reorganized into the Shevchenko Ukrainian Banduryst Kapelle, and toured throughout Germany and the occupied eastern territories. After the Second World War the group remained in Germany, then emigrated en masse in 1949 to Detroit. There the group members generally took laboring jobs and continued their choral activities part-time. The ensemble subsequently has toured throughout the United States, Canada, Western Europe, and Australia to considerable acclaim. It has also trained or recruited new members to replace the original core group, and issued numerous LP records. In 1991 the ensemble toured Ukraine.

For several decades the most outstanding member of the ensemble was H. *Kytasty, who served as musical director, performing banduryst, and composer. The chorus has also been led by V. Bozhyk, H. Nazarenko, I. Zadorozhny, P. Potapenko, and V. Kolesnyk. The central place in the chorus's repertoire is held by Ukrainian folk songs, particularly historical songs as arranged by H. Khotkevych, K. Stetsenko, M. Leontovych, O. Koshyts, H. Kytasty, and others. (See *Bandurysts.)

Ukrainian bilingual education (*ukrainska dvomovna osvita*). A program in which Ukrainian is used along with English as a language of instruction in elementary and secondary schools. Bilingual schools exist in the three prairie provinces of Canada, Alberta, Manitoba, and Saskatchewan. Ukrainian bilingual education there has undergone two distinct stages of development.

From 1897 until the period of the First World War Ukrainians were able to take advantage of the educational concessions granted to French Catholics and other minorities in Manitoba to establish Ukrainian-English bilingual schools in rural bloc settlements in Manitoba. A severe shortage of English-speaking teachers (or their refusal to teach in the Ukrainian bloc settlements) and a concern with overcoming the reluctance of rural communities to provide schools initially made the bilingual-school option tolerable for the English-speaking majority. Ja. *Arsenykh,

J. Baderski, and T. *Ferley were among those who played an active role in the development of Ukrainian bilingual education. As the proportion of immigrants in Manitoba grew, however, Canadian nativists became concerned with the threat to the Anglo-Canadian identity posed by the unassimilated immigrants. The pro-British fervor of the war years (1914–18) and the coincident increase in hostility toward foreigners aggravated the situation. On 8 March 1916 all Ukrainian bilingual schools in Manitoba were abolished. Before their dissolution there were 111 Ukrainian and Polish bilingual schools in Manitoba (lumped together in the 1915 report on their status), with 114 teachers and 6,513 pupils.

Inspired by the Manitoba model, Ukrainians in the provinces of Saskatchewan and Alberta also attempted to establish bilingual schools. In 1916 it was estimated that in 40 public schools in Saskatchewan, Ukrainian was used as the language of instruction. In 1919 the Saskatchewan government placed severe restrictions on French and banned the use of all languages other than English in schools for reasons similar to those of the Manitoba authorities.

In Alberta, bilingual schools did not formally exist, but Ukrainian was used in classrooms. The very limited supply of Ukrainian teachers, however, severely restricted the development of unofficial bilingual schools. In 1909–12 about a dozen Ukrainian teachers worked in Alberta under temporary teachers' permits and used both Ukrainian and English in instruction. The greatest setback to bilingual education in Alberta occurred in 1913, when the Department of Education canceled the permits of Ukrainian teachers trained in Saskatchewan and Manitoba. These teachers were accused of having raided schools in Alberta, of being poorly qualified, and of having been recruited by organizations promoting the use of Ukrainian in schools in Ukrainian bloc settlements. Department of Education pressure proved so effective in preventing the hiring of bilingual teachers that there was not even a need to repeal the regulations allowing Ukrainian instruction, as happened in Manitoba and Saskatchewan.

In all of the prairie provinces Ukrainian community pressure was unable to prevent the elimination of bilingual schools. Furthermore, in all three provinces the linguistic and cultural assimilation of immigrants became one of the main goals of the respective provincial systems of education.

The 1970s witnessed the rebirth of Ukrainian bilingual education in western Canada. Alberta took the lead in re-establishing Ukrainian-language instruction. Availing themselves of the legitimacy afforded to the linguistic and cultural aspirations of minorities by the Royal Commission on Bilingualism and Biculturalism, leading members of the Edmonton Ukrainian Professional and Businessmen's Club, including P. *Savaryn and M. *Lupul, lobbied successfully to have the Alberta School Act amended in 1971 to allow any language in addition to English to be used as a language of instruction. Saskatchewan (1974, 1978) and Manitoba (1979) introduced legislative changes modeled on Alberta's and permitted up to 50 percent of the school day to be devoted to instruction in languages other than English. The Ukrainian bilingual (or partial immersion) education program was established in Alberta in 1974 and in Saskatchewan and Manitoba in 1979. To facilitate Ukrainian bilingual education in all three provinces,

a formal agreement, the Joint Ukrainian Bilingual Curriculum Project, was signed by education authorities in all three provinces in 1985 for the joint development and exchange of curriculum materials.

The objectives of contemporary Ukrainian bilingual education are, among others, to develop students' written and oral communication skills in Ukrainian and English, to familiarize them with Ukrainian culture in Canada, Ukraine, and other countries, and to give them an opportunity to learn French (Canada's second official language) as well as English. The programs attempt to develop positive attitudes toward learning other languages and understanding other cultures. The Ukrainian language itself is studied as a separate subject, Ukrainian language arts. In grades one through six, half of the day is devoted to instruction in Ukrainian. Social studies, art, music, physical education, health, and religion are taught in Ukrainian. Science, mathematics, and English language arts are taught in English. In grades 7 through 9 about 30 percent of instruction is in Ukrainian, and at the grades 10 to 12 level the instruction time in Ukrainian is reduced to about 18 percent. All teachers in the program are fully certified to teach in the public schools of their province. Currently, however, no formal program exists specifically for training Ukrainian bilingual teachers. The *Canadian Institute of Ukrainian Studies, University of Alberta, organizes summer courses on an occasional basis. Some teacher in-service and professional development is provided by local school boards and provincial departments of education.

The legislation governing bilingual programs in the three provinces is permissive. Local school boards may offer a program if there is sufficient parental interest, but they are not required to do so. Thus, the establishment and maintenance of programs depends on the organized support of parents. The Alberta Parents for Ukrainian Education (established in 1984) and the Manitoba Parents for Ukrainian Education (founded in 1980) are two umbrella organizations for parent groups in their respective provinces.

The lack of commercially available Ukrainian-language resources and textbooks in Canada and the ideological and pedagogical inappropriateness of resources from Ukraine, until recently, have necessitated Canadian production of textbooks. So far, the most ambitious projects have involved the Ukrainian community, the Alberta Department of Education, and the Ukrainian Language Education Centre at the Canadian Institute of Ukrainian Studies.

In 1989, 1,400 students were enrolled in Ukrainian bilingual education programs in Alberta, 1,000 in Manitoba, and 160 in Saskatchewan. One of the main issues affecting the programs is the disproportionately low enrollment figures, given the demographic strength of Ukrainians in western Canada.

J. Sokolowski

Ukrainian Black Sea Institute (Ukrainskyi chornomorskyi instytut). An émigré institution established on the initiative of Yu. *Lypa in Warsaw in 1940 to study and disseminate knowledge about the Black Sea and the Black

Sea region. The institute was directed by I. *Shovheniv (1940–3) and I. Lypa (1943–4), and by M. Miller in Germany (1946–9). Its permanent secretary and chief organizer was L. Bykovsky. After 1945 the institute functioned (with interruptions) in the Hersfeld and Mainz-Kastel DP camps in Germany. It was renamed the Ukrainian Marine Institute in 1946, its secretariat moved to New York in 1948, and it was dissolved in 1949. The institute published a total of 11 volumes of its serial *Chornomors'kyi zbirnyk*, 27 offprint brochures, and 29 other publications (mostly brochures). Bykovsky's detailed article about the institute and its publications appeared in the Ukrainian Technical and Husbandry Institute's *Naukovi zapysky*, vol 22 (1970).

Ukrainian Botanical Society (Ukrainske botanichne tovarystvo). A scientific society, which formerly had been a branch of the All-Union Botanical Society of the USSR Academy of Sciences. It was organized originally in 1919 as a botanical subsection of the biology section of the Ukrainian Scientific Society and renamed in 1925. During the period 1921–9 the society published the botanical journal *Ukrains'kyi botanichnyi zhurnal* (5 vols), and since 1959 it has published the annual *Shchorichnyk Ukrains'koho botanichnoho tovarystva*. There are about 700 full and 300 corresponding members of the society.

Ukrainian Branch of the Slovak Writers' Union (Ukrainska filia Spilky slovatskykh pysmennykiv). An organization founded in 1952. Its 30 to 40 members, most of whom live in the *Prešov region, produce 10 to 12 books per year. In 1969 some of them were expelled during the Czechoslovak regime's crackdown against the liberal supporters of the Prague Spring. The branch's official organ has been the bimonthly **Duklia*. Periodically the union has awarded the Franko Prize for the best Ukrainian-language literary work to one of its members.

Ukrainian Brazilian Central Representation (Ukrainsko-brazyliiska tsentralna reprezentatsiia; Portuguese: Representação Central Ucrâniano-Brasileira). An umbrella organization for Brazilian Ukrainians established in 1985. The founding members of the group included the Union for Agricultural Education, Ukrainian-Brazilian Youth Association, Ukrainian-Brazilian Club, St John the Baptist Social Services Society, General Administration of the Ukrainian Autocephalous Orthodox church in Brazil, and 'Unification' (Sobornist) Society of Brazil. Except for the latter (centered in São Caetano do Sul–São Paulo), all the groups have their headquarters in Curitiba. The association's purpose is to represent the Ukrainian community before the government, institutions, and the general public; to provide advice and facilitate co-operation in the areas of cultural affairs and social services; and to defend the interests of the Ukrainian community by all legal means. The first president was A. Antoniuk; he was followed in 1989 by M. Czaiowski. Two organizations have subsequently joined the association, the Brazilian Center for Ukrainian Studies and the Society of Friends of Ukrainian Culture. Among the most important activities of the group has been the creation of the Ukrainian Brazilian Foundation (Fundação Ucrâniano-Brasileira, known popularly in Ukrainian as the 'Dopomohova fundatsiia') to co-ordinate the social assistance rendered to Ukrainians in Brazil from other parts of the world. Its first president

was H. Bezruchka. The Representation is a member of the World Congress of Free Ukrainians.

N. Kerechuk

Ukrainian Bulletin, The. An English-language semi-monthly newsletter published in New York from May 1948 to February 1970, when it merged with the **Ukrainian Quarterly*. The organ of the Pan-American Ukrainian Conference until September 1951 and then of the Ukrainian Congress Committee of America, it was edited by W. Dushnyck. The *Ukrainian Bulletin* reported mostly on political affairs concerning Ukrainians in the West and on political developments in the Ukrainian SSR. A total of 518 issues appeared.

Ukrainian Bureau in London (Ukrainske biuro v Londoni, aka Ukrainske presove biuro). An information office established and financed by Ya. *Makohin to acquaint the British public with Ukrainian affairs. It operated in London under V. *Kaye-Kysilewsky from 1931 to 1939. Its irregular *Bulletin* was mailed to 250 papers in Britain. As a result the number of articles on Ukrainian issues in the British press increased. (See *Press and Information bureaus abroad.)

Ukrainian Canadian, The. An English-language magazine published in Toronto by the *Association of United Ukrainian Canadians semimonthly from September 1947 to 1969 and monthly until the end of 1991. It contains articles on Ukrainian culture, translations of Ukrainian literature, and reports on developments in the Ukrainian pro-Soviet community in Canada. While it devoted less attention to political affairs than most other Ukrainian pro-Soviet publications, it consistently supported the policies of the Communist Party of Canada, particularly concerning the peace movement. The editors of the *Ukrainian Canadian* included J. Weir, M. Sago, M. Skrypnyk, W. Szczesny, P. Prokop, and G. Moskal. In 1992 it was succeeded by the bilingual *Ukrains'ko-kanads'kyi visnyk/Ukrainian Canadian Herald*.

Ukrainian Canadian Archives and Museum of Alberta (Ukrainsko-kanadskyi arkhiv-muzei Alberty, or UCAMA). The museum, located in Edmonton and based on the collections of S. and H. Yopyk, was founded on 31 October 1972 and officially opened on 17 October 1974. Its collection reflects the contribution of Ukrainian pioneers to the development of Canada and includes much material about Ukraine. The library contains more than 15,000 volumes and several archival collections, including those of M. *Luchkovich. UCAMA also houses an extensive exhibit of photographs and documents of the Royal Canadian Legion, Norwood Branch 178 in Edmonton. UCAMA has held over 30 public exhibits including works by artists such as P. Shostak and J. Hnizdovsky. H. Yopyk was president of UCAMA until his retirement in 1988; he was followed by M. Kalinowsky (1988–90) and W. Chmiliar (1990–).

Ukrainian Canadian Art Foundation (Kanadsko-ukrainska mystetska fundatsiia, or KUMF). A nonprofit corporation established in 1975 in Toronto to promote Ukrainian art. Its founders, M. and Ya. Shafraniuk, donated their collection of Ukrainian art and a building to the foundation. The KUMF runs an art gallery. By 1989 it had

A display room in the gallery of the Ukrainian Canadian Art Foundation

hosted over 180 exhibitions there, including the 1982 Ukrainian Artists International Exhibit, to which 87 artists living in the West submitted their works. In recent years KUMF has sponsored exhibitions of works by artists living in Ukraine. It also organizes art lectures and literary readings and has published several art albums. Its permanent art collection includes over 200 paintings and sculptures, including works by M. Hlushchenko, J. Hnizdovsky, O. Hryshchenko, B. Kriukov, H. Kruk, M. Krychevsky, W. Kurelek, M. Levytsky, V. Makarenko, H. Mazepa, L. Molodozhanyyn, V. Patyk, P. Shostak, A. Solohub, and V. Tsybal.

Ukrainian Canadian Citizens' League (Ukrainsko-kanadiiyskyi horozhanskyi komitet). A Ukrainian-Canadian organization founded in Winnipeg in December 1918 to assist the cause of Ukraine's independence by lobbying the Canadian government. It sent two delegates (I. Petrushevych and O. Megas) to the *Paris Peace Conference. It also initiated the Ukrainian Red Cross Society. Because of religious differences a rival Catholic Ukrainian National Council was formed, but in 1920 the two briefly merged into the Ukrainian Central Committee to represent the community nationally.

Ukrainian Canadian Committee. See Ukrainian Canadian Congress.

Ukrainian Canadian Congress (Kongres ukrainsiv Kanady, or KUK). An umbrella organization of the Ukrainian community of Canada. It was formed as the Ukrainian Canadian Committee on 6–7 November 1940 in Winnipeg by a merging of two rival umbrella organizations established earlier that year – the Ukrainian Central Council of Canada and the Representative Committee of Ukrainian Canadians – that included the five major Ukrainian associations in Canada: the *Ukrainian Catholic Brotherhood (BUK), the *United Hetman Organization, the *Ukrainian Self-Reliance League (SUS), the *Ukrainian National Federation (UNO), and the *Ukrainian Workers' League. As an ad hoc committee, KUK had the original purpose of uniting the Ukrainian community behind the Canadian war effort, and its establishment was fostered intensively by the Canadian government. The actual process of forming the group was aided in large measure by

The first KUK executive. First row, from left: S. Chwaliboga, Jaroslav Arsenych, Rev Semen Sawchuk, Rev Vasyl Kushnir, Volodymyr Kossar, A. Malofie, Anthony Yaremovich; second row: Mykhailo Pohoretsky, Myroslaw Stechishin, Stepan Skobliak, Rev Stefan Semchuk, Taras Ferley, Paul Barycki, Andrii Zaharychuk; third row: I. Gulay, Vasyl Sarchuk, Boryslav Dyma, Evstakhii Vasylyshyn, Constantine Andrushyshen, T. Melnychuk

the intervention of T. *Philipps, a British specialist on Near Eastern and Eastern European affairs.

KUK was successful in getting young Ukrainians to enlist in the armed forces and in promoting the purchase of war bonds. After the war it continued its activities by responding to the plight of Ukrainian refugees in Western Europe. It set up the *Ukrainian Canadian Relief Fund and the Central Ukrainian Relief Bureau in London, thereby saving many refugees from forced repatriation to the Soviet Union, helping them materially, and resettling them in Canada. As the new immigrants set up their own organizations, KUK altered its constitution to admit them. By 1965 its membership increased to 30 organizations, although its structure and operations were effectively controlled by the so-called Big Six senior member groups – BUK, SUS, UNO, the *Ukrainian Canadian Veterans' Association, the *Canadian League for Ukraine's Liberation, and (later) the *Ukrainian Canadian Professional and Business Federation (UCPBF).

Prime Minister Louis St Laurent addressing the 4th KUK Congress (Winnipeg, July 1953)

KUK has promoted Ukrainian in public schools, universities, and in private schools run by Ukrainian organizations. Its recommendations on preserving the multicultural character of Canadian society helped shape government policy. In 1963 it set up the Ukrainian Canadian Foundation of Taras Shevchenko to support Ukrainian-Canadian cultural activities. It also played a major role in founding the *World Congress of Free Ukrainians in 1967.

Since its inception KUK has had a strongly anticommunist character and has steadfastly refused to co-operate with the pro-Soviet Association of United Ukrainian Canadians. During the 1970s KUK came under increasing criticism from its own member groups, particularly the Ukrainian Canadian Students' Union (SUSK) and the UCPBF, for its 'undemocratic' structure (manifested in the issue of veto power for each of the Big Six groups) and the actual ineffectiveness of its operations. Such concerns finally led to the establishment of KUK's *Ukrainian Community Development Committee (UCDC) in 1982 and the formation or revival of KUK provincial council structures in the four western provinces.

KUK has established its own Ukrainian Information Bureau in Ottawa (1987). It organized the celebrations of the millennium of Ukrainian Christianity (1988) and the centenary of Ukrainian settlement in Canada (1991–2). It has sponsored a Civil Liberties Commission (from 1985) whose first and paramount task was to respond to indiscriminate charges of war criminals among Ukrainian Canadians. KUK also undertook the issue of redress for the internment in Canada during the First World War of un-naturalized Ukrainian migrant laborers from Austrian-ruled Western Ukraine.

Today KUK has 30 member organizations and 35 local branches in six provinces. Work on the regional level is coordinated by five KUK provincial councils (British Columbia, Alberta, Saskatchewan, Manitoba, and Ontario). The head office in *Winnipeg is run by an executive director, a position filled by V. Kokhan (1948–66), S. Kalba (1966–81), A. Yaremovich (1981–5), Yu. Weretelnik (1985–6), and W. Werbeniuk (1986–). The presidents of the UCC, elected at its congresses every three years, have been Rev V. *Kushnir (1940–53, 1958–71), A. Yaremovich (1953–6), Rev S. Sawchuk (1957), P. Kondra (1971–4), S. Radchuk (1974–80), J. Nowosad (1980–6), D. Tsipyvnyk (Cipywnyk) (1986–92), and O. Romaniw (1992–). It adopted its present 'Congress' title in 1989.

O. Gerus

Ukrainian Canadian Foundation of Taras Shevchenko (Ukrainska Kanadska fundatsiia im. Tarasa Shevchenka). A Winnipeg-based nonprofit endowment fund incorporated in July 1963 by the Ukrainian Canadian Committee (now Congress) (KUK) to promote Ukrainian culture in Canada. Between 1964 and 1988 its capital assets reached 3,500,000 dollars and its grants exceeded 1,500,000 dollars in support of folk ensembles, institutes, museums, the Ukrainian press, language schools, research, and publications. Administered by a board of directors appointed by the KUK presidium, it has been headed by I. Hlynka (1964–83) and S. Radchuk (1983–).

Ukrainian Canadian Professional and Business Federation (Obiednannia ukrainskykh kanadskykh pro-

fesionalistiv i pidpriumtsiv, or UCPBF). A national association of Ukrainian professional and business clubs in Canada. Founded by delegates from 12 clubs at the Ukrainian Canadian Congress in Winnipeg in October 1965, it was known originally as the Federation of Ukrainian Professional and Businessmen's Clubs of Canada. The federation represents the interests of the Ukrainian community in Canadian business and government circles and has played an influential role in Ukrainian-Canadian community affairs, particularly with the establishment of educational bodies, such as the Canadian Institute of Ukrainian Studies, the Canadian Foundation for Ukrainian Studies, and the Chair of Ukrainian Studies at the University of Toronto. Today it has about 20 member clubs in cities such as Toronto, Winnipeg, Ottawa, Regina, Saskatoon, Edmonton, Vancouver, Hamilton, and Calgary. It has published irregularly the magazines *Ukrainian Canadian Review* (since 1966) and *Panorama* (1972–8). At its biennial conventions the following have been elected president: V. Swystun (1965–6), S. Radchuk (1966–8), S. Frolick (1971–3), M. Lupul (1973–5), J. Karasevich (1975–7), G. Danyliw (1977–9), L. Decore (1979–81), J. Tutecky (1981–3), J. Slogan (1983–5), B. Shuliakevych (1985–7), P. Zakarow (1987–9), P. Ortynsky (1989–91), and E. Zalucky (1991–).

Ukrainian Canadian Relief Fund (Fond dopomohy ukrainskyh Kanady, or UCRF). An organization created in 1945 by the Ukrainian Canadian Servicemen's Association and the Ukrainian Canadian Committee (now Congress) to assist Ukrainian refugees in postwar Europe. Between 1945 and 1947 it gathered nearly 200,000 dollars. In Europe the UCRF was represented by a Relief Mission (B.G. *Panchuk, A. Crepleve, A. Yaremovich) which worked through the Canadian Red Cross and the International Relief Organization in the British zone of Germany to organize Ukrainian schools, resist forced repatriation, lobby for resettlement in Canada, and assist in family reunions. The Relief Fund was initially linked to the *Central Ukrainian Relief Bureau (CURB) but continued functioning after CURB was disbanded late in 1948. In 1962 the UCRF was reconstituted as *Ukrainian Canadian Social Services.

Ukrainian Canadian Research and Documentation Centre (Ukrainsko-kanadskyi doslidchyi i dokumentatsiyni tsentr). A research center in Toronto that developed out of the Ukrainian Famine Research Committee (est 1982, renamed the Centre for Research on the Ukrainian Famine in 1986). It acquired its present name and an expanded mandate to examine Ukraine during the Second World War (together with other recent events in Ukrainian history) in 1988. The center collects official and personal documents, photographs, film footage, and newspaper articles; conducts audio and video oral history interviews; and organizes conferences and workshops relating to its areas of research. In 1984 it produced *Harvest of Despair*, an award-winning documentary about the man-made famine in Ukraine in 1932–3.

Ukrainian Canadian Research Foundation. A society founded in Toronto in 1957 to support the study of Ukrainians in Canada by assisting research and publication. The group's titles include *Early Ukrainian Settlements in Canada, 1895–1900* (1964) by V.J. Kaye; *A Ukrainian Canadian in Parliament* (1965), the autobiography of M. Luch-

kovich, edited by J.B. Gregorovich; *Persistence and Change* (1978), a sociological study of Ukrainian Canadians in Alberta by C.W. Hobart and W.E. Kalbach; *Dictionary of Ukrainian Canadian Biography: Pioneer Settlers of Manitoba, 1891–1900* (1975) by V.J. Kaye; and *Ukrainian Canadians in Canada's Wars* (1983) by V.J. Kaye. S. Pawluk was the foundation's first president.

Members of the Ukrainian Canadian Servicemen's Association in front of their building in London (November 1945)

Ukrainian Canadian Servicemen's Association (Soiuz ukrainskykh kanadskykh voiakiv, or UCSA). A service club established in 1943 in Manchester. Formed as a social group to provide a means for Ukrainian-Canadian service personnel overseas to gather with their kinsmen, the UCSA was underwritten by the Ukrainian Canadian Committee (now Congress). It established a Services Club in large rented premises in London, organized several major 'Get-Togethers' (initially in Britain and later on the Continent), published the *UCSA Newsletter*, and arranged the recruitment of Ukrainian chaplains for the Canadian troops. More significantly, UCSA members were among the first to become aware of the plight of Ukrainian *displaced persons in Europe during the war and played a leading role in efforts to prevent their forced repatriation to the Soviet Union by forming the *Central Ukrainian Relief Bureau as a parallel structure to their own for this purpose. The UCSA later laid the groundwork for the establishment of the Association of Ukrainians in Great Britain. The group disbanded shortly after the war and was succeeded in Canada by the Ukrainian Canadian Veterans' Association. Leading figures in the UCSA included B.G. *Panchuk, J. Yuzyk, and J. Swystun.

Ukrainian Canadian Social Services (Suspilna sluzhba ukrainskyh Kanady, or SSUK). A national welfare agency founded in 1962 to continue the charitable work of the *Ukrainian Canadian Relief Fund. Affiliated with the Ukrainian Canadian Congress, it works through its 12 local branches in the major Ukrainian communities in Canada, including Toronto, Winnipeg, Edmonton, Saskatoon, Montreal, and Vancouver. It has provided aid to needy Ukrainians (students, the elderly, and newcomers) in Canada as well as Ukraine, Poland, Argentina, Brazil, and Paraguay; to political prisoners in Soviet Ukraine; and to refugees from the Soviet bloc in Austria. The agency is a member of the World Council of Ukrainian Welfare and Social Services. Its head office was moved from Winnipeg

to Toronto in 1972. The presidents of SSUK, elected at its triennial conventions, have been: R. Senchuk (1962–8), O. Zhuravsky (1968–71), S. Kharko (1971–4, 1983–9), Z. Duda (1974–80), I. Kushpeta (1980–3), and O. Danyliak (since 1989).

Ukrainian Canadian Students' Union (Soiuz ukrainskykh studentiv Kanady, or SUSK). A co-ordinating national organization of Canadian postsecondary students of Ukrainian descent. SUSK was founded at the first Congress of Ukrainian Canadian Students in Winnipeg (26–27 December 1953), under the auspices of the *Ukrainian Canadian Congress, of which it became a member organization. SUSK played an important role in the late 1960s and the 1970s in promoting multiculturalism and in defending political prisoners in Ukraine. In 1968 SUSK established a newspaper called **Student*. In 1975–6 SUSK had member clubs at 18 Canadian universities, to which some 1,250 students belonged: in 1989 the organization had member clubs at 15 universities, involving almost 1,000 students.

Ukrainian Canadian Veterans' Association (Soiuz ukrainskykh kanadiiskykh veteraniv). A national association of Ukrainian veterans of the Canadian armed forces formed in Winnipeg in June 1945 to maintain the wartime camaraderie developed by members of the disbanded *Ukrainian Canadian Servicemen's Association. Prominent founders were B.G. *Panchuk, J. Yuzyk, J. Karasevich, and S. Kalin. The first organization in the postwar period to join the Ukrainian Canadian Committee (now Congress), the association opened its membership to Ukrainian veterans of other armies in 1965. It published a newsletter, *Opinion*, and became a member of the Royal Canadian Legion. Most of the group's functions are local in nature and are carried out by its branches.

Ukrainian Catholic Brotherhood of Canada (Bratsvo ukrainsiv katolykiv Kanady). A national lay organization for Ukrainian Catholics founded in 1932 in Saskatoon to strengthen the Ukrainian Catholic church in Canada. Guided for many years by Rev S. Samchuk, it published *Biuiletyn' Bratstva ukrainsiv katolykiv Kanady* (1933–7) and *Buduchnist' natsii* (1932–50) and sponsored the establishment of the Sheptytsky Institute in Saskatoon in 1935. One of the founding members of the *Ukrainian Canadian Committee (now Congress) in 1940, it had over 100 branches across Canada in 1982.

Ukrainian Catholic church (Ukrainska Katolytska Tserkva). The current name of the Ukrainian church that belongs to the group of Eastern or Byzantine rite churches that are in communion with the Roman Catholic church and recognize the spiritual and administrative authority of the pope. These Eastern churches are also called 'particular' (*pomisni*), because they are hierarchically, canonically, liturgically, and culturally autonomous, although they belong to the association of particular churches that forms the Universal Church. (For the history of Ukrainian Catholicism, see *Church, history of the Ukrainian.)

Canonical aspects. The name 'Ukrainian Catholic church' (UCC) has been used popularly and in official Vatican documents since the early 1960s to refer to all Ukrainian Catholics in the diaspora and the underground (until 1989) church in Ukraine. It replaced the term *Greek

Ukrainian Catholic hierarchs at the Second Vatican Council. First row, from left: Bishop Nil Savaryn, Archbishop Ivan Buchko, Metropolitan Maksym Hermaniuk, Supreme Archbishop Yosyf Slipy, Metropolitan Ambrose Senyshyn, Archbishop Havryil Bukatko, Bishop Isidore Borecky; second row: Bishop Yosyp Martynets, Bishop Volodymyr Malanchuk, Bishop Avhustyn Horniak, Bishop Platon Kornyliak, Bishop Andrii Roboretsky, Bishop Joseph Schmondiuk, Bishop Ivan Prashko, Bishop Andrii Sapeliak, Bishop Yoakym Segedi

Catholic church,' which had been used since the 18th century, and the official term *Ecclesia Ruthena unita* used by the Vatican. UCC leaders favored the new term because it recognized the national character of the church; prevented the confusion that arose with such terms as 'Greek Catholic,' *Ruthenus*, or 'Ruthenian'; and implied the spiritual and administrative unity of Ukrainian emigrants with the church in Ukraine.

After the formal liquidation of *Halych metropoly at the *Lviv Sobor of 1946, those Ukrainian Catholic (then Greek Catholic) clergy and faithful who refused to convert to Russian Orthodoxy were severely persecuted, and most of the church's hierarchs died in concentration camps. In February 1963, however, Metropolitan Y. *Slipy was released from prison and permitted to emigrate. In October 1963, at the Second Vatican Council, he proposed the creation of a Kiev-Halych patriarchate for Ukrainian Catholics (see *Patriarch). The council did not resolve the matter, but in December 1963, as a result of the Decree on the Eastern Catholic Churches, the Vatican recognized the archbishop of Lviv as the major archbishop of the UCC. In 1975 Slipy began using the title 'Patriarch of Kiev and Halych and All Rus', and many UCC bishops began to refer to him and his successor as 'patriarch'; this was done without the pope's consent, however, and the UCC has not been recognized as a patriarchal church by the Vatican. Nonetheless, Slipy secured official recognition of the *synodal structure of the UCC under the authority of the major archbishop, who has the right to convoke the synods of Ukrainian Catholic bishops and the Council of the UCC.

The UCC is formed by Halych metropoly (traditionally composed of *Lviv, *Stanyslaviv, and *Peremyshl [now primarily in Poland] eparchies) and all metropolies, eparchies, and exarchates in the diaspora (consisting mainly of Ukrainian immigrants from Galicia and their offspring) that participate in the synods of Ukrainian Catholic bishops.

Not all Ukrainian Catholics outside Ukraine belong directly to the UCC. Many Ukrainians in ethnically mixed borderlands west of Ukraine, for example, belong to Byzantine rite Catholic church eparchies not jurisdictionally

affiliated with the UCC. *Prešov eparchy in eastern Slovakia is one such eparchy. Forcibly converted to Orthodoxy in 1950, the eparchy was re-established as a Greek Catholic eparchy in 1968 for both Ukrainians and Slovaks. It has been subject to increasing Slovakization, and the Ukrainian hierarchs P. *Goidych and V. *Hopko, who were arrested when the eparchy was converted in 1950, were succeeded in 1968 by a Slovak. In Hungary, *Hajdúdorog eparchy and the exarchate of Miskolc include many Magyarized Transcarpathian Ukrainians. The *Lemko Apostolic Administration existed until most Ukrainians were deported from the Lemko region after the Second World War. In Rumania the Greek Catholic parishes in Bukovyna and the Maramureş region, which had been subordinated to Lviv archeparchy and then Stanyslaviv eparchy (from 1885) and consisted primarily of Ukrainians, were forcibly incorporated into the Rumanian Orthodox church on 1 December 1948. In the United States, Transcarpathian Ukrainian emigrants and their descendants belong primarily to *Pittsburgh metropolity, which is also a Byzantine rite province with four eparchies that do not fall under the UCC. Finally, in some countries with very small Ukrainian communities, individual Ukrainian Catholic parishes may exist, but they are under the jurisdiction of the local Roman Catholic hierarchy.

In Ukraine. Despite official persecution, the hierarchy, clergy, monastic orders, and theological seminaries of the UCC remained active in the underground after 1946; they conducted secret services, administered rites, and ordained priests and consecrated bishops. Many Ukrainian Catholic believers also attended Roman Catholic or Orthodox churches while retaining their traditional beliefs and convictions. It was only during the liberalization of the late 1980s that the UCC re-emerged in public. In October 1987 two bishops and several priests announced that they were coming out of the underground; they notified Pope John Paul II of their actions and asked for his protection. In 1989 six more people identified themselves as hierarchs of the UCC (from 1946 several other bishops had died in Ukraine without their identity being revealed; only Ya. Tymchuk [d 20 December 1988] was posthumously identified as a bishop). In a May 1989 open letter to President M. Gorbachev, leading members of the underground UCC (including Metropolitan V. Sterniuk, three

bishops, and several priests) demanded that the church be legalized; that same month a major hunger strike was staged in Moscow to publicize these demands.

The movement for the legalization of the UCC quickly gained great momentum. Throughout western Ukraine, parishes, priests, and believers formally declared their allegiance to the church. Such actions were strongly supported by the Vatican and the UCC hierarchy outside Ukraine. In August 1989 the hierarchy in Ukraine met to re-establish the authorities of three individual eparchies. As of 1990 the hierarchy was headed by V. Sterniuk, ordinary of Lviv archeparchy (which includes that part of the former Peremyshl eparchy not in contemporary Poland) and acting metropolitan under the major archbishop (M. Liubachivsky). He was assisted by Bishops F. Kurchaba, M. Sapryha, and Yu. Voronovsky. The ordinary of Ivano-Frankivske (formerly Stanyslaviv) eparchy, Bishop S. Dmyterko, was assisted by Bishops P. Vasylyk (co-adjutor) and I. Bilyk, and the ordinary of Uzhhorod eparchy, Bishop I. Semedii, by Bishops Y. Holovach and I. Margitych. The last eparchy was newly created and based primarily on the former *Mukachiv eparchy, which had not been a part of Halych metropolity before its forcible conversion to Orthodoxy after the Second World War. In June 1990 the entire hierarchy met with Pope John Paul II in Rome.

Official permission to register UCC parishes was granted by the Council for Religious Affairs of the Ukrainian government in December 1989. By March 1992 more than 1,000 parishes in Lviv eparchy, 530 in Ivano-Frankivske eparchy, and 12 in Uzhhorod eparchy had declared themselves to be Ukrainian Catholic. The church included over 1,000 priests (including 350 former priests of the Russian Orthodox church), 700 nuns, and 400 seminarians. Official registration of the entire church as a legal entity, however, had still not been granted by the end of 1990. Moreover, several contentious questions were also unresolved, particularly the ownership and control of church properties. Neither this difficulty nor the unofficial measures used by the central government to hamper the church's growth have been able to stop the popular rebirth of the UCC. Many church publications and religious schools have been founded; several monasteries have been renewed under the UCC; and a variety of public demonstrations

Ukrainian Catholic hierarchs from Ukraine at the Vatican in June 1990. From left: Auxiliary Bishop Mykhailo Sapryha (Lviv), Auxiliary Bishop Ivan Margitych (Uzhhorod), Auxiliary Bishop Yuliiian Voronovsky (Lviv), Auxiliary Bishop Pavlo Vasylyk (Ivano-Frankivske), Auxiliary Bishop Fylemon Kurchaba (Lviv), Cardinal Myroslav Liubachivsky (Rome), Pope John-Paul II, Auxiliary Bishop Yosyf Holovach (Uzhhorod), Metropolitan Volodymyr Sterniuk (Lviv), Bishop Ivan Semedii (Uzhhorod), Bishop Sofron Dmyterko (Ivano-Frankivske), Auxiliary Bishop Irynei Bilyk (Ivano-Frankivske)

have been held, including a large religious festival in September 1990 in Lviv. In the fall of 1990 the St George's Cathedral complex, the historic cathedral and residence of the metropolitan of Halych, was transferred back to the UCC from the Russian Orthodox church. Cardinal M. Liubachivsky moved from Rome to Lviv on 30 March 1991. A synod under his leadership took place on 16–31 May 1992 at St George's Cathedral in Lviv. The 28 bishops from Ukraine and the West who participated in the synod created new eparchies and metropolies and condemned the Lviv Sobor of 1946 as uncanonical.

In Poland. Following the Second World War, part of Peremyshl eparchy and the entire Lemko region were ceded to Poland. Most Ukrainians living in these regions were forcibly deported to the Ukrainian SSR or resettled in the western territories that Poland acquired from Germany. At the same time the Greek Catholic church was severely repressed. Bishop Y. Kotsylovsky of Peremyshl and his assistant, H. Lakota, were both deported to the USSR, where they subsequently died in prison, and most priests were deported or resettled along with their faithful. Liturgies in the Byzantine rite were forbidden, both by the authorities and by the Roman Catholic church; some Ukrainian priests conducted Latin liturgies as assistants to Polish clergymen.

From 1957 Ukrainian Catholic priests were again permitted to conduct Byzantine liturgies for Ukrainians in Poland. But they were allowed to establish only 'pastoral centers' attached to and dependent on local Roman Catholic churches and bishops, and not canonical parishes. By the end of 1977 there were 77 such centers, served by lay and Basilian priests. Also, from the 1950s the Sister Servants of Mary Immaculate, Sisters of Saint Joseph, and Basilian Sisters were re-established. In 1969 a Byzantine rite seminary was established at the Catholic University in Lublin. Graduates have been ordained by the Polish cardinal

S. Wyszyński and, since 1982, by Ukrainian hierarchs (including some from outside Poland, such as Archbishop M. Marusyn and Cardinal M. Liubachivsky). In general the Polish church has had a very ambivalent attitude toward Ukrainian Catholics; it has pressured them to adopt the Latin rite, disallowed them an independent hierarchy, and hindered their contacts with the UCC hierarchy in the West.

In 1949 Wyszyński was appointed by the Vatican as special delegate for Catholics of the Byzantine rite in Poland. He appointed V. Hrynyk, a former professor of the theological seminary in Peremyshl, as vicar-general for Ukrainian Catholics. In 1977 Hrynyk was succeeded by S. Dziubyna. In December 1981 Wyszyński's successor, Cardinal J. Glemp, appointed two vicars-general for Ukrainian Catholics: I. Martyniak was chosen to head the southern deaneries of Peremyshl and Wrocław, and Y. Romanyk was assigned to the Koszalin and Olsztyn deaneries in the north. Despite persecution by the government and the occasional prejudice of the Roman Catholic clergy, Ukrainian Catholics began to establish parishes, build chapels and churches, and renovate shrines that had been returned to them (especially in the Peremyshl and Lemko regions, to which many Ukrainians have returned in recent years). Finally, John Paul II consecrated I. Martyniak as the first Ukrainian Catholic bishop in Poland in September 1989, in the presence of Cardinals Glemp and Liubachivsky. At first Martyniak was an auxiliary bishop to the ordinary for Catholics of the Byzantine rite in Poland (Cardinal Glemp). In January 1991 he became bishop of the traditional Ukrainian Catholic see of Peremyshl. He has participated in the synods of the UCC since his consecration.

Estimates of the total number of Ukrainian Catholics in Poland range as high as 500,000, but since many identify themselves as Roman Catholics to avoid harassment, this

number is uncertain. In 1987 there were 83 missions and pastoral centers served by 47 priests and 11 Basilian fathers. Their celebrations of the millennium of Christianity in Ukraine were very successful, and a large rally, attended by 70,000 Ukrainians from across Poland, was held in Częstochowa in September 1988. (See also *Poland.)

In former Yugoslavia. Ukrainian settlers from Transcarpathia and Galicia began arriving in Vojvodina and Croatia in the 18th century. The separate *Križevci eparchy was established for them in 1777. Today this eparchy includes all 50,000 Byzantine rite Catholics in former Yugoslavia, most of whom (35,000) are of Ukrainian descent. The bishop of the eparchy participates in synods of the UCC, and the eparchy's clergy is often trained in UCC seminaries and uses Ukrainian liturgical texts.

In the United States. The Ukrainian Catholic church in the United States was established after the arrival in 1884

of Rev I. Voliansky, who had been sent to minister to Ukrainian emigrants by Metropolitan S. Sembratovych of Lviv. The first bishop, S. *Ortynsky, arrived from Western Ukraine in 1907. He was under the authority of the Roman Catholic church until 1913, when a separate exarchate for all Greek Catholics in the United States was established. Soon after his death in 1916, the Vatican appointed two vicars-general for Byzantine rite Catholics, one for Galician Ukrainians (P. Poniatyshyn) based in Philadelphia, and one for Transcarpathian Ukrainians (H. Martiak) based in Pittsburgh; the latter eventually became Pittsburgh metropolity.

In 1924 the Holy See appointed K. *Bohachevsky exarch for the Galician Ukrainians, with his see in Philadelphia. In 1956 a second exarchate was established, in Stamford, Connecticut, to serve New York State and New England. In 1958 the church was reorganized as Philadelphia

^cIncludes all missions

metropolis, and the exarchates were designated as eparchies (Philadelphia was raised to the status of archeparchy). Eparchies were established in 1961 in Chicago, to serve congregations in the western states, and in 1983 in Parma, Ohio, to serve parishes in the central and southern United States. In the mid-1970s there were approx 285,000 Ukrainian Catholics in the country. (See also *United States of America.)

In Canada. The first Ukrainian Catholic priests in Canada were N. Dmytriv, who arrived from the United States in 1897, and P. Tymkevych. The first bishop, N. *Budka, served in 1912–28; he was succeeded by V. Ladyka (1929–56). In 1943 the church was made an exarchate, and N. Savaryn was named as an assistant bishop to Ladyka. Two more exarchates were added, in 1948 and 1951. In 1956 the church was reorganized as Winnipeg metropolis under M. *Hermaniuk, with an archeparchy in Winnipeg and eparchies in Edmonton, Saskatoon, and Toronto; a fourth eparchy was established in New Westminster, British Columbia, in 1974. According to the 1981 Canadian census, there are 191,300 Ukrainian Catholics in Canada; a further 100,600 Ukrainians claimed Roman Catholicism as their religion. (See also *Canada.)

In Brazil. Although priests and monks accompanied the earliest Ukrainian immigrants to Brazil in the late 19th and early 20th centuries, it was not until 1952 that a separate apostolic exarchate was established for Byzantine rite faithful. The exarchate was initially headed by Archbishop J. Câmara, who appointed C. Preima as vicar for Ukrainians. In 1958 Y. *Martynets was appointed as the first bishop for Ukrainians, and in 1962 a separate Ukrainian exarchate was established, with its center in Curitiba. The exarchate was made an eparchy in 1971, and is now headed by Bishop Ye. *Kryvy. Although the Curitiba UCC eparchy is under the jurisdiction of the Curitiba Roman Catholic metropolis, its bishop participates in UCC synods. (See also *Brazil.)

In Argentina. Ukrainian Catholics in Argentina were served by Basilian priests from Brazil until 1909, when Ya. Karpiak arrived from Peremyshl. Soon afterward he was joined by I. Senyshyn and O. Ananevych from Stanyslaviv (Ivano-Frankivske) eparchy. In 1959 the Vatican designated the archbishop of Buenos Aires ordinary for all Byzantine rite Catholics in Argentina. He appointed Y. Halabarda to oversee Ukrainian congregations. The first Ukrainian bishop, A. *Sapeliak, was made apostolic visitor for Ukrainian Catholics in 1961. A separate Ukrainian exarchate was created in 1968 under Sapeliak, and in 1978 it was made an eparchy. There are approx 115,000 Ukrainian Catholics in the country. (See also *Argentina.)

In Paraguay and Venezuela. The small Ukrainian Catholic communities in these countries date only from the late 1940s and number only a few hundred faithful. Church services are generally conducted by visiting priests from other South American countries.

In Australia and New Zealand. When Ukrainian Catholics began to arrive in Australia in 1948, they were accompanied by several priests. The Vatican created an apostolic exarchate in 1958 encompassing all of Australia, New Zealand, and Oceania and appointed Bishop I. *Prashko as first exarch. In June 1982 the Vatican raised the exarchate to an eparchy. The eparchy serves approx 30,000 Ukrainians. (See also *Australia and *New Zealand.)

In Germany. In the interwar period the small Ukraini-

an community in Germany was initially served by a succession of priests assigned from Lviv eparchy. In 1927 Metropolitan A. Sheptytsky sent P. Verhun to Berlin as a permanent priest. During the Second World War, Ukrainian refugees and others arrived in large numbers in Germany. Because Verhun was unable to communicate regularly with Lviv, he turned to the Vatican, which named him apostolic visitor and administrator for Ukrainian Catholics in 1940. By the end of the war there were several hundred thousand Ukrainians, including many Catholics, throughout Western Europe, mainly in West Germany. In 1945 M. *Voiakovsky was appointed to assist Verhun, who was seized by the Soviets later that year and taken to Siberia. In 1946 the Vatican appointed Bishop I. *Buchko as apostolic visitor for Ukrainian Catholics in Western Europe, and Voiakovsky was made vicar-general for Germany. When Voiakovsky emigrated to the United States in 1949, he was succeeded by P. Holytsky in West Germany. In total, some 240 Ukrainian Catholic congregations, served by 300 émigré priests, were established in the displaced persons' camps. Voiakovsky established a theological seminary in Hirschberg, Bavaria, which was moved to Culemborg, Holland, in 1948. From 1948, however, church life declined as most DPs emigrated to North or South America. In 1959 Bishop P. *Kornyliak was appointed as exarch for Germany, with his see in Munich; in 1982 his responsibilities were extended to include Scandinavia. (See also *Germany.)

In Great Britain. The largest wave of Ukrainian immigrants in Britain arrived in 1947–50, among them many members and chaplains of the Division Galizien. Until 1956 they were under the jurisdiction of Bishop I. Buchko, who appointed V. Malanchuk (1949–50), O. Malynovsky (1950–7), and P. Maliuga (1957–62) vicars-general for Britain. The Roman Catholic bishop of Westminster, W. Godfrey, served as ordinary for Ukrainian Catholics from 1957. The first Ukrainian bishop, A. Horniak, served as an assistant to Godfrey (1961–3) and then as exarch. He was forced to resign in 1987 over controversies concerning the Ukrainian patriarchate, and the administration of the eparchy was given temporarily to the exarch of France and Benelux, Bishop M. Hrynchyshyn. In October 1989 Bishop M. Kuchmiak was installed as exarch. (See also *Great Britain.)

In France, Benelux countries, and Switzerland. Metropolitan A. Sheptytsky established the first Ukrainian Catholic mission in Paris in 1938, with J. Perridon as pastor. In 1946 Bishop I. Buchko, apostolic visitor for Ukrainian Catholics in Western Europe, made Perridon his vicar-general for France. In 1954 the archbishop of Paris was made ordinary for all Byzantine rite believers in France. A separate exarchate for Ukrainian Catholics in France, headed by Bishop V. *Malanchuk, was created in 1961. In 1982 he was succeeded by M. *Hrynchyshyn, and the exarchate was expanded to include the Benelux countries and Switzerland (from 1946 Ukrainian Catholics in these countries had been under the jurisdiction of Bishops I. Buchko and then M. Marusyn). (See also *France, *Belgium, and *Switzerland.)

In Austria. The first Greek Catholic church in Austria was *St Barbara's Church in Vienna, established in 1775; a parish has existed there since 1784. Many prominent church leaders and theologians have served there, including S. Lytvynovych, I. Olshavsky, Yu. Pelesh (bishop of Stanyslaviv and Peremyshl), and I. Snihursty. The parish

has always been small; it has primarily served students and people working in the Austrian civil service. Many Ukrainian Catholic priests were trained at the Jesuit theological faculty in Innsbruck, and for a short time the *Barbareum seminary in Vienna trained priests. Immediately after the Second World War many parishes functioned in displaced persons' camps, but most Ukrainians soon emigrated to North America, and now the entire Ukrainian population of Austria is less than 5,000. In 1946 the Vatican designated the Roman Catholic archbishop of Vienna as ordinary for Byzantine rite Catholics; to this day there is no separate Ukrainian Catholic bishop resident in the country; M. Hornykevych serves as vicar general. (See also *Austria.)

In Italy. Rome emerged as a major center of the UCC after the Second World War and the suppression of the church in Western Ukraine. Archbishop I. Buchko resided there and served as the church's unofficial ambassador to the Vatican. Rome became the temporary residence of the archbishop of Lviv and metropolitan of Halych after Y. Slipy's release in 1963. A variety of educational institutions – St Josaphat's Pontifical College, a minor seminary, the Ukrainian Catholic University – as well as the secretariat of the synod of Ukrainian Catholic bishops, the headquarters of the Basilian and Studite monastic orders, and a number of other institutions are all located in Rome. (See also *Italy and the *Vatican.)

The accompanying tables provide data on the state of the UCC in 1944 and in 1989. All active and retired clergymen and members of the monastic orders are included under 'Priests,' and all churches and other pastoral centers are included under 'Parishes.' The tables are based on various *shematyzmy and church almanacs.

Ukrainian Catholic Organization. See Ukrainian Christian Organization.

Ukrainian Catholic People's party (Ukrainska katolytska narodnia partiia, or UKNP). A political party founded in Lviv in 1930 and known from 1932 as the Ukrainian People's Renewal (Ukrainska narodnia obnova). The UKNP promoted the principles of the Catholic church and opposed atheism and Freemasonry. To a large extent it superseded the Christian Social party. It demanded autonomy for the Ukrainian territories under Poland but remained loyal to the Polish state. The party operated under the care of Bishop H. *Khomyshyn and had more influence in his Stanyslaviv eparchy than in other regions of Galicia. From 1933 the president of UKNP was I. *Voliansky, who was also a deputy to the Polish Sejm. O. *Nazaruk was one of the party's leading members. Its organ was *Nova zoria. It usually succeeded in placing one of its members in the Sejm and the Senate, but it failed to attain much political power in interwar Galicia.

Ukrainian Catholic Press Association (Ukrainska katolytska asotsiatsiia presy). An émigré organization founded in 1952. Centered in Philadelphia and since 1969 in Toronto, it has branches in Australia, Argentina, and Western Europe. The association has had close to 100 members and unites almost all Ukrainian Catholic publications; it is also a member of the International Catholic Press Union. The heads of the organization have included H. Luzhnytsky, L. Mydlowsky, Rev P. Khomyn, and V. Markus.

Ukrainian Catholic Relief Committee (Ukrainskyi katolytskyi dopomohovyi komitet, or UKDK). An agency set up by the Ukrainian Catholic hierarchy in Stamford, Connecticut, in 1946 to help and to resettle Ukrainian displaced persons and refugees in Western Europe. The committee was not an independent organization but a section of the National Catholic Welfare Council. With its founding the representatives of the Ukrainian Catholic church withdrew from the *United Ukrainian American Relief Committee. The UKDK was headed by Auxiliary Bishop A. Senyshyn and from 1961 by W. *Lencyk. Rev I. Stakh acted as its representative in Munich (1946–52). In the late 1940s and early 1950s it helped resettle about 40,000 refugees in the United States. Its activities ceased toward the end of the 1960s.

Ukrainian Catholic Union (Ukrainskyi katolytskyi soiuz, or UKS). A socioreligious organization founded in Lviv in 1931 through the initiative of Metropolitan A. *Sheptytsky. Its purpose was to ensure religion a proper role in public life and to promote the fully rounded social development of the Ukrainian people in a manner consistent with Christian principles. On political issues the UKS tacitly supported the Ukrainian National Democratic Alliance. It published the weekly *Meta, edited by V. Kuzmiovych and M. Hnatyshak. The Meta publishing house, the journal *Khrystos – nasha sylva* (edited by M. Hnatyshak), and the literary and public affairs monthly *Dzvony* (edited by P. Isaiv) co-operated with the union. The Polish authorities restricted its field of activity to Lviv archeparchy. By the end of 1935 the UKS had 416 organizational committees, 261 circles, and district councils in county centers. The first UKS president was V. *Detsykevych; he was followed in 1932 by Z. Lukavetsky. The Second World War put an end to the union's activity.

Ukrainian Catholic University (Ukrainskyi katolytskyi universytet im. sv. Klymentii). An institution of

The building of the Ukrainian Catholic University

higher learning established in Rome on 25 November 1963 by Cardinal Y. *Slipy, who also served as its first rector. The university was built in 1965–6 on the grounds of the St Sophia Cathedral. At the time of its founding it had an academic staff of 24. At present the university serves as a seminary for candidates for the priesthood. It has a library, a museum, and a collection of paintings and icons, which are housed in the Church of the Zhyrovytsi Mother of God. Since 1970 the university has operated a summer school, and in 1981 a course for candidates for the diaconate was initiated. Branches of the university are located in Buenos Aires, Chicago, Washington, Philadelphia, Montreal, and London. The university has published 14 volumes of archival materials, 12 volumes of the collected works of Cardinal Y. Slipy, and other theological texts. It also publishes a periodical, *Blahovisnyk*, and a scholarly journal, *Dzvony*.

Nasha doroha, the journal of the Ukrainian Catholic Women's League of Canada

Ukrainian Catholic Women's League of Canada (Liga ukrainskykh katolytskykh zhinok Kanady). A religious and cultural organization formed in 1944 in Winnipeg from the women's sections of the *Ukrainian Catholic Brotherhood of Canada. The league undertakes cultural, educational, and charitable activities dedicated to strengthening the Ukrainian Catholic church in Canada. The league established eparchial museums in Edmonton, Saskatoon, and Toronto. In 1987 it had 152 parish branches with 6,200 members. Since 1970 it has published the quarterly magazine *Nasha doroha*. Its national presidents have been M. Dyma, K. Krouse, L. Wall, A. Pryma, S. Pototska, I. Pavlykovska, I. Malytska, V. Buchynska, M. Dolishna, A. Dudar, and Ya. Tatarniuk.

Ukrainian Catholic Youth (Ukrainske katolytske iunatstvo, or UCY). A Canadian organization for Ukrainian Catholic youth, founded in 1938 in Saskatoon. The group, guided in its formative years by Rev M. Horoshko, developed as an offshoot of the *Ukrainian Catholic Brotherhood to unite the various youth associations affiliated with church parishes. The UCY maintains a nonsecular profile and undertakes religious education as well as cultural activities. Each branch is organized around a church, with the parish priest as adviser.

Ukrainian Catholic Youth League in America. See League of Ukrainian Catholics.

Founding members of the Ukrainian caucus in the First Russian State Duma. Top row, from left: Mykola Onatsky, Vasyl Shemet, Pavlo Chyzhevsky; bottom row: Andrii Viazlov, Illia Shrah, Havrylo Zubchenko

Ukrainian caucus in the Russian State Duma (Ukrainskyi parlamentarnyi klubi; Ukrainska dumska/trudova hromada). The 497-member First Russian State Duma (1906) had 101 deputies from the nine Ukrainian gubernias, 63 of whom were nationally conscious Ukrainians. Most of the nationally conscious were peasants, and nearly half were members of the *Ukrainian Democratic Radical party (UDRP) or the liberal Russian *Constitutional Democratic party. To promote their goal of Ukrainian national-territorial autonomy and to represent more successfully Ukrainian national interests, 44 Ukrainian deputies from various parties constituted a caucus, the Ukrainian Parliamentary Club, chaired by I. Shrah. The caucus was assisted by an advisory committee of leading Ukrainian intellectuals in St Petersburg belonging to the *Society of Ukrainian Progressives; they established the caucus's organ, **Ukrainskii vestnik*. In the Second Duma (1907) the more radical 47-member caucus, the Ukrainian Duma Hromada, demanded democratic freedoms, autonomy for all the non-Russian peoples of the empire, the use of Ukrainian and other national languages in civic and government institutions, the reform of zemstvo and municipal governments, the distribution of all land to the peasants, an eight-hour workday, the abolition of capital punishment, and the introduction of Ukrainian-language elementary schools and teachers' colleges and of Ukrainian studies courses at Ukraine's secondary and post-secondary schools. The caucus was advised by P. Chyzhevsky, P. Stebnytsky, F. Vovk, and V. Domanytsky; Domanytsky edited the caucus's Ukrainian-language organ, **Ridna sprava – Dums'ki visti*. Duma members from the *Ukrainian Social Democratic Workers' party and

Founding members of the Ukrainian caucus in the Second Russian State Duma. Top row, from left: Yukhym Saiko, Vasyi Khvist, Nyfont Dovhopolov; bottom row: Mykola Rubis, Rev Antoni Hrynevych, Semen Nechytailo

*Spilka (14 members) did not join the UDRP-dominated caucus, which they labeled petit bourgeois. Because of the tsarist reaction and suppression of organized Ukrainian life, the 25 Ukrainian deputies (most of them right-wing 'Little Russians') in the conservative Third (1907–12) and Fourth (1912–17) Dumas did not form a caucus. Some, however, supported M. Onatsky's 1908 draft bill to introduce Ukrainian as the language of instruction in elementary schools, and protested against the banning of public commemorations of the centenary of T. Shevchenko's birth and the tsarist repressions in Galicia in 1914. (See *Duma, State.)

R. Senkus

Ukrainian Center for Social Research (Ukrainskyi sotsiologichnyi instytut). An émigré institution founded in 1969. Initially an autonomous body within the Ukrainian Historical Association, it was incorporated in New York City in 1973. Works prepared by its members include R. Drazniowsky's physical map of Ukraine (1974); R. Tsybrivsky and I. Teslia's statistical study of Ukrainians in the United States and Canada identified in censuses (1975); a collection of articles on Ukrainians in American and Canadian society, edited by W. Isajiw (1976); a handbook on Ukrainian settlements outside Ukraine, edited by A. Milianych et al (1980); and *Ethnicity and National Identity: Demographic and Socioeconomic Characteristics of Persons with Ukrainian Mother Tongue in the United States*, edited by O. Wolowyna (1986). The center is preparing a new handbook on Ukrainian settlements. Its presidents have been Milianych and, since 1987, V. Bandera. Other members of the center include I. Huryn, M. Kots, A. Lencyk-Pavlichko, V. Nahirny, Yu. Pavlichko, and I. Zielyk.

Ukrainian Central Civic Committee in France (Ukrainskyi tsentralnyi hromadskyi komitet u Frantsii). An organization founded in Paris in 1948 for the co-ordination of Ukrainian community and cultural life and the representation of Ukrainians before the French government. Until 1985 it represented approx 20 organizations and institutions and was the only Ukrainian umbrella organization in the country. After 1985 the *Ukrainian Central Representation in France emerged as a parallel organization. The Civic Committee, now with 15 member organizations, belongs to the *World Congress of Free Ukrainians. The organization has been headed by S. Sozontiv (1948–70), O. Melnykovich (1970–9), Ya. Musianovich (1979–86), V. Malynovich (1986–9), and V. Mykhalchuk (since 1989). During the tenure of S. Sozontiv, the committee ensured that the French government officially recognized Ukrainians as one of the country's nationality groups.

Ukrainian Central Committee (Ukrainskyi tsentralnyi komitet, or UTsK). The only officially sanctioned Ukrainian political and community organization in the *Generalgouvernement (1939–45). Headed by V. *Kubijovyč, the UTsK oversaw virtually all secular Ukrainian activities following the closure of all other Ukrainian institutions in the Generalgouvernement. It also acted as a representative body that brought Ukrainian concerns to the attention of the German authorities. Its activities and structure were shaped by the occupation policies and the nature of the Nazi regime.

The building in Cracow where the Ukrainian Central Committee was housed

History. Shortly after the fall of Poland local Ukrainian committees sprang up in the Generalgouvernement to organize cultural-educational activities, manage economic affairs, and provide Ukrainians with representation before the German authorities. In November 1939 the idea of a central Ukrainian organization was put forward at a congress of local committee deputies in Cracow. R. Sushko, the chief OUN representative in the Generalgouvernement, set out the legal and organizational basis for such a central organization, and a conference in late November established the Ukrainian National Alliance (UNO) as the central body. Sushko nominated V. Kubijovyč to be its leader; the other members of the executive included O. Boidunyk, M. Khronoviat, I. Zilynsky, and Ya. Rak. The new organization was tolerated, but not officially recognized, by the German authorities.

Early in its existence the central organization developed a close working relationship with the *Ukrainske Vydavnytstvo (UV) publishing house, the only legally sanctioned Ukrainian press in the Generalgouvernement. It used the publisher to print Ukrainian textbooks, and the UV's **Krakivs'ki visti* served as the unofficial organ of the UTsK.

The formal organizational structure of the UTsK began to take shape after a meeting of Ukrainian representatives in April 1940. The numerous local groups functioning under its umbrella were reconstituted as Ukrainian relief committees (Ukrainski dopomohovi komitety, or UDKs) in order to expedite official German recognition. The UTsK itself was formally constituted in June 1940 as the official umbrella body of the UDKs and as such received official sanction. It incorporated other Ukrainian organizations under its name in order to provide them with a measure of legal status. This arrangement later developed into a system of subsidiary *labor alliances that were linked to the various departments of the UTsK. It also established the *Ukrainian educational societies (Ukrainski osvichni tovarystva, or UOTS) as affiliated groups. They were granted official recognition in July 1940.

The UTsK executive was headed by Kubijovyč, with V. Hlibovytsky as deputy leader and executive officer. The UTsK departments and their heads consisted of the following: administration, O. Boidunyk, M. Tsenko (from 1941), and A. Figol (from 1943); finance, O. Zybenko, R. Mytsyk, and Omelian Tarnavsky (from 1942); social services, O. Malynovsky and Rev M. Sopuliak (from late 1941); culture, M. Duzhy and M. Kushnir; education, N. Hirniak, I. Teslia, and P. Isaiv; economic affairs, M. Khronoviat, A. Milianych, and O. Kotyk-Stepanovych; and youth, Ya. Rak, Yu. Tatomyr, S. Levytsky, and Z. Zeleny. The UTsK staff numbered 80 to 200 people in 1940–5. In the spring of 1941 it dealt with 26 UDKs, 33 rural-district delegations, and 100 local trustees. The UTsK also established a mission in Berlin (staffed initially by Figol and then by Kotyk-Stepanovych) in the spring of 1941. Offices were also opened in Vienna and, briefly, Bratislava in 1944 during the evacuation before oncoming Soviet troops.

The OUN maintained a close connection with the UTsK, a body in whose formation it had played a key role. Excluding Kubijovyč, many of the UTsK leaders and a significant number of its cultural and organizational cadres were OUN members. The UTsK maintained an ostensibly neutral position on the split within the OUN between the Bandera and Melnyk factions, although tacitly it supported the latter. With the outbreak of German-Soviet hostilities a large number of the OUN activists who had been working with the UTsK joined *OUN expeditionary groups. At the same time the UTsK declined to join the Ukrainian National Committee, established by the Bandera OUN faction in Cracow in late June 1941. It also refrained from involving itself in Galician affairs, although it did open the Work Bureau in Lviv (eventually with a branch in Rivne) to assist in the movement of refugees from the Generalgouvernement back to Galicia.

After the annexation of Galicia by the Generalgouvernement the UTsK did not agree with German demands that it expand its activities into Galicia, because of the political characteristics of that territory. In September 1941 the Germans established the *Ukrainian Regional Committee (UKK) to oversee the Distrikt Galizien, with statutes

The presidium of the Ukrainian Central Committee in 1943. Sitting, from left: Kost Pankivsky, Volodymyr Kubijovyč, Vasyl Hlibovytsky; standing: Zenon Zeleny, Rev Mykhailo Sopuliak, Petro Isaiv, Atanas Figol, Omelian Tarnavsky, Ya. Mazurak, Mykhailo Kushnir

similar to those of the UTsK. In its jurisdiction the Ukrainian okruha committees (UOKs) performed the same function as the UDKs. K. *Pankivsky was the head of the UKK.

In February 1942 the Germans dissolved the UKK and ordered the UTsK to expand its activities into Galicia. In March 1942 the Lviv executive branch of the UTsK began operations under K. Pankivsky, who then became the UTsK's deputy leader. The cultural and youth departments were transferred to Lviv. The UTsK's jurisdiction in Galicia was fairly narrow. Ukrainians assumed control over the lower administration, the commissioners of education, the lower courts, and the auxiliary police. That situation, however, did not prevent abuses by the German authorities, which the UTsK reported to Governor O. Wächter, Governor-General H. Frank, and the Gestapo chief in Berlin, H. Müller. Another aspect of German-Ukrainian co-operation was the creation, through the efforts of Wächter, of the *Division Galizien. The Military Board (the division's civilian advisory council) worked with the UTsK in this area.

The Germans agreed to limited Ukrainian involvement in the administration of Galicia, but both internal and external factors made Ukrainian participation difficult. In order to protect the civilian population the UTsK urged Ukrainians not to provoke the Germans and called for an end to revolutionary military resistance. At the request of the UTsK the Ukrainian Catholic hierarch (A. Sheptytsky) issued a proclamation to that effect.

The capture of eastern Galicia by Soviet armies in the spring of 1944 resulted in the partial evacuation of the UTsK and its workers to the western reaches of the Generalgouvernement; the central bureau continued to operate out of Cracow. A skeleton staff headed by Pankivsky continued to work in Lviv. The Soviet advance of the summer and fall into Galicia and the capture of Lviv resulted in further evacuations of people via Cracow to Germany. Temporary accommodations were found for nearly 10,000 people in Slovakia. In early 1945 there were 300,000 to 400,000 Ukrainians in Germany who required the legal and social services the UTsK could provide. Through an agreement with the Generalgouvernement administration a UTsK bureau headed by Pankivsky was opened in Lüben (now Lubin) in lower Silesia. The Cracow bureau

was reduced, and the Berlin mission was expanded. The Vienna bureau was headed by Yu. Poliansky. The Ukrainiske Vydavnytstvo and the editorial office of *Krakivs'ki visti* were also moved to Vienna.

To assist Ukrainian workers and refugees approx 20 local centers were set up by the UTsK in various German cities, and a conference of their directors was convened by the UTsK in Weimar in March 1945. When the *Ukrainian National Committee (UNK) was set up under the leadership of Gen P. *Shandruk, Kubijovyč, as the head of the UTsK, became its deputy leader, and the UTsK local centers became the primary network of the UNK. After the Allied occupation of Germany Kubijovyč dissolved the UTsK on 17 April 1945 in Aufkirchen (in southern Bavaria) and handed its assets over to V. Mudry's civic committee, which formed the basis for the *Central Representation of the Ukrainian Emigration in Germany.

Activity. From July 1940 until the outbreak of German-Soviet hostilities in June 1941 the UTsK leadership concerned itself mainly with reviving Ukrainian life in the territories that had been under Polish control. In virtually every village with a Ukrainian population, a Ukrainian school and a co-operative were established. A UOT (which functioned much as a Prosvita society) could be found in 80 percent of these villages, and approx 50 percent had youth groups and nursery schools. Much of this educational work was conducted by refugees from Galicia. In approx 70 percent of the villages a 'man of trust' could be found. The most active Ukrainian centers in the Generalgouvernement were Kholm, Jarosław, Peremyshl, Sianik, Krynytsia, and Cracow.

Social services were by far the most important UTsK function and consisted of public health care as well as assistance to children, the sick, invalids, students, and Ukrainian POWs. Dealing with these issues was made even more difficult by the constant interference of the German authorities.

Food supplies were distributed by the UDK-UOK network, which received additional rations for community kitchens, student residences, and rest homes for children and youths as well as for civil servants and teachers. In mountainous regions seasonal kitchens were set up to deal with food shortages in the spring. In late 1943 there were 1,366 Ukrainian kitchens, which fed nearly 100,000 people. The UTsK was particularly successful in providing aid to victims of a flood in the Subcarpathian region in 1941: in the spring of 1942 it saved approx 30,000 children from starvation by resettling them with peasant families in Galician Podilia and Pokutia.

The UTsK also cared for Ukrainian POWs captured during the German-Polish conflict. It arranged for the quick release of around 85,000 of them. Some returned to the Generalgouvernement; others remained as laborers in Germany. The fate of Ukrainians taken on the Soviet-German front was much worse. Only very few, mainly those from Galicia, were released. They were forced to return home by foot, and most of them were ill with typhus. The UTsK commissioner for POW affairs, R. Danylevych, toured virtually all the POW camps on Ukrainian territory, but he was powerless to stem the implicit German policy of exterminating Slavic POWs. The UTsK could do nothing for the staggering numbers of prisoners who died of disease, starvation, and exposure or were taken to labor camps in Germany.

The UTsK assisted in resettling approx 10,000 Ukrainians who took advantage of the Volksdeutsche provisions of the German-Soviet accord in camps (*Umsiedlungslager*) in Germany in 1939-40. The UTsK secured administrative positions for many people within the Generalgouvernement civil service or in other state institutions. Among them were a few Orthodox clergymen from Bukovyna, who assisted in the Ukrainization of the Orthodox church. The UTsK also managed to resettle nearly 600 families in the Kholm region after they had been evacuated to Germany. When the Germans set up artillery ranges in the Lviv region in 1943, they displaced several thousand of the local rural population. The UTsK, in concert with local UOKs, helped resettle those displaced people in other areas.

The UTsK helped Ukrainian laborers in Germany through Ukrainian organizations there. Its Berlin mission issued certificates of nationality to workers from the Generalgouvernement. The UTsK petitioned the German authorities concerning political prisoners, to whom it sent care packages. It also secured compensation for Ukrainian invalids of the German-Polish War and the war for Ukrainian independence in 1918-20.

The public health department of the UTsK was directed by V. Karkhut and later by R. Osinchuk. It worked with the Labor Alliance of the Medical-Sanitation Service to deploy medical personnel, establish medical clinics and disinfection centers, train auxiliary medical personnel, and open four rest resorts.

In education the UTsK was fairly limited because under Nazi rule all schools were state-run. The UTsK co-operated with the German authorities in forming new schools, finding teachers, and establishing curricula. The UTsK's education department organized training for those not qualified to teach in vocational schools and the retraining of teachers from gymnasiums. It also organized a pre-school system and oversaw pupil residences (131 in 1943-4, which housed 7,000 pupils). Funds for these institutions were taken from the social services treasury. The department was aided by the Ukrainian Teachers' Labor Alliance.

The Ukrainian Students' Aid Commission (KODUS), funded by the social services treasury and private donations, was established in 1940. It issued 730 scholarships (valued at 1,350,000 zloty) in 1943, subsidized a student cafeteria in Lviv, and maintained an assistance fund for Ukrainian students. The *Labor Alliance of Ukrainian Students was the main Ukrainian student body in the Generalgouvernement.

The cultural department of the UTsK oversaw extramural education. In the fall of 1939 the Prosvita, Kachkovsky, and Ridna Khata (in Podlachia and the Kholm region) societies were revived throughout the Generalgouvernement. On 16-17 March 1940 the First Cultural-Educational Congress was held in Cracow. In July 1940 UOTs began to function largely independently of one another but were overseen by the UTsK cultural department and maintained a liaison with local UDKs. In March 1941 there were 808 UOTs with 46,000 members. The UTsK cultural department issued guidelines for the UOTs, prepared educational materials for them, published the monthly *Dosvitni vohni*, assisted in the assembling of libraries, and organized courses for UDK cultural officials.

After Germany took control of Galicia from the Soviet

Union all branches and reading rooms of the Prosvita society were reopened. The UTsK cultural department also oversaw the work of the Institute of Public Education (INO, headed by S. Volynets) and the Institute of Folk Art (INT, headed by S. Saprun). The INO aimed to train field workers and to provide them with instructional materials. The INT was divided into three virtually independent sections, music, theater, and folk arts. It oversaw 780 choirs and organized 10 conducting classes. It organized a festival of Ukrainian song in Lviv on 8 July 1943, in which over 1,200 singers participated. Art associations came under the umbrella of the Literary-Artistic Club. They included associations of painters, writers, journalists, musicians, actors, photographers, and scholars. A women's section, headed by M. Biliakova and M. Zaiachkivska, largely continued the work of the *Union of Ukrainian Women. On 2–3 March 1942 the first congress of deputies of the women's groups of the Generalgouvernement took place in Lviv. The women's organizations dealt mainly with social services.

The UTsK also tried to stimulate academic activity. There were some difficulties in this area. An Institute of Ukrainian Studies was planned to open in Cracow in 1941, but the plan was halted by the German-Soviet War. A Shevchenko Institute was to replace the banned Shevchenko Scientific Society, but it too was proscribed by Berlin. Nevertheless, the Labor Alliance of Academic Workers was established, the *Ukrainske Vydavnytstvo* publishing house remained active, and educational and vocational courses were taught. The UTsK also assisted Ukrainian academic institutions (such as the Ukrainian Free University) through the separate Academic Fund, headed by V. Simovych.

The youth department of the UTsK organized physical education and sports clubs. Youth groups were divided according to age: 7 to 14, 14 to 18, and 18 to 24. In July 1941 the UOTs oversaw 52 school youth groups, 28 teen groups, 18 sports associations, and 46 fire brigades. The youth department organized camps, courses for cultural instructors, and jamborees (1,200 youths participated in one held in Kholm in 1941). Other youth organizations under the UTsK included the Ukrainian Youth Educational Societies (VSUM), which were similar to the scouting *Plast Ukrainian Youth Association. In 1944 they had over 2,500 members, in 60 groups. The youth department organized two Galician youth congresses in 1943 and set up a number of rest and instructional camps. Leading VSUM figures included R. Olesnytsky and K. Paliiv. When the German authorities established compulsory construction service (*Baudienst*), the UTsK secured the right to form a separate *Ukrainian Service to the Fatherland, headed by M. Rusnak.

The UTsK's economic activity was marginal owing to wartime conditions. During its existence, however, some co-operatives were reopened, and new ones were established. After considerable difficulties Ukrainian county associations and the so-called Society of Patrons of Ukrainian Co-operation, headed by Yu. Pavlykovsky, were set up. Co-operatives were kept under German control, however. The UTsK economic department called a congress of merchants and craftsmen and created the requisite labor alliances.

The UTsK was financed by a variety of means. The primary source was a budgetary allotment given by the Ge-

neralgouvernement, earmarked mainly for social services but also covering administrative costs. Significant contributions were also made through regular collections among Ukrainian citizens. Material assistance (food, clothing, medication) also arrived from the International Red Cross in Geneva, with which the UTsK was in constant contact. The deputy head of the financial department in Lviv was V. Pushkar.

The UTsK existed for over five years as the only Ukrainian social and community force during the Second World War that concerned itself with the vital interests of the Ukrainian people. For Ukrainians its activity was particularly significant in that it made possible the restoration of some national features to institutions that until then had been increasingly Polonized. These gains were made in spite of limitations imposed by the Nazi regime, such as the forbidding of all contact between the UTsK and Ukrainians in the Reichskommissariat Ukraine, Rumania, and other territories.

Ukrainian Central Committee in Poland (Ukrainskyi tsentralnyi komitet u Polshchi, or UTsK). A central émigré organization, founded in Warsaw in 1921 and active until the fall of Poland in September 1939. The UTsK provided a community base in Poland for the Government-in-exile of the UNR, with which it co-operated closely. It conducted cultural and educational work and provided legal and other aid to its members. Most of the political and military leaders of the UNR who lived in Poland belonged to it. The Central Executive of the UTsK co-ordinated the work of 68 branches (1929), with a membership of approx 15,000, located in both central Poland and parts of Western Ukraine under Polish rule. In Kalisz the UTsK organized a rest station for 310 invalids and a Ukrainian gymnasium; in Perymyshl it founded the Petliura Student Residence for émigré children; in Warsaw it sponsored the Lysenko Ukrainian National Choir. The UTsK was headed throughout its existence by M. *Kovalsky. The executive members included V. Kushch, I. Zolotnytsky, M. Sadovsky, and V. Krasnopilsky. Policy was set by the UTsK Council, which was elected every three years at a congress of delegates of the Ukrainian political emigration in Poland. It included V. Andriievsky, M. Bezruchko, L. Chykalenko, Ye. Glovinsky, O. Halkyn, P. Kholodny, O. Kuzminsky, O. Lototsky, A. Lukashevych, Yu. Lypa, S. Pysmenny, M. Sereda, V. Sinkler, P. Shandruk, P. Shkurat, S. Shramchenko, R. Smal-Stotsky, V. Solsky, M. Tyshkevych, M. Yunakiv, O. Zahorodsky, and V. Zmiienko. The official organs of the UTsK in Poland were *Visty* (published 1923–8 in Warsaw), *Shliakh nezalezhnosti* (1929–31), and *Za nezalezhnist'* (1934–8). They were all edited by Shkurat.

The UTsK in Poland worked with other Ukrainian émigré organizations, in Czechoslovakia, Rumania, and France. Together they held congresses of the Ukrainian emigration (the first in 1929) and formed the *Supreme Emigration Council.

A. Zhukovsky

Ukrainian Central Co-operative Committee (Tsentralnyi ukrainskyi kooperatyvnyi komitet, or Kooptsentr, aka Central Ukrainian Co-operative Committee). The central organization of the *co-operative movement in Ukraine, established in Kiev as a temporary body in April 1917 and as a permanent body in September 1918. It represented the whole Ukrainian co-operative movement at home and abroad, defended the interests of co-operatives in government circles, trained co-operative workers, audited individual co-operatives, organized conferences and congresses, collected statistics on co-operatives, and developed and propagated the theory of co-operation. Its activities were organized into three sections, organizational-legal, economic-statistical, and cultural-educational. Membership was restricted to co-operative associations and unions. The board of directors was headed by M. *Tuhan-Baranovsky, assisted by K. Matsiievych; the executive was headed by B. Martos. By the end of 1918 Kooptsentr represented 45 credit, 110 consumer, 31 mixed, 4 agricultural, and 62 other co-operative unions. A year later there were almost 400 unions and 30,000 individual co-operatives in Ukraine. The committee published the journal *Ukrains'ka kooperatsiia* and then, irregularly, a bulletin. In 1919 its courses were reorganized into the Tuhan-Baranovsky Co-operative Institute, the first school of its kind in the world. Kooptsentr was dissolved by the Soviet authorities in 1921.

Ukrainian Central Relief Alliance in Austria (Ukrainske tsentralne dopomohove obiednannia Avstrii, or UTsDOA; German: Ukrainische Zentralhilfsvereinigung in Österreich). A social-services organization founded in Innsbruck in February 1946 to care for and assist in the resettling of Ukrainian émigrés, DPs, and refugees, in co-operation with the United Ukrainian American Relief Committee, Caritas, the International Relief Organization, and other organizations. It also provided cultural-educational facilities and programs, established a network of schools (of all levels) and recreational camps, and tended Ukrainian burial sites. Later it co-ordinated the work of all Ukrainian organizations and institutions in Austria and represented the Ukrainian community before the Austrian government and other institutions. The UTsDOA membership consisted of nine provincial committees and a number of cultural and professional associations in Austria, and its activities were centered in Innsbruck, Salzburg, Linz, Graz, Villach, Klagenfurt, and (after its release from the Soviet zone in 1955) Vienna. The headquarters were moved to Salzburg in 1950, and to Vienna in 1965. In the 1940s the UTsDOA had approx 12,000 members and served over 30,000 Ukrainians. After the emigration of most Ukrainians from Austria by the early 1950s, the membership declined. In the early 1980s the membership stood at approx 800, and the alliance served nearly 5,000 Ukrainians. In the mid-1980s it began assisting a new wave of Ukrainian emigrants, particularly from Poland and also from the USSR and its satellites (Czechoslovakia, Yugoslavia, Rumania, Hungary, Bulgaria).

The UTsDOA has been headed successively by M. Rosliak, I. Kedryn, I. Tyktor, Ye. Glovinsky, M. Kurakh, V.

Bemko, D. Bobanych, M. Kovalevsky, I. Dashkovsky (1957–65), S. Naklovych (1965–71), and Yu. Kostyuk (1971–5). It has been headed by S. Naklovych since 1975.

S. Naklovych

Ukrainian Central Representation in Argentina (Ukrainska tsentralna reprezentatsiia v Argentini; Spanish: Representación Central Ucraina en la República Argentina). An umbrella organization for Ukrainian associations in Argentina, established in 1947 in Buenos Aires. Inspired by the example of representative Ukrainian councils in Canada and the United States, the group managed to bring almost all the noncommunist Ukrainian-Argentinian societies into its ranks. Strong infighting, however, particularly between the Prosvita and Vidrodzhennia societies, was a major problem for the group and limited its effectiveness for many years. This tension subsided somewhat in the 1960s. The Representation is a member of the *World Congress of Free Ukrainians.

Ukrainian Central Representation in France (Ukrainske tsentralne predstavnytstvo u Frantsii). One of two émigré umbrella organizations in France, it was established in September 1985 as a breakaway body from the *Ukrainian Central Civic Committee in France. It represents seven organizations and institutions affiliated with or sympathetic to the *Ukrainian Liberation Front. It is headed by B. Kopchuk.

Members of the executive of the Ukrainian Christian Movement in 1963. From left: Volodymyr Kalvarovsky (secretary of the Supreme Council), Petro Zeleny (head in Belgium and 4th vice-president), Osyp Melnykovych (head in France and 2nd vice-president), Oleksander Kulchyt'sky (head of external relations), Volodymyr Yaniv (president), Hnat Martynets (head in Germany and 1st vice-president), Markiian Zaiats (secretary of the executive)

Ukrainian Christian Movement (Ukrainskyi khrystyianskyi rukh, or UKhR). A community and religious organization of Ukrainian Catholics in Western Europe, founded on the initiative of Archbishop I. *Buchko in 1955. V. Yaniv was appointed president, and M. Konovalets was made head of its council (later he was replaced by I. Holubovych). National chapters were established in Germany, France, England, and Belgium, headed by H.

Martynets, O. Melnykovych, R. Rudensky, and V. Popovych respectively. In seven other countries (four of which were outside Europe) trust groups were set up. As an organization with an ecumenical purpose, the UKhR invited Ukrainian Orthodox activists to participate.

The UKhR sought to expand lay participation in Ukrainian religious life. It organized pilgrimages to Rome and Lourdes for the millennium of Olha's baptism, the 15th anniversary of A. Sheptytsky's death, and other occasions. For the 10th anniversary of the Soviet arrest of the Ukrainian Catholic hierarchy and the 25th anniversary of the Soviet abolition of the Ukrainian Autocephalous Orthodox church, it compiled memorial booklets, which were distributed throughout the world. In 1962 the UKhR initiated a campaign for the release of Metropolitan Y. *Slipy. The UKhR participated officially in international Catholic organizations, particularly in World Congresses of the Lay Apostolate. It also organized study days in Rocca di Papa in Italy on the topic of Ukrainian laity in the life of the church. It supported a conference on religion in the life of the Ukrainian people, together with the Shevchenko Scientific Society (NTSh), the Ukrainian Free University (UVU), the Ukrainian Free Academy of Sciences (UVAN), and the Ukrainian Theological Scientific Society. The proceedings of both events were published. The UKhR also published *Informatyynyi lystok zv'iazku*. Leading UKhR activists included D. Buchynsky, Ye. Glovinsky, V. Kachmar, O. Kulchytsky, I. Mirchuk, D. Pelensky, S. Shakh, and P. Zeleny. In the early 1970s UKhR activity dropped off, and its members joined the laymen's movement in support of a Ukrainian patriarchate.

V. Yaniv

Ukrainian Christian Organization (Ukrainska khrystyianska orhanizatsiia, or UKhO). A nonpolitical organization established in Lviv in 1925 for educating Ukrainian Catholics in a Catholic spirit and countering sectarian and communist influences. In 1930 it assumed the name Ukrainian Catholic Organization. It set up the newspaper *Nova zoria* (1926–38) and the Biblioteka UKhO publishing house. The organization remained loyal to the Polish state and favored a realistic policy aimed at winning autonomy for the Ukrainian territories under Poland. It opposed Ukrainian and Polish nationalism and criticized the Polish government for neglecting 'burning Ukrainian problems.' In the elections of 1928 it supported the Ukrainian National Democratic Alliance. The first president of UKhO was Rev T. *Halushchynsky, and its leading members included O. Nazaruk and S. Tomashivsky.

Ukrainian Citizens' Committee (Horozhanskyi komitet, or Ukrainskyi horozhanskyi komitet). A Ukrainian public body formed in Lviv in December 1918, after the evacuation of the Ukrainian government, for the purpose of representing the interests of the city's Ukrainian community before the Polish occupational authorities and providing relief to the victims of the military operations (particularly prisoners of war and political prisoners). The committee had several departments – charitable (Samaritan), legal aid, and clandestine operations for liaison with the Ukrainian army. The president of the committee was S. *Fedak, and its leading members were L. Hankevych, Rev L. Kunytsky, M. Panchyshyn, and O. Fedak-Sheparovych. Most of its membership consisted of women. The body was dissolved in September 1921.

The executive of the Ukrainian Civic Committee in Czechoslovakia. From left: Nykyfor Hryhoriiv, Mykyta Shapoval, Mykola Halahan

Ukrainian Civic Committee in Czechoslovakia (Ukrainskyi hromadskyi komitet v Chekhoslovachchyni, or UHK). An immigrant aid organization established in the summer of 1921 in Prague. The group was initiated by Mykyta *Shapoval, who used his connections with the Czechoslovak authorities to secure government funds for the committee's organizational and relief work. The committee had a medical and sanitary department under the leadership of S. Litov that ran a clinic and provided aid to invalids. It also initiated the establishment of the *Ukrainian Husbandry Academy in Poděbrady (1922) and the Ukrainian Higher Pedagogical Institute in Prague (1923). Initially the UHK represented all Ukrainians in Czechoslovakia, but eventually some émigré circles broke away from it because of ideological and political differences. In 1925 the Czechoslovak government withdrew its financial support, and the committee was replaced by several new organizations. The president of the UHK was M. Shapoval, and its most active members were N. Hryhoriiv and M. Halahan.

The logo of the Ukrainian Civic Publishing Fund (artist: Robert Lisovsky)

Ukrainian Civic Publishing Fund (Ukrainskyi hromadskyi vydavnychiy fond). A publishing house in Prague from 1923 to 1932. Initially part of the *Ukrainian Civic Committee in Czechoslovakia and then an independent institution, it was directed by a bureau headed by Ye. Vyrovny and consisting of Ye. Prykhodko, P. Bohatsky, H. Shcherbyna, and Mykyta Shapoval. It published approx

40 scholarly and popular-educational books on a variety of topics, including Ukrainian literary criticism (by L. Biletsky), Ukrainian ethnography and anthropology (F. Vovk), political economy (M. Tuhon-Baranovsky), Ukrainian theater and cultural history (D. Antonovych), philosophy (Ya. Yarema and D. Chyzhevsky), educational theory (S. Rusova), Ukrainian art (D. Antonovych, V. Sichynsky, and V. Shcherbakivsky), statistics (F. Shcherbyna), music (F. Yakymenko), and the pure and applied sciences (S. Ryndyk, F. Burian, A. Honcharenko, F. Yakymenko, M. Pavlichuk, M. Chaikovsky, M. Halahan, V. Harmashov, F. Frolov, R. Kakhnykevych, and L. Hrabyna). The fund also published a bulletin and editions of poetry by O. Oles, Yu. Darahan, and H. Chuprynka.

Ukrainian Club (Ukrainskyi klub). A literary and artistic society founded in Kiev in 1908 by various leading Ukrainian cultural figures, such as M. Starytsky, M. Sadowsky, O. Pchilka, O. Oles, and M. Lysenko. The club's literary-dramatic, musical, lecture, and library sections organized theatrical performances by Sadowsky's theater, literary-musical evenings which included artists from the Solovtsov theater and advanced students from Lysenko's music school, and public lectures by figures such as I. Franko, M. Kotsiubynsky, and Lesia Ukrainka. The tsarist authorities closed down the club in 1912. It was revived in 1913 as the Rodyna club, and it was disbanded again by the authorities at the outbreak of the First World War.

Ukrainian Committee in Czechoslovakia (Ukrainskyi komitet v Chekhoslovachchyni). A community organization established in Prague in 1926 after the dissolution of the *Ukrainian Civic Committee. Most members of the committee were Ukrainian émigré socialist revolutionaries, social democrats, radicals, or nonpartisan émigrés. The chairmen of its executive board were N. Hryhoriiv, M. Halahan, and S. Shelukhyn. The committee declined in the 1930s.

Ukrainian Communist party (Ukrainska komunistychna partiia, or Ukapisty). A Communist group of no more than 250 members who in 1920–4 supported Soviet rule but opposed Russian domination of Ukraine through the CP(B)U. Its most prominent leaders were Yu. *Mazurenko, Mykhailo Tkachenko, and A. *Richytsky.

In January 1919, at the Sixth Congress of the Ukrainian Social Democratic Workers' party, a group called the *nezalezhnyky* (see *Ukrainian Social Democratic Workers' Party [Independentists]) walked out and began to function as a separate party with its own press organ, *Cherovonyi prapor*. It adopted an ideology of national communism, favoring a Soviet regime in Ukraine but rejecting both the UNR Directory and the CP(B)U. In June 1919 it formed a revolutionary committee under the protection of Otaman D. *Zeleny, who had revolted against the Bolshevik regime. In August the group split: its left faction joined the *Borotbists, and the majority co-operated in military matters with the Directory for a short period.

On 22–25 January 1920 the group held the founding convention of the Ukrainian Communist party in Kiev and appealed unsuccessfully to the Comintern for recognition as the legitimate representative of the Ukrainian proletariat. In the next few months it attracted Communists who opposed Russian domination. Yu. Lapchynsky

joined the Ukapisty after his Federalist Opposition within the CP(B)U was defeated, and a number of former Borotbists went over to the Ukapisty when their group merged with the CP(B)U.

In 1919 V. *Vynnychenko organized an émigré branch of the Ukapisty in Vienna. In the summer of 1920 he visited Moscow and Kharkiv, ostensibly representing the Ukapisty, and was named Ukrainian Soviet deputy premier, but he soon realized that the Bolsheviks would not give him any real power. Vynnychenko left Ukraine and ended his association with the Ukapisty.

Thereafter the Ukapisty were tolerated as a legal but impotent opposition which objected to the economic exploitation of Soviet Ukraine by Russia. In 1921 Yu. Mazurenko and M. Yavorsky, both members of the party's Central Committee, left to join the CP(B)U. In 1923 a so-called Left Faction was formed with CP(B)U encouragement to subvert the Ukrainian Communist party from within, but it was expelled from the party. In August 1924 the Ukapisty again applied for admission to the Comintern, and the Left Faction was drawn into the discussions in order to discredit the Ukapisty. In December the Comintern Executive Committee ordered both the party and the faction to dissolve. They complied in January 1925. Their members were admitted into the CP(B)U, where they helped carry out the *Ukrainization policy. The leading Ukapisty members were appointed to high posts in Ukraine. Eventually most of them were charged with Ukrainian nationalism and executed by the NKVD.

Ukrainian Communist Youth Association (Ukrainska komunistychna yunatska spilka, or Ukrainska komunistychna robitnycha yunatska spilka). The youth organization allied with the *Ukrainian Communist party. It was founded in 1920 by some former members of the *Communist Youth Association and by the *Independent Social Democratic Youth Association. The new association was based in Kharkiv, and its leading members were Ya. Chmil and P. Syniavsky. The association competed with the Communist Youth League of Ukraine, which was allied with the CP(B)U for several years. In 1925 it was absorbed by the league.

Ukrainian Community Aid in France (Ukrainska hromadska opika u Frantsii). An organization founded in 1946 in Paris by former members of the Union of Ukrainian Emigré Organizations in France. It had 10 branches throughout the country. It was headed by S. *Sozontiv (1946–54) and S. Kachura (1954–68) and included Yu. Batsutsa and I. Kosenko among its active members. It ceased to exist in the late 1960s. The majority of its membership

also belonged to the Society of Former Combatants of the Ukrainian Republican Democratic Army in France.

Ukrainian Community Development Committee

(Ukrainskyi komitet suspilno-hromadskoho rozvoiu, or UCDC). A subcommittee of the National Executive of the Ukrainian Canadian Congress (UCC) established in May 1982. The group was established as a prairie-wide committee consisting of 15 members, five from each province, to provide the national UCC with concrete proposals for actions to meet the long-term needs of the Ukrainian community in Canada. In this regard it undertook a major survey of organized Ukrainian life in Alberta, Saskatchewan, and Manitoba and co-ordinated a series of 'needs-assessment' conferences in each of these provinces in 1984-5. The committee's findings were published as *Building the Future: Ukrainian Canadians in the Twenty-First Century* and submitted as a report to the UCC at its 1986 congress. By this time the UCDC had begun to function as a strategic development committee for the UCC provincial councils in Alberta and Saskatchewan and as the initiative group for the formation of UCC provincial councils in Manitoba and British Columbia. It has continued to serve in an advisory capacity to the national UCC. Chairpersons of the committee have included M. Lupul (1982-3), L. Melosky (1983-4), C. Devrome (1984-5), M. Spolsky (1985-6), T. Harras (1986-7), and R. Petryshyn (1987-8).

The seal of the Ukrainian Congress Committee of America

Ukrainian Congress Committee of America

(Ukrainskyi kongresovyi komitet Ameryky, or UKKA). An umbrella organization of Ukrainian civic associations in the United States founded at the First Congress of Ukrainian Americans in Washington, DC, on 25 May 1940. Its chief promoters were four fraternal insurance associations: the *Ukrainian National Association (UNA), the Ukrainian Workingmen's Association (see *Ukrainian Fraternal Association [UFA]), the *Providence Association of Ukrainian Catholics in America, and the *Ukrainian National Aid Association. Besides them the committee represented, in 1980, about 70 political, social, scholarly, professional, economic, religious, women's, young people's, and veterans' organizations of a national status and 65 local branches. By 1990 membership had dropped to 42 organizations in 67 local branches as a result of a major rift and the establishment of the Ukrainian American Coordinating Council, a rival representative organization for Ukrainian Americans.

The governing bodies of the UKKA are the Congress of Ukrainians in the United States, held every four years (the 16th in 1992); the Presidium and Executive (30 members altogether); and the National Council (formerly the Political Council, the Audit Commission, and the Court), con-

sisting of two representatives from each of the national organizations and one representative from each of the 12 largest local branches of the UKKA. The latter body was intended to serve as a kind of parliament between congresses, but it does not sit regularly and does not have the authority needed to fulfill this function. The presidents, elected at quadrennial congresses, have been M. Murashko (1940-4), S. Shumeyko (1944-9), L. *Dobriansky (1949-84), I. Bilynsky (1984-92), and A. Lozynsky. Executive directors have included Yu. Revai, V. Mudry, V. Bazarko, and Ya. Haivas. UKKA activists have included A. Batiuk, D. Halychyn, B. Hnatiuk, J. Lesawyer, O. Lototska, T. Mynyk, M. Piznak, I. Roberts, R. Smal-Stotsky, J. Flis, and S. Yarema.

The UKKA has consistently defended Ukraine's right to national independence and the interests of the Ukrainian people inside and outside Ukraine. As well, it has promoted recognition of the contribution of the Ukrainian community to American society. After the war the UKKA opposed the repatriation of Ukrainian displaced persons to the USSR and fought for their resettlement in the United States; it established the *United Ukrainian American Relief Committee for this purpose. It demanded that the United States establish diplomatic relations with Kiev and won the US president's annual proclamation of Captive Nations' Week. In the last three decades the UKKA has defended political dissidents and human rights activists in Ukraine. In 1944 the UKKA began to publish the **Ukrainian Quarterly* under the editorship of M. Chubaty and, later, W. *Dushnyck. It also issued the semimonthly *Ukrainian Bulletin* (1948-70) and numerous Ukrainian and English publications about Ukraine. A UKKA page has appeared occasionally in two Ukrainian-American dailies and two weeklies since 1975. An information bureau, directed by L. Dobriansky, was set up in Washington in 1977.

Much of the UKKA's energy is directed toward political goals and visible external events rather than internal community problems, such as generational changes, language retention and cultural awareness, and alienation among young people. It organized the celebration on a national scale of a number of important Ukrainian anniversaries: the centennial of T. Shevchenko's death (with the opening of his monument in Washington in 1964), the centennial of Ukrainian immigration to the United States (1976-7), and the millennium of Christianity in Ukraine (1988). It ensures that Ukrainian Independence Day is commemorated every 22 January by the US Congress, some state assemblies, and some municipal councils. The Educational Council, an autonomous body affiliated with the UKKA, which oversees Ukrainian Saturday schools (75 in 1970 and 40 in 1980), publishes textbooks (about 30 titles), approves school programs, and sponsors teacher training.

The UKKA supported efforts to organize and co-ordinate the activities of Ukrainian organizations abroad: it was one of the founders of the *Pan-American Ukrainian Conference and the *World Congress of Free Ukrainians. Maintaining a policy of consensus on political issues (up to 1980), it has tried to work with all noncommunist Ukrainian civic groupings. Occasional attempts by one group or another to seize control of the UKKA led to crises and factionalism. In 1966 an opposition group, the Committee for Community Unity, arose, and some of its members formed the Association of Ukrainians in America. Its conflict with the UKKA was finally settled, in 1978. A more serious crisis arose at the 13th Congress in 1980 in Phila-

delphia, when the organizations of the *Ukrainian Liberation Front and their allies stacked the gathering with their own candidates and used their majority to override the UKKA statute and procedures. Two fraternal associations (the UNA and UFA) and 25 national organizations walked out of the convention and formed the Committee for Law and Order in the UKKA, which, after more than two years of unsuccessful negotiation, gave birth to the *Ukrainian American Coordinating Council.

Ukrainian Constituent Assembly. See Constituent Assembly of Ukraine.

Ukrainian Co-operative Council of Canada (Ukrainska kooperatyvna rada Kanady). A national association of Ukrainian credit unions in Canada established in 1971. Its purpose is to co-ordinate the activities and plans of its members. In 1988 there were 28 member groups, with total assets of 564 million dollars. The council publishes a newsletter, *Koordinator*. Its presidents, elected at triennial conventions, have included V. Sytnyk (1971–88) and P. Mykuliak (1988–).

Ukrainian Co-operative Insurance Union. See Strakhsioiuz.

Ukrainian Cossack Brotherhood. See Ukrainian Free Cossacks.

Ukrainian Council for Physical Culture (Rada fizychnoi kul'tury, or RFK). The central sports and physical-education organization for Ukrainian refugees in postwar Germany, founded in November 1945 in Munich-Karlsfeld. In 1946 the RFK represented 38 Ukrainian sports clubs in the DP camps of the American zone (2,873 members), 12 in the British zone (829 members), and 4 in the French zone. The various organized activities, such as soccer, track-and-field sports, swimming, volleyball, basketball, hockey, hiking, skiing, mountaineering, table tennis, boxing, weight lifting, swimming, and chess, came under eight departments. The RFK introduced a standard test for a physical fitness badge, which had been awarded to 1,003 individuals by the end of 1947; accredited 27 referees and judges; and organized an association and courses for them, as well as an instructors' school (in Mittenwald) and skiing, volleyball, and basketball training camps.

On the initiative of the RFK the International Committee of Political Refugees held a DP Olympiad in June–November 1948; Ukrainian athletes captured gold medals in soccer, men's volleyball, boxing, and the men's 4 × 100-m relay. The RFK also organized, as part of international refugee sports meets, games with German teams, and annual competitions among the various Ukrainian soccer, track-and-field, chess, and skiing clubs. After the mass emigration of refugees from Germany, the RFK wound down its activities in 1950. It was headed by A. Lukiianenko (1945–6), V. Blavatsky (1946–7), I. Krasnyk (1947–8), and S. Kikta (1948–50).

Al'manakh Rady fizychnoi kul'tury: Almanac of the Ukrainian Council for Physical Culture (Munich 1951)

Ukrainian Council of the National Economy (Ukrainska rada narodnoho hospodarstva, or URNH). A central body for economic management and planning in Ukraine roughly analogous to the *Supreme Council of the National Economy, which was abolished in 1932. It was established in June 1960 to oversee the Ukrainian *regional economic councils, which were restored in May 1957 in the major economic reform initiated by N. Khrushchev. The URNH was responsible primarily for drafting and implementing yearly economic plans (long-term planning remained the prerogative of the *State Planning Committee of the USSR). Initially accountable only to the Council of Ministers of the Ukrainian SSR, in 1962 the URNH was subordinated also to the newly established USSR Council of the National Economy. The URNH was instrumental in decreasing the influence of central planners on the Ukrainian economy and in restoring some semblance of economic autonomy for the republic. Its first head was M. *Sobol. The council was dissolved in January 1966, following Khrushchev's fall from power.

Ukrainian Council of Industrial Co-operation (Ukrainska rada promyslovoi kooperatsii, or UKRPROMRADA). The central union of manufacturing co-operatives in Ukraine, established in 1932 with its head office in Kiev. It co-ordinated the activities of the oblast-level councils of manufacturing co-operatives. Unlike the various co-operative bodies of the 1920s, UKRPROMRADA was under stricter official control and served as an instrument of government and Party economic policy. By 1940, 26,700 enterprises were nominal members of the council. In 1960 UKRPROM-

Badges of the Ukrainian Council for Physical Culture (1–3) and member clubs

RADA was dissolved, and its enterprises were transferred to various state farms and city soviets or to the ministries of Trade, Health Care, Transport, and Communal Housing.

The head office of the Ukrainian Credit Union in Toronto

Ukrainian Credit Union (Ukrainska kredytova spilka). The largest Ukrainian credit union in Canada, and the oldest in Toronto. It was established on 12 July 1944, as the Ukrainian (Toronto) Credit Union, with a membership of 42. By the end of the year it had 91 members and assets of 17,000 dollars. Its office was located on the premises of the Ukrainian National Federation and was open one evening per week. In 1949 a branch was set up in the west end of the city. The credit union grew rapidly in the 1950s. By 1969 it had 5,000 members and assets of 8 million dollars, and by 1991 it had over 14,000 members and assets of 168 million dollars. The union built its own office building in 1980 and by 1991 had two other branches in Toronto and one each in Mississauga, London, Oshawa, and Windsor. From its educational and cultural fund the union provides scholarships and sponsors summer camps, cultural events, and sports teams. Its presidents have been V. Sytnyk (1944–79) and M. Rebyk (1979–).

Ukrainian Crystalline Shield (aka the Ukrainian Massif or Azov-Podolian Shield). An uplifted block of outcropping crystalline rocks of the Precambrian age running through the central reaches of Ukraine mainly on the right bank of the Dnieper. It originally made up the southwestern portion of the Fennosarmatian paleocontinent and is now tilted toward the west. It extends in the form of a boomerang for some 1,000 km from the Horyn River in the northwest to the Azov Sea in the southeast and covers an area of about 200,000 sq km. Within the shield area the crystalline rocks outcrop in deeply incised river valleys (such as the Dnieper between Dnipropetrovske and Zaporizhia) in the form of picturesque cliffs and rapids. To the northwest the Ukrainian Crystalline Shield dips under the Hercynian structures of the Dnieper-Donets Trough (including the Donets Basin), without apparently being involved in their late Paleozoic structural deformation, and connects in the subsurface to the Voronezh Massif north of Vovcha and the iron-ore district of Belgorod. Elsewhere it dips under Alpine folded structures of late Mesozoic and early Cenozoic, in the Caucasus to the east, the Crimean Mountains to the south, and the Carpathian Mountains to the west.

The Ukrainian Crystalline Shield near Korostyshiv

The Ukrainian Crystalline Shield is made up of a folded basement broken up by deep meridional faults into a series of blocks: Volhynian-Podolian, Bila Tserkva-Odessa, Kirovohrad, and Dnieper-Azov. The shield is divided into an older Archean and a younger Proterozoic series of igneous and metamorphic rocks.

The Archean is represented predominantly by gneisses, granites, and green schists that are 3,500 to 1,900 million years old. A lower suite, the Dnieper series, 3,500 to 2,700 million years old, contains various gneisses and amphibolites and is intruded by pegmatites and aplites associated with migmatites. An upper suite, 2,700 to 1,900 million years old, consists of paragneisses, biotite, sillimanite and graphite schists, quartzites, marbles, and amphibolites intruded by monzonites, diorites, and either charnockitic or microcline-bearing granites. The degree of deformation increases to the southwest. Both the lithologic composition and the grade of metamorphism are distinctly different from rocks of the Lower Proterozoic and their precise subdivision is not generally accepted.

Wedged into the Archean and separated from it by angular unconformity are tight, long, narrow folds of Lower Proterozoic rocks (1,900–1,600 million years old) of a lower grade of metamorphism. Basal arkosic and conglomeratic sandstones are overlain first by phyllites and quartzose schists, then by talcose and actinolitic schists, and finally by ferruginous hornstones and jaspilites. The jaspilitic iron ores (banded iron formation) of the Kryvyi Rih series, composed of alternating laminae of chert and hematite, extend north to include the iron ores of Kremenchuk. Owing to intensive folding the ore-bearing sequence is never less than 50 m thick, and often exceeds 1,000 m.

The sequence is surrounded by Middle Proterozoic (1,600–1,300 million years ago) metamorphosed sediments and volcanics and is cut by postorogenic Rapakivi granites in plutons at Korosten, Korsun, and Novomyrhorod as well as an Azov complex of alkaline gabbros. They are covered by chloritic, carbonaceous, and quartz-mica schists with intercalations of dolomitic marble. The highest beds are quartzose schists.

The Upper Proterozoic (1,100–570 million years ago) is represented by the Ovruch series of quartzites, schists,

and quartz porphyries as well as by muddy sandstones and volcanics. A sharp unconformity separates it from a thin covering of younger sedimentary rocks (Paleogene, Neogene, and Quaternary) that include the Dnieper Lignite Basin and the Nykopol manganese-ore deposit.

The building and logo of the Ukrainian Cultural and Educational Centre

Ukrainian Cultural and Educational Centre (Oseredok ukrainskoi kultury i osvity, or Oseredok). Established in *Winnipeg in 1949 by the Ukrainian National Federation as a repository for Ukrainian historical and cultural artifacts, Oseredok consists of a museum, art gallery, 40,000-volume library, and archive containing important collections on wartime refugees, Ukrainian-Canadian organizations, and prominent individuals (Ye. Konovalets, O. Koshyts, I. Bobersky). The center also maintains an extension and educational program. It is governed by a board of directors and supported by a Canada-wide membership, its own foundation, and (since 1979) an operational grant from the province of Manitoba.

Ukrainian Cultural Council (Ukrainska kulturna rada, or UKR). A body set up in Vienna in 1915 to oversee cultural activity among Ukrainian émigrés. The president of the UKR was Yu. Romanchuk, but the actual director was O. *Kolessa. The council founded schools and reading

societies in several Ukrainian camps located in Austria (notably Gmünd and Wolfsberg) and sponsored education courses in Vienna. It ceased activity after the war.

Ukrainian Cultural Festival in Czechoslovakia. An annual three-day folk-art festival organized in late June by the *Cultural Association of Ukrainian Workers (KSUT; since 1990, the Union of Ruthenian Ukrainians) and other institutions and organizations in Slovakia. Known as the Festival of Song and Dance until 1977, it was held in 1955 in Medzilaborce and has been held since then in Svydnyk. The festival is usually attended by 20,000 to 40,000 people, who watch 40 to 60 independent folklore ensembles (1,500–2,500 performances). Besides the local Ukrainian ensembles and folklore groups an ensemble from each of the other nationalities in Czechoslovakia (Czech, Slovak, Hungarian, and Polish) and groups from neighboring countries (Poland, Hungary, and Ukraine) have participated in the festival. The *Duklia Ukrainian Folk Ensemble from Prešov appears every year, and the *Transcarpathian Folk Chorus from Uzhhorod is a frequent guest. The main festival is preceded by regional song and dance festivals in 12 localities inhabited by Ukrainians in the Prešov region.

In recent years the festival has consisted of eight distinct programs: choral ensembles, contemporary vocal and instrumental groups, children's collectives, folk groups, visiting ensembles, anniversary collectives, authentic folk art (in the setting of the Svydnyk Museum of Ukrainian Culture), and the final gala performances. Virtually all the programs are broadcast live or are recorded for radio, and an hour or two of the gala performance is televised.

Thematic exhibits at the Museum of Ukrainian Culture, talks with veterans of the struggle for national liberation, and a performance by the winner of the Dukhnovych Festival of Ukrainian Drama have been integral parts of the cultural festival.

M. Mushynka

Ukrainian Cultural Heritage Village (Selo spadshchyny ukrainskoi kultury). An open-air living history

Premier Peter Lougheed of Alberta unveiling the Ukrainian pioneer family monument (sculptor: Leonid Molodozhanyan) at the Ukrainian Cultural Heritage Village on 10 August 1980

museum situated on 320 acres of land along the eastern boundary of Elk Island National Park approx 50 km east of Edmonton. The village was founded by the Ukrainian Cultural Heritage Society (est 1971) and in 1975 was purchased by the government of Alberta, which then developed it according to a master plan. The purpose of the village is to preserve and reconstruct pioneer farm and town buildings, collect artifacts and farm implements, and demonstrate practical skills and cultural traditions practiced by the pioneers. Administered by the Alberta Department of Culture and Multiculturalism, the museum conducts extensive research and uses dramatic presentations and skill demonstrations to convey to visitors the experience of Ukrainian pioneer life.

Ukrainian Democratic Agrarian party (Ukrainska demokratychno-khliborobska partiia, or UDAP). A conservative democratic nationalist party founded in Lubni, Poltava gubernia, in May 1917 as the Ukrainian Democratic party. Among the founding members were V. Andriievsky, M. Boiarsky, V. Chyhryn, L. Klymov, I. Korniienko, M. Makarenko, S. and V. Shemet, and V. Shkliar; M. Mikhnovsky, V. *Lypynsky, and D. Dontsov were prominent members. Its constituent congress in Lubni on 29 June 1917 was attended by 1,500 rich peasants and 20 landowning nobles. The UDAP adopted a program (written by Lypynsky) of Ukrainian national sovereignty and independence, the preservation of private property as the foundation of the national economy, the preservation of middle-sized landholdings, the resolution of the land question by a Ukrainian parliament on the basis of the mandatory state purchase of lands owned by the large landowners and the permanent leasing of parcels therefrom to the poor and landless peasantry, and an agrarian economy based on well-developed co-operatives. On 27 March 1918 a 200-man UDAP delegation lobbied the Central Rada and UNR Council of Ministers for the inclusion of UDAP members in the Rada, the repeal of the land-socialization law, and new elections to the Constituent Assembly of Ukraine. Because its demands were rejected, the UDAP welcomed Hetman P. Skoropadsky's coup d'état in April 1918. Later, however, it protested against the *Hetman government's reactionary and repressive policies and administrative abuses. At its second congress (Kiev, 26–28 October 1918) the UDAP was against Skoropadsky's declaration of federation with a non-Bolshevik Russia. It co-operated with, but did not officially vote in favor of joining, the anti-Hetman *Ukrainian National Union. In 1921 its émigré members (eg, S. Shemet, Lypynsky) helped to found the *Ukrainian Union of Agrarians-Statists.

R. Senkus

Ukrainian Democratic Alliance (Ukrainskyi demokratychnyi rukh). A political organization founded in New York in 1976 by the Ukrainian National Democratic Alliance, the Ukrainian Revolutionary Democratic party, and the Organization of Ukrainian Nationalists (Abroad). Its aims were to promote the development of the world Ukrainian community and to help the Ukrainian nation in its struggle for cultural and political rights. The alliance sought specifically to mobilize younger, highly educated Ukrainians of democratic persuasion who were not involved in established Ukrainian parties. Its first president was A. *Figol.

Ukrainian Democratic party (Ukrainska demokratychna partiia). A liberal democratic party that superseded the *General Ukrainian Non-Party Democratic Organization in 1904. Its members (V. Antonovych, V. Chekhivsky, O. Cherniakhivsky, Ye. Chykalenko, B. Hrinchenko, M. Komarov F. Matushevsky, M. Levytsky, V. Naumenko, T. Shteingel, I. Shrah, P. Stebnytsky, I. Steshenko, Ye. Tymchenko, S. Yefremov, and others) adopted a program calling for the overthrow of tsarist absolutism and its replacement by a constitutional democratic federation, Ukrainian autonomy, and the official use of Ukrainian in the schools, courts, public institutions, and government; a Ukrainian territorial diet would nationalize all land, transfer the ownership of industrial enterprises to the workers, and introduce an eight-hour workday, pensions for seniors and the handicapped, and a progressive tax system. Early in 1905 a left wing led by Hrinchenko left the party and founded the *Ukrainian Radical party. Both parties competed for support in the various local hromadas until they merged in December 1905 to form the *Ukrainian Democratic Radical party.

Ukrainian Democratic Radical party (Ukrainska demokratychno-radykalna partiia, or UDRP). A liberal nationalist party formed in Kiev in December 1905 out of the merger of the *Ukrainian Democratic and *Ukrainian Radical (URP) parties. It consisted primarily of members of the intelligentsia (eg, Ye. Chykalenko, P. Chyzhevsky, V. Domanytsky, B. Hrinchenko, M. Hrushevsky, M. Levytsky, F. Matushevsky, V. Shemet, I. Shrah, Ye. Tymchenko, A. Viazlov, F. Vovk, S. Yefremov) who were active in the Prosvita societies and the co-operative movement. The party adopted a revised version of the URP program, without the independence clause. Its organs were *Hromads'ka dumka, *Rada, and *Ridnyi kraj. Many members of the *Ukrainian caucus in the Russian State Duma (eg, three-quarters of the caucus in the Second Duma) belonged to the UDRP. In early 1908 the UDRP, many of whose members also belonged to the Russian *Constitutional Democratic party, fell apart, and most of its members joined the clandestine *Society of Ukrainian Progressives.

Moloda Ukraina, the magazine of the Ukrainian Democratic Youth Association

Ukrainian Democratic Youth Association (Obiednannia demokratychnoi ukrainskoi molodi, or ODUM). A youth association in the United States and Canada established in 1950 in New York. The group was composed initially of the children of postwar refugees from Soviet Ukraine who were adherents of or sympathetic to the *Ukrainian Revolutionary Democratic party. It under-

takes Ukrainian studies, sports, and performing-arts activities (it sponsors a number of dance, bandura, and music ensembles). With its centers of support in Ontario and the eastern United States, ODUM has a central committee and separate structures for each side of the border. It sponsors (since 1951) the monthly journal **Moloda Ukraina* and has had pages in the Ukrainian-American newspapers *Ukrains'ki visti* (Jersey City) and *Ukrains'ke zhyttia* (Chicago). It also owns summer resorts in Acton, New Jersey, and London, Ontario, that are commonly used for summer camps and performing-arts workshops. ODUM has a total membership (1980) of approx 1,000. It published a commemorative almanac in 1965.

The Ukrainian Diocesan Museum of Stamford

Ukrainian Diocesan Museum of Stamford (Ukrainskyi muzei v Stempfordi). A museum in Stamford, Connecticut, established in 1935 by Bishop K. Bohachevsky. Since that time it has collected and preserved Ukrainian artworks, folk costumes, and handicrafts and has amassed a library with over 20,000 volumes, including rare books and incunabula. The Lemko Museum is also located there. The museum is housed in the residence of Bishop B. Losten. Since 1964 the director has been W. *Lencyk.

Ukrainian Drama School (Ukrainska dramatychna shkola). The first drama school in Ukraine, a department of the *Lysenko Higher Institute of Music in Lviv. Directed by M. *Vorony with the participation of O. *Zaharov, it offered a two-year program and was active in 1922–5.

Ukrainian Economic Advisory Association. See Ukrainian National Credit Union Association.

Ukrainian Economic Bureau (Ukrainske ekonomichne biuro, or UEB). A research office set up by eight Ukrainian economists in Warsaw in 1932 to publish an an-

nual Ukrainian statistical compendium. They also set up the Mediator legal and commercial consulting firm, which supported the UEB. It published four statistical collections in 1933–8 in printings of 2,000 to 3,000. In 1936 the Shevchenko Scientific Society consented to lend its name to the publication.

Ukrainian Economic Council (Ukrainska ekonomichna rada). An economic planning and administrative organ, under the Council of People's Commissars of the Ukrainian SSR. It was established in September 1923. Its primary task was to co-ordinate the economic plans of the various commissariats and prepare overall plans for the entire republic. The council was disbanded in 1936 and renewed briefly in 1940–1.

Ukrainian Educational and Cultural Center (Ukrainskyi osvithno-kulturnyi tsentr). A community center established in Philadelphia in 1980 for the promulgation of Ukrainian culture and heritage. Under the leadership of O. Chernyk, the center has become the focus of nearly all communal cultural, social, and educational life for the Ukrainians of Greater Philadelphia. Among the center's most valuable programs are the Ukrainian Heritage (Saturday) School, with over 350 children; an extensive library; and the Ukrainian Social Services, which helps senior citizens, needy families, and newly arrived immigrants. Nearly 50 organizations of different kinds are housed at the center. Some are branches of the Plast Ukrainian Youth Association, the Ukrainian Youth Association (SUM), the Ukrainian Women's League, the Ukrainian Engineers' Society, the Ukrainian Medical Association, and the Ukrainian Professional Society. B. Zakharchuk is the current director of the center.

Ukrainian educational societies (Ukrainski osvithni tovarystva, or UOTs). Local Ukrainian societies for popular education and cultural work that were active in the Generalgouvernement in 1940–4. They replaced the Prosvita, Ridna Khata, and Kachkovsky societies, which had been banned by the German authorities. The UOTs were independent organizations with no direct organizational connections to one another. Their work, however, was coordinated at a regional level by a district Ukrainian relief committee (UDK), which in turn reported to the cultural department of the *Ukrainian Central Committee (UTsK), which was based in Cracow. The UOTs provided the only legal means of carrying out broad-based educational and cultural work for the general Ukrainian population. Only a UOT, for example, could sponsor a women's or a youth group.

UOTs existed in virtually every locality of the Generalgouvernement which had Ukrainian inhabitants. By early 1943 there were 4,000 UOTs with a combined membership of 230,000. A third of them had their own buildings, and there were 2,200 libraries, holding over 360,000 volumes (the figure would have been higher if many books had not been destroyed in 1939–41 during the Soviet occupation). The UOTs had 1,770 drama groups (which gave approx 7,350 performances) and 870 choral groups in addition to women's groups and youth sections, kindergartens, and adult literacy courses. The heads of the UOTs were usually young local peasants. The UOTs received assistance from the cultural department of the UTsK, which prepared programs and materials for them and offered leadership

training courses. The UDKs had permanent staffs who advised and helped co-ordinate the work of the UOTs. In many respects the UOTs resembled the prewar Prosvita societies.

After 1943 the activities of the UOTs declined as many of their leading figures were deported to Germany for forced labor or enlisted in the Division Galizien. With the second Soviet occupation of Galicia (and then Poland) in 1944, they ceased to exist.

V. Kubijovyč

Ukrainian Emigrant Aid Society (Tovarystvo opiky nad ukrainskymy emigrantamy). An organization founded in Lviv in 1925 to provide aid for and maintain contact with immigrants from central and eastern Ukraine. It published the magazine **Ukrains'kyi emigrant* (from 1927). By the early 1930s the society had offices not only in Lviv but also in Ternopil, Sambir, and Stanyslaviv as well as a network of circles throughout Galicia. As the number of emigrants shrank in the 1930s, the society's activity declined, and after the death of its only president, M. *Zaiachkivsky, in 1938, it was dissolved.

Ukrainian Engineers' Society in Lviv. See Ukrainian Technical Society.

Ukrainian Engineers' Society of America (Tovarystvo ukrainskykh inzheneriv Ameryky, or TUIA). A professional association of Ukrainian engineers, architects, and economists in the United States, established in 1948 to promote research and professional upgrading by means of scientific conferences, seminars, and publications. In 1990 the society had 30 branches, in the major cities of the United States. It is the largest of the constituent societies in the World Federation of Ukrainian Engineers' Societies (United States, Canada, Argentina, and Australia), which has over 1,500 members. With its head office in New York, the TUIA has standing committees on the technology and industry of Ukraine and on Ukrainian technical terminology. It has published the quarterly **Visti ukrains'kykh inzheneriv* since 1950 and *Biuletyn' TUIA* since the 1960s, as well as a number of separate publications, including a dictionary of selected terms and a history of the Ukrainian engineers' movement. Its presidents have been V. Bohachevsky, M. Lepkaliuk, P. Shokh, O. Tymoshenko, O. Balaban, R. Wolchuk, I. Zhukovsky, V. Ryzhevsky, R. Rohozha, R. Levytsky, M. Shul, E. Yarosh, P. Hrytsak, R. Halibei, V. Hnatkivsky, Ye. Ivashkiv, I. Mokrivsky, M. Boretsky, E. Zmyi, Yu. Bazylevsky, R. Havryliak (1989–91), and Yu. Honcharenko. With the *Society of Ukrainian Engineers and Associates in Canada, TUIA has organized international conferences of Ukrainian engineers. Particularly interested in automation and the use of Ukrainian in computer programming, TUIA sponsored a public conference on that theme in New York (1990) and initiated contacts and joint projects with the AN URSS (now ANU) Institute of Cybernetics and the Kiev Polytechnical Institute.

Ukrainian Evangelical Alliance of North America (Ukrainske yevanhelske obiednannia v Pivnichnii Amerytsi). A co-ordinating body of Ukrainian Presbyterian (Reformed) church congregations in North America. The group was formed in 1922 at an evangelical convention in Rochester, New York, in order to rejuvenate the flagging Evangelical movement, to combine forces in

The participants in the 1st convention of the Ukrainian Evangelical Alliance of North America (Rochester, 1922)

proselytizing efforts in North America, and to underline the Ukrainian character of the congregations represented so that they would not be lost in the milieu of the United church. It also resolved to undertake evangelical missionary work in Galicia, an action that imbued the new body with a stronger sense of purpose. The alliance's effort in establishing the *Ukrainian Evangelical Reformed church in Galicia, in fact, led to one of its greatest successes. It also arranged for the translation of the Bible into Ukrainian by I. Ohienko (later Metropolitan Ilarion). The first leader of the alliance was V. Kuziv. Other notable figures in it were P. Krat, I. Kovalevych, V. Borovsky, V. Kupchynsky and V. Bahrii. Since 1961 the alliance has published the bi-monthly *levanhel's'kyi ranok*.

Ukrainian Evangelical Baptist Union of Canada (Ukrainske yevanhelske baptystske obiednannia). A national religious organization established in 1959 in Winnipeg. Initiated and led (until 1972) by the pastor P. *Kindrat, the union brought together the Western and Eastern conferences of the Ukrainian Evangelical Baptist church. The union conducts radio programs, publishes *Khrystians'kyi visnyk* in Winnipeg, and is closely associated with the Ukrainian Bible Institute in Argentina.

Ukrainian Evangelical Church of the Augsburg Confession (Ukrainska Yevanhelsko-Avgvsburgska Tserkva). A Lutheran church active in Galicia during the interwar period. It was established in 1925 under the guardianship of the German Evangelical superintendent for Galicia, with its headquarters in Stanyslaviv (now Ivano-Frankivske). It made some inroads in the Ternopil region and Volhynia and had over 20 parishes, with nearly 5,000 faithful and 16 preachers, by the outbreak of the Second World War. The official organ of the church was the monthly *Stiah*, and its major figures included I. Shebets and T. Yarchuk (who later perished in a Soviet prison). It was disbanded by the Soviet authorities following the annexation of Western Ukraine.

Ukrainian Evangelical Reformed church (Ukrainska Yevanhelsko-Reformovana Tserkva). An Evangelical church active in Galicia during the interwar era. Formed in 1925 through the missionary efforts of the *Ukrainian Evangelical Alliance of North America, the church had its consistory in Kolomyia. In spite of efforts to attain organizational autonomy, it never attained official recognition by Polish authorities and was forced to remain affiliated first with the Ukrainian Evangelical Church of the Augsburg Confession and then with the Evangelical Reformed Church of Poland. By the outbreak of the Second World War the church consisted of 35 congregations, with 17

Leaders of the Ukrainian Evangelical Reformed church in Western Ukraine in 1922. First row, from left: Roman Didenko, Ivan Vynnychuk, Rev Mykola Zhurakovsky, Supt Stefan Skerski, Rev Lev Buchak, Rev Pavlo Krat, Roman Kvasniuk; back row: Rev Volodymyr Borovsky, Rev Petro Yaremko, Rev Teodosii Dovhaliuk

preachers and approx 5,000 adherents, and published the monthly **Vira i nauka*. Among its notable leaders were V. Kuziv, P. Krat, V. Fediv, and V. Borovsky. The church was liquidated by the Soviet authorities after the annexation of Western Ukraine. A number of its pastors were arrested and incarcerated; others fled to the West or joined the Russian Orthodox church.

Ukrainian Federative Democratic party (Ukrainska federatyvno-demokratychna partiia). A minor conservative party founded in December 1917 by former members of the Old **Hromada* of Kiev, among them V. Naumenko, B. Kistiakovsky, I. Kviatkovsky, I. Luchytsky, and V. Ihnatovych. Their program for the transformation of the Russian Empire into a federation of autonomous lands and their passive opposition to Ukrainian independence won them little support, and the party had virtually no impact on revolutionary events in Ukraine.

The coat of arms of the Ukrainian Former Combatants in Great Britain

Ukrainian Former Combatants in Great Britain (Obiednannia buvshykh voiakiv ukrainsiv u Velykii Brytanii, or ObVU). An organization of veterans, mainly from the First Division of the **Ukrainian National Army*, established in 1949 in London to perpetuate Ukrainian military traditions and soldierly brotherhood. It had a membership of 4,850 divided among 52 branches in 1952–

3, before many of its members departed for North America. Its structure stabilized in 1965–6, when there were 47 branches with 718 members. In 1989 there were still 47 branches (as well as an affiliate in Spain and six postings), albeit with a greatly reduced membership. In the 1950s the organization was strongly involved with sports; in the 1960s and 1970s it concentrated more on military studies.

From its beginnings ObVU devoted effort and resources to care for the chronically ill, the disabled, and war amputees. It also looked after military cemeteries in Austria and Italy. It has published 2 almanacs, 13 books, a number of anthologies, commemorative cards, brochures on history and military affairs, and V. Kubijovyč's *Etnichni hrupy Pivdennozakhidn'oi Ukraïny* (Ethnic Groups of Southwestern Ukraine, 1953). From 1955 to the early 1970s ObVU sponsored the military journal *Surmach*. In 1959 it assisted in establishing the Ukrainian Officers' Club and later the Ukrainian Former Combatants' Council. It also established Ukrainian branches of the British paramilitary Home Guard in Edinburgh, Bolton, and Manchester (1953–7). The association has been headed successively by M. Dliaboha, M. Bily-Karpynets, B. Mykytyn, and S. Fostun.

C. Zelenko

The seals of the Ukrainian Workingmen's and Ukrainian Fraternal associations

Ukrainian Fraternal Association (Ukrainskyi bratskyi soïuz, or UFA). A fraternal insurance association founded on 25 October 1910 in Scranton, Pennsylvania, as the Ruthenian National Association (Ruskyi narodnyi soïuz). Its founders (42 delegates from 34 branches) were former members of the Ruthenian National Association, which at its 11th Convention in Cleveland in 1910 had adopted the resolution to change its name to the Greek Catholic Ruthenian Association (Hreko-Katolytskyi ruskyi soïuz) and to limit membership to Catholics. This resolution was eventually overturned, but in the interim two organizations with the same (Ukrainian) name came into being. In 1918 the new association changed its name to the Ukrainian Workingmen's Association (Ukrainskyi robotnychy soïuz), and in 1978 to the UFA.

The UFA has always been a democratic, nondenominational, all-Ukrainian organization, initially with an anti-clerical and radical orientation based on the ideas of M. Drahomanov and I. Franko. Its leaders have been politically active in the larger Ukrainian community, and played a decisive role in combating communist influence among Ukrainians in both the United States and Canada. They organized the first all-Ukrainian congress in America (1915), supported the Federation of Ukrainians in the United States, provided the core of support for **Oborona*

The main building of the UFA resort, Verkhovyna, in Glen Spey, New York

Ukrainy, and helped found the Ukrainian Congress Committee of America, the United Ukrainian American Relief Committee, and the World Congress of Free Ukrainians.

Besides meeting its basic duty of paying out insurance to families of deceased members and assisting disabled or unemployed members, the UFA (through its educational committee) has organized Ukrainian schools, orchestras, and drama groups at its branches and has financed publications, bookstores, and libraries. It published the newspapers *Shersten'* (1910) and *Narodna volia* (1911–) in Ukrainian, the English-language weekly *Ukrainian Life* (1941–3) and illustrated quarterly **Forum* (1967–), annual calendars or almanacs (1912–51), and popular books. Over the years it has disbursed over 300,000 dollars in scholarships. The head office and editor's office are housed in the association's own building in Scranton. In 1955 it purchased the Verkhovyna resort in Glen Spey, New York, where it conducts summer camps, cultural workshops, annual art festivals (since 1976), and sports competitions. In the interwar period the UFA offered financial aid to various institutions in Ukraine, including the All-Ukrainian Academy of Sciences in Kiev, the Ukrainian Workers' Home in Lviv, the Union of Ukrainian Progressive Youth, the Ridna Shkola society, and Prosvita reading halls.

From 1,800 members in 1910 the association grew to 6,800 in 1920, 15,800 in 1930, 19,100 in 1950, and 24,200 in 1960. In 1990 the group's membership stood at 22,000, and its assets came to approx 13 million dollars. Since 1932 it has recruited members in Canada.

The presidents of the UFA, elected at its quadrennial conventions, have been J. Ardan (1910–12), M. Semeniuk (1912–13), I. Artymovych (1913–16, 1922–5), O. Zaplatynsky (1916–19), Yu. Kraikivsky (1919–22, 1925–7), P. Duchak (1927–33, 1941–6), M. Sichynsky (1933–41), A. Batiuk (1946–73), and I. Oleksyn (1973–). Other important leaders of the association include M. Belia, O. Lenchytsky, S. Korman, T. Mynyk, E. Popil, and R. Rychok.

BIBLIOGRAPHY

Iuvileina knyha Ukrain's'koho robotnychoho soiuzu, 1910–1960 (Scranton 1960)

Ukrainian Fraternal Society of Canada (Ukrainske tovarystvo vzaiemnoi pomochi v Kanadi). A mutual benefit society founded by members of the Ukrainian National Home Association in Winnipeg in November 1921. In

1925 it obtained a Dominion charter and began to organize branches across Canada. Incorporation in 1943 has enabled it to offer a wide variety of life insurance plans. Among its leaders have been I. Trach, M. Stechishin, T. Dowhanyk, T.D. Ferley, J.H. Syrnick, and S. Radchuk. Intended initially to be a nonpartisan association, the society has maintained an informal affiliation with the Ukrainian Orthodox Church of Canada.

Ukrainian Free Academy of Sciences. See Ukrainian Academy of Arts and Sciences.

Ukrainian Free Cossacks (Ukrainske vilne kozatstvo, or UVK). An émigré military and educational society established in Munich in 1923 on the model of the Free Cossack units of Ukraine. The founder and first otaman of the UVK was I. *Poltavets-Ostrianytsia, who viewed the Cossacks as a paramilitary force. Branches of the organization were established in other European émigré centers. After 1946 the makeup of the group changed as new branches sprang up in the DP camps of Austria and Germany and then in Ukrainian communities overseas. Today the UVK has 39 branches (*kurenii*) in eight countries (*palanky*). Since 1947 it has published the magazine *Ukrains'ke kozatstvo*, which in 1968–80 appeared quarterly. It prints historical and literary materials about the Cossacks and their traditions. The society's other otamans have included I. Birchak-Voloshyn, Gen M. Omelianovych-Pavlenko, I. Voloshyn, P. Tereshchenko, I. Tsapko (1952–67), V. Diachenko, A. Kushchynsky, P. Korshun-Fedorenko, M. Kovalsky, and V. Riznyk.

Ukrainian Free Society of America (Ukrainska vilna hromada Ameryky, or UVHA). An ideological organization in the United States set up in 1949 by those members of the *Oborona Ukrainy society who rejected a pro-Soviet policy and remained committed to Ukraine's independence. In the 1950s some socialists among the new immigrants joined the society. The UVHA published the journal **Vil'na Ukraina* (1954–70s) on an irregular basis, I. Makukh's valuable memoirs *Na narodnii sluzhbi* (In the People's Service, 1958), and the Politycho-naukova biblioteka (Political Science Library), a book series of over 30 works in 19 issues. In the 1970s the society dissipated. Its presidents included V. Dovhan, V. Lazechko, and I. Palyvoda. The group had close ideological ties with the Ukrainian Workers' League in Canada.

