptural composition (eg, *Prairie Hunting Mask* [1976] and *Wild Bill Lobchuk Back Forties Mask* [1976]). His drawings are usually of the prairie landscape, to which Proch has a strong attachment. His first

Don Proch: *Mask* (mixed media)

solo show was held in Winnipeg. Proch's works have also been exhibited in Montreal, Windsor, Paris (1973), London, and Brussels (1984–5). Although there are no obviously Ukrainian images in his works, Proch has been credited with incorporating Ukrainian cultural traditions, such as the decorating of Ukrainian Easter eggs, into his space-age masks and thereby transcending the traditions to create complex, universal images.

Prochaska, Antoni, b 23 March 1852 in Zalizhchyky Mali, Chortkiv circle, Galicia, d 23 September 1930 in Lviv. Polish historian; member of the Polish Academy of Learning from 1891. He was a specialist in the history of the 14th- and 15th-century Polish-Lithuanian Commonwealth. From 1878 he was a curator in the Lviv archives. His writings include works about the Union of Brestia (1896), the Polish king Władysław Jagiełło (2 vols, 1908), and the Lithuanian grand duke Vytautas (1914).

Prociuk, Stephen. See Protsiuk, Stepan.

Procko, Bohdan, b 18 July 1922 in Rychyiv, Rudky county, Galicia. Historian. A graduate of Columbia University (MA, 1946) and the University of Ottawa (PH D, 1964), he has taught history at Villanova University since 1949. He has written several works on the history of the Ukrainian Catholic church and Ukrainians in America, including *Ukrainian Catholics in America: A History* (1982).

Proclamation of Ukrainian statehood, 1941 (Akt 30-oho chervnia). In the wake of Germany's attack on the Soviet Union on 22 June 1941, several members of the Bandera faction of the recently split *Organization of Ukrainian Nationalists (OUN[B]) set out to proclaim a Ukrainian state in Lviv. They put into motion a bold plan to force the German government to commit itself to an independent Ukraine. It was their hope the Germans would take what they perceived to be a rational course of action and ally themselves with the 'enslaved' nations of the USSR; alternately, a proclamation of statehood could provide a rallying point for national resistance in the event that Germany should turn against the interests of the Ukrainian people. Their actions have been assessed as brilliant or reckless (even foolish) by supporters of Ukrainian aspirations for independence. The Soviet authorities (especially after regaining control of Western Ukraine) painted them in the blackest terms as the perfidious un-

dertakings of evil collaborators riding on the coattails of the Nazis.

S. *Bandera's lieutenant, Ya. *Stetsko, entered Lviv on the same day as the Germans, 30 June 1941, and began the task of state-building. A group of 50 to 200 Lviv residents (estimates vary) came to a hastily arranged evening meeting to hear what the OUN 'émigrés' from Cracow had to report, only to witness Stetsko declare: 'By the will of the Ukrainian people the OUN, under the direction of Stepan Bandera, proclaims the creation of a Ukrainian state.' What is believed to be the original of several versions of the proclamation went on to say that this Western Ukrainian government would submit to a national government yet to be created (in Kiev), and that it would co-operate with Germany in its struggle against Moscow's occupation of Ukraine.

The OUN(B) 'Akt 30-oho chervnia' (Act of 30 June), as the proclamation has come to be known, was followed by a decree by Bandera appointing Stetsko as head of state. In that way the OUN(B) executed its plan as a rapid series of what it hoped would become *faits accomplis* that took both the Germans and the Ukrainians by surprise. That course of action, in fact, was based on a practical consideration, for if the Gestapo had been warned of the possibility, it likely would have stopped the entire affair.

The OUN(B)'s coup was in harnessing a significant, albeit short-lived, legitimacy for its 'Akt.' Stetsko could intimate that the foundation for his government had already been laid in Cracow on 22 June 1941 through the OUN(B)'s efforts at consolidating the émigré community in a *Ukrainian National Committee. The split in the OUN's ranks did not immediately undermine Stetsko's position, since the Soviet occupation of Galicia had kept Lviv residents largely ignorant of that development. Ironically, it was the 'Akt' itself which attracted attention to the matter by highlighting that there was an OUN under Bandera; Lviv residents knew only of an OUN under A. *Melnyk (OUN(M)). More important, the evidence suggesting a German-OUN(B) agreement (where there was none) was overwhelming. The OUN(B)'s confident and unprecedented public appearances, the fact that its volunteer unit *Nachtigall* (see *Legion of Ukrainian Nationalists), dressed in German uniforms, was leading the German army into Lviv, the greetings of a German officer at the proclamation itself, and the OUN's peaceable control of Lviv radio for some three days after the German arrival all contributed to the impression that there was such an agreement. Doubts even among the skeptics dissipated when Stetsko and *Nachtigall's* chaplain, I. Hrynokh, had an audience at the residence of Metropolitan A. *Sheptytsky and procured his blessing as well as his immense authority for the OUN(B)'s imminent 'Akt.' Hrynokh spoke at the proclamation on behalf of the Ukrainian soldiers in *Nachtigall* and read over Lviv radio Sheptytsky's pastoral letter, which exhorted the nation to support Stetsko's government. The inaction of the German army in establishing a civil administration, and the fact that spontaneously formed Ukrainian administrations were at first tolerated, strengthened the illusion of German approval. Various Ukrainian bodies pledged their allegiance to Stetsko's government, and the proclamation was joyously repeated at mass gatherings all over Western Ukraine.

Stetsko's government was effectively paralyzed when he was quietly ushered to Berlin for 'discussions' on 12

July 1941, although public perception did not immediately recognize the significance of the move. Shrewdly, the Germans did not begin their mass arrests of OUN(B) members until mid-September, by which time most of Ukraine had been easily occupied.

During his brief tenure the 29-year-old Stetsko controlled no significant forces and was unable to bring in outside (non-OUN(B)) expertise to his administration. Much of the Lviv leadership had denied him their co-operation on three grounds: that the OUN first had to mend its internal split; that neither the international nor the internal situation justified the risks of such a proclamation in the absence of knowledge of Germany's plans for Ukraine; and that there was concern about what was perceived as the amorality of OUN(B) behaviour. The last objection was based on false or misleading OUN(B) claims about its relationship with the Germans, about the nature of its consolidation of Ukrainian émigrés, about internal OUN difficulties, and about the consent of Lviv leaders to positions in Stetsko's administration. The OUN(B) quickly lost its credibility, and a non-OUN(B) council to deal with the Germans was formed. Even Metropolitan Sheptytsky publicly withdrew his support. In spite of those setbacks and pressure from the Germans, the OUN(B) leadership resisted all demands to revoke the 'Akt.' Their resistance was a key element in the subsequent arrest of the OUN(B) leaders by the Nazis, as well as of prominent OUN(M) figures, who themselves had been considering making a proclamation of Ukrainian statehood in Kiev.

Procopius of Caesarea (Prokopii Kesariisky), b ca 490–507 in Caesarea, Palestine, d after 562. Byzantine historian, whose writings are valued as a source for 6th-century geography and history. He chronicled the campaigns of the Byzantine emperor Justinian against Persia, the Vandals, and the Goths, and he described the great plague of 542 in Constantinople. His work *Secret History* also included information about the nomad tribes of Caucasia, among them the Antes.

Procurator's office (*prokuratura*). The state body that investigates crimes, prosecutes criminals, and oversees the execution of sentences. The procurators (usually called public prosecutors in English) emerged in Western Europe in the 18th century as a result of liberal demands to ensure the procedural rights of the accused. The inquisitorial process, in which the court conducted the investigation, trial, and punishment, gave way in the British system to the separation of the prosecutorial and judicial functions. The near equality of the prosecutor with the attorney for the accused was eventually established, as a legal principle throughout Western Europe, as well as in Ukrainian territories under Austrian, Russian, and Polish rule, before their annexation by the USSR.

The procurator's office in the Ukrainian SSR differed in some ways from its counterparts in other countries. Abol-

ished immediately after the Bolshevik seizure of power, the institution was re-established in 1922. In recent times the office functioned according to the Law on the Procurator's Office of the USSR (1979) and articles 162–5 of the Constitution of the Ukrainian SSR. It was part of a centralized, all-Union system that was headed by the general procurator of the USSR, appointed for seven years by the USSR Supreme Soviet. He appointed republican procurators for five-year terms; these procurators were responsible to the general procurator. Thus, unlike the courts, Ukraine's procuracy was a Union, not a republican, institution. The major responsibility of the procurator's office was to 'oversee the precise implementation of law' and to practice 'socialist legality.' Because the meaning of 'socialist legality' was relative and dependent upon the current policy of the Party and state, the procurator's interpretation of the law had a decisive influence on the courts, especially in political cases.

In a broad sense, the procurator's office combined the functions of a Western district attorney, inspector of prisons, attorney general, and ombudsman. It supervised criminal investigations, authorized arrests, prosecuted offenders, and supervised prisons. To ensure that all government institutions, as well as individuals, adhered to the law, the procurator's office reviewed the laws, decrees, and orders of the administrative organs (except the Supreme Soviet of the USSR and the USSR Council of Ministers) and even the decisions of public and co-operative organizations. The office could appeal verdicts to higher courts; it could even appeal to the Supreme Court of the USSR, while the defendant could appeal only to the republican supreme court. The office could also interfere in civil cases, supporting one side against the other, if it believed that doing so would serve the public interest. An individual who had been wronged or libeled by an official or administrative organ could turn to the procurator's office for redress. Such cases were decided by the procurator in secret, and the decision was not subject to appeal. Thus, Soviet citizens could not defend their rights themselves but were dependent on the procurator's protection.

Yu. Starosolsky

Prodamet (full name: Obshchestvo dlia prodazhi izdelii russkikh metallurgicheskikh zavodov, or Society for the Sale of Products of Russian Metallurgical Factories). A cartel controlled by a group of European banks that ran the largest industrial monopoly in the Russian Empire. The plan to organize Prodamet was first devised in 1901 at the 16th Conference of Mining Industrialists of Southern Russia in Kharkiv, and official approval was granted in July 1902. The cartel consisted of 12 of the largest metallurgical companies in Ukraine, with total capital reserves of almost 175 million rubles, including the Donets-Yurev, Providence, Briansk-Oleksandrivkse, South Dnieper, and Huta-Bankova iron and steel works. Those companies were in turn owned by French (Crédit Lyonnais, Banque de Paris et des Pays-Bas, Société Générale pour l'Industrie en Russie), Belgian (Société Générale de Belgique, Crédit Général à Liège, Nagelmäcker et Fils), German (Deutsche Bank, Bank für Handel und Industrie, Dresdner Bank), and Russian (Azov-Don, Russian-Asiatic, Russian Foreign Trade, and Russian Commercial) banks. The French interests controlled 52 percent of Prodamet's capital, the Belgian, 23 percent, the German, 17 percent, and the Russian,

8 percent. Although the central office of Prodamet was located in St Petersburg and most of its operations were conducted from Kharkiv, the key decisions were made in Paris by its major shareholders through the so-called Paris Committee.

In 1902–5 Prodamet established a monopoly on the distribution of sheet iron, steel rails, pipes, railway ties, beams, and axles in Ukraine. In 1908 it began to expand its monopoly on metal products into the Baltic region, Moscow, and the Congress Kingdom of Poland. By 1913 it had overcome its major competitor, the large Krovliia syndicate of Ural iron and steel manufacturers, and established its monopoly throughout the empire. It controlled over 85 percent of the metals market in the Russian Empire. Prodamet accepted orders for metal products from Russian and foreign consumers and divided them among its members. It set prices and ordered certain factories to specialize in order to limit competition. The main goal of its policies was to stabilize and modernize metals production. From 1902 to 1912 it paid its members an average of 13 percent on their investment, and the rest of its profits was used to modernize production. At the same time Prodamet waged a continuous struggle with the *Produgol and *Prodarud syndicates. Eventually Prodamet emerged as a single, vertically integrated monopoly of iron-ore, coal, and metals producers throughout the Russian Empire. It was even able to gain control over the Truboprodazh syndicate and German metalworking plants in Ukraine, and became an all-encompassing monopoly in heavy industry. After 1911 internal bickering among members of the monopoly over the division of orders and dividends was stopped only through the intervention of the Paris Committee. From then on Prodamet concentrated on raising prices by limiting production.

The tsarist government became displeased with Prodamet's tactics, which raised the cost of railway construction and arms production. Its attempts to regulate the industry, however, had little success, and Prodamet continued to raise prices during the war. Only in 1915 did the government impose some control on the metallurgical industry. In January 1918 the new Soviet regime in Russia nationalized Prodamet. In Ukraine the syndicate retained legal ownership of its properties for a year longer.

Prodan, Kornii, b 11 September 1888 in Huliai Pole, Oleksandrivske county, Katerynoslav gubernia, d 15 June 1973 in Calgary. Agronomist and community activist; member of the Shevchenko Scientific Society and the Ukrainian Academy of Arts and Sciences. After emigrating to Canada in 1907, he completed teachers' college and worked as a teacher. Upon graduating from the agricultural faculty of the University of Manitoba (1921), he worked for the Ministry of Agriculture in Manitoba until

Kornii Prodan

Rev Vasyl Prodan

1957. He was a leading member of the Ukrainian People's Home and the Prosvita Institute in Winnipeg and president of the *Saint Raphael's Ukrainian Immigrants' Welfare Association of Canada for many years. He contributed articles on practical farming to Ukrainian papers in Canada and Western Ukraine and wrote a number of brochures on agriculture.

Prodan, Vasyl, b 29 January 1809 in Sukhoverkhiv, Bukovyna, d 16 December 1882 in Lashkivka, Bukovyna. Bukovynian civic, cultural, and church activist, writer, Orthodox priest, and Russophile. A priest at the cathedral church in Chernivtsi, he headed the *Ruska Besida in Bukovyna (1869–78) and the political society *Ruska Rada (1870). He wrote many panegyrics in the vernacular, including 'Stykh posviachen Evheniiu Hakmanu' (Verse Dedicated to Yevhen Hakman) and 'Oda na posviachenie tserkvy v Chernovtsiakh' (Ode on the Occasion of the Consecration of a Church in Chernivtsi). He also published a collection of poems, *Stykhyy* (Verses).

Prodarud (full name: Obshchestvo dlia prodazhi rud yuga Rossii, or Society for the Sale of Ores from the South of Russia). A cartel of iron-ore producers in the Kryvyi Rih region and one of the largest monopolies in Ukraine and the Russian Empire. It was formed in 1908 by the eight largest mining companies, which produced 80 percent of the iron ore, to control ore prices. Financed by French, Belgian, and Russian capital, the cartel waged a fierce struggle against *Prodamet. In 1913–15 Prodarud fell apart, and its members were forced to submit to the Prodamet cartel and join in a single, vertically integrated monopoly of iron-ore, coal, and metal producers.

Prodazha. A monetary penalty imposed in Kievan Rus' on people not punished with a *vyra or potok for the killing of a slave or for a transgression against a freeman's property or liberty. The amounts and types of these fines were listed in *Ruskaia Pravda* as ranging from 1 to 12 hryvni.

Producer co-operative. See Artel.

Production brigade (*vyrobnycha bryhada*). A group of workers in the Soviet system who worked together and shared responsibility for a single production assignment. The brigadier, who in addition to the usual job led the bri-

gade, received extra pay for doing so. The purpose of the brigade system was to divide labor and responsibilities more rationally and to improve productivity. There were two types of brigades in the USSR: specialized brigades, in which workers of the same trade worked at similar jobs, and integrated brigades, in which workers of different trades worked at different jobs on a single project. Both forms of brigade could involve shift work. The brigade was paid according to its contract with an enterprise: a part of its earnings depended on the number of hours worked and the skill level, and a part on the result of the collective effort.

Production brigades became popular in the USSR in the late 1970s and were modeled on the brigades of the Volga Automobile Plant. They averaged 100 to 300 members each and were credited with increasing productivity by 15–20 percent and wages by 7–8 percent. Although they were generally popular with workers, especially the highly skilled workers, they were often opposed by the more traditional ministries and enterprises.

Production conference (*vyrobnycha narada*). A formal organizational unit of workers and managers in Soviet enterprises. The purpose of such bodies was to increase worker and community involvement in industrial management, improve labor discipline, and raise productivity. They were introduced in the 1920s, but almost all were dissolved under J. Stalin's regime. In the late 1950s, production conferences were set up in all enterprises and offices with over 300 employees. They were administered by trade-union committees and the Party. They met at least four times a year and could rule on a wide range of issues, but in practice they did little but rubber-stamp management decisions. In 1977 almost 21,000 of the total 130,000 production conferences in the USSR were located in Ukraine.

Produgol (full name: Obshchestvo dlia torgovli mineralnym toplivom Donetskogo basseina, or Society for the Trade in Mineral Fuel of the Donets Basin). A cartel of coal producers and one of the largest industrial syndicates in Ukraine and the Russian Empire. It was established in May 1904 by 11 of the largest coal producers in the Donets Basin, all of which were owned by French or Belgian capitalists. By 1910 the cartel had 24 members and produced 75 percent of all the coal mined in the basin. The administration of Produgol was located in St Petersburg, but real control was exercised by the Paris Committee, which represented the major foreign shareholders. Produgol accepted orders for coal and distributed them among its members, rationalizing the entire delivery system and lowering costs for its members. From the outset it practiced the typical monopolistic tactics of raising prices and limiting production: between 1904 and 1914 the price it charged per pood (16.38 kg) increased from 7 to 17 kopecks. In that period the average return on investment for its members was 17 percent. Produgol also reached an agreement with the Dombrowa coal cartel in Poland that prevented it from competing in the Donets Basin, and acquired control over two coal-producing cartels based in Siberia.

The artificial 'coal famine' of 1911–12, engineered by Produgol, angered the leaders of the *Prodamet metallurgical cartel, the main consumers of Donets Basin coal. In

1911 they established in Paris l'Union Minière et Métallurgique de Russie, which was to acquire coal mines in the Donets region and iron mines in the Kryvyi Rih region for Prodamet and organize the vertical integration of the metallurgical industry in Ukraine. The action greatly undermined Produgol's position. By 1914 its share of coal production in the Donets Basin had fallen to 54 percent. That same year the Russian government launched court proceedings against the syndicate for corrupting officials. The case was dropped after intercessions by the French government. Finally, in January 1914 six members withdrew from Produgol because of internal dissension. At the end of 1915 Produgol was formally dissolved. Its affairs in Paris were taken over by l'Union Minière du Sud de la Russie, which as late as the mid-1920s attempted to acquire mining concessions from the Soviet government.

Profesiini visty (Professional News). An unofficial trade-union paper of the Communist Party of Western Ukraine, published biweekly in Lviv from December 1926 to September 1928 (a total of 28 issues). The editor was A. Hoshovsky. The Polish authorities confiscated most of the issues and in the end closed down the paper.

Profesional'nyi vistnyk (Professional Herald). A semi-monthly trade-union newspaper published by the Ukrainian Social Democratic party in Lviv in 1920-1. It was edited by A. Chernetsky and I. Kushnir.

Professional and vocational education (*profesiina osvita*). The acquisition of specialized knowledge and skills required for entry into specific professions or occupations, obtained through educational institutions or training programs. In modern society, professional education (such as law, medicine, engineering) is acquired at institutions of higher learning, and entry into such establishments demands complete secondary education; vocational training is obtained either in specialized secondary schools, technical schools, or vocational schools or through apprenticeship programs.

The first institutions to offer vocational education in Ukraine were the artisan schools organized in the mid-16th century by guild organizations of the Orthodox *brotherhoods in Lviv, Kiev, and Peremyshl. In Russian-ruled Ukraine, by 1716 the so-called *tsyferni* (numbers) schools had been established in provincial capitals to train scribes, assistants to master shipbuilders, architects, and apothecaries. The origins of professional education in Ukraine date back to the 18th century, with the establishment of theological seminaries and institutions such as the medical-surgical school in Yelysavethrad (now Kirovohrad). Toward the end of the 18th century the first agricultural schools were established. In 1839 a veterinary school was founded in Kharkiv. Further development occurred with the establishment of universities - Kharkiv (1805) and Kiev (1834) - and of *lyceums, which emerged as cen-

ters of *higher education (legal, pedagogical, and medical training in particular).

A network of professional schools began to develop in the 1860s with the abolition of serfdom, the rise of the *zemstvo schools, and the development of trade and industry. Professional and vocational education became the concern of district and gubernia zemstvos, some ministries, and private individuals and societies. An important role was played by Western European industrialists, who developed Ukraine's industry, and who brought with them their own engineers, technicians, and skilled workers, from whom the local population acquired knowledge and skills. The organization of professional schools was decreed by a law enacted in 1869. Regulations passed in 1888 divided technical-industrial schools into three groups: (1) secondary technical schools, with a 4-year program for the training of technicians, (2) lower technical schools, with a 3-year program for training master craftsmen and tradesmen, and (3) trade schools, with a 3-year program for preparing skilled workers.

Between 1870 and 1890 *Realschulen had supplementary classes of applied mechanical and chemical studies, and had commerce departments which offered specialized secondary education. Toward the end of the 19th century important professional schools were founded, such as the Kharkiv Technological Institute (1885), the Kiev Polytechnical Institute (1898), and the Katerynoslav Higher Mining School (1899).

Prior to the Revolution of 1917 there were 16 higher professional schools (including 4 technical, 3 medical, 3 pedagogical, and 2 commercial), 125 secondary professional schools (including 66 commercial, 23 pedagogical, 11 art, 9 theological, and 6 agricultural), and 535 lower schools (369 trade and industrial, 54 agricultural, 34 pedagogical, 30 theological, 21 commercial, 16 medical, and 11 art). As a rule professional and vocational education was poorly developed in Russian-ruled Ukraine in comparison with Western Europe. The tsarist regime stymied the development of the country's productive forces and paid little attention to the establishment of a network of professional and vocational schools in Ukraine.

During the revolutionary period of 1917-20 efforts were made to Ukrainianize professional and vocational education, since all instruction had hitherto been conducted in Russian. Plans were also made by the educational authorities of the Ukrainian National Republic to organize trade schools with 1- or 2-year programs, and 4- or 5-year professional education programs at universities and institutes. Two new universities were founded (at Kamianets-Podilskyi and Katerynoslav) which offered some professional educational programs.

With the establishment of Soviet rule in Ukraine, professional and vocational education was reorganized. In the 1920s the professional school became the standard secondary school, offering 2-, and, later, 3- and 4-year programs. The following types of professional schools existed: industrial-technical, agricultural, socioeconomic, medical, art, artisan-industrial, construction, and transport. Survey data for November 1929 show that there were 678 professional schools in Ukraine, with an enrollment of 88,200 students. The most numerous were agricultural schools (249 schools, with 27,000 students) and industrial-technical schools (157 schools, with 26,000 students). Professional schools were established to train a

skilled work force and prepare students for higher education.

Vocational training of skilled industrial workers was conducted in the factory apprenticeship schools. Established in 1920, these schools offered 3- and 4-year programs of technical training and general education to 14- and 15-year-olds who worked in factories and plants, and who had completed four grades of elementary education. In 1929 there were 201 such schools, with 30,000 students. In the 1930s the program of study was reduced to one and a half or two years. Similar schools existed for rural young people who worked on state farms (see *Schools for peasant youth).

Higher education was also reorganized. In 1920, universities were abolished and replaced by *institutes (agricultural, industrial-technical, socioeconomic, medical, pedagogical, art, and transport) which offered professional education programs that encompassed all facets of production (theory, economics, management, and practical skills). Technical colleges or *tekhnikums were established on the basis of former secondary technical schools and Realschulen and were designed to train specialists in narrow, practical technical fields. In 1928 there were 38 institutes, with 33,400 students, and 126 tekhnikums, with 26,900 students.

In 1929 the All-Union Supreme Council of the Economy ordered all levels of Ukraine's education system to be reorganized along Russian lines. Whereas in the 1920s Ukrainian had increasingly become the language of instruction in institutions of professional and vocational education, in the 1930s the trend was reversed, in favor of Russian-language instruction. In 1931, tekhnikums were reduced to the status of secondary schools. By 1933 some professional schools had been transformed into schools that offered *secondary special education; others had been liquidated.

In 1934 *Kharkiv, *Kiev, *Odessa, and *Dnipropetrovsk universities were re-established. Tekhnikums were charged with the preparation of specialists at the intermediate level, and institutions of higher education (institutes and universities) were to offer advanced qualifications. Institutions of higher technical education with a three- or four-year program were organized in larger industrial enterprises. Under the impact of rapid industrialization the number of institutions of higher learning grew from 42 in 1929 to 173 in 1940. The student population increased from 40,900 to 196,800, and most students were trained in narrow, highly specialized technical fields.

With the approach of the war the supply of labor from the tekhnikums and factory apprenticeship schools was deemed insufficient, and in 1940 the Main Administration of the State Labor Reserve was established with its own schools. All vocational training schools below the level of tekhnikums were placed under the jurisdiction of this highly centralized institution (see *Labor reserve schools). In 1959 the labor reserve schools were transformed into urban and rural *vocational-technical schools, and the whole system of vocational training was transferred to the jurisdiction of a state committee of the Ukrainian SSR Council of Ministers.

Under N. Khrushchev an attempt was made to unify secondary general education with rudimentary vocational education, in a system of specialized secondary and higher education offering practical experience of production processes in enterprises. The attempt failed, and in

1964 professional and vocational training was again reorganized.

In Western Ukraine under Austrian rule, in the 19th century professional and vocational education was poorly developed, and both the authorities and the Ukrainian community focused on the development of the general education school system. *Lviv and *Chernivtsi universities offered professional education, although few Ukrainians were enrolled there because of discriminatory policies. The *Lviv Polytechnical Institute was founded in 1844, and there were veterinary, agricultural, and forestry schools in Lviv as well. There were practically no public vocational schools with Ukrainian as the language of instruction, and only one private secondary-level trade school, operated by the *Prosvita society in Lviv. There was also a Prosvita agricultural school of lower rank in Mylovannia.

In Western Ukraine under Polish rule, professional and vocational education continued to be weak. The most highly developed professional schools were institutions offering pedagogical training. Professional education organized by the Galician land board was poorly developed; there were only a few schools at the secondary level (eg, commercial art and trade schools in Lviv) and a few more of lower rank (primarily vocational schools). Polish was the language of instruction.

In 1937-8 there were 146 secondary vocational schools (91 in Galicia and 55 in Volhynia), with 22,000 students (17,300 and 4,700 respectively). The number of Ukrainian students attending these schools was negligible because the transition from rural elementary to professional and secondary schools was difficult. In Galicia the Ukrainian community gradually developed private professional schools - four secondary and eight lower schools. In the Lviv school district, out of 154 secondary and lower vocational schools only 13 were Ukrainian-language institutions; out of 97 schools offering supplementary vocational instruction 5 gave instruction in the Ukrainian language, and all were private institutions. Various community organizations, such as *Ridna Shkola and Prosvita, offered short-term vocational courses. During the Second World War, under the *Generalgouvernement, professional and vocational education expanded owing to Ukrainian community efforts. There were 330 professional schools, with 81,885 students. In 1941-2, higher education programs were organized in the fields of medicine, veterinary science, pharmacy, technology, agronomy, and forestry.

In Bukovyna, under Rumanian rule, there were few opportunities for professional and vocational education. In 1927 all Ukrainian-language schools were closed. Transcarpathia, under Czechoslovak rule, was in a better situation. In 1938 there were 5 teachers' seminaries (4 with Ukrainian as the language of instruction) and 3 secondary vocational schools (all Ukrainian, including the Trade Academy in Mukachiv), 9 lower vocational schools (of which 8 were Ukrainian), and 151 supplementary vocational schools (113 Ukrainian).

In contemporary Ukraine lower-grade vocational education is provided in vocational-technical schools, which, beginning in 1969, have gradually been transformed into institutions of secondary education offering general education as well as instruction in a specific trade. Full-time and part-time programs are offered that vary from one to three years. In 1986 there were 1,100 such schools, with 742,000 students. Institutions of *secondary special educa-

tion provide middle-grade vocational or semiprofessional education (for the training of technicians, paramedics, and the like). In 1987–8 there were 734 specialized secondary schools, with 800,600 students (of whom 524,300 were in full-time day programs). Schools specializing in commerce and business had 106,800 students in 1987–8; machine-building and -equipment secondary special schools had 102,200 students.

Various institutions of higher education train specialists with advanced qualifications. In 1987–8 there were 146 such establishments in Ukraine, with 852,300 students, of whom 454,500 were in full-time day programs. The largest number of students, 321,300, were in industrial and construction institutes, and 248,800 were enrolled in pedagogical institutes.

Institutions of professional and vocational education were under the jurisdiction of various all-Union ministries in Moscow or of ministries in Kiev. The number of students admitted to these institutions in any given year is determined according to a plan. Graduates are given employment by the appropriate ministry and normally must work at the designated position for three years. In some years up to 18 percent of Ukraine's graduates were given jobs in the USSR outside Ukraine. In recent years there has been much discussion of the quality of vocational and professional education, its failure to keep pace with technological and scientific progress, and its emphasis on narrow specialization. The extreme *Russification of this sector of education and the lack of opportunity to study in the West have also been criticized. In 1987 only 25 percent of the courses in institutions of professional and technical education were taught in Ukrainian, and there were virtually no textbooks written in the language. Since 1988, however, the use of Ukrainian has slowly expanded.

Institutions of professional and vocational education were also organized by Ukrainian émigrés in Czechoslovakia – notably, the *Ukrainian Husbandry Academy, the *Ukrainian Higher Pedagogical Institute, and the *Ukrainian Studio of Plastic Arts. After the Second World War professional and vocational programs were organized for the large number of Ukrainian refugees in various *displaced persons camps in Germany and Austria. In Germany, in 1947–8 there were 26 professional schools and courses, with 1,163 students, and in Austria, 8 secondary professional schools and 140 professional courses of various types.

Program music. Instrumental music, composed around a particular theme from literature, history, or nature, that is used to tell a story or illustrate an ideal. Notable examples of program music by Ukrainian composers include the symphonic poem *Taras Shevchenko* by K. Dankevych,

Dusha poeta (The Soul of a Poet) by A. Shtoharenko, the piano cycle *Liubov* (Love) by V. Barvinsky, and the symphonic *Hutsulian Pictures* by L. Kolodub.

Vasyl Prokhoda

Semen Prokhorov (self-portrait, 1895)

Prokhoda, Vasyl [Proxoda, Vasył'], b 6 January 1891 near Pavlivka in the Kuban, d 8 December 1971 in Denver. Military and public figure. While serving as a lieutenant in the Russian army he was captured in the Carpathians, in 1915, and interned in POW camps in Bohemia. There he was active in the Ukrainianization movement. After returning home in 1918, he served as staff captain in the UNR Army's Graycoats Division (fall 1918), the Third Iron Rifle Division (spring 1919), and the Fourth Gray Brigade (summer 1919). After internment by the Poles he emigrated (1922) to Czechoslovakia and studied and then taught forestry (1927–33) at the Ukrainian Husbandry Academy in Poděbrady. He headed the Ukrainian Agrarian Society and edited its irregular organ, *Selo*; headed the Society of Former Ukrainian Military Officers in Czechoslovakia; and wrote a booklet about S. Petliura (1930). In January 1945 he was arrested by the NKVD, and he spent ten years in Soviet prisons and concentration camps. He was repatriated to Czechoslovakia in 1956 and emigrated to the United States in 1965. His memoirs are titled *Zapysky nepokirlyvoho* (Memoirs of an Indocile, 2 vols, Toronto 1967, Neu-Ulm 1972).

Prokhorov, Semen [Proxorov], b 11 February 1873 in Maloiaroslavets, Kaluga gubernia, Russia, d 23 July 1948 in Kharkiv. Painter. After graduating from the Moscow School of Painting, Sculpture, and Architecture (1904) he studied under I. Repin at the St Petersburg Academy of Arts (1904–9) and lectured at the Kharkiv Art School (1913–22) and Art Institute (1922–48). In the 1920s he took part in the exhibitions of the Association of Revolutionary Art of Ukraine and the Association of Artists of Red Ukraine. He painted portraits, landscapes, and genre paintings, such as *Sick Child* (1909), the cycle 'In the Colony' (1915–18), *Boy in a Hat*, *Golden Autumn* (1921), *Female Harvesters* (1922–3), *The Women's Department* (1929), *Orphans*, and *Village Commune* (1929).

Prokipchak, Ivan [Prokipčak], b 6 January 1917 in Medzilaborce, eastern Slovakia. Writer, teacher, and civic figure in the *Prešov region. He graduated from the teachers' seminary in Prešov (1935) and worked as a village school teacher until the Second World War. He lost his po-

sition as ideological secretary in Prešov and the right to teach during the Stalinist purge of 1951. He was later reinstated, and became director of the Duklia Ukrainian Folk Ensemble (1953–7), head of the Humenné District People's Council (1957–61) and the Cultural Association of Ukrainian Workers in Czechoslovakia (1971–80), and a deputy to the Slovak National Council (1972–6). He is the author of the story collections *Ranok* (Morning, 1955), *Borot'ba pochynaet'sia* (The Struggle Is Beginning, 1956), and *Vyboïny* (Potholes, 1965) and of stories and publicistic articles in the Ukrainian press in Czechoslovakia. Yu. Kundrat's book about him appeared in 1977.

Prokofev, Aleksandr [Prokof'ev], b 2 December 1900 in Kobona, St Petersburg gubernia, Russia, d 18 October 1971 in Leningrad. Russian poet. He often wrote on Ukrainian subjects, and he translated T. Shevchenko, I. Franko, Lesia Ukrainka, P. Tychyna, M. Rylsky, and A. Malyshko into Russian. Prokofev's book of verse has been published in Ukrainian as *Vybrana liryka* (Selected Lyric Verse, 1960).

Prokofiev, Sergei [Prokof'ev, Sergej], b 7 December 1874 in Morshansk, Tambov gubernia, Russia, d 14 January 1944 in Kiev. Civil engineer. He graduated from the St Petersburg Institute of Road Engineers (1899). From 1908 he taught at the Kiev Polytechnical Institute, where he was a professor from 1922. He was instrumental in the construction of the first reinforced-concrete bridges in the Russian Empire and started the first course on reinforced concrete. Prokofiev was a pioneer in the field of reinforced concrete. His scientific works dealt with the technology, particulars, and applications of reinforced concrete, stress calculations, and related areas.

Prokofiev, Sergei [Prokof'ev, Sergej], b 23 April 1891 in Sontsivka, Bakhmut county, Katerynoslav gubernia, d 5 March 1953 in Moscow. Russian composer. He was exposed to Ukrainian folk songs while growing up, and motifs from these songs are prevalent in a number of his works, including the ballet *On the Dnieper* (1930), the opera *Semen Kotko* (1939), and sound tracks to the films *Partyzany v stepakh Ukraïny* (Partisans on the Steppes of Ukraine, 1942) and *Kotovs'kii* (1942).

Prokop, Myroslav (pseud: M. Vyrovyy), b 1913 in Pere-myshl, Galicia. Lawyer, political activist, and publicist. For his activity in the OUN he was imprisoned by the Poles in 1933–7. Upon his release he edited (1938–9) the student journal *Students'kyi visnyk* in Lviv and contributed (1939–41) to the publications of the Ukrainian Press Service in London. In 1942 he belonged to the home executive of the OUN (Bandera faction) in Kiev and then to its leadership (1943–4). He helped edit the underground OUN organ *Ideia i chyn* (1942–4). He was a founder of the *Ukrainian Supreme Liberation Council (UHVR) and a member of its presidium, and vice-president of the External Representation of the UHVR. After emigrating to the United States in 1949, he served as vice-president of the *Prolog Research Corporation and an editor of *Digest of the Soviet Ukrainian Press* (1957–77) and *Suchasnist'* (1967–). In addition to contributing articles to the Ukrainian press and entries to *Entsyklopediia Ukraïnoznavstva* (Encyclopedia of Ukraine, 1955–84) he wrote *Ukraïna i Ukraïns'ka polityka Moskvy* (Ukraine and Moscow's Ukrainian Policy, 1956; repr 1981).

Prokopchak, Petro [Prokopčak] (Prokop), b 12 November 1903 in Vapenne, Gorlice county, Galicia, d 31 October 1981 in Toronto. Communist leader and journalist. After emigrating to Canada in 1926, he worked in the mines and joined the Ukrainian Labour-Farmer Temple Association and the Communist Party of Canada. In the early 1930s he studied journalism in Kharkiv and then edited *Robitnytsia*, *Ukraïns'ki robitnychi visti*, *Narodna hazeta*, *Ukraïns'ke zhyttia*, and *Zhyttia i slovo* in Canada. He was interned during the Second World War (1940–2) under Defence of Canada regulations. In 1946 he was elected national secretary and in 1972 president of the *Association of United Ukrainian Canadians. At the same time he sat on the board of directors of the Workers' Benevolent Association.

Hryhorii Prokopchuk

Prokopchuk, Hryhorii [Prokopčuk, Hryhorij] (Prokopschuk, Gregor), b 1909 in Galicia, d 25 October 1972 in Munich. Emigré historian, publicist, and publisher in West Germany. He received a doctorate from Munich University in 1942 for the dissertation 'Die österreichische Kirchenpolitik in der Westukraine während der Regierungszeit Maria Theresa, 1772–1780.' He founded the Baturyn Ukrainian student society in Munich in 1939 and was a research associate of the East European Institute in Cracow in 1942–4. In the postwar period he was a central figure in the *German-Ukrainian Society in Munich and its publishing house Ukraine. He edited and contributed articles on Ukrainian church history and culture to the society's journal **Ukraine in Vergangenheit und Gegenwart* (1952–68), and he wrote *Das ukrainische Lwiw-Lemberg: Kultur-politische Betrachtung* (1954), *Der Metropolit Andreas Graf Scheptyčkyj: Leben und Wirken des grössten Förderers der Kirchenunion* (1955; rev edn 1967), *Ukrainer in München* (1958), *Ukrainer in der Bundesrepublik* (1959), and *Deutsch-Ukrainische Gesellschaft, 1918–1968* (1968).

Prokopchyts, Yevstafii [Prokopčyc', Jevstafij], b 1806, d 1856. Educator, philologist, and civic and political leader. In 1848, while teaching at a gymnasium in Stanyslaviv, he was elected to the Austrian parliament. That year he was appointed principal of the new Ternopil German Gymnasium. Under pseudonyms such as I. Kolosowicz and ein Rusin he wrote poetry, articles on political issues, and linguistic studies. He was a strong promoter of Ukrainian education.

Prokopenko, Oleksii, b 19 November 1925 in Auly, now in Krynychky raion, Dnipropetrovske oblast. Cine-

matographer. He graduated from the State Institute of Cinema Arts in Moscow (1955) and then participated in the production of *Ivanna* (1960), *Lisova pisnia* (The Forest Song, 1961), *Sofiia Hrushko* (1972), *Poizd nadzvychainoho pryznachennia* (A Train of a Singular Assignment, 1980), and the telefilm *Istoriia odnoi liubovy* (The Story of One Love, 1981).

Prokopii [Prokopij], b and d ? Wood engraver of the mid-17th century. He did illustrations for the publications of the Kievan Cave Monastery Press, including *Apokalipsys* (Apocalypse, 1646–62) and the first editions of the Kievan Cave Patericon (1661 and 1678). The illustrations of the latter were also issued as separate prints.

Prokopovych, Borys [Prokopovyč], b 13 July 1929 in Kutriv, Dubno county, Volhynia voivodeship, d 19 February 1980 in Poltava. Stage director and actor. In 1953 he completed study at the Kharkiv Theater Institute. He worked as a stage director and actor in the Poltava Ukrainian Music and Drama Theater, and from 1965 was its artistic director.

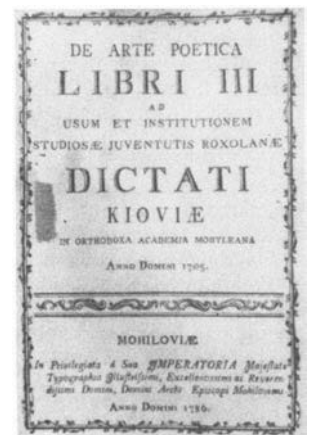

Prokopovych, Petro [Prokopovyč], b 10 July 1775 in Mytchenky, near Baturyn, Nizhen regiment, d 3 April 1850 in Palchyky, Chernihiv gubernia. Apiarist. He completed study at the Kievan Mohyla Academy and then served in the army (1794–8) before retiring to his estate and concentrating on beekeeping. Prokopovych gained considerable expertise in his field and established apiculture as a branch of agricultural science. He invented the frame hive in 1814, a marked improvement in beekeeping technology, and was the first in the world to obtain clear comb honey without destroying bees. He established the first scientific beekeeping school in Eastern Europe (which trained nearly 600 apiarists in 1828–74) and developed the first nomenclature for modern beekeeping in Eastern Europe. Prokopovych planned to purchase a printing press to publish his lectures in Ukrainian but was prevented from doing so by the tsarist authorities. A number of his essays were published in Russian scientific journals, and a collection of his lectures in Russian was published posthumously (later translated into German, French, and Polish).

Prokopovych, Sava [Prokopovyč], b ?, d 1701. Member of the Cossack *starshyna*; progenitor of the *Savych family. He was captain of Voronizh company in Nizhen regiment (1669), a signatory of the *Hlukhiv Articles, Hetman D. Mnohohrishny's envoy in Moscow (1669), and chancellor of Pereiaslav regiment (1671). He was appointed general chancellor (1672–87) and general judge (1687–1701) of the Hetman state. He took part in the *starshyna*'s overthrow of Hetman I. Samoilovych in 1687.

Prokopovych, Teofan [Prokopovyč] (secular name: Eleazar), b 18 June 1681 in Kiev, d 19 September 1736 in St Petersburg. Orthodox archbishop, writer, scholar, and philosopher. He graduated from the Kievan Mohyla Academy in 1696 and continued his education in Lithuania, Poland, and at the St Athanasius Greek College in Rome. In 1704 he returned to the Mohyla Academy to teach poetics, rhetoric, philosophy, and theology. He also served as prefect from 1708 and rector in 1711–16. He gained prominence as a writer and as a supporter of Hetman I. *Mazepa. His most famous work, *Vladimir*, is ded-

icated to the hetman, whom he depicted as the figure of the Grand Prince of Kiev. Prokopovych also praised Mazepa in his sermons and propounded Kiev as the second Jerusalem. Following Mazepa's unsuccessful revolt against Tsar Peter I in 1709, however, Prokopovych denounced him and expressed his complete allegiance to Peter. He participated in the campaign to vilify Mazepa, calling him 'the one filled with the Devil's spirit' and 'the new Judas.' From then he became a favorite of Peter's and was rewarded with several promotions. He was called to St Petersburg to be a preacher and adviser to the tsar, was consecrated bishop (1718) and then archbishop (1720) of Pskov, was appointed vice-president of the new *Holy Synod in 1721, and finally was made archbishop of Novgorod in 1725.

In the 1720s Prokopovych played a crucial role in the reform of the Russian Orthodox church. He supported the liquidation of the position of patriarch and the creation of the Holy Synod under the direct authority of the tsar. In 1721 he wrote the **Dukhovnyi reglament*, a reform statute under which the church was transformed into a state bureaucracy. He was also one of the major theorists of Russian autocracy. These positions brought him into conflict with the traditional church establishment and the boyars, who succeeded in isolating him from Russian political and cultural life after Peter's death.

Teofan Prokopovych and his book on poetics (1786)

Prokopovych's most notable contribution to Ukrainian literature was the drama *Vladimir* (1705). Although filled with Old Church Slavonic expressions, it is innovative in its use of dialogue and varied patterns of verse. His other poetic works include a panegyric on the Battle of Poltava in Ukrainian, German, and Latin; various elegies; and other works. He wrote an authoritative textbook on poetics, *De arte poetica ...*, which was influenced more by classical poetics than by prevailing baroque theory. In this he introduced the use of the hexameter and developed the epigram and other poetic forms. After his departure to St Petersburg, Prokopovych lost contact with Ukrainian literary development. His subsequent works were all in Russian and often devoted to praising Peter and his imperial reforms.

He wrote many theological works in Latin and Old Church Slavonic. His course notes on theology from the Kievan Academy were published as *Christianae orthodoxae theologiae in Academia Kijoviensi* (5 vols, 1773–5) and *Com-*

pendium sacrae orthodoxae theologiae (1802). His theology showed the influence of Protestant theologians and his conscious departure from the Catholic influences that earlier predominated at the academy. His *Philosophia peripatetica* is a philosophical text that embraces logic, natural philosophy, mathematics, and ethics. In it he set out the ideas of Descartes, Locke, Bacon, Hobbes, and Spinoza and supported the theories of Galileo, Kepler, and Copernicus. He also introduced the teaching of mathematics and geometry into the curriculum of the Kievan Academy. His text on rhetoric, *De arte rhetorica libri x* (which appeared in Ukrainian translation as *Pro rytorychni mystetstvo*, 1979), criticized the baroque style in speeches, sermons, and panegyrics and argued for the dominance of content over form.

Most of Prokopovych's historical writings deal with the reign of Peter I. The most important of these is *Istoriia imperatora Petra Velykogo ot rozhdeniia ego do Poltavskoi batalii* (The History of Emperor Peter the Great from His Birth to the Battle of Poltava, 1788).

The most complete collections of his works appeared in 1961 (ed I. Eremin) and in 3 vols in 1979–81 (published in Ukrainian translation by the AN URSS [now ANU]). A bibliography of his works, compiled by J. Cracraft, appeared in *Oxford Slavonic Papers* (1975).

I. Korovytsky, A. Zhukovsky

Viacheslav Prokopovych

Prokopovych, Viacheslav [Prokopovyč, V'jačeslav] (pseud: S. Volokh), b 10 June 1881 in Kiev, d 7 June 1942 in Besancourt, near Paris. Political leader, pedagogue, publicist, and historian. After graduating in history and philology from Kiev University (studying under V. An-

tonovych), he taught history at a Kiev state gymnasium. He was released for 'Ukrainophilism,' taught briefly at a private gymnasium, and then served as a librarian in the Kievan Local Museum. From 1905 he was active in the Ukrainian Radical Democratic party and from 1908 in the Society of Ukrainian Progressives (TUP). He edited the pedagogical journal *Svitlo* and published articles in the Ukrainian press (particularly in *Rada*). A member of the Central Committee of the Ukrainian Party of Socialist Federalists, he became a representative to the Ukrainian Central Rada in 1917 and then a member of its executive council. He served as minister of education in the cabinet of the UNR *Holubovych government (January–April 1918), and under the Hetman government he worked in the offices of the Kiev gubernial zemstvo. After the arrest of S. Petliura, he became the head of the National Zemstvo Administration. He remained in Kiev until May 1920. In May–October 1920 he was the head of the UNR Council of National Ministers, and in early 1921 he was the minister of education in a cabinet led by A. Livytsky. He emigrated to Poland and stayed in internment camps in Tarnów, Kalisz, and Szczepiórno. He arrived in Paris in 1924, and worked closely with S. Petliura. After the latter's death, he once again headed the UNR *government-in-exile's Council of National Ministers (1926–39). In October 1939–May 1940, he was the head of the UNR Directory and deputy to the Supreme Otaman of the UNR, in Paris. Prokopovych edited and wrote for the weekly *Tryzub* in Paris in 1925–9 and was one of the initiators (and a director) of the Petliura Library in that city.

A. Zhukovsky

Prokopovych-Antonsky, Antin [Prokopovyč-Antons'kyj], b 28 January 1762 in Chernihiv regiment, d 18 July 1848 in Moscow. Naturalist and pedagogue; full member of the Imperial Russian Academy of Sciences from 1813. He graduated from the Kievan Mohyla Academy (1782) and Moscow University (1786) and taught natural science at the Moscow University Boarding School for the Nobility (1787–1802) and then held the chair of agriculture and mineralogy at the university (1804–28). He served as director of the boarding school (1818–24) and was elected rector of the university three times (1818–26). At the same time he presided over the Society of Lovers of Russian Literature at the university and oversaw the first department of the Imperial Moscow Society of Agriculture. He edited a number of journals: *Detskie chteniia dlia serdtsa i razuma* (1785), *Magazin natural'noi istorii, fiziki i khimii* (1788–90, a supplement to *Moskovskie vedomosti*), and *Zemledel'cheskii zhurnal* (1823–45).

Proletar. See Politvydav Ukrainy.

Proletar (Proletarian). A newspaper published by the Galician Regional Bureau of the Siberian Bureau of the Communist Party in Omsk, Siberia, in 1920 (a total of 13 issues). It was aimed at Galician POWs in the city.

Proletariat. See Working class.

Proletarii (Proletarian). A Russian-language daily organ of the CC CP(B)U and the All-Ukrainian Council of Trade Unions, published in Kharkiv in 1923–35 and briefly in Kiev in 1935. Until 1924 it appeared as a supplement to the

newspaper *Komunist*. In 1926–7 it was called *Vseukrainskii proletarii*.

Proletars'ka pravda (Proletarian Truth). A daily organ of the Kiev Gubernia (then Oblast) Party Committee, published in 1921–41. It was published in Russian as *Proletarskaia pravda* until 1925, when it merged with *Bil'shovyk* and switched to Ukrainian. Previous organs of the Kiev Gubernia Party Committee, including *Kievskii kommunist* (1918–19) and *Kommunist* (1919–21), were also published in Russian. Under its longtime editor, S. Shchupak, the newspaper played a role in the Ukrainization movement of the 1920s. It was succeeded by **Kyivs'ka pravda*.

Proletkult (Ukrainian acronym for *proletarska kul'tura* 'proletarian culture'). A leftist mass movement in the immediate postrevolutionary period, which originated in Russia in 1917 and was carried over into Ukraine. Proletkult's theoreticians (including A. Bogdanov and V. Pletnev) were opposed to classical traditions; they considered them bourgeois and inimical to the proletariat. They believed that a 'purely proletarian' culture was to be created 'in the laboratory.' Driven by an imperative to educate the masses in the new form of culture, the organizers established a system of reading groups and workshops in literature, drama, and the visual arts. Their mass and largely nonartistic nature fostered the production of meager works by dilettantes and graphomaniacs. V. Lenin recognized that such production could result in a general cultural breakdown, and came out against the Proletkult in 1920. Nevertheless it continued to be active, particularly in Ukraine, where it led the assault on Ukrainian culture. Initially it worked under the auspices of the People's Commissariat of Education and the All-Ukrainian Organizational Bureau of the Proletkult, which in 1922 briefly issued a Russian-language monthly, *Zoria griadushchego*. Many of the leading activists of the movement in Ukraine were Russians (eg, A. Gastev, G. Petnikov) and were among those opposed to Ukrainization. Proletkult's orientation to the masses was similar to that of the organizations Pluh and Hart; it differed, however, in its national orientation. The *Neoclassicists (led by M. Zerov) and members of *Vaplite (led by M. Khvylovy) opposed the Proletkult's mass orientation and its members' ignorance. Their opposition was reflected in the *Literary Discussion of 1925–8, although by that time the Proletkult was in decline.

I. Koshelivets

Prolitfront (Proletarskyi literaturnyi front [Proletarian Literary Front]). A Ukrainian literary organization founded in Kharkiv by M. *Khvylovy, other former members of *Vaplite, members of *Molodniak, and members of other literary organizations. It was active from April 1930 to January 1931, when it was pressured by the All-Ukrainian Association of Proletarian Writers (VUSPP) to disband. It was the last attempt of the Vaplite group to take a collective stand for the right of writers to belong to organizations other than the VUSPP, which sought a monopoly on the entire Ukrainian literary world. Among its members were Khvylovy, P. Tychyna, M. Kulish, O. Vyshnia, Yu. Yanovsky, O. Dosvitnii, I. Senchenko, P. Panch, I. Dniprovsky, H. Epik, H. Kostyuk, V. Mysyk, M. Yalovy, L. Kvitko, and I. Momot. Prolitfront issued no direct state-

ments of opposition, but it rejected from the VUSPP's adopted method of 'proletarian realism.' Like Vaplite it sought to unite the best in Ukrainian literature and create a free environment for its development. Prolitfront also issued an official organ of the same name. Its fall was brought about by increasing political and cultural centralism and increasing disunity among Ukrainian Communists.

Prolitfront (acronym for Proletarian Literary Front). A monthly literary journal, the official organ of an organization of the same name. It was published from April to December 1930 (eight issues) in Kharkiv. It was the vehicle for the works of M. Khvylovy, P. Tychyna, M. Kulish, O. Vyshnia, Yu. Yanovsky, O. Dosvitnii, I. Senchenko, P. Panch, I. Dniprovsky, H. Epik, H. Kostyuk, V. Mysyk, M. Yalovy, L. Kvitko, I. Momot, and others.

Prolog. An Old Ukrainian expanded version of the Greek Synaxarion, which is a collection of lives of the saints for every day of the year. The name is derived from the introduction (*prólogos*) to the Synaxarion, which was translated into Church Slavonic in the early 12th century. *Prolog* is three times larger than its prototype; it includes additional lives of Slavic and Rus' saints (eg, ss Borys and Hlib and Theodosius of the Caves) and other religious and edifying material taken from Byzantine religious and secular sources, the Patericons, and the Rus' Primary Chronicle. Two Ukrainian redactions exist. The first dates from the early 13th century. The second is believed to have been the work of Cyril of Turiv. *Prolog* was used widely as a book of knowledge and served as the foundation for didactic literature in Rus'. M. *Petrov's book about it was published in Kiev in 1875.

Prolog Research Corporation (Proloh). A research and publishing association set up in New York in 1952 by members of the *Ukrainian Supreme Liberation Council (M. Lebed, M. Prokop, Yu. Lopatynsky, B. Chaikivsky, and others) to monitor and report on political, economic, and cultural developments in Soviet Ukraine. It published an English-language quarterly, *Prologue* (1957–61), under the editorship of L. Shankovsky, and a monthly, *Digest of the Soviet Ukrainian Press* (1957–77). It has assisted the Suchasnist Ukrainian Society for International Studies in producing the periodical **Suchasnist* and has published over 200 books in Ukrainian and 5 in Russian on Ukraine's political and literary history, contemporary writing, and the dissident movement. The association was reorganized into a corporation in 1968. Its directors have been M. Lebed (1952–73), M. Prokop (1973–79), R. Kupchynsky (1979–91), and P. Sodol (since 1991).

Prolom (Breach). A biweekly Russophile journal published in Lviv in 1881 (15 issues) and 1882 (22 issues) by Y.(O.) Markov. It was edited by Markov and O. Avdykovsky (1881, nos 1–15), V. Lutsyk (1882, no. 2), I. Yavdyk (1882, nos 3–12), and S. Labash (1892, no. 13). A supplementary newspaper, *Viche*, accompanied each issue. In 1883 Markov replaced *Prolom* with a semiweekly newspaper, **Novyi prolom*.

Prombank. A bank founded in Lviv in 1936 by a group of activists from the *Union of Ukrainian Merchants and

Entrepreneurs to promote the development of Ukrainian industry and trade. The bank encouraged small investors to open accounts and used its reserves to provide primarily short-term credit. It helped finance several enterprises in Lviv, a nail factory in Vynnyky, a gravel operation in Sarny, and other businesses. Prombank had branches or representatives in 20 cities and towns in Galicia and Volhynia. Its membership increased quickly, from 815 in 1937 to 1,550 in 1938, and total deposits increased from 407,000 zlotys to 627,000 zlotys. The bank's board of directors was headed by Ya. Skopliak and included A. Milianych, its founder, R. Mytsyk, and V. Yatsyshyn. When Soviet forces occupied Galicia in 1939, Prombank was dissolved, and its assets were seized by the State Bank of the USSR.

Prometei (Prometheus). An émigré publishing house owned and operated by R. *Paladiichuk in Augsburg and Neu-Ulm, Germany, from 1947 to 1951. It published six literary works (including two fairy-tales for children) by I. *Bahriany, Yu. Kosach's *Enei i zhyttia inshykh* (Aeneas and the Lives of Others), U. Samchuk's *Iunist' Vasylia Shermety* (The Youth of Vasyl Sheremeta), historical and political works by Isaak *Mazepa (5 vols), S. Pidhainy's memoirs of Ukrainian political prisoners in the Soviet concentration camps in the Solovets Islands, O. Han's biography of M. Khvylovy, and I. Ševčenko's Ukrainian translation of G. Orwell's *Animal Farm*.

LES NATIONS OPPRIMÉES PAR MOSCOU

Map issued by the Promethean movement

Promethean movement. A political movement of opposition to the Soviet government, named after the mythical god Prometheus (a symbol of the struggle of all enslaved nations for freedom), that emerged in Europe in the 1920s among émigré communities of nations under Soviet rule. It was formed as the Promethean League of Nations Subjugated by Moscow (commonly known as the Promethean League) in 1925 after a conference of representatives of various governments-in-exile and national committees based in Paris, Warsaw, Bucharest, Istanbul, Helsinki, and Prague. Its headquarters was set up in Warsaw. The league's first executive included president R. *Smal-Stotsky of Ukraine and two vice-presidents, W. Mustapha Bei of Azerbaidzhan and J. Salakaya of Georgia. The league consisted of Azerbaidzhani, Buriat, Cau-

casian Mountain Peoples', Crimean Tatar, Don Cossack, Georgian, Idel-Ural Tatar, Ingrian, Kazakh, Kirghiz, Komi, Kuban Cossack, Mari, Mordovian, Tadjik, Turkmen, and Ukrainian representatives. Armenians and Belarusians were not represented. The league claimed to speak for up to 80 million people. Its most concrete undertaking was a campaign to block the admission of the USSR into the League of Nations. In connection with this campaign it sent memorandums and other materials to all attending delegations. The Promethean League's representative in Geneva was M. Livytsky. The league sponsored a congress in Warsaw in 1935 which was attended by 200 delegates and specialists in the nationalities question in their respective countries.

Much of the Promethean movement's activity consisted of advocacy work. It was carried out mainly by local clubs through lectures, meetings, and informative gatherings aimed at acquainting the participants with the movement's struggle. Local chapters also published periodicals, such as the French-language **Prométhée* (1926–8) and *Revue de Prométhée* (1938–40). Journals in other languages were also published, and articles for publication in the press, books, and brochures were written by Promethean supporters.

Paris and Warsaw were the main centers of Promethean activity. Paris was an important publishing center and served as the headquarters for the allied Friendship Committee of the Peoples of Caucasia, Turkestan, and Ukraine and the France-Orient organization (which had a Ukrainian section), both of which were organized under the auspices of Prince J. Tokarzewski-Karaszewicz. The leading activists among the Ukrainians were M. Kovalsky, I. Kosenko, V. Prokopovych, and O. and R. Shulhyn.

In Warsaw the movement benefited from the financial and administrative support of government and semigovernmental agencies, military officials, and supporters of J. Piłsudski. The Oriental Institute in Warsaw (S. Siedlecki, director; O. Gurka, secretary) was the main base for the movement, and many scholars and professionals associated with it worked there. A youth circle formed around the institute published *Wschód (L'Orient)* under the editorship of W. Bączkowski. The Polish Institute of Nationalities Research, the Ukrainian Scientific Institute in Warsaw, and the *Biuletyni Polsko-Ukraiński* were also havens for movement supporters, as was the Institute of Eastern Europe in Vilnius (V. Bięłgorski, director). Other Polish proponents of the movement included A. Bocheński, T. Hołowko, M. Handelsman, S. Poniatowski, S. Stempowski, and L. Wasilewski. Leading activists among the Ukrainians included S. Baziak, L. Chykalenko, T. Olesiuk, V. Salsky (head of the Ukrainian section), P. Shandruk, R. Smal-Stotsky (long-standing head of the Prometei club), P. Suliatynsky (of the Kuban), and V. Zmiienko.

Secondary centers of the league's activity were Berlin, Harbin, Helsinki, Istanbul, Prague, and Teheran. In 1932–7 the Prometei club was active in Harbin, and in 1933 it published a collection of articles in Ukrainian, Georgian, Turkic-Tatar, and Polish. Local activists were I. Paslavsky and I. Svit. There was also a Promethean group in Shanghai, formed by refugees from Manchuria and Soviet territory.

After the Second World War certain ideas of the Promethean movement were perpetuated by organiza-

tions such as the *Anti-Bolshevik Bloc of Nations, the *Paris Bloc, and the Federation of Former Central and East European Veterans.

A. Zhukovsky

Prométhée

Prométhée. A French-language journal published in Paris monthly from 1926 to 1936 and then quarterly to 1938 (a total of 137 issues). The organ of the *Promethean movement, it promoted the national aspirations of the Ukrainians and the Caucasian and Turkic peoples in the USSR and contained much information on political and cultural developments there. Its contributors included many prominent Ukrainian, Armenian, Georgian, and other émigrés. The chief editor was the Georgian Zh. Gvazava, and the Ukrainian section was edited by M. Shulhyn and then I. Kosenko. *Prométhée* was succeeded by **Revue de Prométhée*.

Promin (Ray). A publishing house in Dnipropetrovske, established in 1954. It was called the Dnipropetrovske Book-Journal-Newspaper Publishing House until 1964. It has published political propaganda, prose, poetry, children's books, technical literature, and especially books on regional history and tourist guides in both Ukrainian and Russian. In the years 1966–75 it issued 1,057 titles with a combined pressrun of 13.4 million copies. In 1990 the publishing house was renamed Sich.

Promin' (Vashkivtsi)

Promin' (Ray). A pedagogical journal for Ukrainian teachers in Bukovyna and Galicia, published semimonthly in Vashkivtsi, Bukovyna, in 1904–7. Founded and edited by I. *Herasymovych, assisted by I. Karbulytsky, the journal published articles on pedagogical topics, on the history of Ukrainian education, on culture and literature, and on general political and social issues. The journal also supported the establishment of the Ukrainian Teachers' Mutual Aid Society.

Promin' (Ray). A weekly newspaper of literary, cultural, and community affairs, published in Moscow from December 1916 until early 1917, when it was closed by the Russian authorities. It was edited by L. Solohub with the close co-operation of V. Vynnychenko. Among the contributors were O. Lototsky, L. Abramovych, M. Hrushevsky, S. Yefremov, D. Doroshenko, O. Oles, O.

Salikovsky, P. Stebnytsky, P. Tychyna, M. Filiansky, and H. Chuprynka.

Promin' (Ray). A literary monthly published in Chernivtsi from 1921 to 1923 under the editorship of I. Pihuliak. Among its contributors were O. Kobylinska, O. Makovei, M. Marfiievych, O. Vilshyna, O. Hrytsai, F. Dudko, K. Polishchuk, H. Orlivna, O. Oles, A. Pavliuk, O. Zaduma, V. Limnychenko (Melnyk), A. Voloshchak, D. Makohon, V. Zalozetsky-Sas, M. Pidhirianka, M. Nyzhankivska, L. Myroniuk, and O. Shevchukovych. It ceased publication after Pihuliak's emigration and because of the pressures of Rumanian censorship.

Promin' (Ray). An illustrated monthly children's magazine published in Winnipeg from January 1927 to 1930. It contained stories, poetry, songs, and games and was especially intended to raise the national consciousness of Ukrainian children. The magazine was edited by S. *Doroshchuk. Contributors included O. Darkovych and D. Hunkevych.

Promin' (Ray). A newspaper for displaced persons, published in Salzburg, Austria, from September 1946 to April 1949 and then in Munich to September 1949 (a total of 96 issues). It was edited by Ye. Lazor.

Promin' (Ray). The monthly organ of the *Ukrainian Women's Association of Canada, published in Winnipeg since January 1960. The journal publishes articles on women's issues, culture, child rearing, and political and historical topics. It also contains some belles lettres and news of the association and its members. Its longtime editor was N. *Kohuska.

Pronchenko, Mykhailo [Prončenko, Myxajlo], b 1902 in Apostolove, near Kryvyi Rih, Kherson gubernia, d April 1942 in Kryvyi Rih. Poet and community figure. He began publishing in 1927, with the collection *Zdobuvaiu nadra* (I Conquer the Earth's Interior). He was arrested in 1933 and imprisoned for over five years in a labor camp in the Soviet Far East. During the Nazi occupation he edited the nationalist weekly *Dzvyn* in Kryvyi Rih from October to December 1941 and published the patriotic poetry collection *Kobza* (1941). He was arrested in January 1942 and executed by the Gestapo. I. *Bahriany's novel *Rozhrom* (The Rout) was dedicated to the memory of Pronchenko.

Proniuk, Yevhen [Pronjuk, Jevhen], b 26 September 1936 in Khomiakivka, Kolomyia county, Galicia. Philosopher and dissident. He grew up in Karaganda oblast in Kazakhstan, to which his family was deported in 1947. After studying philosophy at Kiev University as a correspondence student (1957–62) he worked as a researcher and bibliographer at the AN URSR (now ANU) Institute of Philosophy and wrote a candidate of sciences' dissertation on O. Terletsky (1965). Between 1964 and 1972 he wrote a number of articles on 19th-century Ukrainian thought and socialism, particularly in Galicia, and was one of three compilers of the bibliography of the works of the Institute of Philosophy (1969), a guide which was organized according to his scheme. For helping V. *Lisovy prepare an open letter to the CC CPSU criticizing its policies, and for distributing the letter, he was arrested in July

Yevhen Proniuk

1972. In November 1973 he was sentenced to seven years in labor camps in Perm oblast and Vladimir prison and five years' internal exile for anti-Soviet agitation and propaganda. Ill with tuberculosis, Proniuk barely survived his long term. After his release in 1984 he was permitted to work in Kiev only at menial jobs. In June 1989 he was elected president of the Society of Politically Repressed Ukrainians at its founding congress, and in 1990 he was elected to the co-ordinating council of the *Memorial Society and to the Kiev City Council.

Proniv, Danylo, b 1923 in Hrabivka, Kalush county, Galicia. Neurologist. A graduate of the Lviv Medical Institute (1951), he worked there as an intern, taught at the Kiev Institute for the Upgrading of Physicians, and headed the neurology department at the Lviv Medical Institute (from 1963). He has published works on vascular diseases of the nervous system and nerve regeneration.

Propaganda. See Agitation and propaganda.

Propination (*propinatsiia*; Polish: *propinacje*). The right to manufacture and distribute or sell alcohol and alcoholic beverages (derived from the Latin *propinare* 'to drink to one's health'). In theory a sovereign ruler always had the authority to regulate the production and sale of alcohol; in practice the exercise of that authority has depended on circumstances, especially on the power actually at the disposal of the ruler.

In Kievan Rus' and subsequently in Muscovy until the late 15th or early 16th century, it was the practice of the boyars to make specific amounts of mead, wine, kvass, and beer for special occasions. Others could brew privately for similar occasions on payment of a fee to the overlord and on condition that the drinks be used for domestic consumption only.

By the late 15th century most Ukrainian lands were under the joint control of the Kingdom of Poland and the Grand Duchy of Lithuania. In 1496 the sovereign granted to the nobility the exclusive right to manufacture and sell spirits. That propination right included the sole right of the manor lords to operate taverns on their estates. Over time the interpretation of the propination right was broadened so that estate owners could use alcoholic beverages as a form of payment for peasant labor. Records of estates in the 18th century show that serfs were required to purchase set quantities of alcohol as part of their obligations to manor lords. Further, peasants were forbidden to buy alcohol from any other source.

The propination privilege provided the landlords with substantial incomes, especially from the 18th century on. As the export of grain declined in significance, the Polish nobility turned increasingly to distilling as an inexpensive and profitable means of disposing of surplus grain. The king of Poland reconfirmed the nobility's propination right in 1768; it continued in Right-Bank Ukraine and in Austrian Galicia after the partitions of Poland.

In Left-Bank Ukraine the Cossack *starshyna* acquired many of the rights of the nobility after the collapse of Polish rule. Where the tsarist state was able to exert its authority, Russian regulations applied: distilling was in private hands except on crownland property, but the tsar regulated trade in alcohol. Peter I encouraged merchants to engage in the distilling industry, but in 1754 the landowning gentry were granted a monopoly over alcohol production on contract to supply the crown. Stills belonging to merchants were to be sold to the gentry or destroyed. The predominance of the gentry in the distilling industry was reinforced in the late 18th century when the Russian Empire expanded to the southern steppes and the gentry had exclusive distilling rights there.

In 1801 there were 19,067 stills in the Ukrainian lands under tsarist rule. Small local stills were the norm, but during the first half of the 19th century the economics of the distilling industry made practicable consolidation and the use of larger stills. By 1860 the number of stills had been reduced to 4,437. In Right-Bank Ukraine the nobility continued domestic distillation for the inn (*korchma*) and drink-house (*shynok*) on their estates. Russian regulations and sales were only gradually extended to those lands.

Changes were made in the alcohol production and marketing systems during the reform era of the 1860s. The notoriously corrupt liquor tax-farming system was abolished in 1863. Instead an excise tax on production was collected by state officials even in the Ukrainian lands, where the landlords continued their rights of production and retailing. Retailers had to pay a license fee. The tsarist government took away the right of the Polish nobles to sell alcohol on their estates as punishment for their involvement in the Polish Insurrection of 1863–4. They were, however, allowed to sell alcoholic beverages to the towns and cities. Between 1894 and 1902 the tsarist state progressively implemented monopolistic control of all aspects of the alcohol trade, thereby ensuring not only the effective regulation of retail outlets and better quality control, but also an increase in crown revenues. The previous owners of monopoly rights were compensated. Those measures effectively ended the historical propination right in the Ukrainian lands of the Russian Empire.

In Western Ukraine (eastern Galicia) the Habsburg rulers initially attempted to ease the lot of the peasantry by limiting certain manorial rights. By a decree of 1775, manor lords could no longer force peasants to buy alcohol exclusively from them or their taverns, and by a decree of 1789 anyone, regardless of social status, who built a decent tavern could retail alcoholic beverages. Neither decree was strenuously enforced, and the latter, which represented a challenge to the nobles' propination right, was rescinded in 1815. The 1775 decree was reconfirmed in 1848. The abolition of the peasants' compulsory labor for the manor lords was not accompanied, however, by an abrogation of the propination right.