Ukrainian Free University (Ukrainskyi vilnyi universytet, or UVU). An institution devoted to the development of Ukrainian scholarship and postsecondary studies free of the political influences dominating Ukraine, inaugurated on 17 January 1921 in Vienna. It emerged through the initiative of the *Union of Ukrainian Journalists and Writers Abroad, the *Ukrainian Sociological Institute, and the Society of Friends of Education in Vienna and was to work parallel with the *Lviv (Underground) Ukrainian University. The initiative was supported by professors of former Austrian universities, who influenced its formation along traditional lines. O. *Kolessa was its first rector, and his traditionalism in education won out over the project of a people's university, put forward by M. Hrushevsky.

The faculty in the UVU's initial stages consisted of 12 professors and 3 lecturers. Initial enrollment was low (90 students) because the principal centers of Ukrainian emigration at the time were Prague and other Czechoslovak

Rectors of the Ukrainian Free University to 1986. Top row, from left: Oleksander Kolessa, Stanyслав Dnistriansky, Ivan Horbachevsky, Fedir Shcherbyna, Dmytro Antonovych, Andrii Yakovliv; middle row: Serhii Shelukhyn, Oleksander Mytsiuk, Ivan Borkovsky, Rev Avhustyn Voloshyn, Vadym Shcherbakivsky, Ivan Mirchuk; bottom row: Yurii Paneiko, Mykola Vasylyv, Oleksander Kulchytsky, Vasyl Oreletsky, Yurii Blokhyn, Volodymyr Yaniv

locales. The founders hoped to tap the potential in the Czechoslovak Republic for students and for financial support for the institution, which did not exist in Vienna. As a result of the efforts of V. *Starosolsky, the dean of the Faculty of Law, in conjunction with his association with J. *Nečas and the president of the Czechoslovak Republic and active supporter of Slavic studies T. *Masaryk, the UVU was relocated to Prague. Official negotiations of this transfer were carried out by Kolessa, S. *Dnistriansky, and the premier of the Czechoslovak Republic, J. Černý.

The Czechoslovak government guaranteed financial assistance (including scholarships for students) and the right to use the resources of Charles University. The UVU was also officially recognized by the Ministries of Foreign Affairs and Education (16 and 30 September 1921). Upon its transfer the university was limited to two faculties, philosophy and law. This structure has remained in place to this day.

In 1921–2 the faculty was expanded to include 16 professors, 4 docents, and 1 lecturer. By 1931 it had expanded to include 39 members. Enrollment had increased from the initial 702 to 874 by 1922–3, and many students studied at both the UVU and Charles University. As the first Ukrainian postsecondary institution in Prague, the UVU became the center of Ukrainian academic life in the Czechoslovak Republic, the point of departure for many postsecondary institutions, academic institutes, and scientific societies. Every rector of the UVU also served as head of the governing *Ukrainian Academic Committee. By the late 1920s the UVU's library had expanded to include 10,000 titles, and its press had issued 27 monographs. The latter included jubilee anthologies in honor of Masaryk and three collections of the faculty's works.

In the 1930s the institution underwent a crisis, because the Czechoslovak government's rapprochement with the Soviet Union and Poland resulted in limitations on the rights given to Ukrainian political émigrés. Saved from

dissolution through the efforts of its rector, I. *Horbachevsky, the UVU's financial resources forced it to cut back on publishing. Other difficulties arose because of a decline in enrollment, which fell to 61 in 1939. Some hope was rekindled when *Carpatho-Ukraine was granted autonomy in 1938.

After the partition of the Czechoslovak Republic the UVU was placed under the jurisdiction of the new, German rector of Charles University. Enrollment rose when students began arriving from the rest of the *Generalgouvernement (107 in 1940–1). As a result V. *Kubijovyč, head of the *Ukrainian Central Committee, secured monthly grants and financing for the institution's press. In the final stages of the UVU's stay in Prague, the faculty consisted of 20 professors, 10 docents, and 3 lecturers. In 1921–41, 37 doctorates in philosophy and 95 in law were conferred.

In the years 1921–45 the rectors were Kolessa (1921–2, 1925–8, 1935–7, 1943–4), Dnistriansky (1922–3), Horbachevsky (1923–4, 1931–5), F. *Shcherbyna (1924–5), D. *Antonovych (1928–30, 1937–8), A. *Yakovliv (1930–1, 1944–5), O. *Mytsiuk (1938–9, 1940–1), I. *Borkovsky (1939–40, 1941–3), and Rev A. *Voloshyn (1945). The institution's Prague period came to an end when the city was occupied by Soviet forces in May 1945. Yakovliv handed over the rectorship to Voloshyn (who believed in continuing activities in Czechoslovakia), and together with most of the faculty emigrated westward. Voloshyn's hopes proved illusory. He was arrested, and died in prison; the UVU was liquidated, and its assets plundered.

The building of the Ukrainian Free University in Munich

Through the initiative of V. *Shcherbakivsky and a group of scholars of the Ukrainian Scientific Institute in Berlin (including its director, I. *Mirchuk) the UVU was re-established in Munich in 1946. Its faculty was expanded to include émigré scholars from central and eastern Ukraine. In 1947 the faculty consisted of 44 professors, 16 lecturers, and 18 teaching assistants. The highest level of enrollment (493) was reached in 1947–8. The revival of the UVU was funded by donations from the Ukrainian Publishing House in Cracow and the Congregation of the Eastern Churches (gathered by Bishop I. *Buchko, who became the UVU's curator). Instruction continued in law and philosophy, as did publishing, which focused primarily on the printing of textbooks and original manuscripts (27 titles by 1950). In 1946–56, 206 doctorates and 103 mas-

ters degrees were conferred. On 16 September 1950 the Bavarian Ministry of Education and Religion officially recognized the UVU as a private university.

The monetary reforms in Germany, instituted in June 1948, complicated the financial status of displaced persons and prompted the emigration of professionals and students to North America. This course of events had a negative impact on the UVU, whose enrollment declined to 272 in 1949 and 137 in 1950. Classroom instruction was cut back sharply, and eliminated altogether in 1956. The UVU sought to compensate for this curtailment by establishing the Institute for Correspondence Education, establishing firmer ties with former faculty members in institutions in Canada, France, and the United States, and fortifying its publishing house. In 1957 it began publishing the journal *Zapysky Ukraïns'koho vil'noho universytetu*.

O. Kulchytsky of the UVU and others established the *Association for the Advancement of Ukrainian Studies in 1962, and the new association gave rise to greatly improved conditions for the institution. Yu. *Blokhyh (rector) was able to reintroduce classroom instruction in 1965, and V. *Yaniv (rector), to expand it further, to include summer and winter courses in general Ukrainian studies, pedagogy, basic linguistics, and Eastern European studies in English (in co-operation with Michigan State University). The faculty increased from 56 members in 1965 to 92 in 1990. Most members live outside of Munich but participate in summer instruction. In the years 1968–81, 1,585 students, from 17 countries, enrolled in UVU programs. The large increase in enrollment was made possible by the acquisition of a building for the university in 1974 with funds from a donation made by Cardinal Y. *Slipy, the expansion of a foundation in Canada and the United States, and contacts with non-Ukrainian scholars.

Between 1972 and 1989 the UVU organized 189 conferences, including a commemorative conference on H. Skovoroda held in co-operation with universities in Germany, France, and Austria. Contacts with Belarusian, Bulgarian, Czechoslovakian, Jewish, and Polish academics proved particularly important. The UVU also held numerous art exhibitions.

In all, the UVU has published 230 works since it established operations in Munich. In the years 1966–89 it conferred 116 doctoral and 44 masters degrees. In 1981 the Institute for the Study of Nationalities Problems was established, headed by Z. Sokoliuk.

Notable members of the UVU faculty have included the historians D. Doroshenko, B. Krupnytsky, O. Ohloblyn, N. Polonska-Vasylenko, and A. Zhukovsky; the geographers V. Kubijovyč and S. Rudnytsky; the philologists O. Horbach, O. Kolessa, J. Rudnyckyj, G. Shevelov, and S. Smal-Stotsky; the scholars in philosophy D. Chyzhevsky, O. Kulchytsky, I. Mirchuk, and V. Yaniv; the ethnographers Z. Kuzelia and V. Petrov; the art historians D. Antonovych and V. Zalozetsky-Sas; the church historians V. Bidnov, M. Chubaty, and O. Lototsky; the jurists S. Dnistriansky, O. Eikhelman, R. Lashchenko, L. Okinshevych, Ya. Padokh, V. Paneiko, V. Starosolsky, and A. Yakovliv; and the economists Ye. Glovinsky, O. Mytsiuk, and V. Timoshenko.

The rectors of the UVU since 1946 have been V. Shcherbakivsky (1946–7), I. Mirchuk (1947–8, 1950–5, 1956–61), Yu. *Paneiko (1948–50, 1961–2), M. *Vasylyv (1955–6), O. Kulchytsky (1963), V. *Oreletsky (1964, 1966–8), Yu. Blokhyh (1965–6), V. Yaniv (1968–86), T. *Ciuciura (1986–92), and P. Goy (since 1992).

Ukrainian Galician Army (Ukrainska halytska armiiia [UHA]). The regular army of the Western Ukrainian National Republic (ZUNR), known as the Galician Army (Halytska armiiia). It was formed around a nucleus consisting of the Legion of Ukrainian Sich Riflemen and other Ukrainian detachments of the Austro-Hungarian army, which recognized the authority of the *Ukrainian National Rada and took part in the *November Uprising in Lviv in 1918.

The UHA was a well-organized and disciplined force. It was established as a regular army of the ZUNR by the law of 13 November 1918 on compulsory military service, which empowered the State Secretariat for Military Affairs (DSVS) to divide the country into military districts, to define an organizational structure for the army, and to call up Ukrainian males between the ages of 18 and 35 for military duty. Three military regions (Lviv, Ternopil, and Stanyslaviv) were introduced, each consisting of four districts (covering five to eight counties). The military commander of each district was responsible for recruitment, training, and combat readiness.

Until 9 June 1919 all military affairs of the ZUNR came under the jurisdiction of the DSVS, which was divided into a chancellery and 16 departments, and was headed initially by Col D. Vitovsky (to 13 February 1919) and then by Col V. Kurmanovych. With the installation of the Dictatorship of the Western Province of the Ukrainian National Republic, the functions of the DSVS were transferred partly to the Military Chancellery, directed by Lt Col K. Dolezhal, and partly to the Supreme Command of the Ukrainian Galician Army (NKHA).

The NKHA was set up in November 1918 in Lviv. Its chief, the UHA supreme commander, was appointed by the head of the Ukrainian National Rada and later by the dictator of the Western Province. All UHA units at the front came under its command; all other UHA units came under the district commands, and ultimately under the DSVS. When the DSVS was abolished, the NKHA assumed responsibility for supplies and training. The supreme commanders of the UHA were Col D. Vitovsky (29 October–5 November 1918), Col H. Kossak (to 9 November), Col H. Stefaniv (to 10 December), Brig Gen M. Omelianovych-Pavlenko (to 9 June 1919), Maj Gen O. Hrekov (to 5 July), Brig Gen M. Tarnavsky (to 7 November), and Brig Gen O. Mykytko (to 10 February 1920). The chiefs of the General Staff included Col M. Marynovych (to 5 November 1918), Maj S. Goruk (to 10 December), Col Ye. Myshkivsky (to 12 February 1919), Col V. Kurmanovych (to 7 June), Col A. Schamanek (to 7 November 1919, and 10 February–1 March 1920), and Gen G. Ziritz (to 10 February 1920).

The Supreme Command of the Ukrainian Galician Army (Khodoriv, 1919). Sitting, 5th through 7th from left, Gen Mykhailo Omelianovych-Pavlenko, Col Viktor Kurmanovych, Otaman Alfred Schamanek

The territory controlled by the UHA was divided into 13 military districts of four or five counties each: Berezhany, Chortkiv, Drohobych, Kolomyia, Lviv, Peremyshl, Rava Ruska, Sambir, Sokal, Stanyславiv, Stryi, Ternopil, and Zolochiv. The commands of the districts, which grew out of military committees established in November 1918, were responsible for security and public order in the army's rear. They conducted drafts, trained draftees and organized them into infantry units, and protected government property.

The first regular UHA units were joined by worker and student detachments, which sprang up spontaneously to resist the Polish underground in Lviv and the Polish army invading Galicia. By December 1918 the Galician Army consisted of combat groups of different strength and profile – regular, semi-insurgent, and insurgent. The strongest were the Navariia, Stare Selo, and Skhid groups operating around Lviv. On the northern border of the ZUNR the Northern Group under Col O. Mykytenko was organized to repel the Polish offensive. The oblast command in Stryi, under Col H. Kossak, took charge of the groups that sprang up on the western front, including the Komancha, Liutkiv, Staryi Sambir, Hlyboka, Krukenychi, Rudky, South I, and South II groups. They did not form a continuous front and were rarely in contact with the NKHA or with each other. At the beginning of December 1918, when Gen M. Omelianovych-Pavlenko took command of the Galician Army, it numbered 30,000 officers and men, half of whom were combat-ready.

In December 1918 all field units were brought under the NKHA, and in January–February 1919 they were organized into three corps, each consisting of four brigades. A brigade generally had three to six infantry battalions (sometimes merged into two regiments), a cavalry company, a field artillery regiment with four to six batteries, a sapper

company, and communications, auxiliary, and support groups. The First Corps, based in Kaminka-Strumyl'ova and commanded by Col O. *Mykytka, consisted of the Sokal, Rava, Uhniv, and Yaniv brigades. The Second Corps, based in Bibrka and commanded by Col M. Tar-navsky, included the First Brigade of the Ukrainian Sich Riflemen and the Kolomyia, Third Berezhany, and Zolochiv brigades. The Third Corps, based in Stryi and commanded by Col H. Kossak and then Gen M. Gembachiv, encompassed the Lviv (initially named the Seventh Stryi Brigade), Sambir, Mountain, and Stryi (formed out of the Krukenychi and Hlyboka groups) brigades. The basic combat unit was the kurin (51 on the Polish front, 48 on the Soviet front), consisting of four companies (*sotni*), which were in turn divided into platoons (*choty*).

In June 1919 the UHA at its maximum strength numbered 70,000 to 75,000 men, including reserves. Its proportion of officers to men was very low, only 2.4 percent. To overcome the shortage of staff and higher officers, non-Ukrainian specialists of the Austrian-Hungarian army and officers of the UNR Army were recruited. To train young officers three infantry schools, an artillery, and a communications cadet school were set up in Galicia, and one infantry and artillery school in central Ukraine.

The bulk (67 percent) of the combat force was infantry. Each kurin had a machine-gun company. About 10 percent of the soldiers belonged to artillery units, with 58 batteries on the Polish front and 47 on the Soviet front. The Galician Army also had two or three armored cars and two armored trains. Cavalry did not play an important role, because the DSVS preferred the tactics of positional warfare. On Gen O. Hrekov's recommendation a cavalry brigade and regiment were set up in June and July 1919 with a total of 1,340 sabers. The first air force unit was organized by Capt P. Franko in Krasne. With the help of former pilots of the Russian

army, a flying regiment under Col B. Huber (later under Col D. Bulat Kanukov) was formed. Until April 1919 the UHA had an advantage in the air over the Polish forces, but it lost it as the Polish strength increased (150 Polish planes vs 40 Ukrainian). Four of the nine sapper companies were attached to the corps and five to the brigades. The companies were formed and trained by the reserve sapper kurin in Chortkiv, which was reorganized into a technical kurin under K. Kiziuk's command. Communications specialists were trained in Stanyslaviv. Each corps had two to five field hospitals and sanitary trains. Because of a severe shortage of medical personnel and supplies, medical care deteriorated quickly, and by the end of 1919 the army fell victim to typhus.

In the *Ukrainian-Polish War in Galicia (1918–19) the UHA scored some victories against the numerically stronger and better-equipped Polish forces. After the *Chortkiv offensive it retreated across the Zbruch River and joined up with the UNR Army to take part in the *Ukrainian-Soviet War. Reduced by typhus to a mere 5,000 combat-ready men, the UHA accepted absorption into the Red Army and became the *Red Ukrainian Galician Army. Having been thrown into battle against the Poles, its First Brigade was defeated and captured; its Second and Third brigades deserted the Red Army and allowed themselves to be disarmed by the Poles. By the end of April 1920 the UHA had ceased to exist.

Ukrainian Geographical Society (Ukrainske heohrafichne tovarystvo). An organization of professional and amateur scientists engaged in theoretical and applied research in geography. Its purpose is to co-ordinate geographical research and training, improve geographical education in high schools and postsecondary institutions, and popularize geographical knowledge. The society originated in 1947 as a branch of the Geographical Society of the USSR, which evolved from the Imperial Russian Geographical Society (est 1845). In 1958 it was reorganized into the Geographical Society of the Ukrainian SSR and placed under the jurisdiction of the Academy of Sciences in Kiev. In 1987 it had over 8,000 members grouped in 33 chapters throughout Ukraine. Its work was divided among 17 sections, specializing in such areas as physical geography, economic geography, cartography, paleo-

geography, geomorphology, meteorology and climatology, hydrology, medical geography, remote sensing, high-school geography, regional studies, tourism, and speleology. The society held scientific meetings and conferences, published collections of scientific papers, organized exhibitions of geographical publications and maps, and participated in organizing geographical contests for high-school students. In the absence of an institute of geography it played an important role in linking the many specialists in the field, but it did not participate as a separate entity in international geographical conferences or the congresses of the International Geographical Union. In 1990 the society asserted its independence from the all-Union geographical society and changed its name to the Ukrainian Geographical Society.

I. Stebelsky

Ukrainian Geological Administration (Ukrainske heolohichne upravlinnia). The chief government agency in charge of geological research and prospecting in Ukraine from 1918 to 1957. Its history goes back to the Ukrainian Geological Committee, which was formed in Kiev in 1918 on the initiative of V. *Luchytsky. The administration introduced a program of systematic geological surveying and mapping and published the first geological maps of Soviet Ukraine. Its prospecting work led to the development of many mineral deposits, such as coal, iron, titanium, nickel, and potassium salts. As part of the economic reforms of 1957 the Chief Administration for Geology and the Protection of Underground Resources was established under the Council of Ministers of the Ukrainian SSR, and the Ukrainian Geological Administration was reorganized into the Kiev Geological Administration, which was renamed the Kiev Geological Prospecting Trust in the subsequent year.

Ukrainian Girls' Institute in Peremyshl (Ukrainskyi institut dlia divchat u Peremyshli). A secondary school for young women, supported by private funds, in which education was provided in Ukrainian. It was opened in 1895; in 1903 the higher grades of the institute were transformed into a *lyceum, and in 1920 into a *gymnasium. The school, which boasted the first forced central air heating in Eastern Europe, a tennis court, a large library, and a massive three-story building that is still in use today, was the fruit of private initiative and fund-raising efforts. It was founded by Ukrainian parents and Ukrainian Catholic clergy who wanted to provide Ukrainian women with the opportunity to acquire a secondary education to prepare them for admission to university or teacher training institutes. The school accommodated about 200 boarders, and another 50 or so day students. It employed female and male faculty members and prided itself on progressive educational approaches, which included sports, foreign languages, and sciences. The school was closed down by Soviet authorities in 1939.

Ukrainian Gold Cross (Ukrainskyi zoloty khrest, or UZKh). A humanitarian relief and educational organization of Ukrainian women in the United States. Founded in New York in 1931 as the women's auxiliary of the *Organization for the Rebirth of Ukraine (ODVU), it was renamed the Ukrainian Red Cross of the ODVU (1933) and incorporated in 1940 as the Ukrainian Gold Cross. In the interwar period UZKh provided help to Ukrainian war invalids

and political prisoners in Polish-ruled Western Ukraine, and in 1938–9 sent supplies of food, clothing, and medicine to Carpatho-Ukraine. In 1940 it opened an office under O. Nyzhankivsky in Leysin, Switzerland, to help Ukrainian detainees in French and Swiss internment camps. After the war UZKh helped Ukrainians in DP camps and sponsored immigrants to the United States. In 1967 it set up a special Defense and Relief Committee to help Ukrainian political prisoners and their families in the USSR. The Ukrainian Gold Cross has also organized nurseries, summer camps for boys and girls, and exhibits of Ukrainian art and handicrafts. It grants scholarships to needy students in the United States and South America. It is a founding member of the United Ukrainian American Relief Committee, the World Federation of Ukrainian Women's Organizations, and the World Congress of Free Ukrainians. Besides publishing its own page in *Natsionalist* (1936), *Ukraina*, and *Zhinochyi svit* and its own bulletin (1975–), it has published collections of O. Teliha's poetry (1977) and H. Cherin's humorous sketches (1974). The presidents of UZKh have been A. Hladun (1931–6, 1950–4), A. Sereda (1936–8), S. Halychyn (1938–40), M. Lechytska (1940–9), A. Levkut (1949–50), P. Riznyk (1954–8), M. *Kvitkovska (1958–82), and N. Ivaniv (since 1982–). A history of UZKh was published in 1981.

Ukrainian Greek Orthodox Church of Canada. See Ukrainian Orthodox Church of Canada.

Ukrainian Gymnasium in Chernivtsi (Ukrainska himnaziia v Chernivtsiakh). Founded in Chernivtsi in 1896 as the Ukrainian counterpart of the German-language gymnasium in the city, the institution provided Ukrainian-language instruction in all areas of study and had a predominantly Ukrainian staff. By 1913 it had 560 students and 34 teachers. After the Rumanian occupation of Bukovyna the gymnasium was Rumanianized. The name was changed in 1922 from the Ukrainian State Gymnasium to the Fourth Gymnasium, and in 1930 it became the Liceul Marele Voievod Mihai. In 1925–7 Rumanian became the language of instruction, and after 1927 even Ukrainian language courses were canceled. After the Soviet occupation of Bukovyna the gymnasium was turned into a *10-year school. Some of the notable figures who taught at the gymnasium were A. Artymovych, A. Klym, M. Korduba, V. Kmitykevych, Yu. Kobyliansky, and M. Ravliuk.

Ukrainian Gymnasium in Czechoslovakia (Ukrainska himnaziia v Chekhoslovachyni). Founded in Prague in 1925 on the initiative of the *Ukrainian Higher Pedagogical Institute. In 1926 it received official sanction as a realgymnasium, on the model of the Czech gymnasium system. In 1927 it was relocated to Řevnice, and in 1938 to Modřany, near Prague. In 1937–8 the gymnasium had 185 students and 33 faculty members. It had a dormitory which housed the majority of its students, who came mainly from Transcarpathia. It remained open until 1945. The directors were Ya. Yarema, A. Artymovych, I. Kobyzky, M. Khliur, H. Omelchenko (from 1936), and A. Shtefan (from 1940). A collection of articles (ed V. Maruniak) about the gymnasium was published in 1975.

Ukrainian Helsinki Group (aka Ukrainian Civic Group for Promoting the Implementation of the Helsinki

The 1928–9 report of the Ukrainian Gymnasium in Czechoslovakia

Accords; Ukrainian: Ukrainska helsinkska hrupa, or Ukrainska hromadska hrupa spryannia vykonanniu Helsinksykh uhod). A human rights committee founded on 9 November 1976 in Kiev by M. *Rudenko (head), O. *Berdnyk, P. *Grigorenko, I. *Kandyba, L. *Lukianenko, M. *Marynovych, M. *Matushevych, O. *Meshko, N. *Strokata, and O. *Tykhy. Its purpose was to monitor the implementation of the human rights provisions of the Helsinki Accords, signed in August 1975 by 33 European states, the United States, and Canada: freedom of conscience, the free flow of information, and freedom of travel. Although the USSR, not Ukraine, signed the accords, the provisions were binding on the Soviet authorities and could be used as a basis for demands for individual and national rights in Ukraine.

The group assumed three principal tasks: to monitor the implementation of the accords in Ukraine, to gather and disseminate information about their violation, and to secure an independent role for Ukraine in subsequent negotiations and in international affairs. In its memoranda and open letters to international agencies the group pointed out violations of human and national rights in Ukraine and showed how the people's aspirations for independence were being suppressed. It gave voice to the Ukrainian people's demands for political, cultural, and social freedom within the framework of the Soviet legal system.

In February 1977 the authorities began to arrest the group's members. Within two years all the founding members were tried and sentenced to imprisonment for 7 to 10 years and to exile. In defiance of the crackdown new members joined: V. Kalynychenko, Yu. Lytvyn, M. Melnyk, V. Ovsienko, V. Striltsiv, P. and V. Sichko, and P. Vins. In 1979 V. Chornovil, O. Heiko-Matushevych, M. Horbal, Z. Krasivsky, Ya. Lesiv, V. Malynkovych, P. Rozumny, S. Shabaturo, I. Sokulsky, V. Stus, and Y. Zisels became members. Early that year political prisoners in various labor camps declared their membership: S. Karavansky, O. Popovych, V. Romaniuk, B. Rebyrk, I. Senyk, Yu. Shukhevych, and D. Shumuk. In 1983 the Estonian M. Niklius and the Lithuanian V. Petkus, both political prisoners, were accepted into the group. The new groups were punished promptly: in 1979–80 O. Berdnyk, V. Chornovil, O. Heiko-Matushevych, M. Horbal, V. Kalynychenko, Z. Krasivsky, Ya. Lesiv, Yu.

Lytvyn, V. Ovsienko, P. Rozumny, P. and V. Sichko, and V. Stus were given sentences of 2 to 10 years' imprisonment, sometimes on trumped-up criminal, not political, charges. In 1978 the group's *Informatsiynyi biuleten'* began to appear. It was reprinted by the Smoloskyp publishing house in the United States in 1981, and the first two issues were translated into English.

By 1983 the group had 37 members, of whom 22 were in prison camps, 5 were in exile, 1 (M. Melnyk) had committed suicide, 3 had been released and were living in Ukraine, and 6 had emigrated to the West. Three members of the group subsequently died in concentration camps: O. Tykhy (1984), Yu. Lytvyn (1984), and V. Stus (1985).

In 1979 the Foreign Representation of the group was established in the United States under the leadership of P. Grigorenko (to 1987) and then M. Rudenko. N. *Svitlychna, who joined the group in the United States, edited *Visnyk represii na Ukraini*. The Committee of Helsinki Guarantees for Ukraine, headed by A. Zvarun, was established in November 1976 in the United States. It staged a number of demonstrations at the Helsinki review conferences in Belgrade (1977), Madrid (1980), and Vienna (1986), demanding the inclusion of Ukraine in the Helsinki process and defending the imprisoned members of the Helsinki Group. The Helsinki Committee of the Ukrainian Congress Committee of America, the World Congress of Free Ukrainians, and Americans for Human Rights in Ukraine were particularly active in attracting international attention to the group.

In 1987–8, during the period of Perestroika and Glasnost, all imprisoned members of the group were released. Upon their return to Ukraine they revived the organization and elected a new leader, L. Lukianenko. They changed the group's name to the Ukrainian Helsinki Association (Ukrainska helsinska spilka) and they expanded it into a broad civic union. On 7 July 1988 they issued the Declaration of Principles of the new association and published its statutes. The goal of the association was to promote democratic reform in Ukraine and to achieve economic and political sovereignty for Ukraine.

In the succeeding year the association revised its program and activities. It became involved in the elections to the USSR Supreme Soviet and to the Ukrainian Supreme Soviet. It organized large demonstrations against repressive laws and measures and participated in organizing the *Popular Movement of Ukraine. Its branches in various parts of Ukraine established their own newspapers: *Holos vidrodzhennia* in Kiev, *Ekspres-khronika Ukrain's'koho visnyka*, *Informatsiynyi biuleten'*, and *L'viv's'ki novyny* in Lviv, *Informatsiynyi biuleten'* in Kharkiv, and *Vil'na dumka* in Volhynia. When the 1990 elections in Ukraine opened up new opportunities for political competition, the association was dissolved and replaced by the Ukrainian Republican party.

Ukrainian Hetman Organization of America. See United Hetman Organization.

The seal of the Ukrainian Higher Pedagogical Institute

Ukrainian Higher Pedagogical Institute (Ukrainskyi vysokyi pedahohichnyi instytut im. M. Drahomanova). A pedagogical school in Prague, founded in 1923 by the Ukrainian Citizens' Committee. It received financial support from the Czechoslovak government and trained teachers for elementary and extramural education. In 1925 it increased the program of study from two to four years and in addition began training teachers for secondary schools. The institute had departments of literature-history, mathematics-sciences, and, from 1924, choral music. The faculty consisted of 78 members. Over the period of its existence the institute graduated 178 students, most of whom went on to teach in schools in Transcarpathia. In 1924 a gymnasium was attached, which in 1925 became the *Ukrainian Gymnasium in Czechoslovakia. The institute's publication activity consisted of 44 course outlines, 3 volumes of the journal *Pratsi* (1929–33) put out by its own publishing house, Siiach, and 11 other works published by the Ukrainian Publishing Fund in Prague. In 1933 the Czechoslovak government cut off funding, and the institute was forced to close. The rectors of the institute were L. *Biletsky, V. *Simovych, and V. *Harmashiv.

Ukrainian Higher School of Economics (Ukrainska ekonomichna vysoka shkola, or UEVS). An institute of higher education established in Munich in 1945 by Ukrainian displaced persons. Its mandate, from the American military authorities, was to prepare cadres for government, co-operative, and private-enterprise posts. The program at UEVS lasted for eight semesters and consisted of 58 subjects and three seminars. Subjects were divided into 10 departments: accounting, national and private husbandry, statistics, geographical economics, trade, public and private law, sociology, and co-operative theory. Among the professors at UEVS were M. Velychkivsky, I. Vytanovych, S. Drahomanov, I. Zamsha, B. *Martos, M. Stakhiv, and Yu. Studynsky. The rectors of UEVS were B. Martos (1945–9) and M. Kosenko (1950–1). The UEVS was liquidated in 1951 as a result of financial restraints and the emigration of both potential students and professors. In the six years that it operated it graduated some 280 students, among them one with a doctorate in economics.

Ukrainian Historical Association (Ukrainske istorychne tovarystvo, or UIT). A society of Ukrainian historians in North America and Europe founded in 1965 with an initial membership of 45. Since its inception it has published the quarterly **Ukrains'kyi istoryk* and the book series *Istorychni monohrafiï* (Historical Monographs), *Istorychni studii* (Historical Studies), *Memuarystyka*

(Memoirs), *Ukraïns'ki vcheni* (Ukrainian Scholars), *Hrushevskiana*, and *Ukraïns'ko-zhydivs'ki vzaiemnyy* (Ukrainian-Jewish Relations). By 1990 the association had published approx 70 Ukrainian and English titles. It is particularly interested in source material in Ukrainian history deposited in Western archives and libraries. The UIT is a member of the American Historical Association and a participant in various American and Canadian learned conferences. It collaborates with the Ukrainian Academy of Arts and Sciences in the US and the Shevchenko Scientific Society. The presidents of UIT have been O. Ohloblyn (1965–81) and L. *Wynar (1981–).

The seal of the Ukrainian Historical-Philological Society

Ukrainian Historical-Philological Society (*Ukrainske istorychno-filolohichne tovarystvo*). A Ukrainian learned society founded in Prague in 1923 and affiliated with the Ukrainian Free University. It held semimonthly sessions featuring scholarly lectures and published offset editions of its members' essays and five volumes of its proceedings (1926–44). Its members participated in European Slavic conferences. Most of its approx 50 members were specialists in Ukrainian history or philology and worked as scholars and teachers in Czechoslovakia. Its president was D. *Antonovych (1923–45), and its prominent members included O. Kolesa, V. Bidnov, and S. Narizhny. The society was disbanded when the Soviet army occupied Prague and was revived briefly in Munich in 1946 under the leadership of V. Shcherbakivsky.

Ukrainian Hromada (*Ukrainska hromada*). A civic and cultural association established in Berlin in 1919 by Ukrainian emigrants, many of whom were prisoners from the Russian Imperial Army, supporters of the *Union for the Liberation of Ukraine, or members of Ukrainian diplomatic missions. It was initially a nonparty organization but subsequently became associated with the hetmanite movement. It was active throughout the 1920s and into the early 1930s and had over 6,000 members. Its official organs were *Nove slovo* (1920) and *Ukraïns'ke slovo* (1921–3). Among its leaders were B. Lepky and Z. Kuzelia (1924–33). It was revived under the auspices of P. Skoropadsky, and was active in 1940–5 as one of two Ukrainian organizations permitted by the German authorities (along with the Ukrainian National Alliance). It was headed then by B. Homzyn, and its official organ was **Ukraïns'ka diisnist'*. It was dissolved when Germany was occupied in 1945 by the Allied forces.

Ukrainian Hromada in Czechoslovakia (*Ukrainska hromada v Chekho-Slovachyni*). A cultural and educational organization of a nationalist profile established in 1927. Its membership was over 200 and consisted mostly

of veterans of the UNR Army and some Ukrainians from Transcarpathia. It had several branches and a head office in Prague. After the German occupation of Czechoslovakia in 1939, the Ukrainian Hromada merged with the Ukrainian National Alliance in Germany. The Hromada's president for the duration of its existence was M. Halahan.

Ukrainian Hromada in France (*Ukrainska hromada u Frantsii*). The first Ukrainian community-cultural organization to emerge in France after the First World War. It was established in 1924 in Paris, and its membership initially included émigrés of varying political and ideological leanings. Soon the Sovietophiles formed their own Union of Ukrainian Citizens in France (1925); the UNR supporters established the Union of Ukrainian Emigré Organizations in France (1926); and the nationalists founded the Ukrainian National Union in France (1932). Also known as the Shapoval Hromada, the UHF adhered to the political ideals of M. *Drahomanov and Mykyta *Shapoval. In the 1930s it had 22 branches, which sponsored reading rooms and Ukrainian language schools for children, with a membership of 600 to 1,200. The Hromada ceased its activities during the German occupation (1940–4) but revived after the war. It was headed successively by M. Kapustiansky (1924–9), Mykola Shapoval (1929–48), A. Shapoval (1948–53), I. Bodnar, and P. Turkevych. It published *Vistnyk ukrains'koï hromady u Frantsii* (1929–38, 68 issues), *Ukraïns'ka volia* (1938–9, 13 issues), and *Vistnyk* (1948, 3 issues). In 1976 the Hromada formally disbanded. That same year A. Zhukovsky wrote a brief history of the organization.

Ukrainian Hromada in Paris. See Circle of Ukrainians in Paris.

Ukrainian Hromada in Venezuela (*Ukrainska hromada u Venesueli*, or UHV; Spanish: *Asociación de Ucrucianos en Venezuela*). A cultural organization founded in Caracas on 13 March 1949 as the central organization representing the whole Ukrainian community in Venezuela (at that time approx 3,400 individuals). It was based in Caracas and had branches in Valencia, Puerto Cabello, and Maracay. The Ukrainian Women's Alliance in Venezuela, the Ukrainian Reading Hall, the Society of Ukrainian Engineers, and the Plast Ukrainian Youth Association were affiliated with the Hromada. The society ran a kindergarten and a Saturday school; organized concerts, plays, and dances; and built its own hall, the Ukrainian People's Home. Its presidents have been I. Lazarenko, L. Stakhovsky, V. Koval, V. Vasiuk, R. Prypkhan, Yu. Hrytsky, and I. Khomniak.

Ukrainian Husbandry Academy (*Ukrainska hospodarska akademiia*, or UHAK). A postsecondary school operating in Poděbrady, Czechoslovakia, from 1922 to 1935. It was founded by the *Ukrainian Civic Committee in Czechoslovakia, which was headed at the time by Mykyta Shapoval, and was financed by the Ministry of Foreign Affairs of the Czechoslovak Republic. The school's first constitution, which was approved by the Czechoslovak Ministry of Agriculture on 16 May 1922, defined an institution similar to Czechoslovak schools of higher learning. The UHAK consisted of three faculties subdivided into departments: (1) the faculty of agronomy and forestry, (2) the faculty of engineering, with departments of chemical-

The castle housing the Ukrainian Husbandry Academy

technology and hydrotechnology, and (3) the faculty of economics and co-operation, with departments of economics and statistics, and numerous co-operatives. Its supporting institutions included a library of 30,000 volumes, 33 special collections, 14 laboratories, several experimental farms, a tree farm, a meteorological station, and two training co-operatives. Most of these facilities were housed in the castle built by Jiří of Poděbrady (1420–71). The academy's three-year program led to an engineering degree and differed from the standard program in Czechoslovak schools only in offering courses in Ukrainian studies. In 1925 the program of study was extended to four years. The academy's program was overseen by the Ministry of Agriculture, its economic and administrative affairs by the Ministry of Foreign Affairs. The highest governing body of the UHAK was the Faculty Council and its presidium, consisting of the rector, prorector, and secretary of the council. The rectors were I. *Shovheniv (1922–5, 1926–7), B. *Ivanytsky (1925–6, 1928–35), and Serhii *Tymoshenko (1927–8).

In the first decade of its operation the school employed 118 teachers in total, 92 of whom were Ukrainians and 26 of whom were Czechs. At its peak (in 1928) the teaching staff numbered 96. Many of the faculty members were distinguished scientists, such as V. *Domanytsky and V. *Cherediiv (agronomists), B. Ivanytsky (forester), O. *Mytsiuk, V. *Sadovsky, and V. *Timoshenko (economists), S. *Borodaievsky and B. *Martos (co-operative organizers), F. *Shcherbyna (statistician), L. *Bych and O. *Eikhelman (jurists), O. *Bochkovsky (sociologist), and S. *Komaretsky (chemist).

The total enrollment over the years was 786, with a peak of 613 students in 1926–7. The student population was for the most part made up of Ukrainian émigrés. Most of the students were dependent on the government for financial assistance. A total of 559 students graduated with engineering degrees – 125 agronomists, 92 foresters, 58 chemical-technologists, 117 hydrotechnicians, and 167 economists. In the 1930s most of them worked in their professions in Western Ukraine.

The academy undertook a vigorous publishing program. It issued 698 scientific publications, including 229 books (of which many were the first technical higher education textbooks to appear in Ukrainian). The Terminological Commission worked to develop a consistent

Members of the last senate of the Ukrainian Husbandry Academy (1934). From left: Isaak Mazepa, Volodymyr Cherediiv, Leonid Frolov, Borys Ivanytsky, Olgerd Bochkovsky, Vasyl Ivanys, Mykola Dobrylovsky, Leonid Hrabyna, Hryhorii Shyianiv

Ukrainian technical terminology; in particular it published a German-Ukrainian forestry dictionary. Some 50 organizations, including 9 scientific and professional associations, sprang up at the academy.

In 1928, as financial support for the UHAK diminished, the Czechoslovak government ordered the academy not to admit any more new students and gradually to wind down its operation. In 1931 the Society of Friends of the Ukrainian Husbandry Academy (president, B. Matiushenko) was set up in Prague to save the academy. Enough funds could not be raised, and the academy closed in 1935. The society directed its efforts at the *Ukrainian Technical and Husbandry Institute, which had been established as a correspondence school at the academy in 1932.

Ukrainian Hygienic Society (Ukrainske hihienichne tovarystvo). An organization established in Lviv in 1929 to educate the community and improve the general level of hygiene. M. *Panchyshyn was the founding president and a patron of the society. With branches in most of the larger towns and circles in the smaller ones, the society organized popular lectures, exhibitions, first-aid courses, and courses for nurses and sanitary workers. It also published articles, leaflets, popular pamphlets, and the popular magazine *Narodne zdorovia* (1937–9). To improve the general level of health it maintained clinics, tuberculosis dispensaries, a tuberculosis sanatorium in Hrebeniv, sports and eugenics consulting centers in Lviv, and vacation facilities for young people, including a climate station in Pidliute. Its activities came to an end with the Soviet occupation of Galicia in 1939.

Ukrainian Institute for the Upgrading of Physicians (Ukrainskyi instytut udoskonalennia likariv). A

postgraduate medical education institution, until 1992 under the directorship of the Ministry of Health of the Ukrainian SSR. Established in 1923 in Kharkiv, it was reorganized in 1965 and subordinated to the All-Union Ministry of Health. The institute has faculties of internal medicine, surgery, pediatrics, and hygiene, 61 departments, and 2 laboratories, as well as a scientific society. In 1983, 500 physicians upgraded their qualifications there. Medical problems studied include arterial hypertension, arteriosclerosis, the diagnosis and treatment of malignant tumors, road accident traumas, and tissue degeneration. The institute has developed innovative procedures in the surgical treatment of spinal column disorders, the early diagnosis and treatment of tuberculosis in children and teenagers, and the treatment of wound infections, as well as improved noncorrosive materials for dentures and cryogenic treatment methods in stomatology. (See also *Kiev Institute for the Upgrading of Physicians.)

The Ukrainian Institute of America

Ukrainian Institute of America (Ukrainskyi instytut Ameryky). An educational and cultural foundation established in 1948 by W. *Dzus. Originally housed in the Parkwood Lakes estate at West Islip, Long Island, it was moved in 1955 to its present headquarters on 79th Street in Manhattan, a historical building owned previously by A. van Horne Stuyvesant. The institute collects and preserves works of Ukrainian artists, such as A. Archipenko, O. Hryshchenko, and H. Kruk; religious artifacts, such as icons and chasubles; patents of Ukrainian inventors; portraits of historical figures; and samples of folk art. Its library contains 22,000 volumes, and its Ukrainian Research and Documentation Center (est 1985) has an archival repository. The institute's cultural program includes concerts, lectures, art shows, and poetry readings. In the 1950s it granted prizes to artists and scholarships and loans to university students in addition to publishing a collection of M. Fomenko's songs titled *Ukrainian Youthful Melodies* (1957). In 1962 it had 26 individual and 17 association members. By 1988 it had 400 members. The presidents of the institute have included Dzus, T. Dzus (the founder's son), and W. Nazarewicz.

Ukrainian Institute of Marxism-Leninism (Ukrainskyi instytut marksyzmu-leninizmu, or UIML). A Party-sponsored educational and research institute in Kharkiv analogous to the Moscow-based Communist Academy. Its political patron was M. *Skrypnyk. The UIML arose out of the Ukrainian Institute of Marxism, which was established in November 1922 by a decision of the CP(B)U Organizational Bureau to train instructors in ideology for institutions of higher education. In 1924 its name was changed to the UIML. The institute was divided into three divisions – economics, history, and philosophy-sociology – each consisting of three departments. The economics department was headed by D. Naumov, the agrarian department by P. Liashchenko, and the co-operation and collectivization department by A. Lozovy. In the second division M. Yavorsky chaired the history of Ukraine department, H. Rokhkin the world history department, and S. Hopner the Party history department. The third division consisted of the philosophy department under S. Semkovsky, the sociology department under V. Yurynets, and the law department under Yu. Mazurenko. A special department on the nationality question was established in 1926 and headed by Skrypnyk. The institute's duties were expanded in 1925 to include not only the training of teaching cadres but also research.

The institute's prestige grew in the mid-1920s. Major Soviet political figures, such as N. Popov (1927–8), Skrypnyk (1928–30), and O. Shlikhter (1930–1), served as its directors. In 1923 its enrollment was 22. By 1931 it had 48 full members, 17 corresponding members, 29 research associates, and 165 graduate students. Beginning in 1927 the UIML published its own monthly, *Prapor marksyzmu-leninizmu*. From 1929 M. Yavorsky and V. Yurynets came under increasingly intemperate attack for Ukrainian nationalism, and the institute came to be portrayed as a hotbed of ideological heresy. Finally the CC CP(B)U ordered the UIML to be reorganized into a loose union of autonomous institutions called the *All-Ukrainian Association of Marxist-Leninist Scientific Research Institutes (VUAMLIN).

Ukrainian Institute of Modern Art (UIMA; Ukrainskyi instytut modernoho mystetstva). A nonprofit, tax-exempt, cultural institution in Chicago, founded in 1971 to promote and collect contemporary Ukrainian art. Its creation was initiated by A. Khreptovsky (its principal benefactor) and the sculptors K. Milonadis and M. Urban. Since 1974 the UIMA president has been O. Koverko. Since 1978 the UIMA has been housed in a reconstructed building containing an exhibition gallery. An addition housing the UIMA permanent collection was opened in 1980, and two new galleries were added in 1991. The first and only UIMA curator (until 1982) was V. Kachurovsky. Since 1982 the art collection and art exhibitions (approx five a year) have been curated by a committee (K. Milonadis, A. Diachenko-Kochman, A. Koverko, I. Kuchma, and I. Kobyletsky). The UIMA has sponsored solo exhibitions of works by émigré, Ukrainian-American, and Ukrainian-Canadian art-

Part of the permanent collection of the Ukrainian Institute of Modern Art

ists, such as A. Archipenko (1971), H. Kruk (1972), Milonadis (1973), Urban (1974), A. Hunenko (1974, 1982), R. Kostyniuk (1974, 1988), P. Kolisnyk (1975, 1987), I. Dmytruk (1975), M. Andriienko-Nechytailo (1976), J. Hnizdovsky (1978, 1985), Koverko (1979), A. Olenska-Petryshyn (1980), J. Solovij (1980), W. Pura (1984), Diachenko-Kochman (1985), W. Kurelek (1987), and Kuchma (1989). The UIMA has also published exhibition catalogs and some monographs, presented concerts of contemporary music, and organized literary readings and art lectures.

Ukrainian Institute of Sociology (Ukrainskyi instytut hromadoznavstva). An émigré institution founded in November 1924 in Prague on the initiative of members of the Ukrainian Sociological Society (est October 1923 in Prague). The institute had 33 full members and 15 corresponding members. The director and leading figure was Mykyta *Shapoval; when he died in 1932, the institute virtually ceased to exist. The institute included in its program of research, lectures, and seminars all branches of the social sciences; maintained a library of 8,000 volumes (2,500 were from Shapoval's private collection); ran the Ukrainian National Museum and Archives in Prague (est 1923); and organized the Ukrainian Workers' University, a correspondence school with over 30 courses and some 300 students (primarily émigré workers and peasants). The journal *Nova Ukraina* and the publishing house Vilna Spilka were associated with the institute. The institute published 46 studies and reports and the first Ukrainian sociological journal, *Suspil'stvo* (three issues, 1925-7), which contained contributions by Western Ukrainian sociologists.

Ukrainian Institute of Water-Management Engineers (Ukrainskyi instytut inzheneriv vodnoho hospodarstva). An institution of higher education under the jurisdiction of Ukraine's Ministry of Higher and Secondary Education. It was set up in Kiev in 1922 and was known until 1959 as the Kiev Tekhnikum of Engineering and Melioration. In 1959 it was moved to Rivne. It has 10 faculties and offers evening courses, correspondence courses, and a graduate program. Its library has 546,000 volumes (1983). In 1982-3 its enrollment was 9,300.

Ukrainian Institution of Trust in the German Reich (Ukrainska ustanova doviria v Nimetskomu Raikhu; German: Ukrainische Vertrauensstelle im Deutschen Reich). An agency established by the German government in 1938 to aid stateless Ukrainians in the Reich. With a head office in Berlin, it had branches in Vienna, Prague, and Łódź. The agency helped individuals, particularly migrant workers, to contact government institutions and obtain passports, visas, and temporary work permits and gave advice on various personal problems. Owing to its intervention almost 50,000 Ukrainian POWs were released. The agency also kept track of the activities of Ukrainian nationals. Similar agencies were established for other non-German groups, such as the Russians, Belarusians, and Caucasian peoples. The agency was headed by M. *Sushko until it was dissolved in April 1945.

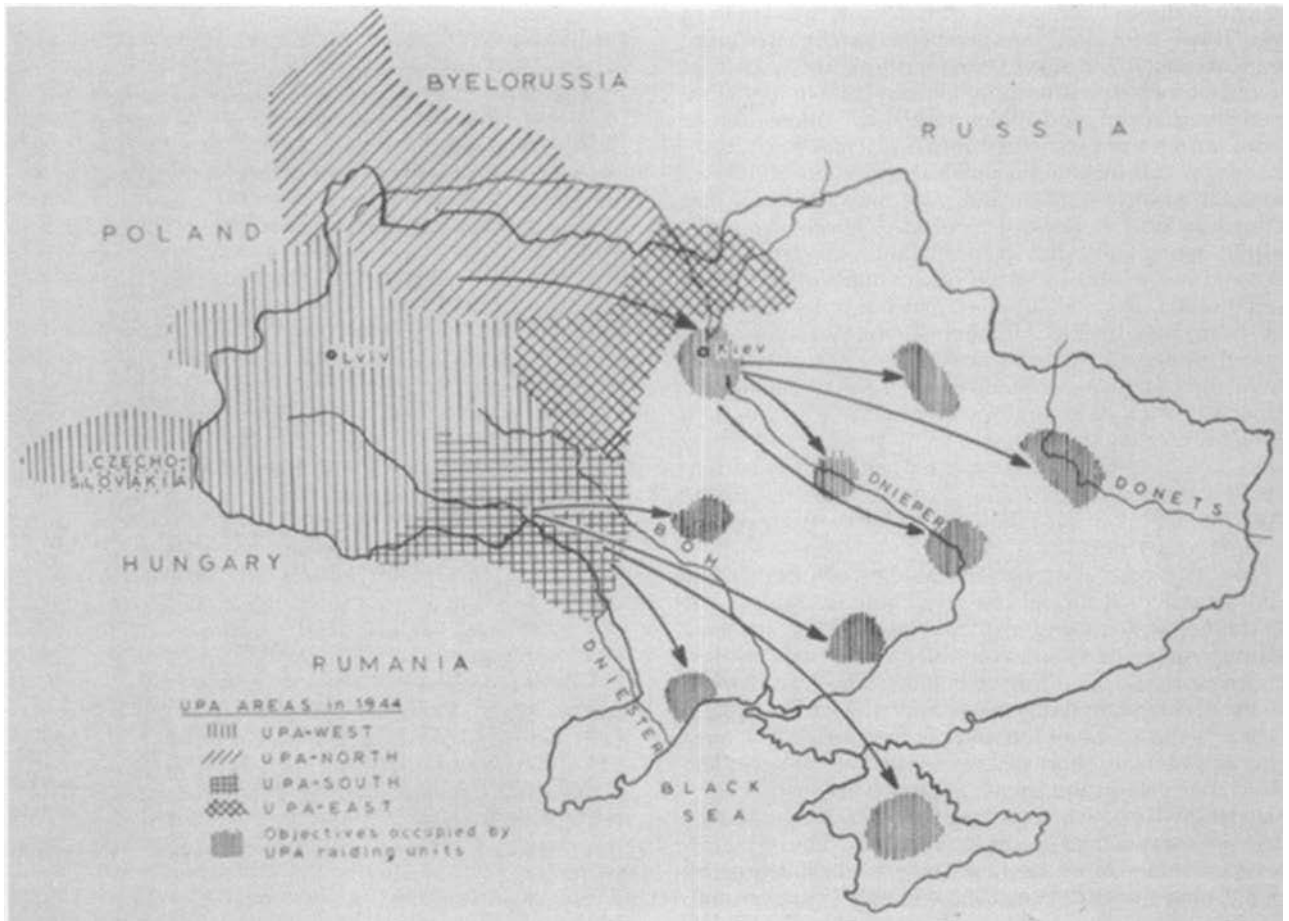

Ukrainian Insurgent Army (Ukrainska povstanska armiiia [UPA]). A Ukrainian military formation which fought from 1942 to 1949, mostly in Western Ukraine, against the German and Soviet occupational regimes. Its immediate purpose was to protect the Ukrainian population from German and Soviet repression and exploitation; its ultimate goal was an independent and unified Ukrainian state.

The first UPA units appeared in western Volhynia (now Volhynia and Rivne oblasts). They were organized independently by T. *Borovets (in spring 1942), the Bandera faction of the OUN (from October 1942), and the Melnyk faction of the OUN (in spring 1943). As resistance to the Germans intensified, the military forces of the Bandera faction grew rapidly and established their control over many districts of Volhynia. When talks on unification among the three groups failed, the most powerful group, the Bandera units, disarmed and absorbed the two other groups, in July and August 1943. K. *Savur, the leader of the OUN (Bandera faction) for northwestern Ukraine, became the commander in chief of the unified UPA.

German auxiliary police and guard units, composed not only of ethnic Ukrainians but also of other nationals who had served in the Red Army, defected to the UPA. The number of non-Ukrainian UPA soldiers grew rapidly, and peaked in the late fall of 1943. They were organized into separate national units, the largest of which were the Azerbaijani, Uzbek, Georgian, and Tatar. In the autumn of 1943 the UPA established a secret armistice with Hungarian units which guarded German communication lines in Volhynia. Recognizing the importance of national aspirations, the UPA organized on 21-22 November 1943 the Conference of the Oppressed Nations of Eastern Europe and Asia. It was attended by representatives of 13 nationalities, who resolved to support each other's liberation struggles.

Beginning in the summer of 1943, UPA units from the northwestern region conducted southward raids into Kamianets-Podil'skyi and Vinnytsia oblasts to undermine German control of this territory and to build up local insurgency forces. By the late autumn a new military grouping was consolidated under the command of V. *Kuk, the OUN leader for central Ukraine.

In the first two years of the German occupation the OUN used Galicia as a training and supply area for the UPA. When a successful recruitment drive for the Division Galizien was launched, in May-June 1943, and a large detachment of Soviet partisans led by S. Kovyapak made its way

AREAS WHERE THE UPA WAS ACTIVE

(reproduced from Yu. Tys-Krokhmaliuk, *UPA Warfare in Ukraine* [1972])

through Galicia into the Carpathian Mountains, in July 1943, the OUN decided to form military units in Galicia as well. Commanded by O. *Lutsky, these units were at first called the Ukrainian People's Self-Defense (UNS). As insurgent activity increased, the Germans placed Galicia under martial law, in October 1943. This only provoked stronger resistance.

A single command for all three regions of Ukraine, the Supreme Command of the UPA, was set up on or about 22 November 1943. The command consisted of the supreme commander and the Supreme Military Headquarters or General Staff, which was headed by the chief of staff (who was also the deputy commander) and was divided into six sections: operations, intelligence, logistics, personnel, training, and political education. Lt Col R. *Shukhevych was appointed commander in chief, and Maj D. Hrytsai became chief of staff. The original UPA in Volhynia was named officially the UPA-North, the insurgent units in central Ukraine became the UPA-South, and the UNS in Galicia was renamed the UPA-West. With Maj V. Sydor's appointment to commander of the new UPA-West in January 1944, the reorganization of the unified UPA was completed. Each of the three krajs of the UPA was subdivided into military districts. At the beginning of 1944 there were at least 10 districts in total: 2 in the UPA-North, 6 in the UPA-West, and 2 in the UPA-South. In 1945 each district was subdivided

Members of the UPA Levy company

into tactical sectors. Every district and sector had its commander and headquarters analogous to the General Staff. This territorial organization of the UPA remained unchanged during the active combat period until 1949. To broaden the social and political base of the armed struggle for Ukraine's independence, the Supreme Command of the UPA took the initiative in setting up the *Ukrainian Supreme Liberation Council (est 15 July 1944), which served as a provisional government expressing the political will of the insurgency movement.

The basic combat unit during most of the UPA's history was a company of 120 to 180 men. The standard UPA com-

pany had three platoons each with three squads (10 to 12 men armed with a light machine gun, two or three automatic weapons, and seven or more rifles). In 1943–5 most companies were organized into kurins (two to four companies per kurin), and under special conditions two or more kurins were combined into a *zahir*. A kurin commander's staff included a political-education officer, an adjutant, a sergeant major, and sometimes a chaplain and a medical doctor. Regardless of size, all combat units within one military district formed a group (*hrupa*). The UPA did not receive aid from other countries; weapons, ammunition, medical supplies, and uniforms had to be seized from the enemy. Although it deployed some cavalry and artillery units during 1943–4, the UPA was basically an infantry force. According to some German intelligence reports in 1944, its strength was 200,000. According to a Soviet source (1988), in 1944–6 some 56,600 UPA soldiers were killed, 108,500 were captured, and 48,300 surrendered voluntarily. According to UPA historians in the West, at its peak in 1944 the army had at least 25,000 and at most 40,000 men.

The UPA made use of two rank systems, a functional one and a traditional formal one (see *Military ranks). The functional system was instituted because of an acute shortage of qualified and politically reliable officers during the early stages of organization. Those who demonstrated leadership ability were appointed to command positions regardless of formal rank or training. The most critical leadership shortages were found at the lower levels, ie, the platoon and squad. Almost every district organized its own NCO school, lasting four to six weeks, but the demand for qualified squad leaders could not be met. A severe shortage of medical officers was alleviated partly by enlisting Jewish doctors, who willingly joined the anti-Nazi resistance. The UPA also ran formal officer candidate schools, which produced approx 690 graduates. (For the UPA's award system see *Military decorations.)

Publishing was usually the responsibility of the political-education section. The UPA printed journals, such as *Do zbroi* (1943) and *Povstanets*' (1944–6); newspapers; military textbooks; pamphlets for youth; and leaflets. Some military districts and tactical sectors published their own irregular periodicals (eg, *Shliakh peremohy*, *Chornyi lis*, and *Lisovyk*). The best-known contributors to the UPA press were Ya. Busel, P. Poltava, O. Diakiv, and the artists N. Khasevych and M. Chereshnovsky.

During 1943 the UPA staged some successful ambushes and battles against the Germans, establishing its control of the countryside in Volhynia and leaving only the towns in German hands. At the same time it cleared some of the region of Soviet partisans and expanded its power southward and eastward. In 1944 it fought its largest engagements with German and Soviet forces. Retreating German units were frequently ambushed for their weapons and supplies. German attempts to secure areas of the Carpathian Mountains in the summer of 1944 led to several pitched battles with the UPA-West. But the main threat to the UPA was the Soviet NKVD combat troops that arrived in the rear of the advancing Red Army with the special task of re-establishing Soviet power. In the winter of 1944 and spring of 1945 numerous ambushes, skirmishes, and large-scale battles occurred between NKVD forces and the *zahony* of the UPA-North and UPA-South. In February Gen N. Vatutin, Soviet commander of the First Ukrainian

The first issue of the UPA organ *Povstanets*', containing the UPA soldier's oath

Front, was mortally wounded in an ambush. On 24 April 30,000 NKVD troops encircled and fought 5,000 soldiers of the UPA-South near Hurby. Modifying its tactics according to experience, the UPA gradually dispersed its larger units and operated mostly with companies which held specific territories and staged occasional propaganda raids into uncontrolled areas or neighboring countries. The first large-scale NKVD offensive against the UPA was conducted in the winter of 1944–5 in the Carpathian region. The UPA managed to preserve its control of the countryside and scored successful attacks against Soviet administrative centers and garrisons. With the ending of the war the returning Red Army divisions were turned against the UPA in the summer of 1945. The results were disappointing to the Soviet regime, but its offer of amnesty to soldiers surrendering by 20 July 1945 appeared more successful. Many men evading induction into the Red Army gave themselves up. The UPA used this opportunity to send home some discouraged or disabled soldiers. By 1949 there were at least four more amnesty calls.

The 'Great Blockade' in the Carpathians from January to April 1946 was the only successful Soviet offensive against the UPA. Special contingents of NKVD troops were stationed in all the towns and villages, and mobile combat units scoured the forests. Denied food and shelter, and forced to fight on the march at extremely low temperatures, the UPA experienced casualties of 40 percent. The Supreme Command decided to demobilize most combat units and ordered their surviving members to continue the struggle underground. The UPA command structure

A radio-communications station of the UPA-North

(krai, military district, and tactical-sector headquarters), however, continued to function.

The demobilization order did not apply to the forces of the Sixth Military District – the Sian Division of the UPA-West – which operated in Ukrainian ethnic territories that were annexed by Poland after 1944. The division defended the Ukrainian population from forced deportations to the USSR in 1945 and 1946. Having reached an understanding with the Polish Home Army, it conducted several joint operations against Polish security forces. On 28 March 1947 Gen K. Swierczewski, the deputy defense minister of Poland, was killed in an ambush by the Lemko Company under Lt S. Stebelsky ('Khrin'). In the spring and summer

Women soldiers of the UPA

of 1947 the Polish authorities staged Operation Wisła, in which the remaining Ukrainian population was deported by force to other parts of Poland. UPA battle losses went up sharply, and the surviving units were ordered either to cross into the USSR or to march across Czechoslovakia to West Germany. Remnants of Company 95, led by Lt M. Duda ('Hromenko'), reached West Germany on 11 September 1947.

Some UPA units continued to operate in 1948 and 1949 in the Carpathian Hoverlia Military District. They were usually composed of two platoons of two squads each, and had a total strength of 30 to 50 veteran noncommissioned officers. Except for two units, they were demobilized at the end of the summer of 1948. On 3 September 1949, R. Shukhevych ordered the command structure and the remaining combat units to be deactivated, and their members to be transferred to the underground network. After Shukhevych's death (5 March 1950) the underground continued the armed struggle under V. Kuk's ('Koval's') leadership until 1954.

Ukrainian Insurgent Army, Former Members of the (Obiednannia kolyshnikh voiakiv UPA). A veterans' organization formed in Toronto in September 1966 out of a union of the Former Members of the UPA in the United States (est 1955 in New York) and the Former Members of the UPA in Canada (est 1951 in Toronto). Its purpose is to cultivate the military traditions of the UPA, to inform the West of Ukraine's struggle for independence, and to support the liberation struggle in Ukraine. The association (1981) has six branches in the United States and five branches in Canada. It has published several books about the UPA and military theory and a veterans' page in *Homin Ukrainy*, in addition to copublishing the magazine **Visti kombatanata* (1961–) and the documentary collection **Litopys UPA* (The UPA Chronicle, 1976–). Its presidents have included O. Gerega, M. Chuiko, P. Mykolenko, Ya. Strutytsky, M. Ripetsky (1983–6), M. Bokhno (1986–9), M. Kovalchyn (1986–9), and L. Futala (1989–92).

Ukrainian Invalids' Aid Society (Ukrainske tovarystvo dopomohy invalidam u Lvovi). An association set up in Lviv in 1922 to help invalid veterans of the Ukrainian Galician and the UNR armies. It assumed some of the tasks that until then had been performed by the social welfare section of the Ukrainian Citizens' Committee. In 1937 it had 2,016 registered clients, 434 of whom received regular monthly assistance. Others received less frequent aid. The society owned a large building in Lviv and ran a work-

shop employing invalids. For many years its president was I. Gyzha. The society was disbanded under Soviet rule.

Ukrainian Journalists' Association Abroad (*Spilka ukrainskykh zhurnalistiv na chuzhyni*). An organization of Ukrainian émigré journalists formed in June 1946 in Dillingen, Germany. Its original membership of about 100 declined gradually, to about 50 in 1954. Its presidents were S. Baran, M. Livytsky, M. Konovalets, D. Andriievsky, V. Stakhiv, Z. Pelensky, V. Shtelen, and M. Styranka. The association ceased its activities after 1986.

Ukrainian Journalists' Association of America (*Spilka ukrainskykh zhurnalistiv Ameryky*, or SUZHA). A professional organization founded in 1952 in New York to promote the interests of Ukrainian journalists. Consisting largely of émigré journalists, the association organized writing competitions, debates, and lectures and offered scholarships to students specializing in journalism. Together with a similar organization in Canada it formed (1966) the Federation of Ukrainian Journalists of the United States and Canada, which later founded the World Federation of Ukrainian Journalists. In 1967 the first federation began to publish a semiannual magazine, *Ukrain-s'kyi zhurnalist*. The SUZHA has published a collection of materials on two of its conventions (1969) and Yu. Ternopil'sky's *Ukrains'ka presa z perspektyvy ii 150-richchia* (The Ukrainian Press from the Perspective of Its 150th Anniversary, 1974). By 1976 it had 130 members. The association's presidents have included L. Myshuha (1952–8), R. Kupchynsky (1958–61), I. Kedryn (1964–7), M. Dolnytsky (1967–76), and O. Kuzmowych (1976–80). The organization has not met since 1980, when it failed to elect a new president, and has been in a process of decline.

Participants at the 2nd congress of the Ukrainian Journalists' associations of America and Canada (Toronto, 1966)

Ukrainian Journalists' Association of Canada (*Spilka ukrainskykh zhurnalistiv Kanady*, or SUZHK). A professional organization founded in Toronto in 1957 to promote the interests of Ukrainian journalists. In 1976 it had 90 members. To attract younger members it set up a youth section and provided scholarships to students of journalism. It has organized writing competitions, discussions, beauty pageants, and lectures. In 1966 it joined with its counterpart in the United States to form a federation, which published the semiannual *Ukrains'kyi zhurnalist* (1967–76). The presidents of SUZHK have been V. Solo-

nynka, M. Sosnovsky, V. Levytsky-Sofroniv, O. Matla, N. Ripetsky, M. Lypovetsky, and V. Didiuk.

Ukrainian Labor party (*Ukrainska trudova partiia*, or UTP). A political party consisting largely of Ukrainian co-operators, established in Kiev on 18 October 1917. The UTP was ideologically similar to the Ukrainian Party of Socialist Revolutionaries. It was led by F. Kryzhanivsky, who was its representative to the Central Rada (where he was vice-president) and Little Rada, and later participated in the Ukrainian National Union. The UTP was a small and relatively insignificant party; it ceased to exist in 1918.

Ukrainian Labor party (*Ukrainska trudova partiia*, or UTP; also Labor Party, Ukrainian People's Labor party). Formerly the *National Democratic party, it was inaugurated as the UTP at a party congress on 28 March 1919 in Stanyslaviv. The UTP maintained its predecessor's basic profile and personnel. It was the strongest Galician party in the Ukrainian National Rada and the General Secretariat of the Western Ukrainian National Republic (ZUNR). Ye. Petrushevych and members of his government belonged to the UTP. Its publications included the dailies *Dilo*, *Ukrains'ka dumka* (1920), and *Ukrains'kyi vistryk* (1921) as well as the weekly *Bat'kivshchyna*. The People's Committee of the UTP protested against the Treaty of Warsaw (1920) between the UNR government and Poland, which acknowledged Poland's claim to Galicia, as well as against the Peace Treaty of Riga (1921). The UTP protested Polish rule in Ukrainian lands on the ground that it was a foreign occupation, and recognized the ZUNR government-in-exile under Ye. Petrushevych. On 21 May 1923 the National Congress of the UTP protested against the 14 March ruling of the Conference of Ambassadors, which recognized Poland's control over Galicia. The reaction to that decision resulted in the UTP's split into three factions. The first, the so-called independent group (under Ye. Evyn, Rev O. Stefanovych, and others), rejected any attempt to harmonize Ukrainian-Polish relations and continued its support of Petrushevych. It published *Nash prapor*. The second, more influential group centered around the paper *Dilo* and stressed its independence from émigré government centers, particularly that of Petrushevych, who was moving politically to Sovietophilism. The third, nationalist faction, headed by S. Pidhirsky, D. Paliiv, and V. Kuzmowych, broke away altogether from the UTP and founded the Ukrainian Party of National Work. The split was not final. In 1924, talks took place between the groups regarding the consolidation of Ukrainian political forces, and the factions were reunited on 11 July 1925 as the *Ukrainian National Democratic Union.

V. Kubijovyč

Ukrainian Labour-Farmer Temple Association (*Tovarystvo ukrainskyi robitnycho-farmerskyi dim*, or ULFTA). A nationwide Canadian pro-Communist organization active in the interwar era. Established in Winnipeg in March 1918 as the Ukrainian Labour Temple Association on the basis of a recently completed Ukrainian labor hall, the group built upon and expanded the network of organizations encompassed by the *Ukrainian Social Democratic Party of Canada. It obtained a Dominion charter in 1924, and in 1925 expanded its name to underline its desire to develop further in rural areas. Membership grew to

Delegates at the 5th convention of the Ukrainian Labour-Farmer Temple Association (Winnipeg, February 1924). Second row, 4th through 8th from left: Ivan Navizivsky, Danylo Lobai, Matthew Popovich, Myroslav Irchan, William Kolisnyk

2,650 in 88 branches in 1929 and to approx 10,000 in 201 branches (with 113 labor temples) in 1939. The association also developed women's and young people's sections; initiated and maintained a close affiliation with the *Workers' Benevolent Association and the Society for the Aid of the Liberation Movement in Western Ukraine; and operated an active publishing house, whose newspapers and journals included **Ukrains'ki robotnychi visti*, *Robotnytsia*, *Svit molodi*, and *Farmers'ke zhyttia*. The activities of ULFTA worked in tandem with an overriding political connection to the *Communist Party of Canada through the Communist-dominated ULFTA leadership. The group faced a major organizational crisis in 1935, when a group of ULFTA stalwarts led by D. *Lobai broke ranks over the issues of the ULFTA's bolshevization, the man-made famine in Ukraine, and the disappearance of two former ULFTA cultural activists, M. *Irchan and I. Sembai, during the Stalinist purges. Leading figures in the ULFTA included M. Popovich, M. Shatulsky, I. Navizivsky (J. Navis), and I. Boychuk (J. Boyd). The ULFTA was closed down under wartime regulations by Order in Council on 4 June 1940. It was succeeded in 1946 by the *Association of United Ukrainian Canadians.

Ukrainian language. See Language, Ukrainian.

Ukrainian Language Association (Tovarystvo plekannia ridnoi movy). An organization established in Winnipeg in 1964 to promote the proper use of Standard Ukrainian among Ukrainians in the West. The society's presidents have been C. Bida (1964–71), J. Rudnyckyj (1971–9, 1982–8), and O. Woycenko (1979–82). The society has had representatives in the United States (G.Y. Shevelov, P. Kovaliv), Australia (O. Pavlyshyn, P. Hrin, T. Babii), New Zealand (V. Krekhovets), Argentina (Ye. Onatsky, O. Bunii), Venezuela (V. Vasiuk, I. Polisky), and

Brazil (O. Borushenko, M. Kusa). Its official organ is the annual **Slovo na storozhi*, edited by J. Rudnyckyj.

Ukrainian Language Education Centre (ULEC). A center established in Edmonton at the University of Alberta by the *Canadian Institute of Ukrainian Studies in June 1987. Endowed by the Ukrainian Professional and Business Club of Edmonton and the Government of Alberta, ULEC has dealt primarily with publishing a Ukrainian language series (*Nova*) for grades 1 to 12 in the Ukrainian-English bilingual education program. ULEC works in partnership with the Department of Education in Alberta, which sponsored the development of the series with some assistance from the province of Manitoba. ULEC also sponsors methodology workshops for teachers of the Ukrainian language. The center houses a library of print and audiovisual Ukrainian-language educational materials. ULEC also has a mandate to facilitate research in the area of bilingualism. The predecessor of the center was headed by O. Bilash, the originator of the *Nova* series. The co-ordinators of ULEC have been A. Biscoe (1987–9) and M. Petryshyn (1989–).

Ukrainian Law Society (Ukrainske pravnyche tovarystvo). An organization of Ukrainian lawyers, judges, and jurists founded in Kiev in May 1917. The president was V. Voitkevych-Pavlovych, and the vice-president was R. Lashchenko; other prominent members included H. Vovkushivsky, A. Viazlov, A. Yakovliv, M. Tkachenko, M. Korchynsky, and I. Shrah. The society was dissolved in 1920 after the Bolsheviks occupied Kiev. A branch of the organization existed in Poltava (1917–19).

Ukrainian Law Society (Ukrainske pravnyche tovarystvo). An organization of Ukrainian lawyers and jurists founded in 1922 in Prague to continue the work of the society with the same name that had existed in Kiev in 1917–20. It sponsored academic lectures and conferences and published R. Lashchenko's monograph on Lithuanian law and the text of *Ruskaia Pravda*. At its height in 1933, it had over 60 members, many of whom were teachers and professors of various Ukrainian higher schools in Czechoslovakia. It also included some corresponding members in Transcarpathia. The society's presidents were R. Lashchenko (1922–9), A. Yakovliv, K. Losky, and S. Dnistriansky. The society ceased functioning during the Nazi occupation.

Ukrainian Lawyers' Association. See Association of Ukrainian Lawyers.

Ukrainian Learned Educational Society (Ukrainske naukove osvittnie tovarystvo, or UNOT). An association in Belgium for promoting Ukrainian education and scholarship. It was founded in Brussels in 1947 as a section of the Ukrainian Relief Committee and in 1950 was reorganized into an independent organization. Its activities included the operation of Ukrainian Saturday schools and the publication of scholarly works in Ukrainian and French. Its presidents were Rev M. Hermaniuk, P. Zeleny, D. Andrievsky, I. Vytyaz, Rev B. Kurylas, and Rev I. Kit (1978–).

Ukrainian Liberation Army (Ukrainske vyzvolne visko). The common name for various German auxiliary

military units formed from among Ukrainian POWs interned by the Germans on the eastern front in 1941–3. The first units of this kind were created in the fall of 1941 by the Wehrmacht front commands and were used in the rear, in the Kharkiv region and the Donbas. They were usually organized as companies and were called *Hilfswillige*. A. Hitler ordered the Ukrainian units disbanded (but allowed units made up of Caucasian and Central Asian nationals). But as the Wehrmacht's manpower shortage became more acute, the army expanded its recruitment program, and by the end of 1942 it had about 300 so-called eastern battalions, 74 of which consisted mostly of Ukrainians. In 1944 there was an attempt to regroup these units into the Ukrainian Liberation Army, but they were never brought under a central command, and the name was used by the Wehrmacht largely for propaganda purposes. The total strength of all these units in 1945 was estimated at 75,000.

Ukrainian Liberation Front (Ukrainskyi vyzvolnyi front, or UVF). A coalition of community, youth, women's, and cultural organizations associated with the Bandera faction of the OUN. It incorporates approx 50 member groups in Great Britain (Association of Ukrainians in Great Britain and others), France (Union of Ukrainians in France), Belgium (Ukrainian Relief Committee), Germany (Ukrainian Youth Association [SUM]), Australia (League for the Liberation of Ukraine), Argentina (Prosvita society), Canada (Canadian League for Ukraine's Liberation), and the United States (Organization for the Defense of Four Freedoms for Ukraine), as well as representations in other countries. The combined membership of these groups is estimated at up to 30,000. They were formally organized as the World Ukrainian Liberation Front (SUVF) in 1973. A head office for the group was then established in Toronto. The SUVF has been headed by R. Malashchuk, B. Fedorak, and M. Andrukhiv. It is a member of the Anti-Bolshevik Bloc of Nations.

Ukrainian Library Association of America (Ukrainske bibliotekne tovarystvo Ameryky, or UBTA). An organization of Ukrainian-American professional librarians. Until 1974 it was called the Association of Ukrainian Librarians of America (TUBA). Its founding conference was held in Cleveland in 1961 on the initiative of B. Wynar, R. Kos, and O. Danko. The association's presidents were S. Volyniak (1961–3), R. Weres (1963–70), D. Shtohryn (1970–4), V. Luchkiv (1974–7), R. Drazniowsky (1977–9), and M. Kravchuk (from 1979). Its organs were the irregular *Biu-leten' TUBA* (1962, 1965, 1969), an internal bulletin (from 1971), and the bibliographic quarterly **Ukrains'ka knyha* (1971–82). In 1971 the association created the Ukrainian Bibliographical Reference Center (directed by Weres) at the Ukrainian National Museum in Chicago. It also co-sponsored the preparation of the biographical directory *Ukrainians in North America* (1975, ed by D. Shtohryn), and in 1974 it organized the First Congress of Ukrainian Librarians, Publishers, and Booksellers in the United States and Canada (held in Jersey City). Its approx 100 members – mostly in Metropolitan New York, but also in Urbana, Chicago, Bloomington, Philadelphia, Denver, and Washington – developed *Ucrainica* collections at many American university and reference libraries, cataloged Ukrainian-American community libraries, prepared bibli-

ographies of Ukrainian publications as well as a catalog of *Ucrainica* in North American libraries and indexes of Ukrainian periodicals, and organized Ukrainian book exhibitions. The association has been inactive since the mid-1980s.

Ukrainian Line. A network of fortifications that was built at the behest of the Russian government to replace the Belgorod Line as the population of the Russian Empire expanded southward into Slobidska Ukraine. The Ukrainian Line was maintained from the 1730s to the 1760s as a defense against attacks by Crimean and Nogay Tatars. It extended for nearly 285 km from the Dnieper River along the Orel River and the tributary Berestova River, and further east along the Bereka River to its junction with the Donets River. Construction of the fortifications began in 1731, according to the design of General J.-B. von Weissbach, and proceeded intensively until 1733, but was not fully completed until well into the 1740s. Each year 20,000 Left-Bank Cossacks, 2,000 Cossacks from Slobidska Ukraine, and 10,000 common peasants worked on the building of the line. It consisted of 16 fortresses and 49 redoubts, connected by a large earthen rampart and deep ditches. Defensive forces included 20 regiments of land militia (14 cavalry and 6 infantry), totaling nearly 22,000 men, as well as 180 cannons and 30 mortars.

The construction, maintenance, and defense of the Ukrainian Line proved to be a heavy burden on the population of the Hetmanate and Slobidska Ukraine. Unfortunately the line was unable to defend Ukraine (particularly Slobidska Ukraine) from the incessant Tatar attacks, which frequently penetrated it. In the 1760s P. Rumiantsev set out to reorganize the system of defense, but by that time the Tatar threat had begun to subside.

The Ukrainian Line also had a policing function, in that it divided the Zaporizhia from the Hetmanate. It impeded the efforts of deserters to flee to the Zaporozhian Sich and the freedom of Cossacks in Slobidska and Left-Bank Ukraine to move from one place to another. The Ukrainian Line lost its strategic significance in the 1770s, when the border of the Russian Empire moved southward by 175–180 km, to where a new line, the *Dnieper Line, was built.

Ukrainian Medical Association of Czechoslovakia. See Ukrainian Physicians' Association in Czechoslovakia.

Ukrainian Medical Association of Lviv. See Ukrainian Physicians' Society.

Ukrainian Medical Association of North America (Ukrainske likarske tovarystvo Pivnichnoi Ameryky, or UMANA). A professional and civic association of medical doctors and dentists. Founded as the Ukrainian Medical Association in New York in 1950, in 1953 it became the coordinating center for 17 branches in the United States and Canada, with a total membership of over 1,000. Since 1956

UMANA has sponsored annual or biennial scholarly conferences in major centers, such as Cleveland, Chicago, Toronto, Detroit, New York, Montreal, Philadelphia, Washington, DC, and Vienna, as well as in Australia and the Bahamas. The conferences are accredited by the American Medical Association. The UMANA quarterly journal **Likars'kyi visnyk* has been published since 1954. The association also published almanacs in 1958 (Chicago) and 1962 (Detroit) and *Materiialy do istorii ukrains'koi medytsyny* (Materials for the History of Ukrainian Medicine, 3 vols, 1975–90). In 1975 the headquarters was moved to Chicago. Since 1977 UMANA has collected a sizable medical library. Its archivist, P. Pundii, has re-edited old issues of medical publications and begun publishing an annual report of newly acquired materials. In 1991 M. Klodnytska-Protsyk was succeeded by A. Levytsky as president of UMANA. The executive board oversees a stipend fund, named after M. Panchyshyn, for deserving students.

Ukrainian Medical Charitable Service (Ukrainska medychno-kharytatyvna sluzhba). An organization for providing basic medical care and material aid to Ukrainian refugees in Germany. It was formed as the Sanitary Charitable Service (SKhS) in November 1945 out of former branches of the *Ukrainian Red Cross (closed down by the occupational authorities in Germany) and the Sanitary Charitable Service at the Apostolic Visitor's Office of the Greek Catholic Church for Germany. From 1945 the SKhS surreptitiously obtained supplies of food, medicine, and clothing from the Bavarian Red Cross, as well as donations from Ukrainian organizations in North America and from the Catholic church. To cover operating costs it collected membership fees from approx 14,000 members in 61 branches (1947) and organized charitable concerts. In 1948 (renamed the Ukr SKhS) it expanded its operations into the three western occupational zones of Germany and Austria. The SKhS had delegations and liaison officers in the United States, Canada, Australia, France, and Belgium. Medical care was dispensed through clinics in the DP camps; in 1946 there were 20 clinics, including 5 under the direct supervision of the SKhS, and after 1950 there was 1, in Munich. About 150 physicians worked in these clinics, and a number of nursing courses were conducted. The SKhS also had special departments for family search and reunion and aid for invalids, former soldiers of the Ukrainian Insurgent Army, and widows and orphans.

As more and more refugees were resettled, the SKhS curtailed some of its activities and redirected them to helping needy Ukrainians in Ukraine, Poland, Czechoslovakia, Yugoslavia, Rumania, and Argentina. In 1955 its name was changed from Ukrainian Sanitary Charitable Service to Ukrainian Medical Charitable Service. Presidents of the SKhS were B. Andriievsky (1945–51), I. Mirchuk (1951–5), H. Martynets (1955–68), and Ya. Kovalyk (from 1968); executive presidents were T. Vorobets (1945–8), Ya. Voievidka (1948–9), I. Mirchuk (1949–50), M. Khronoviat (1950–1), Ya. Hynylevych (1951–79), V. Mialkovsky, and V. Synyshyn (from 1979); from 1945 H. Komarynsky served as secretary. A separate organization called the Ukrainian Medical Charitable Alliance (Ukrainske medychno-kharytatyvne obiednannia) was founded at the first DP physicians' convention in Munich-Karlsfeld in May 1946, with Ya. *Voievidka elected president. Its 640 members were grouped into sections of physicians, den-

tists, pharmacists, and intermediary medical personnel. Two issues of its journal *Medychno-sanitarnyi visnyk* were published. At the second DP physicians' convention in Regensburg in December 1947, F. Bohatyrychuk succeeded Voievidka as president.

Ukrainian Meteorological Service (Ukrainska meteorohichna sluzhba, or Ukrmet). A government agency established in Kiev in 1921 to monitor the weather and climate in Ukraine. It had sections for general meteorology, weather forecasting, and agricultural meteorology, and regional branches in Kiev (est 1912), Chernihiv (est 1922), Volhynia (est 1911), Podilia (est 1922), Poltava (est 1910), Kharkiv (est 1903), the Black Sea region (est 1912), Dnipropetrovske (est 1922), and Donetsk (est 1923). In 1927 the Hydrometric Service of the Melioration and Water Management Department of the People's Commissariat of Agricultural Affairs, and the Boh and Dnieper hydrological research stations, were brought under Ukrmet, which was then reorganized into the Ukrainian Meteorological and Hydrological Service under the directorship of M. Sofoterov. Ukrmet published a bulletin and the popular magazine *Pohoda i zhyttia*.

Ukrainian Military Club (Ukrainskyi viiskovyi klub im. Hetmana Pavla Polubotka). A military-political organization founded on 29 March 1917 at a conference of Ukrainian officers and soldiers of the Kiev Military District. Its chief founder was Lt M. *Mikhnovsky. The club organized Ukrainian volunteer regiments and military organizations. Thanks to its efforts, similar clubs sprang up on all the fronts, the *Khmelnysky Regiment was formed in Kiev, and the First *All-Ukrainian Military Congress (18–21 May 1917) was held. Club members demanded a declaration of Ukraine's independence from the congress. The club's activities ceased in June 1917, when Mikhnovsky was transferred to the Rumanian front.

Ukrainian Military Committee (Ukrainskyi viiskovyi komitet or Tsentralnyi viiskovyi komitet). A clandestine organization of Ukrainian officers in the Austrian army formed in Lviv in September 1918. Working closely with the People's Committee of the National Democratic party, it made preparations to transfer power in Galicia to the Ukrainian people. In October 1918 representatives of the Legion of Ukrainian Sich Riflemen were added to the Military Committee, and Capt D. Vitovsky was elected chairman. On orders of the Ukrainian National Rada the committee carried out a coup d'état on the eve of the *November Uprising in Lviv and other cities. With the proclamation of the Western Ukrainian National Republic, the Military Committee was dissolved. Besides D. Vitovsky its more active members were P. Bubelia, T. Martynets, L. Ohonovsky, D. Paliiv, I.T. Rudnytsky, and V. Starosolsky.

Ukrainian Military History Institute (Ukrainskyi voienno-istorychnyi instytut). Founded in Toronto in 1952 as a continuation of the *Ukrainian Military History Society. It established a museum of the UNR Army and Navy and published two volumes of *Za derzhavnist'* (1964, 1966). It was headed by Gen M. Sadovsky until 1967 and then by Col M. Bytynsky. The institute was dissolved in 1969, and its museum was transferred to the Ukrainian Free Academy of Sciences, which reopened it in Winnipeg in 1981.

Ukrainian Military History Society (Ukrainske voienno-istorychne tovarystvo). A society of UNR Army veterans founded in Kalisz, Poland, in 1925. It published nine volumes of historical materials titled *Za derzhavnist'*. Its president was Gen M. Sadovsky. In 1939 the society was disbanded by the German authorities.

Participants at a conference of the command of the Ukrainian Military Organization in 1923. Sitting, from left: Volodymyr Bemko, Andrii Melnyk, Yevhen Konovalets, Volodymyr Tselevych, Yaroslav Selezinka, Yaroslav Indyshevsky; standing: Petro Bakovych, Yuliiian Holovinsky, Ivan Reviuk, Pavlo Merkun

Ukrainian Military Organization (Ukrainska viiskova orhanizatsiia [UVO]). An underground revolutionary organization formed in 1920 to continue the armed struggle for an independent Ukrainian state. Its founders were former officers of the *Sich Riflemen and the *Ukrainian Galician Army, particularly its Rava Brigade. UVO members differed in political outlook but were bound by their participation in the 1917–20 wars for Ukrainian independence.

In September 1920 a provisional Supreme Collegium of the UVO, consisting of O. Navrotsky, M. Matchak, Ya. Chyzh, Yu. Poliansky, and V. Tselevych, was established in Lviv. On 20 July 1921 it was renamed the Supreme Command, and Ye. *Konovalets and Yu. Otmarshain were appointed commander and chief of staff, respectively. Organizational, intelligence, operations, and propaganda-political departments were established. The main area of operations was Galicia, which was divided into 13 military districts and 58 counties, each with its own command.

The first phase of the UVO's history (1920–2) was devoted to organizing cadres, obtaining arms, and conducting terrorist operations. Its major actions included an unsuccessful attempt on J. *Piłsudski's life on 25 September 1921, a Galicia-wide arson campaign against Polish landlords and colonists in the autumn of 1922, and the assassination of S. *Tverdokhlib on 15 October 1922. The Polish government responded with a wave of arrests which shattered the UVO. Its leaders went underground, and some of them, including Konovalets, escaped abroad. At a conference near Danzig in early 1923, it was decided to move the Supreme Command to Berlin and to set up a home com-

mand in Lviv under A. *Melnyk. At the same time the UVO severed its ties with the Government-in-exile of the Western Ukrainian National Republic (ZUNR).

UVO operations in the Ukrainian SSR were planned by Otmarshain and executed by Yu. *Tiutiunyk. A number of officers, including I. Andrukh, M. Opoka, and V. Romanyk, were sent east to establish contact with insurgent forces. The prospects for UVO activity in Soviet Ukraine diminished as the partisan movement was brought under control, the NEP was introduced, and Ukrainization started. The UVO maintained several missions under different names outside Ukraine, including the Krai Command in Czechoslovakia, the External Delegation in Berlin, a group in Danzig, and the Ukrainian Circle of the Lithuanian-Ukrainian Society in Lithuania. Their tasks were to get official recognition for the UVO, cultivate contacts with government and other foreign circles, print UVO literature, purchase arms, and organize training for new cadres. UVO cells in North America organized larger civic institutions and provided financial support.

A prolonged power struggle within the UVO resulted in a serious setback for the organization. With the recognition of Poland's annexation of Galicia by the Conference of Ambassadors (15 March 1923), the ZUNR government, led by Ye. Petrushevych, lost its international status. To continue the struggle against Poland, President Petrushevych turned to the Soviet government, which made its aid conditional on his controlling the UVO and the removal of Konovalets from the leadership of the organization. After two years of internal fighting, Petrushevych's faction was forced out of the UVO. It formed a rival organization (14 May 1926), the Western Ukrainian National Revolutionary Organization, which published *Ukrains'kyi revoliutsioner* in Berlin (1926–9). Lacking support in Ukraine, the organization eventually disintegrated.

As political conditions in Galicia changed, and open opposition to the regime through political parties and institutions became possible, many UVO veterans opted to work within legally recognized civic and political organizations. Weakened by arrests, internal dissension, and the loss of veteran cadres, the UVO limited its terrorist activities and emphasized intelligence gathering, political education, and training of new recruits. Training courses were conducted in the Carpathian Mountains, Czechoslovakia, Germany, and Danzig.

After an unsuccessful attempt on the life of the Polish president S. Wojciechowski on 5 September 1924, a small detachment known as the Flying Brigade was set up. For about two years it held up mail trucks and post offices to obtain sorely needed funds, and carried out other operations, such as the assassination of the Lviv school superintendent S. Sobiński on 19 October 1926. This activity gave the UVO notoriety and attracted young people into its ranks. Its contribution to mass political education was equally important. Its own magazine, *Surma*, published in Berlin (1927–8) and then in Kaunas, Lithuania (1928–34), had a run of 10,000. The organization also helped finance the publications **Literaturno-naukovyi vistnyk*, **Zahrava*, and **Novyi chas* and the *Chervona Kalyna publishing house. A special Political Collegium was set up in the Home Command of the UVO.

UVO activities were financed from a number of sources – eg, funds of former military units, donations from the UNR government-in-exile, donations from Ukrainians

overseas, grants from Ukrainian financial institutions in Galicia, and expropriations. The UVO also received aid from foreign sources: Lithuanian government and military circles underwrote the publication and distribution of UVO publications, and German military circles financed training courses for its cadres.

After A. Melnyk, the home commanders of the UVO were Ya. Indyshevsky, Yu. Holovinsky, O. Senyk, R. Sushko, B. Hnatevych, and V. Horbovy.

Taking advantage of its prestige among young Ukrainian revolutionaries, the UVO played a key role in forging the *Organization of Ukrainian Nationalists (OUN) out of smaller nationalist youth groups. Konovalets, who assumed leadership in the OUN, regarded it at first as a political front for the UVO and as a pool for its cadres. The OUN, however, absorbed the UVO, appropriating its program and traditions. Without being dissolved formally, the UVO withered away in the early 1930s.

Ukrainian Mineralogical Society (Ukrainske mineralohichne tovarystvo). A scientific association founded in 1970 in Kiev to co-ordinate research in the field, promote expeditions, and popularize results achieved in mineralogy. It was organized out of the Ukrainian Division of the All-Union Mineralogical Society (est 1954). One of the chief founders of the new society was Ye. *Lazarenko, who also served as its first president (1970–9). After him Yu. Melnyk was elected president. The society holds conferences, organizes lectures, and publishes scientific collections. In 1984 there were 18 branches, which represented 540 members altogether.

Ukrainian Mohylo-Mazepian Academy of Sciences (Ukrainska mohyliansko-mazepynska akademiia nauk, or UMMAN). A scholarly institution created in Warsaw in May 1938 by the Government-in-exile of the UNR. Its aim was to continue the work of the VUAN after it was shut down during the Stalinist terror, to revive its publications, and to inform the Western scholarly community about Ukraine and Ukrainian scholarship. UMMAN consisted of a Ukrainian studies division made up of 24 chairs and research groups. Its presidents were S. *Smal-Stotsky and I. Feshchenko-Chopivsky (from August 1938); the secretary was A. Yakovliv. UMMAN published three monographs before the 1939 German invasion of Poland forced it to suspend its activity. In the 1980s UMMAN renewed its activity in the diaspora, and J. Rudnyckyj was elected president. In 1992, with the revival of the Kievan Mohyla Academy in Kiev, UMMAN terminated its activities and encouraged its members to continue working with the renewed academy in Kiev.

Ukrainian Museum (Ukrainskyi muzei). A museum set up in New York in 1976 to house the folk-art and handicrafts collection of the *Ukrainian National Women's League of America. The core of the collection was acquired in 1933 from the Ukrainske Narodnie Mystetstvo co-operative in Lviv. It included weavings, embroidery pieces, folk dress, wood carvings, ceramics, metal artifacts, and Easter eggs. Besides that ethnographic collection the museum has built up collections of paintings and historical documents. It has presented special exhibitions of Ukrainian embroideries, folk ceramics, ceremonial *rushnyky*, and other folk art, exhibitions of individual painters, and thematic exhibitions of the lost architecture of Kiev, the Ukrainian emigration to America, and Ukrainian wooden churches. The museum has published catalogs and studies to accompany some of its exhibitions. Courses in traditional handicrafts are offered to the public from time to time. The museum has a membership of approx 1,500. Its most recent president has been T. Hewryk.

The Ukrainian Museum of Canada

Ukrainian Museum of Canada (Ukrainskyi muzei Kanady). Canada's first professional ethnic museum, founded in 1936 in Saskatoon by the *Ukrainian Women's Association of Canada (SUK) with branches in Vancouver, Edmonton, Winnipeg, and Toronto. The museum's main branch was housed at the *Mohyla Ukrainian Institute in Saskatoon for many years before acquiring its own building in 1980. It contains collections of Ukrainian embroidery, weaving, folk costumes, Easter eggs, domestic tools and farm implements, historical photographs and documents, and printed materials. Its gallery owns W. Kurelek's series of paintings of the Ukrainian pioneer woman. In addition to mounting touring exhibitions, the museum has offered courses in arts and crafts and published works such as *Ukrainian Embroidery: Designs and Stitches* (1957), *Pysanka: Icon of the Universe* (1977), and *Pobut: Folk Costume Patterns* (1986). A catalogue of its library and archival holdings was published in 1989 as *The Monograph Collection of the Ukrainian Museum of Canada*. Its directors have been L. Lazarovych (1973–80), M. Kishchuk (1981–4), A. Kachkowski (1984–9), and J. Zayachkowski (1989–91).

Ukrainian Museum of the Liberation Struggle. See Museum of Ukraine's Struggle for Independence.

Ukrainian Museum-Archives (Ukrainskyi muzei-arkhiv, or UMA). An archival repository and exhibiting museum in Cleveland. Originally established in 1952 by L.

*Bachynsky on the top floor of a community center as a repository for Plast memorabilia and other items of interest, the museum acquired a building of its own in 1977. It houses a library of over 14,100 separate volumes; 2,400 Ukrainian periodical titles from around the world; an archive; and fine art, stamp and coin, folk art, and Shevchenkiana collections. The UMA has published six volumes of *Bibliografichnyi pokazhchyyk ukrains'koi presy* (A Bibliographic Guide to the Ukrainian Press, 1966–78) and *Derzhaoni hroshi Ukrainy* (Ukraine's State Currency, 1973); released the videotape *Muted Bells*, which deals with the suppression of the church in Western Ukraine; and held exhibits of paintings, folk art, and Shevchenkiana. Its presidents have been Bachynsky (1952–77), O. Fedynsky (1977–81), S. Kikta (1981–7), and A. Fedynsky (1987–).

Ukrainian Music Institute of America (Ukrainskyi muzychnyi institut Ameryky, or UMIA). A Ukrainian music school established in New York in 1952, with branches subsequently located in Philadelphia, Washington, Baltimore, Cleveland, Detroit, Chicago, and other American cities. The UMIA was founded for the purpose of continuing and further developing the music program of the *Lysenko Higher Institute of Music. It offers a 10-year course of study with an introductory year for younger children, a 'concert performance' year for graduates, and (since 1972) a preschool music program. The UMIA also sponsors recitals of guest vocalists, thematic evenings, and concerts of Ukrainian music and is active in music publishing. The group's main organizer and first director (1952–9) was R. *Savytsky. Later directors include I. Sonevtsky (1959–61), Z. Lysko (1961–2), M. Bailova, T. Bohdanska, N. Kotovych, D. Karanovych, and K. Chichka-Andriienko (since 1981).

Ukrainian Musicians' Alliance (Obiednannia ukrainskykh muzyk, or OUM). An organization of Ukrainian professional musicians in Germany in 1946–50. With more than 60 members, the group was active in music education, musicological work, and musical performances for the community. Executive members of the alliance included Z. Lysko, W. Wytwycky, R. Savytsky, and A. Olkhovsky. The group disbanded after many of its key members emigrated to North America.

Ukrainian Mutual Benefit Association of Saint Nicholas (Bratstvo zapomohove sv. Mykolaia). The oldest Ukrainian mutual-aid society in Canada. It was founded by Rev T. Hura, V. Karpets, and N. Hladky at the Ukrainian Catholic St Nicholas Church in Winnipeg on 11 September 1905. At first there were 45 members. By 1931 it had 15 branches and 2,500 members, and by 1990 it had 24 branches and 1,200 members. Its assets total 3,588,000 dollars. Besides helping its members with funeral expenses and sickness benefits, the association supports Ukrainian cultural and educational institutions. The presidents of the association have been T. Hura, N. Kotliaryk, N. Hladky, I. Martsiniv, M. Havryliuk, S. Horbachevsky, Ya. Baryliuk, I. Zavidovsky, T. Stefanyk, I. Zarovsky (1923–38, 1940–60), T. Kozak, J. Nowosad (1960–70), J. Kozoriz (1970–83), and Bishop M. Daciuk (1983–).

Ukrainian National Aid Association of America (Ukrainska narodna pomich, or UNAAA). A fraternal-bene-

fit life-insurance society founded in 1914 and known until 1926 as the National Aid Association (Narodna pomich). Until the Second World War most of its members were Orthodox; in the postwar period it has been dominated by members of the Ukrainian Liberation Front. Since 1914 the UNAAA has published *Narodne slovo*, renamed **Ukrains'ke narodne slovo* in 1959, as its official organ. The association also produces an annual almanac titled (since 1960) *Zoloty homin* (The Golden Echo), as well as various books, plays, and songbooks. The association maintained contact with civic organizations in Western Ukraine and sent them financial aid. As a founding member of the Ukrainian Congress Committee of America and the *United Ukrainian American Relief Committee, it donated funds for the resettlement of Ukrainian displaced persons in the United States. In 1961 it expanded into Canada. In 1981 its head office was moved from Pittsburgh to Chicago. Today (1990) the UNAAA has 8,710 members in 161 branches. Its presidents have included D. Porada (1915–23), V. Sorochak (1923–34), M. Markiv (1934–42), V. Shabatura (1942–62), and V. Mazur (since 1966–90). In 1977 L. Poltava prepared *Istoriia Ukrains'koi narodnoi pomochi v Amerytsi i Kanadi* (History of the Ukrainian National Aid Association in the United States and Canada).

Ukrainian National Alliance (Ukrainske natsionalne obiednannia, or UNO). An émigré organization centered in Berlin. Established in 1933, it was one of two Ukrainian community organizations tolerated by the Nazi regime (the other was the Ukrainian Hromada). It was active in central Germany and then expanded into Austria and the protectorates of Bohemia and Moravia in 1937–45. Its membership expanded markedly after it adopted a Ukrainian nationalist position in 1937. In spite of government restrictions, the UNO had 42,000 members in over 1,268 branches and lesser groups in 1942. Until 1937 it was headed by I. Koroliv and I. Drabaty, and in 1938–45 by T. Omelchenko. Members of the UNO executive included Yu. Artiushenko, M. Dorozhynsky, B. Kravtsiv, D. Kvitkovsky, V. Levytsky, V. Maruniak, M. Seleshko, P. Verzhbytsky, and V. Yaniv. The executive had active publicist departments in Berlin and ran a publishing house in Prague. The UNO's official press organ was the weekly **Ukrains'kyi visnyk*. During the Second World War it also operated a Ukrainian Information Bureau out of Berlin, which informed Germans and other non-Ukrainians about Ukrainian affairs. Apart from its work in organizing lectures and classes, the UNO defended the interests of Ukrainian workers in Germany (forced and voluntary), assisted Ukrainian students, and gave aid to Ukrainian prisoners from Soviet and Polish units. During the course of the war the UNO published 13 educational brochures and 2 brochures on the rights and duties of Ukrainian workers. Lower-level UNO groups organized courses in Ukrainian studies, German language instruction, folk dancing, driving, and first aid; sponsored art workshops; and ran various libraries and reading rooms. In 1943–5 the Gestapo began persecuting its members. The UNO was finally forced to cease activities outright after the occupation of Berlin by Soviet forces in 1945.

A. Zhukovsky

Ukrainian National Alliance (Ukrainske natsionalne obiednannia, or UNO). A political organization of Trans-

carpathian Ukrainians, which replaced the Central Ruthenian People's Council in representing the interests of the region's Ukrainian inhabitants. It was founded in Khust on 18 January 1939, and its members were from all the Ukrainian parties and groups except the Communists. Its president was F. Revai (later Yu. Perevuznyk), and its general secretary was A. Voron. The UNO presented a single slate of 32 candidates in the elections to the Diet of Carpatho-Ukraine, all of whom were elected. Its daily organ was *Nova svoboda*. The UNO ceased its activities when Hungarian troops occupied Carpatho-Ukraine (March 1939).

Ukrainian National Alliance in France (Ukrainska natsionalna yednist u Frantsii). A civic and cultural organization founded in Paris in 1949 by supporters of the Organization of Ukrainian Nationalists (Melnyk faction) as the successor to the interwar *Ukrainian National Union in France. The alliance belongs to the world federation of Ideologically Allied Nationalist Organizations and works with the Ukrainian Central Civic Committee in France. The central executive in Paris co-ordinates the work of 12 branches (in the 1950s there were 22) in the major centers of Ukrainian settlement in France. It organizes annual courses in Ukrainian studies for young people (courses are also offered at the local level by the branches) and, together with the newspaper **Ukrains'ke slovo*, publishes pamphlets and almanacs. The alliance also initiated the creation of the *Organization of Ukrainian Youth in France. Its presidents have been Ya. Musianovych (1949–61), V. Lazovinsky (1961–7), V. Malynovych (1968–70), L. Huzar (1970–1), Yu. Kovalenko (1972–6), V. Mykhalchuk (1976–8, 1984–6), A. Zhukovsky (1978–82), O. Korchak (1982–4), and V. Genyk (since 1986). V. Mulyk served as the alliance's longtime secretary.

Ukrainian National Army (Ukrainska natsionalna armiiia). A military formation within the German armed forces at the end of the Second World War. On 12 March 1945 the Ukrainian National Committee, with the approval of the German government, announced the formation of the Ukrainian National Army (UNA), which was to group approx 220,000 Ukrainians serving in the German armed forces into one army. The committee hoped that after the defeat of the Germans the UNA would play an important role in establishing an independent Ukraine, an outcome made possible by postwar rivalry between the Western Allies and the Soviet Union. With the consent of the UNR government-in-exile, former UNR Army officers accepted key posts in the army, among them Gen P. Shandruk, as UNA commander, and Gen A. Valiisky, as chief of staff. The Division Galizien (approx 16,000 men) became the First Division of the UNA, and Col P. Diachenko's antitank brigade (approx 1,900 men) was to be the nucleus of the Second Division. Other units also volunteered to join the UNA, but military operations prevented their reassignment. By war's end the UNA headquarters still lacked operational control of the UNA units. The UNA surrendered to the British in Austria and was interned in *Rimini.

Ukrainian National Association (Ukrainskyi narodnyi soiuz, or UNA). The oldest and largest Ukrainian fraternal benefit association in North America, known until 1914 as the Ruthenian National Association (Ruskyi narodnyi soiuz). It was founded in Shamokin, Pennsylvania, on

The Ukrainian National Association building in Jersey City

22 February 1894 by several local brotherhoods, which had seceded from the Union of Greek Catholic Ruthenian Brotherhoods because of its conservative, pro-Hungarian and pro-Russian policies. The purpose of the UNA was to promote unity and education and to improve the material security of Ukrainian families in the United States through life and health insurance. The initiative for an organization of this type came from Rev H. *Hrushka and a group of Ukrainian Catholic clergy. Appeals first appeared in **Svoboda* (1893), which later became the paper of the UNA. The Brotherhood of ss Cyril and Methodius in Shamokin constituted the original nucleus of the association. It was joined by St Michael's Brotherhood (est 1885) in Shendoah – the first Ukrainian organization in the United States – and by 11 other brotherhoods in the region. Later, brotherhoods in other states became branches of the association, and in 1906 its first Canadian branch was set up in Toronto. In 1990 there were 399 branches in North America.

Until 1910 the UNA was the only Ukrainian-American community fraternal association. That year an effort was made by Bishop S. *Ortynsky to give the association a confessional character. He spearheaded a resolution at the UNA's national convention to change its name to the Greek Catholic Ruthenian Association (Hreko-Katolytskyi ruskyi soiuz) and to limit its membership to Catholics. The legality of the resolution's adoption was successfully challenged by the UNA executive, and the group reverted to its former character. Before it had done so, however, a section of the UNA membership established a second fraternal association, the Ruthenian National Union (with the same Ukrainian title, Ruskyi narodnyi soiuz). It changed its name to the Ukrainian Workingmen's Association in 1918 and then to the *Ukrainian Fraternal Association in 1978. Ortynsky dropped his aspirations for control of the UNA and established a separate *Providence Association of Ukrainian Catholics in 1912. Another rival fraternal association was established in 1914 as the *Ukrainian National Aid Association of America.

Membership in the UNA has varied with the number of immigrants, the internal state of the Ukrainian community, and the insurance system. In 1894 the association had 439 members and assets of 220 dollars; in 1904 it had 9,000 members and assets of 46,000 dollars. Competition and changes in the fee schedule based on a theoretical mortality table adopted by the other fraternal associations led to a crisis in the UNA and a drop in membership in 1914–17 from 25,300 to 11,900. In the interwar period membership rose again: by 1946 UNA had 46,000 members and assets of 8.5 million dollars. With the influx of new immigrants after the war membership almost doubled: by 1971 it had

reached over 88,000. In 1988 there were 74,000 members and total assets of approx 60 million dollars.

As a nonpartisan organization the UNA reflects the general sociopolitical opinion of the Ukrainian community: it stands for democracy, Ukrainian independence, and allegiance to the United States. It has initiated some of the main projects undertaken by the Ukrainian community. It played a leading role in founding Ukrainian umbrella organizations, such as the American Ruthenian National Council (1914), the Federation of Ukrainians in the United States (1915), the Ukrainian National Council (1916), the Ukrainian National Committee (1918), the United Ukrainian Organizations in America (1922), and the *Ukrainian Congress Committee of America (UKKA, 1940). It was instrumental in getting President W. Wilson to proclaim 21 April 1917 'Ukrainian Day' and permit a public collection in aid of the Ukrainian people. During the struggle for Ukraine's independence (1917–20) the UNA organized financial support for the Central Rada and the government of Western Ukraine, and in the interwar period it provided assistance for political and educational organizations in Polish-ruled Ukraine. After the Second World War it helped the United Ukrainian American Relief Committee (est 1944) resettle Ukrainian displaced persons in the United States. It supported the building of the T. Shevchenko monument in Washington, DC (1964), and the establishment of the Ukrainian studies program at Harvard University (1968–73). As the largest Ukrainian organization in the United States, the UNA played a leading role in the UKKA: its president traditionally held the post of executive vice-president and from 1976 shared it on a rotational basis with the presidents of the other three fraternal associations. When the social consensus that had held the UKKA together fell apart at the 13th Congress of Ukrainian Americans (1980), the UNA and many other organizations seceded from the UKKA and established the *Ukrainian American Coordinating Council (1983) as a new representative umbrella group.

The association's paper *Svoboda* played an important role in the development of the UNA and of the Ukrainian community as a whole. Some of its editors, such as Rev H. Hrushka, Rev N. Dmytriv, and L. *Myshuha, had a strong impact on the shaping of Ukrainian-American attitudes. In 1933 the UNA began to publish *The *Ukrainian Weekly*, and in 1954 the children's magazine *Veselka*. It has also published 80 almanacs (by 1990), over 20 English books about Ukraine, and the two-volume *Ukraine: A Concise Encyclopaedia* (1963, 1971). The UNA has also funded the publication of a multivolume index of selected articles from *Svoboda*. The index is being published by the Immigration History Research Center of the University of Minnesota.

Soiuzivka, the association's resort in Kerhonkson, New York, is used not only for sports and recreation but also for educational activities. The cultural commission of the UNA, set up in 1956, plans its cultural and educational program. Each year the association distributes scholarships to Ukrainian students: in 1992 it granted 229 scholarships worth 124,000 dollars.

Since the earliest days of the UNA, its head office has been located in Jersey City, New Jersey. The supreme ruling body of the association is its convention, which meets every four years (32 by 1990). It elects an executive committee, an auditing commission, and a board of directors to run the association. The presidents of the UNA have

been T. Talpash (1894–5), I. Glova (1895–8), Yu. Khyliak (1898–1900), Rev A. Bonchevsky (1900–2), Rev M. Stefanovych (1902–4), K. Kyrchiv (1904–8, 1917–20), D. Kapitula (1908–17), S. Yadlovsky (1920–5), T. Hrytsei (1925–9), M. Murashko (1929–49), D. *Halychyn (1950–61), J. *Lesawyer (1961–78), J. Flis (1978–90), and U. Diachuk (1990–; the first woman president). R. Slobodian served for over 50 years in various positions, including that of treasurer (1933–66).

The delegation of the Ukrainian National Committee that went to Washington, DC, in 1919 to urge the US government to recognize the UNR. Rev Petro Poniatyshyn, the committee's president, is in the center.

Ukrainian National Committee (Ukrainskyi narodnyi komitet, or UNK). A political umbrella organization of Ukrainians in the United States in 1918–22 which rivaled the *Federation of Ukrainians in the United States. A coalition of church and community organizations that included the Ukrainian National Association, the UNK was headed by P. *Poniatyshyn (the administrator of the Greek Catholic church in the United States), with V. *Lototsky as its secretary. A 'people's congress' was held on 16–17 January 1919 to give the UNK a broader mandate. The UNK organized a wide range of activities in support of Ukrainian statehood, including publishing, fund-raising, lobbying the US government, and maintaining information bureaus in New York and Washington. The UNK was a member of the Eastern European Union (headed by T. Masaryk) and the League of Four Nations (Estonia, Latvia, Lithuania, and Ukraine). In 1919 the UNK sent its delegation (K. Bilyk and Congressman J.M. Hammill) to the Paris Peace Conference. The UNK was disbanded in 1922 in the interests of forming a larger organization, the *United Ukrainian Organizations in America.

Ukrainian National Committee (Ukrainskyi natsionalnyi komitet, or UNK). An administrative body formed in Cracow on the initiative of the Bandera faction of the OUN in an attempt to present a united Ukrainian national representation to the German occupying forces. A total of

113 people were individually selected from a range of political parties, community organizations, and economic firms for the association. As a nonpolitical institution the Ukrainian Central Committee decided not to join. At the inaugural meeting held on 22 June 1941 Gen V. Petrov was elected head of the committee in absentia, and V. *Horbovy was chosen to be acting leader until Petrov's acceptance. V. Andriievsky was second deputy leader. The committee's secretaries were S. Shukhevych and V. Mudry. The UNK sent a memorandum to A. Hitler in which it underscored the Ukrainian people's aspirations for independence and their readiness to fight against Moscow; at the same time it expressed the hope that Germany would respect the will of the Ukrainian people. It did not have a chance to develop any significant activity, because on 5 July the German security police arrested the nationalist organizers of the committee (M. Bohun, V. Horbovy, Ya. Rak, and V. Yaniv). Their action effectively abolished the group.

Ukrainian National Committee (Ukrainskyi natsionalnyi komitet, or UNK). A central political and civic body set up in Germany in October–November 1944 to defend Ukrainian interests before the German authorities. A change in German policy toward Eastern Europe and the release of Ukrainian political leaders, such as A. Melnyk and S. Bandera, from concentration camps paved the way for the founding of the committee. Besides the freed leaders, the committee's founders included A. Livytsky, president of the UNR government-in-exile, the Ukrainian Civic Committee (an organization of Ukrainians from central and eastern Ukraine), and the Ukrainian Central Committee. The founding of the Committee for the Liberation of the Peoples of Russia under Gen A. Vlasov, which claimed to represent all anti-bolshevik émigrés from the USSR, prompted Ukrainian leaders to set up their own organization. All Ukrainian political camps accepted Gen P. *Shandruk as president of the UNK, V. *Kubijovyč and O. Semenenko as vice-presidents, and P. Tereshchenko as secretary. At first the German authorities did not recognize the UNK and wanted it to be subordinate to A. Vlasov, but the Ukrainians refused to comply. Reichsminister A. Rosenberg officially recognized the UNK as the sole political representative only on 12 March 1945. In the name of the German government he also consented to having the UNK represent all the Ukrainian military formations in the German armed forces (the Ukrainian Liberation Army and the *Division Galizien). The presidium of the UNK issued a proclamation to the Ukrainian people and on 17 March 1945 appointed Gen P. Shandruk commander of the *Ukrainian National Army. On 25 April 1945, at the front, the Division Galizien took the oath of allegiance to the Ukrainian people and became the First Division of the Ukrainian National Army. Branches of the Ukrainian Central Committee functioned as local organizations of the UNK, and the daily *Ukrains'kyi shliakh* (renamed from *Krakov's'ki visti*) in Vienna became its organ (five issues). The disintegration of Nazi Germany put an end to the committee's activities.

A. Zhukovsky

Ukrainian National Council (Ukrainska narodna rada). A representative committee formed early in 1919 in Winnipeg by Ukrainian Catholics who broke away from the *Ukrainian Canadian Citizens' League (UCCL). The

council duplicated the efforts of the UCCL in fighting discrimination and promoting Ukrainian independence at the Paris Peace Conference. It collected funds for the Ukrainian Press Bureau in Paris and purchased supplies for Ukrainian prisoners of war in Italy. It also sought (unsuccessfully) to obtain government assistance to ship grain to Galicia. It was dissolved in the early 1920s.

Ukrainian National Council (Ukrainska natsionalna rada). A political and civic body established on 5 October 1941 in Kiev on the initiative of the OUN (Melnyk faction). Its presidium was headed by M. *Velychivsky, and its secretaries were I. Dubyna and O. Boidunyk. At the end of 1941 the Reichskommissariat Ukraine banned the council, which thereupon functioned underground until 1943. On 29 April 1944 the council created the All-Ukrainian National Council (VUNR) in conjunction with the Ukrainian National Council in Lviv and representatives of the former Diet of Carpatho-Ukraine. Velychivsky was elected president of the new council, and Metropolitan A. Sheptytsky and A. Shtefan were chosen vice-presidents. Efforts to create a common program for the VUNR and the Ukrainian Supreme Liberation Council in the fall of 1944 did not succeed. In 1946 the VUNR, whose members were now in the emigration, ceased to function.

Members of the Presidium and Executive Organ of the Ukrainian National Council in 1952. First row, from left: Gen Mykhailo Kapustiansky, Stepan Baran, Pres Andrii Livytsky, Ivan Bahriany, Mykhailo Khronoviat; second row: V. Hryhorenko, Spyrydon Dovhal, M. Khrobak, Yurii Blokhyn, Mykola Livytsky; third row: Mykhailo Voskobiinyk, Fedir Haienko, Oleksander Yurchenko, V. Dibert, Ivan Luchyshyn, Dmytro Andriievsky; fourth row: I. Inozharsky, Ya. Dziabenko, Col Mykola Stechyshyn, Yevhen Glovinsky, Col Mykola Shramenko

Ukrainian National Council (Ukrainska natsionalna rada). The parliamentary body of the *Government-in-exile of the UNR, established in 1947 as the result of a pact between émigré Ukrainian political parties. The aim of the council was to consolidate all independentist parties and organizations for the renewal of an independent Ukrainian state with a democratic order and to broaden the political base for the State Center of the Government-in-exile of the UNR. It established an executive organ functioning as a protoparliament or constituent assembly (that looked after the council's affairs between sittings) and a state auditing body and elected a president of the UNR-in-exile. The

inaugural council had representatives from the OUN Melnyk faction, the OUN Bandera faction, the Ukrainian National State Union (UNDS), the Ukrainian National Democratic Alliance (UNDO), the Ukrainian Revolutionary Democratic party (URDP), the Ukrainian Revolutionary Democratic party (Socialist), the Ukrainian Party of Socialist Revolutionaries, the Ukrainian Socialist Radical party, and the Ukrainian Social Democratic Workers' party (USDRP).

After the second session of the council in 1950, the OUN Bandera faction left the parliament. At the fourth session in 1957, the Union of Lands of United Ukraine (the Peasant party) and the Union of Constructively Creative Forces of Ukraine joined the council. From October 1957 to 1961 the OUN Melnyk faction operated outside the council. In the meantime, there were schisms in the URDP and the UNDO. At the seventh session a breakaway URDP faction headed by M. Stepanenko and a UNDO faction headed by P. Kashynsky were officially recognized by the council. A range of amendments were brought into the council's statutes at its eighth session in 1979, one of which set the term of its sitting at five years (after the completion of the term, the parliament is dissolved by decree of the president, and the presidium and chairman hand over their positions), and another of which concerned the election of a president, vice-president, chairman, and presidium. In 1984–9 the council, after considerable effort, managed to consolidate and obtain the support of most of the émigré Ukrainian parties for the State Center of the UNR: the OUN Melnyk faction returned, as did the URDP led by M. Voskobynyk, and the UNDO schism was resolved.

The council convened for 10 sessions: July 1948 in Augsburg, June 1949 in Leipzig, March 1954 in Munich, March 1957 in Munich, November 1961 in Munich, March 1967 in Munich, December 1972 in London, June 1979 in Munich, July 1984 in Toronto, and June 1989 in South Bound Brook, New Jersey. At the third session (1954) S. *Vytvytsky was elected to replace the recently deceased A. *Livytsky as president, and at the sixth session (1967) M. *Livytsky was elected president after Vytvytsky's death. After the death of M. Livytsky in December 1989, the vice-president, M. *Plaviuk, assumed the presidency. After the creation of the independent Ukrainian state in 1991, the council transferred its mandate to the Ukrainian government in 1992. The council's vice-presidents have included O. Udovychenko (1954–61), I. Bahriany (1961–3), M. Stepanenko (1967–84), Yu. Blokhyn (1984–8), J. Rudnycky (1988–9), and M. Plaviuk.

W. Zyla

Ukrainian National Council in Lviv, 1941 (Ukrainska natsionalna rada, or UNC). A body formed in Lviv out of the Council of Seniors on 30 July 1941 to represent the interests of the Ukrainian population of Galicia, Volhynia, and the Kholm region before the German authorities. The Council of Seniors, convened on 6 July 1941 by the Bandera faction of the OUN, consisted of 16 members (30 by the end of July). The Melnyk faction did not participate in the UNC, although the council tried to embrace all political camps and professions. Its membership eventually rose to 45. The president of the council was K. *Levytsky; his deputies were Rev Yu. Dzerovych and L. Turchyn; the secretary was A. Bilenyk (later H. Myketei). The other members included Archbishop Y. Slipy, Rev H. Kostelnyk, M.

Panchyshyn, V. Simovych, Yu. Pavlykovsky, A. Pali, M. Stefanivsky, M. Voloshyn, V. Zahaikivych, K. Pankivsky, B. Kozubsky, and S. Khrutsky, most of whom were members or supporters of the Ukrainian National Democratic Alliance. The patron and honorary president was Metropolitan A. Sheptytsky. The UNR recognized the OUN as the leading force in Ukrainian political life and supported the *Ukrainian State Administration, but it was critical of the strife between the two OUN factions. On 30 July the UNC protested to the German government the annexation of eastern Galicia by the Generalgouvernement. At the beginning of September it sent a memorandum to the governor general, H. Frank, defending the interests of Ukrainians in Galicia.

On 31 July the UNC set up a General Secretariat, headed by Pankivsky, to serve as its executive branch and to cultivate contacts with the German authorities. But after Levytsky's death (12 November) the German government made it increasingly difficult for the UNC to function. Finally, Sheptytsky's letter to H. Himmler (February 1942) protesting the genocide policy with respect to Jews provided the authorities with a pretext for banning the council (3 March). The job of maintaining contacts with the German government was assumed by the *Ukrainian Regional Committee.

Ukrainian National Council in Petrograd (Ukrainska natsionalna rada v Petrohradi). The council, established on 1 April 1917, consisted of Petrograd representatives of the Society of Ukrainian Progressives (TUP), Ukrainian Social Democrats, the Ukrainian Revolutionary Committee, Ukrainian factions of soviets of workers' and soldiers' deputies, Ukrainian students and workers, the Petrograd Hromada, and other groups. O. *Lototsky headed the executive committee. His deputy was M. *Korchynsky, and the secretary was P. *Stebnytsky (who was elected head in May). Other members of the executive were H. *Holoskevych, M. *Slavinsky, F. *Sliusarenko, and P. *Zaitsev. The council became formally associated with the Central Rada on 3 April. It also sent a delegation to the first head of the Provisional Government, G. Lvov, which submitted a memorandum concerning Ukrainian national rights and the Russian army's occupation of Galicia and Bukovyna. The council met with Metropolitan A. Sheptytsky (who had returned from exile) and acted as a liaison with the Provisional Government for the Central Rada. After the consolidation of the Central Rada's position in Kiev most members of the council left Petrograd, and the group's liaison functions diminished. After the Second Universal P. Stebnytsky, the Provisional Government's Ukrainian commissioner, assumed the council's liaison functions.

Ukrainian National Credit Union Association (Tsentralia ukrainskykh kooperatyv Ameryky, or TsUKA). A central organization of Ukrainian credit unions in the United States, founded in 1957 as the Ukrainian Economic Advisory Association (Tovarystvo ukrainskoi kooperatsii, or TUK) and renamed in 1974. Its purpose is to promote the development of Ukrainian credit unions and of the Ukrainian community as a whole. Its original members were seven credit unions in New York, Philadelphia, Baltimore, Chester, Jersey City, Detroit, and Chicago. In 1967 its head office was moved from New York to

Chicago. By 1970 TsUKA had 20 member unions with a membership of 24,000 and assets of 32 million dollars. By 1979 it had 35 member unions, and in 1988 it had 29 member unions with a membership of 57,000 and assets of 82 million dollars. Today it includes 32 separate financial institutions with total assets approaching 300 million dollars. The association is a copublisher of the bimonthly magazine *Nash svit*. Since 1986 it has published an occasional page, 'Koooperatyvna trybuna,' in *Svoboda*. The presidents of TUK and TsUKA have included I. Sheparovych, O. Pleshkevych, and D. Hryhorchuk.

Ukrainian National Defense (Ukrainska natsionalna oborona, or UNO). A paramilitary organization established on the initiative of the OUN on 4 September 1938 in Uzhhorod, Transcarpathia. Its purpose was to prepare young men for service in a future Ukrainian army. It was headed first by V. Ivanovchuk, then by S. Rosokha. The first military unit of the UNO, a platoon, was commanded by M. Kolodzinsky. In November 1938 the UNO was transformed into the *Carpathian Sich.

Ukrainian National Democratic Alliance (Ukrainske natsionalno-demokratychnе obiednannia, or UNDO). The main legal Galician Ukrainian political party of the interwar period. Established on 11 July 1925 by a merger of the *Ukrainian Labor Party, the *Ukrainian Party of National Work, and the Ukrainian deputies and senators from Volhynia, the Kholm region, and Podlachia, the party emerged as a broadly based centrist group and successor to the *National Democratic party. Its founding convention called for a struggle for the unification of Ukrainian lands into an independent state, demanded the right to self-determination for the Ukrainians in Poland, and rejected international decisions (from 1919 to 1923) concerning Galicia. It criticized the Soviet system but treated the Ukrainian SSR as 'a stage in the development of a single independent Ukrainian state.' It also supported the émigré representation headed by Ye. *Petrushevych.

The program prepared at the second UNDO convention on 19–20 November 1926 contained no positive statements about Soviet Ukraine and Petrushevych; instead it proclaimed the conviction that the best orientation for Ukrainians was a belief 'in their own strength.' The program defined the system of the future independent Ukrainian state as a parliamentary democracy and announced policies regarding a redistribution of land (without redemption) among Ukrainian peasants, the development of national industry, trade, and co-operatives, and the recognition of equal rights for all religions. At the same time it noted Christian morality as the spiritual foundation of the Ukrainian nation.

In the 1920s UNDO refused to recognize the legality of Poland's annexation of Ukrainian lands and opposed Polish settlement in the eastern regions of Western Ukraine, the school and language laws passed by the Sejm (July 1924), and the principles of the Polish land reform (July 1925).

The highest body of authority in UNDO was the People's Convention, held every two years, which elected a central (people's) committee whose work was directed by a presidium. The chairman of UNDO was D. *Levytsky (to 1935), the secretary was V. Tselevych, and some of the most important figures were V. Bachynsky, M. Halushchynsky, I.

Kedryn-Rudnytsky, K. Levytsky, O. Lutsky, V. *Mudry, S. Vytvytsky, and V. Zahaikvych. The official UNDO organ was *Svoboda*, although the party also received support from the papers *Dilo*, *Rada*, *Ukrains'ke slovo*, and *Novyi chas*.

Legalism and organic work were key characteristics of UNDO's approach to politics. As a result it spread its influence over a broad spectrum of Ukrainian life in Galicia. It developed strong links with the majority of cultural-educational societies (*Prosvita, *Ridna Shkola), co-operative, credit, and economic institutions (the *Audit Union of Ukrainian Co-operatives, *Tsentrosoiuz, *Sil'skyi Hospodar), and even the sport association *Sokol. It was active mainly in Galicia but also had support in the towns of Volhynia.

UNDO considered itself to be the representative body of the entire Ukrainian community in interwar Poland, and did not co-operate with other Ukrainian parties (apart from early contacts with the leaders of the Ukrainian Military Organization). That self-perception, though somewhat inflated, was not entirely off base: UNDO enjoyed mass support and remained by far the strongest legal Ukrainian party. It also dominated the *Ukrainian Parliamentary Representation in the Sejm and Senate from 1928. In 1928 and 1930 UNDO took part in elections as a member of the Bloc of National Minorities.

Several splits occurred within UNDO before 1930. They established splinter groups but did not affect the main body of the party. In December 1926 a Polonophile group led by Bachynsky left the party; it was followed in April 1927 by supporters of an understanding with Soviet Ukraine, who founded the *Ukrainian Party of Labor.

In the summer of 1930, in connection with a campaign against the anti-Sanacja opposition and with the *Pacification, the Polish authorities took repressive steps against UNDO. In September a number of UNDO deputies were imprisoned in the Brest fortress, and in October a new wave of arrests (D. Levytsky, Mudry) took place. The government's hard new line and a perception that the tactics pursued up to that time had been futile prompted the leaders of UNDO to consider a compromise with the *Sanacja regime. Negotiations between the Ukrainian Parliamentary Representation and Non-Party Bloc for Co-operation with the Government (February 1931) were, however, unsuccessful.

The desire of the UNDO leadership to recognize the reality of the incorporation of Ukrainian lands by Poland without dismissing a pro-independence stance became a major item of party discussion in the first half of the 1930s. The representatives of one current of thought developed a minimal program of autonomy for Ukrainian lands. The chief opponents of a rapprochement left the party in July 1933 and founded the *Front of National Unity. Nevertheless the shift in UNDO policy continued, influenced now by dramatic new developments, such as the Polish-German agreement of January 1934, the denunciation by Poland of the Minorities Treaty in September 1934, and the repressions in Soviet Ukraine. It resulted finally in an agreement with the Polish government in the spring of 1935, the so-called *Normalization. The policy proved contentious among UNDO members and supporters. In October 1935 D. Levytsky and M. Rudnytska were expelled from the Central Committee, and Mudry became the new head of the party. The opponents of the tactics of the party gathered

around the daily *Dilo*, and *Novyi chas* became the main periodical of UNDO.

Normalization proved to be an absolute debacle for UNDO, and by May 1938 its central committee had largely abandoned the policy. It once again demanded autonomy for Ukrainian lands. In December 1938 an understanding with D. Levytsky's group ended the split within the party.

In October 1938 UNDO welcomed the *Munich Agreement as a sign of the creation of new national states in Europe. But in the following months it became discouraged by the German policy with respect to Transcarpathia. On 24 August 1939, a day after the Molotov-Ribbentrop Pact was signed in Moscow, the UNDO Central Committee passed a resolution in which it proclaimed that despite unsolved political accounts with Poland, Ukrainians would defend the Polish state in case of war. After the takeover of Western Ukraine by the Soviet armies and the signing of the German-Soviet convention of 28 September 1939 UNDO was forced to cease all activity.

A. Chojnowski

Ukrainian National Federation (Ukrainske natsionalne obiednannia, or UNO). A national organization established in Edmonton in 1932 by members of the *Ukrainian War Veterans' Association of Canada who were seeking a means of expanding the base of support for the Ukrainian national cause in Europe. Major figures in the association during its early years included V. Kossar, A. Gregorovich, T. Pavlychenko, and M. Pohoretsky, the editor of its official newspaper, **Novyi shliakh*. Although it had greatest appeal for Ukrainians who had immigrated to Canada during the interwar period, UNO had some success in drawing the Canadian-born into its ranks. It grew throughout the 1930s and 1940s and eventually established 91 branches, with major bases of strength in Alberta, Saskatchewan, and Ontario. It also established the Ukrainian Women's Organization of Canada (OUK) and the Ukrainian National Youth Federation (MUNO) as auxiliary bodies. During the late 1930s UNO's connections with European-based Ukrainian groups (particularly the OUN) became an issue of concern to the Canadian authorities, although the group was never subjected to the damaging public scrutiny experienced by its US counterpart, the Organization for the Rebirth of Ukraine. In 1940 UNO became a founding member of the Ukrainian Canadian Committee (now Congress) (KUK). In the postwar period UNO aligned itself politically with the Melnyk faction of the OUN and took a significant portion of the new wave of Ukrainian immigrants into its ranks. UNO's cultural-educational program has included Ukrainian language schools, summer camps for youth, and dance groups and choirs, the best known being the Koshetz Choir in Winnipeg. It has also sponsored higher-education courses for its cultural activists and organized the *Ukrainian Cultural and Educational Centre (Oseredok) in Winnipeg in 1944. In 1980 the federation had 56 branches and about 6,200 members.

Ukrainian National Front (Ukrainskyi natsionalnyi front). A clandestine political organization founded in the mid-1960s in Ivano-Frankivske. In its journal, *Volia i bat'-kivshchyna* (15 issues, 1965-7), it propagated the idea of an independent, democratic Ukraine. Most of its members, including Z. Krasivsky, D. Kvetsko, M. Diak, H. Prokopovych, Ya. Lesiv, V. Kulynyn, M. Kachur, I. Hubka, and M. Melen, were arrested in 1966-7 and sentenced to long prison terms for 'anti-Soviet activity.'

Another organization with the same name and some 40 members was established in Ivano-Frankivske in the mid-1970s. Some of its members, including M. Krainyk and V. Zvarych, were arrested in 1979. I. Mandryka died in mysterious circumstances after his arrest. The group propagated the idea of Ukrainian independence in its journal, *Ukrains'kyi visnyk*, and its almanac, *Prozrinnia*.

Ukrainian National Museum (Ukrainskyi natsionalnyi muzei-arkhiv). A Ukrainian museum and archive founded in Chicago in 1953. Its initial fund consisted of the private folk-art collection donated by O. and A. Kachan and the military artifacts and portraits donated by K. Lysiuk. M. *Simenovych-Simens provided the museum with a building. The museum consists of a folk-art section, a library of over 17,000 books, a military history collection, an archive of émigré materials, and a bibliographic and informational center. The presidents of the museum have been Yu. Kamenetsky (1953-62, one of its founders), Simenovych-Simens (1962-6), I. Mula, R. Weres, and E. Basiuk.

Ukrainian National Museum. See National Museum.

Ukrainian National party (Ukrainska natsionalna partiia, or UNP). The only legal Ukrainian political party in Rumania after the Ukrainian section of the Social Democratic Party of Bukovyna was disbanded. Continuing the traditions of the Ukrainian National Democratic party from the time of the Austro-Hungarian occupation of *Bukovyna, the UNP was centered in Chernivtsi, where it was active in 1928-38. It protested against the forced Rumanianization of the Ukrainian population, demanded that Ukrainian be taught in schools and used in churches, and promoted wide-ranging cultural and national development as well as agrarian reform. Its efforts to expand into Bessarabia and the Maramureş region were stymied by administrative edicts and by a lack of organization. The UNP drew on an electoral base of approx 32,000 voters, but because of Rumanian proscriptions it had to enter into coalitions with Rumanian parties (which it did with the national-peasant party, the liberal party, and the radical-agrarian party). It maintained good relations with parties that represented other minority groups in Rumania, including Jews, Germans, and Hungarians. UNP representatives, particularly its leader V. *Zalozetsky-Sas, participated in the Minorities Section of the League of Nations and spoke out about the oppression of Ukrainians under Rumanian, Polish, and Soviet rule. Yu. Serbyniuk was party secretary; other parliamentary representatives were V. Dutchak, D. Maier-Mykhalsky, and O. Shkraba. Other activists included T. Ivanytsky, L. Kohut, A.

Kyryliv, Yu. Lysan, I. Stryisky, M. Syvy, M. Vitan, R. Yasenytsky, and I. Zhukovsky. The UNP's official organ was the periodical *Rada*; periodicals affiliated with the party included *Ridnyi kraj*, *Chas*, *Narod*, and *Narodnia syla*. The UNP was banned in 1938 along with all political parties in Rumania.

Ukrainian National Rada (Ukrainska natsionalna Rada). A council formed in Lviv on 18 October 1918 to represent the Ukrainian ethnic territories within the Austro-Hungarian Empire in their quest for self-determination. Its membership included all Ukrainian deputies in both houses of the Austrian parliament and the diets of Galicia and Bukovyna, three representatives from each Ukrainian political party in the two crownlands, a group of nonpartisan specialists, and selected deputies from counties and towns. Several seats were reserved for representatives of national minorities, but they were never

filled. The Rada's total membership was 150. On 9 November 1918 the Rada proclaimed the establishment of the *Western Ukrainian National Republic (ZUNR). With its legislative and review powers the Rada served as the parliament of ZUNR and the body to which the *State Secretariat (the latter's executive branch) was accountable. The plenum of the Rada elected an executive consisting of a president and nine members. It was responsible for key state functions, including installing the government, granting amnesties, appointing directors of higher state offices, and enacting legislation passed by the Rada. The post of president was filled first by K. Levytsky and then by Ye. Petrushevych. All constitutional powers were transferred to President Ye. Petrushevych as the 'dictator plenipotentiary' on 9 June 1919, when the government of the ZUNR was forced to quit the country and the *Ukrainian Galician Army retreated beyond the Zbruch River. Until the calling of the next plenum of the Ukrainian National Rada Petrushevych was invested with all military and civil executive powers (see *Dictatorship of the Western Province of the Ukrainian National Republic).

M. Dobriansky

Ukrainian National Republic (Ukrainska Narodna Respublika, or UNR). The Ukrainian state, established at

The UNR diplomatic mission in Hungary in 1919–20. From left: Baron Mykola Vasylo, Otaman Symon Petliura, Gen Volodymyr Sikevych

first on the territory of central Ukraine and then, as of 4 January 1919, also including the Western Ukrainian lands of the former Austro-Hungarian Empire. The UNR was first proclaimed in the Third *Universal of the Ukrainian *Central Rada on 20 November 1917. It was in federation with Russia until it declared complete independence in its Fourth Universal on 25 January 1918 (back-dated to 22 January). Under the Hetman government of P. *Skoropadsky the UNR was renamed the Ukrainian State (29 April to 14 December 1918). Under the *Directory the name UNR was restored. The UNR existed on Ukrainian territory until 1920, when the head of the Directory and the government of the UNR went into exile. The *Government-in-exile of the UNR was first in Poland and then, in 1939–40, in France. After the Second World War (1948) the *Ukrainian National Council was created as a preparatory parliament for the State Center of the Ukrainian National Republic, which continued the traditions of the national republican government of Ukraine until 1992.

Ukrainian National Revolutionary party (*Ukrainska natsionalno-revoliutsiina partiia*). A short-lived (July–August 1917) faction of the Ukrainian Party of Socialist Revolutionaries. Led by M. Liubynsky, it opposed the Central Rada's compliance with the 'Instruction' from the Provisional Government in Petrograd.

Ukrainian National Society for Child and Adolescent Care (*Ukrainske kraiove tovarystvo okhorony ditei i opiky nad moloddu, or UKTOD*). A charitable organization founded in Lviv in 1917 through the efforts of V. *Detsykevych and Rev T. *Voinarovsky-Stolobut. Its chief patron and financial supporter was Metropolitan A. *Sheptytsky. The society had 31 branches throughout Galicia, which maintained 10 orphanages, 6 child shelters, 3 counseling centers for mothers, a publishing house in Lviv, and a children's library. The head office in Lviv operated another orphanage and an outpatient clinic; raised funds for summer camps, Plast Ukrainian Youth Association camps, and rest homes; managed organizational matters; and participated in international conferences. The first president of the UKTOD was M. *Karatnytsky. With the Soviet occupation of Ukraine in 1939, the society's activities ceased.

Leading members of the Ukrainian National State Union with President Andrii Livytsky in 1946. Sitting, from left: Ivan Kabachkiv, Kost Pankivsky, Livytsky, Gen Mykhailo Omelianovych-Pavlenko; standing: Viktor Solovii, Gen Mykhailo Sadovsky, Mykhailo Vetukhiv, Col Mykola Stechyshyn

Ukrainian National State Union (*Ukrainskyi natsionalno-derzhavnyi soiuz, or UNDS*). An émigré political party established in 1946 in Neu-Ulm, Germany. It incorporated a number of groups, including interwar émigré activists; officials of the UNR government-in-exile; veterans of the Army of the UNR; post-Second World War émigrés from Soviet Ukraine (notably the so-called Kharkiv community, which included V. Dolenko and V. Dubrovsky); and political centrists from Western Ukraine (including M. Dobriansky, V. Kubijovyč, K. Pankivsky, and M. Shlemkevych), many of whom had been involved with the *Ukrainian Central Committee (UTsK). The party's official platform was written by M. Dobriansky. T. Olesiuk was its first president, and V. Dolenko headed its executive council. The UNDS was a founding member of the Ukrainian National Council, and B. Ivanytsky, a UNDS activist, was elected as its chairman. At the second UNDS congress, in 1947, the structure of the party was changed, and a central committee headed by M. Oleksiiv was elected. In 1950 M. Livytsky was chosen as leader; he was succeeded by T. Leontii in 1967 and I. Samiilenko in 1982. Other active UNDS members included M. Omelianovych-Pavlenko, M. Sadovsky, A. Valiisky, O. Vyshnivsky, A. Yakovliv, and M. Yurchenko.

Several groups seceded from the UNDS coalition within a decade of its founding and established their own parties. In 1948 the Kharkiv representatives established the Union of Lands of United Ukraine (later known as the Peasant party). In 1950 K. Pankivsky, M. Shlemkevych, and M. Vetukhiv established the Union of Ukrainian National Democrats in the United States. A group of former UTsK adherents led by V. Kubijovyč also left the party. By 1956 only a core group of UNR supporters remained; T. Leontii, was the long-standing director of the UNR executive branch, and in 1965 the UNDS president, M. Livytsky, was elected as president of the UNR government-in-exile.

The official organ of the party, the monthly **Meta*, was published in Munich in 1952–82 (before being moved to Philadelphia) and served as the semiofficial voice of the UNR government-in-exile from the 1970s. In the 1950s the *Biuletyn' UNDS* briefly appeared in the United States. The party also put out four issues of *Biblioteka ukrains'koho derzhavnyka* (1946–9) and other publications.

A. Zhukovsky

Ukrainian National Theater (Ukrainskyi natsionalnyi teatr). A theater founded by the UNR government's Theatrical Committee in Kiev in April 1917, under the artistic directorship of I. Marianenko and with the executive members M. Hrushevska, M. Vorony, and O. Koshyts. The National Theater attempted to move away from the populist-ethnographical repertoire toward a more realistic and contemporary theater genre. Vorony directed its first productions – V. Vynnychenko's *Pryhvozhdzheni* (The Downtrodden) and S. Cherkasenko's *Khurtovyna* (The Snowstorm) – and H. Haievsky directed Vynnychenko's *Panna Mara* (Miss Mara), M. Starytsky's *Oborona Bushi* (The Defense of Busha), Molière's *Tartuffe*, and H. Sudermann's *Fires of St John*. Marianenko staged V. Samiilenko's *U Haikhan-Beia* (At Haikhan Bei's). Other directors included I. Zamychkovsky and M. Petliashenko. Economic and political difficulties led to the dissolution of the theater by the Hetman government in July 1918; its successors were the State Drama Theater and the People's Theater.

Ukrainian National Theater. See Prešov Ukrainian National Theater.

Ukrainian National Union (Ukrainskyi natsionalnyi soiuз, or UNS). An umbrella organization formed at the beginning of August 1918 as a successor to the Ukrainian National-State Union with the intention of establishing a democratic parliamentary system and consolidating Ukraine's independence. Its membership consisted of political parties, such as the Ukrainian Party of Socialists-Federalists, the Ukrainian Social Democratic Workers' party, the Ukrainian Party of Socialist Revolutionaries, and the Ukrainian Party of Socialists-Independentists, as well as civic and professional associations, such as the Peasant Association, the Teachers' Association, the Ukrainian Law Society, the Union of Railway Workers, the Postal-Telegraph Association, the Physicians' Association, the Prosvita society, and the All-Ukrainian Union of Zemstvos. It had branches in Odessa, Vinnytsia, Kremenchuk, Kamianets-Podilskyi, and Poltava. On 5 October 1918 a delegation of the UNS demanded of P. Skoropadsky that he reorganize his Hetman government and introduce Ukrainian ministers. The reformed government (from 24 October 1918) was headed by F. Lyzohub, and included several notable Ukrainian figures. Nevertheless it failed to win the confidence of the UNS. When the Hetman government proclaimed Ukraine's federation with Russia on 14 November 1918 and approved a cabinet of Russian monarchists headed by S. Gerbel, the UNS instigated an uprising against it, which was led by the UNR "Directory". The presidents of the UNS were A. Nikovsky (August to 18 September), V. Vynnychenko (18 September to 14 November), and Mykyta Shapoval (14 November 1918 to January 1919).

Ukrainian National Union in France (Ukrainskyi narodnyi soiuз u Frantsii, or UNSF). A nationalist community organization established in 1932 (with Paris as its center) as an umbrella group for local bodies, Prosvita societies, and clubs active among Ukrainians in France. It supported the idea of a unified Ukrainian state and was active in preserving national consciousness among Ukrainian émigré workers (particularly in preventing them

Members of the executive and audit commission of the Ukrainian National Union in France. Sitting, from left: ?, Ivan Stasiv, Gen Mykola Kapustiansky (president), Panas Zavorytsky, Oleksander Boikiv; standing: Khodan, ?, Kulchenko, Martyniuk, Pidkorych, Nedaikasha, Oleksander Kyselytsia

from becoming Polonized). It also strongly opposed the pro-UNR Union of Ukrainian Emigré Organizations, Mykola Shapoval's Ukrainian Hromada, and the Sovietophile Union of Ukrainian Citizens in France.

UNST began publishing the weekly **Ukrains'ke slovo* in Paris in 1933 and supported the cultural and educational work of Paris's Ukrainian Students' Hromada in different parts of the country. It was formed initially by 13 groups; the number of its affiliates had risen to 50 by 1936 and to 87 by 1939 (with a total membership of 5,000). By that time it was the most influential Ukrainian émigré organization in Europe. The union was headed successively by Gen M. Kapustiansky (1932–8), P. Zavornytsky (1939–43), and O. Boikiv (after 1943). Active members included V. Fedoronchuk, L. Huzar, O. Kyselytsia, M. Nebeliuk, Z. Riznykiv, Yu. Soroko, I. Stasiv, T. Tsvikula, L. Verzhbitska, and P. Zakusylo. In early 1939 the UNSF waged a successful public campaign to encourage Ukrainians of Polish citizenship to join the French Foreign Legion rather than the Polish army – a considerable achievement in light of Poland's close ties with France. During the German occupation, UNSF activity dropped until the group was proscribed early in 1944. It revived after the war, but because of difficulties in registration the group soon dissolved. Its former members created the *Ukrainian National Alliance in France in 1949.

A. Zhukovsky

Ukrainian National Women's League of America (Soiuз ukrainok Ameryky, or SUA). A national organization formed in 1925 by the merger of five women's associations in and around New York. Its purpose is to promote Ukrainian national consciousness, organize educational programs, participate in the wider women's movement, and provide aid to Ukraine or Ukrainians in need. The league raised funds to help flood victims in the Carpathian region (1927), victims of the Polish Pacification (1930), war refugees in Germany and Austria (1946–8), widows with children resettled in the United States (1950), elderly women without families in Europe (1958), earthquake victims in Yugoslavia (1969), political prisoners and their families in the USSR, and needy families in Poland and Brazil. The SUA has supported Ukrainian schools in Austria and Germany (since 1954) and in Belgium

Nashe zhyttia, the magazine of the Ukrainian National Women's League of America

(since 1963) and has provided scholarships (141,000 dollars by 1986) to needy students in Europe and particularly in South America. Local branches run 26 nurseries in the United States. A collection of folk art purchased by the SUA in Galicia in 1932 became the core of its permanent exhibit at the Ukrainian Institute of America in 1967 and then of its Ukrainian Museum in New York (est 1976).

The league has published *Spirit of Flame* (1950), a collection of Lesia Ukrainka's poetry in translation; a second edition of the women's almanac *Pershyi vinok* (The First Garland, 1984); a collection of poetry by N. Livytska-Kholodna (1986); several albums of Ukrainian embroidery; and some cookbooks. It provides grants for scholarly research and prizes for scholarly books. In 1938 it began to publish a special page in *Ameryka*, and in 1944 the monthly **Nashe zhyttia*. The SUA was a founding member of the Ukrainian Congress Committee of America, the United Ukrainian American Relief Committee, and the World Federation of Ukrainian Women's Organizations. It is a member of the General Federation of Women's Clubs (since 1949) and the National Council of Women in the United States (since 1952). It has participated in various international women's conferences. Before the Second World War it maintained contacts with the Union of Ukrainian Women in Galica. Today the league has over 100 branches with a membership of approx 3,500. Its head office was moved to Philadelphia in 1943 and back to New York in 1975. The presidents of the SUA have been Yu. Shustakevych, Yu. Yarema (1925–31), O. *Lototska (1931–4, 1943–65), A. Kmets (1934–5, 1939–43), A. Wagner (1935–9), S. Pushkar (1965–71), L. Burachynska (1971–4), I. Rozhankovska (1974–87), and M. Savchak.

Ukrainian National Youth Federation of Canada (Molod ukrainskoho natsionalnoho obiednannia, or MUNO). The youth affiliate of the *Ukrainian National Federation, established in 1934 as Molodi ukrainski natsionalisty (Young Ukrainian Nationalists). During its earliest years MUNO was active in cultivating a nationalist consciousness among Ukrainian-Canadian youth, in attempting to counter the influence of the Ukrainian pro-communist left, and in providing youth with paramilitary training – most notably through the operation of a radio-telegraph school in Toronto (1935–9) and a flying school in Oshawa (1937–9). Led by the organizing efforts of president P. *Yuzyk (1936–7 and 1941–3), the group had established approx 50 branches throughout Canada by 1939. During the Second World War many of its rural branches

were dissolved, and MUNO's strength was thereafter concentrated in Ontario and the urban centers of western Canada. After the war MUNO was reconstituted with a strong cultural focus, largely through the efforts of M. Orychiwsky (national organizer, 1945–8, and president, 1956–9). It became particularly strong in the field of dance and spawned a number of (later independent) ensembles, including Cheremosh (Edmonton), Yevshan (Saskatoon), Rusalka (Winnipeg), and Kalyna (Toronto). It adopted its current Ukrainian name in 1963. The group published a separate page (with interruptions) in the newspaper **Novyi shliakh* in 1934–47. It then sponsored *Holos molodi* (1947–54) and *MUN Beams* (1955–66). Since 1977 it has published *New Perspectives* as a monthly supplement to *Novyi shliakh*.

Ukrainian National-State Union (Ukrainskyi natsionalno-derzhavnyi soiuз, or UNDS). A co-ordinating organization for Ukrainian parties of the center and right wing (Ukrainian Party of Socialists-Independentists, Ukrainian Party of Socialists-Federalists, Ukrainian Labor party, Ukrainian Democratic Agrarian party), as well as the Unified Council of Railways of Ukraine and the Postal-Telegraph Association. The UNDS was formed in Kiev in mid-May 1918 with the purpose of 'rescuing the threatened Ukrainian nationhood' from the encroachment of influential Russian monarchists in the Hetman government. In its manifesto of 24 May the UNDS expressed a vote of nonconfidence in the government of F. Lyzohub, protesting the anti-Ukrainian activities of some of its ministers and administration and demanding the Ukrainization of the government apparatus. The UNDS widened its scope at the end of July, when it included the left-wing formations of the Ukrainian Social Democratic Workers' party and the Ukrainian Party of Socialist Revolutionaries; subsequently it transformed itself into the *Ukrainian National Union.

Ukrainian Native Faith church (Ridna Ukrainska Natsionalna Vira or RUNVira). A Ukrainian religious body established in the West in 1964 by L. *Sylenko that combines Ukrainian pre-Christian beliefs with monotheism and nationalism. The teachings of RUNVira present the ancient Slavic god *Dazhboh generally as the 'consciousness of the world' and specifically as the Ukrainian

Samobutnia Ukraina, an organ of the Ukrainian Native Faith church

conception of God (comparable to Brahma for a Hindu or Yahweh for a Jew). RUNVira adherents view the adoption of Christianity during Rus' times as an aberration from the 'native faith' of Ukrainians. RUNVira's sense of its 'native faith' as the natural religion of the Ukrainian people is reinforced by a strong affiliation with Ukrainian history and a marked disdain for all foreign invaders of Ukraine. This disposition is most evident in the major scriptural work of the group, *Maha vira* (The Great Faith), the magnum opus completed by Sylenko in 1979. In 1987 the church had 37 branches in the United States (where it has its major world center, in Spring Glen, New York), Canada, Great Britain, West Germany, Australia, and New Zealand. Since 1966 it has published a journal, *Samobutnia Ukraina*.

Ukrainian News. See *Ukrains'ki visti*.

Ukrainian Onomastic Commission (Ukrainska onomastychna komisiia). In 1960 the Commission on Toponymy and Onomastics was created within the AN URSR (now ANU) Social Sciences Section to organize and coordinate onomastic research, teaching, conferences, and publications in Ukraine. It was renamed in 1963. A member organization of the International Onomastic Committee, the commission has been headed by K. Tsiluiko (1960–81) and A. Nepokupny (since 1982). It has approx 30 members, who work at the ANU Institute of Linguistics. Its publications include 15 issues of *Povidomlennia* (1966–76); a prospectus for a hydronymic atlas of Ukraine (ed K. Tsiluiko, 1967); a dictionary of Ukraine's hydronyms (ed A. Nepokupny, O. Stryzhak, and K. Tsiluiko, 1979); and books on the hydronyms of the lower Dniester Basin (ed Yu. Karpenko, 1981), the interlingual and interdialectal aspects of Ukraine's hydronyms (ed O. Stryzhak, 1981), the hydronyms of western Podilia (L. Masenko, 1979), and Baltic-Northern Slavic linguistic ties (A. Nepokupny, 1976).

Ukrainian Orthodox church (Ukrainska Pravoslavna Tserkva). The general designation for a number of Orthodox churches that include Ukrainian believers, clergy-men, and hierarchs. Although all of these churches have a common historical, liturgical, and theological tradition, and some are joined in a spiritual union, they are organized in separate jurisdictions. In addition to the church in Ukraine and the explicitly Ukrainian churches formed by Ukrainian emigrants in the West, some Ukrainians also belong to other Orthodox churches. (For the history of Ukrainian Orthodoxy, see *Church, History of the Ukrainian.)

The annexation of the Ukrainian church by the Russian Orthodox church under the patriarch of Moscow in the late 17th century was followed by the eradication of Ukrainian church autonomy and the increasing Russification of church life and practices. It was only after the fall of the tsarist regime in 1917 that the brief renaissance of Ukrainian statehood permitted the revival of an independent Ukrainian church. In January 1919 the government of the Ukrainian National Republic declared the *autocephaly of the Ukrainian church and its independence from the Moscow patriarch. Efforts to realize this independence in practice culminated in 1921 in the creation of the *Ukrai-

nian Autocephalous Orthodox church (UAOC). This church, under the leadership of metropolitans V. Lypkivsky (1921–7) and M. Boretsky (1927–30), grew to encompass 30 bishops, 1,500 priests, and 1,100 parishes in 1924. But the radical reforms that the UAOC adopted (which stressed the participation of the laity in all aspects of church life), the untraditional rite of ordination that it used to consecrate its hierarchy, and especially its great popularity among the population and the threat it posed to the status of the Patriarchal Russian Orthodox church in Ukraine earned it the enmity of the conservative Russian hierarchy and some of the clergy, who denounced it as noncanonical, illegitimate, and a nationalist creation. The UAOC was also opposed by the Soviet regime, which in the 1920s tried unsuccessfully to undermine it by supporting the competing *Living church, the *Renovationist church, and the so-called Active Church of Christ. In the late 1920s the Soviet authorities decided to destroy all of these bodies, as well as the Patriarchal Russian church. The UAOC was decimated in the Stalinist terror, and all of its hierarchs and many of its priests were killed or died in concentration camps.

The partition of Ukrainian territories in the interwar period found many Ukrainian Orthodox believers living in the Polish state (in Volhynia, Polisia, and the Kholm region). There the *Polish Autocephalous Orthodox church, under Metropolitan D. *Valedinsky, was granted autocephaly by the patriarch of Constantinople in 1924. Despite strong Russifying and Polonizing pressures, many traditions of Ukrainian Orthodoxy survived, the Ukrainian language was introduced for services and church publications, and Ukrainian lay and church figures (eg, Bishop P. *Sikorsky) played a major role in the church.

In *Bukovyna the Orthodox church was initially established as a part of Halych metropoly. From the early 15th to the late 18th century a separate metropoly was centered in Suceava, then the capital of Moldavia. When all of Bukovyna came under Habsburg rule a separate eparchy, which became a metropoly in 1873, was established there. For most of its history this jurisdiction was dominated by Rumanians, but concessions were made to the large Ukrainian minority (in the interwar period there were 155 Ukrainian parishes and 135 priests in Bukovyna).

In the interwar period Orthodox churches were established by Ukrainian immigrants in North America. The *Ukrainian Orthodox Church of Canada (UOCC) was formed in 1918 (until 1990 known as the Ukrainian Greek Orthodox Church of Canada). It was under the spiritual authority of Metropolitan G. Shegedi of the Syrian Orthodox church in the United States until 1924, when Bishop I. *Teodorovych of the UAOC arrived in North America and assumed leadership of it and the *Ukrainian Orthodox Church in the USA (UOC-USA), which had been formed in 1920. Administratively these two churches remained totally independent, however, and the UOCC was actually run by the church's consistory in Winnipeg (Teodorovych had settled in Chicago and then Philadelphia). Both of these churches attracted many former Ukrainian Catholics, who opposed the Latinization of their church and rejected the authority of Roman Catholic hierarchs in North America. (For the same reasons, many immigrants from Transcarpathia established the American Carpatho-Russian Orthodox Greek Catholic church in 1936, but it does not consider itself a part of Ukrainian Orthodoxy.) The

churches especially stressed their Ukrainian character (adopting the Ukrainian language for the liturgy) and conciliar organization. In 1928 many former Ukrainian Catholics in the United States established the *Ukrainian Orthodox Church of America. This group rejected the authority of Teodorovych and the canonical reforms of the UAOC, and placed itself under the jurisdiction of the patriarch of Constantinople. Many parishes left this church in the late 1940s and 1950s to join the UOC-USA. Now the church is administered as part of the Greek Orthodox exarchate of North and South America (it also maintains a few parishes in Canada).

Many Ukrainians in North America also joined other, non-Ukrainian, Orthodox jurisdictions. Before the First World War some 200,000 immigrants from Galicia and Transcarpathia in the United States joined the Russian Orthodox church that was under the patriarch of Moscow and was supported directly by the tsarist government. After the Russian Revolution of 1917 and the subjugation of the church to the Bolshevik regime, this church split. Most parishes were reconstituted in 1924 as the Russian Greek Catholic Orthodox church; it functioned, except for short interludes, as an independent church before being granted autocephaly in 1970 by the patriarch of Moscow and being renamed the Orthodox Church of America. Although many of this church's adherents are of Ukrainian origin, the church has little contact with the other Ukrainian churches, and a conscious attempt was made initially to Russify and recently to Americanize church practices and traditions. The other two jurisdictions to emerge from the pre-First World War Russian Orthodox church (the so-called Patriarchal church, which remained directly under the jurisdiction of the Moscow patriarch, and the Synodal church or Russian Orthodox Church outside Russia, which is under a synod of émigré bishops who do not recognize the patriarch) are much smaller. The Synodal church is predominantly Russian in constituency, though it has attracted some emigrants from eastern Ukraine. The Patriarchal jurisdiction in North America is predominantly composed of former Uniates from Western Ukraine (in the United States) or from Bukovyna (in Canada), but only in western Canada do its members retain links to the Ukrainian community.

During the Second World War the UAOC was revived in German-occupied territories under the spiritual authority of Metropolitan Valedinsky of the Polish Orthodox church and the leadership of P. Sikorsky. Several new bishops (including M. *Skrypnyk) were consecrated for the Reichskommissariat Ukraine (the former Soviet Ukrainian territories). At the same time, two Ukrainians, I. Ohienko and P. Vydybida-Rudenko, were consecrated as bishops for the Orthodox Ukrainians in the Generalgouvernement. Sikorsky was named metropolitan of the UAOC, and attempts were made to absorb surviving clergy from the UAOC of the 1920s into the church, although its radical reforms were not affirmed. A competing body, the *Ukrainian Autonomous Orthodox church, was also organized in German-occupied Ukraine. This church, under Metropolitan O. Hromadsky, recognized the authority of the Moscow patriarch over the Ukrainian church, although it considered this authority suspended as long as the church remained under Soviet control, and was supported by the more conservative and Russified elements of the population. The German authorities encouraged

this division to prevent the emergence of a united church in opposition to their rule.

After Soviet rule was consolidated throughout Ukraine at the end of the Second World War, both the UAOC and the Autonomous church were destroyed, and most of the UAOC bishops and many priests fled to the West. The Ukrainian exarchate of the *Russian Orthodox church (ROC) remained as the only legal church entity in Ukraine, and it was closely controlled by the regime. At the *Lviv Sobor of 1946 the Ukrainian Greek Catholic church in Western Ukraine was forced to liquidate itself and join the ROC. The surviving hierarchy of the UAOC fled to Western Europe, where they re-established the church under Metropolitan Sikorsky. When they also did not affirm the most radical reforms of the UAOC of the 1920s, an opposition emerged, and in 1947 the *Ukrainian Autocephalous Orthodox Church (Conciliar) under the leadership of Bishop H. Ohichuk split from the UAOC. Since then the UAOC (Conciliar) has also split and reunited itself several times. Another jurisdiction, the short-lived *Ukrainian Autocephalous Orthodox Church in Exile, was established under Bishop P. Vydybida-Rudenko in New York in 1951. Other bishops and priests of the UAOC also emigrated to North America, where they joined the UOCC or UOC-USA. In 1949 Archbishop Teodorovych underwent a reconsecration as part of an agreement to unite the Ukrainian Orthodox Church of America and the newly arrived followers of the UAOC with his church. Many parishes of the former and most of the clergy and believers of the latter took part in the unification, thereby creating the largest Ukrainian Orthodox jurisdiction in the United States, since 1970 headed by Metropolitan Skrypnyk.

Now, Skrypnyk is metropolitan of both the UOC-USA and the UAOC (which includes parishes in South America, Europe, and Australia), but the two bodies remain administratively independent. In 1960 the three largest jurisdictions – the UOCC, UOC-USA, and UAOC – at a joint sobor resolved that outside Ukraine there is a single Ukrainian Orthodox church, which is autocephalous and conciliar and consists of three independent metropolies that create a single spiritual whole. This sobor also took steps to standardize liturgical practices and the training of priests for the churches. The *Ukrainian Orthodox church in Australia, which dates only from the late 1940s, is split into two jurisdictions, one under the UAOC and the other under the Ukrainian Greek Orthodox Church in Canada.

After the Second World War the ROC, in addition to assuming total control over the church in Ukraine, extended its authority over the Orthodox church in Poland. Metropolitan Valedinsky was forced to resign his post and was replaced by a bishop from the ROC. At the same time the Moscow patriarch invalidated the 1924 *Tomos* of the patriarch of Constantinople granting autocephaly to the Polish church, and replaced it with its own grant of autocephaly. The Polish Autocephalous Orthodox church, however, remains a Russian-dominated institution with occasional Polonizing tendencies, despite the fact that the majority of its believers are Ukrainians or Belarusians, and in recent years it has begun to protest this situation. The small Orthodox church in Czechoslovakia has Ukrainian parishes in the Prešov region. The Rumanian Orthodox church, which has several parishes in the largely Ukrainian *Maramureş region and southern Bukovyna, is independent of Moscow. Since 1990 it has permitted an administration

for Ukrainian believers. It also tolerates some practices of Ukrainian Orthodoxy and the limited use of the Ukrainian language in services, but has no Ukrainian hierarchs. In any case, none of the churches in the Ukrainian border states can be seen as national Ukrainian institutions.

The relative liberalization of the Gorbachev regime in the late 1980s permitted the rebirth of Ukrainian Orthodoxy in Ukraine. Several parishes and priests began to leave the official ROC and re-form themselves as a revived UAOC. In 1989 Bishop I. Bodnarchuk left the ROC to head a new UAOC hierarchy. The church sobor in June 1990 elected Metropolitan M. Skrypnyk as patriarch, and he was installed in October 1990. In response to these developments the ROC began granting its Ukrainian exarchate increased independence: it renamed it the Ukrainian Orthodox church and in October 1990 proclaimed that it was formally independent and administratively autonomous. The church was to be returned its right to choose its own metropolitan (although the candidate had to be approved by the patriarch of Moscow) and hierarchs; the head of the church, however, is the former exarch, Metropolitan F. *Denysenko. A struggle has developed between the two jurisdictions over parishes and other church property in Ukraine. In general the UAOC has greater support in western and central Ukraine, where it is supported as a national church; the other church enjoys its greatest support in the more Russified east and south.

A. Zhukovsky

Ukrainian Orthodox church in Australia. The first Orthodox parishes in Australia were founded in 1945 following the arrival of postwar immigrants from Soviet Ukraine and Bukovyna. These immigrants included several priests and Bishop S. Haievsky of the Ukrainian Autocephalous Orthodox church (UAOC). Other hierarchs in the 1950s to 1970s were Bishops I. Danyliuk, V. Solovii, and D. Burtan. The eparchy, with its see in Canberra, includes parishes in New Zealand. A split developed in the 1960s, and now there are two separate jurisdictions, the Ukrainian Autocephalous Orthodox church (which recognizes the authority of Metropolitan M. Skrypnyk) and the Ukrainian Orthodox church (which is affiliated with the Ukrainian Orthodox Church of Canada [UOCC] and recognizes that church's metropolitan as its spiritual head). From 1986 to 1990 Bishop V. Didovych headed the branch under the UAOC, which in 1989 had 9 priests, 10 parishes, and 2 small communities in New Zealand. The church's consistory has published the quarterly *Pratsia i zhyttia* since 1966. The branch under the UOCC has fewer parishes and no bishop of its own.

Ukrainian Orthodox Church in the USA (Ukrainska Pravoslavna Tserkva v SSHa, or UOC-USA). The largest Ukrainian Orthodox church in the United States. It is in communion with the Ukrainian Orthodox Church of Canada and the *Ukrainian Autocephalous Orthodox church (UAOC) in Western Europe but is administered independently.

The first UOC-USA parishes were founded in 1919, mostly by former Ukrainian Catholics from Galicia or Orthodox from Transcarpathian Ukraine and Bukovyna. At that time several Catholic parishes founded as early as 1903 joined the new church. Influenced by the movement for an independent church in Ukraine, these parishes founded

The first synod (1924) of the Ukrainian Orthodox Church in the USA. Sitting in the center is Archbishop Ioan Teodorovych.

the independent UOC-USA at a national convention held in Newark in 1920. Its first administrator was Rev N. Kopachuk, an Orthodox priest from Bukovyna. This church organization proclaimed its unity with the UAOC in Ukraine. In 1924 Archbishop I. *Teodorovych was dispatched by the All-Ukrainian Orthodox Council in Kiev to serve as a hierarch for the new churches in the United States and Canada.

The UOC-USA grew quickly, and by 1932 it included 32 parishes and 25 priests. Some priests and faithful, however, questioned the canonicity of Teodorovych's episcopal ordination by the UAOC and formed the *Ukrainian Orthodox Church of America (UOCA) under the jurisdiction of the patriarch of Constantinople. In the late 1940s many parishes left the UOCA to join the UOC-USA, and attempts were made to unite the two jurisdictions. In 1949 Teodorovych even accepted a reconsecration to satisfy the demands of some elements of the UOCA, but the division remained. With the arrival of postwar immigrants the church grew, and many new parishes were founded. In 1950 a sobor in New York reorganized the church as a metropolity under Metropolitan Teodorovych, and in 1951 the see and the administrative offices were transferred to South Bound Brook, New Jersey, where a memorial church (St Andrew's), a museum, an archive and library, and a Ukrainian cemetery were all founded.

In the 1960s the UOC-USA had 93 parishes, 94 priests, and approx 100,000 faithful. Teodorovych was assisted by Archbishop M. *Skrypnyk, who became administrative head of the consistory. In 1967 three eparchies were established, in New York (Skrypnyk), Detroit (Archbishop V. Malets), and Chicago (Archbishop H. Shyprykevych). In 1975 St Sophia's Seminary was opened in the Ukrainian Orthodox center in South Bound Brook; it is affiliated with Rutgers University in New Brunswick. The church has published *Ukrains'kyi pravoslavnyi kalendar* (1951-), *Ukrains'ke pravoslavne slovo* (1951-), the English-language *Ukrainian Orthodox Word* (1967-), and *Dnipro* (1920-50). By 1990 the church had over 100 priests and parishes and over 100,000 adherents.

H. Myroniuk

Ukrainian Orthodox Church of America (Ukrainska Pravoslavna Tserkva v Amerytsi, or UOCA). A church founded in 1928 in Allentown, Pennsylvania, that is under the jurisdiction of the patriarch of Constantinople. Its predecessor was the American Greek Catholic church, founded in 1926 under the administration of Rev Y. Pelekhovych. The church attracted former Ukrainian Catholics who resented the Latinization of their church and the authority of Roman Catholic hierarchs in the United States (later it attracted some parishes in Canada formed by immigrants from Bukovyna). The church, priests, and faithful refused to join the *Ukrainian Orthodox Church in the USA because they questioned the canonicity of Archbishop I. Teodorovych's episcopal consecration. Rev Y. Zhuk (a Catholic priest from Galicia) was selected as the church's bishop in 1931 and consecrated in 1932 by the patriarch of Constantinople. He was succeeded by Bishop B. *Shpylka (consecrated in 1937), who later was named metropolitan. In the late 1940s some of the UOCA's parishes joined the church headed by Archbishop Teodorovych, and an attempt at uniting the churches was made in 1948, but Bishop Shpylka and some of the parishes refused to join the other group. In 1959 the UOCA had 37 parishes, 52 priests, and 40,000 faithful. Bishop A. *Kushchak headed the church from 1967 to 1986. In 1980 the church had 1 bishop and 26 parishes (including several organized in a Canadian administration). In 1983 it was elevated to the status of a metropolis. Since 1987 Bishop V. Maidansky has headed the church. The UOCA is administered as a part of the Greek Orthodox exarchate in the Americas. It publishes the quarterly newsletter *Ukrainian Orthodox Herald (est 1928).

The consistory of the Ukrainian Orthodox Church of Canada in 1980. Sitting, from left: Rev Semen Sawchuk, Archbishop Mykola Debryn, Archbishop Borys Yakovkevych, Metropolitan Andrei Metiuk, Bishop Wasyl Fedak, Rev Hryhorii Udod

Ukrainian Orthodox Church of Canada (Ukrainska Pravoslavna Tserkva v Kanadi, or UOCC). The major Ukrainian Orthodox jurisdiction in Canada. The church was known as the Ukrainian Greek Orthodox Church of Canada until 1990, when the word 'Greek' was dropped from common use. (Officially, its charter was amended by Parliament only in 1991.) Until 1918 the spiritual needs of the Orthodox Ukrainians in Canada, mainly immigrants from Bukovyna, were met by the itinerant clergy of the Russian Orthodox mission in the United States, subsidized by the Russian government. Protestants also tried to penetrate the Ukrainian community in the guise of Orthodoxy through the *Independent Greek church, absorbed in 1912 by the Presbyterian church.

The formation in 1918 of a national Ukrainian Orthodox

church resulted from a bitter conflict between Bishop N. Budka, head of the Ukrainian Catholic church in Canada, and a nationalistically minded segment of the Ukrainian intelligentsia associated with the *Mohyla Ukrainian Institute in Saskatoon and the weeklies *Ukrains'kyi holos and *Kanadiis'kyi farmer. A range of controversial issues – the bishop's personality, parish property rights, a perceived Latinization of the Ukrainian Catholic church in Canada – led to a schism. In July 1918 a confidential conference of disenchanted lay Catholics from Manitoba, Saskatchewan, and Alberta created a Ukrainian Orthodox Brotherhood to organize the Ukrainian Greek Orthodox Church of Canada. The church placed itself under the temporary spiritual jurisdiction of Metropolitan G. Shegedi of the Syrian Orthodox church in the United States, who accepted the new church's administrative body, the elected consistory.

The new church was a distinct Canadian institution, unconnected with any Ukraine-based church. It accepted the traditional dogma and rites of Eastern Orthodoxy, including a married clergy. It also stressed that church property was to be owned by congregations (and not the bishop), and that the church was to be democratic and conciliar in organization. Theology classes were begun in Saskatoon in 1919, and the church's first three priests, S. *Sawchuk, P. Samets, and D. Stratyuk, were ordained by Shegedi in 1920. Large numbers of Ukrainians who had formerly belonged to the Russian Orthodox and Ukrainian Catholic churches joined the newly formed UOCC.

In 1924 Archbishop I. *Teodorovych of the *Ukrainian Autocephalous Orthodox church, formed in Kiev, became primate of the *Ukrainian Orthodox Church in the USA, and the church in Canada, with 14 priests, also accepted his primacy; the UOCC, however, insisted on retaining its administrative independence under Rev Sawchuk as church administrator and president of the consistory. The *Ukrainian Self-Reliance League, formed in 1927, became an effective lay arm for the UOCC and boosted its fortunes. By the end of 1928 the church had approx 64,000 followers, organized in 152 parishes served by 21 priests. It was strongest in Saskatchewan (81 parishes in 1940), Alberta (55 parishes), and Manitoba (53 parishes).

Serious internal conflict broke out in 1935–40 between the consistory and a group led by W. *Swystun and centered around the church's designated cathedral parish, St Mary the Protectress in Winnipeg. The group questioned Teodorovych's leadership and his desire for a closer relationship with other Orthodox churches, and the parish seceded. Despite its problems the church opened a theological school, *St Andrew's College, in 1946.

In 1947 Archbishop M. *Skrypnyk, newly arrived from Europe, succeeded Teodorovych, but policy differences with the consistory led to his resignation in 1950, and the church came under the temporary authority of Metropolitan P. Sikorsky of the *Ukrainian Autocephalous Orthodox church (UAOC) in Europe. In August 1951 Metropolitan I. *Ohienko was elected primate, and Archbishop M. *Khoroshy became bishop of Toronto. At the same time the church was reorganized as a metropolis with three eparchies and two bishops; a self-contained and independent church able to perpetuate its own hierarchy was thereby created. By 1951 it had almost 300 congregations, 70 priests, and some 110,000 adherents. By 1963 the UOCC had four eparchies (Winnipeg, Toronto, Edmonton, and Saskatoon). Under Metropolitan Ohienko

(1951–72) relations with the Ukrainian Catholic and Protestant churches improved. Ohiienko was succeeded by Khoroshy (1972–5), A. Metiuk (1975–85), and W. Fedak (1985–).

The quinquennial councils or sobors represent the supreme decision-making body of the UOCC. Executive duties are shared between the council of bishops and the consistory, based in Winnipeg and composed of elected representatives of the laity and the clergy. The Ukrainian Self-Reliance League, with its component organizations, continues to play a leading role in church affairs at the local and national levels. In addition to St Andrew's College, the church is affiliated with three student residences: the Mohyla Ukrainian Institute in Saskatoon, St John's Institute in Edmonton, and St Vladimir Institute in Toronto. Its organ since 1924 has been **Visnyk*. Since 1978 several parishes of the Ukrainian Orthodox church of Australia have also been under the jurisdiction of the UOCC.

Data on membership are imprecise because many faithful have been classified as Greek Orthodox rather than Ukrainian. Historically, membership has been relatively stable, and has ranged between 20 and 25 percent of the total Ukrainian-Canadian population. In 1989 the church's estimated membership was 128,000, in 293 congregations with 99 clergy. Since 1960 the UOCC has been in spiritual union with the Ukrainian Orthodox Church in the USA and the UAOC, both of which are headed by Metropolitan Skrypnyk. In July 1990 the sobor of the UOCC ratified an agreement with the ecumenical patriarch of Constantinople that established a eucharistic union between the two churches. In 1990 the church had three bishops. (See also **Canada*.)

Ukrainian Orthodox Herald/Ukraïns'kyi pravoslavnyi visnyk. A bilingual English-Ukrainian illustrated quarterly organ of the Ukrainian Orthodox Church of America. Founded ca 1928, it appeared irregularly until 1967 as *Ukraïns'kyi visnyk*. It contains information about church affairs as well as articles on religious and cultural topics.

Ukrainian Orthodox League of the USA (Ukrainska pravoslavna liga ZSA, or UOL). An association of Ukrainian Orthodox laity founded in 1947 in New York for the purpose of propagating knowledge about Ukraine and its Orthodox church and involving young people in church activities. The league has organized annual summer camps, art and dance competitions, and basketball tournaments; published educational pamphlets on Ukrainian issues; granted scholarships to seminarians; and held annual conventions. In 1961 a junior division was formed. Today the senior division has 30 chapters, and the junior division has 20. Recent presidents of the UOL have included G. Woloschak and E. Skocypiec.

Ukrainian Orthodox (Synodal) church. See Living church.

Ukrainian Orthodox Word. An English-language organ of the Ukrainian Orthodox Church in the USA, published quarterly in South Bound Brook, New Jersey, since 1967. It contains church news and articles on religion, history, and culture, many of which are translated from the church's Ukrainian-language publication, *Ukraïns'ke pravoslavne slovo*.

Members of the Ukrainian Parliamentary Representation and Ukrainian émigré leaders at a conference of the Interparliamentary Union held in Berlin in 1928. From left: Rep Antin Maksymovych, Zenon Kuzelia, Rep Dmytro Paliiv, Yevhen Konovalets, Rep Oleksander Vyslotsky, Rep Stepan Kuzyk, Dmytro Andrievsky, Rep Ivan Blazhkevych, Sen Ostap Lutsy, Rep Volodymyr Pellikh

Ukrainian Parliamentary Representation (Ukrainska parlamentarna reprezentatsiia). The Ukrainian caucus in the Polish Sejm and Senate in 1928–30. Similar in nature to the **Ukrainian caucus in the Russian State Duma*, the representation was organized after the 1928 parliamentary elections. Its immediate precedent was the bloc of Ukrainian deputies from Volhynia and the Kholm region in the first Sejm (1922–7). In the campaign of 1928 the Ukrainian parties formed a coalition with the Belarusian and other minority groups to present a common slate of candidates. Ukrainians won 42 seats in the Sejm and 12 in the Senate. The majority of the Ukrainian deputies belonged to the representation, which was dominated by the Ukrainian National Democratic Alliance. It presented a common front on Ukrainian issues. After the 1930 election a joint Ukrainian representation did not take shape, because of Polish harassment and contention among Ukrainian parties.

Ukrainian Party of Labor (Ukrainska partiia pratsi, or UPP). A political party formed in Lviv on 7 May 1927 by the followers of Ye. Petrushevych as a breakaway group from the Ukrainian National Democratic Alliance (UNDO), largely in reaction to UNDO's growing anti-Soviet stance. The UPP remained to the left of the Galician political mainstream and was a strong opponent of the Polish state. The main item of its political platform was the unification of all ethnic Ukrainian lands into one independent country, although it relegated specific legal and state issues in that area to a secondary position. In its quest for a united Ukraine the party aligned itself to the national fortunes of the Ukrainian SSR, which it acknowledged as the core of

the future state. Accordingly the UPP experienced a major crisis as a result of the arrest and subsequent show trial (March–April 1930) in Soviet Ukraine of 45 members of the so-called *Union for the Liberation of Ukraine. The party suffered a further setback with its poor success during the November 1930 elections to the Polish Sejm. It was dissolved almost immediately thereafter. The leaders of the UPP included V. Budzynovsky, M. Zakhidny, and M. Topolnytsky. Its publications were the biweekly *Rada* and the weekly *Pratsia*.

Ukrainian Party of National Work (Ukrainska partia natsionalnoi roboty, or UPNR). A political party formed in Lviv on 24 April 1924 by a group of politicians originally affiliated with the *Ukrainian Labor party. They were joined by the editorial staff of the journal *Zahrava*, which was published by D. Dontsov. The executive committee consisted of O. Lutsky, D. Paliiv, S. Pidhirsky, K. Troian, and Yu. Sheparovych. Their political program maintained that the Ukrainian nation had been reduced by foreign elements controlling the cities into a dependent rural society. The party believed that effective counteraction could be developed only through a system of re-education of the younger generations, who would develop a sense of discipline and self-reliance. The group's rallying cry was 'Ukraine for the Ukrainians.' Its political platform also denounced unequivocally all doctrines of internationalism or cosmopolitanism. The party was never able to implement its ambitious goals, and was dissolved on 11 July 1925, when its members joined forces with the newly formed *Ukrainian National Democratic Alliance. Nonetheless the political program of the UPNR strongly influenced the shaping of the ideology of Ukrainian nationalism.

Ukrainian Party of Socialist Revolutionaries (Ukrainska partiia sotsialistiv-revoliutsioneriv, or UPSR). A national-liberationist revolutionary socialist party that played an important role in Ukraine during the revolutionary period of 1917–20. Modeling themselves on the Russian Socialist Revolutionary party, small, clandestine cells of nationally conscious Ukrainian socialist revolutionaries were active in Symferopil and Odessa from 1905, in Kiev, Poltava, Chernihiv, Podilia, Kherson, and Tavriia gubernias from 1906, and in Kharkiv gubernia from 1907. In 1907 they held a conference and elected a Central Committee headed by Mykola *Zalizniak. In 1915 the Kiev group published five issues of *Borot'ba*, and in 1916 it issued a draft program. As a national party the UPSR held its founding congress in Kiev, on 17–18 April 1917. There it adopted resolutions calling for the national and territorial autonomy of Ukraine, convening of a Ukrainian constituent assembly, and socialization of all land; L. Bochkovsky, V. Ihnatiienko, P. Khrystiuk, Mykola Kovalevsky, K. Korzh, L. Kovaliv, I. Maievsky, O. Shleichenko, and V. Zalizniak were elected to the CC. At the second UPSR congress (28–31 July 1917) a radical socialist program was adopted, which provided for the transformation of the Russian Empire into a federation of national republics; I. Baziak, M. Chechel, D. Isaievych, I. Kovalenko, Kovalevsky (chairman), Korzh, S. Lymar, I. Lyzanivsky, H. Mykhailychenko, Yu. Okhrymovych, M. Panchenko, P. Plevako, A. Polonsky, M. Poloz, I. Puhach, P. Pylypchuk, M. Saltan, O. Sevriuk, Mykyta Shapoval, O. Shleichenko,

and M. Shrah were elected to the permanent CC. At the third congress (3–6 December 1917) the UPSR clarified its position on the need for social revolution in Ukraine and on government by democratic councils of the toiling masses.

In 1917–19 the UPSR was the leading spokesman of the Ukrainian peasantry. In its daily *Borot'ba*, its biweekly *Vil'na spilka*, and the co-operative daily **Narodnia volia* it promoted the slogan All Land to the Toilers without Redemption Payments and thus attracted mass support (by November 1917 it had nearly 75,000 members) and control of the influential Ukrainian *Peasant Association. It had the largest caucus in the Ukrainian *Central Rada; one of the vice-presidents, Shrah, was a member. In the *General Secretariat of the Central Rada the general chancellor Khrystiuk and the secretaries V. Holubovych, M. Savchenko-Bilsky, Kovalevsky, Shapoval, M. Stasiuk, O. Zhukovsky, and O. Zarudny were UPSR members; and the *Council of Ministers of the UNR formed after the declaration of Ukrainian independence in January 1918 included UPSR members, such as Holubovych (the prime minister), N. Hryhoriiv, Khrystiuk, Kovalevsky, M. Liubynsky, A. Nemolovsky, Shapoval, and Zhukovsky. Holubovych and Sevriuk headed the UNR delegation that signed the Peace Treaty of Brest-Litovsk, and Liubynsky and Poloz were members.

Under the right-wing 1918 Hetman government many UPSR leaders were arrested, and the party was forced to go underground. At its secret fourth congress near Kiev on 13–16 May 1918, ideological differences split the UPSR. The internationalist left wing (V. Blakytyn [Ellansky], Kovaliv, P. Liubchenko, Yu. Mazurkevych, Mykhailychenko, Poloz, A. Prykhodko, O. Shumsky, A. Zalyvchy), which had repudiated the Central Rada and advocated co-operation with the Bolsheviks, gained control of the CC. A few weeks later the CC dissolved the UPSR and formed a new underground revolutionary organization that conducted political terror and organized a separate uprising against the government and the German occupation. The party's right wing (Chechel, Holubovych, Khrystiuk, D. Odryna, Saltan, Sevriuk, Shrah, A. Stepanenko, Zhukovsky) and center (Hryhoriiv, Lyzanivsky, Okhrymovych, Shapoval, O. Yanko) rebuilt the UPSR only after the left formed the separate pro-Bolshevik party of *Borotbists in March 1919. In the meantime the center played a key role in organizing the *Ukrainian National Union that co-ordinated the successful popular rebellion against the German-backed Hetman government, and after the UNR Directory took power in December 1918, a few of its members (O. Mytsiuk, S. Ostapenko, Shapoval, I. Shtefan) received portfolios in the renewed Council of Ministers of the UNR of December 1918 to February 1919. At the January 1919 legislative *Labor Congress UPSR delegates constituted the majority and pushed through resolutions on the socialization of land, the nationalization of the railways, sugar refineries, and industrial enterprises, and the transfer of power to collectives of representatives of the toiling masses. UPSR members did not take part in the pro-Entente Council of National Ministers in February to April 1919, and in protest against its policies the UPSR and other socialist parties formed in March the Committee for the Defense of the Republic. In the socialist Council of National Ministers headed by B. Martos (April to August 1919) and Isaak Mazepa (August 1919 to April 1920), however, UPSR members (T.

Cherkasky, Hryhoriiv, Kovalevsky, Lyzaniivsky, Odryna, I. Palyvoda, L. Shramchenko) again held portfolios. Many members joined the ranks of the UNR Army and the *partisan movement that fought the Reds, Whites, and Allied expeditionary forces.

From late 1919 on, many UPSR leaders and a small number of members lived as émigrés in Polish-ruled Western Ukraine and in Central Europe, especially in Austria and Czechoslovakia. At the UPSR conference in Tarnów, Poland, a Foreign Committee led by Shapoval and consisting of Hryhoriiv, Mytsiuk, and H. Hrytsai was elected. The ideologues Shapoval and Hryhoriiv propagated the principle of the 'dictatorship of a democracy of toilers' in a sovereign pan-Ukrainian federal republic and elaborated a critique of the USSR as a state-capitalist, colonialist, totalitarian system. In Vienna M. Hrushevsky, Chechel, Shrah, Khrystiuk, and Isaievych founded the UPSR Foreign Delegation; its organ **Boritiesia – poborete!* promoted the idea of transforming the UNR into a republic of workers' and peasants' councils and reaching an accord with Soviet Russia. From February to July 1920 it had a common 'soviet-revolutionary bloc' with V. Vynnychenko's Foreign Group of the *Ukrainian Communist party, with the aim of creating an independent Ukrainian soviet republic. The Foreign Delegation belonged to the Second International until January 1921, when it withdrew because the International did not support the principles of social revolution.

By January 1921 the émigré UPSR had split into mutually hostile factions: (1) the small Vienna-based Foreign Delegation, which supported recognition of Kh. Rakovsky's Soviet Ukrainian government; (2) Shapoval's anti-Soviet, revolutionary-socialist UPSR Foreign Committee (renamed the Foreign Organization in 1925) in Prague, which published the irregular organ *Vil'na spilka*, played a key role in the *Ukrainian Civic Committee and *Ukrainian Committee in Czechoslovakia, the *Ukrainian Institute of Sociology, and the monthly **Nova Ukraïna* and strongly opposed the 'bourgeois' *Government-in-exile of the UNR; and (3) the right-wing UPSR Foreign Organizational Committee, headed by Kovalevsky and Mykola Zaluzniak in Vienna, which had been purged from the UPSR in 1920 for supporting S. Petliura. In 1924 the members of the Foreign Delegation returned to Ukraine to help build a Ukrainian state; there, during the Stalinist terror, they were repressed. At the 1927 conference of the Foreign Organization a new provisional program by Shapoval was adopted. After Shapoval's death in 1932, the remaining factions reunited and established in Prague a common CC, which published the irregular **Trudova Ukraïna*. Other leading members of the émigré UPSR were M. Balash, P. Bohatsky, S. Dovhal, Isaievych, K. Kobersky, L. Kobylansky, M. Kosenko, V. Liakh, M. Mandryka, Palyvoda, S. Pilkevych, S. Ripetsky, M. Stakhiv, F. Sumnevych, B. Zalevsky, and A. Zhyvotko. The interwar *Ukrainian Radical party in Western Ukraine and the *Oborona Ukrainy organization in North America had close links with the émigré UPSR. After the Second World War the UPSR was reactivated in Western Europe under the leadership of Shapoval and Ya. Zozulia. In 1948 it joined the *Ukrainian National Council, and in 1950 it fused with other émigré parties to form the *Ukrainian Socialist party.

Ukrainian Party of Socialist Revolutionary-Borotbists (Communists). See Borotbists.

Ukrainian Party of Socialists-Federalists (Ukrainska partiia sotsialistiv-federalistiv, or UPSF). A numerically small but influential liberal democratic party that superseded the *Society of Ukrainian Progressives (TUP) in April 1917. Until June 1917 it was called the Union of Ukrainian Autonomists-Federalists. The UPSF leader was S. *Yefremov. Its organ was the daily **Nova rada*. Of all the Ukrainian political parties that arose after the February Revolution the UPSF had the largest number of experienced politicians and members of the elite intelligentsia, who had long been involved in national-cultural work. Its program was based on that of the *Ukrainian Democratic Radical party (1905–8), the predecessor of TUP.

In 1917–18 Yefremov was vice-president of the Ukrainian Central Rada, and he and other UPSF members, such as O. Shulhyn, P. Stebnytsky, O. Lototsky, and M. Tuhan-Baranovsky, held portfolios in its *General Secretariat; the latter two secretaries resigned after the proclamation of the Third *Universal in November 1917. In the 1918 *Council of National Ministers of the UNR portfolios were held by the UPSF members I. Feshchenko-Chopivsky, P. Kholodny, I. Kraskovsky, Lototsky, V. Prokopovych, S. Shelukhyn, and Shulhyn, and A. Yakovliv served as UNR emissary to Austria-Hungary. The UPSF boycotted the 1918 *Hetman government and took part in organizing the oppositional *Ukrainian National-State Union and *Ukrainian National Union. D. Doroshenko, however, resigned from the UPSF to become acting minister of foreign affairs, Shelukhyn chaired the government's peace delegation to Soviet Russia, Shulhyn served as ambassador to Bulgaria, and V. Leontovych, Lototsky, M. Slavinsky, Stebnytsky, and A. Viazlov participated in the government's Council of Ministers of October–November 1918. After the overthrow of the Hetman government in December, under the UNR Directory the UPSF members Feshchenko-Chopivsky, Kholodny, O. Korchak-Chepurkivsky, M. Korchynsky, D. Markovych, K. Matsievych, and I. Ohienko held portfolios in the revived UNR Council of National Ministers, until April 1919. Others served as UNR ambassadors to Greece (F. Matushevsky), Bulgaria (Shulhyn), Turkey (Lototsky), Czechoslovakia (Slavinsky), Rumania (Matsievych), Sweden and Norway (K. Losky), and Holland and Belgium (Yakovliv), and as members of the UNR delegation at the Paris Peace Conference (Shulhyn, Shelukhyn, M. Kushnir).

Most UPSF members fled from the Bolshevik occupation of Ukraine in 1919–20. In Tarnów, Poland, Prokopovych became prime minister of the new UNR Council of National Ministers in May 1920, and Kholodny, Ohienko, A. Nikovsky, and O. Salikovsky received portfolios. Feshchenko-Chopivsky headed the *Council of the Republic in 1921. In 1923 the émigré UPSF was renamed the Ukraini-

an Radical Democratic party (URDP). Lototsky was elected its leader. He and other members, such as P. Chyzhevsky, Matsiievych, Prokopovych, Shulhyn, Salikovsky, Slavinsky, and Yakovliv, played important roles in the *Government-in-exile of the UNR; Prokopovych served as prime minister (1926–39) and head of the UNR Directory (1939–40), and Lototsky was deputy prime minister. Other prominent UPSF/URDP members were V. Bidnov, Z. Mirna, I. Mirny, I. Shrah, and L. Starytska-Cherniakhivska. The URDP ceased functioning during the Second World War and was not revived.

A. Zhukovsky

Ukrainian Party of Socialists-Independentists (Ukrainska partiia sotsiialistiv-samostiinykiv, or UPSS). A numerically small nationalist party founded in Kiev on 30 December 1917 by members of the former *Ukrainian People's party and by UNR Army senior officers. In its weekly organ *Samostiinyk* (Kiev 1918) the UPSS demanded the immediate proclamation of Ukrainian independence. Although it advocated a social program based on the peasants' ownership of the land and the workers' ownership of industrial enterprises, it was in fact antisocialist and therefore opposed the General Secretariat of the Central Rada and criticized its land-socialization policies and its liberal position with respect to the ethnic minorities. It also opposed the succeeding 1918 Hetman government and took part in the creation of the *Ukrainian National-State Union and Ukrainian National Union. O. Andriievsky represented the UPSS in the UNR *Directory, and under its rule the UPSS members M. Bilynsky, M. Kryvetsky, I. Lypa, O. Osetsky, O. Shapoval, and D. Symoniv held portfolios in the UNR *Council of National Ministers until April 1919. Other prominent UPSS members were P. Bolbochan, I. Lutsenko, O. and P. Makarenko, and O. Stepanenko. Dissatisfied with the policies of the UNR government headed by B. Martos and supporting the idea of creating a military dictatorship to fight Soviet Russia, Andriievsky and the UPSS supported Otaman V. *Oskilko's failed coup in Rivne in April 1919. Thereafter the UPSS had negligible influence. Its émigré members joined a short-lived coalition of Ukrainian antisocialist opponents of S. Petliura in Vienna in 1921. In 1923 the émigré Ukrainian People's Party of Socialists-Independentists was founded by Oskilko in Polish-ruled Volhynia. In its government-funded organ, *Dzvin* (Rivne, 1923–8), it advocated co-operation with the Polish regime and therefore had little support. The party fell apart after Oskilko's death in 1926.

R. Senkus

Ukrainian Patriarchal Society in the United States (Ukrainske patriarkhalne tovarystvo v Amerytsi, or UPT). An organization founded in 1965 to pursue the cause of establishing a Ukrainian Catholic patriarchate headed by Cardinal Y. Slipy. Until 1979 it was called the Society for the Promotion of the Patriarchal System in the Ukrainian Catholic Church. The UPT has organized petitions and demonstrations and copublished the monthly **Patriarkhat* (until 1977 titled *Za patriarkhat*) and other lit-

erature to promote the idea of self-government in the Ukrainian church. It has approx 30 branches and over 2,500 members. Its head office has moved from New York to Philadelphia to Detroit. The presidents of the UPT have included V. Kachmar, V. Shebunchak, V. Pasichniak, Z. Gil, M. Navrotsky, V. Lonchyna, O. Pryshliak, and R. Haida. Similar associations have arisen in Argentina, Australia, Canada, Germany, and France and are united with their American model group in the Ukrainian Patriarchal World Federation.

Patriarkhat, the organ of the Ukrainian Patriarchal Society in the United States and the Ukrainian Patriarchal World Federation

Ukrainian Patriarchal World Federation (Ukrainske patriarkhalne svitove obiednannia, or UPSO). An umbrella organization of Ukrainian patriarchal societies in the United States, Canada, Belgium, Germany, France, Britain, Australia, and Argentina as well as of some other Ukrainian Catholic organizations, such as Obnova and the Union of Brotherhoods and Sisterhoods in America. It was founded on 28–29 December 1974 in Washington, DC, to promote the introduction of the patriarchate system in the Ukrainian Catholic church. Besides organizing lay conferences, UPSO copublishes the monthly **Patriarkhat* and publishes a book series, *Biblioteka myrianyina* (Laymen's Library). Its presidium has shifted between Europe and the United States.

Ukrainian Peasants' and Workers' Party of Subcarpathian Ruthenia (Ukrainska seliansko-robotnycha partiia Pidkarpatskoi Rusy). A short-lived nationalist party set up in Transcarpathia in 1936. It was headed by I. Nevytska, and its leading members included I. Hryts, M. Tulyk, and V. Kuzmyk. It published a semimonthly newspaper, *Narodnia syla* (1936–8), in Prešov. The party failed to attract support beyond student circles.

Ukrainian Peasants' and Workers' Socialist Alliance. See Sel-Rob.

Ukrainian Pedagogical Society. See Ridna Shkola society.

Ukrainian Pedagogical Society in Prague (Ukrainske pedahohichne tovarystvo v Prazi, or UTP). A society founded in 1930 by S. *Siropolko as a continuation of the Skovoroda Philosophical-Pedagogical Society, which had existed since 1925. It undertook practical measures to help teachers, most notably in attempting to secure for them

teaching positions in Transcarpathia. One volume of *Pratsi UPT* (Works of the Ukrainian Pedagogical Society, 1932) appeared.

Ukrainian People's Council of the Prešov Region (Ukrainska narodna rada Priashivshchyny, or UNRP). A political and social body representing the indigenous Ukrainians of the Prešov region in eastern Slovakia. It was set up on 1 March 1945 in Prešov at a congress of delegates from Ukrainian villages and counties. Initially the UNRP favored the incorporation of the Ukrainian part of the Prešov region along with Transcarpathia in the Ukrainian SSR. Then it consented to remain within Czechoslovakia and assumed the task of defending the interests of the Ukrainian minority. The council did not succeed in winning de jure recognition as the political representative of a national group or cultural autonomy for the Ukrainian community. But it was recognized de facto as the voice for Ukrainians by the central government in Prague and the Slovak National Council, and appointed five deputies to the provisional assembly in Prague and the Slovak National Council in 1945–8. It published annual almanacs and the weekly *Priashivshchina* (1945–51), which contained Ukrainian- and Russian-language materials. Its work was conducted by the presidium and county committees. One of its jobs was to co-ordinate mass education in various villages. The first chairman of the UNRP was V. Karaman, and the general secretary was I. Rohal-Ilkiv. Its most active members were V. Kapishovsky, P. Babei, P. Zhydovsky, D. Roikovych, and S. Bunhanych. After the Communist coup in Czechoslovakia in 1948, the role of the council diminished, and it was forced to dissolve. It ceased all activities in 1951 and formally disbanded itself on 11 December 1952. In its place the *Cultural Association of Ukrainian Workers was set up.

Ukrainian People's Democratic party (Ukrainska narodno-demokratychna partiia, or UNDP). A political group established in 1942 among left-wing OUN members then fighting in Volhynia with T. Borovets's UPA. The UNDP was inspired by I. *Mityrynga, and the other leading members were V. Turchmanovych, V. Rybak, and B. Levytsky. The manifesto announcing its political program was critical of both the German occupation and the ideological foundations and political practices of the OUN. The new group failed to attract members and soon dissolved itself. After the war a number of its members in the West joined the left wing of the Ukrainian Revolutionary Democratic party (the *Vpered group).

Ukrainian People's Labor party. See Ukrainian Labor party.

Ukrainian People's party (Ukrainska narodna partiia, or UNP). A numerically small, clandestine organization of nationalistic intellectuals and students founded by M. *Mikhnovsky in Kharkiv in 1902. Its members, among them Ye. Liubarsky-Pysmenny, O. Makarenko, S. and V. Shemet, and O. Stepanenko, rejected the socialist politics of the *Revolutionary Ukrainian party. A 1903 brochure containing the UNP 'ten commandments' deemed the Russians, Poles, Jews, Hungarians, and Rumanians enemies of the Ukrainian people for as long as they kept exploiting them; it advocated a 'Ukraine for the Ukrainians,' the ex-

pulsion of all foreigners, the creation of an independent, unitary, democratic, pan-Ukrainian republic, and the use of the Ukrainian language always and everywhere; and condemned marriage and fraternization with non-Ukrainians. Mikhnovsky's draft constitution for an independent Ukraine was published in 1905 in its Lviv organ, *Samostiina Ukraina*. Because of its extremist views the UNP had negligible support. In 1906 an 'autonomist' faction left the 'independentist' UNP and formed the short-lived Ukrainian People's Democratic party. After Mikhnovsky left the UNP in 1907, it became inactive. In 1917, however, its former members established the *Ukrainian Party of Socialists-Independentists.

Ukrainian People's Republic. See Ukrainian National Republic.

Ukrainian People's Republican party (Ukrainska narodno-respublikanska partiia, or UNRP). A political group founded in Ukraine toward the end of 1918. The UNRP followed a conservative line on agrarian and other matters, supported the Entente, and opposed socialism. Its leading members included Ye. Arkhypenko, P. Pylypchuk, and O. Kovalevsky. In April 1919 the UNRP played a key role in V. Oskilko's failed coup in Rivne.

Ukrainian People's Revolutionary Army. See Polish Sich.

Ukrainian Philatelic and Numismatic Society (UPNS). An international society devoted to the promotion of Ukrainian *philately and numismatics, founded in 1925 as the Society of Ukrainian Philatelists by I. Turyr in Vienna. The society published the Journal **Ukrains'kyi filatelyst* in 1925–39 before it was disbanded.

The society was renewed in the United States after the Second World War (in 1951, under its original name. E. Kotyk served as president and editor of its journal, *Filatelyst*. The society prospered for a decade but started to fail financially during the 1960s. In 1971 the society was reorganized under a new president, G. Slusarczuk. The journal of the society again became *Ukrains'kyi filatelyst*, and the society itself was renamed the Ukrainian Philatelic and Numismatic Society. A system of public auctions of philatelic materials, held under the supervision of V. Zabijska, was instituted, and a biweekly newsletter, *Trident Visnyk*, was added to the society's publications. The society also holds UKRAINPEX as an annual exhibition and convention.

Ukrainian Philatelic Society of Austria (Ukrainske filatelistychnye tovarystvo v Avstrii; German: Ukrainischer Briefmarkensammlerverein in Österreich, or UFTA). The organization, established in Vienna in 1967 by local Ukrainian philatelists, held its first philatelic exhibition that year and has continued to sponsor or to participate in philatelic exhibitions since then. Every UFTA exhibition has been commemorated by an official bilingual postal cancellation of the Austrian post office; there had been over 75 such cancellations by the end of 1988. The society also was responsible for the issue of two Austrian postal stamps (1979 and 1988) with Ukrainian icons. The society issues a journal and is active in the cultural life of Ukrainians in Austria. The group was first led by J. Kostiuk; other

heads have included B. Jaminskyj and S. Marzinger-Romanyshyn.

Ukrainian Philosophical Society (Ukrainske filosofske tovarystvo). The organization of philosophers and teachers of philosophy in Ukraine, founded in June 1972. Based in Kiev, until late 1989 it was the Ukrainian Branch of the USSR Philosophical Society (est 1971), but it is now an independent organization. The society co-ordinates research, facilitates exchanges of ideas, fosters contacts with philosophers in other countries, and popularizes philosophical ideas. It is divided into thematic sections (dialectical materialism, historical materialism, scientific communism, the history of philosophy, logic, ethics, and esthetics) and, geographically, into locals (Kiev, Lviv, Kharkiv, Donetske, Zaporizhia, Mykolaiv, and Sevastopol). Membership, which is open to lecturers in philosophy and ideology at postsecondary institutions, numbers close to 3,000. Its executive is elected every five years. The presidents have been V. Shynkaruk (1972–86) and M. Popovych (since December 1986).

Ukrainian Physicians' Association in Czechoslovakia (Spilka ukraïnskykh likariv u Chekhoslovachyni). Founded in 1922 in Prague, the association aided émigré doctors in their professional endeavors. Its founder and first president was B. *Matiushenko (1922–35); he was followed by Yu. Dobrylovsky (1935–40) and M. Zavalniak. The association was disbanded in September 1940. Its membership was approx 120; in 1923–8 the members were allocated stipends by the Czechoslovakian government. Six issues of *Ukrains'kyi medychnyi vistnyk* were published (1923–5), and in 1936 a Ukrainian-Latin medical dictionary appeared, compiled by M. Halych and edited by Yu. Matiushenko and V. *Nalyvaiko (re-edited in the United States by P. Dzul in 1969).

The association participated in medical conventions in Lviv and Prague, published scholarly articles in *Likars'kyi vistnyk* (Lviv), and edited the medical reference book 'Knyha zdorov'ia' (Book of Health), which went unpublished because of the Second World War. Members of the association participated in the founding and activities of the Ukrainian Scientific Society in Prague and played an active civic role in numerous Ukrainian organizations in Czechoslovakia (eg, in collecting funds for the construction of a Ukrainian hospital in Lviv). They took part in organizing conventions of the All-Slavic Medical League in Belgrade, Warsaw, and Prague. They were also active in non-Ukrainian organizations, in attending conventions, and in publishing in Czechoslovakian and German medical journals. In 1990 the association was revived (headed by Ya. Babiuk) as a member of the World Federation of Ukrainian Medical Associations.

P. Pundii

Ukrainian Physicians' Society (Ukrainske likarske tovarystvo, or ULT). A professional association of Ukrainian physicians in Western Ukraine, founded in October 1910 in Lviv by 63 members. Its aims were to promote the interests of Ukrainian physicians, raise their qualifications, and improve health care in Ukraine. Its precursor was the Medical Commission of the Shevchenko Scientific Society (est 1898). To raise the level of popular knowledge about sanitation and health the ULT published the monthly **Zdorovlie* (1912–24). With the Shevchenko Scientific Soci-

Narodne zdorov'ia, the paper of the recently revived Ukrainian Physicians' Society in Lviv

ety it published the scientific journal **Likars'kyi vistnyk* (1920–39). It was also instrumental in setting up the *Ukrainian Hygienic Society (1929) and worked closely with it. The membership of the ULT was 205 in 1925, and 289 in 1937 (268 in Galicia). The association held four scientific conferences (1927, 1931, 1933, and 1935). With the financial support of Metropolitan A. Sheptytsky it built the Ukrainian Hospital in Lviv (1935). The presidents of the ULT were Ye. *Ozarkevych, T. Burachynsky, and M. *Panchyshyn, and the membership included I. Horbachevsky, I. Kurivets, M. Muzyka, S. Parfanovych-Volchuk, and R. Osinchuk. The association was dissolved with the Soviet occupation of Galicia in 1939. It was revived in Lviv in April 1990; its new president is O. Kitzera.

Ukrainian Planning Design-and-Technology Institute of Local Industry (Ukrainskyi proektnyi konstruktorsko-tekhnologichnyi instytut mistsevoi promyslovosti). A research institute under the jurisdiction of Ukraine's Ministry of Local Industry, established in Kiev in 1929 as a branch of the All-Union Scientific Research Institute of the Peat Industry. In 1933 it was reorganized into the Ukrainian Scientific Research Institute of Peat, and in 1978 it acquired its present name. The institute has 24 departments and laboratories, an experimental plant, and branches in Donetske and Dnipropetrovske. Its research is directed at the production of consumer and industrial goods made of metal, plastic, local raw materials, and industrial wastes; documentation for the manufacture of new products; and the technological improvement of local industry enterprises.

Ukrainian Polytechnical Correspondence Institute (Ukrainskyi zaochnyi politekhnichnyi instytut im. I. Sokolova). A higher educational institution established in Kharkiv in 1958, until 1992 under the Ministry of Higher and Secondary Special Education of the Ukrainian SSR. It has (1983) faculties for machine building, chemical technology, energy, electromechanics, and mechanical technology and four general technical faculties (in Kharkiv, Artemivske, Kostiantynivka, and Slovianske). It offers a graduate program. Enrollment in 1983 reached 13,000.

Ukrainian Press (Ukrainska drukarnia; French: Imprimerie ukrainienne; Russian: Ukrainskaia tipografiia). An imprintery in Geneva, founded in 1876 by M. *Draho-

manov. From 1878 to 1918 its manager was A. *Liakhotsky. Until approx 1890 it was called the Russian (Imprimerie russe), *Rabotnik*, *Hromada*, and *Volnoe Slovo* (La Parole libre) Press. Using funds provided by the *Hromada of Kiev, Drahomanov printed materials that were smuggled into Russian-ruled Ukraine after the Ems Ukase prohibited publishing in Ukrainian. In 1882 the Hromada withdrew its support, and left the press in difficult circumstances. Nonetheless, it continued operating. By the time Drahomanov moved to Sofia in 1889, it had printed his miscellany/journal **Hromada* (1878–82) and nearly 70 books and brochures in Russian and Ukrainian, many of them by Drahomanov, but also by authors such as S. Podolynsky, T. Shevchenko, F. Volkhovsky, M. Pavlyk, and P. Myrny. Thereafter Liakhotsky printed other booklets by Drahomanov; editions of Shevchenko's banned poems (1890) and P. Kulish's *duma* collection (1893); and booklets, leaflets, and periodicals for various Russian and Ukrainian revolutionary groups, including Lesia Ukrainka and I. Steshenko's small Ukrainian Social Democracy group in Kiev and, during the First World War, the Union for the Liberation of Ukraine and L. Yurkevych (his paper *Borot'ba* [1916] and his brochure on the Russian Social Democrats and the national question [1917]). By the time the press ceased functioning in 1917, it had issued over 110 books and brochures. E. Batchinsky's detailed account of the press was published in *Naukovyi zbirnyk II* (1953) of the Ukrainian Academy of Arts and Sciences.

Easter at the Ukrainian Press Service in Berlin in 1934. Sitting, from left: Mykhailo Seleshko, Ivan Gabrusevych, Oleksander Vlasiv; standing: Yuliiian Hoshovsky, Orest Semchyshyn, Mykola Mytliuk, Sydir Chuchman, Pavlo Turula, Orest Chemerynsky, Volodymyr Stakhiv

Ukrainian Press Service (Ukrainska presova sluzhba; German: Ukrainischer Pressedienst). An information bureau established in 1931 in Berlin by the OUN to inform the Western world, particularly the German government and public, about the Ukrainian question and the Ukrainian national movement. The director was R. *Jary. It published bulletins in Ukrainian (for the Western Ukrainian and émigré press) and German under the editorship of M. Seleshko (1931–4) and V. Stakhiv (1937–41). Editors at the service included A. Lutsiv, O. Chemerynsky, B. Kordiuk, and M. Prokop. The service maintained contacts with similar bureaus and offices maintained by the OUN in New York, Geneva, London, Paris, Rome, Prague, Madrid, Brussels, Vienna, and Kaunas (see *Press and information bureaus abroad). In 1938 it was renamed the Nationalist

Press Service, and after the outbreak of the Second World War it was moved to Rome, where it was directed by Ye. Onatsky until 1943.

Ukrainian Printing Institute (Ukrainskyi polihrafichnyi instytut im. I. Fedorova). The only postsecondary school in Ukraine for the training of skilled workers and managers in the publishing and printing industries. It was established in Kharkiv in 1930 out of faculties of the Kiev and Kharkiv art institutes. Since 1945 it has been located in Lviv, and until 1992 it was under the jurisdiction of the Ukrainian SSR Ministry of Higher and Secondary Special Education. The institute has a teaching staff of approx 250, in 5 faculties and 21 departments. Approx 4,000 students are enrolled in its three- and five-year programs each year. The institute also offers graduate and correspondence programs, upgrading courses, and, in Kiev, a six-year evening program. Over 13,000 specialists have graduated from the institute.

Ukrainian Publishers Limited (Ukrainska vydavnycha spilka, or UPL). The largest Ukrainian publishing house in Great Britain, founded in May 1949 by members of the émigré OUN (Bandera faction). In 1951 H. Markiv was elected chairman of its board of directors, and V. Oleksiv became UPL secretary. In 1951 UPL began publishing the monthly journal **Vyzvol'nyi shliakh*. It has set and printed other periodicals, such as the weekly paper **Ukrains'ka dumka*, the quarterly journal **Ukrainian Review*, the Catholic organ *Nasha tserkva*, the Orthodox organ *Vidomosti UAPTs*, the children's magazine *Iuni druzi*, the Ukrainian Youth Association's journal *Avangard*, and the Ukrainian Former Combatants' organ *Surmach*. UPL has also published dozens of books of political and belletristic writing by authors such as B. Antonenko-Davydovych, B. Bora, D. Dontsov, S. Karavansky, S. Mechnyk, P. Mirchuk, L. Orlyhora, V. Sichynsky, A. Svydnytsky, O. Voropai, and O. Zvychaina. Directors of UPL have included V. Yavorsky, R. Borkovsky, I. Ratushny, V. Vasylenko, and Ya. Deremenda.

Ukrainian Publishing Institute (Ukrainskyi vydavnychiy instytut). A publishing house of scholarly and popular-educational materials in Lviv from 1936 to the outbreak of the Second World War in 1939. Directed by M. Mykytchuk, V. Vytvytsky, and I. Fediv, it published V. Kubijovyč's atlas (1937) and geography (1938) of Ukraine and adjacent lands, a reference book for choir conductors, a collection of articles about Transcarpathia, and a series of educational titles.

Ukrainian Quarterly, The. An English-language quarterly journal published since 1944 in New York by the Ukrainian Congress Committee of America (UCCA). It contains articles on Ukrainian history, culture, and political and economic developments and has been especially concerned with the national question in the USSR and with publicizing Ukrainian opposition to the Soviet regime, national-liberation struggles in Asia, and anticommunist movements throughout the world. After the Second World War the journal took up the cause of the *displaced persons and lobbied to have them admitted to the United States. Many prominent Ukrainian-American émigré and non-Ukrainian scholars have contributed to *The Ukrainian*

The Ukrainian Quarterly

Quarterly. Its chief editors have been N.(M.) Chubaty, W. Dushnyck (1957–84), and N. Bohatiuk (1985–). Others who have served on the editorial board include A. Drahan, M. Stakhiv, P. Stercho, R. Smal-Stotsky, S. Shumeyko, and Ye. Zyblykevych. Cumulative indexes to the journal for the years 1944–64 and 1965–70 have been published.

Ukrainian Radical party (Ukrainska radykalna partiia, or URP; originally the Ruthenian-Ukrainian Radical party, and from 1926 the Ukrainian Socialist Radical party, or USRP). A Western Ukrainian political party, formally established at a congress in Lviv on 4 October 1890. The URP could trace its descent from a movement of radical Galician young people influenced by M. *Drahomanov in the late 1870s. The founding members of the URP included V. *Budzynovsky, S. Danylovykh, I. *Franko, Ye. *Levytsky, M. *Pavlyk, and K. *Trylovsky. Drahomanov considered the formation of a party premature but reconciled himself to the accomplished fact. He contributed regularly to the Radical press and helped to shape the party's ideology. His personal involvement was important in holding the young party together, and his death in 1895 accelerated a division into factions which culminated in party splits at the end of the 1890s.

The URP was the first modern Ukrainian political party with a defined program, a mass following, and a registered membership. The party program advocated socialism and a series of political reforms aimed at the extension of democracy and the improvement of the position of Ukrainians in Galicia. The URP called for the secularization of Ukrainian social and cultural life and opposed the influence of the Greek Catholic church and its clergy in national affairs. The party aimed its activities at peasants and, to a lesser extent, workers; it convened public assemblies (*vicha*) in small towns and villages, founded reading clubs (*chytalni*) and co-operatives, campaigned in elections, organized women's groups, and trained activists from among the peasantry. The Radicals were in opposition to the government as well as to the mainstream Ukrainian populists (*narodovtsi*); they were particularly successful in their opposition to the *New Era, the short-lived rapprochement between the populists and the Polish establishment in Galicia. In 1895 three Radical deputies were elected to the Galician Diet, and in 1897 two were elected to the all-Austrian parliament. At their 1895 congress in Lviv the Radicals passed a resolution in favor

of Ukrainian independence; the resolution was proposed by Yu. *Bachynsky, but the idea of independence had been championed in the party even earlier by Budzynovsky. At its 1897 congress the URP endorsed strikes for agricultural workers, and such strikes became an important feature of Galician life over the next decade. The Radicals also organized mass assemblies and demonstrations to demand universal suffrage.

From the mid-1890s there were three competing groups in the URP: the orthodox Radicals, who remained faithful to the ideas of Drahomanov; younger Radicals, who were influenced by Marxism and hoped that the URP would unite with Europe's social democratic parties in the Second International; and other Radicals who were becoming increasingly uncomfortable with the party's socialist program and more and more interested in purely national concerns. In 1899 the latter two groups left the URP. Yu. Bachynsky, M. Hankevych, S. Vityk, R. Yarosevych, and others founded the *Ukrainian Social Democratic party (USDP); Budzynovsky, Franko, Levytsky, V. Okhrymovych, T. Okunevsky, and others, together with the majority of the populists, founded the *National Democratic party (NDP). Thereafter the URP, which was now definitively a peasant party, was the second-largest Ukrainian political party in Galicia, after the NDP. In 1911 five Radicals were elected to the parliament in Vienna, and in 1913 six were elected to the Galician Diet. In the early 20th century, largely through the efforts of Trylovsky, the Radicals established the sporting society *Sich and, later (1913), the paramilitary Ukrainian Sich Riflemen.

With the proclamation of the *Western Ukrainian National Republic (ZUNR) the URP joined the *Ukrainian National Rada. The Radical L. Bachynsky was vice-president of the Rada, and the Radicals D. Vitovsky and I. Makukh served in the ZUNR's State Secretariat as military secretary and interior secretary respectively. After the collapse of the Ukrainian state the URP joined the *Interparty Council.

At its first congress after the war (1 April 1923) and at subsequent congresses the URP reworked its program. It defined itself as the party of the working masses of Ukraine; it aimed to implement a socialist program, including the socialization of the means of production, in an independent Ukrainian republic in which the working masses themselves would hold power. The URP distanced itself from the USDP, which in 1923 began to follow a pro-communist line. At its 1925 congress the URP passed a resolution against collaborating with Ukrainian 'bourgeois parties' and simultaneously condemned the colonialist policies of the Bolsheviks in Ukraine and endorsed the slogan All Land to the Peasants without Redemption. In 1926, after the Ukrainian Socialist Revolutionaries of Volhynia joined it, the party changed its name to the Ukrainian Socialist Radical party. In April 1931 the USRP joined the Second Socialist International. Together with other Ukrainian parties the URP boycotted the 1922 elections to the Polish Sejm. In 1928, 11 USRP candidates were elected to the Sejm, and 3 to the Senate. In the 1931 elections the USRP ran jointly with the *Ukrainian National Democratic Alliance and won one-fourth of the coalition's seats; the USRP's deputies formed separate clubs in the Sejm and Senate. The USRP boycotted subsequent elections because they regarded them as undemocratic. In 1934 the USRP had 20,000 members.

The leaders of the party were Franko, Pavlyk, M. Laho-

dynsky, L. Bachynsky, and Makukh. Other prominent Radical activists included I. Blazhkevych, K. Kobersky, D. Ladyka, V. Lysy, M. Matchak, O. Nazaruk (until 1922–3), O. Pavliv-Bilozersky, I. Popovych, M. Stakhiv, Trylovsky, and S. Zhuk. Some prominent writers were also associated with the URP: D. Lukiianovych, O. Makovei, L. Martovych, and V. Stefanyk.

The URP had its own youth and women's organizations, the *Union of Ukrainian Progressive Youth (Kamenari) and the *Union of Ukrainian Working Women (the Women's Hromada). The publishing house and people's university *Samoosvita (1930–9) was under the party's influence. The URP's official publishing house was Hromada (1922–39); its official organs included **Narod* (1890–5) **Khliborob* (1891–5), and **Hromads'kyi holos* (1895–1939).

The USRP renewed its activities in the postwar emigration (1946) and took part in the formation of the Ukrainian National Council (1948). In 1950 the USRP joined with the USDP and other socialist parties to form the Ukrainian Socialist party. The radical leaders in the emigration included Lysy and Stakhiv.

J.-P. Himka, I.L. Rudnytsky

Ukrainian Radical party (Ukrainska radykalna partiia, or URP). A numerically small, clandestine organization formed in Kiev in the spring of 1905 by a younger left-liberal group that had quit the *Ukrainian Democratic party (UDP). Most of its members were writers (eg, B. Hrinchenko, Modest Levytsky, F. Matushevsky, S. Yefremov). The URP concentrated on publishing antitsarist and socialist propaganda, and in 1905 it issued its platform and 15 other brochures by authors such as B. and M. Hrinchenko, Matushevsky, Yefremov, M. Drahomanov, A. Munko, and V. Durdukivsky, which were printed in Austrian-ruled Lviv and smuggled into Russian-ruled Ukraine. In its literature the URP advocated Ukrainian autonomy (and independence as a maximum goal), democratic rights, the abolition of private land ownership, the nationalization of industries, and the creation of industrial and agricultural co-operatives. Because it failed to recruit new members, the URP merged with the UDP in December 1905 to form the *Ukrainian Democratic Radical party.

Ukrainian Red Cross (Ukrainskyi chervonyi khrest). A voluntary nongovernmental organization for providing aid to victims of war or natural disasters and various medical services to the population. The Ukrainian Red Cross society was organized in April 1918 out of already-existing local branches of the Russian Red Cross society on Ukrainian territories. It was formed at the initiative of the All-Ukrainian Congress of Physicians in Kiev; its founders included Ye. Lukasevych and B. Matiushenko. The first president of the society was A. Viazlov; he was followed in 1919 by A. Nikovsky and in the 1920s by I. Kholodny.

The Ukrainian Red Cross established ties with the International Committee of the Red Cross in Geneva through its representative, E. Batchinsky, and sent missions to Germany (headed by I. Kholodny), Austria (A. Okopenko), Yugoslavia (D. Doroshenko), Poland (L. Starytska-Cherniakhivska and S. Rusova), and Italy. These missions obtained sorely needed medical supplies for the population in Ukraine and provided relief to Ukrainian internees in foreign countries. With the loss of Ukraine's independence the Ukrainian Red Cross continued to operate abroad but lost the right to belong to the International Red Cross. B. Matiushenko ran the foreign office of the Ukrainian Red Cross in Paris (1919–21). In 1931 the *Ukrainian Gold Cross was set up in the United States to furnish aid to Ukrainians, particularly political prisoners who were suffering under Polish or Soviet rule.

In 1941 another Ukrainian Red Cross organization was established, surreptitiously, in Lviv to provide relief and medical care to released Soviet political prisoners, prisoners of war, and displaced people. Its president was O. Kurchaba and then T. *Vorobets. Similar organizations, which co-operated with the office in Lviv, were formed later in Kiev (headed by F. Bohatyrchuk), Rivne (M. Kornyliv and Kh. Kononenko), and other cities. In 1942 the German authorities dissolved the Red Cross in Lviv, but its functions in the Generalgouvernement were assumed by the Department of Social Services of the Ukrainian Central Committee. An underground health service of the Ukrainian Insurgent Army, called the Ukrainian Red Cross, operated in 1943–9. It was headed for several years by K. *Zarytska.

In Germany and Austria several attempts were made to revive the Ukrainian Red Cross. A conference in Munich on 10 October 1945 elected the officers of a Red Cross organization (president, B. Andriievsky, and executive chairman, Vorobets), but under Soviet pressure the American occupational authorities prohibited the use of the name Red Cross (see *Ukrainian Medical Charitable Service).

Red Cross societies continued to operate in Soviet Ukraine as independent humanitarian organizations. Eventually they were brought under the People's Commissariat of Public Health and absorbed by the unitary Soviet Red Cross system. The Red Cross Society of the Ukrainian SSR had republican, oblast, and raion offices representing nearly 70,000 (1983) primary organizations with 24 million members. Like all so-called nongovernmental organizations in the USSR it was under the complete control of the state and the Party.

Ukrainian regiments in 1812. Temporary military formations raised in Ukraine during *Napoleon Bonaparte's Russian campaign. The governor-general of Left-Bank Ukraine, Prince Ya. Lobanov-Rostovsky, permitted a *levy en masse and the formation of regular Cossack regiments and promised to keep the Cossack units after the war as a permanent Cossack army. Influential Ukrainian leaders, such as D. Troshchynsky and V. Kapnist, persuaded the governor-general to give the regiments a Ukrainian character. The organizational scheme of the Cossack regiments was drafted by Senator M. Myklashvsky. In addition to Cossacks serfs volunteered for service to escape from their oppressive condition. Most of the regiments raised by the levy en masse came from the Pol-

tava and Chernihiv regions. Cossack regiments, under the command of Count de Witte, also came from Kiev and Podilia gubernias. Among the organizers of the Cossack regiments in Poltava gubernia was I. *Kotliarevsky. The total number of troops, peasant and Cossack, was almost 75,000. They were supported (provided with horses, arms, uniforms, and supplies) mostly by the local population. The Russian command did not trust the Ukrainian regiments; hence, it did not use them at the front in Russia, but gave them an auxiliary role.

In 1813–15 some Cossack regiments took part in the war against Napoleon in central and western Europe and in the occupation of Paris. During that time they discovered Western ideas of individual liberty and human rights. After the war some of the regiments were converted into regular Russian units. The rest were demobilized, and returned to the peasant estate.

Ukrainian Regional Committee (Ukrainskyi kraiovyi komitet, or UKK). A body set up in Lviv in 1941 by the German authorities to represent the Ukrainian community, and the only legal Ukrainian civic institution in Galicia at the time. Its statute was similar to that of the *Ukrainian Central Committee (UTsK) in Cracow. The Germans approved the general secretary of the Ukrainian National Council, K. *Pankivsky, as chairman of the UKK. The vice-chairman and executive director was M. Dobriansky-Demkovych.

The departments of the UKK were organized in September–December 1941 and were headed by M. Rosliak and M. Tsenko (organizational), Yu. Savchak and V. Pushkar (financial), V. Lysy and M. Voloshyn (legal), Rev V. Lytsyaniak and P. Sanotsky (social services), M. Bachynsky and then M. Mazuryk and P. Koniukh (economic), Z. Zeleny (educational), V. Zubrytsky (cultural), S. Levytsky (youth affairs), M. Biliak and M. Zaiachkivska (women's affairs), T. Vorobets and I. Cherkavsky (prisoners' aid), I. Tkach (labor), and D. Kvasnytsia (auditing). Ukrainian okruha committees (UOKs), which were comparable to the Ukrainian relief committees (UDKs) operating under the UTsK, were set up in the administrative areas introduced by the Germans, and trustees were installed in the villages.

The UKK assumed the tasks of furnishing relief to war victims, defending the Ukrainian population from arbitrary treatment by the occupational power, improving or at least tempering the difficult economic circumstances, widening the scope of its activities to support as many facets of national life as possible, and establishing as much influence as possible over government agencies which had an impact on the well-being of the population.

From the outset the UKK worked closely with the UTsK. Its activities ceased in March 1942, when the Generalgouvernement administration decreed that the UTsK in Cracow would assume its functions. The similarity of their structures facilitated the merging of the two bodies, and Pankivsky was subsequently made deputy head of the UTsK.

Besides its daily work in the fall of 1941 the UKK assisted in the return of Soviet officials to eastern Ukraine and in the release of Soviet POWs from Galicia; organized relief for inmates of POW camps; set up public, factory, and school cafeterias; and promoted the establishment of gymnasiums and professional schools.

M. Dobriansky

Ukrainian Relief Committee in Belgium (Ukrainskyi dopomohovyi komitet u Belhii). An organization founded in Brussels in 1945 to assist Ukrainian *displaced persons arriving in Belgium from Germany. From 1947 to 1949 the committee had 26 branches with approx 3,000 members; after large-scale emigration to North America, 10 branches with 380 members (1981) remained. The committee has published *Visti* (News) since 1945, initially as a semimonthly, later as a monthly, and since 1976 as a bimonthly. The presidents of the committee have been M. Hrab (1945–6), K. Mulkevych (1947), A. Kishka (1948), M. Dzoba (1949–51), V. Popovych (1952–86), and O. Koval (since 1986).

Ukrainian Relief Committee in Rome (Ukrainskyi dopomohovyi komitet u Rymi). A body formed by Bishop I. Buchko at the end of the Second World War (1945) to help Ukrainian refugees, POWs, and students in Italy. Headed by Bishop I. Buchko, it included Rev I. Prashko, Yu. Mylianyk, M. Vavryk, and P. Polishchuk (secretary). The Vatican provided funds for material aid in the form of clothes, food, and spending money. The committee helped the members of the *Division Galizien interned at Rimini by establishing contacts for them with the Vatican and with Italian and international circles, by providing postal services, and by supplying camp schools with textbooks and equipment. The committee ceased functioning in 1970. Thenceforth, the apostolic mission for Ukrainians in Western Europe, under Archbishop I. Buchko and Rev M. Marusyn (secretary), has fulfilled whatever charitable responsibilities have remained.

Ukrainian Republican Council of Trade Unions (Ukrainska respublikanska rada profesiinykh spilok, or URRPS). The central body co-ordinating and directing trade-union activities in Soviet Ukraine. Before the Second World War that function was fulfilled by the *All-Ukrainian Council of Trade Unions, which was dissolved in 1937 in an attempt to centralize all power in the All-Union Central Council of Trade Unions (VTsSPS) in Moscow. The first URRPS was elected in 1948 by a conference of Ukrainian trade unions in Kiev. The council was elected at trade-union congresses held every five years. Although formally it was an autonomous body, in fact it came under the VTsSPS and made few decisions itself. It was also closely tied to the Party, and helped implement Party economic and social policies. The presidents of the council were A. Kolybanov (1948–51), K. Moskalets (1951–60), M. Synytsia (1961–5), V. Klynenko (1966–71), V. Solohub (1971–90), and O. Kovalevsky.

Ukrainian Republican Kapelle (Ukrainska respublikanska kapelia). A state choir founded in Kiev in early 1919 by K. *Stetsenko and O. *Koshyts. The group had been commissioned by S. Petliura and charged with the task of propagating Ukrainian musical culture abroad. The kapelle, directed and conducted by O. Koshyts, consisted of 80 members in a mixed choir. In February 1919 it embarked on a major European concert tour through Czechoslovakia, Austria, Switzerland, France, Belgium, Holland, England, and Germany. When disbanded in Berlin in July 1920, its members formed three separate choirs. The core group, led by O. Koshyts, was reconstituted in Warsaw as the Ukrainian National Choir. Late in 1921 it

The Ukrainian Republican Kapelle in 1919. Sitting, 5th through 8th from left: Hryhorii Tuchapsky, Oleksander Koshyts, Platonida Shchurovska, Kyrylo Stetsenko

began a tour of Spain, France, Belgium, Germany, and the United States, where from October 1922 to March 1923 it performed in more than 100 concerts. A tour of Brazil, Argentina, Uruguay, and Cuba followed. In 1924 the Ukrainian National Choir disbanded, after having staged approx 900 concerts.

The kapelle and its successors had a significant impact in raising in the West an awareness of Ukrainian musical life. They also provided a training ground for many individuals who were later active in Ukrainian civic cultural societies. The most popular pieces in the repertoire of the kapelle were works by M. Leontovych (particularly 'Shchedryk,' later known as the 'Carol of the Bells'), M. Lysenko, K. Stetsenko, and O. Koshyts.

W. Wytwycky

Ukrainian Republican Regiment (Persnyi ukrainskyi respublikanskyi polk). An infantry regiment organized in the fall of 1917 by Col P. Bolbochan. It consisted of volunteers from the Fifth Corps of the Russian army. In January 1918 it suffered heavy casualties defending Kiev from the invading Bolshevik army. Its surviving units re-formed as the Second Battalion of the Separate Zaporozhian Detachment and later expanded into the Second Infantry Regiment of the Zaporozhian Corps.

Ukrainian research and documentation centers.

Centers established to collect historical materials of various forms, for the purpose of conducting directed research. A number of such centers have been founded in the West and financed by donations from the Ukrainian community. The *Lypynsky East European Research Institute was established in Philadelphia in 1963 to preserve the archives of V. Lypynsky and P. Skoropadsky and to publish materials from them. The Ukrainian Famine Re-

search Centre, founded in 1982 in Toronto to produce the documentary film *Harvest of Despair* in 1985, was reorganized in 1987 as the *Ukrainian Canadian Research and Documentation Centre. It is collecting materials on Ukrainian participation in the Second World War and on the effects of the war on Ukraine and its people and plans eventually to make a film on the subject. In 1987 the Ukrainian Research and Documentation Center was set up at the *Ukrainian Institute of America in New York to collect archives and documents on Ukrainians in the 20th century and, particularly, on the Soviet collectivization and 1932-3 man-made famine in Soviet Ukraine, the two world wars, the dissident movement, and diaspora institutions. The collection is to serve as the basis for research and documentary publications. Its director is T. Hunchak.

Ukrainian Research and Information Institute

(Ukrainskyi publitsystychno-naukovyi instytut, or UPNI). An information organization founded in the United States on the initiative of M. *Shlemkevych in 1961 to inform the Ukrainian and the general public about current Ukrainian issues and to correct misinformation about Ukraine and Ukrainians. The first branch of the institute was formed in Chicago, where its head office, under T. Lapychak, was set up. Ten other branches were organized, in cities such as New York, Detroit, Newark, Trenton, and Winnipeg. It also had individual members in Europe and Australia. Its main publications were in English and included S. Goldelman's *Jewish National Autonomy in Ukraine, 1917-1920* (1968). It also published a series of brochures in Ukrainian and English. In 1976 the institute was dissolved.

Ukrainian Research Station for Beekeeping

(Ukrainska doslidna stantsiia bdzhilnytstva). In 1920 the Kharkiv Oblast Beekeeping Research Station was organized and in 1924 it was relocated to the village of Artemivka, near Merefa, and renamed the Ukrainian Beekeeping Research Station, a research institution in the system of the Ukrainian SSR Ministry of Agriculture. In 1959 the station was transferred again, to the village of Cherniatyn, in Zhmerynka raion, Vinnytsia oblast. It consists of a biochemical laboratory and three research divi-

sions – bee breeding and maintenance, procurement of food and pollination of agricultural plants, and research on bee diseases.

Ukrainian Research Station for Floral and Ornamental Plants (Ukrainska doslidna stantsiia kvitkovykh i dekoratyvnykh roslyn). A Kiev-based research institution, organized in 1946 on the basis of the former Kiev Floriculture Trust and placed under the jurisdiction of the Ukrainian Ministry of Public Economy. At present it has support bases in Odessa, Mykolaiv, Lviv, Kharkiv, Donetsk, Dnipropetrovske, and Sevastopil. Its scientific program extends over the following areas: agricultural engineering and agricultural chemistry, selection and seed production, covered-ground floriculture, dendrology, plant protection, and the organization and construction of municipal and rural greenbelts. The station operates an ornamental plant nursery, an agricultural laboratory, a meteorological station, and a technical workshop.

Ukrainian Research Station for Hop Growing (Ukrainska doslidna stantsiia khmeliarstva). Organized in 1924 on the basis of the Experimental Hops Plantation of the Ukrainian SSR People's Commissariat of Agriculture, the station is now a research institution in the system of the Ukrainian Ministry of Agriculture, located in the village of Smykivka, Korostyshiv raion, Zhytomyr oblast. The station consists of three divisions (selection and seed production, agricultural engineering, and mechanization), four laboratories (plant physiology and agricultural chemistry, technology, entomology, and phytopathology), an economic and organizational group, a library, a museum, and a meteorological station. New, highly productive hops have been developed there, including Clone 18, Zhytomyr 5, and Zhytomyr 8. The research results are published in professional journals.

Ukrainian Research Station for Orchardling. See Mliiv Orchardling Research Station.

Ukrainian Research Station for Silk Production (Ukrainska doslidna stantsiia shovkivnytstva). A research facility under the Ministry of Agriculture of Ukraine, located in Merefa, Kharkiv oblast. It was established in 1933. The station has developed several new varieties of silkworms (Ukrainian 1, 9, and 107 and Kharkiv 3) and new techniques for producing natural silk for the *silk industry. It has departments of selection, agrotechnology, cultivation, diseases, economics, and mechanization, as well as chemical-technological and physiology laboratories.

Ukrainian Research Station for Tobacco (Ukrainska doslidna stantsiia po tiutiumu i makhortsii). Originally established in 1890 in Lohvytsia (now in Poltava oblast), the institute was renamed in 1959 and moved to Pryluka (Chernihiv oblast). A component of the Ukrainian Ministry of Agriculture, it consists of a laboratory, a tobacco support base in Nova Ushytsia (Khmelnitskyi oblast), and departments of selection, agricultural engineering, and plant protection.

Ukrainian Resource and Development Centre (Ukrainskyi tsentr zasobiv i rozvytku, or URDC). Estab-

lished in 1987 at Grant MacEwan Community College in Edmonton, the URDC is the first Ukrainian center located in a Canadian community college. It deals with major provincial, national, and international projects in the fields of business, the arts, audiovisual communications, and community development. Members of its staff have been involved in projects with Ukrainian choirs and dance groups across Canada, with farmers in Ukraine, with an international network of Ukrainian businessmen, with the *Encyclopedia of Ukraine*, and with the Ukrainian Canadian Congress. It operates on funds derived from endowments established by the Ukrainian community and the governments of Canada and Alberta. R. Petryshyn has been the URDC's first director.

Ukrainian Review, The. An English-language quarterly journal of politics, history, and culture, published since 1954 in London by the *Association of Ukrainians in Great Britain; since the mid-1960s the *Canadian League for Ukraine's Liberation and the *Organization for the Defense of Four Freedoms for Ukraine have been copublishers. The journal supports the OUN (Bandera faction) and the Anti-Bolshevik Bloc of Nations. It has covered political developments in the USSR, with particular focus on the national question and the plight of the non-Russian minorities; devoted considerable attention to the dissident and democratic movements in Ukraine; and published reviews of Soviet and non-Soviet books. The first editors were V. Derzhavyn and V. Oreletsky. Since 1965 S. Stetsko has served as chief editor and head of an editorial board that has had such members as V. Bohdaniuk, R. Yendyk, N. Chirovsky, L. Shankovsky, A. Bedrii, O. Romanyshyn, M. Savchuk, and M. Sosnovsky.

Ukrainian Revolutionary Democratic party (Ukrainska revoliutsiino-demokratychna partiia, or URDP). An émigré political party dedicated to the overthrow of the Soviet regime and the building of an independent and democratic Ukrainian state. It was founded officially in Regensburg, Germany, in August 1947 by émigrés from Soviet Ukraine who embraced the ideals of the Ukrainian national renaissance of the 1920s and by former members of the OUN who supported I. *Mityrynga. Charter members included I. Bahriany, H. Kostyuk, I. Maistrenko, B. Levytsky, S. Pidhainy, and R. Paladiichuk. Its first president was H. *Kostyuk, who in 1948 left the party with I. Maistrenko, B. Levytsky, R. Paladiichuk, and others to form the Left URDP. This faction published the monthly **Vpered* and, eventually, dissolved. I. *Bahriany was president for the longest term (1948–63); he was followed by F. Haienko (1963–7), M. Stepanenko (1967), V. Hrysko (1967–75), and M. Voskobiinyk (since 1975). Some of the leading members of the party were V. Bender, P. Volyniak, V. Holubnychy, Yu. Lavrinenko, I. Dubylko, O. Konoval, I. Korniiichuk, A. Lysy, F. Pigido, and A. Riabyshenko. Stepanenko led a group that established a separate Right URDP in 1979. The URDP helped found the *Ukrainian National Council, in which it participated until 1968, and the *Ukrainian Democratic Alliance. Its members played key roles in the founding of the Ukrainian Association of Victims of Russian Communist Terror, the Symon Petliura Legion, and the Ukrainian Democratic Youth Association. Today the party has national offices in the United States, Canada, Britain, Belgium, Germany,

Australia, and Argentina, which sponsor or support a variety of publications. The official voice of the URDP is the irregular magazine *Nashi pozysii* (1948–). In 1990 the URDP changed its name to Ukrainian Democratic Republican party.

Ukrainian Scholarly Association (Ukrainska nauko-va asotsiatsiia). A learned society founded in Prague in late 1932, at a time when the activity of Ukrainian émigré scholars and scholarly institutions in Bohemia was in a period of marked decline. Organized on the initiative of professors at the Ukrainian Husbandry Academy, the society aimed to unify all Ukrainian scholars in Bohemia. Its approx 50 members were headed by V. Ivanytsky and K. Matsiievych (from 1936). The association organized over 70 lectures in the years 1933–6.

Ukrainian school in Polish literature. The term was first used in 1837 by the Polish writer A. Tyszyński and came to be used widely to denote a group of Polish writers and poets of the Romantic era, who used Ukrainian historical subjects, Ukrainian folklore, customs, and landscapes in their work. The group included T. Padura, A. Malczewski, S. Goszczyński, J.B. Zaleski, J. Słowacki, W. Pol (geographic and ethnographic descriptions of the Ukrainian lands as a part of the Commonwealth in 'Pieśń o ziemi naszej' [Song about Our Land]), M. Czajkowski, M. Grabowski, and J. Korzeniowski. The traditions of the Ukrainian school have remained in the works of many Polish writers to this day, such as S. Vincenz, J. Jędrzejewicz, and J. Łobodowski.

Ukrainian Scientific and Technical Society. See Scientific-technical societies.

Ukrainian Scientific Institute in Berlin (Ukrainskyi naukovyi instytut u Berlini). An émigré institution established in Berlin in November 1926 on the initiative of Hetman P. Skoropadsky and with the support of Gen W. Groener. The institute's mandate was to represent Ukrainian scholarship, develop Ukrainian studies, disseminate information about Ukraine in Germany, study Ukraine's relations with Western countries (particularly Germany), and aid Ukrainian students and young scholars in Germany by granting scholarships and fellowships and running a student residence in Berlin. It also established a library, a Ukrainian-press archive, and an archive of foreign press clippings about Ukraine. Until 1931 the institute was funded by the Verein zur Förderung der ukrainischen Kultur und Wissenschaften. Its director was the historian D. Doroshenko. The chairman of its board of trustees was Groener, and the vice-chairman was O. Skoropys-Yoltukhovsky. Full members of the institute included Doroshenko, R. Dymynsky, B. Krupnytsky, Z. Kuzelia, V. Lypynsky, and I. Mirchuk. Other associates in Germany included M. Antonovych, O. Burghardt, E. Chykalenko-Keller, D. Chyzhevsky, V. Leontovych, and P. Verhun. In 1928 the institute took part in the International Press Exhibition in Köln and issued a catalog of Ukrainian in the German press and literature (compiled by M. Hnatyshak). By 1931 it had published three volumes of scholarly papers called *Abhandlungen* (1927, 1929, 1931) and two volumes of informational articles called *Mitteilungen* (1927–8).

From 1931, under the new director, Mirchuk, the insti-

tute was funded by the German Ministry of Education. In 1934 it received the status of a state institution affiliated with Berlin University. Groener was succeeded as chairman of the board of trustees by A. Palme (1934–9) and G. Gerullis (1939–45). In the 1930s the institute worked to bring the Ukrainian question to the fore of Central and Western European public attention. To this end it organized lectures (mostly at Berlin University) by Ukrainian and German scholars, offered German-language courses in Ukrainian studies (taught by Krupnytsky, Kuzelia, Leontovych, and Mirchuk), sent literature on Ukraine to German and foreign academic libraries, organized public exhibitions (eg, of Ukrainian graphic art [Berlin 1933] and of Ukrainian demographic, economic, and ethnographic maps [Berlin 1936]), and provided German institutions, publishers, and encyclopedias with information about Ukraine and Ukrainian issues. It expanded its library (est 1926) to nearly 35,000 volumes. After 1932 the institute issued informational and scholarly publications, including the brochure series *Beiträge zur Ukrainekunde* (mostly transcripts of the institute's lectures); exhibition catalogs; the bulletins *Visty Ukrain's'koho naukovooho instytutu u Berlini* (1933–8) and *Ukrainische Kulturberichte* (1933–40), edited by Kuzelia; an ethnographic map of Transcarpathia (1938); the encyclopedic *Handbuch der Ukraine* (1941), edited by Mirchuk; Krupnytsky's *Geschichte der Ukraine von den Anfängen bis zum Jahre 1920* (1939, 1943); J. Rudnyckyj's *Lehrbuch der ukrainischen Sprache* (1940, 1942, 1943); and several dictionaries, notably Kuzelia and Rudnyckyj's large *Ukrainisch-deutsches Wörterbuch* (1943).

After the Soviet occupation of Berlin in 1945, the institute was dissolved, and its library holdings perished.

V. Kubijovyč

Ukrainian Scientific Institute in Warsaw (Ukrainskyi naukovyi instytut u Varshavi). A research institution established in Warsaw in 1928 (formally in 1930) through the efforts of the Government-in-exile of the UNR. It was funded by the Polish Ministry of Religious Faiths and Education as an autonomous Ukrainian studies institute. The directors were O. Lototsky (until January 1939) and A. Yakovliv, the secretary-general was S. Smal-Stotsky, and the board of directors included B. Lepky, Ye. Glovinsky, and V. Sadovsky. The institute was divided into commissions and seminars, and most of its members were émigré or Galician scholars.

The institute supported research on topics in Ukrainian studies that it was not possible to pursue freely in Soviet Ukraine, and published more books (over 70 vols) than any other interwar émigré or Western Ukrainian scholarly publisher. In its series *Pratsi Ukrain's'koho naukovooho instytutu* (55 vols) were D. Doroshenko's survey history of Ukraine (2 vols, 1932–3), Hetman P. Orlyk's diary (ed J. Tokarzewski-Karaszewicz, 1936), B. Krupnytsky's book on Orlyk (1938), the article and document collection *Mazepa* (2 vols, 1938), A. Yakovlev's book on 17th- and 18th-century Ukrainian-Russian treaties (1934), an annotated volume of M. Drahomanov's correspondence with the Old Hromada of Kiev (1938), O. Dotsenko's book on the 1920 Winter Campaign of the UNR Army (1932) and a collection of documents pertaining to the campaign (ed P. Shandruk, 1933), O. Lototsky's memoirs (3 vols, 1932–4) and books on the Ukrainian sources of canon law (1931) and on the principles and history of autocephaly (2 vols,

1935, 1938), a volume of memoirs by L. Wasilewski, M. Halyn, S. Stempowski, A. Topchibashi, and G. Tabouis (1932), K. Chekhovych's book on O. Potebnia (1931), I. Zilynsky's map of Ukrainian dialects with commentaries (1933), S. Smal-Stotsky's book of interpretations of T. Shevchenko (1935) and book on the Ukrainian language under Soviet rule (1936), a collection of memoirs and articles about the late 19th-century Ukrainian movement in the Russian empire (2 vols, 1939), collections of articles on Soviet Ukrainian demography (by T. Olesevych [Olesiuk], O. Pytel, V. Sadovsky, and O. Chubenko, 1931) and economics (by Ye. Glovinsky, K. Matsiievych, and V. Sadovsky, 1931–6), a book of Soviet Ukrainian statistical tables (ed Olesevych, 1930), I. Ivasiuk's book on credit cooperatives in Ukraine (1933), V. Ivanys's two books on energy and industry in Ukraine and northern Caucasia (1933), I. Shovheniv's book on water management in the Dnieper Basin (1934), V. Sadovsky's book on agricultural labor in Soviet Ukraine (1935), S. Siropolko's book on public education in Soviet Ukraine (1934), L. Wasilewski's book in Polish on the Ukrainian question (1934), V. Sadovsky's book on Soviet nationality policy in Ukraine (1937), B. Ivanytsky's book on Ukraine's forests and forest economy (2 vols, 1936), D. Chyzhevsky's book on H. Skovoroda (1934), S. Kuczyński's book in Polish on the Chernihiv and Novhorod-Siverskyi lands under Lithuanian rule (1936), and T. Shevchenko's collected works with critical articles and notes (13 of 16 planned vols, ed P. Zaitsev, 1934–9), as well as Ukrainian translations of the Psalter (1936) and three liturgical books prepared by a commission headed by Metropolitan D. Valedinsky (1936–9). Other publications included a book of Shevchenko's poems in Polish translation (1936), two brochures on the institute's activities (in Ukrainian, Polish, and French, 1935, 1939) and two on the activities of its Economic Seminar (1935, 1936), and the *Bulletin de la commission pour l'étude des problèmes polono-ukrainiens* (5 issues, 1935–8). Approx 35 prepared volumes were never published. After the German occupation of Warsaw in 1939, the institute was closed down, and its valuable 10,000-volume library and archive holdings perished.

V. Kubijovč

Ukrainian Scientific Institute of Bibliology (Ukrainskyi naukovo-doslidnyi instytut knyhoznavstva, or UNIK). A scholarly research institution established in Kiev in 1922 on the basis of the Supreme Book Chamber (est 1919). Under its director, Yu. *Mezhenko, UNIK undertook the study of general and Ukrainian bibliology and bibliography and the history of printing, developed library science methodology, offered courses in bibliography and library science, prepared various bibliographic guides to Soviet Ukrainian publications, and amassed a valuable catalog and library of Ukrainian publications. Its staff and research associates (approx 50 people) were divided into four sections: the history of the book (chaired by S. Maslov), the sociology of the book (D. Balyka), book art and technology (N. Makarenko), and bibliography (T. Aleksiev and V. Shpilievych). UNIK published research in bibliography, library science, and the history of Ukrainian printing, the Ukrainian press, and Ukrainian book art in its serials *Bibliolohichni visti* (25 issues, 1923–30), *Trudy* (4 issues, 1926–30), and *Naukovi zapysky* (2 issues, 1933), and in over 60 books and brochures. Its activities declined with the onset of the Stalinist terror and the persecution

Bibliolohichni visti, the organ of the Ukrainian Scientific Institute of Bibliology

of its staff. Mezhenko was replaced as director by S. Yakubovsky in 1931, and UNIK was closed down in 1934.

Ukrainian Scientific Research Institute of Agricultural Microbiology (Ukrainskyi naukovo-doslidnyi instytut silskohospodarskoi mikrobiolohii). A research institute formed in Chernihiv in 1969 out of the Department of Agricultural Microbiology, Virology, and Immunology of the Ukrainian Scientific Research Institute of Land Cultivation and the Department of Agricultural Microbiology of the Chernihiv Oblast Agricultural Research Station. Until 1991 it was part of the Southern Branch of the All-Union Academy of Agricultural Sciences, and is now part of the new Ukrainian Academy of Agrarian Sciences. The institute has seven laboratories and a research farm. It researches problems of agricultural microbiology and virology and develops practical methods for increasing food production and improving the quality of agricultural produce. It also develops animal and plant antibiotics.

The Ukrainian Scientific Research Institute of Animal Husbandry of the Steppe Regions

Ukrainian Scientific Research Institute of Animal Husbandry of the Steppe Regions (Ukrainskyi naukovo-doslidnyi instytut tvarynnytstva stepovykh raioniv im. M. Ivanova). An agricultural institute located in the Askaniia-Nova Nature Reserve, in Kherson oblast. It was established in 1956 on the basis of the All-Union Scientific

Research Institute for the Hybridization and Adaptation of Animals. Studies are carried out on heredity patterns, livestock breeding, variability in traits, the care and feeding of sheep, and methods of the acclimatization, domestication, and hybridization of wild animals. Its scientific journal *Trudy* has been published since 1933. The institute also manages a zoo, a botanical garden, a technical information division, livestock breeding farms, and an experimental farm. Some of the achievements of the institute include improved Askaniia sheep, purebred multiparous Karakul sheep, a new breed of Red Steppe cattle, and new breeds of local swine. It has domesticated a number of wild animals and hundreds of plants. A graduate course is offered on a resident or correspondence basis.

Ukrainian Scientific Research Institute of Coal Chemistry (Ukrainskyi naukovo-doslidnyi vuhlekhi-michnyi instytut). Until 1992 an institute of the USSR Ministry of Ferrous Metallurgy, founded in Kharkiv in 1930. From 1968 it played a key role in the Soviet coke-chemical industry. In 1984 it had 7 departments, 18 laboratories, an experimental factory, and a postgraduate studies program. Its main research areas are thermal coal conversion and the isolation and conversion of coking products. Since 1972 it has published collections of scientific articles.

Ukrainian Scientific Research Institute of Experimental Veterinary Science (Ukrainskyi naukovo-doslidnyi instytut eksperymentalnoi veterynarii). The main veterinary research center of the Ukrainian SSR and now Ukraine. Located in Kharkiv, it was formed in 1921 out of the bacteriological station (est 1889) of the Kharkiv Veterinary Institute. Until 1956 it was known as the State Institute of Scientific and Practical Veterinary Medicine. The institute consists of 18 departments and oversees four veterinary research stations, the Department of Noninfectious Farm-Animal Diseases in Kirovohrad, and the Leukemia Research Support Center in Luhanske. The purpose of the institute is to develop methods of preventing and treating diseases that afflict farm animals and bees. It has prepared a number of vaccines, serums, antigens, and other effective means of combating animal diseases. It also trains researchers and upgrades the qualifications of veterinary workers. It offers a graduate program. The institute publishes an interdepartmental collection of papers titled *Veterynariia* and has published a 20-volume collection of its scientific works.

Ukrainian Scientific Research Institute of Forest Management and Agroforest Amelioration (Ukrainskyi naukovo-doslidnyi instytut lisovoho hospodarstva ta agrolisomeliorsii im. H. Vysotskoho). An institute established in Kharkiv in 1929 under the Commissariat (now Ministry) of Forest Management of Ukraine. It was merged with the Ukrainian Institute of Forest Management in 1951 and with the Forestry Institute of the AN USSR (now ANU) in 1956. In 1980 the institute had 12 laboratories, 2 departments, and a Carpathian branch. It oversaw the work of four forestry stations, the Crimean Mountain Forestry Station, four agroforest amelioration stations, the Lower-Dnieper Sand Forestation and Viticulture Research Station, the Desna Soil Erosion Research Station, the Veseli Bokovenky Dendrological Selection Station, and the Danylivka Experimental Forest

Farm. Its chief goals are to increase forest productivity and improve forest protection. The institute has a graduate program and publishes collections of scientific papers.

Ukrainian Scientific Research Institute of Geography and Cartography (Ukrainskyi naukovo-doslidnyi instytut heohrafiï ta kartohrafiï). A research institute under the People's Commissariat of Education of the Ukrainian SSR, founded in October 1927 in Kharkiv. Its director was S. *Rudnytsky, and its associates were geographers such as M. *Dmytriiev and K. Dubniak. Its objectives were to modernize fundamental research in geography, train professional geographers, develop geography curricula for secondary and higher schools, and prepare textbooks, maps, and atlases. It managed to publish two issues of *Zapysky* and a physiographic wall map of the Ukrainian SSR for schools before it was dissolved in 1934. Its director and some of its associates were charged with nationalism and repressed.

Ukrainian Scientific Research Institute of Geological Prospecting (Ukrainskyi naukovo-doslidnyi heolohorozviduvalnyi instytut). A research institute under the Ministry of Geology of Ukraine, dealing with oil and gas explorations in Ukraine. Established in Lviv in 1952, it was a branch of the All-Union Scientific Research Institute of Geological Prospecting for Petroleum until 1957. In 1978 the institute had 11 departments and branches in Kiev, Chernihiv, and Poltava. Its research deals mostly with the geology of petroleum and gas-bearing regions, prospecting methods, techniques and technologies for deep drilling, geophysical research methods, ways of estimating resources, and the economic analysis of geological prospecting. The institute participates in planning the development of the petroleum and gas industry in Ukraine and in international programs of petroleum and gas exploration. It publishes an annual collection of scientific papers.

Ukrainian Scientific Research Institute of Irrigation Farming (Ukrainskyi naukovo-doslidnyi instytut zroshuvanoho zemlerobstva). An institute established in Kherson in 1956 out of the Ukrainian Scientific Research Institute of Cotton Growing and until 1992 under the Southern Branch of the All-Union Academy of Agricultural Sciences. The earlier institute was formed in 1949 out of the Ukrainian Research Station of Cotton Growing, which grew out of the Kherson Research Station, which had been set up in 1910 on the basis of the experimental field of the Kherson Agricultural School (est 1889). The institute in 1979 had 19 departments, 2 research stations, 2 research farms, and 2 state farms. It researches the theoretical and practical aspects of irrigation farming and develops new techniques for effective irrigation. In 1972 a selection center for irrigated feed cultures was added to the institute. Since 1991 the institute has been part of the new Ukrainian Academy of Agrarian Sciences.

Ukrainian Scientific Research Institute of Irrigation Orchardling (Ukrainskyi naukovo-doslidnyi instytut zroshuvanoho sadivnytstva). A research institute of the Chief Administration of the Fruit-Preserving and Wine-Making Industry, established in 1972 in Melitopil, Zaporizhia oblast. It was formed out of the Melitopil Orchardling Research Station, which was based on a branch

of the Mliiv Orchard Research Station (1928–30). The institute in 1979 had 13 departments and specialized laboratories, a quarantine and introduction nursery, and 2 research farms. It studies the theoretical and practical aspects of irrigation orcharding and develops new farming techniques and new strains of fruit trees with higher yields.

Ukrainian Scientific Research Institute of Land Cultivation (Ukrainskyi naukovo-doslidnyi instytut zemlerobstva). An institution established in 1928 in the village of Chabany, Kiev oblast, on the basis of an agronomic laboratory. Until 1965 it was called the Ukrainian Scientific Research Institute of Socialist Land Cultivation, and until 1992 it was under the Southern Branch of the All-Union Academy of Agricultural Sciences. It is now part of the Ukrainian Academy of Agrarian Sciences. The institute has 22 departments and laboratories and a selection center of feed crops for Polisia and the forest-steppe region of Ukraine. It also maintains three research stations: for soil cultivation (in Drabiv, Cherkasy oblast), for meadowland management (in Kiev oblast), and for bog reclamation (in Panfyly, Kiev oblast); two research farms (in Kiev oblast); and several other research facilities. The main purpose of the institute is to develop the theoretical foundations and practical methods of land cultivation in the various agricultural regions of Ukraine. It also develops new plant strains and trains graduate students in agronomy. Research by its associates has been published in regular collections.

Ukrainian Scientific Research Institute of Mechanized Wood Processing (Ukrainskyi naukovo-doslidnyi instytut mekhanichnoi obrobky derevyny). A research institution, until 1992 under the Ministry of the Lumber and Woodworking Industry of the Ukrainian SSR. It was established in Kiev in 1930 as a branch of the Kharkiv Central Scientific Research Institute of Forest Management and the Lumber Industry and was given its present name in 1933. From 1975 it was the chief agency of the Ukrainian Scientific-Manufacturing Wood-Processing Consortium. Under the USSR Ministry of the Lumber and Woodworking Industry, it was the main agency for the standardization and metrology of sawdust materials, lumber, and wood products. The institute consists of 14 departments and a graduate school.

Ukrainian Scientific Research Institute of Metals (Ukrainskyi naukovo-doslidnyi instytut metaliv). A research institution established in Kharkiv in 1928 and until 1992 under the jurisdiction of the USSR Ministry of Ferrous Metallurgy. In 1980 it had 10 departments, 12 laboratories, an experimental plant, and a graduate program. Its research is devoted to increasing the range and quality of rolled steel, developing and applying the technology for manufacturing special steels and steel rollers, improving the technology for producing better-quality metals for railway use, implementing continuous steel pouring into the production process, and improving quality testing and control methods. The institute published three collections of scientific papers, in Russian: *Sortoprokatnoe proizvodstvo*, *Gnutye profili prokata*, and *Proizvodstvo zhelezodorozhnykh rel'sov i kolek*.

Ukrainian Scientific Research Institute of Orchard (Ukrainskyi naukovo-doslidnyi instytut sadivnytstva). A research institution established in 1930 in the village of Novosilky, Kiev oblast, known until 1954 as the All-Union Research Institute of Fruit and Vegetable Farming. Until 1992 it was under the USSR Ministry of the Food Industry. The institute has 11 departments, 9 laboratories, and 2 research farms. It studies new methods and techniques for orcharding and vegetable growing, and has developed 500 new strains of fruits and vegetables. It offers a graduate program and publishes collections of scientific papers.

Ukrainian Scientific Research Institute of Plant Cultivation, Selection, and Genetics (Ukrainskyi naukovo-doslidnyi instytut roslynnystva, selektsii i henytyky im. V. Iurieva). A scientific-research institution in the system of the Ukrainian Ministry of Agriculture located in Kharkiv, established in 1956 by the union of the Kharkiv Selection Station (est 1909) and the AN URSS (now ANU) Institute of Selection and Genetics (est 1946). It consists of 5 departments, 12 laboratories, 3 seed farms, and a research farm and has a total area of some 30,000 ha. The divisions support the following programs: agriculture, agricultural ecology and plant resources, plant protection, seed production, and the economics of agriculture. The laboratories investigate the *selection of spiked-grain cultures, the selection of corn, grain, and cereal cultures, genetics, implantation and development, heterosis, physiology and biochemistry, agricultural chemistry, soil microbiology, and grain biochemistry.

Ukrainian Scientific Research Institute of Refractory Materials (Ukrainskyi naukovo-doslidnyi instytut vohnetryviv). A research institute established in Kharkiv in 1932 on the basis of the Scientific Research Institute of the Silicate Industry of the Ukrainian SSR. Until 1992 it was under the jurisdiction of the USSR Ministry of Ferrous Metallurgy. The institute consists of several departments, laboratories, an experimental plant, and a graduate school. It develops refractory materials for blast furnaces as well as auxiliary devices for coke, Martin, two-tank, and glass furnaces, such as air heaters and mixers, and studies the technology of refractory-materials production. The institute has published a collection of scientific papers since 1932.

Ukrainian Scientific Research Institute of Scientific-Technical Information and Technical-Economic Research (Ukrainskyi naukovo-doslidnyi instytut naukovo-tekhnichnoi informatsii i tekhniko-ekonomichnykh doslidzhen). An institution under the State Planning Committee of Ukraine, established in Kiev in 1966. It has 15 departments and controls 17 interbranch territorial centers for disseminating information and propaganda. It also maintains a library and offers courses on information processing and propaganda. The institute develops strategies and methods for informing the public and economic managers of the state's economic goals and plans and for encouraging the implementation of the plans.

Ukrainian Scientific Research Institute of Soil Science and Agrochemistry (Ukrainskyi naukovo-doslidnyi instytut hruntoznavstva i ahrokhimii im. O.N.

Sokolovskoho). An institute of the Southern Branch of the All-Union Academy of Agricultural Sciences (to 1992) and now the Ukrainian Academy of Agrarian Sciences, founded in Kharkiv in 1956 on the basis of the AN URSR (now ANU) Soil Science Laboratory. It consists of four departments (soil science, chemical soil melioration, antierosion melioration, and agrochemistry), each with its own laboratories. It houses Ukraine's soil science archives, and maintains an antierosion research station in Yasynuvata raion (Donetske oblast) and an experimental state farm in Korotych (Kharkiv oblast). The institute conducts large-scale studies of soil utilization by the collective and state farms, and provides them with soil analyses and recommendations for the prevention of soil erosion and the improvement of productivity. It offers postgraduate and correspondence programs, and has compiled and published soil charts of Ukraine and the serial collection *Ahrokhimiia i hruntoznavstvo*.

Ukrainian Scientific Research Institute of the Economics and Organization of Agriculture (Ukrains'kyi naukovo-doslidnyi instytut ekonomiky i orhanizatsii silskoho hospodarstva im. O.H. Shlikhtera). A republican institute established in Kiev in 1956, which by 1963 had become the central institution for co-ordinated studies of agricultural problems in Ukraine. Until 1992 it was under the Southern Branch of the All-Union Academy of Agricultural Sciences, and is now part of the Ukrainian Academy of Agrarian Sciences. The institute studies theoretical and practical problems of agricultural economics and organization with the aim of increasing and accelerating agricultural production. It drafts proposals for rationalizing the labor process, establishing work norms and wages, and stimulating production. It also works out ways to improve farm management. In 1979 the institute had 10 departments, a computing center, and a graduate program. Its Department for the Organization of Agricultural Production is located in Kharkiv. It has three branches, in Tarashcha, Kiev oblast, Nykopil, Dnipropetrovske oblast, and Zhytomyr, and published the journal *Ekonomika i orhanizatsiia sil's'koho hospodarstva*.

Ukrainian Scientific Research Institute of the Meat and Dairy Industry (Ukrainskyi naukovo-doslidnyi instytut miasnoi i molochnoi promyslovosti). An institution established in Kiev in 1959. Until 1992 it was under the USSR Ministry of the Meat and Milk Industry. It had 7 departments, 17 laboratories, a construction office, experimental factories, and a graduate program for food workers. The institute was primarily concerned with improving meat- and milk-processing techniques in the USSR. It designed machinery and equipment used in the industry and new processing and packaging methods.

Ukrainian Scientific Research Institute of the Printing Industry (Ukrainskyi naukovo-doslidnyi instytut polihrafichnoi promyslovosti). A research institute of the Ukrainian State Committee on Publications, Printing, and the Book Trade. It was founded in Kharkiv in 1932 and was moved to Lviv in 1945. Since 1972 it has been the leading institute of the printing industry for problems of high-quality printing. The institute consists of nine departments, five laboratories, an experimental plant, a computing center, and a standardization group.

Ukrainian Scientific Research Institute of the Spirits and Liqueur-Whiskey Industry (Ukrainskyi naukovo-doslidnyi instytut spyrtovoi i likero-horilchanoi promyslovosti). A research institute formed in Kiev in 1958 out of the Kiev branch of the All-Union Scientific Research Institute of the Spirits Industry. Until 1992 it was under the jurisdiction of the USSR Ministry of the Food Industry. In 1982 the institute included 5 departments and 11 laboratories, a design and construction office, and 2 experimental distilleries, in Luzhany (Chernivtsi oblast) and Popivka (Sumy oblast). Its main areas of research are improved distilling technology; the complex processing of sugar-beet molasses into alcohol, baking and fodder yeasts, amino acids, and pharmaceuticals; improved industrial equipment; the automation of production; the mechanization of labor-intensive operations; and scientific work-planning and management. The institute also improves safety procedures and the control technology for chemical and microbiological processes. It studies more efficient ways to use raw materials and fuels.

Ukrainian Scientific Research Institute of Viticulture and Winemaking (Ukrainskyi naukovo-doslidnyi instytut vynohradarstva i vynorobstva im. V. Tairova). An institute established in 1931 on the basis of the Central Scientific Research Winemaking Station (est 1905). It is a component of the Ukrainian Ministry of Agriculture, located on the shores of the dry estuary southwest of Odessa. The institute consists of seven departments: agricultural engineering, wine production, *selection and studies of various grape varieties, plant protection, mechanization, economics and organization, and agricultural meteorology. In addition there are laboratories for plant physiology and biochemistry, agricultural chemistry, soil science and microbiology, and wine chemistry. It also manages the Donets Zonal Viticulture Research Station in Dokuchaievsk and support bases in Kiev, Vinnytsia, and Bilhorod-Dnistrovskiyi. The total area of the institute extends over 340 ha of grape fields, 100 ha of grafting vine nurseries, and 120 ha of orchards. New grape varieties developed by the institute include the Tairov, Sukholyman White, Early Odessa, and Ukrainian Beauty. Other innovations include the isolation of novel yeasts and improved wine storage technology.