During the first half of the 19th century, potatoes had replaced grain in the distillation process, and larger and

more efficient units had taken the place of small stills. In 1867 the right to rule on propination in Galicia was transferred from the central government in Vienna to the provincial administration. It passed a law in 1875 that was to end the exclusive right of landlords to produce and sell alcoholic beverages in the villages, which (until 1848) had formed part of their estates. Nonmanorial 'concessioned' taverns could thereafter operate in the villages, and anyone who could pay a 2,000-gulden fee and had the other necessary capital could operate a distillery or brewery, or, for a fee of 100 gulden, a mead winery. The nobility retained the propination right in part until 1910, however, for holders of the right could continue to operate one tavern in the community in which their estate was located, and they could maintain their distilleries and breweries as before. In addition they were to receive redemption payments as compensation for the loss of a proprietary right. Those were to come from a special 'redemption fund' composed of levies on tavern-keepers, fines for drunkenness, and the like. In 1890, in reaction to an increased excise tax on vodka imposed by the Austrian government, the nobility, through the Galician Diet, voted themselves a higher redemption payment (62 million gulden) and lengthened the term for its payment to 1916. It was only then that that lucrative right came to an end.

Prose. The plain speech of humankind. As a literary genre prose includes all forms of literary expression not metrically versified or designed for theatrical presentation. Literary prose is distinct from poetry and drama.

Ukrainian prose literature first appeared after the Christianization of Rus' in 988 and the adoption of Church Slavonic as a written language. The earliest works of Ukrainian prose literature, written in that language, were liturgical and other religious books either copied from those of the previously Christianized Balkan and Moravian Slavs or newly translated in Constantinople or Kiev from Byzantine Greek sources. Liturgical works included full texts or selections of the Gospels (eg, the oldest dated monument of Rus' literature, the Ostromir Gospel, ca 1056-7) and the Acts of the Apostles. In Kievan Rus', from the 10th to 14th centuries, the Old Testament was known mostly through translations of the *Paremeinik* (selected quotations used in the liturgy) and the Pentateuch and Octateuch. Instruction books for divine services and church ceremonies were also available, as were hagiographic lives of the saints and sermons in various collections and anthologies. Translated secular literature included the Byzantine chronicles of John Malalas, Georgius Hamartolus, and Georgius Sincellus; collections of scientific knowledge, such as the *Shestydnevi* (Hexamers) of Basil the Great and of John the Exarch, and the anonymous *Fiziolog*; and miscellanies, such as Maximus's *Pchela* (The Bee) and the *izborniki*, such as the *Izbornik* of Sviatoslav of 1073 and 1076. Translated prose tales also circulated, including the *Aleksandriia* (legends about Alexander the Great), *Devheniieve diianiie* (The Deeds of Degenis), *Varlaam i Ioasaf* (Barlaam and Josaphat), *Povist' o Akiri Pre-*

mudrom (The Tale of Akir the Wise), and *Povist' pro Indiiske tsarstvo* (The Tale of the Indian Kingdom).

The original literary prose in Kievan Rus' was small in quantity and heavily influenced by Byzantine sources in its forms and substance. The most important prose works of Kievan Rus' were the annalistic chronicles, **Povist' vremennykh lit* and the Galician-Volhynian Chronicle. Also significant were sermons, such as those of Theodosius, Ilarion, and Cyril of Turiv; original hagiographic literature, such as the lives of ss Borys and Hlib or of St Theodosius and the works contained in the *Paterik* of the Kievan Cave Monastery; original tales, which appear in the text of the chronicles; and works such as *Zhyttiie i khozhdeniie Danyla, rus'koi zemli ihumena* (The Life and Pilgrimage of Danylo, Abbot of Rus', ca 1100), Volodymyr Monomakh's *Poucheniie ditiam* (An Instruction for [Myl] Children, ca 1117), and various prayers, letters, and supplications, such as the *Moleniie Danyla Zatochnyka* (Supplication of Daniel the Exile, ca 12th or 13th century).

After the break in Ukrainian cultural development caused by the Mongol invasion of the 13th century, Ukrainian literary prose reappeared along with the general resurgence of culture in the second half of the 16th century. The resurgence was characterized by the influence of Renaissance, Reformation, and Counter-Reformation ideas from Western Europe and by growing religious and national awareness among Orthodox Ukrainians under pressure from Polish Catholicism. The 16th century witnessed a renewed interest in the genres of translated prose that were popular in Rus', as in the Ostrih Bible of 1581 (a complete and verified Slavonic text), the Peresopnytsia and other Gospels that appeared between 1556 and 1600, various sermons, and secular works and collections, among them *Velyke zertsalo* (The Great Mirror) and the *Rymski diiannia* (Gesta Romanorum). Original works, such as the sermons of L. Baranovych and D. Tuptalo's collection of saints' lives, were also popular in the 17th century.

The most important genre of Ukrainian prose in the second half of the 16th and first half of the 17th centuries was *polemical literature. The subject of the polemic was the religious and cultural struggle between Catholicism (both Latin and Uniate) and Orthodoxy. The rhetorical works on both sides of the debate were highly charged philippics written in Old Ukrainian, Church Slavonic, or Polish. On the Orthodox side the outstanding polemicist was I. *Vyshensky, a monk who lived on Mount Athos, and whose works consist of sermons and letters to his countrymen. Other Orthodox polemicists were Z. Kopystensky, H. Smotrytsky, L. Zyzzanii, and, later, I. Galiatovsky and M. Andrella. Another important figure in the polemic, M. *Smotrytsky, began as a defender of Orthodoxy but later converted to Catholicism. The outstanding Uniate polemicist was I. Potii. Many works written anonymously or pseudonymously have not been definitively attributed to specific authors, among them *Apokrysis*, *Perestorooha*, and *Poslaniie do latyn*. P. Skarga and B. Herbest were Polish Jews who participated in the polemic.

After the establishment of the *Kievan Mohyla Academy and the Cossack-Polish War Ukrainian prose was enriched with historical writing and scholarship. History appeared in the form of the so-called Cossack chronicles, among them the Samovydets, Hrabianka, and Velychko chronicles, which give accounts of the Cossack wars, and the *Synopsis*, which was composed at the Kievan Cave Monastery. Scholarship from the 17th and 18th centuries

covered a wide range of topics: linguistics, as in M. Smotrytsky's Slavonic grammar and P. Berynda's Slavonic dictionary; theology, as in the treatises of K. Stavrovetsky-Tranquillon and H. Dometsky; philosophy, as in the Latin treatises of I. Gizel and T. Prokopovych; and various other works, usually derived from Western sources and often produced as textbooks for the Kievan Mohyla Academy, on rhetoric, poetics, science, and mathematics written by a variety of authors in Church Slavonic, Old Ukrainian, or Latin. Ukrainian philosophical prose culminated with the work of H. Skovoroda at the end of the 18th century. His original treatises and dialogues, as well as his fables, were written in the bookish language of the time. *Istoriia Rusov*, an influential early 19th-century history of Ukraine, bridged the gap between the traditions of the Cossack chronicles and the literature of the emerging Ukrainian national revival.

Cultural secularization and national self-consciousness dramatically changed the Ukrainian cultural landscape at the beginning of the 19th century. Modern Ukrainian prose did not develop as rapidly or as richly as poetry, but it made a clean break with the past in adopting a modern system of belletristic genres and in abandoning the bookish language of the 18th century in favor of the modern forms of either Ukrainian or Russian. Many writers of the first half of the 19th century, among them H. *Kvitka-Osnovianenko, Ye. Hrebinka, N. Gogol, P. *Kulish, and T. Shevchenko, chose to write prose in Russian. The unqualified choice of Ukrainian as the language of prose literature occurred in the second half of the century.

Kvitka-Osnovianenko was the first major figure in modern Ukrainian prose. His short stories combined elements of burlesque classicism and moralizing sentimentalism with lengthy and abundant descriptions of ethnographic detail, such descriptions as would become a feature of Ukrainian prose throughout the 19th century. The first novel in Ukrainian, written in 1845–6, was Kulish's *Chorna rada* (The Black Council), a historical novel influenced by Sir Walter Scott, on the subject of the Cossack past, which Gogol and Kulish had already pursued in Russian novels. Kulish was also instrumental in promoting the Ukrainian works of M. *Vovchok, whose emotional, abolitionist short stories describe the horrors of serfdom and the cruel fate of women. A number of her stories were published in the journal *Osnova*, edited by Kulish and published in St Petersburg in 1861–2. *Osnova* also published ethnographic stories by lesser figures, such as H. Barvinok and P. Kuzmenko.

The tsarist government's Valuev circular (1863; see P. *Valuev) and *Ems Ukase (1876) were particularly heavy blows for Ukrainian prose because they closed off the possibility of publishing, except in Western Ukraine. Some works remained unknown to the general public, among them A. Svydnytsky's realist novel *Liuboratski* (The Liuboratsky Family), written in the 1860s but not published in its entirety until 1901. Because of the prohibition the realist period in Ukrainian prose was an assortment of individual writers rather than a cohesive literary movement.

The last quarter of the century was dominated by the large presence of I. *Nechui-Levytsky, the author of over 50 stories and novels (Nechui-Levytsky, like most 19th-century authors, called all his long works *povisti* [tales]). A descriptive realist with a focus on social and national issues, Nechui-Levytsky set himself the task of describing

contemporary Ukraine in the abundance of its social, cultural, ethnic, and geographic types. His contemporary and fellow realist P. *Myrny wrote a number of stories and novels focusing on social issues. Other writers in eastern Ukraine, such as O. Konysky, B. Hrinchenko, and O. Pchilka, were largely ethnographic realists who depicted populist social issues. M. Starytsky wrote novels and short stories in Russian on themes from Ukrainian history. In Western Ukraine, under Austria-Hungary, the major figure was I. *Franko, whose prose works, heavily influenced by Western European naturalists, particularly E. Zola, focus on the misery and victimization of workers and peasants under changing economic conditions. Among other prose writers in Western Ukraine were Yu. Fedkovych, a late Romantic, and O. *Kobylianska, a modernist who focused on the psychology of the new woman.

The 20th century brought major changes to Ukrainian prose. Cultural, national, and political ferment created an atmosphere that allowed literature to develop as an organic system. Modernist esthetics challenged the prevailing realist canon in a lively and productive assault. As government restraints were lifted, Ukrainian prose acquired a new readership with new interests.

The major figure of 20th-century prose has been M. *Kotsiubynsky. In his modernist works Kotsiubynsky concentrated on the psychology of his heroes, usually exceptional persons, through subjective narration, an impressionistic descriptive technique, and a poetic, lyrical style. Many of his works depict social conditions at the time of the Revolution of 1905. Kotsiubynsky's influence on subsequent Ukrainian prose, particularly the short story in the 1920s, was overwhelming. A different direction in prose was charted by V. *Vynnychenko, the most popular Ukrainian writer in the 1910s and 1920s. Vynnychenko practiced a form of psychological realism similar to that of G. de Maupassant and D.H. Lawrence. His short stories and novels often focus on the loss of human dignity under the weight of oppressive social stratification and on the personal dilemma of sexual morality. In Western Ukraine the first half of the century was dominated by the novellas of V. *Stefanyk, who depicted the tragedy of human existence in an extremely laconic style, and the less successful stories of L. Martovych and M. Cheremshyna.

The 1920s was a period of unprecedented growth and development for Ukrainian prose in Soviet Ukraine. After a few years of tentative efforts, between 1923 and 1927 the Ukrainian short story underwent a burst of creativity. Hundreds of new writers, not all of them highly skilled, appeared. After 1927 much of the energy turned from the short story to the novel. The generic and stylistic profile of the period was, for the first time in the history of Ukrainian literature, heterogeneous in the characteristically modern manner. The prose genres included every imaginable form: adventure stories, thrillers, science fiction, historical stories, travel stories, erotica, melodrama, biographies, humorous feuilletons, experimental novels, poems in prose, and so on. The styles included those of neoromanticism, ethnographic realism, psychological realism, and modernism of various stripes. Although many works still centered on Ukrainian village life, others dealt with newer subjects, such as industrialization, prostitution, and life in Central Asia.

In the early years of the decade the characteristic genre was the highly lyrical and melodramatic short story, often

about the turbulent events of the revolution and civil war and their effects on an individual's psychology. The focus was usually on the incompatibility of the individual's personal values with the demands placed on him or her by the new ideology. Among the outstanding practitioners of the genre were M. *Khvylovy, H. *Kosynka, B. Antonenko-Davydovych, A. Holovko, M. Ivchenko, and A. Liubchenko. Major novelists in the second half of the decade, V. *Pidmohyl'ny and V. *Petrov (Domontovych) wrote intellectual novels using psychological realism. Their works, particularly Pidmohyl'ny's outstanding novel *Misto* (The City), examined philosophical questions about humanity in the 20th century against the backdrop of Soviet reality. Yu. *Yanovsky wrote romantic idylls set in contemporary times; O. Dosvitny, travel novels set in exotic places; Yu. *Smolych, adventure novels; and G. Shkurupii and M. Yohansen, experimental novels. Among the most popular novels were those of V. Vynnychenko, even though their author lived abroad and was considered an ideological enemy. O. Vyshnia was a popular humorist. Other writers, such as P. Panch and I. Le, wrote novels that reflected the values and ideology of the Communist party. Their weak and artificial works anticipated the prescribed style of the Stalin era, *socialist realism.

The massive campaign of the early 1930s against the Ukrainian nation and its culture brought the growth and development of Ukrainian prose to an abrupt halt. Most writers were either silenced or destroyed. Those who continued to write were forced to adopt the official style of socialist realism, a poorly defined concept that amounted to glorification of the Soviet Union, its ideology, its defenders and heroes, and its way of life, while prohibiting psychological, especially Freudian, characterization, philosophical speculation, and formal experimentation. The Second World War introduced new enemies and a military backdrop, but otherwise Ukrainian prose changed little.

The general thaw in Soviet Ukraine in the late 1950s and 1960s brought a renewal in the prose genres. New writers, such as O. *Honchar and P. Zahrebelny, produced works that did not challenge the rules of socialist realism but gently expanded and humanized them. What was new in their works was often a return to the traditions of the early decades of the 20th century, as in O. *Dovzhenko's small autobiographical masterpiece *Zacharovana Desna* (The Enchanted Desna). In the 1970s, under renewed ideological pressure, Ukrainian prose developed slowly. Young writers who had first appeared in the 1960s continued to experiment tentatively with new techniques and new subjects. In the novels and stories of Hryhir *Tiutiunyk, V. Drozd, A. Dimarov, and Valerii *Shevchuk human values and the mundane struggles of human existence replaced state ideology as the guiding principle. The trend continued through the 1980s. Since 1991 there has been a slow but steady stream of original and interesting works in a variety of genres and styles from both new and established writers. In the emigration Ukrainian prose is scant and weak: U. *Samchuk continued the realistic tradition, and E. *Andriievska endeavored to write complex surrealist novels.

The study of Ukrainian prose is poorly developed, a reflection of that genre's subordinate position relative to poetry. There is no general history of Ukrainian prose or of the Ukrainian novel or short story. Most existing special-

ized studies, such as M. Levchenko's *Vyprobuvannia istoriieiu* (Trial by History, 1970) on the prerevolutionary novel or I. Hrytsiutenko's *Estetychna funktsiia khudozhn'oho slova* (The Esthetic Function of the Artistic Word, 1972), about 16th- and 17th-century prose, are limited in scope, methodologically unsound, and ideologically biased.

Prosiana [Prosjana]. v-17. A town smt (1986 pop 6,700) in Pokrovske raion, Dnipropetrovske oblast. A workers' settlement was established there in 1882 during the construction of the Donetsk railway line. The first fire-brick factory was built in 1894 to exploit the local kaolin deposits. Today Prosiana has the largest refractory-products manufacturing complex in Europe and two kaolin enrichment plants.

Prosiana kaolin deposit. A kaolin deposit located in Pokrovske raion, Dnipropetrovske oblast. It covers an area of approx 80 sq km, and its estimated recoverable reserves are 88.7 million t (1982). The kaolin is found in seams 0.1-61.5 m thick at a depth of 14-23 m. The field has been known since 1894. The kaolin is mined and processed for use in the chemical, ceramic, paper, and other industries.

Heorhii Proskura

Proskura, Heorhii (Yurii), b 28 April 1876 in Smila, Cherkasy county, Kiev gubernia, d 30 September 1958 in Kharkiv. Scientist in the fields of hydromechanics, marine construction, and aviation; full member of the AN URSS (now ANU) from 1929. He graduated from the Moscow Higher Technical School (1901) and taught at the Kharkiv Technological Institute (from 1902), where he introduced one of the first courses on the theory of aviation. From 1945 he was director of the ANU Laboratory of High-Speed

Machines and Mechanisms (now the Institute for Problems of Machine Building). He made important contributions in the areas of hydrodynamics, turbines, wind tunnels, and the modeling of fluid flow and was instrumental in the design and construction of major hydraulic works in the USSR, including the Moscow Canal. In 1974 a scientific prize in the area of energy research was established in his name by the ANU. Proskura's selected works were published in Kiev in 1972, and a biography of him was published there in 1979.

Proskura, Olha, b 31 May 1904 in Kiev, d 2 May 1978 in Kiev. Urologist. A graduate of the Kiev Medical Institute (1928), she taught at the Kiev Institute for the Upgrading of Physicians and headed its urology department (1953–69), and was chief urologist at the Ministry of Health of the Ukrainian SSR. Her main publications deal with urologic reconstructive surgery.

Proskuriv. See Khmelnytskyi.

Proskurivna, Mariia (pseud of Mariia Semenko), b 15 June 1863 in Kybyntsi, Myrhorod county, Poltava gubernia, d 19 October 1945 in Kiev. Writer; mother of M. *Semenko. She contributed her first Vovchokesque stories about the peasantry (some of them autobiographical) to the prerevolutionary weekly *Ridnyi krai*. Her stories *Od sina do solomy* (From Hay to Straw, 1913) and *Pani pysarka* (Madame Scribe, 1914) and novella *Uliasia* (1913) were published separately. In the mid-1920s several of her stories appeared in the Soviet Ukrainian press.

Prostitution. Promiscuous sexual activity performed in exchange for money or valuables. Prostitution has existed in Ukraine, as in other countries, since the earliest times. Its large-scale growth began in the 18th century as a result of the creation of large standing armies, urban development, and the increased circulation of money.

In Russian-ruled Ukraine attempts by the state to combat prostitution were spurred by the spread of venereal diseases, which infected a large number of troops. In 1843 a certain toleration of prostitution was legislated. Brothels and individual prostitutes had to register with a medical-police commission. The regulation of prostitution was rife with corruption, however, and it has been estimated that only a third of the prostitutes actually registered with the authorities.

An 1890 study of female prostitution in the Russian Empire serves as the most complete source of information to date, though it is in some respects inaccurate. Central statistical data collected in 1889 showed that there were 912 brothels, with 6,121 prostitutes, in European Russia. Russian-ruled Ukraine accounted for 157 brothels and 1,349 prostitutes. There were 6,826 registered prostitutes in European Russia, 802 of them in Ukraine. Prostitution in Ukraine was limited to the large centers, especially the port cities (one-third of the prostitutes in Ukraine were located in Kherson gubernia). The average age of prostitutes was 22, and over a third were infected with syphilis or other venereal diseases. The majority of women who became prostitutes did so before the age of 18, and almost a quarter started before they were 16. Three-quarters of prostitutes were from poor families, almost 90 percent were illiterate, and over 90 percent were orphans. A pros-

titute in a brothel charged 20 kopecks to 1 ruble per customer and had 3 to 10 visitors per day. (A well-paid worker in metallurgy earned 3 rubles a day.) Almost 20 percent of the women concerned had been raped before becoming prostitutes. Two-thirds of all brothel keepers were Jewish by nationality. Because the vast majority of Ukrainian women were peasants and were tied to traditional rural, agrarian life, only a small proportion of prostitutes were Ukrainian. According to 1897 census data, 75 percent of the female population of Ukraine was Ukrainian, but less than a quarter of the total number of prostitutes were of that nationality. Almost 50 percent were Russian, and some 20 percent were Jewish. There were fewer than 100 male prostitutes in Ukraine.

In Western Ukraine under Austrian rule, as a result of Empress Maria Theresa's energetic struggle against prostitution, in 1774 all brothels were closed down, and solicitation in taverns was prohibited. Consequently, prostitutes took to the streets, and the incidence of venereal diseases increased. Although only individual prostitution was allowed, illegal brothels existed in most large towns. Because prostitution in Western Ukraine, as in the Russian-ruled regions, was concentrated in urban centers, it involved relatively few Ukrainians, who were overwhelmingly an agrarian people.

When the Bolsheviks assumed power in Russia in 1917, they abolished all regulations prohibiting prostitution. Instead of imposing administrative measures against prostitutes, the Bolsheviks emphasized rehabilitation programs in the early years of their rule. In 1919 the Commission to Combat Prostitution was created by the People's Commissariat of Public Health. In 1920 the first camps for the rehabilitation of female speculators, pickpockets, and prostitutes were established. The CP(B)U Women's Sections (established in 1920) also took up the struggle against prostitution. Because of the economic crisis, however, prostitution continued to develop. In response, in 1922 the Interdepartmental Commission to Combat Prostitution was created in the USSR, and branches were opened in Soviet Ukraine. It established a network of centers (called prophylactoria) for the rehabilitation and retraining of former prostitutes. One of the largest such centers in Ukraine was in Dnipropetrovske. Although formally the commission was not to use administrative measures to combat prostitution, in practice prostitutes were forcibly confined in the centers.

In the 1920s prostitution was substantially reduced from what it had been during the prerevolutionary period. Changes in family and marriage law, and laws and policies designed to promote women's equality, played an important role in the reduction, as did the acceptance of freer sexual relations that gained currency as part of the revolutionary struggle against the 'old' morality. The shortage of housing and difficulties in getting hotel rooms also served to limit prostitution. The high rate of unemployment among certain categories of women, however, continued to push women into prostitution. Under early Soviet rule the social composition of prostitutes changed dramatically. Women from the former privileged classes (merchants, nobility, the petite bourgeoisie) formed almost 43 percent of prostitutes according to 1926 data; women of working-class origin formed only 14 percent; and peasant women, especially those who had entered domestic service, formed 43 percent. Prostitutes from the

former privileged classes often established liaisons with members of the new Soviet elite and were often used by the secret police as spies and informers.

In 1932, during the First Five-Year Plan, the Stalinist regime announced that industrialization policies had liquidated female unemployment, which was considered to be the root cause of prostitution, and that prostitution had ceased to exist in the USSR. Thenceforth, until recently, officials claimed that prostitution in the USSR was not a significant social phenomenon, and that only isolated incidents of such 'social parasitism' occurred. In reality prostitution continued to exist, and the security police often procured prostitutes for members of the Soviet elite. Soviet legislation established criminal responsibility for drawing minors into prostitution, for procuring a prostitute, for maintaining dens of vice, and for spreading venereal disease. The Criminal Code of the Ukrainian SSR and other Soviet republics carried no penalty for the sale of one's body, however. Most women arrested for prostitution were charged with currency offences – a frequent occurrence, given that 'hard-currency' prostitution in cities visited by Western tourists was and remains widespread. Homosexual prostitution was rare because until very recently homosexuality was a criminal offense.

Under the policy of glasnost officials finally admitted that prostitution had plagued Soviet society for many decades. In 1987 prostitution was made an offense, punishable by fines of up to 200 rubles, and apprehended prostitutes were subjected to a compulsory medical examination for venereal diseases. Prostitution continues to be widespread in Ukraine, especially in the large cities and resort areas (eg, the Crimea). Hard-currency prostitution is common in Kiev and in Odessa and other port cities. The majority of prostitutes are streetwalkers. A small minority work as call girls, catering to important diplomats and foreigners. In the past the KGB often used them for entrapment. Recent studies have shown that the majority of prostitutes are 30 years old or younger. Seventy percent of hard-currency prostitutes are under 30, but 86 percent of the street and train-station 'ruble' prostitutes are over 35. Twenty-six percent of the hard-currency prostitutes are daytime blue-collar workers, 25 percent are white-collar employees, and 7 percent are students; 38 percent do not have other jobs. About 50 percent are divorced, 26 percent are married, and 23 percent have children. Between 1987 and 1990 administrative sanctions were imposed on some 5,000 prostitutes, but had little effect. As elsewhere, most of what a prostitute earns is taken by her pimp, who pays expenses, including bribes to policemen. The spread of AIDS has heightened concern about prostitution and its moral, medical, and social impact.

Prosvita (Enlightenment). A monthly organ of the Prosvita society, published in Lviv in 1936–9. It was intended for Prosvita society supporters who were fostering literacy and enlightenment among the Ukrainian peasantry. The journal contained reading exercises, articles on hygiene, education, and culture, and instructions on how to administer choirs and other local organizations. Its editor was I. *Bryk.

Prosvita societies (Enlightenment societies). Ukrainian community organizations active in Ukraine from the late 1860s to the 1940s and in other countries from the early 20th century. Prosvita societies were first established in Galicia and became most developed there. Initially they had a general educational purpose and incorporated only the intelligentsia, but over time they assumed a mass character and diversified into a number of areas of activity. In several instances they laid the groundwork for the establishment of economic co-operatives, educational societies, and other groups that were instrumental in the Ukrainian national movement. In central and eastern Ukraine the development of Prosvita societies was stymied by political hostility to the Ukrainian populist ideals that underpinned their work. Nevertheless, the small number of Prosvitas established after the Revolution of 1905 had a substantial impact on the development of Ukrainian national consciousness. The ground swell of support for the movement following the Revolution of 1917 indicated that the societies probably would have developed a mass character if they had not been suppressed by the Soviet regime early in the 1920s. In other parts of the Russian Empire Prosvita societies provided a key focal point for community activity. Prosvita societies also developed in Europe and the Americas, and although they were vital community institutions, they never assumed the same mass character as the Galician Prosvita.

Galicia. The first Prosvita society was founded in Lviv on 8 December 1868 by a group of young populists who were unhappy with the conservatism and increasing Russophilism of the *Halytsko-Ruska Matytsia. The idea of the new society was proposed by S. *Kachala. The first constitution defined Prosvita as a learned society, whose purpose was to 'know and edify the people.' Besides 'promoting the moral, material, and political edification of the people' it was to 'collect and publish all the fruits of oral folk literature.' The original membership (72) was limited to a small circle of the intelligentsia. In the new constitution of 1870 the society's mandate was narrowed down to that of 'promoting education among the Ruthenian (Ukrainian) people' by means of popular publications in the vernacular and the organization of county committees, which eventually developed into branches. Prosvita's research function was transferred to the Shevchenko Society, which in 1893 was reorganized into the *Shevchenko Scientific Society. To increase membership, the constitution was amended in 1876: the admission fee was abolished, annual dues were reduced drastically, and all members received a free popular booklet each month. With these changes Prosvita started to become a truly popular organization. The first presidents of Prosvita were A. *Vakhnianyn (1868–70), Yu. *Lavriivsky (1870–3), V. *Fedorovych (1873–7), and O. *Ohonovsky (1877–94).

Prosvita devoted considerable attention to the development of Ukrainian schools. It demanded from the govern-

Building of the Prosvita society in Lviv

ment that Ukrainian schools be established and that Ukrainian be taught in the schools. It petitioned the government to establish a chair of Ukrainian history at Lviv University. It fought for equal rights for the Ukrainian language in the educational system. It published Ukrainian textbooks, not only for Galicia but also for Bukovyna and Hungary. In 1881 Prosvita's educational activities led to the establishment of the Ruthenian Pedagogical Society (later *Ridna Shkola).

The absence of local cells was Prosvita's major shortcoming in its early period. Outside Lviv educational work among the people was conducted by reading rooms, some of which were inspired or aided by the Prosvita society. In 1881-5 there were 320 reading rooms in Galicia under the

care of Prosvita. They had no organizational ties among themselves, however, nor with the center in Lviv. Yet it was largely through Prosvita's initiative that the popular paper *Bat'kivshchyna* (1879) and the populist political organization the People's Council (1885) were established. The main rival to the avowedly Ukrainophile Prosvita was the *Kachkovsky Society, a cultural-educational association established in 1874 by Galician Russophiles.

As more and more peasants joined the society, its structure was reshaped, and its goals were expanded. The revised constitution of 1891 provided for the establishment of autonomous rural reading societies tied to the central society in Lviv through county branches; a multitude of unconnected reading rooms would thereby be converted into a single network covering all of Galicia. Between 1891 and 1914 the number of reading rooms within Prosvita increased from 5 to 2,944, and the number of branches from 7 to 77, 3 of which (Sianik, Jasło, and Nowy Sącz) were in the Lemko region. In 1914, 75 percent of the cities, towns, and villages in Galicia had a reading room, and 20 percent of the province's Ukrainian population belonged to Prosvita (for growth in membership see the table).

At that time also the society assumed an activist posture and added the task of 'raising the welfare of the Ukrainian people' to its general educational purpose. Its new program called for the establishment of economic institutions, such as credit unions, stores, farm co-operatives, dairies, and warehouses, in association with reading rooms. The society became involved in improving farming methods, organizing agricultural courses, and publishing agronomic literature. From 1906 a special agricultural-industrial commission at the head office supervised its economic activities. By 1912 the Prosvita reading rooms had 540 stores, 339 small credit unions, and 121 warehouses. Its work in the area of economic life culminated with the First Educational-Economic Congress, held in February 1909 to commemorate the 40th anniversary of the society. As Ukrainian involvement in the economy expanded and became diversified, Prosvita transferred some of its economic functions to specialized central organizations, such as the Provincial Audit Union (later the *Audit Union of Ukrainian Co-operatives), *Maslosoiuz, and *Sil'skyi Hospodar. It continued to play a role in economic education by maintaining itinerant farming in-

The Galician Prosvita society's agricultural school in Mylovannia

structors and publishing popular economic literature. It set up and financed a commercial school in Lviv, a women's domestic school in Uhertsy Vyniavski (1912–18), and a farming school in Mylovannia (1912–39). Furthermore, the society granted scholarships to students of agronomy, dairying, and domestic management and sent its best scholarship holders abroad to study (40 in 1907–14).

Prosvita's involvement in book publishing began in 1869, when it released *Zoria* (Star), a reader for peasants. Then similar readers and popular brochures about temperance brotherhoods, community banks, and warehouses began coming out, albeit irregularly. With the help of government grants the society published 17 textbooks for the lower Ukrainian gymnasium grades in 1871–6. From 1877 the society began printing monthly booklets, which members received free of charge. In a 50-year period (1868–1918) 348 popular booklets, including 305 monthly booklets (1877–1914), totaling 2,941,115 copies were published; of these, 88 were devoted to fiction, 52 to history and geography, 42 to economics and trade, 22 to science and medicine, 22 to legal issues, 11 to religion and military affairs, and 20 to biography. Another 41 were annual almanacs, and the remainder dealt with miscellaneous topics. The *Ruska* (later *Ukrainska*) *pysmennist* (Ruthenian [Ukrainian] Literature) series (1904–28) contained 28 volumes (over 170,000 copies) of Ukrainian classics. Eight books (23,000 copies) were issued in the *Hospodarska biblioteka* (Farming Library) series (1907–27). The *Prosvitni lystky* (Prosvita Leaflets) series consisted of 60 pamphlets (190,450 copies), mostly reprints of articles in Prosvita's almanacs and in *Pys'mo z Prosvity*. An additional 44 publications (183,606 copies) came out after 1909. The society published the educational and cultural magazines *Pys'mo z Prosvity* (1877–9, 1907–14) and *Chyital'nia* (1894–6). The editors of these various publications included O. Partytsky, V. Shashkevych, Yu. Tselevych, Yu. Fedkovych, I. Franko, A. Vakhnianyn, V. Lukych-Levytsky, P. Ohonovsky, K. Pankivsky, K. Levytsky, O. Borkovsky, V. Biletsky, Ya. Vesolovsky, H. Khotkevych, Yu. Balytsky, and F. Fedortsiv. By 1914 over half the reading rooms had their own libraries, consisting largely of Prosvita's publications.

In the three-tiered structure of the Prosvita society the chief executive council in Lviv co-ordinated the work of the branches, which in turn assumed responsibility (from

Cover of early publications published by the Prosvita society in Lviv

1891) for the local reading rooms in their counties. The head office in Lviv, directed for many years by A. Skorodynsky and then by A. Hapiak, provided the branches with materials, organizers, examiners (particularly auditors), and lecturers. To manage the large organizational network, it relied on help from a number of commissions, particularly publishing, economic, and educational-organizational, which were formed in 1906–8. From 1869 the central Prosvita in Lviv maintained a library which received donations and book contributions, particularly from eastern Ukraine. In 1909, after transferring its most valuable collections to the Shevchenko Scientific Society, it was reorganized into a public lending library (16,900 volumes in 1935). An archive and museum set up at the Lviv Prosvita in 1869 was eventually donated to the Shevchenko Scientific Society and the National Museum. The central society organized a series of all-Ukrainian events, such as the Educational-Economic Congress in 1909 and the centennial of T. Shevchenko's birth in 1914. From 1895 it owned its own building in the heart of the city.

Prosvita derived its income from membership dues (202,000 out of a total income of 793,000 kronen between 1868 and 1907), subsidies from the provincial and central governments, individual donations, and profits from its own operations, such as publishing. The subsidies from the Galician Diet were small and were often cut off because of Polish opposition. From 1908 they were increased, particularly to support the society's economic

program. From 1870 to 1914 the Galician government donated 190,000 kronen to Prosvita for publishing and 173,000 kronen (1906–14) for economic operations. The Vienna government provided 42,000 kronen in 1906–9 for economic projects. Prosvita's first patron was its president, V. Fedorovych, who donated 24,000 kronen in 1875. Eventually a number of foundations for specific purposes were set up. Many of them provided scholarships for young people, among them the foundations of Rev S. Kachala, Count M. Tyshkevych, Rev S. Novosad (120,000 kronen for secondary-school scholarships), Rev I. Zalutsky, and S. Dubrovsky. M. Maletsky left his estate in Uhertsi Vyniavski for a women's school. In 1869–1907 Prosvita's income totaled 793,000 kronen and its expenses, 791,000.

Until 1914 the Prosvita society was the most important Ukrainian mass organization in Galicia. Its activities encompassed almost all aspects of the nation's life, and it gave birth to various cultural, political, economic, farming, and sports organizations and societies which eventually became independent entities. Its reading rooms were the chief Ukrainian community organizations in the countryside and the focal points for the establishment of savings unions, co-operative stores, Silskyi Hospodar circles, and kindergartens. In short, Prosvita played a central role in the growth of national consciousness among the Ukrainian population and in the improvement of its standard of living: without its work the restoration of Ukrainian statehood in Galicia in 1918 would have been impossible. Prosvita also served as a model for the Bukovynian educational and cultural organization Ruska Besida, the Prosvita society in the Dnieper region (est 1905), and the Prosvitas of the emigrants in the New World, with whom the Lviv-based society maintained contact.

The First World War inflicted heavy losses on the society: its buildings, equipment, and libraries suffered extensive damage, and most of its reading rooms were closed. Until 1921 the Polish authorities refused to allow them to be restored. Accordingly, in 1920 there were only 882 reading rooms in 73 branches. At the same time the society found itself in a financial crisis, as its holdings, which in 1914 were worth 352,000 kronen, had suffered from devaluation, and government subsidies had stopped altogether. It was only in 1924, when a new constitution was approved by the Polish authorities, that reading rooms began to be reopened on a wide scale. The Polish government continued to harbor reservations about Prosvita's work: during the Polish *Pacification (1930) many Prosvita reading rooms were damaged or destroyed, and in 1936 one branch and 135 reading rooms were dissolved by the authorities. The society was also forbidden to expand its activities into the so-called northwestern lands (Volhynia, Podlachia, and the Kholm region). In the early 1930s its reading rooms in the western Lemko region were closed down.

In spite of government opposition the number of reading rooms increased steadily: by 1939 there were 3,075 reading rooms and 360,000 members in Prosvita (85 percent of Ukrainian settlements in Galicia had a reading room, and the membership incorporated 15 percent of the adult population). Almost 50 percent of the reading rooms owned their own premises. The highest percentage of the Ukrainian population enrolled in Prosvita was in Ternopil, Zbarazh, Skalat, and Sokal counties. In some villages

Members of the Galician Prosvita society's chief executive and auditing commission in 1936

there were also Young Prosvitas, which recruited young men and women. In the 1930s there were a lending library, a bookbinding shop, and a bookstore at the head office in Lviv.

The paragraph on economic activities was dropped from Prosvita's new constitution of 1924. Henceforth the society's work was restricted to the educational field, to which the presidents M. *Halushchynsky (1923–31) and I. *Bryk (1932–9) devoted most of their attention. Increasingly the work was carried out by full-time professional staff at the head office and at most of the branches, and even among groups of neighboring reading rooms. The policy on educational work was set by the Second Prosvita Congress in September 1929. Besides managing the usual affairs of the organization, in 1935–7 the head office organized 1,932 literacy courses, 112 courses for executive members of reading rooms, 37 courses for play directors, 26 courses for choir conductors, 8 courses for leaders of Young Prosvitas, and 11 general educational courses. In the second half of the 1930s the staff of the head office numbered several dozen. V. Mudry, S. Shakh, and M. Duzhy were the key theoreticians and managers of educational work, besides the presidents, the secretaries, and the other members of the executive, such as K. Malytska. Branch inspectors and secretaries, such as S. Magalias, P. Petryk, M. Brylynsky, V. Haftkovych, and M. Kushnir, provided support for the head office.

Because of financial difficulties Prosvita did not publish in the same quantities as before the First World War, but its publications improved in content and design. Besides continuing the Ruska pismennist series, it published 8 books (31,500 copies) in the Zahalna biblioteka (General Library) series (1919–28), including M. Vozniak's *Istoriia ukrains'koï literatury* (History of Ukrainian Literature, 3 vols, 1920–4) and *Ukrains'ki narodni dumy* (Ukrainian Folk Dumas, 1920) under the editorship of F. Kolessa. By 1938, 22 works of popular scholarship, by such authors as M. Vozniak, M. Holubets, V. Doroshenko, Kolessa, I. Krypiakevych, V. Kubijovyč, I. Rakovsky, S. Rudnytsky, S. Siropolko, and O. Terletsky, had come out in the *Uchitesia, braty moi* (Learn, My Brothers) series. The Narodna biblioteka (Popular Library) series (1919–28), which replaced the monthly booklets, contained 38 books (203,000 copies), including calendars. Ten books (48,000 copies) came out in the *Istorychna Biblioteka* (Historical Library)

THE PROSVITA SOCIETY IN INTER-WAR GALICIA

series. Another 53 booklets (157,000 copies) came out, mostly reprints of articles in *Zhyttia i znannia*.

Prosvita published over 600 books (3,995,000 copies) during its lifetime: 477 books, booklets, and leaflets (3,479,000 copies) in 1869–1918; and 126 titles (516,000 copies) in 1919–28.

In the interwar era Prosvita's periodical publications included the renewed *Pys'mo z Prosvity* (1921–2), which was reorganized into a magazine for extramural education titled *Narodnia prosvita* (1923–7), the monthly *Prosvita* (1936–9), the popular *Zhyttia i znannia* (1927–39), and the specialized magazines *Amators'kyi poradnyk* (1925–7) and *Bibliotechnyi poradnyk* (1925–6). The editors of Prosvita books and magazines included V. Doroshenko, F. Fedortsiv, S. Shakh, V. Mudry, O. Terletsy, and V. Simovych.

The number of reading-room libraries increased from 2,664 in 1914 to 3,209 (with 688,186 books) in 1936. To expand the holdings of local libraries Prosvita organized a system of book purchasing and distribution. In 1924 the head office introduced traveling libraries (49 by 1935), which served the poorest communities and particularly the villages without reading rooms. The branch offices conducted similar activities. The branch libraries were usually lending libraries and often included special collections on extramural education and amateur theater.

In the interwar period Prosvita depended on membership dues, profits from its publications and cultural events, and individual donations for its budget. A fund-

raising drive known as *Dar Prosvity* (A Gift to Prosvita) was held in December of each year on the anniversary of the society's founding. Substantial financial aid also came from emigrants in the New World, who sometimes financed entire libraries or buildings to house reading rooms.

In spite of government interference the Galician Prosvita made some contribution to the cultural and educational life in the northwestern lands. It provided advice and supplied books to the reading rooms there. Prosvita's ties with emigrant communities were also strong.

With the Soviet occupation of Galicia in 1939, Prosvita's entire network was dismantled, and some of its libraries were destroyed. In the Lemko and Sian regions, which were under the German occupation, hundreds of reading rooms sprang up, some of them as revivals of the societies which had been closed down by the Poles in the 1930s. When the Germans captured eastern Galicia in 1941, they permitted reading rooms to be revived, but only under the auspices of officially recognized *Ukrainian educational societies.

Central and eastern Ukraine. The success of the Galician Prosvita attracted wide interest among Ukrainian circles in central Ukraine. Activists and writers from this region of Ukraine, including I. Nechui-Levytsky, S. Rusova, Kh. Alchevska, D. Doroshenko, M. Levytsky, and B. and M. Hrinchenko, enlisted as secret (anonymous) members of Prosvita, supported it financially, and sent their works for publication in its magazines and book series. It served as an example for the Vik publishing house, established in Kiev in 1895, and the Philanthropic Society for Publishing Generally Useful and Inexpensive Books in St Petersburg in 1898.

The first educational societies, which were called Prosvita after the Galician reading rooms, arose only after the 1905 Revolution. First among them was the Prosvita formed on 8 October 1905 in Katerynoslav, which had a membership of 400, including D. Yavornytsky, V. Bidnov, Ye. Vyrov, D. and N. Doroshenko, P. Narizhny, S. Lypkivsky, H. Denysenko, and L. Bidnova. It established branches in Manuilivka, Diivka, Perepyna, Hupalivka, and a number of other villages. Its activities consisted of organizing reading rooms, arranging various celebrations, concerts, plays, lectures, and evenings, and selling subscriptions to Ukrainian papers, magazines, and books. In 1914 it was closed down for 'promoting separatism,' but it continued to operate as the Ukrainian branch of the Russian Scientific Society. The rural reading rooms survived until 1916.

A second Prosvita was founded in Odessa on 30 October 1905 by I. Lutsenko, M. Komarov, I. Lypa, S. Shelukhyn, A. Nikovsky, and M. Slabchenko. This unique club of Ukrainian intelligentsia organized lectures and discussions, literary-musical evenings every Saturday, and plays every Sunday. Through its efforts O. Hrushevsky began to lecture in Ukrainian on Ukrainian history at the university in 1906, the paper *Narodnia sprava* appeared, and two popular books were published. The society maintained a library and reading room, bookstore, museum, and choir until the authorities closed it down in 1908.

In May 1906 a Prosvita society was founded in Kiev by B. Hrinchenko, H. Kovalenko, M. Lysenko, F. Krasytzky, F. Matushevsky, and M. Starytsky with the support of Le-

sia Ukrainka, S. Yefremov, and D. Durdukiivsky. Since it was prohibited from establishing branches, the society limited its activities, such as lectures, public readings, concerts, and plays, to the city and its suburbs. Laying down broad plans for educational work and publishing and setting up special committees for different activities, the Kiev society assumed a leading role among the Prosvitas. It gave particular weight to publishing and within five years printed 34 books (163,760 copies) for the common people. Its reading-room library contained over 10,000 volumes, mostly in Ukrainian studies. By 1909 its membership had reached 625, but in 1910 the authorities dissolved the society by administrative order.

From 1906 Prosvitas sprang up in other centers, including Kamianets-Podilskyi, Zhytomyr, Chernihiv, Mykolaiv, and Melitopil. In the Kuban Prosvitas appeared in Katerynodar, Temriuk, and Maikop. Prosvitas were organized also in Novochoerkassk (Don region), Baku (Caucasia), and Vladivostok (Far East). The authorities withheld approval of Prosvitas in Poltava and Kharkiv gubernias. Prosvitas in other gubernias were rarely allowed to set up branches. All Prosvita societies were closed down in 1910–11. Although there were only about 40 short-lived Prosvitas, including branches, in eastern Ukraine, they made a significant contribution to the growth of national consciousness.

With the outbreak of the Revolution of 1917, Prosvitas sprang up spontaneously in Ukrainian towns and villages. By the summer of 1917 a dense network covered eastern Ukraine. The revived Kiev Prosvita assumed the leading role in the movement, and on 20 September 1917 it convened the First All-Ukrainian Conference of Prosvitas, which set up the All-Ukrainian Association of Prosvitas and the Central Bureau for co-ordinating the activities of rural societies and county associations. Many Prosvitas arose in the Far East and the Kuban. Within a short time thousands of Prosvita societies were established, and almost every town and larger village in Ukraine had a reading room. In 1917–22 the reading rooms were centers of Ukrainian national life. The new Soviet regime viewed the Prosvitas as centers of Ukrainian national resistance. In July 1920 the Central Executive Committee of the CP(B)U passed a resolution to take control of the Prosvitas and incorporate them into state structures. This measure proved unsuccessful, and the Prosvitas continued to expand their influence, with the number of societies growing in 1921 from approx 4,000 to 4,500 with a total membership of 400,000. In February 1922 a meeting of the Ukrainian gubernial departments decided to destroy the Prosvitas and initiated measures to force their closure. As a result only 573 Prosvita branches were still operational in 1923, and these were converted into 'Soviet' Prosvitas, *village centers, or reading houses. The Prosvitas in the Kuban, the Far East, and throughout the RSFSR were abolished also. Of the Far East Prosvitas only the one in Harbin survived until 1945.

With the German occupation of Ukraine in 1941 Prosvitas began to appear, often at the initiative of the OUN expeditionary groups, but as the administration passed into the hands of the German civil authorities, they dissolved themselves to avoid repression or were suppressed. The Prosvita in Kharkiv, with the president V. Dubrovsky, the vice-president Z. Sapitska, and such members as B. Porai-Koshyts, O. Popov, D. Solovei, and F. Bulbenko, was reg-

istered officially as an organization for mutual aid, particularly for food supplies, but went far beyond these activities to become the focus of Ukrainian civic life in the city (1941–3). It organized an exhibition of documents and memorabilia of Soviet terror, titled 'Away with Bolshevism.'

Northwestern Ukraine. At the beginning of the 20th century there were active Prosvitas in Siedlce, Hrubeshiv, and Kobyliaky (in Biała Podlaska county) and in the Kremianets region of Volhynia. In 1916–18, during the Austrian-German occupation of Volhynia, the Ukrainian popular educational movement began to expand there as a result of the presence of the Ukrainian Sich Riflemen and the Bluecoats and Graycoats divisions. The Prosvita established in Brest in 1918, headed by V. Dmytriuk and V. Krynytsky, organized about 100 reading rooms in the villages and towns of Polisia. It was closed down by the Polish authorities in 1919 and revived in 1923, but eventually most of its reading rooms were closed down, and the rest disintegrated.

In the Kholm region and Podlachia the *Ridna Khata society served as a regional counterpart to Prosvita. It had almost 125 branches by the time it was banned (1930) by the Polish authorities. The Prosvita in Lutske, established in 1918, had 134 branches by 1932, when it was banned. Its membership included I. Vlasovsky, Ye. Petrytsky (a long-time president), V. Ostrovsky, O. Levchanivska, and M. Maslov. On its initiative two educational conferences were convened in Lutske. They resolved to set up a Volhynian Prosvita, which would cover the entire region, but the Polish government did not give consent. The Lutske Prosvita organized courses in Ukrainian studies and workshops on co-operative management. Other county Prosvitas maintained similar programs. The most active were in Kremianets, Rivne, Kovel, Dubno, Horokhiv, Volodymyr-Volynskyi, Ostrih, Kostopil, Liuboml, and Oleksandriia. From the late 1920s the Polish authorities systematically closed down Prosvita branch offices and reading rooms in Volhynia and Polisia, until all 600 had been removed. The Prosvitas in the northwestern lands tried to maintain close contacts with the Prosvita society in Lviv, and in 1932–3 they started to establish Ridna Khata societies in Volhynia. These were disbanded in 1937–9. In the summer and fall of 1941, after the German occupation of Volhynia, a string of Prosvitas sprang up. These too were soon banned.

Transcarpathia. Prosvita was formally constituted in Transcarpathia only in the interwar era. It had some antecedents. In 1896 the Greek Catholic Reading Room, based on the constitution of the Lviv Prosvita and closely associated with it, was founded by Rev O. Shtefan in Skotarske. It was the first of several semilegal reading rooms and circles established after 1900, in villages such as Velyki Veretsky, Holubyne, Lypcha, Rakhiv, Stroine, and Yasinia. Commonly they received Prosvita's publications from Lviv and distributed them in spite of restrictions and prohibitions by the Hungarian authorities.

Prosvita was formally established in Uzhhorod in 1920, and subsequently its network spread throughout Transcarpathia. By 1923 it had four branches in county centers and 82 reading rooms, 30 drama groups, and 12 choirs in towns and villages. In 1934 there were 10 branches (including Prešov and Bratislava), 230 reading rooms, 146 theater groups, 21 orchestras, 98 choirs, and 47 sports

groups. The membership reached 15,337. By the time it was dissolved in 1939, the Transcarpathian Prosvita had published over 200 books and brochures, almanacs, and an annual collection for Carpatho-Ukrainian studies, *Naukovyi zbirnyk* (14 vols, 1922–38). In 1925 *Prosvita*, a scientific-literary and economic monthly, came out for a brief period. The central society in Uzhhorod maintained the Ruthenian Theater of the Prosvita Society, directed by M. Sadovsky and then O. Zaharov, the Nova Stena national theater (1934–9), directed by Yu. Sherehii, and the Ruthenian National Chorus, conducted by O. Prykhodko. The village choirs were usually conducted by Prykhodko's students, among whom were A. Mino, Yu. Paliukh, F. Povkhan, I. Tymkanych, and F. Shymanovsky. A. Kist taught courses in folk dancing, and I. Romanenko organized orchestras. The larger branches and reading rooms owned their own buildings. The head office in Uzhhorod (built in 1926) also housed an ethnographic museum, the offices of various organizations, an editing office, and a library of 10,000 volumes (based on H. Strypsky's private collection). The leading figures were Yu. and M. Brashchaiko, Rev A. Voloshyn, Rev V. Hadzhega, Rev V. Zheltvai, A. Shtefan, P. Yatsko, S. Klochurak, and Rev K. Fedelech. The Prešov branch was managed by Rev E. Biharii and I. Nevytska. Annual conferences took place in various parts of Transcarpathia. The largest of them was the all-Prosvita conference of 1937 in Uzhhorod, attended by over 12,000 participants. Prosvita's chief competitor was the Russophile *Dukhnovych Society (est 1923). The Hungarian authorities banned Prosvita in 1939 and confiscated its property. Its archive and part of its library were destroyed, and the remainder of its assets (along with all the property of the head office, its branches, and reading rooms) was transferred to the Subcarpathian Scientific Society.

Europe. In 1919, after the downfall of Austria-Hungary, the Ukrainians in the Bačka and Srem regions (of Yugoslavia) founded the *Ruthenian People's Enlightenment Society in Novi Sad. It had a number of branches and a broad program that included publishing. Its activities were banned by the Hungarians, who occupied Bačka in April 1941. In 1923 a Prosvita society was established in Zagreb on the model of the Lviv one. It had branches and representations in Slavonia, Bosnia, and Belgrade. It published an irregular bulletin that eventually became *Vistnyk Ukraïns'koho tovarystva Prosvita v Záhrebi* (1936–9) and maintained contacts with Prosvita in Lviv. After Croatia declared independence in 1941, the Zagreb Prosvita transferred its functions to the Ukrainian Representation, the only functioning Ukrainian organization there, which paid little attention to educational work. After 1944 neither organization could resume its work, under the communist regime.

The first Prosvita outside Ukraine's ethnographic territory was the society established in Cracow in 1894 as a reading room under the Lviv Prosvita. In 1923 it became a branch of the Lviv society. A Prosvita operated in Vienna from 1908 to 1918. During the First World War there were Prosvita societies in Ukrainian refugee camps and in some POW camps for soldiers of the Russian army in Germany and Austria. In Czechoslovakia the Ukrainian Labor Battalion in Brno had a Prosvita (1922–3), and the societies in Bratislava and Prešov were tied to the Prosvita in Uzhhorod.

In France Prosvita societies arose among emigrant workers and were organized along the lines of Galician reading rooms. In the interwar period such reading rooms functioned in Versailles, Lyon, Metz, Orléans, Strasbourg, and Soissons. In 1932 there were 75 Prosvitas registered with the Ukrainian National Union in France.

North and South America. Popular educational societies modeled on the Lviv Prosvita were established among the Ukrainian emigrants in the New World. Eventually most of them were incorporated into various organizations, although their programs and activities were obviously influenced by the Lviv society. Separate Prosvita societies developed only in Argentina, Paraguay, Uruguay, and several Canadian centers.

The first Prosvita society in the United States was established in Shenandoah, Pennsylvania, in 1887. Other communities followed suit and also formed popular educational societies. From 1896 Rev A. Bonezevsky led a campaign to develop a Prosvita-like association in the United States. The idea was pursued seriously by a group of Ukrainophile priests known as the American Circle after Bonezevsky's death in 1903, when they established a Prosvita-style press (*Slovo*) using moneys the priest had left in his will for this purpose. The venture folded in 1906 because of a lack of support, but it was revived under a different name for one more year. In 1909 the idea of an American Prosvita society was discussed at the All-People's Enlightenment Conference, held in Philadelphia. With the powerful backing of Bishop S. *Ortynsky the gathering launched an American Prosvita. The new group had an auspicious beginning, but it was scuttled in the heated dispute that broke out between Ortynsky and the Ukrainian National Association (UNA) in 1910. The UNA launched its own attempt at a Prosvita-style organization in 1912, when it formed the Enlightenment Committee. This group also enjoyed some initial success but failed to develop a Prosvita structure. Some UNA locals maintained the Prosvita name, and the general aims of Prosvita were pursued independently by various Ukrainian-American associations, but the society itself never took root. In the interwar period the Lviv Prosvita maintained contacts with Ukrainians in the United States and published three issues of *Amerykans'kyi prosvitianyn* to recruit members from among them.

Even though a large number of popular educational associations developed among Ukrainians in Canada along Prosvita lines, the society itself failed to take root there also. The first Ukrainian-Canadian reading society was established in Winnipeg, in 1899, and by the early 1920s such societies were widespread throughout the country. In the period after the First World War many of them were housed in community centers, which commonly referred to themselves as people's homes (*narodni domy*). These groups usually developed formal or informal ties with the national religious or ideological structures which were established in Canada in the 1920s and 1930s, and were not organized into Prosvita affiliates. Nevertheless, they functioned much as Prosvita societies, and 35 of the 116 educational societies in Canada in 1935 referred to themselves as Prosvitas. The most significant Ukrainian educational societies which were organized as Prosvitas were located in Winnipeg and Port Arthur–Fort William (Thunder Bay), and the people's homes in Edmonton and Toronto operated much along the lines of Prosvitas. An attempt

was made (under the auspices of the Ukrainian Self-Reliance League) to establish a *Union of Ukrainian Community Centres of Canada that would have served many of the functions of a central Prosvita organization, but the group failed to develop as anticipated.

The first Prosvita society in South America arose in Curitiba, Brazil, in 1902. Until 1914 educational organizations there bore various names, including Prosvita. After they merged into the Ukrainian Union in 1922 (later the *Union for Agricultural Education), they ceased to act as independent societies.

In Argentina the first Prosvita society was founded in 1910 in Apostoles. Others arose only in the 1920s. In 1924 the Ukrainian Central Prosvita Society was formed in Buenos Aires, and it became the head office for all the Prosvitas in Argentina. Before the Second World War branches were situated in Dock Sud, Valentin Alcua, Chaco, Tres Capones, and other centers. After the war the Prosvita society received a major influx of new members from among recent immigrants and was reoriented politically into a group supporting the Bandera faction of the OUN. New branches were also formed in Lavallon, Vila Caraça, San Martin, and other locations. In 1971 Prosvita had 15 branches and 1,226 members. Each branch had its own building, Ukrainian school, and secondary school. The society maintains a dance group and a banduryst kapelle and publishes *Ukrains'ke slovo* (since 1928), almanacs, and books.

In Paraguay educational societies began forming in the late 1920s and led to the establishment of a Prosvita society in Encarnación in 1937. By 1945 it had 10 branches. After the Second World War it developed a youth section, branches of which were later reconstituted as Ukrainian Youth Association groups. In the 1980s Prosvita in Paraguay maintained a central office in Encarnación and had five branches.

In Uruguay a Prosvita society was established in Montevideo in 1934 as a branch of the Buenos Aires Prosvita.

Prosvitnyi lystok (Educational Bulletin). A newspaper for Ukrainian soldiers of the Russian army interned by the Germans in the First World War. It was published in 1915–16 at the Wetzlar POW camp in Germany three times per month, and was later absorbed by *Hromads'ka dumka*.

Proterozoic era. See Geology of Ukraine.

'Protestacja' (Protestation). A memorandum written in Polish in the spring of 1621 by Metropolitan Y. Boretsky of Kiev and M. Smotrynsky and sent in the name of the Orthodox hierarchy and clergy of the Polish Commonwealth to King Sigismund III Vasa. The memorandum defended

the historic rights of the Orthodox church and especially the legitimacy of the hierarchs consecrated by Patriarch Theophanes of Jerusalem in 1620, stressed the positive role of the Cossacks as defenders of the Orthodox church, and criticized Metropolitan Y. Rutsky and the Uniate hierarchy. It was circulated widely in manuscript throughout Ukraine and Belarus. The text was first published, with annotations by P. Zhukovich, in *Stati po slavianovedeniiu*, vol 3, 1909.

Protestantism. A major branch of Christianity established in the 16th century as a result of the *Reformation. Protestantism emerged in the 16th century in opposition to the dogma and institutional practices of the Catholic church and quickly spread throughout the western, northern, and central reaches of Europe as well as into Eastern Europe. Incorporating the teachings of theologians such as M. Luther, J. Calvin, H. Zwingli, and T. Müntzer, Protestantism rejected the ritualism, entrenched dogmatism, and authoritarianism of the Catholic church in favor of the concept of grace through faith, the involvement of the laity in church affairs, and a personal understanding of the Bible. The movement quickly spawned a number of new churches, among them the Anglican, Lutheran, Baptist, Presbyterian, and Methodist. For the history of Protestantism in Ukraine see *Evangelical Christians, *Socinians, *Baptists, *Adventists, *Lutherans, *Mennonites, and *Stundists. Some Ukrainians in *Canada and the *United States also joined Protestant or Protestant-inspired churches, such as the *Independent Greek Church.

Profosis. See Union of Industry, Trade, Finance, and Agriculture.

Viktor Protopopov

Protopopov, Viktor, b 22 October 1880 in Yurky, Kobleliaky county, Poltava gubernia, d 29 November 1957 in Kiev. Psychiatrist; full member of the AN URSR (now ANU) from 1945. A graduate of the St Petersburg Military Medical Academy (1906), he worked there until 1921 and then served as a professor at Perm University and at the Kharkiv Medical Institute (1923–44). He was director of the Institute of Clinical Psychiatry and Social Psychohygiene (1926–9) and of the psychiatric clinic of the Psychoneurological Institute in Kharkiv (1932–41), taught at the Kiev Institute for the Upgrading of Physicians (1944–57), and headed the psychiatry department of the ANU Institute of Physiology (from 1944). He was chief psychiatrist

and president of the Scientific Council of the Ukrainian SSR Ministry of Health. He introduced the pathophysiological approach to psychiatry, applied I. Pavlov's theories in psychiatry, proposed new methods for treating schizophrenia and manic depression, and was one of the first psychiatrists in the USSR to use hypnosis as therapy. His collected works were published in Kiev (1961).

Protsenko, Havrylo [Procenko], b and d ? Kievan engraver and silversmith of the first half of the 19th century. A member and president (1828–9) of the Kiev goldsmiths' guild, in 1840 he was elected an honorary citizen of Kiev. He did the engravings *Council of the Kievan Cave Saints* (1820–1), *St Gregory* (1822) in the Kievan Cave Liturgicon (1832), and *John the Theologian* (1827). Together with F. Korobka he made silver articles for the Kievan Cave Monastery.

Protsenko, Volodymyr [Procenko], b 4 January 1942 in Mariupol, Donetsk oblast. Mathematician. After completing his studies at the Berdianske Pedagogical Institute, he taught at the Kharkiv Agricultural Institute (1964–72) and then at the Kharkiv Aviation Institute. His main contributions are in the theory and application of R-functions.

Protsiuk, Stepan [Procjuk] (Prociuk, Stephen), b 3 January 1916 in Chocen, Czechoslovakia, d 12 October 1984 in New York. Mechanical engineer and economist; member of the Ukrainian Academy of Arts and Sciences. He studied and worked at the Lviv Polytechnical Institute and emigrated in 1943, first to Austria, then to Australia, and then, in 1957, to the United States. He published numerous studies and articles about the development of technology, transport, and energy in Ukraine and other parts of the USSR. Among his most important contributions are studies of the Kakhivka Hydroelectric Station, the economic development of Siberia, the economic reconstruction of Ukraine after the Second World War, the Ukrainian aircraft industry, Ukrainian contributions to space sciences, the organization of research and development in Soviet Ukraine, and Ukrainian scientific and technical publishing. He was active in the Ukrainian Engineers' Society of America and was editor of *Visti ukrains'kykh inzheneriv* for many years. He contributed entries to *Entsyklopediia ukraïnoznavstva* (Encyclopedia of Ukraine, 1955–84) and the *Encyclopedia of Ukraine* (1984–93).

Protsyshyn, Zhyhmont [Procyšin, Žyhmont] (pseud: Pavlo Mariichyn), b 1910 in Kavsko, Stryi county, Galicia, d 1945 in Belgium. Galician writer and journalist. As a student at Cracow University he began contributing to the Lviv daily *Dilo*. In 1929 he was arrested by the Polish authorities and tried in Lviv with several others for belonging to the Ukrainian Military Organization and distributing its organ *Surma*, but he was acquitted. In the late 1930s he coedited, with B. Kravtsiv, the OUN political weekly **Holos natsii*. He wrote stories about the plight of political prisoners and the prose collection *Molode pokolinnia* (The Young Generation, 1933), the copies of which were confiscated by the authorities. During the German occupation he was deputy director of the Lviv District Committee of the Ukrainian Service to the Fatherland, an organization that recruited and trained students as a labor force for the German war effort. For a brief period after the

war he was a professor of Slavic studies at Ghent University and contributed political articles to the Belgian press.

Proty khvoyl'! (Against the Currents). A monthly journal of socialist thought and political affairs, published in Lviv in 1928–9. It was closely allied with the Ukrainian Radical party and was edited by prominent leaders of the party, such as M. Stakhiv, K. Kobersky, and O. Pavliv-Bilozersky.

Proverbs (*prykazky, prypovidky, pryslivia*). Brief, pithy popular maxims which are often rhymed and easily remembered. Dating back to prehistoric times, they typically express a universal concept through a concrete image, often with a dash of humor. Proverbs are part of the oral rather than the literary tradition.

Proverbs deal with various aspects of life and are said to constitute an encyclopedia of popular wisdom. Their principal themes are nature, farming, flora and fauna, domestic life, human nature, family and social relations, customs, folk wisdom, religion, and morality. In content and form they are similar to adages, folk metaphors, puns, and fables. Because of their simple structure they can be memorized easily. Usually they consist of two symmetrical sections that rhyme.

Proverbs can be found in the literary monuments of Kievan Rus', such as the *Izbornik* of Sviatoslav, the Primary Chronicle, and *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign). The first written collections of Ukrainian proverbs did not appear until the late 17th century. These were *Povisty ili poslovitsy vsenarodniia po alfavytu* (Most Common Sayings or Proverbs in Alphabetical Order) and Klymentii's *Prypovisty, abo tezh prysliviia, pospolitye* (Proverbs or Sayings of the Common People). I. Yuhasevych-Skliarsky's collection of 370 Transcarpathian Ukrainian proverbs, published in 1809, was unique in its time. The first printed collection, of 618 Ukrainian proverbs, was V. Smyrnytsky's *Malorosiiskii poslovitsy i pogovorki* (Little Russian Proverbs and Sayings, 1834), published in Kharkiv. The second was *Halyts'ki prypovidky i zahadky* (Galician Proverbs and Riddles, 1841), published in Lviv (2,715 items). The best collection of proverbs in the 19th century was M. *Nomys's *Ukrains'ki prykazky, pryslivia i take inshe* (Ukrainian Sayings, Proverbs, and the Like, 1864), published in St Petersburg (14,339 items). To this day I. Franko's collection of over 30,000 items, *Halyts'korus'ki narodni prypovidky* (Galician-Ruthenian Folk Proverbs, 6 vols, 1901–10), has not been surpassed.

Collections of proverbs published during the Soviet period include large sections of so-called Soviet proverbs and sayings, about love of the people, the Communist party, the Soviet order, Marxist-Leninist ideology, and 'enemies of the people.' Most of these sayings are artificial: they were devised at the behest of Party authorities and have nothing to do with the people. The collections often fail to meet the basic criteria of scholarship. The first scholarly collection, *Prysliv'ia ta prykazky* (Proverbs and Sayings, vol 1, 1989), edited by M. Paziak, deals with sayings about nature and man's economic activities. The first bibliographic guide to Ukrainian proverbs was *Paremiologia Ukrainy* (Paroemiology of Ukraine, 2 vols, 3,342 items, 1982–3), edited by A. Bushui and A. Ivchenko. Virtually all Ukrainian writers from I. Vyshensky and H. Skovoroda to the poets of the 1980s have used proverbs in their works.

Original charter (1914) of the Providence Association

Providence Association of Ukrainian Catholics in America (Soiuz ukrainsiv katolykiv Provydinna). A fraternal benefit and insurance association founded by Bishop S. *Ortynsky in 1912 for the purpose of providing moral support and material aid to Ukrainian immigrants. Ortynsky had earlier desired to create a Catholic fraternal institution and had attempted to do so by proposing a change to the constitution of the Ruthenian National Association (later the *Ukrainian National Association) that would give it an explicitly (Catholic) confessional rather than secular character. Strong opposition to his initiative convinced the bishop to abandon this approach and to set up a separate body. The Providence Association's founding conference took place in New York after a number of priests and some lay members resigned from the Ruthenian National Association. The first Providence branches arose in New York, Newark, Jersey City, and Yonkers. By 1914, when its head office was moved to Philadelphia, the association had about 600 members. By 1971 Providence had 212 branches with a membership of 18,700 and assets of 6.8 million dollars, and by 1989 it had 213 branches with almost 18,000 members and assets of about 12 million dollars. Besides helping the families of its members, the association sponsored Ukrainian nurseries and schools in Galicia, Ukrainian eparchies in the United States and Argentina, Ukrainian seminaries and schools in the United States, and various cultural events. It was a founder and presidium member of the Ukrainian Congress Committee

Flag of the Providence Association

of America (UCCA) until 1982, when it withdrew its participation in the UCCA in order to remain neutral in its dispute with the Ukrainian American Coordinating Council. Since 1912 it has published the paper *Ameryka*, and since 1918 an annual *Kalendar*. It has also published some valuable monographs, such as H. Luzhnytsky's *Ukrains'ka tserkva mizh skhodom i zachodom* (The Ukrainian Church between East and West, 1954) and S. Hordynsky's *The Ukrainian Icon of the 12th to 18th Centuries* (1973). The presidents of Providence have been Revs Ye. Barysh (1912), M. Pidhoretsky (1912–16), P. Poniatyshyn (1916), V. Dovhovych (1916–18), M. Kuziv (1919–21), I. Ortynsky (1922–9), A. Lotovych (1930–41), V. Bilynsky (1942–57), R. Lobodych (1958–9), R. Sukhy (1959–61), S. Tykhansky (1962–5), M. Kharyna (1966–78), R. Moskal (1978–82), S. Chomko (1982–6), and M. Kanavan (1986–90). The association's history is presented in jubilee books published in 1974 (60th anniversary) and 1987 (75th anniversary).

Provincial School Union (Kraiovyi shkilnyi soiuz). An organization founded in 1910 in Lviv by representatives of several Ukrainian political parties and principal community organizations to co-ordinate and administer Ukrainian private education in Galicia. Its primary concern was secondary education. M. *Hrushevsky and I. *Kyveliuk served as presidents of the union, and L. Salo served as director. The union suspended activity with the onset of the First World War and eventually disbanded, in 1920. On many occasions the union worked together with the Ukrainian Pedagogical Society (see *Ridna Shkola).

Provisional Committee for Investigating Antiquities in the City of Kiev (Vremennyi komitet dlia izyskaniia drevnostei v gorode Kieve). A committee formed in 1835 to undertake archeological studies in Kiev. Under the leadership of M. *Maksymovych, the rector of Kiev University, the committee searched for Rus' sites in Kiev and undertook studies of St Michael's Golden-Domed and St Cyril's monasteries, St Michael's church, and the grounds of St Sophia Cathedral. The committee was composed largely of academics, including V. Tsykh, S. Ornatsky, A. Petrov, I. Daniłowicz, and M. Berlynsky. As a direct result of its work, an archeological museum was established at Kiev University in 1837. More significantly, the committee's activity laid the groundwork for a lasting vehicle for archeological investigation in Ukrainian lands: when it was dismantled in 1845, an expanded version of its mandate was transferred to the *Kiev Archeographic Commission.

Provisional Government (Vremennoe pravitelstvo). The Russian government from the *February Revolution (15 March 1917) to the *October Revolution (7 November 1917), composed of members of the Constitutional Democratic, Russian Socialist Revolutionary, Octobrist, and Russian Social Democratic Workers' (Mensheviks) parties. The Provisional Government favored continuing the war with the Central Powers and tried to maintain the unity of the Russian Empire in the new democratic Russian republic against the autonomist and separatist aspirations of the non-Russian nationalities. It attempted to introduce reforms gradually and faced opposition from the revolutionary wing of Russian social democracy, the Bolsheviks.

The Provisional Government established gubernial (and county) executive committees chosen by the local zemstvo assemblies and revolutionary committees. They were headed by gubernial commissars. Many Ukrainians were chosen for those local administrative positions in Ukraine. The Provisional Government appointed D. Doroshenko krai commissioner of the occupied regions of Galicia and Bukovyna; he, in turn, appointed I. Kraskovsky gubernial commissioner of the Ternopil region and O. Lototsky gubernial commissioner of Bukovyna. In Ukraine a dual governing structure was agreed to in principle, in which the Provisional Government was to share power with the *Central Rada (unlike the situation in most of the former empire, where the soviets were contesting for power). The Provisional Government attempted to limit the competency of the Rada, however, and a mutually acceptable solution of power sharing was never worked out.

Prince G. Lvov headed the Provisional Government until 20 July; after a period of crisis, A. *Kerensky assumed the leadership of a coalition government on 6 August and remained head of the government until its demise. At first the Provisional Government took a negative view of the Central Rada's demand for the national-territorial autonomy of Ukraine, and the Central Rada defied it in its First Universal (see *Universals of the Central Rada) and by the establishment of an autonomous Ukrainian government, the *General Secretariat of the Central Rada. But since the Provisional Government was threatened by increasing revolutionary unrest throughout the country, it decided to come to terms with the Rada. On 11 July the Provisional Government ministers Kerensky, M. Tereshchenko, and I.

Tseretelli came to Kiev and negotiated a compromise: the Provisional Government would recognize the General Secretariat as the supreme organ of government in most of Ukraine, and the Rada and General Secretariat, recognizing the Provisional Government, would refrain from a unilateral implementation of autonomy and would co-opt members of national minorities in Ukraine. The agreement was codified in the Rada's Second Universal. The Provisional Government did not agree with the Statute of the Higher Administration of Ukraine drafted by the Rada, and instead issued its own Instruction (17 August), which limited the rights of both the Rada and its General Secretariat. The Provisional Government, however, did not even hold to the Instruction, but hindered the Rada and the General Secretariat from establishing their authority in Ukraine.

Of the members of the Provisional Government the Georgian Tseretelli was the most sympathetic to Ukrainian demands, and the Constitutional Democrats were the most ill disposed. The minister Tereshchenko, though of Ukrainian nationality, showed little sympathy for the Ukrainian cause. A delegation from the General Secretariat was in Petrograd in November to settle differences with the Provisional Government when the Bolsheviks took power.

J.-P. Himka

Provisional Workers' and Peasants' Government of Ukraine (Tymchasovi robitnycho-selianskyi uriad Ukrainy). The second Bolshevik attempt to form a Soviet administration in Ukraine. Set up on 20 November 1918 in Kursk Russia by the CC of the Russian Communist Party (Bolshevik), the new government was announced on 28 November. The CC of the CP(B)U had no say in its creation. Its first head, G. *Piatakov, was replaced on 29 November by Kh. *Rakovsky, an even stronger opponent of Ukrainian independence. The chief positions in the government were held by Russians who were anti-Ukrainian: foreign affairs by Rakovsky; national economy by G. Piatakov, E. Kvirng, and M. Rukhymovych; propaganda by Artem; military affairs by N. Podvoisky and V. Mezhlauc; and internal affairs by V. Averin and K. Voroshilov. Ukrainians received secondary appointments: V. Zaton-sky, education; O. Khmelnytsky, justice; M. Skrypnyk, state control; A. Zharko, communications; and Yu. Kotsiubynsky and E. Shchadenko, members of the Revolutionary Military Council. In January 1919 this government was established in Kharkiv by the Red Army. Its immediate task was to supply Russia with bread during the winter of 1918-19 and then to replace the Hetman regime with the Soviet one. In early March the Third All-Ukrainian Congress of Soviets, called by the provisional government, changed its name to the Workers' and Peasants' Government of the Ukrainian SSR and adopted the First Constitution of Soviet Ukraine, which copied closely the RSFSR Constitution.

O. Skrypnyk

Provody. Memorial services for the deceased that were held during the so-called *Mavka* week immediately after

Easter. They were usually held on the Sunday or Monday following Easter. In some cases they were held on Holy Thursday. In Bukovyna they took place on the Saturday following Easter; in Galicia, on the Friday or Saturday following Easter. Participants gathered at the cemetery, bringing Easter eggs, bread, bowls of food, and liquor or wine. After a commemoration service they ate a meal at the graves, where they left some of the food and drink for the dead. In some regions the *provody* concluded with games and dancing. The first Monday after Pentecost, when the **rusalky* were conducted away from the village and the sown fields, was also known as *provody*.

Prozorov, Hryhorii, b 1803 in the Chernihiv region, d 20 January 1885 in St Petersburg. Physician. A graduate of the Chernihiv Seminary (1821) and the St Petersburg Medico-Surgical Academy (1825), he obtained a doctorate in medicine and surgery (1836), was a professor of veterinary science at the academy (1836–63), and introduced the first course on zoonoses. His numerous publications include papers on zoonoses, horse colic, scarlet fever, and syphilis; a collection of materials on the history of the academy; and textbooks on veterinary obstetrics and horse diseases. He created a scholarship fund for students from the Chernihiv region attending the academy.

Prozumenshchikova, Galina [Prozumenščikova], b 26 November 1948 in Sevastopol, Crimea. Champion swimmer. She was the first Soviet swimmer to win an Olympic gold medal, in the 1964 women's 200-m breaststroke. She won two silver medals in the women's 100-m breaststroke and two bronze medals in the women's 200-m breaststroke in the 1968 and 1972 Olympic Games, was the European champion in the 1966 women's 200-m breaststroke and the 1970 200-m and 100-m breaststroke, set five world records in 1964–6, and was a USSR champion 15 times (1963–73). Since 1968 she has lived in Moscow.

Ukrainian Catholic church in Prudentópolis

Prudentópolis. A town (1987 pop 51,7000) with an area of 2,395 sq km, located in the state of *Paraná in Brazil. The population is estimated to be 75 percent Ukrainian and 20 percent Polish; the town has one of the major concentra-

tions of Slavs in South America and is one of the largest centers of Ukrainian immigration on that continent. Ukrainian immigrants began to arrive in the late 1890s in São João de Capanema, today Prudentópolis. From the beginning it became the center of the Ukrainian Catholic church. By 1897 a parish had already been founded, with 5,250 members, by S. Kizyma of the Basilian order. A chapel was ready in 1898, and in 1904 a new church had been built, which was later replaced by an even larger one. St Josaphat parish now comprises a number of churches and chapels from the neighboring areas.

A number of church organizations exist, such as the Sisters of the Sacred Heart of Jesus (from 1899), which has branches in Brazil, Argentina (Oberá), and Paraguay (Encarnación). The nuns are trained by the Basilian Fathers, and often they participate in other nonreligious organizations in addition to teaching at local schools and directing one of the state schools (where Ukrainian is taught as an optional subject). Also located in Prudentópolis are the Internato S. Olga (administered by the St Olha Association of the Ukrainian Catechists of the Sacred Heart of Jesus); the Seminário São José; and the printing house of the Basilian Fathers, which publishes *Pratsia* and *Ukrains'kyi missionar*. A local radio station transmits Ukrainian programs in Portuguese and Ukrainian. A large number of secular Ukrainian organizations are also active there.

N. Kerechuk

Prudky, Nykon [Prudkyj], b 5 April 1890 in Kaniv, Kiev gubernia, d 8 December 1982 in Cherkasy. Banduryst. He learned to play the bandura as a teenager, from the kobzars and lirnyks who frequented the markets of Kiev. In the 1920s he wandered through the villages of the Kaniv region, and in 1928–32 he became curator of the museum at T. Shevchenko's grave in Kaniv. Later he directed an amateur bandura ensemble in Cherkasy. His repertoire consisted of over 100 songs, many of which were dedicated to Shevchenko and were Prudky's own compositions.

Prusianowski, Jan, b 1818 in Podorozhnia, Lityn county, Podilia gubernia, d 9 December 1892 in Zhytomyr, Volhynia gubernia. Polish writer and folklorist. After being expelled from Kiev University for revolutionary activity he completed his studies at Kazan and eventually established a law practice in Zhytomyr (1850–80). His collection *Z podani ludu i z obcej mowy* (From Folk Legends and from General Speech, 1856) contained some Ukrainian materials, and his collection of Ukrainian proverbs appeared in *Biblioteka Warszawska* (1862–3).

Prut River. A major waterway in southwestern Ukraine that eventually flows into the Danube. It is 910 km long (nearly 240 km are in Ukraine) and drains a basin area of 27,500 sq km (approx 8,000 sq km in Ukraine). Its source is near Mt Hoverlia, and it flows through the Carpathians, Subcarpathia, and the Pokutian-Bessarabian and Moldavian uplands. The river is the demarcation point for a short section of the Ukrainian-Rumanian border and the length of the Rumanian-Moldovan border. The first section of the Prut (to Deliatyn) flows through narrow mountain valleys and is marked by rapids and waterfalls (near

Bridge across the Prut River near Yaremche (engraving)

Yaremche). From that point the river widens, although it still has a considerable drop. Fed by rain and meltwater, the Prut freezes over lightly from January to March. The river is used for log rafting. Major centers along its banks include Deliatyn, Kolomyia, Sniatyn, and Chernivtsi. Its tributaries in Ukraine include the Pistynka, the Rybnytsia, and the Cheremosh.

Prut Treaty of 1711. A Russo-Turkish treaty concluded on 22 July 1711 at the Prut River near Iași, where the Russian army, led into Moldavia by Emperor Peter I, was encircled by a superior Ottoman force. The treaty's provisions were unfavorable to Russia. In exchange for being allowed to withdraw peacefully from Moldavia Peter agreed to return the recently conquered city of Azov (Oziv) and to destroy the newly constructed Russian fortresses of Tahanrih (Taganrog), Kamianyi Zaton, and Novobogoroditskaia, near the mouth of the Samara River, and others on the Don and the Dniester rivers. He was also forced to agree not to interfere in Polish affairs and to guarantee safe passage to King Charles XII during the king's return to Sweden. Disputes over alleged violations of the treaty resulted in the signing of other accords on 16 April 1712 and 24 April 1713, which obligated Russia to withdraw its armies from Right-Bank Ukraine.

Pruzhaný [Pružany]. 1-5. A town (1979 pop 7,600) in western Polisia on the Mukhavets River, in Berestia oblast, Belarus. It is on the border of Ukrainian ethnic territory.

Prybylovych, Stepan [Prybylovych], b ? in Yaroslav, Galicia, d ca 1726 in St Petersburg. Theologian and philosopher. A monk at the Kievan Cave Monastery from ca 1693, he served as a preacher and philosophy lecturer at the Moscow Theological Academy in 1707–10. In 1711 he returned to Kiev and became hegumen of the Kievan Cave Zmiiv Monastery (1713–16). Accused of heresy and Protestant sympathies, he was tried (1717–18) in St Petersburg and banished to a monastery. Prybylovych wrote the unpublished works 'Summulae logicales' (1708), 'Tractatus phisicus' (1710), and an anti-Uniate polemical tract in Russian (1720). He died at the Aleksandr Nevsky Monastery.

Prychodko, Andrii [Pryxod'ko, Andrij], b 18 July 1951 in Toronto. Painter. He has lived and worked in France and Switzerland since 1970. Prychodko has exhibited in Canada, Italy, Switzerland, and France. He combines calligraphic signs and symbols with geometric forms in a flattened space (eg, *Tower*, 1982). Since 1983 he has painted on canvas, using acrylics, tempera, and pastels. He is a sensitive colorist who uses unusual combinations of calm and intense hues and spontaneous and controlled brush strokes (*Horse Trading*, 1983–5).

Prychodko, Nicholas. See Prykhodko, Mykola.

Roman Prydatkevych

Prydatkevych, Roman [Prydatkevych], b 1 June 1895 in Zywiec, near Cracow, d 17 November 1980 in Owensboro, Kentucky. Violinist, composer, and pedagogue; full member of the Shevchenko Scientific Society from 1963. He studied at the Lysenko Higher Institute of Music in Lviv and at the Vienna Academy of Music, before serving in the Austrian army and the Ukrainian Galician Army, and then teaching music in Odessa (1920–2). He continued his musical studies in Berlin and New York, and from 1930 he played in concerts throughout the United States and Canada, with a mainly Ukrainian repertoire. He organized the Ukrainian Trio, the Ukrainian Music Appreciation Society (with H. Pavlovsky), and the New York-based Ukrainian Conservatory (with M. Haivoronsky), which he directed in 1924–9. In 1946 he became a professor of music at Murray State University in Kentucky. His compositions were written primarily for violin and orchestra and include four symphonies, the *Ukrainian Suite* for chamber orchestra, works for violin and piano such as the *Hutsul Suite*, two rhapsodies, and a sonata. They have been performed by orchestras in Denver, Rochester, Detroit, and other cities by such noted conductors as L. Stokowski, F. Fennel, and H. Hanson. His style is modern romantic, with frequent references to Ukrainian folk music.

Pryhara, Andrii, b 27 June 1836 in Kobeliaky county, Poltava gubernia, d 1 July 1875 in Kiev. Legal scholar. After graduating from the universities of Kharkiv and Kiev (MA, 1868) he taught state law at Odessa University. A strong believer in decentralization, he wrote a monograph on the legal status of burghers in Russia under Peter I (1868) and worked on a doctoral dissertation on federal states. He was also interested in the nationality question and the relation of Ukrainian and Russian cultures. Pryhara was active in the *Prosvita movement in Ukraine.

Mariia Pryhara

Roma Pryima-Bohachevska

Pryhara, Mariia, b 20 February 1908 in Moscow, d 8 September 1983 in Kiev. Writer. From the 1920s she lived in Kiev, where she graduated from the Institute of People's Education (1930). She began to publish her work in 1924, and from 1928 she wrote mainly for children. Her first books of children's verse, *Vesna na seli* (Spring in the Village) and *Dytiachyi sadok* (The Children's Nursery), were published in 1929. During the decades that followed, Pryhara was one of the leading writers for children and published many books, including *Shkoliari* (Schoolchildren, 1951), *Kazky* (Stories, 1956), *Rostemo zavziati* (We Grow Up Determined, 1959), *My liubymo sontse i vesnu* (We Love the Sun and Springtime, 1960), *Kozak Holota* (1966), and *Ruchai* (Brooklets, 1968). She also wrote the historical novelette *Mykhailyk – dzhura kozats'kyi* (Mykhailyk, the Cossack Page, 1974), *Kalytochka* (The Little Leather Purse, 1974), and collections of poetry for adults, and she translated from Polish into Ukrainian. An edition of her selected works (2 vols) was published in 1978.

Pryhodii, Mykhailo [Pryhodij, Myxajlo], b 31 July 1922 in Berezivka, Horodnia county, Chernihiv gubernia. Literary scholar. He graduated from Lviv University in 1949. He has taught at postsecondary schools and worked at the AN URSR (now ANU) Institute of Literature and, from 1970, the CC CPU Institute of the History of the Party. He has written books on M. Gorky as a Soviet publicist (1958), the interaction of the various Soviet literatures (1966), the dialectic of the rapprochement of literatures (1970), V. Lenin and the problem of the creation of a Soviet literature (1970), the all-Union consolidation of literatures (1972), the fraternal unification of the artistic cultures of the Soviet peoples (1976), the Leninist conception of the 'Party-ness' of literature (1985), and other subjects.

Pryima, Fedir [Pryjma], b 8 February 1909 in Akhtanzovska, Kuban. Literary scholar. He graduated from the Krasnodar Pedagogical Institute (1932) and worked as a senior associate at the Institute of Russian Literature of the Academy of Science of the USSR in Leningrad. Among his works are articles about T. Shevchenko in journals and Shevchenko studies collections; Russian books on I. Franko, (1956), Shevchenko and 19th-century Russian literature (1961; for which he was awarded the Lenin Prize in 1964), and *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign) in Russian literary history of the first third of the

19th century (1980); and a Ukrainian book on Shevchenko and the Russian liberation movement (1966).

Pryima, Ivan [Pryjma], b 1867 in Selyska, Bibrka county, Galicia, d June 1921 in Kharkiv. Educator and civic leader. After graduating from Lviv University he taught secondary school in Peremyshl, Kitsman, and Chernivtsi. Then he served as principal of the Ukrainian gymnasiums in Horodenka (1910–12) and Yavoriv (1912–15). Having been deported east as a hostage by the Russians in 1915, he was freed after a few months, and settled in Poltava. There he directed the Ukrainian gymnasium and played a leading role in organizing the Ukrainian community and advocating the Ukrainization of local institutions. A member of the Committee for Ukraine's Liberation, he was arrested and transferred to Kharkiv, where he died of typhus in a prison hospital.

Pryima-Bohachevska, Roma [Pryjma-Bohačevska], b 3 March 1927 in Peremyshl, Galicia (now in Poland). Ballerina and modern dance choreographer. A pupil of J. Dalcroze (Lviv) and H. Kreutzberg (Vienna), she worked in the Lviv Opera Theater (1939–44) and was the soloist dancer in the Innsbruck Theater (1947–9) and in R. Sorell's troupe in Montreal (1949–51). In 1951 she settled in New York, and from 1964 led her own ballet school there. Her dance compositions include *Strakhittia viiny* (The Horrors of War), *Chaika* (The Seagull), and *Icon*. She also staged *Cinderella* (1967) and *Kvit paporoti* (The Fern Flower, 1971).

Mariia Pryimachenko: *Halia and a Cossack* (gouache, 1967)

Pryimachenko, Mariia [Pryjmačenko, Marija], b 30 December 1908 in Bolotnia, Radomyshl county, Kiev gubernia. Famous folk painter. She has lived in Bolotnia (now in the Chernobyl nuclear accident zone) throughout her life and has done over 500 primitive paintings, murals, illustrations to verses and children's stories, and ceramic decorations. Distinguished by their vivid colors, they include the painting series 'Bolotnia's Animals' (1935–41), 'For People's Enjoyment' (1960–6), and the recent 'Chornobyl Cycle'; murals, such as *Peahen* (1936), *Cossack Grave* (1962), and *Bears in the Apiary* (1965); and illustrations to several children's poetry books by M. Stelmakh. Her works have been displayed at Soviet and international exhibitions. Albums of her paintings were published in 1971 and 1985.

Ivanna Pryima-Shmerykovska Mykola Prykhodko

Pryima-Shmerykovska, Ivanna [Pryjma-Šmerykovs'ka], b 19 January 1898 in Nadvirna, Galicia, d 19 January 1982 in New York. Pianist, singer (mezzo-soprano), and pedagogue. A graduate of the Lviv Conservatory (1920), she continued her studies in Paris and then concertized in Lviv, Warsaw, and Cracow. She taught singing at the Lviv Conservatory from 1937 and was concertmaster at the Lviv Opera in 1942–3. She emigrated to the West after the Second World War, and in 1951–9 taught at the Ukrainian Music Institute in New York. Upon retirement, she became the music director of a school in Palm Beach, Florida.

Pryimak, Borys [Pryjmak], b 11 June 1909 in Novocherkassk, Don Cossack region. Architect. After graduating from the Kharkiv Art Institute in 1930, he worked for planning agencies in Kharkiv and participated in drafting reconstruction plans for Zaporizhia, Kryvyi Rih, Mariupol, and Tbilisi (1930–6). From 1946 he worked in Kiev, and he became its chief architect (1955–73). From 1966 he also taught at the Kiev State Art Institute. He took part in drafting the general reconstruction plan for Kiev and the plans for rebuilding the Khreshchatyk; helped design many buildings in Kiev, including the Ministry of Communications (1950–5), the Main Post Office (1952–6), the Moskva Hotel (1959–66), and the metro stations Zavod Bilshovyk (1962–3), Nyvky (1971), Zhovtneva (1971), and Chervona Ploshcha (1976); designed several monuments; and wrote articles on architecture.

Prykarpats'ka pravda (Subcarpathian Truth). An organ of Ivano-Frankivske (formerly Stanyslaviv) oblast's CPU Committee and Soviet until the end of 1991, published five times a week in Ivano-Frankivske from April 1944. The paper's pressrun was increased from 27,000 in 1950 to 145,000 in 1970 and 186,000 in 1980.

Prykhodko, Antin [Pryxod'ko], b 1892, d ? Political figure. In 1917 he represented the Ukrainian Party of Socialist Revolutionaries in the Central Rada. Afterward he was one of the leading Borotbists and, from 1920, a member of the CP(B)U. In the 1920s he held several important portfolios in the Soviet Ukrainian government, including those of deputy people's commissar of education and of justice. He perished in the late 1930s, during the Stalinist terror.

Prykhodko, Hryhorii [Pryxod'ko, Hryhorij], b 20 December 1937 in Oleksandropil, Synelnykove raion, Dnipropetrovske oblast. Dissident and political prisoner. He was arrested in December 1973 in Kaluga, Russia, and sentenced, for writing and distributing an anti-Soviet leaflet, to five years in labor camps in the Mordovian ASSR, and in the Vladimir prison near Moscow. In November 1975 he renounced his Soviet citizenship. He was rearrested in July 1980 and sentenced to 10 years in camps and 5 years' exile. In the camps he participated in prisoners' protests and signed numerous declarations and open letters. After being released in the fall of 1987, he settled in Lviv, where he led the radical nationalist Ukrainian National party until 1991. In early 1989 he began publishing an unofficial newspaper, *Ukrains'kyi chaos*.

Prykhodko, Maryna [Pryxod'ko], b 1927 in Prague. Poet and translator; daughter of T. *Olesiiuk. For taking part in the Warsaw Uprising she was imprisoned in a Nazi concentration camp. Since 1949 she has lived in the United States. She began publishing in the 1950s and has written modernistic and experimental poetry. Her collection *Potoibich mostu* (On the Other Side of the Bridge) appeared in 1967. She has also translated into Ukrainian poems by J. Tuwim, R.M. Rilke, M. Lermontov, M. Tsvetava, and other poets.

Prykhodko, Mykola [Pryxod'ko] (Prychodko, Nicholas), b 23 December 1904 in Chapaievka, Zolotonosha county, Poltava gubernia, d 19 February 1980 in Niagara Falls, Ontario. Writer and community figure. After studying in Kiev in the pedagogical and polytechnic institutes and at the university (docent, 1935) and teaching in high schools and the Polytechnic Institute, he was arrested by the NKVD and sent to a labor camp in Siberia in 1938. He returned to Ukraine in 1941 and emigrated to Canada in 1948, where he worked as a research engineer with Massey-Ferguson and wrote extensively about his experiences. His works include *Na rozdorizhzhziakh smerty* (At the Crossroads of Death, 1949), which was translated as *One of 15 Million* (1952); *la proshu slova* (I Ask to Speak, 1949); and *Dalekymy dorohamy* (Along Distant Paths, 1961), which was translated as *Stormy Road to Freedom* (1968) and reprinted as *Good-bye Siberia* (1976).

Prykhodko, Nadiia [Pryxod'ko, Nadija], b 27 March 1926 in Hoholiv, Brovary raion, Kiev oblast, d 24 March 1980. Poet. She wrote the poetry collections *Divocha pishnia* (A Maiden's Song, 1958), *Ranok v horakh* (Morning in the Mountains, 1960), *Zoriana balada* (A Stellar Ballad, 1972), and *Prolisok* (The Clearing, 1975) and five books of poetry for children.

Prykhodko, Petro [Pryxod'ko], b 13 January 1908 in Verbky, Pavlohrad county, Katerynoslav gubernia, d 11 January 1970 in Kiev. Literary scholar. He graduated from the pedagogical institute in Kherson in 1935 and completed graduate work at the Science Research Institute of Pedagogy of the Ukrainian SSR in 1938. From 1945 to 1962 he was a senior associate of the Shevchenko studies department of the Institute of Literature of the AN URSR (now ANU). He wrote books on the study of T. Shevchenko in secondary schools (1939), about Shevchenko's long poem *Son* (A Dream, 1957), and about Shevchenko and Ukraini-

an romanticism (1963), and articles on Shevchenko's poetry. He helped to prepare a guidebook to places in Ukraine pertaining to Shevchenko (1957) and was coeditor of the 1957 (vol 6) and 1963 (vol 1) editions of Shevchenko's works, the 1952-3 (vol 2) edition of I. Kotliarevsky's works, and the 1955-6 (vol 1) and 1964-7 (vols 1, 3, 6) editions of M. Vovchok's works.

Viktor Prykhodko

Antonina Prykhotko

Prykhodko, Viktor [Pryxod'ko], b 31 January 1886 in Kniazhpil, Kamianets-Podilskyi county, Podilia gubernia, d 6 February 1982 in New York. Lawyer and civic and cultural figure. After graduating from the law faculty of Kiev University (1912) he worked as court investigator at the Podilia circuit court. As head of the education department of the Podilia zemstvo in 1917, he Ukrainianized the gubernia's public school system. In 1918 and 1919 he was elected president of the gubernial zemstvo. After leaving Ukraine in 1920, he served in the UNR government-in-exile and was a lecturer at the Ukrainian Husbandry Academy in Poděbrady. In 1929 he proposed to convene an All-Ukrainian National Congress and to introduce a national tax among émigrés. In 1949 he emigrated to the United States, and thereafter he worked at the head office of the Ukrainian Congress Committee of America, for 10 years. Besides contributing articles to the Ukrainian press he published his memoirs as *Pid sontsem Podillia* (Under Podilia's Sun, 1927; repr 1931 and 1948).

Prykhodko, Yevhen [Pryxod'ko, Jevhen], b 24 December 1901 in Yarmolyntsi, Proskuriv county, Podilia gubernia, d 4 August 1965 in New York. Geologist and civic figure. He studied in Kamianets-Podilskyi and at the Faculty of Law of Kharkiv University. He was arrested and sentenced to death by Bolshevik forces in 1919. He was freed through the intercession of his friends, and left for Czechoslovakia, where he studied geodesy at the Prague Polytechnical Institute. He later emigrated to the United States and became the US representative of the Ukrainian National Rada's executive branch.

Prykhodkova, Yelyzaveta [Pryxod'kova, Jelyzaveta], b 19 August 1892 in Kharkiv, d 12 August 1975 in Kharkiv. Physiologist; corresponding member of the AN URSS (now ANU) from 1951. She graduated from the Women's Medical Institute in Kharkiv (1918) and worked there, as a department head from 1946, and at the Ukrainian Scientific

Research Institute for Experimental Endocrinology (1919-48). She researched organ, tissue, and internal secretion gland extracts, the adaptive trophic role of the nervous system, and the stimulative effect of acetylcholine.

Prykhotko, Antonina [Pryxot'ko], b 26 April 1906 in Piatigorsk, Stavropol krai, Subcaucasia. Physicist; AN URSS (now ANU) full member since 1964. A graduate of the Leningrad Polytechnical Institute (1930), until 1941 she worked at the ANU Physical-Technical Institute in Kharkiv. There she investigated spectra of solid oxygen, nitrogen, methane, and other gases at temperatures close to absolute zero and contributed to the understanding of corresponding crystalline structures. From 1944 until her retirement she worked at the ANU Institute of Physics in Kiev, where she also served as director (1965-70). There she contributed to the understanding of the role of excitons in molecular crystals, discovered and investigated the exciton luminescence of these crystals, and collaborated in research that led to the discovery of biexcitons and polyexcitons.

Prykhylny, Amvrosii [Pryxyl'nyj, Amvrosij], b ? in Italy, d 1641. Architect of Italian origin. P. di *Barbone's assistant from 1588, he became a member of the Lviv builders' guild in 1591 and was elected often to its presidency. He took part in the construction of the *Dormition Church in Lviv (1591-1631) and the buildings of the Lviv Dormition Brotherhood. After P. Romanus's death he completed the Bernardine church in Lviv (1630). He also built his own residence in Lviv and collaborated in building St Lazarus's Roman Catholic Church in Lviv, the Ostrozky family's castle in Stare Selo, near Lviv, and the Roman Catholic church in Zhovkva (1605). His style is a blend of the Italian Renaissance with indigenous architectural motifs.

Pryliuk, Dmytro [Pryljuk], b 8 November 1918 in Bozhykivtsi, Letychiv county, Podilia gubernia, d 22 September 1987. Writer and journalist. He graduated from the journalism institute in Kharkiv in 1941, worked as editor of the newspapers of Poltava, Kiev, and Vinnytsia oblasts, and of the CC CPU daily *Kolhosopne selo*, and became dean of the journalism faculty and director of the chair of the theory and practice of the Soviet press at Kiev University (1965-82). Most of his literary works deal with contemporary Ukrainian rural life. He is the author of the essay collections *Uroky* (Lessons, 1956) and *Selo na nashii Ukraini* (The Village in Our Ukraine, 1961); the short novels *Selo, a v n'omu liudy* (A Village, and in It Are People, 1976) and *Zemnosyly* (Earthly Powers, 1979); the novels *De ty, dole?* (Where Are You, Fate?, 1971), *Povnokolossia* (Full Ears of Grain, 1977), and, a trilogy, *Vidhomin* (The Echo, 1979-83); three books of humor and feuilletons; two books of ballads; two story collections; and three books on the theory and practice of journalism.

Pryluka or Pryluky. III-13. A city (1989 pop 72,000) on the Udai River and a raion center in Chernihiv oblast. It was first mentioned, as a fortress, in the Hypatian Chronicle under the year 1092. From 1362 Pryluka belonged to the Grand Duchy of Lithuania, and from 1569, to the Polish Commonwealth. After B. Khmelnytsky's uprising it became a regiment center of the Hetman state (1654-1781)

St Nicholas's Church in Pryluka (1720)

and then a county center of Chernihiv vicegerency (1781–1802) and Poltava gubernia (1802–1925). It was granted the rights of *Magdeburg law in 1783. Before the industrialization drive of the 1930s Pryluka's main occupations were farming and tobacco processing. Today the city is an industrial and communications (railway) center. Its chief industries are machine building, chemicals and building-materials manufacturing, woodworking, textile manufacturing, and food processing. Its architectural monuments of the baroque period include the Cathedral of the Transfiguration (1705–16), the regiment treasury (1708), the Church of the Savior (1717), St Nicholas's Church (1720), and the Church of the Nativity (18th century).

Pryluka regiment. An administrative territory and military formation of the Hetman state. It was formed in 1648 at the outbreak of B. Khmelnytsky's uprising but was soon greatly reduced in size. In 1649 it had 20 companies, with a total of 2,100 registered Cossacks. It suffered heavy losses in M. Pushkar's revolt and the Cossack-Muscovite War (1657–9). In the 1720s it consisted of only eight companies, with 3,300 Cossacks and 7,000 peasants. By the end of the century the regiment had 11 companies and a population of 69,200, including 10,900 elect Cossacks and 9,700 Cossack helpers. A number of its colonels served on the general officer staff of the Hetmanate, and one of them, P. *Doroshenko (1657–9), became hetman of Right-Bank Ukraine. The regiment also spawned two traitors, whom Peter I rewarded for their treason with a colonelcy: I. Nos (1708–14), who led the Russians into Hetman I. Mazepa's capital, Baturyn, and H. *Galagan (1714–39), who helped them capture the Sich.

Prymak, Fedir, b 23 April 1899 in Tatarivka (now Sofiivka), Nizhen county, Chernihiv gubernia, d 9 September 1981 in Kiev. Internal medicine specialist. A graduate of the Kiev Medical Institute (1924, doctorate 1936), he served as a professor and head of the internal medicine department at the Lviv Medical Institute (1940–1) and as head of the Department of the Propaedeutics for Internal Diseases at the Kiev Medical Institute (1952–73). Among his publications are works on tuberculosis, angiology, hypertension, wound sepsis, and hypoxia.

Prymak, Thomas [Pryjmak, Toma], b 10 April 1948 in Winnipeg. Historian. Since graduating from the University of Toronto (PH D, 1984) he has taught at the universities of Saskatchewan, Toronto, and McMaster. He is the author of *Mykhailo Hrushevsky: The Politics of National Culture* (1987) and *Maple Leaf and Trident: The Ukrainian Canadians during the Second World War* (1988).

Prymorske [Prymors'ke]. VII-17. A city (1989 pop 13,500) on the Obytochna River and a raion center in Zaporizhia oblast. In 1821 the village of Obytochne was converted into the town of Nohaiske. In spite of its potential as a port, it did not develop; by 1896 its population was only 4,100. In 1964 it was renamed, and in 1967 it was granted city status. Most of its inhabitants are occupied in agriculture; only 19 percent work in industry. The main industries are metalworking and building-materials manufacturing.

Prymorske [Prymors'ke]. VI-18. A town smt (1986 pop 10,800) on the Kalmiuz River near Mariupil, Donetsk oblast. It was founded as a Greek colony called Sartana in 1780. In 1938 it attained smt status, and in 1946 it was renamed. Today it is administered by the council of Illich raion of Mariupil city.

Prymorskyi [Prymors'kyj]. VIII-16. A town smt (1982 pop 12,800) on Teodosiia Bay near Teodosiia, Crimea oblast. It was founded in 1952 and is administered by the Teodosiia municipal council.

Prypjat [Prypjat']. II-11. A city (1986 pop 45,000) on the Prypiat River in Chornobyl raion, Kiev oblast. It was founded in 1979 to house the workers of the adjacent Chornobyl nuclear power station. Prypiat was granted city status in 1980. On the morning of 27 April 1986, following the nuclear accident at the station the day before, the city was evacuated. Since then it has been turned into a ghost town.

Prypjat River [Prypjat']. The major right-bank tributary of the Dnieper River. It is 761 km long (the second-longest tributary of the Dnieper, next to the Desna) and drains a basin area of 121,000 sq km (the largest in the Dnieper watershed). Most of it passes through Ukrainian ethnographic territory and its borderland in Belarus. Its upper reaches (185 km) and lower reaches (80 km) as well as 57 percent of its basin are in Ukraine (nearly 75 percent is in Ukrainian ethnographic territory). The river flows slowly, meandering through wide floodplains, frequently breaking into and rejoining branches. In its upper course it is 30–40 m wide, in the middle, 200–250 m wide, and in the lower, 200–500 m wide. The large homogeneous floodplain of the

river consists of oxbows, marshes, bush, and coppice. The river freezes in mid-December and thaws in late March. Its average annual discharge is 14.5 cu km, 60 percent of its flow coming in the spring. Spring floods last well into the summer. Its principal tributaries include (right bank) the Horyn, the Slovechna, the Stokhid, the Stvyha, the Styr, the Ubort, the Uzh, the Vyzhivka, the Turia, and the Zholon rivers, and (left bank) the Lan, the Pyna, the Ptsich, the Sluch, and the Yaselda rivers. The Prypiat is connected to the Vistula River by the Dnieper-Buh Canal. It is used for shipping, log rafting, and water supply. The river contains a wide variety of fish (pike, carp, perch, catfish, bream, and others). The main centers along the river include Pynske, Petrykiv, Mozyr, and Chornobyl.

Pryp Khan, Roman [Pryp Khan], b 6 September 1919 in Stanyslaviv, Galicia. Psychiatrist. After completing his medical studies at Poznań, Lviv, and Vienna (MD, 1943) universities he specialized in surgery at the Regensburg International Refugee Organization Hospital (1946–8). He emigrated to Venezuela (1948); there he was a professor of psychopathology at Carabobo University, opened his own psychiatric clinic, and was president of the central Ukrainian organization in Venezuela (1956–8). His scientific publications include papers on balantidiasis, chronic schizophrenia, and the drug treatment of mental illnesses.

Prysetsky, Ivan [Prysec'kyj], b 1854, d 1911. Civic activist in the Poltava region. He collaborated with V. *Malovany and Ye. Borysov on the draft of a social and political program, which was published by M. Drahomanov as *Volnyi soiuz/Vil'na spilka* (A Free Union, 1884). He was arrested upon returning from abroad in 1883 and exiled to Siberia. He later served as a Ukrainian caucus member in the First Russian State Duma.

Hryhorii Pryshedko: *In the Cosmic Orchestra* (1971)

Pryshedko, Hryhorii [Pryšed'ko, Hryhorij], b 9 June 1927 in Dnipropetrovske, d 21 August 1978 in Kiev. Mosaicist and painter. A graduate of the Dnipropetrovske Art School (1951), together with his wife, H. *Zubchenko, he created the large-scale wall mosaics in Kiev at the ANU Sports Palace, the ANU institutes of Roentgenology and Oncology Nuclear Research, and Cybernetics. Most of the mosaics are stylized and incorporate folk-art motifs.

Prystai, Oleksa [Prystaj], b 1863 in Truskavets, Drohobych county, Galicia, d 17 January 1944 in Slowsburg, New York. Catholic priest and writer. In 1907 he emigrated to the United States, where he did missionary work among Ukrainian coal miners. He wrote the memoirs *Z*

Truskavetsia u svit khmaroderiv (From Truskavets to the World of Skyscrapers, 1933).

Khoma Prystupa

Prystupa, Khoma (Toma), b 3 November 1895 in Zadviria, Peremyshliany county, Galicia, d mid-1930s. Volhynian Communist politician. An agronomist educated in Kiev, he worked in Lutske, was active in the Spilka cooperative and the Prosvita society, and edited the Lutske newspaper *Ukrains'ke zhyttia* (1922–4). In 1922–7 he served as a deputy from Volhynia voivodeship to the Polish Sejm. In 1924 he left the independentist Ukrainian Parliamentary Representation and joined the *Ukrainian Social Democratic party, which was controlled by the underground *Communist Party of Western Ukraine (KPZU). That same year he was elected to the CC KPZU. In 1927 he emigrated to Soviet Ukraine, where he joined the CP(B)U and worked at the People's Commissariat of Industry. He disappeared in the Stalinist terror.

Pryvillia [Pryvillja]. IV-19. A city (1989 pop 11,800) on the Donets River in Lysychanske raion, Luhanske oblast. It is administered by the Lysychanske city council. It was founded in 1695 by runaway serfs and was first called Asesorske. Then it was known as Piata Rota and Pryvilne; it became Pryvillia in 1938. In 1963 it was granted city status. Its economy depends on its coal mine and enrichment plant.

Pryvilne. A multi-occupational site near the present-day village of Pryvilne, Chervonoarmiiske raion, Zaporizhia oblast. Excavated in 1929, the site produced evidence of a Neolithic camping ground and a 3rd- to 5th-century *Cherniakiv culture settlement.

Przegląd Krajowy (Homeland Review). A Polish semi-monthly political, literary, and scholarly journal published in Kiev in 1909 (a total of 14 issues) by a coalition of Polonized Ukrainian and Polish gentry in Right-Bank Ukraine. It promoted Polish-Ukrainian rapprochement and recognized the territorial and democratic demands of the Ukrainian national movement. The publisher was L. Radziejowski and the de facto editor was V. Lypynsky, who was assisted by B. Yaroshevsky and Yu. Yankovsky. Among the contributors were L. Wasilewski, S. Yefremov, V. Domanytsky, and B. Lepky.

Przemysł. See Peremyshl.

Artifacts of the Przeworsk culture

Przeworsk culture. A prehistoric culture of the 1st century BC to 4th century AD found in central and southern Poland as well as parts of western Ukraine. It is named after an archeological site in Poland. The people of this culture engaged primarily in agriculture and animal husbandry, although they were also adept at ironworking and pottery (they began using wheels in the 3rd century). They established settlements along rivers and lived in surface dwellings with hearths or ovens inside and storage pits outside. Trade with the Romans brought them coins, bronze, glass, red lacquered tableware, and personal adornments. The common burial practice was cremation, with remains placed into pits or urns. The influence of this culture was felt in Ukraine mainly along the Sian and Buh river routes. Most scholars believe that the people of the Przeworsk culture were the proto-Slavic *Venedi.

Przyłęcki, Stanisław, b 1805 in Arekhauka, Vitsebsk gubernia, Belarus, d 1 August 1866 in Wilanów, Poland. Polish librarian, bibliographer, and historian. He studied at Lviv University and was custodian of the Ossolineum Institute library in Lviv (1832–7), librarian of G. Pawlikowski's library in Medyka, near Peremyshl (1839–44), secretary of the Galician Husbandry Society in Lviv (1845–62), and editor of its weekly *Pamiętnik Gospodarski* and its serial *Rozprawy* (29 vols, 1846–61). He compiled Polish bibliographies, wrote works on bibliography and library science, and published many works he found in various archives, including a volume of materials on 17th-century Ukrainian affairs, *Ukrainne sprawy* (1842), and, for the first time, W. Potocki's epic poem *Wojna Chocimska* (The Khotyn War, 1850). From 1862 he was librarian of A. Potocki's library in Wilanów.

Psalms. The sacred songs, hymns, and laments collected in the *Psalter. After the Christianization of Ukraine they were cited in literary works (from the 11th century), used in teaching, sung in unison by alternating choirs or read during liturgies, and read at funeral services. Various free musical and poetic renditions of the Psalms (by anonymous authors and by D. Tuptalo) became widespread in Ukraine from the 16th century and were published in collections (eg, **Bohohlasnyk* [1790]). As 'spiritual songs' they remained part of the *lirnyks' repertoire until the 20th century. Parodies of them were composed and performed by *itinerant tutors in the 17th and 18th centuries and by students living in bursas in the 19th century. H. Skovoroda, P. Hulak-Artemovskyy, T. Shevchenko, P. Kulish, S. Rudansky, I. Franko, and other 18th- and 19th-century poets imitated or paraphrased the Psalms. The Psalms were translated by M. Maksymovych (1859). They have been set to music by M. Dyletsky, A. Vedel, M. Berezovskyy, D. Bortniansky, M. Leontovych, O. Koshyts, M. Haivoronsky, P. Kozytzky, and other Ukrainian composers.

Psalter (*psaltyr*). A collection of 150 lyrical poems and hymns (Psalms) that constitutes an important book of the Old Testament. The Psalms are widely used in the liturgies of the Christian churches, including the Ukrainian church. They were first translated into Church Slavonic by ss Cyril and Methodius and were disseminated through Ukraine after the adoption of Christianity. The earliest renditions of the Psalter were particularly notable for their ambiguous passages and outcries against the Jewish faith. By the 11th century the Psalter was being used in fortunetelling, with expository passages commonly accompanying each Psalm (in a 'speculative' or *hadatelnnyi* tone) advising people how to act in various situations. The Psalter was a popular work and one of the first items to be published in Ukrainian and Belarusian by F. Skoryna (1517), I. Fedorovych (1570), and others.

For centuries the Psalter was used as a school text. It was also used for reading over the dead or infirm. It has been a common source of quotation in Ukrainian literature from as early as the 11th century up to modern times.

In the 20th century, new translations of the Psalms have been attempted by several authors, including I. Puliui (1903, using Hebrew sources), A. Bachynsky (1903), Ya. Levytsky (1925), M. Kobryn (1936), I. Ohiienko (1962), and I. Khomenko (1963).

Pshenychny, Borys [Pshenychnyj], b 24 April 1937 in Kiev. Mathematician; corresponding member of the AN URSS (now ANU) since 1985. Since graduating from Lviv University (1959) he has worked for the ANU Institute of Cybernetics. His research contributions are in the fields of mathematical programming, theory of differential games, computational methods of optimization, and theory of optimal control.

Pshepiurska-Ovcharenko, Mariia [Pshepjurs'ka-Ovčarenko, Marija], b 19 June 1909 in Tarnawka, Przeworsk county, Galicia. Slavic philologist; member of the Shevchenko Scientific Society since 1952 and the Ukrainian Academy of Arts and Sciences in the US. A graduate of the universities of Cracow (M PHIL, 1934) and Prague (PH D, 1945), she taught Ukrainian in gymnasiums in Peremyshl (1934) and Lviv (1934–9). From 1939 to 1941 she was an as-

Mariia Pshepiurska-Ovcharenko

Yaroslav Pstrak (self-portrait, 1913)

sociate of the Lviv branch of the AN URSR (now ANU) Institute of Linguistics and taught at the Lviv Teachers' and Medical institutes. She taught at Ukrainian DP camps in Bavaria (1945–9). After emigrating to the United States (1949) she taught at various colleges and at the Ukrainian Catholic University in Rome. She is the author of a book on the *Sian dialects (1938), a Ukrainian school reader (3 edns, 1955, 1959, 1962), the booklet *Gogol (Hohol) and Osmachka* (1969), and articles on Ukrainian language and literature.

Pshepiursky, Andrii [Pšepjurs'kyj, Andrij], b December 1874 in Yavoriv, Galicia, d 1947 in Stariava, Mostyska county, Galicia. Greek Catholic priest and civic leader. After completing his studies at the Peremyshl Seminary (1901) he served as parish priest in Tarnavka and as chaplain (1915–17) in the Ukrainian Sich Riflemen. He was appointed to Stariava parish in 1925 and organized a Prosvita circle, a co-operative, and a Luh sports club in the Mostyska region. He was active in the Ukrainian National Democratic Alliance and sat on its Central Committee.

Pshysh River [Pšyš]. A left-bank tributary of the Kuban River. It is 253 km long and drains a basin area of 2,000 sq km. It flows along the northern slope of the Caucasus Mountains. At the start of its course it is a narrow river flowing through a deep valley, but it broadens when it reaches the Kuban Lowland.

Psol, Hlafira [Ps'ol] (married name: Dunina-Borkovska), b 24 October 1823 in Psolivka, Myrhorod county, Poltava gubernia, d 26 April 1886. Self-taught painter; sister of O. *Psol. In 1843 she met T. Shevchenko in Yahotyń and received his advice on painting. She did portraits of N. Repnin, V. Repnina (1839), and Shevchenko.

Psol, Oleksandra [Ps'ol], b 1817 in Psolivka (now Psilske), Myrhorod county, Poltava gubernia, d 27 October 1887 in Moscow. Poet; sister of H. *Psol. She lived and studied in Yahotyń, with the family of N. Repnin, where she met T. Shevchenko (1843–4). She later corresponded with him and sent him her poetry when he was in exile. Shevchenko favorably judged some of her early poetry (eg, 'Sviachena voda' [Holy Water]). Her poetic cycle 'Try

sl'ozy divchyny' (Three Tears of a Girl) was published in the almanac *Khata* (1960). The cycle included the poems 'Zaplakala Ukraína' (Ukraine Began to Cry), 'Oi, koly b ia holos soloveika mala' (Oh, If I Had the Voice of a Nightingale), and 'Viie viter nad Kyievom' (The Wind Blows over Kiev). Her poetry is marked by patriotic motifs (eg, protests over the dissolution of the Cyril and Methodius Brotherhood). One poem, 'Ne pytai ty moikh pisen' (Don't Ask My Songs), was erroneously attributed to Shevchenko and was published in some editions of his *Kobzar*.

The Psol River valley

Psol River [Ps'ol] (also Psel and Pslo). A left-bank tributary of the Dnieper River. It is 717 km long and drains a basin area of 22,800 sq km. It originates along the western edge of the Central Upland in Kursk and Belgorod oblasts and passes through Sumy and Poltava oblasts before emptying into the Dnieper's Dniprodzerzhynske Reservoir, near Kremenchuk. The river valley is fairly wide (10–15 km) in its lower reaches, and its right bank tends to be higher than its left. The Psol freezes over from late November to mid-March. The major centers along the river include Oboian, Sumy, and Hadiache. Its major tributaries in Ukraine include the Hrun-Tashan (left bank) and the Khorol (right bank) rivers.

Pstrak, Yaroslav, b 24 March 1878 in Hvizdets, Kolyomyia county, Galicia, d 1916 in Kharkiv. Painter and

graphic artist. He studied at the Cracow and Munich (1895–9) academies of art. From 1900 he lived in Lviv and Pokutia. He did paintings with biblical subjects, such as *Christ on the Mount of Olives* (1900), *Moses, Last Supper*, and *Christ with Angels*; many portraits, landscapes, and genre paintings, particularly of the Hutsuls, such as *Hutsul Girl with a Candle*, *Quarrier* (1904), *Vengeance* (1907), and *On a Summer Day*; and historical canvases, such as *Cossack with a Captured Janissary* and *Oleksa Dovbush*. He illustrated I. Franko's *Zakhar Berkut* (1902), A. Krushelnytsky's reader (1905), N. Gogol's *Taras Bul'ba* (1907), and the satirical magazines *Komar, Osa*, and *Zerkalo* (1900–8). A book about Pstrak by M. Figol was published in Kiev in 1966.

Pstruch, Mysail [Pstruč, Mysajil], b and d ? Orthodox metropolitan. The archbishop of Smolensk (1445–74), he was elevated to the office of metropolitan of Kiev (1475–80) without the consent of the Patriarch of Constantinople. At around the same time, the patriarch appointed his own metropolitan, Spyridon, who was turned away when he set off to assume his post, and ended his years in Muscovy. Pstruch is known for a letter he wrote to Pope Sixtus IV in 1476 that praised the pontiff lavishly, suggested a desire for closer co-operation between Catholics and Orthodox Christians, and then pointedly criticized the Catholic clergy for its infringements on the rights of the local Orthodox population. A slightly modified version of the letter was presented in 1605 by the Uniate metropolitan I. Potii as evidence of a long-standing desire by the Orthodox population to unite with Rome.

Psychiatric hospitals, special. The main difference between regular and special psychiatric hospitals (Ukrainian slang: *psykhusky*) is that the former fell under the jurisdiction of the Ministry of Health whereas the latter were under the direct jurisdiction of the *MVD. In the special psychiatric hospitals (SPH) security factors were given priority over medical considerations, and instances of abuse of *psychiatry for political purposes were common. A person could be sentenced, without right of appeal, to 'compulsory psychiatric treatment' for 'anti-Soviet agitation and propaganda' (Article 70 of the USSR), 'circulation of fabrications known to be false which defame the Soviet state and social system' (Article 190-1), 'betrayal of the Fatherland' (Article 64), or 'illegally leaving the country and illegally entering the USSR' (Article 83).

As late as the 1980s there were SPH operating in the USSR, with two new SPH known to have been established in 1972 (see table). The most notorious SPH was the Sichevka. Female patients consigned to involuntary psychiatric treatment were invariably taken to Kazan. One SPH was located in Ukraine, in Dnipropetrovske; like most others it was housed in a former prison. Until the mid-1950s SPH were officially classified as prison institutions or places of detention. They were surrounded by walls as well as barbed wire and guarded by military personnel with dogs. Personnel, including hospital directors, heads of departments, and many of the psychiatrists (who were not obliged to tell their full names to the inmates or their relatives), were officers in the MVD. Many sanitary orderlies were convicts recruited from the penitentiary system, and they were granted the authority to maintain discipline among patients.

The patients of the SPH were committed there by the

*Major SPH

courts, but there was no legal code governing conditions of detention, nor any set limit on the length of a person's confinement, as there is for prisons. Biannual commissions composed of the administration and medical staff of the SPH recommended a person's release or transfer to another institution, which then was considered by the courts. Abuses often occurred at the time of release, with either the extension of compulsory confinement or the reservation of the right to re-examine without warrant at any time and to recommend further treatment. The anonymity of the psychiatrists and the irrefutability of their decisions, the administration of potent drugs, such as sulfadiazine, haloperidol, and insulin, not for medical purposes but as a form of punishment, and almost total isolation from society – either singly or in combination, these factors have abetted violations of the *human rights of inmates in the system of SPH in the USSR.

A partial list of Ukrainians who underwent involuntary psychiatric treatment in SPH includes P. *Grigorenko, L. *Pliushch, V. and V. Rybak, V. Kolyshenko, V. Tiurchev, Y. *Terelia, M. Valkov, V. *Ruban, I. Medvedev, I. Marynchenko, L. Biloborodov, V. Kaliuzhny, V. Zinoviev, M. Hershkan, V. Khaiko, K. Striltsev, V. Spynenko, P. *Sko-chok, M. Ozerny, I. *Lytvynov, A. Mykhailenko, V. Kolo-miitsev, D. Kutsil, V. Lutskiv, V. Polynok (Poliinyk), A. *Lupynis, V. *Rafalsky, Yu. Osmanov, I. Khomiak, V. *Klebanov, M. Breslavsky, O. Bondarenko, O. Borovsky, O. Cherep, V. Dmytrenko, F. Dvoretzky, I. Hreshchuk, O. Ivanytsky, M. Klishch, A. Kochby, V. Korol, O. Nozhak, I. Osadchuk, V. Siry, F. Sydenko, V. Synyovsky, I. Steba, M. Yakubenko, A. Yavorsky, and Kalush (first name unknown).

The psychiatrists S. Gluzman of Kiev and A. Koriagin of Kharkiv were arrested, sentenced, and incarcerated in corrective labor camps for resisting the practice of declaring dissidents mentally ill. Following the nuclear explosion at the Chornobyl Atomic Energy Station in 1986, some protesters were sent to SPH for 'radiophobia.'

The International Independent Research Center of Psychiatry in Moscow, established in 1988 under the aegis of the International Human Rights Association (later becom-

ing independent), in two years reviewed the cases of 2,000 persons sentenced to penal psychiatry and obtained the release and *rehabilitation of many of them. The center experienced repressions and harassment, especially from the KGB, and was officially shut down in early 1991 after M. Gorbachev granted special powers to the KGB to investigate organizations.

A decree concerning the conditions and procedure for psychiatric treatment was ratified by the Presidium of the Supreme Soviet and came into effect in March 1988. The All-Union Society of Psychiatrists and Addictologists was reinstated in 1989 as a member of the World Psychiatric Association after resigning to avoid expulsion in 1983. As of 1989 not a single SPH had been closed down, and the practice of abusing psychology for political purposes in the SPH did not cease until the demise of the USSR.

Psychiatry. A branch of medicine that deals with disorders of thought, feeling, and behavior (see also *Psychology). The first research on psychiatry in the Russian Empire was done by Ukrainians in the second half of the 18th century – K. Yahelsky, N. Kviatkovsky, M. Kozlovsky, S. Uspensky, and O. *Maslovsky. The first textbook on psychiatry was published in Kharkiv by P. *Butkovsky in 1834. The first journal of psychiatry, *Arkhiv psikhiiatrii, neurologii i sudebnoi psikhopatologii*, was published by P. *Kovalevsky in Kharkiv in 1883. The journal *Voprosy nervno-psikhicheskoi meditsiny* was published in Kiev (1896–1905). In the 20th century, departments of psychiatry were established in Kiev (P. *Nechai, V. Hakkebus), Odessa (Ye. Shevalov), and Dnipropetrovske (D. Frank) universities. Ukrainian scientists active in the field included Ye. Kopystynsky, O. *Yushchenko, V. *Protopopov, T. Yudin, Ya. Frumkin, and N. Tatarenko. In the 1920s, psychoneurological institutes were founded in Kharkiv (1921), Kiev (1922), and Odessa (1930). The journal *Sovremennaiia psikhonevrologiia*, later renamed *Sovetskaia psikhiiatriia*, was published from 1925, first in Kiev and later in Kharkiv. At present working in the field of psychiatry in Ukraine are the Scientific Research Institute of Neurology and Psychiatry in Kharkiv and the Department of Psychiatry and Pathology of the Central Nervous System at the ANU *Institute of Physiology in Kiev. Departments of psychiatry and neurology also exist at all medical institutes, including those for the upgrading of physicians. Psychiatry in the former USSR was divided into independent branches of child, judicial, army, labor, narcotics, organizational, and geriatric psychology, among others. Research had been co-ordinated by the USSR Academy of Medical Sciences and by the Ukrainian SSR Ministry of Health.

The Ukrainian Society of Psychiatrists and Neurolo-

gists was part of the All-Union Society of Psychiatrists and Neurologists, which belonged to the World Psychiatric Association (WPA) until 1983. In 1983 the All-Union Society of Psychiatrists and Neurologists resigned from the WPA to avoid expulsion for political abuse of psychiatry in its special *psychiatric hospitals in the former USSR.

Despite being reinstated in the WPA in 1989, the All-Union Society of Psychiatrists and Addictologists (renamed in 1988) was firmly opposed to any kind of reform of psychiatry in the former USSR and was still headed by the old guard of Soviet psychiatrists (including G. Morozov, M. Vartanian, N. Zharikov, and A. Churkin).

Psychology. In Ukraine psychology was an integral part of the study of *philosophy beginning in the Princely era; it did not constitute a scientific discipline in itself until the mid-19th century. In his theological and philosophical works Nicephorus, a 12th-century Kievan metropolitan, set out a conception of the dual (corporeal and spiritual) nature of a human being, analyzed the basic principles of will, emotion, and intellect, and examined the function of the five sensory faculties. Such theological and philosophical thinking about psychological problems disappeared after the Mongol invasions of the mid-13th century. The question of the dualism of human nature was taken up again in the 16th century in the philosophical works of I. Vyshensky. At the Kievan Mohyla College (later the Kievan Mohyla Academy) a course in psychology was taught by I. Gizel. L. Baranovych and I. Galiatovs'ky wrote on psychology with reference to the philosophical works of Aristotle. Reviews (by P. Pelekh) of the Latin text of psychology lectures at the academy (17th–18th centuries) suggest that the professors were knowledgeable in contemporary psychological theory. T. Kropovych was an adherent of the theory of human duality. H. Skovoroda's philosophical system stressed the need to 'discover oneself.' Devoting considerable attention to the 'microcosmos' of individuals and their earthly concerns, he broke with the categorical monistic conception of the invisible spiritual and the visible corporeal.

In Ukraine the first psychophysical parallelism in psychology appeared in the works of Ya. Kozelsky, who taught that the actions of the human spirit are connected to the neurophysiological structure of the organism. He defended sensualism and sought to prove that knowledge is derived from the senses. The sensualism of I. Rizhsky continued the materialist trend in philosophy. Believing in the indissolubility of the sensory and rational elements, without which it is impossible to grasp the essence of phenomena, he investigated the influence of the material world on human consciousness. P. Lodi held similar sensualist convictions and sought to prove the spirit's dependence on the body (the psychic on the physical). More traditional views of the primacy of the psyche prevailed in the teachings of I. Hrynevych, O. *Novytsky, and P. Yurkevych at Kiev University. In opposition to H. Skovoroda's idealistic rationalism, Yurkevych stressed the

importance of the emotional components in mental development and pedagogy.

In his textbook *Rukovodstvo k opytnoi psikhologii* (A Guide to Experimental Psychology, 1840) Novytsky, a proponent of psychophysical dualism, set out the neurophysiological basis of memory and focused on the active role of attention in perceptions. Severe restrictions placed on philosophical studies in Russian imperial universities in 1850 halted the development of psychological sciences. Novytsky's successors were I. Skvortsov (from 1850), S. Hohotsky (1851–86), and O. Kozlov (1876–87), who returned to the concept of rational psychology as a philosophical discipline. In *Mysl' i iazyk* (Thought and Language, 1862) O. Potebnia examined the interaction of thought and language from a psycholinguistic point of view and claimed that concepts cannot be formulated without words and that 'consciousness cannot be conjured out of nothing.'

Experimental psychology in Ukraine was initiated by the famous physiologist I. Sechenov, who worked at Odessa University (1871–6). He had a profound influence on subsequent research in reflexology. In the 1880s his successor, P. *Kovalevsky, established the first psychological research laboratory in Ukraine, at Kharkiv University's clinic of psychic and nervous diseases. N. *Lange established a similar laboratory at Odessa University in 1895. Lange sought to reconcile traditional psychophysical dualism with reflexology.

G. Chelpanov, a Russian philosopher and a professor at Kiev University (1892–1907), was the first to conduct psychological seminars and practical workshops with students. He set up the first experimental laboratory in Kiev and collected much valuable psychological data. V. *Zenkovsky followed in Chelpanov's footsteps and sought to reconcile idealistic views on the nature of the psyche with experiential learning. I. *Sikorsky, one of the first in the world to apply experimental methods in researching child psychology, laid the groundwork for the field of developmental psychology.

In Western Ukraine before the Second World War, psychological studies were associated with the work of Polish scholars at Lviv University, particularly K. Twardowski, who established the first psychological laboratory there in 1901. The most notable of his Ukrainian students was S. *Balei. He published the first Ukrainian textbook on psychology in Western Ukraine, as well as numerous articles on developmental psychology and a psychological study of T. Shevchenko's work.

In the first few decades after the imposition of Soviet rule in Ukraine, psychology was subjected to rigid Party control, and developed exclusively as a branch of reflexology. The new definition entailed a shift from the tradition of idealism in psychology to materialism, imposed as the new orthodox science. General psychology began to disappear from the curriculum in schools, even as an area of research. In the Ukrainian SSR the center of studies in reflexology was the Ukrainian Scientific Research Institute of Pedagogy in Kharkiv. Its leading academician was V. *Protopopov, who considered psychology to be a superfluous discipline, although he acknowledged the existence of a 'subjective element of the personality.' The Kharkiv psychiatrist Ye. Popov and defectologist I. Sokoliansky completely denied the existence of a human psyche and consciousness and proposed that they were accumulated reflexological sets of the individual. O.

Zaluzhny expanded on that proposition to formulate a theory of the 'reflexology of collectives' on the basis that 'all social life is a reflex.' The journal *Ukrains'kyi visnyk refleksolohii ta eksperymental'noi pedahohiky* was published in Kharkiv in 1925–30. Psychologists in Ukraine were also interested in various aspects of educational psychology, mostly dealing with the problems of memory processes and the relationship between learning and maturation. Leading researchers of that time included P. *Zinchenko, who did pioneering work in perception, processing, and memory and established a psychological laboratory devoted to the investigation of memory; and O. *Zaporozhets, who did educational, psychological, and physiological research on the optimum chronological age for symbolic and abstract learning.

In Kiev a pedagogical institute was established by the psychiatrist A. *Volodymyrsky. He was one of the first in Ukraine to initiate experimental studies of psychological anomalies in children. K. Mokulsky taught reflexology at the Kiev Institute of People's Education.

In the 1930s there was a reaction against the unilateral mechanistic conception of humans as passive organisms whose behavior is determined by their physiology and environment. Reflexology was condemned as 'a vulgar attempt to biologize social phenomena.' Soviet psychologists, however, continued to maintain the primacy of physiology, recognizing only that the autonomy of the psyche was a characteristic of 'highly organized matter' which operated according to its own laws. Renewed emphasis was placed on the consciousness and on individual responsibility for behavior, in opposition to the previously held view of the complete modification of behavior by the environment. The approaches remained materialistic, however, in that they continued to deny the presence of an unchangeable soul and stressed the dynamic evolution of consciousness as a product of nature and history. In that regard psychology was hampered by its links to dialectical materialism and utilitarian considerations of social policy.

The return from reflexology to general psychology was argued by the noted psychological historian H. *Kostiuk, the director of the Institute of Psychology of the Ukrainian SSR in Kiev (from 1945) and head of the Ukrainian branch of the All-Union Association of Psychologists. From a position of materialistic monism he sought to explain consciousness as one of the characteristics of matter in the higher stages of development. He also supported the viewpoint that historical development determines the ontogenesis of human personality by biological and social means. D. Elkin, a department head at Odessa University from 1930, stressed the individuality of consciousness that is inherent in a physical subject.

Specialized research institutes were initially established in Kharkiv, including the Psychoneurological Scientific Research Institute (reorganized in 1937), the psychology division of the Scientific Research Institute of Pedagogy of the People's Commissariat of Education of the Ukrainian SSR, the Institute of Labor, and the Scientific Research Institute of Defectology. In those institutions attention was focused primarily on diseases or congenital defects that had a direct or indirect effect on the psyche.

Kiev began to gain importance as a research center in psychology in the 1940s. The first autonomous academic department of psychology was established in Kiev (1944). In 1945 the Institute of Psychology of the Ukrainian SSR

was formed in Kiev to co-ordinate the work of Ukrainian researchers. The institute had departments of general psychology, child psychology, educational and polytechnical education psychology, professional development psychology, and special psychology. It published *Naukovi zapysky*, various thematic collections of works, and popular works. In 1959 a Ukrainian section of the Association of Soviet Psychologists at the Academy of Pedagogical Sciences of the RSFSR (later of the USSR) was established.

The most developed disciplines came to be child psychology and developmental psychology as well as the history of psychology (Kostiuk, V. Voitko, A. Hubko). Scientists in those fields included L. Balatska, P. Chamata (who edited a psychology text for pedagogical schools, 1954), T. Kosma (at the department of psychology at Kharkiv University, 1931–5), Kostiuk, O. Leontev, D. Nikolenko, and N. Vovchik-Blakytina, as well as Zaporozhets and P. Zinchenko. Kostiuk and O. *Raievsky (head of the department of psychology at Kiev University from 1945) studied the philosophical and physiological bases of psychology. Raievsky also researched the history of psychology with P. Pelekh and the psychology of language with M. Zhinkin. Ye. Milerian researched the psychology of labor.

In Ukraine there was also an early interest in zoopsychology, among such researchers as Balei and M. Pargamin. The conceptual anthropomorphization of animals and mechanistic reflexological theories held that there were only quantitative differences between the psyches of animals and humans. Later theories proposed by A. Khilchenko, N. Ladygina-Kots, V. Protopopov, and H. Rohinsky held that animal psyches were established only biologically, whereas human consciousness was molded socially as well.

Of more specialized areas of research, the most notable include studies of the perception of time, particularly the influence of experience on the subjective deformation of perception of time (D. Elkin, T. Kozina, and V. Yaroshchuk), the psychology of mathematical problem solving (Yu. Moshbytsia), and the psychology of technical construction (B. Baieva). The formation of worldviews and individual self-awareness was researched by Chamata (1956). Raievsky studied the relation between the emergence of consciousness in early humans and its dependence on the physical environment, particularly social class.

Emigré Ukrainian psychology was initially centered in Prague, where Ya. Yarema, a professor at the Ukrainian Higher Pedagogical Institute, studied the problem of psychometry in schools and published a textbook on pedagogical psychology. O. Ivanov worked at the Psycho-technical Institute of the Masaryk Academy and as a lecturer (until 1945) at the Ukrainian Free University (UVU). Psychology gained importance as a discipline at the UVU after it was moved to Munich, where O. *Kulchytsky headed the department of psychology (from 1946). Kulchytsky believed in holistic psychology and pedagogical characterology. M. *Mishchenko taught experimental psychology at the UVU in 1946–9. In 1955 V. *Yaniv became director of its department in psychology. Yaniv studied the psychology of prisoners and the social trends among Ukrainians. The Munich school focused on the psychological characteristics of Ukrainians (ethnopsychology) and organized a number of thematic conferences with non-

Ukrainian scholars (Munich, 1953; Leuven, 1954). H. *Vashchenko also worked in the field of ethnopsychology (he published a survey of reflexological studies in the Ukrainian SSR), as did D. Chyzhevsky and I. Mirchuk. In the United States, B. *Tsymbalisty studied problems involving geometrical and optical illusions and was a director of psychology programs at the Jamesburg State Home for delinquents. I. Holowinsky published in the areas of mental retardation, learning disorders, and the history of psychology.

In the 1970s and 1980s in the Ukrainian SSR, developments in psychology continued to be hampered by Russification and Party control. The publications of psychologists were not allowed to deviate from official dogma, and doctoral degree programs in psychology at Soviet universities were approved only in 1968. Ukrainian psychologists were obliged to publish their papers in the Russian-language journals *Voprosy psikhologii* (est 1955) and *Defektologiya*; the Ukrainian-language pedagogical journal *Radians'ka shkola* (from 1945) contained articles of a descriptive, nonempirical nature.

The Institute of Psychology of the Ukrainian SSR expanded its mandate to include the area of programmed instruction, and established a laboratory to study the methodology of psychological research (1973). Ukrainian psychologists also continued their studies in perception and memory (H. Sereda, N. Venger, T. Zinchenko, V. Zinchenko), developmental psychology (L. Venger, Zaporozhets), personality psychology, and the history of psychology (Kostiuk). In 1988 Kostiuk's collected psychological works were published in Kiev. H. Sereda proposed the unity of short-term and long-term memory mechanisms (1970). T. Zinchenko formulated information processing and information search models, and V. Zinchenko suggested a functional model of information transformation in which memory mechanisms are arranged in a hierarchical sequence (1971). V. Zinchenko continues to publish in the area of developmental psychology (1991).

N. Venger investigated the perceptual characteristics of preschool children (ages 5–7). Venger distinguished between the sensory and intellectual aspects of the assimilation and systematization of the external properties of objects (1970). Soviet psychologists used a qualitative approach in assessing and evaluating cognitive skills, as opposed to the standardized quantitative psychometric tests accepted in the West. They rejected the idea that it is possible to measure intellectual potential independently of the conditions of experience and education. As well, there was a reluctance to acknowledge the existence of behavioral disorders with a primarily social etiology, such as social and emotional maladjustment and juvenile delinquency.

V. Yaniv

Mykhailo Ptukha

Ptukha, Mykhailo [Ptuxa, Myxajlo], b 7 November 1884 in Oster, Chernihiv gubernia, d 3 October 1961 in Kiev. Pioneering demographer and statistician; full member of the VUAN from 1920 and corresponding member of the USSR Academy of Sciences from 1943. While a gymnasium student he worked during the summers for the statistics section of the Chernihiv zemstvo bureau. He studied at St Petersburg University (1906–10) and abroad, notably in Berlin (1910–12) and London (1914–15). In 1913 he began teaching statistics at St Petersburg University. Ptukha moved to Kiev in 1918. In 1919 he organized the VUAN Demographic Institute (renamed the AN URSR [now ANU] Institute of Demography and Health Statistics in 1934), which he headed until its absorption by the ANU Institute of Economics in 1938. Ptukha organized the latter institute's statistical section and headed it from 1940 to 1950. From 1944 to 1950 he also headed the ANU Section of Social Sciences and was a member of the ANU presidium. In 1929 he was elected a member of the International Statistical Institute.

Ptukha founded the Ukrainian school of demographers. The Demographic Institute he headed was the first research center on demographic statistics in the world and trained many prominent scholars. Ptukha wrote numerous articles and reports and 11 books, including ones on the theory of population and mortality statistics (1916, master's diss), the marriage index (1922), the population of Kiev gubernia (1925), mortality in Russia and Ukraine (1928), D. Zhuravsky (1951), and the history of statistics in the Russian Empire (2 vols, 1955, 1959). A collection of his writings on population statistics was published in Moscow in 1960, and an edition of his selected works appeared in Kiev in 1971.