Ukrainian Scientific Society (Ukrainske naukove tovarystvo, or UNT). The first Ukrainian-language and openly Ukrainophile learned society in Russian-ruled Ukraine. It was founded in Kiev on the initiative of V. *Naumenko in 1907, after tsarist restrictions on Ukrainian publishing were lifted. Its structure and activities were modeled on those of the *Shevchenko Scientific Society in Lviv, with which it maintained close ties. In 1912 the executive council members were M. Hrushevsky (president from 1908), O. Levytsky and I. Steshenko (vice-presidents), O. Cherniakhivsky (secretary), O. Shramchenko (treasurer), M. Biliashivsky, M. Lysenko, and I. Feshchenko-Chopivsky. The UNT was divided into historical, philological, natural sciences, and, later, technical, medical, archeological, pedagogical, and art sections and commissions on ethnography, linguistics, statistics-economy, and, from 1917, economic history, law, archeography, botany, and 11 other natural sciences. It maintained a library, an archeology and art museum, and the Museum of Ukrainian Person-

ages in Kiev. The UNT held biweekly lecture meetings, organized scholarly conferences and public lectures, and published original research, surveys, reviews, and some primary-source materials in its serials **Zapysky Ukrain-s'koho naukovoho tovarystva v Kyievi* (18 vols, 1908–14, 1917–18), **Ukraina* (quarterly, 1914, 1917–18), and *Ukrain-s'kyi naukovyi zhurnal* (2 vols, Moscow, 1915–16), a symposium dedicated to T. Shevchenko (1915), and several publications of the natural sciences, technical, and medical sections and the Ethnographic Commission. The UNT's activities were interrupted by the First World War and consequent tsarist restrictions, persecution, and censorship until 1917. After the 1917 Revolution the UNT was instrumental in the founding of the Ukrainian State University (see **Kiev University*) and the UAN (see **Academy of Sciences of the Ukrainian SSR* [now the Academy of Sciences of Ukraine]) in Kiev. It organized the first congress of Ukraine's natural scientists (1918), created the **Ukrainian Meteorological Service*, and prepared many scientific terminological dictionaries.

The UNT grew from 54 members in 1908 to 98 members in 1912. In its first decade it elected 161 full members. Most of them lived in Kiev and elsewhere in Russian-ruled Ukraine, with only a few in Galicia. Among the members were K. and V. Antonovych, D. Bahalii, J. Baudouin de Courtenay, B. Bukreev, V. Danylevych, V. Domanytsky, V. Durdukivsky, I. Dzhydzhora, F. Ernst, I. Franko, D. Grave, M. Halyn (chairman of the medical section), B. Hrinchenko, O. Hrushevsky, I. Kamanin, P. Kholodny (chairman of the natural sciences and technical sections), B. Kistiakovsky, O. Kolessa, M. Komarov, O. Korchak-Chepurkivsky, F. Korsh, O. Kosach (Pchilka), V. Kostiv (Verkhovynets), P. Kozytsky, M. Kravchuk, A. Krymsky, K. Kvitka, O. Leontovych, A. Loboda, I. and V. Luchytsky, V. Modzalevsky, K. Mykhalchuk, V. Naumenko, I. Nechui-Levytsky, H. Pavlutsky, V. Peretts (chairman of the philological section), M. Petrov, M. Porsh, V. Riznychenko, O. Rusov (chairman of the Statistical-Economic Commission), D. Shcherbakivsky, V. Shcherbyna, A. Shakhmatov, M. Sharleman, Ya. Shulhyn, S. Smal-Stotsky, M. Stadnyk, L. Starytska-Cherniakhivska, M. Sumtsov, S. Tomashivsky, P. Tutkovsky, Ye. Tymchenko, M. Vasylenko (chairman of the historical section), V. Vernadsky, F. Vovk, M. Vozniak, A. Yakovliv, O. and N. Yanata, D. Yavornytsky, O. Yefymenko, D. and M. Zerov, and P. Zhytetsky. In 1918 the UNT had nearly 300 members. In 1921 the UNT sections, commissions, library, and museums were forcibly incorporated into the All-Ukrainian Academy of Sciences (VUAN). Its *Zapysky* and *Ukraina* were revived in 1924 as the annual *Naukovyi zbirnyk* and quarterly/bimonthly *Ukraina* (1924–30) of the VUAN historical section.

R. Senkus

Ukrainian Self-Reliance League (Soiuz ukrainsiv samostiinykiv, or SUS). An umbrella group of liberal nationalist Ukrainian-Canadian associations and institutions founded in 1927 at conventions in Edmonton and Saskatoon. The member groups of SUS include the Ukrainian Self-Reliance Association (Tovarystvo ukrainsiv samostiinykiv, or TUS); **Ukrainian Women's Association of Canada* (SUK); **Canadian Ukrainian Youth Association* (SUMK); **Union of Ukrainian Community Centres* (SUND); Ukrainian student residences in Edmonton (**St John's In-*

stitute), Saskatoon (**Mohyla Ukrainian Institute*), and Toronto (**St Vladimir Institute*); and **St Andrew's College* in Winnipeg. The association grew out of an informal grouping of leading figures among the Ukrainian intelligentsia in Canada (including T. Ferley, J. Arsenych, W. **Swystun*, P. Zvarych, and the three Stechishin brothers) which was centered around the newspaper **Ukrains'kyi holos* and which established the **Ukrainian Orthodox Church of Canada* in 1918. Its ideology of self-reliance, articulated most clearly by Myroslaw **Stechishin* and W. Swystun, has centered on the ideas of self-respect among individuals, organizations, and nations; self-sufficiency in politics, economics, and religion; and independence of thought and action. The application of these ideas has resulted in efforts to develop nonpartisan 'all-Ukrainian' community organizations among Ukrainians in Canada. SUS actively promoted strong civic involvement in Canada by its members. At the same time it wholeheartedly supported Ukrainian causes abroad, although it has consciously refrained from direct involvement with Old World political factions. The league was a founding member of the Ukrainian Canadian Committee (now Congress) in 1940.

Ukrainian Service to the Fatherland (Ukrainska sluzhba batkivshchyni; German: Ukrainischer Heimatsdienst). A German-run program established in late 1941 in the **Generalgouvernement* to organize youths 19 and 20 years of age for work primarily in construction and road-building. In 1942 it was extended to include all males 18 to 60 years of age. From 1943 high-school students were required to do one year of service, and university students half a year. From the outset the **Ukrainian Central Committee* attempted to modify the program. Initially Ukrainians were accepted as volunteer laborers rather than conscripts. They were organized into separate Ukrainian units and allotted time for physical exercise and relaxation. The committee's representative for the program was O. Rusnak. In 1943 leadership courses for Ukrainians were organized in Lviv. In total, over 10,000 Ukrainians served under the program. When the Soviet forces approached Galicia, the workers were assigned to the German army, to the Division Galizien, or to anti-aircraft units.

Ukrainian Shield. See Ukrainian Crystalline Shield.

Ukrainian Sich Riflemen (Ukrainski sichovi striltzi [USS], Legion USS). The only Ukrainian unit in the Austrian army. Organized in Galicia in August 1914 at the initiative of the Supreme Ukrainian Council, it was supervised by the Ukrainian Combat Board. The first volunteers were members of Ukrainian paramilitary organizations, such as Sich, Sokil, and Plast. In September 1914 only 2,500 of them were accepted into the army and sent to Transcarpathia for brief training. After two weeks, individual USS companies were moved to the Russian front in the Carpathian Mountains.

The USS was divided into ten companies, grouped initially into two and one-half battalions and then into three independent groups (commanded by Capt M. Voloshyn, Capt H. Kossak, and Maj S. Shukhevych). Placed under the operational control of the Austrian 55th Infantry Division, they were employed tactically as battalions or com-

The coat of arms of the Ukrainian Sich Riflemen

panies of the 129th and 130th Austrian brigades. The legion's commander was T. *Rozhankovsky, then M. *Halushchynsky. In March 1915 the post of legion commander was abolished, and the USS were divided into two independent battalions (commanded by H. Kossak and S. Goruk and, later, V. Didushok), a reserve company, and a training unit. The legion distinguished itself in battle at *Makivka (29 April–3 May 1915), Bolekhiv, Halych, Zavadiv, and Semykivtsi. Despite casualties, the force remained at eight infantry companies (in two battalions). In 1916 the battalions were merged into the First Regiment of the USS, under the command of Maj H. Kossak and then Lt Col A. Varyvoda. In August–September 1916 the regiment lost over 1,000 men at *Lysonia and was reduced to a battalion (commanded by Col F. Kikal). The USS suffered another severe loss at Koniukhy in July 1917. The survivors of the USS Hutsul Company and the USS Kish were reformed into a new battalion (commanded by D. Krenzhulovsky). In February 1918, under Maj M. Tarnavsky, it marched with the Austrian army to the Kherson region. In October it was transferred to Bukovyna. On 3 November, the USS arrived in Lviv, too late to hold the city against the Poles. By January 1919 the battalion was expanded into

The Combat Board of the Ukrainian Sich Riflemen. Sitting, from left: Volodymyr Starosolsky, Teofil Kormosh, Kyrylo Trylovsky, Stepan Tomashivsky, Dmytro Katamai; standing: Ivan Bobersky, Volodymyr Temnytsky, Lonhyn Tsehelsky

the First Brigade of the *Ukrainian Galician Army (UHA). Commanded by Maj S. Bukshovany, it consisted initially of one regiment. By June 1919 it had two infantry regiments, a cavalry troop, an artillery regiment, and other support units. When the UHA was reorganized into the *Red Ukrainian Galician Army, the USS became the First Infantry Regiment, under the command of Capt Z. Noskovsky and then M. Baran. In late April 1920 the regiment suffered heavy casualties in battle and was surrounded by the Polish army; on 2 May 1920 it was forced to capitulate.

The Legion USS was the first and most durable (5.5 years) Ukrainian military formation during and after the First World War. Its former officers became the organizers and leaders of the *Sich Riflemen in Kiev. Its officers also played an important role in the *November Uprising in Lviv. It had the best-trained troops of the UHA, and its officers were the army's top commanders.

P. Sodol

Ukrainian Sich Riflemen, Brotherhood of (Bratstvo ukrainskykh sichovykh striltstiv). A veterans' organization of former members of the Ukrainian Sich Riflemen (USS), founded at the first USS convention in Regensburg, Germany, in February 1948. Its original name, Union of Ukrainian Sich Riflemen, was changed at the next convention to the present one. Its eight local branches in Germany and Austria had a membership of over 200. As its members emigrated overseas, new branches were set up in the United States (5 in the 1950s), Canada (4), and Argentina (1). The brotherhood organized the Chervona Kalyna press (New York), which published the collection *Nashi L'viv* (Our Lviv, 1953) and S. Ripetsky's *Ukrains'ke sichove striletstvo* (The Ukrainian Sich Riflemen, 1956) and copublished the quarterly *Visti kombatanta*. Leading figures in the brotherhood included I. Porytko and N. Hirniak.

Ukrainian Social and Cultural Society (Ukrainske suspilno-kulturne tovarystvo, or USKT). Established in 1956, the USKT was the only community institution in post-war Poland allowed to engage in Ukrainian cultural and educational activities until the 1980s. In spite of its official sanction, the USKT functioned under surveillance by the Ministry of Internal Affairs.

In 1981 the USKT headquarters in Warsaw oversaw 170 groups with nearly 6,000 members, and in 1988, 180 groups with about 7,500 members, all of whom were spread throughout Poland. Of these, only 10 percent lived on traditional Ukrainian ethnographic territory. For a long time the USKT was barred from forming groups in the Kholm and Podlachia regions. The largest branches (1981 figures) were in Peremyshl (400 members), Gdańsk (250), Szczecin (250), Koszalin (200), Cracow, Katowice, Olshzyn, Słupsk, Warsaw, and Wrocław. The USKT was headed by S. Makukh, H. Boiarsky, M. Korolko, K. Lashchuk, Ye. Kokhan, and M. Verbovy. Despite the impediments created by the Polish authorities, it managed to organize 50 art collectives, establish the male choir Zhuravli in 1972, and stage Ukrainian song festivals every two years,

as well as (since 1972) an annual festival of children's art collectives in Koszalin. Other aspects of the society's work include a wide-ranging program of lectures, dissemination of Ukrainian publications (in Olsztyn, Szczecin, and Warsaw), radio programs (in Koszalin, Olsztyn, Rzeszów, and Szczecin) in Polish about Ukrainian affairs, and work with Polish scholars in Ukrainian disciplines. It has published the weekly **Nashe slovo* (circulation, 10,000), with monthly supplements such as the scholarly-popular *Nasha kul'tura* and the children's *Svitank*. It also publishes the weekly *Lemkiv'ska storinka* as well as the annual *Ukrains'kyi kalendar*. Other publications include the literary anthology *Homin* (Echo, 1964); collections of poetry by Ya. Hudemchuk, Ye. Samokhvalenko, and I. Zlatokudra; and 19 school texts for Ukrainian language instruction in elementary schools.

Until 1989 a literary and artistic association with 40 members, including S. Demchuk (translator), P. Halytsky (prose writer), V. Hirny (prose writer), S. Kozak (literary scholar), O. Lapsky (poet), M. Lesiv (linguist), A. Mentukh (painter), H. Petsukh (sculptor), Ye. Samokhvalenko (poet), A. Serednytsky (literary scholar), T. Venhrynovych (painter), and S. Zbrovarny (historian), was affiliated with the executive. Other leading activists of the USKT have been R. Andrukhovych, O. Hnatiuk, S. Kontrolevych, M. Kovalsky, M. Kozak, P. Kreminsky, O. Las-ka, M. Serkiz, M. Syvitsky, and Ya. Zalitch. Its art collectives were headed by M. Duda, B. Fitsak, P. Lakh-tiuk, E. Mohyla, Ya. Popovska, and O. Valkovska. Former activists now deceased include H. Dmytriieva, L. Gets, L. Hladylovych, A. Hoshovsky, Y. Kurochko, O. Kutynsky, K. Kuzyk, I. Markiv, and O. Vasylkiv.

In 1990 the USKT was reconstituted as the Alliance of Ukrainians in Poland (Obiednannia ukraintsiv v Polshchi).

M. Trukhan

Ukrainian Social Democratic Association. See Spilka.

Ukrainian Social Democratic party (Ukrainska sotsial-demokratychna partiia, or USDP). A socialist workers' party founded on 18 September 1899 by Ukrainian members of the Polish Social Democratic Party of Galicia and Silesia (PPSD) who had formed a Ukrainian social democratic organization in Lviv in 1897, and by a minority faction that split away from the *Ukrainian Radical party. The USDP was a national section of the federated Social Democratic Party of Austria. Its Austro-Marxist program advocated the equality and autonomy of all nations in the Austro-Hungarian and Russian empires and the creation of a pan-Ukrainian independent republic. The executive consisted of Yu. *Bachynsky, M. *Hankevych (the chairman), R. *Yarosevych (a member of the Austrian State Council), M. Novakivsky, and S. *Vityk. Hankevych and Vityk were the key leaders. Other prominent members were R. Dombchevsky, Ye. Kosevych, V. Levynsky, T. Melen, P. and S. Novakivsky, M. Ogrodnik, Ya. Ostapchuk, M. Sichynsky, I. Siiak, D. Starosolska, M. Vitoshynsky, and I. Vozniak. The USDP had ties with the Revolutionary Ukrainian party and Ukrainian Social Democratic Workers' party in Russian-ruled Ukraine. By concentrating on trade-union work among the Ukrainian rural proletariat and organizing strike committees during the 1902 *peas-

ant strikes in Galicia it fostered a national identity and class consciousness within the Ukrainian peasantry. The first USDP congress was held in Lviv in March 1903. A fraternal Ukrainian section of the Social Democratic Party of Bukovyna was founded in 1906 and was led by Y. Bezpalcko.

Until 1907 the USDP was de facto a section within the PPSD. Its leaders Vityk and M. Hankevych were also members of that party (Hankevych headed the PPSD committee in Lviv). By mutual agreement the USDP did political work in the Galician Ukrainian villages, and the PPSD was active in urban centers. In 1906, however, Levynsky and other younger USDP members began demanding that the USDP do political work among the Ukrainian urban proletariat independently of the PPSD. Consequently, at the June 1907 USDP conference a new party statute was adopted, which made the USDP independent of the PPSD and instructed its members to begin organizing USDP committees, Volia workers' associations, and Ukrainian trade unions in urban centers; it also postulated the ethnic partitioning of Galicia. During the 1907 elections to the Austrian parliament the USDP received 8 percent of the Ukrainian vote and sent Ostapchuk and Vityk to the Chamber of Deputies. At the December 1911 USDP conference factional strife between the pro-PPSD leadership and the independentist 'young' faction (Bachynsky, P. Buniak, L. Hankevych, I. Kvasnytsia, Levynsky, V. Starosolsky, V. Temnytsky, Yarosevych) ended in the secession of the latter group. The USDP was not reunited until its fifth congress, in March 1914, which elected Temnytsky the new leader.

During the First World War USDP members were active in nation-building organizations such as the Supreme Ukrainian and General Ukrainian councils, the Combat Board of the Ukrainian Sich Riflemen, and the Union for the Liberation of Ukraine. In 1918 they took part in the first Ukrainian National Rada of the Western Ukrainian National Republic (ZUNR). Vityk was one of the Rada presidium's vice-presidents and a member of the executive; O. Ustyianovych was the presidium's deputy secretary; and V. Birchak, M. Boikovych, A. Chernetsky (also the first ZUNR state secretary of labor and social security), L. and M. Hankevych, I. Kalynovych, Y. Krupa, R. Kulytsky, I. Liskovatsky, H. Mariiash, and R. Skybinsky were Rada delegates. As early as December 1918, however, the USDP left the coalition government and joined the socialist opposition, the Peasants' and Workers' Union. The USDP supported the January 1919 unification of the ZUNR and UNR, however, and from April 1919 to May 1920 Y. Bezpalcko, Temnytsky, and Vityk held portfolios in the UNR Council of National Ministers. Starosolsky served as a deputy minister.

In 1921, after the Soviet-Polish Peace Treaty of Riga partitioned Ukraine between the two powers and the UNR Army was routed in the Ukrainian-Soviet War, the USDP adopted a pro-Soviet Ukrainian-unification platform and remained openly hostile to both the Polish government and Ye. Petrushevych's Vienna-based ZUNR government-in-exile. In the early 1920s members of the Vasylkiv faction of the *Communist Party of Western Ukraine (KPZU) infiltrated the USDP upper echelons. Consequently, at its sixth congress, in Lviv in March 1923, the USDP adopted a Communist platform and removed M. and L. Hankevych, Skybinsky, Starosolsky, Buniak, and Kvasnytsia from the leadership. In 1922 the Volhynian USDP members A. Bra-

tun, M. Chuchmai, S. Kozytsky, M. Lutskevych, V. Mokhniuk, A. Pashchuk, Kh. Prystupa, Y. Skrypa, P. Vasynchuk, and Ya. Voitiuk were elected to the Polish Sejm. In November 1923 they met in Lutske with other representatives of Ukrainian socialist organizations and established a united front, which was named the USDP of Eastern Galicia, Volhynia, the Kholm Region, Polisia, and Podlachia in December.

On 30 January 1924 the Polish government proclaimed the USDP a threat to peace and order and outlawed it and its organs. Most USDP members then joined the underground KPZU. The Sejm members Mokhniuk, Pashchuk, Prystupa, Skrypa, and Voitiuk left the Ukrainian Parliamentary Representation, formed their own Ukrainian Social Democratic Club, and then in November joined the Communist caucus in the Sejm. The non-Communist USDP minority became involved in the Robitnycha Hromada cultural and educational society. L. Hankevych's *Vpered* group revived the USDP in 1928. Under his and, from 1933, Starosolsky's leadership the new USDP belonged to the Labour and Socialist International. In December 1934 it formed a Ukrainian Socialist Bloc with the Ukrainian National Democratic Alliance and the Ukrainian Socialist Radical party. By that time the USDP had few members and little political influence or support, and after the German invasion of Galicia in 1939, it became inactive. Postwar émigrés in Western Europe who had been USDP members helped to found the *Ukrainian Socialist party.

The USDP organs were **Volia* (1900–7), **Zemlia i volia* (1906–13, 1919–20, 1922–4), **Chervonyi prapor* (1906–7), **Nash holos* (1910–11), **Vpered* (1911–13, 1918–24), **Pratsia* (1914, 1918), and, in Bukovyna, *Borba* (1908–14, 1918), *Volia naroda* (1919–21), **Robitnyk* (1919–23), and *Borot'ba* (1925–8).

R. Senkus

Ukrainian Social Democratic Party of Canada (Ukrainska sotsial-demokratychna partiia v Kanadi, or USDPK). A socialist political organization established in 1914. Its organizational antecedents include the Taras Shevchenko Society, formed in Winnipeg in 1904; the Ukrainian branches of the Socialist Party of Canada, organized in Nanaimo, Portage la Prairie, and Winnipeg in 1907; and the Federation of Ukrainian Social Democrats, formed in 1909, whose biweekly newspaper, *Robochyi narod*, became the USDPK's official organ. The group's leaders included I. Navizivsky and M. Popovich. When banned in 1918 for antiwar agitation, the USDPK had about 1,500 members, mostly immigrant laborers in mining, lumbering, and construction. It was later reconstituted as the *Ukrainian Labour-Farmer Temple Association.

Ukrainian Social Democratic Workers' party (Ukrainska sotsial-demokratychna robitnycha partiia, or USDRP). A clandestine party of the nationally conscious, revolutionary Marxist intelligentsia in Russian-ruled Ukraine that superseded the *Revolutionary Ukrainian party at the end of that party's third congress in December 1905. Prominent among the founding members were D. Antonovych, L. Bych, P. Diatliv, V. Doroshenko, D. Dontsov, M. Kovalsky, A. Livytsky, B. Martos, L. Matsiievych, Isaak Mazepa, P. Poniatenko, M. *Porsh (the first leader and ideologist), S. Petliura, V. Sadovsky, V. Stepankivsky, M. Tkachenko, M. Trotsky, S. Tymoshenko, V. Vynnychenko, L. Yurkevych, and A. Zhuk. The USDRP basically adopted the German Social Democratic Erfurt program. The approx 3,000 members of the USDRP did political work among the proletarianized peasantry of Chernihiv, Kharkiv, Kiev, Podilia, Poltava, and Volhynia gubernias and the Kuban. In 1906–7 the USDRP boycotted and condemned the 'bourgeois' *Ukrainian caucus in the Russian State Duma. From late 1906 on, the USDRP suffered mass arrests, repressions, and desertions, as well as internal conflicts. After its March 1907 congress the party was dormant, and its members co-operated with the Mensheviks and the Jewish Workers' Bund. Many leading members fled to Galicia and Central Europe, where they formally united with the *Spilka in late 1911. During the First World War several of them were active in the *Union for the Liberation of Ukraine. In the first decade of its existence the USDRP published the organs **Vil'na Ukraina* (1906) and *Nasha Duma* (1907) in St Petersburg, *Borot'ba* (1906) and **Slovo* (1907–9) in Kiev, and *Sotsial-demokrat* (1907) in Poltava. The USDRP Foreign Group, headed by Zhuk, published **Pratsia* (1909–10), **Robitnyk* (1910), and **Nash holos* (1910–11) in Austrian-ruled Lviv and *Borot'ba* (1915–16, ed Yurkevych) in Geneva.

The USDRP was reactivated as a public organization after the February Revolution. Until 1919 it published a daily paper, **Robitnycha hazeta*. At its conference in Kiev on 17–18 April 1917 it voted in favor of Ukrainian autonomy and federation with a democratic Russia. In July 1917 it dominated the First All-Ukrainian Workers' Congress. Although the USDRP had the most politically developed members (5,000 in October 1917) of all the Ukrainian left-wing parties, unlike the *Ukrainian Party of Socialist Revolutionaries it did not have mass support because of its cautious position on the socialization of land. It was on the executive level of the 1917–18 Central Rada and 1918–20 UNR coalition governments that the USDRP had the greatest influence. Vynnychenko was the Rada's vice-president and also headed the 1917 *General Secretariat of the Central Rada, and Petliura, Porsh, Sadovsky, and Tkachenko held portfolios in the latter body. In the first UNR *Council of National Ministers (CNM) Vynnychenko served as prime minister until 30 January 1918, and Antonovych, Porsh, Mazurenko, L. Mykhailiv, and Martos held portfolios. Under the right-wing 1918 *Hetman government the USDRP suffered repression; Petliura, Vynnychenko, and other leaders were imprisoned. Forced to go underground, the party adopted a position in favor of Ukrainian independence and participated in the coalition *Ukrainian National Union that led the successful uprising against the Hetman government and the German army.

In the UNR *Directory that took power in December 1918, Vynnychenko was the head, and Petliura was com-

mander in chief of the UNR Army. In the revived CNM V. Chekhivsky served as prime minister, and Antonovych, Martos, B. Matiushenko, V. Mazurenko, and Mykhailiv held portfolios until February 1919. At the fourth USDRP congress (10–12 January 1919) a split in the USDRP occurred. The left wing, which advocated rule by peasants' and workers' councils in an independent Ukrainian socialist republic and immediate peace with Soviet Russia, broke away and formed the separate *Ukrainian Social Democratic Workers' party (Independentists). The majority faction advocated a toilers' democracy, the gradual socialization of key economic sectors, and support for the Directory and the defense of the independent UNR against Soviet and Allied aggression. At the January 1919 *Labor Congress its delegates voted in favor of a democratic parliament, the implementation of major social reforms, the supreme authority of the Directory, and local rule by commissioners.

When the new prime minister, S. Ostapenko (not a USDRP member), began attempts at reaching an accord with the Entente Powers in February 1919, the USDRP instructed its members in the CNM to resign. Vynnychenko also resigned and emigrated with his followers. He was succeeded by Petliura, who resigned from the USDRP to become the new head of the Directory. A part of the USDRP remaining in Ukraine (including the Central Committee members A. Livytsky, I. Romanchenko, and M. Shadlun) continued supporting the Directory. In the CNM appointed in April 1919, Martos served as prime minister until August, and Livytsky (deputy prime minister), Mazepa, Shadlun, and H. Syrotenko held portfolios. Mazepa served as prime minister from August 1919 until May 1920. He added Tymoshenko to the CNM and appointed P. Fedenko a member of the Central Ukrainian Insurgent Committee. Livytsky signed the UNR-Polish Treaty of *Warsaw in April 1920, and from May 1920 only he, Mazepa, and Tymoshenko remained in the CNM.

The USDRP was banned in Soviet Ukraine. At the 9–13 September 1919 conference of USDRP émigrés in Vienna the Central Committee members P. Chykalenko, P. Didushok, Yu. Hasenko, I. Kalynovych, V. Levynsky, S. Mazurenko, H. Palamar, H. Piddubny, S. Vikul, and Vynnychenko demanded that the USDRP withdraw its support for Petliura's Directory and the CNM, and that its members resign from the CNM. After losing the vote on their motion they left the USDRP and constituted the so-called Foreign Group of the Ukrainian Communist party until 1921. The émigré majority formed the Prague-centered USDRP Foreign Group under the leadership of Mazepa. Y. Bezpalko, O. Bochkovsky, Fedenko, O. Kozlovsky, Matiushenko, and V. Starosolsky were prominent members. A member organization of the Labor and Socialist International, the group published the organs *Vil'na Ukraina* (Lviv 1921), *Sotsiialistychna dumka* (Lviv and Prague 1921–3), and *Sotsiial-Demokrat* (Prague 1925–9; Poděbrady 1929–39?). Although it was not part of the UNR *government-in-exile, it remained loyal to it, and the former USDRP member Livytsky served as its prime minister until 1947. After the Second World War former USDRP members helped to found the émigré *Ukrainian National Council in 1947 and the *Ukrainian Socialist party in 1950.

Ukrainian Social Democratic Workers' party (Independentists) (Ukrainska sotsiial-demokratychna robotnycha partiia-nezalezhnykh, or Nezalezhnyky). Originally a leftist faction within the *Ukrainian Social Democratic Workers' party (USDRP) and then a separate political party. In December 1918 the faction established its own Organizational Bureau in Kiev. It was opposed to both the Directory of the UNR and the CP(B)U and advocated an independent Soviet Ukrainian republic. It accused the CP(B)U of being an alien organization obsessed with violence, which substituted the dictatorship of the Party for the dictatorship of the proletariat and rejected the national rights of Ukrainians. The Independentists officially left the USDRP in January 1919, when the party's sixth congress rejected their motion to transform the UNR into a Soviet republic. As a party the Independentists patterned themselves on the Independent German Social Democratic party. Their leading ideologists were M. *Tkachenko and A. *Rychytsky, and their official organ was *Chervonyi prapor*.

Initially the Independentists adopted a pro-Soviet program and welcomed the establishment of G. Piatakov's Bolshevik government in Ukraine. They tried to function as a legal opposition party but were soon disillusioned. Upon breaking with the Bolsheviks the Independentists set up the *All-Ukrainian Revolutionary Committee, which headed an anti-Bolshevik revolt from April to July 1919. The leading members of the committee (Yu. Mazurenko, A. Drahomyretsky, Rychytsky, and M. Avdiienko), the Supreme Insurgent Council, and the General Insurgent Staff (Rychytsky and Mazurenko) were prominent Independentists.

A tiny group within the party, the so-called Left-Independentist faction (Pankiv, Hurkovych, and Dihtiar), condemned the revolt, split off from the Independentists, and formed a separate party with the official organ *Chervonyi stiah*.

At the beginning of the revolt the Independentists opposed not only the Soviet Ukrainian and Russian governments but also the Directory of the UNR and co-operated with Otaman D. Zeleny's partisans. A short-lived modus vivendi with the UNR was reached in June 1919. In July the Independentists decided to call an end to their insurrection, which was making it easier for A. Denikin's forces to advance into Ukraine. The UNR government arrested some members of the General Insurgent Staff but soon released them. Mazurenko and Tkachenko fled to Moscow and tried to work with the Bolsheviks.

In August 1919 the Left-Independentists merged with the *Borotbists and formed the Ukrainian Communist party (of Borotbists); the Independentists became the Ukrainian Communist party, or Ukapisty, in January 1920. Both Communist parties criticized the CP(B)U and ar-

gued for an independent Soviet Ukraine with its own economic, political, and party centers. The Borotbists were dissolved in 1920, and the Ukapisty in 1924, and most of their members joined the CP(B)U. Many of the former Independentists, such as Rychytsky, Yu. Lapchynsky, and B. Antonenko-Davydovych, became prominent Ukrainian cultural figures during Ukrainization and were later persecuted and even destroyed for their alleged nationalism.

Ukrainian Socialist Alliance–Peasant Union. See Sel-Soiuz.

Ukrainian Socialist party (Ukrainska sotsialistychna partiia, or USP). A small revolutionary party founded in Kiev in 1900 by Polish students sympathetic to the Ukrainian cause and other Poles who considered themselves Ukrainian. The USP was led by B. *Yaroshevsky, and modeled its program on that of the Polish Socialist party. Its approx 15 active members propagated among the peasantry of Right-Bank Ukraine the overthrow of tsarist oppression and the creation of an independent, democratic socialist Ukraine. Its five pamphlets (including the first Ukrainian translation of K. Marx's *Communist Manifesto*), proclamations, and the organ *Dobra novyna* (1903, ed S. Vityk and M. Stanko) were published in Austrian-ruled Lviv with the help of the *Ukrainian Social Democratic party there. The USP merged with the *Revolutionary Ukrainian party (RUP) in the summer of 1903, but it seceded in December after the Lviv-based RUP Foreign Committee condemned its position on Ukrainian independence as chauvinist. The USP never officially disbanded, but by 1905 most of its members had joined other parties.

Ukrainian Socialist party (Ukrainska sotsialistychna partiia). A union of émigré members of Ukrainian socialist parties from central (the Ukrainian Social Democratic Workers' party and the Ukrainian Party of Socialist Revolutionaries) and Western Ukraine (the Ukrainian Social Democratic party and the Ukrainian Radical party), formed in Augsburg, Germany, in 1950. The party supported the UNR government-in-exile and belonged to the *Ukrainian National Council. It represented Ukraine in international socialist party congresses in Europe. Its leaders included S. Dovhal, P. and B. Fedenko, I. Luchyshyn, V. Lysy, S. Ripetsky, and M. Stakhiv. With the death of most of its members, it ceased to be active. The party published several issues of an irregular organ, *Nashe slovo*, and several books by P. Fedenko.

Ukrainian Socialist Radical party. See Ukrainian Radical party.

Ukrainian Society for Friendship and Cultural Relations with Foreign Countries (Ukrainske tovarystvo druzhby ta kulturnoho zviazku z zarubizhnymy krainamy). An association for developing cultural contacts between Ukraine and other countries, with 12 oblast branches and nearly 2,000 affiliate members (local friendship societies and cultural organizations). First established in 1926 in Kharkiv as the Ukrainian Society for Cultural Relations with Foreign Countries, it assumed its

present name in 1959. The society was a member of the Union of Soviet Societies for Friendship and Cultural Relations with Foreign Countries. In representing Soviet policy the Ukrainian Society served as a major source of propaganda. Its activities consisted of sponsoring foreign cultural and trade delegations; sending Ukrainian delegations abroad; organizing Ukrainian festivals, art and industrial exhibitions, lectures, film screenings, and theatrical events in other countries; sending books and periodicals about Ukraine abroad; and hosting similar events in Ukraine. The presidents of the Ukrainian Society have been K. Kolosov (1959–68), V. Dmytruk (1968–71), V. Shevchenko (1972–7), M. Orlyk (1977–8), and V. Osnach.

Ukrainian Society for the Protection of Historical and Cultural Monuments (Ukrainske tovarystvo okhorony pamiatok istorii ta kultury). A republican voluntary organization established in Kiev on 21 December 1966 with the purpose of involving the Soviet Ukrainian public in the finding and protection of monuments of history, archeology, architecture, art, literature, ethnography, and folk art. The society has been headed by K. Dubyna (1966–7) and P. Tronko (since 1968). It co-operated closely with the Communist Youth League, the Znanzia Society, the Ministry of Culture, the Chief Archival Administration at the Ukrainian SSR Council of Ministers, and city planners. In 1986 it had nearly 18 million dues-paying individual members, in 75,293 workplaces and schools, who also donated over three million rubles to the society that year. The society's nearly 4,000 councils, research sections and commissions, and inspectorates function within the framework of state, oblast, raion, and city governments and employ more than 37,000 people, over 3,000 of them in administration. The society has devoted particular attention to protecting monuments of the Second World War. In 1981–5 it spent over 20 million rubles on the erection of new architectural monuments and the reconstruction and restoration of old ones. It organizes public events using the services of over 20,000 lecturers; operates some 700 'people's universities,' which educate new organizers, lecturers, guides, and inspectors; and publishes textbooks, guides, photo albums, methodological literature, and a quarterly magazine, *Pam'iatnyky Ukrainy* (est 1969), renamed **Pam'iatky Ukrainy* in 1988. It also convenes republican congresses (1966, 1971, 1976, 1981, 1986), has columns in more than 200 local newspapers and a regular radio broadcast, prepares television documentaries, and funds and runs the Museum of Folk Architecture and Folkways of Ukraine and a special restoration workshop.

Ukrainian Society of Aid to Emigrants from Greater Ukraine (Ukrainske tovarystvo dopomohy emigrantam z Velykoi Ukrainy). A relief and cultural organization established in Lviv in 1921, initially as a department of the *Ukrainian Citizens' Committee and then as an independent entity. It had active branches in Warsaw, Kalisz, and Częstochowa. The society provided a wide range of services to émigrés from Soviet Ukraine – financial support, legal aid, medical care, and cultural and educational development. It maintained a library, organized workshops and co-operatives, arranged concerts and lectures, and helped students to finish their education. Starting in 1922 it published the annual almanac *Dni-pro*. The society's president was V. *Doroshenko, and its

leading members were L. Biletsky, M. Dontsova, P. Kholodny, S. Fedak, and I. Kokorudz. After the Soviet occupation of Galicia in 1939 the society was dissolved.

Ukrainian Society of Bibliophiles in Prague (Ukrainske tovarystvo prykhylnykiv knyhy v Prazi). An association of bibliographers, librarians, publishers, and book lovers, founded in Prague in January 1927. It organized conferences and lectures on Ukrainian bibliography and publishing, book exhibits, and displays; compiled bibliographies of Ukrainian publications and *Ucrainica*; published the journal **Knyholiub* (1927–32); organized a large exhibition of Ukrainian book art in 1933; and, from 1934, sponsored annual awards for the five best-designed Ukrainian publications. The society maintained close contact with similar organizations in Czechoslovakia, Poland, Lviv, and (initially) Soviet Ukraine. In 1932 it had over 100 members. Its first head, S. *Siropolko, was succeeded in 1934 by V. *Sichynsky. The society ceased to exist in 1942.

Ukrainian Sociological Institute (Ukrainskyi sotsiologichnyi instytut). An émigré institution founded in 1919 in Vienna by M. *Hrushevsky with the participation of other members of the *Ukrainian Party of Socialist Revolutionaries. In 1920–1 the institute organized public lectures on topics ranging from sociology to the history of the Ukrainian revolution and published 10 works, among them P. *Khrystiuk's classic collection of materials on the history of the 1917–20 Ukrainian revolution (4 vols, 1921–2), M. Lozynsky's book on Galicia in 1918–20 (1922), V. Starosolsky's *Teoriia natsii* (Theory of Nation, 1921), and a book on M. Drahomanov and the Geneva socialist circle (1922) edited by Hrushevsky. The institute ceased to exist when Hrushevsky and Khrystiuk returned to Ukraine in 1924.

Ukrainian Soviet Socialist Republic (Ukrainska Radianska Sotsialistychna Respublika, or URSR). A communist state proclaimed by the First All-Ukrainian Congress of Soviets in Kharkiv on 24–25 December 1917 and established through armed aggression against the UNR by Soviet Russia and local Bolshevik forces in 1917–20. At the end of 1922 it became one of the constituent republics of the USSR. Until 1937 it was called the Ukrainian Socialist Soviet Republic (Ukrainska Sotsialistychna Radianska Respublika). The URSR ceased to exist on 24 August 1991, when its Supreme Soviet proclaimed the independent state of Ukraine.

The URSR bordered on the Black Sea and the Sea of Azov in the south, on Rumania, the Moldavian SSR (Moldova), and Hungary in the southwest, on Czechoslovakia and Poland in the west, on the Belorussian SSR (Belarus) in the north, and on the RSFSR (now Russian Federation) in the northeast and east. The total length of its borders was 6,466 km, of which 4,142 km were with other USSR republics, 1,271 km were with Eastern European countries, and the remaining 1,053 km were coast. Lying between 52°10' and 40°23' N latitude (893 km from north to south) and between 22°10' and 40°15' E longitude (1,316 km from west to east), the URSR had an area of 603,700 sq km. It was the third-largest USSR republic, after the RSFSR and the Kazakh SSR.

The population of the URSR, second only to that of the RSFSR, was 51.7 million according to the 1989 census; 34.6

million, or 67 percent of it, was urban. Less than three-quarters of the population was Ukrainian (72.7 percent), over one-fifth was Russian (22.1 percent), and other minorities accounted for the remaining 5.2 percent (including 0.95 percent Jewish, 0.86 percent Belarusian, 0.63 percent Moldavian, 0.45 percent Bulgarian, 0.43 percent Polish, 0.32 percent Hungarian, 0.26 percent Rumanian, 0.19 percent Greek, and 0.17 percent Tatar). For administrative purposes the URSR was divided into 25 oblasts, 479 raions, and 8,878 rural councils (*silrady*). Of its 434 cities 2 were subordinated directly to the republican government, 142 to the oblast governments, and 290 to the raion authorities. There were 927 urban-type settlements in 1989 (see the table). The borders of the URSR did not encompass the entire Ukrainian ethnic territory, which is one-quarter larger (750,200 sq km) than the national territory and contains 16 percent more people (60 million). The capital of the URSR was *Kharkiv, and from 1934, *Kiev.

The state emblem and red-and-blue flag of the Ukrainian SSR

Political structure. During the revolutionary period the Bolsheviks set up, on 25 December 1917, the Central Executive Committee of the Soviets of Ukraine as the government of Soviet Ukraine and formed, on 17 December, the People's Secretariat (headed by Ye. Medvediev and then M. Skrypnyk). The Bolsheviks had proclaimed Ukraine a republic of workers', soldiers', and peasants' soviets federated closely with Soviet Russia. Yet the URSR constitution of 10 March 1919 did not mention any federative links, and established a nominally independent state. In reality Moscow (the Party and government of Soviet Russia) controlled the URSR through the CP(B)U, which, except briefly, from its Tahanrih conference in April to its first congress in Moscow in July 1918, was a constituent part of the Russian Communist Party (Bolshevik).

The government institutions of the URSR were copies of the Russian institutions, and Ukrainian legislation merely echoed Russian laws. In fact, Russia's legislative acts were enforced automatically in Ukraine. The pretense of a separate Ukrainian state was maintained briefly to counteract the appeal of the UNR among the Ukrainian people. As soon as Soviet rule was established firmly in Ukraine, the URSR was turned into a constituent part of the federated state of the USSR.

In 1917–27 the highest governing body of Soviet Ukraine was the *All-Ukrainian Congress of Soviets. That body elected the *All-Ukrainian Central Executive Committee, which governed the country between sessions of the congress and appointed the *Council of People's Commissars as its executive organ. Similar bodies were established locally on the city, village, volost, county, and

UKRAINIAN SOVIET SOCIALIST REPUBLIC

gubernia level. Their members were selected through indirect elections, in which a worker's vote was worth more than a peasant's, and some citizens had no vote at all.

The URSR was absorbed into the RSFSR by the merging of their commissariats on the basis of so-called defensive or economic alliance treaties between two or more Soviet republics (1 June 1919 and 28 December 1920). The situation did not change when the URSR joined the USSR on 30 December 1922 as an equal partner of the RSFSR, the Belorussian SSR and the Transcaucasian SFSR. In the revised (May 1925) constitution of the URSR and its new version (1929) the governing bodies remained similar to the previous ones: the All-Ukrainian Congress of Soviets, the All-Ukrainian Central Executive Committee (headed by H. *Petrovsky), and the Council of People's Commissars (headed by V. *Chubar and later by P. *Liubchenko). The organs of the state administration, the people's commissariats, were of three types: (1) merged, which existed at the USSR level and had representatives in the republican governments; (2) joint, which existed in parallel at both the USSR and the republican levels; and (3) independent, which existed only at the republican level. In the Union agreement, five merged commissariats were created: foreign affairs, defense, foreign trade, transportation, and postal and tele-

graph service. Later, other commissariats were also merged. The new constitutions of the USSR (1936) and the URSR (1937) centralized the government system even further. A system of direct elections was introduced, and every citizen was given the vote. The Supreme Soviet, with its Presidium, became the highest governing body, and the Council of People's Commissars (from 1946, the Council of Ministers) became the highest executive organ. The people's commissariats were classified into (1) all-Union, (2) Union-republican, and (3) republican, and the number of all-Union and Union-republican commissariats was increased. The Constitution of 1 February 1944 gave the URSR new powers in foreign relations and defense by establishing Union-republican commissariats (later ministries) in those areas. The URSR did not establish its own embassies or armed forces, however. By the end of the 1940s Ukraine's Ministry of Defense had been abolished.

As the rights of the Union republics were expanded after J. Stalin's death, the URSR received in its revised constitution some new powers in administrative, judicial, and economic matters. In 1957, regional economic councils were introduced in addition to the republican economic councils to strengthen republican autonomy. The URSR gained the right to pass its own laws in the field as long as

*Includes city of Kiev

they were consistent with Union legislation and were called for by Union organs. On that basis a number of new USSR codes were worked out in the 1950s and 1960s. From the end of the 1960s the system of government was increasingly centralized: by 1978 there were 28 Union-republican ministries and 16 state committees, and only 6 republican ministries. As of June 1986 there were 23 Union-republican ministries and 14 state committees, and 6 republican ministries and 1 republican state committee. The last constitution of the USSR (1978), modeled on the USSR constitution (1977), reiterated the main articles of the latter and made only minor changes in the structure of government. Structural changes in the ministries could be made thenceforth by legislative enactment.

Both formally and actually the USSR was a unitary state without autonomous parts. Until 1940 it contained the Moldavian ASSR, which that year became a separate Union republic. In 1954 Crimea oblast was transferred from the RSFSR to the USSR. After a local referendum in January 1991, the Supreme Soviet of the USSR recognized the Crimea's autonomy. Until the end of 1991 the USSR was part of a broader federation of the USSR and its governing organs were subordinated to the governing organs of the USSR. Until 1990 the leading force in the political system in the USSR was the CPSU, which was merely a branch of the CPSU.

History. (For the history of the USSR to the beginning of the 1980s see *History of Ukraine.) Under L. Brezhnev's aging successors Yu. Andropov (1982-4) and K. Chernenko (1984-5) it became increasingly clear that the repressive, corrupt regime established by Brezhnev was leading the USSR into bankruptcy. After assuming power in 1985,

M. Gorbachev tried to revive the stagnant economy by a program of restructuring (Perestroika) at home and a reduction of armaments and tensions abroad. But economic reforms threatened the existing power structure and could succeed only if extensive political reforms were introduced. Furthermore, the Chernobyl nuclear accident (26 April 1986) and its handling by the authorities undermined public confidence not only in Soviet technology but also in the Party, the central government in Moscow, and the old guard led by V. *Shcherbytsky in Kiev. The disaster convinced even many members of the privileged Soviet elite that the existing political system and its corrupt leadership endangered the very survival of the people.

Gorbachev's policy of Glasnost (openness) led to increasingly bolder criticism of the Party, the government, and Soviet society and demands for faster and more radical reform. Nonofficial and uncensored publications began to circulate widely, and unofficial organizations (see **Neformaly*) sprang up to address cultural needs. National movements calling for greater local autonomy and less control from Moscow emerged in the Baltic and Caucasian republics and set an example for Ukraine. Recently released political prisoners reactivated the Ukrainian Helsinki Group at the end of 1987 and had reorganized it by mid-1988 into a broad political organization, the Ukrainian Helsinki Union, which spearheaded the national movement in Ukraine. The first unsanctioned public rallies were held in Kiev and Lviv in the summer of 1988.

Elections to the new USSR Congress of People's Deputies were held in March 1989. Although only a third of the deputies were elected by direct popular vote, some outspoken critics of the government won seats in the con-

A non-Party public rally in Lviv in July 1988

gress and turned it into a forum of debate over important issues. By September Shcherbytsky had retired as the first secretary of the CPU. The *Popular Movement of Ukraine was founded to unify the various streams of the national movement. In response to strong public protest the electoral law for the coming elections to the Supreme Soviet of the USSR in March 1990 was changed to make the election of all deputies subject to direct voting. Although the democratic movement lacked financial means and was poorly organized, it captured over a fifth of the seats in the Supreme Soviet and overwhelming majorities on the oblast and city councils in the three western oblasts of Ukraine (Lviv, Ternopil, and Ivano-Frankivske). Upon forming the National Council the 125 democratic deputies used the live radio and TV coverage of the parliamentary proceedings to raise the political consciousness of the Ukrainian people. A number of political parties appeared. On 16 July 1990 parliament passed the Declaration on Ukraine's State Sovereignty, which asserted the precedence of Ukrainian laws over Union laws and signaled Ukraine's intention to form its own army, create a banking system, and issue its own currency. A student hunger strike in October forced the resignation of Prime Minister V. Masol. In November the chairmen of the Ukrainian and Russian parliaments, L. Kravchuk and B. Yeltsin, signed a 10-year co-operation agreement between the two sovereign republics. To preserve the USSR, reactionary forces unleashed violence in the Baltic republics, which had declared their independence, and the Communist majority in the Ukrainian parliament passed undemocratic restrictions on political expression. In Ukraine there were protests in support of independent Lithuania and against Ukraine's signing of a new Union treaty. To build pressure for maintaining the Union, the central authorities held an all-Union referendum. In Ukraine 70 percent of the voters approved a new union of sovereign states, but at the same time 80 percent supported sovereignty as defined in the act of 16 July 1990. Negotiations between the central government and the sovereign republics continued until the attempted coup of 19–21 August in Moscow. On 24 August 1991 the Supreme Soviet of the USSR proclaimed Ukraine's independence, subject to a popular referendum to be held in December. Two days later the Supreme Soviet suspended the activities of the CPU, and shortly afterwards it banned the Communist party altogether. On 1 December 1991 over 90 percent of the voters

confirmed the declaration of independence and elected Kravchuk the first president of the new state, Ukraine. Ukraine was recognized immediately by Poland, Canada, Hungary, Russia, and the Baltic states. The referendum sealed the fate of the Soviet Union: without Ukraine a meaningful federation was not possible. On 8 December Ukraine, Belarus (formerly Belorussia), and Russia formed a Commonwealth of Independent States and declared the end of the USSR.

The state symbols of the USSR were a red and blue flag with a golden star, hammer and sickle on the red field, and an emblem with a golden hammer and sickle over a golden rising sun on a red shield surmounted by a red star and encircled in ears of wheat. Its anthem glorified the Soviet Union, V. Lenin's leadership, and the friendship of the Russian people.

Ukrainian Sports Federation of the USA and Canada (Ukrainska sportova tsentralia Ameryky i Kanady, or USTsAK). An umbrella organization of Ukrainian sports clubs and of teams sponsored by Plast and the Ukrainian Youth Association, founded in December 1955. It consists of three divisions: eastern United States (Newark, NJ, Philadelphia, New York City, Rochester, Yonkers), western United States (Chicago, Cleveland, Detroit), and Canada (Toronto, Montreal). USTsAK has run an annual summer sports school; trained referees and coaches; and organized annual soccer, skiing, volleyball, basketball, tennis, chess, swimming, and golf competitions, nearly 20 Ukrainian

Youth Sports Games, and Free Olympiads in Toronto (1980, 1984) and Philadelphia (1988), in which Ukrainians, Estonians, Latvians, Lithuanians, and Armenians living in North America competed. In 1981 it represented 20 clubs and sections and had a membership of 2,500. The first chairman of the board of directors was E. Zharsky. The presidents of the federation were I. Krasnyk, V. Levytsky, Ya. Khorostil, Y. Kosachevych, M. Sniurovych, W. Kizy-ma, R. Kucil, and M. Stebelsky.

Ukrainian Sports Union (Ukrainskyi sportovyi soiu, or USS). An umbrella organization of Ukrainian sports clubs and sports sections of the Sokil and Luh societies in Galicia, founded in 1925. The USS oversaw sports and physical education programs in Galicia, organized annual competitions in various sports, introduced tests for a physical fitness badge (1934–9), organized medical care for athletes (with the co-operation of the Ukrainian Physicians' Society), and published sports magazines. In 1934 it represented 77 organizations with a combined membership of 2,053. Through its activities it contributed to the rise of national consciousness, and because of this it was abolished by the Polish authorities in 1937. The USS presidents were O. Navrotsky, Ye. Savchak, B. Hnatevych, S. Dmokhovsky, B. Makarushka, S. Shukhevych, and O. Radlovsky.

Ukrainian State (Ukrainska Derzhava). The official name of Ukraine under the *Hetman government of P. *Skoropadsky, formally announced on 29 April 1918 in the Manifesto to the Entire Ukrainian Nation and the Laws on the Provisional State System of Ukraine. The legal structure of the Ukrainian State was a distinctly Ukrainian variant of a constitutional monarchy, based on some aspects of the traditional Cossack Hetmanate of the 17th and 18th centuries. The name appeared on official seals and currency until the fall of the Hetman government on 14 December 1918.

Ukrainian State Academy of Arts (Ukrainska derzhavna akademiia mystetstv). The first Ukrainian postsecondary art school, established in Kiev by a commission created in August 1917 by I. *Steshenko, the Central Rada's general secretary of education, and headed by H. *Pavlutsky. The academy's statute was approved by the Central Rada on 18 November 1917. The academy was officially opened on 5 December 1917 in the Rada building (formerly the Pedagogical Museum). On 31 December the Rada adopted a law making the academy an autonomous state institution with an annual budget of 97,400 *karbo-vantsi* and the right to receive foreign books and artworks duty-free. In January 1918 the academy moved into the former Tereshchenko School. It was governed by a council, elected on 27 October 1917, that included D. Antonovych, P. Zaitsev, and D. Shcherbakivsky (learned secretary). The rectors were V. Krychevsky (1917–18), F. Krychevsky (1918 and 1920–2), H. Narbut (1919–20), and M. Boichuk (1920). Its original faculty consisted of Boichuk (fresco and mosaic), M. Burachek (landscape), V. Krychevsky (folk art, ornamentation, architecture, composition), F. Krychevsky (genre, portrait, and historical painting, sculpture), A. Manevich (landscape), O. Murashko (genre painting), M. Zhuk (portraiture), and Narbut (graphic art). Courses were also taught by F. Ernst, M. Makarenko, V. Modzalevsky, and Shcherbakivsky. In

Faculty members and important guests at the official opening of the Ukrainian State Academy of Arts in 1917. Sitting, from left: Abram Manevich, Oleksander Murashko, Fedir Krychevsky, President Mykhailo Hrushevsky, Secretary of Education Ivan Steshenko, Mykola Burachek; standing: Heorhii Narbut, Vasyi Krychevsky, Mykhailo Boichuk

April 1919 the academy's premises were closed down by the Bolshevik authorities. Courses were held in the professors' homes until October, when the academy moved into a building rented by the Dniprosoiuz co-operative union. In 1920 the sculptor B. Kratko replaced Manevich, and in 1921 L. Kramarenko (large-scale decorative painting), V. Meller (theatrical scenery), S. Nalepinska (xylography), Ye. Sahaidachny (sculpture), and A. Taran (mosaic) joined the faculty. The academy had 140 students in 1918–19, 253 in October 1919, and approx 400 in 1921–2. Among them were T. Boichuk, S. Kolos, O. Lozovsky, O. Pavlenko, I. Padalka, V. Sedliar, R. Lisovsky, O. Dovzhenko, V. Krychevsky, Jr, S. Pozharshy, M. Rokytsky, O. Saienko, M. Yunak, K. Antonovych, and O. Sakhnovska. In 1922–3 the Kiev Gubernial Department of Professional Education transformed the academy into the Kiev Institute of Plastic Arts, which in 1924 became the *Kiev State Art Institute. Its first rector was I. Vrona. The formerly independent Ukrainian Architectural Institute (est 1918) became a faculty of the new institute.

S. Bilokin

Ukrainian State Administration (Ukrainske derzhavne pravlinnia). A provisional regional administration set up by S. *Bandera in Lviv in 1941. At a public meeting of Lviv's Ukrainian residents at the Prosvita hall on 30 June 1941 (later referred to as the National Assembly), Ya. *Stetsko proclaimed Bandera's decree on the creation of the Ukrainian state in the western territories of Ukraine (see *Proclamation of Ukrainian statehood) and the creation of a regional administration headed by Stetsko. On 4 July the German police prohibited publication of the act. Nevertheless, people held spontaneous meetings in outlying areas, at which representatives of the OUN (Bandera faction) proclaimed the restoration of Ukrainian statehood. A few similar demonstrations also took place in Volhynia, which was cleared of Soviet troops. At the same time local administrations, which recognized the State Administration, sprang up in Galicia and were tolerated

for a period by the German and Hungarian military authorities.

The composition of the government was set on 5 July: Stetsko, president; M. Panchyshyn, first vice-president and minister of health; L. Rebet, second vice-president; Gen V. Petriv, defense; V. Lysy, internal affairs; M. Lebed, state security; V. Stakhiv, foreign affairs; Yu. Fedusevych, justice; Ye. Khraplyvy, agriculture; I. Olkhovy, finance; A. Piasetsky, forestry; V. Radzykevych, education and religion; O. Hai-Holovko, information and propaganda; I. Klymiv-Legenda, political co-ordination; N. Moroz, post and telegraph; and M. Rosliak, state chancery. Deputy ministers and secretaries were appointed also. Some of those who had been appointed without consultation turned down their appointments. Metropolitan A. Sheptytsky agreed to become the honorary patron of the new body. The State Administration sat several times (although attendance was never full), published several declarations, and sent a memorandum to the German government. At its sitting of 11 July some members pressed the need to clarify the nature of the relationship between the German command and the administration. The matter was to be settled by a delegation made up of Stetsko, Rebet, Pankivsky, and Lysy.

On 12 July Stetsko and R. Ilytsky were arrested in Lviv and Stakhiv in Berlin by the German political police. Thereupon the Ukrainian State Administration ceased to function. The Council of Seniors headed by K. Levytsky, which had been set up as a consultative body by the Banderas OUN at a public meeting on 6 July, assumed the role of a temporary Ukrainian representation. Eventually it was reorganized into the Ukrainian National Council in Lviv.

The Ukrainian State Museum of Ethnography and Crafts

Ukrainian State Museum of Ethnography and Crafts (Ukrainskyi derzhavnyi muzei etnografii ta khudozhozho promyslu). The principal museum of its kind in Western Ukraine. It was established in 1951 through the merger of the Museum of Handicrafts (est 1874) and the Ethnographic Museum of the Shevchenko Scientific Society (est 1895). The holdings of both museums suffered heavy losses during the two world wars. After the second war they were replenished with nationalized private and public collections. By 1974 the museum held almost 80,000 artifacts of material culture, which were divided into two

collections, ethnographic and handicraft. The ethnographic collection encompasses articles from every region of Ukraine, but particularly Western Ukraine: farm implements, craft tools, weavings, folk costumes, embroidery, ceramics, wood-carvings, artistic metal products, toys, and Easter eggs. The handicraft collection includes articles not only from Ukraine but also from other territories, such as Russia, Central and Western Europe, and the Orient: porcelain, faience, fine furniture, belts, tapestries, and clocks. In 1967 a Department of Folk Architecture was set up. It oversaw the construction of the Lviv Museum of Folk Architecture and Folkways (opened in 1972). The Museum of Ethnography and Handicrafts supports a wide research and publishing program. It organizes expeditions, conferences, and seminars and provides methodological consultation for cultural institutions and manufacturing enterprises. It has published scholarly monographs, albums, and the collection *Materialy z etnografii ta mystetstvoznavstva* (8 vols, 1954-63). In 1982 the museum became a subdivision of the AN URSS (now ANU) Institute of Fine Arts, Folklore, and Ethnography in Kiev. Its director since 1958 has been Yu. Hoshko.

Ukrainian State Trio (Ukrainske derzhavne trio). An instrumental group established in Kharkiv in 1926 and active until 1941. Its members were M. Polevsky (piano), L. Tymoshenko (cello), and O. Ilevych (violin). The trio performed classical chamber music and works of contemporary Ukrainian composers.

Ukrainian State University of Kiev. See Kiev University.

Ukrainian Steppe Nature Reserve (Ukrainskyi stepovyi zapovidnyk). A nature reserve established in 1961 as an amalgamation of three nature reserves, Khomutovskyi step (Khomutove Steppe), Kamiani Mohyly (Stone Graves), and Mykhailivska tsilyna (Mykhailivka Virgin Soil Preserve). The reserve is dedicated to preserving a portion of the original steppe environment. It has a total area of 1,634 ha. The largest (1,030 ha) of the components, Khomutivskyi step, is situated in Novoozivske raion, Donetsk oblast, in the Black Sea Depression. It provides sanctuary for animals such as the European hare, the mole rat, the tiger weasel, the steppe viper, the black-headed bunting, the whip snake, marmots, and the like, some of which faced almost total extinction at the turn of the century. It also features approx 560 varieties of flora. The Kamiani Mohyly component of the reserve consists of two parallel granite ridges separated by a valley. With an area of 404 ha, it stretches across the border between Donetsk and Zaporizhia oblasts in Volodarske and Kuibysheve raions. A variety of vegetation can be found in the reserve, including the European aspen, pears, hawthorns, spireas, the dog rose, and the blackberry cotoneaster. Several centaureas and yarrows unique to the region grow in the reserve. The Mykhailivska tsilyna component (202 ha) is situated farther to the north, in Lebedyn raion of Sumy oblast. Although in the forest-steppe zone, the Ukrainian Steppe Nature Reserve is primarily a steppe-type reserve. Among its 960 varieties of fauna are approx 40 rare plants, including several vetches, carnations, wedge larkspurs, and irises. The reserve also shelters 26 species of mammals, 115 of birds, and 10 of fish.

Ukrainian Student Association in Germany (Spilka studentiv-ukraintsiv u Nimechchyni). The first Ukrainian student organization in Germany. Founded in 1921 and based in Berlin, it had 11 branches with approximately 180 members in 1923. In the following decade approx 400 students were members of the association, of whom 140 completed their education. In the 1930s the association gradually dissolved.

Ukrainian Student Hromada in Saint Petersburg (Ukrainska studentska hromada v Peterburzi). An association of Ukrainian students attending the various institutions of higher learning in St Petersburg, founded in 1898. Its purpose was to raise the national consciousness of Ukrainian students. It had a student choir and maintained close ties with the Ukrainian community in St Petersburg. Its members were active in the *Revolutionary Ukrainian party and the *Society of Ukrainian Progressives. The membership in the Hromada grew steadily: in 1905 there were 60 members, in 1908, 100, and on the eve of the First World War, 300. The heads of the Hromada were S. Shemet, V. Mazurenko, D. Doroshenko, and Serhii Tymoshenko, among others. Active and noteworthy members were M. Maslov, D. Dontsov, Ye. Neronovych, M. Skrypnyk, B. Ivanytsky, and I. Kosenko. The Hromada published the magazine *Ukrains'kyi student* (Ukrainian Student, 1913–14). In 1916 the Hromada ceased operations.

Ukrainian Student Organization of Mikhnovsky (Tovarystvo ukrainskoi studiiuichoi molodi im. M. Mikhnovskoho, known also as Ukrainian Students' Association of Mikhnovsky, or TUSM). A student organization with a nationalist ideological profile founded at a conference in Leipheim, Germany, in December 1949. Affiliated with the External Units (Bandera faction) of the *Organization of Ukrainian Nationalists, TUSM organizes ideological and political conferences. At its peak it had 300 to 350 members organized in several local branches (which in Canada and the United States come under national offices) and published the journal **Feniks*. Its head office was in Munich until 1955, when it was moved to North America. In 1970 Senior TUSM, a support group consisting of former student members of TUSM, was organized; it was headed by M. Bohatiuk, K. Savchuk, and M. Sosnovsky. The national executives and the executive of Senior TUSM constitute the association's supreme executive. Its presidents have included H. Vaskovych, M. Kravchuk, V. Budziak, V. Kulchytsky, B. Futala, and A. Lozynsky.

Ukrainian Students' Aid Commission (Komisiia dopomohy ukrainskomu studentstvu, or KODUS). Founded in 1940 in Cracow by the Ukrainian Central Committee, it was transferred to Lviv in 1942. After 1945 it became an émigré group based successively in Fürth (Germany), Sarcelles (France, 1951–82), and Munich (since 1982). It has been headed consecutively by I. Hrynokh, Yu. Poliasky, Z. Kuzelia (1944–52), O. Kulchytsky (1952–80), I. Hrynokh (1982–9), and Z. Sokoliuk (from 1989). Its secretaries have been T. Voloshyn (1946–82), H. Komarynsky (1982–9), and V. Lenyk (from 1989). To date approx 2,600 students have received financial aid from the commission. These funds were drawn from community donations, the Ukrainian Central Committee (before 1945), the Ukrainian Catholic

church (through the efforts of Archbishop I. Buchko), the United Ukrainian American Relief Committee, the Ukrainian Congress Committee of America, and the Ukrainian Canadian Relief Fund.

Ukrainian Studies Centre (Tsentri ukrainskykh studii). A scholarly institution established in March 1984 within the School of Modern Languages at Macquarie University in Sydney, Australia. In addition to a teaching program, the center undertakes research and publication in the areas of Ukrainian language, literature, history, political economy, and art. It is responsible for continuing education programs in Ukrainian studies and engages in community-related activities to attract support from outside the university. The center's operations are funded by the Ukrainian Studies Foundation (est 1974) in Australia. Its first director was I. Gordijew (1985–90).

Ukrainian Studies Fund (Fond katedry ukrainoznavstva, or FKU). A major funding body for Ukrainian studies in the United States. The fund was created in 1957 for the purpose of establishing and supporting Ukrainian scholarship at American universities. Headed by S. Kheymych, the FKU has raised endowments for three chairs in Ukrainian studies at Harvard University, of history (1968), literature (1973), and linguistics (1973). The FKU has also endowed the *Harvard Ukrainian Research Institute at Harvard University. The endowments were the result of a community-wide effort during which 9,000 individuals and organizations donated over three million dollars.

Professors Robert Lisovsky, Ivan Kulets, and Kostiantyn Stakhovsky of the Ukrainian Studio of Plastic Arts

Ukrainian Studio of Plastic Arts (Ukrainska studiia plastychnoho mystetstva). A private postsecondary art school established in Prague in late 1923 by the émigré Ukrainian Society of Plastic Arts. D. *Antonovych, the society's president, was the studio's director. Graduates of its four-year program received the degree of master of arts. Enrollment reached its peak in 1925 (67 students). Until 1930 the studio received a small subsidy from the Czech government. From 1932 it was registered in the name of I. *Kulets. The faculty, who taught for free, consisted of I. Mirchuk (esthetics), S. Litov, and, from 1925, Yu. Rusov (anatomy), F. Sliusarenko (classical archeology), D. Antonovych (art history), Serhii Tymoshenko (architecture, to 1929), V. Sichynsky (perspective), K. Stakhovsky (sculpture), S. Mako, and, from 1924, I. Kulets (drawing, painting) and I. Mozalevsky and, from 1929, R. Lisovsky (graphic art). From 1925 the studio held annual

exhibitions of its students' works (13 by 1939). It continued operating even under the German occupation. Its more noted graduates include K. Antonovych, Yu. Vovk, P. Hromnytsky, S. Zarytska, I. Ivanets, V. Kasian, M. Krychevsky, O. Liaturynska, H. Mazepa, P. Omelchenko, I. Palyvoda, P. Kholodny, Jr, V. Khmeliuk, V. Tsymbal, and Ye. Biss. The studio was closed down by the communist regime in 1950.

Ukrainian Supreme Emigration Council. See Supreme Emigration Council.

Ukrainian Supreme Liberation Council (*Ukrainska holovna vyzvolna rada*, or UHVR). A body formed toward the end of the Second World War by members of the Ukrainian Insurgent Army (UPA) and the Organization of Ukrainian Nationalists (OUN) to provide political leadership for Ukrainian independentist forces. It proclaimed itself the 'supreme organ of the Ukrainian people in its war of revolutionary liberation.' The council's organizers hoped to establish a broader political and social base for armed resistance to both the German and the Bolshevik occupational forces and sought to attract support from outside the OUN, although the OUN would continue to serve as the UHVR's ideological and organizational foundation.

A bulletin of the Ukrainian Supreme Liberation Council

In January 1944 L. Shankovsky, as a leader of UPA forces, headed the initiating commission that established contacts with representatives of former Ukrainian political parties as well as nonpartisan activists. Representatives of the Melnyk faction of the OUN declined to participate in the undertaking. The founding meetings of the UHVR were held on 11–15 July 1944 near Nedilna, in the Sambir region, under the protection of UPA forces. There were 20 participants; another 5 people had agreed to accept mandates but were unable to attend. The majority at the founding meeting were not OUN members, and

10 of them were from the northwestern Ukrainian lands and central Ukraine. The proceedings, chaired by R. *Voloshyn, resulted in the election of a provisional executive (presidium), the formulation of a social and political platform, and the proclamation of a universal to the Ukrainian people. The UHVR resolved to adopt democratic principles of state and political life and outlined the social and economic policies it believed a future Ukrainian administration would institute. The presidium included the president, K. Osmak, of Kiev; the vice-president, V. *Mudry; the director of the general secretariat, R. *Shukhevych; I. *Hrynokh; and I. Vovchuk.

In Soviet-occupied Ukraine the UHVR co-ordinated armed resistance through the UPA and waged a political and propaganda campaign against the Soviet authorities through the OUN. It also aimed its propaganda at Red Army detachments in Western Ukraine. Its official publications were *Visnyk UHVR* (1944–5), *Biuro informatsii UHVR* (9 issues, 1948–51), and *Samostiinist* (1 issue, 1946). P. *Poltava headed the information bureau. In 1946 the UHVR organized a boycott of the Soviet-sponsored elections. It also opposed the forced liquidation of the Ukrainian Catholic church.

In October 1949 the UHVR, UPA, and OUN issued a joint communiqué, *Zvernennia voiuuiuchoi Ukrainy do vsiei ukrains'koï emigratsii* (An Appeal of Fighting Ukraine to the Entire Ukrainian Emigration), as a call for people to mobilize around the independence issue beyond Ukraine's borders. After Shukhevych's death in 1950, V. *Kuk headed the general secretariat. According to Soviet sources, Kuk was captured in the mid-1950s. Likewise, most other members of the UHVR in Ukraine were either killed or arrested, and the organization was effectively eliminated there.

A number of UHVR members had left Ukraine in late 1944 and formed its External Representation (*Zakordonne predstavnytstvo*, or ZP UHVR), which was headed by Hrynokh. The general secretary was M. *Lebed, who served as the UHVR's external liaison officer and director of its information bureau. Lebed established contact with the Western Allied leadership in Italy in 1945. In the emigration the ZP UHVR issued a number of memorandums concerning the situation in Ukraine, including a submission (jointly with the UNR government-in-exile) to the peace conference in Paris. A Ukrainian press service was established, assistance was organized for UPA expeditionary forces that had worked their way to the West, and contacts were maintained (as far as possible) with the underground in Ukraine. A separate UPA mission was attached to the ZP UHVR.

The Bandera faction of the OUN supported the ZP UHVR until 1948. A number of tactical, ideological, and personal differences had emerged by 1954, and a splinter group of the Bandera OUN was formed, the OUN (Abroad); the new group became the main supporter of the ZP UHVR.

Attempts by the ZP UHVR to attract other organizations and parties to a popular front under its leadership were unsuccessful. After the establishment of the broadly based *Ukrainian National Council in 1947, the ZP UHVR formally renounced any intention of leading Ukrainian émigré political life; its focus was to serve as a representative of the revolutionary movement in Ukraine. The group co-opted a number of new members, formed a council, and established representative bodies in various countries.

From the mid-1960s the ZP UHVR held periodic conferences, at which new members were brought in and new executives were elected. In 1980 the group had over 20 members, of whom 10 were founding members. Original members of the UHVR who had died as émigrés included P. Chuiko, O. Malynovsky, Mudry, Z. *Pelensky, I. Si-mianchuk, Vovchuk, and Ye. *Vretsona.

The ZP UHVR began publishing the biweekly *Suchasna Ukraina* and the monthly *Ukrains'ka literaturna hazeta* in Munich in 1951. Those later provided the basis for the establishment of the journal **Suchasnist'*. In 1952, members of the ZP UHVR formed the research and publishing firm **Prolog*, which issued the English-language journal *Prologue* (1957–61) and the monthly *Digest of the Soviet Ukrainian Press* (1957–77). The *Suchasnist'* and *Prolog* publishing houses have issued more than 100 titles in history, political science, literature, and fine art. In the 1960s the ZP UHVR press bureau began publishing samvydav materials and popularizing the efforts of the Ukrainian dissident movement.

Ukrainian Teachers' Federation of Canada (Obiednannia ukrainskykh pedahohiv Kanady). An association formed in Toronto in 1949 by post-Second World War immigrant teachers to develop a national curriculum for the Ukrainian Saturday school system in Canada. Headed for many years by Z. Zeleny, the association attempted to develop curriculum, texts, and teaching aids as well as a specific pedagogical philosophy. While not totally successful, the federation had some influence in Ontario through its journal *Ridna shkola* and its participation in the National Center of Ukrainian Educational Councils created by the Ukrainian Canadian Committee (now Congress).

Ukrainian Teachers' Labor Alliance (Ukrainske uchytelske obiednannia pratsi). An organization for Ukrainian teachers, founded in 1941 as one of the separate professional *labor alliances operating under the auspices of the *Ukrainian Central Committee. The Teachers' Labor Alliance was the largest of these unions. Its statutes were accepted by the *Generalgouvernement, with the alliance thereby receiving semiofficial status. It fulfilled the functions of the two prewar teachers' professional societies, the *Ukrainian Teachers' Mutual Aid Society and the *Teachers' Hromada. In addition to engaging in its own professional activities, the alliance co-operated with school authorities in creating curricula, collecting materials, overseeing teacher qualifications, organizing courses, and publishing the journal *Ukrains'ka shkola*. It worked closely with the education section of the Ukrainian Central Committee. The headquarters was initially in Cracow, and from the autumn of 1941 the alliance also operated out of Lviv. It had over 8,000 members, and 80 percent of the Ukrainian teachers in the Generalgouvernement. The heads of the alliance were I. *Herasymovych, I. *Teslia, and S. *Levytsky.

Ukrainian Teachers' Mutual Aid Society (Vzaiemna pomich ukrainskoho vchytelstva, or VPUV). A professional organization of Ukrainian elementary-school teachers, founded in 1905. Initially it operated only in Galicia, but eventually it had four district branches in Bukovyna. Its membership in 1906 was 865 teachers out of a total possible membership of 4,000, and in 1914 some 710. In 1922 the society became a union of all the Ukrainian teachers in Polish-ruled Ukraine. In 1930 and after, because of the growth of the teachers' professional movement, the society expanded rapidly; that year it had 2,792 members out of a possible 3,500, and in 1938, 2,162 members, with 44 branches and 20 delegations. The headquarters was in Lviv. The society published the biweekly journal **Uchytel's'ke slovo*, the pedagogical-methodological monthly, later a quarterly, **Shliakh vykhovannia i navchannia*, and a series entitled *Pedahohichna-metodychna biblioteka* (A Pedagogical-Methodological Library). The society had a central pedagogical library, a research commission, a pedagogical consulting service, a credit union (Vzaiemna Pomich), relief funds for teachers, widows, and orphans, two buildings in Lviv, one building in Mushyna, and vacation resorts in Vorokhta and Cherche. Among the leading members of the organization were A. Alyskevych, I. Stronsky, M. Moroz, O. Vlasiihuk, I. Yushchysyn, A. Zeleny, H. Koval, I. Lylyk, and D. Stelmakh. With the arrival of the Soviet army in 1939, the organization was disbanded. In 1941–4 the society operated as the *Ukrainian Teachers' Labor Alliance, a section of the Ukrainian Central Committee.

O. Skrypnyk

Ukrainian Teachers' Publishing Company (Vydavnycha spilka ukrainskoho vchytelstva). A publishing house in Kolomyia that existed from 1909 to 1928. It issued readers; popular books on Ukrainian history, culture, and ethnography; and a series of five books of selected works by Ukrainian writers. It also ran its own bookstore.

Ukrainian Teachers' Union. See Ukrainian Teachers' Labor Alliance.

Ukrainian Technical and Husbandry Institute (Ukrainskyi tekhnichno-hospodarskyi instytut, or UTHI; German: Ukrainisches Technisch-Wirtschaftliches Institut). A polytechnical institute established in November 1932 as a correspondence school of the *Ukrainian Husbandry Academy (UHA) in Poděbrady, Czechoslovakia. With the closing of the academy in 1935, the institute took over its scientific and educational functions. The UTHI was organized along the same lines as the UHA, with departments of agronomy and forestry, chemistry and technology, and economics and co-operatives. It also offered courses in practical fields, such as beekeeping, gardening, and soap making, a secondary-school program on the farming industry, and programs of Ukrainian studies, foreign languages, and journalism. The economics and co-operatives department attracted the most students; the other two departments were soon dissolved. To supply correspondence students with textbooks a publishing house was established. It published 77 textbooks, the journal *Zhurnal shkil'noho lystuvannia* (1932–3), and the bulletin *Visti UTHI*. In 1932–9 there were 87 faculty members, and 1,080 students (75 percent of them in Galicia) were registered at the institute. During the war (1940–5) enroll-

The first senate of the Ukrainian Technical and Husbandry Institute (1936). Top row, from left: Leonid Frolov, Borys Martos, Mykola Dobrylovsky; bottom row: Serhii Komaretsky, Volodymyr Cherediiv, Oleksii Kozlovsky

ment in the correspondence school increased to 7,000. The directors of UTHI were B. *Ivanytsky (1932–6), B. Martos (1936–7), L. Bych (1937–9), L. Frolov (1939–41), and S. Komaretsky (1941–5).

In April 1945 the institute's faculty fled from the advancing Soviet forces, leaving the library, press, and archive in Poděbrady. On 28 June 1945 the American authorities permitted the institute to resume its work in Regensburg, Bavaria. In addition to the three existing programs of study, courses were offered in veterinary science and medicine and pharmacology. The faculty and students were provided with food and lodgings by the United Nations Relief and Rehabilitation Administration, and then by the International Refugee Organization. In 1945–52, 1,290 students matriculated, 307 of them with diplomas: 91 agronomists, 34 foresters, 13 civil engineers, 32 veterinarians, 122 pharmacists, 6 chemists, and 9 economists. The faculty had 219 members: 62 full professors, 45 docents, 91 lecturers, and 29 assistants. Besides lectures the institute continued to offer correspondence courses, which had an enrollment of 1,500. It also organized vocational training in Ukrainian émigré centers in Germany and graduated over 2,300 skilled tradesmen. Forty-seven textbooks were published or reprinted, and the periodicals *Visti UTHI*, *Naukovi zapysky* (edited by R. Yendyk and then M. Korzhan), and *Naukovyi biuletyn' UTHI* were issued. As Ukrainians emigrated from Germany UTHI was gradually transformed into a research institution. Its bimonthly *Biuletyn'* (1980–5) was edited by I. Maistrenko, and its *Naukovo-tekhnichnyi visnyk* (1986) by M. Horbatsch. Since the war the rectors of the institute have been V. Domanytsky (1945–7), Ivanytsky (1947–52), P. Savytsky (1952–61), R. Yendyk (1961–74), M. Korzhan (1974–8), I. Kovalsky (acting rector 1978–9), Maistrenko (1979–84), and A. Figol (since 1985).

Ukrainian Technical Society (Ukrainske tekhnichne tovarystvo, or UTT). A professional association of Ukrainian engineers, founded in Lviv in February 1909. The society's interests ranged from professional concerns to national issues. It participated in the development of Ukrainian industry and co-operatives, and the improvement of agriculture. To these ends the UTT organized conferences in Lviv in 1913 and in Stanyslaviv in 1919. After the First World War the UTT helped organize the Lviv (Underground) Ukrainian Higher Polytechnical School (1922–5), set up the Scientific Technical Commission of the Shevchenko Scientific Society (1929) and the Psychotechnical Commission (1930), and published the journal *Tekhnichni visty* (1925–39). Its membership grew from 65 (1913–23) to 366 (1930) and 532 (1935). During the Ukrainization drive in Soviet Ukraine, the UTT established contacts with professional societies such as the All-Ukrainian Association of Engineers in Kharkiv, the All-Ukrainian Intersectional Bureau of Engineers and Technicians, and the Scientific Technical Society of the VUAN. Some members of the UTT volunteered to work in Soviet Ukraine, and almost all of them perished there in the 1930s. In 1932 the UTT hosted the First Congress of Ukrainian Engineers in Lviv, which approved the charter of the Federation of Ukrainian Engineers' Organizations. The society's Commission for the Development of Ukrainian Industry (est 1932) promoted small businesses, worker training, and capital accumulation. The UTT was banned after the Soviet occupation of Western Ukraine. Many engineers fled from Galicia to the Generalgouvernement and established the Society of Ukrainian Engineers in Cracow (headed by Z. Kokhanovsky and R. Skochdopol). Under the German occupation of Galicia (1941–4) the Labor Alliance of Ukrainian Engineers (headed by P. Shokh and Ye. Perkhorovych) in Lviv co-operated with the Ukrainian Central Committee and promoted technical education. The presidents of the UTT were R. Zalozetsky-Sas (1909–19?), M. Gamota (1919–24), V. Manastyrsky (1925–6), P. Durbak (1926–7), A. Kornellia (1927–8), M. Pavlov (1928–30), V. Ryzhevsky (1930, 1935–8), Ye. Nahirny (1930), V. Levytsky (1930–2), O. Vasiuta (1932–5), and R. Vasylevych (1938–9). The society was reconstituted as the Ukrainian Engineers' Society in Lviv in 1990, under the directorship of V. Chaban; a similar society was founded in Kiev (1990), under the directorship of M. Zhurovsky.

Z. Kokhanovsky

Ukrainian Technical Society of Canada. See Society of Ukrainian Engineers and Associates in Canada.

Ukrainian Technological Society. A professional association set up in Pittsburgh in 1970 by M. Kotyk, P. Naber, M. Korchynsky, and M. Tymiak to help Ukrainian students attain higher education. It has organized concerts and other social events to raise funds for scholarships totalling more than 50,000 dollars over 20 years.

Ukrainian Terminological Center of America (Ukrainskyi terminolohichniy tsentr Ameryky [UTTsA]). An institution established in New York City in 1965 under the aegis of the Shevchenko Scientific Society (NTSh) and the Ukrainian Academy of Arts and Sciences in the US to develop and popularize Ukrainian terminology. The initiator of the UTTsA was M. Pezhansky, and its first director was V. Davydenko (1965–78), who was followed by A. Wowk

(1978–92). The UTTsA bases its work on microfilms of almost all of the terminological dictionaries published in 1920–30 by the *Institute of the Ukrainian Scientific Language before its abolition by the Soviet authorities. The UTTsA assisted in preparing M. Danyliuk's *English-Ukrainian Dictionary of Medical Terms* (1970) and N. Chaplenko's terminological dictionary *Ukrainian Terms in Culinary Art and Nutrition* (1980). In 1982 the UTTsA published M. Pezhansky's *Materials for an Aeronautical Dictionary*. A. Wovk published the *English-Ukrainian Dictionary of Color Names and Color Science* in 1986. Also produced within the framework of the UTTsA was *A Selective English-Ukrainian Dictionary of Science, Technology, and Modern Living* by A. Wovk. The first volume (A–M) was published by the UTTsA in 1982, and the second volume was published in fascicles by the Ukrainian Engineers' Society of America in 1982–90.

Ukrainian Theater Artists' Association (Obiednannia myststiv ukrainskoi stseny, or OMUS). An actors' association organized in Augsburg, Germany, in 1946 under the chairmanship of V. *Blavatsky. OMUS members belonged to various theater troupes in the displaced persons camps of Germany and Austria and numbered 90 by 1948, the largest contingent coming from the Ukrainian Actors' Ensemble. OMUS published the magazine *Teatr*. With the postwar emigration of most members the association was inactive until 1971, when it was renewed with Yu. Kononiv as director. OMUS published the supplement *Holos aktora* in the newspapers *Ameryka* and *Svoboda*, organized theatrical festivals and conferences, and published a voluminous collection of historical essays and memoirs, *Nash teatr* (Our Theater, 1975), edited by H. Luzhnytsky.

Ukrainian Theater in America (Ukrainskyi teatr v Amerytsi). A theater founded in New York in 1954 from the main cast of the *Theater-Studio of Y. Hirniak and O. Dobrovolska. It was directed by V. Lysniak and L. Kruhshelnyska, and its repertoire included émigré Ukrainian plays – Dima's *Peresadzheni kvity* (Transplanted Flowers) and *Khmil'* (Hops) and I. Kernytsky's *Taina doktora Horoshka* (Dr Horoshko's Secret) – and Ukrainian and world classics with nontraditional staging – I. Karpenko-Kary's *Martyn Borulia*, Molière's *Tartuffe*, R. Burkner's *Kniazivna na horoshyni* (The Princess and the Pea), and the Dobrovolska productions *Moisei* (Moses, based on I. Franko's poem) and *Liudyna i heroï* (Man and Hero). The theater was active until 1964.

Ukrainian Theater in Philadelphia (Ukrainskyi teatr u Filiadelfii, formerly Ansambl ukrainskykh aktoriv). Formerly the Ensemble of Ukrainian Actors theater, created in 1945 in Germany from the former drama cast of the Lviv Opera House under the artistic direction of V. *Blavatsky. A touring theater based in Augsburg (until 1947) and Regensburg (until 1949), in its first two years it gave 309 performances in the DP camps, from its varied repertoire of 16 dramas, operettas, revues, and farces, including M. Kulish's *Narodnyi Malakhii* (The People's Malakhii), Yu. Kosach's *Voroh* (The Enemy) and *Order* (The Warrant), L. Kovalenko's *Domakha*, J. Anouilh's *Antigone*, and A. Obey's *Le viol de Lucrèce*. In 1949 the ensemble moved to the United States, where it continued performing with Y.

Shasharovsky as director (from 1953) as the Ukrainian Theater in Philadelphia until 1957 and as Teatr u Piatnytsiu (1963–74).

Ukrainian Theater of the RSFSR. See Moscow Ukrainian Theater of the RSFSR.

Ukrainian Theatrical Society (Ukrainske teatralne tovarystvo). A society subordinated to the Union of Theater Societies of the USSR and established under the auspices of the Ukrainian SSR Ministry of Culture in Kiev in 1944. It has branches in Kharkiv, Donetsk, Lviv, Odessa, Dnipropetrovske, and Symferopil. By 1984 it had organized eight conferences to survey theatrical trends, discuss acceptable repertoire, and propagate K. Stanislavsky's acting method. It publishes **Ukrains'kyi teatr* and *Teatral'no-kontsertnyi Kyiv* in Kiev and theatrical journals in Lviv, Odessa, and Kharkiv. Its directors have been I. Patorzhynsky (1948–54), N. Uzhvii (1954–73), and O. Kusenko (1973–87). In 1987 an extraordinary congress of the Ukrainian Theatrical Society was convened, which established the *Union of Theatrical Workers of Ukraine and elected its executive, headed by S. *Danchenko.

Ukrainian Theological Academy. See Theological Academy of the Ukrainian Autocephalous Orthodox church.

Ukrainian Theological Scholarly Society (Ukrainske bohoslavske naukove tovarystvo [UBNT]; Theologica Societas Scientifica Ucrainorum). An association for the advancement of Ukrainian Catholic theology, religious education, and scholarship. Until 1939 it was called the Theological Scholarly Society. It was founded in September 1922 in Lviv, and its statute was written by the society's key figure, Rev Y. *Slipy, and adopted in December 1923. The UBNT was housed at the Greek Catholic Theological Seminary in Lviv, and its presidents were the seminary's rectors, Rev T. Halushchynsky (1923–6) and Rev Slipy (1926–39). The general secretaries were Rev Y. Skruten (1923–5), Rev M. Galiant (1925–8), Rev P. Khomyn (1928–31), K. Chekhovych (1931–9), and Ya. Chuma (1939). The UBNT membership grew from 27 in 1923 to 236 in 1939; approx 80 percent were clerics. Its full members (17 in 1923, 52 in 1938) were grouped in four sections: biblical studies, philosophy and dogma, history and law, and practical (pastoral) theology. The UBNT published a theological quarterly, **Bohosloviia* (17 vols by 1939), edited by Slipy; the monograph series *Pratsi Bohoslovs'koho naukovo tovarystva* (Works of the Theological Scholarly Society, 13 vols by 1939); the offprint and book series *Vydannia bohoslavii* (Publications of Theology, 29 issues by 1939); and the religious and community affairs monthly, **Nyva* (1933–9). It also established a library and archive containing, by 1939, over 12,000 volumes; over 300 valuable manuscripts and old books; and icons, vestments, and other religious artifacts. From 1933 to 1938 the UBNT sponsored more than 120 public 'academic evenings for a Catholic world view' in Lviv and nine other Galician towns, and the scholarly 'Union Congress' in Lviv (December 1936). In September 1939 its library was destroyed by a German bomb, and the UBNT itself was abolished after the Soviet occupation of Galicia.

In October 1959 the Conference of Ukrainian Catholic

Bishops in Rome revived the UBNT. Since that time its presidents have been Rev A. Velyky (1960–4) and Rev I. Hrynokh and its general secretary, Rev I. Khoma. Major Archbishop Slipy became the society's patron in 1963. He housed it at the new Ukrainian Catholic University in Rome and revived the publication of *Bohosloviia*. Today the UBNT has over 140 members in the West and three sections: (1) biblical studies, theology, and philosophy (based in Canada), (2) law and pastoral theology (United States), and (3) history and Eastern Christian studies (Europe).

Ukrainian Touring Theater. See Stanyslaviv Ukrainian Touring Theater.

Ukrainian Union. See Union for Agricultural Education.

Ukrainian Union of Agrarians-Statists (Ukrainskyi soiuз khliborobiv derzhavnykiv, or USKhD). An émigré monarchist organization founded in Vienna in February 1920 by V. *Lypynsky and S. *Shemet as the Union of Ukrainian Statehood (Soiuз ukrainskoi derzhavnosti). It was conceived as the body uniting all Ukrainian agrarians as a class in the pursuit of independent Ukrainian statehood, and in December 1920 it was renamed the USKhD and a statute and regulations were adopted. The USKhD consolidated the émigré members of the *Ukrainian Democratic Agrarian party and other supporters of Hetman P. *Skoropadsky. Lypynsky served as chairman of the Council of Jurors (Rada prysiazhnykh), the USKhD supreme council. A. Bilopolsky, D. Doroshenko, B. Homzyn, I. Mirchuk, N. Kochubei, V. Korostovets, S. Krylach (L. Sidletsky), V. Kuchabsky, O. Nazaruk, O. Shapoval, O. Skoropys-Yoltukhovsky, M. Tymofiiv, and V. Zalozetsky were other leading USKhD members. Lypynsky edited the USKhD organ, **Khliborobs'ka Ukraina* (1920–5), and serialized therein his 'Lysty do brativ-khliborobiv' (Letters to [My] Brother Agrarians' (pub separately 1926), a 630-page discourse that served as the foundation of the USKhD ideology. It elaborated the idea of an independent, 'classocratic' (as opposed to democratic), pan-Ukrainian 'toilers' monarchy' without political parties, ruled by Skoropadsky (the embodiment of national unity) and his dynasty with the help of an agrarian aristocracy and the co-operation of the productive classes. Fraternal organizations of the USKhD were founded in Poland (the Union of Agrarians of Ukraine [est 1921], headed by M. Khanenko), Rumania (the Union of Ukrainian Agrarians in Bucharest [est 1921], headed by P. Novitsky), Germany, Czechoslo-

vakia, Bulgaria, Yugoslavia, Estonia (1921, headed by V. Pototsky), and North America (see *Sich society). At their joint June 1922 congress the Central Administration of United Ukrainian Agrarian Organizations, headed by S. Shemet, was appointed by Skoropadsky to assist him in Wannsee, near Berlin.

The USKhD prepared itself to take power in Ukraine after the collapse of Soviet rule, which it believed to be inevitable. It was hostile to the *Government-in-exile of the UNR and did not co-operate with that body's supporters. Because of political disagreements with Skoropadsky and his supporters in the Council of Jurors, in September 1930 Lypynsky announced the liquidation of the USKhD and founded in its place the short-lived Brotherhood of Ukrainian Classocrats-Monarchists Hetmanites (Bratstvo ukrainskykh klasokrativ-monarkhivistiv hetmantsiv). The majority of USKhD members disagreed with Lypynsky's actions, however, and after his death in 1931 the Council of Jurors revived the USKhD and elected Y. Melnyk the leader. Internal conflicts did not disappear, however, and the USKhD was formally dissolved without Skoropadsky's participation at a meeting of the Council of Jurors in Warsaw on 16 July 1937. It was replaced in September 1937 by the Union of Hetmanites-Statists. A fraternal North American organization by that name had been founded in 1934 and was called in English the *United Hetman Organization.

R. Senkus

Ukrainian Veterinary Medical Association (Obiednannia ukrainskykh veterynarykh likariv, or OUVL). A professional organization established in Munich in 1946 with a membership of about 200. The first president was I. *Rozhin. In 1950 its head office was moved to Chicago. It has six branches in North America and individual members on other continents around the world. In 1967 its membership stood at 140. There is an active research group within the OUVL. The association published its journal *Informatyvnyi lystok OUVL* irregularly in Munich and then as a quarterly in Chicago (1950–63) and Saskatoon (1964–7). In 1981 it published an almanac, compiled by Ya. Geleta and edited by R. *Baranovsky.

Ukrainian Veterinary Scientific Research Institute (Ukrainskyi veterynarnyi naukovo-doslidnyi instytut). A research center under the Southern Branch of the All-Union Academy of Agricultural Sciences and, from 1991, the Ukrainian Academy of Agrarian Sciences. It was formed in Kiev in 1977 out of a branch of the *Ukrainian Scientific Research Institute of Experimental Veterinary Science. It has five departments with 20 laboratories, and three support centers. It also oversees the Poltava and Zhytomyr veterinary research stations and an experimental farm. Its purpose is to develop measures to prevent infectious diseases on industrial and specialized animal farms and to introduce sanitary inspection methods for farm products and quality-control methods for animal products. The institute developed ways to combat infectious hog diseases, a vaccine for hoof-and-mouth disease, and an improved diagnostic test for anthrax.

Ukrainian Volcanic Carpathians. See Volcanic Ukrainian Carpathians.

Yevhen Konovalts with leading members of the Ukrainian War Veterans' Association of Canada in 1929. Sitting, from left: Pavlo Shtepa, Konovalts, Evstakhii Vasylyshyn; standing: Dmytro Gerych, Vasyl Topolnytsky, ?

Ukrainian War Veterans' Association of Canada (Ukrainska striletska hromada v Kanadi, or USH). A nationalist veterans' organization founded in 1928 in Winnipeg and incorporated in 1950 as an autonomous organization affiliated with the *Ukrainian National Federation (UNO). Its purpose was to cultivate Ukrainian military traditions and support the struggle for Ukrainian independence. From the beginning the USH maintained close contacts with the Ukrainian Military Organization (UVO), the Organization of Ukrainian Nationalists (OUN), and, after the war, the Melnyk faction of the OUN. In the 1930s it sent substantial sums to Western Ukraine to help war invalids and to defend political prisoners. It played a key role in the founding of the UNO. At first its membership (478 in 1928, 585 in 1931, and about 1,200 in 1939) consisted of former soldiers of the Army of the UNR and the Ukrainian Galician Army. There were 22 branches in the interwar period and 16 branches after the Second World War. After 1945 recent immigrants from Ukraine and veterans of the Canadian armed forces joined the USH. The head office was moved from Winnipeg to Saskatoon and, finally, to Toronto (1935). The presidents of the USH have included E. Vasylyshyn (1928–30, 1945–7, 1950–2), I. Guliai (1930–3, 1934–6, 1937–45), Yu. Diakunchak (1954–6, 1962–6), I. Nosyk (1956–62), and Yu. Temnyk (1966–71, 1972–5). To propagate its ideas the association published the monthly paper *Strilets'ki visti* (1930–1), a weekly page in *Novyi shliakh* (1932–9, 1949–50), and *Informator Holovnoi upravly USH* (1953–63).

Za chest', za slavu, za narod! Zbirnyk na zoloty iuvilei Ukrains'koi strilets'koi hromady v Kanadi, 1928–1978 (Toronto 1978)

Ukrainian War Veterans' Association of the USA (Ukrainska striletska hromada v ZDA). An organization of former soldiers of the Army of the UNR and the Ukrainian Galician Army founded in Philadelphia in 1925 for the purpose of cultivating Ukrainian military traditions, helping war invalids in Ukraine, and supporting the struggle for Ukrainian independence. The association collected

over 44,000 dollars in a decade and helped to finance the Ukrainian Invalids' Home in Lviv. Its first and longterm president was V. Galan. Upon organizing the United Ukrainian War Veterans in America in 1949, the association dissolved itself.

Dorohovkaz, the organ of the Ukrainian War Veteran's League of Canada, with a picture of the league's crest

Ukrainian War Veterans' League of Canada (Soiuz buvshykh ukrainskykh voiakiv). A veterans' organization founded in Montreal in 1936 to propagate Ukrainian national and military traditions. Composed primarily of former soldiers of the Army of the UNR, the group established six branches prior to the Second World War and several more after it. S. Waldstein served as the longtime head of the group during its early phase. In 1952 the organization's headquarters was moved to Toronto, where its leaders have included M. Sadovsky, I. Yanishevsky, I. Lypovetsky, and I. Roienko. The league published two quarterly journals, *Biuletyn' Soiuzu buvshykh ukrains'kykh voiakiv u Kanadi* (1959–64) and *Dorohovkaz: Orhan voiats'koi dumky i chynu* (1964–1970).

The Ukrainian Weekly

Ukrainian Weekly, The. An English-language weekly paper published in Jersey City, New Jersey, since October 1933. It succeeded the *Ukrainian Juvenile Magazine*, a quarterly supplement to the paper **Svoboda* that appeared from December 1927 to April 1931. The *Ukrainian Weekly* was also a supplement to *Svoboda* until the early 1970s. Since then it has been an independent paper published by the *Ukrainian National Association (UNA). Aimed at native Americans of Ukrainian descent, it has reported and commented on Ukrainian life in the United States and elsewhere and on developments in Ukraine, promoted Ukrainian culture and identity in the English-speaking world, and serialized English translations of Ukrainian prose. It has maintained high journalistic standards and has done much in recent years to increase its coverage of events and developments across North America through the use of local correspondents. The editors of the *Ukraini-*

an Weekly have been S. Shumeyko (1933–59), H. Perozak, W. Dushnyck, R. Chomiak, Z. Snylyk (1962–79), and R. Hadzewycz. The associate editors have included I. Dlaboha, G. Zarycky, I. Casanova, M. Kolomayets, and C. Lapychak. In 1986 the paper's circulation was 6,300.

Ukrainian Women's Alliance in Belgium (Obiednannia ukrainok Belhii, or OUB; Union des ukrainiennes en Belgique). A women's organization founded in 1948 as an autonomous section of the *Ukrainian Relief Committee in Belgium. It became an independent body in 1952. It was most active in 1948–52, with 15 branches and 500 members participating in the co-operative work of Belgian women's organizations, organizing exhibitions of Ukrainian folk art, and taking part in the congresses of the World Motherhood Movement. After the emigration of many of its members abroad, the OUB gradually restricted its activities largely to gatherings and commemorative events, day-care centers, social services, and the running of a radio program in the area of Hainaut and Centre. Today the OUB has five branches and fewer than 150 members. It has been headed by Z. Vytiaz and S. Sydor.

Ukrainian Women's Alliance in Germany (Obiednannia ukrainskykh zhinok u Nimechchyni, or OUZh; Ukrainische Frauenverband). An association formed in 1945 to serve the cultural, educational, and material needs of the Ukrainian *displaced persons in Germany. OUZh set up a network of nurseries and schools, trained nursery teachers, made contact with German and other émigré women's organizations, and published the monthly *Hromadianka* (1946–50) and quarterly *Zhinochyi informatsiyni lystok* (1962–) as well as various brochures on Ukrainian women and folk art. In 1947 its membership peaked at 7,500 (72 branches); then it declined rapidly as many refugees emigrated overseas. In the 1960s OUZh had about 500 members organized in 16 branches, and in 1987 it had 186 members in 7 branches. Its head office is in Munich. It has financed two Ukrainian schools and three day-care centers; provided care for elderly members; sent parcels to political prisoners in the USSR and poor Ukrainian families in Poland, Brazil, and Yugoslavia; and given bursaries to Ukrainian student refugees from Poland and Ukraine. The presidents of the alliance have been I. Pavlykovska (1945–50), O. Pavlovska (1950–8), O. Sulyma-Boiko (1958–66), O. Yarymovych (1966–9), and O. Steiner (since 1969). A history of OUZh was published in Munich in 1980.

Ukrainian Women's Alliance in Venezuela (Obiednannia ukrainskykh zhinok Venesueli, or OUF). An autonomous women's section of the Ukrainian Hromada in Venezuela, founded in 1949 in Caracas. The alliance has organized national festivals, children's events, and recreational activities. It ran two kindergartens and a Saturday school and raised funds for building the Ukrainian People's Home. Its presidents have been H. Koval, E. Berezna, E. Sliusar, O. Boshko, S. Prypkhan, L. Pochynok, and M. Mazniak.

Ukrainian Women's Association in Australia (Soiuz ukrainok Avstralii, or UWAA). Founded in 1949 by I. *Pelenska, the group held its first national conference in June 1951, with delegates from three states representing 400 members. In March 1989 the UWAA had 958 members

in 19 branches. The UWAA promotes the cultural and educational development of women and the family as a whole, engages in social welfare work, and informs the general public about Ukraine. It maintains the Ukrainian Museum in Adelaide and is a member of the *World Federation of Ukrainian Women's Organizations and the National Council of Women of Australia. Its presidents have included I. Pelenska, S. Vavryk, L. Haievsk-Denes, and (since 1983) O. Shevchyk. It has published the quarterly *Nashe slovo* since 1965. The first editor was L. Gordijew, who was followed by L. Haievsk-Denes and in 1985 by S. Syvenka.

The central executive of the Ukrainian Women's Association of Canada in 1929. Sitting, from left: Savella Stechishin, Olena Kysilevska (guest from Ukraine), Anastasiia Ruryk; standing: Stefania Bubniuk, M. Hryniuk

Ukrainian Women's Association of Canada (Soiuz ukrainok Kanady, or UWAC). A national Ukrainian women's organization established in December 1926 in Saskatoon. Initiated by S. Stechishin, M. Madiuk, D. Yanda, and M. Hryniuk, the association organized Saturday and Sunday schools, sponsored concerts and lectures on topics of national concern and domestic matters, promoted the preservation of Ukrainian folk art traditions, and urged its members to become active in Ukrainian community affairs. It maintained ties with the Union of Ukrainian Women in Galicia, became a member of the National Council of Women (in Canada), and participated in national and international women's conferences. UWAC became part of the *Ukrainian Self-Reliance League in 1927. It has contributed a women's page to the newspaper *Ukrains'kyi holos* since 1929 and began publishing its own monthly bilingual journal, **Promin'*, in 1960. A history of the first 25 years of UWAC was published in 1952 under the editorship of N. Kohuska. The *Ukrainian Museum of Canada, begun by UWAC in 1936, is the group's most visible achievement. At present (1990) consisting of 160 branches, UWAC maintains a central office in its own building in Saskatoon. Its presidents have been S. Vasylyshyn, O. Woycenko, L. Ivasiuk, N. Kohuska, K. Miskiv, S. Paush, O. Svystun, S. Stechishin, M. Tkachuk, A. Tokaryk, L. Khorosh, D. Yanda, H. Romanchych, and A. Shemeliuk. UWAC is the only noncommunist Ukrainian women's organization in the West that does not belong to the *World Federation of Ukrainian Women's Organizations.

O. Woycenko

Ukrainian Women's Association of France (Soiuz ukrainok Frantsii; Association des femmes ukrainiennes). An organization established in Paris in 1945 with branches later in Lyon, Lille, and Metz. It has been active in educational and community work. It maintained contact with the World Movement of Mothers. Its membership has ranged from 50 to 100. It has been headed by H. Koval (1945–8), I. Knysh (1948–50), A. Saprún (1950–7), H. Pasternak (1957–74), M. Mytrovych (1974–89), and, since 1989, N. Tryndiak.

Ukrainian Women's National Council. See National Council of Ukrainian Women.

Some of the members of the first central executive of the Ukrainian Women's Organization of Canada

Ukrainian Women's Organization of Canada (Orhanizatsiia ukrainok Kanady im. Olhy Basarab, or OUK). A national organization established in 1934 in Saskatoon. It united the women's auxiliaries of the Ukrainian War Veterans' Association of Canada and became an affiliate of the *Ukrainian National Federation. OUK has focused largely on cultural and educational work, such as operating Saturday schools; organizing concerts, plays, and civic commemorations; and sponsoring lectures. Toward the end of the 1930s it also organized paramedical courses and formed locals of the Ukrainian Gold Cross.

OUK contributed to the Canadian war effort, and after the Second World War it was active in relief and resettlement work on behalf of Ukrainian displaced persons in Europe. The presidents of OUK have been A. Pavlychenko, M. Guliai, Ye. Sytnyk, A. Tarnovetska, O. Stebnytska, S. Savchuk, Ya. Zorych, L. Chaikovska, S. Protsiv, Y. Klymkiv, and M. Pidkovych. It has maintained approx 15 to 22 locals and contributed a women's page to the newspaper *Novyi shliakh* until 1950, when it began publishing the monthly **Zhinochyi svit*. The group published a 25th anniversary book in 1955, *Na sluzhbi ridnoho narodu* (In Service of Our People), under the editorship of I. Knysh.

The executive of the Ukrainian Women's Union in 1925. Sitting, from left: Mariia Levytska, Anna Zhuk, Mariia Krushelnytska, Olena Zalizniak; standing: Yaroslava Lahodynska, Olha Kossak, Mariia Plevako

Ukrainian Women's Union (Ukrainskyi zhinochyi soiuz, or UWU). A social-political, cultural-educational, and charitable organization. It was active in Vienna in 1920–38 and was renewed in 1957. A member group of the *National Council of Ukrainian Women, it participated in the congresses of the International League of Women for Peace and Freedom and of the International Council of Women. The UWU instituted literary and musical evenings and other such events, as well as courses in Ukrainian language, history, and art, and typing and stenography. Also active in the UWU was a section which assisted children and immigrants in Vienna (led by O. Halahan). The heads of UWU have included S. Maritchak, O. Zalizniak, A. Zhuk, and, from 1957, A. Saprún, D. Dzerovych, and S. Theil-Schwarz. Active members have included O. Basarab, M. Dontsova, M. Rudnytska, and M. Dnistrianska.

Ukrainian Worker-Farmer Educational Society. See Ukrainian Workers' League.

Ukrainian Workers' and Peasants' Union (Ukrainskyi robotnycho-selianskyi soiuz). A small clandestine group formed in Lviv in late 1959 to struggle by legal means for democracy and Ukraine's independence. It consisted of L. *Lukianenko, I. *Kandyba, S. Virun, O. Libovych, V. Lutskiv, Y. Borovnytsky, and I. Kipysh. Its draft program, prepared by L. Lukianenko, advocated Ukraine's secession from the USSR on the basis of a referendum. Before the draft could be revised and adopted, the group was betrayed by M. Vashchuk, and its members were arrested and charged with plotting the violent over-

throw of the Soviet government. On 20 May 1961 L. Lukanenko was sentenced to death (later commuted to 15 years' imprisonment), I. Kandyba to 15 years', and the others to 10 years' imprisonment.

Ukrainian Workers' League (Ukrainska robitnycha orhanizatsiia, or URO). A socialist-oriented political and civic organization in Canada founded by defectors from the pro-communist *Ukrainian Labour-Farmer Temple Association (ULFTA). When the general convention of the ULFTA in 1935 refused to condemn the mass deportations, famine, and terror in Ukraine, five members of the executive (D. Lobai, T. Kobzei, T. Kulchytsky, S. Khvaliboga, and M. Smiiovsky) and their followers left the ULFTA. By January 1936 they had formed the Ukrainian Worker-Farmer Educational Society with branches in Winnipeg, Transcona, Portage la Prairie, Edmonton, and Calgary; the Ukrainian Educational Society in Montreal; and the Kamenari Society in Toronto. At the beginning of August 1936 these associations joined together to form the Federation of Ukrainian Worker-Farmer Organizations, which changed its name to the Alliance of Ukrainian Organizations (Soiuz ukrainskykh orhanizatsii) at its national convention in Toronto at the end of the year. In 1940 it adopted the name Ukrainian Workers' League. The leading members of the URO were D. Lobai (president, 1940-66), T. Kobzei, S. Khvaliboga, T. Kulchytsky, Yu. Elen-diuk, T. Pylypas, and M. Kashchak. The league published the semimonthly *Pravda* (Winnipeg, 1936-8) and *Vpered* (Toronto, 1938-40), which were edited by D. Lobai. In 1940 the URO was one of the founders of the Ukrainian Canadian Committee (now Congress).

Ukrainian Workingmen's Association. See Ukrainian Fraternal Association.

Ukrainian World Committee for Sport Affairs (Ukrainskyi svitovyi komitet dlia sprav sportu). A body formed in 1956 in the United States under the name Ukrainian Olympic Committee in Exile and renamed shortly thereafter at the insistence of the International Olympic Committee (IOC). The committee arose after the suppression by Soviet authorities of a movement for separate Ukrainian representation at the *Olympic Games, which spread through Ukraine after the USSR first participated in the games in 1952. To publicize their demand in the West, the committee published the brochures *Ukraine and the XVI Olympic Games* (1956) and *Ukrainian Olympic Champions* (1968, 1972), a series of Ukrainian Olympic stamps, and the bulletin *Za uchast' Ukraïny v Olimpiis'kykh ihrakh* (For the Participation of Ukraine in Olympic Games). It sent numerous memoranda to the IOC and various national Olympic committees demanding Ukraine's separate and independent participation in the games. The press conferences organized by the committee (jointly with the Smolokyp Organization for Defense of Human Rights in Ukraine) at the 1976 Summer Games in Montreal and the 1984 Summer Games in Los Angeles attracted international attention. At the latter conference, on the basis of documentation obtained from the USSR, the committee revealed that 59 Soviet Olympic athletes had died prematurely. These revelations prompted the Medical Commission of the IOC to investigate the illegal use of performance-enhancing drugs by Olympic athletes and to adopt strict

rules on the chemical testing of participants. In 1989 the movement for Ukraine's independent participation in the Olympics was revived in Ukraine, and this demand became part of the program of the *Popular Movement of Ukraine.

O. Zinkevych

Ukrainian World Consolidation of Hutsuls [Hutsuls] (Ukrainske svitove obiednannia hutsuliv, or USOH). An organization of Hutsuls founded in 1975 to maintain contacts among Hutsuls around the world and promote research on the culture and history of the Hutsul region. In 1985 the Conference of Hutsul Societies in the United States and Canada (est 1972), which was the successor of the Hutsul Council (1960s), joined the USOH. Today the association has six branches, five in North America and one in England. Since 1985 it has published the journal *Hutsul'shchyna*. Its presidents have been I. Havryliuk (1975-8), D. Tkachuk (1978-80), M. Belmega (1980-4), V. Borchuk (1984-7), V. Petryshyn (1987-9), and I. Andrusiak (1989).

Ukrainian World Co-operative Council (Ukrainska svitova kooperatyvna rada, or USKR). An umbrella organization of Ukrainian co-operatives set up on 31 October 1973 at the Second World Congress of Free Ukrainians in Toronto. It represented three national co-operative organizations - Council of Ukrainian Credit Unions in Canada, the Ukrainian National Credit Union Association of America, and the Council of Ukrainian Co-operative Societies of Australia - as well as other co-operatives; it has a combined membership of 120,000 and assets of 600 million dollars. Its presidents have been V. Sytnyk (1973-8) and O. Pleshkevych (since 1978).

Ukrainian Youth. An irregular organ of the Ukrainian Catholic Youth League in America. It was published from May 1934 to 1942 in Chicago, New York, and then Pittsburgh. The paper originally contained both Ukrainian-language (editor, B. Katamai) and English-language articles (editor, E. Piddubchysyn), but later it appeared only in English.

Ukrainian Youth Association (Spilka ukrainskoi molodi, or SUM). An émigré youth organization established in Germany in 1946 by members of the Bandera faction of the OUN to attract those who did not already belong to other youth groups. Its initiators hoped to emulate the traditions of the Association of Ukrainian Youth in Ukraine, an organization allegedly active in Ukraine during the 1920s. In its statutes it sets itself forth as a patriotic organization whose slogan is God and Ukraine.

Initially SUM consisted of young men and women of 18 to 30 years of age. In 1948 groups of 12- to 18-year-olds were formed; they were followed by groups of 6- to 12-year-olds. In the 1950s members over 30 began to stay on, and the association came to consist of four age-groups: the junior youth (6-12), the senior youth (13-18), the *druzhynnyky*, or full members (19-35), and the senior members (over 35). It was soon organized along a three-level geographical scale, with local urban centers, national executives, and a central international executive that oversaw edification. In 1946-7 it was active mainly in Germany and Austria; it spread to Belgium in 1947, and then to Canada

The presidium at a national rally of SUM in Canada in the early 1950s. First row, from left: Yaroslav Stetsko, O. Kalynnyk, Rev Yaroslav Benesh, Slava Stetsko, Lev Husyn. The SUM emblem is in the background.

and Great Britain in 1948, the United States in 1949, and other countries (including Argentina, Australia, Brazil, France, and Paraguay) in subsequent years. In 1952 it was active in 14 countries and had a membership of more than 8,000. As a result of the gradual stabilization of émigré life in the West and extensive organizational efforts, SUM became the largest Ukrainian youth organization. In 1962 it had 10,500 members (of whom 3,200 were senior members and 7,300 were youth); in 1969, 13,700 members (with 4,500 and 9,200 respectively). Of the 1969 total, 1,800 senior members and 3,100 youths were active in the United States; 1,000 and 2,400 respectively in Great Britain; 750 and 2,500 in Canada; 430 and 570 in Australia; and 520 and 630 in other countries. By 1978 membership had declined to 11,780, and by 1987 to 7,290. The United States has consistently had the largest number of SUM members, followed by England, Canada, and Australia.

Every four years SUM sponsors world jamborees. These have taken place in Munich–Gomaringen–Rome (1972), Montreal (1976), Calgary (1980), Los Angeles (1984), and Rome (1988). Every summer the association runs summer camps in England, Belgium, France, the United States, Canada, Australia, and Argentina, using their own facilities.

The highest administrative body of the organization is the SUM Congress, elected by the Central Administration (before 1958, the Central Committee). Congresses were convened annually until 1949, after which they were held every three years. They are now held every five years. By October 1973, 10 congresses had been held. In 1946–9 the Central Committee was headed by M. Serdiuk; he was followed successively by S. Vozhakivsky, O. Kalynnyk, and M. Fil. The Central Administration of SUM has been headed by O. Koval (1958–78), Ye. Hanovsky (1978–88), and Y. Roshka (since 1988). In 1949 the Central Edifying Council (Vykhovna rada) was formed from the ranks of senior counselors and pedagogues to serve as an advisory body. It has been headed successively by P. Chuiko, M. Kushnir, D. Chaikovsky, Z. Sahan, B. Stebelsky, O. Koval (1978–88), and Ye. Hanovsky (1988–). In 1978 the headquarters of the Central Administration was moved from Brussels to New

Speakers at a SUM rally in the United States in the early 1950s

York. Other members of the central or national executives over the years included T. Buiniak (Canada), O. Chubaty (Australia), Ya. Deremenda (Great Britain), Ye. Hanovsky (United States), V. Kosyk (France), V. Lenyk (Germany), and H. Oshchypko (Belgium). Younger members who rose through the ranks of the organization and joined its executive at the 10th Congress included A. Bandera, M. Frankevych, R. Mirchuk, M. Pidhirna, R. Shuper, B. Yurkiv, and M. Yurkiv-Yavrotska. Many pedagogues and political activists also worked as counselors, editors of SUM publications, lecturers, and camp instructors, including P. Bashuk, M. Fostun, P. Kizko, V. Koval, I. Krushelnytsky, Y. Serbyn, P. Mirchuk, V. Mykula, L. Poltava, D. Shtohryn, S. Stetsko, H. Vashchenko, H. Vaskovych, and I. Vovchuk.

Publications of the SUM Central Committee in 1947–52

The association's ideological and educational program combines Christianity and nationalism. Apart from helping its members develop religious and national consciousness, it encourages them to support Ukraine whether, as previously, in its liberation struggle or, as after 1991, in its drive for the democratization of the newly independent state. Attention is also paid to the teaching of Ukrainian history and culture. The organization's instructional methods are set out in various manuals, educational materials, and periodicals. Activities are conducted in groups of various sizes (junior youth are organized into *roi*, senior

youth into *kureni*), as well as in the course of educational conferences, summer and winter camps, and sporting events.

SUM also provides the young with the opportunity to participate in choirs, dance and instrumental ensembles, theater groups, applied arts groups, and other cultural activities, as well as organizing sports competitions and clubs (soccer/football is particularly popular). Some SUM ensembles have gained wide popularity in the community and have traveled to émigré centers in various countries. These include the Prometei and Dibrova choirs, the Baturyn band (conducted by V. Kardash, M. Dlaboha, and O. Brezden), and the Verkhovyntsi dance ensemble (directed by Y. Klun) of Toronto; the banduryst kapelle of Detroit (V. Potapenko, conductor); the Krylati dance ensemble of Great Britain (O. Buriak, director); and the Krylati sports club of Chicago. SUM commonly takes part in national celebrations, anniversaries, and political demonstrations. Its members have also conducted mass actions in defense of Ukrainian political and religious prisoners.

SUM has acquired a number of facilities, such as meeting halls and summer camping grounds. The more notable include the resort in Ellenville, New York, the Veselka resort near Toronto, Verkhovyna near Montreal, Bilohorshcha near Sudbury, Tarasivka in Great Britain, Frankopole in Belgium, Tarasivka near Melbourne, Lemkivshchyna near Sydney, and Veselka near Buenos Aires. In some centers SUM has established and runs Ukrainian schools, of which there were nine in the United States in 1970.

SUM periodicals include *Avangard* (est 1947), the official organ of the Central Administration; *Na varti* (est 1949 in Canada); and *Krylati* (est 1963), a youth journal. In addition a number of émigré newspapers carry 'SUM pages,' including *Shliakh peremohy*, *Homin Ukraïny*, *Ukraïns'ka dumka*, *Svoboda*, *Ameryka*, *Vil'na dumka*, and *Ukraïns'ke slovo* (Argentina). Other materials are published by the Central Administration (such as *Biuletyn' Tsentral'noi upravly SUM* and the irregular *Zapysky vykhovnyka*), national executives, and certain regional centers. The central SUM publishing house has published a number of works on edification of youth (particularly by H. Vashchenko), some fiction, and a series of youth-, children-, and family-oriented books.

Leading activists in SUM national centers through the 1980s have included A. Lozynsky, Ye. Kuzmovych, Ya. Petryk, Y. Roshka, and R. Zvarych (United States); Ye. Cholii, M. Figol, I. Mytsak, V. Okipniuk, and M. Shepetyk (Canada); M. Finiv, V. Karpynets, M. Matviivsky, and V. Shliakhetko (Great Britain); M. Duda, B. Kachmarsky, I. Khokholiak, Z. Koval, I. Levytsky, and P. Osmalsky (Belgium); A. and V. Haidamakha, S. Kostiuik, V. Panchuk, R. Shuper, and L. Vilych (Germany); I. Kopchuk, P. Nau-miak, I. Pasternak, and L. Vitoshynska (France); I. Kohut, M. Moravsky, and S. Romaniv (Australia); and M. Rokush, R. Savchuk, and O. Stryga (Argentina).

Ukrainian Youth Educational Societies (Vykhovni spilnoty ukrainskoi molodi, or VSUM). Youth organiza-

tions set up in the *Generalgouvernement between 1941 and 1944 at elementary and secondary schools. VSUM were modeled on the *Plast Ukrainian Youth Association, which was banned by the German occupational authorities. Among the chief organizers were K. *Paliiv, R. Olesnytsky, T. Samotulka, and I. Khoynatska-Chaikivska. The organ of VSUM was **Doroha*. In 1944 VSUM had a membership of over 2,500, organized in more than 60 cells.

Ukrainian Youth for Christ (Ukrainska Molod Khrystovi). A large festival for Ukrainian Catholic youths, held in Lviv in May 1933 on the occasion of the 1,900th anniversary of the death and resurrection of Christ. It was attended by over 100,000 people, including 50,000 youths. The festival was organized by I. Babii, V. Hlibovytsky, and R. Danylevych and held under the spiritual authority of Bishop I. Buchko and Metropolitan A. Sheptytsky. The program included a large public liturgy and procession through the streets of Lviv. To commemorate the 50th anniversary of the event, a festival for Ukrainian Catholic youths in the West was held in Stamford, Connecticut, in 1983, and subsequent gatherings were held in Stamford in 1985; in Parma, Ohio, in 1986; and in Philadelphia in 1987. Following the liberalization of the late 1980s another Ukrainian Youth for Christ festival was held in Lviv, in September 1990. It was attended by tens of thousands of participants from across western Ukraine, as well as several priests and lay persons from the West. The festival program included public liturgies, demonstrations, lectures, and other events.

Ukrainian Youth League of North America (Liga ukrainskoi molodi Pivnichnoi Ameriky). An umbrella organization of Ukrainian-American youth clubs founded in Chicago during the World's Fair, on 17 August 1933. Its purpose was to perpetuate Ukrainian traditions, disseminate knowledge about Ukraine among Americans, and promote the cause of Ukraine's independence. To this end it organized cultural activities, political rallies, sports competitions, and social events, including annual Ukrainian cultural courses at the Ukrainian National Association resort, Soiuzivka (1954-71); annual conventions; a Ukrainian-American Olympiad (1936); softball, basketball, and bowling tournaments (mainly in the 1950s); and sports rallies (1954-8). It published the quarterly magazine *Ukrainian Trend* (1937-1960s), the monthly newsletter *Trendette* (in the 1950s-1960s), and the book *Ukrainian Arts* (1951). In 1959 it made a color film for television, *With Faith, We Hope*, depicting Ukraine's struggle for independence. In the 1930s the league represented over 60 youth organizations. In time it added some Canadian member groups. Since 1971 the league has been inactive. A 1983 reunion of league members led to the creation of an offshoot organization, the Ukrainian Heritage Foundation, which has undertaken several video projects on cultural themes.

Ukrainian-Polish War in Galicia, 1918-19. The Ukrainian-Polish War broke out in late 1918 as a result of the Polish rejection of Ukrainian efforts to establish an independent state - the *Western Ukrainian National Republic [ZUNR] - in the wake of the dissolution of the Austro-Hungarian Empire. The major issue of dispute in the conflict was control over eastern *Galicia, a predomi-

nantly Ukrainian ethnic territory regarded by the Poles as an integral part of the historical Polish realm. As the boundaries of the new Polish state had not yet been established, and the ZUNR had not been granted international diplomatic recognition, the matter was ultimately reduced to a question of control by military force.

The outbreak of hostilities can be dated to 1 November, when Poles in Lviv organized resistance to Ukrainian efforts to take control of the city (see *November Uprising in Lviv). Similar resistance by Poles to the Ukrainian takeover followed in Drohobych, Sambir, Jaroslaw, and Peremyshl. The Ukrainian government, in response, established the *Ukrainian Galician Army (UHA) as its regular military force. Until the end of December the war remained a series of local skirmishes that developed into a standoff in which the Poles controlled Lviv and certain territories east of the city. The command of the UHA did not possess an overall operational plan, and the Poles simply tried to maintain their position. By January 1919 the front stretched from Balyhorod, in the Carpathian Mountains, along the Khyriv-Peremyshl railway line (with the Poles in possession of Peremyshl) to Lviv (in Polish hands) and then looped around in a clockwise direction to the Uhniv-Rava Ruska area, from which it went northward.

When the Polish government in Warsaw began to dispatch regular troops to eastern Galicia, the conflict assumed a new dimension. By January 1919, Polish numbers reached about 20,000 men. On 15 February the UHA (some 40,000 men) began a great offensive (the so-called Vovchukhy Operation) toward Lviv, the Peremyshl-Lviv railway line, Rava Ruska, and Belz. By the end of the month a short armistice was being enforced by the Entente (as a result of negotiations by the *Berthélemy Mission). On 2 March, however, the UHA renewed the attack and was able to encircle Lviv. On 19 March the Polish divisions broke through the Ukrainian lines in the region of Horodok and retook the Lviv-Peremyshl corridor.

On 2 April the Supreme Council of the Paris Peace Conference established a commission headed by Gen L. *Botha to arrange an armistice between Poland and Ukraine. The proposed demarcation line it suggested (Lviv to be on the Polish side, Drohobych and Boryslav, on the Ukrainian side) was accepted by the government of the ZUNR but rejected by the Polish government, which claimed the right to take over the whole of eastern Galicia.

By that time the Poles had acquired the means to enforce their will. On 17 March the Supreme Council in Paris had given permission for the army of Gen J. *Haller (six divisions, with about 68,000 men) to be transferred from France to Poland for the express purpose of securing a frontier against potential Bolshevik attack. It was moved in April. Although the Polish prime minister, I. Paderewski, had assured the council that the army would not be sent to eastern Galicia, the troops were nonetheless being deployed there by mid-May. On 14 May a Polish force of approx 50,000 men attacked from the regions of Peremyshl, Horodok, and Lviv; in six days it had occupied Turka, Drohobych, and Stryi in the south and Kaminka-Strumylova in the north (the Polish offensive also included Volhynia). By 27 May the Poles had taken Halych and Stanyslaviv and were making contact with the Rumanian troops which entered Pokutia. The protests of the Entente and the need to transfer the armed forces to the west (be-

cause of fears of a German attack against Poland) stopped the Polish offensive on the Brody-Zolota Lypa River line.

On 7 June the reorganized UHA (with Gen O. *Hrekov as commander in chief from 9 June) embarked upon the *Chortkiv offensive, which in two weeks reached the Brody-Krasne-Peremyshliany-Hnyla Lypa River line. The UHA troops were now about 40 km from Lviv, but they began to run short of ammunition and provisions. At the same time the international situation of the ZUNR also changed for the worse: following the defeat of the UNR Army in Volhynia by the Red Army the Supreme Council empowered Poland (25 June) to take over the whole of eastern Galicia up to the Zbruch River in a move intended to block a potential Bolshevik onslaught to the west. The council, however, did not regard that resolution as a final decision on the political future of eastern Galicia.

After new Polish troops (under the command of J. *Piłsudski) were transferred to the east, they commenced a decisive offensive on 28 June. On 5 July the Poles reached the line of the Strypa River, and on 15 July they seized Ternopil and the area on both sides of the Seret River. Despite the defeat the UHA forces (about 80,000 men, including 36,000 in the first line of the front) retained their combat readiness and on 16-18 July crossed to the eastern side of the Zbruch, where the UNR Army was stationed. The government of the ZUNR also crossed the Zbruch to Kamiannets-Podilskyi.

Ukrainian-Ruthenian Publishing Company (Ukrainko-ruska vydavnycha spilka). A publishing venture established as a joint stock company in 1899 in Lviv. Initiated by M. *Hrushevsky, who also served as the first director, it published literary and scholarly works and literature in translation. The chief editors were I. Franko and V. Hnatiuk. In 1905 the company assumed responsibility for the publication of **Literaturno-naukovyi vistyryk* from the Shevchenko Scientific Society. From 1907 to 1918 the company was based in Kiev. Renewed in 1922 in Lviv as the Ukrainian Publishing Company, it continued to function until 1932, but its output was minimal and of relatively little importance.

By 1917 the company had issued over 300 books in two major series. Its belletristic series included original and reprinted works by V. Vynnychenko, M. Kotsiubynsky, O.

Kobylianska, L. Martovych, V. Stefanyk, M. Cheremshyna, I. Franko, I. Nechui-Levytsky, M. Vovchok, and B. Lepky, and translations of W. Shakespeare, G. Byron, H. Heine, K. Hamsun, G. Hauptmann, É. Zola, G. de Maupassant, H. Pontoppidan, K. Gutzkow, L. Tolstoy, F. Dostoevsky, W. Orkan, V. Korolenko, and others. Its popular-scholarly series included primarily translations of historical, sociological, and philosophical works by authors such as J. Ingram, H. Taine, E. Kareev, A. Smith, F. Engels, and K. Kautsky.

Ukrainians. The East Slavic nation constituting the native population of Ukraine; the sixth-largest nation in Europe. According to the concept of nationality dominant in Eastern Europe the Ukrainians are people whose native language is Ukrainian (an objective criterion) whether or not they are nationally conscious, and all those who identify themselves as Ukrainian (a subjective criterion) whether or not they speak Ukrainian (see *Language, Ukrainian). Isolated attempts to introduce a territorial-political concept of Ukrainian nationality on the Western European model (eg, by V. Lypynsky) have been unsuccessful until the 1990s. Because territorial loyalty has also been manifested by the historical *national minorities living in Ukraine, the accepted view in Ukraine today is that all permanent inhabitants of Ukraine are its citizens (ie, Ukrainians) regardless of their ethnic origins or the language in which they communicate. The official declaration of Ukrainian sovereignty of 16 July 1990 stated that 'citizens of the Republic of all nationalities constitute the people (*narod*) of Ukraine.'

The name. The oldest recorded names used for the Ukrainians are *Rusyny*, *Rusychi*, and *Rusy* (from *Rus'), which were transcribed in Latin as *Russi*, *Rutheni*, and *Ruteni* (see *Ruthenians). In the 10th to 12th centuries those names applied only to the Slavic inhabitants of what is today the national and ethnic *territory of Ukraine. Later a similar designation was adopted by the proto-Russian Slavic inhabitants of the northeastern principalities of Kievan Rus' – *Russkie* (of Rus'), an adjectival form indicating that they were initially subjects of ('belonged to') Rus'. Beginning in the 16th century Muscovite documents referred to the Ukrainians as **Cherkasy*, alluding perhaps to the fact that in and around the town of Cherkasy there were many Cossack settlements. In the 17th- and 18th-century Cossack Hetman state the terms *Malorosiiany* and *Malorosy*, from *Mala Rus'* (Rus' Minor, the name introduced by the patriarch of Constantinople in the 14th century to refer to the lands of Halych metropolity and reintroduced by Ukrainian clerics in the 17th century), became accepted by the inhabitants as their designation. Those terms were retained in a modified Russian form and used officially under tsarist rule and by foreigners until 1917 (see *Little Russia). By the 1860s, however, some opposition to the terms became evident in Russian-ruled Ukraine, on the ground that they were as pejorative as the term **khokhol*.

The modern name *Ukrainci* (Ukrainians) is derived from *Ukraina* (*Ukraine), a name first documented in the *Kiev Chronicle under the year 1187. The terms *Ukrainiany* (in the chronicle under the year 1268), *Ukrainnyky*, and even *narod ukrainskyi* (the Ukrainian people) were used sporadically before *Ukrainci* attained currency under the influence of the writings of Ukrainian activists in Russian-

ruled Ukraine in the 19th century. In late 18th- and early 19th-century tsarist nomenclature 'Ukrainians' was used only in reference to the inhabitants of Slobidska Ukraine. In 19th-century Polish usage the people so designated were the inhabitants of Kiev gubernia. Western Ukrainians under Austro-Hungarian rule used the term to refer to their ethnic counterparts under Russian rule but called themselves 'Ruthenians.' The appellation 'Ukrainian' did not take hold in Galicia and Bukovyna until the first quarter of the 20th century, in Transcarpathia until the 1930s, and in the Prešov region until the late 1940s. In the 20th century *Malorosiiany* or *Malorosy* has been a derogatory term used by Ukrainians to designate Ukrainians with little or no national consciousness.

Population. Until the final quarter of the 19th century the Ukrainians, with few exceptions, lived on their aboriginal lands, which now, basically, constitute Ukrainian ethnic territory. In the last few decades of the 19th century Ukrainians under Russian rule began a massive *emigration to the Asian regions of the empire, and their counterparts under Austro-Hungarian rule emigrated to the New World. The number of Ukrainians outside of their homeland had grown from 1 million in 1880 to over 14 million by 1989. Thus, approx one-quarter of all Ukrainians in the world today live outside of Ukraine. The greatest number live in Ukraine and elsewhere in Europe (44 million); they are followed in number by those in Asia (ie, within the former USSR, 5 million), North and South America (2.5 million), and Australia (35,000). (See table 1.) The constant pressure of Russification on Ukrainians in the USSR, especially those living outside Ukraine, who generally had an underdeveloped national consciousness, has resulted in a decline in the total number of Ukrainians and Ukrainians speaking Ukrainian (81.1 percent in 1989) on the territory of the former USSR, and a change in Ukraine's *national composition.

Table 2 illustrates the rather high natural population growth of Ukrainians (approx 18 to 20 per thousand per year) until 1914. Thereafter there have been exceptional decreases because of the First and Second *world wars, the Soviet famines of 1921–3, especially the Soviet man-made *famine of 1932–3, and the impact of *urbanization in the last 60 years. Since the Second World War the natural *population growth of Ukrainians has decreased, and since the mid-1980s it has been one of the lowest among the nations of Eastern Europe.

Origins. Archeological and linguistic evidence indicates that at the dawning of the Christian era the lands between the Oder or the Vistula and the middle Dnieper basins were inhabited by proto-Slavic tribes. The southern Ukrainian steppes were dominated by Iranian and then Turkic nomadic peoples, although some Slavic agrarian colonization occurred. From the 7th century AD on, proto-Ukrainian tribes are known to have inhabited Ukrainian territory: the *Volhynians, *Derevlians, *Polonians, and *Siverians and the less significant *Ulychians, *Tivertsians, and *White Croats. The question of whether the Ukrainians of *Transcarpathia and the *Maramureş region were there before the Magyar expansion of the 9th and 10th centuries or arrived as colonists from Galicia or Podolia has not been settled. At any rate, they were already occupying those lands in the 13th century. The relatively late appearance of the *Lemkos has been attributed to a pastoral migration of the 13th to 15th cen-

*46,136,000, according to V. Naulko

turies. Even more recent in origin is the population of *Southern and *Slobidska Ukraine, which arose out of ongoing colonization from the 16th to the 19th centuries.

That the Ukrainians share certain linguistic traits with the two other East Slavic nations, the Belarusians and Russians, has been interpreted variously. That the three nations shared a religion and a ruling dynasty in the time of Kievan Rus' has been used to hypothesize the existence of an 'ancient Rus'' nationality, that is, one proto-Rus' people, that disintegrated under the impact of Mongol, Lithuanian, and Polish domination during the 13th and 14th centuries. That originally Muscovite concept became dogma in the USSR and has often been repeated in the West; among Ukrainian scholars it was advocated by M. Korduba. A second theory states that a single, proto-Ukrainian people lived in the area from the Carpathian

Mountains to the White Sea, and that the Russians and Belarusians later separated from it. That thesis has been supported by many Ukrainian scholars. A third hypothesis proposes that a complex interethnic process unifying as well as dividing the Ukrainians, Belarusians, and Russians occurred. The vast territory encompassed by the Kievan Rus' federation of principalities made the existence of a single people as well as political unity (with the exception of the reigns of Volodymyr the Great, Yaroslav the Wise, and Volodymyr Monomakh) virtually impossible, and from the very beginning there were territorially different cultural substrata: Iranian, Turkic, and perhaps even Thracian in Ukraine, Baltic in Belarus, and Finno-Ugric in Russia.

Ethnocultural features. The ethnocultural features of the Ukrainians are most evident when viewed historically and ethnographically by region. Yet there are features of folk culture and folkways common to all Ukrainians. Ukrainian *villages and *folk architecture were distinct from the Russian, as were certain implements (see *plow), various means of transportation (the chumak wagon, the Zaporozhian Cossack boat, Carpathian rafts), folk *dress and *folk musical instruments. With the advent of Christianity traditional and pagan practices were absorbed into the Christian calendar (see *Burial rites, *Christmas, *Demonology, *Easter, *Harvest rituals, *Kupalo festival, *New Year, *Spring rituals, and *Wedding); many are popular even today. The Ukrainians observed the spring ritual much more than did the other East Slavs. A unique feature of the Ukrainian folk tradition was the *kolodka, for which there is no analogous ritual among the other Slavs.

This page intentionally left blank

Ukrainian *folk oral literature and poetry (especially the *dumas), rich *embroidery, *ceramics, and other crafts and elaborate *folk dances are world-renowned.

The peasant commune, or **hromada*, played a major role in Ukrainian life well into the 20th century. The large *clan, however, was abandoned by the Ukrainians sooner than by other Slavic nations. As early as the 18th century the small, two-generation family prevailed. Family customs and celebrations retained many unique features. Ukrainian *wedding traditions in particular had well-defined ceremonial stages (from betrothal to the post-wedding festivities) and involved ritual *foods (eg, the **korovai*) and special musicians (**troisti muzyky*) and songs. *Birth customs were more developed than among the Russians and Belarusians.

In the 20th century the Ukrainians have absorbed many features of modern European secular culture. Such modernization, coupled with rapid *urbanization, and the militant *atheism and *antireligious propaganda under Soviet rule, have resulted in the disappearance of many customs, widespread indifference to traditions, and spiritual impoverishment. In recent years, however, various attempts at reviving some of the lost customs have been made, particularly those connected with Christmas and Easter.

National consciousness. The people of Rus' did not have a common national consciousness, but they showed an allegiance to their rulers, their clans, their towns and regions, and later their church. They did know that they were different from their neighbors and their enemies, and they had a sense of loyalty and concern for the 'land of Rus', judging by what was written in the extant literature and chronicles of the period. Some notion of a Rus' language also existed, as evidenced in Ilarion's Sermon on the Law and Grace, the Primary Chronicle, and the epic *Slovo o polku Ihorevi* (The Tale of Prince Ihor's Campaign). After the fall of the Principality of Galicia-Volhynia in the 14th century and its partition among Lithuania, Poland, Hungary, and Moldavia the Ukrainians began developing more than a territorial consciousness. Their awareness that they were a different people was reinforced by their distinct *church rite and use of the bookish *Slavonic-Ruthenian language. The common fate of the 'Ruthenian' Ukrainians and Belarusians in the Polish-Lithuanian Commonwealth resulted in the evolution of a cultural, religious, and partly national awareness that set them off from the neighboring 'Muscovites.' That Ruthenian identity became fragmented after the 1569 Union of Lublin. A rebirth of historical memory about Kievan Rus' occurred during the 'Orthodox Renaissance' of the late 16th and early 17th centuries, which revived the literary and architectural traditions of Kievan Rus'.

In the Cossack *Hetman state of 1648–1782 a 'Little Russian' or 'Cossack-Ruthenian' consciousness emerged. After the complete absorption of the Hetman state by the Russian Empire in the 1780s, the majority of the Left-Bank Cossack elite became loyal subjects of the empire. That did not exclude the nurturing of a local patriotism and culture (see, eg, I. *Kotliarevsky), but it resulted in the widespread growth of a *Little Russian mentality.

In Western Ukraine, after the partitions of Poland the indigenous elite (most of them clergy) rid themselves of Polish influence. They did not assume an Austrian identity, but they remained loyal subjects as long as the Austri-

ans kept the Poles in check. Unlike the 'Little Russian' elite, the *Old Ruthenians of Galicia and the assimilationist *Magyarones of Hungarian-ruled Transcarpathia did not participate in empire-building.

During the 19th century the former identification with the Ukrainian Cossack state was superseded by cultural *Ukrainophilism. The cultural rebirth that occurred was manifested primarily through the rise of a modern Ukrainian *literature. From the 1860s on, however, a *Russophile movement became prominent in Austrian-ruled Galicia, Bukovyna, and Transcarpathia. More an attempt at fending off Polish and Hungarian influences than a true acceptance of Russian hegemony, Russophile attitudes eventually gave way to populist and, later, nationalist ones.

The watershed in the development of modern Ukrainian national consciousness was the 1917–20 struggle for Ukraine's *independence. For the first time many Russified Ukrainians became aware they were not Russians, and the existence of a nation-state, albeit brief, consolidated Ukrainian national identity, and forced the Bolsheviks to create the Ukrainian SSR and even to accede to the policy of *Ukrainization in Soviet Ukrainian society through most of the 1920s.

A concerted effort to reverse the growth of Ukrainian national consciousness was begun by the Stalinist regime in the late 1920s, and continued with minor interruptions until the most recent times. The man-made *famine of 1932–3, the deportations of the so-called *kulaks, the physical annihilation of the nationally conscious intelligentsia, and *terror in general were used to destroy and subdue the Ukrainian nation. Even after J. Stalin's death the concept of a Russified though multiethnic *Soviet people was officially promoted, according to which the non-Russian nations were relegated to second-class status. The creation of a sovereign and independent Ukraine in 1991, however, pointed to the failure of the policy of the 'merging of nations' and to the enduring strength of the Ukrainian national consciousness.

National consciousness has not prevailed among all Ukrainian ethnographic groups. The inhabitants of the *Kuban, for example, have vacillated among three identities, Ukrainian, Russian (supported by the Soviet regime), and 'Cossack.' The linguistic and religious identities of some groups (eg, the **Latynnyky*) have been in conflict. Not all so-called *Rusini* or *Rusnatsi* of Yugoslavia's *Bačka region consider their roots to be Ukrainian, nor do many immigrants from Transcarpathia and the Lemko and Prešov regions in the New World or, to a lesser extent, the inhabitants of those regions today. (See also *History of Ukraine, *Physical anthropology, and *Population of Ukraine.)

Ukrainian-Soviet War, 1917-21. A military struggle for control of Ukraine waged intermittently in 1917-21 by Ukrainian independentist forces and pro-Bolshevik elements seeking to establish Soviet rule. The struggle began shortly after the *October Revolution of 1917. Notwithstanding the creation of the *Ukrainian National Republic (UNR) on 20 November 1917, the Bolsheviks planned to seize power in Ukraine with the aid of Russian or Russified urban elements, Russian garrisons, and army units stationed near the front. Their armed uprising in Kiev on 11 December 1917 was unsuccessful, however, and the Bolshevik army units were deported from Ukraine in stages. A pro-Bolshevik force under Ye. *Bosh moving in on Kiev was also disarmed by Ukrainian troops under P. Skoropadsky near Zhmerynka and then sent off to Russia.

December 1917 to April 1918. Hostilities broke out in Ukraine after a series of diplomatic maneuvers. On 17 December 1917 the Petrograd-based Soviet of People's Commissars issued an ultimatum demanding that Bolshevik troops be granted the legal right to be stationed on Ukrainian soil. The ultimatum was rejected by the UNR. The Bolsheviks countered by proclaiming their own Ukrainian government based in Kharkiv on 25 December, and then proceeded with a campaign to establish effective military control over Ukraine. The Ukrainian forces at that time consisted of a small volunteer detachment and several battalions of the *Free Cossacks. The pro-Soviet forces in Ukraine included Russian army regulars stationed at the front, a number of garrisoned units, and Red Guard detachments composed of laborers from Kharkiv gubernia and the Donbas. Their main strength, however, lay in a large force of Red Guards from Russia, which had been stationed along the Ukrainian border. On 25 December that 30,000-strong army, led by V. *Antonov-Ovsienko, set off in four groups from Homel and Briansk toward Chernihiv-Bakhmach, Hlukhiv-Konotip, and Kharkiv-Poltava-Lozova.

The invasion by pro-Soviet forces was accompanied by uprisings initiated by local Bolshevik agitators in cities

throughout Left-Bank Ukraine. The Bolshevik forces occupied Kharkiv (26 December), Lozova and Katerynoslav (now Dnipropetrovske, 9 January 1918), Oleksandrivske (now Zaporizhia, 15 January), and Poltava (20 January). The Briansk group captured Konotip (16 January) and Hlukhiv (19 January). On 27 January the Bolshevik army groups converged on Bakhmach and then set off under the command of M. *Muravev to take Kiev.

The Central Rada prepared for the defense of the capital by sending advance forces of volunteers to Poltava and Bakhmach. One of those, the Student Kurin, was annihilated by a vastly larger (4,000 troops) Bolshevik force at *Kruty, 130 km northeast of Kiev, on 29 January. As the Soviet advance continued, an attempt was made to take Kiev through an uprising organized by non-Ukrainian workers based at the *Arsenal plant. Fighting broke out on 29 January and continued until 4 February, when the revolt was put down by a newly formed contingent of the *Sich Riflemen and the Free Cossacks. Meanwhile the Bolshevik expeditionary force continued to move on the capital from Bakhmach and Lubni. On 8 February the Ukrainian government was forced to evacuate the city. Soviet troops under Muravev's command entered Kiev on 9 March and then carried out brutal reprisals against the Ukrainian civilian population.

After taking Kiev the Bolsheviks launched an offensive in Right-Bank Ukraine, where they were engaged in battle mainly with Free Cossack forces. They moved into Volhynia (led by the former Russian Seventh Army), where they took Proskuriv (now Khmelnytskyi), Zhmerynka, Koziatyn, Berdychiv, Rivne, and Shepetivka and forced the Ukrainians back to a Zhytomyr-Korosten-Sarny defensive line.

The tide changed following Ukraine's signature of the Peace Treaty of *Brest-Litovsk and the entry of German and Austrian troops into the conflict in late February as allies of the Central Rada. With a Ukrainian command of Gen K. Prisovsky and S. Petliura the combined force rolled the Bolshevik troops out of Right-Bank centers, such as Zhytomyr, Berdychiv, Koziatyn, and Bucha, before regaining Kiev on 1 March. Through March and April the German and Austrian armies took control of Left-Bank Ukraine, and the troops of P. *Bolbochan and V. *Sikevych took the Crimea and the Donetsk region. Alarmed by the changed military situation, V. Lenin ordered his representative in Ukraine, G. Ordzhonikidze, to Ukrainize (at least ostensibly) the predominantly Russian forces of Antonov-Ovsienko and Muravev in a bid for more popular support. The maneuver proved unsuccessful. Continuing military setbacks gave Soviet Russia little choice but to comply with the articles of the Treaty of *Brest-Litovsk and to sign a preliminary peace with the Ukrainian government on 12 June 1918.

December 1918 to December 1919. The second phase of the Ukrainian-Soviet War began with the fall of the German-supported Hetman government to the forces of the UNR Directory. The Bolsheviks took advantage of the unsettled situation by forming a Provisional Workers' and Peasants' Government of Ukraine on 17 November 1918 and starting a military advance into Ukraine in December with an army led by Antonov-Ovsienko, J. Stalin, and V. Zatonsky. The Directory protested the aggression, with diplomatic notes sent to the Soviet government on 31 December 1918 and on 3, 4, and 9 January 1919. Not having

received a reply, the Directory was compelled to declare war against Russia on 16 January. The Ukrainian forces at that time consisted of two regular troop formations, the *Zaporozhian Corps and the Sich Riflemen, as well as partisan detachments led by otamans, such as N. *Makhno, N. *Hryhoriiv, and D. *Zeleny. The otamans, however, were politically unreliable and occasionally sided with the Bolsheviks.

In December 1918 and January 1919 the Bolshevik expeditionary force, aided by some of the otamans, captured Left-Bank Ukraine, and on 5 February it closed in on Kiev, where it forced the Ukrainian government once more to flee from the capital. The Soviet attack proceeded on several fronts. A northern group moved along a Mozyr–Korosten and Lunynets–Sarny–Rivne line in an attempt to cut off the UNR *Army from the *Ukrainian Galician Army (UHA) to the west. A southern group proceeded from the Kremenchuk–Katerynoslav region through Znamianka toward the Birzula–Koziatyn–Zhmerynka line in an effort to cut off the UNR troops from possible reinforcement by Entente forces. At a critical moment Otaman Hryhoriiv threw his support behind them. The third Bolshevik army group proceeded from Kiev to the Berdychiv–Koziatyn–Zhmerynka line in an effort to keep the northern and southern wings of the UNR Army divided.

The UNR Army launched a counteroffensive in March, in which it defeated the Soviet forces along the Berdychiv–Koziatyn line and advanced almost to Kiev, thereby effectively cutting off any possibility that the Soviets might march through Rumania to Hungary in order to aid the Béla Kun regime. The Bolshevik forces retaliated in April (after the withdrawal of Entente troops) by marching on Zhmerynka and dividing the UNR Army's southern flank from the force's main body. The southern group subsequently lost the support of Otaman O. Volokh and was forced to retreat into Rumania, where it was disarmed (eventually returning through Galicia to Volhynia). At the same time, the UNR Army was pushed back to a small parcel of territory approx 40–50 km wide in the Dubno–Brody region of southwestern Volhynia. Its position was weakened further with a coup attempt by one of its commanding officers, V. *Oskilko.

The UNR Army's fortunes improved as Ukrainian peasants, disgruntled by the Bolsheviks' anti-Ukrainian policy and high requisition quotas, started to replenish insurgent ranks. But before the army itself could regroup, it faced an assault by Polish forces in the Lutske region and advances from the Soviet troops in the north and southeast that took Rivne, Shepetivka, Proskuriv, and even Kamianets-Podilskyi. The UNR then reached a peace agreement with the Poles and reorganized its army into four groups – the Sich Riflemen and the Zaporozhian, Volhynian, and Southwestern corps – with a total of approx 15,000 soldiers. In early June the UNR forces launched an offensive which retook Podilia and Kamianets-Podilskyi. The Red Army retaliated at the end of the month with a campaign that regained Proskuriv (5 July) and approached Kamianets-Podilskyi, which had been made the UNR's provisional capital. The UNR was then strengthened by the arrival of Yu. *Tiutiunnyk with troops formerly under Hryhoriiv, who had worked his way through the Reds' southern flank. The UNR Army launched a campaign which pushed the Bolshevik forces back to the Horodok–Yarmolyntsi–Sharhorod–Dunaivtsi–Nova Ushytsia–Vapniarka line be-

fore being joined by UHA troops who had crossed the Zbruch River on 16–17 July; their arrival brought together a combined Ukrainian force of nearly 85,000 regulars and 15,000 partisans.

The subsequent campaign to take Kiev proceeded with victories in Vinnytsia (12 August), Khmilnyk, Yaniv, Kalynivka, and Starokostiantyniv (14 August), Berdychiv (19 August), and Zhytomyr (21 August). On 31 August the Ukrainian troops entered Kiev, only to discover that soldiers from A. *Denikin's Volunteer Army had arrived at the same time. Hostilities between the two forces were narrowly averted when the combined Ukrainian forces pulled out of the city. The Bolsheviks took advantage of the Ukrainians' standoff with Denikin's troops to move some of their forces from the Katerynoslav region to Zhytomyr. Meanwhile the leadership of the UNR and UHA split over how to deal with Denikin, a situation exacerbated by an outbreak of typhus among the troops. The UHA leadership finally made a separate peace with the Volunteer Army on 6 November. The military situation had worsened as Bolshevik forces, which had made substantial gains in Right-Bank areas formerly controlled by Denikin's troops, and the Poles moved into the western reaches of Ukraine. By the end of November the government and the UNR Army found themselves hemmed in by Soviet, Polish, and Volunteer Army troops. At a conference on 4 December the army decided to suspend regular military operations in favor of underground partisan warfare.

December 1919 to November 1920. The UNR Army under the command of M. *Omelianovych-Pavlenko carried out an underground operation known as the First *Winter Campaign in the Yelysavethrad (now Kirovohrad) region against the Soviet 14th Army from 6 December 1919 to 6 May 1920. In addition to that action the UNR government concluded the Treaty of *Warsaw on 22 April, and then launched a joint offensive with Polish troops against the Bolsheviks. By 7 May a Ukrainian division under the command of M. Bezruchko entered Kiev, but the success was short-lived. A Soviet counteroffensive led by S. Budenny pushed the combined forces back across the Zbruch and past Zamość toward Warsaw. After the decisive battle of 15 September the Polish-Ukrainian forces threw the Bolshevik contingent back as far as the Sharhorod–Bar–Lityn line in Podilia. The Poles concluded a separate peace with the Soviets on 18 October. The 23,000-strong UNR force continued fighting until 21 October, when its position became untenable. The UNR troops crossed the Zbruch into Polish-controlled Galicia, where they were disarmed and placed in *internment camps.

November 1921. The final military action of the UNR against the Soviets was a raid in November 1921 known as the Second Winter Campaign. The intent of the action was to provide a catalyst for the formation of partisan groups which would incite a general uprising against the Bolsheviks in Ukraine. The commander of the action was Tiutiunnyk. Two expeditionary forces were established, Podilia (400 men) and Volhynia (800 men). The Podilia group advanced as far as the village of Vakhnivka, in the Kiev region, before returning to Polish territory through Volhynia on 29 November. The Volhynia group took Korosten and advanced as far as the village of Leonivka in the Kiev region. On its return march it was intercepted by a Bolshevik cavalry force under the command of H. Kotovsky, however, and routed in battle near Mali Minky on

17 November. Of the 443 soldiers captured by the Soviets 359 were shot on 23 November near the town of Bazar, in the Zhytomyr region, and 84 were passed on to Soviet security forces.

The Second Winter Campaign brought the Ukrainian-Soviet War to a definite conclusion. The *partisan movement in Ukraine remained active until mid-1922, but conventional military action by regular troops had ceased.

Ukrainische Blätter. An irregular German-language periodical of the *Union for the Liberation of Ukraine, published by V. Kalynovych in Vienna in 1916–18 (a total of 42 issues). Edited by O. Hrytsai, it reported on Ukrainian political and cultural developments and the growth of the Ukrainian national movement.

Ukrainische Korrespondenz. A weekly informational organ of the *Supreme (later *General) Ukrainian Council, published in Vienna in 1914–18. Until 1916 it was called *Ukrainisches Korrespondenzblatt*. The publication informed the German and Austrian public and policymakers about Ukrainian affairs. It was specifically intended to garner support for the Ukrainian national movement and the cause of Ukrainian independence. The paper was published by K. Levytsky and edited by V. Paneiko, V. Singalevych, and V. Kushnir (1917–18).

Ukrainische Kulturberichte. An informational organ of the *Ukrainian Scientific Institute in Berlin. Published irregularly in 1933–40, it informed the German public about the work of the institute and other émigré scholars. It also devoted some attention to Soviet Ukrainian political, scholarly, and cultural affairs. The editors were Z. Kuzelia and M. Masiukevych.

Ukrainische Nachrichten. A German-language semi-monthly and then weekly published by the *Union for the Liberation of Ukraine in Vienna from October 1914 to 1918 (a total of 100 issues). Originally a press bulletin, it later became a regular newspaper that provided German and

Austrian newspapers, journalists, and political leaders with information on political developments in Ukraine and the growth of Ukrainian nationalism. *Ukrainische Nachrichten* was published by M. Trotsky and edited by O. Bachynsky and then an editorial board headed by V. Biberovych. The paper became popular; its circulation reached almost 4,000.

Ukrainische Rundschau. A German-language informational monthly published in Vienna in 1905–14. The continuation of **Ruthenische Revue*, it informed the Western public and policymakers about Ukrainian affairs in the Austro-Hungarian and Russian empires and was distributed free of charge to numerous newspapers, writers, and diplomats. Edited by V. *Kushnir, and in 1908–9 by O. *Turiansky, the publication was actively supported by members of the Ukrainian Parliamentary Representation in Vienna, particularly V. Yavorsky (the formal publisher), S. Dnistriansky, O. Kolessa, and Ye. Levytsky. Its other contributors included some of the most distinguished Ukrainian publicists and political figures of the time, such as Yu. Romanchuk, O. Turiansky, V. Shchurat, I. Krypiakievych, M. Korduba, B. Lepky, M. Lozynsky, I. Makukh, and V. Doroshenko, as well as many non-Ukrainians.

Ukrainization (Ukrainizatsiia). A series of policies pursued by the CP(B)U in 1923–33 to enhance the national profile of state and Party institutions and thus legitimize Soviet rule in Ukrainian eyes. Ukrainization was the Ukrainian version of the all-Union policy of *indigenization.

Since Ukrainians were by far the largest non-Russian nation in the newly created USSR, indigenization went farther in Ukraine than in other national republics. It included the following measures: making Party and state cadres fluent in the Ukrainian language and familiar with Ukrainian history and culture; actively recruiting Ukrainians into the Party and state apparatuses; establishing separate Red Army units with Ukrainian as the language of command; financially supporting non-Communist cultural institutions, such as the All-Ukrainian Academy of Sciences; developing a Communist or pro-Communist Ukrainian intelligentsia to play, eventually, the leading role in the 'Ukrainian cultural process'; and vastly expanding education and publishing in Ukrainian to raise the social prestige of Ukrainian culture. Ukrainization evolved from an attempt to make the Soviet regime more palatable to the Ukrainian people into the larger project of de-Russifying the urban environment and establishing Ukrainian as the dominant language throughout society.

Ukrainization grew out of the weakness of early Soviet governments in Ukraine. As early as 1920 M. *Skrypnyk attributed this weakness to national hostility between the Ukrainian peasantry and the Russified workers, which was reflected in the Ukrainophobic policies of the Soviet authorities. The solution lay in the gradual de-Russifica-

tion of the proletariat in Ukraine and its adoption of Ukrainian culture. The *Borotbists, led by O. *Shumsky, offered a similar analysis. Other Bolshevik leaders in Ukraine, such as Kh. *Rakovsky and D. Lebid, opposed any concessions to Ukrainian cultural aspirations.

In 1921 the 10th Congress of the Russian Communist Party (Bolshevik) (RKP(B)) proclaimed, along with the *New Economic Policy, the complete equality of national languages and cultures. The persistence of partisan activity in rural Ukraine, called 'kulak-banditry' in Soviet sources, and the Basmachi revolt in Central Asia forced the 12th Congress of the RKP(B) in 1923 to admit that its nationality policy was not working and to introduce the policy of indigenization, which was designed to give the Russian-imposed Soviet regimes in the non-Russian republics a veneer of national legitimacy. On 16 July 1923 Rakovsky was replaced as chairman of the Ukrainian Council of People's Commissars by V. *Chubar, a Ukrainian. On 27 July the council ordered the school system, except for schools serving national minorities, to be completely Ukrainized within the next two years. On 1 August the Ukrainian government decreed that all public officials master Ukrainian within two years, and that all official business be transacted in Ukrainian.

Despite widespread opposition to Ukrainization within the still largely Russian CP(B)U, ex-Borotbists, such as O. Shumsky, V. Blakytny, S. Pylypenko, and M. Semenko, were given considerable authority over Ukrainian cultural policy. Blakytny became editor of *Visti VUTsVK*, the organ of the government, and head of the mass literary organization *Hart. Pylypenko was editor of the newspaper *Seliants'ka pravda* and head of the peasant literary organization *Pluh. Semenko founded Nova Generatsiia, an association of Ukrainian futurist writers. In 1923 Shumsky became editor of Soviet Ukraine's first and most prestigious 'thick journal,' *Chervonyi shliakh*, and in 1925, people's commissar of education responsible for the Ukrainization program and all cultural policy. Shumsky's appointment to this key post came shortly after the CP(B)U's Russophile leader, E. *Kvirning, was replaced by L. *Kaganovich, who made it clear that no further foot-dragging on Ukrainization would be tolerated. Yet Shumsky called for Kaganovich's immediate replacement by an ethnic Ukrainian, V. Chubar, and an even faster pace of Ukrainization. In 1927 Shumsky was replaced by Skrypnyk, who had aligned himself against Shumsky with J. Stalin and Kaganovich, both of whom supported the policy but opposed any criticism of Russian interference. In 1927 S. *Kosior replaced Kaganovich as CP(B)U first secretary. Under Skrypnyk's supervision all postsecondary education was rapidly Ukrainized. He also oversaw Ukrainization in Ukrainian areas outside the Ukrainian SSR.

Ukrainization had a substantial impact on the national composition of Ukraine's cities, its proletariat, and the CP(B)U. The percentage of Ukrainian residency in Kharkiv grew from 38 in 1923 to 50 in 1933; in Kiev, from 27 to 42; in Dnipropetrovske, from 16 to 48; and in Odessa, from 7 to 17. The proportion of Ukrainians among Ukraine's 1.1 million workers grew from 55 percent in 1926 to 59 percent in 1931 and 60 percent in 1933. In 1922 CP(B)U membership was 23 percent Ukrainian and 54 percent Russian; in 1933 it was 60 percent Ukrainian and 23 percent Russian. But not all Ukrainians considered Ukrainian to be their native language or were literate in it. According to the 1926 census 45 percent of the population of the Ukrai-

nian SSR was literate (16 percent in the countryside and 50 percent in the cities). Of the 11.7 million literate inhabitants, 9.6 million were Ukrainians, of whom only 6.5 million were literate in Ukrainian. Slightly more of Ukraine's inhabitants were literate in Russian than in Ukrainian. The distinction between ethnicity and language literacy was particularly evident in the CP(B)U: in January 1927 Ukrainians accounted for 52 percent of the members and candidates, but only 31 percent gave Ukrainian as their native language. A mass literacy campaign, which was mostly Ukrainian, raised adult literacy in Ukraine to 74 percent in 1929. At the high point of Ukrainization, in the 1932-3 school year, 88 percent of all students were enrolled in Ukrainian-language schools. About 57 percent of trade-union members were Ukrainians in 1930, but only 44 percent claimed Ukrainian as their native language. In the crucial industrial sector the situation in 1929 was much worse: 48 percent of Ukraine's trade-union members in industry were Ukrainian by nationality, 32 percent spoke Ukrainian at home, 43 percent read Ukrainian, and 38 percent wrote Ukrainian. By 1933, 88 percent of all factory newspapers were published in Ukrainian, double the figure for 1928.

The policy of actively favoring Ukrainian over Russian led to resentment among some Russian-speakers. The view that Ukrainization violated the national rights of Ukraine's workers was articulated in 1925 by Yu. Larin. In 1927 G. *Zinoviev, then in opposition to Stalin, denounced Ukrainization as a policy supporting S. Petliura's followers and encouraging Ukrainian chauvinism. Many Russian CP(B)U members felt excluded from the development of Ukrainian culture. Others, such as S. Dimanshtein, feared that the progress of Ukrainization would ultimately unleash centrifugal political forces. In the 1920s Stalin consistently supported Ukrainization and publicly denounced such views. But his attitude changed in the early 1930s.

The political justification for Ukrainization had been the need to placate the Ukrainian peasantry. The collectivization of agriculture, based on the massive application of force by central authorities against the peasants, eliminated any such need and bypassed the republic's leadership. When the Ukrainian elite, fostered by Ukrainization, attempted to defend the Ukrainian peasantry from the center's worst depredations, Stalin responded by eliminating the elite, its social base, and the Ukrainization policy which strengthened that social base. The state-ordered famine of 1932-3, P. *Postyshev's assignment to the position of second secretary of the CP(B)U, the 1933 purge of the CP(B)U, and the widespread repressions against Ukrainian cultural activists marked the end of Ukrainization. Rapid industrialization continued to draw Ukrainian peasants to the cities, mines, and factories, but means of preventing their denationalization were vastly diminished in Ukraine and completely eliminated in Ukrainian ethnic territories outside Ukraine.

Lesia Ukrainka

Ukrainka, Lesia [Ukrajinka, Lesja] (pseud of Larysa Kosach-Kvitka), b 25 February 1871 in Zviahel (now Novohrad-Volynskiy), Volhynia gubernia, d 1 August 1913 in Surami, Georgia. Poet and playwright; daughter of O. Kosach-Drahomanova (O. *Pchilka). Lesia Ukrainka spent her childhood in Volhynia in the towns of Zviahel, Lutske, and Kolodiazhne and then moved to Kiev. Her views were particularly influenced by her mother's brother, M. *Drahomanov. Lesia Ukrainka achieved a broad education by self-tuition. She knew all of the major Western European languages as well as Greek and Latin and the Slavic languages (Russian, Polish, Bulgarian, and others). She was equally familiar with world history and at 19 wrote a textbook for her sisters, published in 1918 as *Starodavnia istoriia skhidnykh narodiv* (Ancient History of the Eastern Peoples). Lesia Ukrainka translated a great deal (eg, N. Gogol, A. Mickiewicz, H. Heine, V. Hugo, Homer). Suffering from tuberculosis, she traveled to Germany, Austria-Hungary, Italy, Egypt, and, several times, the Caucasus in search of a cure. Travel exposed her to new enriching experiences and broadened her horizons. Lesia Ukrainka began writing poetry at a very early age. At the age of nine she wrote the poem 'Nadiia' (Hope), and her first published poems, 'Konvaliia' (Lily of the Valley) and 'Safo' (Sappho), appeared in the Lviv journal *Zoria* in 1884. 1885 saw the appearance of her collection of translations of Gogol, which she prepared together with her brother, M. Kosach.

Lesia Ukrainka began to write more prolifically from the mid-1880s. In Kiev she joined the literary group *Pleiada and together with M. Slavinsky translated *Knyha pisen'* (Book of Songs, 1892) by H. Heine. Her first collection of original poetry, *Na krylakh pisen'* (On Wings of Songs), appeared in Lviv (1893; 2nd edn, Kiev 1904). It was followed by the collections *Dumy i mrii* (Thoughts and Dreams, 1899) and *Vidhuky* (Echoes, 1902). Her early poems deal mainly with the beauty of nature, her love of her native land, personal experiences, the poet's vocation and the role of poetry, and social and community concerns. Epic features can be found in much of her lyric poetry, and reappear in her later ballads, legends, and the like – 'Samson,' 'Robert Brus, korol' shotlands'kyi' (Robert Bruce, King of Scotland), 'Vila-posestra' (Vila Sister), 'Oдно slovo' (A Single Word).

Lesia Ukrainka reached her literary heights in her poetic dramas. Ukrainka's first drama was *Blakytna troianda* (The

Azure Rose, 1896), which describes the life of the Ukrainian intelligentsia. In further dramatic works she developed a new genre, that of the 'dramatic poem.' The first such work was *Oderzhyma* (A Woman Possessed, 1901). Particularly important among her works are the dramatic poems on the subject of prisoners in Babylon, which were meant to serve as symbols of the imprisonment of Ukrainians within the Russian Empire; among them are *Na ruïnakh* (Upon the Ruins, 1903), *Vavylons'kyi polon* (The Babylonian Captivity, 1903), and *V domu roboty – v kraïni nevoli* (In the House of Labor, In the Land of Slavery, 1906). In the dramatic poem *Kassandra* (1907) she portrayed the fate of Ukraine through the tragic history of long-lost Troy, and using Cassandra as her spokesperson, she challenged the Ukrainian people to shake off their apathy and inertia. In the dramatic poem *U katakombakh* (In the Catacombs, 1905) she also castigated the Ukrainian community for its compromises and passivity. In the drama *Rufin i Pristsilla* (Rufinus and Priscilla, 1908) the shining image of the Christian woman is contrasted with the brutal strength of Imperial Rome. The dramatic poem *Botarynia* (The Boyar Woman, 1910) illustrates most clearly Ukrainka's hostility to Russian imperialism; it maintains that only armed struggle can free the Ukrainian people from their Muscovite prison. The theme of the poem *Orhiia* (The Orgy, 1912–13) concerns the poet's role in that ceaseless battle. In the dramatic poem *Kaminnyi hospodar* (The Stone Host, 1912) Lesia Ukrainka employs the Don Juan theme in an original presentation of the conflict between social conformity and personal freedom and responsibility. Her neoromantic work, the drama *Lisova pisnia* (The Forest Song, 1911), treats the conflict between lofty idealism and the prosaic details of everyday life. Lesia Ukrainka also wrote prose works. Her literary legacy is enormous, despite the fact that for most of her life she was ill and often was bedridden for months. The last few years of her life were spent convalescing in Egypt and the Caucasus. The works of Lesia Ukrainka have been published many times. The most notable editions, however, have been those of *Knyhospilka* (7 vols, 1923–5 and 12 vols, 1927–30), which include scholarly introductions by M. Zerov, B. Yakubsky, M. Draikhmara, P. Rulin, Ye. Nenadkevych, O. Biletsky, and others. O. Kosach-Kryvyniuk's *Lesia Ukrainka: Khronolohiia zhyttia i tvorchosty* (Lesia Ukrainka: A Chronology of Her Life and Works, New York 1970) is valuable for its biographical and epistolary material.

Ukrainka v sviti (Ukrainian Woman in the World). An organ of the *World Federation of Ukrainian Women's Organizations, published in Philadelphia, then in Detroit, and since October 1963, in Toronto, three times a year at first and quarterly since 1965. Edited by a board headed by I. *Pelenska and, since 1982, by Ya. Zorych, it reports on the activities of the federation and its constituent organizations and on the women's movement in general. It also contains articles on issues of concern to women and on the status of women in Ukraine. An annual English-language issue, *Ukrainian Woman in the World*, has been published since 1973, edited by I. Pelenska, H. Mazurenko, and D. Rak.

Ukrainophilism (*ukrainofilstvo*). A cultural and political current sympathetic to Ukrainians. In its widest application the term can refer to any manifestation of sympathy for Ukrainians; it has been applied, for example, to 19th-century Polish and Russian writers who chose to work on Ukrainian themes. More narrowly, the word refers to the Ukrainian national movement in the Russian Empire from the 1860s to the 1880s, because Ukrainian activists in that period often referred to themselves and were referred to by others as Ukrainophiles (*ukrainofily* or *ukrainoliubtsi*). In the 1890s and 1900s the word acquired a negative connotation, when nationalist thinkers, such as B. *Hrinchenko and M. *Mikhnovsky, began to use the word Ukrainophiles to describe Ukrainians whose national consciousness had not developed beyond ethnographic appreciation. That refinement of the term, in part, reflected a generational difference between the revolutionary youth and their more moderate elders, the self-described Ukrainophiles. It also, however, reflected a more uncompromising national consciousness: the Ukrainophiles' critics presented themselves as consciously and exclusively Ukrainian and accused the Ukrainophiles of having a double national allegiance, Russian and Ukrainian; the very word Ukrainophile implied a sympathy with the Ukrainian nation perceived as other (ie, as not one's own). In English-language scholarly literature, and to some extent in Ukrainian political literature of the 1860s and 1870s, the term Ukrainophilism has also been used as a synonym for Western Ukrainian *populism (*narodovstvo*), to distinguish those who specifically allied themselves with the Ukrainian movement in the Russian Empire from the *Russophiles (and Rusynophiles) of Galicia, Transcarpathia, and Bukovyna.

J.-P. Himka

Ukrainska Besida. A Ukrainian cultural-educational club in Galicia in 1861–1939, known as Ruska Besida until the 1920s. The first Ukrainska Besida club was founded by Yu. *Lavrivsky in Lviv in 1861 and consisted of a group of local intelligentsia from the Moloda Rus' society. Ukrainska Besida provided a forum for social interaction and developed a program of literary and musical evenings, lectures, concerts, and commemorative observations. It also sponsored its own renowned theater group, *Ukrainska Besida Theater, and maintained a reading hall. In 1870–90 it provided a spiritual home for numerous Ukrainian student groups. As new organizations were established by the developing Ukrainian national movement in Galicia, Ukrainska Besida increasingly assumed a more social and recreational character. Ukrainska Besida clubs

were established in a number of Galician centers, including Peremyshl, Stanyslaviv, Ternopil, and Zhovkva. Notable leaders of the Ukrainian Besida in Lviv included Lavrivsky, V. Shukhevych (1895–1910), I. Kokorudz (1920–32), and I. Kopach.

Ukrainska Besida Theater (Teatr tovarystva Ruska Besida; also Ruskyi narodnyi teatr, Ukrainkyi liudovyi teatr). The first professional Ukrainian *touring theater, created in 1864 and subsidized by the Ruska Besida (see *Ukrainska Besida) Society in Lviv and occasionally supported by the Galician Diet. It served Galicia and Bukovyna, toured Poland and the Russian Empire, and was instrumental in the development of modern theater in all Ukraine. It performed mostly in the populist-realistic style and during its first years staged works from the Ukrainian classical repertoire (I. Kotliarevsky, H. Kvitka-Osnovianenko, T. Shevchenko, D. Dmytrenko, and O. Storozhenko) and the works of contemporary Galician dramatists (R. Mokh, I. Hushalevych, V. Kovalsky, and I. Naumovych). The director was O. Bachynsky; M. Verbytsky and I. Lavrivsky composed for the theater. After a hiatus (1867–9) the directors were A. Molentsky (1870–3), T. Romanovych (1874–80), M. Kropyvnytsky (1875), and I. Hrynevetsky (1878–89), jointly with I. Biberovych (1882–92).

During the 1870s and 1880s the theater introduced local historical dramas by O. Ohonovsky, K. Ustyianovych, and O. Barvinsky; populist-realistic comedies by H. Tsehlynsky; and plays by M. Kropyvnytsky, M. Starvtsky, I. Karpenko-Kary, and P. Myrny. In the 1890s the theater staged I. Franko's realistic dramas, and after 1911, performances of V. Vynnychenko's psychological plays and V. Pachovsky's allegorical plays. While touring Ukraine it staged works by Western European playwrights – German (G. Lessing, A. Kotzebue, F. Schiller, F. Grillparzer, H. Kleist, K. Gutzkow, F. Hebbel, G. Hauptmann, and H. Sudermann), French (Molière, P. Beaumarchais, E. Scribe, G. Ohnet, and E. Rostand), Scandinavian (H. Ibsen and A. Strindberg), and Italian (C. Goldoni's comedies) – as well as Russian (N. Gogol, L. Tolstoi, A. Chekhov, M. Gorky) and Polish (A. Fredro, S. Przybyszewski) playwrights.

In addition to Ukrainian operas composed by S. Hulak-Artemovsky, M. Arkas, P. Bazhansky, D. Sichynsky, and Ya. Lopatynsky, the theater performed I. Vorobkevych's operettas and (in Ukrainian translation) C. Gounod's *Faust*, J. Offenbach's *Les Contes Hoffmann*, G. Bizet's *Carmen*, B. Smetana's *The Bartered Bride*, and S. Moniuszko's *Halka*. Many prominent actors appeared on its stage, among them T. Bachynska, M. Romanovych, I. and I. Biberovych, A. Osypovycheva, F. Lopatynska, S. Stadnyk, O. Pidvysotska, I. and K. Rubchak, S. Yanovych, V. Yurchak, A. Nyzhankivsky, V. Petrovych, M. Olshansky, and L. Kurbas, as well as visiting actors from Poland and Russian-ruled Ukraine.

In later years the directors of the Ruska Besida Theater were M. Hubchak (1901–4), M. Sadovsky (1905–6), Y. Stadnyk (1906–13), and R. Siretsky and S. Charnetsky (1913–14). The theater ceased activity with the start of the First World War. The members of its cast formed the nucleus of new theatrical collectives, including the *Theater of the Legion of Ukrainian Sich Riflemen (which used the name Ukrainska Besida Theater in 1916–18), Ternopilski Teatralni Vechory, the New Lviv Theater, and Y. *Stad-

nyk's touring theaters. In 1921–4 it existed as a resident theater in Lviv and then it was joined by the *Lviv Ukrainian Independent Theater.

V. Revutsky

Ukrainska biblioteka (Ukrainian Library). A monthly book series issued by the *Ukrainska Presa publishing house in Lviv from 1933 to 1939. Eighty editions (a total of 230,000 copies by 1937) of literary works, including original works, reprints, and translations, appeared, under the editorship of M. Holubets. They were distributed free of charge to the subscribers of **Nash prapor*.

Ukrains'ka diisnist' (Ukrainian Reality). An organ of the hetmanite *Ukrainska Hromada organization in Germany, published monthly and then semimonthly in Berlin in 1939–45. Until 1943 it included an economic supplement. The newspaper published reports on Ukrainian life in Germany, Czechoslovakia, and Austria and on developments in Soviet Ukraine. The editors were H. Derkach and M. Pasika, and I. Kalynovych was the publisher.

Ukrains'ka dumka (Ukrainian Thought). A daily newspaper published in Lviv in October and November 1920 in place of the suppressed newspaper **Dilo*. It was edited by F. Fedortsiv.

Ukrains'ka dumka (Ukrainian Thought). A weekly newspaper for Ukrainians in Great Britain, published in London since 1945. It has been the organ of the *Association of Ukrainians in Great Britain since 1947. The paper publishes news of the association and articles on Ukrainian political and community affairs in Great Britain and elsewhere; it supports the positions of the OUN (Bandera faction). It also devotes considerable attention to cultural issues and publishes literary works. At various times the paper has included pages devoted to the Ukrainian Youth Association, the Association of Ukrainian Women in Britain, and the Plast Ukrainian Youth Association. The paper has been edited by a board; since 1978 the board has been headed by S. Fostun. Circulation reached a high of over 4,000 in the late 1940s; since then it has dropped steadily.

Ukrains'ka hromada (Ukrainian Community). A semi-monthly organ of the *Oborona Ukrainy organization, published in New York in 1923–7 and in Detroit in 1930–1. The paper was edited by Ya. Chyzh and M. Tsehlynsky.

Ukrains'ka hromada (Ukrainian Community). An illustrated weekly organ of the *Ukrainian National Democratic Alliance, published in Lutske from November 1926 to May 1929. Edited by M. Cherkavsky, S. Vyshnivsky, H. Hladky, and V. Ostrovsky, it published reports on political developments in Poland and abroad and was intended for the Ukrainian population of Volhynia. Like its forerunner **Hromada*, it was closed by the Polish authorities.

Ukrains'ka hromads'ka pora (Ukrainian Community Time). A socialist weekly newspaper published in Detroit

from 1930 to 1952, initially as *Pora* (1930–6) and *Nova pora* (1937–40). Founded by T. Pochynok and edited by him and N. Hryhoriiv, it espoused the positions of the Ukrainian Party of Socialist Revolutionaries and the Ukrainian Socialist Radical party in Western Ukraine.

Ukrains'ka khata (Ukrainian House [*UKh*]). A monthly journal of literature, criticism, and politics that appeared in Kiev from March 1909 to August 1914 (66 issues) under the editorship of P. *Bohatsky and Mykyta *Shapoval. A major forum of the younger democratic, nationally conscious Ukrainian intelligentsia after the Revolution of 1905, it published articles whose authors, particularly Shapoval (pseud: M. Sribliansky) and A. Tovkachevsky, formulated the foundations for a new Ukrainian national liberation ideology and national and social worldview. They promoted Nietzschean principles for the individual and the ideal of an independent, full-fledged Ukrainian culture free of external (ie, Russian and Polish) influences and inhumane materialism. They also attacked the moderate liberal Ukrainophile populists and their superficial ideas, political compromises, and slavish reliance on Russian 'higher culture' and social forces. In the esthetic realm they propagated the new trends of modernism and impressionism. The journal's literary critics, particularly Shapoval and M. *Yevshan, evaluated works on the basis of their esthetic value or their expression of the national ideal. A bitter rivalry and polemic arose between *UKh* and the more moderate paper *Rada*. S. Yefremov, for example, referred to the views expressed in *UKh* as those of refined, decadent burghers who had no principles.

UKh succeeded in attracting as contributors many prominent writers of the time. Translations of European contemporary works (by C. Baudelaire, K. Hamsun, P. Altenberg, J. Jakobsen, M. Maeterlinck, H. Mann, and others), notes on Ukrainian in the foreign press, and a literary chronicle were regular features. *UKh* was closed down by the tsarist authorities after Russia entered the First World War. A booklet of Bohatsky's and Shapoval's memoirs about *UKh* was edited by S. Zerkal and published in New York in 1955.

P. Bohatsky

Ukrains'ka knyha (Ukrainian Book). A monthly journal of bibliography and bibliology published in Lviv in 1937–9 (21 issues) and in Cracow in 1943 (2 issues) by the Bibliographic Commission of the Shevchenko Scientific Society and the Ukrainian Society of Bibliophiles in Lviv. Edited by Ye. Pelensky, the journal contained articles on the history of Ukrainian books and libraries (by M. Andrusiak, V. Doroshenko, A. Gensorsky, M. Vozniak, I. Krypiakkevych, P. Zlenko, T. Pachovsky, S. Siropolko, V. Sichynsky, A. Zhyvotko), on library science (L. Bykovsky), and on printing (V. Doroshenko and S. Yefremov). It also published lists of new Galician publications, and specialized military, literary, and regional studies bibliographies (P. Zlenko, B. Romanenchuk, M. Vozniak, and Ye. Pelensky). An entire issue was devoted to the history of Ukrainian publishing in Cracow.

Ukrains'ka knyha (Ukrainian Book). A quarterly journal of bibliography and bibliology published in Philadelphia in 1971–82 by the Society of Ukrainian Bibliophiles, the Ukrainian Librarians' Association of America, and the

Ukrainian book

Bibliographic Commission of the Shevchenko Scientific Society. Edited by B. Romanenchuk, V. Lev, and M. Kravchuk, it contained articles on the history of Ukrainian publishing, bibliographies, reviews of émigré and Soviet publications, biographies, and organizational news.

Ukrainian correspondence (Ukrainian Correspondence). A newspaper published by H. Denysenko three times a week in Prague in 1930–1 to inform the Czech and Western European public about the brutal Polish *Pacification of Western Ukraine and suppression of Ukrainian activities there. It appeared in both Czech and Ukrainian. Although founded on the initiative of the Prague-based Ukrainian Party of Socialist Revolutionaries, it was an independent publication with a broad base of supporters. The editor was Ya. Zozulia.

Ukrainian swallow (Ukrainian Swallow). An illustrated monthly children's magazine, published in Chernivtsi in 1933–9 by the Ridna Shkola society. It was edited by V. Yakubovych, O. Drachynsky, T. Bryndzan, M. Haras, and K. Horvatsky.

Ukrainian literature. See *Vitchyzna*.

Ukrainian literary paper. A monthly paper of literature and art, which appeared from July 1955 until 1960 and was published by the Suchasna Ukraina publishing house in Munich. It was edited by I. *Koshelivets and Yu. *Lavrinenko. It was the unofficial organ of the *Slovo Association of Ukrainian Writers in Exile and aimed to reflect the literary and artistic processes in the emigration and in Soviet Ukraine. Since it was not a vehicle for any one ideology, it became a forum for the leading figures of the interwar (A. Zhuk, V. Doroshenko, Ye. Malaniuk, D. Chyzhevsky) and of the postwar emigration (Yu. Shevelov, V. Barka, H. Kostiuk, O. Izarsky, Y. Hirniak, and many others). The first works of writers of the younger generation, particularly of the *New York Group, also appeared in the journal. In 1961 the newspaper *Suchasna Ukraina* and *Ukrainian literary paper* merged to form the monthly **Suchasnist'*.

Ukrainian mala entsyklopediia. See Encyclopedias of Ukraine.

Ukrainian language and literature in schools (Ukrainian Language and Literature in Schools). A monthly pedagogical journal and organ of the Ministry of Education in Kiev. It was established in 1963 with the merger of two journals, *Ukrainian language and literature in schools* (1951–62) and *Literature in schools* (1951–62). The journal is aimed at secondary-school teachers of Ukrainian language and literature in *secondary general-education schools and *secondary special-education schools, and at lecturers in institutions of *higher education.

Ukrainian musical press. See *Muzyka*.

Ukrainian music. A monthly periodical published by the Union of Ukrainian Professional Musicians. It appeared from March 1937 in Stryi, and from March to June 1939 in Lviv. The editor in chief was Z. Lysko, and the members of the editorial board included V. Barvinsky, R. Savytsky, F. Steshko, and W. Wytwycky. Among the contributors were S. Liudkevych, A. Rudnytsky, M. Haivoronsky, and E. Tsehelsky. The periodical discussed music history, music criticism, the work of individual composers, and current musical affairs.

The logo of Ukrainska Nakladnia

Ukrainska Nakladnia (Ukrainian Publishing House). A publishing house owned by Ya. *Orenshtain. From 1903 to 1918 it operated in Kolomyia as Halytska Nakladnia (Galician Publishing House). From 1919 to 1932 it was located in Berlin. It issued hundreds of popular books: works on Ukrainian history and culture, illustrated editions of Ukrainian classics and contemporary Ukrainian literature, translations (eg, of Molière, R. Kipling, F. Nietzsche, A. France, L. Tolstoy), textbooks, atlases, musical scores, songbooks, and children's literature. Its *Zahalna biblioteka* (General Library) book series had 238 titles, of which 113 were published in Kolomyia and 125 in Berlin.

Ukrainska Narodna Obnova. See Ukrainian Catholic People's party.

Ukrainian field (Ukrainian Field). A newspaper published weekly and then semimonthly in Warsaw (1926–8) and semimonthly in Lutske (1929–36). Intended primarily for the Ukrainians of Volhynia and for émigrés from Soviet-occupied Ukraine, it promoted Polish-Ukrainian co-operation and supported the Government-in-exile of the UNR. The editors were P. Pevny, L. Musiiievych, and V. Artsebka. In 1930 the paper had a pressrun of 2,000 copies.

It ceased publication in May 1936, but in June a weekly paper with the same name was established in Lutske. An organ of the *Volhynian Ukrainian Alliance, edited by A. Kokhanivsky, after 26 issues it was renamed *Volyns'ke slovo* (1937–9).

Ukrain's'ka nyva (Ukrainian Field). An illustrated evangelical journal published quarterly (1947–58), monthly, and then annually (to 1966) in Saskatoon. It was the organ of the Ukrainian Missionary and Biblical Society in Canada and published articles on religious and theological topics. The editor was Ya. Homeniuk.

Ukrainska politychna biblioteka (Ukrainian Political Library). A series of political books and pamphlets edited by Mykola Zaluzniak and printed between 1914 and 1917 in Vienna and Stockholm. Most were works by Ukrainian socialist writers, such as M. Drahomanov, S. Tomashivsky, and M. Lozynsky. They were distributed among Ukrainians in the Russian army interned in Austrian POW camps, and smuggled into Russian-ruled Ukraine.

Ukrain's'ka pravoslavna nyva (Ukrainian Orthodox Field). The monthly organ of the General Church Administration of the Ukrainian Autocephalous Orthodox church in Brazil. Called *Lystok* in 1953–4 and then *Pravoslavna nyva* in 1954–5, it was published in Curitiba until 1974. The editors were Rev F. Kulchytsky (to 1963) and S. Plakhtyn.

The logo of Ukrainska Presa

Ukrainska Presa (Ukrainian Press). A major publishing house in interwar Lviv, owned and operated by I. *Tyktor from 1923 to the outbreak of the Second World War. It employed over 100 writers, editors, administrators, and printers, including some of the most prominent writers, journalists, and artists in Galicia. The press's publications did much to raise the educational level and national consciousness of Galicia's Ukrainian population. Foremost among them were the daily newspaper **Novyi chas*, the weekly **Narodnia sprava* for the rural population, the children's monthly **Dzvinochok*, the semimonthly **Nash prapor*, the satirical weekly **Komar*, and the semiweekly **Nash lemko*. Their combined pressrun was 92,600 in 1937 and 106,500 in 1938. Ukrainska Presa also published several annual almanacs, including *Zoloty kolos* for the rural population from 1929 (approx 85,000 copies), *Kalendar dlia vsikh* from 1931 (renamed *Al'manakh Novoho chasu* in 1937), and the humorous *Komar* from 1935; and series of short books and pamphlets, which were sent free of charge to its

periodicals' regular subscribers: *Ukrainska biblioteka (Ukrainian Library), *Novyi chas* (New Times; 30 titles to 1933), *Narodna sprava* (National Cause; 18 titles to 1936), *Ridne slovo* (Native Word), *Ranok* (Morning), *Amatorskyi teatr* (Amateur Theater), *Muzychna biblioteka* (Musical Library), *Biblioteka tserkovno-rehliiinykh knyh* (Library of Church and Religious Books), and *Istorychna biblioteka* (Historical Library), which included *Velyka istoriia Ukraïny* (The Great History of Ukraine), *Istoriia ukrains'koï kul'tury* (The History of Ukrainian Culture), and *Istoriia ukrains'ko-ho viis'ka* (The History of the Ukrainian Army). Altogether, it published 400 titles.

The Ukrainska Radianska Entsyklopediia building

Ukrainska Radianska Entsyklopediia (Ukrainian Soviet Encyclopedia). An editing and publishing institution in Kiev established in 1957 by the AN URSR (now ANU) to prepare and publish general and specialized *encyclopedias and encyclopedic dictionaries in Ukrainian and Russian. It co-operated with other ANU bodies in the preparation of reference works, such as the multiauthor histories of Ukrainian art (6 vols, 1966–8), of Ukrainian cities and towns (26 vols, 1967–74), and of the AN URSR (2 vols, 1967). Its recent projects include the second edition of the Ukrainian Soviet encyclopedic dictionary (3 vols, 1986–7), a four-volume encyclopedia of Ukrainian literature (vol 1, 1988; vol 2, 1990), a three-volume geographic encyclopedia of Ukraine (vol 1, 1989; vol 2, 1990), and an as yet unpublished four-volume encyclopedia of Ukrainian art. In 1992 it was renamed *Ukrainska Entsyklopediia* (Ukrainian Encyclopedia).

Ukrain's'ka reformatsiia (Ukrainian Reformation). An evangelical journal of religious and educational affairs published in Lviv in 1929–30 and Kolomyia in 1931. It began as a monthly and later appeared semimonthly. The journal worked to reconcile the two branches of the Evangelical movement in Western Ukraine, the *Ukrainian Evangelical Reformed church and the *Ukrainian Evangelical Church of the Augsburg Confession. *Ukrain's'ka reformatsiia* was edited by P. Yaremko, T. Yarchuk, Z.

Bychynsky, and V. Fediv; in 1930 it was published in a pressrun of 2,000 copies.

Ukrains'ka rodyna (Ukrainian Family). A popular journal of literature and history, published monthly from October 1947 to August 1949 in Toronto (a total of 20 issues). It contained stories, fables, poems, biographies, and popular articles on Ukrainian history, primarily for children. The publisher and editor was O. Luhovy.

Ukrainska Shkola. A Ukrainian pedagogical association in Bukovyna, originally called Ruska Shkola (to 1910). Founded in 1887 as an offshoot of the *Ruska Besida society, the group developed as a regional counterpart to the Galician *Ridna Shkola society. It pursued the formation of state-supported Ukrainian schools, established private schools and courses, made efforts to upgrade the qualifications of Ukrainian teachers, and provided financial assistance for needy students. It sponsored a private teachers' seminary for girls in Chernivtsi, a (Realschule) gymnasium in Vashkivtsi, and a people's university in Chernivtsi. By 1914 it had 12 branches, with a total of 965 members. It published various journals (including **Nasha shkola* in conjunction with the Lviv-based Teachers' Hromada), school texts (30 titles by 1914), and two series of popular books for children, Kreitsarova biblioteka (The Kreutzer Library; 1902–8) and Dytiacha biblioteka (Children's Library; 1909–14). After the Rumanian occupation of Bukovyna, Ukrainska Shkola's undertakings suffered considerably as branches were closed down by the authorities, the central office was harassed, and Ukrainian schools were closed. After 1918 the group managed to print only three school texts. One successful aspect of its work was the summer courses in Ukrainian studies which it sponsored during the 1930s. Ukrainska Shkola was liquidated after the Soviet occupation of Bukovyna in 1940. The association's leaders included S. Smal-Stotsky (1887–91), O. Popovych (1891–1914), and A. Kyryliv (1919–40); among the prominent members were Ye. Pihuliak, I. Danylevych, I. Karbulysky, I. Syniuk, M. Haras, and V. Yakubovych.

Ukrains'ka shkola (Ukrainian School). A scholarly-pedagogical journal published with varying periodicity in Lviv in 1925–34 and 1938–9 by the *Teachers' Hromada. It contained professional news for Ukrainian teachers in Western Ukraine, book reviews, curricula, and articles on teaching methodology and the history of Ukrainian education. It was intended primarily for secondary-school teachers, and published a separate series of booklets and pamphlets. The editors of *Ukrains'ka shkola* included H. Myketei, Yu. Rudnytsky, O. Makarushka, and Ya. Bilenky. In 1930 it appeared in a pressrun of 500 copies. During the Second World War the journal was briefly revived in Cra-cow (1942–3) under the editorship of I. Teslia and P. Isaiv.

Ukrains'ka stavka (Ukrainian Card). A daily publication of the UNR Army Information Bureau during 1918–20. It was edited first by N. *Hryhoriiv, then by D. Budka.

Ukrains'ka trybuna (Ukrainian Tribune). A newspaper published by Ye. Lukasevych six days a week in Warsaw from May 1921 to March 1922. It was edited by O. Salikovsky and supported the Government-in-exile of the UNR.

Ukrains'ka trybuna (Ukrainian Tribune). One of the most widely read newspapers for Ukrainian displaced persons in postwar Germany. It was published in Munich, weekly in 1946–8 and then semiweekly to August 1949 (a total of 219 issues) by V. Pasichnyk under license from the US military authorities. *Ukrains'ka trybuna* reported on developments in Soviet Ukraine, international politics, and Ukrainian émigré affairs and published a chronicle of life in the DP camps and documents from the nationalist resistance in Ukraine. At various times it included special sections devoted to literature and art, the émigré student movement, and the Ukrainian Youth Association. The first editors were Z. Tarnavsky and Z. Pelensky; they were assisted by M. Hlobenko, O. Lysiak, O. Pytliar, V. Stakhiv, D. Chaikovsky, B. Nyzhankivsky, and others. With time the paper came under the domination of the OUN (Bandera faction), and its quality declined as it became more partisan. In 1947–8 Ukrainska Trybuna publishers sublicensed the cultural magazine **Arka*.

Ukrains'ka zahal'na entsyklopediia. See Encyclopedias of Ukraine.

Ukrainska Zakhoronka. A society founded in 1901 in Lviv on the initiative of the *Club of Ruthenian Women, to hinder the trend of denationalization of Ukrainian children of preschool age in Polish-ruled Ukraine. In 1914 the society supported two nurseries operated according to Froebel techniques (see *Preschool education). By 1922 the society was responsible for 22 nurseries in Lviv and its surrounding area. The *Ridna Shkola society was responsible for the educational component of these nurseries. Leading members of the Ukrainska Zakhoronka included B. Kotsovska, S. Rakova, and M. Pasternak. In 1938–9 the society published the journal *Ukrains'ke doskillia*, devoted to preschool education. In 1939 the society was disbanded by the Soviet authorities, and the nurseries were incorporated into the Soviet preschool educational system.

Ukrains'ka zemlia. See *Ukrains'kyi selianyn*.

Ukrainskaia literaturnaia letopis' (Ukrainian Literary Chronicle). The first Ukrainian bibliographical journal, published by O. *Lazarevsky in Chernihiv in 1856–8 (a total of five issues). It consisted of offprints from *Chernigovskie gubernskie vedomosti* of Lazarevsky's reviews of books and articles dealing with Ukrainian history, geography, ethnology, culture, language, literature, and religion.

Ukrainskaia zhizn' (Ukrainian Life). A Russian-language monthly journal published in Moscow in 1912–17 to inform the non-Ukrainian public in the Russian Empire about the Ukrainian question and the Ukrainian national movement, and to raise the level of Ukrainian national consciousness among Russified Ukrainians. It contained articles on the national question in Russia; chronicles of current events in Ukraine; reviews of articles in Russian, Polish, and other newspapers on Ukrainian topics; reports from Russian-ruled and Western Ukraine; polemics with the militant Russian nationalist and chauvinist press; critical articles on political, historical, cultural, and literary subjects; and book reviews. Although the formal editor and publisher was Ya. Sheremetsinsky, the real editors were S. Petliura and O. Salikovsky. Contributors included prominent Ukrainian and Russian figures.

Ukrainske [Ukrajins'ke]. V-18, DB III-2. A city (1989 pop 16,500) under the jurisdiction of the Selydove city council in Donetsk oblast. It was founded as a mining town in 1952 and was first named Lisivka. In 1963 it was renamed and given city status. Ukrainske has two coal mines and a coal enrichment plant.

Ukrains'ke iunatstvo (Ukrainian Youth). A Catholic monthly journal published by the *Orly Catholic Association of Ukrainian Youth in Lviv in 1933–9. It was edited by R. Danylyvych and V. Hlibovytsky. A supplement, *Hotovs'*, published materials on work in the association's groups.

Ukrains'ke kozatstvo (Ukrainian Cossackdom). An illustrated journal of the *Ukrainian Free Cossack, published irregularly (1964–70) and then quarterly (1971–80) in Chicago (a total of 63 issues). The chief editor was A. Kushchynsky. Seven more issues were published in Toronto in 1982–5 and edited by M. Huta. The journal contains articles and literary works on the history of the Zaporozhian Host, the Free Cossacks, and the UNR Army; a chronicle of the brotherhood and its branches; biographies; memoirs; military information; poetry; and song lyrics.

Ukrains'ke literaturoznavstvo (Ukrainian Literary Scholarship, or UL). A scholarly serial published at Lviv University since 1966. It has been edited by a large board of literary scholars under the direction of F. Neboriachok (nos 1–17, 1966–72), I. Doroshenko (nos 18–48, 1972–87), and, since 1987, L. Mishchenko (nos 49–). Two issues have appeared annually except in 1967 (no issues), 1968 (three), 1969 (one), 1970 (five), 1971 (three), 1972 (three), and 1973 (three). UL is a major forum for scholars of Ukrainian literature. Theoretical and historical articles on prerevolutionary and Soviet Ukrainian writers and literary scholars (particular aspects of their lives and contributions in the context of Ukrainian and world literature, analyses of individual works) and on certain literary periodicals (eg, *S'vit*, *Narod*) and writers' groups (eg, Zakhidnia Ukraina), as well as bibliographies (eg, of M. Vozniak) and archival materials (writers' correspondence), have been published therein. Western Ukrainian literature, particularly I. *Franko, to whom every other issue has been devoted, has received the most attention.

Ukrains'ke muzykoznavstvo (Ukrainian Musicology). An annual journal of the Academy of Sciences and the Ministry of Culture of Ukraine that has been published in Kiev since 1966. The journal, whose editorial board includes M. Hordiichuk, K. Maiburova, S. Pavlyshyn, M. Skoryk, and O. Shreier-Tkachenko, deals with the history and theory of music, music performance, folklore, esthetics, and music criticism. Some issues – most notably no. 6, which discusses Ukrainian musical culture in the 16th to 18th centuries – focus on a single theme.

Ukrains'ke mystetstvoznavstvo (Ukrainian Art Studies). An annual publication of the AN URSSR (now ANU) Institute of Fine Arts, Folklore, and Ethnography, published in Kiev in 1967–71 and 1974 (a total of six issues). It contained articles on the history of Ukrainian art, architecture, and folk art, and art criticism. It also published

regular chronicles of art exhibitions and developments in the arts in Ukraine and comprehensive bibliographies in art studies. Among its contributors were some of the most distinguished art scholars in Ukraine, including H. Lohvyn, B. Butnyk-Siversky, V. Shcherbak, D. Stepyvyk, and Yu. *Turchenko (editor in chief).

Ukrainske Narodne Mystetstvo (Ukrainian Folk Art). A folk-art and handicrafts co-operative established in 1922 in Lviv. It operated workshops for Ukrainian handicrafts and organized courses to teach folk art. In 1936 its 13 workshops employed almost 500 workers. It also administered a system for the distribution and sale of folk art, especially embroidered and woolen goods and wood carvings. Ukrainske Narodne Mystetstvo worked with various local co-operatives in Lviv, Kosiv, Vilshany, and elsewhere and operated stores in Lviv and Warsaw. The co-operative also organized exhibitions of Ukrainian folk art in Stryi, Prague, and Chicago and sold goods at international trade shows. From 1925 it published the journal **Nova khata*. Its board of directors was headed by S. Montsibovych and then I. Bonkovska. Its leading organizers included S. Pushkar, I. Pavlykovska, and S. Savytka. After the Soviet occupation of Galicia the co-operative and its workshops were transformed into artels.

Ukrains'ke narodne slovo (Ukrainian National Word). A newspaper published by the *Ukrainian National Aid Association of America (UNAA). Founded in March 1914 as *Narodne slovo*, it was published weekly in McKees Rocks and, from 1921, Pittsburgh, Pennsylvania. It was renamed in 1959, and in 1969 it became a semimonthly (22–26 issues per year). Since 1981 it has been published in Chicago, where it now appears quarterly. In the interwar period the paper was closely aligned with the Ukrainian Orthodox church in the United States. It sought to raise the level of national consciousness of its readers and to instill the values of American patriotism. Since the 1950s it and the UNAA have been controlled by supporters of the OUN (Bandera faction). The chief editors have been H. Kysil (1914), Y. Kosovy (1914–17), D. Ivankiv (1917), M. Khavriuk (1917–20), M. Khandoha (1920–48), V. Kedrovsky (1948–50), R. Kryshtalsky (1950–2), M. Sydor-Chartoryisky (1952), P. Kravchuk (1952–9), V. Mazur (1959–61, 1963–5, 1974–), I. Vovchuk (1961–3), P. Marenets (1965–74), and L. Poltava. Recently the newspaper's circulation has been approx 5,000.

Ukrains'ke pravoslavne slovo (Ukrainian Orthodox Word). A monthly organ of the Ukrainian Orthodox Church in the USA. It has been published since 1950, at first in New York and then, since 1951, in South Bound Brook, New Jersey. It succeeded **Dnipro* as the official publication of the church. The editors of *Ukrains'ke pravoslavne slovo* have included Yu. Bobrovsky, I. Hundiak, F. Istochyn, A. Kotovych, I. Kreta, H. Pavlovsky, Metropolitan M. *Skrypnyk, and P. Falko. *Ukrains'ke pravoslavne slovo* had an English-language section from 1951; in 1967 it became a separate journal, **Ukrainian Orthodox Word*. The journal includes pastoral letters; church news; and articles on religious, political, historical, and cultural topics. It is a valuable source of information on the history of the Ukrainian Orthodox church.

A *Ukrainske Slovo* publication (Viktor Andriievsky's memoirs)

Ukrainske Slovo (Ukrainian Word). An émigré publishing house founded in Berlin in 1921. The director and chief editor was Z. Kuzelia. It published the weekly newspapers *Ukrains'ke slovo* (1921–4) and *Litopys polityky nys'menstva i mystetstva* (1923–4) and over 70 books, including D. Doroshenko's book on the Slavic world in the past and present (3 vols); reprints of B. Hrinchenko's Ukrainian dictionary and M. Komarov's Russian-Ukrainian dictionary; an anthology of Ukrainian poetry edited by B. Lepky (2 vols); editions of works by P. Kulish, Ya. Shchoholiv, B. Lepky, V. Birchak, M. Kropyvnytsky, and H. Skovoroda; V. Yemets's book on the kobza and kobzars; S. Rudnytsky's monographs on Ukraine's national territory and the Ukrainian question from the perspective of political geography; V. Andriievsky's memoirs; books on the art of A. Archipenko and O. Novakivsky; M. Arkas's history of Ukraine; I. Herasymovych's *Hunger in der Ukraine*; a compendium on the Ukrainian Sich Riflemen; M. Drahomanov's selected works; O. Barvinsky's readers on world history and Ukrainian literature; a collection of M. Rudnytsky's literary essays; and M. Lozynsky's books on Polish and Russian revolutionary groups and Ukraine, M. Drahomanov, I. Franko, and M. Pavlyk. *Ukrainske Slovo* went bankrupt in 1926.

Ukrains'ke slovo (Ukrainian Word). A daily newspaper published in Lviv from July 1915 to November 1918. Initially, under the editorship of F. Fedortsiv and S. Charnetsky, it supported the positions of the *General Ukrainian Council. I. Krypiakevych, M. Yatskiv, and H. Mykytei were regular contributors. In 1916 the newspaper's charter was acquired by Rev T. Voinarovsky-Stolobut, who had earlier published **Nove slovo*. Although Charnetsky continued to edit the paper, it changed its political orientation and began to support Ye. *Petrushevych in his opposition to the General Ukrainian Council. After Charnetsky S. Holubovych edited the paper. *Ukrains'ke slovo* was closed down by the Polish authorities.

Ukrains'ke slovo (Ukrainian Word). A hetmanite newspaper published in Berlin by the *Ukrainske Slovo publishing house. It appeared weekly in 1921–3 and six times a week in 1923–4 under the editorship of D. Doroshenko and Z. Kuzelia.

Ukrains'ke slovo (Ukrainian Word). A weekly newspaper published in Lviv in 1922–5, in 1922–3 as *Slovo*. Edited by P. Seniuta and then I. Kuzmych, it was aimed at urban-

The editorial board of *Ukrains'ke slovo* in Berlin (1922). From left: Volodymyr Leontovych, Dmytro Doroshenko, O. Kryha, Ivan Herasymovych, Bohdan Lepky, Zenon Kuzelia, Stepan Tomashivsky

ized Ukrainians in Galicia, and supported Ye. Petrushevych's government-in-exile.

Ukrains'ke slovo (Ukrainian Word). The first Ukrainian newspaper in Argentina, published in Buenos Aires since January 1928 weekly and now semimonthly. The organ of the Prosvita Ukrainian Cultural Association in Argentina, in the postwar period it has supported the émigré OUN (Bandera faction) and has included pages devoted to the Prosvita Women's Alliance, the Ukrainian Youth Association (SUM), the Ukrainian Student Organization of Mi-khnovsky, and literature and art. The editors have been O. Vudkevych, S. Mandzii, M. Korytko, I. Kryvy, N. Blavaty, A. Bilopolsky, O. Shkeda, I. Mitrenga, I. Rybak, M. Kovalenko, N. Velychkovsky, O. Kuzmych, Yu. Serediak, I. Didenko, B. Vitoshynsky, I. Klymenko, H. Holiian, and M. Danylyshyn.

Ukrains'ke slovo (Ukrainian Word). A newspaper published weekly in 1932–7 and semiweekly in 1938 in Uzhhorod. It supported the Ukrainian national revival in Transcarpathia and was one of the first papers there to appear from the outset in Standard Ukrainian. The newspaper was founded by Yu. Brashchaiko and edited by his brother, M. Brashchaiko. Frequent contributors included V. Grendzha-Donsky, V. Birchak, Rev K. Fedelesh, and I. Roman.

Ukrains'ke slovo (*La Parole ukrainienne*, Ukrainian Word). A weekly newspaper published in Paris in 1933–40 and since 1948. It is closely allied with the OUN (Melnik faction) and serves as an unofficial organ of the Leadership of Ukrainian Nationalists. The paper has been edited by O. Boikiv (1933–4), V. Martynets (1934–40), O. Shtul-Zhdanovych (1948–77), and M. Styranka (1977–92). Contributors have included some of the most prominent figures in the OUN, such as M. Stsiborsky, M. Kapustiansky, O. Olzhych, D. Andriievsky, Ye. Onatsky, and B. Kentrzhynsky. *Ukrains'ke slovo* has been an excellent source of information on the Ukrainian nationalist movement before and after the Second World War. It has reported ex-

Kiev and Paris editions of *Ukrains'ke slovo* in 1992

tensively on developments in the Ukrainian diaspora and in Ukraine. For some time the paper had special pages devoted to students, youth, military affairs, and culture. Until 1939 it was published by the *Ukrainian National Union in France. Since that time the publisher has been the First Ukrainian Press in France, which also issues the paper's annual almanacs and books. Since February 1992 the paper has had a Kiev edition.

Ukrains'ke slovo (Ukrainian Word). A daily newspaper published in Zhytomyr and then Kiev in September–December 1941 (a total of 100 issues). Edited by I. Rohach, P. Oliinyk, and O. Chemerynsky, all members of *OUN expeditionary groups (Melnyk faction), the newspaper advocated Ukrainian nationalism and independence and became one of the most influential and popular papers of its time; its pressrun was 20,000 to 50,000 copies. It also published a separate literary and artistic supplement. Because of the newspaper's outspoken views on Ukrainian independence, the German occupational authorities closed it down, arrested most of the editors, and executed them. In its place the pro-German **Nove ukrains'ke slovo* was established.

Ukrains'ke slovo (Ukrainian Word). A weekly newspaper published in Stanyslaviv (now Ivano-Frankivsk) in 1941–2. Edited by D. Gregolynsky, it was closed down by the German occupational authorities after 42 issues. It was succeeded in June 1942 by *Stanyslavivs'ke slovo* (1942–4), a newspaper published three times a week and edited by Gregolynsky and A. Kniazhytsky.

Ukrains'ke slovo (Ukrainian Word). A pro-Soviet weekly newspaper and the organ of the Association of United Ukrainian Canadians, published in Winnipeg from January 1943. Edited by M. Shatulsky and then M. Hrynchyshyn, the paper was intended mainly for Ukrainian farmers in western Canada, and published articles on the labor and farm movements, political and economic affairs, and cultural topics. It reached the height of its popularity during and after the Second World War, when it helped raise funds and supplies for the Soviet war and rebuilding efforts. At that time it had up to 15,000 subscribers. It constantly praised the Soviet Union and

published regular attacks on Ukrainian 'bourgeois nationalists' in Canada. After the war it strongly criticized the Canadian government for allowing anti-Soviet Ukrainian displaced persons to immigrate to Canada. In 1965 the paper merged with *Ukrains'ke zhyttia* to form **Zhyttia i slovo*.

Ukrainske Vydavnytstvo (Ukrainian Publishing House). A publishing house founded in March 1916 in Katerynoslav (now Dnipropetrovske). Directed by Ye. Vyrovny, by the end of 1916 it had published over a dozen children's and popular educational books. In 1919 it became a co-operative venture and printed its books in Kamianets-Podilskyi, Vienna, Leipzig, Berlin, and finally Prague. It was nationalized in 1921. By 1925 it had issued 68 titles with a combined pressrun of 591,200 copies. They included brief histories of Ukrainian culture (by I. Ohienko) and literature (S. Yefremov), histories of Ukraine (D. Doroshenko) and ancient Rome and Greece (M. Kovalevsky), M. Levytsky's Ukrainian grammar, S. Ivanytsky and F. Shumliansky's Russian-Ukrainian dictionary, the *Iaryna* primer and reader by A. Voronets, pedagogical booklets and stories by S. Rusova, over 15 collections of children's stories and folktales, V. Simovych's edition of T. Shevchenko's *Kobzar*, and 10 stories and novelettes by A. Kashchenko.

Staff members of Ukrainske Vydavnytstvo. Sitting, from left: Lesia Khomiak, R. Hanas, R. Berezovsky, Lev Chubaty; standing: P. Dragan, Ivan K., V. Hryhorchak, Danylo Chaikovsky, Kateryna Humnilovych, V. Otchak, Mykola Denysiuk, V. Bilynsky

Ukrainske Vydavnytstvo (Ukrainian Publishing House [UV]). The only Ukrainian publishing house permitted by the German occupational authorities in the *Generalgouvernement of Poland during the Second World War, founded in Cracow in December 1939 as a limited company. V. *Kubijovyč was the major shareholder and chairman of the board of directors. UV had close ties with the *Ukrainian Central Committee (UCC), which Kubijovyč headed. The executive directors of UV were Ye. Pelenky (to May 1940), I. Kotsur (June 1940 to June 1941), I. Zilynsky (June 1941 to August 1944), and finally Omelian Tarnavsky. The assistant director was I. Fediv.

The first priority of UV was to supply books to the half-million Ukrainians of the Kholm, Podlachia, Lemko, and Sian regions, areas that had been denied Ukrainian-language publications by the Polish regime and in which the level of national consciousness was consequently low. UV concentrated on preparing and publishing textbooks and other educational materials for children and adolescents

(37 percent of its total output in 1940) and reading materials for peasants, which were distributed through the UCC-supervised *Ukrainian educational societies. It also published works by B. Lepky, V. Birchak, Lesia Ukrainka, B. Antonych, M. Cheremshyna, I. Vynnytska, R. Yendyk, and V. Karkhut, and issued 16 books about the aforementioned borderlands by M. Korduba, S. Liubarsky, V. Ostrovsky, V. Sichynsky, Yu. Tarnovych, and F. Kokovsky. Its largest editions were a history of Ukraine and T. Shevchenko's *Kobzar*. By mid-1941 UV had published 195 titles. It also printed the newspaper **Krakov's'ki visti* and the renewed children's monthly **Mali druzy* from January 1940, the literary-artistic monthly *Illustrovani visti* from April 1940, and the renewed young people's monthly **Doroha* from October 1940.

After Lviv was taken by the Germans in July 1941, an independent UV publishing house was established there. By the end of 1941 it had published 37 books (textbooks, an orthographic dictionary, literary works, and books on historical and other topics) with a combined pressrun of over 857,000 copies. At the same time, however, the official German publishing house in the Generalgouvernement established a branch in Lviv and began publishing the daily **L'vivs'ki visti*. It tried, through official channels, to limit the distribution of the Cracow UV publications in Galicia and even have the house closed down. As a result of interventions by Ukrainian community leaders (K. Levytsky, K. Pankivsky, and Kubijovyč), however, the Cracow UV was permitted to sell and distribute in Galicia, to open a branch in Lviv with two printing shops, and to publish a literary-cultural monthly, **Nashi dni*. Thenceforth UV maintained its head office in Cracow (directed by I. Fediv), but the Lviv branch (directed by M. Matchak) printed most of the UV publications (except newspapers). Its publishing department was headed by M. Shlemkevych and included V. Simovych, Z. Khraplyva, B. Hoshovsky, S. Hordynsky, Yu. Stefanyk, I. Krypiakievych, D. Shtykalo, and D. Kozii.

In 1942–3 UV issued 212 titles, 71 of them in Cracow and 141 in Lviv. A large part consisted of reprints of works by writers who had been repressed in Soviet Ukraine (eg. O. Vlyzko, B. Antonenko-Davydovych, O. Vyshnia, V. Pidmohylny, M. Kulish, M. Zerov, O. Slisarenko, I. Bahriany, T. Osmachka, V. Gzhytsky, V. Chaplenko, and M. Orest). It also published editions of the collected works of L. Martovych and V. Stefanyk, a few scholarly monographs by Ya. Pasternak and V. Kubijovyč, the mass-circulation monthly **Vechirnia hodyna*, and the *Knyzhka dlia vsikh* (A Book for Everybody) series (books devoted to Ukrainian history and Shevchenko studies). UV continued publishing *Krakov's'ki visti* and *Nashi dni* and introduced a weekly, *Kholms'ka zemlia* (1943–4), for the Ukrainians of the Kholm region. Its periodicals were distributed not only in Ukraine, but also among Ukrainians working in Germany and Czechoslovakia.

With the Red Army advance toward Lviv, the UV branch there was forced to curtail its activities, and finally cease publishing in April 1944. The Cracow head office continued functioning until August 1944, when it moved to Vienna and there published 26 more titles and, briefly, continued *Krakov's'ki visti*.

UV was undoubtedly the most prolific and important Ukrainian publisher of its time. Despite the financial and technical difficulties, strict German censorship, and paper shortages that plagued it throughout its existence, from

1940 to 1945 it published 544 titles (434 books) with a combined pressrun of nearly 5.8 million copies, and 1,839 issues of periodicals with a combined pressrun of 24.7 million copies.

 V. Kubijovyč

Ukrainske Vydavnytstvo (Ukrainian Publishing House). A publishing house established in Munich in 1954 by the OUN (Bandera faction). It has published its weekly organ **Shliakh peremohy*; Biblioteka ukrainskoho pidpilnyka (Library of the Ukrainian Underground Fighter), a series of documentary collections on the history of the OUN, the Ukrainian Insurgent Army, the Ukrainian Supreme Liberation Council, and the Anti-Bolshevik Bloc of Nations; books on political, historical, and ethnographic topics by authors such as N. Polonska-Vasylenko, O. Voropai, and P. Mirchuk; and literary works by O. Mak, V. Vovk, L. Khraplyva, P. Kizko, Yu. Tys, R. Yendyk, O. Berdnyk, and others.

Ukrains'ke zhyttia (Ukrainian Life). A weekly newspaper published in Stanyslaviv in 1921 and 1922–3. Edited by I. Stavnychy, it focused on events in the Stanyslaviv region. The paper was twice banned by the Polish authorities.

Ukrains'ke zhyttia (Ukrainian Life). A pro-Soviet newspaper published weekly from August 1941, then twice a week (1954–60), and then weekly again in Toronto. Sponsored initially by the Committee to Aid the Fatherland, the newspaper became the organ of the *Association of United Ukrainian Canadians. It published articles on economic and political topics, on the labor movement, and on culture. During the war it stressed the need to assist the Soviet war effort and helped to raise funds and supplies to be sent to the USSR. At that time it reached the height of its popularity, with between 12,000 and 15,000 subscribers. *Ukrains'ke zhyttia* rarely strayed from the official Soviet line; it criticized Ukrainian 'bourgeois nationalists' and the acceptance of Ukrainian displaced persons into Canada after the war, and denied Russification and Soviet atrocities and terror at home. The paper was edited by S. Matsievych, M. Hrynchysyn, I. Stefanytsky, M. Korol, P. Krawchuk, and others. In 1965 the paper merged with *Ukrains'ke slovo* to form **Zhyttia i slovo*.

Ukrains'ke zhyttia (Ukrainian Life). A newspaper published weekly and then semimonthly and monthly in 1955–85 in Chicago. It was nonpartisan; it frequently criticized mainstream émigré organizations and promoted democratic ideals. It was generally less critical of Soviet Ukraine than other émigré papers and devoted considerable attention to cultural and political developments there. The paper was edited by a board headed for many years by T. Lapychak, who was also the main force behind the publication. Other editors and contributors included M. Semchysyn, Yu. Stepovy, T. Kurpita, I. Yaremko, and A. Bilynsky, whose articles stressed the need for a rapprochement with Soviet Ukraine.

Ukrains'ki robitnychi visty (Ukrainian Labor News). A pro-Communist newspaper published in Winnipeg; an organ of the *Ukrainian Labour-Farmer Temple Association. It appeared weekly from March 1919, twice a week from April 1920, and then three times a week from March 1924. In January 1935 it became the first and only Ukrainian-language daily newspaper in Canada. The paper published articles on political and economic topics and devoted considerable attention to the labor movement and trade unionism in Canada. It also published laudatory articles about developments in Soviet Ukraine and news of the international Communist movement, and made strident attacks on Ukrainian 'bourgeois nationalists.' The first editor was D. *Lobai, who was assisted by M. Shatulsky from 1920. In 1935 Lobai left the newspaper and split with the Communist movement over events in the Soviet Union. He was replaced by M. Popovich and, later, P. Krawchuk, A. Bilecki, and M. Hrynyshyn. In 1937 *Ukrains'ki robitnychi visty* ceased publication and was succeeded by **Narodna hazeta*. At the height of its popularity in 1929 the paper had a circulation of approx 10,000.

Ukrains'ki visti (Ukrainian News). A pro-Soviet newspaper published weekly in New York and allied with the *League of American Ukrainians. In 1920 it succeeded **Robitnyk* as the organ of the Ukrainian Federation of the Communist Party of America, and it appeared daily until 1956 as *Ukrains'ki shchodenni visty*. It has reported on developments in the Soviet Union, the workers' movement in the United States and elsewhere, and cultural and community affairs. In the interwar period it devoted particular attention to events in Galicia. In the late 1920s the paper became Stalinist and criticized the more nationalistic elements in the Communist Party of Western Ukraine led by O. Vasylykiv. Since then it has rarely deviated from the official Soviet line, and has constantly praised the USSR and attacked Ukrainian 'bourgeois nationalists' in the West. It contains many reports of trips by Ukrainian Americans to Soviet Ukraine and literary contributions by Soviet Ukrainian writers. Editors and contributors have included M. Tkach, M. Andriichuk, M. Tarnovsky, M. Kniazevych, and D. Borysko. From 1956 until the mid-1980s the editor was L. Tolopko; he was succeeded by M. Hanusiak. Since 1977 *Ukrains'ki visti* has published a monthly English-language edition, the *Ukrainian News*, which succeeded the *Ukrainian-American* (1965-77).

Ukrains'ki visti (Neu-Ulm)

Ukrains'ki visti (Ukrainian News). A newspaper published weekly (at times semimonthly) in Neu-Ulm, West Germany, from November 1945 to May 1978 and in Detroit since August 1978. It has been closely allied with the postwar émigré *Ukrainian Revolutionary Democratic party, and briefly published its ideological organ *Nashi pozysitii*. The paper contains articles on politics, economics,

culture, and community affairs. It has devoted particular attention to developments in Soviet Ukraine. Until the 1960s it supported the Ukrainian National Council. In 1953 it published a semimonthly Russian-language supplement, *Osvobozhdenie*, edited by G. Aleksinsky. It has also published sections devoted to the Plast Ukrainian Youth Association, the Petliura Legion (veterans of the Army of the UNR), the Ukrainian Democratic Youth Association, and art and culture. In 1986 it had a circulation of approx 1,500. The initiator of the paper and a longtime chief editor (1946-7, 1954, 1957-62) was I. *Bahriany. Other chief editors have included P. Maliar (1945), Yu. Lavrinenko (1948), M. Voskobiinyk (1949), A. Romashko (1950-3), V. Bender (1955-6), V. Minialo, A. Hlynin (1963-74), F. Haienko (1975-8), and M. Smyk (since 1978).

Ukrains'ki visti/Ukrainian News (Edmonton)

Ukrains'ki visti/Ukrainian News. A newspaper published in Edmonton. It began to appear in 1928 as a weekly, under the name *Zakhidni visty*. Published by S. Fodchuk and then T. Tomashevsky, it was a general-interest paper concerned with economic and political affairs. Among its early editors and contributors were V. Kaye-Kysilewsky, M. Pohoretsky, and M. Koziak. In 1929 it was acquired by the Edmonton eparchy of the Ukrainian Catholic church, and in January 1932 it assumed its present name. The paper publishes articles on political, cultural, and historical topics; church news; and reports on current affairs, with a focus on developments in Alberta and western Canada. For many years after the Second World War the paper was edited by Rev M. Sopuliak. The newspaper's tone and appearance were modernized during the 1980s by its present editor (1991), M. Levvitsky. It also adopted a bilingual English-Ukrainian format and became a monthly.

Ukrains'ki visty (Ukrainian News). A semimonthly newspaper published in 1926-9 in Paris. The organ of the Sovietophile *Union of Ukrainian Citizens in France, it regularly criticized the Government-in-exile of the UNR, many leaders of which lived in Paris. The editor was E. Borschak.

Ukrains'ki visty (Ukrainian News). An organ of the *Front of National Unity, published daily in 1935-9 in

Lviv. It was edited by I. Hladylovych with the assistance of D. Paliiv, M. Shlemkevych, S. Volynets, and V. Dzis. The newspaper reported extensively on political, economic, and Ukrainian community developments in Poland and abroad. From 1937 it published an illustrated weekly supplement and a page of news for workers. It did much to mobilize support for the national movement in Western Ukraine while criticizing both the pro-Polish policies of the Ukrainian National Democratic Alliance and the political terrorism of the OUN. Among its frequent contributors were Ya. Zaremba, O. Babii, M. Pasika, Z. Tarnavsky, O. Hubchak, and M. Levytsky.

Ukrainskii al'manakh

Ukrainskii al'manakh (Ukrainian Almanac). The first Ukrainian literary miscellany, published in Kharkiv in 1831 by I. *Sreznevsky. It was edited by I. Roskovshenko, and contained poetry and prose in Ukrainian and Russian by writers of the *Kharkiv Romantic School, such as Roskovshenko, Sreznevsky, L. Borovykovsky, Ye. Hrebinka, O. Shpyhotsky, P. Morachevsky, and O. Afanasiev-Chuzhbynsky. It also published two dumas, nine folk songs, and translations of works by A. Pushkin and A. Mickiewicz. *Ukrainskii al'manakh* played an important role in the early development of Ukrainian literature and influenced many later writers. Although subsequent volumes were planned, a shortage of funds precluded their appearance.

Ukrainskii biokhimicheskii zhurnal. See *Ukrains'kyi biokhimichnyi zhurnal.*

Ukrainskii domovod (Ukrainian Household Manager). A Russian-language journal, two issues of which appeared in Kharkiv in 1817 under the editorship of M.-H. Pilger. It provided practical advice on farming practices and especially veterinary medicine and the proper care of farm animals. The journal was closed down by the authorities for its criticism of official indifference to the plight of the peasantry.

Ukrainskii fizicheskii zhurnal. See *Ukrains'kyi fizychnyi zhurnal.*

Ukrainskii khimicheskii zhurnal. See *Ukrains'kyi khimichnyi zhurnal.*

Ukrainskii matematicheskii zhurnal (Ukrainian Mathematical Journal, or *UMZh*). A scientific journal published by the Institute of Mathematics of the AN URSR (now ANU) on a quarterly basis in 1949–64 and a bimonthly basis until 1991. Initiated by A. Ishlinsky, its first editor, the journal was published in Russian until the 1970s, when it appeared briefly in both Ukrainian and Russian. In 1978 the Ukrainian edition was abolished. Since 1968 the journal has been translated into English in the United States. For many years it was edited by Yu. *Mytropolsky. The journal published primarily research papers in such fields as nonlinear mechanics and mathematical physics, theoretical physics, differential equations, algebra, geometry, topology, real and complex function theory, constructive function theory, functional analysis, and the theory of probability and mathematical statistics. Brief research notes and bibliographic information appeared also. The journal represented a good cross-section of mathematics in Ukraine. *UMZh* was the successor to *Zapysky Fizychno-matematychnoho viddil'u* (1923–31), *Zhurnal matematychnoho tsykladu* (1931–4), *Zhurnal Instytutu matematyky* (1934–8), and *Zbirnyk prats' Instytutu matematyky* (1938–49).

Ukrainskii narod v ego proshlom i nastoiashchem (The Ukrainian People in Its Past and Present). The first encyclopedic reference work on Ukraine. Initiated by O. Lototsky and M. Hrushevsky, it was originally conceived as an encyclopedic dictionary. A lack of contributors and other resources forced the editors to plan instead a four-volume reference work with long articles in Russian addressing the major areas of Ukrainian studies. The editorial board consisted of M. Hrushevsky, F. Vovk (Volkov), M. Kovalevsky, F. Korsh, A. Krymsky, M. Tuhan-Baranovsky, and A. Shakhmatov. The formal publisher was M. Slavinsky, and the managing editor was O. Lototsky. Contributors included leading Ukrainian scholars from Russian-ruled and Western Ukraine, and Russian academics. The first volume, published in Moscow in 1914, contained M. Hrushevsky's overview of the development of Ukrainian studies and his survey history of the Ukrainian people. The second volume, which appeared in 1916, contained articles by S. Rudnytsky (on Ukraine's geography), O. Rusov (on the demography of Russian-ruled Ukraine), V. Okhrymovych (on Galicia and Bukovyna), S. Tomashivsky (on Transcarpathia), P. Yefymenko (on Ukrainian customary law), F. Vovk (on Ukrainian anthropology and ethnography), and A. Shakhmatov (on the history of the Ukrainian language). Subsequent volumes, which never appeared because of the outbreak of the First World War and anti-Ukrainian tsarist policies, were to contain articles on Ukrainian culture, literature, architecture, art, music, economic history, religion, local government, political and national relations, and the social, political, and cultural life of Western Ukraine.

Ukrainskii sbornik (Ukrainian Collection). The earliest Ukrainian literary periodical, published by I. *Sreznevsky. The first issue (1838, 88 pp) consisted of Sreznevsky's preface and postscript, I. *Kotliarevsky's drama *Natalka Poltavka* (Natalka from Poltava), and a short dictionary. The second (1841, 46 pp) consisted of Kotliarevsky's play *Moskal'-charivnyk* (The Soldier-Sorcerer).

Ukrainskii vestnik

Ukrainskii vestnik (Ukrainian Herald). One of the first journals in Ukraine, published in Kharkiv from 1816 to 1819 (a total of 16 large issues) under the editorship of H. Kvitka-Osnovianenko, R. Honorsky, and E. Filomafitsky. Although published primarily in Russian and initiated by I. *Sreznevsky, *Ukrainskii vestnik* was dedicated to publishing works on Ukrainian topics. It contained works on history, particularly the history of the Hetmanate and Slobidska Ukraine, by M. Markov, J. Vernet, M. Hrybovsky, and I. Kvitka; literary criticism by R. Honorsky and E. Filomafitsky; articles on Ukrainian ethnography by A. Levshin; commentaries by V. Karazyn, H. Kvitka-Osnovianenko, I. Voronov, and others; regular reports on cultural and intellectual life in Kharkiv; articles on prominent figures from Slobidska Ukraine, especially H. Skovoroda; original prose and poetry, in Ukrainian by P. Hulak-Artemovskyy and H. Kvitka-Osnovianenko and in Russian by O. Somov; and translations of writings by Voltaire, J. Rousseau, and J. Milton. The tsarist Ministry of Education objected to the 'liberal' tendencies of the journal and eventually prevailed upon the local authorities to close it down.

Ukrainskii vestnik (Ukrainian Herald). A Russian-language weekly organ of the *Ukrainian caucus in the Russian State Duma, published in St Petersburg from June to September 1906 (a total of 14 issues). Published by N. Lototska and edited by M. Slavinsky, it contained articles on political, cultural, and economic affairs, and informed the public in the Russian Empire about the Ukrainian question and the autonomy movement. Regular contributors included Ukrainian figures such as M. Hrushevsky, D. Doroshenko (managing editor), O. Lototsky, M. Biliashivsky, B. Hrinchenko, S. Yefremov, L. Zhebunov, P. Zhytetsky, B. Kistiakovskyy, M. Lozynsky, D. Markovych, I. Luchytsky, P. Stebnytsky, P. Chyzhevsky, V. Shemet, I. Shrah, F. Vovk, S. Rusova, M. Mohyliansky, D. Bahalii, M. Tuhan-Baranovskyy, and O. Rusov. I. Franko and V. Hnatiuk contributed reports from Galicia, and the Russian writer D. Ovsianiko-Kulikovskyy submitted an article on the psychology of national creativity. The paper stopped appearing after the First Duma was dissolved.

Ukrainskii zhurnal (Ukrainian Journal). A semimonthly Russian-language journal of literature, art, scholarship, and civic affairs, published by the Kharkiv University Press in 1824–5 (a total of 48 issues). It was edited by O.

Sklabovskyy and appeared in a pressrun of 600 copies. From the end of 1824 important archival documents pertaining to the history of the Hetman state were published in a separate section called 'Little Russian Antiquities.' *Ukrainskii zhurnal* also contained ethnographic articles on Ukrainian towns and the Ukrainian language by J. Vernet and A. Levshin, and the first attempt at a synthetic assessment of Ukrainian poetry, by I. Kulzhynskyy. The journal also reported extensively on educational, civic, and cultural affairs in Slobidska Ukraine.

Ukrains'kyi agronom (Ukrainian Agronomist). A monthly organ of the agronomy section of the Ukrainian Bureau of the USSR Union of Agricultural and Forestry Workers. It appeared in Kharkiv in 1925–9 in place of *Zemel'nyk*, which had been published in 1924–5 before being split into *Ukrains'kyi agronom*, **Ukrains'kyi zemlevporiadnyk*, and *Ukrains'kyi lisovod*. In 1930 the first two journals were succeeded by the semimonthly *Spetsialist sil's'koho hospodarstva Ukraïny*, which later became *Spetsialist sotsialistychnoho sil's'kohospodars'koho vyrobnytstva* (1931–2). *Ukrains'kyi agronom* contained technical and scientific articles on agriculture and agronomy as well as articles on economic and political topics.

Ukrains'kyi agronomichnyi vistnyk (Ukrainian Agricultural Herald). The only scholarly journal of agronomy published in Western Ukraine before the Second World War. It appeared quarterly in Lviv in 1934 and 1938 (a total of six issues). Its publisher and editor was Ye. *Khraplyvy.

Ukrains'kyi Beskyd (Ukrainian Beskyd). A weekly Catholic, pro-hetmanite newspaper published by D. Gregolynsky in Peremyshl in 1933–9 as the continuation of **Beskyd*. It was edited by Yu. Kostyuk and appeared with the financial assistance of Bishop Y. Kotsylovskyy of Peremyshl.

Ukrains'kyi biokhimichnyi zhurnal (Ukrainian Biochemistry Journal). The oldest existing periodical devoted to biochemistry in the USSR, published bimonthly by the AN URSS (now ANU) Institute of Biochemistry. The continuation of *Naukovi zapysky Ukraïns'koho biokhemichnoho instytutu* (1926–34), it was originally called *Ukrains'kyi biokhemichnyi zhurnal* (1934–7). Renamed *Biokhimichnyi zhurnal* (1938–41), it was revived under its current name in 1946. Since 1978 it has been published only in Russian, as *Ukrainskii biokhimicheskii zhurnal*.

Ukrains'kyi botanichnyi zhurnal (Ukrainian Botanical Journal). A scientific quarterly published by the AN URSS (now ANU) Institute of Botany since 1940. It was founded in 1921 under the title *Zhurnal instytutu botaniky UAN*, and in the 1930s it was published as *Botanichnyi zhurnal AN URSS*.

Ukrains'kyi emigrant (Ukrainian Emigrant). A monthly and then semimonthly and quarterly organ of the *Ukrainian Emigrant Aid Society, published in Lviv in 1927–39. Edited by V. Bachynskyy, V. Konstantynovych, H. Rohozhynskyy, and A. Hovynovych, it published reports on émigré life and developments in Western Ukraine. In 1930 it had a pressrun of 3,200 copies.

Ukrains'kyi filatelist (Ukrainian Philatelist). A journal of the émigré Society of Ukrainian Philatelists, published in Vienna monthly from 1925 to 1930 and then bimonthly to 1939. Its first editor was I. Turyn. The journal sought to popularize Ukrainian affairs in philatelic circles, and published some articles in German.

Ukrains'kyi filatelist/Ukrainian Philatelist. A journal of the *Ukrainian Philatelic and Numismatic Society, published annually and then semiannually since 1951 in the United States. Originally titled *Philatelist*, it was renamed the *Philatelic News/Filatelistychni visti* in 1962 and has appeared under its present name since 1963. The journal has published articles in both Ukrainian and English and has served as the main historical record of Ukrainian philately and numismatics in the world. The editors have been Ye. Kotyuk (1951–61), I. Svit (1961–72), G. Slusarczuk (1972–5), S. Kikta (1975–6), J. Tkachuk (1976–85), and I. Kuzych (since 1985). By 1990, 58 issues had appeared.

Ukrains'kyi fizychnyi zhurnal (Ukrainian Physics Journal). A scientific journal published by the AN URSR (now ANU) Physics and Astronomy Division, founded in 1956 at the initiative of V. *Lashkarev. A bimonthly until 1961, it has appeared monthly since 1962. From 1967 through 1977 the journal was published in parallel Ukrainian- and Russian-language editions. Since 1978 it has appeared only in Russian, as *Ukrainskii fizicheskii zhurnal*. It now publishes (since 1989) research papers in Russian, Ukrainian, and English, as submitted. The journal has published research papers in fields such as atomic and molecular physics, nuclear physics, field theory and elementary particles, electromagnetic radiation and optics, plasma and gas dynamics, liquids and liquid crystals, solids, thermodynamics, statistical physics, quantum mechanics, and quantum optics; and brief research notes, letters, review articles, bibliographic information, and reviews. The chief editors have been V. Lashkarev, A. Simirnov, and O. Sytenko (since 1988).

Ukrains'kyi fol'klor (Ukrainian Folklore). An illustrated popular scientific bimonthly periodical published in Kiev from 1937 to 1939 by the Institute of Ukrainian Folklore of the AN URSR (now ANU) and the Office for the Arts at the Council of People's Commissars of the Ukrainian SSR. It replaced *Etnohrafichnyi visnyk*, which had been discontinued in 1932. Ten issues appeared, containing articles mostly on 'Soviet folklore,' with examples of it and guidelines for creating it and recording it. The editor was A. Khvyliya. In 1939 the periodical's name was changed to *Narodna tvorchist'*.

Ukrains'kyi holos (Ukrainian Voice). A weekly newspaper published in *Winnipeg since March 1910; the oldest continuing Ukrainian newspaper in Canada. The paper was published by the Ukrainian Publishing Company (now *Trident Press), which was founded by a group of liberal-minded Ukrainians, many of them graduates of the *Ruthenian Training School. It was committed to the principles of popular enlightenment, education, economic self-reliance, Ukrainian nationalism (it was the first paper in Canada and one of the first in the world to call itself 'Ukrainian' instead of 'Ruthenian'), and loyalty to Canada. Initially it was supported by most liberal, na-

The first issue of *Ukrains'kyi holos* (Winnipeg)

tionally conscious Ukrainians in Canada, by the emerging Prosvita movement and the various national homes and cultural societies across western Canada. The paper reported on Ukrainian-Canadian affairs and on developments in Western and Russian-ruled Ukraine. During the struggle for Ukraine's independence it supported the Central Rada and then the UNR. The paper also emerged as a major critic of the Ukrainian Catholic Church in Canada – engaging often in heated polemics on religious and church subjects – and (in the interwar era) of the Ukrainian Communist movement in Canada. Its first editor was V. *Kudryk (1910–21). Others involved in the early years of the paper included T. Ferley, W. Czumer, P. Woycenko, O. Zerebko, and J. Arsenych.

Early in its history, *Ukrains'kyi holos* emerged as a major force behind the establishment of the *Ukrainian Orthodox Church of Canada, and it became the unofficial organ of the new church in 1918. Under its second editor, Myroslaw *Stechishin (1921–47), it worked to establish a new Orthodox lay organization, the *Ukrainian Self-Reliance League (SUS); it became that organization's organ in 1927. Since then it has reported extensively on the activities of SUS and its constituent organizations, the Canadian Ukrainian Youth Association, the Ukrainian Women's Association of Canada, the Union of Ukrainian Community Centres of Canada, and the four student residences affiliated with SUS. Until 1973 it included a monthly supplement devoted to literature, scholarship, and the arts. Since the Second World War the paper's editors have included I. Syrnyk, D. Lobai, S. Volynets, M. Hnativ, M. Hykavy, A. Kurdydyk, and P. Danyliuk.

In 1981 the newspaper **Kanadiis'kyi farmer* was merged with *Ukrains'kyi holos*. Eight volumes of annals of Ukrainian life in Canada based on the contents of *Ukrains'kyi holos* covering the period through the 1970s, prepared by O. Woycenko, appeared by 1992. The newspaper has published an annual almanac virtually from the time of its formation. The 1960 jubilee edition includes accounts of its history and development.

B. Balan

Ukrains'kyi holos (Ukrainian Voice). A semiweekly organ of the Ukrainian Military Executive Council of the Northwestern Front, published from June to November 1917 (a total of 47 issues) in Riga, Valga, and Valmiera in Latvia, and in Pskov, Russia. It was edited by S. Pylypenko and K. Polishchuk.

Ukrains'kyi holos (Ukrainian Voice). An official daily newspaper of the *State Secretariat of the Western Ukrainian National Republic, published in November 1918 in Lviv and then, after the occupation of Lviv by Polish forces, to May 1919 in Ternopil. The editors were L. Tsehelsky (May 1918), P. Karmansky (November 1918 to February 1919), and M. Malysky (February–May 1919). K. Hrynevych and S. Charnetsky were staff writers. The paper was succeeded by *Ukrains'ki visty* (May–July 1919; 36 issues), edited by Malysky, I. Halushchynsky, S. Sydorak, I. Brykovych, and F. Bulat.

Ukrains'kyi holos (Peremyshl)

Ukrains'kyi holos (Ukrainian Voice). A weekly newspaper published in Peremyshl in 1919–32. Initially it backed the Ukrainian Labor party, but in 1920–9, under the editorship of D. Gregolynsky and then Ye. Zyblykevych, it supported the hetmanite movement. At this time it reached the height of its popularity and appeared in a pressrun of up to 17,000 copies. In 1929 it became the first legal, though unofficial, organ of the OUN; from then it was edited by Z. Pelensky (1929–30), Zyblykevych (1930–1), and V. Zubrytsky (1931–2). Issues of *Ukrains'kyi holos* were frequently confiscated by the Polish authorities, particularly in 1920, when it appeared briefly under four different titles, and after 1929. The paper was finally closed down.

Ukrains'kyi holos (Ukrainian Voice). A newspaper published in Lutske during the German occupation. It appeared weekly from the fall of 1941 to October 1942 and then semiweekly to January 1944 (a total of 144 issues). The newspaper was edited by V. Postryhach and, from February 1942, by A. Dubliansky.

Ukrains'kyi holos na Dalekomu skhodi (Ukrainian Voice in the Far East). A newspaper published irregularly (usually three times a month) in Shanghai from November 1941 to July 1944. It reported on developments in Ukraine and the Far East, particularly on the Ukrainian nationalist movement and the struggle for Ukrainian independence. It carried on a lively polemic with anti- and pro-Soviet Russian émigré newspapers in China and criticized Nazi policies toward Ukraine. The newspaper was edited by M. Milko, O. Drobiazko, and I. Svit.

Ukrains'kyi invalid (Ukrainian Invalid). A biweekly and later irregular organ of the Ukrainian Association of Disabled Veterans, published in Kalisz, Poland, in 1923–31. It was intended for disabled veterans of the Army of the UNR living in Poland. The editors were V. Rohaza and M. Sadovsky. In 1937–9 a quarterly journal with the same title was published in Lviv by the Ukrainian Invalids' Aid Society.

Ukrains'kyi istorychnyi zhurnal

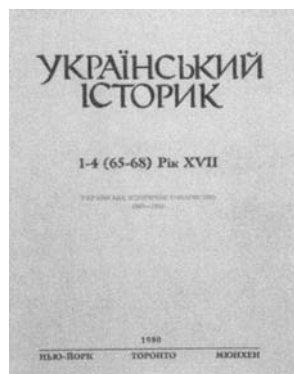

Ukrains'kyi istorychnyi zhurnal (Ukrainian Historical Journal, or *UIZh*). An organ of the AN URSS (now ANU) Institute of History and of the Institute of Party History of the CC CPU (until 1991), published in Kiev bimonthly from 1957 and monthly since 1962. Its chief editors have been F. Shevchenko (1957–67, 1968–72), K. Dubyna (1967), P. Kalynychenko (1972–9), O. Kondufor (1979–88), and M. Koval (since 1988). During the Soviet period *UIZh* was the only historical journal in Ukraine, and it was in some ways the republican version of several Moscow-based historical journals, including *Voprosy istorii*, *Istoriia SSSR*, *Voprosy istorii KPSS*, and *Vestnik drevnei istorii*.

A great deal of space in *UIZh* was given to CP history, and comparatively little to the history of Ukraine. The journal mainly addressed the Soviet period and the socio-economic history and workers' movement during the 19th and 20th centuries, and only marginally discussed the Cossack era and the history of Ukrainian culture. The Princely period was almost totally excluded from *UIZh*, and minimal attention was paid to world history. All the published material adhered ideologically and conceptually to Marxism-Leninism, and CP policies were strictly followed on national politics in Ukraine. During the 1960s there were attempts to broaden the scope of the journal and to rehabilitate the proscribed historical past, but those efforts were soon halted. Only a few prerevolutionary historians (O. Lazarevsky, D. Yavornytsky, A. Yefymenko, M. Drahomanov, and a few others) were partially accepted in the officially recognized historiography. In the mid-1970s *UIZh* came under severe CP restrictions, and a purge was carried out among the members of the editorial board and in the ANU Institute of History.

UIZh marked the great historical event of the millennium of Christianity in Ukraine with only one article, by M. Kotliar on the introduction of Christianity in Rus' (1988, no. 6). The reforms that began in 1985 had some slight effect on its orientation and contents (eg. the reprinting of M. Kostomarov's monograph 'Mazepa,' contradictory data on the 1932–3 man-made famine in Ukraine), but the journal continued to espouse, until the demise of the USSR, a conservative, dogmatic CP line and publish a minimal amount on the history of Ukraine. The standard sections of *UIZh* have included essays, announcements (including obituaries), history and source studies, notes, methodology and the methods of historical research ('to aid the lecturer on history'), documents, a historical calendar, relics of history and culture, reviews, annals, criticism and bib-

liography, and announcements of defenses of doctoral theses. Systematic guides to *UIZh* were published for the periods 1957–66 (1968), 1967–76 (1982), and 1977–86 (1987).

A. Zhukovsky

Ukrains'kyi istoryk

Ukrains'kyi istoryk (Ukrainian Historian, or *ui*). A quarterly journal on Ukrainian history published in one or two volumes per annum. The first three issues were published by Zarevo (1963–4), and the *Ukrainian Historical Association has published the journal since the fourth issue. The founder and chief editor of *ui* is L. *Wynar, who has been assisted by M. Antonovych. The journal was printed in the United States until 1964 and in Munich until 1986, and has again been printed in the United States since 1987. The language of the publication is primarily Ukrainian, although some papers are printed in the original English, German, or another language.

ui publishes research on the history of Ukraine and on related historical disciplines, as well as source materials, memoirs, epistolary documents, abstracts, reprints from other publications, reviews, annals, and so on. One of its major accomplishments has been its comprehensive illumination of the life and work of M. Hrushevsky (particularly by L. Wynar, who founded a section of *ui* dedicated to Hrushevsky studies). Separate volumes of the journal have focused on eminent Ukrainian historians (Hrushevsky, nos 9–10 and 81–4; O. Ohloblyn, nos 25–7; L. Wynar, nos 69–72; D. Doroshenko, V. Lypynsky, and M. Slabchenko, nos 75–7; and O. Kandyba, nos 85–8) and on historic jubilees and anniversaries (the centenary of the Shevchenko Scientific Society [NTSh], nos 37–8; the millennium of Christianity in Ukraine, nos 97–100). Some papers appearing in *ui* have been republished as monographs, including L. Wynar's essay on Hrushevsky and the NTSh in 1892–1930, Ya. Pasternak's historical, archeological, and linguistic study of early Slavs, and B. Wynar's examination of the development of economic thought in Kievan Rus'.

M. Antonovych

Ukrains'kyi khimichnyi zhurnal (Ukrainian Chemistry Journal). A scientific journal published monthly in Kiev by the AN URSS (now ANU) Division of Chemistry and Chemical Technology. It succeeded *Ukrains'kyi khimichnyi zhurnal*, a quarterly and then bimonthly published in 1925–6 and 1927–38 in Kharkiv. It was revived in Kiev in 1948 and has been published since then in Russian, as *Ukrainskii khimicheskii zhurnal*; since 1969 a Ukrainian edition has also been published. An English translation, ap-

pearing briefly in 1964 as *Ukrainian Journal of Chemistry*, has been marketed since 1966 by Allerton Press (New York) as *Soviet Progress in Chemistry*.

Ukrains'kyi khlivorob. See *Khlivorob*.

Ukrains'kyi medychnyi vistnyk (Ukrainian Medical Herald). An irregular medical journal published in Prague by the *Ukrainian Physicians' Association in Czechoslovakia in 1923–5 (six issues). During these years it was the only Ukrainian medical journal being published in the West, and its readership extended to Soviet Ukraine. Edited by B. *Matiushenko, the journal published articles on clinical and theoretical medicine, community hygiene, and eugenics. Besides scientific papers and professional news, it devoted much attention to the development of Ukrainian medical terminology. Its contributors included members of the association and doctors in Western and Soviet Ukraine.

Ukrains'kyi misionar (Ukrainian Missionary; Portuguese: *Missionário ucraino*). A Ukrainian-Brazilian Catholic monthly, published in Prudentópolis by the Basilian order since 1911. Originally entitled *Misionar*, it was twice closed down by the Brazilian authorities (1918–34 and 1940–7) and replaced temporarily by the annual *Namirenna apostol'stva molytoy* under the editorship of Kh. Myskiv. It began appearing as *Ukrains'kyi misionar* in 1935 and was later also called *Ukrains'kyi misionar u Brazylii*. It contains a calendar of church events and dates, articles of general religious and national interest, and news from parishes from around the world. It has been edited by R. Krynytsky, I. Vihorynsky, and V. Zinko.

Ukrains'kyi myslyvets' i rybalka (Ukrainian Hunter and Fisherman). A monthly organ of the All-Ukrainian Association of Hunters and Fishermen, published in Kharkiv in 1925–32 (a total of 98 issues). In 1925–6 it appeared in Russian as *Ukrainskii okhotnik i rybolov*. The journal was formed through the merger of two Russian-language journals founded in 1924, *Priroda i okhota na Ukraine* and *Ukrainskii okhotnichii vestnik*.

Ukrains'kyi pasichnyk (Ukrainian Beekeeper). A monthly organ of the *Sil'skyi Hospodar society and *Rii beekeepers' co-operative society, published in Lviv in 1928–39 and 1942–4. It provided practical advice for beekeepers on producing and marketing honey. The editors were M. Borovsky (1928–38), Ye. Khraplyvy (1938–42), I. Drabaty, and S. Yatsura. The circulation in 1930 was 6,000.

Ukrains'kyi prapor (Ukrainian Flag). An official organ of the *Dictatorship of the Western Province of the UNR, published in Vienna from August 1919 to October 1923. After the Dictatorship was dissolved, the paper moved to Berlin, where it continued to appear until 1932. In Berlin it attempted to influence Western European governments to support the cause of Ukrainian independence. *Ukrains'kyi prapor* was published initially twice a week; then weekly from 1922, semimonthly from 1925, and monthly from 1929; and finally irregularly. Its editors included P. Lysiak, I. Nimchuk, and I. Prots (from 1923), and regular contributors included K. Levytsky, O. Nazaruk, and O. Hrytsai in Vienna and M. Lozynsky, R. Perfetsky, Yu. Bachynsky, and A. Zhuk in Berlin.

Ukrain's'kyi pravoslavnyi visnyk. See *Ukrainian Orthodox Herald*.

Ukrain's'kyi Prometei (Ukrainian Prometheus). A weekly newspaper published in Detroit in 1952–8, and then in New York in 1959–61 as *Prometei*. The unofficial organ of the *Ukrainian Revolutionary Democratic party, it was edited by P. Maliar, V. Hryshko, and M. Dziabenko.

Ukrain's'kyi revoliutsioner

Ukrain's'kyi revoliutsioner (Ukrainian Revolutionary). An organ of the clandestine émigré Western Ukrainian National Revolutionary Organization (ZUNRO) led by Ye. Petrushevych, the former president of the Western Ukrainian National Republic. The journal was printed in Berlin from July 1926 to August 1929 (a total of 24 issues) and smuggled into Polish-ruled Western Ukraine, where it was illegally disseminated. It advocated the revolutionary overthrow of Polish rule and the creation of a unitary pan-Ukrainian state. Because it and the ZUNRO were Sovietophile and condemned the legal Western Ukrainian parties and the much more influential Ukrainian Military Organization, they had little support in Western Ukraine, and disappeared.

Ukrainskyi Robitnyk (Ukrainian Worker). One of the four major publishing houses in Ukraine in the 1920s, founded in Kharkiv in July 1925 from the merger of the Ukrprofizdat publishing house of the All-Ukrainian Council of Trade Unions and the Rabochii Donbassa publishing house. Until October 1935 it published mass-distributed literature on industrial, technical, sociopolitical, and trade-union subjects, inexpensive series of prose and poetry (including Ukrainian literature in Russian translation), textbooks for vocational schools, and trade-union and cultural-educational journals, such as *Vestnik profdvizheniia Ukrainy* (1925–9), *Znanie* (1925–7), *Rabochii* (1925–6), *Rabochii klub* (1925–7), *Kul'trobitnyk* (1927–30), and *Kul'tfront* (1931–5). Major branch offices of the publishing house were located in Kiev, Odessa, Dnipropetrovske, and Kryvyi Rih. From late 1930 *Ukrainskyi Robitnyk* was part of the State Publishing Alliance of Ukraine.

Ukrain's'kyi robotnyk (Ukrainian Worker). A weekly organ of the *Sich society in Canada and then the *United Hetman Organization, published from January 1934 to August 1956 in Toronto. Splits in the hetmanite movement in the early 1950s led to several changes in the paper.

In July 1954 it was renamed *Ukrain's'kyi khrystyians'kyi robotnyk* to stress its anticommunist, Christian outlook, and in September of that year it became *Kanadiis'kyi horozhanyyn*. The editors of *Ukrain's'kyi robotnyk* and its successors were I. Korchynsky, M. Hetman (1937–49; in 1952–5 he published a competing conservative newspaper, **Nasha derzhava*), Yu. Rusov, Yu. Tarnovych, V. Bosy, R. Domazar, and A. Kurdydyk.

Ukrain's'kyi samostiinyk

Ukrain's'kyi samostiinyk (Ukrainian Independentist). The name of two related publications that appeared in Munich from 1950 to 1975. The first, a weekly newspaper of political news and commentary, was the semiofficial organ of the émigré OUN (Bandera faction) and was edited by K. Kononenko, S. Lenkavsky, D. Shtykalo, and Z. Pelensky. After the 1954 split in the faction, the paper became the organ of the newly formed OUN (Abroad) and was edited by Pelensky, L. Rebet, and B. Kordiuk. From September 1957 it appeared as a monthly journal of social and political thought. Edited by L. Rebet, V. Markus, B. Kordiuk, and A. Kaminsky, the journal espoused principles of democratic nationalism and provided a forum for more open discussion of political, social, cultural, and religious issues. It devoted particular attention to political developments in Soviet Ukraine, Ukrainian émigré politics, and the relationship between Ukraine and its neighbors. In 1975 it appeared quarterly. A total of 212 issues appeared before the journal merged with **Suchasnist'* in 1976.

Ukrain's'kyi selianyn (Ukrainian Peasant). A monthly organ of the *Union of Lands of United Ukraine. It succeeded the party's journal *Ukrain's'ka zemlia* (three issues in 1951–3) and was published in 1953 in New York and in 1954–62 in Munich. Edited by V. Dubrovsky (1954–5) and Yu. Semenko (1955–62), the paper was read primarily by émigrés from central and eastern Ukraine. Contributors included V. Dolenko, A. Vovk, Yu. Lavrinenko, T. Borovets, M. Kovalevsky, N. Pavlushkova, and V. Senyk. In the late 1970s the party revived *Ukrain's'ka zemlia* as an annual publication; no. 15 appeared in 1988.

Ukrain's'kyi skytalets' (Homeless Ukrainian). A newspaper published by émigré veterans of the Ukrainian Galician Army in the internment camps at Liberec (1920–2) and Josefov (1922) in Czechoslovakia, and then in Vienna. It appeared monthly and then semimonthly (with interruptions) from November 1920 to 1923 and was edited by P. Budz and I. Prots.

Ukrain's'kyi teatr (Ukrainian Theater). An illustrated bimonthly journal published under the auspices of the Ministry of Culture by the *Ukrainian Theatrical Society

since 1970 in Kiev. It contains articles on the development of Soviet Ukrainian theater, the history of Ukrainian theater, the contemporary Soviet theatrical repertoire, public figures in the theater world, and the activities of 'progressive' foreign theaters. Its predecessor (1936–41) was **Teatr*. In 1954–69 theatrical affairs were covered in the journal *Mystetstvo*.

Ukrains'kyi tyzhden' (Ukrainian Week). A weekly newspaper published in Prague in 1933–8. Published and edited by P. Zlenko, it reported on Ukrainian life, particularly in Czechoslovakia and Prague.

Ukrains'kyi visnyk (Ukrainian Herald). An organ of the *Ukrainian National Alliance in Germany, published in Berlin in 1936–45 irregularly, then monthly (from 1938), semimonthly, and three times a week, and finally weekly. A pro-OUN paper edited by T. Omelchenko, Yu. Artiushenko, V. Yaniv (1940), V. Panchenko-Yurevych, A. Bilynsky, and V. Maruniak (from 1941), and P. Bohatsky (1944), it contained articles on political and social issues and reports on Ukrainian émigré life in Germany and elsewhere and on the activities of the alliance. It also devoted considerable attention to developments in Ukraine. During the Second World War the paper had a pressrun of 15,000 copies; it was distributed throughout German-occupied Ukraine until distribution was forbidden by the Ostministerium.

A 1987 issue of the revived *Ukrains'kyi visnyk*

Ukrains'kyi visnyk (Ukrainian Herald). An underground samvydav journal in Ukraine. The first eight issues (in six volumes) appeared in the early 1970s; all of them, except vol 5, were published in the West, and some were translated into English or French. The journal contained articles defending human rights in Ukraine and exposing *Russification and Russian chauvinism. The journal published much information on the illegal repressions against Ukrainian intellectuals, including reports on the closed trials and prison or camp conditions and the texts of defense speeches and protest letters. It presented the available evidence on the murder of A. Horska and the persecution of Ukrainian dissidents, such as V. Chornovil, M. Plakhtoniuk, S. Khmara, O. Shevchenko, V. Moroz, I. Svitlychny, Ye. Sverstiuk, S. Karavansky, and I. Sokulsky. Besides reports and materials on the human rights movement it published analytical articles on political questions and literary works by persecuted writers, such as V. Sy-

monenko, I. Kalynets, H. Chubai, and M. Kulchytsky. Issues 7–8, edited by the pseudonymous Maksym Sahaidak, differ from the previous issues in tone and in their more nationalistic positions. After a 13-year silence the journal was renewed, in 1987, with the appearance of issue 7 (the earlier issues 7–8 were not recognized by the journal's founders). A reflection of the more liberal atmosphere under M. Gorbachev, the editorial board was listed for the first time. It consisted of I. *Hel, V. *Barladianu, M. *Horyn, P. *Skochok, and V. *Chornovil (chief editor), all former political prisoners. For the most part issues published previously banned or censored literary works. Although the editors intended to publish monthly, no further issues have appeared. The journal was criticized severely in the Soviet press, and its editors were denounced as Ukrainian bourgeois nationalists and agents of Western imperialism.

B. Balan

Ukrains'kyi visnyk eksperymental'noi pedahohiky ta refleksolohii (Ukrainian Herald of Experimental Pedagogy and Reflexology). A scholarly pedagogical journal published in Kharkiv from 1925 to 1930, until 1927 as *Ukrains'kyi visnyk refleksolohii ta eksperymental'noi pedahohiky*. It espoused modern Western methodologies in pedagogy and devoted much attention to psychology and behavioral science. The journal was closed down and replaced by the Stalinist **Za markso-lenins'ku pedahohiku*.

Ukrains'kyi vistnyk (Ukrainian Herald). A daily newspaper published in Lviv from January to September 1921 in place of **Dilo*, which had been banned by the Polish authorities. It was edited by M. Strutynsky.

Ukrains'kyi zbirnyk. See Institute for the Study of the USSR.

Ukrains'kyi zemleporiadnyk (Ukrainian Land Cultivator). A monthly organ of the land cultivation section of the Ukrainian Bureau of the USSR Union of Agricultural and Forestry Workers, published in Kharkiv in 1925–9. Until 1927 it appeared in Russian as *Zemleustroitel' Ukrainy*. It published scientific and technical articles about land melioration, irrigation, and drainage, and other aspects of land use. *Ukrains'kyi zemleporiadnyk*, **Ukrains'kyi agronom*, and the quarterly *Ukrains'kyi lisovod* all succeeded *Zemel'nyk* (1924–5). In 1930 the first two journals were replaced by *Spetsialist sil's'koho hospodarstva Ukrainy*, which later became *Spetsialist sotsialistychnoho sil's'kohospodars'koho vyrobnytstva* (1931–2).

Ukránia (Ukraine). A popular monthly journal published in Hungarian in Budapest in 1916–17 (a total of 20 issues). Sponsored by the Hungarian government, it promoted the dismemberment of the Russian Empire by supporting the Ukrainian national movement there, and fostered Hungarian interest in the Ukrainian question by publishing articles on Ukrainian affairs and translations of Ukrainian literature. It did not, however, support the development of Ukrainian consciousness among Transcarpathia's Ukrainians. The editor was H. Strypsky.

Ukrmet. See Ukrainian Meteorological Service.

Ulaszyn, Henryk, b 19 January 1874 in Lykhachykh, Tarashcha county, Kiev gubernia, d 23 May 1956 in Łódź, Poland. Polish neogrammarian linguist and Slavist. He studied at Kiev (1895–7), Cracow (1897–1901), Vienna (1898–9), and Leipzig (1901–3; PH D, 1904) universities and then taught Polish at Kiev (1917–19), Lviv (1919–21), Poznań (1922–39, where he headed the Slavic Seminar and Slavic Society), and Łódź (1945–?) universities. He wrote over 1,000 works, including a textbook of Old Church Slavonic (1928); a historical study of Kievan contracts in 1798–1898 (1900); a study of the Polish criminal argot in Lviv (1902); a pamphlet on the origin of the ethnonym 'Ukrainian' (1947); and articles on the terms 'Ruthenian,' 'Little Russian,' and 'Ukrainian,' in *Dziennik Kijowski*. A bibliography of his works was published in *Rozprawy Komisji Językowej Łódzkiego Towarzystwa Naukowego* (2 [1955]).

Ulianivka [Uljanivka]. V-11. A city (1989 pop 11,000) on the Synytsia River and a raion center in Kirovohrad oblast. It was founded in the early 1880s and was first called Hrushky. It was renamed in 1924 and granted city status in 1974. Ulianivka is an agricultural center with a sugar refinery, juice factory, and dairy.

Ulianov, Petr [Uljanov], b 23 July 1899 in Patsyn, Smolensk gubernia, Russia, d 31 March 1964 in Kiev. Sculptor. After studying at the Kharkiv Art Institute (1919–27) and the Higher Art and Technology Institute in Leningrad (1927–31) he taught at the Kiev State Art Institute (1931–49) and Kiev Construction Institute (1936–64). His works include the monument to L. Hlibov in Chernihiv (1934), the bust *Red Army Soldier* (1934), and busts of Soviet political leaders, T. Shevchenko (1959), A. Mickiewicz, and M. Gorky.

Ulizko, Yakiv (Petrenko), b ?, d before 1686. Cossack officer. He was a military judge in I. Zolotareno's army in Belarus (1654–5) and colonel of Korsun regiment (1660–4). With Yu. Khmelnytsky he switched his alliance to the Poles (1660) and was later captured by Muscovite forces (1665). In 1674 he was a general judge under P. Doroshenko, but then he threw his support behind I. Samoilovych and became judge of Starodub regiment (1676–8). Ulizko's descendants became members of the Chernihiv and Poltava nobility; his son, Tymish, was flag-bearer for Starodub regiment in 1686–7.

Ulychians (*ulychi, uhlychi, uluchi*). An East Slavic tribe that lived in the 6th to 9th centuries in the Dnieper River lowlands from the Ros River to the Black Sea, south of the Polianians. They were on friendly terms with the Tivertsians but warred with the Polianians and Kievan Rus'. In 885 Prince Oleh led a campaign against them. In the 10th century the Ulychians were pushed westward by the Pechenegs, and they settled in Bessarabia on the Boh and the Dniester rivers, where they extended as far as the Danube River and the Black Sea coast. Their capital was *Peresichen. In the mid-10th century, during the rule of Prince Ihor, the Ulychians were conquered by the voivode Svineld and absorbed by the Kievan Rus' state, along with the Tivertsians. With other *tribes they eventually became the original *Ukrainians. The Ulychians are not mentioned in chronicles after 940. Some scholars believe that, under Polovtsian pressure, they moved northward in the

12th century and settled near the Sluch and the upper Boh rivers (see *Bolokhovians).

Ulynets, Oleksa [Ulynec'], b 22 March 1903 in Tyshiv, Bereg county, Transcarpathia, d 25 November 1978 in Chynadiieve, Mukachiv raion, Transcarpathia oblast. Folk composer. While working as a laborer in various European countries in 1918–45 and, later, as a mechanic in Chynadiieve, he composed over 1,000 *kolomyika*-like songs. Many of them are addressed to his homeland, Ukraine.

The Uman Art Gallery

Uman [Uman'] (aka Human). V-11. A city (1990 pop 91,000) on the Umanka River and a raion center in Cherkasy oblast. It was first mentioned in historical documents in 1616, when it was under Polish rule. In 1648 it was liberated from the Poles by I. Hanzha, a colonel of B. Khmelnytsky, and became the administrative center of Uman regiment. After being returned to Poland in 1667, the town was abandoned by many residents, who moved to Left-Bank Ukraine. Under the ownership of the Potocki family of Polish magnates (1726–1832) the town grew in economic and cultural importance. A Basilian monastery and school were established. The Uman region was the site of the haidamaka rebellions in 1734, 1750, and 1768, when the town was captured by Maksym Zalizniak and I. Gonta. After the partition of Poland in 1793, Uman was annexed by Russia, and in 1797 it became a county center of Kiev gubernia. At the end of the 19th century Uman was linked by railway to Kiev and Odessa, and its manufacturing industries began to develop rapidly. Its population grew from 10,100 in 1860 to 29,900 in 1900 and over 50,000 in 1914. Today the city has optical and farm-machinery plants, a cannery, a brewery, a vitamin factory, a sewing factory, and a footwear factory. Its highest educational institutions are the Pedagogical and Agricultural institutes. The main architectural monuments are the catcombs of the old fortress, the city hall (1780–2), a Roman Catholic church in the classical style (1826), and 19th-century trading stalls. Uman has a rich regional museum and is the home of the famous *Sofiivka Park.