Ptushynsky, Yurii [Ptušyns'kyj, Jurij], b 29 November 1927 in Kiev. Physicist; AN URSR (now ANU) corresponding member since 1978. A graduate of Kiev University (1951), in 1954 he joined the ANU Institute of Physics, where since 1970 he has been deputy director and department head. An expert in surface physics, he has contributed substantially to the understanding of the electronic aspects of adsorption and desorption and of galvanomagnetic phenomena in thin metal films.

Public education. See Education and Extramural education.

Public expenditure. The total moneys spent by the state on Ukraine's territory or on Ukraine's behalf. The budgetary expenses of the central state (tsarist or Soviet) included transportation, communications, and defense. Funds spent directly in Ukraine were distributed among various levels of government, institutions, and enterprises.

Prior to 1917 the tsarist government did not record expenditures for Ukraine as a separate budgetary item. Economists such as M. *Yasnopolsky, M. *Porsh, P. Maltsev, V. Dobrohaiev, and M. *Volobuiev estimated the size of Ukraine's budgetary expenditures and the net balance of receipts over expenses. The imperial government consistently collected more taxes from Ukraine than it spent on the country. Government expenditures were concentrated in the administrative center of Kiev and in the Black Sea ports of the navy. At the beginning of the 20th century Ukraine contributed on average 20 percent of the imperial revenues and received only 13 percent of the expenditures. In absolute terms the yearly negative balance has been estimated at 50 to 210 million rubles. In 1913 state expenditures in Ukraine were 584 million rubles, state revenues 649 million, and the negative balance 62.6 million rubles.

The first Soviet Ukrainian government did not have a separate budget and was subject to the budgetary policies of the Russian SFSR. The first formal budget was established for the year 1923–4. From then the budgetary system was divided between expenditures by the Union commissariats and ministries on the territory of Ukraine and the republican state budget. Furthermore the expenditures of the republican state budget were divided between ministries under joint Union-republican supervision and those under exclusive republican authority.

Initially, in the mid-1920s, 40 percent of the republican budget was spent on educational and social needs, and a large part of the investment in the economy came from the Union budget. The First Five-Year Plan saw a large increase in capital investment, although the share of investment funds under republican (including local government) control declined from 28 to 18 percent. Approx 43 percent of all expenditure in Ukraine was devoted to financing industrial projects (excluding transportation and communication). During that period republican expenditures amounted to 1.7 billion rubles, and Union expenditures in Ukraine totaled 11.8 billion rubles. Nevertheless the net budgetary surplus of revenues over expenditures accumulated by the Union government has been estimated at 5 billion rubles, or 23.2 percent of revenues raised in Ukraine by all levels of government (local, republican, and all-Union).

The 1932 reform, which emphasized direct sector control of the economy, increased the power of the Union commissariats in Ukraine. The republican budget continued to play a minor role in financing Ukraine's needs. In 1937, republican expenditures amounted to only 3.8 percent of the total USSR state expenditures. In 1957 N. Khrushchev reformed the system of economic administration and replaced ministries with regional economic councils. The system increased somewhat Ukraine's control over economic expenditures, and as a result Ukraine's share of the total USSR state expenditures had increased by 1960 to 10.3 percent. In 1959–61 average state (republican and Union) expenditures in Ukraine were 85.8 billion rubles, whereas state revenues were 125.9 billion. Thus the negative balance for Ukraine was 40.1 billion rubles. In 1959–70 the excess of budgetary receipts over expenditures in Ukraine was about 33.6 percent. In other words, the central government in Moscow retained for its purposes 90.1 billion rubles of the revenues it collected in Ukraine. Data for budgetary transfers in later years are not available.

In 1970 the republican government's expenditures in Ukraine amounted to 13.3 billion rubles, or 8.7 percent of the total Union budget. In 1988 Ukraine's state expenditures were 34.4 billion rubles, of which 47 percent was spent on the economy, and 50.8 percent on social and cultural needs. Ukraine's budget that year represented 8.5 percent of the Union budget. In 1990 Ukraine proclaimed its economic sovereignty, thereby claiming full control over all revenues and expenditures in the republic.

B. Somchynsky

Public health. During the pre-Christian era in Ukraine, *folk medicine, *medicinal plants, and primitive psychotherapy in the form of therapeutic suggestion were applied as health care services, and with time, specialists appeared such as midwives (*babu povytukhy*), bonesetters (*kostopravy*), and diviners (*vorozhbyty*). The development of health care in Kievan Rus' was greatly influenced by Byzantine-Christian medicine. Physicians from Byzantium and Western Europe began arriving in Ukraine in the 11th century. The *Kievan Cave Patericon provides information about the activities of local, Greek, Armenian, and other physicians, and payment to physicians is mentioned in **Ruskaia Pravda*.

During the Princely era, care for the sick and aged was the responsibility of the churches and *monasteries. In addition, some care for the infirm was provided by *brotherhoods or by municipalities in the 16th and 17th centuries. A *tsyrulnyk*, or phlebotomist, was able to provide a variety of primitive health care services, including bloodletting and treatment of wounds and venereal diseases. Guilds of *tsyrulnyky* existed in most medieval Ukrainian cities. The Zaporozhian Cossack army had its own hospitals in Trakhtemyriv (from the end of the 16th century) and in the Mezhyhiria Transfiguration Monastery (in the 17th century). Therapy typically consisted of the application of

old folk remedies. Obstetric care was provided by midwives. Healers (*znakhari*) applied the knowledge of medicinal plants acquired from their forefathers. Ukrainian manuscripts of the 18th century show that the use of leeches for bloodletting was prevalent. A bloodletters' guild existed in Kiev until 1834, and these *tsyrulnyky* practiced in villages until the 1870s, even after government injunctions made the practice of bloodletting illegal.

When scientific *medicine began to develop in Europe in the 19th century, and measures in sanitation and *hygiene began to be adopted, Ukraine was divided between the Russian and Austrian empires and was thus subject to their public health laws and regulations.

Ukraine under the Russian Empire. Health care services were divided among various ministries and did not come under the jurisdiction of a single ministry devoted to public health until 1916. *Sanitary-epidemiological measures, alimentary and industrial hygiene, and the network of medical institutions were inadequate and unevenly distributed, and most hospitals and infirmaries were located in the cities. Medical help for the general population was hopelessly lacking, and sanitary-rehabilitative care remained in private hands.

In 1911 there were 3,933 medical doctors in Ukraine. In 1915 there were 5,000 intermediary medical personnel and 28,500 hospital beds in 617 gubernial and county hospitals, 21 city hospitals, 202 factory hospitals, 47 Jewish hospitals, 4 church-run hospitals, 26 charity hospitals, 4 hospitals run by the Red Cross, 66 private hospitals, 17 university clinics, 15 railroad hospitals, 68 prison hospitals, and 58 hospitals run by various other institutions and organizations. There were also 22 psychiatric institutions and 291 clinics. The system of health care was best organized in the large urban centers, particularly Kiev, Kharkiv, and Odessa, where there were highly qualified personnel and well-equipped clinical facilities at the university medical faculties, in addition to good private institutions. City administrations had departments devoted to health care, as well as medical-sanitary councils that managed city hospitals and sanitary conditions in the urban centers, and combated epidemics.

The only recourse for the rural population was to the *zemstvo* doctors in those gubernias where *zemstvos* existed (see **Zemstvo* medicine). The *zemstvo* clinics generally consisted of a doctor, a midwife, and a *feldsher and were supplemented by various outposts staffed by amateurs, who served under difficult conditions. In the event of a plague epidemiological doctors were sent in. Medical societies educated civilians about sanitation and hygiene and practiced some preventive medicine, particularly smallpox vaccination. *Zemstvo* doctors also provided general education and conducted scientific research on health in the Ukrainian countryside by compiling lists of epidemic diseases and describing working and general living conditions. Medical assistance was provided by volunteer organizations, such as the Red Cross and the Tuberculosis League, which operated 14 cloisters and 5 sanatoriums before the revolution. Community initiatives resulted in the creation of a network of *Pasteur stations for inoculation against rabies, which was then widely prevalent. In a period of 25 years of activity at the Kharkiv Pasteur Institute (from 1887), 32,800 people brought in from outlying provinces were inoculated.

Western Ukraine under Austria-Hungary. Public

health was overseen by the health department of the Ministry of the Interior, and in Galicia it was in the hands of the local parliaments. The first health care ministry in Austria was established in 1917 (headed by the Ukrainian I. Horbachevsky). Medical assistance was generally provided in cities, on the basis of payment for services rendered, by private doctors operating under the auspices of local and state medical foundations. For poorer segments of the population there were hospitals funded by municipalities and charitable organizations. Sanitary-rehabilitation measures were in private hands. Although sanitary conditions and means of combating epidemics were somewhat better developed within the boundaries of Austria-Hungary than in the Russian Empire, the poor living conditions and poor nutrition of the rural population resulted in a high mortality rate, particularly among children. Ukrainian doctors active in providing general health care included Ye. Ozarkevych, S. Drymalyk, and I. Kurovets. In 1912 the *Ukrainian Physicians' Society was established in Lviv; it issued the monthly publication **Zdorovlia*.

The period of Ukrainian national revival. In 1917, under the rule of the Central Rada, the People's Commission for Public Health was set up. After the declaration of independence it became the Department of Public Health, and during the period of the Hetman government, the Ministry of Public Health, headed by Yu. Liubynsky.

In the Western Ukrainian National Republic the State Secretariat for Public Health was headed by I. Kurovets. The medical services of the Ukrainian Galician Army were directed by R. Bilas and then T. Burachynsky. Throughout the liberation struggles the Ukrainian government maintained a health ministry; it was headed at various times by D. Odryna, O. Bilous, and S. Stempowski.

Interwar Soviet Ukraine. During the first years of the Bolshevik occupation, health care services deteriorated catastrophically in the anarchic conditions. The breakdown of the medical and sanitation network compounded by the war brought about a rise in the death rate as a result of malnutrition, typhus, venereal disease, and tuberculosis. Conditions did not begin to improve until the NEP period. A tripartite health care system was then installed. First, the state health care apparatus consisted of various foundations under the authority of the Ukrainian SSR People's Commissariat of Public Health, with provincial, regional, and district divisions of health services. These medical services, concentrated in the rural regions, instituted measures of preventive medicine by combating epidemics and improving sanitary conditions. Second, workers' medicine was developed by the establishment of workers' treasuries for the institution of health insurance for urban workers and civil servants. Third, volunteer associations, such as the Ukrainian Red Cross, the Tuberculosis League, Jewish assistance organizations, and a network of private doctors, instituted private and co-operative medical foundations (such as the polyclinic of medical professionals in Kharkiv). Thus the general network of medical institutions and services was slowly restored, as were the various scientific research institutes. In 1928 there were 5 sanitary-bacteriological, 1 protozoan, 2 radiological, and 3 psychoneurological institutes, and 1 for internal medicine, 1 for orthopedic and traumatological research, 1 for workers' medicine, 1 for experimental

pharmacology, and 3 clinics for postgraduate training in the Ukrainian SSR.

The Soviet government placed particular emphasis on preventive medicine. Wide social and sanitary legal provisions were set, including mandatory two-week holidays, pregnancy leave, prohibition of child labor, work norms for minors and women, health insurance, employment insurance and protection, additional rations in dangerous industries, statutes concerning the cleanliness of land, water, and air, and directives concerning nutrition, living conditions, community hygiene, and so on. An institute was established for the training of doctors in housing, community, nutritional, scholastic, and professional hygiene; epidemiologists and pediatricians were trained; and a network of dispensaries were built, as were day and night workers' clinics, nutritional dining halls, tuberculosis and venereal disease clinics, dispensaries for minors, and consultation boards for pregnant women. Emphasis was also placed on the construction of sanatoriums.

Even so, the program did not produce the desired results, in some measure because the training of general practitioners and the building of general hospitals were neglected, and because the standard of living and living conditions remained poor. There was no perceptible decline in the population's susceptibility to disease, there was a constant shortage of beds in hospitals, and doctors were overloaded with patients. According to official statistics there was 1 doctor for every 7,400 inhabitants in the rural areas in 1928, and 1 hospital bed for every 1,900 rural inhabitants in 1927. Medical specialists were particularly rare in rural areas. The one surgeon of the Kamianets-Podilskyi district was responsible for 160,000 people; the one in the Konotop district, for 200,000; and in the Romen district, for 225,000.

The bankruptcy of a health care policy devoted primarily to preventive medicine forced the government to reorient the system toward therapy and to begin constructing hospitals. The reorientation was implemented at the beginning of Stalin's dictatorship through bureaucratization and the centralization of all power in Moscow.

Interwar Western Ukraine. In Poland the Ministry of Health had divisions in the voievodship administrations, complemented by local physicians, workers' and civil servants' treasuries, and a network of privately owned medical installations and private practitioners, as well as various benevolent associations, notably religious community organizations. The health care system was more efficiently organized than in Austria-Hungary. There were a state employment insurance agency, certain kinds of social insurance, and pensions. Medical insurance programs financed a network of adequately equipped installations, including polyclinics, hospitals, and sanatoriums. In the non-Polish regions of Galicia, Volhynia, and Polisia, however, the conditions were measurably worse. There was a shortage of medical institutions and a high incidence of tuberculosis, syphilis, and other contagious diseases. Ya. Hynylevych compiled statistics concerning the high infant mortality, which in some years reached 30 percent.

A concerted effort to bring health care to the population was undertaken by the *Ukrainian Hygienic Society in Lviv, *Narodnia Lichnytsia, the *Ukrainian National Society for Child and Adolescent Care, and *Vidrodzhennia. There were also an antitubercular dispensary (est by M.

*Panchyshyn), a bacteriological laboratory, and health cooperatives in Remeniiv (Lviv county), Bodnariv (Stanyslaviv county), and Tsebliv (Sokal county), initiated by I. Fur in the late 1930s. The Shevchenko Scientific Society's Medical Commission published **Likars'kyi vistykyk* in conjunction with the Ukrainian Physicians' Society. In outlying regions the peasants were also served by itinerant practitioners, such as V. Bilozor, V. Hankivsky, and T. *Vorobets.

In Transcarpathia under Czechoslovakia, general and workers' insurance was common, and medical care for the peasantry was adequate, but the scarcity of Ukrainian doctors in the region curtailed the possibilities of community action in health care. I. Rykhlo published *Likars'ka komora*. In Bukovyna under Rumania, organized medical care for the Ukrainian population was primitive and only partly accommodated by private and individual practitioners.

Soviet Ukraine, 1945 to the 1960s. The German-Soviet War damaged the public health system in Ukraine. Soviet statistics show that in the Ukrainian SSR there were 160,993 beds available (33,649 doctors) in 1940, 144,512 (21,441) in 1945, and 194,223 (48,626) in 1950.

The health care system was headed by the Ministry of Health of the USSR (MOZ). Its counterpart in the Ukrainian SSR was subservient to it, with oblast and raion representation. The medical sections of all levels of this administration figured prominently in the setting of policy. Sanitation affairs came under the jurisdiction of the State Sanitation Inspectorate. In the MOZ there were subgroupings, such as the Medical Scientific Research Institutes Administration, the Administration for Institutions of Higher Education in Medicine, the Administration for Sanatoriums and Health Resorts, and the State Medical Publications Office. A number of medical installations were under the control of the Ministry for State Security (including Special *psychiatric hospitals), the Ministry of the Armed Forces, the Ministry of Defense, the Ministry of Internal Affairs, and the Ministry of Communications. Various ministries also operated their own medical services (so-called *spetslikarni*), which cared for Party and state functionaries.

Soviet affairs of public health were predicated on the system of state control, with an emphasis on preventive medicine, its application in the industrial workplace, the ensuring of readiness for work, and the differentiation of service for various levels of society (optimal service for Party members and state functionaries). Full state control and centralization of health care services were in tandem with the continuing bureaucratization of society. The growth of medical cadres was a focus for the Soviet government, but the distribution of the doctors was skewed, tending toward concentration in the large urban centers. Women figured prominently in the profession and constituted 68 percent of its ranks (1964). In total there were 871,000 medical personnel in Ukraine in 1966, but the low proportion of doctors in this figure resulted in inadequate medical care in up to 80 percent of cases.

The provision of beds in *hospitals, *clinics, and *polyclinics was also uneven, the urban areas being favored, as well as institutions that serviced visitors from the rest of the Soviet Union, such as the Crimea. With 44.8 beds per 10,000 pop in 1966, the Ukrainian SSR lagged behind world averages (West Germany, 108; France, 131; Japan, 124).

There was a relatively large number of beds for psychiatric hospitals, but few in comparison with the United States.

The field of balneology and climatology saw considerable development. In 1966 there were 447 sanatoriums, with a total capacity of 100,400. These extensive facilities were mainly used by visitors to Ukraine, however. A large proportion were also reserved for tuberculosis patients and for children. (See *Health resorts and sanatoriums.)

Health care for mothers and children was highly developed, a reflection of the policies of massive induction of women into the workplace and child rearing by the state apart from the family. (See *Obstetrics and *Pediatrics.) *Sanitation education and the basics of hygiene were taught in regular schools, in the industrial workplace, in special health-oriented universities in cities, and in instructive seminars given by doctors in rural areas.

The considerable development of a network of medical installations and the upkeep of approx 100,000 doctors and over 700,000 intermediary medical personnel was made possible only by the extraordinarily low wages set by the MOZ. The average monthly wage of a doctor ranged from 100 to 150 rubles; intermediary medical personnel earned an average of 76 rubles. In comparison, the average for most workers and civil servants was 95 rubles per month. The yearly salaries of all doctors in the Ukrainian SSR totaled approx 150 million rubles, whereas in West Germany the cost of maintaining a smaller number of doctors (94,500) was over 3 billion DM, and in the United States, even higher.

Soviet Ukraine since the 1960s. Life expectancy at birth in the Soviet Union had risen by nearly six years in the 1950s and early 1960s, and the country had undergone rapid improvements in public health services. But progress in reducing mortality virtually halted during the 1960s, and by the early 1970s life expectancy was actually falling. Nearly every age group (except teen-agers) had higher death rates in 1975 than in 1960. Measured by the health of its people, the USSR in 1981 was no longer a developed nation, even though caloric intake, educational attainment, and the ratio of doctors to population seemed to be higher than in Western Europe. Life expectancy had dropped by six years, and infant mortality had tripled.

Among the possible factors contributing to the deteriorating health conditions were (1) the stress accompanying modern industrialization, introduced at a faster pace in the Soviet Union than in the West; (2) air *pollution, the misuse and abuse of pesticides and fertilizers, the careless release of industrial waste and heavy metals into the waters, and the radiation emitted from poorly constructed or only partially safeguarded nuclear facilities; (3) excessive cigarette smoking, affecting particularly the incidence of respiratory diseases; (4) the monotonous diet, traditionally high in animal fats; and (5) a sharp rise in the consumption of alcohol, estimated in 1980 to be more than 70 percent higher in Eastern Europe than in Western Europe and more than twice as high as in the United States or Sweden (the cutbacks instituted by M. Gorbachev's restraint program in 1986-7 were swiftly compensated for by the escalating production of *samohon* 'moonshine'). Although it would have been theoretically possible for properly framed and implemented state social policies to mitigate the deterioration in health conditions, the problems rooted in the very concept of 'free' health care in the

centralized system of the USSR had resulted in a health crisis by the 1980s. Even the relatively high ratios of medical personnel and hospital beds to population seemed to be inversely related to the quality of the health care services provided.

Statistically, public health care in the Soviet Union appeared impressive. The administration expressed concern for public health, announced new advances in medical research and technology, and reported on national decisions to update, modernize, and add to medical facilities. These plans were often not realized, however, because of shortages in materials, funds, and manpower, or simply because of poor planning. There was also too much emphasis on expanding rather than maintaining and upgrading existing facilities.

Because Soviet public health services were financed directly and virtually entirely by the state, the policies governing the services were determined not by the consumers but according to political priorities, which often ran directly contrary to the needs of consumers. Health care expenditures were not easily budgeted or accounted for because they were usually grouped together with pensions, disability outlays, and research and construction costs. Being low on the Soviet government's list of priorities, public health services were the first to be affected when cutbacks were required – the so-called *zalyshkovyi* (leftover) principle of budgeting. The proportion of the country's GNP spent on health care continually dropped (estimated at 9.8 percent in 1955, 7.5 percent in 1977, and less than 5 percent in 1990), and auxiliary medical institutions were repeatedly neglected, while official statistics presented an image of rising expenditures and uninterrupted technological advances (eg, new housing projects with inadequate sewage-disposal facilities or new factories that did not comply with the proper safety standards).

Even the most dedicated and qualified doctors could not provide an effective service without the minimum in supplies, equipment, and medications. The shortages also served to reinforce the rampant practice of *blat* 'payment under the table.' In 1990 Ukraine had 32 percent of the multiple-use syringes, 7 percent of the multiple-use injection needles, 21 percent of the disposable syringes, and 8 percent of the laryngoscopes it needed. These shortages, combined with the absence of a system of industrial sterilization for medical tools and preparations, as well as repeated cases of patients being infected with blood-transmitted diseases in Soviet hospitals, have resulted in a mass phobia of inoculations and a concomitant increase in infectious diseases. Moreover, the health of Ukraine's population has been endangered by a serious drop in immunity due to ecological catastrophes and social demoralization, identified by Ukrainian immunologists as 'Increased Immune Fatigue Syndrome.'

In 1990 a diphtheria epidemic affected the entire republic and killed 18 people. Each year in Ukraine there are 90,000 cases of viral hepatitis (including 16,000 cases of hepatitis B), 20 congenital disorders per 1,000 newborns, more than 1 million abortions and 40,000 miscarriages (reported), and 14,000 children born with congenital disorders. Influenza, not yet under control, kills tens of thousands of babies each year, and rickets is common. Eighty percent of all 18-year-olds had chronic diseases.

The devastating crisis in public health services in Ukraine has served to illustrate many of the weaknesses

of the wider social and economic system of which it was a part.

Public libraries and reading rooms (*narodni biblioteki i chytalni*). Centers founded in the 19th and first half of the 20th centuries, primarily by community rather than government organizations, which provided access to books and newspapers for a public largely deprived of these resources. The educational work done in public libraries and reading rooms, which were regularly the venues of literacy drives, often had a political character. In 1913 in all of Ukraine (within present boundaries) there were 3,153 mass circulation public libraries, with 1,917,000 volumes; of these, 414 libraries (894,000 volumes) were located in urban centers, and 2,739 libraries (1,023,000 volumes) in rural areas.

Public libraries and reading rooms were most widespread in Galicia, where independent social organizations flourished. There were approximately 400 reading rooms in Galicia in the mid-1880s, and over 3,000 by 1939. Reading rooms had a particularly marked effect on rural society. Most rural reading rooms were founded by political organizations led by the urban intelligentsia, which sought grass-roots support in the villages. In the 1880s the Russophile *Kachkovsky Society was the most active in establishing rural reading rooms. As the Ukrainian national current came to dominate the political life of Galicia, the Ukrainian *Prosvita society took the lead in organizing reading rooms. Of the 3,244 reading rooms operating in 1914, 2,944 were associated with Prosvita, and 300 with the Kachkovsky Society. In that year Prosvita also operated 2,664 public libraries.

Because of reading rooms, reading in the villages became a part of adult life and not an activity confined to the schoolhouse. Prosvita's reading rooms are closely associated with the rise of national consciousness in rural Galicia. Newspapers would be read aloud in reading rooms, urban intelligentsia would visit and give talks, and election strategy would be discussed. The 197,000 people who were members of Prosvita's reading rooms in 1914 were the basis of a burgeoning popular movement. In some ways reading rooms conformed to the usual pattern of social relations in the village: 60.5 percent of reading-room presidents were priests, in keeping with the traditional leading role of the clergy in rural life, and men were the main participants in reading room activities. In other ways reading rooms challenged the old order. The founding of a reading room was a major event, complete with a

concert, speeches, and the shooting of rifles or mortars, and reading rooms quickly became a center of village life, threatening the focal role the tavern had traditionally played. Closely connected with the Ukrainian co-operative movement, reading rooms challenged economic relations in the village as well. The gentry and village notables, supported by the government, sometimes opposed the founding of reading rooms.

In Bukovyna the *Ruska Besida society organized reading rooms; in 1914 there were 150 in the province. In inter-war Transcarpathia, public libraries run by the Czechoslovak state satisfied much of the population's need for literature; in addition, the *Dukhnovych and Prosvita societies organized reading rooms.

Public libraries and reading rooms in Russian-ruled Ukraine were not as widespread as and played a more narrowly educational role than their counterparts in Western Ukraine. Three types of public libraries existed in imperial Russia, public, community, and free. Of these only the free libraries did not charge patrons for borrowing books. Rural libraries were established principally by zemstvo authorities and co-operatives. Urban libraries were founded and funded by city dumas, educational and literacy societies, and philanthropic patrons. The first public library in Ukraine was established by the city government in Odessa in 1829. It was followed by municipal public libraries in Kherson (1872), Chernihiv (1877), Kharkiv (1886), and Katerynoslav (1887). In Kharkiv the first free library was opened in 1891, and by 1896 there were three more. By the 1890s there were five free libraries in Kiev, two of them founded by the *Kiev Literacy Society and three by the city council. There were two free libraries in Odessa at the turn of the century. In 1897 there were 141 public libraries in Russian-ruled Ukraine, most of them set up by local zemstvos in villages. Between a quarter and a half of the patrons of urban public libraries were factory workers or tradespeople, and roughly half of the library users were children. To make literature more accessible to workers, libraries were often set up at factory sites and in traveling railcars. The materials public libraries were permitted to circulate were severely restricted: only 9.5 percent of those books passed by the censor for the general public were permitted in public libraries. The 1890 Law on Free Public Reading Rooms and the Supervision of Them placed additional limitations on free libraries. From then on they could be opened only with the governor's permission, were directly under government control, could circulate only Russian-language religious and educational material, and could be summarily closed. In the 20th century the number of public libraries and reading rooms has grown significantly. There were 684 public libraries and reading rooms, with combined holdings of 542,800 volumes, in 1911 in Kharkiv gubernia, and 322 public libraries and reading rooms, with combined holdings of 141,000 volumes, in 1912 in Chernihiv gubernia. Only 3–6 percent of these materials were in Ukrainian. The restrictive law of 1890 was modified in the aftermath of the 1905 Revolution. As a result the Prosvita society began organizing Ukrainian public libraries and reading rooms, but it had minimal success, and its efforts were frequently thwarted by the state. In Russian-ruled Ukraine in 1913 (within pre-1939 boundaries) there were 2,340 public libraries, containing 1,770,000 volumes; of these, 359 libraries (845,000 volumes) were located in ur-

ban centers, and 1,981 (925,000 volumes) in rural areas.

During the struggle for Ukrainian independence (1917–20) public libraries and reading rooms were established and co-ordinated by the Prosvita society and closely affiliated with the co-operative movement. Under Soviet rule they were reorganized first into political education buildings, then into public libraries called *reading houses, and later into libraries in *people's homes, village halls, and collective-farm, state-farm, and factory clubhouses. The number of public libraries increased from 5,154 in 1924 to 10,275 in 1933. Ukrainian-language books, however, accounted for only 2.3 percent of general library holdings (in 1929), despite measures to increase the acquisition of such materials. In 1940 in all of Ukraine, including the Western Ukrainian territories occupied in 1939, there were 22,297 public libraries, with combined holdings of 41 million volumes. In 1960 there were 32,600 public libraries, with holdings of 196 million volumes. By 1970 the number of libraries had decreased to 27,600, but holdings had increased to 292 million volumes. This trend has continued, with totals in 1980 of 26,200 libraries and 371 million volumes, and in 1988 of 25,800 libraries and 421 million volumes. In the same period (1970–88) the number of public libraries throughout the USSR increased from 128,000 to 133,700, and the number of books and journals from 1.363 billion to 2.154 billion (an increase of 57 percent for the USSR as a whole, as compared to 44 percent for Ukraine). In recent years public complaints about the shortage of Ukrainian-language books in public libraries have resurfaced: in 1988 fully 61 percent of all literary holdings were Russian books and journals, and only 38 percent were Ukrainian. (See also *Libraries.)

Public opinion. The collection through questionnaires of individual opinions on issues of public policy. The sample group questioned is generally quite large, and their opinions are interpreted as representing the entire population of a region or country.

In the USSR the study of public opinion was not allowed to develop freely. Opinion studies that were carried out were designed to show virtually unanimous support for state policies and to serve as a tool of agitation and propaganda. The study of public opinion was concentrated in the centers of various CPSU committees in Moscow and some institutes of the USSR Academy of Sciences.

The democratization of Soviet society in the late 1980s revived interest in the study of public opinion. The Soviet government itself recognized the need for the establishment of a professional research center that would provide it with information and analyses about public views, and in 1988 the All-Union Center for the Study of Public Opinion on Social and Economic Questions was established by the Central Council of Trade Unions and the USSR State Committee on Labor. Headed by T. Zaslavskaiia, the center had two branches in Ukraine, in Kiev and Lviv.

Public opinion is also being studied by the recently

founded Institute of Sociology of the AN URSR (now ANU), Kiev University's Center for the Study of Political Psychology, and sociological laboratories at Kharkiv, Lviv, and Odessa universities and the Dnipropetrovske Chemical-Technological Institute. Since the late 1980s the academy's journal *Filosofs'ka i sotsiologichna dumka* has regularly published results of public opinion research, and many public organizations and newspapers have conducted their own public opinion surveys. Although some of the surveys lack methodological rigor, they cover a wide range of topics hitherto considered taboo.

Public readings. The reading of popular books to audiences of illiterate or semiliterate people, practiced in the Russian Empire in the 19th century as a form of *extramural education. The materials read were literary works, historical or geographical studies, essays on science or religion, and practical guides to farming, co-operative enterprise, or hygiene. In Ukraine the first public readings were organized in Poltava in 1861. They were prohibited by the authorities and were revived only in the 1870s. They became particularly popular in Kiev and Kharkiv. From 1882 they were organized by a special commission in Kiev. In rural areas they were organized by *zemstvos*. By the end of the 19th century public readings were widespread and popular. They were conducted only in Russian and were closely monitored by the authorities. After 1906 readers were permitted to recount the substance of books in their own words, and occasionally works of Ukrainian writers were read. Public readings were also a common activity of popular educational societies (most notably *Prosvita) in Western Ukraine.

Public Relief Committee of Ukrainian Emigrants in Rumania (Hromadsko-dopomohovyi komitet ukrainskykh emigrantiv v Rumunii). An organization of émigrés from the central and eastern regions of Ukraine after the First World War. It was founded in 1923 in Bucharest and had local branches in Braşov, Vatra Dornei, Chişinău, Piatra-Neamt, and Tolmadijiv. The president was K. Matsiievych, and the most active members were D. Heredot, I. Havryliuk, V. Trepke, and H. Porokhivsky. The committee was active until the Second World War.

Publishers and publishing. Publishing began in Ukraine soon after the emergence of printing and became active in periods of cultural and national renaissance. The more noted publishers of the late 16th and the 17th centuries included Prince K. *Ostrozky (from the early 1580s), the *Lviv Dormition Brotherhood (from 1586), Bishop H. *Balaban and F. Balaban in Striatyn, M. *Slozka in Lviv, the *Kievan Cave Monastery (from 1617), S. Sobol in Kiev, Archbishop L. *Baranovych in Novhorod-Siverskyi (from 1674), and the Univ Monastery (1660–1770). In the 18th century, Ukrainian publishing houses declined because of bans imposed by the Russian government.

When the Ukrainian national movement revived in the early 19th century, the few Ukrainian books published were produced by Russian houses or through the offices of individual Ukrainian sponsors. These included the

works of P. Hulak-Artemovsky and H. Kvitka-Onovianenko, as well as a number of almanacs of the romantics in the 1830s and 1840s. They appeared mainly in Kharkiv. When the Cyril and Methodius Brotherhood was disbanded in 1847, there was a further crackdown, but publishing resumed in the early 1860s (with the publishing activity of P. Kulish, O. Konysky, and others). The Valuev circular of 1863 and the *Ems Ukase of 1876 made it virtually impossible for anything to be published in Ukrainian within the Russian Empire. Apart from individual exceptions, works by Ukrainian authors were published elsewhere, mostly in Austrian-ruled Lviv and by other émigré publishing houses, such as M. Drahomanov's Ukrainian Press in Geneva.

In Austrian-ruled Galicia there were no government proscriptions to contend with. The first sporadic attempts at publishing occurred in the 1830s (the works of M. Levytsky, M. Luchkai, M. Shashkevych). The Halytsko-Ruska Matytsia publishing house was established in 1848. The Prosvita society began to publish in 1877, and the Russophile Kachkovsky Society in 1874. The 1860s to 1880s saw the emergence of full-time periodicals (such as *Pravda*, *Dilo*, *Hazeta shkol'na*), as well as of publishing houses of various political parties, the Ridna Shkola society, the Basilian monastic order in Zhovkva (in 1895), and so on. Textbooks were published by the Knyzhky Shkilni press, Prosvita, the Shevchenko Scientific Society (NTSh), and other publishers. Publication series began to be issued, such as the Dribna biblioteka (Little Library) series (1877–81), edited by I. Franko; the Biblioteka naiznametnishykh povistei (Library of the Greatest Stories; 1881–1900) of *Dilo*; the Rus'ka istorychna biblioteka (Ruthenian Historical Library, 1886–1904); Ya. Orenshtain's Zahal'na biblioteka (General Library, 1903–18); F. Fedortsiv's Novitnia biblioteka (New Library, 1912–23); D. Nykolyshyn's *Zahalna Knyhozbirnia (General Book Collection, 1914–33); and the NTSh's Ukrainsko-rus'ka biblioteka (Ukrainian-Ruthenian Library).

In Bukovyna the Ruska Besida Society published the Biblioteka dla molodezhy, selian i mishchanstva (Library for Young People, Peasants, and Burghers) series and other items. In the 1900s a number of similar series were issued. The Ukrainiska Shkola society published textbooks.

In Transcarpathian Ukraine publishing efforts were more limited. They were initiated in 1850 by O. Dukhnovych through the Prešov Literary Society and later continued by the Society of St Basil the Great (1864–1902).

The *Ukrainian-Ruthenian Publishing Company, established in 1899 under the direction of M. Hrushevsky, I. Franko, and V. Hnatiuk, played an important part in Galician publishing in the early 20th century. It issued many scholarly and popular works and in 1905 took over the publication of the *Literaturno-naukovyi vistnyk*. The NTSh was also active at this time; it issued approx 1,200 titles with reproductions.

After a long period of prohibition, the pressure of censorship in Russian-ruled Ukraine began to lighten in the late 1890s. Literature as well as popular works began to appear. On the initiative of B. Hrinchenko and with funding from I. Cherevatenko, the publishing house in Chernihiv issued close to 50 titles with pressruns of 5,000 to 10,000 in the years 1894–1909. In 1895 O. Lototsky, S. Yefremov, V. Domanytsky, and others established the *Vik

publishing house in Kiev. Although it was subjected to Russian censorship, the Vik house managed to put out 140 titles in 560,000 copies (mainly reprintings of Ukrainian classics) by 1914. Other ventures included *Kievskaiia starina* and operations in Odessa, Kharkiv, St Petersburg (the Philanthropic Society for Publishing Generally Useful and Inexpensive Books), and elsewhere. After the Revolution of 1905, a number of publishing houses were opened in Kiev, notably Chas, Krynytsia, Ranok, Dzvin, Nasha Kooperatsiia, and Lan. The Ukrainske Vydavnytstvo was opened in Katerynoslav; Dnister began operations in Kamianets-Podilskiy. Books were also put out by the Kiev and Katerynoslav branches of Prosvita, the Ukrainian Scientific Society in Kiev, and various co-operatives, zemstvos, and private publishers.

Ukrainian publishing was interrupted by the First World War, the repressions of the Russian imperial government, and persecution (in Galicia) by the occupying forces of the Russian army. It resumed in Western Ukraine toward the end of the war, largely through the efforts of the *Union for the Liberation of Ukraine and Mykola Zalizniak in Vienna.

The Revolution of 1917 revived publishing in Kiev and other cities in spite of adverse economic conditions. Individual publishers established themselves (A. Kashchenko, E. Cherepovsky, and others), as well as community and co-operative operations, such as Chas, Vik, Dzvin, Krynytsia, the Ukrainian Co-operative Publishing Union, the All-Ukrainian Teachers' Publishing Company, Dniprosoiuz, Siaivo, Rukh (Kharkiv), and *Ukrainske Vydavnytstvo in Katerynoslav. The Ukrainian-Soviet War of 1919–20 markedly limited publishing activity, although in Right-Bank Ukraine (mainly in Kamianets-Podilskiy) the ministries of the Ukrainian National Republic continued to issue books and periodicals.

After the Bolshevik occupation in 1920, all Ukrainian publishing houses were closed. Then, during the period of Ukrainization and of the New Economic Policy, publishing expanded dramatically. By the 1930s the many new operations had managed to produce a large number of titles of new and old Ukrainian literature, scholarly publications, textbooks, dictionaries, and so on. Work in the 1920s was concentrated in the State Publishing House of Ukraine (DVU, 1919–30) and in the co-operatives Knyhospilka, Rukh, Chervonyi Shliakh (Kharkiv), Slovo (Kiev), Siaivo, and Kultura. Specialized publications were issued by Radianskyi Selianyn, Ukrainskyi Robitnyk, Naukova Dumka, the press of the People's Commissariat of Justice, the VUAN, and other presses. In 1930, as a result of increasing government pressure, Soviet Ukraine's publishing industry was largely reorganized. The DVU was turned into the State Publishing Alliance of Ukraine (DVOU); it included the specialized presses Literatura i Mystetstvo (books on literature and art), Radianska Shkola (textbooks), Molodyi Bilshovyk (books for young people), Ukrainskyi Robitnyk (books for workers), and Na Varti (military publications). In 1934 DVOU was itself dissolved, and the entire network of Soviet Ukrainian publishing houses was handed over to the central state publishing operation in Moscow.

In 1920–39 in Galicia, under Polish occupation, the principal publishing firms were those of I. Tyktor, M. Taranko, M. Matchak, R. Paladiichuk, Ridna Shkola, Chervona Kalyna, *Dilo*, the NTSh, Bystrytsia, *Vistnyk*, and co-opera-

tives, such as the Audit Union of Ukrainian Co-operatives, Silskiy Hospodar, Maslosoiuz, and the temperance society Vidrodzhennia. In Bukovyna the conditions of Rumanian occupation proved limiting; Yu. Hlynka's Publishing Company was the most active. In Czechoslovak-ruled Transcarpathia the Prosvita society, the Teachers' Society of Subcarpathian Ruthenia, the Teachers' Hromada, and other societies issued publications. In interwar Bohemia, Ukrainian émigré academic and professional societies and organizations published their own periodicals; the Ukrainian Civic Publishing Fund and individuals such as V. Koroliv-Stary, M. Omelchenko, and S. Rosokha had their own publishing houses in Prague. Other active émigré firms included Ukrainske Slovo (Berlin, 1921–4), Ya. Orenshtain's Ukrainska Nakladnia (Berlin–Leipzig, 1919–32), and a number in Warsaw, including Nasha Kultura, Variach, and the Ukrainian Scientific Institute.

During the Second World War, when publishing in Ukraine was largely paralyzed, the most active houses were Ukrainske Vydavnytstvo in Cracow and Lviv, those of the Ukrainian National Alliance and *Holos* in Germany, and *Proboiem* and Yu. Tyshchenko's operation in Czechoslovakia.

After the war there was a brief period (1946–50) of resurgence in publishing, conducted by émigré individuals and organizations in the displaced persons camps. Subsequently the more notable publishers have been the NTSh; the Ukrainian Academy of Arts and Sciences in the US; Molode Zhyttia, and Dniprova Khvyliia in Munich; the Basilian presses in Rome, Toronto, and Prudentopolis; the Ukrainian National Association and Svoboda Press in Jersey City; Yu. Tkach (Bayda Books) in Australia; O. Mokh's Dobra Knyzhka press in Toronto; the Prolog Research Corporation in New York; Smoloskyp in Baltimore and Toronto; the Slovo Association of Ukrainian Writers in Exile in New York and Toronto; M. Denysiuk in Buenos Aires; M. Kots in Philadelphia; the Ukrainian Publishers Limited in London; *Suchasnist'* in Munich and New York; *Ukrains'ki visti* in Neu-Ulm and Detroit; the First Ukrainian Press in Paris; the Trident Press and I. Tyktor in Winnipeg; and *Novi dni* in Toronto. English-language scholarly works have been published by the Ukrainian Academic Press (Littleton, Colorado), the Harvard Ukrainian Research Institute, the Canadian Institute of Ukrainian Studies (Edmonton), and the Ukrainian Language Education Centre (Edmonton).

In postwar Soviet Ukraine the main publishers were the State Publishing House for Literature (Derzhlitvydav), Dnipro and Radianskyi Pysmennyk (belles lettres), Mystetstvo (art books), Molod (young people's books), Vyshcha Shkola (postsecondary textbooks and monographs), Radianska Shkola (textbooks and pedagogical literature), the Ukrainska Radianska Entsyklopediia press (encyclopedias), Tekhnika (technical books), Urozhai (agricultural books), Muzychna Ukraina (music books), Veselka (children's literature), Zdorovia (medical and health books), Politvydav Ukrainy (political propaganda), Radianska Ukraina (the publishing house of the CC CPU), Naukova Dumka (scientific publications), the Kiev, Kharkiv, and Lviv university presses, and several oblast houses (eg, Kameniar in Lviv, Tavriia in Symferopil, Karpaty in Uzhhorod). Through the administration of the Ministry of Culture of the Ukrainian SSR that co-ordinated

all publishing, from 1949 all presses were subordinated to the Chief Administration of the Printing Industry, Publishing, and Book Trade of the USSR Council of Ministers in Moscow. After Ukraine gained independence in 1991 many of the aforementioned institutions continued to function, some of them under new names.

R. Senkus

Puchkivska, Nadiia [Pučkivs'ka, Nadija], b 25 May 1908 in Smolensk, Russia. Ophthalmologist; full member of the USSR Academy of Medical Sciences since 1971; daughter of O. *Puchkivsky. A graduate of the Kiev Medical Institute (1930), from 1946 she worked at the Odessa Scientific Research Institute of Eye Diseases and Tissue Therapy (from 1956 as its director). Her chief publications deal with cornea transplants, the treatment of severe eye burns, the application of laser beams in ophthalmology, and the organization of ophthalmological care for the public. From 1956 she edited the journal *Oftal'mologicheskii zhurnal*. She was a member (6th–10th assemblies) and deputy chairman (7th–8th assemblies) of the Ukrainian SSR Supreme Soviet, and a member of the International Ophthalmological Academy (from 1975).

Puchkivsky, Oleksandr [Pučkivs'kyj], b 17 June 1881 in Baturyn, Konotip county, Chernihiv gubernia, d 14 February 1942. Otolaryngologist. A graduate of the St Petersburg Military Medical Academy (1905), he taught at Odessa University, the Odessa Medical Institute, and the Kiev Medical Institute (from 1922), where he organized a

department of otolaryngology. Accused of belonging to the *Union for the Liberation of Ukraine, he was sentenced to long imprisonment. His publications dealt with rhinoscleroma, tuberculosis of the larynx, and the history of otolaryngology, and he wrote the first Ukrainian textbook in the field of otolaryngology.

Pud. See Weights and measures.

Pu-hu. An illustrated weekly magazine for displaced persons, published, with interruptions, in Augsburg, Germany, from March 1947 to 1951 and in 1954 by V. Charnetsky.

Volodymyr Pukhalsky

Heorhii (Yurii) Pukhov

Pukhalsky, Volodymyr [Puxal's'kyj], b 2 April 1848 in Minsk, d 23 February 1933 in Kiev. Teacher, pianist, and composer. In 1874 he graduated from the St Petersburg Conservatory, and in 1876 he was appointed director of the Russian Musical Society's school in Kiev. From 1913 he was a professor of piano at the Kiev Conservatory (in 1913–14 its first director) and at its successor, the *Lysenko Music and Drama Institute. He also performed as a pianist in St Petersburg, Kiev, and Odessa. His students included V. Horowitz, A. Brailowsky, and K. Mykhailov. Among his main works are the opera *Valeria* (1923), the symphonic *Little Russian Fantasy* (1882), a piano concerto (1881; the first such work for modern piano in Ukrainian music), works for piano solo, and the *Liturgy of St John Chrysostom* for choir.

Pukhov, Heorhii (Yurii) [Puxov, Heorhij], b 23 August 1916 in Sarapul, Viatka gubernia, Russia. Scientist in the fields of electrotechnical theory, computational sciences, and applied mathematics; full member of the AN URSS (now ANU) since 1967. He graduated from the Tomsk Polytechnical Institute and taught at the universities of Lviv, Tomsk, Tahanrih, and Kiev (1944–59). He worked at the ANU institutes of Cybernetics (1959–70) and Electrodynamics (1971–80) and has been director of the ANU Institute for Problems of Modeling in Energetics (since 1981). In 1978 he became a member of the ANU presidium. His main scientific contributions are in the analysis and synthesis of complex electrical machinery and processes, and the theory of electric machines. He developed new methods of designing analog and hybrid electronic computers and created the theoretical basis for quasi-analog modeling.

Pułaski, Kazimierz, b 19 January 1845 in Borushkivtsi, Zhytomyr county, Volhynia gubernia, d 5 January 1926 in Poznań, Poland. Polish historian and heraldic scholar. He studied at Prague and Vienna universities. From the mid-1870s to 1918 he owned an estate in Zavadyntsi, Podilia gubernia, wrote reports on Podilia for *Gazeta Warszawska*, and contributed articles about the history and archeology of Podilia to Polish periodicals. His *Stosunki z Mengli-Girejem, Chanem Tatarów Perekopskich, 1469–1515: Akta i listy* (Relations with Mengli-Girei, Khan of the Perekop Tatars, 1469–1515: Documents and Letters, 1881), *Szkice i poszukiwania historyczne* (Historical Sketches and Explorations, 4 vols, 1887, 1898, 1906, 1909), and *Kronika polskich rodów szlacheckich Podola, Wołynia, i Ukrainy* (Chronicle of Polish Noble Families of Podilia, Volhynia, and Ukraine, 1911) contain a wealth of information on the history of the early Cossack period.

Pulemet Lake. II-4. A lake in northwestern Volhynia oblast. The lake is approx 6 km long and up to 3.6 km wide, with a surface area of 16.3 sq km. Its deepest point is 19 m. Its southern shores are sandy, and its northern ones marshy. Straits join Pulemet with Luka and Svytiatiz lakes.

Ivan Puliui

Puliui, Ivan [Puluj] (Puluj, Jan), b 2 February 1845 in Hrymaliv, Ternopil circle, Galicia, d 31 January 1918 in Prague. Physicist, electrical engineer, inventor, translator, and community figure. He studied theology (1864–9) and physics (1869–72) at Vienna University and received a PHD in physics from Strassbourg University (1877). He taught physics at the Naval Academy in Fiume (1873–5) and at Vienna University (1877–83). From 1884 to 1916 he was a professor of experimental physics and electric technology at the Prague Polytechnical Institute, where he served as rector (1899–1900) and the first dean of the electric technology faculty (from 1902). Puliui made major contributions in the fields of electrical discharges in gases, molecular physics, cathode rays, and the technology of alternating electrical currents. While working with a cathode-ray tube of his own invention (widely known at the time as the ‘Puluj tube’), he observed and recorded on film ‘mysterious invisible rays’ several years prior to W. Roentgen’s observation, but he published his results only after Roentgen published his. Puliui also created many inventions in the fields of thermal measurements, electric incandescent lamps, and telemetry; and he wrote, in Ger-

man, over 50 technical and scientific books and papers and approx 30 articles and brochures on the Ukrainian question. He translated into Ukrainian the Gospels (1871) and the entire New Testament (1880), with P. *Kulish. These translations and his translations, with I. Nechui-Levytsky, of the Old Testament became part of the Ukrainian Bible published by the British Bible Society in 1903. Puliui also translated and published in Vienna the first colloquial Ukrainian prayer book (1871). He was active in Ukrainian community life in Vienna and Prague, particularly in various relief committees. In 1865 he founded the Society of Ukrainian Theologians in Vienna, which in 1868 was transformed into the *Sich student society. A collection of articles about him was published by the Shevchenko Scientific Society in 1928, and Yu. Hryvniak’s biography of him was published in London in 1971.

L. Onyshkevych

Pulo. A copper coin that circulated in Galicia in the 14th and 15th centuries. It was coined by Casimir III, his successor Louis I of Hungary, and Louis’s viceroy in Galicia, Władysław of Opole. The fact that the coin was used in Galicia but not in Poland proper underscores the relative autonomy of Galicia at the time. The *pulo* also circulated in the 15th century in Muscovy, Tver, Novgorod, and other Russian principalities to the north and west.

Pumpkin. See Squash.

PUN. See Organization of Ukrainian Nationalists.

Punctuation. The use of spacing and conventional signs to clarify the construction, syntax, rhythm, and intonation of a sentence. In medieval Old Ukrainian writing, the punctuation used was that of Byzantine Greek (the comma, raised period, three and four points, cross, and, rarely, question mark [;]). Words in the oldest texts were not written separately, initial and final syllables were sometimes marked by acute and grave accents, and a stressed vowel was marked by an aspirate. The punctuation marks and their functions in Modern Ukrainian have much in common with German and other European languages. Their use became widespread after the introduction of printing and followed the practice of the great 15th- and 16th-century Italian and French printers. They include the period (Ukrainian: *krapka*), comma (*protynka, koma*), exclamation mark (*znak oklyku*), question mark (*znak pytannia*), colon (*dvokrapka*), semicolon (*serednyk*), hyphen (*rozdilka, defis*), dash (*ryska, tyre*), parentheses (*duzhky*), quotation marks (*lapky*), and virgule (*skisna ryska*). Paragraphs are indented, letter spacing and italics are used for emphasis, ellipses are marked by three periods or asterisks, and German quotation marks or French guillemets are used to indicate direct speech. A dash is often used in place of the verb ‘is/are’ (eg, *My – ukräintsï*. ‘We are Ukrainians.’), and apostrophes are used in words between labials and iotated vowels (eg, *zv’iazok* ‘contact’). The rules of comma use with subordinate, restrictive, and nonrestrictive clauses are more rigid in Ukrainian than in English. In the names of most institutions and organizations (except supreme governmental bodies) and in book titles, only the first letter of the first word is capitalized.

Pavlo Pundii

Yurii Pundyk

Pundii, Pavlo [Pundij] (Pundy), b 14 April 1922 in Kosiv, Chortkiv county, Galicia. Physician, publicist, and bibliographer. He studied at the Lviv Medical Institute and Erlangen University (MD, 1949). After emigrating to the United States in 1950, he established himself as an industrial physician in Chicago, managed the medical archives and library of the Ukrainian Medical Association of North America (from 1977), and edited the collection *Ukrains'kyi medychnyi arkhiv* (Ukrainian Medical Archives, 10 vols, 1980–6). With M. Boiko he compiled and edited *Vyznachni ukrains'ki likari zakhidn'oi Ukrainy i diaspori* (Distinguished Ukrainian Physicians of Western Ukraine and the Diaspora, 3 vols, 1987–8).

Pundyk, Yurii, b 4 November 1918 in Pechyrna, Kremianets county, Volhynia, d 28 October 1973 in Hibbing, Minnesota. Educator and political activist. A graduate of the Kremianets Seminary, he fled Ukraine in 1944 and served on the executive of the OUN in Austria and Germany (1945–9). He was also executive secretary of the Ukrainian Refugee Relief Committee in Salzburg (1945–6) and editor of the weekly *Promin'* (1947–9). After settling in the United States (1949) he completed his education at the University of Minnesota (MA, 1955) and taught economics at Hibbing State Junior College. He held various executive posts in the Organization for the Rebirth of Ukraine, contributed articles to *Samostiina Ukraina*, *Novyi shliakh*, and *Ukrains'ke slovo*, and wrote *Ukrains'kyi natsionalizm* (Ukrainian Nationalism, 1966). A collection of his articles, *U polum'i druzhn'oho slova* (In the Flame of a Friendly Word), appeared in 1983.

Puppet theater. From the end of 16th until the mid-19th century puppet theaters in Ukraine existed almost exclusively in **vertep* form. After the establishment of Soviet

rule oblast-level puppet theaters were registered in Kiev (from 1929 as a separate theater, founded with the help of O. Solomarsky); Vinnytsia (1937); Kharkiv, Dnipropetrovske, Poltava, and Voroshylovhrad (1939); Symferopil, Zhytomyr, Stanyslaviv (now Ivano-Frankivske), and Odessa (1945); Lviv (1946); Donetske (1958); Khmelnyts'kyi, Kirovohrad, Mykolaiv, and Cherkasy (1970); Zaporizhia and Kherson (1971); Sumy and Rivne (1975); Chernihiv and Lutske (1976); Kryvyi Rih (1977); Ternopil (1980); and Chernivtsi and Uzhhorod (1981). Along with **young spectator's theaters*, puppet theaters are dedicated to performing for children, although they stage some productions for adults. Most puppet theaters use hand puppets operated by actors hidden behind a curtain, rather than marionettes operated by strings. Their repertoire includes *Farbovani lys* (The Painted Fox), based on I. Franko; Yu. Chepovetsky's *Mysheniatko Mytsyk* (Mytsyk the Mouse), *Dobryi Khorton* (The Good Khorton), and *la – kurchatko, ty – kurchatko* (I'm a Chick, You're a Chick, co-authored by H. Usach); Usach's *Kotyhoroshko* (The Pea Roller) and *Veselkova kazka* (A Rainbow Tale); B. Yanker's *Bila troianda* (A White Rose); Ye. Radaban's *Malenka feia* (A Small Fairy); A. Shyian's *Ivasyk-Telesyk*; B. Chaly's *Barvinok za synim morem* (A Periwinkle beyond the Blue Sea); *The Mermaid* and *The Steadfast Tin Soldier*, based on H.C. Andersen; and *Puss 'n Boots*, based on C. Perrault. The repertoire for adults includes *Joseph Shveik against Francis Joseph*, an adaptation of J. Hašek's novel, I. Shtok's *The Divine Comedy* produced by the **Kiev Puppet Theater*, and S. Hulak-Artemovs'kyi's *Zaporozhian Cossack beyond the Danube*, produced by the Kharkiv Puppet Theater. Until recently the repertoire of puppet theaters also included plays which propagated the ideology of the CP and the Komsomol. In 1979 a drama workshop for puppet theaters was opened under Yu. Chepovetsky.

V. Revutsky

Purges (*chystky*). Periodic membership reviews in the Communist party and other institutions of the USSR for the purpose of 'cleansing' them of unworthy or undesirable members, such as careerists, dissolute individuals, criminals, and political opponents. From 1933 to J. Stalin's death, those purged were usually arrested.

The first large-scale purge of the Russian Communist Party (Bolshevik) (RCP[B]) was authorized by the Eighth Congress in March 1919. Almost half the Party membership was expelled in the reregistration process. Another reregistration, conducted in 1920, removed mostly adherents of T. Saponov's Democratic Centralist opposition. A 'verification' of the Party membership, proclaimed by the Central Committee in July 1921, led to the expulsion of 186,386 of the 730,000 RCP(B) members in the next three months. In the CP(B)U 22.5 percent of the members were expelled according to official sources, and about 50 percent, including most of the former **Borotbists*, according to M. Skrypnyk. The Party census of 1922 supports the latter estimate. Lesser purges of RCP(B) and CP(B)U nonproduction cells and village cells were carried out in 1924 and 1925 respectively, but no figures are available. Followers of L. Trotsky (see **Left Opposition*) were expelled in

1923–4, and of G. Zinoviev in 1926–7, without any formal purges. Following the Fifteenth Congress of the All-Russian Communist Party (Bolshevik) (VKP[B]; 1927), about 1,500 oppositionists who refused to recant their views were expelled.

Beginning with the Shakhty show trial of so-called bourgeois specialists in the spring of 1928, various types of 'class enemy' were purged from industrial, educational, art, and academic institutions. In Ukraine the show trial of the *Union for the Liberation of Ukraine (1930) led to the arrest of thousands of so-called bourgeois nationalist scholars, clergy, teachers, and intelligentsia. In general, show trials attempted to define the nature of the 'enemy' to be sought out on a wide scale.

The Sixteenth VKP(B) Conference, in April 1929, ordered another major purge, which was connected with the forced *collectivization of agriculture. Its main target, the so-called *Right Opposition, included N. Bukharin's supporters and those who, like him, lacked the required enthusiasm for dispossessing *kulaks and forcing peasants into collective farms. Of 129,200 reviewed CP(B)U members and candidates in industrial centers, 9 percent were expelled and 13 percent were fined; of 35,800 reviewed rural CP(B)U members and candidates, 16 percent were expelled and 16 percent were fined. In the winter of 1929–30 the state apparatus was purged also: 164,000 of 1.5 million employees reviewed throughout the USSR were dismissed.

The next major purge was carried out in 1933–4. The guidelines of April 1933 targeted six categories for exclusion: (1) class enemies; (2) double-dealers; (3) violators of Party discipline; (4) traitors who had joined the class enemy; (5) careerists, self-seekers, and bureaucrats; and (6) moral degenerates. Two trials helped define the 'enemy': the Kotov case, which dealt with a former Party secretary from the Kuban who had advanced local farmers more than the prescribed amount of food, and the case of 75 agricultural officials who, supposedly, had organized 'wrecking' on collective farms in Ukraine, Belarus, and north Caucasia. In subsequent months various 'Ukrainian nationalist conspiracies' were also 'exposed.' Of approx 3.5 million VKP(B) members and candidates, over 800,000 were purged in 1933, and 340,000 in 1935, for a total of 32.6 percent; out of 267,900 CP(B)U members and candidates, only 51,700 (19.3 percent) were purged. In Ukraine the 1933–4 purge was supervised by P. *Postyshev and was directed on the one hand against adherents of *national communism and M. Skrypnyk, and on the other against district and collective-farm officials who were too lenient in seizing food from the peasantry at the height of the man-made famine. Skrypnyk committed suicide, and most of his supporters were arrested as alleged members of the Ukrainian Military Organization (UVO). In Ukraine's 496 raions, 237 raion committee secretaries, 249 raion executive committee chairmen, and 158 raion control commission chairmen had been replaced by November 1933. At the same time 3,000 collective-farm chairmen and Party secretaries were dismissed. The final figures are not available but must have been much higher. Those who lost their posts were usually arrested.

After S. Kirov's assassination on 1 December 1934, the purges changed from a periodic expulsion ritual to a continuous bloody hunt for 'enemies of the people,' which lasted about four years and is known as the Great Purge or the *Yezhov terror. Because Kirov's assassin had used forged Party documents, the Central Committee ordered,

on 13 May 1935, all Party documents to be verified. Figures on exclusions from the Party after 1933 are not available. The purge was marked by three show trials in Moscow, which 'exposed' an all-embracing terrorist conspiracy headed by L. Trotsky and involving virtually all the top Party leaders of V. Lenin's day. In the atmosphere of universal suspicion, Stalin destroyed the existing Party leadership and replaced it with one dependent completely on him.

As second secretary of the CP(B)U and candidate of the VKP(B) Politburo, Postyshev protected the Ukrainian leadership from the purge for several months. When a certain Nikolenko denounced some of the CP(B)U leaders, she was expelled, and then reinstated by Stalin. In March 1937 Postyshev was transferred from Ukraine, and after about a year he disappeared. With his transfer a purge of the oblast and raion Party organizations began. It claimed two-thirds of the oblast and one-third of the raion secretaries.

On 30 August 1937, following a series of attacks on the CP(B)U leadership in the Moscow press, a special mission consisting of N. Yezhov, V. Molotov, and N. Khrushchev came to Kiev. Special mobile NKVD squads were sent from Moscow, and military units stationed in Ukraine were replaced by troops from Siberia. Molotov demanded that the CC of the CP(B)U remove all three of its secretaries, S. Kosior, M. Khataevich, and N. Popov; the head of state, H. Petrovsky; and the head of government, P. Liubchenko; and appoint Khrushchev first secretary. The CC refused, and Liubchenko committed suicide. The plenum of the CC of the CP(B)U was reconvened in Moscow, where some of its members were arrested immediately. Within a year the entire CP(B)U Politburo, Organizational Bureau, Secretariat, and Central Control Commission were arrested. Only 3 of the 102 CC members survived. All oblast Party secretaries in Ukraine were removed, and many raion secretaries, raion executive committee chairmen, industrial managers, directors of scholarly institutions, and prominent writers were arrested. As commissars appeared and disappeared, Party and state authority collapsed, and for several months the Ukrainian SSR was an NKVD fief.

In January 1938 Khrushchev and D. Korotchenko were appointed first secretary of the CP(B)U and chairman of the Ukrainian Council of People's Commissars respectively. Between February and June the 12 new oblast secretaries and the new government were replaced again. The Party was reconstructed from the ground up. CP(B)U membership declined by 37 percent, from 453,500 in January 1934 to 285,800 in May 1938. The figure includes not only arrested but also transferred personnel.

In 1938 the *Communist Party of Western Ukraine was accused of serving the Polish 'fascist' government and was abolished. Those of its leaders who were in the Soviet Union were executed as Polish spies. When Stalin annexed Western Ukraine a year later, there were hardly any local Communists to put in power. By early 1940 mass repressions had begun, and with the outbreak of the German-Soviet War in June 1941, large numbers of political prisoners were executed by the Soviets in Western Ukraine and in labor camps.

Immediately after the Second World War the CP(B)U was purged again. In some oblast organizations over 80 percent of Party members were expelled. Over half the CP(B)U's 'leading workers' were dismissed between May 1945 and August 1946, including 38 percent of Party sec-

retaries, 64 percent of regional executive committee chairmen, and about two-thirds of machine-tractor-station directors. In the postwar A. Zhdanov period a number of Ukrainian cultural figures were purged. The so-called Doctors' Plot of 1952 and some circumstantial evidence indicate that at the time of his death Stalin was planning another great purge.

Since Stalin's death there were no Party purges comparable to the earlier ones, but there were waves of arrests and repressions of Ukrainian cultural and political activists. The first wave of trials, in 1965–6, coincided more or less with similar trials in Moscow. The trials aroused protests in Moscow and Kiev and failed to stop the growth of the *dissident movement. The second wave of repressions, in 1972, was far more extensive and cruel. Widespread arrests of national and human rights activists began in January. After P. Shelest's dismissal from the CPU leadership, in May, thousands of arrests and searches were carried out, educational and academic institutions were thoroughly purged, some writers and journalists were forbidden to publish, and several journals were discontinued. By October the purge had reached the Party, and several Shelest supporters were removed. An exchange of Party cards in 1973–4 resulted in the exclusion of 37,000 CPU members (1.5 percent of the January 1973 membership).

Purism. A normative tendency in language policy aimed at eliminating from use foreign borrowings in vocabulary, word formation, and syntax, and replacing them with neologisms or colloquial constructions. It arises in societies that strive to throw off alien cultural and linguistic impositions during periods of national revival and struggle for national independence. Excessive purism impoverishes the stylistic richness of a language and creates superfluous lexical doublets, thereby increasing the distance between the literary language and the vernacular. In their struggle against the impact of *Polonisms, Ukrainian purists relied in the 17th and 18th centuries on Church Slavonicisms and in the 19th and 20th centuries on neologisms (particularly terminological ones) and German, Czech, and even Polish calques. In the 1920s Ukrainian purists in Soviet Ukraine (Ye. Tymchenko, O. Kurylo, S. Smerechynsky, M. Sulyma, A. Krymsky, and others) reacted similarly to Russianisms. During the Stalinist terror of the 1930s, the purists were condemned as 'Ukrainian bourgeois nationalists in language' and repressed. After Stalin's death moderate 'puristic' views were expressed in the Soviet Ukrainian monthly *Ukrains'ka mova i literatura v shkoli*, in the collection *Pro kul'turu movy* (On the Culture of Language, 1964), and in the serials *Pytannia movnoi kul'tury* (1967–) and *Kul'tura slova* (41 issues by 1991). Purism has also been advocated in columns on language in

various émigré periodicals and by linguists such as I. *Ohienko (in *Ridna mova*) and J. *Rudnyckyj (in *Slovo na storozhi*).

Pushcha-Vodytsia

Pushcha-Vodytsia [Pušča-Vodycja]. A town smt (1982 pop 7,200) in Podil'skyi raion on the northwestern outskirts of Kiev. In the medieval period the forested area was a hunting ground of the princes. In 1893 the Kiev city council set up the cottage district of Pushcha-Vodytsia, and in 1904 the first tuberculosis sanatorium was built there. A streetcar line was laid from the city to the district in 1909. Today the town has about 40 sanatoriums, rest homes, and camping grounds and a wooded park covering more than 40 ha.

Pushkar, Martyn [Puškar], b ? , d 11 June 1658 near Poltava. Cossack leader. From 1648 he was colonel of Poltava regiment. After B. Khmelnytsky's death in 1657, Pushkar, being one of the senior colonels in the Hetman state, was considered a candidate for the hetmancy, but I. *Vyhovsky was elected instead. That personal slight, coupled with his opposition to Vyhovsky's pro-Polish leanings and alliance with the Crimean Tatars, prompted Pushkar to form a coalition against Vyhovsky with the anti-*starshy-*

na Zaporozhian Cossacks led by Otaman Ya. Barabash. Pushkar received the support of the entire Poltava regiment and many other Cossacks who were opposed to Vyhovsky's policies and his appointment of foreigners to the *starshyna*. In November 1657 a Cossack-peasant rebellion against Vyhovsky led by Pushkar and Barabash erupted in the Poltava region. Vyhovsky's army and his Tatar allies crushed the rebellion and razed Poltava in June 1658, killing Pushkar and 8,000 to 15,000 of his supporters in battle. Barabash was captured later and executed.

Pushkar, Mykola [Puškar], b 30 October 1894 in Holovchyntsi, Zalishchyky county, Galicia, d ? Slavic philologist. A graduate of Prague University (PH D, 1925), he studied education at Warsaw University and then taught in gymnasiums in Yavoriv, Łańcut, Rzeszów, Lviv, and Horodok. In 1940-1 and from 1945 to 1974 he taught at Lviv University, chairing its department of Slavic philology in 1950-6. A comparative linguist, he is the author of articles on pedagogy and the Ukrainian, Slovak, and Czech languages; a book of lectures on Standard Czech (3 parts, 1963); and books on the palatalization of Ukrainian consonants (1932), and on Czech historical phonetics (2 parts, 1965) and historical morphology (2 parts, 1970, 1972).

Pushkar, Mykola [Puškar], b 3 August 1930. Cryobiologist; corresponding member of the AN URSS (now ANU) since 1978 and member of the American Society of Cryobiologists. A graduate of the Dnipropetrovske Medical Institute (1954), he worked in the area of organized medicine and medical education and researched the effect of extreme cold temperatures on human organs and tissues. He was one of the founders and the first director of the ANU Institute for Problems of Cryobiology and Cryomedicine (1972-83). Since 1983 he has headed the division of low-temperature conservation at the institute, where he has worked on cryomicroscopy and theoretical and experimental models of cryobiological processes. He is the author of numerous scientific works, including 9 monographs and over 40 inventions.

Stefaniia Pushkar

Pushkar, Stefaniia [Puškar, Stefanija] (née Ortynsky), b 9 January 1901 in Chornoriky, Krosno county, Galicia, d 11 April 1988 in Philadelphia. Industrial engineer and civic leader; wife of V. *Pushkar. She was director of the *Ukrainske Narodne Mystetstvo* co-operative (1929-39 and 1941-4) and helped found the journal *Nova khata*. After emigrating to the United States in 1947, she was active in the Ukrainian National Women's League of America as a member of its executive and as president (1966-71), as well as in the World Federation of Ukrainian Women's Organizations as vice-president.

Pushkar, Volodymyr [Puškar], b 9 August 1907 in Perymysl. Civic and co-operative leader; husband of S. *Pushkar. In 1941-4 he was deputy director of finance at the *Ukrainian Central Committee. After emigrating to the United States in 1947, he helped found a number of financial institutions, such as the Self-Reliance Association of American Ukrainians, Self-Reliance credit unions, and the Ukrainian Economic Advisory Association. He served as secretary and then as vice-president (1959-65) of the Providence Association of Ukrainian Catholics in America, was an executive member of the Ukrainian Congress Committee of America, and headed (1969-74) the Ukrainian Patriarchal World Federation.

Pushkari. A village in Novhorod-Siverskyi raion, Chernihiv oblast, near which Paleolithic and Mesolithic camping grounds were excavated in 1932-3 by M. *Rudynsky and in 1937-9 by P. Boryskovsky. Pushkari I revealed the remains of a semi-pit dwelling which was reinforced by mammoth bone and linked together three round living areas, each with its own fireplace. Pushkari VII contained a large number of flint tools from the Mesolithic Period.

Pushkin, Aleksandr [Puškin], b 6 June 1799 in Moscow, d 10 November 1837 in St Petersburg. Russian poet, playwright, and prose writer. Pushkin maintained close relations with the Ukrainians M. Markevych, M. Maksymovych, D. Bantysh-Kamensky, and O. Somov and helped N. Gogol to establish himself in Russian literature. He maintained an interest in Ukrainian folklore, and his book collection included *Opyt sobraniia drevnikh malorossiiskikh pesnei* (An Attempted Collection of Old Little Russian Songs, 1819) by M. Tsertelev, *Malorossiiskie pesni* (Little Russian Songs, 1827) and *Ukrainskie narodnye pesni* (Ukrainian Folk Songs, 1834) by M. Maksymovych, and *Zaporozhskaia starina* (Zaporizhia Antiquities, 1833) by I. Sreznevsky. Nonetheless, Ukrainian folk imagery was virtually absent from his writing. His stay in Ukraine during his exile from Russia in 1820-4 (Katerynoslav, Odessa, Kamianky, near Bila Tserkva, and, for a visit, Kiev) did little to acquaint Pushkin with the Ukrainian national movement. Pushkin attempted to influence K. Ryleev to rework his poem 'Voinarovskii' to reflect the Russian nationalist spirit. He wrote his collection of notes 'Istoriia Petra' (History of Peter) in a similar vein, including a subjective Russian interpretation of the Swedish-Moscovite-Ukrainian war of 1708-9.

Pushkin wrote the poem 'Poltava,' which was highly praised by Tsar Nicholas I. Being under investigation at the time, he had followed the tsar's suggestions and thus demonstrated his loyalty to the official ideology. The pur-

pose of 'Poltava' was to prove the 'historical correctness' of the destruction of Ukrainian statehood and the building of the Russian Empire. Peter I is extolled as in an ode where was Hetman I. Mazepa is portrayed melodramatically and described as 'sly,' 'cruel,' 'cunning,' 'cold,' 'destructive,' 'wily,' and 'a snake.' P. Kulish, who was influenced by Pushkin's imperialistic Great Russian ideology as much as by his poetic style, stressed Pushkin's importance for Ukrainian literature. Shevchenko, however, in his poem 'Son' (The Dream) passionately contradicted Pushkin's apotheosis of St Petersburg in 'Mednyi vsadnik' (The Bronze Horseman). The works of Pushkin were first translated into Ukrainian in 1829 by L. Borovykovsky. The best prerevolutionary translations are by Borovykovsky, M. Starytsky, I. Franko, and M. Vorony. Of the postrevolutionary translators the most noteworthy are P. Fylypovych, M. Zerov, M. Rylsky, M. Bazhan, M. Terezhchenko, and N. Zabala.

Yu. Boiko

Pushyk, Stepan [Pušyk], b 26 January 1944 in Viktoriv, Halych raion, Ivano-Frankivske oblast. Writer. He graduated from the Ivano-Frankivske Pedagogical Institute (1964) and Gorky Institute of Literature in Moscow (1972), and is the author of four poetry collections and several books of children's verse. He has gained renown for his novels *Pero zolotoho ptakha* (Quill of the Golden Bird, 1978) and *Strazh-hora* (1981), for which he was awarded the Shevchenko State Prize for literature in 1990. An edition of the two novels and 21 of his stories was published in 1988. Pushyk is also the author of a book about Ivano-Frankivske oblast (1984), a collection of song lyrics (1985), and a collection of literary and folkloristic essays, *Daraby plyvut' u lehendu* (Rafts Float into Legend, 1990). He received the Shevchenko Prize in 1990 for his novel *Halys'ka brama* (The Halych Gate).

Puskova, Olha, b 1857 in Kiev, d 1911 in Odessa. Opera singer (contralto). A graduate of the Moscow Conservatory (1874), she studied voice under M. Viardot-Garcia in Paris. She sang as a soloist with the Kiev (1874–6, 1878–9) and Kharkiv (1876–7) operas, and then gave concerts and taught music in Kiev, Katerynoslav, and Odessa. Her main roles were Vania in M. Glinka's *Ivan Susanin*, Basmanova in P. Tchaikovsky's *Oprichnik* (a role written especially for her), and Azucena in G. Verdi's *Il Trovatore*.

Pustomyty. IV-4. A town smt (1986 pop 7,900) on the Stavchanka River and a raion center in Lviv oblast. It is first mentioned in 1441 in the Lviv court records. Lying on a busy trade route, it became a royal tariff post. After the partition of Poland in 1772, Pustomyty belonged to Austria. Taking advantage of its natural sulfur springs, the local landowner set up a spa in 1880. In 1919 the town was annexed by Poland, and in 1939, by the USSR. At the beginning of the 20th century lime enterprises were set up. In the 1950s an asphalt and a reinforced-concrete plant were constructed. Besides building materials Pustomyty manufactures mineral fertilizer.

Pustoviit, Havrylo [Pustovijt], b 26 July 1900 in Mezhyrich, Kaniv county, Kiev gubernia, d 20 March 1947 in Kiev. Graphic artist. He studied at the Kiev Art School (1916–18) and the Kiev State Art Institute (1923–30) under

Havrylo Pustoviit: *Grape Harvest in Moldavia* (color lithograph, 1937)

M. Boichuk, I. Pleshchynsky, and S. Nalepinska. From 1930 to 1934 he taught at the Ukrainian Printing Institute in Kharkiv. He designed covers for Ukrainian translations of J. London's *Iron Heel* (1928) and E. Remarque's *All Quiet on the Western Front* (1929) and illustrated editions of T. Shevchenko's *Naimychka* (The Hired Girl, 1938), M. Kotsiubynsky's stories, M. Bazhan's *Danylo Halys'kyi* (Danylo of Halych, 1942), and I. Franko's *Zakhar Berkut* (1946). He did a number of lithograph series, including 'Landscapes of Caucasia' (1935) and 'The Industrial Dnieper' (1937), and drawing series, such as 'Lviv' (1939–41) and 'The Hutsul Region' (1939–41). In 1941–2 he drew many portraits, including ones of Yu. Yanovsky, V. Sosiura, O. Dovzhenko, I. Le, and A. Malyskko.

Pustovoit, Vasyl [Pustovojt, Vasył'], b 14 January 1886 in Taranivka, Zmiiv county, Kharkiv gubernia, d 11 October 1972 in Krasnodar. Selection scientist; full member of the USSR Academy of Sciences from 1964 and of the All-Union Academy of Agricultural Sciences from 1956. A graduate of the Kharkiv agricultural school (1907) and the Kuban Agricultural Institute (1926), he was a lecturer at the Kuban agricultural tekhnikum (1908–24) and head of the department of genetics, selection, and seed cultivation at the agricultural institute (1926–30). He founded an experimental farm at the Kuban tekhnikum (1912) that was the basis for the All-Union Scientific Research Institute of Oil Cultures (est 1932), at which he headed the selection and oil seed cultivation division and the sunflower selection laboratory. He created 20 varieties of sunflower with a high oil yield (up to 57 percent in dry seeds), including *Peredovyk* (Leader) and VNIIMK 8883 and 6540.

Pustynky settlement. A *Bronze Age settlement on the Dnieper River near Pustynky, Chernihiv raion. An estimated 200–250 people – practicing mainly agriculture and animal husbandry – lived in this settlement of the 13th to 12th century BC. Excavations in 1964–7 revealed the remains of dwelling, agricultural, and religious structures, ceramic items, and stone and bone tools. A burial ground with cremated remains was located nearby.

Put' prosveshcheniia. See *Shliakh osvity*.

Putiatyn, Viktor [Putjatyn], b 12 September 1941 in Kharkiv. Champion fencer. He was a member of the USSR men's foil teams that won gold medals at the 1965, 1966, 1969, and 1970 world fencing championships and the 1968 and 1972 Olympic silver medals, and was a Ukrainian and USSR champion many times. In 1981 he was elected a mem-

ber of the Executive Committee of the International Fencing Federation.

Putna Gospel (Putnianske yevanheliie). An Old Ukrainian manuscript transcribed in the *ustav* from a Macedonian Glagolitic original by two copyists (folios 1–48, 49–146) in the second half of the 13th century, somewhere in southern Galicia or southwestern Volhynia. It was preserved at the Putna Monastery in northern Bukovyna. The text has many Ukrainian phonetic features similar to those of the *Halych Gospel of 1266–1301. It was published and analyzed by O. Kaluzhniatsky under the title *Evangeliarium Putnanum* (1888).

Putni boyars. The lower category of *boyar military servitors in the Lithuanian-Ruthenian state. They had the same privileges as the *pantysyni boyars. In the 15th and 16th centuries they occupied a social position between the state peasants and the petty nobility. By the end of the 16th century most of them had been absorbed by those groups or, in Ukraine, become *registered Cossacks. In some localities in Right-Bank Ukraine, however, *putni* boyars could be still found in the 18th century.

Putyliv or Putyla. VI-6. A town smt (1986 pop 2,900) in the Putylivka River Valley and a raion center in Chernivtsi oblast. It was first mentioned in historical documents in 1501 under its original name, Putyliv. At that time it was under Moldavian rule. In 1774 Bukovyna along with Putyliv was annexed by Austria. From the end of the 18th century the town was called Putyla-Storonets, and in 1920 it was renamed Putyla by the Rumanians. It was annexed by the USSR in 1940. Its main industries are forestry, woodworking, and wool processing. Yu. *Fedkovych's homestead in Putyliv, where he was born, has been converted into a literary memorial museum.

Putyvl or Putyvel [Putyvl' or Putyvel']. II-14. A town (1989 pop 19,100) on the Seim River and a raion center in Sumy oblast. It was first mentioned, as a fortress, in the Hypatian Chronicle under the year 1146. Putyvl was established in 988 at the crossroads of several trade routes. From the 12th century until 1523 Putyvl was the center of an appanage principality, which was part of Kievan Rus', the Grand Duchy of Lithuania (1356–1503), and Muscovy. The town, which is described in **Slovo o polku Ihorevi*, withstood a Cuman siege in 1186. In 1239 it was destroyed by Batu's horde. In 1618 it was captured by Hetman P. Sahaidachny. As Slobidska Ukraine became colonized in the 17th century, Putyvl lost its strategic importance. In the 19th century it was a county center of Kursk gubernia. In 1926 it became part of the Ukrainian SSR. Today its main industries are food processing and tourism. It produces canned fruits, butter, powdered milk, and mixed feed. In 1988 Putyvl was declared a historical and cultural reserve. Its architectural monuments include the fortified complex of Movchanskyi Monastery, built in the 1570s, with its Cathedral of the Nativity of the Theotokos (1630–6) and Transfiguration Church (1666–7), the building complex of the Transfiguration Monastery (1617–1707) with its cathedral, the main gate surmounted by the Annunciation Church (1693–7), St Nicholas's Church (1735–7), and the Church of the Resurrection (1758). Only the last two are designed in the Ukrainian baroque style. Artistic monu-

St Nicholas's Church (1735–7) in Putyvl

ments of the 17th and 18th centuries include the sculpture of Jesus in a dungeon, some icons by local masters, an image of the Madonna in gold and silver on white satin, a shroud with an image of Christ (1666), the bookbindings of the gospel, and a church bell.

Puza, Yevhen, b 2 February 1880 in the Bačka region, d 13 December 1922 in Uzhhorod, Transcarpathia. Political and military figure. He studied at the military technical academy in Prague and worked at the Military Cartography Institute and as a government notary in Vienna. With the fall of Austria-Hungary he became deputy leader of the *Ruthenian People's Council in L'ubovňa (1918) and its delegate to the Ukrainian National Council in Stanyslaviv. In 1919–20 he was a major in the Ukrainian Galician Army, and in 1920 he was a member of the Directory of Subcarpathian Ruthenia in Prague. After moving to Uzhhorod he edited *Narod* and *Vpered* and founded Prosvita society chapters in the Hutsul region.

Puzyna, Kostiantyn, b 1790 in the Poltava district, d 1850 in Vydubychi Monastery near Kiev. Poet. He concluded his studies at the St Petersburg Theological Academy (1814) and taught at the theological seminary in Vologda. In 1822 he joined a monastic order and adopted

the religious name Filadelf. Puzyna wrote in Ukrainian and Russian and maintained that Ukrainians should not forsake their native tongue, even if they lived in distant St Petersburg. Most of his poetry was written in St Petersburg. It includes poems in genres popular in his day, such as name-day greetings in verse and verses of condolence. Burlesque in style, Puzyna's poems have a democratic theme, in particular the poem 'Oda – malorossiiskii krest'ianyn' (An Ode: The Little Russian Peasant), in which the poet defends the peasant against the misrule of the gentry.

Puzyr. A family of potters. Musii (1812–95) opened a workshop in Radychiv, Chernihiv gubernia, in 1842. His sons, Lavrentii (1845–1917) and Hryhorii (ca 1850–1930), learned from and worked with him. Eventually Lavrentii set up his own shop in Novhorod-Siverskyi. The Puzyr produced decorative and consumer earthenware decorated with plant motifs and horizontal bands.

Puzyrkov, Viktor, b 4 October 1918 in Katerynoslav. Painter. He studied at the Kiev State Art Institute (1938–46) and has taught there since 1948. He is known for his seascapes and socialist-realist battle scenes, including *The Undeclared* (1946), *Black Sea Sailors* (1947), *Soldiers* (1972), and *Kiev: 1942* (1974). He also painted the triptych *Lesia Ukrainka* (1979).

Puzytsky, Antin [Puzyc'kyj], b 1880, d 1945. Senior army officer. As a colonel of the Russian army during the First World War, he was captured by the Austrians, in 1917. In 1918 he served as a regimental commander of the Graycoats Division and from December 1918 he commanded the division. He was promoted to brigadier general of the UNR Army. In the interwar years he lived in Poland and contributed to Ukrainian military journals.

Pykulychi [Pykulyč]. A village in Peremyshl county, Galicia, which in 1919–21 was the site of a Polish internment camp. Initially, Ukrainian civilians from Galicia (approx 1,920 people in 1919) and then soldiers of the UNR Army and the Ukrainian Galician Army were interned there by the Poles.

Pylchikov, Dmytro [Pyl'čykov], b 7 November 1821 in Kherson gubernia, d 17 October 1893 in Kharkiv. Educator

Dmytro Pylchikov

Mykola Pylchikov

and civic leader; father of M. *Pylchikov. After graduating from Kiev University (1843) he lectured at the Poltava Cadet Corps (1846–64). In 1846 he became acquainted with T. Shevchenko and joined the Cyril and Methodius Brotherhood. An avid Ukrainophile and active member of the Poltava Hromada, he helped organize Sunday schools in Poltava in 1859–62. He maintained ties with M. Draho-manov abroad and with Galician cultural and civic leaders. In 1873 he visited Lviv and became a patron of the Shevchenko Scientific Society.

Pylchikov, Mykola [Pyl'čykov], b 21 May 1857 in Poltava, d 19 May 1908 in Kharkiv. Pioneering experimental physicist and instrument designer; son of D. *Pylchikov. After graduating from Kharkiv University in 1880 he taught there and became a professor in 1889. Later he was a professor at the university in Odessa (1894–1902) and at the Kharkiv Technological Institute (1902–8). Throughout his career he was an active researcher in the fields of optics, geomagnetism, radioactivity, X-rays, and radio control and guidance. In 1893 he researched the *Kursk Magnetic Anomaly.

Pylankevych, Oleksander [Pyljankevych], b 16 March 1933 in Korosten, Kiev oblast, d 13 November 1989 in Kiev. Materials scientist; corresponding member of the AN URSR (now ANU) from 1976. He graduated from the Kiev Polytechnical Institute (1955) and worked at the ANU Institute for Problems of Materials Science, as assistant director from 1968. A specialist in electron microscopy, he studied, in particular, the molecular structure of boron nitride, using that material to develop a new superhard material. He also worked in the area of metal thin-films, in which he studied the mechanisms of nucleation and structure formation.

Pyliavtsi, Battle of. A major battle of the *Cossack-Polish War. It took place on 21–24 September 1648 near the Podilian village of Pyliavtsi, now Pyliava, in Stara Syniava raion, Khmelnytskyi oblast. The battle pitted the 100,000-strong Cossack-peasant army led by Hetman B. Khmelnytsky and colonels such as I. Bohun and M. Kryvonis and a force of 3,000 to 4,000 Budzhak Tatars against a Polish levy en masse of 32,000 nobles, over 100,000 servitors, and 8,000 German mercenaries led by the magnates D. Zasławski, M. Ostroróg, and A. Konięcpolski. Khmelnytsky split the Polish army by sending a large force directly into its midst. Tatar cavalry forays created confusion, and Khmelnytsky's remaining troops surrounded the Poles and attacked them with musket fire. The Polish army was routed and fled in disarray, leaving behind its artillery, ammunition, and supplies. After the victory Khmelnytsky's army gained control of Podilia and Volhynia and moved on to Lviv and Zamość. News of the Polish defeat was a catalyst for the spread of anti-Polish insurgency in Galicia.

Pylinska, Mariia [Pylins'ka, Marija], b 18 October 1898 in Kamianets-Podilskyi, d 16 December 1976. Teacher and translator; wife of I. *Dniprovsky. She graduated from the teachers' seminary in 1917, and in the 1920s she worked as a teacher, an orphanage director, and a translator for the Radio and Telegraph Agency of Ukraine. From 1928 she was a Ukrainian translator of Russian literature. In the

1960s she prepared a Russian-Ukrainian phraseological dictionary with I. Vyrhan, which was published in the journal *Prapor*.

Pylypchuk, Pylyp [Pylypčuk], b 1869 in Volhynia, d 1940 in Kholm. Engineer and civic and political leader. In the 1900s he was active in the Ukrainian community in St Petersburg. In 1917–18 he lectured on theoretical mechanics at the Kiev Polytechnical Institute, and in 1919 he was in charge of the Dnieper River route system. At the same time he served as UNR communications minister in V. Chekhivsky's and S. Ostapenko's cabinets. In mid-1919 he was appointed chief of the UNR negotiations mission to Warsaw. He remained there and served briefly as prime minister of the UNR government-in-exile (1921–2). He was appointed a professor at the Lviv (Underground) Ukrainian Higher Polytechnical School (1922–5). From 1927 he worked in Lutske as a municipal engineer. There he founded and headed the Lesia Ukrainka Society.

Pylypchuk, Vasyl [Pylypčuk, Vasyl'], b 1871, d 17 February 1941 in Liubsha, Zhydachiv county, Galicia. Community leader and beekeeper. After graduating from the Greek Catholic Theological Seminary in Lviv he served as a parish priest. He set up a large, successful apiary, contributed to the monthly *Ukrains'kyi pasichnyk*, and wrote *Pidručnyk pasichnytstva* (A Handbook on Beekeeping, 1913; 2nd rev edn 1930). He organized local credit unions, dairy co-operatives, and Prosvita reading rooms.

Pylypenko, Anatolii, b 3 May 1914 in Kyrylivka (now Shevchenkove), Zvenyhorodka county, Kiev gubernia. Analytical chemist; AN URSS (now ANU) full member since 1972. A graduate of the Kiev Industrial (now Polytechnical) Institute (1936), he worked at the Kiev Technological Institute of Silicates (1939–41), headed the Laboratory of the Central Research Institute of Building Materials of the Ministry of the Building Materials Industry (1944–6), taught at Kiev University (from 1964), worked at the ANU Institute of General and Inorganic Chemistry (1968–75), and directed the ANU Institute of Colloidal Chemistry and Hydrochemistry (1975–). Pylypenko's research covers the use of complexing agents in inorganic analysis, the complex formation between metal ions and organic or inorganic ligands, and their analytical utilization. He established a classification system for organic reagents used in analytical chemistry and developed photometric and luminescence-based methods for the determination of rare elements.

Pylypenko, Borys, b ca 1892 in Chernihiv gubernia, d 3 November 1937 on Solovets Islands. Historian, ethnographer, and art historian. He was an associate of the Chernihiv Historical Museum in the 1920s. He then headed the history department at the All-Ukrainian Historical Museum in Kiev (1928–33) and the fieldwork of the joint museum-VUAN Polisian Historical-Economic Expedition (1932). He was arrested during the Stalinist terror of 1933 in Ukraine and was most likely shot.

Pylypenko, Mykhailo, b 8 October 1888 in Nosachiv, Cherkasy county, Kiev gubernia, d 27 July 1952 in Kiev. Actor. He completed theatrical studies at the Lysenko Music and Drama Institute in Kiev (1919) and then worked in

the Shevchenko First Theater of the Ukrainian Soviet Republic (1919–20), the Kiev Operetta Theater (1934–5), and the Kiev Ukrainian Drama Theater (1921–52). He played comic and character roles and was known for his recitations of humorous and satirical stories.

Pylypenko, Nataliia (née Komilevska; married name: Khodymchuk), b 26 August 1898 in the Chernihiv region, d 27 October 1973 in New York. Stage actress and director. In 1918 she joined Molodyi Teatr; then she acted in the Shevchenko First Theater of the Ukrainian Soviet Republic (1919–21) and in Berezil (1922–34). She was expelled from the cast in 1934 as a result of the arrest of her husband, and she returned to theatrical activities only as an émigré in Paris, where she led a Ukrainian troupe (1948–57). Her memoirs are titled *Zhyttia v teatri* (Life in the Theater, 1968).

Serhii Pylypenko

Ivan Pylypiv

Pylypenko, Serhii, b 22 July 1891 in Kiev, d 3 March 1934. Writer and journalist. He was active in the Ukrainian Party of Socialist Revolutionaries in 1917–18 and then joined the Ukrainian Communist party. In the early 1920s he edited a number of newspapers, among them *Selians'ka pravda*. He published several collections of stories: *Baikivnytsia* (The Storyteller, 1922), *Baiky* (Stories, 1927), *Svyni na dubi* (Pigs on the Oak, 1932), and others. His writing is secondary to his role in literary and scholarly organizations, however. He founded *Pluh and edited its publications. He took an active role in the *Literary Discussion of 1925–8, in which he came out against M. *Khvylovy. In addition he was director of the *Taras Shevchenko Scientific Research Institute in Kharkiv (1926–33) and sat on the boards of directors of the Knyhospilka publishing house and the State Publishing House of Ukraine. In 1933 he was arrested, accused of belonging to a counterrevolutionary Ukrainian organization, and sentenced by a NKVD tribunal to be shot. In 1957 a military tribunal found no ground for his arrest, and he was posthumously rehabilitated.

Pylypenko, Viktor, b 15 November 1935 in Zaporizhia. Machine scientist; full member of the AN URSS (now ANU) since 1982. He graduated from Dnipropetrovske University (1959) and has worked at the ANU Institute of Technical Mechanics since 1966, as director since 1980. He has made scientific contributions in machine design, dynamic calcu-

lations in complex hydromechanical systems, and mathematical models for cavitating oscillations in pumping systems.

Pylypenko's Hill. A fortified settlement of the 3rd century BC to 1st century AD, 4 km south of Kaniv, Cherkasy oblast, on the right bank of the Dnieper. Excavations in 1948 and 1966–70 revealed 44 small, deeply set rectangular dwellings arranged in rows. Other remains found include local and Greek ceramic tableware, iron slag, crucibles for pouring bronze jewelry, and iron, bronze, and glass items. The settlement was a significant center of the *Zarubytshi culture.

Pylypiv, Ivan (Pylypiw, Pillipiw; né Pylypivsky), b 7 July 1859 in Nebyliv, Kalush county, Galicia, d 10 October 1936 near North Bank, Alberta. Pioneer settler. Pylypiv, along with W. *Eleniak, another peasant from Nebyliv, has been regarded as the first Ukrainian to come to Canada; he arrived in 1891 to investigate the suitability of the country for settlement. After returning to Galicia early in 1892 for his family, he was arrested by the Austrian authorities on charges of sedition and inciting people to emigrate, and spent four months in jail. He returned to Canada in 1893 and took out his first homestead near Bruderheim, Alberta, before settling in Alberta's Edna-Star colony in 1894. Pylypiv acquired growing stature among Ukrainian Canadians after his death, once an article by I. Bobersky in the 1937 almanac of *Kanadiis'kyi farmer* established him and Eleniak as the first Ukrainians in Canada. Pylypiv's home was moved to the *Ukrainian Cultural Heritage Village near Edmonton in the 1970s and has been restored as a historical monument.

Pylyshenko, Volodymyr [Pylyshenko] (pseud: Mirko), b 28 July 1934 in Volodymyr-Volynskyi. Painter. A refugee, Pylyshenko emigrated to the United States after the Second World War and completed his studies at the Rochester Institute of Technology (MFA, 1963). Since 1963 he has been a professor of drawing and painting at the State University of New York at Brockport. He has exhibited his figurative and expressionistic oils and prints since 1963.

Pylyshyn, Zenon [Pylyshyn], b 25 August 1937 in Montreal. Psychologist; specialist in cognitive science. A graduate of McGill University (B ENG, 1959) and the University of Saskatchewan (1961; PH D, 1963), he joined the faculty of the University of Western Ontario in 1966 and was appointed director of its Centre for Cognitive Science in 1981. Since 1984 he has been a fellow of the Canadian Institute for Advanced Research and national director of its program in artificial intelligence and robotics. He was a founding member and board member of the Canadian Society for Computational Studies of Intelligence and of the International Cognitive Science Association, of which he was president in 1986. He has done experimental research on short-term memory, computer analysis of text, machine vision, computer models of human visual attention and perceptual-motor co-ordination, and the role of imagery in reasoning. He has written over 60 articles and book chapters, and 4 books, including *Computation and Cognition: Toward a Foundation for Cognitive Science* (1984).

Pymenova, Nina, b 27 December 1888 in Pułtusk, Poland, d 14 April 1941 in Kiev. Geologist and paleobotanist. She graduated from the Higher Courses for Women in St Petersburg (1910) and then taught secondary school in Warsaw, Moscow, and Kiev. She became a research associate of the geology chair at the VUAN (1924) and of the Institute of Geological Sciences (1926). At the same time she taught paleontology at Kiev University. Her main works deal with the plant fossils and the stratigraphy of Cretaceous, Paleogene, and Neogene deposits in Ukraine.

Mykola Pymonenko

Pymonenko, Mykola, b 9 March 1862 in Priorka (a suburb of Kiev), d 26 March 1912 in Kiev. Prominent Ukrainian realist painter; son-in-law of V. *Orlovsky; full member of the St Petersburg Academy of Arts from 1904. After studying at the *Kiev Drawing School (1878–82) and the St Petersburg Academy of Arts (1882–4) he taught at the Kiev Drawing School (1884–1900) and *Kiev Art School (1900–6). He took part in the exhibitions of the *Society of South Russian Artists (1891–6) and *Peredvizhniki society (from 1893) and became a member of the latter society in 1899. In 1909 he was elected a member of the Paris International Association of Arts and Literatures. Pymonenko produced over 700 genre scenes, landscapes, and portraits, many of which were reproduced as postcards. They include *Wedding in Kiev Gubernia* (1891), *At the Well* (1894), *Kiev Flower Seller* (1897), *At the Market* (1898), *Victim of Fanaticism* (1899), *Trial of One's Own (Horse Thief)* (1900), *Before the Storm* (1906), *Hay Gathering in Ukraine* (1907), *Rivals: At the Well* (1908), *Hopak* (1908; bought by the Louvre), and *Paschal Matins* (1910). Pymonenko also created illustrations for several of T. Shevchenko's narrative poems, and in the 1890s he took part in painting the murals

in *St Volodymyr's Cathedral in Kiev. Books about him have been written by Ya. Zatenatsky (1955) and P. Hovdia (1957), and an album of his works was published in Kiev in 1983.

Pyna River. A left-bank tributary of the Prypiat River. It is 88 km long. It originates in marshland and then develops into a connecting waterway for the Dnieper–Buh Canal before joining the Prypiat near Pynske. Its entire course is in the Polisian area of Belarus. The river is regulated by dams.

Pynchuky. The name of the inhabitants of the Pynske region of Polisia. Sometimes the term is applied to all natives of Polisia (*polishchuky*), to whom the *pynchuky* are culturally related. Together with that of the Podlachians, the dialect of the *pynchuky* belongs to the western Polisian subgroup of northern Ukrainian dialects.

The Jesuit college and church in Pynske

Pynske or Pinsk. 1-7. A city in Polisia (1990 pop 122,000), the center of the Pynske region and a raion center in Brest oblast (Belarus), situated at the confluence of the Pyna and the Prypiat rivers, on the eastern (dry) boundary of the Polisian swamps. The environs were first settled in the Neolithic age, and artifacts of the *Zarubyntsi culture have been unearthed there. The city was first mentioned in a chronicle under the year 1097 as Pynesk. During the Princely era it was the capital of the Turiv-Pynske principality and from the late 12th century, of the Pynske principality. It was annexed by Lithuania, and in 1569 became part of the Polish state. In 1581 it was granted the rights of *Magdeburg law. In the 16th and early 17th centuries it was an important trading and cultural center (an Orthodox and then Uniate bishopric, the site of a Jesuit college). It went into a period of decline until the late 18th century, when waterways were developed. Between 1793 and 1917 it was part of the Russian Empire and a county center of Minsk gubernia. It was a trading center for bread, fat, and wood products and later a center of the lumber and wood-working industry. In the late 19th century it attracted a large Jewish community, which came to constitute most of its population (1897, 28,000). In 1920–39 the city was controlled by Poland. By 1931 its population had reached 31,700. It was annexed by the Soviet Union in 1939 and assigned to the Belorussian SSR even though the population

in the surrounding area is predominantly Ukrainian.

Today local industry is varied: it includes furniture, shoe, weaving, match-making, and linen and hemp factories. There are also a foundry, a crane repair plant, a ship repair plant, food-processing plants, and a river port. Of cultural interest are a regional studies museum, a baroque Polish church and Jesuit college (17th century), and a Catholic cathedral (16th–18th centuries).

Pynske Congregation (Pynska kongregatsiia). An Orthodox sobor held from 15 June to 2 July 1791 in Pynske. In the late 18th century the Orthodox eparchy in Polish-ruled Belarus and Ukraine was subordinated to the Russian *Holy Synod, and its subordinate status gave St Petersburg a pretext for interfering in the internal affairs of the Polish Commonwealth. To inhibit such interference the Polish Sejm proclaimed religious freedom in 1790 and guaranteed government assistance to the Commonwealth's Orthodox faithful. The Pynske Congregation was convened to formalize the new arrangement. It was attended by 96 delegates drawn from the clergy, nobility, and bourgeoisie. The Commonwealth's only Orthodox bishop, V. Sadkovsky, could not attend because he was in prison. Archimandrite I. Balanovsky of the Motronynskiy Trinity Monastery was elected director of the congregation.

The congregation adopted rules regarding the structure of the Orthodox church in the Commonwealth that proscribed ties with the Russian Holy Synod and renewed the jurisdiction of the Patriarch of Constantinople. It also endorsed a new hierarchy consisting of a metropolitan and three bishops. A sobor held every four years was to be the church's legislative authority, and executive authority was to be vested in the metropolitan's Consistory in Pynske. Hegumen S. Palmovsky was elected chairman of the Consistory. Resolutions essentially proclaiming the autocephaly of the Orthodox church were adopted. The Sejm ratified the congregation's decisions on 16 May 1792. None of them were implemented, however, because of the 1793 and 1795 partitions of Poland and the resulting annexation of the Belarussian and Ukrainian territories by the Russian Empire.

Pynske region. A historical territory in the upper reaches of the Prypiat River in Polisia. Until the late 12th century it was part of *Turiv-Pynske principality, but later it constituted an appanage of Pynske principality dominated by the princes of Kiev and Volodymyr-Volynskiy. The rulers of Pynske principality included the brothers Yaroslav (1183) and Yaropolk (1190) Yaroslavych and their descendants, Volodymyr (1206–7), Rostyslav (1228–32), Mykhailo (1228), Teodor (1262), and Yurii (d 1289). In the mid-13th century the principality recognized the overlordship of King Danylo Romanovych of Galicia-Volhynia, and ca 1318 it was annexed by the Lithuanian grand duke Gediminas. From 1471 to 1521 it was governed by the *Olelkovych family of Lithuanian-Ruthenian

princes of Kiev. Thenceforth it was under Polish rule. During the Cossack-Polish War the principality's nobles officially joined the Hetman state on 20 June 1657, and created *Pynske-Turiv regiment.

Pynske-Turiv regiment. An administrative territory and military formation of the Hetman state. It was established in 1657, when the Ukrainian Cossacks expelled the Polish landowners from Belarusian territory. The regiment was dissolved in the middle of 1659, when Polish forces recaptured the region. The commanders of the regiment were Cols I. Hrusha (1657) and K. Vyhovsky (1657–9).

Pyntia (Pinta), b and d? Leader, perhaps of Rumanian origin, of a band of Transcarpathian *opryshoks from 1701. The rebels participated in the Kuruc peasant revolt of 1703, which overran Berehove, Mukachiv, Khust, and Uzhhorod before it was suppressed. Pyntia's band fled across the Carpathians to Polish-ruled Pokutia, where together with I. *Pysklyvy's band it attacked the nobles and usurers of Kolomyia and its vicinity.

Pypin, Aleksandr, b 6 April 1833 in Saratov, d 9 December 1904 in St Petersburg. Russian Slavist and cultural historian; full member of the Russian Academy of Sciences from 1898 and the Shevchenko Scientific Society from 1903. He studied under I. Sreznevsky at St Petersburg University and was a professor there in 1860–1. Both he and M. *Kostomarov resigned as professors in protest against the tsarist oppression of the student movement. Pypin played an important editorial role in the progressive journals *Sovremennik* and *Vestnik Evropy*, in which he published his reviews of Ukrainian literature. He wrote nearly 1,200 works. He discussed the development of Ukrainian literature and ethnography in his pioneering histories of ancient Russian tales (master's thesis, 1857), Slavic literatures (coauthor, V. Spasovich, 1865; 2 vols, 1879, 1881), Russian ethnography (4 vols, 1890–2; vol 3 is devoted to Ukrainian ethnography), and Russian literature (4 vols, 1898–9). Pypin also wrote articles about T. Shevchenko; he considered him one of the best Slavic poets and a talented realist prose writer. His 1890 *Vestnik Evropy* review of O. *Ohonovsky's history of Ruthenian literature, in which Pypin disagreed that Ukrainian literature has its origins in Kievan Rus' and that it evolved independently of Russian literature, elicited a lively polemic in which Ohonovsky, I. Nechui-Levytsky, M. Komarov, K. Mykhalchuk, M. Drahomanov, I. Franko (with whom Pypin corresponded), and other scholars took part. Information regarding Ukraine can be found in his books on the social (1871) and religious (1916) movements during the reign of Alexander I and on Russian Freemasonry (1916). His reminiscences were published in 1910.

R. Senkus

Pyriatyn [Pyrjatyń]. III-13. A city (1989 pop 20,500) on the Udai River and a raion center in Poltava oblast. It was first mentioned in the Hypatian Chronicle under the year 1155. From the mid-14th century it belonged to the Grand Duchy of Lithuania, and from 1569, to the Polish Commonwealth. It was granted the rights of *Magdeburg law in 1592. Under the Hetman state (1648–1781) Pyriatyn belonged to Kropyvna and Lubni regiments. Then, for over

a century, it was a county center in Poltava gubernia. Today the city is an industrial center with a metalworking, building-materials, woodworking, and food industry. Its architectural monuments include the Cathedral of Christ's Nativity (1781) and a hospital building designed by N. Amvrosimov in the early 19th century.

Mykola Pyrohiv

Pyrohiv, Mykola, b 28 March 1875 in Chernihiv, d March 1961 in Blacktown, Australia. Physician, educator, and army officer; grandson of N. *Pirogov. After graduating from the St Petersburg Military Medical Academy he served in Kovel as an army doctor. During the First World War he was chief physician at the Military Surgical Hospital in Kiev and principal of the Fourth Coeducational Ukrainian Gymnasium, which he had organized. He commanded a regiment in the Zaporozhian Corps in the UNR Army in 1919 and a battalion in the First Zaporozhian Rifle Division in 1920. He received the rank of colonel. After returning to Kovel in 1921, he practiced medicine and was active in the Prosvita Society and the Ukrainbank. In 1922 he was elected to the Polish Sejm, where he served as vice-president of the *Ukrainian Parliamentary Representation. After the war he emigrated to Australia (1951).

Pyrohoshcha Church of the Mother of God (Tserkva Bohorodytsi Pyrohoshchi, aka Soborna tserkva Uspinnia presv. Bohorodytsi). A church built in the Byzantine style in the Podil district of Kiev in 1132–6 during the reign of Prince Mstyslav I Volodymyrovych the Great. The short church consisted of three naves and apses covered by one dome. The walls were decorated with frescoes, and the floor was laid with glazed and mosaic tiles. The first building of the Kievan princes to be erected entirely of brick instead of stone, in the medieval period it was the main church of the Podil's merchants and tradesmen and housed an orphanage, a hospital for the poor, and the municipal archives. In 1613–33, when the St Sophia Cathedral was the seat of the Uniate Kiev metropol, the church served as the cathedral of the Orthodox metropolitans. It was reconstructed several times: in 1613–14 by the Italian architect S. Bracci, in the 1770s in the baroque style by I. Hryhorovych-Barsky, and in 1811 in the neoclassical style by A. Melensky. In 1778 it acquired one of the finest rococo iconostases in Ukraine. In 1835 its five-level belfry was dismantled, and a new one was built in the Empire style above the main entrance. In 1935 the church was de-

Pyrohoshcha Church of the Mother of God

stroyed by the Soviet authorities so that a public square could be expanded. In the latter half of the 1970s the foundations of the old church were excavated, and the question of rebuilding the church in its original form was raised.

Pyrola (Ukrainian: *hrushanka*). Perennial grasses of the family Pyrolaceae. In Ukraine *P. rotundifolia* and *P. minor* grow in the forest zone in mossy, coniferous, and mixed forests. They are occasionally grown as decorative ground covers in shady areas of parks. Extracts of *P. chimaphila umbellata* were used to treat urinary bladder infections.

Pysanka. See Easter egg.

Heorhii Pysarenko

Lev Pysarzhevsky

Pysarenko, Heorhii (Yurii), b 12 November 1910 in Poltava. Scientist in the field of mechanics and strength of materials; full member of the AN URSR (now ANU) since 1964 and of the International Academy of Astronautics since 1977. He graduated from the Gorkii Industrial Institute (1936) and worked at the ANU Institute of Mechanics (1939–51) and the ANU Institute for Problems of Materials Science (1951–66). He was director of the ANU Institute for Problems of the Strength of Materials (1966–88) and taught at the Kiev Polytechnical Institute. He also served as the first scientific secretary (1962–6) and vice-president (1970–8) of the ANU. His main scientific contributions are in the field of mechanical vibrations and in various areas of the theoretical study of the strength of materials.

Pysarenko, Leonid, b 10 March 1907 in Znamianka, Oleksandriia county, Kherson gubernia, d 23 January 1979 in Kiev. Scenery designer. In 1931–6 he studied at the Kharkiv Arts Institute (pupil of B. Kosariv). Then he designed scenery (mostly monumentalist) for over 80 drama, opera, and ballet productions in Kiev, Lviv, Kharkiv, and Zaporizhia. He also created the panel *Science* in the House of Culture in Sutysky, Tyvriv raion, Vinnytsia oblast (1965).

Pysarevsky, Leonid. See Zymny, Leonid.

Pysarevsky, Stepan [Pysarevs'kyj] (pseud: Stetsko Shereperia), b 1780s, d 3 February 1839 in Vovchanske, Slobidska Ukraine. Writer. He studied at Kharkiv College and served as a priest in Kharkiv, Bohodukhiv, and Vovchanske. He began to publish in 1813. Pysarevsky set some of his poems to music, and they became popular folk songs ('Za Neman' idu' [I'm Going beyond the Neman], 'De ty brodysh moia dole?' [Where Are You Roaming, My Fate?]). He contributed to the almanacs *Snip* and *Lastivka*. He wrote an operetta, *Kupala na Ivana* (On St John's Eve, 1840), which I. Ozarkevych reworked and retitled *Vesillia, abo Nad tsyhana Shmahaila nema rozumnishoho* (The Wedding, or There's No One Smarter Than Shmahailo the Gypsy), and for which M. Verbytsky composed the music.

Pysarzhevsky, Lev [Pysarzhev's'kyj], b 13 February 1874 in Kishinev, Bessarabia, d 23 March 1938 in Dnipropetrovske. Inorganic and physical chemist; VUAN/AN URSR (now ANU) full member from 1925; corresponding member of the USSR Academy of Sciences from 1928 and full member from 1930. A graduate of the university in Odessa (1896; M SC, 1903), he was a professor at Yurev (Tartu) University (1904–8), the Kiev Polytechnical Institute (1908–11), and the Katerynoslav (now Dnipropetrovske) Mining (1913–30) and Chemical Technology (1930–2) institutes. He cofounded and directed the Ukrainian Physical-Chemical Institute in Dnipropetrovske (1927–34), the Tbilisi Chemical Research Institute (1929–31), and the ANU Institute of Physical Chemistry in Kiev (1934–8), which is named in his honor. Pysarzhevsky studied the structure and properties of peroxides and peracids, the influence of solvents on chemical equilibria, the free energy of reactions, and electronic concepts of chemistry in all their ramifications. His work played a significant role in establishing the current views on the nature of chemical bonding and chemical reaction mechanisms, with particular emphasis on the electronic theory of heterogeneous

catalysis. He wrote over 90 papers, monographs, and textbooks. His book on elementary chemistry (1926) introduced a holistic view of chemistry from the standpoint of electronic interactions. Editions of his selected works were published in 1936, 1955, and 1956. Since 1964 the ANU has awarded the Pysarzhevsky Prize for outstanding contributions to chemistry or chemical technology. A biography, by K. Yatsymyrsky and R. Kostrova, was published in Kiev in 1979.

S. Trofimenko

Pysemsky, Hryhorii [Pysems'kyj, Hryhorij], b 7 February 1862 in Pyriatyn, Poltava gubernia, d 25 July 1937 in Kiev. Obstetrician and gynecologist. A graduate of Kiev University (1888), he served as a lecturer at Kiev University (1905–13); professor at Moscow University (1913–15), the Kiev Medical Institute (1921–30), and the Kiev Institute for the Upgrading of Physicians (1930–7); and scientific director of the Kiev Institute for the Protection of Maternity and Childhood (1930–7). He organized the first consultation office for pregnant women in Kiev and presided over the Ukrainian and the Kiev scientific societies of obstetricians and gynecologists. He wrote over 70 works dealing with the innervation of the womb, problems of operative gynecology and oncology, postnatal complications, and the organization of obstetric aid.

Pysh, Symeon [Pyž], b 14 February 1894 in Vapenne, Gorlice county, Galicia, d 10 June 1957 in Yonkers, New York. Lemko activist. After spending most of the First World War in an Austrian internment camp and an Italian POW camp, he studied law at Charles University in Prague (PhD, 1922). He emigrated to the United States in 1923 and became editor of *Pravda*, the weekly organ of the Russian Brotherhood Organization. He helped found the *Lemko Association and in 1934 was appointed editor of its newspaper *Lemko* in Cleveland and then *Karpats'ka Rus'* in Yonkers. His *Short History of Carpatho-Russia*, originally printed in 1938, appeared in English translation in 1973.

Pyshkin, Borys [Pyškin], b 3 September 1893 in Kazan, Russia, d 29 January 1970 in Kiev. Scientist in the field of hydrotechnology; corresponding member of the AN URSS (now ANU) from 1951. He graduated from the Moscow Agricultural Academy (1924), worked at the ANU Institute of Hydrology and Hydrotechnology (from 1948, now the Institute of Hydromechanics), and taught at Kiev University (from 1962). He contributed to research on the mathematical modeling of dynamics of large bodies of water, processes of wave formation, erosion by waves on shores and shore structures, and methods of preventing wave-caused erosion.

Pysklyvy, Ivan [Pysklyvyj], b ? in Dohopillia, Pokutia, d 1705 in Stanyslaviv. Leader of a band of *opryshoks in the Hutsul region from 1701. In 1703 the band attacked the nobles and usurers in the town of Kolomyia and the villages of Otnia, Bereziv, Vorona, Zabolotiv, and Nezvyshko, and in 1704 it joined *Pyntia's band to attack Kosiv. Pysklyvy was captured by the Poles and executed.

Pysmenna, Larysa [Pys'menna], b 11 February 1914 in Chopovychi, Radomyshl county, Kiev gubernia. Writer. She worked as head of the literature editorial office at the

Larysa Pysmenna

Veselka publishing house. She began publishing in 1931 and has written numerous books of stories and fables for children, including *Iak u Chubasyka smikh ukraly* (How Chubasyk Had His Laughter Stolen, 1965), *Charivnyk na tonkykh nizhkakh* (A Sorcerer on Thin Little Legs, 1972), *Skarb vovchoi krynytsi* (The Treasure of the Vovcha Spring, 1975), *Ne za synimy moriamy* (Not beyond Blue Seas, 1980), and *Tysiacha vikon i odyń zhuravel'* (A Thousand Windows and One Crane, 1984). Pysmenna has also written prose for teenagers and young adults: such collections as *Khochete prozhyty dvisti rokiv?* (Do You Want to Live 200 Years?, 1972), *Nenapysanyi portret* (The Unpainted Portrait, 1979), and *Lina* (1983), and the novels *Zlochyn Nadii Polishchuk* (The Crime of Nadiia Polishchuk, 1964), *Palats bez stin* (A Palace without Walls, 1965), *Zhyvoi zustrichaiut' svitanok* (The Living Greet the Dawn, 1969), and *Bat'ko* (Father, 1978). She was awarded the Lesia Ukrainka Prize in 1984. A book of her reminiscences, *Choho ne znau erudyt* (What the Erudite One Did Not Know), was published in 1989.

Pysmenny, Oleksii [Pys'mennyj, Oleksij], b and d ? Haidamaka leader of Polish origin. He organized a rebel detachment of Zaporozhians during the 1750 haidamaka uprising. The group was active in Right-Bank Ukraine until it was broken up during a skirmish with a Polish punitive expedition near the town of Vilshana. Pysmenny's further fate is unknown.

Pys'mo do hromady (Letter to the Community). A political and literary newspaper for peasants, published in Lviv and edited by S. Shekhovych. A single issue appeared in 1863. The newspaper reappeared as a semi-monthly in August 1864 (1864–5 and 1867–8; a total of 90 issues). It contained popular educational and religious articles, community news, and belles lettres by writers such as H. Barvinok, M. Vovchok, S. Rudansky, L. Hlibov, I. Naumovych, and M. Ustyianovych.

Pys'mo z Prosvity (Writing from Prosvita). The title of three organs of the *Prosvita society in Lviv. All of them contained practical information and advice on farming and animal husbandry, reports on the activities of the Prosvita society throughout Galicia, poetry, and prose. The first appeared monthly from October 1877 to May 1879 and was edited by A. Vakhnianyn and, from 1878, O. Partytsky. In 1894 Prosvita took over publication of the

semimonthly *Chytal'nia* (est 1893) from the Dnister insurance company and published it as *Chytal'nia – Pys'mo z Prosvity* until the end of 1896, under the editorship of K. Pankivsky. In 1907–8 *Pys'mo z Prosvity* reappeared as a monthly edited by Ya. Vesolovsky and then H. Khotkevych. From 1909 to 1914 it was a semimonthly edited by Yu. Balytsky. Publication was interrupted by the First World War, although an issue edited by V. Lukych appeared in 1916. From December 1921 to the end of 1922 the periodical was a semimonthly edited by V. Doroshenko.

Pyvorizy. See Itinerant tutors.

Pyvovariiv, Mykola, b ? , d 1935 in Vinnytsia. Church figure. He was a bishop of the Ukrainian Autocephalous Orthodox church (UAOC) in Kamianets-Podilskyi from 1922. From 1924 he headed the Active Church of Christ, a dissident faction of the church, before returning to good standing with the UAOC in 1927. Pyvovariiv was arrested in 1929, together with 45 other priests and believers, and imprisoned in Siberia. He was released in 1934 because of illness, and he returned to Ukraine and died shortly thereafter.

Hryhorii Pyvovarov:
Portrait of Oleksander
Dovzhenko (bronze, 1940)

Pyvovarov, Hryhorii, b 22 March 1908 in Lohvytsia, Poltava gubernia, d 15 May 1942 in Kerch, Crimea. Sculptor. He studied at the Kiev State Art Institute (1926–31) and was a member of the Union of Young Artists of Ukraine (1928–31). He sculpted plaster portraits of T. Shevchenko (1936), I. Franko (1939), and O. Dovzhenko (1940); collaborated with Yu. Bilostotsky and E. Fridman on the multifigural compositions *Socialist Agriculture* and *Socialist Industry* for the Ukrainian pavilion at the Exhibition of the Achievements of the National Economy in Moscow (1937); and created granite monuments to Komsomol heroes in Trypilia (1934–6), to Soviet heroes of the stratosphere in Donetsk (1938), and to M. Shchors in Shchors (1939).

Pyziur, Eugene [Pyzjur, Jevhen], b 16 April 1917 in Belzets, Rava Ruska county, Galicia, d 13 March 1980 in St Louis, Missouri. Political scientist and community figure; full member of the Ukrainian Academy of Arts and Sciences in the US and member of the Shevchenko Scientific Society. He studied law at the Universities of Lviv (1936–9) and Vienna (1942–5). While in Vienna, he headed the *Sich student society (1943–4) and *Nationalist Organization of Ukrainian Students in Germany (1944). As a post-war refugee in Germany he was a member of the executive of the *Central Union of Ukrainian Students (1945–8) and editor of its *Students'kyi visnyk*, and he continued his studies at the Ukrainian Free University in Munich (1947–8; LLD, 1949). After emigrating to the United States, he studied political philosophy at Columbia University (1954) and the University of Notre Dame (1957–8; PH D, 1961). In 1961 he joined the Department of Political Science at St Louis University, and from 1965 he was also an associate and editor of the *Lypynsky East European Research Institute in Philadelphia. Pyziur is the author of *The Doctrine of Anarchism of Michael A. Bakunin* (1955) and articles in Ukrainian émigré and American periodicals on Soviet agricultural policy (1952), D. Chyzhevsky (1955), the ideas of B. Kistiakovsky (1958), M. Drahomanov (1966), and M. Katkov (1967), T. Shevchenko and E. Burke (1980), Soviet nationality policy, and Marxist ideology.

Q

Giacomo Quarenghi: architectural rendering of the new Transfiguration Cathedral in Novhorod-Siverskyi (ca 1790)

Quarenghi, Giacomo, b 20 or 21 September 1744 in Valle-Imania, near Bergamo, Italy, d 2 March 1817 in St Petersburg. Italian architect. From 1780 he worked in the Russian Empire, where he built palaces and public buildings in the Empire style in St Petersburg and Peterhof. In Ukraine he built the cathedral of the Novhorod-Siverskyi Transfiguration Monastery (1796), the cathedral in Kremenchuk (1790s), and Count P. Zavadovsky's palace in Lialychi, Chernihiv gubernia (1780s to 1790s). The Ukrainian architect A. Melensky was taught by Quarenghi.

Quarrying. A branch of the *building-materials industry that mines and processes sand, blocks, gravel, and stone slabs. These products are used in the construction, road-building, and other industries. In Ukraine most quarries are located in the *Ukrainian Crystalline Shield. Quarrying has been practiced in Ukraine for centuries, but it emerged as a major industry only in the 20th century. From 1940 to 1980 the total output of quarries in Ukraine increased from 3.2 million sq m to approx 170 million sq m. The major products of the industry are gravel, stone, and *granite, which is used as decorative facing.

Quince (*Cydonia oblonga*; Ukrainian: *aiva zvychaina*). A fruit tree of the family Rosaceae, native to the Crimea,

Iran, and Turkey. In Ukraine it is also cultivated in the south, in Transcarpathia, and in Chernivtsi oblast. It grows in a dwarf form and a tall form. Several Ukrainian varieties exist. The aromatic fruit is sweetish sour and contains 5–15 percent sugars, approx 1 percent organic acids, and less than 1 percent pectin. It is processed for consumption as preserves, jelly, compote, marmalade, and candied peels. Quince is often used as a stock for the grafting of *pear.

Quitrent. Feudal rent paid in kind or money by landless peasants, townspeople, and other free persons for the use of royal-, state-, church-, and gentry-owned farmlands, pastures, forests, ponds, hunting places, mills, shops, and other properties in perpetuity. Quitrent replaced *tribute as the main form of peasant exploitation in the late Middle Ages. In Polish- and Lithuanian-ruled Ukraine from the 14th century, peasant households paid quitrents in grain, honey, furs, livestock, food, and money. They had several names: *chynsh* (from German *Zins*, from Latin *census*), *podymne* (quitrent paid by each **dym*), *serebshchyna* (from *srebro* 'silver,' quitrent in silver coins), *ordynshchyna* (from *orda* 'horde,' originally tribute paid to the Golden Horde), *poholovshchyna* (from *holova* 'head,' a form of poll tax), and *povolovshchyna* (from *vil* 'ox,' quitrent in livestock). Their amounts were regulated by a *chynsh* law and custom and varied from place to place. After the **voloka* land reform of 1557 and the imposition of *serfdom the use of quitrents declined and was replaced by the more oppressive *corvée*. *Chynsh* was revived on the vast colonized estates of the Polish magnates in Right-Bank Ukraine in the late 17th century. Economic relations based on *chynsh* law were maintained in the Polish-dominated territories annexed by the Russian Empire.

In Russian gubernias where the soil was poor, more peasants (60 percent in the mid-19th century) paid quitrent (called *obrok*) than performed *corvée*. From 1724 the tsarist state imposed an *obrok* tax on state peasants in addition to the *poll tax. In the black-earth Ukrainian gubernias, the *obrok* tax was paid by most state peasants (44 percent of all peasants in 1860). Only a small minority (1.2 percent in 1858) of the gentry-owned serfs paid cash *obrok* to their owners; the vast majority performed *corvée* instead. After the abolition of serfdom in the Russian Empire in 1861, peasants continued paying *obrok* for the land they received until it was replaced by *redemption payments in 1886. In Western Ukraine the emancipated peasants paid *chynsh* for *servitudes until the 1939 Soviet occupation.

R. Senkus

R

Rabbit (*Oryctolagus cuniculus*; Ukrainian: *kril*, also *zaiats* or *zaiets*). The Old World rabbit, also known as the European or true rabbit. Along with the cottontail rabbit (*Sylvilagus*) and other genera, it belongs to the family Leporidae (rabbits and *hare) of timid and swift, long-eared, small gnawing mammals. The ancestor of the domestic rabbit, the gregarious Old World rabbit is found in the wild in southwestern Ukraine. It is widely hunted for its flesh and fur; in some places it is exterminated as a serious agricultural pest. Domestic rabbits, of which there are many breeds and varieties, are kept as pets and as fur, meat, and laboratory animals. Research on *rabbit breeding is co-ordinated by the Scientific Research Institute of Animal Husbandry of the Forest-Steppe and Polisia, in Kharkiv. The rabbit is a popular character in *children's folklore.

Rabbit breeding. A branch of *animal husbandry that raises rabbits for meat, fur, and down and for use as scientific laboratory animals. Because rabbits require relatively little attention and feed, multiply quickly, and yield high-quality meat and fur, their breeding is economically efficient and profitable. In Ukraine up to 90 percent of all rabbits are raised privately by peasants and workers. Large-scale commercial rabbit breeding was introduced only in the late 1920s, and today there are about 500 rabbit farms, primarily in the Crimea but also in Cherkasy and Kherson oblasts. Production of rabbit meat, which is concentrated in Poltava and Cherkasy oblasts, increased from 37,000 t in 1960 to 67,000 t in 1987. In 1961, 26.4 million pelts were produced in Ukraine (45 percent of the entire USSR production). In 1985 about 10.6 million rabbits were bred in Ukraine. (See also *Rabbit.)

Yuliiian Rabii

Rabii, Yuliiian [Rabij, Julijan], b 5 January 1894 in Sambir, Galicia, d 17 November 1982 in Utica, New York. Lawyer and civic leader. He acted as defense counsel at many political trials and founded various local organizations, such as the Sokil sports club, the Knyzhka library, a branch of the Lysenko Music Society in Lviv, the Boian

singing society, and the Banduryst wind orchestra. In 1944 he fled from Ukraine to Germany, and in 1951 he emigrated to the United States. He contributed many articles to the Ukrainian press based on his recollections and wrote the monograph *Sambirs'ka Bohorodytsia* (The Sambir Mother of God, 1970).

Rabotnik (Worker). The first legal Bolshevik newspaper in Ukraine. Two issues appeared in Russian in Kiev in June 1906, before the newspaper was closed down by the authorities.

Rabynovych, Zinovii [Rabynovyč, Zinovij], b 1 August 1918 in Kiev. Computer scientist. He graduated from the Kiev Polytechnical Institute (1941) and worked in industry, at the AN URSR (now ANU), and, from 1957, at the ANU Institute of Cybernetics as a department head. His main contributions are in the field of the theory of digital computers. He was one of the creators and the main designer of the first Soviet digital computer (the *MEOM).

Race (*rasa*). A biological grouping of a breeding population of individuals with certain genetically transmitted characteristics. It is not the uniformity but the comparative frequency of the appearance of inherited characteristics which defines a population as a racial group. The idea of race is statistical in principle in that it describes the characteristics of a population and not necessarily its individual members, and the diversity within a racial group is enormous. The markers used in identifying various races of humans are skin color, eye cast, hair form and bone structure, blood type, and so on. At present three general racial groups are recognized: the Mongoloid race, the Caucasoid race, and the Negroid race.

In broad terms Ukrainians are of the Caucasoid or Europoid race, with a wide range of skin color, from pale alabaster white to shades of brown. Eyes vary from the northern light blue to the dark brown to black of the Mediterranean inhabitants. The hair is usually soft, straight or wavy, its color ranging from light blond to raven black. The structure of the nose varies from high and narrow to broad and snub; the lips are usually thin. Both sexes have relatively large amounts of body hair, and men grow heavy beards. Although typically Slavic in general, Ukrainians show a wide range of the aforementioned characteristics as a result of the centuries of turmoil and the influence of nomadic nations in their ethnic territory (see *Physical anthropology).

More precisely, the current structure of the Ukrainian population reflects the following distribution of racial formations: (1) the Nordic-sub-Nordic race, found in the territory of Podlachia, Polisia, Volhynia, and Zhytomyr, and then down towards the southern Kiev, Poltava, and Dni-propetrovske regions, with some islands in Ivano-

Frankivske oblast and in the Prut River basin; (2) the Dinaric race, predominant in Subcarpathia and Transcarpathia, western and central Galicia, Podilia, and the Kholm region, with some penetration into Kiev oblast (Alpinian traces are found in some Transcarpathian zones, in the Podilia and Kiev regions; and definite Armenoid characteristics appear along the crests of the Carpathian Mountains in the area inhabited by Hutsuls, down to Bukovyna); (3) the Alpinian-Lappanoid race, predominant in the Kharkiv, Poltava, Sumy, and Chernihiv regions; (4) the sub-Lappanoid races, characteristics of which are found in the Donbas and southern steppe zones, with some Alpinian admixtures; (5) the Mediterranean race, which appears in the territory between the Prut and Dniester rivers, south to Zalishchyky. These five groups are the results of complex processes which began in pre-historic times with the *Trypilian culture. (See also *Anthropological studies.)

I. Masnyk

Rachmaninoff, Sergei [Raxmaninov, Sergej], b 1 April 1873 in Oneg, Novgorod gubernia, d 28 March 1943 in Beverly Hills, California. Russian composer, pianist, and conductor. He studied at the St Petersburg Conservatory in the theory and harmony class of Ukrainian musicologist O. Rubets (1882–5) and frequently appeared as pianist and conductor in Kiev, Kharkiv, and Odessa before emigrating to the United States after the revolution. Several of his works contain conspicuous Ukrainian elements; they include a setting of the Ukrainian folk song 'Choboty' (Boots) for mixed chorus a cappella (1899), a fragment for vocal quartet titled 'Mazepa' (ca 1890, lyrics based on Pushkin), the symphonic poem *Prince Rostyslav* (1891), and transcriptions of Mussorgsky's 'Hopak' dance from *Sorochyntsi Fair*. He also composed three songs for solo voice with piano to Russian versions of poems by T. Shevchenko – 'The Days Pass By' or 'Duma,' 'Soldier's Wife,' and 'Again I Am Alone.' Some of his works are influenced by or contain ancient ritualistic chants of the Kievan Cave Monastery, among them the *Third Piano Concerto* (First Movement, opening theme), the *Sacred Liturgy of St John Chrysostom* (1910), and *Vespers Service* (1915).

Rachynsky, Andrii [Račyns'kyj, Andrij], b 24 November 1724 in Velyki Mosty, Sokal county, Galicia, d 1794 in Novhorod-Siverskyi. Composer and conductor. He studied at the Collegium in Lviv, where he also conducted the archbishop's kapelle for three years. In 1753 he started working at the court of Hetman K. Rozumovsky, where he founded the Hlukhiv Music Library and introduced Italian music in Left-Bank Ukraine. In 1761–2 he became a chamber musician at the court of Peter III, and in 1763 he was made captain of the Novhorod-Siverskyi company. During the next 30 years he made numerous trips throughout Ukraine recruiting promising young singers for court service. His works include the sacred vocal concertos *Radutesia Bohu, pomoshchnyku nashemu* (Rejoice in God, Our Helper) and *Vozliubykh Tia, Hospody* (Loving Thee, O Lord).

Rachynsky, Havrylo [Račyns'kyj], b 1777 in Novhorod-Siverskyi, d 11 April 1843 in Novhorod-Siverskyi. Composer, violinist, guitarist, and pedagogue; son of A. Rachynsky. At an early age he was taught to play the vio-

lin by his father. In 1789–95 he probably studied with A. Vedel at the Kiev Academy, and in 1795–7 he studied in Moscow, where he subsequently taught advanced music until 1805. Beginning in 1808 he concertized throughout Ukraine. He was one of the first Ukrainian musicians to embark on a career as a concert artist. From 1823 to 1840 he lived in Moscow. His works consist mostly of songs, romances, variations, and arrangements of Ukrainian folk songs. His best-known set of variations is on the song 'Viit' vitry, viit' buini' (The Wild Winds Blow).

Rada. The Ukrainian term (equivalent to council) for a representative state governing body or the leading body of a party, organization, or institution. The term has been used since the medieval period: it was applied to the Boyar Council in Kievan Rus' and the Council of Lords in the Grand Duchy of Lithuania. The Cossack host and state had radas: the Sich Council, the General Military Council, and the Council of Officers.

The representative national congress of the people of Galicia in 1848 was called the Supreme Ruthenian Council, and the political representation of Ukrainians in Austria in 1914 was known as the Supreme Ukrainian Council. After the Revolution of 1917 the highest representative bodies and government agencies in Ukraine were the Central Rada and the Ukrainian National Rada.

All-Ukrainian councils of peasants', workers', and soldiers' deputies were formed in Kiev in 1917 to represent certain segments of the population, and in December 1917 they convened the All-Ukrainian Congress of Workers', Soldiers', and Peasants' Deputies. The Peasant Association–Ukrainian Party of Socialist Revolutionaries bloc set up its own radas in volosts, counties, and villages in 1918–19 as organs of local government. In Transcarpathia in 1918–19 local people's radas and the Central Ruthenian People's Council were formed to decide the fate of the region. A similar body, the American Ruthenian National Council, was organized by émigrés in the United States.

In the civic and legal context a rada is a representative body. Some examples include the National Council of Ukrainian Women, the Ukrainian National Council (émigré political center), and the Ukrainian Supreme Liberation Council. The State Popular Council and the Council of the Republic were conceived in 1920–1 as advisory bodies of the UNR government, which was run by the Council of National Ministers.

In 1917–18 the Bolsheviks used the abbreviated form Rada instead of Central Rada in their official documents and press. They called their own regime and its governing organs 'soviet' at first. Only in 1919 did they begin to use the Ukrainian term rada and its adjective *radianskyi* for their ruling organs. They applied the adjectives *radiivskyi* and *radiivtsi* to the Central Rada. Since 1920 the Ukrainian term rada has been generally accepted as the name for 'soviets' at every level. On 6 January 1919 Soviet Ukraine adopted the official name of the Ukrainka Sotsialistychna Radianska Respublika. Yet in other languages the term was commonly translated from the Russian as, for example, Soviet Ukraine or L'Ukraine soviétique. In Western Ukraine (before 1945) and among Ukrainians abroad the terms Soviet and *sovietskyi* were preferred to rada and *radianskyi* in identifying Soviet Ukrainian institutions, because they imply the non-Ukrainian origin of the institutions.

O. Ohloblyn, M. Stakhiv

Rada, pt 1 (1883)

Rada (Council). A Ukrainian almanac edited and published by M. Starytsky in two volumes in Kiev in 1883–4. It included poetry by Starytsky, Chaichenko (B. Hrinchenko), Bobenko (A. Bibik), M. Sadovsky, Khrushch (O. Afanasiev-Chuzhbynsky), Ya. Shchoholiv, P. Ratai (P. Kulish), and others; I. Nechui-Levytsky's famous novel-ette 'Mykola Dzheria'; the first two of four parts of P. Myrny's classic realist novel 'Poviiia' (Loose Woman); stories by O. Pchilka, D. Mordovtsev, Bobenko, Hnat Kary (I. Tobilevych), Lopukh (A. Hrabenko), H. Barvinok, P. Myrny, and T. Alatonchenko; Starytsky's drama 'Ne sudylos'' (It Was Not Destined); V. Vasylenko's article on peasant associations; a demonological sketch by H. Desiatyn (H. Lukianov); and M. Komarov's pioneering bibliography of Ukrainian literature (1798–1883) with addenda.

The editors of *Rada* in 1908. Sitting, from left: O. Kuzmysky, Spyridon Cherkasenko, Leonyd Pakharevsky, Yevhen Chykalenko, Hryhorii Sherstiuk, Serhii Yefremov, Fedir Matushevsky; standing: Maksym Hekhter, Prokip Poniatenko, Mykola Vorony, Metodii Pavlovsky, P. Hai, P. Sabaldyr, S. Panasenko, Oleksander Oles

Rada (Council). A political and cultural newspaper published in Kiev from September 1906 to August 1914. In that period it was the only Ukrainian-language daily in tsarist-ruled Ukraine. *Rada* succeeded the banned daily **Hromads'ka dumka*. It was published by B. Hrinchenko and, from 1907, by Ye. Chykalenko, who provided most of the funding. Some capital investment came from V. Symyrenko, V. Leontovych, P. Stebnytsky, M. Komarov, P. Pelekhin, and L. Zhebunov. Although officially nonpartisan, from 1908 *Rada* reflected the political views of the **Society of Ukrainian Progressives*, to which Chykalenko and

many of the contributors belonged. Its chief editors were F. Matushevsky, M. Pavlovsky (1907–13), and A. Nikovsky. The editorial secretaries were S. Petliura, V. Koroliv-Stary, and P. Sabaldyr (Maiorsky). From 1907 the paper also had several section editors: D. Doroshenko (to 1909, developments in Ukraine), L. Starytska-Cherniakhivska (developments in the Russian Empire), M. Lozynsky (foreign developments), H. Sherstiuk (education), M. Hekhter (socioeconomic affairs), and B.-V. Yaroshevsky and occasionally V. Lypynsky (developments in Poland). Its prominent contributors were H. Chuprynka, P. Chyzhevsky, V. Domanytsky, V. Doroshenko, S. Draho-manov, V. Durdukivsky, I. Dzhydzhora, I. Franko, M. Hrinchenko, M. Hrushevsky, P. Kapelhorodsky, H. Kovalenko, M. Kotsiubynsky, M. Levytsky, O. Lototsky, I. Lypa, Ya. Mamontov, O. Oles, L. Padalka, V. Pismanchevsky, M. Porsh, V. Prokopovych, O. Rusov, V. Samiilenko, S. Shelukhyn, K. Shyrotsky, V. Stepankivsky, H. Stepura, M. Trotsky, Yu. Tyshchenko, S. Vasylychenko, M. Vorony, V. Vynnychenko, A. Yakovliv, and A. Zhuk. By providing news from all the Ukrainian lands and responding to all political and cultural developments, *Rada* played a key role in the crystallization of a nationally conscious Ukrainian intelligentsia. Because of persistent tsarist interference and persecution as well as frequent fines and confiscations of issues, it was able to print only 3,000 to 5,000 copies and had no more than 2,000 subscribers. Three days after the Russian Empire entered the First World War, the paper was shut down. It was revived after the February Revolution under the title **Nova rada*.

V. Pavlovsky

Rada (Council). A newspaper published weekly, semi-weekly, and then three times a month in Lviv from August 1925 to 1934. It succeeded **Nash prapor* (1923–4), *Prapor* (1924), and *Ukrains'ka rada* (1924–5) as the organ of the 'Independent Group' in the **Ukrainian Labor party*. Soon afterward it became an organ of the **Ukrainian National Democratic Alliance*. From 1927 it was the organ of the Sovietophile **Ukrainian Party of Labor* and reported favorably on nation-building efforts in the Ukrainian SSR. It was edited by H. Myketei, V. Budzynovsky (1927–30), and L. Petrushevych. In 1930 *Rada* had a pressrun of 1,500.

Rada (Council). A weekly newspaper published, with interruptions, from January 1934 to the end of 1935 and from early 1937 to February 1938 in Chernivtsi. It carried regular reports on Ukrainian life in Western and Soviet Ukraine and abroad, devoted considerable attention to international affairs, and supported the **Ukrainian National party* in Bukovyna. The editor and main contributor was Yu. Serbyniuk.

Rada of State Secretaries of the Western Ukrainian National Republic. See State Secretariat of the Western Ukrainian National Republic.

Rădăuți (Ukrainian: Radivtsi). VI-6. A town (1965 pop 18,800) on the Toplița River in Rumania. It is one of the oldest towns in Bukovyna: references to it in historical documents begin in the 14th century. The western part of Rădăuți county is part of Ukrainian ethnic territory. In 1930 over 26,000 Ukrainians lived in the county, where they accounted for 16 percent of the population.

Radchenko, Andrii [Radčenko, Andrij], b 30 October 1887 in Parafiivka, Pryluka county, Poltava gubernia, d 20 January 1938. Bolshevik revolutionary and Soviet official. In 1912 he left the Mensheviks, whom he had supported from 1904, and joined the Bolsheviks. In 1917–18 he chaired the Druzhkivka Council of Workers' and Soldiers' Deputies in the Donbas and then did political work in the Red Army. From 1920 he worked in the Party and the trade unions and rose to the position of secretary of the Donetske Gubernia Party Committee (by 1924), chairman of the All-Ukrainian Trade Union Council (1925–8), and vice-chairman of the All-Union Central Trade Union Council. During this time he was a member of the CC and Politburo of the CP(B)U. He disappeared in Stalin's purges of the late 1930s.