Uman Agricultural Institute (Umanskyi silskohospodarskyi instytut im. O. Horkoho). An institution of higher education, under the USSR Ministry of Agriculture until 1992. It is based on the Chief Orchard School, the first

The Uman Agricultural Institute

school of its kind in the Russian Empire, established in Odessa in 1844 and transferred to the Sofiiivka Park in Uman in 1859. The school was reorganized several times before acquiring its present name in 1929. The institute has faculties of agronomy, orcharding, economics, and the upgrading of agricultural specialists and managers. It also maintains an experimental farm. Its enrollment in 1986–7 was 3,475, including over 2,000 correspondence students. It publishes a bilingual, Ukrainian-Russian, collection of scientific papers.

Uman Pedagogical Institute (Umanskyi pedahohichnyi instytut im. P. Tychyny). An institution of higher learning, under the jurisdiction of the Ministry of Education. Founded in 1930 as one of the *institutes of social education with a three-year course of instruction, in 1933 it was reorganized as a pedagogical institute. In 1967 it was named after P. Tychyna. It has three faculties, natural sciences, elementary education, and technical education. The student enrollment in 1986–7 was 2,600. The library has a collection of 200,000 volumes.

Uman regiment. An administrative territory and military formation in Right-Bank Ukraine established in 1648 at the outbreak of the Cossack-Polish War. The regimental center, Uman, was well fortified and withstood a number of sieges by the Poles, including a major attack in 1653. The regiment was split during the 1670s as a result of factional fighting between its colonel, M. Khanenko, and Hetman P. Doroshenko and was disbanded in 1686. The regiment was revived under Hetman I. Mazepa in 1704 and dissolved in 1712.

Uman Regional Studies Museum (Umanskyi kraieznavchyi muzei). A museum founded in 1918 in Uman under the direction of P. Kurinny. Large archeological and ethnographic collections, a library, a collection of early books, and a picture gallery were created, including artworks and artifacts confiscated from local nobles. From 1922 to the mid-1930s the museum was called the Socio-Historical Museum of Uman Okruha. Its large collection of autographs was transferred to Kiev in the mid-1930s. In 1971 the museum had over 20,000 exhibit items, including objects of the prehistoric Trypilian, Bilohrudivka, and Cherniakhiv cultures and of the Scythians, a collection of 17th-century tiles, and materials pertaining to the Cossack Uman regiment. A guide to the museum was published in 1967.

Umanets [Umanec']. A Cossack *starshyna* family line from Right-Bank Ukraine that came into prominence during the B. Khmelnytsky period, when they moved to the Left Bank. Pylyp Umanets ('Pylypcha') was a captain in Hlukhiv company (1653–68) and the colonel of Nizhen regiment (1667 and 1669–74). The descendants of his only son, Demian Umanets, archpriest of Hlukhiv, were *town Cossacks and captains in Hlukhiv (1726–67) and Yampil (1772–81) companies. Some of them became regimental commanders; Vasyl Umanets was the flag-bearer of Nizhen regiment (1734 and 1736–8). That lineage also produced O. *Umanets, a physician and writer, and some important landowners in Chernihiv gubernia during the 19th century, especially the provincial activist F. *Umanets.

Umanets, Fedir [Umanec'], b 5 March 1841 in Yasnivka, Hlukhiv county, Chernihiv gubernia, d 1908. Liberal historian and civic figure. A law graduate of Moscow University, he served as a member of the agency for peasant affairs in Hlukhiv (1875–80) and the head of Hlukhiv county's zemstvo (1887–95) and Chernihiv gubernia's zemstvo administration (from 1896). He supported the Ukrainian national movement and secured zemstvo jobs for its members (B. Hrinchenko, M. Kotsiubynsky, M. Vorony, V. Samiilenko, and others). An active member of the Chernihiv Gubernia Scholarly Archival Commission, from the 1860s on he published historical and political articles on Ukrainian-Polish relations and other subjects in Russian journals, and books on public education in Russia (1871), the decline of Poland (1872), the colonization of unsettled lands in the Russian Empire (1884), and Hetman I. Mazepa (1897). Using archival and published sources, he was the first writer in Russian and Ukrainian historiography to evaluate positively Mazepa as a man and a statesman. He also wrote a study on Prince K. Ostrozky (*Russkii arkhiv*, 1904).

Umanets, Oleksander [Umanec'], b 23 October 1808 in Symferopil, Tavriia gubernia, d 26 December 1877 in St Petersburg. Epidemiologist with a specialization in quarantine. A graduate of Moscow University (1830), he was director of the Odessa Quarantine Office (1840–8). In 1842–3 he traveled to Egypt with a government commission to investigate heat disinfection of the clothes of plague victims. His report (1845) was translated into German and French. Later he published his memoirs of the trip to the Middle East (1850) and a survey history of the Black Sea coastal region (1887).

Umanets, Vasyl [Umanec', Vasyl'], b 2 May 1916 in Rubchenky, Skvyra county, Kiev gubernia. Composer, conductor, pedagogue, and musicologist. He graduated from (1945) and completed postgraduate work at (1948) the Kiev State Conservatory and taught (1944–56) in Kiev and Dnipropetrovske. Since 1956 he has taught singing at various schools in Kiev. His main works include the choral-symphonic suite *Na verkhovyni* (In the Highland, 1962); orchestral and chamber music; pieces for piano, violin, and bandura; solo songs to texts by T. Shevchenko, M. Rylsky, D. Pavlychko, R. Bratun, and others; children's songs; and folk song settings. He has also written musicological studies on the choral compositions of M. Lysenko, M. Leontovych, and others.

Umansky, Morits [Umans'kyj], b 8 March 1907 in Zhytomyr, d 19 December 1948 in Kiev. Theatrical and cinema designer. He was a student at the Kiev School of Industrial Art (1923–6) and completed his studies at the Kiev Art Institute (1926–30, pupil of V. Tatlin and K. Yeleva). He made designs for the Kiev Ukrainian and Russian drama theaters (1930–3) and then for the Kiev Artistic Film Studio (particularly for O. Dovzhenko's *Shchors*, 1935–7). A biography, by V. Nelli, was published in Kiev in 1967.

Umansky, Oleksander [Umans'kyj], b 2 February 1900 in Kiev, d 1973. Civil engineer. He studied at the Kiev Polytechnical Institute under Ye. *Paton, and in the period 1925–30 he designed a number of bridges in Ukraine. He was a professor at the Kiev Civil-Engineering Institute and the AN URSR (now ANU) Institute of Construction Mechanics and the Military Air Force Academy in Moscow (from 1935). He wrote numerous textbooks and monographs on floating bridges (1931, 1939), building mechanics (1934), the deformation of thin-walled aviation design parts (1939), the strength of materials (1952), and the engineering mechanics of airplanes (1957).

Umantsev, Fedir [Umancev], b 11 January 1914 in Udachne, Bakhmut county, Katerynoslav gubernia. Art scholar. He graduated from Kiev University in 1941. He wrote books on the Ukrainian painted portrait (1970, with M. Anikina) and the Trinity Church above the gate of the Kievan Cave Monastery (1970), introductions to and commentaries on several books, and chapters for a general history of art (1960), a history of Ukrainian art (1966), and the AN URSR (now ANU) history of Ukrainian art (vols 2–4, 1967–70).

Unava River. A right-bank tributary of the Irpin River that flows for 87 km through Zhytomyr and Kiev oblasts and drains a basin area of 680 sq km. The river is used for industry, water supply, irrigation, and fishing. Its channel has a general width of 2–10 m, and there are granite outcrops in its basin. The city of Fastiv is situated on it.

Unbegaun, Boris, b 23 August 1898 in Moscow, d 4 March 1973 in New York City. Russian émigré Slavist of German origin; full member of the Ukrainian Academy of Arts and Sciences in the US. He studied at the universities of Ljubljana and Paris (D LITT, 1935) and served as a professor at Brussels (1936–53), Strasbourg (1937–53), Oxford (1953–65), Columbia (1938–9, 1959–60, 1965–71), and New York (1965–73) universities. He wrote numerous works on Russian language and literature, Serbo-Croatian, and Slavic etymology and onomastics. His contributions to Ukrainian studies can be found in his *La Langue russe au XVII^e siècle (1500–1550): La flexion des noms* (1935; repr 1978), and in his studies of the calque in the Slavic literary languages (1932); of the Church Slavonic and Hellenic names of towns founded in the 18th- and 19th-century Russian Empire, particularly in Ukraine (1936); of the origin of the name 'Ruthenians' (1949, 1950, 1953); of the Kaffa charters of 1502 (1950); of Ukrainian loanwords in 17th-century Russian (1960); and of Ukrainian surnames in the chapter 'Surnames of Ukrainian Origin' and elsewhere in his *Russian Surnames* (1972). His *Selected Papers on Russian and Slavonic Philology* appeared in 1969. In the journal *Revue des études slaves* he published annual surveys of publications in Ukrainian linguistics (1931–68).

Underground economy. Economic activity not sanctioned by the state and not subject to legislation and government control. Other terms used to describe the underground economy are the 'shadow' or 'alternative' economy and the 'black market.' The underground economy exists because of inadequacies in the official one, or because governments may define certain activities as illicit (eg, making, selling, and consuming *narcotics). The predominant role in modern economies has been played by the regular economy. Data for the early 1980s suggest that the underground economy generated the equivalent of 7.5 percent of the gross national product in Great Britain and of 10 percent of that in the United States. The size of the underground economy in the USSR and Ukraine has been difficult to establish because the underground economy has been so pervasive. In recent years, with increasing shortages, its size has grown. Rough estimates suggest that some 20 million people in the USSR were involved.

The means of production in the USSR were nationalized, and the state had a monopoly on most economic activity; much of the economic activity that was illegal would have been perfectly legal in a capitalist country. Unsanctioned economic activity, including production outside the state plan, was a punishable offense, and the death penalty was applied to major economic crimes.

The forms of exchange in the underground economy have been classified as gray, brown, and black markets. The gray market consists of money and barter transactions that are not officially recorded and are thus untaxed. They include renting apartments and houses, private tuition, and individual payment for services. The gray market is the most widespread. Sociological studies show that 83 percent of the Soviet population paid money for goods and services over and above the official state rate. In cities the gray market accounted for half of shoe repair, almost half of the repair of apartments, 40 percent of the repair of automobiles, a third of the repair of household appliances, and 40 percent of tailoring. The entire gray market of medical services was estimated as a 2.5- to 3-billion-ruble business. The USSR State Planning Committee estimated that the gray market turnover in the service sector was 14 to 16 billion rubles annually, or the equivalent of about 30 percent of the total value of paid services provided by the state.

The brown market is based on the unofficial redistribution of production. Because of chronic shortages in the USSR, demand has exceeded the supply of a commodity at its official price. Some commodities have vanished almost as soon as they came into the shops and have been sold illegally. The brown market has entailed the widespread corruption of employees in the distribution and retail sectors. In Ukraine in 1989–90, brown market prices for goods in short supply were 5 to 10 times higher than the official state price; in the early 1980s they were 1.5 to 2 times higher. The growth of the brown economy has resulted in a rapid increase in money supply, which in turn has fueled speculation.

The black market involves wide-scale speculation in illegally imported commodities, illegal goods (foreign currency, gold, and narcotics), prostitutes' services, privately distilled alcohol, goods stolen from state enterprises, and items produced from supplies pilfered from such enterprises.

Despite numerous state campaigns to stamp out the Soviet underground economy, it continued to flourish because of chronic shortages, and it has remained active since the collapse of Soviet rule. In recent years there have been many calls to legalize some of the activity that takes place in the underground economy. Privatization was suggested as a more rational solution to the economic problem but was resisted by the Soviet state, in part because it would entail higher prices, but also because state enterprises would then have to compete with private firms. The future of the underground economy in Ukraine and the other countries that made up the USSR will depend on the impact of the economic reforms introduced in 1992.

Underground water. Commonly known as groundwater, underground water is found in the soil pores and rock fissures beneath the land surface. It feeds wells and springs, maintains the dry-weather flow of streams, helps maintain the levels of lakes and ponds after overland runoff from rain or melting snow has ceased, and provides soil moisture during drought. Water from wells or springs is used for rural and urban domestic consumption, industrial processes, livestock watering, and crop irrigation. Groundwater is especially valued for its clarity, purity, cool temperature, and reliable, continuous supply, even in dry seasons and drought.

The presence, quantity, and quality of groundwater depend on a number of hydrogeological factors: climate (notably precipitation), morphology, and the nature of rocks and geologic structure. As those factors vary from place to place, they induce variations in hydrogeological conditions. In Ukraine the decline of precipitation and the rise in evaporation from the northwest to the southeast results in a corresponding decline in the quantity and quality of groundwater, especially in the strata nearest the surface. Despite the abundant precipitation in mountainous areas, steep slopes induce intensive runoff which hinders the formation of larger, water-bearing horizons called aquifers. In the steppe and forest-steppe, deep gullies and ravines tend to drain not only the surface but also groundwater, and thus lower the water table to far below the surface. Flat terrain and the shallow position of the impervious parent material are responsible for the poor drainage and marshy conditions of Polisia. Geological structure is responsible for the Dnieper-Donets, the Black Sea, and the Volhynian-Podilian artesian basins as well as for the poor supply of groundwater in the Donets Ridge and the Ukrainian Crystalline Shield.

In the Carpathian Mountains most of the precipitation runs off directly into the rivers, which are the main sources of water supply. Consequently there are few aquifers, or water-bearing strata. In Subcarpathia and in the Tysa Lowland fresh groundwater collects in the Quaternary alluvial deposits of the floodplains. Moreover, there are small artesian basins in the Tysa Lowland. Carbonated mineral waters come to the surface along the southwestern flank of the Carpathians (the Inner Carpathian Val-

ley). Saline and alkaline mineral waters occur in the Tertiary deposits of the Subcarpathian Depression.

In the Crimean Mountains karst phenomena and underground drainage are common. Groundwater collects in several northward-sloping strata. Water is most abundant in the porous limestones and conglomerates that overlie impervious Tavriian shales. The lightly mineralized groundwater comes to the surface at the base of the mountains, where it feeds the streams and serves as a water supply.

The Black Sea Depression forms a large artesian basin. Since a large part of its surface is dissected by gullies and ravines, there are no continuous groundwater horizons near the surface. Instead there are artesian waters, found at considerable depths, with varying chemical characteristics. Mineralized waters prevail, with concentrations below 3 g/L on the border with the Ukrainian Crystalline Shield but increasing to above 5 g/L along the coasts of the Black Sea and the Sea of Azov. Fresh groundwater occurs in the western and eastern margins. Artesian waters (mostly brackish or salty) occur in over a dozen horizons at depths close to 300 m in the north and 100 m in the south. Fresh artesian water is obtained mostly from the Neogene deposits. In general that water supply is inadequate. Exceptional in this respect is the southern Kuban Lowland, which possesses Quaternary deposits rich in fresh artesian water.

Groundwaters of the Volhynian-Podilian artesian basin are generally fresh or lightly mineralized. In the severely dissected Podilian Upland the water table is found far below the surface. Artesian waters occur in deposits of Paleozoic, Mesozoic, and Cenozoic eras, but the highest-yielding strata are of the late Cretaceous period; they yield flows of up to 100 L/sec or more. The Tertiary period strata contain artesian waters with high concentrations of hydrogen sulfide.

The groundwater of the Ukrainian Crystalline Shield is variable. As a result of the intense development of gullies and ravines, the water table is usually found 20 m or more below the surface. In the interfluvial groundwater is usually saline. Potable water originates from sources along the sides of deep gullies and riverbanks and in wells on the bottom of ravines. In larger river valleys Quaternary alluvial deposits contain good drinking water. Limited quantities of groundwater occur in Paleogene deposits, in weathered deposits covering depressions in the Precambrian rock, and in fissures associated with tectonic dislocations or faults. Fissure waters, however, are usually highly mineralized.

In the Donets Basin groundwater is not abundant and is usually saline (with below 5 g/L of dissolved salts). The most accessible groundwater is obtainable from wells on the bottom of ravines or from sources along river valleys. Water under hydrostatic pressure may be found at greater depths, and the highest-yielding Cretaceous and Carboniferous deposits are located at considerable depths. The maximum yield of groundwater for those strata is estimated at 30–60 L/sec; the demand for industry, farming, and municipal uses is several times greater.

The Dnieper-Donets artesian basin occupies the Dnieper Lowland, the eastern margin of the Dnieper Upland, the Chernihiv section of Polisia, and a portion of Polisia northwest of Kiev. As a result of gullying on the higher elevations, the water table in those areas is found deep be-

UNDERGROUND WATER

low the surface. Groundwaters are more commonly saline and are not abundant. The main sources of water supply for large cities, such as Kiev, Kharkiv, and, especially, Poltava, are the artesian waters obtainable from porous sandstones and marls of the Cretaceous, Jurassic, and Tertiary periods.

The southwestern perimeter of the Central Upland has a good supply of groundwater. Deep gullies and ravines, however, have reduced the water table to 25 or 30 m below the surface. Artesian water is available from several horizons in the Cretaceous, Carboniferous, and Devonian sedimentary rocks. More accessible groundwater is found in the Quaternary glacio-fluvial sands of larger river valleys.

As a result of poor drainage, groundwater in Polisia is closely related to surface water. Most of the water is mineralized with iron oxides or calcium oxides and, in peat bog areas, with hydrogen sulfide. In elevated areas good-quality water is obtainable from moraine sands. Artesian water is associated with Cretaceous and Jurassic deposits.

The increasing use of water by municipalities, industries, and agriculture has created a high demand for groundwater. In the mid-1980s, groundwater contributed

about 55 percent of the water consumed for various uses in the economy. About 80 percent of the water supply in the rural areas came from groundwater. Large-volume users, notably power generating stations and metallurgical plants, had to rely on surface water, for they could not obtain sufficient quantities of groundwater. Even very large cities had to develop systems of combined surface and groundwater sources. Groundwater supplies have been of good quality and adequate quantity only in the Dnieper Lowland, Polisia, and Western Ukraine. Elsewhere, notably in the Donets Basin and the Black Sea Lowland, the supplies were poor, and cities had to obtain additional surface water by means of long-distance transfers by canals and/or pipe. Meanwhile, groundwater supplies have shown signs of depletion where withdrawal rates have exceeded rates of recharge, even in areas with a good groundwater supply. Moreover, the top groundwater horizon has been subjected to pollution from fertilizers, herbicides and pesticides, chemical dumps, and, near Chernobyl, radionuclides. Consequently the wise management of groundwater has become complicated not only by the growing demand for water and the lack of correspondence between the location of good supplies and

heavy demand, but also by the contamination of some of the groundwater supplies by human activities.

Unemployment. A socioeconomic phenomenon wherein part of the population is not fully occupied in productive labor. The unemployed are those who want and are able to work but have lost their jobs and cannot find new ones. Unemployment was common in Ukraine before Soviet rule (it was common in Western Ukraine until 1939). Data on the total number of unemployed in this period are unavailable. Urban and especially rural unemployment and underemployment were mass phenomena. During the 1920s, under conditions of the *New Economic Policy, unemployment in Soviet Ukraine was significant, and labor exchanges and unemployment benefits were introduced by the state. According to the 1926 census 327,000 people were unemployed in Soviet Ukraine, and 475,000 others did not indicate an occupation. Official data did not register the large number of unemployed rural inhabitants because they indicated 'peasant' as their nominal occupation.

At the height of the First Five-Year Plan in late 1930, the Soviet regime announced that unemployment in the USSR had been eliminated. Labor exchanges were closed, assistance to the unemployed was abrogated, and everyone was obliged to work wherever he or she was assigned by the regime. From that time on, the Soviet regime continued maintaining that unemployment did not exist in the USSR and enacted laws punishing those who did not have work (eg, the law on 'parasitism'). In reality unemployment continued to be a problem, especially in the least industrialized regions of the USSR and Ukraine. A 1968 study of three towns in Rivne oblast, for example, found that 13 percent of the able-bodied population were unemployed. An analysis of the 1959 census showed that 21 million people were employed in Ukraine, whereas the average yearly number of blue-collar, white-collar, and agricultural workers was only 17 million. The difference of 4 million workers resulted primarily from underemployment, which affected 20 percent of all workers. It is true that a significant share of that number consisted of collective-farm workers, who had no retirement benefits and were forced to work to an advanced age. The 1979 census showed a similar discrepancy, of 1.5 million persons, or 6 percent. Just before the dissolution of the Union, the Soviet authorities admitted that the USSR had an unemployment problem. In 1990 it was revealed that some 2 million people were truly unemployed, and that another 8 to 10 million were underemployed.

Economic reforms designed to introduce market mechanisms have inevitably resulted in an increase in unemployment. The number of unemployed began to rise in

1989 with the introduction of self-financing enterprises and the cutback in the size of the white-collar force. According to specialists' estimates, market reforms will result in unemployment for 6 to 8 million people in what was until 1991 the USSR; some have given figures as high as 34 to 40 million. It has been estimated that 2 million people in Ukraine will be unemployed as a result of the closure of unprofitable plants. In 1990, draft legislation was prepared to establish labor exchanges and to provide unemployment benefits and job retraining.

União Agrícola Instrutiva. See Union for Agricultural Education.

Uniates (*uniaty*). The popular term for Eastern Christians recognizing the authority of the papacy. In Ukraine and Belarus the term came into common use after the Church Union of *Berestia (1596), when some Orthodox Ukrainians and Belarusians united with Rome by accepting Catholic dogmas but retained their Byzantine rite and canonical peculiarities. In Catholic and Uniate writings those who rejected the Union were frequently called 'Dis-uniates.' The term 'Uniates' took on a negative coloration in Orthodox polemical literature, Ukrainian folk literature (*dumas*), and some modern Ukrainian writings (above all in the poems of T. Shevchenko). In modern times Ukrainian Catholics have objected to the term both for ecclesiological reasons and because of pejorative connotations it has taken on in writings of the Union's opponents.

Unified Automated Gas Delivery System of the USSR (*Yedyna avtomatyzovana systema hazopostachannia USSR*). A system integrating the facilities that produce, transport, and store gas with the automated systems which control those facilities. It covered the European part of the USSR, western Siberia, Central Asia, Kazakhstan, and Transcaucasia. It was established to ensure regular supplies of gas to consumers and industry. The first part of the system was completed in 1975. Ukraine's gas network is integrated with the system.

Unified Electric Power System of the South (*Obiednana enerhetychna systema pivdnia*). A power network consisting of power generating stations, including nuclear plants, and distribution lines in Ukraine and Moldavia. It was established in 1940. Its central control was in Kiev, and it was part of the *Unified Electric Power System of the USSR. The southern system is divided into nine regional electric power networks. One of them, the Lviv system, is integrated into the Mir international system serving Eastern Europe.

Unified Electric Power System of the USSR (*Yedyna enerhetychna systema SRSR*). A system integrating the regional electric power systems of the former USSR. It began to take shape in 1956, when the Unified Electric Power System of the European Part of the USSR was set up. Eventually the power networks of Kazakhstan and Siberia were connected with the latter. Some 1,000 power stations were part of the unified network, which generated and distributed almost 80 percent of the electricity produced in the USSR. The system was also connected to the former

COMECON countries through the Mir international electric power system. Its central control, known as the Central Distributing Administration, was in Moscow. The Unified Electric Power System of the Ukrainian SSR was integrated into the USSR network.

Unified labor school (*yedyna trudova shkola*). A system of public education established in the Ukrainian SSR in 1920. It existed as an independent system (with some changes) also known as the (H.) *Hrynko-(Y.) *Riappo system until 1932-3. The seven-year unified labor school was divided into two stages: grades one to four for children aged 8 to 12, also called elementary school; and grades five to seven for children aged 12 to 15, sometimes referred to as *incomplete secondary education. The system, developed by the Ukrainian Commissariat of Education, was at variance with the one in the RSFSR. The difference between the two systems was that the Ukrainian one stressed society's needs. The unified labor school tried to satisfy the specific demands of Ukraine, such as the dire shortage of skilled workers and specialists, and therefore introduced a polytechnical and vocational component at an early age. The emphasis on social education (understood as the active recruitment of children, the offer of protection to them in the school, and socialization was motivated by the fact that as a result of war, revolution, and famine, almost one million children had been left homeless or in single-parent families. In 1930 the Ukrainian SSR and the RSFSR commissars of education signed an agreement which paved the way for the creation of a single system of public education throughout the USSR; it was implemented in 1934. Uniiia (Union; Hungarian: Unio). A publishing company in Transcarpathia, based in Uzhhorod, founded in 1902 in place of the *Society of St Basil the Great. Uniiia was also active in cultural-educational activities. It published the periodicals *Nauka* (1897-1914, 1918-22), *Slovo Bozhe* (The Word of God), and the Hungarian-language *Görök-katholikus Szemle* as well as popular books. Uniiia was active into the interwar period.

Union, church. See Berestia, Church Union of.

Unión de Graduados Ucranios de la República Argentina. See Society of Argentinian-Ukrainian Graduates.

Union for Agricultural Education (Khliborobskosvitnyi soiuz; Portuguese: União Agrícola Instrutiva). A community organization founded in 1922 as the Ukrainian Union at a congress of Ukrainians in Brazil in Dorizon. The group was organized by P. Karmansky as a central institution for cultural and educational activity among Brazil's Ukrainians. But the liberally minded union failed to attract the support of the Basilian clergy, who established a rival cultural-educational body, the Ukraina society, which gained the support of a majority of Brazil's Ukrai-

nians. Based initially in Porto União, Paraná, the union published *Ukrains'kyi khliborob* **Khliborob* from 1924, briefly operated a school (1925-9), and organized several co-operatives. It moved its headquarters to Curitiba in 1934 and changed its name to the present one in 1938 in an unsuccessful attempt to stave off its suppression (1940-7) during the Vargas regime's 'nationalization of culture' campaign. The group has been ideologically and politically identified with the Melnyk faction of the OUN since resuming its activities in 1947. The union's women's affiliate, the *Organization of Ukrainian Women in Brazil, maintains its own program and functions largely autonomously.

A youth section, Centro Littero Esportivo Mocidade, was established in 1946. The renowned folk dance ensemble Barvinok was set up with union support in 1930. The union has maintained a students' residence in Curitiba and a press. Its branches are located throughout Paraná. It also has a twin organization, the Ukrainian-Brazilian Club (Clube Ucraino-Brasileiro), which develops activities in tandem with the union. It has a library, a museum consisting largely of folk art, and a country resort in Curitiba. In 1985 it became a founding member of the *Ukrainian-Brazilian Central Representation and offered its premises as a temporary headquarters.

Union for the Liberation of Ukraine (Soiuz vyzvolennia Ukraïny, or svu). An organization of Ukrainian émigrés from the Russian Empire established in Austria-Hungary and Germany during the First World War as an organization representing Ukrainians under Russian domination. Its members were mostly socialists from central Ukraine who had either fled or been deported to Austrian territory. They sought to use the war, in which Austria-Hungary and Germany were pitted against the Russian Empire in the east, as a means of securing Ukrainian independence. Ultimately they hoped to establish a constitutional monarchy with a democratic structure and a unicameral legislature in Ukraine.

The svu's presidium, initially headed by D. *Dontsov and Mykola *Zalizniak, consisted of V. *Doroshenko, M. *Melenevsky, O. *Skoropys-Yoltukhovskyy, and A. *Zhuk. It was assisted by various Galician and Bukovynian activists, including I. Krypiakievych, B. Lepky, M. Lozynsky, S. Rudnytsky, V. Simovych, S. and R. Smal-Stotsky, and M.

Vozniak. The group was initially centered in Lviv, but moved to Vienna in August 1914. From its inception the SVU worked with the *Supreme Ukrainian Council (after May 1915, the *General Ukrainian Council) in Vienna, in which it was represented by Doroshenko, Skoropys-Yoltukhovskyy, and Melenevskyy.

Typesetters of the paper *Rozvaha* at the Union for the Liberation of Ukraine's press in the Freistadt POW camp. From left: Ovchynnyk, Dekhtiarenko, Kavun

The SVU undertook a wide-ranging campaign of distributing information and making representations to the Central Powers and neutral European nations. Its representatives were in Germany (Skoropys-Yoltukhovskyy), Turkey (Melenevskyy), Bulgaria and Rumania (L. Hankevych), Italy (O. Semeniv), Sweden and Norway (O. Nazaruk), and Switzerland (P. Chykalenko). It published the journal *Vistnyk Soiuzu vyzvolennia Ukrainy* (edited by Doroshenko, Vozniak, and Zhuk) and the weekly *Ukrainische Nachrichten* in Vienna and *La Revue ukrainienne* in Lausanne. It also issued about 50 books and 30 brochures about Ukraine in German, French, English, Italian, Turkish, Swedish, Rumanian, Croatian, Czech, and Bulgarian. Among the more important monographs it issued were Doroshenko's *Ukrainstvo v Rosii* (The Ukrainian Movement in Russia) and *Pivtorasta lit ukrains'koi politychnoi dumky* (150 Years of Ukrainian Political Thought), V. Hnatiuk's *Natsional'ne vidrozhennia avstro-uhors'kykh ukrainsiv* (The National Revival of Austro-Hungarian Ukrainians), Krypiakkevych's *Ukrains'ke viis'ko* (The Ukrainian Military), Lozynskyy's *Halychyna v zhytti Ukrainy* (Galicia in the Life of Ukraine), Rudnytsky's *Ukraina, Land und Volk*, M. Hrushevskyy's *Geschichte der Ukraine*, and V. Temnytsky's *Ukrains'ki sichovi stril'tsi* (The Ukrainian Sich Riflemen).

With the support of the Ukrainian community of Galicia and Bukovyna and the approval of the Austro-Hungarian and German military authorities the SVU provided medical, religious, and cultural services for Ukrainian prisoners of war of the Russian army held in camps in Austria (in Freistadt), Hungary (Duna-Serdagel), and Germany (Rastatt, Salzwedel, and Wetzlar). As a result of its efforts about 50,000 POWs in Germany and 30,000 in Austria were provided with hospitals, schools, libraries, reading rooms, choirs, orchestras, theaters, and courses in political economics, co-operative management, Ukrainian history and literature, and German language. Various newspapers were established, including *Rozsvit* (printed

in Rastatt), *Vil'ne slovo* (Salzwedel), *Hromads'ka dumka* (Wetzlar), *Rozvaha* (Freistadt), and *Nash holos* (Josefstadt). A number of educational brochures were also published.

In 1916 the SVU set up an office in Lviv, which established a private Ukrainian school system in those regions of Volhynia that had been occupied by Austria-Hungary. In the spring of 1917 the SVU organized a group of former Ukrainian POWs to set up about 100 schools (for about 5,500 pupils) and established the newspaper *Ridne slovo* (Biala Podlaska) in Podlachia, a region controlled by the German army at that time.

With the outbreak of the February Revolution in 1917, the SVU declared that its mandate extended beyond the supervision of POWs and the defense of Ukrainian territories under Austrian-Hungarian rule from Polish designs. As a result of SVU efforts two Ukrainian army divisions, the *Bluecoats (under the German army, commanded by V. Zelinsky) and the *Graycoats (under the Austro-Hungarians), were formed. They were later incorporated into the UNR Army.

The SVU was initially criticized by other central Ukrainians for its collaboration with the Central Powers, but its activities gradually earned acceptance, particularly as a result of its publishing. The supporters of the Entente and various Russian émigrés (including V. Lenin) were hostile to it. The Ukrainian Social Democratic journal *Borot'ba*, edited by L. *Yurkevych in Geneva, was also critical. The SVU was formally dissolved on 1 May 1918.

Union for the Liberation of Ukraine (Spilka vyzvolennia Ukrainy, or SVU). A fictitious political organization invented by the GPU for the purpose of staging a show trial to intimidate the Ukrainian intelligentsia and put an end to Ukrainization. The trial of 45 non-Communist Ukrainian intellectuals was held in the Kharkiv Opera House from 9 March to 19 April 1930. Most of the defendants were associated with the VUAN: 2 of them (S. *Yefremov and M. *Slabchenko) were academicians, and 21 (Y. *Hermaiz, O. *Cherniakhivskyy, V. *Hantsov, H. *Ivanytsia, V. *Doha, K. *Shylo, H. *Holoskevych, H. *Kholodny, M. Kryvnyiuk, V. *Strashkevych, V. *Sharko, V. *Durdukivskyy, V. *Dubrovskyy, K. *Turkalo, A. *Barbar, V. Udovenko, V. *Pidhaietsky, M. *Kudrytsky, V. *Otamansky, T. *Slabchenko, and A. *Nikovskyy) were research associates. Many lectured at various institutes. The second-largest group consisted of educators of secondary and higher schools: Yu. Trezvynskyy, O. *Hrebenetsky, N. Tokarevska, A. Zalesky, P. *Yefremov, L. Bidnova, V.

*Shchepotiev, M. Lahuta, Y. Karpovych, and K. Panchenko-Chalenko. Three defendants (M. *Pavlushkov, B. *Matushevsky, and M. Bily) were university students who were accused of organizing a youth branch of the SVU, the Association of Ukrainian Youth (SUM). Five were active in the co-operative movement: V. Sharko, A. *Bolozyvych, M. Botvynovsky, P. *Blyzniuk, and Z. Morgulis. The brothers V. and M. *Chekhivsky were prominent leaders of the Ukrainian Autocephalous Orthodox church (UAOC). Two defendants were writers (L. *Starytska-Cherniakhivska and M. *Ivchenko), and one was a lawyer (V. Tovkach). Some of the accused had been active supporters of the UNR and had occupied high government posts in the revolutionary period. Besides the 45 accused who were put on trial, thousands of Ukrainians were arrested for 'belonging' to the SVU or SUM.

According to the prosecution the conspirators began to organize the SVU in 1926 on orders from the émigré L. *Chykalenko. Their purpose was to overthrow the Soviet regime and restore capitalism in Ukraine in 1930 or 1931 through an armed uprising of the kulaks and other capitalist elements. The rebellion was to be accompanied by an offensive by Poland and other capitalist powers. The SVU, it was alleged, had first hoped to restore the UNR and then opted for a fascist dictatorship headed by Yefremov. The police claimed to have uncovered 15 five-member cells in the VUAN, the UAOC hierarchy, the management of the rural co-operatives, and the school system, and among former 'bandits.' All the defendants were convicted, but they were given relatively lenient sentences ranging from 3 to 10 years' imprisonment. Ten were given conditional sentences and released, and seven were exiled from Ukraine for three years. In the next few years almost all of the defendants were rearrested, and perished in prison or a concentration camp.

Although the existence of the SVU and SUM as depicted at the trial has been unquestioned by Soviet historians and some opponents of the Soviet regime, most objective researchers of the period have recognized that the two organizations were contrived by the authorities for a political purpose. The SVU trial was one of the first show trials in the USSR to be aimed against the 'bourgeois nationalist intellectuals.' The specific targets of the SVU trial were the VUAN, the UAOC, and the Ukrainian co-operative movement – the three most important Ukrainian institutions that were beyond the Party's control. By linking concern for the Ukrainian language and culture with subversion, the trial established an association between national cultural assertion and treason, which would be used in the next decade to justify mass repressions against both non-Communist and Communist Ukrainian intellectuals.

On 11 August 1989 the Supreme Court of the Ukrainian SSR admitted that the charges against the 45 defendants at the SVU trial were groundless, and annulled their sentences.

Union Nationale Ukrainienne en France. See Ukrainian National Alliance in France.

Union of Agrarians-Statists. See Ukrainian Union of Agrarians-Statists.

Union of Architects of Ukraine (Spilka arkhitektoriv Ukrainy, or SAU). A professional organization of architects, architectural conservators, and other specialists connected with architecture. It was created in 1933 by the Party in place of the Alliance of Contemporary Architects of Ukraine (OSAU), which had been founded in Kiev in 1928 and dissolved along with other Ukrainian organizations in April 1932. The union was a member of the Union of Architects of the USSR. Its highest governing body was the republican congress, held in 1937 and every five years after 1955. The congress elected the executive, and the executive selected the presidium. There were 28 oblast and city branches of the SAU. In 1983 their combined membership was over 2,600. The SAU has various sections, such as bridge construction, industrial architecture, architectural education, and theory. It has published the journals *Arkhitektura Radians'koï Ukraïny* (1938–41), *Arkhitektura i budivnytstvo* (1953–7), and, with the State Construction Committee, **Stroitel'stvo i arkhitektura* (est 1957). Its presidents have been H. Holovko (1937–75) and I. Sedak (elected in 1975). In the late 1980s the SAU freed itself of Party control. In 1992 it had 3,500 members, and its president was I. Shpara.

Union of Artists of Ukraine (Spilka khudozhnykiv Ukrainy). The only official organization of artists and art scholars in Soviet Ukraine since the Party banned all other artistic organizations in 1932 and set up an organizational committee. In 1938 the union was officially founded at its first congress. Subsequent congresses have been held every five or six years since 1956. The union has been divided into sections (painting, sculpture, poster design, graphic art, large-scale decorative art, applied art, artistic design, stage design) and commissions (art criticism and art scholarship). The Art Fund of the Ukrainian SSR has been administered by it. The union has been divided into 20 oblast organizations. In 1983 their combined membership was 2,200. The union's official organs have been **Maliarstvo i skul'ptura* and **Obrazotvorche mystetstvo*. Its presidents have been I. Boichenko (1938–41), O. Pashchenko (1941–4), V. Kasiian (1944–9), O. Shovkunenko (1949–51), M. Khmelko (1951–5), M. Derehus (1955–62), V. Borodai (1968–82), O. Skoblykov (1982–3), and O. Lopukhov (elected 1983). In the late 1980s the union freed itself of Party control, and it no longer propagates *socialist realism as the only artistic approach. Many of Ukraine's talented artists have never been members of the union. In 1992 the union had 3,600 members, and its president was V. Chepelyk.

Union of Carpathian Youth (Soiuz molodi Karpat). A youth organization founded in 1945 for Ukrainians of the Prešov region of Slovakia. In 1949 it had 20,000 enrolled members, with 225 branches. The leading members of the union were mainly Russophiles. The first head was I. Dzurenda; he was followed by A. Yedynak and A. Sushko. The union published the monthly *Kolokol' chik-dzvinochok* in Russian and Ukrainian and a supplement

to the newspaper *Priashkevshchina* called *Slovo molodezhy*. It ceased operations in 1950, and attempts to revive it in 1968 were unsuccessful.

Union of Cinematographers of Ukraine (Spilka kinematohrafov Ukrainy). An organization which unites film directors, screenwriters, film actors, cameramen, stage designers, sound producers, and technical staff, established in 1958 and subordinated until 1991 to the USSR Union of Cinematographers in Moscow. In 1988 it had over 7,000 members. It has commissions and sections of film dramaturgy, art cinematography, animation, documentary film, science film, theory and history of cinema, television, criticism, and actor training and publishes the journal *Novyny kinoekranu*. In 1992 the union had only 828 members, and its president was M. Bielikov.

Union of Composers of Ukraine (Spilka kompozytoriv Ukrainy). An administrative and policy-making body of composers and musicologists established in 1932 to replace Proletmuz and the All-Ukrainian Society of Revolutionary Musicians. The association, called the Union of Soviet Composers in 1932–57, sought to 'educate' its members politically and ideologically and to support them in their creative work. It has been headed by such musical luminaries as B. *Liatoshynsky (1939–41), L. *Revutsky (1944–8), H. *Verovka (1948–52), P. *Kozytsky (1952–6), K. *Dankevych (1956–67), H. *Maiboroda (1967–8), A. *Shtoharenko (1968–89), and Ye. *Stankovych (1989–91). The union administered the Ukrainian branch of the USSR Musical Foundation, publishes (since 1970) the journal *Muzyka*, and supported the work of the Music Society of the Ukrainian SSR. In 1992 it had 292 members, and its president was M. *Stepanenko.

Union of Constructively Creative Forces of Ukraine (Soiuz konstruktivno-tvorchykh syl Ukrainy). An émigré Ukrainian organization established in Munich in 1948. Drawing upon Ukrainians who were not affiliated with any existing political party for its membership, the union sought to develop a high degree of economic independence for Ukrainian émigrés. Its president was T. Leontii, and its members included H. Prokopchuk, V. Horbachevsky, P. Kashynsky, and V. Odynsky. The union supported the Ukrainian National Council. It ceased to exist in the 1950s.

Union of Contemporary Artists of Ukraine (Obiednannia suchasnykh myttsiv Ukrainy, or OSMU). An association of Soviet Ukrainian artists, established in Kharkiv in 1927. Its members – L. Kramarenko, V. Palmov, A. Petrytsky, I. Pleshchynsky, Yu. Sadylenko, M. Sharonov, D. Shavykin, I. Shtilman, A. Taran, O. Zhdanko, and others – followed the newer schools of European modernist art, particularly those in France and the postfuturists. OSMU was disbanded in 1932 under pressure from the Stalinist regime.

Union of Hetmanites-Statists. See United Hetman Organization.

Union of Industry, Trade, Finance, and Agriculture (Soiuz promyshlennosti, torgovli, finansov i sel'skogo khoziaistva, or Protofis). An organization of Rus-

sian and Russified political activists in Ukraine, founded in the spring of 1918. The leaders of the organization included the banker and factory owner N. von Ditmar, the sugar-beet magnate A. Bobrinsky, and large landowners, such as A. Golitsyn and V. Kochubei. Protofis represented the conservative business elite of Ukraine and strongly supported the *Hetman government. Just prior to the German-sponsored coup d'état by Gen P. Skoropadsky it presented a series of demands to the Central Rada government, including closer economic ties between Russia and Ukraine, a greater say for representatives of industry and trade in government, and a reaffirmation of private ownership and an end to socialized industry and agriculture. Protofis also warned against the introduction of Ukrainian as the official language of the UNR; its claim was that such a measure would hurt economic growth and alienate the intellectuals. The organization held its first conference in Kiev on 15–18 May 1918. The conference attracted almost 1,000 delegates, including F. Lyzohub and S. Gutnik, both members of Skoropadsky's government. After the fall of the Hetman government the union suspended its activities, although it resumed them briefly during Gen A. Denikin's occupation of Kiev.

Union of Journalists of the Ukrainian SSR (Spilka zhurnalistiv URSR). The CPU-controlled organization of journalists, editors, and others working for newspapers, journals, publishing houses, news agencies, radio, and television in Ukraine, founded in 1959 as the Ukrainian branch of the USSR Union of Journalists. It is a voluntary organization; its goals were the improvement of journalism in Ukraine through the sponsorship of courses and conferences, the exchange of information among its members, and the fostering of relations with journalists in the rest of the USSR and the Soviet-bloc countries. Until recently an important agitation and propaganda tool of the Party, the union was organized into a republican administration, oblast sections, and over 540 primary organizations based at individual newspapers, journals, and television and radio stations. In 1987 it had over 11,200 members. Since 1964 it has awarded an annual prize for the best journalism, and since 1975 it has published a professional and methodological monthly journal, *Zhurnalist Ukrainy*. The presidents have been I. Syromolotny, I. Pedaniuk, Yu. Lazebnyk, Ya. Pashko, B. Sirobaba, and M. Shybyk. The union's seventh congress in October 1990 proclaimed the union's professional and creative independence, reconstituted it as a new organization free of Party and government control, and renamed it the Union of Journalists of Ukraine. I. Spodarenko was elected president.

Union of Landowners. See All-Ukrainian Union of Landowners.

Union of Lands of United Ukraine (Soiuz zemel sobornoï Ukrainy). A liberal émigré political party established in Aschaffenburg, Germany, in 1948. The group was renamed the Peasant party in 1950. V. *Dolenko was its main organizer and leader until his death in 1971. Then Yu. Semenko headed the group. Other figures associated with the party included V. Dubiv, V. Dubrovsky, and D. Melnyk. The party's head office was moved to New York; its journal, *Ukrains'kyi selianyn*, was published in Munich.

Union of Peasant Associations (Soiuz selianskykh spilok). An organization of Ukrainian peasants, established in Galicia in 1925. The Polish authorities suppressed its branches in Volhynia. The union's head office in Lviv co-ordinated the work of county and local associations. It organized life and livestock insurance, spear-headed strikes, and negotiated collective agreements for hired workers, especially for teamsters and lumbermen. The union co-operated with the Ukrainian Socialist Radical party and published a supplement, *Selians'ka spilka*, in the party's organ *Hromads'kyi holos*. The president of the union was M. Stakhiv, and the secretary was O. Pavliv-Bilozersky. The organization was dissolved in 1939, when Soviet troops occupied Western Ukraine.

Union of Red Cross and Red Crescent Societies of the USSR (Soiuz obshchestv Krasnogo kresta i Krasnogo polumesiatsa SSSR). An all-Union voluntary public organization, formed in 1923, that embraced the 11 republican Red Cross and 4 Red Crescent societies of the USSR. Its purpose was to co-ordinate their operations within and beyond the USSR, to address problems common to all the societies, and to defend the interests of the republican societies before the USSR government. The charter of the union was approved by the Council of People's Commissars on 1 September 1925. In 1934 the union was accepted into the League of Red Cross Societies. It published the journal *Sovetskii krasnyi krest* from 1951. Membership in the societies numbered several million volunteer nurses, health inspectors, and medical workers, who assisted government medical bodies to control infectious diseases, provide health care, improve working and living conditions, and furnish first aid in emergencies.

Members of the delegation of the Union of Ruthenians and Ukrainians of Croatia during their visit to the Presidium of the Supreme Soviet in Kiev in 1988. From left: the Presidium official Leonid Horovy, delegates Vasyl Sikorsky and Yuliiana Furmints, the Presidium secretary Mykola Khomenko, and the union's president Teodor Frytsky

Union of Ruthenians and Ukrainians of Croatia (Soiuz rusinokh i ukrainsokh Horvatskei, or Soiuz rusyniv i ukrainsiv Khorvatii). An umbrella organization representing four local cultural and educational societies in Croatia. It was established in 1968 in Vukovar, where it maintained its head office until Vukovar was destroyed by Serbian forces in 1992. Its purpose was to cultivate the Ukrainian language and Ukrainian folklore, arts, and historical research. It promoted theater and art groups, con-

certs, exhibits of folk costumes, and dance ensembles. The union published the journal *Nova dumka* (1971–91) and maintained a special library, an ethnographic collection, an artists' colony, a literary section, and a research commission on the history of Ruthenians and Ukrainians in Croatia. It published a number of books, including F. Labosh's *Istoriia rusinokh Bachkei, Srimu i Slavonii 1745–1918* (History of the Ruthenians of Bačka, Srem, and Slavonia, 1745–1918, 1979) and *Dumky z Dunaiu: Litopys Soiuzu rusyniv i ukrainsiv Khorvatii ta redaktsii 'Novoi dumky'* (Thoughts from the Danube: A Chronicle of the Union of Ruthenians and Ukrainians of Croatia and the Editorial Office of *Nova dumka*, 1989).

Union of Salvation (Soiuz spaseniia). One of the first clandestine political organizations in the Russian Empire and a forerunner of the *Decembrist movement. It was founded in St Petersburg in February 1816 by a group of guard officers, including A. and N. Muravev, Prince S. Trubetskoi, and P. Pestel. Some of its 25 to 30 members were Ukrainian by descent or had close ties with Ukraine: M. and S. Muravev-Apostol, V. Volkhovskiy, A. Poltoratsky, and M. Novikov. Its goal was to abolish serfdom and absolutism and to establish a constitutional monarchy. In the spring of 1817 the union was dissolved and replaced by the *Union of Welfare.

Union of Song and Music Societies (Soiuz spivatskykh i muzychnykh tovarystv). An organization for the promotion of music in Western Ukraine, founded in Lviv in 1903 by V. Shukhevych and A. *Vakhnianyn at the first convention of the Boian choruses. The union's main initiative was to open a school, which was reorganized into the Lysenko Higher Institute of Music (1912). In 1907 the association was renamed the *Lysenko Music Society.

Union of Soviet Socialist Republics (Soiuz Radianskykh Sotsialistichnykh Respublik, or USSR). A 20th-century federal state made up of 15 constituent socialist republics on the former territory of the Russian Empire. It was the largest state in the world, with a territory of 22,276,000 sq km (land area only), and spanned two continents, with 23 percent of its landmass in Europe and the remaining 77 percent in Asia. With a population exceeding 288 million (1 January 1990), it was, after China and India, the third most populous country in the world. During its existence from 1944 to 1991 the USSR incorporated 97 percent of the Ukrainian contiguous ethnographic territory and was the home of approx 93 percent of the Ukrainians in the world.

History. The assumption of power by Bolshevik forces in Russia in 1917 precipitated a civil war between Communist and anti-Communist forces (also known as the Whites), which lasted for three years, until the latter were defeated. At the same time the Bolsheviks waged war against non-Russian nations that had formed separate states after the collapse of the empire in 1917; one of the major conflicts was the *Ukrainian-Soviet War. By 1920 the Bolsheviks had assumed control of virtually all the lands that formerly had constituted *Russia and the Russian Empire. The Baltic nations, Finland, and Poland were the only former imperial possessions to escape inclusion in the Soviet Union, and they emerged as independent

states in their own right. Ukrainian and Belarusian lands were divided between Poland and the *RSFSR in 1921 by the Peace Treaty of *Riga, which concluded the Polish-Soviet War. After the Bolshevik victory the formerly independent national republics were converted into Soviet republics under the control of the RSFSR, and on 30 December 1922 they were formally linked together in a federative union, the USSR.

In their drive to power the Bolsheviks instituted a policy of *War Communism and practiced extensive terror (conducted by the secret police, the Cheka) to subdue the population. In order to consolidate its power and reconstruct the war-torn economy the Soviet government replaced those practices in 1921 with the concessions of the *New Economic Policy (NEP). Several years of relative peace followed, until the assumption of power by J. *Stalin, following the death of V. *Lenin in 1924, and his elimination of both the *Left and the *Right opposition (L. Trotsky, G. Zinoviev, L. Kamenev, N. Bukharin, A. Rykov). In 1928–9 the NEP came to an end as the first *five-year plan was instituted in an effort to industrialize the Union and collectivize agriculture. The plan was accompanied in the late 1920s and especially in the mid-1930s by the growth of totalitarianism, the application of mass *terror by the secret police (the GPU, later the NKVD) against all groups of the population, the establishment of an enormous network of forced labor camps, the destruction of the peasantry as a class by means of forced collectivization and the liquidation of the so-called kulaks, and the destruction of non-Russian national intelligentsias. That first wave of Stalinist social policy, marked by collectivization, the enforcement of prohibitively high food procurements in the grain-producing regions, and open hostility toward the peasantry (particularly in Ukraine), culminated in the massive man-made *famine of 1932–3, which claimed millions of lives. At the same time the nominally federative nature of the Soviet Union was undermined, proponents of national communism arrested or eliminated, and an increasingly centralized state structure established. Stalinist repressions continued throughout the 1930s and resulted in the devastation of the national cultures of most non-Russian peoples in the USSR. Stalin also launched a wholesale attack on the Union's cultural, intellectual, military, and political elite that culminated in 1937–8 with the *Yezhov terror.

In the earliest years of its existence the USSR, as a state ostensibly based on the ideology of communism, was regarded as a pariah among world powers, and remained largely isolated. Nevertheless it maintained a loyal following among Communists and Communist sympathizers beyond its borders and played a dominant role in the affairs of the *Communist International (Comintern). In the 1930s the USSR began to seek rapprochement with Western democracies, particularly with the rise of anti-communist powers such as Nazi Germany, fascist Italy, and imperial Japan. It entered the League of Nations (1934), signed several nonaggression pacts (with Poland and France in 1932, Italy in 1934) and mutual assistance treaties (with France and Czechoslovakia in 1935), and pursued a policy of establishing united fronts. Unwilling to risk its own security, the USSR chose not to participate openly in the civil wars of China and Spain. It even came to terms with Nazi Germany by signing the *Molotov-Ribbentrop Pact in 1939, which established a nonagres-

sion agreement between them and delineated their respective spheres of influence in Eastern Europe. The accord paved the way for the partitioning of Poland later that year. The USSR occupied the former western borderlands of the Russian Empire (Estonia, Latvia, Lithuania, a region of Finland, western Belarus, western Volhynia, western Polisia, and Bessarabia) and annexed Galicia and northern Bukovyna, lands that had never been part of the Russian Empire.

The German advance into Poland triggered the Second World War. On the eve of the conflict the USSR was militarily and politically weakened by the purges of 1937–8. Its loss of strength had already become apparent during a war with Finland, which country, despite territorial losses, had managed to defend its independence. During the first months of the German invasion the Wehrmacht defeated and captured a large portion of the Soviet army and advanced to the outskirts of Moscow and Leningrad. The German attack, launched on 22 June 1941, initiated a dogged war for the very existence of the USSR. Stalin and the Communist party of the USSR called it the Great Patriotic War and strove to harness Russian national sentiments (rather than a belief in communist ideals) to sustain their military efforts. Russian military tradition was rejuvenated, the Russian Orthodox church was used to promote patriotism, and the Comintern was abolished (1943). At the same time Soviet propaganda exploited the anti-German feelings of the non-Russian nations that were occupied and persecuted by the Nazis. Together with the Western Allies (the United States, Britain, France, and others) and with considerable material and technical assistance from the United States, the USSR came out of the war victorious. Its victory was also helped by the destructive and racist Nazi German policy toward Eastern Europeans, which gave rise to resistance on the part of both the non-Russian nations, particularly the Ukrainians (see *Organization of Ukrainian Nationalists, *Ukrainian Insurgent Army, and *Soviet partisans in Ukraine), and the Russians themselves, on the territory occupied by the Germans.

After the defeat of the Nazis the Soviets firmly re-established their authority in the parts of the USSR that had been overrun. The USSR increased its territory in Eastern Europe and the Far East through a series of agreements attained by means of a succession of tripartite meetings, notably the *Yalta Conference. Included in the gains were Western Ukrainian lands previously ruled by Poland, Czechoslovakia, and Rumania. A bloc of communist satellite countries was formed in Eastern and Central Europe, with which the USSR established treaties of friendship and mutual assistance (1948), economic integration (the Council for Mutual Economic Assistance, or Comecon, in 1949), and unified military command (the Warsaw Pact, 1955). Only Yugoslavia (1948) and Albania (1960) managed to slip out of Soviet control. There was considerable resistance to the extension of Soviet territory. The Ukrainians (in the western borderland regions) and the Balts continued guerrilla actions against the new regime until the mid-1950s. An anti-Soviet rebellion erupted in Hungary in 1956 and was suppressed by Soviet forces. Peaceful attempts to sever dependency in Poland (1956) and Czechoslovakia (1968) were also suppressed. The 'legitimacy' of Soviet interests in its Eastern European satellites was eventually provided by the so-called Brezhnev Doctrine, which provided an ideological justification for the 1968 invasion of Czechoslovakia.

As a result of its territorial expansion the Soviet Union emerged as a world superpower after the Second World War. Its cordial relations with its wartime allies, however, soured after a clerk in the Soviet embassy in Canada, I. *Gouzenko, after his defection in September 1945, revealed the extent and intentions of Soviet espionage in the West. The so-called Cold War between the USSR and the United States then erupted and was fought out for over four decades on political and propaganda fronts and occasionally in limited wars between their respective client states. The economic cost to the Soviet Union was enormous, as vast resources were allocated for military expenditures and economic and technical assistance for client states. The USSR managed to develop a formidable military and industrial capacity during that period, but it fell chronically short in providing its citizens with a high standard of housing, food stocks, medical service, and consumer goods.

Politically the USSR was totally dominated by Stalin and the Communist party in the immediate postwar period. Social control was maintained through an extensive internal security force (the *KGB), and large numbers of people were imprisoned for political reasons. Even laborers who had been forceably taken by the Germans and who after the war were subjected to *repatriation to the Soviet Union against their will were sent to labor camps, their 'crime' being the departure, no matter how forced, from the Soviet Union. The Party also sought to extend its tenets throughout society and launched a campaign spearheaded by A. Zhdanov against 'formalism, cosmopolitanism, and stooping to the decadent West.' Marked strongly by anti-Semitism and chauvinism, the policy provided a convenient means of expanding a policy of *Russification.

Stalin's death (1953) and a change of leadership (G. Malenkov, N. *Khrushchev) brought about a temporary détente or 'thaw' in Soviet life in 1956–9. Khrushchev's dramatic revelations about the extent of Stalin's crimes at the 20th Congress of the CPSU in 1956 provided a particularly important catalyst for the process. The successful removal of the 'anti-Party group' (Malenkov, V. Molotov, and L. Kaganovich) strengthened Khrushchev's position and allowed him to combine his function as first secretary of the CC of the CPSU with that of the premier or head of the government (in place of N. Bulganin, who had resigned). Setbacks in the economy (notably the costs of developing highly mechanized state farms and amenity-supplied agrocities, and the crop failures and dust storms in the virgin lands) and in foreign brinkmanship (the Cuban missile crisis, the border conflict with China), and, in particular, the strains on the Soviet bloc caused by liberalization in the USSR, prompted a reaction. In October 1964 Khrushchev was deposed and replaced by a 'collective leadership' headed by L. *Brezhnev. Like Khrushchev before him, Brezhnev gradually strengthened his position in party and government leadership. In 1973 and 1977 two Ukrainians were removed from the Politburo, P. *Shelest and M. *Pidhirny (Podgorny). Pidhirny lost his prestigious, albeit largely ceremonial, position as president of the Supreme Soviet to Brezhnev.

The Brezhnev leadership assumed a highly conservative course that in some respects returned to Stalin's methods (neo-Stalinism). The role of the KGB increased, and the military assumed an even greater influence on the armaments policy. The party apparatus and government bureaucracy grew in importance, and corruption, already

well established in Soviet life, became rampant. The limited dynamism seen in cultural and intellectual life during the Khrushchev thaw was largely brought under control. The economy did not expand to any significant degree. Critics later characterized the Brezhnev regime as being afflicted with a particular malaise and referred to it as 'the period of stagnation.'

Political *dissidents in the Soviet Union were repressed during the Brezhnev era, as they had been under previous administrations. The methods of the state security organs, however, had become more refined, and the sort of mass terror experienced by Soviet society under Stalin was not repeated. Publications, however, that did not conform to official ideology were closed down, and their editors commonly jailed. Ukrainians and other non-Russian peoples in the USSR constituted a disproportionately high percentage of dissidents, for in addition to general political rights they were also often concerned about the national rights of their respective peoples. The issue became particularly acute in the 1970s, after Brezhnev's *nationality policy downplayed the existence of different peoples in the USSR and began to promote the concept of a *Soviet people. The regime also took a sharper course against religion. Under the combined pressure of internal protests and external diplomatic action, the emigration of Jews increased, and a number of dissidents, chiefly Russian, were exiled to the West.

While tightening up controls internally and maintaining a Cold War with China, the Soviet leadership began, in the early 1970s, a policy of détente with the West. Negotiations and agreements were concluded with the United States that limited nuclear armaments and broadened trade relations. The USSR obtained nearly 15 billion dollars' worth (1976) of credits from Western Europe, the United States, and Japan for the purchase of machinery and grain. Such help carried it through a series of poor harvests and aided its industries with modern Western technology. In 1976 the USSR signed the Helsinki Accord, which provided Western recognition of the post-Second World War boundaries in Eastern Europe. In return the Soviet Union and its satellite countries made certain human rights guarantees, agreed to broaden the access granted to Western media, and promised to allow greater emigration. The USSR did not abide by any of those commitments. Its failure to act was highlighted by dissident groups formed in 1976–7 in Moscow, Kiev, Vilnius, Tbilisi, and Yerevan to monitor the implementation of the Helsinki agreement. Three groups succeeded in gaining international publicity with their protests. In due course their leaders were arrested, and their activities repressed.

Brezhnev died in November 1982 and was succeeded, in rapid succession, by Yu. Andropov (who died in February 1984), K. Chernenko (who died in March 1985), and M. Gorbachev. Gorbachev initiated major disarmament measures that diffused Cold War tensions with the West. He also launched the policies of perestroika (Ukrainian: *perebudova*), or restructuring, in an effort to stimulate the Soviet economy, and of glasnost (Ukrainian: *hlasanist*), or openness, in order to allow for greater freedom of social and intellectual life in the Union. The Party was increasingly criticized in the media and challenged politically by a host of new parties and unsanctioned civic groups known (in Ukrainian) as **neformaly*. National movements also threatened the power of the USSR. The competence of the Party and the Soviet system in general was particular-

UNION OF SOVIET SOCIALIST REPUBLICS, POLITICAL-ADMINISTRATIVE SUBDIVISION

ly brought into question as the cover-up of the Chernobyl nuclear disaster of 1986 came to light.

The visible collapse of the USSR began in 1989, when its satellite countries in Central and Eastern Europe (East Germany, Czechoslovakia, Hungary, Poland, and Rumania) swept out their Soviet-backed Communist governments in rapid succession. In 1990 the three Baltic states declared themselves independent of the Soviet Union, and the majority of republics made claims to sovereignty (by which their local laws took precedence over those of the USSR). The uncertainty of the political situation was accentuated by a growing economic crisis. Matters quickly came to a head after an abortive coup attempt led by G. Yanayev in August 1991. The Ukrainian SSR declared itself independent of the USSR (on 24 August); it was followed soon by most of the other Soviet republics. On 1 December 1991 Ukraine's declaration was confirmed by a decisive vote in a national referendum. It proved to be the death-blow to the Union. A week later, on 8 December 1991, L. Kravchuk (Ukraine), B. Yeltsin (Russia), and S. Sushkevich (Belorussia, now renamed Belarus) met in Minsk, ostensibly to discuss bilateral trading arrangements; they

emerged from the gathering with a blueprint for the establishment of a Commonwealth of Independent States (CIS) that would render the USSR obsolete. After a last-ditch effort to save the Union, Gorbachev accepted the CIS as a fait accompli and resigned from his position as president of the Soviet Union, on 25 December. The state was formally dissolved the following day (26 December 1991) during the final session of the Supreme Soviet. Subsequently the RSFSR (reconstituted as the Russian Federation) sought and obtained international recognition as the legal successor state to the USSR and assumed its seat at the United Nations; in addition it seized a large portion of the USSR's assets and appropriated numerous central institutions (bank, post office, and the like) directly into its own state structure.

Administrative-political structure. The existence of the RSFSR alongside a buffer of 'independent' Soviet republics tied to each other in a military, economic, and diplomatic union was considered by the Russian Communist party as a temporary phenomenon. It sought, in fact, to unite the Soviet republics tightly and to unify their internal and external policies under one monolithic leadership. The prin-

principle of unity was shared by many factions of the party, but there was no common concept as to how it should be achieved. The Russian centralists demanded the inclusion of the republics in the RSFSR as autonomous units (the so-called autonomy concept, represented principally by Stalin), whereas some national-Communists (such as M. *Skrypnyk, Kh. Rakovsky, P. Mdivani) desired a union of equal partners on the basis of confederation. An intermediate formula, that of a federative union, was supported by Lenin, and eventually won out. The founding act of the new state was the 'Declaration and Agreement Concerning the Establishment of the USSR,' approved at the First Congress of the Soviets of the USSR, 30 December 1922. The Second Congress, 31 January 1924, approved the 'Constitution of the USSR.' Despite the opposition of some non-Russian representatives, the constitution was formulated along the lines of a centralized federation.

The union and autonomous republics, autonomous oblasts, and autonomous okrugs were political-territorial units that formed the federative structure of the USSR. The krajs (despite the presence of autonomous units within them) and the oblasts had only administrative-territorial significance. The chief criterion for the establishment and division of the political-territorial units was the presence of a particular nationality or people in a particular territory. The Soviet constitution provided the Union and autonomous republics with the characteristics of state structures, including their own constitutions. The Union republics thus had theoretical indicators of sovereignty. In that way the federal structure of the USSR was unique, and in many respects it evoked contradictory interpretations in constitutional law and political science (see *Federalism).

Initially the main Soviet principle of political order was considered to be the dictatorship of the proletariat, with the soviets (councils) as the organs of administration. Following the 22nd Congress of the CPSU the emphasis in guiding principles shifted to the 'general peoples' nature of the Soviet state and the strengthening of social democracy through the participation of social organizations and the masses in the administration.

The governing state organs of the USSR in 1923-36 were the Congress of Soviets of the USSR and the Central Executive Committee of the USSR. The executive and administrative power was wielded by the Soviet of People's Commissars (Sovnarkom), chaired first by Lenin and later by A. Rykov. Deputies to the All-Union Congress of the Soviets were selected by the republics by indirect vote, with one deputy per 25,000 electors in the cities and one per 100,000 in the rural areas.

The Central Executive Committee consisted of two chambers, the Soviet of the Union and the Soviet of the Nationalities. The Congress of the Soviets elected members to the Soviet of the Union in proportion to the population of each republic. The Soviet of the Nationalities consisted of delegates from the Union and autonomous republics (five from each), and the autonomous oblasts (one each). The Central Executive Committee met three times a year. Between sessions the Presidium performed legislative and control functions and could exercise the prerogative for negating the acts of the republican organs.

The Sovnarkom consisted of the all-Union people's commissars (External Affairs, Transport, Post and Telegraph, Army and Navy, and External Trade) and the uni-

fied or directive commissars (Supreme Council of the National Economy, Finance, Land Affairs, Labor, Worker-Peasant Control), who had counterparts in the Union republics. Matters of sociocultural or local significance were deferred to the republics to be managed by republican commissars along general guidelines established by the USSR government. The Supreme Court both served as the highest judicial body of the USSR and had some control functions over the republican courts. Legislation tended to be unified, but in many matters there were separate republican codes (civil and criminal codes and process, administrative law, and the like).

Some institutional changes were brought about by the new USSR Constitution of 5 December 1936. The functions of the All-Union Congress of the Soviets and the Central Executive Committee were taken over by the Supreme Soviet of the USSR, consisting of two chambers, the Soviet of the Union and the Soviet of the Nationalities. The Supreme Soviet convened two times a year for sessions, which were held either separately in each chamber or jointly in a plenary meeting. Between the sessions of the Supreme Soviet all the functions of the highest state organ were performed by the Presidium of the Supreme Soviet, with the president as its chairman. The highest executive-administrative organ of the government with broad managerial (in fact, legislative) functions became the Council of Ministers of the USSR (until 1946 the Council of People's Commissars), whose members were chosen by the Supreme Soviet or its Presidium. The individual ministries and bodies of state administration (committees, councils, administrations) were either all-Union, directly managing all matters throughout the USSR, or Union-republican, with respective organs at the republican level as well. The ministries encompassed almost all governmental, economic, cultural, and social matters and left the republics with jurisdiction over minor matters (usually of local significance). A movement to expand republican rights in the late 1950s and to decentralize the national economy through the establishment of regional economic councils (known as the Sovnarkhozy) was ended in the early 1960s.

The Supreme Court of the USSR was the highest court, and the USSR state public prosecutor and his prosecuting magistracy provided the central supervision of the execution of Soviet law. In October 1977 an extraordinary session of the Supreme Soviet of the USSR approved a new constitution for the USSR that broadened the prerogatives of the Union over the republics and strengthened the leading role of the Communist party in state affairs. Its provisions negated the previous constitutional right of Union republics to have their own national military units, although in practice the military forces of the USSR were strictly centralized and nationally mixed. It also repealed provisions that recognized most of the non-Russian languages as the official languages of their respective Union republics.

In accordance with the concept of democratic centralism, government administration in the USSR and the direction of its economy were highly centralized. The representative bodies of the government actually exercised nominal control; real power resided in smaller groups (such as the Presidium of the Council of Ministers) or individual administrators, who invariably were leading Party functionaries. Centralization among state political organs and

administrative bodies was maintained through a tight chain of answerability.

The most characteristic trait of the Soviet political system was the leading role of the *Communist Party of the Soviet Union. Effectively it was a superior body that gave direction to and controlled the state from the outside. Its members held all the key positions at every level of government. The real and highest power in the USSR was concentrated in the Politburo and the Secretariat of the Central Committee of the CPSU. The secretariats of the CPSU and the CPU, and even those at the oblast and raion level of the party committees, had divisions structured parallel to the ministries and other government bodies. Those divisions carried out directives and maintained control functions over government establishments in addition to appointing people to leading posts or removing them from administrative responsibility.

The absolute political dominance of the Party (no other political organs or opposition was allowed), with its dogmatic ideology, control over economic resources, and monopoly over the means of communication, effectively rendered the Soviet Union a model totalitarian state. The CPSU was disbanded shortly after the abortive coup attempt of August 1991, and its assets were seized by republican governments.

The Ukrainian diaspora in the USSR. Although most Ukrainians lived within the limits of the Ukrainian SSR and in adjacent areas that constitute contiguous Ukrainian ethnographic territory, there were large numbers of Ukrainians who lived in other areas of the Soviet Union. The contiguous Ukrainian ethnic territory included (along with the Ukrainian SSR) the predominantly Ukrainian-settled territories in the bordering RSFSR, consisting of the southern parts of Belgorod, Kursk, and Voronezh oblasts (northern Slobidska Ukraine), part of Rostov oblast (the Donets-Don), and most of Krasnodar krai (the Kuban), as well as a southern wedge in the Belorussian SSR, incorporating most of Brest and the southwestern strip of Homel oblasts. Contiguous mixed Ukrainian-Russian territory (in which the Ukrainians constituted a minority) could be found in central and in a portion of eastern North Caucasia (the rest of Krasnodar krai and nearly all of Stavropol krai) as well as in the southern part of Briansk oblast north of Chernihiv. Because Soviet census figures after 1926 do not provide nationality and language characteristics of the population for units smaller than the oblast or krai, it is impossible to ascertain the status of the contiguous Ukrainian and mixed territories beyond the Ukrainian SSR in a definitive manner. The 1926 census itself also underestimates the number of USSR Ukrainians outside the Ukrainian SSR.

To 1930. The Ukrainian diaspora in the USSR was distributed in a geographical pattern established before the Revolution of 1917. The first Russian census in 1897 recorded that the Ukrainian diaspora numbered 1,560,000 in the Russian Empire, with 1,232,000 in the European part, 311,000 east of the Urals, and 17,000 south of the Caucasus. Between 1897 and 1914 a major shift occurred as Ukrainians emigrated in large numbers beyond the Urals (nearly 1.5 million, after taking returnees into account). By 1914 the number of Ukrainians in the Asian part of Russia had increased to approx 2 million. Meanwhile, in European Russia the assimilation of Ukrainians began to speed up, especially in those areas where they were not highly

concentrated, or were dispersed among the Russian population. During and immediately after the First World War Ukrainian emigration to the east was insignificant, and the geographical pattern of Ukrainian settlement there remained unchanged. Therefore, the 1914 situation was closely reflected in the 1926 census, even though it tended to understate the number of Ukrainians (for example, in the Central, or Industrial, region of Russia it identified only 41,300 Ukrainians, in spite of the fact that 121,000 persons indicated their place of birth as Ukraine). Nevertheless the 1926 census noted that 3,450,000 Ukrainians lived beyond contiguous Ukrainian ethnic territory, 1,310,000 in the European USSR and 2,140,000 in the Asian.

The distribution of the Ukrainian diaspora in the European USSR in 1926 was similar to what it had been in 1897. Nearly 340,000 Ukrainians lived in the RSFSR borderland regions, including 170,000 in Kursk gubernia, 69,000 in Voronezh gubernia, and 79,000 in the Donets subregion (later the western half of Rostov oblast). The largest number (771,000) lived along the Volga and in the foothills of the Southern Urals in large concentrations. Those concentrations included approx 440,000 in the Lower Volga region (15,000 in the Kalmyk Autonomous Oblast, 14,000 in Astrakhan gubernia, 141,000 in Stalingrad [later Volgograd] gubernia, 202,000 in Saratov gubernia, and 69,000 in the Volga German ASSR), 206,000 in the Middle Volga region (Samara and Orenburg gubernias), 77,000 in the Bashkir ASSR, and 48,000 in Ural oblast. Fully 92 percent of that Ukrainian diaspora was rural population.

Other large concentrations of Ukrainians were in North Caucasia, not far from the contiguous Ukrainian territory. The largest ones were at Rostov-na-Donu (59,200, but only 5,600 in 1897), Groznyi (8,800), Novocherkassk (7,500, with 2,600 in 1897), and Vladikavkaz (now Ordzhonikidze, 4,000).

In the rest of the European USSR there were almost 100,000 Ukrainians in the diaspora (nearly 10,000 in the Belorussian SSR and the rest in the RSFSR). They resided mostly in large cities and had come there as workers or employees. The largest concentration of Ukrainians was in Moscow (16,100 in 1926, 4,500 in 1897); it was followed by those in Leningrad (10,800 in 1926, 5,200 in 1897), Kaluga (7,000), Orenburg (3,500), Voronezh (3,400), and Kursk (2,400).

The Ukrainian diaspora in the Asian USSR was, by 1926, more numerous than that in the European. According to the 1926 census it had reached 2,160,000 (only 328,000 in 1897) and thus represented 62 percent of all the Ukrainians diaspora in the USSR (only 20 percent in 1897). In other words, the Ukrainian presence in Asia increased from 1.6 percent of all the Ukrainians in the Russian Empire in 1897 to 6.8 percent of all the Ukrainians in the USSR in 1926. Its share of all population in the Asian USSR also doubled, from 3.2 percent in 1897 to 6.4 percent in 1926. Within the borders of *Kazakhstan lived 861,000 Ukrainians, who constituted 13.2 percent of its population; within *Siberia there were 853,000 Ukrainians (9.5 percent of the Siberian population); in the Far Eastern krai there were 315,000 Ukrainians (16.8 percent of the Far Eastern population); in the Kirgiz SSR, 64,000 (6.5 percent); in the remaining Central Asian republics, 33,000 (0.5 percent); and south of the Caucasus, 35,000 (0.6 percent).

The Ukrainian population in Asia was not uniformly distributed. The Ukrainian peasants, who migrated be-

yond the Urals, searched for physical conditions comparable to those in Ukraine: they shunned arid deserts (in the south) and forests (in the north) and settled where possible in a forest-steppe or steppe zone. Consequently the Ukrainians were concentrated in two areas, the Far East and the Siberian-Kazakh steppe. The latter area, located in southwestern Siberia and northern Kazakhstan, is the eastern extremity of the broad zones of chernozem soils and the forest-steppe and steppe zones that extend all the way from Ukraine. In both the Far East and the Siberian-Kazakh steppe the Ukrainians constituted a majority in some places. Ukrainians in the Asian USSR were almost exclusively rural (97 percent).

According to the 1926 census about one-quarter of the Ukrainian diaspora in the USSR claimed Russian as its native tongue. That indicator should be considered with caution, for linguistic Russification was impeded by the fact that 95 percent of the Ukrainians were rural and lived in large concentrations or villages with their own way of life, seldom intermarried with members of other nationalities, and were first- or sometimes second-generation immigrants from Ukraine.

As of 1 January 1933 the Ukrainian diaspora in the USSR was estimated at 4.5 million, or some 14 percent of all the Ukrainians in the USSR, with 3 million in Asia and 1.5 million in Europe. By comparison, at that time there were 1.2 million Ukrainians in North America and up to 0.6 million in Europe beyond the contiguous Ukrainian ethnic territories in Poland, Czechoslovakia, and Rumania.

Changes after 1930. Changes in the 1930s and later concerning the Ukrainian diaspora cannot be firmly documented because of scanty and less reliable subsequent census data (1959, 1970, 1979, and 1989). In the 1930s the Ukrainian diaspora in the European USSR suffered disruptions of the sort experienced by the Ukrainian population in its contiguous ethnic territory, though with proportionately smaller losses. Those disruptions included deaths resulting from repression, hunger, and deportations, escapes from repression to other parts of the USSR, and escapes, deportations, and deaths during the Second World War. Moreover, more individuals preferred not to identify themselves as Ukrainians, and succumbed to the increasing tempo of Russification. By contrast, the number of Ukrainians in the Asian USSR continued to grow as a result of new immigration from Ukraine. During the period of collectivization the immigrants were exiled peasants and those who saved themselves from hunger and repression by fleeing to industrial towns in Asia. Subsequent immigration included Second World War evacuees (only some of whom subsequently returned to Ukraine), exiles and prisoners of concentration camps (many of whom remained in Asia after their release), settlers recruited for the virgin lands program in the 1950s and for major construction and industrial projects, and those who migrated to the Asian USSR in search of higher income or better living conditions. Similar immigration processes (though much weaker) in the European part of the RSFSR involved the forced or voluntary migration of Ukrainians to the north or to industrial centers. The Soviet authorities also encouraged interrepublican transfers of population, with the migration of Ukrainians to other republics and a reciprocal movement of other populations to Ukraine.

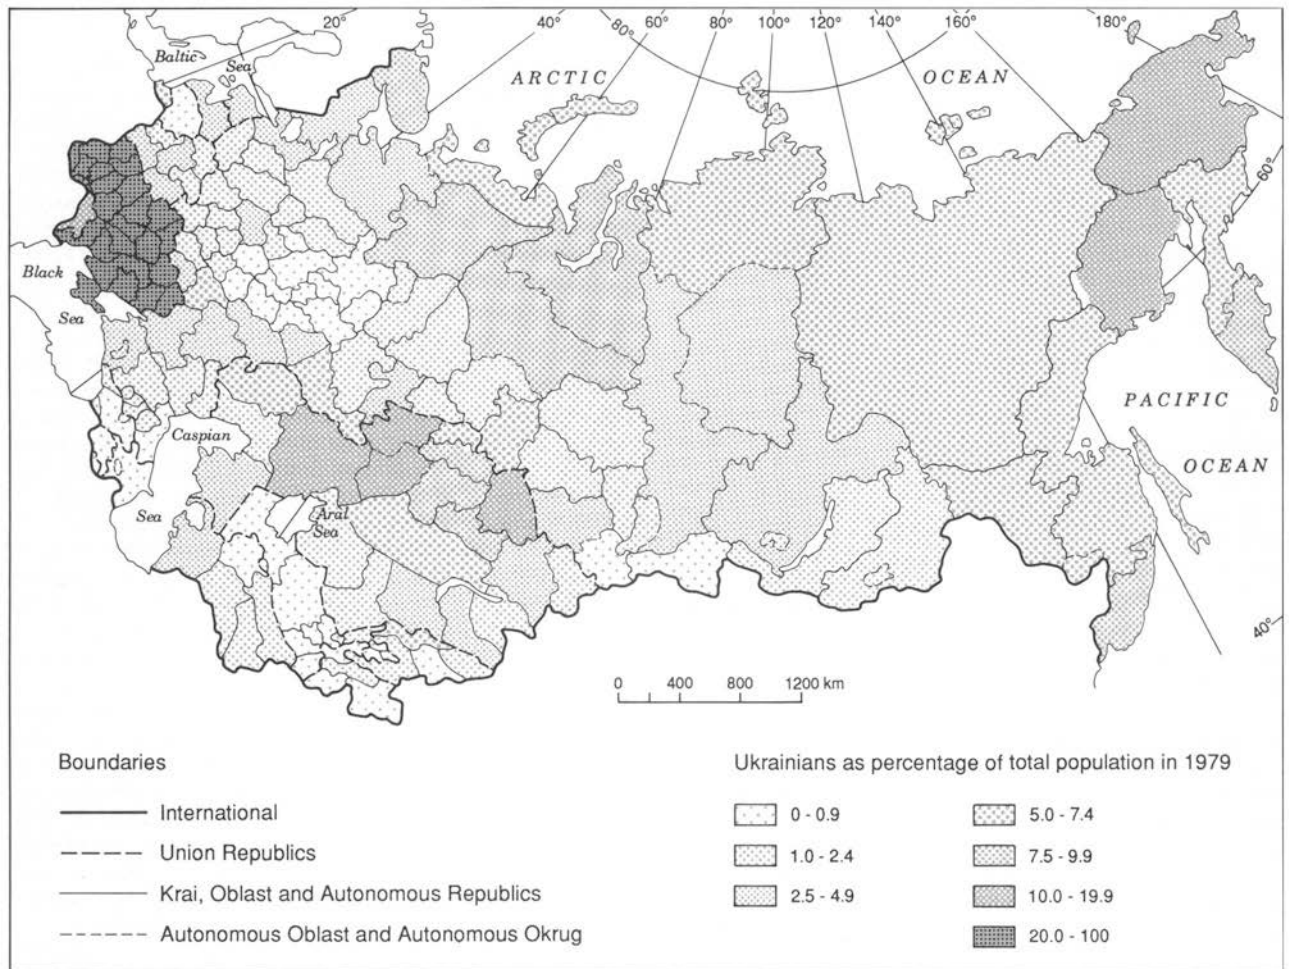

The present state of the Ukrainian diaspora in the former USSR is the product of the aforementioned process-

es and of a constant and increasingly intense process of Russification. Beyond the borders of the Ukrainian SSR Ukrainians had no national rights, not even on the territory of the Kuban (part of the contiguous Ukrainian ethnic territory, where Ukrainians once constituted the majority of the population). There were no Ukrainian schools, societies, or organizations outside the Ukrainian SSR, and no newspapers or books published. The dissemination of printed matter in Ukrainian from the Ukrainian SSR as well as cultural contacts with the Ukrainian SSR was difficult. Such a state of affairs resulted in the linguistic and national Russification of the Ukrainian diaspora. The greatest losses within the Ukrainian diaspora (in census terms) occurred in the Ukrainian-Russian borderland, in those oblasts or krajs which in whole or in part made up the contiguous Ukrainian ethnic territory beyond the Ukrainian SSR – Belgorod, Kursk, and Voronezh oblasts – and in Subcaucasia, which consisted of the Kuban, Stavropol, and, partly, Terek regions and is now encompassed by Krasnodar and Stavropol krajs and Rostov oblast.

The Soviet census indicates a drop in the Ukrainian population in the Ukrainian northeastern borderlands by 1959 to 17 percent of the 1926 numbers, and a reduction in the use of Ukrainian as the mother tongue (among Ukrainians) from 84 to 8 percent. For the southeastern borderlands official Soviet figures indicate a Ukrainian population drop to 10.5 percent of 1926 numbers and a reduction in the use of Ukrainian as the mother tongue from 50 to 42 percent. The situation is comparable to that in the northern Chernihiv land, in the southern part of the present Briansk oblast, where the number of census Ukrainians declined from 128,000 in 1926 to 21,000 in 1970. A similar decline is indicated for that portion of Ukrainian Polisia that in 1939 was joined to the Belorussian SSR (nearly 600,000 Ukrainians): the proportion of Ukrainians there fell from 68.8 percent in 1931 (calculations by V. Kubijovyč) to 2.3 percent in 1959 (official Soviet figures).

The Ukrainians of the diaspora in the USSR living in the non-Russian republics tended to rely on the Russian language for communication with others rather than the language of the local national population. According to the 1979 census only 17 percent of the Ukrainians in the Belorussian SSR knew Belarussian, and 14 percent in the Moldavian SSR knew Moldavian. In the Baltic republics 17 percent in Lithuania knew Lithuanian, 7 percent in Latvia knew Latvian, and 6 percent in Estonia knew Estonian. In Central Asia the figure for those Ukrainians knowing the local language reached only 3 percent in the Uzbek SSR, 2 percent in the Kirgiz and Tadzhik SSRs, 1 percent in the Turkmen SSR, and scarcely 0.4 percent in the Kazakh SSR. Conversely, non-Russians settled in Ukraine commonly lacked a knowledge of the Ukrainian language and relied on Russian.

The Ukrainian diaspora in the USSR has changed dramatically, from being overwhelmingly rural (92 percent in 1926) to being predominantly urban (65 percent in 1970). Recently the level of urbanization of the Ukrainian diaspora exceeded the USSR average (56 percent in 1970) and especially that of the Ukrainians in the Ukrainian SSR (46 percent in 1970). The level of urbanization of the Ukrainian diaspora was not uniform: it was highest in the Baltic republics, the industrial regions of the RSFSR, and Transcaucasia, but it fell below the average in the Kirgiz SSR (51

UKRAINIANS IN THE USSR, 1979

percent in 1970). It was particularly low in the Moldavian SSR (44 percent in 1970). The high levels of urbanization resulted in major changes in life-style, with an increased frequency of mixed marriages and accelerated Russification.

The largest Ukrainian concentration in the European USSR was found, as in 1926, in the Volga and Ural regions (771,000 in 1926, 779,000 in 1989). Ukrainian as the mother tongue was claimed by 41 percent of the people; an additional 12 percent claimed Ukrainian as their second language (1989). By 1970, 65 percent lived in cities, whereas in 1926 only 8 percent were urban. The distribution by oblast was also similar to that in 1926: the largest number (1989) lived in the oblasts of Cheliabinsk (110,000, or 3 percent of the population), Orenburg (102,000, or 5 percent), Saratov (102,000, or 4 percent), Sverdlovsk (82,000, or 1.8 percent), Kuibyshev (82,000 or 2.5 percent), Volgograd (79,000, or 3 percent), and in the Bashkir ASSR (75,000, or 2 percent).

A new concentration of the Ukrainian diaspora had emerged in the Central (Industrial) region of the RSFSR. In 1968-9 alone approx 96,500 persons migrated there from the Ukrainian SSR (in their place, the Central region provided 59,400 migrants to the Ukrainian SSR). The number of Ukrainians in the Central region had grown constantly, from approx 13,000 in 1897 to some 675,000 in 1989. The

largest concentration of Ukrainians was in the city of *Moscow (253,000 in 1989). Of the Ukrainians living in the Central region, 86 percent (1970) were urban, with 44 percent declaring Ukrainian as their mother tongue, and another 22 percent declaring it as their second language (1989).

Similar conditions existed in the Western region. As in the Central region, the Ukrainian diaspora was more recent, having grown from 6,000 in 1897 to 293,000 in 1989, and was predominantly urban (88 percent in 1970). The main concentration of Ukrainians was in Leningrad (now St Petersburg; 151,000 in 1989, or 3 percent of the city's population, compared to approx 5,000 in 1897), although significant numbers were also found in Leningrad oblast (49,200, or 3 percent) and Kaliningrad oblast (formerly East Prussia, 62,800, or 7.2 percent). Some 42 percent (1989) indicated Ukrainian as their mother tongue, and another 22 percent declared it their second language.

Ukrainian settlement in the European north was also relatively recent. In 1926 approx 1,100 Ukrainians lived there, but by 1959 their number had grown to 194,000, and by 1970 to 230,200, mostly (78 percent) urban. Whereas the number of Ukrainians in the old-settled Vologda oblast was relatively small (13,000, or 1.4 percent of Vologda's population), the number increased to the north, in the

Union republics in the USSR: territory, total population, and Ukrainian population, 1989

Administrative unit	Territory in sq km	Total population in 1,000s	Ukrainians	
			1,000s	% of total
USSR	22,403,000	286,731	44,306	100.0
Ukrainian SSR	603,700	51,707	37,500	84.6
RSFSR	17,075,400	147,400	4,400	9.9
Kazakh SSR	2,717,300	16,536	900	2.0
Moldavian SSR	33,700	4,338	600	1.3
Belorussian SSR	207,600	10,200	290	0.6
Uzbek SSR	447,400	19,905	154	0.3
Kirgiz SSR	198,500	4,290	108	0.2
Latvian SSR	64,500	2,680	92	0.2
Georgian SSR	69,700	5,443	52	0.1
Azerbaidzhan SSR	86,600	7,038	32	0.07
Estonian SSR	45,100	1,573	48	0.1
Turkmen SSR	488,100	3,534	36	0.08
Tadzhik SSR	143,100	5,109	41	0.09
Lithuanian SSR	65,200	3,690	45	0.1
Armenian SSR	29,800	3,288	8	0.02

Karelian ASSR (27,400, or 3.8 percent), in Arkhangelsk oblast (51,200, or 3.7 percent), in Murmansk oblast (56,300, or 7 percent), and, especially, in the Komi ASSR (83,000, or 8.6 percent). Ukrainian males outnumbered females in the region two to one (1959), especially in older age cohorts; that fact indicated the substantial number of former prisoners of concentration camps (notably Vorkuta) and exiles. The number of Ukrainians continued to grow with immigration from the Ukrainian SSR. By 1989 there were 310,000 in the northern region (with increases to 104,200 in the Komi ASSR and 105,100 in the naval base of Murmansk).

Linguistically the Ukrainian diaspora in the European north was the least assimilated. In 1970 some 59 percent considered Ukrainian as their mother tongue, and 15 percent used Ukrainian as their second language; by 1989 the figures had declined to 47 and 17 percent respectively.

Among the other neighboring Union republics there was a very large Ukrainian presence in the Moldavian SSR (600,400 in 1989). In the Belorussian SSR the Ukrainians (according to the 1989 census) numbered 291,000 (2.9 percent of the republic's population), of whom 132,100 (45 percent) declared Ukrainian as their mother tongue. Most were urban residents, scattered through all the oblasts. Even in those regions that contained parts of the contiguous Ukrainian ethnic territory Ukrainians were identified by census figures as a tiny minority – in Brest oblast, 60,600 (4 percent) and in Homel oblast, 68,600 (4 percent).

Ukrainians came to live in the Baltic republics in substantial numbers only after the Second World War. Most (88 percent in 1970) have resided in cities, many as civil servants, notably the capital cities of Riga (43,600 in 1989, nearly half of the Ukrainians in Latvia and 4.8 percent of the city's population), Tallinn (24,200, or 50 percent of the Ukrainians of Estonia and 4.8 percent of the city's population), and Vilnius (13,300, or 30 percent of the Ukrainians in Lithuania and 2.3 percent of the city's population). A large proportion declared Ukrainian as their mother tongue (53 percent in 1970, 48 percent in 1979) or knew it

as their second language (15 percent in both 1970 and 1989).

Despite a large influx of Ukrainians into the Asian USSR census figures suggested only a slight absolute growth, from 2,160,000 in 1926 to 2,378,000 in 1959, and a declining share of the Ukrainian population, from 6.7 to 4.2 percent. Although increases in the numbers of Ukrainians in the Far East and especially in eastern Siberia were noted, the census suggested a decline in their number in western Siberia and the Kazakh SSR despite an influx of Ukrainian workers for the virgin lands program. By 1970, census figures indicated losses in the regions of western Siberia, eastern Siberia, and the Far East, thereby suggesting the continuing Russification of the second-generation Ukrainians. Meanwhile, the number of Ukrainians in the Asian north and northeast increased, from 4,000 in 1926 to 116,300 in 1970 and 252,100 in 1989. Many settled in the Yakut ASSR (in 1989, 77,100, or 7 percent of the ASSR's population), in Kamchatka oblast (43,000, or 9 percent), in Sakhalin oblast (46,200, or 6.5 percent), and, especially, in Magadan oblast (85,800, or 15.4 percent), with its infamous Kolyma. Magadan oblast represented the highest proportion of Ukrainian population in any oblast of the RSFSR. Clearly the Ukrainian element continued to play a prominent role among the exiles and workers of the north. Urbanization in Siberia and the Far East was above the USSR average, especially in the north, a trend that also pertained to Ukrainians (66 percent for all Siberia and the Far East in 1970). In all of Siberia and the Far East 44 percent of Ukrainians declared Ukrainian as their mother tongue, and 14 percent knew it as their second language, in 1989. The respective percentages for the three separate regions were 46.5 and 10.9 percent for western Siberia, 48.7 and 15.4 percent for eastern Siberia, and 37.4 and 16.7 percent for the Far East. (See also *Siberia and *Far East.)

In the Kazakh and Kirgiz republics the size of the Ukrainian diaspora (according to the official statistics) changed little over time: from 925,000 in 1926 to 1,007,300 in 1970 (largely in Kazakhstan, offset in part by a small decline in Kirgizia), followed by a decline, and then to 1,004,000 in 1989. The proportion of the Ukrainian population declined throughout the period, as both the Kazakh and Kirgiz populations experienced rapid growth. Urbanization among Ukrainians was not rapid, because many of the newcomers were settled on the virgin lands (54 percent in Kazakhstan and 51 percent in Kirgizia in 1970). Ukrainian as the mother tongue was claimed by 36.6 percent of the Ukrainians in Kazakhstan (1989); another 5.8 percent used Ukrainian as their second language; the respective indicators for Kirgizia were 34 and 6.0 percent. (See *Kazakhstan and *Kirgizia.)

Most Ukrainians in Central Asia (formerly Turkestan) settled there in the post-Second World War period. In 1926 the old settlers, mostly grain farmers in the border foothills or workers in the cities, numbered 33,000; by 1959 their number had grown to 136,000, by 1970 to 179,000, and by 1989 to 230,100, virtually all in the cities. The largest Ukrainian concentration in Central Asia is in the Uzbek SSR (153,200, or 0.8 percent of the republic's population in 1989). In 1970 approx 87 percent of the Ukrainians in the republic were urbanized. In the capital city of Tashkent lived 60,000 Ukrainians in 1989 (2.9 percent of the city's population), the largest known urban concentration of Ukrainians in the Asian USSR. In the Turkmen SSR

there were 35,600 Ukrainians (1 percent of the republic's population) in 1989. Of those, 29,500 (82 percent) lived in cities, mainly (11,000) in the capital of Ashkhabad (where they constituted 4.3 percent of the city's population). In the Tadzhik SSR the 41,400 Ukrainians (0.8 percent) in 1989 indicated a rise from 31,700 (1.1 percent) in 1970, when 29,400 (92 percent) were urban, and 13,300 lived in the capital, Dushanbe (constituting 3.6 percent of the city's population). In sum, over one-third of all Ukrainians living in Central Asia resided in the capital cities of their respective republics. Since that diaspora was mostly recent, its language retention indicators were somewhat higher: 50.0 percent declared Ukrainian as their mother tongue, and 6.5 percent indicated Ukrainian as their second language.

In the Transcaucasian republics most Ukrainians lived in Georgia (52,400, or 1 percent of the population in 1989); it was followed by Azerbaidzhan (32,300, or 0.5 percent) and Armenia (8,300, or 0.3 percent). The largest urban concentration of Ukrainians in Transcaucasia was in Baku (14,400 in 1970); it was followed by Tbilisi (10,600) and Yerevan (2,600). Their linguistic retention was slightly better than that of their counterparts in Central Asia: in 1989 fully 59 percent declared Ukrainian as their mother tongue, and another 7.2 percent gave Ukrainian as their second language.

The census data provided only a sketchy indication of the status of the Ukrainian diaspora in the Asian USSR. The large migrations (until the 1960s) from Ukraine, along with a relatively high level of natural increase, presumably would have resulted in a population of Ukrainian origin in the Asian USSR of seven to eight million. As they stand, the official figures suggest that the majority of the migration had undergone extensive Russification.

V. Kubijovyč, V. Markus, I. Stebelsky

Union of Struggle for the Liberation of the Working Class (Russian: Soiuz borby za osvobozhdenie rabo-

chego klassa). An underground organization in Kiev, founded in March 1897 by Russian and Polish social democrats. Initially the union had 30 members. Among the most active were P. Belousov, B. Eidelman, and P. Tuchapsky. The union issued revolutionary leaflets, brochures, and a newspaper, maintained a library, and had contacts with other Marxist groups in the Russian Empire. The First Congress of the *Russian Social Democratic Workers' party in March 1898 in Minsk was called at the union's insistence. Shortly after the congress 142 of the union's members were arrested by the tsarist police and banished to Siberia, whereupon the union ceased to exist.

Union of Subcarpathian Ukrainian Students (Soiuz pidkarpatskykh ukrainskykh [ruskykh] studentiv). A Ukrainophile student organization that existed in Czechoslovakia in the interwar period from 1920. It organized cultural-educational activities (such as a traveling theater) in Prague and Subcarpathia, belonged to the *Central Union of Ukrainian Students, and from 1933 published the journal **Proboiem*.

Union of the Archangel Michael (Russian: Soiuz Mikhaila Arkhangel'a; aka the Russian People's Union of the Archangel Michael). A reactionary, anti-Semitic, Russian chauvinist organization founded in March 1908 by a group that broke away from the *Union of the Russian People. It was led by a Bessarabian landowner, V. Puri-shkevich, and received financial support from official tsarist circles. Like the Union of the Russian People, the union defended tsarist autocracy, Orthodoxy, Russification, and a centralized Russian Empire. It terrorized and assassinated liberals, revolutionaries, Jews, Ukrainians, Poles, and other non-Russians considered enemies of the regime. It did not, however, boycott the Third Russian State Duma (although it demanded nonsuffrage for Jews and limits on the number of non-Russian representatives), and it supported the Stolypin agrarian reforms. In Ukraine the union had particularly strong branches in Odessa and Kiev. It was banned soon after the February Revolution of 1917. (See also *Black Hundreds.)

Union of the Free Press (German: Verband der Freien Presse; Ukrainian: Soiuz vilnoi presy). An organization of Eastern European and Soviet émigré publishers and journalists in postwar Germany. It was established on the initiative of Ukrainian journalists in Augsburg in 1947 to provide the Western world with objective information about and analyses of events in Soviet-occupied Europe and the USSR. Initially it had members from 6 nations; the 6 had grown to 23 by the 1960s. The union published the monthly *Freie Presse-Korrespondenz* from 1952 (with interruptions) and informational brochures, and in 1962 it initiated the creation of the Bonn-based Federation of Exiled Journalists in Europe. It became inactive in the 1970s. Ukrainians who served as its presidents were R. Ilytsky (the first president) and V. Lenyk (1962-74).

Union of the Russian People (Russian: Soiuz russkago naroda). The largest and most extremist of the Russian *Black Hundreds organizations, founded in St Petersburg in October 1905. It was led by A. Dubrovin and, from 1910, N. Markov. It fanatically defended tsarist autocracy, an indivisible Russian Empire, and Orthodoxy, and its mem-

bers terrorized and murdered 'traitors' and enemies: Jews, liberals, socialists, revolutionaries, and participants in the non-Russian national movements. Enjoying the moral and financial support of Tsar Nicholas II, the government, the police, and even Russian Orthodox bishops and members of the Holy Synod, the union founded 900 branches throughout the Russian Empire and published a daily, *Russkoe znamia*, and other reactionary propaganda. In Ukraine, where it was particularly strong in the cities of Odessa, Kiev, and Chernihiv and at the Pochaiv Monastery in Volhynia gubernia, it disseminated militantly anti-Semitic and anti-Ukrainian views through periodicals such as its own *Pochaevskii listok* and the right-wing Kiev daily, *Kievlianin*. During the Revolution of 1905–6 the union's 'combat bands,' consisting mostly of lumpen and criminal elements, instigated many vicious anti-Semitic pogroms, particularly in Odessa, Yalta, and Chernihiv gubernia. In the 1907–12 Third Russian State Duma at least 32 deputies were union members. From 1908 on the union increasingly lost popular support, and several factions (eg, the *Union of the Archangel Michael) broke away from it. In 1913 the union inspired the infamous anti-Semitic *Beilis affair in Kiev. It was banned after the February Revolution of 1917.

R. Senkus

Union of Theatrical Workers of Ukraine (Spilka teatralnykh diiachiv Ukrainy, or STD). An organization established at an extraordinary congress of the *Ukrainian Theatrical Society (UTT) in Kiev in 1987. A 95-member executive was elected, headed by S. *Danchenko (artistic director of the Kiev Ukrainian Drama Theater). The resolutions of the UTT congress defined the main objectives of the STD: to carry out Party policy in this branch of the arts (an objective abandoned in 1991), to promote high idealism and esthetic quality in theater, to support the search for new masters of the stage, and to take responsibility for all theater issues in Ukraine. In 1992 the STD had 6,000 members, and its president was L. *Taniuk.

Union of Ukrainian Autonomists-Federalists. See Ukrainian Party of Socialists-Federalists.

Union of Ukrainian Citizens in France (Soiuz ukrainskykh hromadian u Frantsii, or SUHUF). A Sovietophile organization founded in 1925 in Paris. It opposed other Ukrainian émigré groups, particularly UNR government-in-exile circles, and the state of Poland (for which it gained favor among some expatriate Galicians). Some members traveled to Soviet Ukraine and became disillusioned; others continued returning there even after 1945. Leading activists included E. *Borschak, A. Halip, M. Norych-Dzikovsky, N. Okhrym, O. Savchyn, O. Sevriuk, and I. Zhahaidak. Its official organs were **Ukrains'ki visty* (1926–9, edited by E. Borschak) and *Vistnyk SUHUF* (1929–30). It became particularly popular during the period of Ukrainization in the Ukrainian SSR. In 1927 it included 16 branches with approx 800 members, but its membership declined after the onset of the Stalinist terror in Ukraine. In 1929 the organization experienced a split during which leading figures, such as Borschak and Sevriuk, left, and in 1932 it ceased its activity.

Union of Ukrainian Community Centres of Canada (Soiuz ukrainskykh narodnykh domiv, or SUND). A na-

tional association of Ukrainian community centers (*narodni domy*) under the umbrella of the *Ukrainian Self-Reliance League (SUS). Established in 1927 as an integral part of the SUS organizational structure, the union was formally incorporated in 1928. T. *Ferley was the first official president of the national association, which provided support for the member groups of SUS and sponsored Ukrainian Saturday schools. The extensive depopulation of rural areas inhabited by Ukrainians that accompanied urbanization in the 1950s caused its decline.

Union of Ukrainian Emigrant Engineers and Technicians in Poland (Spilka inzheneriv i tekhnikov ukrainstiv-emigrantiv u Polshchi). A professional organization founded in Warsaw in 1927. Its membership rose from an initial 17 to 174 in 1930. The union had four branches and a head office in Warsaw. Until 1939 it promoted scientific work, supported students by means of scholarships, and published its own bulletin, *Visty* (1928–9). The leading members of the union were I. Shovheniv, A. Lukashevych, Ye. Glovinsky, M. Shtanko, L. Panasenko, V. Shevchenko, and M. Teliha. It ceased its activity after the Nazi invasion of Poland.

The executive of the Union of Ukrainian Emigrant Women in Poland in 1932–3. Sitting, from left: O. Sadovska, V. Zavadaska, M. Livytska, N. Salikovska; standing: K. Chaikivska, O. Lukasevych, E. Kmet, M. Shevchenko

Union of Ukrainian Emigrant Women in Poland (Soiuz ukrainok emigrantok u Polshchi, or SUEP). The organization originated in 1921 as a women's section of the *Ukrainian Central Committee in Poland. Headed by O. Lukasevych, it was reorganized in 1924 as the Women's Hromada under the presidency of N. Salikovska, and in 1927 as the SUEP under the leadership of M. Livytska. The union had a branch in Lviv. At first the union was involved mostly in charity work, but later it also organized literary readings, choirs, theatrical performances, and embroidery. It was disbanded in 1939.

Union of Ukrainian Emigré Organizations in France (Soiuz ukrainskykh emigrantskykh orhanizatsii u Frantsii). An organization founded on 3–4 January 1925 in Paris. It consisted of groups that supported the UNR government-in-exile, mainly political emigrants from central Ukraine. Notwithstanding its posture as an umbrella group for Ukrainians in France, the union maintained an intense rivalry with the Sovietophile *Union of Ukrainian Citizens in France, the *Ukrainian Hromada in France,

and the *Ukrainian National Union. In the 1930s the union co-ordinated the work of 56 community associations and seven Plast scouting groups. Fifteen of its affiliates offered Ukrainian language instruction for youth. It held 16 general assemblies and published the *Biuletyn* (later it provided columns in the weekly *Tryzub*). Throughout its existence the union was headed by M. *Shumytsky; other activists included Yu. Batsura, M. Kovalsky, I. Kosenko, B. Lototsky, M. Shulhyn, and P. Verzhbytsky. It belonged to the *Supreme Emigration Council. The union ceased activities in 1940. In 1946 many of its former members established the *Ukrainian Community Aid Society in France.

Union of Ukrainian Engineers' Organizations Abroad (Soiuz orhanizatsii inzheneriv ukrainsiv na emigratsii, or SOIU). An umbrella organization of Ukrainian engineering associations outside Ukraine. It was founded on 15–17 November 1930 in Poděbrady by delegates of 10 engineering and technical societies in Poland, Czechoslovakia, and France. Later, societies in Argentina and Belgium became members. By 1931 the union represented 556 individual members. It established contacts with other Ukrainian scientific societies and non-Ukrainian professional associations. In 1931–4 it published four issues of *Ukrains'kyi inzhener*. The head office was in Poděbrady, and the president was V. *Ivanys. When the Czechoslovak government withdrew its support of Ukrainian scientific and educational institutions, many engineers were forced to leave the country, and in 1937 the union ceased its activities.

Union of Ukrainian Evangelical-Baptist Churches in Australia. A federation of four churches (Sydney, Melbourne, Brisbane, Perth). Ukrainian Evangelical-Baptist church services were first celebrated in Sydney in 1959. Pastor M. Yatsyshyn replaced Pastor L. Semenets as chief pastor in 1985 in the Sydney Ukrainian Evangelical community. Pastor I. Podolak conducts services in Melbourne, which formed a religious community in 1960. Church services were first celebrated in Brisbane and in Perth in 1955. The Evangelical-Baptist communities in both of the last-named cities have their own prayer halls. W. Tereshchuk is pastor in Brisbane; F. Baranenko performs pastoral duties in Perth. The union has published the quarterly magazine *Dobra novyna* since 1960.

Union of Ukrainian Foresters and Woodsmen in the USA (Obiednannia ukrainskykh lisnykiv i derevnykiv, or OBULID). A professional organization of Ukrainian émigré foresters, originally founded in 1946 in Germany. The group sponsored technical courses in forestry, sought accreditation from Western technical institutes for studies completed in Ukraine, and pursued various possibilities for finding jobs or professional contacts for émigré Ukrainian foresters. It ceased operations in Germany in 1948 and was reconstituted in the United States in 1949. The group's official organ was *Visnyk OBULID* (edited by Ya. Zubal), which was published irregularly. It also sponsored a Ukrainian forestry almanac (1958) to commemorate the group's 10th anniversary. By this time, however, the union was moribund. Its presidents included B. Luchakovsky (1946–8), I. Vintoniak (1949–52), and P. Piasetsky (1954–6).

Union of Ukrainian Journalists and Writers Abroad (Soiuz ukrainskykh zhurnalistiv i pismennykiv na chuzhyni). A professional association founded in Vienna on 12 September 1919 to inform the Western press and public about developments in Ukraine, to defend the professional interests of its members, and to give financial help to needy writers. In 1920 the union set up a lecture program, which in the following year was reorganized as a series of university courses under the name of the *Ukrainian Free University. In 1925 its head office was moved to Prague. In the 1930s it had 50 to 70 members and was active in disseminating information about Polish and Soviet repressions in Ukraine. Its presidents included V. Kushnir, O. Oles, and S. Siropolko. The group was disbanded in 1940.

Union of Ukrainian Lawyers (Soiuz ukrainskykh advokativ, or SUA). A professional organization of Ukrainian lawyers in interwar Poland. Established in 1923, it had its headquarters in Lviv and local branches in most towns with a district court. The union succeeded the Collegium of Advocates (1919–21), which was the legal section of the Ukrainian Citizens' Committee. The SUA defended the professional interests of Ukrainian lawyers in Poland and the use of the Ukrainian language in courts and official institutions, and organized the defense of Ukrainians involved in political trials. Together with the Society of Ukrainian Lawyers, it published the legal quarterly *Zhyttia i pravo* (1928–39). The SUA published an almanac commemorating its 10th anniversary (1934), and R. Dombchevsky's *Za prava ukrains'koi movy* (For the Rights of the Ukrainian Language, 1936). By 1939 it had a membership of almost 400 lawyers and 300 articling students, almost three-quarters of all the Ukrainian lawyers in Poland. The presidents of SUA were L. Hankevych and K. Levytsky (1924–39). The society was dissolved in 1939, when the Soviets occupied Western Ukraine.

The first council of the Union of Ukrainian Merchants and Entrepreneurs in Lviv (1928)

Union of Ukrainian Merchants and Entrepreneurs (Soiuz ukrainskykh kuptsiv i promyslovtziv, or SUKP). An organization of Ukrainian businessmen in Western Ukraine, established in 1923 with headquarters in Lviv. Until 1933 it was called the Union of Ukrainian Merchants. SUKP represented businessmen and entrepreneurs, encouraged the development of the private sector in the Ukrainian economy, organized exhibitions of goods manufactured

by Ukrainians, defended the interests of the Ukrainian business community before the Polish government, helped organize *Prombank, published the semimonthly **Torhovia i promysl* and an almanac, and assisted the Ukrainian co-operative movement. The Polish government permitted it to operate only in Galicia, but the union accepted members from Volhynia and even from abroad. In 1937 it had 29 branches and 3,137 members (in 1934 the respective figures were 10 and 521). Separate sections were established in the organization for manufacturers, retailers, young businessmen, restaurateurs, and so on. SUKP was headed by Ye. Martynets, R. Zubyk, H. Hanuliak (1928–34), and Ya. Skopliak; other leading figures in the organization included Ye. Hovykovich, V. Ryzhevsky, S. Herasymovych, Ye. Dumyn, M. Zaiachivsky, D. Koniukh, Yu. Tys, and V. Lazorko. After the Soviet occupation of Western Ukraine in 1939, SUKP suspended its activities. The Labor Alliance of Merchants and Entrepreneurs under the Ukrainian Central Committee continued the work of the SUKP in the German-run Generalgouvernement.

Nestorovich, V. *Ukrains'ki kuptsi i promyslovtsi v Zakhidnii Ukraini, 1920–1945* (Toronto–Chicago 1977)

Union of Ukrainian National Democrats (Soiuz ukrainskykh natsionalnykh demokrativ, or SUND). A political organization founded in New York in 1950. The group was established by post-Second World War émigrés who hoped to develop a nonpartisan center-left coalition to support the cause of Ukrainian independence and to counterbalance the perceived extremism of the existing nationalist and socialist Ukrainian-American organizations. The initiators of and main figures in the group were K. *Pankivsky and M. *Shlemkevych. The union published its own *Biuletyn* and then *Informatsiyni lystok*, although its members also used the journal **Lysty do pryiateliv* as a forum for expressing their views. The SUND was centered in and around New York City and initially generated some interest in establishing branches in other locations. These hopes were never realized, and the group dissolved itself in 1966.

Union of Ukrainian Nationalist Youth (Soiuz ukrainskoi natsionalistychnoi molodi, or SUNM). A coordinating body for Ukrainian nationalist youth groups in Galicia, formed in 1926 out of the *Group of Ukrainian National Youth. SUNM sought to activate Ukrainians (particularly youths) in the nationalist cause. The union had its greatest strength in Lviv (with headquarters in the *Academic Gymnasium), although its members frequently toured villages with plays, public lectures, concerts, and the like. The union quickly assumed a leading role in the Ukrainian nationalist movement and became one of the founding members of the *Organization of Ukrainian Nationalists, after the establishment of which, in 1929, SUNM disbanded. The union published the newspaper **Smolohyppu* in 1927–8. Leading SUNM figures included O. Bodnarovich, I. Habrusevych, B. Kravtsiv, S. Lenkavsky, S. Okhrymovych, and M. Dobriansky-Demkovych.

Union of Ukrainian Private Office Employees (Soiuz ukrainskykh pryvatnykh uriadovtsiv, or SUPRUHA). A professional organization of Ukrainian office workers in Galicia, founded in 1914 in Lviv. By 1939 it had 13

branches and over 1,100 members. It also owned a bank, called SUPRUHA, which financed the union's Suspilnyi Promysl co-operative (est 1932). The latter ran a factory that produced a coffee substitute. The union published a monthly, **Sluzhbovyk*. SUPRUHA was dissolved by the authorities following the Soviet occupation of Western Ukraine in 1939. Its last president was L. *Yasinchuk.

Union of Ukrainian Professional Musicians (Soiuz ukrainskykh profesiinykh muzyk, or SUPROM). A music society active in Lviv in 1934–9. The union was active in the fields of composition, musicology, and musical performance. It sponsored the periodical *Ukrains'ka muzyka*, selected the items to be included in the collection *Velykyi spivannyk Chervonoï kalyny* (The Great Songbook of Chervona Kalyna), published *Dyrygents'kyi poradnyk* (The Conductor's Adviser), and organized a competition for young performers. Among the leading figures in the union were N. *Nyzhankivsky, V. *Barvinsky, Z. *Lysko, R. *Savvitsky, and W. *Wytwycky.

Union of Ukrainian Progressive Youth (Soiuz ukrainskoi postupovoi molodi im. M. Drahomanova 'Kameniar'). A Galician youth organization founded in 1929 and popularly known as the Kameniar (Stonecutters) after the poem by I. *Franko. The organization had a radical-democratic and ethical-socialist ideology and was under the influence of the *Ukrainian Radical party. Its headquarters was in Lviv. In 1930 the union had 48 branches throughout Galicia, in 1933, 108 branches, and in 1936, 291 branches, with over 15,000 members. Local branches organized study circles, sports activities, theatrical groups, and choirs. Annual district sports meets were organized at the district level. The union had two journals, **Kameniar* and *Molodi kameniar*, and published several organizational handbooks. The union belonged to the International Workers Sports Union (headquarters in Brussels) and participated in two of its olympiads. The head of the union was A. *Hryvnyak, and the secretary-general was P. Kostyuk. The organization ceased to exist with the Soviet occupation of Galicia in 1939.

Union of Ukrainian Student Organizations in Germany and Danzig (Soiuz ukrainskykh studentskykh orhanizatsii u Nimechchyni ta v misti Dantsigu, or SUSOND). A student umbrella organization founded in Berlin in August 1924. It united six student organizations in Berlin, Danzig, and Königsberg, of which the largest was the *Osнова Union of Ukrainian Students in Danzig. In its cultural activities SUSOND collaborated with similar German, Lithuanian, Bulgarian, Turkish, and Estonian student organizations. In the 1930s its membership decreased. In 1938 it accepted student associations in Austria (the Sich student societies in Vienna and Graz), and in 1939 the Ukrainian Academic Hromada in Prague. In 1941 the union was reconstituted as the *Nationalist Organization of Ukrainian Students in Germany. Presidents of SUSOND included M. Milko, M. Kachmar, and A. Kishka.

Union of Ukrainian Student Organizations in Rumania (Soiuz ukrainskykh studentskykh orhanizatsii u Rumunii, or SUSOR). A student umbrella organization established in 1929 to represent various Ukrainian student societies in Rumania. It co-ordinated the work of the Zaporozhe, Chornomore, and Zalizniak student fraterni-

ties in Chernivtsi; the Bukovyna society in Bucharest; and the Hromada in Iași. It organized Ukrainian national celebrations and demonstrations, such as the protest in 1933 against the man-made Soviet famine, and published a supplement, *Students'ki visty* (Student News, 1935–7), in the papers *Chas* and *Samostiinist'*. It raised funds to provide health care for Ukrainian students. The union represented about 160 students. From 1929 it was a member of the Central Union of Ukrainian Students. Although the Rumanian authorities banned SUSOR activities in 1937, it continued its formal existence until 1940. Its presidents were L. Romanovsky, V. Yakubovych, O. Popovych, M. Ivanovych, and Ya. Bayer.

Members of the executive of the Union of Ukrainian Student Organizations under Poland in 1931–2. Sitting, from left: Bohdan Zanko, Mykola Duzhy, Anna Chemerynska, Volodymyr Yaniv, Olha Prystai, Yaroslav Hladky, Yaroslav Rak; standing: Bohdan Dorotsky, Andrii Marchenko, Ivan Maliutsa, Bohdan Romanenchuk, Vasyl Miliianchuk

Union of Ukrainian Student Organizations under Poland (Soiuz ukrainskykh studentskykh orhanizatsii pid Polshcheiu, or SUSOP). A semilegal union of Ukrainian student groups in Poland. Active in 1931–9, SUSOP united Ukrainian students from 5 university cities and 65 district sections; the total membership was nearly 2,500, approx 83 percent of the Ukrainians in postsecondary schools in Poland. SUSOP was formed at a meeting of the Central Student Committee in Lviv in 1931, where it established its plans to undertake cultural-educational work as a means of strengthening the national consciousness of the Ukrainian masses. In 1933 SUSOP assumed a portion of the mandate of the *Central Union of Ukrainian Students, and its journal, **Students'kyi shliakh*, became the official voice of both co-ordinating bodies. Strongly influenced by the temper of the times, SUSOP sought to instill a nationalist spirit in its members. The Polish government retaliated in 1934 with repressive measures: the organization's first three presidents were arrested, and publication of the SUSOP journal was prohibited (it resumed publication under a new name only in 1938). In 1939 all the delegates to the organization's Seventh Congress were arrested. Notable members of SUSOP included V. Yaniv, D. Shtykal, R. Voloshyn, and V. Rudko.

Union of Ukrainian Student Societies in Europe (Soiuz ukrainskykh studentskykh tovarystv v Evropi, or

SUSTE). A Ukrainian student umbrella organization established in 1963 in Paris. It had over 250 members grouped in Ukrainian student clubs in Britain, France, Germany, Belgium, Austria, and Italy. SUSTE organized conferences and student meets. In 1975 it began to publish *Informatyvnyi lystok* irregularly. Its presidents have included F. Tatarchuk, I. Hirna, A. Rebet, B. Drozdovsky, and T. Lonchyna.

Union of Ukrainian Veterans (Soiuz ukrainskykh veteraniv, or SUV). An émigré association of former Ukrainian soldiers in various armies. It was founded in Neu-Ulm, Germany, in 1945 to cultivate Ukrainian military traditions and provide aid to needy members. In 1948 it had over 2,000 members in more than 50 branches. As Ukrainians emigrated from Germany, branches of the SUV sprang up in Austria, Britain, Belgium, Holland, Argentina, and Australia. The head office is in Munich. Ten issues of the union's magazine, *Ukrains'kyi kombatant*, were published. The presidents of SUV have included Gen M. Omelianovych-Pavlenko, Col V. Tatarsky, Col M. Stechyshyn, and R. Debrytsky.

Union of Ukrainian War Invalids (Soiuz ukrainskykh voiennykh invalidiv). A charitable organization founded in 1947 in Augsburg to aid Ukrainian invalids in Germany and Austria. Its list of dependents has gradually diminished from over 500 in 1952 to 280 in 1958 and 80 in 1983. Funds are donated by Ukrainian veterans' organizations and Ukrainian welfare services in Canada, the United States, and Australia. The union's head office is in Munich. Its presidents have been I. Marchuk, I. Nebola, M. Stechyshyn (1955–71), and R. Debrytsky (since 1971).

The presidium of the Union of Ukrainian Women in 1937. Sitting, from left: Olena Fedak-Sheparovych, Iryna Prisnevsk, Natalia Livytska-Kholodna, Zinaida Mirna, Sofiia Rusova, Milena Rudnytska, Konstantyna Malytska, Olena Shtohryn, Olha Tsipanovska; standing: Antonina Horokhovych, Myroslava Mryts

Union of Ukrainian Women (Soiuz ukrainok, or SU). The largest Ukrainian women's organization in Western Ukraine during the interwar period. A successor to the *Women's Hromada in Lviv, the group was established in December 1921 at a women's conference in Lviv. It sought to improve the educational and economic status of Ukrainian women, and to involve them in civic affairs. It undertook activities related to community sanitation, social welfare, the co-operative movement, and the research and development of Ukrainian folk arts.

The SU had a three-tiered structure, with a central executive in Lviv, branch organizations in larger cities and towns (67 in 1936), and village circles (1,101 in 1936). The Polish authorities deliberately limited the scope of its activities to Galicia. The SU branches represented approx 30

percent of all Ukrainian settlements there, and its membership of 45,000 constituted about 5 percent of the female Ukrainian population. The SU was particularly successful in extending its influence into the countryside by dealing with issues of concern to rural women and by using its branches as regional organizational and programming centers for the village circles. The constitution of the SU was ratified in 1917 (wartime circumstances delayed its formal implementation until 1921) and amended in 1933.

The work of the SU proceeded in several directions and at several levels. One of the earliest concerns was the adaptation of Ukrainian folk arts to urban uses; it was followed by the improvement of life among rural women as well as an involvement in the international women's movement. The organization's work in the early 1920s focused largely on postwar reconstruction and the establishment of branches. In 1922 the *Ukrainske Narodnie Mystetstvo co-operative was founded under the auspices of the SU as a means of popularizing and marketing Ukrainian folk-art items. To develop cadres to work in the field, training courses were organized in 1927, 1929, 1932, and 1937. Besides explaining the aims and methods of the SU the specialists lectured on topics such as the operating of co-operatives and nursery schools, housekeeping and garden tending, and the basics of hygiene. Course attendees (approx 200 graduates) were mainly young women who had completed secondary school and were looking for employment. The most capable of these were posted in SU branches; others organized courses in the villages. In 1937 alone the SU sponsored 177 courses in various Galician villages, 81 on cooking, 13 on housekeeping, 52 on knitting and crocheting, 21 on pattern-making and sewing, and 7 on embroidery. The SU also added the organization of summer preschool programs for children and the establishment of youth affiliates around village circles to its activities.

The work of the central organization was divided into sections. The organizational section was headed by O. *Kysilevska, who contributed the SU circulars to the popular weekly **Zhinocha dolia*. The co-operative section was headed by I. Blazhkevych and, later, I. Hladka; it was responsible for disseminating information about co-operatives and keeping a close liaison with county unions of co-operatives. The health section was headed by S. Parfanovych and, later, S. Korenets; it worked in co-operation with the Ukrainian Hygienic Society. The folk-art section was headed by I. Hurhula, and its activities were linked with those of the Ukrainske Narodnie Mystetstvo co-operative. The recruiting section was headed by O. Tsiapanovska, who was also responsible for Ukrainian studies, Ukrainian embroidery, and housekeeping programs. In the mid-1930s there were 142 girls' groups organized around the village circles.

The growth of the SU was stimulated by the Ukrainian Women's Congress, which it sponsored in June 1934 in Stanyslaviv, on the occasion of the 50th anniversary of the founding of the first Ukrainian women's association. The gathering attracted not only a large portion of the SU membership but also representatives of many other women's groups. The agenda of the congress included presentations on all areas of SU activity. During the congress the idea of a World Union of Ukrainian Women, which would unite all such women's organizations under one superstructure, was discussed. Although set in motion later, in

1937, the proposition was not realized because of the disbanding of the SU by the Polish authorities and the outbreak of the war.

The SU published the biweekly **Zhinka* (edited by M. *Rudnytska from 1935) and the monthly *Ukrainka* (1938-9, ed M. Strutyńska), which was particularly popular among village women. SU members were also avid readers of other women's periodicals, including the monthly *Nova khata* and the weekly *Zhinocha dolia*.

Relations between the SU and other Ukrainian organizations were generally good through the 1920s, and the involvement of women in Ukrainian civic life was viewed as desirable. The union maintained a high degree of internal cohesion by concentrating on specific programs and immediate concrete issues and maintaining a moderate political stance, which effectively put theoretical questions of ideology in a secondary position. In the 1930s the situation changed dramatically. The Union of Working Women was formed in 1931 (initially as the Women's Hromada) under the auspices of the Ukrainian Socialist Radical party as a breakaway group of political radicals from the SU. The Ukrainian Catholic church defended the traditional role of women and linked the sort of female consciousness demonstrated by the SU with socialism and atheism as well as with the destruction of the family and the moral fiber of society. In the 1930s an increasing number of Catholic lay bodies were formed, and competed for the loyalties of Ukrainian women. The OUN, also a proponent of a conservative role for women in society, likewise engaged large numbers of potential SU recruits (particularly among the young). Finally, in the mid-1930s a drive by the co-operative society **Silskyi Hospodar* to increase its female membership throughout the countryside was launched before discussions regarding SU co-operation had been completed. Relations between the two groups soured as a result.

The SU executive maintained ties with international women's organizations. In 1923 the SU became a member of the International Women's Union and participated in its congresses in Rome (1923), Paris (1926), Berlin (1929), and Marseille (1933). The SU had a section in the International Women's League of Peace and Freedom (WLPF) headed by B. Baran. An official WLPF representative, M. Sheepshanks, attended the 1934 Stanyslaviv congress. The co-operative section of the SU was also a member of the Women's Co-operative Guild and participated in its congresses in Vienna (1931), London (1933), and Paris (1937).

In 1938 the Polish authorities disbanded the SU. The SU executive then founded **Druzhyna Kniahyni Olhy* to maintain some organizational continuity until it was possible to operate legally again. The new organization had a predominantly political profile and appealed mainly to the SU leadership and intelligentsia. Rank-and-file members usually joined local community associations (particularly *Silskyi Hospodar* and *Prosvita*) until the SU was again allowed to function. The SU was disbanded following the Soviet occupation of Galicia in 1939.

The presidents of the SU were Ye. Makarushka (1917-22), K. Hrynevychyeva (1923-4), M. Biletska (1924-5), O. Fedak-Sheparovych (1925-6), M. Dontsova (1926-7), I. Vitkovytska (1927-8), and M. Rudnytska (1928-39). Also prominent in the association were M. Biliak, K. Malytska, Ya. Ostrovska, I. Pavlykovska, M. Bilozor, O. Dzhydzhora-Dzoba, A. Horokhovych, Hurhula, and N. Selezinka.

Among the notable branch heads were S. Olesnytska and A. Rubleva (Stanyslaviv), M. Vesolovska (Stryi), S. Chor-pita (Kalush), M. Martynuk (Staryi Sambir), O. Malko (Velyki Mosty), S. Hryniv (Buchach), and M. Khoptiak (Rohatyn).

The SU was revived on 21 February 1990 at a conference in Lviv. At the constituent congress held in Kiev in December 1991, A. Pashko was elected president of the SU.

L. Burachynska

Union of Ukrainian Women of Volhynia (Soiuz ukrainok Volyni). Established in 1921 and disbanded by the Polish government on 3 June 1938, this organization of women considered itself part of the *Union of Ukrainian Women in Galicia, although a formal merger of the two organizations was prohibited by the Polish government. The union, which in the early 1920s showed signs of becoming a mass organization, had been reduced to 500 members by 1936. It promoted modernization in the villages through a network of village circles, established day-care centers and summer camps, organized trade courses, and promoted a program that enabled Volhynian girls to study in Ukrainian schools in Galicia. Among the most active women in the union were P. Bahrynivska, O. Pidhirska, M. Volosevych, I. Prisnevskva, and O. Levchanivska.

Union of Ukrainian Workers in France (Obiednannia ukrainskykh robotnykiv u Frantsii, or OURF). A community, cultural, and professional organization established in 1945. Over 6,000 Ukrainians have belonged to the union. It was most active in 1950–1, when it had 63 branches, 3,617 members who belonged to various trade unions, and 402 free members. Its official press organ in 1945–60 was the weekly **Ukrainets' u Frantsii* (later *Ukrainets'*). Working in co-operation with French Christian trade-union organizations, the OURF initiated the Ukrainian émigré trade-union movement. In 1949 it established the Confederation of Ukrainian Free Professional Organizations (KUVPO), which joined the International Confederation of Christian Trade Unions in 1951. Leading members of OURF included O. Forsyk, V. Nesterchuk, P. Polishchuk, I. Popovych, and Yu. Zablotsky. Because of large-scale emigration to North America in the 1950s, OURF membership declined. After the French Christian Trade Union (CFTC) split up in 1964, the union declined until it ceased activities in 1971.

Union of Ukrainian Working Women (Soiuz ukrainskykh pratsiuiuchykh zhinok). A central women's organization which was active in Galicia in 1931–9 and was linked ideologically and organizationally with the Ukrainian Socialist Radical party (see *Ukrainian Radical party). Established initially as the Women's Hromada, it had county branches and local women's hromadas numbering 148 in 1939. The Polish authorities banned the organization from Volhynia and restricted it to Galicia. Its membership reached 7,800, of which almost 95 percent were peasant or working-class women. The hromadas organized cultural events and circles of the Samoosvita popular university. The union published the semimonthly

**Zhinochyi holos*. Its leadership consisted of I. Blazhkevych (president), N. Mykytchuk and L. Muryn (vice-presidents), and F. Stakhiv (secretary).

Union of Ukrainians in Poland (Obiednannia ukrainstiv v Polshchi). See Ukrainian Social and Cultural Society.

Union of Ukrainians of France (Obiednannia ukrainstiv u Frantsii, or OUF). A cultural and social organization established in 1948. Until 1965 it co-operated closely with the *Union of Ukrainian Workers in France (OURF) by concentrating on social development while the latter developed trade-union programs. In 1965 the OUF had about 300 members and 250 supporters; branches in Sochaux, Thionville, Rombas, Mulhouse, Metz, Le Cateau, Denain, Lyon, and Vésines-Chalette; and affiliates in Sarrebourg and Villetupt. In 1989 it had about 200 members and 200 supporters. It owns a building in Sochaux and in December 1978 bought a vacation resort named Verkhovyna in Rosey, near Vesoul. In 1986 the French Ministry of Youth and Sports officially recognized the OUF as a popular educational association. In 1953–67 the union ran a publishing operation, which was taken over by L'Est Européen publishers in 1967. The presidents of the OUF have been V. Nesterchuk (1949–54), O. Melnykovich (1955–60), and V. Kosyk (1961–).

Union of Welfare (Russian: Soiuz blagodenstviia). A clandestine political organization which arose out of the *Union of Salvation at the beginning of 1818 in St Petersburg. Its goal was to abolish serfdom and absolutism and to transform the Russian Empire into a constitutional monarchy or (from 1820) a centralized republic. The union was headed by a central executive to which local executives were subordinate. In Ukraine there was a local branch in Tulchyn, and branches were to be set up in Poltava and Odessa. The union had about 2,000 members. Among its Russian members were M. Orlov, N. Turgenyev, P. Pestel, N. and A. Muravev, Prince S. Trubetskoi, Prince S. Volkonsky, and M. Lunin. Some members were Ukrainians by descent or were closely linked with Ukraine, among them S. and M. Muravev-Apostol, S. Krasnokutsky, V. Lukashevych, O. Yakubovych, O. Myklashkevsky, S. and O. Kapnist, P. Horlenko, A. Rodzianko, L. and V. Perovsky, N. Fylypovych, V. Davydov, and M. Novikov. After January 1821 the union was replaced by the two main Decembrist organizations, the *Southern and the Northern societies.

Union of Writers of Ukraine. See Writers' Union of Ukraine.

Union of Young Artists of Ukraine (Obiednannia molodykh mysttsiv Ukrainy, or OMMU). An artists' organization established in 1929 by graduates of the Kiev State Art Institute who rejected the tenets of the Association of Artists of Red Ukraine and the *Association of Revolutionary Art of Ukraine and promoted, instead, 'utilitarian revolutionary art.' As a group OMMU first appeared before the public at the Second All-Ukrainian Art Exhibition held in several cities in 1929. Among its members were S. Raievsky, O. Pashchenko, S. Hryhoriev, and H. Pyvovarov. OMMU was dissolved by the Party in 1932.

Unions of zemstvos and cities. Organizations in the Russian Empire set up after the outbreak of the First World War for the purpose of assisting the Russian army with supplies and road-building in the war zone and aiding wounded soldiers and (beginning in 1915) war refugees. Until July 1915 the All-Russian Zemstvo Union (Vserossiiskii zemskii soiuz) and the All-Russian Union of Cities (Vserossiiskii soiuz gorodov) acted independently of each other. Then their work was co-ordinated by the United Committee of Unions. Each union had its head office in Moscow, which represented a network of county, gubernia, and war-front committees. In Ukraine the Union of Cities of the Southwestern Front was headed by T. Shteingel, and numbered among its employees M. Biliashvsky, A. Viazlov, D. Doroshenko, I. Kraskovsky, V. Leontovych, F. Matushevsky, A. Nikovsky, and V. Ulianytsky. The Zemstvo Union of the Southwestern Front was headed by S. Shlykevych. From 1916 S. Petliura was plenipotentiary of the unions of zemstvos and cities at the western front. Subsidized by the government, the unions helped the population of Galicia and Bukovyna during the Russian occupation as well as refugees from Galicia. Ukrainian women organized a number of hospitals (even in Petrograd) for Ukrainian soldiers. Hundreds of Ukrainians worked in the unions and acquired managerial and administrative skills, which later proved useful in the setting up of a Ukrainian state. The zemstvo and city unions in Ukraine continued their work in a modified form under the Central Rada and Hetman regimes. Until June 1915 their main offices were in Lviv and then Kiev.