Radchenko, Klavdiia [Radčenko, Klavdija], b 14 December 1929 in Bila Tserkva. Opera singer (lyric soprano). After graduating from the Kiev Conservatory in 1956, she joined the Kiev Theater of Opera and Ballet as a soloist. She has appeared as Oksana in S. Hulak-Artemovskiy's *Zaporozhian Cossack beyond the Danube*, Natalka in M. Lysenko's *Natalka from Poltava*, Tatiana in P. Tchaikovsky's *Eugene Onegin*, Eurydice in C. Gluck's *Orpheus and Eurydice*, Marguerite in C. Gounod's *Faust*, Halia in K. Dankevych's *Nazar Stodolia*, and Mylana in H. Maiboroda's *Mylana*. She sang in concerts as well as in opera.

Radchenko, Oleksander [Radčenko], b 20 August 1894 in Lohkhyvtisia, Poltava gubernia, d 20 January 1975 in Lviv. Composer, conductor, and pedagogue. After studying at the Odessa Music School and conservatory (1911) he was an army concertmaster (1913–23). He subsequently (1923–30) organized and conducted independent orchestras in Odessa before becoming the music director of the Ukrainian State Theater of Drama in Zaporizhia (1931–41) and Lviv (1944–60). He composed incidental music to almost 500 plays, including T. Shevchenko's *Haidamaky*, M. Kropyvnytsky's *Nevol'nyk* (The Slave), M. Starytsky's *Marusia Bohuslavka*, and W. Shakespeare's *Othello* and *King Lear*. His other works include military marches, symphonic and choral pieces, and arrangements of Ukrainian folk songs.

Radchenko, Petro [Radčenko], b 14 July 1902 in Kiev, d 19 July 1942 in Kiev. Writer. He worked as a teacher and book editor, as managing secretary of the Kiev Komsomol journal *Molodyi bil'shovyk*, and, in the late 1930s, as a secretary and department head of the paper *Literaturna hazeta*. A member of the writers' organizations Molodniak and the All-Ukrainian Association of Proletarian Writers, he began publishing stories in 1925 and produced the novellettes *Skrypka* (The Violin, 1928) and *Zalizni shory* (Iron Blinders, 1932; 2nd edn 1955) and the story collection *Chornyi khlib* (Black Bread, 1931). A Soviet partisan during the Second World War, he was tortured to death by the Gestapo.

Radchenko, Serhii [Radčenko, Serhij], b 16 October 1880 in Konotip, Chernihiv gubernia, d 13 September 1942. Hygienist. A graduate of Kiev University (1907), he worked in factories and zemstvos in the Kiev region. He served as director of the county health department in Bila Tserkva (1920–4), a research associate of the Kiev Medical

Institute (1924–9), and head of its social hygiene department (1929–41). His publications dealt with the history of *zemstvo medicine in Ukraine, the problems of providing health care for peasants, and sanitation education.

Radchenko, Viktor [Radčenko], b 24 December 1907 in Kiev, d 31 January 1961 in Kiev. Cameraman. He completed study at the Kiev Institute of Fine Arts (1930) and the Kiev Institute of Cinema (1932). In 1931 he began to produce popular science films at the Kiev Artistic Film Studio, some of which received awards at world cinema festivals in Karlovy Vary (Czechoslovakia, 1948) and Montevideo (Uruguay, 1957).

Radchuk, Fedir [Radčuk], b 2 January 1899 in Okunyn, Volodymyr-Volynskiy county, Volhynia gubernia, d 2 October 1986 in Kharkiv. Stage and film character actor. He completed study in the drama school at the Kiev Society of Folk Theater and Art (1921) and then worked in the Shevchenko First Theater of the Ukrainian Soviet Republic (1921–2) and Berezil (1922–34, from 1935 the Kharkiv Ukrainian Drama Theater). He also appeared in the films *Fata morgana* (1931) and *Kyjanka* (The Kiev Girl, 1958).

Radekhiv [Radexiv]. III-5. A city (1989 pop 8,900) and raion center in Lviv oblast. It was first mentioned in historical documents in 1493, when it was under Polish rule. It was granted the rights of *Magdeburg law in 1752. After the partition of Poland in 1772, Radekhiv belonged to Austria, was ruled by Poland (1919–39), and finally became part of the Ukrainian SSR (1939). Radekhiv has a building-materials factory, a dairy, and a brewery.

Radians'ka Bukovyna (Soviet Bukovyna). An organ of Chernivtsi oblast's CPU Committee and Soviet, published five times a week in Chernivtsi in 1940–1 and from 1944. In 1980 it had a pressrun of 136,000.

Radians'ka Donechchyna (Soviet Donets Region). An organ of Donetske oblast's CPU Committee and Soviet, published five times a week in Donetske from July 1944. Until December 1945 it was called *Sotsialistychnyi Donbas*. In 1980 it had a pressrun of 59,000 copies. Its Russian-language parallel, **Sotsialisticheskii Donbass*, had a much larger pressrun.

Radians'ka kul'tura. See *Kul'tura i zhyttia*.

Radians'ka literatura. See *Vitchyzna*.

Radians'ka muzyka (Soviet Music). A music journal published in Kiev by the Union of Composers of Ukraine. A successor to the music journal **Muzyka*, it came out as a monthly in 1933–4 and a bimonthly in 1936–41. A total of 54 issues appeared. Its editors were A. Olkhovsky and O. Bilokopytov. The journal served as the ideological standard of the composers' union and tended to deal more with propaganda than with art.

Radians'ka osvita (Soviet Education). A popular pedagogical monthly and the organ of the People's Commissariat of Education of Ukraine and the Ukrainian Bureau of the Central Committee of Educational Workers. It was published in Kharkiv from 1923 under the formal editor-

ship of the commissar of education – V. Zatonsky, then O. Shumsky, and finally M. Skrypnyk. It served as a popular forum for the discussion of educational issues and played an important role in the Ukrainization of Ukrainian schools. In 1931 it merged with *Za politekhnichnu osvitu* to form *Politekhnichna shkola* (1932–4).

Radians'ka osvita (Soviet Education). A pedagogical and professional newspaper for teachers and educators, published twice a week in Kiev. Established in 1940, it was an organ of the People's Commissariat of Education of Ukraine and of the Central Committee of the Professional Union of Workers in Primary and Secondary Schools. In 1960 it became the organ of the Ministry of Education of Ukraine, the Ministry of Higher and Specialized Secondary Education of Ukraine, and the Ukrainian Republican Committee of Professional Workers in Education and Science. It publishes news about social-political events and highlights professional and pedagogical developments. Since 1992 it has been called *Osvita* and appears weekly.

Radianska Shkola (Soviet School). A publishing house established in 1919 as a subsection of the All-Ukrainian Publishing House in Kharkiv. In 1923 it was reorganized, placed under the jurisdiction of the People's Commissariat (later Ministry) of Education, and renamed *Shliakh Osvity*. It acquired its name in 1930. In 1934 it was moved to Kiev. The press supplies general and specialized textbooks, methodological guides for teachers, reference works and dictionaries, pedagogical journals and monographs, and books for children in Ukrainian. It also issues books and periodicals in Russian, Hungarian, Polish, Moldavian, English, German, and French. Periodicals published include the journals *Radians'ka shkola*, *Pochatkova shkola*, *Doshkil'ne vykhovannia*, *Ukrains'ka mova i literatura v shkoli*, and *Russkii iazyk i literatura v shkolakh USSR*, and the newspaper *Radians'ka osvita*. The press maintains editorial offices in Kharkiv, Lviv, Uzhhorod, and Chernivtsi. The largest publishing house in Ukraine, in the years 1966–75 it published 5,068 titles with a total pressrun of nearly 431 million copies. In 1978 it published 435 titles with a pressrun of 74.8 million copies.

Radians'ka shkola (Soviet School). A monthly pedagogical journal published by the Ministry of Education of Ukraine. It was founded in 1945 in place of *Shliakh osvity* (later *Komunistychna osvita*). The journal was devoted to articles on education administration, pedagogy, psychology, teaching methods and communist upbringing, professional training, and comparative education. In 1992 the journal was renamed *Ridna shkola*.

Radianska Ukraina (Soviet Ukraine). A publishing conglomerate of the CC CPU in Kiev, established in 1943. Its many printing plants produced 11 republican newspapers and 10 journals of the CPU and Komsomol, Kiev editions of 17 newspapers of the CC CPSU and USSR government in Moscow, 22 other journals, and specialized Russian-language publications for distribution in Ukraine.

Radians'ka Ukraina (Soviet Ukraine). A daily (six days a week) organ of the CC CPU and the Supreme Soviet and Council of Ministers of the Ukrainian SSR. It first appeared

in Kharkiv in 1919 as *Kommunist*, the Russian-language organ of the Central Executive Committee of the CP(B)U and Kharkiv gubernia (later okruha) Party Committee. From June 1926 the paper was published in Ukrainian as *Komunist*. It reached the height of its popularity during the *Ukrainization period of the latter half of the 1920s, when it and **Visti VUTsVK* were the leading political newspapers in the Ukrainian SSR. Edited by the former Borotbists M. *Liubchenko and T. *Taran, it published articles by Soviet Ukrainian journalists and writers (eg, P. Panch, M. Irchan, I. Mykytenko), leading Party and government officials in Ukraine, and Communist leaders in other republics and abroad. Under Stalinist rule, however, the paper was little more than a propaganda tool of the state. In 1930–2 it appeared seven days a week (359 or 360 issues a year), and it reached a circulation of 450,000 in 1932. It was used to push the collectivization drive and the First Five-Year Plan. In 1934 it was transferred to Kiev when that city was made the republic's capital. Later its editorial staff and correspondents were severely repressed; many, including Liubchenko and Taran, were imprisoned or shot. In 1938 A. Chekaniuk became editor, and he served in that capacity until 1943. In 1938 a parallel Russian-language version of the paper, *Sovetskaia Ukraina* (now **Pravda Ukrainy*), was established.

After *Visti VUTsVK* ceased publication in 1941, *Komunist* assumed its function as the organ of the Supreme Soviet. During the Second World War the paper was published in Voroshylovrad, Saratov, Moscow, and Kharkiv. It acquired its *Radians'ka Ukraina* name in February 1943 and returned to Kiev in 1944. The paper's pressrun rose from 400,000 in 1950 to 560,000 in 1977; from then it remained at approx 555,000. By contrast the pressruns of the Moscow papers *Pravda* and *Izvestiia* increased dramatically, in practice displacing republican organs such as *Radians'ka Ukraina* as the main source of information for Ukrainian readers. The central papers were larger (six pages vs four for the Ukrainian papers), distributed more effectively in Ukraine, and of a higher professional and intellectual quality. Unlike them, *Radians'ka Ukraina* did not have foreign correspondents, and devoted little attention to international affairs. In general the paper was politically conservative, even by Soviet standards. Despite the changes brought about by M. Gorbachev and his glasnost policy, *Radians'ka Ukraina* changed little. It continued to publish scurrilous attacks on Ukrainian 'bourgeois nationalists' abroad and in Ukraine and did little to further reform or liberalization. While the Russian-language *Pravda Ukrainy* devoted some attention to the economy, science, and technology, *Radians'ka Ukraina* published considerably more propagandistic and ideological articles.

In 1970 the paper employed some 95 journalists, including 60 so-called creative contributors. Thirty-five of these contributors worked in the editorial office; the rest were employed as correspondents. The editors were part of the **nomenklatura* of the CC CPSU and not of the Ukrainian Party; central control over the paper was thus ensured. After the demise of the USSR in 1991, *Radians'ka Ukraina* was renamed *Demokratychna Ukraina*.

R. Szporluk

Radians'ka Ukraina (Soviet Ukraine). A monthly journal of the All-Ukrainian Central Executive Committee

(1921–38) and the Presidium of the Supreme Soviet (1938–9) of the Ukrainian SSR, published weekly and then semi-monthly in Kharkiv (1921–36) and Kiev (1936–9). It appeared in 1921 in Russian as the committee's *Biulleten'*. From 1924 it appeared in Ukrainian as *Biulleten'*, and in July 1925 it was renamed *Radians'ka Ukraina*. It published reports on the activities of the Soviet Ukrainian government and official institutions. In 1939 only four issues appeared.

Radians'ka Ukraina. See *Literaturna krytyka*.

Radians'ka Volyn' (Soviet Volhynia). An organ of Volhynia oblast's CPU Committee and Soviet until 1991, published five times a week in Lutske. It first appeared from September 1939, after the USSR annexed western Volhynia, until 1940 as *Vil'na pratsia*. The newspaper was not published during the 1941–3 German occupation of Lutske. In 1980 it had a pressrun of 162,000.

Radians'ka Volyn'. See *Radians'ka Zhytomyrshchyna*.

Radians'ka zhinka (Soviet Woman). A republican monthly women's magazine published from 1946 in Kiev by the Writers' Union of Ukraine and the Ukrainian Republican Council of Trade Unions. In addition to propagandistic articles about the achievements of Soviet Ukrainian women in cultural, scholarly, and political life, *Radians'ka zhinka* published articles on child rearing, home economics, health care, and culture, and prose and poetry. Special attention was devoted to international affairs and the peace movement. In 1984 it had a pressrun of 2,052,800, the second largest of all magazines and journals published in Ukraine. In 1992 the magazine was renamed *Zhinka*.

Radians'ka Zhytomyrshchyna (Soviet Zhytomyr Region). An organ of Zhytomyr oblast's CP Committee and Soviet until 1991, published five times a week in Zhytomyr. It first appeared in Russian in March 1919 as *Izvestiia*, of the Volhynia Gubernia Military-Revolutionary Committee. From January 1921 it appeared three times a week in Ukrainian as *Visti*, but in July it reverted to Russian under the title *Volynskii proletarii*. From August 1924 it was again published in Ukrainian, as *Radians'ka Volyn'* and then *Chervone Polissia* (October 1937 to June 1941). The newspaper was not published during the 1941–3 German occupation. It resumed publication in January 1944 as *Radians'ka Zhytomyrshchyna*. In 1980 it had a pressrun of 133,000.

Radians'ke literaturoznavstvo. See *Slovo i chas*.

Radians'ke mystetstvo (Soviet Art). A magazine published in Kiev in 1928–32 (a total of 78 issues). From 1930 it was the organ of the Kiev municipal trade union council and Komsomol committee. It devoted particular attention to Ukrainian theater and the work of Ukrainian cultural clubs. The editor was K. Kravchenko.

Radians'ke mystetstvo (Soviet Art). A weekly organ of the Committee for Artistic Affairs and the Administration for Cinematographic Affairs of the Council of Ministers of the Ukrainian SSR, published in Kiev in 1945–54 (a total of

506 issues). Edited by Yu. Kostiuk, O. Borshchahivsky, and others, it appeared in a pressrun of 15,000 and contained propagandistic articles on art and cinema. It was succeeded by *Radians'ka kul'tura*, later renamed **Kul'tura i zhyttia*.

Radians'ke Podillia (Soviet Podilia). An organ of the CPU committees and soviets of Kamianets-Podil'skyi oblast (1944–54) and Khmelnytskyi oblast (1954–91), published five times a week in Khmelnytskyi (formerly Proskuriv). It succeeded *Chervonyi kordon*, the Party organ of Kamianets-Podil'skyi okruha (1924–37) and oblast (1937–41), published in Kamianets-Podil'skyi. In 1980 the paper had a pressrun of 126,000.

Radians'ke pravo (Soviet Law). A monthly organ of Ukraine's Ministry of Justice, procurator's office, and Supreme Court and of the AN URSR (now ANU) Institute of State and Law. Published in Kiev since 1958 as the continuation of **Revoliutsiine pravo*, it is the only legal journal in Ukraine. It contains articles on political affairs, legal history, and Soviet legal theory and practice. It also publishes some official legal pronouncements and documents, book reviews, and bibliographies of legal publications. In recent years the pressrun of the journal has declined considerably, from 64,000 in 1975 to 49,000 in 1980 and 31,940 in 1990. The editors have included V. Zaichuk, D. Panasiuk, and Yu. Verbenko. In 1992 it was renamed *Pravo Ukrainy*.

Radians'ke selo (Soviet Village). A newspaper for peasants. It was published weekly from June 1924 in Kiev as the organ of Kiev gubernia's CP Committee, for the peasants of Right-Bank Ukraine. In November 1925 the paper was moved to Kharkiv and merged with **Selians'ka pravda* to become the CC CP(B)U organ for Ukraine's peasantry. Published three times a week under the editorship of S. Pylypenko, it became the most popular newspaper in Soviet Ukraine, with a pressrun of 250,600 in 1929. It contained articles on cultural affairs, prose, poetry, humor (eg, by O. Vyshnia), political news, and stories of interest to its peasant readers. In January 1933 the paper was renamed *Kolhosyne selo*. After it was closed down in December 1934, no republic-level newspaper for the Ukrainian peasantry was published until 1939 (see **Sil's'ki visti*).

Radians'ke Zakarpattia (Soviet Transcarpathia). A literary-arts compendium published in Uzhhorod in 1947–57 and continued in 1958–9 as *Karpaty*. It contained Ukrainian- and Russian-language works by Transcarpathian writers, folklore materials, and articles on the history and culture of Transcarpathia. Some of its 25 issues also appeared in Hungarian.

Radians'kyi arkhiv (Soviet Archive). A journal of the Central Archival Administration of the Ukrainian SSR published in Kharkiv in 1931–2 as the successor to **Arkhivna sprava*. It contained specialized articles on archival affairs in Ukraine as well as surveys of archival collections. Six issues appeared before it was merged with the administration's newsletter to form **Arkhiv Radians'koi Ukrainy*.

Radians'kyi knyhar (Soviet Bookman). A journal published semimonthly in 1929–30 and then every ten days to the end of 1932 in Kharkiv by the All-Ukrainian Council of Congresses of Publishing Houses and Book Trade Organizations. A total of 101 issues appeared. It provided information on publishing and the book trade in Soviet Ukraine and promoted the distribution of Ukrainian books. It also published the supplements *Rekomendatsiini spysky* (Recommended Lists) and *Knyzhkovi novyny* (Book News) in 1929 and *Biuletyn' na knyzhkovo-zhurnal'nu produktsiiu* *URS*R (Bulletin of Book and Journal Production of the Ukrainian SSR) in 1932.

Radians'kyi kredyt (Soviet Credit). A monthly journal devoted to agricultural finances in Soviet Ukraine, published in Kharkiv in 1927–8 (18 issues in all). It was edited by V. Bohutsky and published by the Ukrainian Agricultural Bank. In mid-1928 the journal was merged with *Kooperovane selo* (formerly **Sil's'kyi hospodar*) to form *Kooperovana hromada* (1928–30).

Radians'kyi L'viv. See *Zhovten'*.

Radians'kyi myslyvets' ta rybalka (Soviet Hunter and Fisherman). A weekly organ of the All-Ukrainian Association of Hunters and Fishermen, published in Kharkiv in 1927–30. It contained articles on hunting and fishing, Ukraine's fauna, and the association's activities. It had a pressrun of 12,000 in 1929.

Radianskyi Pysmennyk (Soviet Writer). The publishing house of the **Writers' Union of Ukraine* (SPU). It was established as the *Radianska Literatura* publishing house in Kharkiv in 1933. It was moved to Kiev in 1934 and renamed in 1939. It has published prose, poetry, literary criticism, and anthologies, primarily by SPU members, as well as translations of foreign literature, several book series, the SPU organ *Literaturna Ukraina*, and the SPU journals *Vitchyzna*, *Vsesvit*, *Kyiv*, and *Raduga*. In the years 1966–75 it published 1,271 titles with a combined pressrun of nearly 31.8 million copies. In 1987 the chief editor was V. Bilenko.

Radianskyi Selianyn (Soviet Peasant). A publishing house of the People's Commissariat of Land Affairs in Kharkiv. Between 1925 and 1930 it published for mass distribution popular and scientific literature on farming in Ukrainian and Russian, and periodicals such as **Radians'kyi selianyn*, *Visnyk sadivnytstva, vynohradarstva ta horodnytstva*, and *Veterynarnе dilo*. In 1930 the enterprise became part of the State Publishing Alliance of Ukraine.

Radians'kyi selianyn (Soviet Peasant). A popular agricultural semimonthly journal of the Peoples' Commissariat of Land Affairs of the Ukrainian SSR, published in Kharkiv in 1924–31 (a total of 162 issues). The journal provided practical advice on farming and promoted the elimination of illiteracy. From 1926 it included a monthly almanac as a supplement. In 1929 it had a pressrun of 11,000.

Radians'kyi selianyn (Soviet Peasant). A newspaper of the CC CP(B)U, published nine times a month from April 1945 and 13 times a month from 1946 to August 1949 in Kiev. It was distributed among the peasants of the newly

acquired territories of Western Ukraine and had a pressrun of 45,000 to 50,000. It was merged with **Kolhospyk Ukrainy* to form *Kolhospane selo* (now **Sil's'ki visti*).

Radians'kyi sport. See *Sportyvna hazeta*.

Radians'kyi teatr. See *Masovyi teatr*.

Radicalism. In its most general sense radicalism (from the Latin *radix* 'root') is the striving for fundamental change. Usually the term has a narrower meaning in politics. Although there can be right-wing or nationalist radicalism, the term is more often used in connection with movements on the left of the political spectrum. In the context of Ukrainian history radicalism refers to a brand of agrarian socialism that emerged in Galicia in the late 19th century and survived there until the Second World War.

The ideological inspiration for radicalism came from the political thinker M. **Drahomanov* and was embodied in the **Ukrainian Radical party* (est 1890) in Galicia. Before the party was founded, 'radicals' generally had referred to themselves as 'socialists' or 'progressives.' V. **Budzynovsky* claimed that he originally proposed the name for the party because the founders of the party were called 'radicals' by representatives of the traditional Ukrainian movement in Galicia. Soon, however, the term 'radicalism' began to take on a new and more specific meaning. Immediately after the party announced its existence, Polish and Austrian social democrats urged it to change its name to 'socialist' or 'social democratic,' adopt a Marxist program, and join the Second Socialist International. Marxist ideas were soon adopted by a number of the younger members of the Radical party. The party leadership, particularly M. **Pavlyk* and I. **Franko*, however, wanted to distinguish their party, its program, and its name from those of the social democrats. They argued that Marxism was suitable for Western European socialists, whose countries had an industrial proletariat. The Ukrainians, however, were a predominantly peasant people, and *Drahomanov's* political theories suited them much more than K. Marx's. *Franko* and *Pavlyk* elaborated the theory of radicalism as an agrarian, peasant-oriented form of socialism and claimed kinship with the Serbian Radical party, which was also an agrarian socialist party in a largely peasant society. Their view ultimately prevailed in the party, and the discontented minority left the Radicals in 1899 to form the **Ukrainian Social Democratic party*. Anticlericalism was one of the distinctive characteristics of radicalism. Ukrainian radicalism also had a pronounced anticlericalism.

Radicalism was pre-eminently a Galician phenomenon, but it had resonances elsewhere in Ukraine. A radical party of the Galician type was founded in Bukovyna in 1906. A more distant relation was the **Ukrainian Radical party*, formed in Kiev late in 1904, which soon dissolved and in 1908 was replaced by the **Society of Ukrainian Progressives*. Ideologically the Kievan radicals had little in common with their Galician counterparts. In 1926 the Galician Radical party united with the **Ukrainian Party of Socialist Revolutionaries* in Volhynia and Polisia to form the *Ukrainian Socialist Radical party*. In practice, however, the Galician branch of the party carried on the traditions of radicalism, and the Volhynian-Polisian branch continued as a socialist revolutionary organization. After the Sec-

ond World War there was little room for radicalism in Ukraine. Aside from the Communist monopoly in political life, the traditional Ukrainian peasantry, in whose interests the radicals had claimed to work, had been transformed into collective-farm workers, and the Ukrainian Catholic church, which had been the target of radical criticism, was abolished in 1946.

Radimichians (*radymychi*; Belarusian: *radzimichy*). A Slavic tribe that lived in the watershed of the Dnieper, the Sozh, and the Desna rivers from the 9th to 12th centuries. Their principal towns were Homel, Vshchizh, and Chchersk. Until the mid-9th century the Radimichians paid tribute to the Khazars. Grand Prince Oleh of Kiev joined them to the Kievan state in 885, and they took part in the Rus' campaign against Byzantium in 911. They did not, however, become formally part of Kievan Rus' until 984, when they were conquered by Volodymyr the Great. After the death of Yaroslav the Wise the western Radimichian lands came under the rule of Smolensk principality, and those in the east became part of Chernihiv principality. The Radimichians are last mentioned in the Rus' chronicles under the year 1169. Together with the *Krivichians and *Drehovichians they are the ancestors of the Belarusians.

Radio. Radio broadcasting in Soviet Ukraine and in the USSR as a whole served the interests of the Communist state and Party. All news, arts, and public information broadcasts were subordinated to the aims of official internal and external propaganda. Their planning and subject matter were determined by all-Union and republican CPSU departments of propaganda and agitation and delegated by them to broadcasting committees of the Councils of Ministers of the USSR and Ukrainian SSR. Control was also exercised by designated organs of Soviet state censorship such as the Chief Administration for Literature and Publishing (Glavlit) and the KGB.

In Ukraine radiotelegraph communication was introduced in the Kherson area in 1902. The first broadcasts began once a week in Kharkiv, with low-level transmitters, in November 1924, four years after 4-kW radio stations began operating in Moscow, Leningrad, and Kazan. In 1925 the construction of the first high-powered stations was begun in Kharkiv and Kiev by the Moscow Joint-Stock Company for Radio Communications, the Radio Society of Ukraine was created, and local associations of radio enthusiasts arose. By 1928 there were radio stations in Kiev, Odessa, Dnipropetrovske, Donetsk, and nine other Ukrainian cities. The Kharkiv station RV 4, which began operating in 1927, was the fourth most powerful in the USSR. In 1941 the most powerful long-wave radio station was in the Soviet Ukrainian capital, Kiev (RV 84); it transmitted propaganda outside the USSR.

A radio network in Ukraine was begun in 1928 under

the direction of the People's Commissariat of Post and Telegraphy of the USSR. It used a relay system that transmitted signals by wire to loudspeakers. The wireless receiver system common in most other countries was rarely used, and such receivers were produced only in small quantities, mainly for government and Party institutions and personnel. Their number began increasing toward the end of the 1930s, when jamming of foreign radio broadcasts was perfected and the production of radios that could receive only Soviet broadcasts became possible. Until recent times the main system of radio broadcasting in the USSR, particularly in urban workers' districts and in the villages, still used wired transmitters and receivers. In 1940 there were 1,047,000 point-to-point wired receivers in Ukraine, 137,200 of them in rural areas. There were only 255,400 radio sets, mostly in the cities, which had to be registered with the militia.

In August 1930 an all-Ukrainian government radio center in Kharkiv, with a subordinate center in the Moldavian ASSR and a network of local transmission stations, was established. In 1933 the All-Ukrainian Radio Administration was renamed the All-Ukrainian Committee of Radio-Network Development and Broadcasting of the Council of People's Commissars of the Ukrainian SSR. In 1938 its name was shortened to Ukrainian Radio Committee (URC). The URC received information on an ongoing basis from the *Radio and Telegraph Agency of Ukraine. In the 1930s there also existed a Committee for the Support of Radio-Network Development and Amateur Radio Communications of the Komsomol CC. The committees published the journal **Radio* (1930–5, 1938–41).

At first, broadcasting in the Ukrainian SSR was dominated by Moscow radio. Transmissions in Ukrainian were limited in both time and subject matter. In the late 1920s and early 1930s, 70 percent of such programs were devoted to political education and agitation. The programming of the Kharkiv center, aside from 'radio gazettes' for workers, peasants, the Komsomol, Pioneers, the Jewish community, and Esperantists, consisted of speeches, discussions, news, and Party congress and conference reports. Of 18 hours of daily broadcasting, only 3 to 4 were devoted to literary and cultural topics. In the latter half of the 1930s, music, literary, drama, and special programs for children were added. Thirty to 40 percent of broadcast time was occupied by the compulsory transmission of Moscow broadcasts and news in the Russian language (12 times a day).

During the Second World War most civilian Soviet radio stations were destroyed, and the population was served by official broadcasts of the Nazi occupation or by Moscow radio (the station Soviet Ukraine) and the mobile Soviet army station Dnipro and Soviet partisan station Partyzanka. In 1941–4 official Soviet broadcasts were transmitted in Ukrainian from the Taras Shevchenko station in Saratov, Russia, where the equipment of Ukraine's radio stations and the URC had been evacuated.

After the war the reconstruction of stations and broadcasting and network development came under the jurisdiction of the Committee for Radio Broadcasting, renamed in 1950 the Committee for Radio and Television Broadcasting, of the Council of Ministers of the Ukrainian SSR. From February 1957 this committee had its own network called Hovoryt Kyiv (This Is Kiev Speaking). From 1947 it was also a member of the International Organization of Radio Broadcasting and Television in the Soviet-

Radio relay centers, reception points, and equipment in Ukraine and the USSR, 1950 to 1984-7

| | 1950 | 1960 | 1965 | 1970 | 1984-7 |

bloc countries (based in Prague from 1950). In 1965 there were over 50 powerful shortwave, long-wave, and ultra-shortwave stations in Ukraine.

The relay transmitting system still predominates in Ukraine. In 1965 there was one radio per 6.9 persons (in rural areas, one per 14.4), compared to one per 1.2 persons in the United States. For a very long time radios made in the USSR could not receive broadcasts of wavelengths shorter than 25 m and were thereby prevented from receiving most foreign broadcasts. In the postwar period, radio broadcasting in Ukraine has increased considerably. In 1965 there was an average of 30 hours of programming in Ukrainian per day. In addition to 10 daily news programs provided by the Kiev center, 24 oblast radio committees broadcast lectures, discussions, advice, information, music, literary programs, and special programs for children and teen-agers. In 1984 Kiev Radio broadcast 7.5 hours of programming in Ukrainian and foreign languages to 70 countries. In the 1980s there were three republican radio networks. Network One was broadcast via reception stations and points to mass audiences; 20 to 25 percent of its time was devoted to local Party and economic issues, and the remaining time was taken up by transmissions from Moscow. Networks Two and Three were transmitted to people in urban areas with their own radios, and devoted more attention to Ukrainian topics, literature, and art. Apart from the weekly program 'Hovoryt i pokazuie Ukraina' (Ukraine Tells and Shows) there was no other Ukrainian-language radio journal.

Radio technology has been taught and researched at the Odessa Electrotechnical Institute of Communications, the Kharkiv Institute of Radioelectronics, the AN USSR (now ANU) Institute of Radio Physics and Electronics, and the Kiev Polytechnical Institute. Amateur radio clubs and groups were monitored by the All-Union *Voluntary Society for Assistance to the Army, Air Force, and Navy. In 1961 there were 220 clubs, over 24,000 enthusiasts, and over 2,500 amateur stations. Until the 1980s, great expense was devoted to the jamming of foreign broadcasts; as a result it was particularly difficult to receive these transmissions in large cities.

In interwar Western Ukraine under Polish rule, all

broadcasting was state-controlled. All radios had to be registered, and their owners had to pay monthly user fees. Ukrainian-language programs did not exist until the 1930s, when Lviv Radio sporadically broadcast short (15-30 minutes) programs whose content was limited by official censors. On Sundays and holy days liturgies were broadcast from Ukrainian churches. In the Czechoslovak Republic, Ukrainian-language programs were broadcast in the 1930s to the population of Transcarpathia twice a week (from 1934 five times a week) for 15 minutes from Košice. Radio Prague began daily news broadcasts to Transcarpathia in 1934. During the existence of the Carpatho-Ukrainian state in 1938-9, Ukrainian-language programs were broadcast from Banská Bystrica in Slovakia, and in early 1939 a shortwave station existed in Khust.

During the 1939-41 Soviet rule, the population of Western Ukraine was served by new Soviet radio stations established in Lviv, Stanyславiv (now Ivano-Frankivske), and Ternopil. During the 1941-4 German occupation of Western Ukraine a German-controlled station in Lviv broadcast 30-minute censored programs and propaganda in Ukrainian three times a week.

In the postwar period Ukrainian-language programs have been broadcast daily by Czechoslovak Radio in Prešov since 1948 (11.5 hours per week in 1988), weekly by several radio stations in Poland since the 1960s, and weekly in the Bačka dialect from Novi Sad in Serbia since 1949. In the West, Ukrainian-language programs have been broadcast to Ukraine daily by *Voice of America in Washington, *Radio Canada International in Montreal, *Radio Liberty in Munich, and Vatican Radio. Ukrainian community programs have also been broadcast by radio stations in Rome, Madrid, and other European cities and in cities in Brazil, Argentina, the United States, and Canada, where there are large Ukrainian communities. Most have been half-hour or hour-long weekly programs, although there have been some daily programs (eg. in Edmonton, Winnipeg, and Toronto).

Radio. A popular journal for amateur radio operators and technicians, published in Kharkiv in 1930-5 and in

Kiev in 1935 and 1938–41. It appeared semimonthly to mid-1933 and then monthly. It was an organ of the All-Ukrainian Radio Administration in 1930–2 and the Kom-somol CC and Council of People's Commissars' committees for broadcasting and radio affairs thereafter.

Radio and Telegraph Agency of Ukraine (Radiotelegrafichne ahentstvo Ukrainy, or RATAU). The official news agency of the Council of Ministers (formerly People's Commissars) of the Ukrainian SSR. It was founded in April 1921 in Kharkiv on the basis of Ukrosta, the All-Ukrainian Bureau of the Russian Telegraph Agency, founded in January 1920, which in turn was based on the Bureau of the Ukrainian Press (December 1918 to August 1919). Initially RATAU was to collect and disseminate information about developments in the USSR and abroad, to provide a news service for Ukrainian press and radio, and to inform the Soviet and foreign public about the work of the Soviet Ukrainian government. It was also supposed to exchange reports with foreign press agencies and to establish bureaus and a network of correspondents at diplomatic and foreign trade offices of the Ukrainian SSR. With the formation of the Telegraph Agency of the USSR (TASS) in 1925, RATAU lost many of its functions. Located in Kiev since 1934, it was limited almost exclusively to collecting and disseminating news of Soviet Ukrainian internal affairs and of the Ukrainian delegation at the United Nations. A constituent member of TASS from 1971, RATAU has had correspondents in every oblast of Ukraine and separate bureaus in Lviv, Odessa, Donetsk, and Kharkiv. In May 1990 RATAU was renamed the Ukrainian Information Agency (Ukrinform) and was placed under the directorship of V. Burlai. It has a staff of approx 500, including a correspondent in New York City. In 1990 it served 970 newspapers and 230 television and radio stations and other bodies. It is now independent of TASS.

Radio Canada International. The international service of the Canadian Broadcasting Corporation, based in Montreal. Established in 1952 as the Voice of Canada, it broadcasts domestic and international news, information, and commentaries from a Canadian perspective. Since 1986 it has transmitted one hour a day in Ukrainian to listeners in the USSR and its successor states, Eastern Europe, and elsewhere in the world. A special transmitter broadcasts to Ukrainians living in the Far East. Under the terms of a protocol signed between Canada and the USSR, transmissions were not jammed by the Soviets. The first head of the Ukrainian section was G. Panchuk. He was succeeded by B. Veselovsky, O. Bachynsky, R. Olynyk (R. Rakhmanny), Ya. Harchun, and R. Pitt. In 1989 the Ukrainian section had five full-time announcer-producers and several freelance contributors across Canada.

Radio Liberty (RL). A radio service established in 1953 and financed by the US government (initially through the *American Committee of Liberation and then through the United States Information Agency) to provide Soviet listeners with nonpartisan, uncensored news, information, and commentary about the outside world and developments in the USSR; to propagate democratic principles as later outlined in the United Nations Universal Declaration of Human Rights; and to promote the right of national self-determination in the Soviet Union. Its headquarters

are in Munich, where 1,000 of its approx 1,750 employees are based. RL transmits 24 hours a day in 19 different languages of the former USSR. A daily 1.5-hour Ukrainian service has broadcast news, a chronicle of Ukrainian affairs, press summaries, commentaries on developments in the Soviet Union and abroad, information on Ukrainian history, literary reviews, religious programs, interviews, and materials from Ukrainian samvydav and about the dissident movement. The broadcasts were denounced as anti-Soviet by the Soviet authorities, and until 1988 they were jammed. RL also has a well-developed research department, whose staff has provided much information and analysis on political, economic, and social developments in Ukraine. This research is summarized in regular publications and research reports. In the mid-1980s the research department was merged with that of Radio Free Europe, a similar institution that broadcasts to the countries of the Soviet bloc. The Ukrainian broadcast service has been headed by M. Kovalsky, M. Dobriansky, M. Diakovsky, I. Basarab, A. Romashko (pseud of V. Kubryk), A. Kamin-sky, B. Nahaylo, and R. Kupchinsky. Research staff members who have written extensively on Ukrainian subjects include R. Solchanyk, D. Marples, K. Mihalisko, and B. Nahaylo. In 1992 RL opened an office in Kiev.

Radio technology. Radio technological research in Ukraine originated with M. *Pylchikov at Odessa University and the Kharkiv Technological Institute, M. Umov at Odessa University, and D. *Rozhansky at Kharkiv University. Pylchikov oversaw the installation of a research radio station at the Kherson lighthouse and did experiments in radiotelecontrol. In 1906 M. Bonch-Bruevich in Kiev invented an original radio transmitter. In the 1920s, radio-technological research was conducted by M. Papaleksi at the Odessa Polytechnical Institute (in the areas of radiotelegraphy, radio communications with submarines, and telecontrol) and by V. *Ohiievsky at the Kiev Polytechnical Institute. In 1924 in Kharkiv Ohiievsky set up the first radio station in Ukraine. Scientists at Kharkiv University, and then at Lviv University and other higher educational institutions, developed interest and research in the field.

Today radio technology research is conducted by the ANU (formerly AN URSR) *Physical-Technical Institute in Kharkiv, the ANU *Institute of Radio Physics and Electronics in Kharkiv, and the Kiev Institute of Radio-technological Problems. A. *Slutskiy, S. *Braude, I. Truten, and H. Levin studied powerful superfrequency generators and the theory of the magnetron. S. *Tetelbaum and O. *Usykov investigated the remote transmission of energy over long distances, new modulation methods, television, radiolocation, the electronics of superfrequencies, and the phase method of generating radio waves. V. *Lashkarov and S. *Pekar developed the theory and technology of semiconductors, electron diffraction, and the kinetics of photoconduction. O. *Kotelnikov devoted attention to the technology of weak currents, electrodynamics, and the theory of long lines. At the Institute of Radio Physics and Electronics Braude researched the reflection of radio waves from meteor tracks and other problems of radio astronomy. Along with I. *Ostrovsky, I. Turgenev, and A. Men he also contributed to understanding of the propagation of radio waves in the troposphere and to the development of radio oceanography. V. *Marchenko and V. *Shestopalov studied the diffraction of radio waves, and N. *Morgulis specialized in electron emission. New re-

search methods in nonlinear mechanics, quantum field theory, and quantum radio technology developed by N. *Bogoliubov, M. *Krylov, and A. Chernets were useful in the development of theoretical radio technology. The quarterly *Radiotekhnika* and the interdepartmental collection *Radiotekhnika* were devoted to problems of radio technology. Some articles in the field appeared in the journal *Radio* (1930–41).

L. Onyshkevych

Radiobiology. The science devoted to the investigation of the effects of ionizing radiation on living organisms. It covers the range of electromagnetic waves from radio waves, through infrared, visible, and ultraviolet spectra and X rays, to high-energy gamma quanta and subatomic particles that are capable of penetrating living organisms. Irreversible changes are often the cumulative effect of multiple low-dose exposures. H. Chench was the first to use radium for therapeutic purposes in Ukraine, in 1916. The first institutions where radiotherapy was practiced were the Kharkiv Roentgenologic Institute and similar institutes in Kiev and Odessa around 1924. Noted Ukrainian radiobiologists include O. *Krontovsky, O. *Horodetsky, P. Berezhansky, M. Mahat, R. *Kavetsky, B. Kyrychynsky, M. Zaiko, S. Nikitin, M. Lypkan, S. Pokrovsky, and the early radiotherapists I. *Shevchenko, O. Shramenko, H. Perevertun, Ya. Porokhovnyk, and D. Dubovy.

The catastrophic explosion at the Chornobyl Atomic Electric Station in Ukraine on 26 April 1986 exposed millions of Ukrainians, Belarusians, Poles, Russians, and Scandinavians to excessive radiation and reinforced concern about the dangers of overexposure. The number of officially reported victims was suspiciously low; it took the Soviet government over two and a half years to acknowledge that the early fatalities numbered in the hundreds. As a result of the Chornobyl disaster the Center for Radiobiological Research was established in Kiev to co-ordinate a USSR-wide effort in this field. Its efficacy has yet to be established.

I. Masnyk

Radion, Stepan, b 24 July 1912 in Sylne, Lutske county, Volhynia gubernia. Journalist and writer. After emigrating to Australia in 1949, he completed his studies at the Australian School of Journalism (1954). In addition to publishing numerous articles in the Ukrainian press, he prepared a history of the Shevchenko Scientific Society in Australia (1976), a dictionary of Ukrainian surnames in Australia (1981), a list of Ukrainian-Australian graduates (1982), and a six-part bibliography of Ukrainian publications in Australia (1975–87).

Radish (*Raphanus*; Ukrainian: *redka*). An annual or biennial plant of the carrot family Brassicaceae, grown for its succulent root, which usually has red or pink skin and white meat. Most radishes have small roots (up to 20 g); Japanese late field varieties have roots that weigh up to 1 kg. Spring varieties, the leaves of which are suitable for salads, are perishable; larger winter varieties keep well in storage. In Ukraine radish (*R. sativus*) is cultivated principally in the central regions in sandy loams. Radish root is a low-calorie source of bulk food and is usually eaten raw; it contains 1–2 percent each of proteins, carbohydrates, and sugars, and up to 25–30 mg per 100 g of vitamin C.

In addition to the cultivated radish a wild variety (*R. raphanistrum*) grows as a weed, and a white radish (*R. candidus*) grows in Polisia and the northern forest-steppe region. Radishes play a role in Ukrainian folk beliefs; a long root, for example, presages a long winter.

Radkevych, Arsen [Radkevych], b 1759, d 1821. Basilian priest and professor. A rector (1797 and 1804) of the theological faculty at Lviv University, he taught Hebrew, Greek, and hermeneutics in both of its divisions, the Studium Ruthenum (for Eastern rite theology) and the Studium Latinum (for Roman Catholic theology). From 1818 he was the protohegumen of the Basilian order in Galicia.

Radomyselsky, Izrail [Radomysel's'kyj, Izrajil'], b 6 May 1914 in Zhytomyr, Volhynia gubernia, d 29 January 1986 in Kiev. Metallurgist. He graduated from the Kiev Polytechnical Institute (1939) and worked in Kiev and Novosibirsk, at the AN URSR (now ANU) Institute of Ferrous Metallurgy (1948–55), and at the ANU Institute for Problems of Materials Science (from 1955). A specialist in powder metallurgy, he researched the renewal of metal oxides, wear resistance, and the design and preparation of metal powders with predetermined characteristics.

Radomyshl [Radomyśl']. III-10. A town (1989 pop 16,800) on the Teteriv River and a raion center in Zhytomyr oblast. Until 1946 it was known as Radomyśl. It was first mentioned, as Michesk, in the chronicles under the year 1150. In 1362 it came under Lithuanian rule, and in 1390 it is referred to in a historical document as Mytsko. In 1569 it became part of the Polish Commonwealth, and from then it was called Radomyshl. At the beginning of the 17th century Ukraine's first paper factory was established there. For half a century the town was the residence of the Uniate bishops of Kiev (1746–95). With the partition of Poland in 1793, it was transferred to Russia, and became a county center of Volhynia (1795) and then Kiev (1797–1925) gubernias. Today Radomyshl has machine-building, flax-processing, brick-making, canning, and furniture factories, a dairy, a bakery, and a brewery. It has a regional museum and a natural science museum.

Radomyshl camp site. A late Paleolithic campground located near Radomyshl, Zhytomyr oblast. Excavations in 1957–9 and 1963–5 by I. *Shovkoplias uncovered the remains of five small tentlike surface dwellings whose walls were supported by mammoth bones. Other discoveries included a large pit filled with mammoth and other animal bones, flint tools, and a work area for shaping flint pieces.

Raduga (Rainbow). A Russian-language monthly journal published in Kiev since 1963 by the Writers' Union of Ukraine. It was preceded by the monthly *Krasnoe slovo* (Kharkiv, 1927–32), the monthly *Litstroj* (Kharkiv, 1933), the monthly (Kharkiv, 1934) and bimonthly (Kiev, 1935–7) *Sovetskaia literatura*, and the quarterly (1948–50) and monthly (1951–63) *Sovetskaia Ukraina*. *Raduga* contains works by Russian-language authors living in Ukraine and translations from Ukrainian. It has served mainly to further Russification in Ukraine.

Radvanka settlement. A settlement of the 9th to 8th century BC discovered in 1950 in Uzhhorod, Transcar-

pathia oblast. Excavations revealed the remains of semi-pit dwellings, pottery fragments, and the bones of domestic and wild animals. Traces of a late Paleolithic occupation were also noted at Radvanka.

Radvansky, Anatol [Radvans'kyj, Anatol'], b 23 March 1913 in Brody, Galicia, d 29 May 1991 in Philadelphia. Stage actor and singer (baritone). He worked in the Sadovsky Ukrainian Drama Theater (1931–3), the Zahrava Theater (1933–5), the Tobilevych Theater (1936–8), the Lesia Ukrainka Theater (1939–41), and the Lviv Opera Theater (1941–4). After fleeing from the Soviet advance he acted in the Ensemble of Ukrainian Actors in Germany; he continued with the ensemble after emigrating to the United States (1945–57). He retired from the stage in 1957.

Radykal (Radical). A semimonthly political journal published in Lviv from October 1895. It was edited by V. Budzynovsky, and supported the Ukrainian Radical party. Among the contributors were L. Trubatsky and V. Shchurat. In 1896 *Radykal* merged with **Zhytjie i slovo*.

Radylovsky, Yurii [Radylovs'kyj, Jurij] (Radyvylyvsky), b and d ? Painter of the mid-18th century in Kamianets-Podilskiyi. In Dubno he did several portraits of Prince Lubomirski and his wife (1743). In 1749, with his student L. Dolynsky, he painted icons for the iconostasis of St George's Cathedral in Lviv.

Radysh, Myroslav [Radyš], b 21 October 1910 in Ilyntsi, Sniatyn county, Galicia, d 7 June 1956 in New York. Painter and scenery designer. A graduate of the Poznań Art

Myroslav Radysh: *Study*

School (1938), from 1940 he was chief designer at the Lviv Opera Theater. In 1942–4 he participated in exhibitions organized by the Labor Association of Ukrainian Pictorial Artists. A postwar émigré, he worked as a painter and scenery designer for the Ensemble of Ukrainian Actors in Augsburg, Germany. In 1950 he settled in the United States, where he participated in Ukrainian group shows and had solo shows in New York (1952, 1953) and Philadelphia (1954). Radysh painted portraits, still lifes, and landscapes, such as *Madonna* (1948), *Brooklyn Bridge* (1951), *Blue Landscape* (1954), *Mother and Child* (1954), *By the River* (1955), and *Factory Smokestacks* (1956). His impressionist style evolved toward an ever-greater emphasis on color. A book about him was published by his wife in 1966.

Radyvylovsky, Antin (Antonii) [Radyvylovs'kyj], b ?, d 20 December 1688 in Kiev. Churchman and writer. During the 1640s he studied at the Kievan Mohyla Academy, and after graduating he was tonsured and became a noted preacher in various Kievan churches. He was at the Kievan Cave Monastery from 1656 until 1683, when he became hegumen of St Nicholas's Monastery in Kiev. He is the author of two collections of sermons printed at the Kievan Cave Monastery Press: *Ohorodok Marii Bohorodytsi ...* (The Garden of Mary Mother of God ..., 1676), which included sermons for important feast days and about various saints, including ss Anthony and Theodosius of the Caves and Volodymyr the Great, and *Vinets Khristov z propovidii nedelnykh ...* (A Garland for Christ from Sunday Sermons ..., 1688), which included sermons for all Sundays. These sermons, which were written in a bookish Ukrainian close to the vernacular, are excellent examples of baroque oratory prose. In some of them Radyvylovsky touched on contemporary issues, such as the hard life of peasants and women. Some of his themes and parables were drawn from such popular anthologies as *Rym'ski diannia* (Roman Acts) and *Velyke zertsalo* (The Great Mirror).

BIBLIOGRAPHY

Markovskii, M. *Antonii Radvilovskii, iuzhnorusskii propovednik xvii v.* (Kiev 1894)

Janusz Radziejowski

Radziejowski, Janusz, b 3 June 1925 in Kiev. Polish historian. He was educated at the Higher School of Economics and Statistics in Moscow (1949–54) and worked for the Soviet census bureau, where he compiled information about nationality groups in the USSR. Following the rehabilitation of his father (who had perished in the Stalinist

purges) in 1959, Radziejowski moved to Warsaw and worked at the Institute of Party History (to 1970) and the Institute of Scientific Policy, Technological Progress, and Higher Education. In 1970 he received a PH D in history from Warsaw University. He has written articles on Polish-Ukrainian relations and on the impact of collectivization on Ukraine. The monograph *The Communist Party of Western Ukraine, 1919–1929* (1983) is a revised translation of his work in Polish (1976).

Radziievsky, Mykola [Radzijevs'kyj], b 27 November 1884 in Yerky, Zvenyhorodka county, Kiev gubernia, d 27 May 1965 in Khmelnytskyi. Composer and conductor. He studied composition with S. Taneev at the Moscow Conservatory, served as an executive member of the Leontovych Music Society, and then worked as an opera conductor in Moscow and Kiev. During the 1920s he organized and conducted an experimental orchestra of folk instruments, known by the acronym MIK. After 1945 he was conductor and music director of the Vinnytsia and Khmelnytskyi theaters of music and drama. His works include the overtures *Sahaidachnyi* and *Fantastic Poem*; chamber and choral pieces; and songs to poems by H. Skovoroda, T. Shevchenko, I. Franko, and M. Rylsky.

Radziievsky, Oleksii [Radzijevs'kyj, Oleksij], b 14 April 1864 in Vasylkiv, Kiev gubernia, d 22 September 1934 in Kiev. Surgeon and urologist; nephew of I. *Nechui-Levytsky. A graduate of Kiev University (1890), he worked there and was a professor at the Higher Courses for Women (1903–20) and the Kiev Medical Institute (1921–30). His publications dealt with operative surgery, the urological treatment of patients with prostatic hypertrophy (particularly surgical treatment of prostatic hypertrophy and uremia), and bacteriology.

Radziviliv. See Chervonoarmiisk.

Radziwiłł (Radzivil; Lithuanian: Radvilas). A Lithuanian magnate family in the 15th- to 16th-century Lithuanian-Ruthenian state and the 16th- to 18th-century Polish-Lithuanian Commonwealth. The progenitor was the Lithuanian noble Radvilas Astikas. In the 16th century the Radziwiłłs established links through marriage with the Jagiellon, the Hohenzollern, and other European royal dynasties and became the only Lithuanian family to receive the title of princes of the Holy Roman Empire (1547). The family owned thousands of rural estates as well as castles and towns, many of them in Volhynia and Kiev voivodeships. It also had its own private army with some 6,000 soldiers. Twenty-two of its members held high military and political offices (grand hetman, grand chancellor, voivode) in the Grand Duchy of Lithuania.

Several Radziwiłłs were directly involved in Ukrainian history. Albrycht-Stanisław (b 1 July 1593 in Olyka, Volhynia, d 12 November 1636 in Gdańsk) was the Lithuanian grand chancellor from 1623. His *Memoriale rerum gestarum in Polonia, 1632–1656* (4 vols, 1968–74; Polish trans: *Pamiętnik o dziejach w Polsce*, 3 vols, 1980) contains valuable observations and information about the Cossack-Polish War. Janusz (b 2 December 1612, d 31 December 1655) was the Lithuanian field hetman (1646–54) and grand hetman (1654–5) during the Cossack-Polish War. He fought the invading Cossacks in Belarus in 1649, defeated them at Loev on 6 July 1651, and captured Kiev on

4 August 1651, after which he exacted harsh retributions against its inhabitants. In 1654 his army was defeated by the allied Cossack and Muscovite forces. Janusz's son, Bogusław (b 3 May 1620, d 31 December 1669), was the Lithuanian equerry from 1646. During the later part of the Cossack-Polish War he made a pact with Sweden and in 1656 requested that Hetman B. Khmelnytsky take his domain of Slutsk principality under his protection. In 1657–65 Bogusław was the governor of ducal Prussia and an ally of Sweden against King Jan II Casimir Vasa. He donated the *Radziwiłł Chronicle to a library in Königsberg. His autobiography was published in Warsaw in 1979. Karol Stanisław (b 27 February 1734, d 21 November 1790) was a leader of the Confederation of *Bar in 1768.

L. Wynar, A. Zhukovsky

Radziwiłł Chronicle (Radzivilivskyi litopys), aka Königsberg Chronicle. A late 15th-century illustrated compilation of medieval Rus' chronicles, including **Povist' vremennykh lit* in the Sylvestrian redaction of 1116 and excerpts from other chronicles of 1112–1206 in southern (Ukraine) and northern (Russia) Rus'. The manuscript is a copy of a 13th-century compilation. In the 17th century it was owned by the Lithuanian prince J. Radziwiłł (hence its name), and his son donated it to the Königsberg library. It remained there until 1758, when the city was occupied by the Russians during the Seven Years' War, and the manuscript was taken to the library of the Russian Academy of Sciences in St Petersburg. Of particular value in the chronicle are its 617 color miniatures. Although they show the marked influence of Western graphic art, they are most likely copies of earlier miniatures. The first, incomplete printing of the chronicle was published in St Petersburg in 1767. A full photomechanical edition appeared in 1902. The chronicle has been studied by A. Shakhmatov, N. Kondakov, V. Sizov, M. Artamonov, and the Ukrainian linguist V. Hantsov.

Volodymyr Radzykevych

Radzykevych, Volodymyr [Radzykevyc', b 17 October 1886 in Vyshenka, Horodok county, Galicia, d 14 September 1966 in Cleveland, Ohio. Pedagogue, literary scholar, and writer. In 1908 he completed philological studies at Lviv University and became a teacher at the Academic Gymnasium of Lviv (1908–39). He was also a founder of and a teacher at the Second Ukrainian Gymnasium in Lviv (1941–4), and from 1945 to 1950 he taught at various gymnasiums in DP camps in Germany. He was a member of the Shevchenko Scientific Society from 1932, head of the

Teachers' Hromada (1929–39), and, from 1950, an active member of the Association of Ukrainian Writers for Young People in Cleveland. Under the pseudonym Vuiko Vlodko he wrote poems, plays, and historical tales for children. Most famous, and republished several times, was his verse adventure *Pryhody lurchyka kucheriavoho* (Adventures of Curly George). As a literary scholar Radzykevych wrote articles for *Zapysky NTS* and a monograph on P. Sviientsitsky (1911). His most important work was *Istoriia ukrains'koi literatury* (History of Ukrainian Literature), a widely used text for secondary schools which was published in Lviv in 1922, reissued there in 1937 and 1942, published in 1947 in Germany, and published in 1955–6 in the United States.

D.H. Struk

Radzykevych, Yulian [Radzykevych, Julijan], b 4 July 1900 in Vyshenka Mala, Horodok county, Galicia, d 1968 in Springfield, Massachusetts. Physician, civic leader, and writer; brother of V. *Radzykevych. He served as an artillery officer in the Ukrainian Galician Army and then studied medicine at the Lviv (Underground) Ukrainian University and Prague University (MD, 1927). He practiced medicine in Sudova Vyshnia and headed the county committee of the Ukrainian National Democratic Alliance. During the Second World War he organized and directed a hospital and provided medical aid to the Ukrainian Insurgent Army. He emigrated via Austria to the United States (1949), where he became director of a tuberculosis hospital. Besides many short stories he wrote the historical novels *Polkovnyk Danylo Nechai* (Colonel Danylo Nechai, 2 vols, 1961), *Polum'ia* (The Flame, 1963), and *Zoloto i krov* (Gold and Blood, 1967).

Radzykhovskyy, Borys [Radzyxovs'kyj], b 6 August 1909 in Novooleksiivka, Oleshky county, Tavriia gubernia, d 17 February 1975 in Chernivtsi. Ophthalmologist. A graduate of the Dnipropetrovske Medical Institute (1932), he headed the Department of Eye Diseases at the Chernivtsi Medical Institute (1945–75). His publications deal with the treatment of trachoma, roentgenological methods of locating foreign objects in the eye, and the construction of ophthalmological instruments.

Valentyna Radzymovska

Yevhen Radzymovsky

Radzymovska, Valentyna [Radzymovs'ka], b 13 October 1886 in Lubni, Poltava gubernia, d 22 December 1953 in Champaign, Illinois. Physiologist and biochemist; member of the Shevchenko Scientific Society from 1950.

She studied in St Petersburg and graduated from Kiev University (1913). She taught at the Kiev Medical Institute (from 1924) and the Kiev Institute of People's Education (1924–9). Her major research areas included biochemistry, pathophysiology, and tuberculosis. A member of the Revolutionary Ukrainian and the Ukrainian Social Democratic parties, she was arrested in 1929 and released after one year. She was a professor at the Melitopol Pedagogical Institute (1939–41) and headed departments of several medical research institutes in Kiev. She was a professor at the Lviv Medical Institute (1941–3), and after the Second World War she taught at the Ukrainian Technical and Husbandry Institute in Munich (1947–50) and then emigrated to the United States (1950). A biography has been written by I. Rozhin (1968).

Radzymovsky, Yevhen [Radzymovs'kyj, Jevhen] (Radzimovsky, Eugene), b 4 December 1905 in Severynivka, Tarashcha county, Kiev gubernia. Mechanical engineer; full member of the Shevchenko Scientific Society; son of V. Radzymovska. A graduate of the Kiev Polytechnical Institute (1927), he lectured there (1930–41), headed its hoisting-machine development department, and was an associate of the AN URSR (now ANU) Institute of Mechanics. A postwar refugee, he taught in Munich at the International University (1944–7) and the Ukrainian Technical Institute (1946–9). After emigrating to the United States in 1950, he taught mechanical engineering at the University of Illinois; worked as an industrial consultant specializing in machine design, lubrication, engineering mechanics, and stress analysis; and wrote *Lubrication of Bearings: Theoretical Principles and Design* (1959).

Radzyń Podlaski (Ukrainian: Radyn). II-3. A town (1989 pop 15,600) on the Biała River in Biała Podlaska voivodeship, Poland. It was founded in 1468 and was originally known as Kozirynek. In 1905 there were 33,600 Ukrainians of the Orthodox faith in Radzyń county, representing one-third of the population. By 1931 there were only about 2,000 of them left, the rest having converted to Roman Catholicism.

Raevsky, Mikhail, b 18 July 1811 in Arzamas, Nizhnii-Novgorod gubernia, Russia, d 2 May 1884 in Vienna. Russian diplomat and foreign service agent. He graduated from the St Petersburg Theological Academy (1833). He served as a chaplain at the Russian embassy in Stockholm and an agent of the tsarist Ministry of External Affairs and the Russian Synod there, and in 1842 he was transferred to the Russian embassy in Vienna. Raevsky was a proponent of Pan-Slavism; he facilitated contacts between Slavic intellectuals in the Russian Empire and their counterparts in Austria-Hungary, Serbia, and Bulgaria. Through him the tsarist regime funded many Slavic scholarly, social, and religious institutions in Galicia, Bukovyna, and Transcarpathia. In the late 1860s he recruited teachers, among them Western Ukrainian Russophiles, for Russian classical gymnasiums. He was a corresponding member of the Odessa Society of History and Antiquities (1848), a representative of Moscow's Slavic Philanthropic Committee (from 1860), and a founding member of the Dukhnovych Society in Prešov (1863). A biography of Raevsky, by K. Ustyianovych, was published in Lviv in 1884, and a volume of his correspondence was published in Moscow in 1975.

Rafalovych, Artem [Rafalovyč], b 25 November 1816 in Podilia gubernia, d 15 May 1851 in St Petersburg. Physician and traveler. He completed his medical studies at Berlin University and obtained a doctoral degree at Dorpat University (1838). In 1840 he was appointed a professor of forensic medicine at the Richelieu Lyceum in Odessa. As a senior member of a research expedition on the plague, he visited Turkey, Syria, Palestine, Egypt, Tunis, and Algeria (1846–8) and recorded valuable ethnographic and geographic information. He was elected a full member of the Imperial Russian Geographic Society and was appointed to the Medical Council of the Ministry of Internal Affairs (1850). His publications include medico-statistical surveys of Odessa, an account of his travels, a study of syphilis, and an introduction to forensic medicine.

Viktor Rafalsky

Rafalsky, Viktor [Rafal's'kyj], b 1919 in the Rivne region of Volhynia. Dissident and political prisoner. An author of unpublished short stories, novels, and plays, he was committed to Soviet psychiatric prisons in Leningrad, Dnipropetrovske, and Lviv for 24 years, for belonging to a clandestine Marxist group (1954–9), writing anti-Soviet prose (1962–5), and possessing anti-Soviet literature (1968–83). When he was finally released, in the winter of 1987, he was pronounced sane.

Rafes, Moisei, b 1883 in Minsk, Belarus, d 1942. Jewish-Russian revolutionary. A wig-maker by profession, he was a leading member of the social democratic Jewish Workers' *Bund from 1903, and after the February Revolution of 1917 he represented it in the Ukrainian Central Rada and Little Rada. In July 1917 he was appointed general secretary of state control, and he went with V. Vynnychenko and Kh. Baranovsky to Moscow to present the *Statute of the Higher Administration of Ukraine to the Russian Provisional Government. In November 1917 he became a member of the *Committee for the Defense of the Revolution in Ukraine. In January 1918 he voted against adopting the Fourth Universal that proclaimed the UNR as an independent state. He was critical of the UNR law on *national-personal autonomy, and he spoke out against the creation of a national army. In March 1918 he voted against the UNR's signing a separate peace treaty with the Central Powers at Brest-Litovsk. He was imprisoned under the Hetman government. At the Ukrainian Labor Congress in January 1919, Rafes voiced the Bund's support for rule by revolutionary councils, argued for a UNR Directory–Soviet Russian military alliance against the

Whites and the Allied intervention, and condemned the Directory for its war with the Bolsheviks and its inability to prevent pogroms against the Jews. In March 1919 he joined the Bolshevik party, and in December he was elected deputy chairman of the CP(B)U in Kiev gubernia. Rafes served as a leader of the Jewish Section in the Bolshevik Central Executive Committee and as a Red Army commissar. After the civil war ended, he directed the agitprop section of the Comintern Secretariat in Moscow and worked for the Comintern in China. Under Stalin he was removed from the Comintern, and worked in the Soviet film industry. He wrote memoirs about Ukraine in 1918 (1919) and books about the Bund in Ukraine in 1917–19 (1920), the national question (1921), the history of the Bund (1923), and the Chinese revolution (1927). He was arrested during the Stalinist purges, and probably died in a concentration camp.

R. Senkus

Raffalovich, George (pseud: Bedwin Sands), b 1880 in Cannes, France, d 17 May 1958 in New Orleans, Louisiana. Journalist and novelist. Ancestors on his father's side were Jews from Ukraine. A British citizen from 1906, he lived in London. He was honorary secretary of the so-called Ukraine Committee (1913–14); wrote over a dozen articles on the Ukrainian question for English journals (eg, *The New Age*, *Outlook*, *Contemporary Review*, and *The Commentator*) and the book *The Ukraine: Reprint of a Lecture Delivered on Ukrainian History and Present-Day Political Problems* (1914); translated and published a long article by M. Hrushevsky as *The Historical Evolution of the Ukrainian Problem* (1915); and edited the collection *The Russians in Galicia*, which was published by the Ukrainian National Council in New York in 1916. The best-informed observer of Ukrainian affairs in Great Britain in his day, he did much to try to influence British public opinion and gain support for the Ukrainian independence movement. After being accused of pro-German sympathies, he was forced to leave Britain. He moved to the United States, where he taught French and Slavic history at several universities. An account of his life and a bibliography of his writings by O. Kravcheniuk appeared in *Suchasnist'* (1963, no. 9).

Raguzinsky (Vladislavič), Savva [Raguzinskij], b ca 1660–70 in Dubrovnik or Hercegnovi, Dalmatia, d 18 or 28 June 1738 in St Petersburg. Serbian noble and businessman; prince of Illyria from 1711. During the hetmancy of I. Mazepa he leased the import-duty operations in the Hetmanate and exported Ukrainian potash. In 1710 Peter I awarded Raguzinsky large estates confiscated from the émigré *starshyna* supporters of Mazepa. Ca 1728–31 near Velyka Topal, Starodub regiment, he opened the first sail- and linen-cloth factory in Left-Bank Ukraine. The inheritors of Raguzinsky's Ukrainian estates, his nephews G. and M. Vladislavich, married daughters of the Cossack *starshyna* and continued operating his businesses in Ukraine. In 1770 Catherine II awarded their estates to Count P. Rumiantsev.

Rahoza, Mykhailo (Rohoza), b 1540 in Volhynia, d 1599. Metropolitan of Kiev. In 1576 he entered a monastery in Minsk and in 1579 became its archimandrite. He was appointed metropolitan of Kiev by the king of Poland and was consecrated by Patriarch Jeremiah II of Constantinople in August 1589 in Vilnius. He supported the

Church Union of *Berestia; he dispatched Bishops I. Potti and K. Terletsky to Rome to complete the negotiations, and he signed the act of union in 1596. For this he was opposed by the Orthodox brotherhoods and some of the Orthodox clergy and nobility, led by Prince K. Ostrozky.

Mariia Raievska-Ivanova (self-portrait, 1866)

Raievska-Ivanova, Mariia [Rajevs'ka-Ivanova, Marija], b 1840 in Havrylivka, Kharkiv gubernia, d 1912 in Kharkiv. Painter and educator; the first woman in the Russian Empire to be granted the title of artist by the St Petersburg Academy of Arts (1868). She studied painting in Dresden. She founded the *Kharkiv Painting School (1869) and later wrote a handbook on drawing for home and school (1879). Her oils and watercolors were influenced by the academic style – *Self-Portrait* (1866), *Death of a Peasant in Ukraine* (1868), and *Girl by a Fence*, for example.

Raievsky, Arkadii [Rajevs'kyj, Arkadij] (Raevsky), b 1848 in Voronezh, Russia, d 28 November 1916 in Kharkiv. Veterinarian and educator. A graduate of the Medico-Surgical Academy in St Petersburg (1871), he taught there from 1875 (as professor from 1879). In 1884 he became a professor at and the director of the Kharkiv Veterinary Institute, where he founded a veterinary-bacteriological station for developing vaccines, a zoohygienic laboratory, and courses for upgrading zemstvo veterinarians. One of the first organizers of veterinary education in the Russian Empire, in the 1870s he wrote *Patologicheskaia anatomiia i gistologiia domashnikh zhivotnykh* (Pathological

Anatomy and Histology of Domestic Animals) and *Rukovodstvo k izucheniiu infektsionnykh boleznei domashnikh zhivotnykh* (A Guide to the Study of Infectious Diseases of Domestic Animals).

Raievsky, Borys [Rajevs'kyj] (Rajewsky, Boris), b 19 July 1893 in Chyhyryn, Kiev gubernia, d 22 November 1974 in Frankfurt am Main. Biophysicist. A graduate of Kiev University, he became a docent (1929) and a professor (1934) at Frankfurt University. Concurrently he worked at the Max Planck Biophysics Institute in Frankfurt and served as its director (1937–66). As rector of Frankfurt University in the difficult postwar years, he played an important role in its reconstruction. His research dealt primarily with the biological effects of ionizing radiation, ultrasound, and nonionizing electro-magnetic radiation. He provided expert input into the process of establishing radiation protection standards.

Raievsky, Oleksander [Rajevs'kyj], b 4 February 1872 in Kharkiv, d 23 June 1924 in Moscow. Engineer. He graduated from the Kharkiv Institute of Technology (1895), worked as a specialist in locomotive design at the Kharkiv Locomotive-Building Factory (from 1900), and was a professor at the Petrograd Polytechnical Institute (from 1920). He was a pioneer in the development of locomotives in the Russian Empire and designed various early models of locomotive, including the first Soviet-built M-series locomotive. He developed methods for the calculation of loading parameters in locomotives.

Raievsky, Oleksandr [Rajevs'kyj], b 21 August 1891 in Kiev, d 14 September 1971 in Kiev. Psychologist. A graduate of Kiev University (1917), he taught psychology there (as a professor from 1925) and became chairman of the psychology department (from 1945). He worked in the Scientific Research Institute of Psychology of the Ukrainian SSR (1945–59). He published about 80 works dealing with methodological problems of teaching psychology, the psychology of language and thought, and the history of psychology, and wrote *Psikhologiia rechi v sovetskoi psikhologicheskoi nauke za 40 let* (1917–1957) (The Psychology of Language in Soviet Psychological Science over 40 Years [1917–1957], 1958).

Raievsky, Petro [Rajevs'kyj], b 1847 in Boryspil, Perekop county, Poltava gubernia, d 20 January 1886 in Kiev. Writer and ethnographer. He graduated from the Lublin Progymnasium in 1867. He took part in P. *Chubynsky's ethnographic expedition in Ukraine and worked for three years as a functionary of the Chernihiv surveying service. From 1875 he lived in Boryspil and devoted himself to writing. He contributed regularly to the daily *Kievlianin*, in which he published over 40 novelettes, stories, and true accounts of the peasantry of Chernihiv gubernia and life in Kiev and, from 1877, the folkways, folklore, and demonology of Volhynian Polisia. His prose appeared separately as *Stseny iz' malorusskago narodnago byta* (Scenes from Little Russian Folkways, 5 edns, 1871–86), *Epizody iz zhizni malorussov* (Episodes from the Life of the Little Russians, 1872), and *Novyia stseny i razskazy iz' malorusskago byta* (New Scenes and Stories from Little Russian Folkways, 1883). An epigone of N. Gogol, Raievsky used a half-Russian, half-Ukrainian vernacular in his works. Although many of them lack artistic merit,

they are a valuable source of information about the Ukrainian peasantry and their social and economic relations with the Russian and Polish nobility and clergy and Jewish taverners.

Raievsky, Serhii [Rajevs'kyj, Serhij], b 8 October 1905 in Faivka, Novhorod-Siverskyi county, Chernihiv gubernia. Art scholar. A graduate of the Kiev State Art Institute (1930), he was director of the Gallery of T. Shevchenko's Paintings in Kharkiv (1935–6). He wrote many scholarly and popular articles on Ukrainian painting, particularly on Shevchenko's artistic work, and published a number of books, including *Plakat A. Strakhova* (A. Strakhov's Posters, 1936) and *Zhyttia i tvorchist' khudozhnyka Tarasa Shevchenka* (The Life and Work of the Artist Taras Shevchenko, 1939).

Raiffeisen credit co-operative. A form of rural *credit union, first organized by W. Raiffeisen in Germany in the mid-19th century. The first such union in Russian-ruled Ukraine was founded in Ivanivka, Pryluka county, Poltava gubernia, in 1895, following the adoption of a new law on credit co-operatives. The unions were popular with Ukrainian peasants, who had little money. By 1915 there were 1,978 Raiffeisen credit unions in the nine Ukrainian gubernias of the Russian Empire, 176 in the Kuban, and several hundred more in predominantly Ukrainian regions of Bessarabia and other neighboring gubernias. In 1914 those institutions had 1,754,000 members, total assets of over 130 million rubles, and outstanding loans of over 117 million rubles. The unions were dissolved by the Bolshevik regime.

In Galicia most Ukrainian Raiffeisen credit unions were under the control of the *Patrons of Agricultural Associations (est 1899). Before the First World War another 33 were under the Audit Union of Ukrainian Co-operatives (RSUK). After the war the RSUK devoted considerable attention to activating Ukrainian Raiffeisen credit unions, and by 1938 there were over 500 individual offices. Most of them provided long-term loans to peasants and peasant co-operatives. They worked closely with the Ukrainbank credit unions, which served urban dwellers, and the Tsentrobank, which functioned as the overall co-ordinating body for Ukrainian credit co-operatives in the interwar period. All of the Raiffeisen credit co-operatives were abolished in 1939, when Soviet forces occupied Western Ukraine.

Raihorodka hoard. A cache of late *Bronze Age bronze items found in 1926 on the banks of the Aïdar River near Raihorodka, Novoaidar raion, Luhanske oblast. Among the items found were six sickles, the head of a mace, two sections of a sword, pins, and brass ingots. The pieces are characteristic of the *Sabatynivka and *Noua cultures, making Raihorodka an unusual discovery because of its location far to the east of the center of these cultures.

Raiky fortified settlement. A Rus' fortress town on the Hnylopiat River near Raiky, Berdychiv raion, Zhytomyr oblast. It was excavated in 1929–35 by T. *Molchanivsky and in 1946–7 by V. Honcharov. Raiky was one of a series of fortified outposts along the steppe frontier of Kievan Rus'. It occupied a territory of 1.25 ha and was surrounded by a deep (7 m) moat and earthen walls with towers. Excavations revealed the remains of 52 dwellings and a variety of tools used in agriculture, iron production (from

local ore deposits), metalworking, jewelry making, and ceramic production. The town was destroyed in 1241 by the Mongols; the remains of those who died defending the settlement were found in the stronghold.

Rail, water (*Rallus aquaticus*; Ukrainian: *pastushok*). A slender marsh bird, 11–45 cm in length, belonging to the family Rallidae. Rails are fast runners and good swimmers and divers, but poor fliers. The water rail is the only species represented in Ukraine; it has a long, reddish bill. Under Ukrainian climatic conditions it is a migratory bird inhabiting reed thickets and brush. It is considered an excellent game bird but has no other commercial value.

Railroad transportation. In Ukraine railroads are a major mode of transportation. Because the natural waterways lie from north to south, the east–west traffic must be borne by land transportation, in which railways played the dominant role. The lower cost of railroad building and maintenance gives them an advantage over motor vehicle transport. Ukraine's railroad network was developed by the imperial powers that controlled its territories and served the interest of the imperial economies, not Ukraine's economy.

The first railroad line in Ukraine, built in 1861, connected Lviv, Cracow, and Vienna. Later the line was extended southward toward Chernivtsi, in Bukovyna (1866), and eastward to Brody and Pidvolochyska (1867–71). By the turn of the century nine lines had spread rapidly from Lviv, the largest rail center in Western Ukraine. The other main junctions, with five lines each, were Stanyslaviv, Stryi, and Ternopil. The first railroad in Russian-ruled Ukraine was built in 1865. It ran from Balta to Odessa. In 1868 it was extended to Yelysavethrad and from there through Kremenchuk to Kiev (1872). By then Kiev had been connected by rail to Moscow (1869). In the 1870s the Moscow–Kursk–Kharkiv line was extended south to Lozova, and then branched out to Rostov-na-Donu and Sevastopol. In 1870 Kiev was connected with Odessa through Zhmerynka and with Moscow through Konotip. In 1880 to 1890 numerous trunk lines were constructed to connect the Donets coal region with the Kryvyi Rih Iron-ore Basin and the newly established heavy-industry complexes at Katerynoslav and Oleksandrivske (now Zaporizhia). By 1914 several other main lines, including the Mykolaiv–Bakhmach, Kiev–Donbas, Kiev–Warsaw, and Fastiv–Katerynoslav, were built. The railways in central and eastern Ukraine carried mostly wheat to the seaports for export and raw materials to the rapidly growing industry in the Dnieper region and in Russia. By 1913 Ukraine had approx 15,600 km of rails, some of them double-track trunk lines. Lines were built without any general plans, so that some important cities, such as Radomyshl, Bobrynets, and Pereiaslav, were left without rail service. The physical plant, rolling stock, and carrying capacity of the railways were well below European standards. The Ukrainian-Soviet War (1917–21) destroyed much of the railroad network in Ukraine.

In the interwar period the Soviet regime built some lines that had been planned before the war, including the Kharkiv–Dnipropetrovske–Kherson, Khvastiv–Novohrad-Volynskiy–Zhytomyr, Chernihiv–Horodnytsia, and Pavlohrad–Hryshyne lines and several short links in the Vinnytsia and Kiev regions serving the sugar industry. A number of short lines in the heavily industrialized Dnieper–Donets region were opened to relieve congestion on the

RAILROAD TRANSPORTATION IN UKRAINE

trunk lines, such as Fedorivka–Snihurivka in the Kherson region, Vesele–Dniprorudne in the Zaporizhia region, Dolynska–Pomichna in the Kirovohrad region, Novomoskovske–Dniprodzerzhynske in the Dnipropetrovske region, and Horlivka–Ocheretyne in the Donetsk region. Many of the new lines had a special purpose and were restricted to a certain industry or enterprise. Altogether about 4,000 km of track were added to Ukraine's network. During the Second World War over 9,200 km of track were destroyed. Ukraine's railways returned to their prewar capacity only in 1948. No new lines were built; instead some old ones in the heavily populated areas of Western Ukraine were shut down. To stimulate trade with Western Europe the Lutske–Ustyluh line has been rebuilt recently.

For a country of its size Ukraine's railroad network is inadequate. At present the two major junctions in Ukraine are Kharkiv and Lviv, with eight railroad lines each. Kiev, Bakhmach, Kupianka, Yasynuvata, Krasnoarmiiske, Korosten, Kovel, Shepetivka, Stryi, Ternopil, and Pomichna are five-line junctions. Many other important junctions are small towns, such as Koziatyn, or even villages, such as Hrebinka and Romodan. The republic's capital, Kiev, has only one terminal, which until 1933 was a wooden structure. Another terminal is planned in Bykivnia, just outside the city. Kharkiv has three terminals; Lviv, Odessa, Poltava, and Dnipropetrovske have two terminals each.

Since the 1950s the railway network had been expand-

ed and improved. Many trunk lines have been double-tracked, and approx 7,800 km have been electrified. With the exception of some local lines, all lines use either electric or diesel power. Lines linking Ukraine with other republics of the former USSR and international lines, such as the Kiev–Lviv–Chop, Koziatyn–Kovel, and Lviv–Odessa lines, are double-track and electrified. The heavily used Kiev–Konotip trunk line is being rebuilt into a three-track main line. Modern tracks consisting of heavier rail (R-100 instead of R-50 or R-75), a solid ballast-type bed, concrete ties, and deep side ditches for drainage have a higher load capacity. Containers and longer cars with eight instead of four axles have been introduced. More powerful locomotives make it possible to pull heavier loads at higher speeds. By European standards train speeds are still quite low: the technical speed is approx 55 km/hr, and sectional speed is 45 km/hr. Most locomotives used in Ukraine are built at its own locomotive works (see *Locomotive industry). Major repair shops are located in Luhanske, Popasna, Dnipropetrovske, Odessa, Lviv, and Stryi.

With minimal capital outlays Soviet railroads were run to the point of exhaustion. Whereas Western railroads require sizable government subsidies, Soviet railroads were profitable with an index of efficiency between 0.75 and 0.85.

The Ukrainian system suffers less from obsolete or outdated rolling stock than from managerial incompetence. Infrequent train runs, empty freight runs, poor traffic dis-

TABLE 1
Output of Ukrainian railroad directorates, 1965-87

| Directorate | Network (in 1,000 km) | Category of activity | | | | | | |
|--------------|--------------------------|----------------------|-----|-----|----|----|----|----|
| | | A | B | C | D | E | F | G |
| Donets | 2.9 | 12.8 | 2.7 | 2.5 | 40 | 15 | 35 | 10 |
| Lviv | 4.5 | 19.8 | 1.6 | 1.3 | 18 | 13 | 28 | 41 |
| Odessa | 4.2 | 18.5 | 2.5 | 2.2 | 15 | 30 | 15 | 40 |
| Dnieper | 3.2 | 14.1 | 2.5 | 2.3 | 35 | 28 | 24 | 13 |
| Southern | 3.6 | 9.2 | nd | 4.3 | 10 | 18 | 6 | 66 |
| Southwestern | 4.7 | 20.7 | 2.7 | 4.0 | 12 | 23 | 12 | 53 |

A = percentage of Ukrainian network.

B = percentage of the former USSR freight output.

C = percentage of the former USSR passenger output.

D = percentage of Ukraine's exports to countries within and outside the former USSR.

E = percentage of Ukraine's imports from countries within and outside the former USSR.

F = percentage of Ukraine's local traffic.

G = percentage of Ukraine's transit traffic (transport of goods not produced or sorted in Ukraine).

TABLE 2
Railroad transportation: basic indexes, 1940-86

| Category | 1940 | 1970 | 1980 | 1986 |
|---|---------|---------|----------|----------|
| 1. Length of network (in 1,000 km) | 20.1 | 22.06 | 22.55 | 22.72 |
| including electrified lines | 0.2 | 5.3 | 7.1 | 7.4 |
| 2. Industrial rail (in 1,000 km) | nd | 20.5 | 24.8 | 25.7 |
| 3. Density | | | | |
| (km per 1,000 sq km) | 33.3 | 36.5 | 37.4 | 37.6 |
| (km per 10,000 people) | 4.9 | 4.7 | 4.5 | 4.5 |
| <i>Freight traffic</i> | | | | |
| 4. Output (in billion Tkm ¹) | 71.9 | 380.2 | 469.3 | 506.3 |
| 5. Volume (in million t) | 200.0 | 794.7 | 981.1 | 1,042.9 |
| Coal | nd | 229.0 | 247.0 | 243.0 |
| Ores | nd | 112.0 | 132.0 | 132.0 |
| Chemical products | nd | 192.0 | 261.0 | 267.0 |
| Other products | nd | 262.0 | 341.0 | 367.0 |
| Container haul (in 1,000 t) | - | - | 6,953.0 | 10,567.0 |
| Packaged haul (in 1,000 t) | - | - | 38,565.0 | 53,435.0 |
| 6. Density of haul (in million Tkm) | 3.6 | 17.2 | 20.8 | 22.3 |
| (for the former USSR) | (4.3) | (18.5) | (24.3) | (26.3) |
| 7. Average trip distance per t of haul (in km) | 359.5 | 458.4 | 478.0 | 485.4 |
| (for the former USSR) | (695.0) | (861.0) | (923.0) | (945.0) |
| <i>Passenger traffic</i> | | | | |
| 8. Output (in billion Pkm ²) | 16.4 | 42.1 | 60.1 | 68.3 |
| 9. Volume (in million passengers) | 242.6 | 506.4 | 648.9 | 635.5 |
| 10. Density of haul (in million Pkm) | 0.8 | 1.8 | 2.5 | 3.0 |
| (for the former USSR) | (1.0) | (2.0) | (2.4) | (2.8) |
| 11. Average trip distance of 1 passenger (in km) | 67.6 | 83.1 | 92.6 | 107.5 |
| (for the former USSR) | (73.0) | (82.0) | (84.0) | (92.0) |
| <i>Percentage of railway output relative to Ukraine's transportation output</i> | | | | |
| 12. Freight | - | 62.2 | 60.7 | 56.2 |
| 13. Passenger | - | 43.8 | 38.9 | 39.8 |

¹Tkm = tonnes per kilometer.²Pkm = passengers per kilometer.

tribution, and lower locomotive working time are the main sources of inefficiency. Suburban traffic has its own problems. The major one is the irregularity of traffic.

Ukraine was divided into six railroad directorates: Donets, Dnieper, Southern, Lviv, Southwestern, and Odessa. The directorates enjoy some autonomy in planning and regulating rail traffic and services, but capital

for the construction of new railroads and basic improvements was controlled by the central government in Moscow.

Table 1 shows that traffic density was distributed unevenly. The Donets railroad had the highest traffic density in the USSR network. The Dnieper railroad was export-oriented, with freight density much higher than the net-

work's average. The Southern railroad was plagued with great irregularities of traffic flow; it had a high percentage of empty runs. The Southwestern railroad had a significant transit traffic, but its freight flow was close to equilibrium level. The Lviv railroad was a transit-type directorate with traffic irregularities close to the former Union average. The Odessa railroad was known for its large share of imports and a traffic irregularity close to 50 percent.

E. Bej

Railroad-car industry. A branch of the machine-building industry that builds and repairs passenger and freight cars used in railroad transportation. Before the 1917 Revolution railroad cars were manufactured in five factories, in Kiev, Katerynoslav, Mykolaiv, Kharkiv, and Horlivka. In 1900 their output accounted for only 4 percent of all the railroad cars produced in the Russian Empire. Today, unlike the *locomotive industry, the railroad-car industry in Ukraine remains underdeveloped. The only major plants producing railroad cars are in Kriukiv (the *Kriukiv Freight-Car Plant) and Dniprodzerzhynske, and their output is limited to freight cars. No passenger cars are produced in Ukraine. Railroad cars are repaired in most major railroad centers in Ukraine. The largest is located in Darnytsia, a suburb of Kiev. Other major depots are in Popasna, Luhanske oblast, and in Dnipropetrovske.

Raion. An administrative-territorial unit established in the Ukrainian SSR in 1923. It was part of the conversion from the territorial system of gubernias, counties, and volosts to okruhas (consolidated into oblasts in 1932), raions, and rural soviets. In size the raions were smaller than counties but larger than volosts. In 1923 there were 706 set up in the Ukrainian SSR, where they replaced 1,989 volosts. The number and size of the raions changed constantly: there were 666 in 1925, 383 in 1930, 500 in 1938, 786 in 1956 (including those in Western Ukraine and the Crimea), and 604 in 1961. Another reorganization, in 1962, reduced their number to 251, but the number rose to 394 in 1965, 447 in 1966, 475 in 1968, 476 in 1970, and 481 in 1990. Cities with a population of over 100,000 are also divided into raions. There were 90 city raions in 1970 and 120 in 1990.

The raion council was one of the organs of the government system. It was elected for two years, and appointed an executive committee, which had its own bureaucracy. The raion executive oversaw rural and town (smt) soviets, and city councils of the smaller cities, and was responsible to higher administrative authorities and to the raion soviet. Because the executive committee had to make decisions and take action in all areas under the soviet's jurisdiction, the raion soviet was reduced to the status of a supplementary organ of the administrative system. The executive was supposed to convene the soviet at least six times annually to inform it about the state of the raion, but that was rarely done. In addition, the sessions of the soviet, which were usually brief, did not permit in-depth discussion. Standing commissions advising the executive were more influential than the soviet. Nonelected individuals could be named to the commissions. Raion jurisdiction was fairly limited and local. It had hardly any control over industry and dealt mostly with agricultural, co-operative, community, and cultural affairs. (See also *Soviet.)

The true source of local authority at the raion level was the raion committee of the CPU, which issued directives to both the soviet and its executive committee.

A. Bilynsky

Raion people's court. See People's court.

Rais, Emmanuel [Rajs], b 1909 in Khotyn, Bessarabia, d 27 January 1981 in Paris. Literary critic and translator of Jewish origin. He studied law and literature at Bucharest and Paris universities (1934–40) and earned a PH D from the Sorbonne (1972). He specialized in the study of lyric poetry and published many studies of French, Russian, and Ukrainian literature. His interest in Ukrainian poetry began in the mid-1950s; thereafter he published a number of articles on the works of E. Andrievska, M. Drai-Khmara, V. Svidzinsky, various émigré poets, and poets in the Ukrainian SSR (particularly the **shestydesiatnyky*) in *Ukrains'ka literaturna hazeta and Suchasnist'*. He also wrote articles of general interest on esthetics and philosophy. He edited and wrote the introduction to a collection of Ukrainian poetry in French translation, *L'Ukraine, cette inconnue* (1967).

Raitsa (from Polish *rajca*). A member of the municipal **magistrat*. At first each *magistrat* had 4 to 8 elected *raitsi* (aka *ratmany, radnyky*), but with time their number increased to 12 and even 24, and they were appointed for life by the *viiit*, starosta, or voivode. The *raitsi* ran the municipal administration, civil court, economy, and police. In Austrian-ruled Western Ukraine they and the *magistrat* were abolished in 1780, but in Russian-ruled Ukraine they survived until the judicial reform of 1864.

Rak, Liudmyla, b 1909. Linguist. An associate of the AN URSR (now ANU) Institute of Linguistics, she was a coauthor of a Ukrainian orthographic school dictionary (1936) and a Russian-Ukrainian agricultural dictionary (1963), and wrote articles on the dialectal features of the village of Kodnia in the Zhytomyr region and on the lexical-morphemic features, hyperbole, and synonyms in folk dumas.

Rak, Yaroslav, b 29 July 1908 in Vynnyky, Lviv county, Galicia, d 8 November 1989 in Maplewood, New Jersey. Lawyer, youth leader, and political activist. In the 1930s he was active in the Ukrainian Sports Union in Lviv and president of the Ukrainian Students' Sports Club. An OUN member, he was tried for participating in the 1934 assassination of B. Pieracki. In 1939–40 he headed the youth department of the Ukrainian Central Committee in Cracow, and in 1941–4 he was imprisoned in the Auschwitz concentration camp. After the Second World War he was in charge of the youth department of the Central Representation of the Ukrainian Emigration in Germany (1945–8) and was a member of the executive of the *Plast Ukrainian Youth Association (1945–53). Later he emigrated to the United States, where he continued to work with youth and in education.

Rakhiv [Raxiv]. v-5. A city (1989 pop 15,800) on the Tysa River and a raion center in Transcarpathia oblast. It was first mentioned in historical documents in 1447. Lying on the trade route between Galicia and Transylvania, Moldavia, and Hungary, the town was a major livestock trading

center in the 17th and 18th centuries. In 1920 Rakhiv was transferred from Hungary to Czechoslovakia, and in 1945 it was annexed to the Ukrainian SSR. It acquired city status in 1958. Most of its inhabitants work in industry, producing forest products, cardboard, and vegetable oil.

Rakhiv Mountains. See Hutsul Alps.

Rakhlin, Natan [Raxlin], b 10 January 1906 in Snovske (now Shchors), Horodnia county, Chernihiv gubernia, d 28 June 1979 in Kazan (buried in Kiev). Orchestral conductor. He studied at the Kiev Conservatory (1923–7) and the Lysenko Music and Drama Institute and then served (1937–62, with brief interruptions) as the main conductor of the State Symphony Orchestra of the Ukrainian SSR. In 1941–5 he was also the main conductor of the State Symphony Orchestra of the USSR in Moscow. He premiered B. Liatoshynsky's *Third Symphony*, V. Kossenko's *Heroic Overture*, and works by V. Homoliaka, H. Maiboroda, and L. Kolodub. He was the first to record scores by M. Kolachevsky, V. Kosenko, V. Sokalsky, L. Revutsky, B. Liatoshynsky, A. Shtoharenko, and others for the Melodiya label. From 1939 he also taught at the Kiev Conservatory.

Roman Rakhmanny

Ivan Rakovsky

Rakhmanny, Roman [Raxmanny] (pseud of Roman Olynyk [Olijnyk]), b 26 December 1918 in Lviv. Journalist and political analyst. As a postwar émigré in Germany he worked as an editor of Ukrainian newspapers, such as *Chas* and *Ukraïns'ka trybuna*. After emigrating to Canada in 1948, he was chief editor of *Homin Ukraïny* (1949–51). From 1959 to 1984 he worked as a producer for the Ukrainian section of Radio Canada International, and he served as section head from 1975. He defended his PH D dissertation at McGill University in 1962 and taught courses in Ukrainian studies there for several years. Rakhmanny is the author of hundreds of articles and essays on Ukrainian topics in émigré Ukrainian, Canadian, American, and Western European newspapers and periodicals. These essays range over the fields of politics, literature, and history and have appeared in several collections, including *Krov i chornylo* (Blood and Ink, 1960), *Na p'iatdesiatii paraleli* (On the Fiftieth Parallel, 1969), *Vohni samostiinoi Ukraïny* (Flames of an Independent Ukraine, 1978), *In Defense of the Ukrainian Cause* (1979), and *Ukraïna atomnoho viku* (Ukraine in the Atomic Age, 2 vols, 1987, 1988).

Rákóczi, György I, b 8 June 1593, d 11 October 1648 in Sárospatak, Transylvania. Prince of Transylvania from 1630; father of György II Rákóczi. From 1644 he was a leader of the anti-Habsburg coalition in the Thirty Years' War, and in 1645 he annexed part of Transcarpathia. After the death of King Władysław IV Vasa in 1648, Rákóczi was a candidate for the Polish throne. To that end he solicited support from Hetman B. Khmelnytsky through Yu. Nemyrych. Khmelnytsky wrote a letter promising military support to Rákóczi, but the hetman's delegation, headed by I. Vyhovsky, that took the letter to Transylvania did not arrive until after Rákóczi's death.

Rákóczi, György II, b 30 January 1621 in Sárospatak, Transylvania, d 7 January 1660 in Nagyvárad (now Oradea), Transylvania. Prince of Transylvania from 1648; son of György I *Rákóczi. He continued his father's relations with Hetman B. Khmelnytsky until Khmelnytsky's military intervention in Moldavia in 1652. Rákóczi then broke with Khmelnytsky and joined the side of Wallachia and Poland against Ukraine. In 1654, however, he resumed diplomatic relations with Khmelnytsky, and in 1656 he entered into an anti-Polish coalition with Transylvania, Ukraine, and Sweden. In 1657 Rákóczi's army captured a large part of Poland, including Cracow and Warsaw, with the help of Swedish and Ukrainian forces. He quickly proved not to be an able military or political leader, however, and Khmelnytsky withdrew his troops (commanded by Col A. Zhdanovych) to Ukraine. Abandoned by his allies, Rákóczi was surrounded by the Poles on 23 July 1657 and forced to surrender near Chornyi Ostriv, in Podilia.

Rakovets burial site. A *Cherniakhiv culture burial ground of the 3rd to 4th century near Rakovets, Zbarazh raion, Ternopil oblast. Excavations in 1962–3 revealed 18 burials, some of which were cremations. Items of interest discovered included two cylindrical earthenware goblets with solar and lunar designs on them and a stone idol.

Rakovsky, Ivan [Rakovs'kyj], b 5 March 1815 in Stavne, Transcarpathia, d 3 December 1885 in Iza, Transcarpathia. Russophile Greek Catholic clergyman and publicist. He studied at the Uzhhorod Theological Seminary and was ordained in 1839. His work in Uzhhorod (1844–50) as vice-rector of the theological seminary and lecturer at the teachers' seminary led to a position in Budapest (1850–9) as a translator and editor of a government bulletin for the peoples of the Hungarian crownland. During this period he developed his contacts with Galician Russophiles and published the newspapers **Tserkovnaia gazeta* (1856–8) and *Tserkovnyi viestnik dlia rusynov avstriiskoi derzhavy* (1858). He became a leading figure in the *Society of St Basil the Great and wrote arithmetic, geometry, and Russian language textbooks. He believed that Russian should be the language of Transcarpathia, and his writings generally used a standard Russian rather than **yazychiie*. In 1871 a Magyarophile element took over the St Basil society and ousted Rakovsky from the leadership. He then largely removed himself from public life.

Rakovsky, Ivan [Rakovs'kyj], b 24 August 1874 in Protesy, Zhydachiv county, Galicia, d 1 March 1949 in Newark, New Jersey. Anthropologist, zoologist, pedagogue, and civic leader; honorary member of the Shevchenko Sci-

entific Society (NTSh, full member from 1903). As a student he helped found the *Academic Hromada and served as its first president. He graduated from Lviv University (1896; PH D, 1903) and taught secondary school in Kolomyia. In 1903–5 he took part in F. *Vovk's anthropological expeditions to the Carpathians (Lemko, Boiko, and Hutsul regions) and Podilia. In Lviv (1908) he cofounded the Teacher's Hromada and was active in the NTSh (as secretary to the president, M. Hrushevsky) as well as in the Prosvita and Vidrozhennia societies. After the First World War Rakovsky was one of the founders of the *Lviv (Underground) Ukrainian University, where he taught anthropology and zoology (1921–5). In 1925, in an essay he wrote with S. Rudenko, he developed a theory (contrary to Vovk's) that the Ukrainian population consisted not of one racial (Dinaric) type but of at least six European racial types (although with the Dinaric type predominant). He was editor in chief of *Ukrains'ka zahal'na entsyklopediia* (The Ukrainian General Encyclopedia, 1930–5). Twice he was elected president of the NTSh, first in Lviv (1935–9) and then in Germany (1946–9). After the Second World War he emigrated to Germany, and then in 1948 to the United States. His publications include articles in zoology and on the anthropology of Ukrainians, science textbooks, and popular works on science, such as *Novyi svitohliad s'ohochasnoi nauky* (The New Worldview of Contemporary Science, 1947).

Khristian Rakovsky

Rev Yosyp Rakovsky

Rakovsky, Khristian [Rakovs'kyj, Xrystyian], b 1 August 1873 in Gradets, Bulgaria (then part of the Ottoman Empire), d 11 September 1941. Political activist and Soviet Ukrainian state figure. Active in the pre-1914 Bulgarian and Rumanian socialist movements, Rakovsky opposed participation in the First World War and served on the Central Bureau of the antiwar Revolutionary Balkan Social Democratic Labor Federation (est 1915). In 1918 he joined the Bolshevik party and served as chairman of the Supreme Autonomous Collegium established in Odessa to suppress counterrevolution in Ukraine and Rumania. He was also a member of the Central Executive Committee of Soviets of the Rumanian Front, Black Sea Fleet, and Odessa Military District (RUMChEROD) and participated in Soviet diplomatic delegations to Hetman P. Skoropadsky's government and to Germany. From January 1919 until July 1923, with interruptions, he headed the Soviet Ukrainian government. He opposed Ukrainian 'particularism' in the name of internationalism, and went so far as

to question the existence of a distinct Ukrainian nationality. By the end of 1921, however, he had changed his views; he insisted on greater sensitivity with regard to the Ukrainian national question and also sought to expand the political and economic autonomy of the Ukrainian SSR. At the 12th congress of the Russian Communist party in April 1923, he sharply criticized J. Stalin's position on the national question. After being removed from the Ukrainian leadership he served as USSR ambassador to Britain (1923–5) and France (1925–7). Having been expelled from France for revolutionary activity, he returned to Ukraine in the fall of 1927 and spent a month organizing the *Left Opposition there. In December 1927, at the 15th congress of the Russian Communist party, he was expelled from the party, and a month later he was exiled to Astrakhan. From 1929 he was the recognized leader of the Left Opposition within the USSR. In February 1934 he submitted to party discipline and was allowed to return to Moscow, where he directed the scientific research institutes of the Commissariat of Health. In the fall of 1937 he was arrested as a spy, and in March 1938 he was sentenced to 20 years' imprisonment. He was shot in a Soviet prison.

J.-P. Himka

Rakovsky, Mykhailo [Rakovs'kyj, Myxajlo], b 20 April 1916 in Yelets, Orel gubernia, Russia. Soviet Ukrainian historian. After graduating from the Moscow Pedagogical Institute he did political work in the Red Army (1939–50). From 1951 he taught at Odessa University, and in 1968 he became a professor and the head of the department of the history of the USSR. His specializations included the revolutionary period in Southern Ukraine and primary source materials for the study of Soviet history.

Rakovsky, Yosyp [Rakovs'kyj, Josyp], b 6 October 1870, d 16 November 1944 in Lviv. Agronomist, educator, and pioneer of civic agronomy in Galicia. After graduating from the Greek Catholic Theological Seminary in Lviv he studied agronomy at Dubliany and worked as an agronomist and teacher of natural science and agronomy in teachers' seminaries in Sokal, Zalishchyky, and Stanyславiv. He organized Prosvita reading rooms, co-operatives, and branches of *Silskyi Hospodar. For many years he was president of Silskyi Hospodar in Stanyslaviv. In 1909 he helped organize the First Educational-Economic Congress in Lviv. He contributed articles to economic journals and wrote several popular booklets on farming.

Rakushka, Roman [Rakuška] (Romanovsky), b 1622 in Nizhen, d 1703. Member of the Cossack *starshyna* and Orthodox priest. He was inspector general of the Hetman state's treasury and treasurer of Nizhen regiment in 1654–5, captain of Nizhen company in 1658–63, judge of Nizhen regiment in 1659, and general treasurer of the Hetman state under Hetman I. Briukhovetsky in 1663–8. After clashing with Hetman I. Mnohohrishny he moved to Right-Bank Ukraine, was ordained, and in 1668–75 served

as an archpriest in Bratslav. In 1670 he was Metropolitan Y. Tukalsky-Neliubovych's envoy to the Patriarch of Constantinople. In 1676 he returned to Left-Bank Ukraine and settled in Starodub, where he served as pastor of St Nicholas's Church. According to many historians (eg, M. Hrushevsky, K. Kharlampovych, D. Doroshenko, O. Ohloblyn, M. Petrovsky, V. Romanovsky, M. Marchenko, Ya. Dzyra) Rakushka is the author of the *Samovydet's Chronicle.

Ralston, William, b 4 April 1828 in London, d 6 August 1889 in London. English scholar; corresponding member of the Russian Imperial Academy of Sciences from 1885. One of the first English scholars to specialize in Russian studies, from 1853 he worked at the British Museum. Ukrainian ethnographic and historical material is found in his *Songs of the Russian People as Illustrative of Slavonic Mythology and Russian Social Life* (1872), his lectures *Early Russian History* (1874), and his translation *Russian Folk Tales* (1878). He published reviews of V. Antonovych and M. Drahomanov's collection of Ukrainian historical songs and I. Rudchenko's collection of chumak songs.

Raltsi. A tribute in kind or money paid at Christmas and Easter by Cossacks, peasants, and burghers to the regimental and company Cossack *starshyna*, the municipal **magistrat*, and landed gentry in the Hetman state. Legally it was held to be voluntary, but in reality it was compulsory. In the 1720s Hetman I. Skoropadsky tried to abolish the tribute, but it lasted in Left-Bank Ukraine until the 1780s and in Kiev until the 1820s.

Rank estates (*rangovi maietnosti*). Landed estates in the Hetman state awarded to *Cossack *starshyna* by the hetman for the duration of their commission in return for their service and costs incurred by them in the course of service. They were introduced by Hetman B. Khmelnytsky after 1654 and were distributed out of the land fund created by the confiscation of holdings of Polish landowners and the Catholic church. Military or free lands were also used. Larger rank estates (*volosti*) were granted to hetmans by the tsar. All rank estates were administered by the General Military Chancellery, but their size was not standardized according to rank until 1732. At that time it was established that the general quartermaster was to receive an estate with 400 peasant households; the general justice and general treasurer, one with 300 households; and so on. Russian officials in Ukraine were also given estates (eg, P. Rumiantsev, president of the Little Russian Collegium). In the 18th century the number of rank estates awarded increased rapidly. Holders attempted to transform them into hereditary property, but only a few senior officials who were granted estates by the tsar succeeded. In 1764, 48 persons held 116 rank estates, with a total of 2,791 peasant households in the nine regiments of the Hetman state. After the abolition of the Hetmanate in the

1780s, most of the estates became the private property of their holders and their descendants, who received Russian noble status.

Rank peasants (*rangovi seliany*, *rangovi pospolyti*). Peasants who lived on rank estates in the Hetman state and Slobidska Ukraine in the 17th and 18th centuries. They were obligated to perform various duties for the estate holder, including tilling, harvesting, hay mowing, and timber cutting, and had to pay rent in agricultural products. Their duties were increasingly onerous and by the 18th century they approached the conditions of serfdom. After the abolition of the autonomy of Left-Bank Ukraine on 14 May 1783, most rank peasants became serfs, and the minority became *state peasants.

Ranks, military. See Military ranks.

Ranks, Table of (Russian: *tabel o rangakh*) A system for establishing equivalences in rank among the branches of service in the Imperial Russian military, civil, and court bureaucracies and for defining the hierarchy of offices and the ladder of promotion. The system was established by Tsar Peter I in January 1722, and existed (with several major modifications) until November 1917. The intent of the table was to facilitate the development of a professional and competent service elite for the state.

Initially there were 14 ranks defined in the table in ascending order. The table did not include the lowest functionaries in the bureaucracy or noncommissioned soldiers and seamen. The lowest or 14th rank was adjutant in the army, ship commissary in the navy, and collegial registrar in the civil service; the highest or 1st rank was field marshal, admiral general, and chancellor. At first everyone whose rank was in the table was considered to have noble status, and everyone in the 10th rank in the military or the 8th rank in the civil service achieved hereditary noble status. Because too many people were considered to be gaining noble status, by the mid-19th century only civil servants above the 5th rank and military officers above the 7th rank were being granted hereditary nobility, and only those above the 10th rank achieved personal nobility.

In the 17th and 18th centuries the Hetman state developed its own system of estates. In order to preserve its rights and autonomy in response to greater Russian influence and interference in its internal affairs, the Cossack *starshyna* sent formal requests in 1733, 1742, 1756, 1763, and 1767 that Moscow recognize the legitimacy of the various Cossack titles and offices. Moreover, in 1756 Hetman K. Rozumovsky presented Moscow with a Ukrainian table of ranks that consisted of 12 classes, without the *hetman and *acting hetman.

Beginning in the 1760s, in order to undermine the independence of the Hetman state and to attract the support of individual Cossack officers, Catherine II often granted Ukrainians ranks from the Russian table. When the Cossack regiments were reformed as regular Russian army units in 1783, the officers were given ranks from the Rus-

Hetman K. Rozumovsky's Table of Ranks, 1756, with a list of all 'Little Russian' (Ukrainian) ranks*

| Rank | Office |
|------|---|
| | Hetman |
| | Acting hetman |
| 1st | General quartermaster |
| 2nd | General judge; General treasurer |
| 3rd | General chancellor; General flag-bearer; General osaul; General standard-bearer |
| 4th | Colonel |
| 5th | Fellow of the standard; Osaul of the General Artillery; Colonel of mercenary cavalry regiment; Secretary of the General Military Court; Senior chancellor of the General Military Chancellery |
| 6th | General Artillery flag-bearer; Regimental judge; Quartermaster of mercenary cavalry regiment |
| 7th | Regimental secretary, osaul, and flag-bearer; Translator of the General Military Chancellery |
| 8th | Captain; Chancellor of the General Military Chancellery; Otaman of the General Artillery; Osaul, flag-bearer, and secretary of mercenary cavalry regiment |
| 9th | Fellow of the banner; Regimental court secretary; Captain of the hetman's personal guard; Otaman of company city; Captain of mercenary cavalry |
| 10th | Otaman of the hetman's personal guard; Company osaul, flag-bearer, and secretary; Regimental chancellor; Regimental artillery flag-bearer and otaman; Mercenary company officer |
| 11th | Kurin otaman; Mayor (<i>horodnychyi</i>) of company city; Village otaman |
| 12th | Cossack; Guard; Member of the hetman's guard (<i>zholdak</i>); Mercenary cavalryman (<i>kompaniiets</i>); Artilleryman (<i>pushkar</i>) |

*According to D. Miller (1892)

sian army table. The process was not governed by strict rules, and the granting of a rank to a person depended not so much on his previous position as on his particular accomplishments, abilities, and support for the Russian administration. From 1784 all Ukrainian titles were officially prohibited. With the proclamation of the new Charter of the Nobility in 1785, many of the restrictions keeping the *starshyna* from entering the system of the Russian nobility were removed. With the introduction of the Russian judicial system in 1796, Ukrainian administrative positions were redefined according to an equivalent in the Table of Ranks (eg, *general judge was equivalent to the 4th rank, county chancellor to the 10th rank, and *voznnyi* to the 14th rank).

Ranks and degrees, academic. In the former Ukrainian SSR the granting of academic rank and degrees was tightly controlled by the central authorities in Moscow. Students of postsecondary institutions (known common-

ly by the acronym VUZ), including universities, and scientific research institutes wrote major course essays (*kursovi roboty*), and in the last year of their program they defended a thesis (*dyploмна robotа*) before a committee. Those who intended to work as scholars could write a candidate's dissertation under the supervision of an academic adviser. Upon completion they could work in their field and go on to complete a doctoral dissertation. Candidate's dissertations were limited to 150 pages (180-195 pages in the humanities), and doctoral dissertations to 300 pages (360-390 pages in the humanities). The general thrust of a candidate's dissertation also had to appear in published articles. The results of the public defense of a dissertation before a special council of the VUZ or scientific research institute were submitted to the All-Union Higher Attestation Commission (VAK), whose presidium usually then granted a diploma certifying that the applicant had secured the rank of a candidate of sciences. Doctoral students were expected to publish a monograph that set out a new direction in research. The monograph was printed in a run of 100 and distributed to relevant institutions. The applicant then had to secure the opinions of one reviewer and two or more opponents.

The system sought to establish a single and hermetic organism of Soviet scholarship and science, monolithic in terms of ideology and language. In rare cases linguists and literary scholars were permitted to defend their dissertations in their native tongue, but all documents submitted to the VAK had to be in Russian. The Ukrainian VAK in Kharkiv was dissolved in the early 1930s.

Those who were granted their rank or degrees worked in a scientific research institute or taught in VUZs. They then passed through the academic *nomenklatura* of junior, senior, leading, and chief academic worker. In other cases scholars were given the rank of assistant, docent, or professor. The latter two were conferred by the VAK upon the recommendation of VUZ councils. The title of professor was given only to scholars with doctorates, and they were entitled to appointment, election, and re-election as department heads or institute directors.

The ranks were determined by the presidium of the Academy of Sciences of Ukraine, which also determined salary levels. The character and direction of Soviet academic studies were determined by the leadership of the Academy of Sciences of the USSR and the republics (selected from various academic institutions), which was under the control of the central committees of the Communist party. The resolution of the Council of Ministers of the USSR 'On the Determination of Academic Appellations,' adopted on 29 March 1945 and revised on 20 February 1956, provided for the ranks of corresponding member, academician, and honorary academician in the academies of sciences.

Specialists were trained at the various VUZs in accordance with a similar planning procedure. Professionals and scholars were then assigned to maintain cadres and to disseminate Soviet conceptions of the construction and functioning of society.

S. Bilokin

Ranok (Morning). A publishing house in Kiev owned and operated by O. *Kovalenko and I. Samonenko. Between 1906 and 1908 it issued 18 literary and political pamphlets with a combined pressrun of some 40,000 copies.

Ranok (Morning). An organ of the *Independent Greek church, published in Winnipeg from April 1905 and edited by I. Bodrug. It first appeared monthly; then, after a brief interruption, semimonthly (1907–10); and finally weekly. *Ranok* contained articles on religion written from a Presbyterian perspective and often sharply polemical in tone; covered general developments in Ukraine and Canada; and printed satire, prose, and poetry. In 1920 it merged with **Kanadyiets'* to form **Kanadiis'kyi ranok*.

Ranok (Morning). A weekly and later irregular organ of the Union of Hetmanites, published in Heidenau, West Germany, from October 1948 to July 1951. It published articles on political and community affairs and engaged in vigorous polemics with other émigré newspapers. The editor was I. Marchenko.

Ranok (Morning). An illustrated journal of literature and political, cultural, and current affairs, published monthly in Kiev since 1953. Until July 1965 it was called *Zmina*, and until 1991 it was published by the Komsomol. In the 1960s and early 1970s *Ranok* served as an important forum for the better writers of the postwar generation, among them H. Tiutiunyk, V. Shevchuk, I. Dziuba, Ye. Hutsalo, I. Drach, M. Synhaivsky, M. Vinhranovsky, Ye. Sverstiuk, V. Didenko, and V. Korotych. Its popularity at that time is reflected in the fact that its pressrun was increased from 71,100 in 1960 to 170,000 in 1975. By 1984 it had been reduced to 113,000.

Rapai-Markish, Olha [Rapaj-Markiś, Ol'ha], b 1 August 1929 in Kharkiv. Ceramist. A graduate of the Kiev State Art Institute (1956), where she studied under M. Helman, she has done the 'Circus' series of porcelain statuettes and a series of female porcelain figures in Ukrainian folk costumes; numerous porcelain compositions, such as *Hopak* (1958–9), *Lovers* (1959–60), and *Wedding* (1968); and ceramic wall panels, reliefs, and anthropomorphic vases. She created the reliefs at the Trade Building in Kiev (1967) and the interior decorations of the Chornomorka Sanatorium in Odessa (1969).

Rape (*Brassica napus*; Ukrainian: *ripak*). An annual *oil plant of the mustard family Cruciferae, cultivated for thousands of years and at present unknown in its wild state. In Ukraine rape is planted in Polisia and in the Carpathian Mountains. It grows to 30 cm or more in height and has smooth, bluish green foilage, distinctive pale yellow flowers, and a long, usually thin taproot. A variety of rape known as swede is grown for its enlarged edible root (*brukva*), which is used for human and cattle consumption (see *Turnip). Rapeseeds contain as much as 40–50 percent colza oil, used as fuel, in cooking, and in the production of margarine, soap, and synthetic rubber (see *Vegetable-oil industry). Oil cake, high in protein, makes valuable cattle fodder.

Rarahovsky, Dmytro [Rarahovs'kyj], b 4 November 1878 in Slyvky, Kalush county, Galicia, d January 1957 in Edmonton. One of the first Ukrainian-Canadian poets. After emigrating to Canada in 1903, he contributed to *Chervonyi prapor*, *Robochyi narod*, *Ukrains'ki robotnychi visti*, and other Ukrainian-Canadian left-wing newspapers. He was active in the Ukrainian Social Democratic Party

of Canada and the Ukrainian Labor-Farmer Temple Association. The *kolomyika*-like poems in his two collections, *Robotnychi pisni* (Workers' Songs, 1908) and *Ukrains'ki robotnychi pisni* (Ukrainian Workers' Songs, 1945), reflect the experiences and views of Ukrainian immigrants in Canada.

Rare metals. According to normal classifications, rare metals include beryllium, germanium, yttrium, zirconium, niobium, molybdenum, ruthenium, cadmium, stibnite, lanthanum, cerium, hafnium, tungsten, rhenium, uranium, and so on. Some precious metals – silver and gold, for example – are also rare. Many of those metals are used in the metallurgical industry to strengthen steel and iron, and in the electronics industry, especially in making television screens.

In Ukraine silver (usually amalgams) is found almost equally in ankerite and cinnabar. Silver is also found in some hydrothermal deposits in Transcarpathia. Overall, however, estimated reserves are small, and there is little chance they can be commercially exploited. Some gold was found in the late 1960s and early 1970s in Precambrian metamorphic deposits and in alluvials of the early Paleogene in the Dnieper Basin. Gold concentrations reached 37 g per t, and individual nuggets reached diameters of 0.2–2.5 mm.

Zirconium and germanium are found in Precambrian deposits of the Ukrainian Crystalline Shield, especially in quartz and feldspar. The concentration of germanium averages 1.7–4 g per t. Molybdenum and tungsten have been discovered in greisen zones in Volhynia and in hydrothermal formations in Transcarpathia. Rich uranium deposits (containing uranium ores of U₃O₈ with an admixture of ThO₂) are found in the vicinity of Zhovti Vody in the Kryvyi Rih region. The largest uranium- and plutonium-processing facility in the former USSR has been built there. Uranium from that area is used at the Chornobyl Nuclear Power Station.

In recent years celestite, boracite, and monazite trapings containing varying concentrations of yttrium, lanthanum, cerium, neodymium, and other rare metals have been discovered. Traces of those metals, as well as of niobium and zirconium, have also been found in Ukrainian deposits of ilmenite. Industrial exploitation of rare metal ores was begun in the area of the Samotkan ilmenite deposit in Dnipropetrovske oblast. The Mariiupil Rare Metals Administration was established in 1946 to direct the exploitation of deposits in that region. Chances are good that rare metals can be extracted from the iron-cobalt-nickel deposits of the Dnieper Basin and the Zavallia region, in Kirovohrad oblast. Refining of some rare metals is done in Dnipropetrovske and Kirovohrad oblasts and the Crimea.

Ukraine lacks several important rare metals, such as cerium, antimony, and beryllium, and does not have the technology to use them in steel and iron refining. Their unavailability limits the development of Ukraine's metallurgical and electronics industries and, especially, its machine-building and nuclear reactor industries. Developments in the exploitation and refining of rare metals will have important implications for the economy of Ukraine.

S. Protsiuk

Rashevsky, Ivan [Raševs'kyj], b 1849 in Chuhuiv, Zmiiv county, Kharkiv gubernia, d 1921 in Chernihiv. Painter and sculptor. After graduating from the law faculty of Kiev University he studied painting in St Petersburg. He painted landscapes and genre scenes such as *On the Desna* (1889) and *On the Feast of the Transfiguration* (1900). He sculpted models for a monument to T. Shevchenko in Chernihiv (1921). Most of his works perished during the Second World War.

Rashkiv settlements. A series of early Slavic settlements along the Dniester River near Rashkiv, Khotyn raion, Chernivtsi oblast. Excavations at three settlements in the 1970s revealed a large number of rectangular semi-pit dwellings: 81 at Rashkiv I (late 7th–9th century), 8 at Rashkiv II (5th–7th century), and 91 at Rashkiv III (5th–7th century). Cherniakhiv culture pottery remains were unearthed at sites II and III, while Rashkiv I contained wheel-thrown items. Iron, bronze, bone, and flint artifacts were common to all the sites. The study of this settlement complex provided a clear picture of life in the Middle Dniester area in the latter half of the 1st millennium.

Raskolnik. See Old Believer.

Rašković, Srđan, b 20 December 1952 in Split, Croatia. Serbian writer, translator, and literary scholar. Besides his own literary works he has translated into Serbian from Ukrainian, Russian, and Belarusian. His translations have appeared in numerous journals as well as in separate editions, namely *Povest plamenih godina* (translation and annotation of O. *Dovzhenko's *Povist' polum'ianykh lit* [The Tale of Fiery Years], 1978) and *Skitska baba* (Scythian Woman; an annotated translation of poems by L. *Kostenko, 1981). He has also contributed articles to the *Encyclopedia of Ukraine* and Yugoslav encyclopedias.

Rasp, Karl-Wilhelm, b 16 November 1805 in Plana, Austria (now in Czechoslovakia), d 9 April 1874 in Lviv. Austrian historian and archivist. He was educated at Prague and Vienna universities, and he served as an official of the Lviv *magistrat* (from 1831) and as curator of the Lviv municipal archives (1861–72). Rasp wrote a comprehensive history of Lviv (1870) based on primary sources and assisted in the publication of **Akta grodzkie i ziemskie*.

Rasprava. Rural court for state peasants. *Raspravy* were introduced in Left-Bank Ukraine and Slobidska Ukraine in 1782–92, after the dismantling of the Cossack judicial system. Each gubernia had a higher *rasprava* that handled appeals against the decisions of the lower, local, courts.

Rastatt. A town (1979 pop 37,000) in Germany, and the site of a German POW camp in 1915–18. Many Ukrainians were interned there. As in other German POW camps, the *Union for the Liberation of Ukraine conducted classes (up to grade six), maintained a Ukrainian library and drama group, and published the magazine *Rozsvit*. A Sich society was organized there, and the first units of the *Bluecoats sprang up in the camp. A book describing the

Monument to the Ukrainians who died in the Rastatt POW camp (sculptor Mykhailo Parashchuk)

Ukrainian cultural and educational activities in Rastatt was published by O. Terletsky in 1919, and a memorial erected to the Ukrainian prisoners who died there was designed by M. Parashchuk.

Rastorguev, Pavel, b 1 July 1881 in Starodub, Chernihiv gubernia, d 21 March 1959 in Novozybkov, Briansk oblast, Russia. Belarusian linguist. A graduate of the Hlukhiv Teachers' Institute (1901) and Moscow University (1908). A specialist on the Belarusian dialects of the Briansk, Chernihiv, Homel, and Smolensk regions, he published an important book on the Seversk (Siverianian) Belarusian dialect (1927). In his many articles he dealt with themes such as the dialectal traits of the 18th-century Starodub regiment (1928), the Polish and Belarusian influence on the Ukrainian dialects in the former Siedlce gubernia (1929), and the Ukrainian features in the dialects of western Briansk oblast (1948). In 1927 he prepared and published the results of a 1903–4 survey of dialects in Chernihiv gubernia. His dialectal dictionary of the western Briansk region, which was ready for publication in 1954, came out only in 1973.

Rastrelli, Bartolomeo Francesco, b 1700 in Paris, d 1771 in St Petersburg. Architect of Italian origin. Having arrived in St Petersburg in 1716 with his father, C. Rastrelli, who did many sculptures for Emperor Peter I, he was appointed court architect in 1730. His renovations of the Great Palace in Peterhof (1747–52; now Petrodvorets), the Catherinian Palace in Tsarskoe Selo (1752–7), the Winter Palace (1754–62), M. Vorontsov's palace (1749–57), and S. Stroganov's palace (1752–4) in St Petersburg are the finest examples of late baroque architecture. He designed two outstanding buildings in Kiev, *St Andrew's Church (1747–53) and the *Mariinskyi Palace (1752–5).

RATAU. See Radio and Telegraph Agency of Ukraine.

Ratensky, Petro [Ratens'kyj], b ? in Ratne, Volhynia, d 21 December 1326 in Moscow. Churchman and painter. As a monk in Dvoretz, in the Lviv region, he painted icons and donated them to various churches in Ukraine and

abroad. A number of icons of the Theotokos, including those at the Dormition Cathedral in Volodymyr-Volynskyi, the St Sophia Cathedral in Novgorod, the Dormition Cathedral in the Moscow Kremlin, and the Krekhiv monastery, have been attributed to him. In 1308–26 he served as metropolitan of Kiev and all Rus' while residing in Moscow. He was canonized by the Orthodox church in 1340.

Ratmyrov, Andrii (real surname: Tymkivsky), b 14 October 1884 in Yelysavethrad, Kherson gubernia, d 26 February 1967 in Uzhhorod. Stage actor and director. In 1908 he completed study at the University of Odessa. Then he worked in the Russian troupe there, the Ukrainian National Theater in Kiev (1917–18), the State People's Theater (1918–19), and various other regional theaters (1930–5). He was exiled before the Second World War. Upon his return to Ukraine he worked in the Kiev Oblast (1943–7), the Kirovohrad Ukrainian (1947–9), and the Transcarpathian Ukrainian Music and Drama theaters (1949–59).

Ratmyrova, Olena, b 1869 in Novokhopersk, Voronezh gubernia, d 1927 in Novocherkassk, Rostov oblast, RSFSR. Stage actress and singer (mezzo-soprano). She worked in M. Sadovsky's troupe (1888–93) and M. Kropyvnytsky's troupe (1894–1900) and led her own troupe in 1900–1. In 1908–14 she also sang in opera theaters in Kiev, Kharkiv, and Odessa.

Ratne. II-5. A town smt (1986 pop 5,500) on the Prypiat River and a raion center in Volhynia oblast. It was first mentioned in historical records in the early 13th century, as a fortified outpost of the Principality of Galicia-Volhynia. It changed hands several times in the 14th century before it was finally surrendered by Lithuania to Poland in 1433. In 1440 it was granted the rights of *Magdeburg law. After the partition of Poland in 1795, the town was acquired by Russia, and became a trading center in Kovel county, Volhynia gubernia. In 1921 it was acquired by Poland, and in 1939 it was annexed by the USSR. Most of its inhabitants work in industry. It has a large wood-chemicals plant.

Ratusha or **ratush**. Derived from the German *Rathaus* (city hall), the terms were used in Ukraine to denote both a certain type of municipal government and the city hall building. From the 14th to 17th centuries towns in Ukraine that did not have the rights of *Magdeburg law were called *ratushni* and were governed by a **viit* and one or two **burmistry*. Those officials were not independent, but were responsible to the local lord or the local representative of the state, such as the starosta.

Ratusha or *ratush* also denoted the building of the municipal government, which usually had one tall tower and stood at the center of the town or city. Such buildings first appeared in Ukraine in the 14th century. The oldest architectural monuments of the kind in Ukraine are in Staryi Sambir (1668), Buchach (1751), and Kamianets-Podilskyi (1754). Kharkiv, Poltava, Lviv, and Chernivtsi have some fine examples of 19th-century city halls.

Rava Brigade of the Ukrainian Galician Army (Ravska [6] brygada UHA). A unit of the First Corps of the UHA, formed in January 1919 from units of the Rava Ruska

Group. It consisted of three infantry battalions, an artillery regiment, and a cavalry troop and had a total strength of approx 2,800 men. Its commanders were Capt V. Stafiniak and, later, Capt Yu. *Holovinsky. The brigade distinguished itself during the Chortkiv offensive in June 1919 and in battles for Kiev in August 1919. In February 1920 it was reorganized into the Sixth Regiment of the Red Ukrainian Galician Army. After separating from the Red Army, the regiment was disarmed, and its members were imprisoned by the Poles.

Rava-Ruska [Rava-Rus'ka]. III-4. A city (1989 pop 8,800) on the Rata River in Nesterov raion, Lviv oblast. It is first mentioned in historical documents in 1455, when it was under Polish rule. In the early 17th century it obtained the rights of *Magdeburg law. A church brotherhood arose there in 1707. After the partition of Poland in 1772, the town belonged to Austria. It began to grow when two railway lines were laid through it in 1887, and it had reached a population of 9,000 by 1900. In the interwar period Rava-Ruska was ruled by Poland, and then became part of the Ukrainian SSR. Today it is an industrial and transportation center. Its main industry is food processing.

Raven (*Corvus corax*; Ukrainian: *kruk, voron*). A bird of the family Corvidae, 60–65 cm in length, shiny black in color. Ravens are ubiquitous, though not numerous, omnivorous birds. They are found all through Ukraine. In Ukrainian folklore they represent a bad omen, especially if heard cawing in the morning.

Ravliuk, Mykola [Ravljuk], b 1881 in Orelets, Sniatyn county, Galicia, d 1933 in Chernivtsi. Pedagogue. He graduated from Chernivtsi University in 1908 and became a teacher of Ukrainian and Latin at the Kitsman Gymnasium. During the First World War he was captured by Russian forces and was a POW in Tashkent. From 1920 he taught at the gymnasium in Chernivtsi. Among Ravliuk's works are *Diiepryketnyky i diiepryslyvnyky v ukrains'kii movi* (Participles and Gerunds in the Ukrainian Language, 1912), *Pro diiepryketnyky i diiepryslyvnyky u tvorakh H. Kvitky-Osnovianenka, M. Vovchka, Yu. Fed'kovycha i V. Stefanyka* (Participles and Gerunds in the Works of H. Kvitka-Osnovianenko, M. Vovchok, Yu. Fedkovych, and V. Stefanyk, 1911–12), and a reader for first- and second-year gymnasium (1924).

Ravych, Dmytro [Ravyč], b 25 November 1901 in Sribne, Pryluka county, Poltava gubernia, d 4 June 1942 in

Dmytro Ravych

Vienna. Engineer, musicologist, and student leader. He was an assistant at the *Ukrainian Higher Pedagogical Institute in Prague and longtime head of the *Ukrainian Academic Hromada in Prague. From 1939 he was head of the *Central Union of Ukrainian Students.

Ivan Ravych: chalice for blessing water (1720)

Ravych, Ivan [Ravyč], b 1677 in Kiev, d 1762. Master goldsmith. While working in his own studio in Kiev's Podil district, he was active in civil affairs and served as a court magistrate and city councilor. He produced chalices, cups, goblets, silver book jackets, icon screens, candelabras, plates, and arks decorated with rococo acanthus, cartouches, thematic compositions, and medallions. His patrons were monasteries, bishops, hetmans, Cossack officers, and Russian nobles. Over 60 of his works have survived; most of them are in the Historical Museum of the Ukrainian SSR in Kiev.

Ravytsky, Mykola [Ravyc'kyj], b 29 January 1921 in Sorochanove, Yelysavethrad county, Kherson gubernia. Stage director. In 1950 he completed study at the Kiev Institute of Theater Arts (pupil of V. Nelli and V. Vilner). He was a director of Ukrainian Music and Drama theaters in Ivano-Frankivske (1950–8), Kherson (1958–70), and Zaporizhia (1970–3) and of the Kiev Young Spectator's Theater (1975–9). He served as head of the Theater Administration in the USSR Ministry of Culture (1973–5). In 1979 he was named stage and administrative director of the Kiev Druzhba Theater.

Rawita, Franciszek. See Gawroński, Franciszek.

Razhba, Yakiv [Ražba, Jakiv], b 29 August 1904 in Kremenchuk, Poltava gubernia. Sculptor. He studied under B. Kratko and L. Blokh at the Kharkiv Art Institute (1924–9). He sculpted the decorative reliefs in the Dnipropetrovsk Workers' Theater (1936–7), the grave monument of D. Guramishvili in Myrhorod (1949), the monument to the victims of the Second World War in Kotelva (1981), compositions on themes from the works of T. Shevchenko

Yakiv Razhba: *From the Field* (plaster high relief inside the Workers' Theater in Dnipropetrovske, 1937)

(*Poplar*, 1957) and Lesia Ukrainka, (*Lily*, 1957) and socialist realist compositions such as *Partisan* (1968)

Razumovsky. See Rozumovsky.

Reading house (*khata-chyhtalnia*). A rural cultural-educational institution founded in the initial years of Soviet rule in Ukraine. Reading houses replaced *Prosvita-affiliated reading rooms, which were disbanded by the Soviet regime. Reading houses had libraries and were venues of political agitation, literacy classes, training in new farm techniques, and concerts and plays, often staged by local amateur groups. They were often the center for village Party and Komsomol organizations. In 1927 there were 6,203 reading houses in Soviet Ukraine. In the early 1950s reading houses were transformed into collective-farm clubs and *palaces of culture. By the 1960s reading houses remained only in a few isolated areas.

Realism. A term that usually refers to art that is representational and depicts the visible material world as closely as possible. It may also be used to designate the opposite of stylized or abstract art or simply to describe a work of art that portrays not the beautiful and idealized, but the common, unconventional, or ugly. As a 19th-century art movement it is usually associated in painting with the work of French artists, such as G. Courbet, even though it found independent expression in other countries, including Ukraine.

Realism became popular in Russian-ruled Ukraine through the efforts of the *Peredvizhniki, a group of artists established in 1870 in St Petersburg that promoted

enlightenment through traveling exhibitions of pictures portraying the conditions of contemporary life, particularly of the peasants, and depicting landscapes. Style was relegated to a minor role, and socially relevant subject matter was of major importance. Several prominent Ukrainian-born artists were members of or exhibited with the *Peredvizhniki* (eg, N. Ge, I. Repin, K. Kostandi, S. Vasylykivsky).

In 19th-century Western Ukraine I. *Trush, A. *Manastyrsky, and M. *Ivasiuk painted realistic depictions of mundane subjects, often with peasant themes and ethnographic elements. Realistic works produced with an impressionist palette and brush strokes were created by F. *Krychevsky, M. *Kozyk, P. *Volokidin, I. *Shulha, O. *Kulchytska, and others.

A type of realism known as *socialist realism was forced on all art and artists in the USSR, including Soviet Ukraine, in the early 1930s, and remained the only officially sanctioned method until the late 1980s. Demanding politically correct content, naturalistic rendering, and adherence to Marxist-Leninist esthetics and to the dictates of the Communist party, it resulted in many stereotypical depictions of Communist heroes and leaders and happy workers and peasants. The more interesting socialist-realist artists in Ukraine were M. *Bozhii, O. *Lopukhov, S. *Hryhoriev, O. *Shovkunenko, and T. *Yablonska.

A variety of socialist realism known as the 'severe style' appeared in the USSR after the death of J. Stalin. Its adherents portrayed the ordinary aspects of life instead of idealized and heroic socialist-realist subjects. L. *Medvid depicted the unpleasant and perturbing side of life in paintings such as *First Collective Farms in the Lviv Region* (1972).

A new kind of realism known as photorealism or hyperrealism developed in the West in 1970s. It has had an impact on the work of artists in Ukraine, such as S. Bazylev and S. Geta, who have used precisely rendered close-up views and photographic images. It can also be seen in the work of L. Bodnar-Balahutrak in the United States and in the superrealist figural compositions of N. *Husar and M. Stefura in Canada. J. *Hnizdovsky depicted selected objects and figures in a meticulously rendered realist manner.

(For realism in literature, see *Drama, *Literature, and *Prose.)

D. Zelska-Darewych

Realschule (*realne uchylshche*). A secondary school with a six- or seven-year program of study, established in imperial Russia by the conservative education minister Count D. Tolstói's Realschule Statute of 1872. The curriculum of the Realschule was pioneered in Western Europe. Emphasis was placed on natural sciences, modern languages, and the application of technical knowledge, whereas in *gymnasiums emphasis was placed on Latin and Greek. Although there had been schools in Ukraine which provided practical training from the beginning of the 19th century, such as the Chernihiv Trade School (est 1804), it was not until 1864, when the Russian education minister, Count Golovin, established the eight-year realgymnasium, that 'real' studies in imperial Russia were taught in an academic rather than a purely vocational context. In 1872 the classical education obtained at gymnasiums was made the only conduit to university. Realgymnasiums, which taught natural sciences and modern

languages instead of Latin and Greek, were replaced by Realschulen. Social mobility through education was restricted, and the modern or 'real' curriculum was relegated to second-class status. Realschule students, more likely to be from the lower classes than their gymnasium counterparts, were considered politically volatile and given a narrowly technical education which barred them from entering university and many other postsecondary institutions. The drop-out rate in Realschulen was higher than that in gymnasiums, where a diploma promised academic advancement. In 1879, 20 percent of Realschule students dropped out, compared with 15 percent of gymnasium students. Central government funding of Realschule corresponded to their inferior status, and local *zemstvos were compelled to provide much of the support. In 1885 there were 75 Realschulen in the European part of the Russian Empire, with 14,722 students; 19 of these schools and 4,345 of the students were in Ukraine.

In 1888 time devoted to vocational training in Realschulen was decreased, and a special grade was added to prepare students for higher specialized education. Realschule graduates were given the right to enter all postsecondary technical and agricultural institutes and the physics, mathematical, and medical faculties of universities. Commercial schools, established by the Ministry of Finance in 1896, began to rival Realschulen and gymnasiums. They offered a general rather than a narrowly classical or vocational education, greater scope for local control, limited coeducation, and no class restrictions or quotas on the admission of Jews. By 1913–14, 51,632 students were enrolled in commercial schools, only 40 percent fewer than the 80,800 pupils of the more entrenched Realschulen, and a third as many as studied at boys' gymnasiums. In 1915 graduates of Realschulen were granted the right to enter all university faculties.

In Austrian-ruled Ukraine 'real' studies were taught in both realgymnasiums and Realschulen. Graduates of the eight-year realgymnasiums could enter any school of higher learning; graduates of the seven-year Realschule could enter all institutions of higher learning except universities. In 1906 there were 20 realgymnasiums and Realschulen in Galicia and Bukovyna.

After the October Revolution of 1917, Soviet education reforms abolished Realschulen. (See *Education.)

C. Freeland

Rebet, Dariia (née Tsisyk), b 26 February 1913 in Kitsman, Bukovyna, d 5 January 1992 in Munich. Political leader and publicist; wife of L. *Rebet. She studied law at Lviv and Lublin universities. As a young woman she joined the clandestine Ukrainian Military Organization and its successor, the OUN. In the 1930s she was OUN youth representative and headed the OUN women's groups of the OUN Stryi district executive and the OUN organization in the Stryi district (1933–4). In 1935–8 she was a member of the OUN Home Executive in Western Ukraine responsible for liaison with the émigré Leadership of Ukrainian Nationalists. In 1939 she spent six months in a Polish prison. In 1941 she became a member of the Cracow-based OUN (Bandera faction) Home Executive, headed by R. Shukhevych. During the German occupation of Lviv she worked in the OUN educational and propaganda sectors. She was a delegate at the OUN Third Extraordinary Congress in 1943, and in 1944 she was a member of the OUN

Dariia Rebet

Lev Rebet

Preparatory Commission, which organized the *Ukrainian Supreme Liberation Council (UHVR). She was elected to the first UHVR presidium and was the author of the first UHVR statute. While living as a postwar émigré in Germany she was a member of the UHVR Representation Abroad. When the émigré Bandera faction split in 1956, she joined the new OUN (Abroad) and was elected to its Political Council, which she headed from 1979. Rebet was active in Ukrainian émigré women's organizations and was a delegate to the First World Congress of Ukrainian Women in Philadelphia in 1948. She was a member of the editorial boards of *Suchasna Ukraïna*, *Suchasnist'*, and *Ukraïns'kyi samostiinyk* and edited a collection of articles about the Ukrainian Women's Alliance in Germany (1980). She was the author of articles dealing with the OUN ideology, program, and history, Ukrainian liberation politics, the UHVR, Soviet affairs, Ukrainian émigré community concerns, and educational issues.

Rebet, Lev, b 3 March 1912 in Stryi, Galicia, d 12 October 1957 in Munich. Political leader and publicist; husband of D. *Rebet. He received a master's degree in law from Lviv University (1938) and a doctorate from the Ukrainian Free University in Munich (1947), where he taught state law from 1948 and became a professor in 1954. He joined the clandestine Ukrainian Military Organization in 1927. From 1930 he headed the OUN organization in the Stryi district, and in 1935–8 he headed the OUN Home Executive in Western Ukraine. In the 1930s he was repeatedly arrested by the Poles, and he spent two and a half years in Polish prisons in Stryi and Lviv. During the OUN split in 1940 he sided with the Bandera faction. In 1941 he was second vice-president of the short-lived *Ukrainian State Administration in Lviv and headed it after its president, Ya. Stetsko, was arrested by the Germans. Rebet was himself arrested in September 1941 and sent to the Auschwitz concentration camp. He was released in 1944, and fled to the West.

In 1945 he became chief judge of the émigré Bandera faction and took part in secret talks in Vienna and Munich with representatives of the OUN, headed by R. Shukhevych in Ukraine. In 1952 he became a member of the Foreign Representation of the *Ukrainian Supreme Liberation Council and head of its Council of Representatives. In 1953–4 he headed the collegium charged with reorganizing the émigré Bandera faction along guidelines received from the OUN leadership in Ukraine. After S. Ban-

dera resigned from the collegium in February 1954, Rebet became head of a separate faction which in 1956 began to call itself OUN (Abroad). He was assassinated by a Soviet agent (see *Stashynsky trial).

Rebet contributed to postwar Ukrainian periodicals in West Germany, such as *Ukraïns'ka trybuna*, *Chas*, and *Suchasna Ukraïna*, and was editor in chief of **Ukraïns'kyi samostiinyk* (1955–7). He wrote programmatic documents for the OUN and articles on the question of the nation and the state, émigré issues, and Soviet affairs. His major works are a booklet on the formation of the Ukrainian nation (1951), a monograph on the theory of the nation (1955), and a posthumously published book about the OUN (1964).

A. Zhukovsky

Reboshapka, Ivan [Rebošapka] (Riaboshapka, Reboșapcă), b 29 May 1935 in Dărmănești, Suceava district, Rumania. Folklorist, pedagogue, and translator. A graduate of Bucharest University (1960), he is a professor of Ukrainian literature, language, and folklore there. His primary interests are Ukrainian folklore in Rumania and Rumanian-Ukrainian folklore ties. He has prepared *Curs de folklor literar ucrainean* (A Course in Ukrainian Literary Folklore, 1977); 14 textbooks in Ukrainian language and literature for secondary schools; several folklore collections (in Ukrainian), including *Narodni spivanky* (Folk Songs, 1969), *Oi u sadu-vynohradu* (In the Vineyard, 1971), *Vidhomin vikiv* (Echo of the Ages, 1974), *Oleus'kyi tsvit* (Oleander Bloom, 1976), and *Narod skazhe – iak zav'iazhe* (Popular Sayings Are Apt, 1976); and some theoretical studies of folklore, such as *Narodzhennia symbolu: Aspekty vzaiemodii obriadu ta obriadovoi poezii* (The Birth of a Symbol: Aspects of the Interaction of Ritual and Ritual Poetry, 1975). He has translated Ukrainian textbooks, folklore collections, and literature (O. Vyshnia, M. Pryhara, and V. Nestaiko) into Rumanian.