Uniontown. A city (1988 pop ca 35,000) in southwestern Pennsylvania, with approx 1,500 residents of Transcarpathian origin. The first Ruthenian church, St John the Baptist, was established in 1921. A convent of the Sisters of St Basil the Great was built on Mount St Macrina in 1934, and eventually it became the motherhouse of the order's Ruthenian province. A senior citizens' home (1947), a nursing home (1970), and a novitiate were added to the convent, which today houses about 50 nuns. The bilingual (Ruthenian-English) monthly *Voice from Mount St Macrina* (1948-70) was published there. Mount St Macrina is a site of annual pilgrimages.

Unitarians. See Socinians.

United Hetman Organization (Soiuz hetmansiv derzhavnykiv, or SHD). A Ukrainian monarchist organization dedicated to the restoration of a Ukrainian hetman state under P. *Skoropadsky, which developed independently in Canada and the United States during the inter-war era. The organization grew out of *Sich sporting societies that had been formed in North America in the early part of the century. The impetus for their transformation came from the influence of O. *Nazaruk, a leading conservative Ukrainian ideologue, who came to North America in the early 1920s. Both in Canada and the United States the hetman movement had the implicit support of the Ukrainian Catholic church.

In Canada the SHD was preceded by the *Canadian Sich organization. Proclaiming a clearly monarchist ideology, the group published *Probiti, Kanadiis'ka Sich*, and (from 1934) *Ukrains'kyi robitnyk*. It acquired real estate holdings and spread to western Canada after V. Bosy obtained a

The central executive of the United Hetman Organization of America and Canada in 1937-8. Sitting, from left: Stefan Muryn, Anna Matychak, Bohdan Pelekhovych, Supreme Otaman Mykola Hul, Col Oleksander Shapoval, Ivan Duzhansky, Hryhorii Matviiv; standing: Mykhailo Soltys, Mykhailo Baran, Mykola Kulak, Mykola Moranets, Petro Luchkiv, Tymko Kryvvoviaz, Vasyl Sydoruk

teaching position in Yorkton, Saskatchewan. Its members devoted much energy to military training and even acquired several aircraft. In 1934 the group formally reconstituted itself as the SHD. It reached the height of its development around the time of the visit of D. *Skoropadsky, the hetman's son and successor, to North America in 1937-8. In 1940 it became one of the founders of the Ukrainian Canadian Congress, but then declined during the war. A split in the group in 1952 further weakened it, and *Ukrains'kyi robitnyk* ceased publication in 1958. The SHD subsequently published *Nasha derzhava* and *Bat'kivshchyna*.

In the United States the Sich societies began a process of centralization and militarization that culminated in the election of S. *Hrynevetsky as supreme otaman (head) at the 1922 convention, where resolutions were passed mandating the transformation of each branch into a *sotnia* (company) and each branch head into a *sotnyk* (captain or company commander). Hrynevetsky subsequently expanded the association's paramilitary trappings and developed its monarchist ideological character (the group was now called Hetman Sich). In 1924 Hrynevetsky received his **bulava* of office and pledged fidelity to Hetman P. Skoropadsky. With tacit support from the Ukrainian Catholic church, the Hetman Sich established a Ukrainian 'liberation army.' In 1930 hundreds of Sich members joined the American militia (now the National Guard). Permitted to form their own separate companies, they believed their American-trained force would someday become part of a Ukrainian liberation army. The final step in the development of a Ukrainian fighting force was the creation of a Ukrainian 'air corps.' During the 1930s the Hetman Sich obtained three airplanes - two biplanes and a four-passenger monoplane - named *Ukraina*, *Lviv*, and *Kiev*. In spite of substantial opposition and defections (with many previous supporters becoming adherents of the Organization for the Rebirth of Ukraine), the group continued its activities, and its members increasingly began to seek military training within the US National Guard or with their own resources. In 1930 the Sich organization was formally reconstituted as the SHD. In 1938 the SHD was investigated by the (congressional) Dies Committee, and

in 1940 by the FBI, for possible subversive activities. Although no direct charges were ever laid, the probes undercut member support drastically and resulted in the group's dissolution in 1942. A successor body of sorts (the Ukrainian Hetman Organization of America) was established in 1943 by figures such as O. Bilovus, M. Simenovich-Simens, and P. Zaporozhets, but failed to generate mass support.

United Nations (Obiednani natsii). An international organization set up by charter on 24 October 1945 for the purpose of preserving peace and security through co-operation among nations and international justice based on the principles of equal rights and the self-determination of nations. The United Nations (UN) is the successor of the *League of Nations. The Ukrainian SSR was one of its 51 founding members.

The Ukrainian delegation was one of three Soviet delegations to the founding conference in San Francisco. Its head, D. *Manuilsky, chaired the commission writing the preamble and the first section of the UN Charter. The Ukrainian SSR took part in many UN conferences, such as the 1949 Geneva conference on war victims, the 1954 Hague conference on protecting cultural property during armed conflict, the 1958 and 1960 conferences on maritime law, and the 1961 conference on diplomatic relations. It served twice as a nonpermanent member on the Security Council (1947–9, 1985–7) and once on the Economic and Social Council (1946). It was a coauthor and cosponsor of many resolutions during the first decade of the UN. The Ukrainian SSR was a member of nine UN agencies: the International Atomic Energy Agency, International Labour Organization (ILO), International Telecommunication Union, United Nations Educational, Scientific and Cultural Organization (UNESCO), UN Industrial Development Organization, Universal Postal Union, World Health Organization, World Organization for the Protection of Intellectual Property, and World Meteorological Organization. Its most active role was in UNESCO. Ukraine was conspicuously absent from the major international bodies, however. In 1945 the Ukrainian SSR and the USSR jointly ratified the statute of the International Court of Justice but refused to submit to the court's compulsory jurisdiction. Similarly, Ukraine accepted ILO labor conventions, but Soviet trade unions refused to apply them. Finally, the Ukrainian SSR was represented on some committees and commissions established by UN agencies or intergovernmental organizations outside the UN system.

The Ukrainian SSR signed some 120 treaties, agreements, conventions, declarations, and acts. The most important among them, besides the UN charter itself, are the *Paris Peace Treaties of 1947, the Universal Declaration of Human Rights (1948), and the Moscow Treaty limiting the testing of nuclear weapons (1963). (See also *Treaties.)

Despite the aforementioned activities, until Ukraine's declaration of independence in August 1991 its role in the UN amounted to little more than one of assisting Soviet diplomacy. L. Kravchuk's appearance at the UN in October 1991 signaled the future independent status of Ukraine among the nations of the world. The first independently appointed Ukrainian representative to the UN was V. Batiuk (1992–).

T. Kis

United Nations Educational, Scientific, and Cultural Organization (UNESCO). A United Nations agency established on 4 November 1946 to facilitate international co-operation in nonpolitical endeavors. It had 158 member countries and approx 250 nongovernmental organizations with consultant status by 1987. UNESCO's main offices, located in Paris, include a publishing house (Office des Presses de l'Unesco), which produces 26 periodicals in various languages. The Ukrainian SSR, as a full member of the *United Nations (UN), joined UNESCO on 12 May 1954. It was represented by Yu. Kochubei (later deputy minister for external affairs of the Ukrainian SSR and deputy director general of UNESCO), M. Reshetniak, A. Zlenko, V. Skofenko, and O. Slipchenko. In 1980–5 the representative of the Ukrainian SSR, H. Tsvetkov, was a member of the Executive Board. In 1974–9 the UNESCO museum division was headed by Yu. Turchenko. In 1956 the Council of Ministers of the Ukrainian SSR created the UNESCO Commission of the Ukrainian SSR, which includes over 50 representatives of state educational and civic institutions. The commission drafted plans for UNESCO work and co-ordinated the work of UNESCO committees on scientific programs (geological co-operation, hydrological program, the oceanographic commission, the study of Slavic cultures, and so forth) in the Ukrainian SSR.

An international UNESCO conference of Slavists (with approx 200 participants) took place in Kiev in 1979. The *Biuletyn' Komisii URSR u spravakh IuNESKO* was published in many foreign languages from 1970. As well, the pamphlet *Ukraina – chlen IuNESKO* (Ukraine: A Member of UNESCO, 1966), by M. Petrachkov and T. Kovalenko-Kosaryk, and A. Zlenko's *UNESCO and Problems of the Present* (1984) have appeared in print. As part of its work, UNESCO has produced the following: G. Chevchuk, *La politique culturelle dans la République socialiste soviétique d'Ukraine* (1981; also in English), the album *Sculpture et architecture de bois* (1981), L. Novychenko's *Taras Shevchenko* (1982), and *Antolohiia ukrains'koi radians'koi poezii* (Poetry of Soviet Ukraine's New World: An Anthology, 1986). UNESCO has celebrated the 150th and 175th anniversaries of the birth of T. Shevchenko, the 250th anniversary of the birth of H. Skovoroda, and the centenary of the birth of Lesia Ukrainka, I. Franko, and Ye. Paton, and has staged a festival of films by O. Dovzhenko (1984). In 1983 UNESCO took part in the celebration of the 1,500th anniversary of the founding of Kiev, and in 1988 the commemoration of the millennium of Christianity in Ukraine.

Before Ukraine declared its independence the UNESCO representatives of the Ukrainian SSR, like those in other international organizations, followed closely a common Soviet policy.

A. Zhukovsky

United Nations Relief and Rehabilitation Administration (UNRRA). An international organization created by the Allied and associated powers to plan, co-ordinate, and administer relief (food, fuel, clothing, shelter, medical, and other essential services) for victims of war in areas controlled by the Allied powers. Its objectives also included assistance in returning prisoners and exiles to their homes and help in the re-establishment of agricultural and industrial production. These goals were broadly outlined in the General Agreement signed on 9 November 1943 by 44 governments. The UNRRA was governed by a

council, a central committee (initially consisting of representatives from China, the USSR, the United Kingdom, and the United States), a committee on supplies, regional and other special committees, and a director general with the authority to carry out relief operations. Because of special circumstances the Ukrainian and the Belorussian SSR were admitted to the council on 13 August 1945.

Ukrainian children in the Munich-Freimann DP camp

The UNRRA conducted operations only in the occupation zones of the Western powers, since Soviet authorities did not invite the agency into their occupation zones in Germany and Austria. In providing assistance UNRRA officials worked closely with many voluntary relief agencies, which were granted a special status. Neither the *United Ukrainian American Relief Committee nor the *Ukrainian Canadian Relief Fund was approved by the UNRRA, because a number of its members, including the governments of Canada and the United States, found their anticommunist political activities to be unacceptable. At the peak of its operation, in August 1946, the UNRRA employed a staff of 24,976 and operated 29 servicing or supply offices and 16 missions in receiving countries. Its total resources, based on contributions and receipts, were almost four billion US dollars. It took two years to dismantle the UNRRA and to transfer its functions to new international agencies, such as the World Health Organization (WHO), Food and Agriculture Organization (FAO), International Children's Emergency Fund (UNICEF), and *International Refugee Organization (IRO). The UNRRA was closed formally in September 1948.

The Ukrainian SSR. Prior to the Third Council Session (August 1945) the Soviet Union applied to the UNRRA for 700 million dollars' worth of relief and rehabilitation supplies. After surveying conditions in the USSR, American, British, Canadian, and Soviet representatives agreed on a substitute program for Ukraine and Belorussia worth 250 million dollars: 189 million dollars for Ukraine and the rest for Belorussia. The allocations were free, because neither republic had any foreign reserves. The formal agreement between Ukraine and the UNRRA was signed on 18 December 1945 by Director General H. Lehman and A. Baranovsky, a member of the UNRRA Council for the Ukrainian SSR; the target date for the completion of the aid program was 1 July 1946. The UNRRA mission did not arrive in Kiev until 20 March 1946. It was headed by M. MacDuffie (to June 1946) and then by P. White (August 1946 to August 1947) and consisted most of the time of seven members, including a supply officer and a medical officer. The UNRRA mission at Kiev was slotted for a staff

of 15, but a full complement was never realized; at its peak, personnel at the Ukraine mission numbered 10. UNRRA agricultural and industrial rehabilitation specialists were turned down, supposedly because Soviet experts were better acquainted with Soviet practices and needs.

The mission's chief task was to monitor the distribution of UNRRA supplies. Distribution decisions were worked out not by the mission, but by the host government Supplies Administration and the individual ministries. Approximately 55 percent of all UNRRA goods were allocated for sale, and the remaining 45 percent were distributed free in the most devastated areas. Since most rural districts were considered self-sufficient, the food was directed mainly to urban areas. The food that was sold was offered at fixed prices to ration-card holders. Both prices and rations were determined by USSR authorities. Ration scales were in place throughout 1946 and most of 1947. Information on food rationing was never released to the UNRRA mission because it was considered strategic data. According to UNRRA estimates approx 10 percent of the food imported was distributed to welfare institutions, particularly to children's homes.

Food imports comprised slightly more than 50 percent of the total dollar value of relief and rehabilitation provided for Ukraine (see table 1). Since Ukraine was considered self-sufficient in grain production, wheat or wheat flour was not included in the program, despite the bad harvest of 1946-7. Next in dollar value came industrial rehabilitation goods, notably 'protocol goods,' such as power stations, that had been ordered from Britain in 1942, as well as items such as locomotives, trucks, bulldozers, cranes, integrated plants, and raw metals for repairing telecommunications and electrical systems. Agricultural rehabilitation included 18,240 gross long tons of seeds (vegetable, grass, and clover) and 1,500 tractors. Medical supplies constituted the smallest share of the commodities, and all of them were delivered by March 1947: drugs, chemicals, field-hospital equipment, X-ray and dental equipment, and major components for a penicillin plant.

TABLE 1
UNRRA supply deliveries to Ukraine

Category	US dollar equivalent	Gross long tons
Food	99,437,700	315,748
Clothing, textiles, and footwear	17,207,700	16,225
Medical and sanitation	2,445,500	1,037
Agricultural rehabilitation	16,988,900	38,069
Industrial rehabilitation	52,119,500	95,970
Total	188,199,300	467,049

The UNRRA wanted public recognition of its contribution to Ukraine's rehabilitation. Since no provision for acknowledgment was made in the agreement except for a clause concerning UNRRA labels on goods, little press was given to the UNRRA relief effort in Ukraine.

Displaced persons. In 1946, after the initial stage of repatriation, an estimated 1.2 million *displaced persons remained in Europe. Nearly 200,000 of them were Ukrainians. Thanks to resettlement, by 1947 the number had been reduced to approx 125,000. As a rule they lived in displaced persons' camps in the Western occupation

TABLE 2
Displaced persons under UNRRA care or supervision

	December 1945	September 1946	June 1947
In Germany:			
Ukrainians*	—	—	99,078
Poles	427,407	302,725	136,180
Balts	132,098	176,362	148,776
Yugoslavs	18,029	14,439	9,324
Jews	14,000	120,849	134,864
Others	85,874	81,255	30,629
In Austria:			
Ukrainians†	9,190	—	7,471
Poles	11,236	9,239	2,899
Balts	1,594	2,270	1,841

† Reported mainly under Poles and partly under Yugoslavs and others in September 1946

zones of Germany and Austria. In June 1947 about 106,500 Ukrainians were under the care or supervision of the UNRRA (see table 2).

*Repatriation became a most difficult issue for the UNRRA. The USSR authorities, in keeping with the council's resolutions, demanded that assistance be withheld from displaced persons who refused to be repatriated. Under the expanded legal definition of Soviet national, which embraced Ukrainian inhabitants of prewar Poland, most Ukrainian displaced persons were subject to repatriation. The Ukrainians, Balts, and so-called *Volksdeutsche* who refused to be repatriated found some support among council members. After long debate UNRRA assistance was extended to this category of refugees. Bowing to Soviet pressure, the UNRRA, however, promoted repatriation by removing practical obstacles, providing personal information to governments of origin, removing UNRRA personnel who opposed repatriation, and expelling from its camps activists resisting repatriation.

Since supplies were controlled by the military, the primary function of the UNRRA was to distribute the goods. The military was also responsible for health care. Supervision of the medical and sanitation program was assumed at the end of 1945 by the UNRRA. The agency developed a comprehensive vocational training program which equipped several thousand Ukrainians with the skills necessary to emigrate overseas as contract laborers. Since American authorities were opposed to using UNRRA funds for academic or religious instruction, academic education was organized by self-governing bodies set up within the various DP camps. Over a hundred Ukrainian elementary schools and some 35 Ukrainian gymnasiums were opened. The daily regimen of camp life was administered by self-governing bodies which technically were subordinate to the UNRRA. An international university, UNRRA University, was organized in Munich, and many Ukrainians taught or studied there. In this context social, cultural, religious, and political life among the Ukrainian refugees flourished. Recreational associations and theatrical groups proliferated, churches sprang up, and a publishing

center prospered in Neu-Ulm. When the UNRRA was dissolved, its functions were assumed by the IRO.

B. Kordan

United Societies of Greek Catholic Religion in the USA (*Sobranie greko-kafolicheskikh tserkovnykh bratstv*). A fraternal organization founded in 1903 as a breakaway group from the *Greek Catholic Union of the USA (GCU). It was established by Transcarpathian Ukrainian immigrants who were opposed to the GCU's openly antagonistic stance toward the Greek Catholic church leadership in the United States. Based in the Pittsburgh suburb of McKeesport, it has published the newspaper *Rusin* (1910–16) and its successor *Prosvita* (from 1917). In 1982 the group had 3,900 members in 58 lodges.

United States of America. A federal republic on the North American continent with an area of 5,797,472 sq km. In 1990 the official US population was 248,709,873. The 740,803 Americans of Ukrainian origin (0.30 percent of the total) form the 26st-largest American ethnic group.

Immigration. Isolated individuals from what is today Ukraine began arriving with the first white settlers in the New World. Ukrainian-sounding names appear in references to and in the records of the Jamestown colony in Virginia and of New Amsterdam (now New York), in the rolls of the American revolutionary army, and in the US census of 1790.

Rev Ahapii Honcharenko and visitors on his homestead in Hayward, California, in the late 1880s

The first documented Ukrainian on American soil was Rev A. *Honcharenko, an Orthodox priest. After arriving in 1865 and settling eventually in San Francisco, he began publishing the *Alaska Herald*, a bilingual (Russian-English) newspaper aimed at the Slavic inhabitants of America's newly acquired territory. The first issue of his publication contained a short article about Taras Shevchenko and his ideals as well as a Russian-language translation of the United States Constitution.

The first wave of mass Ukrainian immigration to the United States began in the late 1870s and ended in 1914. The majority of the approx 250,000 immigrants who arrived during this period were single young men. Most of the earliest arrivals came from the Ukrainian borderland region of Transcarpathia, then under Hungarian rule. They possessed little awareness of a Ukrainian national identity and generally regarded themselves, in a regional sense, as 'Rusyns' (*Ruthenians) or 'Uhro-Rusyns' (Hungarian-Ruthenians). After 1900 a greater number of immi-

grants began to arrive from the more nationally conscious region of Galicia. The primary goal of both types of Ukrainian immigrants was economic improvement in the face of land shortages and a chronically depressed agrarian economy.

A second wave of mass Ukrainian immigration began in 1920 and ended in 1939. Immigration restrictions imposed by the US Congress in 1921 and 1924 limited the number of Ukrainians immigrating to the United States during this period to approx 20,000. Although most of the new arrivals came to improve their economic situation, some were political refugees fleeing persecution by the Soviet, Polish, Rumanian, or Czechoslovakian authorities. The second wave differed from the first in that it included people who had participated in Ukraine's struggle for national independence, were keenly aware of their Ukrainian heritage, and, generally, were literate.

The third wave of Ukrainian immigrants to the United States arrived between 1947 and 1955. Almost all were *displaced persons from the refugee camps of Austria and Germany. The *United Ukrainian American Relief Committee, a charitable organization founded in 1944, had sponsored some 33,000 incoming Ukrainians by 1952. Relaxed immigration restrictions provided by the Displaced Persons Act of 1948 permitted a total of approx 85,000 new Ukrainian immigrants to enter the United States. The majority were from Western Ukraine, most were literate, and a relatively high percentage (compared to the previous immigrations) had had some higher education.

No more than 7,000 Ukrainians have immigrated to the United States since 1955. With the exception of Ukrainian Jews and a few human-rights dissidents, who arrived from Soviet Ukraine, most recent Ukrainian immigrants have resettled from other countries, primarily Argentina, Brazil, Chile, Paraguay, Australia, and Venezuela.

Population. Because the earliest Ukrainian immigrants had little sense of their national identity, and the concept of Ukrainians as a distinct people was largely unknown in the United States prior to 1917, Ukrainians were often labeled by immigration officials as Austrians, Hungarians, Poles, or Ruthenians. Furthermore, US census statistics have been suspect until recent times, when mother-tongue and ethnic ancestry questions have been added to census forms. As a result, tallying the number of Ukrainians in the country has been problematic. The 1930 census, for example, listed 68,500 Ukrainians at a time when Ukrainian scholars, such as Y. Chyz and W. Halich, were estimating the total Ukrainian population as between 650,000 and 900,000. The 1950 census listed 79,800 Ukrainians, half of them American-born. The 1960 census recorded 107,000 persons who listed Ukrainian as their mother tongue, and in 1970 the number jumped to 249,351. The 1980 census, which included an ethnic ancestry question, counted 730,056 Ukrainians. Only 52 percent (381,054), however, claimed single Ukrainian ancestry. V. Kubijovyč estimated that there were up to 1.5 million Ukrainians in the United States.

Settlement and distribution. Most Ukrainians who immigrated to the United States prior to the First World War settled in Pennsylvania and, in smaller numbers, in New York, New Jersey, Michigan, Ohio, Illinois, Connecticut, Massachusetts, and Rhode Island, where they usually worked in factories. With the exception of the growing Ukrainian population in the warmer states of Florida

TABLE 1
Percentage of Ukrainians in the United States by state,
selected years, 1930-90

State	1930	1940	1970	1980	1990
Pennsylvania	22.4	32.0	19.8	19.7	17.5
New York	28.4	23.3	20.9	17.5	16.4
New Jersey	10.1	9.4	13.3	11.1	10.0

Massachusetts	3.2	2.9	1.7	2.3	2.4
Minnesota	1.2	1.2	-	1.3	1.4
Rhode Island	1.0	1.3	-	0.5	0.5
Missouri	-	0.6	-	0.6	0.6
California	-	-	4.4	6.8	7.6
Florida	-	-	1.3	3.5	4.6
North Dakota	-	1.4	-	0.4	0.5
Maryland	0.6	-	-	1.9	2.1

(where some Ukrainians have established retirement communities) and California (where employment rates are usually high), this pattern of settlement has remained relatively stable (see table 1). Only a small number of Ukrainians have followed agricultural pursuits. Prior to the First World War Ukrainian farm communities were established in North Dakota, Wisconsin, Michigan, Virginia, Maryland, Connecticut, Georgia, and Texas. Ukrainians also lived in Hawaii as contract workers, often under abominable conditions.

Some of the first Stundists who emigrated from Russian-ruled Ukraine in North Dakota in the late 1890s. From left: Ivan Sypchenko, Havrylo Kuzenny, Ivan Yukhymiv, Yukhym Sych

During the First World War many Ukrainian workers were attracted to the cities by war industries; Ukrainian communities in Allentown-Bethlehem (Pennsylvania), Baltimore, Boston, Buffalo, Chicago, Cleveland, Detroit, Minneapolis, Newark (New Jersey), New Haven (Connecticut), Rochester (New York), Youngstown (Ohio), and Wilmington (Delaware) consequently developed or expanded. Most of these centers continued to grow during and after the Second World War as a result of both the

TABLE 2
Estimated number of Ukrainians in the most populous
US metropolitan areas, 1980

1. New York	56,340
2. Philadelphia	52,740
3. Chicago	37,420
4. Detroit	34,640
5. Pittsburgh	34,200
6. Newark	23,920
7. Cleveland	20,220
8. Los Angeles	19,660
9. Nassau-Suffolk, NY	18,440
10. NE Pennsylvania	14,420
11. Allentown-Bethlehem	11,440
12. New Brunswick (PA)-Sayreville (NY)	11,200
13. Washington, DC	10,180
14. Buffalo, NY	10,020
15. Youngstown-Warren, OH	9,460
16. Rochester, NY	8,860
17. Minneapolis-St Paul, MN	7,720
18. Syracuse, NY	7,420
19. Boston, MA	7,060
20. Baltimore, MD	7,020
21. Albany-Schenectady-Troy, NY	6,840
22. San Francisco-Oakland	6,700
23. Fort Lauderdale-Hollywood, FL	6,180
24. Patterson-Clifton-Passaic, NJ	5,820
25. Anaheim-Santa Ana-Garden Grove, CA	5,720
26. Tampa-St Petersburg, FL	5,180
27. Jersey City, NJ	5,120
28. Long Branch-Asbury Pk, NJ	4,480
29. San Diego, CA	4,440

burgeoning war economy and the influx of new immigrants. Visible Ukrainian communities also emerged in San Francisco, San Diego, Los Angeles, Phoenix, Denver, Tampa-St Petersburg, Miami, Fort Lauderdale, Houston, and Washington (DC).

In 1980 the largest concentrations of Ukrainians were found in the metropolitan areas of New York City, Philadelphia, Chicago, Detroit, Pittsburgh, Cleveland, and Newark (see table 2). Distinct Ukrainian neighborhoods were fading, however. In New York (between East 2nd and East 14th Streets in Lower Manhattan) and Chicago (between Rockwell, Damen, Superior, and Division) one can still find local churches, stores, youth and community centers, banks and credit unions. In Detroit and Cleveland, however, the center of Ukrainian life has shifted to the suburban towns of Warren and Parma respectively.

Socioeconomic development. According to US immigration records, 97.2 percent of the 174,375 'Ruthenians' who arrived in the United States between 1899 and 1910 had been peasant farmers, unskilled laborers, or servants. A mere 0.06 percent (109 persons) claimed to be professionals or business people. Not surprisingly, fewer than 1 percent went into business, usually a grocery store, butcher shop, or tavern.

After the First World War the number of Ukrainians who went into business increased. Grocery stores predominated (some 2,000 in 250 communities were recorded in 1934), but bakeries, restaurants, pharmacies, hardware stores, funeral homes, service stations, barber and beauty salons, laundries, and window-cleaning establishments were also owned and managed by Ukrainians. According to a survey conducted by W. Halich, there were some 1,207 professionals in the United States in 1937. Of this

number, 625 were clergymen, 262 teachers, 68 attorneys, 66 nurses, 61 physicians, and 34 engineers.

The socioeconomic profile of the third immigration revealed a greater number of professionals and persons with skills. Among the Ukrainians living in Germany's displaced persons camps in 1948 (many destined to move on to the United States), 12.3 percent were professionals, business people, or administrators; 26.6 percent skilled laborers; and 61 percent unskilled or farm workers. By 1965 there were 1,200 Ukrainian physicians in the United States, 700 engineers, 150 lawyers, almost 2,000 school teachers, 250 college and university professors, nearly 200 librarians, and over 100 veterinarians. According to the 1970 census 22.4 percent of Ukrainian-American males were either professionals or administrators, 23.7 percent craftsmen, 20.4 percent skilled laborers, 22.5 percent unskilled laborers, and 11 percent service or farm workers. The annual median income for Ukrainian-American males, however, was only 6,200 dollars, 500 dollars less than the US average. For Ukrainian-American females, in contrast, the annual median income was 3,000 dollars, 900 dollars more than the US average. In terms of education, 9.1 percent of Ukrainian-American males and 2.5 percent of Ukrainian-American females had completed 17 or more years of schooling.

The 1980 census identified groups according to ancestry, and so gave a more complete and accurate socioeconomic profile of Ukrainians. In 1980, 10.2 percent of Ukrainian-American males held managerial positions; 8.5 percent were professionals; 5.3 percent were in education at all levels; 5.9 percent were artists, athletes, or technicians; 27.7 percent were in direct sales or sales-related fields; 12.3 percent were in the service industry; 1.3 percent were employed in agriculture and mining; 24.3 percent were skilled laborers; 4.2 percent were unskilled laborers; and 0.4 percent were unemployed. The 1980 educational picture showed that 11.1 percent of Ukrainian males and 5.6 percent of Ukrainian females had completed 17 or more years of schooling; this figure was above the US national average of 10.2 and 5.3 percent respectively. Individual income for males was 13,150 dollars (958 dollars above the US average) and 6,123 dollars for females (861 dollars above the US average).

The first Ukrainian business ventures were grocery stores established in Shenandoah, Pennsylvania, in 1887. The stores were later combined to form the so-called Co-operative General Store, which had expanded to five neighboring cities by 1889. The co-op movement began to decline after 1910 and by 1936 Ukrainian co-ops existed in only four American centers. Ukrainians, however, excelled as private entrepreneurs. From an early date Ukrainians owned boardinghouses, saloons, grocery stores, bakeries, and steamship agencies. By 1936 there were 2,723 Ukrainian-owned enterprises, including 847 grocery stores, 487 restaurants, 307 hotels, 46 window-cleaning establishments, and 11 financial establishments. Consumer co-operative stores were opened in Chicago and Philadelphia after the Second World War, but the co-operative movement became static as Ukrainians continued to concentrate on the professions and small business. A few Ukrainians succeeded in establishing or owning their own corporations. Before the Second World War, Dr S. Sochotzky established the Zellotone Chemical Company in New York City; P. Yarosh owned a canning factory near

Orange, Connecticut; and W. Dzus founded a company in West Islip, New York, to produce the industrial fastener he invented. Since the war Ukrainians have established successful engineering firms, tool companies, printing shops, and construction firms.

Ukrainian banking began after 1919 with the establishment of building and loan associations. Usually associated with neighborhood churches, some were able to survive the Great Depression and to re-establish themselves later in new, modern facilities as savings and loan associations. Among those that thrived during the 1950s were Parma Savings and Loan in Cleveland (founded in 1915), Ukrainian Savings and Loan in Philadelphia (1918), Trident Savings and Loan in Newark, New Jersey (1924), and Trident Savings and Loan in Chicago (1935). In 1964 Security Savings and Loan was established in Chicago; the name was changed to First Security Savings Bank in 1984, and by the end of 1988 the institution had assets of 136 million dollars. During the 1950s a number of Ukrainian federal credit unions were opened in major cities throughout the United States. In 1989 the *Ukrainian National Credit Union Association included 32 separate financial institutions, with total assets approaching 300 million dollars.

The first organization of Ukrainian businessmen was established in New York City in 1890. By 1942 it had over 100 members and was called the Association of Ukrainian Businessmen. A Ukrainian Graduates' Club (open to all college graduates) was founded in Detroit in 1939. The Ukrainian Professional Association was established in 1933. Called the Ukrainian Professional Society of North America after the Second World War, the organization faded out of existence in the early 1970s after various professional groups created separate organizations. The Ukrainian Engineers' Society of America and the *Ukrainian Veterinary Medical Association were both founded in 1948. Ukrainian professional groups formed later included the *Association of Ukrainian Lawyers, founded in 1949 and reorganized as the *Ukrainian American Bar Association in 1977; the *Ukrainian Medical Association of North America (1950); the *Ukrainian Journalists' Association of America (1952); the *Ukrainian Catholic Press Association (1952); the *Ukrainian Library Association of America (1961); the *Ukrainian American Association of University Professors (1961); and the Ukrainian Teachers' Association of the USA (1966). Among the most active of all professional groups are the medical doctors, lawyers, and university professors. During the 1980s local professional and business clubs were created in New York, New Jersey, and Washington, DC.

Participation in American political life. Ukrainians were not active in American political life until recently, largely because they lacked the numerical and financial strength to launch successful campaigns for the US House or Senate. Of the 435 congressional districts, Ukrainians are statistically referenced in only 44: 16 in Pennsylvania, 12 in New York, 9 in New Jersey, 3 in Ohio, and 2 each in Illinois and Michigan. Of these 44 districts, Ukrainians account for 1 percent or more of the total population in only 8 (see table 3). Despite the odds, Ukrainians have run for congressional seats in Pennsylvania, Ohio, Illinois, Michigan, and Florida.

A number of Ukrainians have been appointed to significant posts in the federal government. Of these, Dr G. *Kistiakowsky served as a special adviser to President D.

TABLE 3
Congressional districts in which Ukrainians account for 1 percent or more of the population, 1980

State	District no.	Area	Percent Ukrainian
Pennsylvania	3	Northeast Philadelphia	1.3
Pennsylvania	6	Reading	1.1
Pennsylvania	10	Scranton	1.0
Pennsylvania	11	Wilkes-Barre	1.3
Pennsylvania	15	Allentown-Bethlehem	1.2
New Jersey	6	New Brunswick-Perth Amboy	1.2
Ohio	20	Cleveland (central and west) suburbs	1.1
Illinois	8	Chicago (north and northwest)	1.2

Eisenhower for science and technology (1959-61), J. Charyk was an air force undersecretary (1960-3) during the J. Kennedy administration, Dr M. *Yarymovych was deputy director of the Energy Research Development Agency (1975-77), and Dr M. *Kuropas served in the White House under President G. Ford as special assistant to the president for ethnic affairs (1975-6). C. *Warvariv was agency director of UNESCO Affairs in the Department of State (1978-9) during the J. Carter years. Dr L. *Dobriansky was appointed US ambassador to the Bahamas in 1982-6 by President R. Reagan. B. Futey was appointed a federal judge in the US Foreign Claims Court by President Reagan in 1987. D. Bonior (Democrat, Michigan) was elected House majority whip in July 1991.

Ukrainian-American leaders have encouraged involvement in local American politics since the early 1900s. *Svoboda*, the oldest Ukrainian newspaper in North America, urged the creation of local political clubs in every Ukrainian community followed by the establishment of a national political federation. The idea was never realized, and the few chapters that were organized accomplished little. An exception was the Ukrainian American Citizens' Club of Philadelphia, organized in 1909 with the help of Bishop S. *Ortynsky. The First World War and the hope of Ukrainian independence mobilized the Ukrainian community to organize a national political lobby. A 'Ukrainian Day' was proclaimed by President W. Wilson for 21 April 1917, largely as a result of Ukrainian efforts. Ukrainian Americans have lobbied in Washington, DC, ever since then. In 1959 the Ukrainian Congress Committee of America (UKKA) was instrumental in having the US Congress pass Public Law 86-90, which mandated the annual observance of Captive Nations Week during the third week of July. The Ukrainian National Association (UNA) and the UKKA combined forces to press for a statue of Taras Shevchenko on public land in Washington, DC. The statue was unveiled in 1964 during a ceremony which included participation by former President Eisenhower and approx 100,000 Ukrainian Americans. The most successful recent lobbying effort was conducted by Americans for Human Rights in Ukraine on behalf of a US commission to study the 1932-3 famine in Ukraine. The commission was established in 1984, monies were authorized in 1985, and a staff headed by Dr J. Mace was hired in 1986. In 1988 the commission presented a 524-page report to Congress documenting the nature of the famine.

A rally of some 18,000 Ukrainian Americans commemorating the 1932–3 man-made famine in Soviet Ukraine at the Washington Monument on 2 October 1983

Republicans and Democrats have had Ukrainian affiliates since the 1920s, but their effectiveness within both the party and the community has been minimal. Ukrainian Republicans created the Ukrainian Republican Federation in 1969, with 20 state organizations from New York to California. But with the advent of television advertising during national campaigns, the need for special-interest political affiliates has waned. This change in approach has not diminished Ukrainian lobbying activities in the capital, however. The UKKA opened a Washington office in 1977, and the UNA opened its office in Washington in 1988.

Religion. The early immigrants from Western Ukraine were predominantly Greek Catholic (now 'Ukrainian Catholic') in religion. Because early immigrants had no churches of their own, they initially attended the Roman Catholic churches of Poles and Slovaks. They petitioned Metropolitan S. Sembratovych of Lviv for priests from Galicia or Carpatho-Ukraine to serve them, and in 1884 Rev I. Voliansky arrived in Shenandoah, to organize America's first Ukrainian community. Because he was a married priest, Archbishop P. Ryan of Philadelphia petitioned Rome to recall him, thereby opening a struggle between American Roman and Greek Catholics over celibacy that has lasted to the present day. During Voliansky's five years in the United States, he established parishes in five Pennsylvania towns (Kingston, Freeland, Olyphant, Shamokin, and Wilkes-Barre) as well as in Jersey City, New Jersey, and Minneapolis, Minnesota. In 1890 the Roman Curia approved a prohibition against married Ukrainian priests' holding parishes in North America. As a result many priests and parishioners joined the Russian Orthodox church, following the lead of Rev A. Toth, the first cleric to convert. Centered in Minneapolis, the new Russian Orthodox Greek Catholic church had converted over 7,000 Ruthenians to Russian Orthodoxy by 1900.

Despite the substantial loss of clergy and parishioners, the Ukrainian (Greek) Catholic church survived. By 1894 there were 30 Greek Catholic priests in the United States, 26 from the eparchies of Mukachiv and Prešov in Carpatho-Ukraine and 4 from the eparchy of Lviv in Galicia. The most consciously Ukrainian of them was the small contingent from Galicia, which was later to play a critical role in the development of a Ukrainian community in America. Other priests arrived with different loyalties. After 1892, pro-Magyar Greek Catholic priests from the Carpatho-Ukrainian eparchies were instructed by the

Hungarian government to remain 'faithful Magyars' in America and to remember their Hungarian homeland. Because of their numbers, the Hungarian-Ruthenian clergy dominated the Ruthenian-American community, at least initially. Like their Russian counterparts, they opposed the Ukrainian national revival.

In the 1890s eight ethnationally conscious priests from Galicia arrived in the United States: Revs I. Konstankevych, N. Dmytriv, M. Stefanovych, I. Ardan, A. Bonchevsky, S. Makar, M. Pidhoretsky, and P. Tymkevych. Called the 'American Circle' by their supporters, they stemmed the Russian and Hungarian-Ruthenian tides and helped to establish a distinctly Ukrainian Catholic community in the United States, primarily by taking control of *Svoboda* and the Ukrainian National Association from the Russophiles and expanding reading rooms, Ukrainian schools, publications, and choirs. The American Circle introduced the term 'Ukrainian' into Ruthenian social consciousness by publishing the poems of T. Shevchenko and I. Franko, by explaining political developments in Galicia in the pages of *Svoboda*, and by elaborating on the idea of a united and free Ukraine. In 1901 the circle established the 'Association of Ruthenian Church Communities in the United States and Canada. Renamed the Ruthenian Church in America in 1902, this society organized a convention in Harrisburg, Pennsylvania, which called for the appointment of a Greek Catholic bishop for Ruthenians in the United States.

A struggle between the American Circle and the Hungarian-Ruthenian clergy for control of the Ruthenian Catholic church ensued for the next five years. In 1907 the Holy See appointed S. Ortynsky, a Basilian monk from Galicia, the first Greek Catholic bishop in America. The Ruthenian-American community, while highly supportive of Ortynsky's appointment, did not like *Ea Semper*, the papal bull, that defined the bishop's prerogatives. Ortynsky had to obtain permission from local Latin rite bishops before visiting Ruthenian parishes in their dioceses; he had to file a full report with the Latin bishop after each visit; and he could not allow his Ruthenian priests to administer confirmation. In mixed Catholic marriages the primacy of the Latin rite was maintained. In 1913 the situation was rectified, when Rome granted Ortynsky 'full and ordinary jurisdiction over all Greek Catholics coming from Galicia and Podcarpathia [Subcarpathia].' A year later the Holy See issued *Cum Episcopo Graeco*, another papal bull, which removed the more offensive canons of *Ea Semper*.

After Ortynsky's death in 1916, the Holy See created two Greek Catholic jurisdictions in the United States, one for the Ukrainians and another for the Ruthenians (Carpatho-Rusyns). Rev P. Poniatyshyn was appointed administrator of the Ukrainian parishes. The division was reconfirmed in 1924, when two exarchates were established along the same administrative lines. Bishop K. *Bohachevsky was appointed bishop of an exarchate that included 144 parishes, 102 priests, and 237,445 faithful. V. *Takach, the Ruthenian exarch, received 155 parishes, 129 priests, and 288,390 faithful. The division between the two ethnically identical groups has remained to the present.

The Ukrainian Orthodox movement in America began in Chicago in 1915, when a group of disgruntled parishioners left St Nicholas's Ukrainian Catholic church to form the Independent People's Church. They were soon joined

by other disaffected Catholics and former Ukrainian adherents of Russian Orthodoxy, and in 1919 established the *Ukrainian Orthodox Church in the USA, which was affiliated with the recently established Ukrainian Autocephalous Orthodox Church in Ukraine. In 1924 the All-Ukrainian Orthodox Church Council in Kiev appointed Archbishop I. *Teodorovych the first hierarch of America's newly created Ukrainian Orthodox community. In the late 1920s more Catholics joined the diocese, which by 1939 consisted of 24 parishes, 22 priests, and 19,000 faithful. Concerned by doubts of the canonicity of Teodorovych's consecration in Kiev, another group of ex-Catholic priests and laity met in Allentown, Pennsylvania, in 1929 and founded a second Orthodox diocese, the Ukrainian Orthodox Church of America, which was headed for a time by Y. Zhuk and later by B. *Shpylka. The second diocese included 43 parishes and 36 priests by 1939.

Ukrainian Protestantism in the United States began in the 1890s, when a group of Baptists (*Stundists) from villages in the Kiev region settled first in Virginia and later in North Dakota. Converted from Orthodoxy by German colonists in Ukraine, they had fled religious persecution by the tsar. The spread of Protestantism in Ukrainian-American urban centers benefited from the religious conflicts among Ruthenian Catholics, Ukrainian Catholics, and Russian Orthodox, and before the First World War Baptist groups emerged in Illinois and Pennsylvania, and a Presbyterian congregation was established in Newark, New Jersey (1909). In addition Bloomfield College (New Jersey) and the University of Dubuque (Iowa), two institutions which prepared Presbyterian ministers, offered Ukrainian language, history, and literature courses. In 1922 the Ukrainian Evangelical Alliance of North America was formed, and a group of Presbyterian parishes established the Ukrainian Evangelical Reformed church.

All Ukrainian religious denominations benefited from the influx of new immigrants after the Second World War. The third immigration followed the pattern of church membership established earlier. Ukrainians from Galicia generally joined Catholic parishes; Ukrainians from Bukovyna, Volhynia, and eastern Ukraine usually joined the Orthodox. In 1954 the Vatican elevated Bohachevsky to the rank of archbishop and the exarchate to the status of an eparchy. Two years later a second Ukrainian Catholic eparchy was created. Headed by Bishop A. *Senyshyn, whose seat was in Stamford, Connecticut, the new jurisdiction comprised all the New England states and the state of New York, with 53 parishes, 101 priests, and 86,324 faithful. The Philadelphia eparchy was headed by an auxiliary bishop (J. *Schmondiuk became the first American-born Ukrainian Catholic bishop on 8 November 1956) and included 122 parishes, 93 priests, and 219,720 faithful. In 1958, when Bohachevsky was elevated to the rank of metropolitan, the Ukrainian Catholic Church in America had 300 priests, 2 bishops, 223 churches or chapels, 2 orphanages, 3 homes for the aged, 2 colleges, 4 high schools, and 32 parochial day schools. Bohachevsky died in 1961 and was succeeded by Senyshyn. In the same year Schmondiuk moved to Stamford, and a third eparchy was established to include Ukrainian Catholics in Michigan and all states west of the western boundaries of Ohio, Kentucky, Tennessee, and Mississippi. J. *Gabro, with his episcopal seat in his native Chicago, was consecrated in 1961 to oversee 31 parishes and 20,439 faithful.

During the 1960s the Ukrainian Catholic church in the United States suffered a serious rift. In Chicago, Bishop Gabro changed the religious calendar from Julian to Gregorian, thereby creating a split among the parishioners of St Nicholas's Cathedral, with the result that half of the congregation built a new church, ss Volodymyr and Olha.

Metropolitan Senyshyn died in 1976 and was succeeded by Schmondiuk. When Schmondiuk died unexpectedly in 1979, he was succeeded by M. *Liubachivsky. When the pope convened a synod of Ukrainian bishops in 1980, Liubachivsky was selected coadjutor to the aging Cardinal Y. *Slipy. He was replaced in Philadelphia by Rev S. *Sulyk, who was consecrated on 31 March 1981. Two days later he participated in the consecration of Rev I. *Lotocky as successor in Chicago to Gabro, who had died the previous year. In 1983 a fourth Ukrainian eparchy, headed by Bishop R. *Moskal, was created for the 60,000 Ukrainian Catholics living in western Pennsylvania, Ohio, West Virginia, Kentucky, Tennessee, Georgia, and Florida. Although the Ukrainian Catholic church maintains the heritage of the Greek Catholic (Uniate) church in Ukraine, Old Church Slavonic, which until the 1960s was used exclusively as the liturgical language, was to a great extent replaced by the vernacular in 1965.

The Ukrainian Orthodox Church in America also experienced a period of expansion immediately after the Second World War. In 1947 a synod of Ukrainian Orthodox bishops was convened in Germany under the leadership of Metropolitan P. Sikorsky. Hoping to unite the Ukrainian Orthodox in North America, the synod delegated Archbishop M. *Skrypnyk to approach Metropolitan Teodorovych to effect his reconsecration. The two newly constituted Orthodox groups attempted to unite at a 1948 conference in Allentown, Pennsylvania, with Archbishop Skrypnyk as the head of a Ukrainian Orthodox church. Bishop Shpylka's refusal to join prompted some of his parishes to place themselves under Skrypnyk's jurisdiction, thereby creating a third Orthodox diocese. On 27 August 1949 Teodorovych was reconsecrated by a Syrian exarch, and in 1950 Skrypnyk's parishes came under Teodorovych's jurisdiction. A 1950 synod in New York City constituted the hierarchy of the newly unified Ukrainian Orthodox church, with Teodorovych as its head and Skrypnyk head of the consistory. Also included in the hierarchy were Archbishops V. *Malets and H. Shyprikeyvych. By 1964 the Ukrainian Orthodox Church in the USA consisted of 104 churches, 127 clergy, and 87,200 faithful. Metropolitan Teodorovych died in 1971 and was succeeded by Skrypnyk, who headed an archdiocese centered in South Bound Brook, New Jersey, with two dioceses (one in Chicago headed by Archbishop C. *Buggan, the other in New York headed by Bishop A. Scherba) consisting of 90 parishes with 80,000 faithful. The administrative offices, along with a museum, publishing house, memorial church, and central cemetery, are located in South Bound Brook. Ukrainian is used predominantly in the Divine Liturgy, although English services and sermons are occasionally given in some parishes to accommodate the younger generation. In 1990 Metropolitan Skrypnyk became the patriarch of the Ukrainian Autocephalous Orthodox church and was succeeded as American metropolitan by Archbishop Buggan in 1992.

Bishop B. Shpylka, head of the Ukrainian Orthodox Church of America, died in 1965 and was succeeded by

Archbishop P. Vydybida-Rudenko and, in 1967, by Bishop A. *Kushchak. Consecrated a metropolitan in 1983, Kushchak died in 1986 and was succeeded by Bishop V. Maidansky, whose diocese remains under the canonical jurisdiction of the patriarch of Constantinople. The church includes 22 parishes and 22 priests. Old Church Slavonic is used in the Divine Liturgy exclusively.

The influx of new immigrants from Ukraine also helped strengthen the Ukrainian Protestant churches in the United States. After 1950, new Baptist congregations were established in Hartford, Cleveland, Philadelphia, Minneapolis, Milwaukee, Pittsburgh, Seattle, and the California cities of Los Angeles, Santa Barbara, and Hemet. Today there are 30,000 Ukrainian Protestants in the United States, most of whom belong to congregations organized into two national federations. The largest is the Ukrainian Evangelical Baptist Convention, headed by Rev O. Harbuziuk, with 24 churches and some 10,000 faithful. Baptist leaders are visible in mainstream Ukrainian-American life as well as in Ukraine itself. A daily radio broadcast, the 'Ukrainian Voice of the Gospel,' was initiated in 1952. In addition the Baptist Convention has delivered some 250,000 Ukrainian-language religious books to Ukraine in recent years, including 10,000 copies of the New Testament in 1988. The other Protestant group, the *Ukrainian Evangelical Alliance of North America, once included some 12 Presbyterian parishes (Reformed confession). Since the death of its head, Rev. V. *Borovsky, in 1987, however, most of the parishes have ceased to exist. Ukrainians in the United States are also Pentecostals (many of whom are recent émigrés), Methodists, Lutherans, and Seventh Day Adventists.

All three of the major Ukrainian religions in the United States are losing members because of intermarriage, changing values, and migration among the younger generation (see table 4).

Civic and political organizations. The oldest and most significant civic organizations in the Ukrainian-American community are the fraternal insurance associations established prior to the First World War, whose major purpose was to provide low-cost insurance to Ukrainian immigrants, most of whom had limited savings and little income. They continue to provide insurance plus a variety of benefits to their members and to the Ukrainian community to the present day.

TABLE 4
Ukrainian-American church membership, 1967 and 1988

Church	Diocesan/ eparchial seat	Membership	
		1967	1988
Ukrainian Catholic church	Philadelphia, Stamford, Chicago, Parma	281,253	147,533
Ukrainian Orthodox Church of the USA	South Bound Brook, NJ	87,000	45,000*
Ukrainian Orthodox American-Ecumenical patriarchate	New York	30,000	5,310
Protestant denominations		50,000*	30,000*

*Estimates; no reliable statistics are available.

The first fraternal insurance association, the Brotherhood of St Nicholas, was established by Rev Voliansky in 1885, but dissolved soon after he returned to Ukraine. The first permanent fraternal society was the *Greek Catholic Union of the USA (GCU), which was founded in 1892. Although membership was open to all Ruthenians, disputes over finances and national orientation resulted in an exodus of the Galician leadership and the establishment in 1894 of the Ruthenian National Association (renamed the *Ukrainian National Association [UNA] in 1914). From its inception the UNA represented a Ukrainian perspective, while the GCU initially supported the Hungarian-Ruthenian point of view. Both fraternal societies aided their respective churches – the formation of a local UNA branch was often a prelude to the establishment of a local parish – and developed various educational means to promote their ethnic identity. The fraternal newspapers were the most influential in developing popular public opinion. The GCU published *Amerikanskii russkii viestnik*; the UNA was responsible for *Svoboda*. Today the GCU does not have an active ethnocultural orientation, but focuses its resources on spiritual and social programs.

In 1908 the UNA convention proclaimed Bishop Ortynsky as 'patron' of the organization. In his capacity as chairman of the bylaws committee at the 1910 convention, Ortynsky, despite strong lay opposition, pushed through resolutions which changed the name of the organization to the Greek Catholic Ruthenian Association, subordinated the renamed fraternal society to the bishop's office, restricted the election of future convention delegates to Catholics exclusively, and obligated all members to attend confession at least once a year, during Easter. The bishop's action, subsequently approved by the majority, led to the first serious split in the Ukrainian/Ruthenian camp. Delegates from 14 branches walked out and, with other newly established local brotherhoods, called a convention which in 1911 gave birth to the Ukrainian Workingmen's Association (today the *Ukrainian Fraternal Association [UFA]). In 1912 an all-Catholic fraternal organization, the *Providence Association of Ukrainian Catholics in America, appeared. A fourth fraternal society, the *Ukrainian National Aid Association (UNAA), was established two years later. Each fraternal society supported Ukraine's struggle for freedom during the First World War by organizing political action committees and raising thousands of dollars in support of this cause. Ideological differences during the interwar period put a temporary end to such co-operation. In 1940, however, the four organizations set aside their political differences to form the *Ukrainian Congress Committee of America (UKKA), an all-Ukrainian coalition to lobby on behalf of Ukrainian interests in Europe. The four fraternal societies helped establish the *United Ukrainian American Relief Committee (1944) and fully supported its later efforts to resettle Ukrainian refugees at the end of the Second World War. The united fraternal front collapsed in 1980, when the UNA and the UFA withdrew from the UKKA in response to attempts by the militant nationalist wing of the community to extend its control over the body. In 1983 the two fraternal societies were instrumental in establishing the *Ukrainian American Coordinating Council (UACC), a parallel umbrella organization.

The UNA, with headquarters in Jersey City, New Jersey, has approx 60,000 members and remains the largest and most influential Ukrainian fraternal benefit society in

America. The UFA, with headquarters in Scranton, Pennsylvania, has some 18,000 members. The Providence Association of Ukrainian Catholics has 17,000 members and headquarters in Philadelphia. With a national membership of 8,000, the Ukrainian National Aid Association, centered in Chicago, is the smallest of the 4 Ukrainian fraternal organizations. A major concern of fraternal executives is declining membership. Although assets and insurance in force have increased, membership, usually measured in terms of certificates in force, dwindled by an average of 1 percent per year in 1977-87 (see table 5).

The first political ideology to influence the thinking of American Ruthenian-Ukrainians was socialism. Under the leadership of the American Circle, the political posture of the community essentially reflected the ideology of the Ruthenian-Ukrainian Radical party in Galicia. After the Radicals split into Social Democrats and National Democrats in 1899, the UNA leadership leaned toward the more moderate National Democrats. The first socialist organization to appear in the Ukrainian-American community was *Haidamaky, in 1907. An even more radical group, the Ukrainian Workers' party, formed in 1909, was dissolved a short time later. With Ukrainian socialist organizations multiplying, a convention in 1915 established the Ukrainian Federation of Socialist Parties of America (UFSPA).

The first Ruthenian-Ukrainian national congress was held in Jersey City on 1 January 1900, with subsequent congresses in 1903, 1904, and 1905. At the last congress the organization was renamed the Society of Ruthenian Patriots. Disagreements between social and national democrats within the society continued to escalate, however, and the fledgling organization soon ceased to exist.

The First World War and the Ukrainian liberation struggle galvanized the Ukrainian-American community and strengthened its sense of ethnnonational identity. Following a meeting of fraternal society leaders after the onset of hostilities, an all-Ukrainian national organization was created on behalf of Ukrainians in the United States and Europe. In late October 1915 a convention in Philadelphia established a new, national umbrella organization, the *Federation of Ukrainians in the United States, with Dr V. Simenovych as president. Almost from its inception internal strife between those who supported social reform in Ukraine and those whose first priority was national independence made the federation ineffective. In 1916 the UNA withdrew from the federation and joined forces with the Providence Association to create a second all-Ukrainian umbrella organization, the Ukrainian Alliance of America, which was headed by Rev P. *Poniatyshyn. The feder-

Members of the Ukrainian-American Citizens' Association in Philadelphia in 1916

ation's main base was thus reduced to Haidamaky, the UFA, and socialists.

Both the federation and the alliance competed for the loyalty of the community, now fully conscious of its Ukrainian identity. Representatives of both organizations urged the White House and Congress to assist a war-torn Ukraine. In response to a congressional resolution, President Wilson issued a proclamation on 2 March 1917 which designated 21 April 1917 as 'Ruthenian (Ukrainian) Day' in the United States. The alliance also succeeded in creating a Washington office in the Capitol building suite of Congressman J.A. Hammil (Democrat, New Jersey), one of the most articulate allies the Ukrainian-American community has ever had in Washington. On 18 November 1918 the alliance changed its name to the Ukrainian National Committee, realigned its executive to include disenchanted former federation members, and embarked on a new phase of international lobbying, still under the leadership of Poniatyshyn.

At the second convention of the UFSPA, held in 1917, participants were split between the 'internationalists,' who believed the first priority for Ukraine should be economic reform, and the Social Patriots, who were more nationalistic in their orientation. With the internationalists in the majority, resolutions were passed calling for the destruction of capitalism. In August 1919 an official delegation of UFSPA officers attended the first convention of the Communist Party of America, and a month later the UFSPA was renamed the Ukrainian Federation of the Communist Party of America. This development forced the Social Patriots to form a new socialist organization, *Oborona Ukrainy.

Ukrainian Communist activity in the United States

TABLE 5
Statistics of Ukrainian fraternal benefit societies in the United States, 1977 and 1987

Name	Insurance in force (in dollars)		Certificates in force		Lodges	
	1977	1987	1977	1987	1977	1987
Ukrainian National Assn	92,399,396	100,266,521	81,076	67,644	459	415
Ukrainian Fraternal Assn	22,108,312	27,716,406	22,546	18,434	261	215
Providence Assn	14,950,219	17,390,302	18,694	17,179	210	213
Ukrainian Natl Aid Assn	9,721,822	19,098,913	8,802	7,942	171	159
Greek Catholic Union	93,557,407	129,035,779	48,385	43,256	421	213

flourished following the creation of the United Ukrainian Toilers Organization (SURO) in 1924. Its growth was dramatic. By the fifth SURO convention in 1932, its network included 2,750 members in 112 branches, 3,400 members in affiliated front organizations, 12 Young Pioneer branches (with some 300 children), 36 Ukrainian schools, 64 reading rooms, 35 drama groups, 17 choirs, 12 mandolin orchestras, and 23 owned or rented 'labor temples.' The Communists expanded their activities during the 1930s, especially after the United States extended diplomatic recognition to the Soviet Union. In 1932, Ukrainian Communists established their own fraternal insurance society by creating separate Ukrainian branches of the International Workers' Order. By 1938 there were some 15,000 Ukrainian members of the order, including 3,000 children. During the late 1930s and all through the early 1940s America's Ukrainian Communists were engaged in a vicious and continuous polemics with most other Ukrainian associations in the country. Ukrainian Communist influence in the United States all but disappeared with the end of the Second World War (see *League of American Ukrainians).

Members of the Sich society in New York in 1917

The first political organization to counter the Communists was the Hetman Sich, which consisted of individuals loyal to Hetman P. *Skoropadsky. The *Sich society movement began in the United States in 1902, when Rev M. Strutytsky established the first Sich Athletic Society in Olyphant, Pennsylvania. By 1918 there were 14 Sich branches on the eastern seaboard, all dedicated primarily to bodybuilding. During the First World War some Sich members attempted to organize a Ukrainian military legion to fight for Ukrainian independence. The project failed, but the idea lived on. Militarization began with the introduction of uniforms and the election of S. Hrynyvetsky as supreme otaman at the 1922 convention. Sich began to change ideologically soon after O. Nazaruk, a leading monarchist theorist, convinced Hrynyvetsky that monarchism was the only viable ideological alternative to the increasingly popular Bolsheviks. The Sich came under attack during the 1930s when Ukrainian-American Communists and others alleged that it was a Nazi underground organization serving Germany. Even though the FBI could substantiate none of the charges, the cloud of accusation caused a serious setback for the group. When the Second World War began, the Communist network in the United States accused Sich (renamed the *United Hetman Organization, or UHO) of conducting espionage to sabotage the American war effort. Although another FBI investigation, which continued until 1943, completely exonerated the UHO, the barrage of negative commentaries heard on radio and published in American books, newspapers, and magazines made UHO members fearful

that their activity might someday lead to deportation to the USSR, and caused them to leave the organization in droves. The UHO Supreme Executive voted for dissolution on 7 March 1942.

The second anticommunist political organization to emerge in the United States between the two world wars was the *Organization for the Rebirth of Ukraine (ODVU). Founded in 1930 with moral assistance from the Organization of Ukrainian Nationalists (OUN), ODVU was by 1939 the single most powerful anticommunist political organization in the Ukrainian-American community. Two other affiliated organizations came into being during the early 1930s, the *Ukrainian Gold Cross (a women's society) and the *Young Ukrainian Nationalists (MUN). The first All-American Congress of Ukrainian Nationalists took place in 1935, with 223 delegates representing ODVU, the Gold Cross, MUN, the Black Sea Sich, and the Ukrainian War Veterans' Association of the USA in attendance. By 1938 the combined ODVU network – some 70 ODVU branches, 70

A mass demonstration of Ukrainian Americans in Philadelphia protesting the Polish Pacification of Western Ukraine in December 1930

Gold Cross branches, and 41 MUN branches – had a total American membership estimated to be over 10,000.

Meanwhile, the dissolution of the Federation of Ukrainians in 1919, coupled with the subsequent decline of the *Ukrainian National Committee in 1922, prompted another attempt to form a truly representative umbrella political organization for all Ukrainians. On 26–27 October 1922, 130 delegates representing 176 Ukrainian organizations established the *United Ukrainian Organizations in America (UWOA), which survived for 18 years. The UWOA was soon under attack by the Communists, and the executive was forced to reconstitute the organization under a new name.

Ukrainian Americans in the US Armed Forces taking part in a flag-blessing ceremony at St George's Ukrainian Catholic Church in Manhattan in 1943

In May 1940, 805 delegates from 168 different communities met in Washington, DC, and formed the *Ukrainian Congress Committee of America (UKCA). Included were practically all the organizations that had once belonged to the UWOA. In 1944 the UKCA established the United Ukrainian American Relief Committee (ZUADK) to aid Ukrainian displaced persons. Between 1947 and 1957 the ZUADK helped resettle approx 60,000 Ukrainian refugees in the United States. With the exception of the Communists, all segments of Ukrainian-American society – religious, political, cultural, and social – belonged to the UKCA. In 1967 it helped to organize the first *World Congress of Free Ukrainians (SKVU), in New York City. During the 1970s the UKCA increasingly fell under the direction of the *Ukrainian Liberation Front, a post-Second World War coalition of OUN (Bandera faction) organizations which included the *Organization for the Defense of Four Freedoms for Ukraine (OOChSU), the OOChSU Women's Society, the *Ukrainian Youth Association (SUM), and the *Ukrainian Student Organization of Mikhnovsky (TUSM). The Liberation Front arrived at the 1980 UKCA convention with a majority of delegates and took total control of the organization. As a result, delegates from 27 national organizations walked out of the conclave. Led by the UNA, the dissidents included the UFA, the Ukrainian National Women's League of America (SUA), the Ukrainian American Veterans, ODVU, the Gold Cross, MUN, the Plast Ukrainian scouting organization, the Organization of Democratic Ukrainian Youth (ODUM), most professional

and scholarly societies, and a number of smaller organizations. Remaining within the UKCA were the Providence Association, the UNAA, OOChSU, TUSM, SUM, OOChSU Women's Society, and the Association for the Liberation of Ukraine. Subsequent compromise talks failed, and on 1 October 1983 approx 100 delegates from the UNA, UFA, ODVU, and many (but not all) other dissenting societies came together in Washington, DC, to form the UACC.

The first Ukrainian women's organization in the United States was the Sisterhood of St Olha, a fraternal insurance society established in 1897 in Jersey City, New Jersey. The second national women's organization was the Ukrainian Women's Alliance of America, established in Chicago as a fraternal benefit society in 1917. Both organizations dissolved within a few years. The Ukrainian Women's Society of New York, established in 1921, lasted longer. In 1925 the society founded the first Ukrainian women's confederation, changed its name to the *Ukrainian National Women's League of America (SUA), and began establishing branches on the east coast. A national congress of Ukrainian women was held in New York City in 1932, with 68 delegates in attendance. By 1940 the SUA had 61 branches throughout the United States, organized into three regional councils. With the arrival of the third immigration, the SUA enjoyed unprecedented growth, and by 1984 there were 120 branches from New York to California. Other national Ukrainian women's organizations in the United States include the Ukrainian Gold Cross (est 1931), the *United Ukrainian Orthodox Sisterhoods (est 1961), and the OOChSU Women's Society (est 1967).

The first Ukrainian youth organization in the United States was Sokil, a gymnastic society. Patterned after its European counterpart, the first branch was organized by Rev P. Tymkevych in Yonkers in 1902. That same year Rev M. Strutynsky established the first Sich branch in Olyphant. Sokil eventually faded, and Sich became associated with the political agenda of Hetman Skoropadsky and eventually evolved into an adult-dominated political organization.

The lack of viable youth organizations was not perceived as a problem by community leaders until the 1930s, when the generation born during and after the First World War was in its early teens. Hoping to activate the younger generation, many organizations began forming youth affiliates. The first to develop youth cadres was the Ukrainian Orthodox community. In 1932 the League of Ukrainian Clubs (LUK) was created. Three years later there were some 20 LUK clubs throughout the United States. The LUK eventually disappeared; it was replaced in 1941 by the Organization of Ukrainian Orthodox Youth (renamed the *Ukrainian Orthodox League of the USA [UPL] in 1947).

The most successful early coalition of secular, nonpartisan youth groups was the *Ukrainian Youth League of North America (UYLNA), which emerged in 1933. At a constitutional convention during Ukrainian Week at the Chicago World's Fair, delegates established a North American organization that sought to hold annual youth conventions, sponsor annual sports rallies, publish a cultural monthly in the English language (*Trend*), and form local clubs. By 1939, 69 American and Canadian youth organizations were affiliated with the UYLNA. Except for the war years, the UYLNA held annual conventions until the 1970s, when it ceased to exist.

In 1933 the Ukrainian Catholic church established the Ukrainian Catholic Youth League, renamed the Ukrainian

Catholic Youth League of North America (UCYLNA) in 1938, when the Ukrainian Catholic Brotherhood of Canada joined its ranks. In 1939 it consisted of 60 clubs. With support from the Providence Association and the church, the UCYLNA held annual conventions and sponsored track and field events. In 1962 the name was changed to the *League of Ukrainian Catholics of America (LUC), a reflection of its aging membership. Conventions are still held annually.

Ukrainian political organizations also created youth affiliates. The UHO established 'Junior Siege' (ie, Junior Sich) branches, whose activities included flying lessons, horseback riding, track and field events, and baseball. The Junior Siege disappeared when the UHO was dissolved. The first nationalist youth organization was MUN, founded in New York City in 1933. Activities included military drill, drama, basketball, baseball, writing articles for the *Trident*, and glider and airplane flying. With support from ODVU (which became associated with the OUN [Melnyk faction] after the war), MUN survived as a national organization until the early 1960s. Communist youth affiliates, the Young Pioneers, were prevalent before the war, but all but disappeared completely during the Cold War era of the 1950s. With many Ukrainian young people serving in the armed forces during the Second World War, all Ukrainian youth organizations suffered major drops in membership.

While prewar Ukrainian youth organizations struggled to survive in the postwar era, three new youth organizations founded by the third immigration flourished. SUM, established in 1949, claimed 4,100 members in 34 local branches and 5 summer camps in 1984. Today it is the largest and most affluent Ukrainian youth organization in America. Part of the Liberation Front network, SUM is a member of the UKKA. ODUM was created in 1950. It claimed 450 members in 1984, with local branches in the larger cities and a summer camp in New York State. A member of the UACC, ODUM is associated with the 'democratic' political network composed mostly of the Second World War immigrants from eastern Ukraine. A virtual transplant of the Ukrainian scouting organization founded in Western Ukraine in 1912, the *Plast Ukrainian Youth Association was established in the United States in 1951. In 1984 it claimed some 4,000 members, 27 local chapters, and 5 summer camps. Politically, Plast is nonaligned.

Although several Ukrainian student clubs existed prior to 1940, it was only after the arrival of the third immigration that a national effort was made to organize Ukrainian college students. The *Federation of Ukrainian Student Organizations of America (SUSTA) was founded in 1953 and by 1971 had approx 30 university campus branches. The most successful endeavor initiated by SUSTA was the creation of the *Ukrainian Studies Fund in 1957. Other student organizations established after the war include TUSM, associated with the OUN (Bandera faction); the *Zarevo Ukrainian Student Association, associated with the OUN (Melnyk faction); and the *Obnova Society of Ukrainian Catholic Students.

Education. The first Ukrainian heritage school was established in Shenandoah, in 1888 by Rev I. Voliansky, and a second was begun in Shamokin, Pennsylvania, in 1893 by Rev I. Konstankevych. Within a year similar part-time heritage classes existed in Mt Carmel, Wilkes-Barre, and Olyphant in Pennsylvania, and in Minneapolis. By 1913 most large Ukrainian-American communities had such

schools, thanks largely to the efforts of priests who viewed the expansion of Ukrainian education among youth as part of their ministry. During the early days of the movement, texts were substandard, there was no co-ordinated curriculum, and the facilities were poor, with many classes held in damp church basements. Reform measures began in 1913, soon after the Ruthenian Greek Catholic Teachers' Association was created, and in 1918 proficiency exams for teachers were introduced. A new teachers' organization, *Ridna Shkola, was established in 1927. By 1939 there were 86 Ukrainian heritage schools in the United States, with 56 taught by the preceptors, 18 by Basilian sisters, and 12 by the Sisters of the Immaculate Conception. The third immigration increased school enrollments and improved curriculum co-ordination under the auspices of the UKKA Educational Council (established in 1953), which also provided school accreditation. By 1971 there were some 150 Ukrainian heritage schools. Approximately half were under the jurisdiction of the Educational Council; the others were administered by Catholic and Orthodox parishes.

The first Ukrainian college, Ruska Kolegiia, was opened in Shamokin in 1905. Organized on the European gymnasium model, it accepted all students who had the equivalent of an American high-school education. The school folded after a year, but college-level courses were later established at Bloomfield College in Bloomfield, New Jersey, and at the University of Dubuque, in Iowa, two institutions that had once trained Presbyterian missionaries for work among Ukrainian immigrants. Bloomfield offered courses in Ukrainian language, history, and literature from 1910 to 1920, and Dubuque offered them from 1912 to 1935. During the 1970s approx 20 American universities and colleges were offering courses in the Ukrainian language. Today the Ukrainian Catholic church operates Manor Junior College for Girls in Jenkintown, Pennsylvania, and St Basil's Ukrainian Catholic Seminary for Boys in Stamford. Both offer courses in Ukrainian language and culture. The most comprehensive program of Ukrainian studies can be found at Harvard University.

The first boarding school (for boys) was established in Yonkers, New York, by Rev P. Tymkevych in 1904. Opened as a high school, it lasted less than two years. The first permanent boarding school was an orphanage opened by Bishop Ortynsky in 1912 in Philadelphia. In 1931 the first accredited Ukrainian high school, St Basil's Academy for Girls, was dedicated by Bishop Bohachevsky in Fox Chase, Pennsylvania. A Catholic preparatory school for boys opened in Stamford in 1933. A third high school for boys and girls was established in 1951 in Hamtramck, Michigan.

Bishop Bohachevsky opened the first permanent Ukrainian parochial day school in 1925. Six years later he initiated a national campaign to build schools which resulted in full-time elementary classes in Pittsburgh (1933), New Kensington, Pennsylvania (1936), Chicago (1936), Hamtramck (1936), Newark (1939), and Watervliet, New York (1940). The influx of immigrant children in the postwar era resulted in the opening of more schools. By 1967 there were 33 elementary schools, 3 high schools, and 2 college-level institutions. Twenty years later the elementary-school population had dropped by more than 50 percent (see table 6).

Press. Ukrainian press history in the United States began in 1868, when Rev A. Honcharenko brought out the

TABLE 6
Ukrainian Catholic elementary and secondary schools and enrollments, 1967 and 1987

Alaska Herald. In the same year he added *Svoboda* (Liberty), a supplement that included articles about Ukraine written in Russian. The first Ukrainian-language newspaper in America was *Ameryka*, first published by Rev I. Voliansky in Shenandoah, on 15 August 1886. It lasted until 1890. Two other early Ukrainian publications were *Ruske slovo* and *Novyi svit*, both of which came into existence in 1891 and folded the same year.

The first permanent Ukrainian newspaper in the United States was **Svoboda*, today the world's oldest continuously published Ukrainian-language daily newspaper. First published by Rev H. *Hrushka on 15 September 1893, *Svoboda* became the official press organ of the Ukrainian National Association in 1894. Between 1886 and 1934, 79 different Ukrainian periodicals were established in the United States, most of them short-lived. Those that survived were usually backed by fraternal or religious organizations.

Shershen', a twice-monthly literary journal which first appeared as a satirical periodical in 1908, became the official organ of the Ukrainian Workingmen's Association (UWA) in 1910. It was replaced in 1911 by a new UWA publication, *Narodna volia*, which today is published weekly in Ukrainian and English. The Providence Association began to publish the newspaper *Ameryka* (not to be confused with Voliansky's) in 1912. *Narodne slovo* (*Ukrains'ke narodne slovo* from 1959) made its appearance in 1914 as the organ of the Ukrainian National Aid Association.

In 1908–21 a group of Ukrainian Presbyterians brought out *Soiuz. Pisanets' pravdy*, a Baptist periodical first published in Ukraine in 1927, was revived as a US publication in 1947. The Ukrainian Evangelical Alliance of North America began publishing *Ievanhel's'kyi ranok* in 1961.

In 1909 Rev P. Poniatyshyn started *Dushpastyr*, a Catholic monthly which soon became the official organ of Bishop Ortynsky. The Ukrainian Catholic exarchate began publishing *Shliakh* in 1940. The Ukrainian Catholic eparchy of Chicago has published the bilingual weekly *Nova zoria* since 1965. In 1967 the *Ukrainian Patriarchal Society in the United States began publishing **Patriarkhat*, a quarterly magazine.

Two widely read Ukrainian Orthodox periodicals, *Dni-pro* (1920–50) and the *Ukrainian Orthodox Herald* (from 1935), were published prior to the Second World War. The Ukrainian Orthodox Church in the USA began publishing *Ukrains'ke pravoslavne slovo* in 1950 and its English edition in 1967. Another periodical, *Pravoslavnyi ukrainets'*, was published by the Ukrainian Autocephalous Church (Conciliar) from 1952.

Ukrainian socialists began publishing *Khlops'kyi para-*

graf and *Haidamaky* in 1909. The latter periodical survived until 1916. Another early socialist weekly was *Robitnyk*, founded in 1914. It was replaced by *Ukrains'ki shchodenni visty* in 1920, soon after the formation of the Ukrainian Federation of the Communist Party of America. It is still published in New York City as *Ukrains'ki visty*.

The Sich organization began publishing *Sichovi visty* in 1918, renamed *Sich* in 1924 after the monarchists took over. As the official organ of the UHO, during the 1930s it was renamed *Nash stiah*.

The ODVU began publishing *Vistnyk ODVU* in 1932, and in 1935 created *Natsionalist*, a bilingual paper (Ukrainian-English) whose name was later changed to *Ukraina*. In 1939 the ODVU took over publication of the *Trident*, an English-language monthly periodical initiated by MUN in 1936. After the Second World War the ODVU began publishing *Samostiina Ukraina*, initially as a monthly and then as a quarterly. It now appears irregularly as a journal of political opinion. MUN resurrected the *Trident* as a quarterly in 1960, but publication was discontinued in 1962.

The Liberation Front has published *Visnyk OChSU* since 1947. UKKA has published the *Ukrainian Quarterly* since 1944. The latter also sponsored the *Ukrainian Bulletin* between 1948 and 1970.

The Ukrainian Women's Alliance of America published

Some of the Ukrainian-American newspapers published in the 1930s

Some of the Ukrainian-American journals and magazines published in the postwar period

Rannia zoria between 1918 and 1920. The oldest women's journal in the United States, *Zhinochyi svit*, was first published in 1933 by the Ukrainian National Women's League of America (SUA). SUA began publication of *Nashe zhyttia/Our Life* in 1944.

Periodicals exclusively for Ukrainian youth began appearing in the 1930s. Among them were *Junior Siege*, published by the UHO; the *Trident* (1936–41), initially published by MUN; the *Ukrainian Trend* (1937–69), the official organ of the UYLNA; and *Ukrainian Youth* (1934–42), a periodical of the UCYLNA. Postwar youth publications include *Krylati* (1951–), published by SUM; *Hotuis'* (1953–), published by Plast; and *Veselka* (1954–), a children's magazine published by the UNA.

The most successful English-language periodicals are the UNA-sponsored *Ukrainian Weekly*, which first appeared in 1933 as a youth-oriented newspaper, and *Forum*, published by the UFA.

One of the most popular periodicals was *Lys Mykyta* (a regular publication from 1951 until 1990), a satirical journal edited by E. Kozak.

Today the Ukrainian press in the United States includes some 53 Ukrainian-language periodicals, 23 bilingual publications, and 15 English-language publications. These include 1 daily publication, 10 weekly, and 20 monthly; the remainder appear less frequently. The estimated readership for all Ukrainian periodicals is 208,000.

Particularly popular among Ukrainian Americans are the *calendars or almanacs published annually by the three major Ukrainian churches, the four fraternal societies, and other organizations. In addition to such periodicals, books, pamphlets, and other literature are produced regularly by publishing houses and cultural and scholarly institutions. These include the four fraternal societies, the three major churches, the Shevchenko Scientific Society, the Ukrainian Academy of Arts and Sciences, Prolog Research Corporation, the Ukrainian Academic Press, Smoloskyp publishers, Bulava, and Chervona Kalyna.

Literature. Ukrainian-American literature began with the development of the Ukrainian press in the 1890s. Many editors and contributors to *Svoboda* wrote dramas, short stories, essays, and poetry, as well as journalistic articles. Among the pioneers in this field were Rev H. Hrushka, who wrote poetry and short stories; Rev S. Makar, who was renowned for his short stories about the perils of assimilation and the demoralizing aspects of American life (his 'American Boy' is an early classic); Rev N. Dmytriv, who provided factual and fictional accounts

of immigrant life; and S. Chernetsky, a poet and satirist. Most early immigrant literature focused on the hardships of life in the United States and on a romanticized version of life in the old country.

During and immediately after the First World War Ukrainian immigrant literature was devoted to patriotic themes reflecting Ukraine's struggle for independence. Poets who emerged during this period included S. Musiichuk, D. Zakharchuk, and M. Kostyshyn. A central literary figure was A. *Granovsky, a professor of entomology at the University of Minnesota. Granovsky published three separate collections of lyric poetry between 1910 and 1914 while still in Ukraine. In the United States his poetry became more patriotic, in keeping with his work as an American activist in Ukraine's liberation struggle. Some writers who tried their hand at prose during this period were M. Biela, Zh. Bachynsky, M. Strutynsky, and Yu. Chupka. All wrote on social themes centered around immigrant life.

In contrast the literary works of American-Ukrainian writers (approx 150 in number) after the Second World War tended by and large to ignore immigrant life and to focus on more universal themes. Among the most noteworthy are the poets Ye. Malaniuk, T. Osmachka, V. Barka, O. Tarnavsky, B. Boychuk, B. Rubchak, and G. Tarnawsky; the humorists M. Ponedilok and I. Kernytsky; the novelists Yu. Kosach and D. Humenna; the dramatist L. Poltava; and the literary critics Yu. Sherekh (Shevelov), Yu. Lavrinenko, and H. Kostyuk. The writers organized themselves into literary societies, the most notable being the *Slovo Association of Ukrainian Writers in Exile. Founded in 1954, it publishes *Slovo*, a periodical devoted to new literary works and criticism, and sponsors literary evenings and conferences. Another postwar group, the *Association of Ukrainian Writers for Young People, was transplanted from Germany during the 1950s and has edited the Ukrainian children's magazine *Veselka*. A circle of younger writers constituting the so-called *New York Group introduced modernist trends into the Ukrainian literary process. It published *Novi poezii* on an annual basis in 1959–79.

The Shevchenko Scientific Society, the Ukrainian Academy of Arts and Sciences in the US, and the Ukrainian studies program at Harvard University provide studies on literary topics, usually in the form of conference proceedings. Also enhancing Ukrainian literary life in America are such small literary groups as *Svitannia* and *Volosozhar*, and literary discussion clubs in New York, Philadelphia, Chicago, Detroit, Minneapolis, and Los Angeles. Two Ukrainian writers who have succeeded in the American literary market are M. Bloch and Ya. Surmach-Mills, both of whom write children's stories.

Scholarship. Among Ukrainians who excelled in the American academic world prior to the Second World War were G. Kistiakowsky, a chemist and researcher in atomic energy at Harvard University; S. Timoshenko, a pioneering scientist in strength of materials at the University of Michigan and Stanford University; the historian G. Vernadsky, at Yale; the entomologist A. Granovsky, at the University of Minnesota; and the geneticist T. Dobzhansky of Columbia University. Among the Ukrainians who gained national and international renown as scholars after the Second World War were the Byzantologist I. Ševčenko and the Turkologist O. Pritsak of Harvard; the political

scientists and historians J. Reshetar of the University of Washington in Seattle and A. Motyl at Columbia University; the linguist and Slavist G.Y. Shevelov of Columbia University; the political scientist Ya. Bilinsky of the University of Delaware; the historians R. Szporluk of the University of Michigan and Harvard University and J. Pelenski of the University of Iowa; the archeologist and art historian R. Holod of the University of Pennsylvania; the scientists O. Smakula, R. Jackiw, and D. Sadoway of the Massachusetts Institute of Technology, L. Romankiv of the IBM T.J. Watson Research Center, O. Bilaniuk of Swarthmore College, N. Holoniak of the University of Illinois, L. Dmochowski of Baylor University, S. Trofimenko of Du Pont Experimental Station, and M. Kasha of Florida State University; and the literary scholars B. Rubchak at the University of Illinois and G. Grabowicz at Harvard.

Oleh Bilorus (left), Ukraine's first ambassador to the United States, his wife, and Viktor Batiuk, Ukraine's first ambassador to the United Nations, at Kennedy International Airport on 28 April 1992

A valuable contribution of the third immigration has been the formation of research institutions. These include organizations with European antecedents, such as the Shevchenko Scientific Society, which publishes its *Proceedings* in English and *Zapysky* in Ukrainian, and the Ukrainian Academy of Arts and Sciences, which publishes its *Annals* in English. Societies founded in the United States include the Lypynsky East European Research Institute (Philadelphia), the Ukrainian Historical Association (Kent, Ohio), the Ukrainian Center for Social Research (New York), and the Ukrainian Research and Documentation Center (New York).

Music. The first Ukrainian choir in America was established in Shenandoah, by V. Simenovych in 1887. Choral ensembles were later organized in Shamokin, Olyphant, and Mayfield. Even though they were enthusiastically supported by the local community, most early choral ensembles were mediocre. Choral performances improved dramatically after 1900 when a number of fully qualified cantors came to the United States and took up residence in parishes that could afford their services. By the beginning of the First World War good choirs existed in Chicago, Pittsburgh, Philadelphia, Newark, New Haven, New York City, and Perth Amboy, New Jersey.

The arrival of the Ukrainian National Chorus under O. Koshyts (formerly the *Ukrainian Republican Kapelle) was a milestone in Ukrainian-American musical history. In 1922 and 1923 the chorus toured North America and set a new standard for Ukrainian choral performance. By 1936 former chorus members were directing outstanding choral ensembles in Newark, Cleveland, and Chicago. Ukrainian music was also being recorded during this period by such American companies as Columbia and RCA Victor. Between 1923 and 1952 Columbia released 430 separate Ukrainian recordings, and Victor produced over 100. Two of the most popular Ukrainian recording artists of the time were the fiddler P. Humeniuk, whose *Ukrainian's 'ke vesil'ia* (Ukrainian Wedding) became a classic, and W. Gula and his Trembita Orchestra, who recorded for Columbia.

The highly professional character of Ukrainian choral music was maintained after the Second World War by choruses in New York City (Dumka), Philadelphia (Prometheus and Kobzar), Detroit (Trembita), Cleveland (Dnipro), and Chicago (Surma). Today the best-known Ukrainian choral ensemble in the United States is the Ukrainian Bandurist Chorus in Detroit.

Ukrainian vocal performers who have excelled in the American music world in recent years include the Metropolitan Opera star P. Plishka, who has starred in over 40 roles, and A. Dobriansky, who has sung with the Met since the 1969–70 season.

Ukrainian instrumental music also dates back to the days of the early immigrants. The first Ukrainian band was organized in Shamokin in 1891, and within a few years marching bands, often with elaborate uniforms, existed in Olyphant, Mayfield, Shenandoah, Braddock, Pittsburgh, and Cleveland. As interest in marching bands waned after the First World War, the popularity of mandolin orchestras increased. A Ukrainian Conservatory of Music existed in New York City during the 1920s. The Association of Friends of Ukrainian Music was established in New York in 1934 and contributed greatly to the growing popularity of Ukrainian instrumental music. String orchestras were established in New York (under the direction of the composer M. Haivoronsky) and in Chicago during the 1950s. The *Ukrainian Music Institute of America was created in 1952 and soon had 16 branches throughout the country. In recent years bandura ensembles have become a popular form of instrumental expression, especially among the young. Ukrainian Americans who have enjoyed the most success in American music circles include M. Malko, who was director of the Chicago Symphony Orchestra from 1945 to 1957; V. Baley, conductor of the Las Vegas Symphony; and the concert pianist L. Artymiw.

Theater, film, and dance. The first drama troupes were established in Shamokin and Olyphant in 1880 and were soon followed by ensembles in other Ukrainian communities of eastern Pennsylvania. The first performance of the popular Ukrainian opera *Zaporozhets za Dunaiem* (Zaporozhian Cossack beyond the Danube) was staged in New York City in 1910. By 1940 such classic Ukrainian operas as *Natalka Poltavka*, *Kateryna*, and *Taras Bulba* were seen regularly on Ukrainian-American stages. Most dramatic productions, however, dealt with local themes, such as those by Rev S. Makar, who wrote *Amerykans'kyi shliakhtych* (American Noble) and *Skupar* (Miser). Both were pop-

President Leonid Kravchuk of Ukraine (left) meeting with President George Bush, Secretary of State James Baker, and National Security Adviser Brent Scowcroft at the White House on 6 May 1992

ular productions prior to the First World War. Efforts to establish permanent drama societies in major Ukrainian cities persisted through the 1920s and 1930s. Most troupes, however, were short-lived. Ukrainian theater in the United States greatly improved following the arrival in the 1950s of the Ensemble of Ukrainian Actors, under the direction of V. Blavatsky, in Philadelphia and the *Theater Studio of Y. Hirniak and O. Dobrovolska. Both companies staged a series of popularly acclaimed productions during the 1950s and 1960s. Since 1965 their theatrical tradition has been continued by the drama school of L. *Krushelnytska in New York City.

During the 1930s Ukrainian amateur film studios under the direction of V. *Avramenko produced films such as *Natalka Poltavka*, *Marusia*, and *Zaporozhets za Dunaiem*. Ukrainian filmmaking has recently improved, with the emergence of S. Nowytski of Minneapolis, who has produced such prizewinning films as *Pysanka*, *Harvest of Despair* (a documentary about the man-made famine in Ukraine), and *Helm of Destiny* (the story of America's Ukrainians). Ukrainian Americans who have pursued successful film careers in Hollywood include A. Sten, N. Adams, J. Hodiak, M. Mazurki, J. Palance, and the director E. Dmytryk.

Like the early choirs, Ukrainian dance ensembles prior to the First World War were supported by a handful of enthusiastic supporters. This changed soon after the arrival in 1928 of V. Avramenko, a dance master from Ukraine. After settling in New York City, Avramenko began his American dance career by advertising dance lessons in *Svoboda*. Supported almost entirely by contributions from the community, Avramenko began visiting Ukrainian communities and by 1936 had organized over 50 dance troupes throughout the country. A high point in his career came on 25 April 1931, when approx 500 of his dancers performed at the Metropolitan Opera House.

Ukrainian dance troupes proliferated in the United States after the Second World War; some may have been given new impetus by the tour of P. Virsky's *State Dance Ensemble of Ukraine in 1966. Today outstanding dance groups perform in Miami, Chicago, Milwaukee, New York, Detroit, and Cleveland. As in the past, Ukrainian dance remains the single most effective vehicle for retaining the interest of young people in Ukrainian culture.

Fine arts, architecture, and folk art. Early Ukrainian artists in the United States were icon painters, such as Rev H. Verkhovsky, who painted the sanctuary of St Nicholas's Cathedral in Chicago, and E. Vasylenko. American-born painters who emerged between the two world wars, such as M. Myrosh and I. Kuchmak, devoted much of their time to creative painting. Others became involved with film illustration (A. Palyvoda), graphic arts (N. Bervinchak), and commercial illustration (J. Rosol). The most celebrated Ukrainian artist in the United States was the European-born A. Archipenko, internationally acclaimed as one of the great innovators of modern sculpture. During his American period he produced over 750 pieces, many of which can be found in major museums throughout the world.

Roman Popadiuk being sworn in at the White House on 27 May 1992 as the first American ambassador to Ukraine

Some 100 Ukrainian painters and sculptors immigrated to the United States after the Second World War. In 1952 they founded the *Ukrainian Artists' Association in the USA. Centered in New York City, the association sponsors art exhibits and individual showings. Similar local art groups exist in Chicago (home of the *Ukrainian Institute of Modern Art), Minneapolis, and Detroit. Among the individual Ukrainian artists who have exhibited in many American cities in the postwar period, the most consistently popular have been M. Moroz, L. Hutsaliuk, M. Butovych, E. Kozak, and J. Solovij. The best-known Ukrainian artist in recent years has been the late J. Hnizdovsky, whose unique graphic art is part of many museum and private collections. Ukrainian religious art has been preserved by such artists as S. Hordynsky, M. Dmytrenko, and P. Kholodny. Other Ukrainian artists work as illustrators (Ya. Surmach-Mills) or art instructors (N. Brytsky, J. Gaboda, and A. Olenska-Petryshyn). Perhaps the most commercially successful artist was cinematographer W. Tytla, who spent many years working for Walt Disney Studios in Hollywood. Ukrainian sculptors who have gained renown in America include S. Lytvynenko, M. Mukhyn, K. Milonadis, M. Cheresnovsky, and A. Darahan.

Another aspect of the Ukrainian artistic experience in the United States is Ukrainian church architecture. Noteworthy examples of traditional styles include Chicago's St

Nicholas's (Catholic) Cathedral, modeled after the St Sophia Cathedral in Kiev; the neo-Byzantine St Andrew's (Orthodox) Church in Bloomingdale, Illinois; the Cossack-baroque St Andrew's (Orthodox) Memorial Church in South Bound Brook; and Sacred Heart (Catholic) Church in Johnson City, New York. Churches built in a more modern style include St Joseph's (Catholic) Church in Chicago; Holy Trinity (Catholic) Church in Kerhonkson, New York; and St Josaphat's (Catholic) Church in Rochester, New York. A unique blend of traditional and innovative architectural styles can be found in the Ukrainian Catholic Church Shrine in Washington, DC, and in the Holy Ascension Ukrainian Orthodox Church in Clifton, New Jersey.

Ukrainian folk art – *pysanky*, wood carvings, ceramics, embroidery, kilims – is much in demand in cities with large Ukrainian populations. Most of these cities have retail stores which market such products. The recent availability of Easter egg-making kits has meant that this ancient folk art can be passed on more easily from one generation to another.

The most significant cultural achievement of the Ukrainian community prior to the Second World War was the 1933 erection of a Ukrainian pavilion at the Chicago World's Fair. The displays featured folk and modern Ukrainian art from Europe and the United States, highlighted by the works of the sculptor A. Archipenko. Another major cultural accomplishment was the Ukrainian Cultural Gardens in Cleveland. Dedicated on 2 June 1940, the gardens eventually were the site of statues of Volodymyr the Great, T. Shevchenko, I. Franko (all sculpted by A. Archipenko), and Lesia Ukrainka (rendered by M. Chershnovsky). After some of the art was stolen or destroyed by vandals during the 1970s, the remaining statues were removed. Since the Second World War, memorial statues to T. Shevchenko have been erected in Washington, DC (1964), and Elmira Heights, New York (1981).

Archives, museums, libraries. Prior to the Second World War most Ukrainian archival materials were found in the private collections of older immigrants who appreciated the significance of historical documentation. Unfortunately many archives were either lost or destroyed after the collectors died. Only more recently large depositories have been established at the Ukrainian Academy of Arts and Sciences in the US; at the Ukrainian museums-archives in Cleveland, South Bound Brook, and Detroit; at the Ukrainian National Museum in Chicago; at the *Ukrainian Diocesan Museum of Stamford; and at the Ukrainian Cultural Institute at Dickinson State College, Dickinson, North Dakota. The most extensive collection of archival materials for all periods can be found at the Immigration History Research Center at the University of Minnesota.

The creation of museums was pursued particularly strongly by the third immigration. Ukrainian museums now exist in New York, Chicago, Philadelphia, Cleveland, Detroit, South Bound Brook, and Stamford. Of special significance is the Ukrainian Institute of America, founded by the millionaire W. Dzus and housed in a New York City landmark mansion. The institute features a permanent collection of paintings and occasional exhibits of Ukrainian fine and folk art.

Extensive Ukrainian book collections can be found at

the Library of Congress in Washington, DC, the New York Public Library, and the libraries of Columbia University, Harvard University, the University of Illinois in Champaign-Urbana, the University of Chicago, and the Hoover Institution at Stanford University.

Sport. In the interwar period Sich societies established their own track and field, swimming, volleyball, soccer, softball, basketball, bowling, and tennis clubs and competitions. Ukrainian youth athletic competitions were held in Philadelphia in 1935 and 1936. Young athletes from the United States and Canada competed in the first Ukrainian-American Olympiad, held in Philadelphia in 1936. In 1938 the Ukrainian National Association founded a baseball league; by 1940 it had 28 teams.

After the mass emigration of refugees to the New World in the late 1940s, new Ukrainian sports clubs were founded. Soccer, tennis, volleyball, and swimming have been particularly popular. The *Ukrainian Sports Federation of the USA and Canada was founded in 1953-4. In 1980 it organized, with other émigré communities of the captive nations of the USSR, the Free Olympiad in Toronto. The Ukrainian delegation won 11 gold, 8 silver, and 7 bronze medals and took second place overall.

Assimilation. Statistics showing lower church and organizational membership and decreased language retention suggest that Ukrainians are assimilating rapidly into mainstream American society. Tables 4 and 5 examine church and fraternal-benefit society membership; the 1980 US census revealed that Ukrainian language use among Ukrainian Americans in the country stood at only 17 percent. Among certain professional groups the percentage is even lower (see table 7). No solution to the steady decline in language use has been found, nor does there appear to be any antidote for assimilation. Recent events in Ukraine, however, and the intensification of contacts with the mother country may slow down this process.

TABLE 7
Language retention among Ukrainian-American professionals, 1980

Profession	Total number	Number speaking Ukrainian	%
Manager/administrator	32,980	3,720	11
Engineer	10,820	1,060	9
Sales representative	8,040	980	12
College teacher	4,380	580	13
Physician	3,560	640	17
Lawyer/judge	3,160	260	8
Natural scientist	2,260	400	17
Editor/reporter	1,520	280	18
Librarian	1,320	420	31

United Ukrainian American Relief Committee (Zluchenyi ukrainskyi amerykanskyi dopomohovyi komitet, or ZUADK). A Ukrainian charitable organization established on 20 June 1944 under the name Ukrainian Relief Committee by a commission set up at the Second Congress of the Ukrainian Congress Committee of America in January 1944. On 9 November 1944 it merged with Ukrainian War Relief, a committee in Detroit headed by J. *Panchuk, and adopted its current name. The purpose of the committee was to help Ukrainians in the homeland and displaced Ukrainians outside Ukraine, particularly with respect to resettlement.

Because the Soviet authorities would not permit direct contact with institutions and individuals in Ukraine, ZUADK concentrated its efforts on helping Ukrainian political refugees and *displaced persons in Western Europe. In 1945 it was recognized as a relief organization by the US government, and joined the American Council of Voluntary Agencies for Foreign Service and the Cooperative for American Remittance to Europe. It collaborated with international relief organizations, such as the *United Nations Relief and Rehabilitation Administration, the *International Refugee Organization, and, later, the Intergovernmental Committee for European Migration and the UN High Commission for Refugees. The ZUADK raised funds through membership fees from various Ukrainian organizations, local fund-raising committees, and appeals to the public. To channel its aid to Ukrainian refugees and displaced persons in Europe, ZUADK (in co-operation with the

Volunteers preparing clothing parcels for Ukrainian refugees in Europe at the New York warehouse of the United Ukrainian American Relief Committee after the Second World War. Among them is the committee's executive director, Volodymyr Galan

Ukrainian Canadian Relief Fund) helped to set up the *Central Ukrainian Relief Bureau in London (1945) and then its own European Representation (1947) in Munich, with branches in Salzburg, Paris, Brussels, Trieste, and Berlin, as well as local offices in German towns with sizable Ukrainian communities.

The committee's efforts in 1947-57 were concentrated on resettling Ukrainian refugees and displaced persons overseas: it helped almost 60,000 of them to emigrate to the United States. To achieve this end ZUADK fought to put an end to the forced repatriation of Soviet citizens, to win recognition of the national status of Ukrainian refugees, and to gain immigration rights to the United States for veterans of the Division Galizien and the Ukrainian Insurgent Army. After the period of immigration the committee continued to support Ukrainian organizations, arts ensembles, nurseries, and schools in Europe. In the late 1960s ZUADK sent food, clothes, and medical supplies to Ukrainian earthquake victims in Yugoslavia. Since then it has helped Ukrainian political prisoners and their families in the USSR. In the 1980s the committee helped resettle political refugees from Poland and set up (1985) and funded a land-purchasing program for needy peasant families in Brazil. It has published its own *Visti* ZUADK. Its head office has been in Philadelphia. The presidents of the committee have been V. Galan (1944-7, 1955-78), J. Panchuk (1947-53), L. Myshuha (1953-5), M. Stakhiv (1955), and O. Bilyk (1978-). The executive directors have been V. Galan, V. Mudry, O. Tarnavsky, and I. Skalchuk.

United Ukrainian Organizations in America (Obiednannia ukrainskykh orhanizatsii v Amerytsi, or OOU). A Ukrainian-American umbrella organization, set up by the Ukrainian National Congress, which convened in Philadelphia on 26-27 October 1922 for the purpose of promoting Ukrainian education in the United States, helping Ukrainian institutions in the homeland, and publicizing

ing Ukraine's right to independence. Its seven charter members included the Ukrainian National Association, the Providence Association of Ukrainian Catholics, and the Ukrainian National Aid Association. The OOU raised about 250,000 dollars to help Ukrainian organizations in Western Europe and in Western Ukraine and organized protest campaigns against the Polish *Pacification in Galicia and the 1933 man-made famine in Soviet Ukraine. It published several books on Ukraine for the American reader, including *Polish Atrocities in Ukraine* (1931), a book on the famine, and *Spirit of Ukraine: Ukrainian Contribution to the World Culture* (1935) by D. Snovyd (Dontsov). Its presidents were Rev L. Levytsky (1923-4), Rev V. Spolitatevych (1924-6), O. Reviuk (1927-39), and M. Murashko (1939-40). From 1924 its secretary was L. Myshuha. With the establishment of the *Ukrainian Congress Committee of America in 1940 as the main Ukrainian representative body in the United States, the OOU was dissolved.

United Ukrainian Orthodox Sisterhoods (Obiednannia ukrainskykh pravoslavnykh sestrystv, or OUPS). A national women's organization established in 1961 to represent and co-ordinate the work of Ukrainian Orthodox parish sisterhoods in the United States. The OUPS provides scholarships, social services to senior citizens, and financial aid to needy Ukrainians in Europe and South America. It has also participated in campaigns for human rights and the defence of Ukrainian political prisoners in the USSR. It has organized cultural events, such as concerts of church music and literary evenings. Its organizational news and views were first published in a page devoted to women's issues in *Ukrains'ke pravoslavne slovo* and then in the quarterly *Vira*, edited by H. Petrenko (1975-). Its major contribution to Ukrainian education has been the publication of a junior encyclopedia titled *Ukraina* (1971), which was translated into English as *Ukraine: A Concise Encyclopedia* (1988). As a member of the World Federation of Ukrainian Women's Organizations and the World Congress of Free Ukrainians it participates in the projects of the world bodies. The first president of OUPS was L. Ivchenko (IL. *Kovalenko) 1961-9; she was followed by O. Selepyna (1969-74 and 1977-8), H. Petrenko (1974-7), and V. Kuzmych (1978-present). Today (1989) the association represents 48 parish sisterhoods.

United Ukrainian Toilers Organization. See League of American Ukrainians.

United Ukrainian War Veterans in America (Obiednannia buvshykh voiakiv ukrainsiv v Amerytsi, or OB-VUA). The largest Ukrainian veterans' association in the United States, formed in New York on 9 October 1949 out of the Ukrainian War Veterans' Association of the USA (est 1924) and Ukrainian veterans who had recently arrived in the United States. Its head office is in Philadelphia. In 1964 it had 17 branches with a membership of 850, consisting of former soldiers of the *Army of the UNR, the *Ukrainian Galician Army, and of foreign armies, and of members of the autonomous Brotherhood of *Ukrainian Sich Riflemen. By 1990 there were 6 branches remaining, with approx 200 members. The OB-VUA has set up the Combatants' Welfare Service (1953) to help needy Ukrainian veterans and is a copublisher, with the Brotherhood of Former Sol-

diers of the First Ukrainian Division of the Ukrainian National Army, of the quarterly **Visti kombatanta*. Other veterans' organizations, such as the Former Members of the Ukrainian Insurgent Army, Brody-Lev, the Ukrainian War Veterans' Association of Canada, and the Ukrainian American Veterans, maintain friendly relations with the OB-VUA. The presidents of the association have been D. Halychyn (1949-53), V. Galan (1953-80), Y. Vyshnevetsky (1980-6), and O. Trush (1986-).

The Univ Dormition Monastery

Univ. Formerly an important Galician monastic center (pop 1,300) with a thriving publishing industry. After the Second World War it was renamed Mizhhiria; it is now a village in Peremyshliany raion, Lviv oblast.

In the 14th century the Orthodox church founded the Univ Dormition Monastery, and it was built with fortified walls. In 1618 the hegumen K. *Stavrovetsky-Tranquillon began issuing the expository *Zertsalo bohosloviia* (Mirror of Theology) on the monastery's mobile printing press. The monastery's permanent press was brought from Lviv by Bishop A. *Zhelyborsky. The leading printer A. *Skulsky worked there from 1646, and a psalter and acathistus were published in 1660. In 1670-1710 the monastery's overseer was the archimandrite V. Sheptytsky, under whom S. and V. *Stavnytsky printed *Vyklad o tserkvi sviatoi* (An Essay on the Holy Church, 1670) and D. Kulchytsky printed a psalter (1678). Also at the Univ Monastery Press, the Moldavian metropolitan D. Barila published the important versified psalter *Psaltirea pre versuri tocmită* (1673, modeled on J. Kochanowski), an acathistus (1673), and a liturgicon (1679), all in Cyrillic Rumanian, translated from Ukrainian texts.

The Univ Dormition Monastery came under the jurisdiction of the Basilian monastic order in 1700-90. During the tenure of Bishop A. Sheptytsky (1722-46) the chronicle *Sobranie pryypadkov* (Collection of Events, 1732) was published, as were liturgicons in 1733, 1740, and 1747.

In all, about 60 books were published by the Univ Monastery Press, and the printing remains an example of typographic excellence. In 1770 the press went into decline because of a clash with the Lviv Dormition (Stauropogion) Brotherhood. In 1919 Metropolitan A. Sheptytsky transferred the Studite Fathers' heguminate to Univ. They founded a painting school and a bookbindery, and published the monthly *Prominchyk sontsia liubovy* (1935-9). When Soviet forces occupied Galicia in 1939, the Univ

Dormition Monastery's cells were turned into prison cells, and the rest of the buildings were converted into an asylum for the aged.

B. Kazymyra

Universal (from the Latin *litterae universales*). An act issued by a government as a proclamation of a certain position, as a political resolution, or for the conferral of privileges. In 17th- and 18th-century Ukraine, various hetmans, members of the General Officer Staff, and colonels followed the example of Polish kings and the Sejm in issuing universals, which dealt with military affairs (eg, the beginning of a campaign, a duty roster), land affairs (eg, the recognition of land claims, distribution of holdings, setting of boundaries, enserfment of peasants), appointments to government positions, the levying of taxes, and declarations of foreign policy (eg, the appointment of envoys, signing of treaties). Some universals served as certificates of personal protection.

Universals were written largely in the hetman's or a colonel's chancellery. The preamble contained the names of the issuing party and the addressee, and the end section included the place and date of issue and a signature. Most universals were disseminated through local administrative offices (one per company), and some were read in public squares or in churches.

One of the first hetmans to issue a universal directly to the Ukrainian population was P. Pavliuk in 1637. Thereafter virtually every hetman, including K. Rozumovsky, issued universals (see *Hetman manifestos). Also notable was the universal issued on 22 July 1655 by A. Zolotareno, the wife of B. Khmelnytsky, in defense of the estate of the Hustynia Trinity Monastery.

Later, political documents and addresses to the population by leaders of revolutionary movements also came to be called universals. The leaders of the Koliivshchyna rebellion, for example, issued a universal in 1768, calling the peasantry to revolt against the Polish nobility. In 1917–18 the Ukrainian struggle for *independence culminated in the proclamation of the four *universals of the Central Rada.

A. Zhukovsky

Universal'nyi zhurnal (Universal Journal, or *UZh*). An illustrated journal for the general educated reader. It was edited by a board consisting of O. Vyshnia, M. Bazhan, M. Yohansen, Yu. Smolych, and O. Slisarenko, and it appeared monthly in Kharkiv from November 1928 to August 1929. *UZh* published works by the aforementioned writers and by M. Kulish, O. Dosvitnii, V. Gzhytsky, M. Semenko, V. Vrazhlyvy, O. Vlyzko, L. Chernov, N. Zabyla, L. Pervomaisky, K. Kotko, Yu. Gedz, S. Chmelov, Yu. Shovkopl'ias, and M. Skazbush. It included literary translations; articles on civic matters, politics, international affairs, literature, art, film, science, and technology; humorous and travel sketches; and a chronicle of cultural events. It was illustrated by V. Krychevsky, I. Padalka, A.

Petrytsky, L. Kaplan, O. Dovhal, B. Fridkin, and other artists; it also published photographs.

Mykhailo Hrushevsky's booklet on the Ukrainian Central Rada and its first two universals (1917)

Universals of the Central Rada. In 1917–18 the Ukrainian *Central Rada (CR) adopted and promulgated four edicts possessing the significance of fundamental laws and reflecting the evolution of the Ukrainian state, from autonomy within Russia to independence. Like the edicts of the 17th- and 18th-century Hetman state, they were called *universals. The universals were published in the official CR organ, *Visty z Ukrains'koi Tsentral'noi Rady*, and most newspapers, broadcast by radio, and posted throughout Ukraine on placards printed in Ukrainian, Russian, Polish, and Yiddish. The author of the First Universal was V. *Vynnychenko; he also coedited the Second and Third universals. The Fourth Universal was cowritten by M. *Hrushevsky, Mykyta *Shapoval, and Vynnychenko. The First Universal was proclaimed at the Second All-Ukrainian Military Congress; the Second, at a CR session. The Third and Fourth universals were voted on as bills and passed at sessions of the Little Rada.

In the First Universal (23 June 1917) the CR proclaimed Ukraine's autonomy ('from this day on we alone will create our life'). Referring to the hostility of the Russian *Provisional Government's (RPG) rejection of the demands put to it by the CR delegation in Petrograd, it stated, 'without seceding from all of Russia ... let the Ukrainian people have the right to manage its own life on its own soil,' and called for the creation of a democratically elected all-Ukrainian people's assembly, which would have the sole right to draft laws that would be confirmed later by the *All-Russian Constituent Assembly. It appealed to the national minorities for support and co-operation and introduced a special public tax as the basis of the CR treasury. Five days later the first government of autonomous Ukraine, the *General Secretariat (GS) of the Central Rada, was appointed.

The Second Universal (16 July 1917) reflected the results of the 12–13 July negotiations between the GS and RPG representatives in Kiev. Addressed to the 'citizens of the Ukrainian land' instead of, as in the First Universal, 'the Ukrainian people,' it proclaimed that the CR would be expanded to include representatives from the national minorities, and would thereby become 'the single supreme body of revolutionary democracy in Ukraine.' A new GS would be appointed and would be 'subject to confirmation by the RPG as the repository of the highest regional authority of the RPG in Ukraine.' The CR would 'prepare

drafts of legislation for Ukraine's autonomous structure, would submit them for confirmation to the All-Russian Constituent Assembly, and would not take any steps to establish Ukrainian autonomy until the assembly was convoked. The formation of separate Ukrainian military units would be subject to the approval of the Russian minister of war.

The Third Universal (20 November 1917) was issued after the Bolshevik coup in Petrograd. Addressed to 'the Ukrainian people and all the peoples of Ukraine,' it proclaimed the creation of the *Ukrainian National Republic within a federated Russia of equal and free peoples. The UNR would be governed by the CR and GS until the convocation of the Constituent Assembly of Ukraine. The universal abolished capital punishment and the ownership of land by nontillers; declared all land the property of the working people without compensation to its former owners; introduced an eight-hour workday and state control over all production; stated that the CR would 'use resolute means to force ... both allies and enemies to begin peace negotiations at once'; granted full amnesty to all political prisoners and *national-personal autonomy to Ukraine's national minorities; directed the GS to strengthen and broaden the local self-government rights; affirmed the freedom of speech, the press, religion, assembly, and association, the right to strike, and the inviolability of the person and the home; called upon all citizens to 'struggle decisively against all anarchy and destruction' (ie, the Bolsheviks); and set 9 January 1918 as the date for election of the *Constituent Assembly of Ukraine and 22 January as the day of its convocation.

The Fourth Universal (22 January 1918) was issued after the *Ukrainian-Soviet War began. Denouncing the Bolshevik aggression and expressing the desire for peace, it proclaimed the UNR an 'independent, subject to no one, free, sovereign state of the Ukrainian people.' The universal renamed the GS the *Council of National Ministers (CNM) of the UNR, directed it to negotiate an independent peace treaty with the Central Powers and to 'struggle firmly against all counterrevolutionary forces,' and called on all citizens to defend their welfare and liberty and to drive out the Bolsheviks. It announced an immediate end to the war and promised that the army would be replaced by a people's militia after the ratification of the peace treaty; prescribed new elections to rural-district, county, and urban popular councils; affirmed that a land law would soon be ratified and that all land would be transferred from the land committees to the people before spring tilling; nationalized all natural resources and the most important branches of commerce; directed the CNM immediately to change over industry to peacetime production, to increase the industry of the state, to solve unemployment, and to ensure the welfare of the handicapped; introduced state supervision of imports, exports, and monopolies to prevent speculation and excessive profits by the bourgeoisie; imposed state control over banks so that loans could thenceforth 'primarily ... support the working population and the economic development of the UNR'; and reaffirmed all democratic freedoms and national-personal autonomy. Although the universal was antedated to the day the Constituent Assembly of Ukraine was to convene but could not, it was in fact passed by the Little Rada on 25 January 1918.

Universita Cattolica Ucraina. See Ukrainian Catholic University.

Universities of Marxism-Leninism (*universytety marksyzmu-leninizmu*). Communist educational institutions, established in the USSR in 1938. These universities were organized by city Party committees at larger enterprises. Their purpose was to train propagandists for the system of political education. Courses were scheduled in the evening or offered by correspondence so that students could continue their education 'without withdrawing from the production process.' In 1981–2 there were 26 such universities in Ukraine, with 62,400 students, of whom 44,700 were Party members.

University. An institution of higher learning offering programs of study in all of the major academic disciplines. In Ukraine there are 10 universities to date (1991), with a total enrollment of 110,000. They are the *Chernivtsi, *Dnipropetrovske, *Donetske, *Kharkiv, *Kiev, *Lviv, *Odesa, *Symferopil, *Uzhhorod, and *Zaporizhia universities. The normal program of study lasts five to five and a half years. Until 1992 universities were under the jurisdiction of the USSR Ministry of Higher and Specialized Secondary Education, and the *Supreme Attestation Commission in Moscow was the body which conferred all university degrees and academic appointments in Ukraine, and which designated fields in which each institution could conduct degree training. In recent years university students and staff have challenged the absence of university autonomy. (See *Higher education.)

Unkovsky, Grigorii [Unkovskij, Grigorij], b and d ? A 17th-century Muscovite diplomat. He was sent by the tsar to Ukraine in 1649 to negotiate with Hetman B. Khmelnytsky. His message was that Moscow could not render military assistance to Ukraine in securing its northwestern frontier, as that would contravene its peace treaty with Poland. Moscow's offer of economic aid and trade concessions provoked the Poles into attacking Ukraine. Soviet scholars have interpreted Unkovsky's mission as a success by regarding the discussions as an important step in the process of the 'reunification' of Ukraine with Russia.

UPA. See Ukrainian Insurgent Army.

Upenyk, Mykola, b 14 June 1914 in Platove-Ivanivka, Tahanrih circle, Don Cossack province. Socialist-realist poet. A former editor of *Pravda Ukrainy*, deputy chief editor of *Radians'ke mystetstvo* and *Vsesvit*, and managing editor of *Kul'tura i zhyttia* (1960–2), since 1935 he has published numerous poetry collections, a collection of song lyrics, children's books, and a book of articles.

Uplands (*vysochyny*). Parts of the earth's surface that rise above surrounding plains. Uplands on dry land usually rise 200–600 m above sea level. They are areas subjected to intensive erosive forces, which commonly carry materials from them (mostly by flowing water) onto adjacent lowlands. Uplands may be characterized morphologically as hilly, rolling, flat, or incised, according to the forces sculpting the surface.

The formation of uplands on the territory of Ukraine is associated with geological structure and tectonic movements of the earth's crust. The southern spurs of the Central Upland mark the upwarp of the Voronezh Massif. The Donets Ridge corresponds to a remnant of the main Donets Basin anticline. Neotectonic uplift (300–350 m) of portions of the southwestern slope of the East European Platform resulted in the formation of the inverted morphostructures of the Volhynia-Kholm Upland and the Podolian Upland. Neotectonic uplift (200–300 m) of individual blocks of the Ukrainian Crystalline Shield gave rise to the Dnieper Upland and the Azov Upland.

The uplands of Ukraine form two distinct belts. In the northeast is the Central Upland, the southern spurs of which (rising to 200 m above sea level or more) enter the territory of Ukraine. Its extension to the southeast forms the Don Ridge. Through the middle extends a belt of uplands, tapering off to the east. In its western reaches are the Volhynia-Kholm Upland (200–300 m above sea level); the Podolian Upland (200–400 m, reaching 471 m at Mt Kamula) with its western extensions, the Opilia Upland (250–400 m) and the Roztochia (300–390 m); and, south of the Dniester River, the Pokutian-Bessarabian Upland (200–400 m, reaching 516 m at Mt Berda). In the center of Ukraine are the Dnieper Upland (180–320 m) and the Zaporozhian Ridge (150–200 m), which straddles the Dnieper River at the rapids. The Azov Upland (200–250 m, reaching 327 m at Mt Mohyla-Belmak) is found in the southeast, and the Donets Ridge (150–300 m, reaching 367 m at Mt Mohyla-Mechetna) in the east.

Among the uplands of Ukraine the gently rolling Volhynia-Kholm Upland and especially the plateaulike Podolian Upland are severely eroded. The depths of the incised valleys and ravines range from 50 to 100 m, and along the Dniester River the valleys form gorges 150–200 m deep. Along the Dnieper River the rolling Dnieper Upland is incised with ravines and tributary valleys 100–150 m deep, and the hilly Azov Upland is carved up with ravines and valleys 150–200 m deep. In the northeast the southern spurs of the rolling Central Upland have a dense network of ravines and gullies, joining river valleys 200–250 m below the general level of the upland.

I. Stebelsky

Upper elementary school (*vyshcha pochatkova shkola*; Russian: *vysshee nachalnoe uchilishche*). Four-year schools established in 1912 in the Russian Empire to replace *city

schools. They were created in order to facilitate admission to secondary schools for the less-privileged social groups. The program of upper elementary schools resembled that of the four lower classes of secondary schools, except for the fact that foreign languages were not part of the curriculum. Upon graduation from upper elementary schools students could enter the fifth grade of the secondary-school system upon successful completion of foreign-language entry examinations. Tuition fees were charged, and all instruction was in Russian. In some schools supplementary one- or two-year vocational courses were organized. In 1917 there were 312 upper elementary schools in Ukraine, and in 1920, 1,210. The schools were abolished with the Soviet Ukrainian education reform of 1920.

Urals. The popular name for the Ural Mountains as well as for the geographic and economic territory that makes up the southern reaches of the range and the foothills (mostly rolling plains) to the east, west, and south. Ukrainians live in the southern section of the Urals (an area of 355,500 sq km), in Cheliabinsk and Orenburg oblasts and the Bashkir AR. In 1980 the population of the area was 9.5 million, of whom 64 percent lived in cities. The southeastern section of the Urals (Ural oblast) lies in Kazakhstan. The regions in which Ukrainians reside are in the steppe and forest-steppe zones and have chernozem soils. The climate is continental, with mean January temperatures of -14 to -18°C , July temperatures of 17 to 21°C , and an annual precipitation of 300–700 mm.

Ukrainians began settling in the Urals in the 18th century, at around the same time as they were moving into the Volga regions. Virtually the entire immigrant population worked in agriculture. Census figures show that by 1897 there were 49,000 Ukrainians in the region. Immigration to the Urals subsequently increased, and the number of Ukrainians had reached 236,000 by 1926. They settled mostly in the southeastern section of what is now Cheliabinsk oblast. They formed a majority in many settlements; their presence is reflected in place-names such as Poltava, Dvorianske, and Kharkivskyyi Khutir.

The condition of the Ukrainians in the Urals changed considerably in the 1930s and more so after the Second World War. Cut off from further sources of immigration and deprived of any national rights, local Ukrainians became denationalized. Loss of linguistic fluency was a particular problem. In addition many moved to the cities, and large urban concentrations of Ukrainians emerged in Cheliabinsk, Magnitogorsk, Orenburg, and other locales. By 1970, 51 percent of the Ukrainians in the region lived in cities.

According to the 1970 census there were 76,000 Ukrainians in the Bashkir ASSR, 113,000 in Orenburg oblast, and 115,000 in Cheliabinsk oblast (a total of 304,000). The largest ethnic group in the Ural region was Russian (42.6 percent of the population). Other groups included the Bashkir, Mordovian, and Belarusian people. The impact of denationalization on local Ukrainians was marked. In 1970, 64.2 percent of Ukrainians gave Ukrainian as their mother tongue. Of the rest, only 18.7 percent were also fluent in Ukrainian. Certainly elements of folklore (songs in particular) and dress seemed to persist longer than sentiments of nationality or facility with language.

V. Kubijovyč

Urazovsky, Serhii [Urazovs'kyj, Serhij], b 8 October 1903 in Rivenky, Tahanrih district, Don Cossack province (now Luhanske oblast), d 13 January 1961 in Kharkiv. Physical chemist; AN URSR (now ANU) corresponding member from 1943. A graduate of Kharkiv University (1927), he taught at the Kharkiv Chemical Technology Institute (1930–50) and chaired departments at the ANU Institute of Physical Chemistry (1941–2), the Kharkiv Chemical Technology Institute (1942–50), the Kharkiv Polytechnical Institute (from 1950), and Kharkiv University. Specializing in the physical chemistry of surface phenomena, Urazovsky originated the theory of molecular polymorphism and wrote a monograph about it (1956).

Mykhailo Urban: *Playful Forms* (painted plywood, 1976)

Urban, Mykhailo, b 27 September 1928 in Luka, Galicia. Sculptor and painter. A resident of the United States since 1950, he studied at the School of the Art Institute of Chicago, the University of Chicago (BFA, 1959) and the University of Notre Dame (MFA, 1972). He has been active in the Ukrainian Institute of Modern Art in Chicago. Most of Urban's work has been nonrepresentational. The arrangement of his spatial plywood sculptures results in a constructionist unity of forms and colored surfaces (eg, *Pulsating Form*, 1969). His tubular steel sculptures, such as *Parallel Counterpoint* (1971) and *Mahamudra* (1981), reveal the artist's planar concerns. Urban's paintings (mostly acrylic) are hard-edged, abstract compositions with flat areas of clearly defined and undifferentiated hues (eg, the series 'Exploration I, II, and III,' 1972). Solo exhibitions of his works have been held in Chicago (1965, 1973), Urbana, Illinois (1970), and elsewhere, and he has taken part in many group exhibitions.

Urban economy. See Municipal services.

Urban planning. The design and construction of cities and other urban settlements. The spontaneous growth of the earliest cities was restricted mostly by defensive needs. In Europe deliberate attempts to lay out streets and public buildings date back to the medieval period.

Urban planning in Ukraine can be traced to the second half of the 16th century. (For the earlier history of urban settlements see *Cities and towns.) Many cities founded or rebuilt at that time by the Polish magnates of Right-Bank Ukraine, including Zamość (1580), Sharhorod (1585), Brody (1586), and Zhovkva (1597), bore features of the Italian Renaissance. Zamość was designed by B. Morano of Padua, who lived in the city from 1579 to 1600, and its construction took 50 years. The old town has survived almost intact and is one of the finest examples of Renaissance urban planning. Brody was planned as a rectangular city with a standard grid of streets and two markets. The castle of its owner, S. Koniecpolski, was situated at the hub of the city's fortifications. Some of the cities resembled fortresses. Stanyslaviv (now Ivano-Frankivske), founded in 1662 by A. Potocki, consisted of a few blocks of houses, a marketplace, a castle, and a church, all surrounded by defensive walls. Continual warfare hampered the growth of cities in Ukraine.

In Left-Bank Ukraine the character of urban design was influenced by the cultural and spiritual role of the settlements. Many cities were dominated by large monasteries and were important religious and educational centers. Generally trade and manufacturing were poorly developed. The cities of the Hetman state remained quite small, usually having under 10,000 inhabitants. Their main architectural style was the Cossack baroque.

The towns of Slobidska Ukraine were designed primarily as armed outposts. They were built at strategic sites, usually in unsettled territory on routes used by the invading Nogay and Crimean Tatars. Sumy (est 1650s), for example, was built on a spit and surrounded by three rivers, a palisade, and earthen walls. Its gridiron of streets and squares permitted a high population density within the fortified center and gave the settlement a city appearance. In one of the corners of the city stood the citadel, the city's main stronghold. The irregular streets in the suburbs outside the city walls sprang up spontaneously, without formal planning.

Beginning in the mid-17th century the tsarist government attempted to regulate urban planning throughout the empire but had limited success. The first truly planned city in the empire was St Petersburg, built in the first decades of the 18th century. City planning became a regular feature in the development of the new territories annexed by Russia. In Southern Ukraine, which had been inhabited by nomadic Tatars and was captured by the Russian Empire in the second half of the 18th century, there were no urban centers. Unrestrained by established norms or traditions, the state could create cities according to its own designs. City planning was strongly supported by Peter I and especially Catherine II. In 1762 a special commission was set up by the central government to draw up plans for over 400 cities throughout the empire. Most of the plans were prepared by foreign-born architects and engineers. Generally the cities were laid out in a geometric pattern. Their gridiron of streets was usually rectangular and occasionally radial. In some cases plans were imposed on a previously settled territory without consideration for lo-

cal traditions or geographic conditions. Often only a plan's central core, dealing with government and public buildings, was implemented. A certain code of esthetics played a major role in city design: broad avenues with grand views lined with uniform buildings were officially prescribed. Generous provisions were made for parks and greenery. A special district was set aside for industry, and residential areas were segregated by class. Ukrainian cities that were planned and built in the late 18th and early 19th centuries include Katerynoslav (by I. Starov and V. Geste), Mykolaiv (by I. Kniazev), Kherson, and Odessa (by F. de Volland and J. de Ribas). Odessa was noted for its European appearance.

The government continued to regulate urban planning throughout the 19th century. The pace of urbanization, however, especially in the developing mining and manufacturing areas of the Donets Basin, often precluded the possibility of conscious planning and design of cities. Little thought was given to public utilities or the rational use of space in the developing industrial cities, and in the suburban districts of established cities.

In the Soviet period urban planning developed rapidly throughout the USSR. According to Marxist ideology social and economic planning are feasible and desirable, a doctrine that has important implications for city planning. Ambitious renewal projects for many old cities were drafted, and new model centers of industry and culture were designed.

The best example of the new approach to urban planning in Soviet Ukraine was Kharkiv, the country's first capital. Under I. Voitkevych's direction an ambitious plan was drawn up: a new city center with a square of over 11 ha and a variety of official buildings, mostly in the constructivist style, were to be built. Although P. Alosyn's innovative design for a new residential district was neglected, much work was completed before the capital was transferred to Kiev in 1934.

In June 1933 the Soviet government issued a decree on the design and reconstruction of cities, and in July 1935 it adopted a general plan for the reconstruction of Moscow. Similar plans were to be drawn up for all the cities of the USSR. At that time the Ukrainian Institute of City Planning in Kiev played an important role in the development of urban planning. From 1930 to 1934 it prepared plans for the reconstruction of 38 cities, including 27 Ukrainian ones. Uncontrolled population growth in the cities and a failure to appreciate the role of automotive transport caused many problems. Many roads in the old city were transformed into monumental boulevards or squares which hampered effective movement. Not enough new housing was constructed, but many pompous office buildings were erected in the official socialist-realist style. The reconstruction of the cities led to the demolition of many historical and architectural monuments. Many old cities, such as Kiev and Poltava, began to lose their distinctive character.

Although it has long been widely recognized that urban planning and construction require a comprehensive approach, city planning in Ukraine was often fragmentary and incomplete. Many cities have no general development plan, or have an outdated plan; of the 331 cities in Ukraine, including Kiev and Odessa, in 1960, for example, 187 did not have a general plan. City planning was complicated by the fact that local planning had to be compati-

ble with the all-Union economic plan. Furthermore, city administrations were often influenced by interests that conflicted with the interests of the industrial enterprises on their territory. Professional city planners were often unqualified, and qualified ones were in short supply. The methodology of city planning was undeveloped. The problem of rapid urban growth was tackled by the introduction of urban microregions and satellite settlements. Satellite cities were laid out 10–20 km from the main cities, beyond the greenbelts that ring the metropolitan centers. Most new Ukrainian cities are in the Donets Basin: 18 new cities were registered there in 1959–70. The location of the new cities indicates that the chief factor in siting was accessibility to sources of raw materials.

In general recent city planning in Ukraine has been fairly well developed compared with Western practices. The lack of financial resources and poor quality control, however, have been much graver problems in Ukraine. Official buildings and hotels in the city centers, and sporting facilities, have been built with greater care than most buildings. The over-centralized nature of city planning has resulted in monotonous buildings and city layouts, particularly in new districts. Another distinctive feature of Soviet planning was high population density. New cities and new housing districts of old cities are compact and easily accessible to pedestrians and public transport. In planning new housing districts, some provision was made for private housing, but not for sewers and water supply for the private housing. For economic and ideological reasons most new housing was concentrated in microregions, which hold 5,000 to 10,000 inhabitants and cover an area of 30–50 ha. Communal housing is still claimed to be the optimal form of living. The architectural style of new Ukrainian cities is contemporary modernism. Buildings are up to 24 stories high.

Urban transit. The transportation of passengers within a given city or town or between a city and its suburbs. The most common modes of transport used for this purpose are buses, trolleybuses, tramways (horse, steam, or electric – also called streetcars or trolley cars), subways (metros), and suburban railways.

The first modern urban transport system in Ukraine was established in Odessa in 1880, where a 8.5-km steam tramway line was built between Kulykove Pole and the Great Fountain. Then the first horse-drawn tramway was introduced, in Lviv in 1886. Kiev was the first city in Ukraine to introduce electric tramways (1892), petrol-rail buses (1912), trolleybuses (1936), a subway (1960), a monorail (1971), and light-rail transit (1982). Kharkiv was the first to establish a regular suburban railway network, in 1975. Its example was followed quickly by Kiev and Kryvyi Rih.

URBAN TRANSIT

The scale of urban transit in Ukraine is enormous. Over two-thirds of the republic's 50 million people live in urban areas. A very large urban cluster has emerged in the Donbas region around Donetsk (Makiivka, Yenakiieve, Horlivka, Komunarske, Lysychanske, Sverdlovske, Luhanske, Stakhanov, Dzerzhynske, Artemivske, Kostiantynivka, Kramatorske, Krasnyi Luch, and Slovianske). Slightly smaller conurbations have developed around Kiev, Kharkiv, and Dnipropetrovske. Since there are relatively few private automobiles, most people have to commute by public transit. The number of daily passenger trips in Ukraine increased sixfold between 1950 and 1980, and the trend is still growing. The number of transit systems has also increased (see table 1).

Meanwhile the growth of traffic and changes in transport modes have produced some unintended consequences. Bus services have grown at a rate exceeding the officially approved level. Traffic congestion and pollution, associated particularly with buses, are considered sufficiently serious to require a complete overhaul of transport policy. Transport authorities are planning to increase and extend urban electric transport and cut back on bus traffic. Since subways and suburban railways are expensive and take a long time to build, the preferred solution is to reviv-

TABLE 1
Growth of transit systems by transport mode in Ukraine, 1914-88

Mode	1914	1940	1963	1970	1984	1988

Trolleybuses	-	4	20	30	39	41
Buses	-	63	264	320	436	460

italize the tramway in the form of a light-rail system (basically a rapid tramway with its own right-of-way). Kiev was the first city to build a light-rail line, in 1982. Despite government commitment to the policy the share of urban traffic carried by electric transport has not changed significantly. Not only are buses cheaper and simpler to operate, but their cost has risen less rapidly than that of other modes. In the past 25 years tramways have been replaced by buses in Chernivtsi, Kerch, Kherson, Kremenchuk, Sevastopil, and Symferopil (see table 2). Still, completely new tramway systems have been built in Stakhanov and Yenakiieve. Light-rail systems have been introduced in

Urbanization. A process of population concentration whereby the ratio of urban dwellers in the total population of a country increases. The growth of cities and towns is closely linked to economic development and social modernization. The fact that until the early 1960s the majority of Ukraine's population lived in rural areas is indicative of the country's economic underdevelopment. Urbanization has loomed large as a problem in Ukraine's national development because until the 1930s the majority of urban residents were non-Ukrainian.

A striking characteristic of urbanization in Ukraine was that there was less of it at the beginning of the 19th century than in the second half of the 17th century. It has been estimated that in the mid-17th century Ukraine had 1.2 million urban residents, which figure represented 10 percent of the total population. By the beginning of the 19th century Ukraine's cities and towns had only 375,000 inhabitants, or 5 percent of the total population. The deurbanization of Ukraine that occurred in the second half of the 17th and in the 18th centuries was a consequence of the socioeconomic policies of the Russian and Polish rulers, such as the enslavement of the peasants, which restricted their ability to migrate to urban centers, the ruin of Ukraine's trade and industry by Russian mercantilist policies, and discriminatory measures applied against Ukrainian urban dwellers by the Polish authorities. Only after the abolition of serfdom and the development of trade and industry in the 1870s and 1880s, spurred by foreign investment, did the urban population begin to grow again. By 1897 Ukraine had 3 million urban inhabitants, representing 13.2 percent of the total population.

The urbanization of Ukraine that occurred in the 19th century proceeded largely without the participation of Ukrainians. As a consequence, with little more than 5 percent of their numbers living in towns in 1897, they were the least urbanized national group in their native land. By contrast, 38 percent of Russians and 45 percent of Jews living in Ukraine in 1897 were urban dwellers. In 1897, Ukrainians formed 30 percent of the urban population of Russian-ruled Ukraine. The weak Ukrainian presence in towns, combined with discriminatory tsarist policies aimed at stultifying the Ukrainian language and culture, meant that the cities provided a milieu for the Russification of the relatively few Ukrainians living there. As a result, in the course of the 1917-21 struggle for independence the Ukrainian national movement was weakest in the urban centers. That weakness made an important contribution to its defeat. Symptomatic of the problems the movement faced was the fact that in 1917 only 16 percent of Kiev's population was Ukrainian.

The collapse of Ukraine's economy and industry during the revolutionary period of 1917-21 resulted in a decline in the urban population. By 1920, the cities and towns in what was to become Soviet Ukraine counted 4.1 million inhabitants, 1.5 million fewer than the 1914 figure of 5.6 million. During the 1920s, urban centers began recouping their population losses. In 1926, 18.5 percent of Ukraine's population lived in urban centers, and Ukrainians accounted for 47 percent of the urban population. During the second half of the 1920s the Ukrainian presence in the urban centers was strengthened. The growth was brought about by the sizable in-migration of Ukrainian peasants; by Ukrainization policies, which halted the Russification process in urban centers and created employment opportunities for Ukrainian-speakers; by the

spread of literacy in rural areas; and by the rise in the expectations of village youths, who had been most affected by the mobilization of 1917–21. A 1927 study of migration into the cities of Odessa, Kiev, and Dnipropetrovsk found that three out of four residents were from Ukraine and that 77 percent of those were from the countryside.