Rebro, Petro, b 19 May 1932 in Bilotserkivka, Kuibysheve raion, Zaporizhia oblast. Writer. He graduated from the Zaporizhia Pedagogical Institute (1953) and has worked as a newspaper and book editor in Zaporizhia. Since 1955 he has published collections of lyrical and satirical poetry, documentary novelettes, travel essays, and books of poetry for children. An edition of his selected poetry appeared in 1982.

Rebryk, Bohdan, b 30 June 1938 in Pavlykivka, Kalush county, Galicia. Dissident and political prisoner. A

Bohdan Rebryk

teacher by profession, he was imprisoned in a labor camp in 1967–70 for his pro-Ukrainian views. He was rearrested in May 1974, and sentenced in March 1975 to seven years in special-regime labor camps in the Mordovian ASSR and Perm oblast and three years' exile in Kazakhstan. In February 1979 he joined the *Ukrainian Helsinki Group. He wrote several open letters of protest, notably to AFL-CIO president G. Meany, to D. Milner in Great Britain, and to 'progressive' Ukrainians in Canada and the United States. He was released in 1984. Since 1988 he has edited *Karby hir*, an unofficial literary journal in Ivano-Frankivske.

Rechmedin, Valentyn [Rečmedin], b 12 February 1916 in Andrushivka, Lypovets county, Kiev gubernia, d 6 June 1986 in Kiev. Writer and editor. He was an editor of *Kul'tura i zhyttia* and assistant editor of *Vitchyzna* in Kiev. He wrote the novels *Na verkhovyni* (In the Highland, 1951), *Koly zakypala krov* (When the Blood Boiled, 1958), *Vesniani hrozy* (Spring Storms, 1961), *Tvii pobratym* (Your Loyal Friend, 1962), *Synu, khodim zi mnoiu* (Son, Come with Me, 1965), *Divchyna v ternovomu vinku* (A Girl with a Crown of Thorns, 1967), *Vohon' bat'kovykh ran* (The Fire of a Father's Wounds, 1969), *Narodzhennia Afrodyty* (The Birth of Aphrodite, 1974), *Pora piznikh dorih* (A Time of Late Roads, 1975), *Za vesnoi vesna* (After Spring Comes Spring, 1979), and *Navpereimy doli* (Crossing Destiny's Path, 1983).

Reclus, Jean-Jacques Elisée, b 15 March 1830 in Saint-Foy-la-Grande, Gironde, France, d 4 July 1905 in Turnhout, Belgium. French geographer and political theorist. A graduate of Brussels University and a member of the First International from 1865, he was exiled permanently from France in 1871 because of his involvement in the Paris Commune. He lived in Italy, Switzerland, and Belgium, where he taught in universities. His major scholarly work was the 19-volume *Nouvelle géographie universelle* (1876–94). In the fifth volume a substantial section with the heading 'Russia in Europe' dealt with Ukraine. Reclus recognized Ukraine as a distinct geographical and historical entity. Much of his information about Ukraine was derived from the writings of M. *Drahomanov, whom he knew personally.

Recorded music. The first Ukrainian recordings appeared in 1900, when two German Gramophone Co recording experts, F. Gaisberg and S. Darby, visited St Petersburg and recorded at least five Ukrainian songs by soprano P. Havryltseva-Khmara. Most Ukrainian records in the Russian Empire were on the Gramophone, Pathé, Xenophone, Favorite, Syrena, and Beka labels. Kiev-based Extraphone issued (ca 1910) songs performed by O. Petliash (accompanied on the piano by M. Lysenko) and Ukrainian Christmas songs sung by the Kiev University Student Chorus directed by O. Koshyts. Around the same time Ukrainian singers, such as M. Brochenko, T. Pid-dubny, P. Platonov, I. Hryhorovych, M. Shvets, A. Hvoz-detska, A. Kramska, L. Lypkivska (Lipkowska), M. Mikhailova, E. Petrenko, and É. Zarnytska, were recording in the Russian Empire. Choruses were also engaged in recording activity. The growth of these endeavors can be illustrated by the 1914 Gramophone-Zonophone catalog, which shows 306 Ukrainian titles with 366 recordings, or the 1916 Pathé catalog, which shows 193 and 238 respectively.

With the introduction of the electric recording process in the USSR (1929), Ukrainian soloists, such as I. Patorzhynsky, M. Lytvynenko-Volhemut, M. Mykysha, M. Hryshko, M. Donets, O. Petrusenko, and Z. Haidai, became committed to discs. Choruses that were recorded included DUMKA and the State Exemplary Banduryst Kapelle. Starting in the late 1940s a younger generation of vocalists (among them I. Kozlovsky, D. Hnatiuk, B. Hmyria, P. Karmaliuk, and B. Rudenko) as well as vocal and instrumental ensembles appeared on disc.

Companies like Gramophone and Pathé also had the largest share of the Austro-Hungarian market. Gramophone conducted four recording expeditions to Lviv between 1904 and 1908. The Pathé brothers operated in Vienna, where they recorded tenor R. Lubinetsky and basses O. Nosalevych and O. Nyzankivsky between 1910 and 1913.

With the large influx of immigrants from Eastern Europe into the United States and Canada before the First World War, American companies such as Columbia and Victor saw an opportunity to market millions of ethnic records. Around 1908 these firms began to issue foreign-language records, mostly copies of European originals. By the Second World War Columbia had issued approx 550 records labeled Ukrainian, Ruthenian, Lemko-Russian, and Carpatho-Russian, while Victor had produced approx 200 of the same. A conservative estimate of Ukrainian recordings on the Odeon/Okeh label (1920s and 1930s) comes to more than 120 discs. In 1922–4 the Ukrainian National Chorus under the direction of O. Koshyts recorded 26 folk songs as arranged by Ukrainian composers on another American label, Brunswick. By the 1940s at least 900 Ukrainian records had been produced in the United States, in performances ranging from S. Krushelnytska's Ukrainian songs to typical village bands with exceptionally talented fiddlers, such as P. Humeniuk and J. Pizio.

In the 1930s the Polish company Syrena-Electro marketed 73 records, most notably with the Surma Chorus of Lviv (26 records). At the same time in Germany tenor C. Andrijenko (K. Chichka-Andriienko) recorded Ukrainian and Italian material on the Telefunken label.

After the Second World War most American companies dropped the ethnic record-producing business, leaving small ethnic bookstores, artistic groups, and private entrepreneurs to take over the task. In the late 1940s and early 1950s these private entrepreneurs reissued some pre-Second World War Ukrainian recordings culled from American and Soviet sources. The Stinson company was the most prominent among them. The Surma bookstore in New York did the same thing on its Surma, Fortuna, and Boian labels, later producing some original material. Also in New York, the Arka bookstore began to produce original Ukrainian recordings under the Arka label. These consisted largely of entertainment and popular music, as well as choral issues (the DUMKA and Kobzar choruses, conducted by L. Krushelnytsky and A. Rudnytsky respectively) and recordings of such soloists as M. Starytsky, Ye. Mozhova, I. Orlovska-Fomenko, M. Minsky, and V. Ty-siak. They were issued on 78 RPM or early LP formats. A number of Ukrainian vocalists, among them tenor O. Rusnak, were issued by the Chwyli Dnistra label (Cleveland). The RCA Victor custom department produced four albums of the Ukrainian Bandurist Chorus (Detroit) starting in 1950.

In Canada the largest producer of Ukrainian records was Arka (Toronto), which featured entertainment and popular music. There were also active labels in Montreal and Edmonton. The Ukraina Chorus of Montreal under the direction of N. Horodovenko recorded (1951) an album of six records with Ukrainian titles.

In Argentina RCA Victor issued Ukrainian records by sopranos T. Lykholay and E. Saprun and tenor O. Khlebych. The Boyan label in that country issued recordings of choral music. The Australian Cosmopolitan label produced recordings of the Ukrainian National Choir, with soloists W. Rykhtowsky, A. Hai, and Z. Moroz. In Great Britain the Burlaka chorus made a number of successful recordings in the early 1950s on the Oriole label.

The list of singers who recorded in the 78 RPM and early LP periods also includes S. Krushelnytska on Gramophone (1902), Typewriter (Warsaw 1902), Fonotipia (Milan 1906–10), and Columbia (United States 1928); I. Alchevsky on Gramophone (1903); O. Myshuha on Gramophone and Zonophone (1911); M. Menzinsky on Gramophone (1910–11) and HMV; O. Rusnak (Gerlach) on HMV/Electrola (1932–3); M. Sokil-Rudnytsky on Asch (New York 1940), the first such album in North America featuring professional settings; Ye. Zarytska on London (1949), Decca (1948, 1957), and other labels; H. Shandrovsky on Okeh, Victor, and Columbia (1920s–1930s); and M. Holynsky on Muza (Canada 1950s).

The LP era (mono and stereo). Ukrainian music first appeared on LP in the West on the album *Chants d'Ukraine* (Songs of Ukraine), recorded by Ye. Zarytska with G. Favaretto at the piano (Paris, Columbia 1956). It consisted of folk song arrangements by nine Ukrainian composers of the 20th century. Noted Soviet releases in 1954 included the opera *Bohdan Khmelnytsky* by K. Dankevych and L. Revutsky's *Symphony no. 2* as conducted by N. Rakhlin.

The first stereo LP was recorded in 1959 by Ye. Zarytska (New York, Urania) and consisted of Ukrainian folk songs. Although the USSR began to issue stereo LPS in 1960, Ukrainian repertoire using this technology was not recorded until the 1970s. Both vocal and instrumental music were produced in some quantity, with a strong preference for the folk genre. Piano works now appeared on stereo LPS, making available music ranging from D. Bortniansky through M. Lysenko to S. Liudkevych, L. Revutsky, V. Kosenko, and B. Liatoshynsky, as recorded by M. Krushelnytska, R. Lysenko, V. Sechkin, M. Stepanenko, Ye. Rzhanov, and others.

In 1981 German pianist M. Grill produced the first stereo LP of piano music by a Ukrainian composer (V. Barvinsky) recorded in the West. Also active in the West were pianists V. Baley, T. Bohdanska, Ye. Masliuk, D. Karanovych, J. Osinchuk, R. Rudnytsky, C. Saurer-Smith, M. Shlemkevych-Savytsky, A. Slobodianik, and R. Savytsky. Violinists recording in the West included E. Gratovich, O. Krysa, A. Lysy, Yu. Mazurkevych, and S. Staryk. Outstanding recordings have been produced both in and outside Ukraine by such singers as Y. Hoshuliak, A. Kocherha, S. Kopchak, I. Malaniuk, Yu. Mazurok, P. Plishka, and A. Solovianenko. Major recorded choruses include the Ukrainian Bandurist Chorus (Detroit), the State Banduryst Kapelle of the Ukrainian SSR, the Bukovynian Ensemble, the Verovka State Chorus, the Kiev Chamber Choir, the O. Koshyts Choir (Winnipeg), and the Byz-

antine Choir (Utrecht). Among the conductors who have recorded in the West are V. Bozhyk, A. Hnatyshyn, I. Kovaliv, H. Kytasty, G. Oransky, L. Turkevych, and I. Zadorozhny.

Operas recorded in the USSR include those by D. Bortniansky, M. Lysenko, S. Hulak-Artemovsky, M. Arkas, H. Maiboroda, and M. Verykivsky. These are commonly performed by the Kiev Theater of Opera and Ballet. Much recording is done of the orchestral repertoire of such composers as L. Revutsky, B. Liatoshynsky, L. Kolodub, and L. Hrabovsky. Outstanding Soviet Ukrainian conductors being recorded include I. Blazhkov, M. Kolessa, V. Kozhukhar, N. Rakhlin, V. Tolba, and S. Turchak. The orchestra most often recorded is the State Symphony Orchestra of the Ukrainian SSR (Kiev). Also committed to discs is chamber music by D. Bortniansky, M. Lysenko, V. Barvinsky, V. Kosenko, B. Liatoshynsky, and M. Skoryk, performed by such ensembles as the Lysenko and the Leontovych quartets.

Cantatas composed by L. Revutsky and S. Liudkevych to words by T. Shevchenko have been recorded. The latter's *Caucasus* and *Testament* were recorded by the Trembita chorus (Lviv) under M. Kolessa's direction.

The absence of any record-producing facilities in Ukraine, other than some recording studios in Kiev (without complementary pressing plants), has led to a situation in which only a limited number of Ukrainian issues are released. Only a handful of Ukrainian works have ever been granted a second recording, among them L. Revutsky's *Symphony no. 2*, B. Liatoshynsky's *Symphony no. 3*, and the operas *Kateryna* and *Taras Bulba* by M. Arkas and M. Lysenko respectively. At present most Ukrainian classics are still not available in stereo from Melodiya, even popular operas such as *Zaporozhian Cossack beyond the Danube* and *Natalka from Poltava*. Moreover, significant operatic works ranging from M. Lysenko's *Nocturne* to B. Liatoshynsky's *The Golden Ring* have never been recorded (even in mono). Although the complete choral works of M. Leontovych were recorded, the majority of choral and art songs from M. Lysenko to V. Barvinsky still wait their turn.

Popular and dance music has recently been issued by such ensembles as Kobza (Kiev), Smerichka and Vatra (both in Lviv), Chervona Ruta (Chernivtsi), Rushnychok and Cheremshyna (both in Montreal), Burya (Toronto), Nichna Melodiia (Rochester), and Iskra (New York). Recording kobzars and bandurysts in Ukraine include F. Zharko, H. Menkush, and K. Novytsky, and in the West, Z. Shtokalko, V. Lutsiv, V. Mishalow, and H. and Yu. Kytasty.

Digital technology. The first digital LPS and cassettes of Ukrainian music were issued by the choir Musicus Bortnianskii (Toronto 1985–90), featuring recordings of D. Bortniansky's 35 a capella sacred concertos. Almost simultaneously the same Bortniansky cycle was recorded digitally by the Millennium Choir (V. Kolesnyk, conductor) and released in 1989. The Ukrainian Bandurist Chorus (Detroit), conducted by V. Kolesnyk, issued the album *Christmas Night* (1987) – the first digital stereo LP featuring Ukrainian carols. Music by Ukrainian composers, performed by violinist E. Gratovich and pianist S. Golomon, was issued in 1989 digitally on LP, cassette, and CD. *Kvitka – Two Colors* by K. Tsisyk became the first CD of Ukrainian solo songs (Clinton Recordings, 1989). M. Leontovych's 'Shchedryk,' known commonly as 'Carol of the Bells,' is

also available on CD in several recordings by American musicians.

Recruitment. See Military service.

Recruits' and soldiers' songs. A subclass of lyrical songs about the life of recruits and soldiers. In Russian-ruled Ukraine they began to appear at the end of the 18th century, when Catherine II abolished the voluntary Cossack forces and replaced them with long-term conscript (up to 25 years) military service. In Austrian-ruled Ukraine they arose at the end of the 18th century, when Maria Theresa introduced compulsory service for those between the ages of 17 and 40. These songs developed from old Cossack songs and contain references to different historical periods. Their basic themes are the recruitment process (drafting, induction, desertion, capture, purchasing one's freedom); the parting with one's family, homeland, and sweetheart; the soldier's life (hardships, homesickness, and loneliness); time off duty; war (marches, battles, death or crippling); and the return to civilian life (greeting one's family and friends). The songs were composed by the soldiers or by peasants, particularly women and girls. Their treatment of the soldier's experiences is more realistic than romantic. Allegory, symbolism, and psychological parallelism are widely used. The melodies usually have a marching tempo. Recruits' and soldiers' songs of Russian-ruled Ukraine are generally many-voiced. The songs in Western Ukraine are related closely in melody and theme to the songs of other Western or Southern Slavs, who served with Ukrainians in the Austrian army.

The themes of recruit's and soldiers' songs often appear in Ukrainian literature, especially in the works of T. Shevchenko, Yu. Fedkovych, S. Vorobkevych, and O. Makovei, and some recruit's and soldiers' songs have been based on Shevchenko's, S. Rudansky's, and Fedkovych's verses. The best-known musical arrangements of Ukrainian recruits' and soldiers' songs have been those by S. Liudkevych, L. Revutsky, M. Leontovych, F. Kolessa, and V. Kosenko. These songs have inspired compositions not only by Ukrainian composers, such as M. Arkas, Revutsky, M. Verbytsky, and Kolessa, but also by non-Ukrainians, such as J. Haydn, J.S. Bach, and L. van Beethoven.

M. Mushynka

Red Army. See Soviet Army.

Red Cossacks (Chervone kozatstvo Ukrainy). A Bolshevik military formation that was active in Ukraine in 1918–20 and is considered to be the first regular Soviet Ukrainian fighting unit. The first regiment of the Red Cossacks was formed on 10 January 1918 as the Bolshevik counterpart of the UNR's *Free Cossacks. Its commander was V. Prymakov. The Red Cossacks fought on the Soviet side in the *Ukrainian-Soviet War. Besides the UNR Army, they fought the Central Powers, the Don Cossacks, N. *Hryhoriiv's partisans, and A. *Denikin's and P. *Wrangel's armies.

Red Cross Society of the Ukrainian SSR. See Ukrainian Red Cross.

Red corner (*chervonyi kutok*). A type of cultural-educational club in the USSR under the auspices of the Communist party, trade-union, and Komsomol organizations. Red corners were found in the workplace, in student and worker dormitories, on state and collective farms, and at other enterprises. They carried out mass political agitation, disseminated technical and agricultural propaganda, held meetings, and organized cultural events for workers.

Red Rus'. See Chervona Rus'.

Red Steppe cattle (*Chervona stepova khudoba*). One of the most productive breeds of dairy *great horned cattle, developed in Ukraine in the early 19th century by selective crossing of imported breeds (mostly Ostfriesland) with local Red and Gray Steppe cattle. In the late 19th century the breed was improved by crossing Red Steppe cows with Dutch, Angeln, Wilstermarsh, and other bulls, and a selective breeding program was established in the 1920s. Red Steppe cattle are lean and strong, the bulls weighing approx 1,000 kg and the cows weighing 420–540 kg. Annual milk yield is 4,000–4,500 kg, with 3.6–3.8 percent fat content. Red Steppe cattle are distributed and raised primarily in Ukraine and other regions of the former USSR (see *Cattle raising).

Red Ukrainian Galician Army (Chervona Ukrainska Halytska Armiiia [ChUHA]). The official name of the *Ukrainian Galician Army (UHA) after its forced absorption into the Red Army in February 1920. By December 1919 the 20,000-strong UHA stationed in eastern Podilia and northwestern Kherson gubernia was reduced to 5,000 active men by a typhus epidemic. The army began negotiations with the advancing Red Army and on 12 February 1920 agreed to become an autonomous part of the Red Army, on the condition that it would fight on the Polish front. Gen O. *Mykytka, the commander of the UHA, and Gen G. *Zirits, his chief of staff, were deported to Moscow and executed. Under V. Zatonky's direction the Bolsheviks reorganized the UHA into three brigades and assigned them to different Soviet divisions. The commanders of the brigades were Lt Col A. Bizanz, Capt Yu. Holovinsky, and Capt O. Stanimir. The Bolshevik interference and propaganda aroused much hostility among the rank and file. In mid-April 1920, shortly before the Polish invasion of Ukraine, the Second and Third brigades of the ChUHA deserted the Red Army. Soon afterward they were surrounded by the Poles, and surrendered. The Bolsheviks retaliated by executing many Galician soldiers and offic-

ers left in the rear. The First Brigade continued to fight as part of the Tarashcha Division against the invading Polish army. The Poles defeated it at Makhnivka and then let most of the soldiers return home interned the officers.

Redemption payments. Annual payments imposed on the peasants of the Russian Empire after the abolition of serfdom in 1861 and the introduction of *land reforms. On state-owned lands, from 1866 the emancipated *state peasants paid to the state a monetary *quitrent based on their total incomes instead of the value of the allotments they received. In Ukraine 28 percent of the gentry-owned land was set aside for purchase by the former proprietary serfs at grossly inflated prices (the equivalent of 16.66 years' quitrent). Because the peasants did not have the money to purchase their allotments, the state intervened and advanced the gentry 75–80 percent of the price in cash and interest-bearing bonds, after which the peasants redeemed their allotments by assuming 49-year mortgages from the state at 6 percent annual interest. Payments by the peasants to the gentry for the remaining 20–25 percent were in the form of monetary quitrent or corvée-like services on the remaining gentry-owned lands. Titles to the allotments were entrusted to the **obshchina* instead of to individual peasants to ensure collective responsibility for payments. The peasants in Right-Bank Ukraine were able to redeem land at market value and even received reductions because the state needed their support after the Polish Insurrection of 1863–4. In Left-Bank and Southern Ukraine, however, the payments were 40 percent higher. Laws imposed compulsory 49-year-term redemption payments on all peasants on gentry-owned lands in January 1882 (effective January 1883) and on state-owned lands in June 1886. Most peasants were too poor, too indebted, and too burdened with various taxes to make regular or full redemption payments, and the state deferred and even canceled certain arrears in 1881, 1884, 1896, and 1899. In the wake of the massive peasant disturbances that occurred in 1902 (in Kharkiv and Poltava gubernias) and during the Revolution of 1905–6 the government was forced to reduce the redemption payments and finally to abolish them in January 1907. By then the peasants in the nine Ukrainian gubernias had paid out 382 million rubles in payments (of a total 503 million rubles assessed) for land valued at 128 million rubles.

R. Senkus

Redemptorist Fathers (formally, the Congregation of the Most Holy Redeemer). An order of Catholic priests and monks founded in 1732 by A. de Liguori in Scala (near

The metropolitan's palace in Univ, Galicia, the first Redemptorist Fathers' residence in Ukraine

Naples), Italy. Established as an order of evangelists and practicing clergymen, it spread throughout Europe in the late 18th century and by the 1970s had over 7,400 members. In 1913 Metropolitan A. *Sheptytsky and P. Murray, the head of the order, reached an agreement (approved by the Vatican's Congregation for the Propagation of the Faith) by which Belgian Redemptorists who had been working in Saskatchewan were brought to Galicia and converted to the Eastern rite. They formed a Ukrainian branch of the order, centered near Lviv. Mission houses were opened in Stanyslaviv (now Ivano-Frankivske), Kovel (in Volhynia), Lviv (the residence of its protohegumen), and Ternopil. By the Second World War there were almost 100 members of the order in Galicia and another 24 in Transcarpathia (in Mykhailivtsi and Khust). The first Ukrainian Redemptorist house in Canada was established in Yorkton (Saskatchewan), under the direction of Rev. A. *Delaere in 1913. Other centers opened in Wynyard and Ituna (Saskatchewan); Roblin (Manitoba), where the order runs a boarding school; Toronto; and Winnipeg (the residence of the protohegumen). The major center remained Yorkton, where a religious publishing house and the journals **Holos Spasytelia* and **Logos* were established. In the United States there are 60 monks (1987) in missions in Newark and in Washington. Several Ukrainian Catholic bishops have belonged to the order, including metropolitans M. Hermaniuk and V. Sterniuk and bishops V. Malanchuk, V. Velychkovsky, M. Hrynchyshyn, and F. Kurchaba.

W. Lencyk, V. Malanchuk

Redens, Stanislav, b ?, d 1938. Bolshevik and Soviet security official of Polish origin married to J. Stalin's wife's sister. He served as F. Dzerzhinsky's secretary (from 1918). In 1919–21 and 1928–33 he directed the operations of the Cheka and the GPU in Ukraine, the Crimea, and the Caucasus. He was particularly vindictive against supporters of S. Petliura and the Ukrainian Autocephalous Orthodox church. From 1933 to 1938 he headed the Moscow NKVD; then he was demoted to Kazakhstan, arrested, and executed (later rehabilitated by N. Khrushchev).

Redin, Egor, b 14 November 1863 in Starshee, Dmitriev county, Kursk gubernia, Russia, d 10 May 1908 in

Kharkiv. Art historian and archeologist. A graduate of Odessa University, from 1893 he taught art history at Kharkiv University, directed the Kharkiv Museum of Fine Arts, and belonged to the Kharkiv Historical-Philological Society and the Moscow Archeological Society (full member from 1902). Redin researched the archeological remains of early Christianity, the art and architecture of Kievan Rus' and the Italian Renaissance, and Kharkiv's artistic monuments. He compiled the seven catalogues of the 12th All-Russian Archeological Congress, held in Kharkiv (in 1902), and prepared the album of its exhibition (1903). His chief works deal with the Kievan St Sophia Cathedral's mosaics and fresco paintings (1889, with D. Ainalov), the mosaics of Ravenna's churches (1896), and the church antiquities of Kharkiv (1905).

Redkyn, Petro [Red'kyn] (Redkin, Petr), b 16 October 1808 in Romen, Poltava gubernia, d 19 March 1891 in St Petersburg. Philosopher of law and pedagogue. Educated at Moscow, Dorpat, and Berlin universities, he was awarded an LL D degree by St Petersburg University in 1835 and was appointed a professor of law at Moscow University. He was dismissed in 1848 for his liberal views. He served in the Department of Appanages (1848–82) and later chaired the St Petersburg Pedagogical Society (1860–74) and became a professor of law at (1863–78) and rector of (1873–6) St Petersburg University. From 1882 he was a member of the State Council. Redkyn's early views on the nature and development of law were influenced strongly by G. Hegel. In 1841 he published in *Moskovitianin* the first Russian study of Hegel's dialectical logic. Keeping abreast of Western trends, he turned to positivism (A. Comte) in the 1860s, but he retained some Hegelian habits of thought. He was one of the founders and president (1860–74) of the St Petersburg Pedagogical Society and contributed articles to *Uchitel'* (1861–70). In the 1880s he wrote a seven-volume work consisting of a collection of his lectures on the history of the philosophy of law in relation to the history of philosophy in general (1889–91).

Reed, common (*Phragmites communis* or *australis*; Ukrainian: *ocheret zvychnyi*). A large aquatic grass of the family Poaceae that grows along lakeshores, in marshy areas, in forests, or in sites with nearby ground water. The common or water reed is the only reed found in Ukraine. It grows up to 9 m tall. Dense thickets, covering about 110,000 ha, are found in the Dnieper, Dniester, and Danube rivers as they approach the Black Sea. Reeds tolerate salt water. They have been used for centuries as thatching and construction material, in basketry, and in the manufacture of coarse paper, pens, and musical instruments; they are also used as litter for livestock and as fuel. Young reed plants are eaten by cattle and horses, and they are a valuable food source for muskrat, nutria, elk, and deer.

Reedgrass (*Calamagrostis*; Ukrainian: *ocheretnyk, kunychnyk*). A perennial grass, also known as bluejoint, belonging to the Poaceae family. Ten species can be found in Ukraine, the most common being a surface reedgrass (*C. epigeios*) which grows in meadows, sands, and fallow fields throughout Ukraine and a reedy reedgrass (*C. arundinacea*) which grows in the shady forests of Polisia.

Reformation. A religious, political, and social movement that had as its precursor J. Hus and the Hussites in late 15th-century Bohemia. It is usually considered to have originated with M. Luther and with the spread of *Protestantism in Germany and other countries in northern, central, and eastern Europe in the 16th century. The Reformation was directed against the Catholic church's dogma, feudal structure, and economic and political domination. Its adherents introduced the use of the national vernaculars not only in the Protestant churches but also in many European literatures, thereby strengthening national consciousness and national cultural development. The Reformation cut across social, national, and state boundaries and frequently caused bitter religious conflicts and wars.

Reformational ideas were introduced into Ukraine by students returning from their studies in Bohemia and Germany and by Hussite and German colonists in the Polish-Lithuanian Commonwealth. By the 16th century the ideas had become popular among many noble families (eg, *Radziwiłł, *Sapieha, and *Nemyrych) in the Commonwealth. After the 1569 Union of *Lublin reformational congregations were established in Ukraine (63 in Rus' and Belz voivodeships, 27 in Volhynia, 6 in Podilia, and 7 in the Kiev and Bratslav regions). Although the Reformation did not affect all of Ukrainian territory or society, it helped to mobilize the Orthodox nobility, burghers, Cossacks, and clergy against the Catholic offensive, particularly after the 1596 Church Union of Berestia, and to imbue their Ruthenian (ie, Ukrainian-Belarusian) Orthodox faith with elements of a nascent national consciousness. The leader of the Orthodox opposition to the church union, Prince K. *Ostrozky, favored rapprochement with the Protestants, and joint Orthodox-Protestant conferences were held in 1595, 1596, and, in Vilnius, 1599. In 1632 Archimandrite P. Mohyla and Hetman K. Radziwiłł of Lithuania organized an Orthodox-Protestant coalition against the Catholic-Uniate majority in the Polish Sejm, thereby helping to bring about the restoration of the legal status of the Orthodox church in the Commonwealth.

The Reformation had a marked influence on Ukrainian religious-cultural life. Czech Protestant translations of the Bible were already being used in Ukraine in the 15th century, and in the late 16th century, Ruthenian translations of the Scriptures based primarily on Protestant texts (eg, V. Nehalevsky's translation of part of the New Testament [1581] and V. Tsiapinsky's translation of the Gospel) were published and used privately and during liturgies. Use of the vernacular became widespread in homiletics and religious polemics. Thus, under the influence of the Reformation a bookish Ruthenian language gained currency in writing, alongside the traditional Church Slavonic and the Polish favored by the social elite. Even Catholic publications began appearing in Ruthenian (eg, a catechism published in 1585), and bilingual editions of works (Polish-Ruthenian) were published.

A number of reformational schools were founded in Ukraine, including Calvinist ones in Panivtsi, in Podilia, and Ostrih and Berestechko, in Volhynia, and *Socinian schools in Kyselyn, Hoshcha, Cherniakhiv, and Liubar, in Volhynia. Their quality of education often surpassed that of the Catholic schools, and they attracted many Ukrainian and Belarusian students.

The Reformation reinforced the Ukrainian church's tra-

dition of conciliar rule, as is particularly evident in the work of the 16th- and 17th-century church *brotherhoods. The brethren read from the Scriptures at meetings and at home, monitored each other's conduct, supervised church affairs, and controlled the actions of priests and bishops, to the point of declaring some of them 'enemies of truth' (eg, in the 1588 statute of the Lviv Dormition Brotherhood). Consequently the Orthodox bishops protested against the extent of lay involvement and control in church affairs. The reformational tendencies in the Orthodox congregations prompted many bishops to accept the union with the Roman church.

The Reformation influenced the growth of national consciousness in Ukraine and political mobilization among Cossacks. In the first half of the 17th century they became the vanguard in Ukrainian society; they presented increasingly greater opposition to Polish rule in Ukraine and openly supported the Orthodox church in its struggle against the Catholic onslaught. In their search for allies against Poland the Cossacks repeatedly turned to Protestant states, such as Sweden, Transylvania, and Brandenburg.

The influence and successes of the Reformation did not endure in Ukraine, however. Its link to Protestantism placed it between two warring camps, Catholic Poland and Orthodox Ukraine, both of which grew increasingly antagonistic not only to each other but also to reformational currents. The Polish Catholic church (largely the *Jesuits) waged a successful Counter-Reformation against Protestantism, and the Orthodox church became hostile to Protestants in general and to the Antitrinitarian and other radical Protestant currents popular among the Right-Bank nobility in particular. Consequently the Reformation was deprived of a social base, and the Ukrainian uprising of the mid-17th century under Hetman B. Khmelnytsky opened the way for the penetration of other cultural and political currents (eg, the baroque). Most of the reformational communities in Ukraine ceased to exist around that time.

I. Korovytsky

Sergei Reformatsky

Reformatsky, Sergei [Reformatskij, Sergej], b 1 April 1860 in Borisoglebsk (now in Ivanovo oblast), Russia, d 27 December 1934 in Moscow. Organic chemist; corresponding member of the USSR Academy of Sciences from 1929. A graduate of Kazan University (1882), he studied at Heidelberg and Leipzig universities and was a professor at Kiev University (1891-1934) and the Kiev Polytechnical Institute (1898-1907). He is regarded as the founder of the Kiev school of organic chemists. Reformatsky's research dealt primarily with organometallic synthesis. He studied (1882) the reduction of tertiary alcohols to isostructural hydrocarbons, but is best known for his discovery (1887) of beta-oxyacid synthesis through the action of zinc and complex esters on aldehydes (the Reformatsky reaction). This reaction was extended to unsaturated systems, and it later permitted the synthesis of vitamin A. Reformatsky's textbook on organic chemistry went through 17 editions between 1893 and 1930.

Refractory clays. See Clays.

Refractory-materials industry. An industry that processes refractory clays and materials, which are used primarily in making ovens for the metallurgical and glass industries, and equipment and parts for various high-technology industries. The most important feature of such materials is their ability to withstand high temperatures. Ukraine is rich in refractory *clays. They have been used since ancient times. In Ukraine the first specialized refractory-materials factories were built in *Chasiv Yar (1887), the site of the largest refractory-clay deposit in the former USSR, and Krasnohorivka (1896), both in the Donets Basin. In 1913, 326,000 t of refractory materials were produced in Russian-ruled Ukraine; the total for the entire empire was 582,000.

Since the 1920s, and especially since the Second World War, the industry has developed into an important part of the economy. Total production of refractory materials reached 1.2 million t in 1940, 2.8 million t in 1960, and 3.6 million t in 1970. The industry's output began to drop in the 1970s. It fell to 3.3 million t in 1980 and 3.1 million in 1987. The greatest decline was in the production of fire-clay, which is made by baking *kaolin; whereas 1.9 million t were produced in 1960 and 2.6 million t in 1970, by 1987 the figure was only 1.9 million t. Production of Dinas bricks (made from silica) fell from 347,000 t in 1960 to 269,900 t in 1970, and has remained steady since then at

just under 300,000 t per year (294,900 t in 1987). Meanwhile production of magnesite increased from 532,000 (1960) to 730,000 (1970) and 840,000 (1987). Today the largest refractory-materials factories are in Chasiv Yar, Siverske, Dokuchaievske, and Krasnoarmiiske.

Regalia. Emblems, symbols, or paraphernalia of power or office. Archeological finds in Ukraine show that stone maces and axes were used as signs of power in the Stone Age. In the Princely era family coats of arms served as regalia, those of a princely house usually including a *trident of some kind. Standards (*bunchuky*) and flags were used widely, but the **bulava* was rare.

In the Cossack period flags, *bulavy*, *bunchuky*, seals, *litavy*, bugles, and staffs with silver balls signified various offices of the Zaporozhian Sich and the Cossack state. The *bulava* was used by the hetman, and the **pernach* by colonels, from the 16th century. B. Khmelnytsky received a silver *bulava* from the king of Poland, the Turkish sultan, and the Russian tsar. The *bulava* was also a sign of the Zaporozhian otaman's authority. From the Zaporozhian Sich it was passed on to the Kuban Cossacks, and was used by them until Soviet power was established in the Kuban.

The *bunchuk*, a distinctive standard of Turkish origin, consisted of a wooden staff with a decorative metal head, to which tasseled cords and one or more bundles of horsehair were attached. According to Cossack tradition, in 1578 Stephen Bathory presented the Cossack hetman with a *bunchuk* and other regalia. The *bunchuky* carried by hetmans had red horsetails and white-and-black cords.

Cossack banners were usually made of carmine cloth with images of saints, crosses, and coats of arms embroidered on them. They were carried on each side of the hetman or otaman at the head of the Cossack army. The *litavy* were large copper kettledrums used for announcing various solemn events. The Russian tsars presented the Cossack hetmans and the Zaporozhian Host with various regalia.

In the Ukrainian church the chief regalia are the miter, panagia, and crosier. The miter has been used since the 11th century. Shaped at first like a crown, it evolved to a high, pointed hat with enamel medallions on the sides. Originally worn by bishops, by the end of the 12th century the miter was bestowed on archimandrites and distinguished clergymen. The panagia is a round metal icon of the Holy Mother on a chain that is worn on the breast by Orthodox prelates and archimandrites of stauropegion monasteries. The crosier (*posokh* or *zhezl*) is presented to a hierarch at his consecration. It is topped with a metal cross.

M. Miller

Regensburg. A city (1989 est pop 119,000) in Bavaria, Germany, and the site in 1945–9 of the largest Ukrainian DP camp in Germany. At its peak (1947) the workers' district of Ganhofersiedlung housed almost 5,000 Ukrainian and 1,000 non-Ukrainian refugees and *displaced persons. With a population from all regions of Ukraine and of all occupations, the camp formed a microcosm of Ukrainian society. Its governing bodies were elected by the residents. The administration was headed first by V. Zaiats and then by A. Artymovych (1946), Ya. Serbyn (1946–8), and P. Balei (1948–). A wide range of institutions and or-

View of the Regensburg DP camp (1947)

ganizations was set up: a Ukrainian Catholic parish headed by Rev O. Sharanevych and later by Ye. Haidukevych; a Ukrainian Orthodox parish under Rev V. Shevchuk; a school system, consisting of a kindergarten, elementary and secondary schools, vocational courses in home economics, radio mechanics, driving, and photography, and the Ukrainian Technical and Husbandry Institute; the Plast and SUM Ukrainian youth associations and the Sich sports club; cultural and social organizations, such as a church choir conducted by I. Kurylenko, a drama group and orchestra led by I. Povaliachek, a music school, and the Ensemble of Ukrainian Actors directed by V. Blavatsky (1947–9); a medical and social service; camp-run tailor, barber, toy, leather-ware, jewelry, and ceramics workshops; the Ukrainske Mystetstvo co-operative; some private enterprises; and political blocs, which competed in camp elections. Several periodicals were published there: the weekly *Slovo* (1945–6), edited by S. Dovhal; *Ukrains'ke slovo* (1946–7), edited by Yu. Tarnovych; *Visnyk oseli* (1947–?), edited by I. Durbak; and *Weekly Information Bulletin* (1946). A number of private and co-operative publishers published literary and scientific works and practical manuals.

Regiment (*polk*). During the Princely era any separate military unit or expedition that a prince or his vicegerent commanded in time of war was known as a *polk* (eg, as in the epic **Slovo o polku Ihorevi* [The Tale of (Prince) Ihor's Campaign]). In 14th- and 15th-century Lithuanian-ruled Ukraine military units raised by the inhabitants of towns and lands to repel Tatar attacks were also known as *polky*. In the late 16th century under Polish rule, the first regiments of *registered Cossacks were formed and named after the towns where their colonel and chancellery were located. Before the 1648–57 Cossack-Polish War six such regiments were based in Bila Tserkva, Cherkasy, Chyhyryn, Kaniv, Korsun, and Pereiaslav. Earlier, from 1625 to 1638, there was also a Myrhorod Cossack Regiment.

In the Cossack *Hetman state the regiment was not only a military but also an administrative-territorial unit (see *Company system and *Regimental system). It also had *mercenary regiments of cavalry and infantry (*Serdiuk regiments). An analogous system existed in Russian-controlled *Slobidska Ukraine, where in the late 17th century five Cossack regiments defended the southern frontier of the Russian Empire from the Crimean and Nogay Tatars. In 1764 and the 1770s the Russian regime created *lancer

regiments in the newly annexed region of New Russia, to which they recruited Cossacks from the Poltava and Myrhorod regiments and Russian and foreign colonists. In the early 1780s the tsarist regime abolished the Cossack regimental system, and in 1784 it replaced it with the Little Russian Cavalry of 10 carabineer regiments as part of the Russian imperial army. Each regiment had 10 squadrons, which were initially organized by territory and commanded by Ukrainian officers. Since that time Russian imperial, Ukrainian (1917–21), and Soviet *military formations have been organized along the lines of other European armed forces.

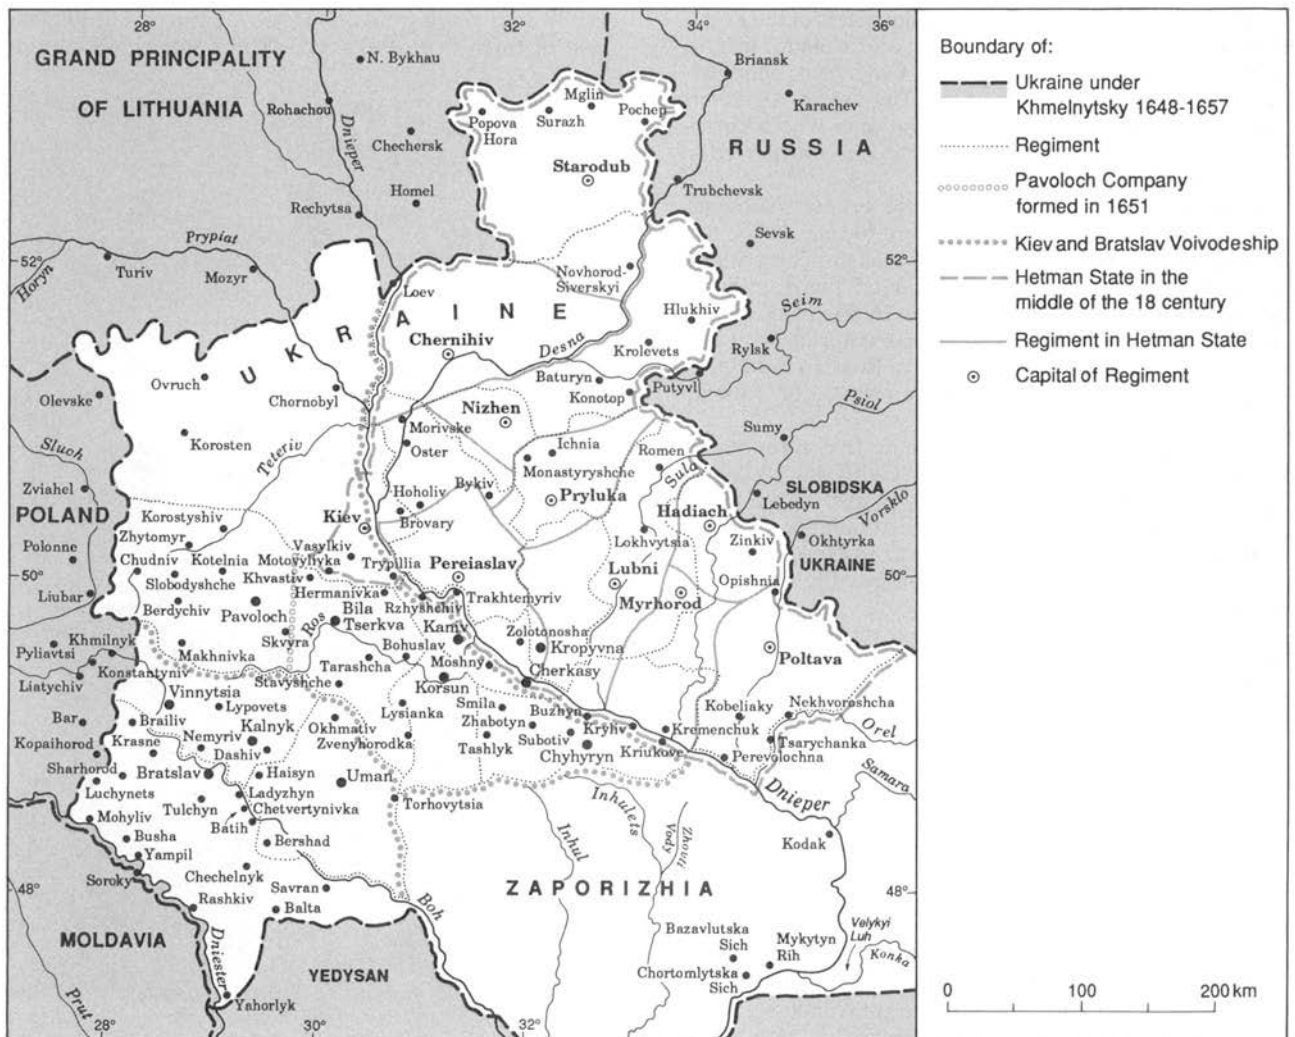

A. Zhukovsky

Regimental court (*polkovyi sud*). A criminal and civil court with jurisdiction in the territory of a given regiment of the Hetman state in the 17th and 18th centuries. It was composed of the regimental *starshyna* and was headed by the regimental judge. It served also as a military court.

Regimental system. The administrative, territorial, military, and judicial structure of the 17th- to 18th-century *Hetman state and *Slobidska Ukraine. Under Hetman

B. Khmelnytsky there were initially 22 regiments, which were named after towns where their headquarters were located. Their colonels and other officers (*starshyna*) had jurisdiction over both the Cossacks and the civilian population in their territories. The colonels belonged to the hetman's *Council of Officers. Before 1648 they had been appointed by the Polish government. Hetman Khmelnytsky, however, frequently appointed colonels personally. From the hetmancy of I. Samoilovych to that of I. Mazepa they were elected by a regimental council in the presence of the hetman's representatives, who greatly influenced the choice of candidate. The hetman confirmed all appointments after the consent of the Council of Officers. The election of colonels persisted longest in the southern Hetmanate (in Poltava regiment). After 1709 Peter I and other Russian tsars appointed or dismissed colonels by fiat, and often chose Russians, Moldavians, Serbs, and other foreigners. Hetman D. Apostol's government had the right only to recommend candidates to the tsar.

The regimental colonel was assisted by his senior staff, which included a quartermaster, a justice, a chancellor, one or two *osauls, and one or two flag-bearers. A regimental council of officers served as an advisory body to

the colonel. The regimental chancellery was initially only a secretarial apparatus, but in the 18th century it served as a collegial administrative body that included the colonel and other regimental officers. The *regimental court settled criminal and some civil cases in the territory of the regiment. It was presided over by the regimental judge except in grave criminal cases, when the colonel himself took over. The regiments were divided into companies commanded by captains. Chernihiv regiment had the fewest companies (7), and Bratslav, the most (22). (See also *Company system.)

From 1650 to 1653 there were 17 regiments in the Hetman state. Ten were in Right-Bank Ukraine: Bratslav, Bila Tserkva, Cherkasy, Chyhyryn, Kaniv, Vinnytsia (aka Kalnyk), Kiev, Korsun, Pavoloch, and Uman. Cherkasy, Chyhyryn, Kaniv, and Kiev regiments also had adjacent territories in Left-Bank Ukraine. Seven regiments were in the Left Bank: Chernihiv, Kropyvna (divided between Lubni and Pereiaslav regiments in 1658), Myrhorod, Nizhen, Pereiaslav, Poltava, and Pryluka.

In the 1670s and 1680s the Right-Bank regiments collapsed after Polish rule in the region was restored. From the 1680s Col S. *Pali of Khvastiv ruled the territory of the lapsed Bila Tserkva regiment. In 1702 he restored the regiments of Bila Tserkva (the new headquarters of the Right-Bank Cossacks), Bohuslav, Bratslav, and Korsun. In 1704 they were supplemented by new Chyhyryn, Mohyliv-Podilskyi, and Uman regiments. The seven regiments were active until 1712, when, in accordance with a Russo-Polish treaty, many of their Cossacks were transferred to the Left Bank.

In the Left-Bank Hetman state three new regiments, Lubni, Hadiache, and Starodub, were formed in the late 1650s and early 1660s, and the total was thereby brought to 10. The regimental system survived there until the tsarist abolition of the Hetman state in the 1780s. It was replaced by Russian administrative-territorial *vice-generacies and courts and 10 regiments of Russian light (after 1784, carabineer) cavalry known as the Little Russian Cavalry.

In Russian-ruled Slobidska Ukraine five autonomous Cossack regiments – Izium, Kharkiv, Okhtyrka, Ostrohozke (aka Rybinsk), and Sumy – were created in the 1650s. They were subordinated to the Russian military governor of Belgorod and the Razriadnyi prikaz in Moscow, and in 1765 they were abolished and transformed into five Russian hussar regiments.

Altogether there were 51 Cossack regiments in 17th- and 18th-century Ukraine: the *Belorussian (aka Chavusy and Mahiliou, 1654–9), Bila Tserkva (1648–74, 1702–12), Bohuslav (1685–1712), Borzna (1648–9, 1654–5), Brahin (1648–9), Bratslav (1648–85, 1690–1712), Chechelnyk (1650, 1673), Cherkasy (1648–76), Chernihiv (1648–1783), Chornobyl (1649, 1651), Chyhyryn (1648–83, 1704–11), Hadiache (1648–9, 1672–1782), Ichnia (1648–9), Irkliiv (1648–9, 1658–63), Izium (1685–1765), Hlukhiv (1663–5), Kaniv (1648–78), *Kharkiv (1659–1765), Khvastiv (1651, 1685–1702), *Kiev (1648–1782), Korsun (1648–1712), Kremenchuk (1661–3), Kropyvna (1649–58), *Lubni (1648–9, 1658–1782), Lysianka (1648–9, 1657–9, 1664–6, 1674), *Mohyliv-Podilskyi (1648–9, 1656–76), *Myrhorod (1648–1782), *Nizhen (1648–1782), Novhorod-Siverskyi (1653–4, 1668), *Okhtyrka (1655–1765), *Ostrohozke (1652–1765), Ovruch (1648–9, 1657–66), *Pavoloch (1650 to ca 1674),

*Pereiaslav (1648–1782), *Poltava (1648–1775), *Pryluka (1648–1782), Sosnytsia (1648–9, 1663–8), *Starodub (1663–1782), *Sumy (1648–1765), Torhovysia (1664–76), Turiv-Pynske (1657–9), *Uman (1648–86, 1704–12), *Vinnytsia (aka Kalnyk, 1648–78), Zhyvotiv (ca 1649 to ca 1664), *Zinkiv (1662–72), *Zviahel (1648–9, 1657–8), Ladyzhyn, Mliiv, Dymmer, Medvedyn, and Kamianets-Podilskyi (dates of the last four are unavailable).

Regina. The capital (1986 pop 175,000) and commercial center of Saskatchewan, with a Ukrainian population (1981) of 14,455. Ukrainians, mainly laborers or railway workers, began to settle in Regina in the mid-1890s. In 1909 the provincial government set up the Training School for Teachers for Foreign-Speaking Communities there, which by 1914 had graduated about 100 Ukrainian teachers. By 1911 there were about 500 Ukrainians in Regina, most of them from Bukovyna. The political association

St Basil's, the first Ukrainian Catholic church (1928) in Regina

Ukraine (est 1914) merged in 1917 with the local branch of the Ukrainian Socialist Democratic party (est 1914) to form the Ukrainian Workers' Association. When this organization took on a pro-communist profile, its nationalist members left and formed the Prosvita society, in 1921. The remaining members went on to establish a local of the Ukrainian Labour-Farmer Temple Association. The Ukrainian Orthodox parish of the Descent of the Holy Ghost (est 1924) built its first church in 1928 and a larger one in 1960. St Basil's Ukrainian Catholic parish (est 1925) consecrated its church in 1929 and a new church in 1960. A branch of the Ukrainian National Federation, organized in 1933 by the Prosvita Institute and the Ukrainian War Veterans' Association, ran a Ukrainian school and a cultural program. The University of Regina began to offer Ukrainian language courses in 1966 and Ukrainian literature courses in 1971. In the 1991 census, only 2,285 inhabitants of Regina stated Ukrainian was their mother tongue.

Regional economic councils (*rady narodnoho hospodarstva* or *radnarhospy*; Russian: *sovnarkhozy*). Territorial bodies for economic planning and management, which operated in the USSR in 1918–31 and 1957–64. The first local economic councils in Ukraine were set up in January 1918 by the Southern Economic Council of the Donets–Kryvyi Rih Basin to manage the nationalized enterprises under the jurisdiction of the Supreme Council for the National Economy of the RSFSR. Under *War Communism there was constant conflict between the economic councils and *workers' control organizations. During the NEP period the local economic councils were abolished, and branch trusts, syndicates, and associations were set up. When the USSR was established, the Supreme Council for the National Economy of Ukraine was renamed the Ukrainian Council for the National Economy and subordinated to the Supreme Council for the National Economy of the USSR. It operated under the chairmanship of V. *Holubovych until 1931. In 1932–4 the supreme economic councils, trusts, and syndicates were dissolved, and Union and Union-republican people's commissariats for the various branches of the economy were set up. In 1946 they were replaced by ministries.

In May 1957, after most of the economic ministries had been abolished, territorial councils were formed to administer the economic regions (see *Economic regionalization). In Ukraine 14 regional economic councils were set up, and almost all industrial enterprises, except for military ones, were placed under their control. Their task was to implement the plans drawn up by the USSR and the Ukrainian state planning committees, draft the plans for enterprises, monitor their fulfillment, distribute the cadres and the funded production, and manage the communications among enterprises. The councils developed local loyalty; that is, they gave priority to the interests of their own regions above the interests of other regions or republics. In 1960 a republican Ukrainian Council for the National Economy, headed by M. *Sobol, was established. In 1962 the economic councils were centralized and consolidated; their number in Ukraine was reduced to seven, and the Council for the National Economy of the USSR was formed. At the same time the state planning committees were restricted to long-range planning, and the Ukrainian and USSR councils for the national economy were entrusted

with the drafting and implementation of the yearly plans. When N. Khrushchev was ousted in 1964, all the regional economic councils were abolished, and the centralized branch system under ministries, which was similar to the system under J. Stalin, was restored. The former functions of the state planning committees were also restored, but the importance of the republican planning fell considerably.

V. Holubnychy

Regional economics. A branch of economics dealing with the role of geographic location and space in the allocation of productive resources. It combines the methods of political economy, geography, and statistics. With regard to Ukraine the key objectives are to analyze the efficiency of industrial location, capital investments, interregional and foreign trade, transfers of capital and labor, and the effectiveness of regional planning and administration.

During the 19th and early 20th centuries Ukrainian territories under Russian and Austrian rule were divided into districts for purposes of administration, taxation, and military strategy. Regional specialization increased during industrialization in the latter part of the 19th century. Thanks to its rich natural resources, the southeastern forest-steppe region became the base of the coal, metallurgical, and chemical industries and, later, of the rail, shipbuilding, and construction industries. The steppe region became a major exporter of grain to Europe.

Western Ukrainian territories under Austria (Galicia, Bukovyna, Transcarpathia, and the Lemko regions) were industrially underdeveloped and overpopulated. Their condition gave rise to extensive emigration.

Geographic studies of the Russian Empire by P. Semenov-Tian-Shansky, D. Mendeleev, and A. Rikhter viewed Ukraine as a distinct entity that was subdivided further into various regions. Although the imperial economy had one tariff-free market and monetary and fiscal systems, major regions, such as Ukraine, Poland, and the Baltic, developed integrated economies in their own right. Inadequate long-distance highways and railroads could not overcome the advantages of local river transportation. Regionalism was also promoted by foreign investors: French and Belgian capital favored Ukraine, German investment gravitated toward Poland and Finland, and Russian private capital controlled the Urals, Siberia, and Central Asia. Up to the First World War Ukraine developed as a cohesive economy that specialized in certain products and traded with other regions of the empire and European countries.

The federal constitution of the USSR as well as practical considerations permitted the Ukrainian SSR to enjoy limited economic autonomy. The planning and management of local consumer industries as well as the administration of educational and social services came under the republic's jurisdiction. The republic's government retained 16.4 percent of the turnover tax collected in Ukraine in 1950, 27.7 percent of the tax in 1960, 27.2 percent in 1970, and 54.8 percent in 1980. The branch or sectoral approach to economic management, however, gave the Union ministries in Moscow decisive control over the largest and most important industries.

In 1957–65 the USSR was divided into self-managed macroregions under the jurisdiction of *regional economic councils. Since most economic activities became subor-

minated to the republic's Council of Ministers, more attention was paid to regional criteria in planning, budgeting, and management.

In the 1980s Ukraine was divided into three economic macroregions of the USSR subordinated directly to Moscow: (1) the Donets-Dnieper region, encompassing 8 oblasts, with cities such as Donetsk, Kharkiv, Dnipropetrovske, and Zaporizhia, and accounting for over half of Ukraine's industrial and a third of its agricultural output; (2) the Southwestern region, encompassing 13 oblasts, 7 of which were annexed during the Second World War, including the cities of Kiev, Lviv, Lutse, Uzhhorod, and Chernivtsi, and accounting for over half of Ukraine's agricultural and a third of its industrial production; and (3) the Southern region, consisting of 4 oblasts, with the major port cities of Odessa, Mykolaiv, and Sevastopol. In addition to shipping and shipbuilding, the region has large machine-building, food-processing, and textile industries, and a well-diversified agriculture. The Crimea is a health-resort and tourist area.

Statistics comparing Ukraine with other Soviet republics were widely published but often misinterpreted. The Union government claimed to pursue a Leninist policy of regional economic equalization aimed at eliminating the causes of conflict among the nationalities. But wide regional differences in economic development had persisted. Thus, the standard of living, wage rates, and capital investment in Ukraine during the 1970s and 1980s lagged behind those in the RSFSR and the Baltic states. There are also considerable disparities among the regions within Ukraine. Pockets of underdevelopment and overpopulation persist in Western Ukraine, and the concentration of industry in the *Donets Basin exceeds what is ecologically safe.

Foreign trade and Ukraine's international specialization also fall within the scope of spatial analysis. As a result of Moscow's policies favoring the development of the eastern regions of the USSR, trade between Ukraine and Russia has been diminishing; Ukraine's export of metals to Russia, for example, dropped from 60 percent of the total production in 1940 to 24 percent in 1960 and 12 percent in 1970. At the same time Ukraine used more of its own output and traded more with Belarus, the Baltic states, and Eastern Europe.

Soviet regional development was shaped by Moscow's tendency toward a centralized planned system and the struggle of the republics for a more efficient and cohesive development of their regions. The losses of capital reflected in Ukraine's annual budgets and balances of payments constituted a form of exploitation.

Research in Soviet regional economics has been conducted by K. Vobly, M. Palamarchuk, L. Koretsky, P. Voloboi, V. Popovkin, I. Panko, and O. Koroid in the USSR and by V. Holubnychy, I. Koropecyij, B. Wynar, Z. Melnyk, and V. Bandera in the United States.

Regional studies. The study of a given part of a country, such as a province, county, or town, from many standpoints – geographic, historical, ethnographic, economic, botanical, zoological, agricultural, and so on. In the USSR regional studies are conducted by regional museums, societies, and clubs which rely heavily on local support and are associated closely with educational programs in the local schools.

Before the 1917 Revolution various central and local government and zemstvo institutions, learned societies, and individuals collected and published regional lore and information. In the 1850s the Commission for the Description of the Gubernias of the Kiev School District at Kiev University developed a wide program of regional studies. The short-lived *Southwestern Branch of the Imperial Russian Geographic Society made major contributions to regional studies. The Moscow Society of Naturalists sent research expeditions to Ukraine to study its flora and fauna. The Polish Society of Regional Studies in Warsaw, which published the periodical *Ziemia*, included Right-Bank and Western Ukraine in its range of interest. A number of historical societies were active in regional studies: the *Kiev Archeographic Commission, the *archival commissions of Tavriia, Chernihiv, Poltava, Katerynoslav, Kiev, and Kherson gubernias, the *Odessa Society of History and Antiquities, the Nizhen Historical-Philological Society, and the *Kharkiv Historical-Philological Society. Naturalists' societies at universities collected and studied the flora and fauna in their regions, and statistics departments of gubernial zemstvos collected economic data on their gubernias. The *Shevchenko Scientific Society in Lviv encouraged regional studies in Galicia.

In the 1920s regional studies in Soviet Ukraine developed rapidly. The Regional Studies Commission of the All-Ukrainian Academy of Sciences (est 1922) had a student section and subcommissions in Kharkiv and Odessa. The Cabinet for the Study of Podilia (est 1924) in Vinnytsia collaborated with the commission. Regional studies were conducted also by the *Agricultural Scientific Committee of Ukraine; the Ukrainian Committee of Regional Studies in Kharkiv, which published 28 issues of the monthly *Kraieznavstno* (1927–30); and the *Central Statistical Administration of the Council of Ministers of the Ukrainian SSR and its branches. Much work was done on the local level by scientific and learned societies, museums, and clubs, some of which published their own regional periodicals. The *Kiev Society of Naturalists published studies of regional flora and fauna in journals and collections. In 1920 the Odessa Regional Studies Commission began to publish *Visnyk kraieznavstva*. The Cabinet for the Study of Podilia issued 23 works in regional studies, and the Kamianets-Podilskyi District Committee for Regional Studies published two volumes of the collection *Kamianechchyna* (The Kamianets Region). *Vsia Odeshchyna* (All the Odessa Region) and collections of materials about the Vinnytsia, Uman, and Mykolaiv regions came out. Several committees of the All-Ukrainian Academy of Sciences, such as the commissions on Kiev, Right-Bank Ukraine, Southern Ukraine, Left-Bank Ukraine, and Western Ukraine, and

the Historical Geography Commission, were involved in regional studies. During this period there were almost a hundred regional studies organizations in Soviet Ukraine.

In the 1930s regional studies institutions were dissolved, and the discipline was suppressed. The Regional Studies Commission was abolished in the reorganization of the Academy of Sciences. Leading scholars and museum workers were repressed. In 1937 the authorities declared that central and local regional studies institutes were superfluous. When local societies and clubs were disbanded, only museums carried on some regional research, but because of staff shortages (under 200 museum workers) the results were insignificant.

After the Second World War regional studies in Ukraine were revived and were subordinated to the needs of economic planning and political propaganda. Surveys of local resources and studies of their efficient exploitation were stressed, and local heroes of the Revolution and the Second World War were glorified. Over 50 special regional studies museums are active in the field. They include large oblast museums, such as the Vinnytsia, Zhytomyr, Transcarpathia, Crimea, Donetske, and Chernivtsi museums, and many raion, school, and collective-farm museums. Regional studies publications began to appear in significant pressruns only at the end of the 1950s. They included books on specific oblasts, tourist guidebooks, maps, and the journal *Kraieznavstvo v shkoli*. Local regional studies clubs were set up in libraries, museums, organizations, and schools, but for many years there was no central Ukrainian institution or journal devoted to regional studies. A republican center for regional studies was established within the AN URSR (now ANU) Institute of History only in the mid-1970s. The institute prepared the 26-volume *Istoriia mist i sil Ukraïns'koi RSR* (History of Cities and Villages of the Ukrainian SSR, 1967–74). In the late 1980s many independent societies and clubs devoted to studies of their regions sprang up.

During the interwar period in Western Ukraine, the Plai society in Lviv organized walking tours and published regional materials in its magazine *Nasha bat'kivshchyna* (1937–9). The Boikivshchyna society, with its important museum and journal, was a leading center of regional studies. Regional studies museums were opened in Sianik (for the Lemko region), Yavoriv, Kolomyia, and Uzhhorod. The collection *Karpats'ka Ukraïna* (Carpathian Ukraine, 1939) and Yu. Tarnovych's works on the Lemko region were important contributions to the field.

Outside Ukraine regional studies are conducted by the Research Institute of Volyn. A series of regional collections has been published by the Shevchenko Scientific Society in collaboration with ad hoc regional committees. It includes works on Bukovyna, Podilia, and the Peremyshl, Stanyslaviv, Buchach, Zbarazh, Horodenka, Terebovlia, Drohobych, Uhniv, Zolochiv, Sian, Lemko, Stryi, and Buh regions.

B. Medwidsky

Regional studies museums. Cultural, educational, and scientific institutions that collect, preserve, exhibit, and study monuments of a region's natural, archeological, ethnic, artistic, and political development. In Ukraine museums of regional history appeared in the 19th century: in Mykolaiv (1806), Odessa (1825), Kerch (1826), Kiev (1835), Katerynoslav (1849), Chernivtsi (1863), Symferopil (1887),

Kherson (1890), Poltava (1891), Lviv (1893), and Chernihiv (1897). Their basic collections consisted of artifacts from archeological excavations; those were supplemented gradually with historical, ethnographic, natural, and artistic materials. The first founders of such museums were O. Pol, O. Lazarevsky, F. Gumilevsky, and D. Yavornytsky. During a period of official suppression of Ukrainian culture the regional museums reminded people of Ukraine's rich historical legacy.

After 1917–18 new regional studies museums were organized from the collections of various associations, church communities, and private individuals, such as V. Tazhovsky, the Khanenko brothers, V. Shavynsky, and P. Pototsky. They developed rapidly in the 1920s, as a result of the intensive work of the Regional Studies Commission of the All-Ukrainian Academy of Sciences (est in 1922) and the Ukrainian Committee of Regional Studies in Kharkiv. In the 1930s many of them became inactive, and some were closed down. During the Second World War many museum exhibits were destroyed or shipped out of Ukraine.

The Volhynian Regional Studies Museum in Lutske

Regional studies museums are divided into two main groups: state museums, which are fully government-supported, and community museums, which are funded by a local community and are housed on factory premises, in collective-farm buildings, or in schools. The latter group are run by volunteers who are concerned about the preservation of cultural monuments. In 1983 there were 52 state regional studies museums. The more important ones are the Poltava, Rivne, Kherson, Luhanske, Ivano-Frankivske, Cherkasy (est 1918, four branches, 75,000 exhibits), Zaporizhia, Transcarpathian, Zhytomyr, Khmelnytskyi (est 1925, four branches, 57,000 exhibits), Crimea (est 1899, two branches, 56,000 exhibits), Odessa (est 1955, seven branches, 50,000 exhibits), and Vinnytsia

regional studies museums. In the Soviet period the exhibition in each of them was organized according to a prescribed format and was usually divided into the following departments: natural history, ethnography, prerevolutionary history, history of the Soviet period, and the contemporary period. Most of the materials were of recent origin: they dealt with the founding of local communist organizations; the local people's involvement in the revolution, the Civil War, and the First and Second world wars; workers and products of the local industries; production statistics and graphs; improvements in living standards; the local writers, artists, and press. There were few materials of national significance; most of them were ethnographic. Religious artifacts were used for atheistic propaganda. The commentary of the guides was screened by higher authorities and was given in Russian. Ukrainian was used occasionally only in some museums in Western Ukraine. Regional museums were treated as an important medium of ideological propaganda. Each museum was staffed by several dozen specialists. Apart from guides to exhibits very little was published by the museums.

Community-run regional studies museums began to appear in the 1940s and 1950s and were organized by amateur groups. In 1959 there were approximately 200 such museums. In the late 1960s the authorities threw their support behind local initiatives and set up a broad regional studies museums program. By 1965 there were up to 1,000 regional museums in Ukraine. In 1965 the Ministry of Culture in Moscow issued a special decree on the organization and activities of community museums in the USSR. Besides general there were specialized (historical, literary, theater, art) regional museums. The museums in Opishna, Velyki Sorochyntsi, and Marianivka in Poltava oblast, Velyki Khodachkiv in Ternopil oblast, and Serednie Vodiane in Transcarpathia have specialized in folk costume and embroidery; those in Yavoriv and Sosnivka in Lviv oblast and Petrykivka in Dnipropetrovske oblast have dealt with folk decorative art. Regional studies museums in schools were regulated by a specific statute on school museums issued by the USSR Ministry of Education in 1974. By 1983 there were nearly 6,000 community museums in Ukraine. Most of them were small amateur exhibitions in community buildings, dealing with the history of particular villages, towns, factories, and firms, or with military or production heroes. The museums have conducted valuable ethnographic studies of various territories. They have preserved implements and costumes that have been disappearing from everyday use because of technological progress, such as hand mills, mortars, weapons from different periods, ceramic and wooden dishes, folk costumes, embroidery, footwear, coins, manuscripts, and old books. Some of the museums have reconstructions of the interior of peasant cottages. State museum staff and specialists from various cultural, scientific, and educational institutions often have acted as consultants to community museums. Churches and abandoned cottages often have been converted into museum facilities. Some 49 community museums in Ukraine have been housed in churches in 1978. In the late 1980s some of these churches have been returned to their religious communities.

Open-air community museums are becoming increasingly popular. In the late 1960s and early 1970s over 10 such museums were established in Transcarpathia, in Antonivka, Zubivka, Osii, Petrivka, and elsewhere. In the

late 1980s independent associations or clubs of amateurs interested in Ukrainian history have sprung up at the museums. Many private collections amassed by enthusiasts of national culture, such as I. Honchar in Kiev, could be counted as regional studies museums.

Ukrainian regional studies museums exist also outside Ukraine. A number of museums were established after the Second World War: the *Svydnyk Museum of Ukrainian Culture in Czechoslovakia, the museums of Ruthenian culture in Ruski Krstur and Petrovci in Yugoslavia, the Museum of Lemko Culture in Zydranowe, Gorlice, and Bielanka in Poland. In Alberta the *Ukrainian Cultural Heritage Village collects and studies materials on the life of Ukrainians in Canada.

M. Mushynka

Regionalization, economic. The territorial subdivision of a larger economically integrated territory, such as a country, a bloc, or the world, into constituent parts that commonly differ from one another in economic specialization or the division of labor. The beginnings of economic regionalization of Ukraine may be traced to the end of the 18th century, when in both the Russian and the Austrian empires descriptions of Ukrainian lands were written and projects for their economic regionalization undertaken for the purpose of taxation or for military-strategic planning. The first scientific contributions to economic regionalization were geographical studies of the Russian Empire by P. Semenov-Tian-Shanskiy (1880), D. Mendeleev (1893), A. Rikhter (1898), and others, which involved the subdivision of Ukraine (among other parts of the Russian Empire) into natural-economic regions. More specialized schemes for agricultural regionalization of the European part of the Russian Empire (which also included Ukraine) were made at the end of the 19th century by the Russian agricultural economists A. Fortunatov (1896), A. Chelintsev (1910) and A. Skvortsov (1914). A most innovative study of spatial distribution of Russian government income and expenditures was made by the Ukrainian economist M. Yasnopolsky (1891–97), who started the first school of territorial financial econometrics. The industrial regionalization of Ukraine was studied by S. Podolynsky (1880). Important works involving the economic regionalization of Ukraine were written by P. Fomin (1914), I. Feshchenko-Chopivsky (1918), and K. Vobly (in several editions from 1919).