The industrialization of the 1930s resulted in rapid urban growth: Ukraine's urban population increased from 5.4 million in 1926 to 11.2 million in 1939, and the proportion of urban residents increased from 18.5 to 32.6 percent of the total population in the same period. Because Ukraine's industrialization was centered on the development of mining and heavy industry, the Donbas and Dnieper Industrial Region accounted for three-quarters of the increase. Industrialization thus created serious regional imbalances in Ukraine's urban network. The urban population of Right-Bank Ukraine stagnated during the 1930s.

The devastation of the countryside during *collectivization accelerated the migration of peasants to the city and changed the national composition of Ukraine's urban population. The number of Ukrainians in the towns increased from 2.5 to 6.8 million between 1926 and 1939, and the rate of urbanization among Ukrainians had risen to 29 percent by 1939, almost triple the 1926 figure. By 1939, Ukrainians had emerged as a majority of the urban population, 58.1 percent. The increase in the Ukrainian urban population would have been much higher had it not been for the 1932–3 man-made *famine. To combat the spontaneous process of immigration, a series of laws regulating migration were passed in 1931 and 1932, and on 27 December 1932 the internal passport was introduced. By making peasants apply for passports in their villages and report their destinations, the authorities artificially controlled the migration to towns.

There was little industrial development in Western Ukraine until the period after the Second World War, and Ukraine's western oblasts remained predominantly rural until the 1980s. In 1931 only 18.5 percent of the 9.1 million inhabitants of the Ukrainian lands under Polish rule (Galicia, Volhynia, Polisia) lived in towns and cities, and only 28 percent of the urban population was Ukrainian. In 1930, only 17.5 percent of the 1.2 million inhabitants of Rumanian-ruled Bukovyna were urban dwellers, and Ukrainians there represented 31 percent of the urban population. In 1930, 18 percent of the inhabitants of Transcarpathia under Czechoslovak rule lived in urban centers, and Ukrainians represented 38 percent of the urban population. After the Second World War Ukrainians increased their share of the urban population of those regions in the wake of the departure of the members of the former ruling nations. By 1959 the overwhelming majority of urban residents of the western oblasts were Ukrainians.

During the Second World War Ukraine's cities bore the brunt of military confrontations. Ukraine's urban centers accounted for 40 percent of the population of the USSR left homeless by the war. Between 1946 and 1951, however, Ukraine received only 15 percent of Soviet construction funds to rebuild its cities. The central government's neglect of investment in Ukrainian urban construction meant that as late as 1950 Ukraine's towns had 12.8 million people, well below the 1940 total of 13.8 million, and two-thirds of the republic's population lived in the countryside, just as in 1940.

Real urban growth did not begin until the 1960s: the number of urban residents grew from 19 million in 1959 to 26 million in 1970. Ukraine had an urban population exceeding half of the total population by 1966 (but the number of Ukrainians in the urban population was not proportionately equivalent). That Ukraine reached the benchmark a full decade behind the RSFSR pointed to major problems in the republic's urbanization. The gap in the rate of urbanization between Ukraine and Russia developed under Soviet rule; Ukraine had been more highly urbanized than Russia at the beginning of the 20th century. The gap reflected the unequal industrial investment policies of the central government in Moscow. Because major industrial investment decisions were the monopoly of the all-Union government in Moscow, Ukraine suffered from discriminatory practices in the location of new plants and factories. The republic's economic development was also affected by the substantial drain of capital. It has been calculated that Ukraine lost 34 percent of the total receipts of its budgetary system between 1959 and 1970. The net capital outflow represented 20 percent of Ukraine's reported national income.

The Ukrainians' rate of urbanization increased from 37 to 46 percent between 1959 and 1970. In 1959, Ukrainians accounted for 62 percent of the republic's urban population. Because during the 1960s there was a large-scale immigration of Russians into Ukraine (approx 750,000 Russians settled in its cities), the Ukrainians' share of the urban population remained largely stagnant between 1959 and 1970. In 1970, Ukrainians still accounted for only 63 percent of the urban population. The Russification of Ukrainians in the urban centers, especially in eastern Ukraine, reduced the size of the Ukrainian urban population. Russian in-migration also stymied Ukrainian urbanization because it forced Ukrainians to compete with Russians for jobs and housing.

Between 1970 and 1989 Ukraine's urban population grew from 25.7 to 34.5 million, or from 55 to 67 percent. The level of urbanization in Russia (74 percent in 1989) was much higher than in Ukraine. Ukraine's western oblasts remain characterized by a relatively low level of urban development; in 1989 only Lviv oblast had more than 50 percent of its inhabitants living in urban areas.

In 1979, 53 percent of Ukrainians lived in urban areas, and Ukrainians represented 63 percent of the urban total, a figure unchanged from 1970. The linguistic and cultural Russification of many Ukrainians and large-scale Russian in-migration into Ukraine's cities accounted for the failure of Ukrainians to improve their share of the republic's urban population. In 1989, Ukrainians represented 65 percent of the republic's urban population.

Urban-type settlement (*selyshche miskoho typu*, or *smt*). A special type of town introduced into the administrative-territorial system of the USSR in 1925. According to a decree of the Presidium of the Supreme Soviet of the Ukrainian SSR on the administrative-territorial structure of the republic (28 June 1965), an *smt* is a populated area around an industrial plant, construction site, railway junction, educational institution, research station, sanatorium, or other stationary medical or convalescent establishment that has state housing and over 2,000 residents, 60 percent of whom are wage or salaried workers or members of their families. In an exceptional case an *smt* may have fewer than 2,000 residents, if it is likely to develop soon into a full-fledged *smt*. Urban-type settlements are classified into three types: worker *smt* (no fewer than 3,000 residents), resort *smt* (no fewer than 2,000), and cottage *smt* (no more than 25 percent of the adults occupied in agriculture). The number of *smts* in Ukraine has increased steadily: there were 459 in 1940, 478 in 1950, 823 in 1960, 861 in 1970, 901 in 1980, and 927 in 1990.

Urbarium. A contract form for landowners and peasants in Hungary printed in the 1770s as a result of Maria Theresa's reforms. It outlined the obligations and rights of the peasants and was to be supplemented locally with precise details concerning each village. Printed in the different languages used in Hungary, it was, according to A. Petrov, who discovered and studied it from the historical and linguistic perspectives, the first printed document in the Ukrainian vernacular of Transcarpathia. It was reprinted in 1908 in *Sbornik Otdeleniia russkogo iazyka i slovesnosti Imperatorskoi akademii nauk*, no. 84. The replies of peasants to questions in the *Urbarium* were written down word for word in the Cyrillic or Latin alphabet. The notes from 212 villages have been preserved and are valuable dialectological materials, containing many geographical and personal names. They have been investigated and published in part by L. Dezső in *Studia Slavica Hungarica*, vols 3, 11; *Die Welt der Slaven*, vol 10; and *Slavica* (Debrecen), vol 10; and by I. Cherednychenko in *Naukovi zapysky Chernivets'koho universytetu*, no. 31.

Uriadovyi vistnyk Pravytel'stva Karpats'koi Ukrainy (Administrative Herald of the Government of Carpatho-Ukraine). An official organ of the government of Carpatho-Ukraine, five issues of which appeared from 20 October 1938 to March 1939. Initially it was published in Ukrainian and Russian and titled *Uriadovyi vestnik Pravitel'stva Pidkarpats'koi Rusi*. From the third issue it appeared only in Ukrainian, and it was renamed with the fourth issue (21 January 1939). The first issue appeared in Uzhhorod under the editorship of F. Skral. From the second issue (15 November) it was published in Khust and edited by V. Grendzha-Donsky.

Uruguay. A country in northern South America (1989 pop 3,017,000), with an area of 176,215 sq km (1989). Montevideo is its capital.

It is possible that a New Israel Orthodox sect from the Kuban region, which fled religious persecution at home and founded the colony of San Javier in the province (department) of Rio Negro in 1913, included many ethnic Ukrainians. Mass Ukrainian immigration did not commence until 1924–31, however, when several thousand, almost exclusively from the Western Ukrainian regions of Volhynia, Polisia, Galicia, Transcarpathia, and Bukovyna, arrived. In addition a small number (approx 50) of immigrants came from displaced persons' camps after the Second World War. From the 1950s to the 1970s the community experienced considerable out-migration to Argentina, North America, Australia, and even Ukraine in response to recurring economic crises. Conservative contemporary estimates of the size of the community have generally agreed on 8,000, which figure makes Ukrainians the largest single Slavic group in Uruguay.

Approximately half the country's Ukrainians live in Montevideo, and most of the others in cities such as Salto, Florida, and Paysandu. Few Ukrainians were able to establish themselves on the land owing to difficulties in gaining access to vacant tracts. Nevertheless, one group of approx 500 persons from Volhynia was able to found a colony in the department of Salto. Otherwise, those Ukrainians who elicited a livelihood from agriculture usually did so by becoming tenant farmers on the estates of wealthy landowners. The majority of the Ukrainian immigrants were employed as laborers in the frozen meat industry or in construction. Those who became farmers brought a new dimension to Uruguayan agriculture by introducing sunflowers and new varieties of wheat to the country. An insignificant number of Ukrainians started their own businesses, and a small percentage are now engaged in the liberal arts professions. Nearly all Ukrainians are home owners.

The first known Ukrainian organization was the Taras Shevchenko Workers' Society, which was founded in 1928. It assumed a pro-communist posture and gradually evolved into the Ukrainian-Belarusian Citizens' Cultural and Educational Organization. In 1934 the Prosvita society was founded, and functioned as a branch of the Prosvita society of Buenos Aires. It acquired its own premises in 1946 and maintained a part-time school. Among its achievements is the naming of one of the capital city's streets 'Ukrania.' Shortly after its founding, a split in the ranks of the Prosvita society resulted in the formation of a short-lived rival nationalist group, Vidrozhennia, which modeled itself after the organization of the same name in Buenos Aires.

For a long time Ukrainians in Uruguay were without religious institutions of their own. In 1948 the Prosvita society contacted the Basilian Fathers in Argentina, and the result was the establishment of a Ukrainian Catholic parish in 1952. The parish ceased to exist in 1967, when its priest, Rev I. Maika, died. The Ukrainian Orthodox community was organized around a brotherhood in Montevideo, but was unable to sustain a parish for an extended period of time owing to the acute shortage of Orthodox priests in South America.

Among other Ukrainian organizations which were briefly active in Uruguay were the Committee to Assist

the Ukrainian National Rada and the Committee for the Struggle against Communism.

In mid-1942 the All-Slavic Committee (ASC) was created in Moscow, and published a periodical (in Russian) called *Slaviane*, which was disseminated throughout the Americas. The ASC established its co-ordinating committee in Montevideo and in 1943 founded the Unión Eslava. The Soviet consul in Montevideo, V. Riabov, played a crucial role in its formation. In the 1940s the Unión Eslava consisted of approx 40 Slavic associations, mainly in Argentina and Uruguay, many of them Ukrainian. This pan-Slavic movement affected a considerable segment of the Ukrainian immigration in Uruguay, and those Ukrainian organizations that supported it soon lost their strictly Ukrainian character. During the 1940s the pro-communist Ukrainian organizations merged with like-minded Belarusian and Russian groups to found the Maxim Gorky Society (Centro Cultural Maxim Gorki), which maintained direct links with the USSR and had branches outside Montevideo. Since the 1960s, however, both this organization and Prosvita have had to contend, unsuccessfully, with the rapid assimilation, indifference, or disappearance of their constituencies. Neither group is very active today.

Uruski, Bill [Urus'kyj, Vasył'], b 27 July 1942 in Poplarfield, Manitoba. Canadian politician of Ukrainian descent. Uruski served as a Royal Canadian Mounted Police constable (1962–7) before his election to the Manitoba legislature in 1969 as the New Democratic party member for Interlake constituency. He was re-elected in 1973, 1977, 1981, 1986, and 1988. He was minister responsible for the Manitoba Public Insurance Corporation (1973–6, 1987–8), minister responsible for the Motor Vehicle Branch (1973–5), minister of municipal affairs and minister responsible for the Civil Service Act (1976–7), and minister of agriculture (1981–7).

Usatove culture. A Neolithic culture of the late 3rd millennium BC that existed in southwestern Ukraine along the lower Dniester River and the area near the Dniester Estuary. It takes its name from a site excavated by M. *Boltenko in Odessa oblast in 1921. Although classified as a late Trypilian culture, the Usatove culture had developed enough distinctive cultural traits through contact with steppe tribes, northern Caucasia, and the Mediterranean world to be considered a separate archeological entity. Its people engaged in animal husbandry and fishing and (to a lesser degree) agriculture. Excavations at sites revealed surface dwellings with stone walls, pottery with corded and painted ornamentation, earthenware figurines of women, and copper weapons and adornments. Eighteen Usatove kurhans, surrounded by cromlechs, have been unearthed. The deceased were buried in a flexed position on their sides; tribal leaders were in the central chambers of the structures. Common grave goods included weapons and adornments.

Usenko, Ivan, b 27 March 1906 in Keleberda, Zolotonosha county, Poltava gubernia. Geologist; corresponding member of the ANU (formerly AN URSR) since 1967. He graduated from the Kiev Institute of Mining and Geology (1932) and worked for the ANU Institute of Geological Sciences. In 1969 he became section head at the ANU Institute of Geochemistry and the Physics of Minerals. Usenko's research was in the areas of the petrography and mineralogy of various rock formations in the Ukrainian Shield, and also in the stratigraphy of Precambrian deposits in Ukraine. He developed criteria useful in exploration for nickel-ore deposits and also introduced a classification for the geological formations of the shield.

Pavlo Usenko

Usenko, Pavlo, b 23 January 1902 in Zaochipske, now in Tsarychanka raion, Dnipropetrovske oblast, d 4 August 1975 in Kiev. Poet and Komsomol activist. He was one of the founders of the organization *Molodniak and was editor of its official organ, *Molodniak*. His first published work appeared in 1922. His collections of poetry include *KSM* (Communist Youth League, 1925), *Poezii* (Poems, 1932), *Lavy idut' Ka-es-eM-ovi* (The KSM Ranks March On, 1934), and others dedicated to the Komsomol. During the Second World War he published a number of collections of war poetry, including *Za Ukrainu* (For Ukraine, 1941), *Kliamyś'* (Swear!, 1942), *Vesna* (Spring, 1943), and *Z vo-hnyshch borot'by* (From the Fires of Battle, 1943). His later collections were typically socialist-realist, such as *I s'oho-dni vesna, iak uchora* (And Today It Is Spring, Just like Yesterday, 1957) and *Vesen nezviianyi tsvit* (The Unblown Bloom of Springs, 1960). Editions of his works appeared in 1966 (2 vols) and 1982 (4 vols). Usenko also published collections of essays, including *Polustanok* (Whistle-stop, 1929) and *Liudy Bilomorbudu* (The People of the White Sea-Baltic Canal Construction, 1934) and wartime notes and poetry for children, *Dva svity* (Two Worlds, 1933) and *Sanochky skrypyny* (The Creaking Sleigh, 1941).

Usha River. See Uzh River.

Ushakevych, Vasył [Ušakevyč, Vasył'], b and d ? Wood engraver. He prepared illustrations for liturgical books which were printed at various times by the Lviv Dormition Brotherhood Press: Pentekostarions (1663, 1667, 1688), Triodions (1664, 1699, 1717, 1753), an *Apostol* (1666, 1772), and Sacramentarions (1668, 1682, 1717, 1719, 1761).

Ushakov, Nikolai [Ušakov, Nikolaj], b 6 June 1899 in Rostov, Russia, d 17 November 1973 in Kiev. Russian writer and translator. He graduated from the Kiev Institute of the National Economy (1924) and spent most of his life in Kiev. The first of his numerous collections appeared in 1927. He wrote many poems on Ukrainian subjects and a book of sketches about Kiev (1960). He was a coeditor of Russian editions of T. Shevchenko's *Kobzar* (1939), Shevchenko's collected works (5 vols, 1948–9), and M. Kotsiubynsky's works (3 vols, 1951–2). He wrote theoretical articles about translating Shevchenko and translated into Russian some 40 of his poems. He also translated into Russian I. Franko's Boryslav stories, Kotsiubynsky's *Fata Morgana* and *Tini zabutykh predkiv* (Shadows of Forgotten Ancestors), prose by Yu. Yanovsky and A. Holovko, and poems by Franko, Lesia Ukrainka, M. Rylsky, P. Tychna, V. Sosiura, M. Bazhan, L. Pervomaisky, A. Malyshko, and other Ukrainian poets. He was awarded the Shevchenko Prize in 1973.

Ushinsky, Konstantin [Ušyns'kyj], b 2 March 1824 in Tula, Russia, d 3 January 1871 in Odessa. Educator and pedagogue; one of the founders of pedagogy as an independent discipline in the Russian Empire. Ushinsky regarded upbringing as a social phenomenon determined by history, and undertook a broad examination of humanity in light of the information provided by all human sciences, thereby laying the foundations of pedagogical anthropology. He developed an integrated system of didactics that presented principles for selecting the content of education and adapting it to the needs of children to help organize their cognitive activity. He emphasized the importance of knowledge of the natural sciences and opposed focusing on the classics in the teaching of the humanities. He was an ardent advocate of the use of the native language in schools and opposed tsarist prohibitions on the use of Ukrainian in the education system. He argued for the integration of national traditions into the school system and demanded universal compulsory education for children of both sexes. Ushinsky wrote the primer *Rodnoe slovo* ([Our] Native Language, 1864), which was used in schools in Russian-ruled Ukraine.

Ushytsia River [Ušycja]. A left-bank tributary of the Dniester River that flows for 122 km through Khmelnytskyi oblast and drains a basin area of 1,420 sq km. Fed by rain and meltwater and characterized by a narrow, ravinelike valley (0.3–1.3 km), the river is 10–15 m wide. It is used for irrigation and fishing.

Uskiw, Samuel (Jus'kiv, Semen), b 18 October 1933 in East Selkirk, Manitoba. Canadian politician of Ukrainian descent. Uskiw was elected to the Manitoba legislature in 1966 as the New Democratic party member for the Lac du Bonnet constituency and was re-elected in 1969, 1973, 1977, and 1981. He served as minister of agriculture (1969), minister of co-operative development (1971–5), minister of highways and transportation (1981–3), minister of business development and tourism and minister responsible for the Manitoba Telephone Act (1983–5), and minister of natural resources (1985). He did not stand for re-election in the 1986 general election.

Uspenskii sbornik (The Dormition Collection). A 304-folio manuscript collection of the late 12th and early 13th centuries, containing primarily lives of saints from the May cycle and sermons, especially of St John Chrysostom. Most of the texts were translated from Byzantine originals in Bulgaria; some, including the oldest extant Life of St Methodius, may have been done in Moravia. The collection also contains many of the earliest original Kievan Rus' texts, among them **Skazaniie i strast' i pokhvala sviatuiu muchemyku Borysa i Hliba*, the Tale of the Miracles of Princes Roman and Davyd, and Life of St Theodosius of the Caves. The manuscript was found by O. Bodiansky in 1855 in the Dormition Cathedral in Moscow (hence its name) and is now preserved at the Central Historical Museum in Moscow. A facsimile edition was published in Moscow in 1971. V. Jagić, A. Sobolevsky, A. Shakhmatov, and other scholars believe the manuscript was compiled in Ukraine, most likely in Kiev. Its language has been studied by A. Popov, Shakhmatov, Sobolevsky, A. Lukianenko, I. Popova, R. Aitzetmüller, and others.

Ussuriisk. A city (1983 pop 152,000) and raion center of Primorskii krai in Russia's Far East. It was founded in 1866 and was known as Nikolsk-Ussuriisk until 1935. Then it was renamed Voroshilov. Its current name was adopted in 1957. It has a large food-processing and machine-building industry. In 1926 there were about 3,600 Ukrainians (10 percent of the population) living there. On 11 June 1917 the First Far Eastern Ukrainian Congress was held there. A local and regional Ukrainian council was formed, and Prosvita societies were organized in the villages around Ussuriisk. The Haidamaka co-operative, the Siaivo publishing house, and the head office of the Far Eastern Artistic Union operated in the city during the revolutionary period.

Ustav. A law or collection of laws that regulated a specific area of legal relations; or an important legislative act which constituted a source of law in Kievan Rus'. The most famous *ustavy* of the Princely era were *Volodymyr Monomakh's Statute and statutes of Volodymyr the Great and Yaroslav the Wise. In the Grand Duchy of Lithuania, some legislative acts, such as *land charters, were also called *ustavy*. In Poland the **voloka* land reform was based on an *ustav* issued in 1557 by King Sigismund II Augustus. In the Russian Empire, the new relations between the landowners and the peasants after emancipation in 1861 were regulated by *statutory deeds. Today the term is sometimes used to refer to a statute or constitution of an institution.

Ustav script. The earliest Cyrillic script. It was created in Bulgaria in the early 10th century on the basis of the Greek majuscular uncial script, which had been used in Greek church books and transcriptions of the New Testament since the 4th century.

The oldest dated manuscript written in the *ustav* in Ukraine is the *Ostromir Gospel (1056–7). It contains typical characteristics: the letters are drawn precisely between two lines, beyond which only the descenders of the letters *d*, *z*, *r*, *u*, *x*, *c*, and *šč* extend; the letters are vertical and have angular lines and curves; their average width approximately equals their height, giving them a square appearance; the distances between letters are generous;

The *ustav* script of the 1144 Halych Gospel

there are no word breaks; except in a few titles, there are almost no diacritics; and the letters are 6–7 mm in height. The **Izbornik* of Sviatoslav of 1073 is written in a smaller *ustav* with smaller spaces between letters and some right-slanted letters and accents. Other extant manuscripts written in the *ustav* include the **Halych Gospel* (1144) and the **Pandects of Antiochus* (11th–12th centuries).

The change from parchment to paper, the increased demand for books, and the requirements of chancery writing forced changes in the *ustav* beginning in the 13th century. Texts had to be written more quickly, and haste led to a decline in the precise geometric written forms of the letters, to their simplification, reduction in size, and slanting. The script evolved through an intermediary stage, large *pivustav* (semi-uncial) (eg, the **Krekhiv Apostol* [1563–72]), into the **pivustav* script of the late 15th and 16th centuries. Nonetheless, a modified *ustav* script (containing *pivustav* elements) was still used in some liturgical books, eg, the **Peresopnytsia Gospel* (1556–61).

V. Swoboda

Ustavni hramoty. See Statutory deeds.

Ust-Kamianka kurhans. Bronze Age and 1st- to 2nd-century Sarmatian burial mounds near Ust-Kamianka, Apostolove raion, Dnipropetrovske oblast. Twenty Sarmatian kurhans at this site were excavated in 1951, revealing 31 burials. Most of the deceased were buried with their heads facing south. Common grave goods included animal bones, pottery, knives, daggers, and bronze mirrors. Traces of a Bronze Age and an early Scythian settlement were found adjacent to the burial mounds.

Ustryky Dolishni [Ustryky Dolišni] (Polish: Ustrzyki Dolne). IV-3. A town (1967 pop 3,700) in Krosno voivodeship, Poland. It was first mentioned in historical documents in 1727. Until 1939 it was known for its cattle markets. In 1945–51 Ustryky Dolishni was included in the territory of the Ukrainian SSR.

Ustyianovych, Kornylo [Ustyjanovyč], b 1839 in Vovkiv, Lviv district, Galicia, d 22 July 1903 in Dovhe, Stryi county, Galicia. Painter, writer, and journalist; son of M. **Ustyianovych*; founding member of the Shevchenko Society (1873). After studying at the Vienna Academy of

Kornylo Ustyianovych: *Hutsul Woman* (oil, 1891)

Fine Arts (1858–63) he worked in Vienna and throughout Galicia and Bukovyna, where he painted icons for over 50 churches, 15 iconostases, 11 church murals, and 7 religious canvases, including *Christ before Pilate* (1880), in Vienna; *Moses* (1887), in the Transfiguration Church in Lviv; and *Baptism of Rus'*, *Christ in the Desert*, *Volodymyr the Great*, and *St Olha*, in the Vistova village church, near Kalush. Among his 40 portraits are ones of M. Ustyianovych, S. Kachala (1871), P. Bazhansky, Yu. Lavrivsky (1887), and A. Vakhnianyn (1895). He also did paintings on historical themes, such as *Prince Vasylko of Terebovlia* (1866), *Shevchenko in Exile* (1880), *Nestor the Chronicler* (1901), *Yaroslavna's Lament*, and *Cossack Battle* (1890); ethnographic paintings, such as *Boiko Couple* and *Hutsul*; and a few landscapes, such as *The Black Sea*, *Sunset*, and *Morning*. His portrait drawings of Galician princes were printed in the journal *Pryiatel' ditei* (1881–3). Ustyianovych's works conform to the principles of **academism* but reveal a romantic bent.

Ustyianovych's first poems were written in **yazychiie* and published in 1861. During his studies in Vienna he evolved from a Pan-Slavist into a Ukrainian populist. From 1872 he contributed articles, humorous feuilletons, accounts of his travels, and several stories in the Ukrainian vernacular to Galician periodicals, such as *Halychanyin*, *Slovo*, *Zoria*, *Pravda*, *Dilo*, *Ruslan*, and *Osnova*. In the 1870s he published his historical poems 'Iskorosten', 'Vadym,' and 'Sviatoslav Khorobryi' (Sviatoslav the Brave). He worked as a scenery designer for the Ruska Besida The-

ater in Lviv, and his tragedies *Iaropolk i Sviatoslavych* (1877) and *Oleh Sviatoslavych* (1876) were performed there (1878, 1883). In 1882–3 he edited and illustrated the satirical magazines *Zerkalo* and *Nove zerkalo*. Three volumes of his writings were published in 1875–7, and his memoirs about M. Raevsky and Russian Pan-Slavism appeared in 1884. A book about Ustyianovych by Ya. Nanovsky was published in Kiev in 1963.

Rev Mykola Ustyianovych

Mykola Ustymovych, the first head of the Hetman government

Ustyianovych, Mykola [Ustyjanovyč] (pseud.: Drotar, Yor, Naum, Nykola(i) (i)z Nykolaieva, N.U.), b 7 December 1811 in Mykolaiv, Stryi circle, Galicia, d 3 November 1885 in Suceava, Bukovyna. Writer, priest, and civic figure; father of K. *Ustyianovych. A graduate of the Greek Catholic Theological Seminary in Lviv (1835–8), he served as a pastor in Slavsko, Stryi circle (1841–9, 1850–70), and Suceava (1870–85). In 1848 he was one of the initiators and organizers of the *Congress of Ruthenian Scholars, as a member of which he championed the use of the vernacular in literature. In 1849–50 he edited the paper **Halychoruskii vistnyk* in Lviv and adapted J. Korzeniowski's *Karpaccy górale* (The Carpathian Highlanders) for the Galician stage under the title 'Verkhovyntsi Beskydiv' (Highlanders of the Beskyds). From 1861 to 1866 he was a member of the first Galician Diet.

Ustyianovych wrote his first Ukrainian poem in 1836 under the influence of his friend M. Shashkevych and joined the *Ruthenian Triad circle. Because of sanctions against those writing in the vernacular, his next three poems appeared only in 1847, in the almanac **Vinok rusynam na obzhyntky*. During the Revolution of 1848–9 he began publishing Romantic poetry on patriotic, social, lyrical, historical, and folkloric (Boiko) subjects, prose based on Galician ethnography and history, and articles on political and cultural issues in *Zoria halytska* and *Halycho-ruskii vistnyk* in Lviv and *Vistnyk* and *Otechestvennyi sbornik* in Vienna. His poems 'Verkhovyno, svitku ty nash' (O Highland, Our Little World) and 'Hei, brattia opryshky' (Hey, Fellow Opryshoks) became popular songs. From 1861 on, having become a Russophile, he wrote poems, stories, and articles in the artificial **yazychiie* and in Russian (in

Suceava). Published separately were a volume of his poems (1860), his story *Staryi Iefrem* (Old Yefrem, 1874), and a book (1879) consisting of 'Mest' verkhovyntsia' (The Highlander's Revenge) and 'Strastnyi chetver' (Passion Thursday), two of the best Galician novelettes until the 1860s. The fullest edition of his poems (together with A. Mohylnytsky's) appeared in Lviv in 1913.

R. Senkus

Ustyluh. III-5. A city (1989 pop 2,600) on the Buh River at the mouth of the Luha River in Volodymyr-Volynskyy raion, Volhynia oblast. From the 9th century a fortified settlement stood at the site. It belonged to Kievan Rus' (10th–11th centuries), Volodymyr-Volynskyy principality (12th century), and the Principality of Galicia-Volhynia (13th century). In 1240 it was razed by the Mongols. In the medieval period Ustyluh was a prosperous river port and trade center that exported foodstuffs to the Baltic towns. From the mid-14th century the town belonged to the Grand Duchy of Lithuania, and from 1569, to the Polish Commonwealth. A Capuchin monastery was built there at the beginning of the 18th century, and a Roman Catholic church in 1747. The town was annexed by Russia in 1795, and became a tariff collection post. In 1875 M. Biliashivsky excavated some of the kurhans in its vicinity. In the interwar period the town was under Polish rule. It was occupied by the Soviet army in 1939 and granted city status in 1940. Today it is an agricultural center with a workshop of the Volodymyr-Volynskyy Sewing Factory and some rest homes in the vicinity.

Ustymovych [Ustymovyč] (Sakhno-Ustymovych). A Cossack *starshyna* family line from Khorol, in the Poltava region. They were descended from the *town Cossack captain Sofon (Sakhno) Ustymovych, who was killed near Chyhyryn in 1678, and his son, Ustym (Sokhnovych, Sokhnenko) Ustymovych (d 1727), who was a captain in Vlasiv (1704–5) before becoming a monk (Ilarion) and serving as the superior of the Motronynskyy Trinity Monastery. His descendant, Prokip Ustymovych (b ca 1756, d ca 1814), was a regimental secretary and a member of a historical committee on the Hetmanate (1780) and later a department director in the imperial Naval Ministry in St Petersburg. Prokip's son, Adriian Ustymovych (b ca 1797, d 1851), was an aide-de-camp to the Little Russian military governor, Prince N. Repnin, took part in the formation of Cossack regiments in 1831–2, and later served as civil governor of Kursk gubernia. His marriage with the daughter of H. Myloradovych linked him with the Polubotok and Apostol lines. Adriian's son, Mykola (b 1832, d 1891), was an active participant in the peasant reforms of 1861 in the Poltava region; he was also the grandfather (through his daughter) of O. Shulhyn. Other members of the Ustymovych family were Petro (b ca 1786, d after 1865), who was a Decembrist from 1821, and Mykola (b 1863, d 1918), who was an engineer and the first head (otaman) of the Council of Ministers of Ukraine's Hetman government (1918).

A. Zhukovsky

Ustymovych, Mykola [Ustymovyč] (Sakhno-Ustymovych), 1863–1918. Ukrainian government figure. An engineer and landowner in the Poltava region, on 29 April 1918 he became the first head (otaman) of the Council of Ministers of the *Hetman government. Little known

among Ukrainian circles, he failed in his primary task of attracting moderate Socialists-Federalists into the new government. He was forced to resign on 30 April 1918. His successor, M. Vasylenko, was no more effective in bringing representatives of the major Ukrainian political parties into the cabinet. Ustymovych was killed during the uprising that brought the Directory of the UNR into power.

Ustynivka. VI-13. A town smt (1986 pop 3,800) on the Berezivka River and a raion center in Kirovohrad oblast. It was founded in the 1740s by settlers from Poltava gubernia. Today it is an agricultural town with a cheese factory and a poultry incubation station.

Usyk, Yakiv, b 9 February 1872 in Marianske, Myrhorod county, Poltava gubernia, d 6 February 1961 in Myrhorod, Poltava oblast. Wood carver. In the 1920s he was a member of the Association of Artists of Red Ukraine. His works include portraits of Ukrainian, Georgian, and Russian writers, such as T. Shevchenko (1943), M. Gorky (1946), I. Kotliarevsky (1947), D. Guramishvili (1949), A. Pushkin (1953), and I. Franko (1955), and thematic compositions, such as *The Pereiaslav Council* (1953) and *B. Khmelnytsky Meeting Russian Envoys* (1954).

Oleksandr Usykov

Usykov, Oleksandr (Usikov, Aleksandr), b 11 January 1904 in Yankivka, Bohodukhiv county, Kharkiv gubernia. Radio physicist; AN URSS (now ANU) full member since 1964. A graduate of the Kharkiv Institute of People's Education (1929), he worked in Kharkiv at the ANU Physical-Technical Institute (1936–55) and as director (1955–73) and a department head at the ANU Institute of Radio Physics and Electronics. In 1966–78 he was a member of the ANU presidium. Usykov made an important contribution to the invention of the impulse magnetron generator of decimeter and millimeter radio waves and to their application in radiolocation. He studied the absorption and diffusion of radio waves and new methods of radio communication. In 1944 he developed a radiolocation method of uncovering damage in power lines, and in 1960 he proposed a way of using the lens effect of the earth's ionosphere in refractor radio telescopes.

Utevsky, Aron [Utevs'kyj], b 20 June 1904 in Konotip, Chernihiv gubernia. Biochemist; AN URSS (now ANU) corresponding member since 1939. A graduate of the Kharkiv Institute of People's Education (1924), he continued his studies at the Kharkiv Biochemical Institute (1925–8) and

taught there and at the Kharkiv Medical Institute, where he chaired the biochemistry department from 1932. A professor since 1932 (doctorate, 1935), he became head of the neurohumoral systems department at the ANU Institute for Problems of Cryobiology and Cryomedicine in Kharkiv. Utevsky's research has dealt with problems of intracellular carbohydrate exchange; metabolic processes in the endocrine glands; the biochemistry of enzymes and hormones (especially catecholamines), where he introduced methods to study their metabolic intermediates; and the biochemistry of vitamin deficiency. In addition to over 140 scientific papers, he has published articles on the history and philosophy of science, short stories, and a play in Russian.

UTHI. See Ukrainian Technical and Husbandry Institute.

Utilities, public. See Municipal services.

Utluk Estuary [Utljuc'kyj lyman]. VII-16. A bay situated at the northwestern corner of the Sea of Azov off the coast of Zaporizhia and Kherson oblasts. Separated from the Sea of Azov by Fedotova Spit and Byriuchy Island, the estuary is 45 km long, 2–20 km wide, and up to 3.5 m deep. The Velyky Utluk and the Malyy Utluk rivers empty into it. A section of the estuary is within the Azov-Syvash Game Preserve.

Utrenniaia zvezda

Utrenniaia zvezda (The Morning Star). A literary miscellany published by I. Petrov and I. Sreznevsky in two volumes in Kharkiv in 1833–4. The miscellany was initiated by H. *Kvitka-Osnovianenko, and the first volume, published in Russian, contained Russian folk songs, Sreznevsky's notes on H. Skovoroda, a translation of a folktale by O. Somov, and poems by Petrov and P. Inozemtsev. The second volume contained Kvitka-Osnovianenko's first Ukrainian-language tale, 'Saldats'kyi patret' (The Soldier's Portrait), his 'supplication' to the publisher in which he justified the right of the Ukrainian people to have a national literature, an excerpt from I. Kotliarevsky's *Eneida* (Aeneid), poetry by Ye. Hrebinka, Sreznevsky, and P. Hulak-Artemovskyy, historical folk songs, music to poems by Kotliarevsky, and drawings of Skovoroda and views of Kharkiv.

Myron Utrysko

Utrysko, Myron, b 30 August 1908 in Lviv, d 14 October 1988 in Edmonton. Civic leader and journalist. In 1934 he completed law studies in Lviv. After emigrating in 1952 to the United States he founded and directed a Ukrainian radio program in Philadelphia. In 1977 he began to edit the journal of regional studies **Litopys Boikivshchyny*, and in 1980 he edited and published *Monohrafiia Boikivshchyny* (Monograph of the Boiko Region). In addition to other regional, memorial, and commemorative articles he wrote *Viden' 1683 – Kozaky i Kul'chyts'kyi* (Vienna 1683 – The Cossacks and Kulchytsky, 1983).

Uvarov, Aleksei, b 12 March 1825, d 10 January 1885. The son of a Russian minister of education and grandson of K. *Rozumovsky, he graduated from St Petersburg University (1845) and then worked in the Russian diplomatic corps while continuing his studies in Berlin and Heidelberg. He undertook archeological research first in Southern Ukraine, where he conducted studies at Olbia, Chersonesus, and Neapolis, and then in Vladimir and Moscow gubernias. He published *Issledovaniia o drevnostiakh Iuzhnoi Rossii i beregov Chérnogo moria* (Studies of the Antiquities of Southern Russia and the Black Sea Coast) in two volumes (1851, 1856). Uvarov was instrumental in organizing many archeological conferences, forming archeological societies in Moscow and St Petersburg, and establishing the Moscow Historical Museum.

Uvarov, Mykola, b 1861 in Bohodukhiv, Kharkiv gubernia, d 1942. Painter and graphic artist. He studied at the Kharkiv Painting School and St Petersburg Academy of Arts (1882–90). He took part in painting the murals inside the Poltava Zemstvo Building (1903–8) by collaborating with S. Vasylykivsky on *The Election of Col Pushkar*. He also painted portraits of T. Shevchenko, I. Franko, M. Lysenko, D. Bahalii, and S. Vasylykivsky and made prints, particularly satirical prints on biblical themes. Later he worked as a restorer in a Kharkiv museum.

UVO. See Ukrainian Military Organization.

Uvyvanets. A folk dance performed by many pairs. It has a quick 2/4 beat and demands great dexterity, as the pairs of lovers wind (*uvyvaiutsia*) themselves around each other. The dance is mostly comical in effect but has some lyrical moments. It has been popular in Western Ukraine.

Uzbekistan. A republic (1989 pop 19,905,000) in Central Asia formerly the Uzbek SSR. It borders on Kazakhstan in the north, Turkmenistan in the southwest, and Kirgizia in

the east and has an area of 447,400 sq km. The capital is Tashkent. The area was absorbed by the Russian Empire in the 1860s and 1870s and reconstituted as a Soviet republic in 1924. Native Turkic-speaking Uzbeks account for about two-thirds of the population. There are 153,000 Ukrainians in Uzbekistan (1989), most of whom live in the cities, including 60,000 in Tashkent. There are approx 20,000 Uzbeks in Ukraine.

UZh. See *Universal'nyi zhurnal*.

Uzh River [Už]. A left-bank tributary of the Laborets River that flows for 133 km along the Tysa Lowland in Transcarpathia oblast and western Czechoslovakia and drains a basin area of 2,750 sq km. It has a valley 2–3 km wide. It is used for industry, water supply, and irrigation. A hydroelectric station is situated on it. Sources of mineral water are found in the river's basin. The city of Uzhhorod is located in its middle reaches.

Uzh River [Už]. A right-bank tributary of the Prypiat River that flows for 256 km through Zhytomyr and Kiev oblasts and drains a basin area of 8,080 sq km. It is 5–40 m wide and has a valley width of 1–7 km. The river is used for industry, water supply, irrigation, and log rafting. It freezes over from December to late March. Granite outcrops can be found in its basin. The city of Korosten is situated near its upper reaches.

Uzhevych, Ivan [Uževyč] (Ioann), b and d ? The 17th-century author of the Latin *'Hrammatyka slovenskaia/Grammatica sclavonica'*, the first grammar of the Ruthenian bookish (non-Church Slavonic) language used by both Ukrainians and Belarusians. He studied at Cracow University (1637–ca 1641) and at the Sorbonne (1643–5). There are only two manuscripts of his grammar, one (1643) at the National Library in Paris and the other (1645) at the Municipal Library in Arras in northern France. A photoreproduction of the two manuscripts, together with a Ukrainian translation of the Paris manuscript, notes, index, and bibliography by I. Bilodid and Ye. Kudrytsky, was published in Kiev in 1970. The grammar has been studied by A. Sobolevsky, V. Jagić, E. Borschak, and M. Zhovtobriukh.

Uzhhorod [Užhorod] (Hungarian: Ungvár; Czech: Užhorod). A city (1989 pop 117,000) on the Uzh River and the capital of Transcarpathia oblast. It is a major economic and cultural center of the Carpathian region. Its name means 'city (*horod*) on the Uzh.'

According to the archeological evidence the site was inhabited as early as the Stone Age. A Slavic tribe founded a fortified settlement there in the 8th or 9th century. Early in the 10th century it was controlled by the Hungarians and then by Kievan Rus'. Hungary regained control of the town in the 11th century and remained the dominant influence there until the 20th century. Uzhhorod was sacked by the Tatars in 1242, and its fortress was destroyed. Its economy was initially based on wine-making, agriculture, and animal husbandry. Trade and manufacturing, stimulated by the town's military and administrative needs, developed through the 15th to 18th centuries. The religious struggle of the 17th century culminated in the *Uzhhorod Union of 1646. In the late 1770s Bishop A. Bachynsky

Uzhhorod and the Uzh River

transferred the seat of Mukachiv eparchy to Uzhhorod. By the end of the century a theological seminary and teachers' college had been established there.

The Austrian Habsburgs won control of Uzhhorod in 1691, and the city became involved in Hungarian attempts to throw off Austrian rule – in the Rákóczi uprising of 1703–11 and the Revolution of 1848–9. With the defeat of the revolution the Ukrainian cultural movement in Uzhhorod gained strength for a time. The *Society of St Basil the Great, the *Uniiia publishing society, and Ukrainian schools were established. Most of the movement's leaders worked in Uzhhorod, although they found little support there, for the city was inhabited mostly by Hungarians, Jews, and Slovaks.

In 1848 the city was granted self-government, and began the process of modernization. A sewage system was built in 1855, and a rail link with Chop was established in 1872. A new gymnasium was erected in 1894. The wine-making industry was expanded, and new manufacturing industries (furniture-making, woodworking, brick-making) were introduced. Trade and commerce increased. The population grew from 3,000 in 1800 to 9,750 in 1860 and 14,700 in 1900.

With Transcarpathia's incorporation into Czechoslovakia after the First World War, Uzhhorod became the capital of Subcarpathian Ruthenia, the seat of the governor and the administration, and a center of Ukrainian life. Ukrainian cultural organizations, such as the Prosvita society, the Russophile Dukhnovych Society, and the Ruthenian People's Theater, and economic institutions, such as the Subcarpathian Bank and the Co-operative Union, set up their regional centers in Uzhhorod. In the 1930s a new administrative district was developed on the right bank of the Uzh. There was a Ukrainian gymnasium in the city.

When Uzhhorod was transferred to Hungary in accordance with the Vienna award of 2 November 1938, the government of autonomous Carpatho-Ukraine moved to Khust. In 1939–44 the city continued to be a center of Ukrainian cultural and civic life.

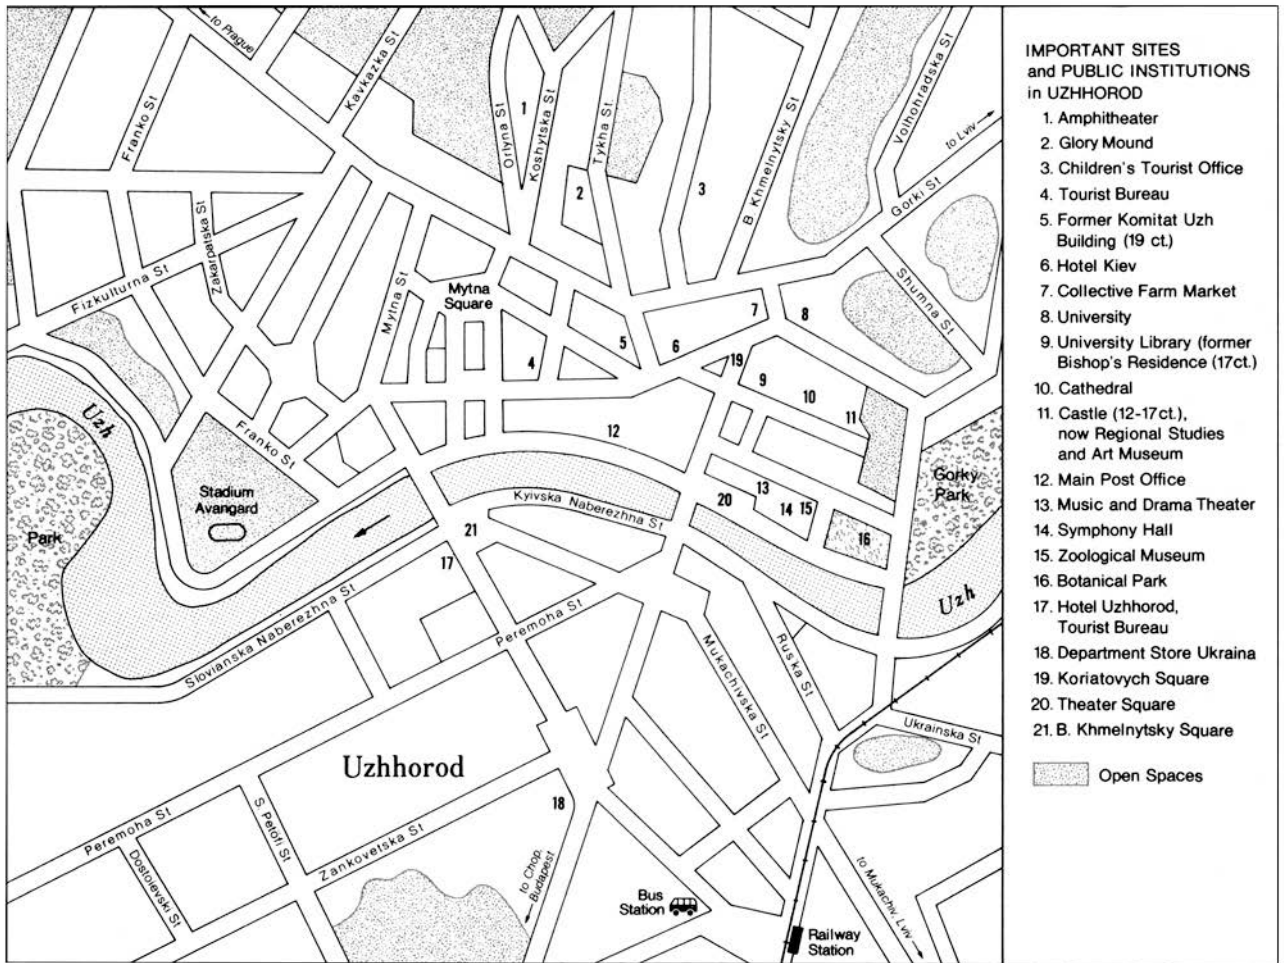

Uzhhorod was occupied by Soviet forces in November 1944 and became the seat of the People's Council of Transcarpathian Ukraine, which called for the territory's unification with the Ukrainian SSR. In January 1946 it became the capital of Transcarpathia oblast. New cultural institutions, many of them regional in scope, were established in the city, including a philharmonic orchestra, a folk-song and -dance ensemble, a theater company, a regional studies museum, a picture gallery, Uzhhorod University, and a publishing house (later renamed Karpaty). Later a museum of folk architecture and folkways was set up.

Today the city is an industrial and communications center. It has strong machine-building (Uzhhorodprylad), woodworking (plywood and furniture manufacturing complex), light (footwear and clothing), food (winery, cannery, meat packers, distillery), and building-materials (reinforced concrete, brick, tiles) industries. A hydroelectric power station provides energy to run the industries. Tourism plays an important role in the local economy.

In addition to the university there are five vocational and five specialized secondary schools in the city. A number of research institutions, such as branches of the Institute of Nuclear Research and the Institute of Social and Economic Problems of Foreign Countries, are located in

Uzhhorod, with the Cathedral of the Elevation of the Cross (1644) in the background

Uzhhorod. The main architectural monuments are the fortress (built in 1598 and reconstructed in the 17th century), the episcopal palace (1646, now the university library), the cathedral (17th century), the Roman Catholic Cathedral of the Elevation of the Cross (1644), the gymnasium (1784), the town hall (1810), and the former synagogue (1904, now the philharmonic hall).

Uzhhorod gymnasium (Uzhhorodska himnaziia). One of the oldest secondary schools in Ukraine, established in 1649 on the basis of an earlier Jesuit college. Until 1778 Jesuits continued to teach in the gymnasium, using Latin as the language of instruction (except for religion classes, which were taught in the Ukrainian redaction of Church Slavonic). In the 18th century approx 150–200 students attended the school. In 1778 it was given the status of an Austrian royal gymnasium; the primary language of instruction was (until 1790) German, then Latin again (until 1796), and finally Hungarian. Two extra grades of philosophy were added to the course of study in 1856, the number thereby being raised to eight. In the 1880s strong pressures were exerted to make the gymnasium a totally Hungarian institution despite the fact that most of the

staff and students were Ukrainian. During the interwar period the gymnasium was first Ukrainized and later Russified, according to the desires of the directors and regional education supervisors (who were alternately Ukrainophile or Russophile in orientation). Approx 800 students attended the school at that time. In 1945, after the Soviet occupation of Transcarpathia, the gymnasium was turned into a *ten-year school. One of the school's most notable directors was A. Alyskevych.

Uzhhorod polustav (Uzhhorod Semi-Uncial). A 209-folio Church Slavonic manuscript of the late 14th to early 15th centuries containing one of the oldest extant East Slavic books of monastic rule. According to O. Kolessa it was first composed in Kiev and then copied in eastern Transcarpathia, possibly at the Hrusheve Monastery. For many years the manuscript was stored in the library of the Prosvita society in Uzhhorod. Now it is preserved at the Transcarpathian Regional Studies Museum in Uzhhorod.

Uzhhorod Union of 1646. An act under which 63 Transcarpathian Orthodox priests joined the Catholic church on the model of the Church Union of *Berestia. It was signed in Uzhhorod by the Roman Catholic bishop of Eger, and was initiated on the Ukrainian side by the Basilian order under the leadership of P. Partenii. Its main provisions were that the Eastern or Byzantine church rite

would be preserved; that the eparchy of Mukachiv would reserve the right to choose bishops, and Rome would have only the right of confirmation; and that the Uniate priests would be equal in status to the Roman Catholic priests. The Union was confirmed by a synod of Hungarian bishops in 1648, but the Vatican withheld ratification because Partenii had been consecrated by an Orthodox metropolitan in 1651. After Rome finally confirmed Partenii as the bishop of Mukachiv in 1655, the union was extended to the eastern part of the eparchy; it was not until 1721, however, that all Transcarpathian Ukrainians in Mukachiv eparchy accepted it. In 1949 the Soviet authorities had the Union revoked, and created the Orthodox Mukachiv-Uzhhorod eparchy, under the patriarch of Moscow. In the late 1980s the Uniate church was re-established in Transcarpathia, following the easing of Soviet religious persecution.

Uzhhorod University [Uzhhorodskyi universytet]. A state university established in 1945. In 1982–3 the university had 11 faculties: history, philology, Romano-Germanic philology, physics, mathematics, chemistry, biology, medicine, evening studies, correspondence studies, and general technical studies. In 1988 there were over 7,800 students enrolled at the university. A division of the AN URSR (now ANU) Institute of History (dealing with the history of the socialist countries of Europe) has been housed at the campus since 1969. The university operates a botanical garden and a mountainside biological research station. Its library collection has approx 1 million volumes.

Uzhok Pass [Užoc'kyj pereval]. v-3. A mountain pass in the High Beskyd region situated on the boundary between Lviv and Transcarpathia oblasts (historically the demarcation between Galicia and Transcarpathia) near the Polish border. The pass stands at an elevation of 889 m. A railroad and highway connecting Lviv and Uzhhorod go through it.

Uzhvii, Nataliia [Užvij, Natalija], b 8 September 1898 in Liuboml, Volodymyr-Volynskyi county, Volhynia gubernia, d 29 July 1986 in Kiev. Stage and screen actress. She

Nataliia Uzhvii

studied and acted in the Shevchenko First Theater of the Ukrainian Soviet Republic (1922–5) and then acted in the Odessa State Drama Theater (1925–6), Berezil (1926–34; later the Kharkiv Ukrainian Drama Theater), and the Kiev Ukrainian Drama Theater (from 1936). In Berezil she played a wide range of roles (from heroic to character), including Sadie in J. Colton and C. Randolph's *Sadie Thompson* (based on S. Maugham's *Rain*, 1926), Auntie Motia in M. Kulish's *Myna Mazailo* (1929), and Larysa in M. Irchan's *Pliatsdarm* (*The Battle Zone*, 1932). Elsewhere she played Elizabeth in F. von Schiller's *Don Carlos* (1936), Beatrice in W. Shakespeare's *Much Ado about Nothing* (1940), and many leading female characters in dramas by O. Korniichuk, O. Levada, M. Zarudny, and other Soviet playwrights. She also starred in the films *Taras Shevchenko* (1926), *Taras Triasylo* (1927), and *Raiduha* (*The Rainbow*, 1943). Biographies of Uzhvii, by R. Bernatska (1958) and Y. Kyselov (1978), were published in Kiev.

Uzyn. IV-11. A city (1989 pop 11,800) on the Uzyn River in Bila Tserkva raion, Kiev oblast. It was first mentioned in historical documents in 1651, under the name Uzenytsia. From 1773 it was called Tembershchyna, and since the end of the 18th century, by its current name. After the partition of Poland in 1793, the village was annexed by the Russian Empire. In 1971 it was granted city status. Today it has a large sugar refinery, a canning factory, and a brick plant.

V

Vacation. A period of exemption from work granted to an employee for rest or relaxation. Mandatory vacations regulated by law have become common in developed countries only in the 20th century. In the Russian Empire before 1917, senior government officials received two-month vacations once every two years.

Vacations in Soviet Ukraine were regulated by various acts and statutes governing labor relations. From 1968 the minimum vacation throughout the USSR was 15 working days annually. It was granted after at least 11 months of uninterrupted service at the same place of employment. Employees were guaranteed their jobs when they returned from vacation and could not be fired during that time. Vacation time could not be replaced by extra pay. Workers employed under special conditions received extra vacation time; academics and teachers, for example, were entitled to 24 to 48 working days of vacation, and lumbermen to 24 days. Workers in difficult jobs, such as mining, qualified for an extra 6 to 36 working days in addition to the normal 15 days of vacation. People who worked with handicapped children got premiums of 12 working days, and workers in the metallurgical industry got 3 to 9 days extra. Vacation time increased with seniority, and workers under the age of 18 also were given extra time off.

Vacation Resort Society (Tovarystvo vakatsiinykh osel). A charitable society in Lviv, active in 1905–39 under the patronage of Metropolitan A. *Sheptytsky, which sponsored country vacations for children aged 7 to 14. The society organized summer expeditions for over 200 children to resorts in Myluvannia, Tovmach county, and Korshiv, Kolomyia county. Major figures in the group included O. Bachynska and Y. Pankivska.

Vagner, Ivan (Wagner, Johann), b 7 November 1833 in Riga, d 1892. Anatomist. A graduate of Dorpat (Tartu) University (1857), he taught there and at Kharkiv University (from 1861, as professor from 1871) and conducted research on cattle vaccination in Kharkiv. His publications include monographs on anatomy written in German and a translation of J. Henle's book on human anatomy into Russian (1881).

Vahylevych, Ivan [Vahylevyč] (pseud: Dalibor, Volk Zaklyka), b 2 September 1811 in Yasen, Stanyslaviv circle, Galicia, d 10 May 1866 in Lviv. Romantic poet, philologist, and ethnographer of the Galician revival. In the years 1829–39, while studying at Lviv University and at the Greek Catholic Theological Seminary in Lviv, he associated with M. Shashkevych and Ya. Holovatsky, and the three of them formed the *Ruthenian Triad. During that time he repeatedly interrupted his studies to conduct archeological and ethnographic fieldwork in Western Ukrainian villages. Because of his populist activities, cul-

Ivan Vahylevych

tural nationalist views, and correspondence with scholars in the Russian Empire, such as M. Pogodin, I. Sreznevsky, and the Ukrainians M. Maksymovych and O. Bodiansky, he suffered harassment by the church and Austrian civil authorities. He was ordained in 1846, and served as pastor in Nestanychi, Zolochiv circle. During the Revolution of 1848–9, as a supporter of a democratic Polish-Ukrainian political federation, he accepted the *Ruthenian Congress's invitation to edit its weekly, **Dnewnyk Ruskij*, in Lviv. Later that year he left the Uniate church in protest against the hierarchy's sanctions against him and converted to Lutheranism. Ostracized by most Ukrainians and by the church because of his 'pro-Polish' politics and his conversion, he was unable to find steady work until 1862, when he was appointed city archivist in Lviv.

Vahylevych wrote poetry in Polish in the years 1829–41. In 1836 he wrote a Ukrainian vernacular prose rendition of the Rus' epic *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign, pub 1884). He coedited the first Galician Ukrainian almanac, **Rusalka Dnistrovaia* (1836). He contributed pioneering articles on the Hutsuls (1838–9), vampires and witches (1840), and the Boikos (1841) to the annual, *Časopis*, of Prague's Czech Museum, and other ethnographic articles to Polish periodicals (*Przegląd Naukowy*, *Biblioteka Warszawska*, *Biblioteka Ossolińskich*). In 1840, with A. Bielowski, he translated into Polish and annotated the Rus' Primary Chronicle (pub 1864). In an unpublished treatise (1841–9) on the Ukrainian ('Southern Rus') language, he was one of the first to treat that language as distinct from Russian and Polish; he divided it into Galician and Kievan dialectal groups. Those views were also expressed in his published Polish grammar of the 'Little Ruthenian' language in Galicia (1845) and 'Little Ruthenian' grammar for elementary schools (1846), which were modeled on the grammar of the Russian N. Grech. In them he employed a 16th- and 17th-century orthography rather than one based on the vernacular, because he believed it to be 'pure Ruthenian.' In 1848 in *Dnewnyk Ruskij*, Vahylevych published political articles on Ukraine as a separate cultural entity, on the need for education in the

vernacular, and on the need for Ukrainian-Polish co-operation on the basis of democracy, autonomy, and equality, and he provided one of the earliest surveys of Ukrainian literature. He also wrote a pioneering booklet on the *Maniava Hermitage (1848). Among his unpublished works are a dictionary with over 10,000 Ukrainian words (1834–44), materials for a Ukrainian-German-Latin dictionary and for books on Carpathian ethnography and Lviv's historical monuments, studies of Slavic demonology, symbolism, and wedding and birth rituals, collections of songs about the opryshoks, and a collection of Ukrainian Christmas carols (of which he had gathered 280). Although he wrote mostly in Polish, he remained true to his Ukrainophile and democratic principles to the end of his life.

The fullest editions of Vahylevych's works were published together with Shashkevych's and Holovatsky's in Lviv in 1913 and in Kiev in 1982. O. Dzoban's guide to Vahylevych's unpublished manuscripts and biographical materials appeared in Lviv in 1986.

R. Senkus

Vainshtein, Moisei [Vajnštejn, Mojsej], b 20 February 1940 in Druzhkivka, Donetsk oblast, d 26 May 1981 in Kiev. Painter and sculptor of Jewish origin. A graduate of the Kiev State Art Institute (1965), throughout his brief life he alternated between painting pictures demanded by socialist realism, such as *Liknep* (1967) and *First Day: Lenin at the 2nd Congress of Soviets* (1980), and works inspired by his quest to express himself, such as the heavily textured *Mountain Ash* (1966) and *The Sun Has Set* (1976). In most of his landscapes the oil pigments are applied with relish and with great sensitivity to hues. Although most of his work was figurative, some of his paintings, such as *Spring* (1968), are reminiscent of abstract expressionism in their gestural application of paint. In some of his final works, such as *Evening, Lviv Square*, and *Kiev* (1979), representation once more yields to a vibrating surface of colors. His first solo exhibition was held posthumously in Kiev in 1987.

Vaišvilkas (Ukrainian: Voishelk Mindovhovich), b ?, d 1268. Grand duke of Lithuania; son of *Mindaugas. Having converted to Orthodoxy, he gave up his holdings in Chorna Rus' to *Roman, the son of Danylo Romanovych of Galicia (thus cementing a peace treaty between the two powers, 1255), and became a monk. He was brought into power after his father and two brothers were assassinated in 1263 by rebel Lithuanian princes. In 1267 he abdicated in favor of his brother-in-law, *Shvarno Danylovych, and returned to the monastery. He was killed by Shvarno's older brother, Lev Danylovych, who resented not being chosen to reign over Lithuania.

Vakhnianyn, Anatol [Vaxnjanyyn, Anatol'] (also Natal), b 19 September 1841 in Siniava, Peremyshl circle, Galicia, d 8 March 1908 in Lviv. Composer, conductor, writer, and

Anatol Vakhnianyn

civic figure. He studied at the Lviv Theological Seminary, graduated from the University of Vienna (1868), and then taught (from 1870) at the Academic Gymnasium in Lviv. His civic and cultural activity was extensive and included the founding or cofounding of the Sich student society of Vienna (1867), the musical associations *Torban (Lviv, 1869) and *Boian (Lviv, 1891), and the *Lysenko Higher Institute of Music (1903 in its nascent form), which he directed in 1903–6. He also served as the first head of the *Prosvita Society in Galicia (1868–70). He was elected to the Galician Diet and the Austrian parliament (1894–1900). His musical works include *Kupalo*, the first opera in Western Ukraine (to his own libretto, 1870–92); music to plays by T. Shevchenko, F. Zarevych, O. Ohonovsky, and K. Ustyianovych; original choral scores to texts by Yu. Fedkovych, I. Hushalevych, O. Levytsky, and others; and choral arrangements of Ukrainian folk songs. He wrote four novels, and tales, poems, and articles, in addition to translating works by N. Gogol and I. Turgenev. His memoirs were published in Lviv in 1908, and a biography, by I. Hrynevetsky, appeared in Kiev in 1961.

Vakhnianyn, Ostap [Vaxnjanyyn], b 1890 in Lviv, d 31 August 1924 in Uzhhorod, Transcarpathia. Educator and cultural activist; son of A. *Vakhnianyn. After graduating from Lviv University he taught briefly at a Lviv gymnasium and then joined the Ukrainian Sich Riflemen. In Uzhhorod he was one of the founders of the Prosvita Society Theater in 1921. He also founded a branch of the *Plast Ukrainian Youth Association in Uzhhorod, published its paper *Plastun*, and wrote two handbooks, *Plast* and *Plastovyi pidruchnyk* (Plast Handbook).

Vakhrusheve [Vaxruševe]. V-19, DB III-5. A city (1989 pop 19,600) on the Khrustalna and the Miiusyk rivers in Luhanske oblast, under the jurisdiction of the Krasnyi Luch city council. It was founded in 1954 and granted city status in 1963. The city's chief enterprises are three coal mines and a coal enrichment plant, a machine repair plant, and a workshop of the Luhanske Sewing Consortium.

Vaks, Borys, b 25 May 1912 in Zhytomyr, Volhynia gubernia. Painter. In 1948 he graduated from the Kharkiv Art Institute, where he had studied with S. Prokhorov, O. Kokel, and M. Derehus. He painted genre paintings, such as *On the Virgin Land* (1961), the triptych *Bread* (1967), and

Miners Resting (1976), and collaborated on monumental paintings such as the frieze *Coal Donbas* in the Horlivka Palace of Culture (1960) and the panel *Builders* in the Krasnodon Building of Culture (1966). He also collaborated on a lithograph series of prints devoted to T. Shevchenko (1964).

Vakulenchuk, Hryhorii [Vakulenčuk, Hryhorij], b 1877 in Velyki Korovyntsi, Zhytomyr county, Volhynia gubernia, d 27 June 1905. Seaman and revolutionary. Upon finishing military training in 1900, he was assigned as a gunner on the battleship *Potemkin*. He headed a cell of the Russian Social Democratic Workers' party on the ship and became an organizer of the Sevastopol Seamen's Central, which was preparing a general uprising of the Black Sea Fleet. A mutiny broke out on the **Potemkin* sooner than anticipated, and Vakulenchuk was killed at the beginning of the uprising. His funeral in Odessa on 29 June 1905 turned into a political demonstration.

Metropolitan Dionisii
Valedinsky

Gen Arkadii Valiisky

Valedinsky, Dionisii [Valedinskij, Dionisij] (secular name: Konstantin), b 16 May 1876 in Murom, Russia, d 15 March 1960 in Warsaw. Russian Orthodox hierarch. After graduating from the Kazan Theological Academy he spent most of his early career in Ukraine, where he served as a rector of the Kholm Theological Seminary (1903–11) and then as bishop of Kremianets (from 1913). In 1918 he supported the creation of an independent Ukrainian church and participated in the All-Ukrainian Church Sobor in Kiev. In 1919 he became acting bishop of Polish-occupied Volhynia, and in 1923, metropolitan of the Orthodox church in Poland, with his see in Warsaw. In this capacity he encouraged the revival of Ukrainian church traditions and approved the translation of liturgical texts into contemporary Ukrainian and their use in services. Under his leadership the **Polish Autocephalous Orthodox church* was formally granted autocephaly by the patriarch of Constantinople in 1924. During the Second World War Valedinsky gave his blessing to the revival of the **Ukrainian Autocephalous Orthodox church* and designated P. **Sikorsky* as administrator of the church. After the war he was interned by the Polish communist

government, which stripped him of the title of metropolitan in 1945. He was also excommunicated by the Russian Orthodox church. After several years under house arrest (at Sosnowic) he was allowed to return to Warsaw, where he died in poverty.

Valerian (*Valeriana*; Ukrainian: *valeriana*). A perennial grassy herb of the teasel family Valerianaceae. Of its 200 species worldwide there are 13 known in Ukraine; the most widely distributed in the wild is the medicinal or common valerian (*V. officinalis*), also known as the garden heliotrope. Its roots and rhizomes contain volatile oils, acids, alkaloids, tannic substances, and sugar. Extracts of valerian are used as tranquilizing agents to control excitement, insomnia, neuroses of the cardiovascular system, spasms, and so on. A relaxant tea is brewed from its roots. Cultivated species in Ukraine include *V. nitida*, *V. rossica*, and *V. stoionifera*.

Valiashko, Mykola [Valjashko], b 1 April 1871 in Kupianka, Kharkiv gubernia, d 25 January 1955 in Kharkiv. Organic chemist. A professor at Kharkiv University from 1909 and the Kharkiv Polytechnical Institute from 1919, he researched the chemistry of pharmaceutical materials and the ultraviolet spectroscopy of aromatic and heterocyclic compounds, including the effect of solvents on their spectra. In 1910 he established the first spectroscopic laboratory in the Russian Empire.

Valiisky, Arkadii [Valijs'kyj, Arkadij], b 8 February 1894 in Chernihiv gubernia, d 16 September 1976 in New York. Military officer. In 1918–19 he served in Zhytomyr as a company commander and then as an instructor in the UNR Army officer school. In 1920 he was a company commander at the unified military youth school in Kamianets-Podilskyi and then an instructor in the Kalisz internment camp. In 1924 he became chief of the Operations Section at the UNR Ministry of Military Affairs, and in 1927 he was contracted by the Polish army. In 1936–9 he was chief of staff in the UNR Ministry of Military Affairs in Warsaw. At the outbreak of the Second World War he was interned by the Germans. In the spring of 1945 he served, at the rank of colonel, as chief of staff of the Ukrainian National Army. After the war, he emigrated to the United States (1951), where he was active in veterans' organizations and the defense department of the UNR government-in-exile, which promoted him to brigadier general.

Valky. IV-16. A city (1989 pop 10,300) on the Mozh River and a raion center in Kharkiv oblast. It was founded in 1646 as a fort to defend Muscovy's southern border against Crimean and Nogay Tatars. A settlement sprang up around the fort, and in 1740 it was granted town status. It served as a company center in Kharkiv regiment and then as a county center in Kharkiv vicegerency (1780–96) and Kharkiv gubernia (1802–1923). By the end of the 19th century its population had reached 7,900. It was granted city status in 1938. Today Valky is an agricultural town with a building-materials plant, a sewing factory, and a branch of the Mechyk Furniture Factory.

Valleys (*dolyny*). Linear-shaped areas of lower elevation on the surface of the earth commonly formed by the erosive action of flowing water. All valleys consist of slopes

(along the sides) and a bottom. In Ukraine valley slopes typically are asymmetrical, often with a high right bank and a low left bank. The asymmetry can be attributed to the endogenic processes and the lithology of parent material, while the manner of the erosion and aggradation of the country's rivers have resulted from fluctuations in the level of the Black Sea and changes in climate.

River valleys in Ukraine are usually classified into three types, lowland (which constitute an overwhelming majority), mountain, and submontane (as in the Dniester Basin). The number of their terraces varies not only from one river valley to another but also within the same river valley. Lowland river valleys predominantly contain aggradational type terraces consisting of fine particles (usually sand). Such terraces are also found in the submontane valleys, together with erosive-aggradational types made up of water-sorted gravels. The erosive terraces (including boulder pavements and rock sculpting) prevail in the mountain valleys.

The river valleys of Ukraine evolved in several geomorphological stages. Broad river valleys with large floodplains were formed at the end of the Pliocene epoch, when the Black Sea stood approx 50 m above its present level. Their remnants may still be seen in the form of broad terraces along the left bank of the Dnieper as well as in the Donets, the Dniester, and the Prut river valleys.

Intensified or rejuvenated river erosion in the early Pleistocene epoch, caused by a drop in the landlocked sea (80–100 m below the present level) resulting from neotectonic uplift, deepened valleys and sculpted landforms. The submarine valleys of the old Dnieper, Dniester, and Danube rivers were created in consequence. The valleys may still be detected on the shelf bottom of the Black Sea, but their surfaces have been modified by subsequent marine deposits. Climatic cooling in the Dnieper age of the Pleistocene brought on the maximum extent of continental glaciation, in which the ice cap depressed the landmass and caused the Black Sea to rise 20 m above its present level. Its rising provided conditions for the formation of liman valleys along the coast. As well, meltwaters from the ice cap produced ponding, with excess water that either spilled over the low points of divides or flowed along the ice margin into valleys that channeled it toward the Black Sea. Glacial spillways were thereby created, some of which still serve as parts of existing river valleys, and others of which have become dry. Examples include the spillways between the Styr and the Slovechna rivers (over 400 km) and between the Sian and the Dniester, and the shorter but more numerous spillways that cross the Dnieper Upland from north to south or connect the left-bank tributaries of the Dnieper. The subsequent isostatic recovery of the landmass and the adjustment of the Black Sea to the present level rejuvenated erosive forces. River channels cut deeper valleys and left remnants of the Pleistocene alluvial deposits visible as terraces. Former river channels of the Pleistocene Dnieper delta dried up to form some of the depressions known as *pody*.

I. Stebelsky

Kyrylo Valnytsky

Rev Maurice Van de Maele

Valnytsky, Kyrylo [Val'nyc'kyj], b 1889, d ? Galician Russophile and socialist leader. He founded (ca 1908) and then headed the *People's Will party in Lviv. He edited (1921–8) the Lviv Russophile newspaper *Volia naroda* and its Sovietophile Ukrainian-language successor, **Volia narodu*. Valnytsky and his group supported the Galician Ukrainian boycott of the 1922 Sejm elections and established a chair of Russian culture and language at the Lviv (Underground) Ukrainian University. By 1924 their views had changed from Russophile to Ukrainophile, pro-Soviet Marxist. In 1925 and early 1926 Valnytsky debated the Ukrainian question with R. *Turiansky in *Volia narodu*. When the People's Will party merged with the Sel-Soiuz to form the *Sel-Rob party, Valnytsky was elected to its Central Committee. As a leader of the pro-Comintern, anti-Vasylkiv faction he played a key role in the Sel-Rob split, and in 1928 he became the head of the 'reunited' Sel-Rob-Yednist federation, editor of its organ *Sel'-Rob*, and a member of the Communist Party of Western Ukraine. Until 1930, when he fled to the USSR, he represented Lviv voivodship at the Sejm. He perished in a Soviet concentration camp.

Valuev, Petr [Valujev], b 22 September 1815 in Tsaritsyno, near Moscow, d 27 January 1890 in St Petersburg. Russian statesman and writer. As tsarist minister of internal affairs (1861–8; also responsible for press censorship from 1862) he implemented the legislation that emancipated the peasantry, introduced the zemstvo government reform, and expanded the powers of the bureaucracy and police. Having been alarmed by the spread of peasant dissatisfaction, student unrest, and Polish separatist, **khlopoman*, and other populist and revolutionary activity, in 1862 he closed down all *Sunday schools on the ground that they were seditious, and had several hromada leaders (eg, O. Konysky, P. Chubynsky, S. Nis, P. Yefymenko) arrested as subversives and exiled to Siberia. In the wake of the *Polish Insurrection of 1863–4 in Right-Bank Ukraine and in response to official fear of 'separatist' *Ukrainophiles, he reacted to the application to print P. *Morachevsky's Ukrainian translation of the New Testament by banning it and all other publications in Ukrainian except belles lettres. In his 30 July 1863 secret instruction informing the minister of education of the ban, he gave the mo-

tive for his decision: 'No separate Little Russian language has [ever] existed, does exist [now], and can [ever] exist, and the dialect used by the common folk is the very same Russian language, only adulterated by the influence on it of the Polish language ... The all-Russian language is just as understandable for Little Russians as it is for Great Russians, and even more understandable than the so-called Ukrainian language, presently fabricated for them by certain Little Russians, and in particular the Poles.' Valuev's instruction was echoed by that of the Holy Synod to its censors and was followed by a vicious campaign in the Russian press (including *Vestnik Iugo-zapadnoi Rossii*, *Kievlianin*, and *Trudy Kievskoi dukhovnoi akademii*) against the Ukrainophile movement as a Polish intrigue.

Valuev later served as a member of the State Council (from 1868) and on D. Tolstoi's commission for gymnasium reform, and as minister of state domains (1872-9). He also headed a commission on the 'peasant question' (from 1872) and was chairman of the Committee of Ministers (1877-81). He chaired several bodies concerned with suppressing the revolutionary movement, created governors-general with extraordinary powers, and published a government-funded counterrevolutionary weekly, *Otgosloski* (1879-81). His diaries of the years 1847-60 (in *Russkaia starina*, 1891, nos 5-11), 1861-76 (2 vols, Moscow 1961), and 1877-84 (Petrograd 1919) were published.

R. Senkus

Vampire (*upyr, opyr, opyrytsia*). A dead person believed to rise from the grave at night and to suck the blood of sleeping people, particularly children. According to Ukrainian folk belief vampires can also be living people, and they can cause droughts and epidemics. They are distinguished by their red faces and a tiny tail. Vampires are former criminals, suicides, victims of a spell, or improperly buried people. They can be destroyed by being exhumed and having a stake driven through their bodies. Living vampires must be pierced by a stake or buried. References to vampires occur in Ukrainian literature of the 13th to 17th centuries and in the works of Romantic writers.

Van de Maele, Maurice, b 5 April 1892 in Alveringem, Belgium, d 19 May 1970 in Belgium. Belgian Redemptorist. In 1917 he was ordained, and in 1922 he adopted the Byzantine Ukrainian rite and became a missionary in Western Ukraine. Until the Second World War he served as a priest and hegumen of several Redemptorist monasteries in Galicia and Volhynia; later he was dean of Ukrainian parishes in the Rzeszów region (1944-6). In 1946 he returned to Belgium. Until December 1952 he ministered to Ukrainian Catholics in Belgium, Holland, and Scandinavia, and from 1953 to 1961 he served as vicar-general for Ukrainian Catholics in France.

Vanchenko, Kostiantyn [Vančenko] (pseud: Pysanetsky), b 1863 in Zhytomyr, d 18 July 1928 in Tashkent. Actor, singer (baritone), director, and playwright. He worked in M. Starytsky's (1883-90) and H. Derkach's (1898-1900) troupes and later led his own. He is the author of many plays, including *Muzhychka* (The Peasant Girl, 1893), *Nedoliudky* (The Brutes, 1906), and the adaptations of N. Gogol, *Taras Bul'ba pid Dubnom* (Taras Bulba at Dubno, 1891) and *Zaporoz'kyi klad* (The Zaporozhian Treasure, 1898).

Vanchenko, Petro [Vančenko], b 1898 in Zhuky, Poltava gubernia, d 1937? Writer and satirist. A member of the writers' group Hart in the 1920s, from 1924 on he published stories (many of them satirical) in journals such as *Literatura, nauka, mystetstvo, Zoria, Vsesvit, Hart*, and *Chervonyi shliakh* (*ChSh*). Published separately were his prose collections *Zhyva reklama* (The Live Advertisement, 1928), *Muzhnist'* (Manhood, 1928), *Obov'iazok* (Duty, 1929), *Try pal'tsi* (Three Fingers, 1929), and *Klopit tsyru'l'nyka Emilia Termana* (Barber Emil Terman's Trouble, 1930) and the novelettes *Povist' bez nazvy* (A Tale without a Name, 1930) and *Onoprii Kud'* (1933). His 'Opovidannia pro hnidu kobylu' (Story of a Bay Mare, *ChSh*, 1929, no. 3) was condemned by Party critics. Vanchenko was arrested in 1934 and sentenced to 10 years of imprisonment. His further fate is unknown; he most likely perished in the Stalinist terror. He was rehabilitated posthumously. Posthumous editions of his works, also called *Onoprii Kud'*, appeared in Ukrainian in 1968 and in Russian in 1971.

Vancouver's Ukrainian Canadians taking part in the 1936 Pacific Exhibition parade

Vancouver. The third largest city (1981 metropolitan pop 1,250,000) in Canada, situated in the southwest corner of British Columbia. Vancouver's natural harbour has made it a major port and railway terminal. Its chief industries are transportation and trade. Although Ukrainians started coming to the area around the turn of the century, their numbers remained small until after the Second World War (1,800 in 1941, 7,200 in 1951). Its first Catholic parish, the parish of the Holy Eucharist, was established in the suburban city of New Westminster in 1952 and became the see of a new Ukrainian Catholic eparchy in 1975. Since then three new Catholic churches (St Mary's, Holy Cross, and Assumption) and one Ukrainian Orthodox church (ss Peter and Paul) have been built. A branch of the Ukrainian National Federation was organized in 1937 and became the center of cultural (choir, drama club) and educational (elementary school, lectures) activities. In 1970 it absorbed the New Westminster branch (est 1951). The local Ukrainian Canadian Professional and Business Club (est 1960) has helped to establish Ukrainian language courses at the University of British Columbia. A provincial council of the Ukrainian Canadian Congress was created in Vancouver in 1990. The area's Ukrainian population stood at 47,620 in 1981, a figure that included many

former Alberta and Saskatchewan Ukrainians. In 1991, 6,745 of them claimed Ukrainian as their sole mother tongue.

Vano, Teodor [Van'ol], b 1880 in Buzk, Kaminka-Strumyl'ova county, Galicia, d ca 1958–9 in Nesterov (Zhovkva), Lviv oblast. Lawyer and civic and political leader. In 1910, after obtaining a law degree at Lviv University and a doctorate at Vienna University, he opened a law office in Zolochiv. He organized Prosvita reading rooms, Sil'skyi Hospodar circles, and credit unions in the county. A candidate of the National Democratic party, he was elected to the Galician Diet in 1913, and during the First World War he served as a captain in the Austrian army. A member of the Ukrainian National Rada, he was placed in charge of food procurements in 1919 by the State Secretariat of the Western Ukrainian National Republic. Having been deported by the Poles, he returned to Zolochiv in 1921 and there resumed his law practice and played a leading role in most of the county's organizations. In 1944 he was imprisoned in Siberian labor camps by the Soviets. He returned to Ukraine in the 1950s.

Vanotti, Jacob-Ludwig, b 1773 in Freiburg im Breisgau, d 14 February 1819 in Kharkiv. Physician. A graduate of Freiburg University (MD, 1798), he practiced medicine in Lviv and worked at Kharkiv University (from 1805), where he set up an anatomy theater and cabinet and taught pharmacology and the history of medicine (from 1810, as professor from 1812). He wrote on smallpox vaccination and field medicine.

Vanzetti, Tito, b 29 November 1809 in Venice, d 7 June 1888 in Padua. Surgeon. He graduated from Padua University (1832) and came to Odessa in 1834. In 1837 he received a doctoral degree from Kharkiv University and was appointed to the chair of eye surgery. In 1848 he performed the first ovariectomy operation in the Russian Empire and published *Annales scholaclinicæ chirurgicæ cesaræ universitatîs Charcoviensis*. He returned to Padua in 1853.

Vaplite (full name: Vilna akademiia proletarskoi literatury [Free Academy of Proletarian Literature]). A writers' organization which existed in Kharkiv from 1925 to 1928. While accepting the official requirements of the Communist party, Vaplite adopted an independent position on questions of literary policy and supported M. *Khvylovy in the *Literary Discussion of 1925–8. Vaplite proposed to create a new Ukrainian literature based on the writers in its ranks who strived to perfect their work by assimilating the finest masterpieces of Western European culture. J. Stalin interpreted that goal as a betrayal of the aims of the Party and accused Khvylovy and Vaplite of working under the slogan Away from Moscow. The association rejected decisively the policy of mass participation (*masovism*) in proletarian writers' organizations, which were supported by the Communist party. Khvylovy was the actual leader of Vaplite; its official president was first M. Yalovy (Yu. Shpol) and then M. Kulish, and its secretary was A. Liubchenko. Its members were M. Bazhan, V. Vrazhlyvy, I. Dniprovsky, O. Dosvitnii, H. Epik, P. Ivanov, M. Yohansen, O. Kopylenko, H. Kotsiuba, M. Maisky, P. Panch, I. Senchenko, O. Slisarenko, Yu.

Members of Vaplite in 1926. Sitting, from left: Pavlo Tychyna, Mykola Khvylovy, Mykola Kulish, Oleksa Slisarenko, Maik Yohansen, Hordii Kotsiuba, Petro Panch, Arkadii Liubchenko; standing: Mykhailo Maisky, Hryhorii Epik, Oleksander Kopylenko, Ivan Senchenko, Pavlo Ivanov, Yurii Smolych, Oles Dosvitnii, Ivan Dniprovsky

Smolych, P. Tychyna, and Yu. Yanovsky. The association published the almanac *Vaplite* (1926), devoted mostly to literary problems, and five issues of the journal *Vaplite* (1927). Vaplite's position on literary issues was supported by the *Neoclassicists (M. Zerov in particular) and by other Ukrainian writers.

The ideas of Khvylovy and Vaplite came under vehement criticism not only from their literary rivals and key Soviet leaders of Ukraine (eg, V. Chubar, V. Zatonsky, M. Skrypnyk, T. Taran, and A. Khvyliia) but also from the Communist Party of Ukraine. Neither the admission of political 'errors' by Khvylovy and others in December 1926 nor the expulsion of Khvylovy, Yalovy, and Dosvitnii from Vaplite in January 1927 could save the organization. Khvylovy's novel *Val'dshnepy* (The Woodcocks, first part pub in *Vaplite*, no. 5, 1927) came under particularly severe criticism. The sixth and last issue of *Vaplite*, containing the continuation of the novel, was confiscated at the printing office and Vaplite was forced to dissolve. Members of the association continued their literary work in association with the journal **Literaturnyi iarmarok* and in the organization **Prolitfront*.

 M. Hlobenko

Vaplite. The official organ of *Vaplite. Its editorial board consisted of M. *Kulish, I. *Senchenko, O. *Slisarenko, P. *Tychyna, and M. *Yohansen. Only an almanac and five issues of a journal appeared. The almanac (1926) consisted of articles on cultural politics and literary topics submitted by five members of Vaplite and the Comintern figure V. Serge (Kibalchich), Vaplite's statute, and a literary chronicle. The journal issues (1927) contained poems and prose by Vaplite members and other writers (eg, N. Surovtsova, V. Stefanyk, N. Shcherbyna, K. Hordiienko,

The cover of the first Vaplite almanac and the Vaplite logo

D. Falkivsky, H. Koliada); polemical and theoretical articles and literary criticism (including articles by nonmembers, such as Y. Aizenshtok, Ye. Kruk, R. Yakobson, A. Pavliuk, L. Kurbas, I. Vrona, H. Maifet, and V. Derzhavyn); an article on literary Paris by the Russian writer A. Gatov; literary translations by A. Liubchenko, P. Tychyna, V. Pidmohlyny, and A. Pavliuk; a literary chronicle (probably by A. Leites); book reviews; and Vaplite's resolutions (1927, no. 2). The journal and its contributors were constantly attacked by Party critics belonging to the *All-Ukrainian Association of Proletarian Writers and *Molodniak, particularly by V. Koriak. The Party forced Vaplite to cease publication after it printed former Vaplite member M. *Khvylovy's novel 'Val'dshnepy' (Woodcocks, pt 1) and a literary article by the nonmember P. *Khrystiuk. The sixth issue of Vaplite, containing the continuation of Khvylovy's novel, was confiscated by the authorities at the printing office.

R. Senkus

Vapniarka [Vapnjarka]. v-9. A town smt (1988 pop 9,200) in Tomashpil raion, Vinnytsya oblast. It emerged in the 1870s as a railway settlement. As a railway junction, in 1919 it was contested by the UNR Army, the Ukrainian Galician Army, the Red Army, and A. Denikin's forces. Today its main enterprises belong to the railway industry, but it also has a large baking complex and a lime factory.

Vapniarka Hill [Vapnjarka]. iv-6. One of the tallest elevations (460 m) of the Voriaki section of the Podolian Upland, situated on the watershed between the Styr and the Seret rivers. With distinctive formations cut into its sandy limestone faces, the hill is a local attraction.

Varangian route. A medieval trade route extending from Scandinavia through Kievan Rus' to the Byzantine Empire, mentioned in chronicles as the route 'from the Varangians to the Greeks.' The trade route consisted of a series of waterways and portages covering nearly 3,000 km from the Baltic ('Varangian') to the Black seas. It began near present-day Stockholm and crossed the Baltic Sea and the Gulf of Finland, followed the Neva River, Lake Ladoga, the Volkhov River, Lake Ilmen, and the Lovat River, and connected with the *Dnieper River by way of the Western Dvina River. The route continued all the way along the Dnieper directly to the Black Sea and then followed its western coast to Constantinople.

The Varangian route was first used in the 9th century. It played a major role not only in the development of trade in the Kievan Rus' territories but also in the cultural and political transformation of East Slavic tribes into the Rus' state with its center in Kiev. Among the cities founded

VARANGIAN ROUTE

along the Varangian route were Ladoga, Novgorod, Smolensk, Liubech, Vyshhorod, Kiev, and Kaniv. Voyaging in the southern Ukrainian portion of the route was difficult owing to raids by nomadic tribes in the region, and by the early 12th century an alternate trade route into western Europe was being used that followed the Prypiat, the Buh, and the Vistula rivers. The Varangian route is described in the Primary Chronicle and is mentioned by Constantine VII Porphyrogenitus in his *De administrando imperio* (948-52).

A. Zhukovsky

Varangians (from Norse *waering* 'one who has taken an oath of allegiance' or *war* 'oath, sworn fidelity'; Ukrainian: *variahy*). Nordic warrior-traders who established themselves in Rus' after first appearing there in the early 9th century. Known as Normans or Vikings in other parts of Europe, those adventurers were called Varangians in Eastern Europe and Byzantium. In the 9th to 11th centuries Varangians served as key mercenary troops for Rus' princes (eg, Ihor, Volodymyr the Great) and also hired themselves out to Byzantine emperors (eg, Basil II). They occupied key administrative positions in Kievan Rus' and engaged in trade in the towns. The Varangians are associ-

ated particularly with the use of the *Varangian route, which provided an eastern access for traders from Scandinavia through Kievan Rus' to the Byzantine Empire.

The extent of Varangian influence in Rus' has been debated for several centuries in connection with the controversial *Normanist theory. The kernel of the debate is accounts of contemporary chroniclers that credit the Varangians with establishing a state structure in ancient Rus'. Certainly the Varangians assumed a leading role in the running of the Rus' state; the *Riurykide dynasty, in fact, is descended from a Varangian. But the extent of their influence beyond that is difficult to ascertain, notably because the Varangians assimilated rapidly with the local population; their influence in Rus' was particularly evident in military organization and in personal names. In Novgorod they built a church which is mentioned in chronicles as the Varangian Church. Later archeological expeditions unearthed large Varangian grave sites in the Kiev and Chernihiv (Shestovytsia) regions containing well-preserved caches of grave goods and weapons.

A. Zhukovsky

Varavva, Oleksii. See Kobets, Oleksii.

Varchenko, Vasyl [Varčenko, Vasyl'], b ?, d 1770. Banduryst. He took part in the Koliivshchyna rebellion in 1768. He joined Rémeza's detachment and with his songs encouraged the haidmakas to battle. He was executed by the Poles in Kodnia.

The 27-ft-high, 12-ft-wide, 3-t fiberglass 'perogy' erected in Glendon, Alberta, in 1991

Varenyky. Boiled dumplings consisting of a dough shell filled with meat, mashed potato, cheese, fruit, or other filling. They are a popular Ukrainian dish. Traditionally they were eaten as a festive dish at weddings or on holidays. In

Galicia *varenyky* were indispensable parts of the Christmas Eve and Epiphany meals, and in many regions of Ukraine they played a symbolic role in the wedding ritual. They have been popular among Ukrainian immigrants in North America. Since the 1960s they have become popular even among non-Ukrainians in Canada and the United States, where they are usually known as 'perogies' (*pyrohy*), and are manufactured as a commercial product.

Varenytsia Uprising. A peasant and Cossack revolt in Right-Bank Ukraine in 1664–5. The uprising took place several years after the Right Bank had been returned to the Polish overlords under the Treaty of Slobodshche. It was preceded by a revolt in Pavoloch regiment led by I. Popovych in 1663. The 1664–5 uprising broke out in the Dnieper region and quickly spread throughout the Right Bank. Its leaders were V. Varenytsia, the colonel of Kalnyk regiment, and a Cossack named Sulymka. The rebels were soon joined by Zaporozhian forces under I. Sirko. After the Poles crushed the rebellion they meted out harsh punishments to its perpetrators and supporters. Sulymka was executed; Varenytsia died in battle near Kalnyk in 1665.

Varetska, Valentyna [Varec'ka] (née Sofiienko), b 17 December 1900 in Ivano-Kepyne near Snihurivka, Khereson county, d 3 January 1981 in Kharkiv. Stage and film actress. She began her theatrical career in the Kherson Theater (1919) and then was a leading actress in the Kiev Ukrainian Drama Theater (1922–31) and the Kharkiv Theater of the Revolution (1931–5) and in Ukrainian troupes in Poltava, Ternopil, Kharkiv, and Drohobych (until 1950). Her noted roles included Donna Anna in Lesia Ukrainka's *Kamynnyi hospodar* (The Stone Host) and the title role in V. Vynnychenko's *Nad* (Nad[ia]). She acted in the film *Order na aresht* (The Warrant for Arrest, 1927).

Variah (Varangian). A publishing house in Warsaw, established in 1933 by émigré writers grouped around the journal *My. It published *My* and books by S. Hordynsky, N. Livytska-Kholodna, B. Olkhivsky, A. Kryzhanivsky, and Ya. Dryhynych. The publishing house closed down in late 1939.

Varlaam, b ? in Kiev, d 19 November 1065 in Volodymyr-Volynskyi. Churchman and saint. The son of the boyar Ivan Vyshatych, he was tonsured in 1056, and lived with St Anthony of the Caves and became the first hegumen of the *Kievan Cave Monastery. During his tenure the wooden Dormition Church was built, in 1058. In 1062 Prince Iziaslav Yaroslavych established a church and monastery that later became known as *St Michael's Golden-Domed Monastery, and invited Varlaam to become its hegumen. Varlaam twice went on pilgrimages to Jerusalem and other places in the Holy Land. On his way back to Kiev he fell ill, and died in the Zymne Monastery near Volodymyr-Volynskyi. He was buried in the Kievan Cave Monastery. He was canonized in the 11th century; his feast day is 2 December (19 November OS).

Varlaam i Ioasaf (Barlaam and Joasaph). A medieval philosophical narrative about the conversion to Christianity of the Indian prince Joasaph (or Josaphat) under the influence of the hermit Barlaam, who told him many parables. Modeled on Indian tales about Buddha, it was writ-

ten in Greek by a monk called John at the St Sava Monastery near Jerusalem ca 630 AD and translated, with various revisions and additions, into Persian, Arabic, Hebrew, Ethiopian, Armenian, and Georgian in the 1st millennium AD. A new Greek version was adapted from the Georgian text at Mt Athos at the beginning of the 11th century. Latin translations (1220–33) of the Greek became popular throughout Western Europe and were translated, in turn, into German, French, Italian, and other languages. A Church Slavonic translation from Greek was made in Kiev no later than the 12th century. Thereafter the tale was widely read in Ukraine. It was transcribed over 1,000 times, in many variants; themes from it were depicted in icons, murals, and miniatures; and parables from it were included in numerous religious didactic collections (eg, the **Menaion* and **Prolog*). **Cyril of Turiv* used it as a source for one of his tales. The first printed Ruthenian translation, made by Y. Polovko using J. Billio's Latin version, appeared in 1637 at the Kutein Epiphany Monastery near Orsha, in Belarus; its text is notable for its incorporation of details of 16th- and 17th-century Ukrainian folkways. The tale left a distinct mark in 17th- and 18th-century Ukrainian literature (eg, in the works of S. Kosiv and L. Baranovych, the *Bohohlasnyk*) and folklore. Verses from it were sung by lirnyks. In the 19th century I. Franko rendered its parables into poetry and, in 1897, published a monograph about it (his PH D diss, reprinted in Franko's collected works, vol 30 [Kiev 1981]). The full Old Slavonic text with I. Lebedeva's long scholarly introduction and annotations appeared in Moscow in 1985.

R. Senkus

Varnak, Okhrim. See Vasylenko, Onoprii.

Vartovy, P. See Hrinchenko, Borys.

Varva. III-13. A town smt (1988 pop 9,100) on the Udai River and a raion center in Chernihiv oblast. In 1079 Volodymyr Monomakh defeated the Cumans at Varyn fortress, which stood near the site of the present town. Varva was destroyed by the Mongols in 1239 and by the Tatars in 1482. From 1569 the territory around Varva belonged to the Polish Commonwealth. Under the Hetman state Varva was a company center of Pryluka regiment (1649–1781). In 1658 Hetman I. Vyhovskiy defeated the Russian army commanded by Prince G. Romodanovskiy at Varva. In the 19th century the town belonged to Lohkvytsia county in Poltava gubernia. In 1960 it was granted smt status. Today it is an agricultural town with a dairy, a building enterprise, and a machine repair shop.

Varvariv, Victoria [Varvariv, Viktorija], b 21 June 1954 in New York. Painter; daughter of C. **Warvariv*. She studied drawing, sculpture, and mosaics at l'Ecole nationale supérieur des beaux arts and art history at the American College in Paris and the Sorbonne (PH D, 1984). She also paints on silk and glass. She has had over 20 solo exhibitions (eg, in Paris, Geneva, New York, Washington, San Francisco, and Toronto).

Varvarivka settlement. A settlement of the 4th to 3rd century BC near Varvarivka, near Mykolaiv, Mykolaiv oblast, on the Boh River. Excavations in 1938–9 uncovered stone surface dwellings and over 70 pits. Most of the pits

were used for storing grain, although eight functioned as dwellings (some even being linked by underground walkways). Pottery, millstones, and the bones of a variety of domestic animals were also unearthed. A Scythian burial site was located adjacent to the settlement.

Otaman Antin Varyvoda

Hryhorii Vashchenko

Varyvoda, Antin, b 10 January 1869 in Seret, Bukovyna, d 12 March 1936 in Vienna. Senior army officer. During the First World War he was a regular officer in the Austrian army and commanded the Legion of Ukrainian Sich Riflemen (14 January 1915 to 30 November 1916). During 1918–19, at the rank of colonel, he was a member of the Western Ukrainian National Republic mission in Vienna. Later he served briefly as a senior officer of the Ukrainian Galician Army at the internment camp in Josefov, Czechoslovakia.

Varzar, Vasili, b 16 December 1851 in Lublin, now in Poland, d 28 September 1940 in Leningrad. Russian economist and one of the first industrial statisticians in the Russian Empire. After graduating from the St Petersburg Polytechnical Institute in 1874, he worked with P. Chervinsky and O. Rusov in the statistical bureau of the Chernihiv zemstvo. After 1890 he worked as an economist in the Ministries of Finance and Trade and Industry in Moscow. After the Revolution of 1917 he served as a statistics professor at Moscow University. He wrote some important statistical studies of the cottage industry in Chernihiv gubernia (1880) and of the economies of Novozybkov and Oster counties (1881), of the factory industries of the Russian Empire (1912), and of factory strikes in Russia in 1895–1904 (1905). He also prepared a textbook on industrial statistics in two volumes (1925, 1927).

Vashchenko, Hryhorii [Vaščenko, Hryhorij], b 5 May 1878 in Bohdanivka, Pryluka county, Poltava gubernia, d 4 May 1967 in Munich. Pedagogue. A graduate of the Moscow Theological Academy (1903), he taught at various schools in Ukraine and Russia until 1918, when he started lecturing at the teachers' institute in Poltava. He was purged from the Poltava Institute of People's Education in 1933, and he obtained a post at the Stalingrad Pedagogical Institute in 1936. After the war he settled in Munich, where he lectured (from 1945) at the **Ukrainian Free University* and the **Theological Academy* of the Ukrainian Autocephalous Orthodox Church. In 1950 he became the rector of the latter institution. Vashchenko

wrote several short stories and a novel, *Do gruntu* (To the Foundation, 1912), as well as pedagogical works, including *Zahal'ni metody navchannia* (General Methods of Teaching, 2 vols, 1949).

Vashchenko, Oleksander [Vaščenko], b 1909 in Poltava gubernia, d 21 June 1974 in Curitiba, Brazil. Journalist. After emigrating to Brazil in 1948, he was editor of the weekly *Khliborob*, published by the Union for Agricultural Education, from 1953 to the end of his life. He also contributed reports and articles to *Svoboda* under the pen name Mykhailo Kylymny.

Vashchenko, Vasyl [Vaščenko, Vasyl'], b 1850, d 1918. Beekeeper. He set up and directed a beekeeping school in Boiarka, Kiev gubernia. He invented an improved beehive and proposed a number of effective methods of beekeeping.

Vashchenko, Vasyl [Vaščenko, Vasyl'], b 11 March 1905 in Nizhen, Chernihiv gubernia. Linguist. A graduate of the Dnipropetrovske Institute of People's Education (1930), from 1933 he lectured at Dnipropetrovske University, eventually chairing the department of Ukrainian language. He has written numerous works, including a Ukrainian grammar (1938); textbooks on Ukrainian stylistics (1958), the Ukrainian language (1959, 1961), and Ukrainian stylistic morphology (1970); monographs on the Poltava dialects (doctoral diss, 1957), the dialectal lexicon of the middle and lower Dnieper region (1962), T. Shevchenko's language (1963), the linguistic geography of the Dnieper region (1968), and the stylistics of the Ukrainian sentence (1968); and a dictionary of the Poltava dialects (1960); and has prepared a scheme for a dictionary of Ukrainian synonyms (1969). He also edited the AN URSS (now ANU) dictionary of Shevchenko's language (2 vols, 1964) and books on the folk and contemporary dialects of the Dnieper region (1969).

Mykhailo Vashchenko-Zakharchenko

Viacheslav Vaskivsky (self-portrait, wood engraving)

Vashchenko-Zakharchenko, Mykhailo [Vaščenko-Zaxarčenko, Myxajlo], b 12 November 1825 in Maliivka, Zolotonosha county, Poltava gubernia, d 27 August 1912 in Kiev. Mathematician. After studying at Kiev University, the Sorbonne, and the Collège de France (1847–8) he graduated from Kazan University in 1854 and taught at

the Kiev Cadet School (1855–62) and Kiev University (1863–1902). Vashchenko-Zakharchenko made significant contributions to the theory of linear differential equations, operational calculus, theory of probability, and the history of mathematics. His master's dissertation was the first treatise in Russian on the operational method and its application to the solution of linear differential equations (1862). He wrote a monograph on the history of mathematics to the 15th century (1883) and a historical survey of the development of analytic geometry. He was the author of 12 textbooks in various fields of mathematics. As one of the first proponents of non-Euclidean geometry in the Russian Empire, he exerted considerable influence on the development of mathematics in Ukraine and Russia.

Vashetko, Mykola [Vašetko], b 18 February 1880 in Mykolaivka, Borzna county, Chernihiv gubernia, d 6 September 1960 in Kiev. Pathophysiologicalist. A graduate of Kiev University (1908), he chaired departments at Kiev University (1918–21) and the Kiev and Donetske (1931–6) medical institutes, the Kiev Veterinary Institute (from 1936), and the Ukrainian Agricultural Academy (from 1957). His publications dealt with toxicoses, urologic pathology, and the role of the nervous system in regulating metabolism.

Vashkivtsi [Vašktivci]. v-6. A city (1989 pop 6,300) on the Cheremosh River in Vyzhnytsia raion, Chernivtsi oblast. It was first mentioned in historical documents in 1431, when the village belonged to the Principality of Moldavia. In 1774 it was annexed by Austria. In 1903 it was promoted to the status of a county administrative center. In the interwar period Vashkivtsi was occupied by Rumania. After the war it became part of the Ukrainian SSR. It was granted city status in 1940. Today it is an industrial and agricultural town with a distillery, a canning factory, and a branch of the Chernivtsi Handicrafts Factory.

Vasilev, Leonid [Vasil'ev], b 1880, d 1920. Russian linguist. He studied under A. Sobolevsky at St Petersburg University and taught there until approx 1913. He was an expert on the manuscripts of Kievan Rus'; his careful analysis of them shed new light on Old Ukrainian phonetics (the softness or hardness of consonants before *e* and nasal *e*, the new *jať*, the softening of *n*) and changes in Slavic stress. A bibliography of his works was published in *Slavia* (1926, no. 4).

Vaskivsky, Viacheslav [Vas'kivs'kyj, Vjačeslav], b 15 February 1904 in Rivne, Volhynia, d ? Artist and educator. In the late 1920s he studied art at the Warsaw Academy of Fine Arts and belonged to the Spokii art group. In 1937 he began teaching at the academy. Besides drawing, painting, and using traditional graphic techniques, he experimented widely with xylotype, colored aquatype, deep linocut, and engraving in various plastic media. His works, many of which deal with Ukrainian subjects (landscapes and portraits), are found in museums in Warsaw, Cracow, New York, Chicago, Moscow, Leningrad, and Kaniv.

Vasko, Havrylo [Vas'ko], b 1820 in Korop, Krolevets county, Chernihiv gubernia, d after 1878. Painter. He learned to paint by copying works by the masters. He

Portrait of a girl by Havrylo Vasko (oil, 1840s)

taught drawing at Kiev University and headed its painting art museum (1847–63). He specialized in painting portraits; among his works are ones of B. and V. Tomara (1847) and Tsar Nicholas I and a series (now lost) of Cossack hetmans for V. Tarnovsky's museum in Chernihiv.

Vasmer, Max, b 28 February 1886 in St Petersburg, d 30 November 1962 in Berlin. German Slavist; member of several German academies of science, the Shevchenko Scientific Society, and the USSR Academy of Sciences. A graduate of St Petersburg University (PH D, 1915), he lectured in Slavic philology at Saratov (1915–17), Dorpat (1918–21), Leipzig (1921–5), and Berlin (1925–56) universities. He was a founder and editor of *Zeitschrift für slavische Philologie*. His main interests were Slavic etymology and ethnogenesis. His *Russisches etymologisches Wörterbuch* (1950–8) contains much material on Ukrainian etymology, although the material is not always complete and verified. He tried to locate the original homeland of the Slavs (1923, 1926) on the basis of Slavic hydronyms and other historical data, and compiled *Wörterbuch der russischen Gewässernamen* (1960–73) and *Russisches geographisches Namenbuch* (1962–81), which fully cover Ukrainian geographical names (except for Transcarpathia). He devoted separate articles to Ukrainian subjects, such as the names of the Sea of Azov (1930), the Desna River (1930), and the Psol River (1932); Queen Anna Yaroslavna's signature (1927, 1931); and other subjects. At his request V. *Hantsov wrote a fundamental survey of Ukrainian dialectology.

Vassyian, Yuliiian [Vassyjan, Julijan], b 12 January 1894 in Kolodentse, Zhovkva county, Galicia, d 3 October 1953

Yuliiian Vassyian

in Chicago. Nationalist ideologue and philosopher. His studies at Lviv University were interrupted by the First World War and Ukrainian-Polish War in Galicia, during which he was an officer in the Ukrainian Sich Riflemen and Ukrainian Galician Army. After his release from a Polish POW camp, he studied at the Lviv (Underground) Ukrainian University (1922–4), Prague University (PH D, 1929), and the Ukrainian Higher Pedagogical Institute in Prague, and was active in nationalist student groups. As chairman of the Ideological Commission, he was elected to the OUN Leadership at its founding congress in 1929. After returning to Galicia in 1930, he worked as an editor of the weekly *Ukrains'kyi holos* in Peremyshl and was imprisoned by the Poles for his political activities (1931–5, 1939). In 1944 he was imprisoned by the Gestapo. A postwar refugee in Germany, he emigrated to the United States in 1950. Vassyian contributed articles defining nationalist ideology to *Natsional'na dumka*, *Rozbudova natsii*, and *Samostiina Ukraina*. Some of his philosophical essays, dealing with Ukrainian history, the Ukrainian national character, and the role of the individual, were published posthumously in the collections *Odynytsia i suspil'nist'* (The Individual and Society, 1957), *Suspil'no-filosofichni narysy* (Socio-Philosophical Essays, 1958), and *Tvory* (Works, 1972). Many of his manuscripts remain unpublished.

T. Zakydalsky

Vasyl [Vasyl']. The 13th archimandrite of the Kievan Cave Monastery (1182–97), and before that a priest at the church on Shchekavytsia Hill in Kiev. During his tenure the monastery was greatly expanded, and several new churches were established, including St Basil's in Kiev (1184) and the Church of the Holy Apostles in Bilhorod, near Kiev (1197).

Vasyl of Lviv [Vasyl'], b and d ? Painter at the court of King Jan III Sobieski in Zhovkva. Between 1659 and 1687 he painted a portrait of Jan III (now in the Uffizi Gallery in Florence), murals depicting the Polish-Turkish War (in the Roman Catholic church in Zhovkva), and icons for the Krekhiv Monastery.

Vasylashchuk, Hanna [Vasylaščuk], b 2 November 1924 in Sheshory, Kosiv county, Galicia. Weaver. She has woven decorative **rushnyky*, curtains, furniture, covers, skirts, and pillowcases. Her colors and designs are characteristic of Hutsul folk weavings. An album of her work was published in Kiev in 1985.

Stepan Vasylenko

Mykola Vasylenko

Vasylenko, Stepan [Vasyľ'čenko] (pseud. of Stepan Panasenko), b 8 January 1879 in Ichnia, Borzna county, Chernihiv gubernia, d 11 August 1932 in Kiev. Writer, teacher, and journalist. He became well known for his short stories, which were published in the collections *Es-kizy* (Sketches, 1911) and *Opovidannia* (Short Stories, 1915). Vasylenko's short stories are filled with humanism and a gentle sense of humor. They are marked by a combination of realism and fantasy (eg, 'V tiniakh lypnevoi nochi' [In the Shadows of the July Night], 'Kriz' drimoty' [Through Slumber], 'Solov'ї [Nightingales]) and by the richness of a language gleaned from folk poetry. Vasylenko was also the author of numerous plays, which were published in the collection *Dramatychni tvory* (Dramatical Works, 1917). He could not countenance Soviet rule and consequently turned to writing stories for children. Vasylenko's works have been republished a number of times; the most complete editions are *Povna zbirka tvoriv* (Complete Collection of Works, vols 1–4, 1928–30) and *Tvory* (Works, vols 1–4, 1960).

Vasylychov, Dmytro [Vasyľ'čykov], b 7 November 1884 in Rostov, Don Cossack region, d 20 February 1960 in Kharkiv. Actor. From 1906 he worked in various Ukrainian touring troupes. In 1929 he was one of the founders of the Kharkiv Theater of Musical Comedy, where he worked until 1940 (in 1945–7 as administrative director).

Vasylenko, Andrii, b 4 November 1891 in Bilenke, Oleksandrivske county, Katerynoslav gubernia, d 5 July 1963 in Kiev. Mechanical and agricultural engineer, specialist in agricultural machinery; full member of the AN USSR (now ANU) from 1948. He studied at the Kiev Polytechnical Institute and worked at agricultural institutes in Kiev, Kharkiv, Moscow, and other cities. He contributed significantly to the development of new agricultural machinery, particularly sugar-beet planters (1930), harvesters (1933 and 1935), and loaders and special types of mechanized plows.

Vasylenko, Mykola, b 14 February 1866 in Esman, Hlukhiv county, Chernihiv gubernia, d 3 October 1935, probably in Kiev. Historian, legal scholar, and community and political leader; husband of N. *Polonska-Vasylenko. He studied medicine and then history and philology at Dorpat (now Tartu) University in 1885–90. He taught in

gymnasiums in Kiev (1892–1902), served in the Russian Ministry of Internal Affairs (1902–5), worked as a journalist and editor of *Kievskie otkliki* (1905–6), and coedited *Kievskaiia starina*. He was imprisoned for his editorship of the *Kievskie otkliki*, and while incarcerated, took to studying law. In 1907 he graduated with a law degree from Odessa University, and he practiced law until 1917. He was elected to the Ukrainian Scientific Society in Kiev (UNTK) in 1908, headed its historical section, and edited its *Zapysky*. He was also made a lecturer at Kiev University but was barred from teaching by the government. He became a full member of the Shevchenko Scientific Society (NTSh) in 1911. He was a member of the Old Hromada of Kiev, joined the Society of Ukrainian Progressives (TUP), and in 1910 became active in the Russian Constitutional Democratic party (Kadets).

In April 1917 Vasylenko was appointed curator of the Kiev school district (which included Kiev, Volhynia, Podilia, Chernihiv, and Poltava gubernias) by the Provisional Government, and that year he became an associate minister of national education in Petrograd. In January 1918 he became a member of the collegium of the Ukrainian General Court. In the Hetman government he was head of the Council of Ministers and then minister of education (until 18 October), and in August 1918 he was also made president of the State Senate. As minister of education he encouraged the formation of the Ukrainian state universities in Kiev and Kamianets-Podilskyi and the establishment of the UAN (November 1918) and the National Library.

In 1920 he became a full member of the VUAN, and in 1921 he was made its head, although the appointment was not confirmed by the Soviet authorities. In 1922–9 he was head of the socioeconomic division of the VUAN, as well as head of the Commission for the Study of the History of Western-Ruthenian and Ukrainian Law and a member of the Archeographic Commission and the Ukrainian Historiographic Commission. In 1924 he was sentenced at a show trial to 10 years' imprisonment but was granted amnesty. In 1929 he was barred from holding directorial positions within the VUAN.

Vasylenko's scholarly work continued the work of O. Lazarevsky in the field of general Ukrainian history and Ukrainian legal history; he undertook studies of Left-Bank Ukraine and published a host of primary documents. By the time of the Revolution of 1917 Vasylenko had already contributed significantly to the literature of his field, with numerous articles in *Kievskaiia starina* and *Ukrainskaia zhizn'*, and in the Russian encyclopedia published by Brockhaus and Efron and *Ocherki po istorii Zapadnoi Rusi i Ukrainy* (Studies in the History of Western Rus' and Ukraine, 1916). Vasylenko published *Materialy dlia istorii ekonomicheskogo, iuridicheskogo i obshchestvennogo byta staroi Malorossii* (Materials for the Economic, Juridical, and Political Life of Old Little Russia, 3 vols, 1901–8) as well as studies on the holdings of Hadiache and Kiev regiments. His essays on such Ukrainian historians and scholars as O. Bodiansky, O. Levytsky, I. Kamanin, B. Kistiakovsky, I. Balinsky, and M. Semevsky (the editor of *Kievskaiia starina*) are valuable historiographical sources.

In the 1920s Vasylenko headed the group of scholars who formed the VUAN Commission for the Study of the History of Western-Ruthenian and Ukrainian Law, and was editor of seven volumes of its *Pratsi* (1925–30) and of six volumes of *Zapysky Sotsiial'no-ekonomichnoho viddilu*

VUAN (1923–7). The VUAN also published a number of his monographs, including *Pavlo Polubotok* (1925), *Iak skasovano Lytovs'koho statuta* (How the Lithuanian Statute Was Abolished, 1926), *O.M. Lazarevs'kyi* (1927), and *Terytoriia Ukraïny 17-oho viku* (The Territory of Ukraine in the 17th Century, 1927); *Zbirka materiialiv do istorii Livoberezhnoï Ukraïny ta ukrains'koho prava XVII-XVIII vv.* (A Collection of Materials for the History of Left-Bank Ukraine and Ukrainian Law in the 17th and 18th Centuries), in *Ukrains'kyi arkhieohrafichnyi zbirnyk*, vol 1, 1926, and as a separate publication; *Pravne polozhennia Chernihivshchyny za pol's'koi doby, 1618–1648'* (The Legal Status of the Chernihiv Region in the Polish Era, 1618–48), in *Chernihiv i pivnichne Livoberezhzhia* (1928); and *Materiialy do istorii ukrains'koho prava* (Materials in the History of Ukrainian Law, vol 1, 1929).

His scholarly works were harshly criticized by the Soviet historian S. Ivanytsky-Vasylenko in 1932, and Vasylenko was subsequently forbidden to publish his works.

L. Okinshevych, A. Zhukovsky

Onoprii Vasylenko

Vasylenko, Onoprii (pseud: Okhrim Varnak, Onysko Vasiuta), b 15 June 1861 in Kovrai, Zolotonosha county, Poltava gubernia, d 20 December 1921 in Zolotonosha. Writer and community figure. A career officer-bureaucrat in the tsarist engineering corps, he was posted in Sevastopil (1890–4), Symferopil (1894–1900), Warsaw (1900–2), Brest-Litovsk (1902–14), and Babruisk (1914–17). He began publishing poems, stories, and correspondence in *Zoria* and other Lviv periodicals in 1890. He dedicated a few poems to T. Shevchenko and wrote articles about him. In 1892 his accounts of his trip from Sevastopil to Zolotonosha appeared in the Chernivtsi paper *Bukovyna*. In 1893 he published *Musii Krynytsia*, a story about Kovrai peasants struggling to open a school. His story about the oppression of military service, *'Z pryntsyipa* (Out of Principle, *Literaturno-naukovyi vistnyk*, 1901), was well received by critics. During the Revolution of 1905 he disseminated antitsarist literature among the troops in Brest-Litovsk. There in 1907–8 he directed a soldiers' choir and actors' troupe, which staged Ukrainian plays. From 1904 to 1914 he played a key role in finding and restoring O. *Storozhenko's grave. He organized illegal commemorations of T. Shevchenko's centenary in Brest-Litovsk in 1914. In 1918 he returned home, and in 1920–1 he edited the Zolotonosha newspaper.

Vasylenko, Petro, b 17 October 1900 in Myhiia, Yelysavethrad county, Kherson gubernia. Mechanical engineer, specialist in agricultural machinery; corresponding member of the ANU (formerly AN URSR) since 1939. He studied at agricultural institutes in Luhanske and Kiev and from 1937 was a professor at the Kiev Agricultural Institute. He contributed to the theoretical and mathematical modeling of various agricultural machines and developed the equations for calculating the dynamics of such machinery.

Vasylenko, Petro (noms de guerre: Volosh, Poltavets, Hetmanets), b 1921 in Viitovtsi, Poltava gubernia, d 21 May 1946 in the Liubachiv region. UPA officer. After joining the UPA in 1944, he served initially as a political instructor and later as an OUN propaganda officer. He edited the periodical *Lisovyk* and wrote a collection of poetry, *Moi povstans'ki marshi* (My Insurgent Marches, 1946) and a collection of combat reports titled *U borot'bi za voliu pid boiovyimy praporamy UPA* (In the Struggle for Freedom under the Combat Flags of the UPA). He was killed in battle with the Polish army.

Vasylenko, Rostyslav, b 27 June 1920 in Kiev. Stage actor and director, reciter, and pedagogue. He completed study in the drama studio at the Kiev Ukrainian Drama Theater (1941) and then worked in the Poltava and Mykolaiv Ukrainian drama theaters (until 1944) and in the Ensemble of Ukrainian Actors in Germany (1946–9). He emigrated to Australia and became artistic director of the Ukrainian Theater of Small Forms in Adelaide (1949–50). In 1957 he moved to Canada.

Vasylenko, Viktor, b 12 February 1839 in Poltava gubernia, d ? Economist and ethnographer. He worked as a statistician in the Poltava zemstvo and the Poltava peasant land bank and collected statistical and ethnographic materials on Poltava gubernia. His articles on topics such as brotherhoods and guilds, folk meteorology, student residences, peasant markets, land leasing, games of peasant children, farming associations, and the 1785 register of Hadiache Regiment appeared in *Kievskaiia starina* and other journals and papers.

Vasylevska, Liudmyla. See Dniprova Chaika.

Vasylevska, Vanda. See Wasilewska, Wanda.

Vasylevsky, Radomyr [Vasylevs'kyj], b 27 September 1930 in Cheliabinsk, RSFSR. Cameraman and film director. He completed study at the State Institute of Cinema Arts in Moscow (1954) and has worked in the Kishinev Artistic Film Studio and, since 1955, the Odessa Artistic Film Studio. He has filmed or directed about 20 films. His children's film *Kvity dlia Oli* (Flowers for Olia) received a prize at the Republican Cinema Festival in Kiev (1976).

Vasylevsky, Serhii [Vasylevs'kyj, Serhij], b 21 March 1917 in Khotin, Sumy county, Kharkiv gubernia. Architect. After graduating from the Kharkiv Civil-Engineering Institute (1947) he worked in Zaporizhia and eventually became the city's chief architect. He designed the metallurgical tekhnikum in Zaporizhia (1954) and planned the reconstruction of the city center (1960). He also designed a

residential complex and park (1952) in Osypenko and a block of three-story residential buildings in Tokmak (1955).

Vasylevsky, Teofan [Vasylevs'kyj] (pseud: Sofron Krut), b ? , d 13 April 1915. Populist activist and publicist; husband of *Dniprova Chaika. As a student at Odessa University he belonged to the Odessa Hromada. Later he studied at Prague University but interrupted his studies to fight as a volunteer in the Hercegovinian uprising against Turkey in 1876 and to help M. Drahomanov publish *Hromada* in Geneva in 1877. He published several articles about the Balkan situation in Galician periodicals, such as *Molot*, *Pravda*, and *S'vit* (1878–81). In 1879 he returned to Ukraine and worked as a village scribe. From the 1880s on he was a zemstvo statistician in Kherson. A book about his experiences in the Balkans was published in Lviv in 1905 with a preface written by I. Franko. Vasylevsky committed suicide.

Vasyliiev, Vasyil [Vasyl'jev, Vasyil'], b 20 March 1890 in Yelysavethrad, Kherson gubernia, d 14 August 1956 in Kiev. Metallurgist; corresponding member of the AN URSS (now ANU) from 1939. He studied at the Kiev Polytechnical Institute and taught there from 1918. He worked at the All-Union Institute of Ferrous Metallurgy (1939–49) and the ANU Institute for Problems of Casting (from 1950). He was instrumental in the introduction of new chemically stable alloys and magnesium steels.

Vasyliiev, Vsevolod [Vasyl'jev], b 28 February 1935 in Voronezh, RSFSR. Scientist in the field of electronics and modeling; corresponding member of the ANU (formerly AN URSS) since 1981. He studied in Tahanrih and since 1981 has worked at the ANU Institute for Problems of Modeling in Energetics. He has made significant contributions in the field of modeling energy control systems, constructions, and so forth.

Vasyliieva, Antonina [Vasyl'jeva], b 27 December 1910 in St Petersburg. Ballerina and pedagogue. In 1930 she completed study at the Leningrad Choreography School (pupil of A. Vaganova). She was a soloist in the Kirov Ballet (1930–5), the Odessa Theater of Opera and Ballet (1935–7), and the Kiev Theater of Opera and Ballet (1937–56), and then worked as a teacher (1956–62) and as artistic director (1963–72) of the Kiev Choreography School.

Vasyliiev-Sviatoshenko, Matvii [Vasyl'jev-Svjatošenko, Matvij], b 30 August 1863 in Smolensk, Russia, d 14 February 1961 in Chernihiv. Conductor and composer. From 1882 he worked as conductor with the M. Kropyvnytsky, M. Sadovsky, and L. Sabinin theater troupes. With some interruptions he served in 1935–48 as music director of the Chernihiv Ukrainian Music and Drama Theater. His major works consist of music to classical Ukrainian plays, such as I. Kotliarevsky's *Natalka Poltavka* (Natalka from Poltava, 1882), H. Kvitka-Osnovianenko's *Shel'menko-denshchyk* (Shelmenko the Orderly, 1882), P. Myrny's *Lymerivna* (The Saddler's Daughter, 1884), I. Karpenko-Kary's *Beztalanna* (The Fortuneless Maiden, 1887), and M. Starytsky's *Tsyhanka Aza* (The Gypsy Aza, 1892). In the Soviet period he wrote music for some contemporary plays, including O. Korniiuchuk's *Pravda* (Truth, 1939) and *V stepakh Ukrainy* (On the Steppes of Ukraine, 1943).

Matvii Vasylev-Sviatoshenko

Osyp Vasyilkiv

Vasyliiv, Mykhailo [Vasyl'jiv, Myxajlo], b 1863 in Lebedyn, Kharkiv gubernia, d 10 May 1912. Ethnographer and engineer; member of the Ukrainian Scientific Society from 1909. A graduate of the St Petersburg Institute of Technology, he specialized in sugar refining and wrote over 50 works in the field. He also collected folklore and ethnographic materials. In the 1880s and 1890s he contributed articles on folk songs, folk theater, funeral rites, and folk beliefs to *Kievskaja starina* and *Etnograficheskoe obozrenie*.

Vasyliiv, Mykola [Vasyl'jiv], b 22 June 1901 in Kiev, d 19 March 1961 in Oberammergau, Germany. Economist and pedagogue; full member of the Shevchenko Scientific Society from 1947; son of Mykhailo *Vasyliiv. After graduating from the Kiev Institute of the National Economy (1922) and Kiev University (1924) he studied under K. Vobly at the VUAN. In 1930–41 he was an associate and academic secretary of the Kiev Scientific Research Institute of the Food Industry. A postwar émigré, he was a professor (from 1946) and rector of the *Ukrainian Free University in Munich. He wrote studies of the food industry in Ukraine, of the theory of value, and of the history of cooperatives in France.

Vasyliiv. A village (1969 pop 1,300) on the right bank of the Dniester River in Zastavna raion, Chernivtsi oblast. One of the oldest settlements in Bukovyna, it is mentioned in the Hypatian Chronicle under the year 1230. In medieval times it was a trading center on the route from Halych principality to the Black Sea. It declined after the Mongol invasion of 1240. In 1958–9 and 1967 archeologists uncovered the remains of a 12th- to 13th-century wooden church, a pagan temple, 12 stone sarcophagi, and many imported artifacts.

Vasyliiv. See Vasyilkiv.

Vasyliivka. VI-16. A city (1989 pop 17,200) on the Kakhivka Reservoir and a raion center in Zaporizhia oblast. It was founded by Cossacks and runaway serfs at the end of the 18th century. In 1957 it was granted city status. Today it has a shoe factory, an automotive repair plant, a metal-products factory, and a brick factory.

Vasylivka burial sites. Burial ground near Vasylivka, Synelnykove raion, Dnipropetrovske oblast, in use during the Mesolithic and Neolithic periods. Excavations in 1950 uncovered numerous Mesolithic burials covered in red ochre. Among the skeletal remains uncovered, arrowheads or spear tips were frequently encountered embedded in the bones. The most common grave goods recovered were pendants with deer or fish teeth and bone bracelets with geometric ornamentation.

Vasytkiv, Osyp [Vasyl'kiv] (pseud of Osyp Krilyk), b 22 July 1898 in Krakovets, Yavoriv county, Galicia, d ? Western Ukrainian Communist leader. As a law student at Lviv University he, together with R. Rozdolsky and R. Turiansky, was one of the founders and leaders of the 'Drahomanovite' International Revolutionary Social Democracy. In 1920 he and Rozdolsky organized communist circles among their fellow internees of the Ukrainian Galician Army in Czechoslovakia and established a Committee to Aid the Revolutionary Movement in Eastern Galicia in Prague and the Foreign Committee of the Communist Party of Eastern Galicia (KPSH) in Vienna. After returning to Lviv in late 1920, he became a KPSH CC secretary and a leader of its partisan movement opposed to the Polish occupation of Galicia. From 1921 he was a prominent 'secessionist' who advocated a KPSH independent of the Communist Workers' Party of Poland (KPRP). He was a principal defendant in the *Saint George Trial of 39 Communists in Lviv. From 1923 he was a CC secretary of the *Communist Party of Western Ukraine (KPZU) and a member of the CC KPRP. In 1927 he became a KPRP Politburo member and the KPZU representative to the Polish section of the Comintern. Vasytkiv headed the national-communist majority faction in the KPZU (popularly known as the Vasytkivtsi) that supported the policies and views of O. *Shumsky. Consequently he was expelled from the Stalinist-dominated Comintern in 1928. In 1932, after emerging from a Polish prison (arrested in 1929), he emigrated with his family to Soviet Ukraine and worked for the Chief Administration of Literary Affairs and Publishing in Kharkiv. In May 1933 he was arrested. He was last seen in 1938, in a concentration camp in Karelia.

R. Senkus

Vasytkiv [Vasyl'kiv]. III-11. A city (1989 pop 35,700) on the Stuhna River and a raion center in Kiev oblast. According to the chronicles it was founded in 988 by Volodymyr the Great – who, it is believed, was christened there – and was named Vasytkiv after his new Christian name. In the 11th century a fort was built there, and the town became an important defense and trade center. In 1240 it was destroyed by the Mongols, and declined to village size. In 1648 Vasytkiv became a company center of Kiev regiment. In 1796 it was promoted to city status and made a county center of Kiev gubernia. In 1825 the local units of the Cherkasy regiment took part in the Decembrist revolt. By the mid-19th century the town was an active manufacturing and trading center with a population of 11,000. Today it is an industrial city with a refrigerator plant, an electric-appliance factory, and a leather factory. Its architectural monuments include the baroque ss Anthony and Theodosius Church and bell tower (1756–9) and St Nicholas's Church (1792).

Vasytkiv Board. See Southern Society.

St Nicholas's Church (1792) in Vasytkiv

Vasytkivka [Vasyl'kivka]. V-17. A town smt (1988 pop 12,500) on the Vovcha River and a raion center in Dnipropetrovske oblast. It was founded in the 18th century as a winter settlement of the Zaporozhian Cossacks. In the 19th century it was a farming village in Pavlohrad county, Katerynoslav gubernia. Today the town is an agricultural center with a cheese and a canning factory.

Vasytkivsky, Serhii [Vasyl'kivs'kyj, Serhij], b 19 October 1854 in Izium, Kharkiv gubernia, d 7 October 1917 in Kharkiv. Painter and art scholar. He studied at the St Petersburg Academy of Arts (1876–85) and in France (1886–8). He also painted in Italy, Spain, northern Africa, and Britain. After settling in Kharkiv in 1888, he was active in Ukrainian artistic circles and headed the architectural and art society there. He produced over 3,000 realist and impressionist works. They include a few portraits; historical paintings, such as *Zaporozhian Skirmish with Tatars* (1892), *Cossacks in the Steppe* (1915), and *Cossack Campaign* (1917); genre paintings, such as *Cossack and Girl* (1894) and *Market in Poltava* (1902); and many landscapes, such as *Cossack Meadow* (1893), *Dnieper Floodplains* (1896), and *Along the Donets* (1901). In 1901–8 Vasytkivsky painted murals and ornamental wall panels for the Poltava Zemstvo Building, which perished in the Second World War; they included *The Chumak Romodan Route*, *The Cossack Holota*, and *The Election of Colonel Martyn Pushkar*. He copublished, with M. *Samokysh, an album of Ukrainian folk ornamental motifs (1912), for which he painted over 100 designs, and

Serhii Vasylykivsky: *Rendezvous* (oil, 1894)

an album on Ukrainian antiquity (1900, text by D. Yavornytsky), for which he did 27 historical portraits. Albums of Vasylykivsky's works were published in 1970 and 1987, and books about him have been written by O. Nikolaiev (1927), K. Slipko-Moskaltsev (1930), M. Bezkhutry (1954, 1967), and I. Ohievskaya (1980).

Mykola Vasylyko

Vasylykivsky

Vasylyko, Mykola [Vasyl'ko], b 21 March 1868 in Chernivtsi, Bukovyna, d 2 August 1924 in Bad Reichenhall, Germany. Diplomat, parliamentarian, and Bukovynian civic figure. He belonged to the Vasylyko family line of nobility in Bukovyna. He studied at the Theresianum in Vienna. He was chosen mayor of Lukavets, in Vyzhnytsia county, Bukovyna, and then elected to the Bukovynian diet and the Austrian parliament (1898–1918). Together with Rumanian (A. Onciul), Jewish (B. Straucher), and Armenian (S. Stefanowicz) politicians he formed the Free-thinking Union, which assisted Ukrainians in making gains in the administrative, cultural, and church realms. Some of those included the recalling of the unpopular president of Bukovyna, F. Bourignon (1903), the founding of a Ukrainian gymnasium in Vyzhnytsia (1908), and the division of the Bukovynian metropolity into Ukrainian and Rumanian parts (1916). He organized a Hutsul-Bukovynian Kurin (1915–16) as an Austrian volunteer unit, founded and served as deputy leader of the General

Ukrainian Council in Vienna (1915), and served in the Ukrainian National Rada in Lviv (1918). In the Austrian parliament he was deputy leader of the Ukrainian Club and a noted defender of Ukrainian rights. He addressed issues such as changes in voter registration (1901), the opening of a Ukrainian university in Lviv (1901), and the peasant strikes of 1902. He was an active foe of Russophilism and of the Rumanianization of Bukovyna. He was a proponent of the so-called Austro-Ukrainian scheme, which provided for (in the event of a victory by the Central Powers in the First World War) the addition of Volhynia and Podilia to Galicia and Bukovyna to form a revived Galician-Volhynian state as an autonomous territory within Austria-Hungary. During the First World War Vasylyko assisted refugees from Bukovyna and Galicia who were interned in Austria and rescued many Ukrainians from the *Thalerhof camp. Through diplomatic efforts and by direct participation he contributed to the signing of the Treaty of *Brest-Litovsk (9 February 1918) between Ukraine and the Central Powers. He was diplomatic representative of the ZUNR government in Austria (1918–19) and ambassador of the UNR in Switzerland and Germany (1919–24). A collection of his speeches titled *Posol's'ka diial'nist' v Derzhavni Radi i v Kraievim Soimi v rokakh 1901–3* (Deputy Activity in the State Council and the Provincial Diet in 1901–3) came out in 1904.

A. Zhukovsky

Vasylyko, Vasylykivsky [Vasyl'ko, Vasyl'] (real name: Miliayev), b 7 April 1893 in Burty, Cherkasy county, Kiev gubernia, d 18 March 1972 in Odessa. Theatrical director and actor. He began his stage career in Sadovsky's Theater (1912) and then performed in Molodyi Teatr (1916–19), Kyidramte (1920–1), and *Berezil (1922–6). In 1929–32 he lectured at the Kharkiv Music and Drama Institute. He was artistic director of the Odessa Ukrainian Music and Drama Theater (1926–8, 1938–41, and 1948–56), the Kharkiv Chervonozavodskyi Ukrainian Drama Theater (1928–33), and theaters in Donetske (1933–8) and Chernivtsi (1944–8). Vasylyko debuted as a director in Berezil in 1925, with *Za dvoima zaitsiamy* (After Two Hares, based on M. Starytsky). He also staged I. Kocherha's *Marko v pekli* (Marko in Hell, 1928), W. Shakespeare's *Macbeth* (1938), and his own adaptations of O. Kobylanska's *Zemlia* (The Land, 1947) and *U nedilii rano zillia kopala* (On Sunday Morn She Gathered Herbs, 1955). As a character actor he appeared in varied roles, from H. Kvitka-Osnovianenko's Shelmenko to Shakespeare's Banquo. Vasylyko helped initiate the Kiev Museum of Theater Arts. A biography, by P. Kravchuk, was published in Kiev in 1980, and his memoirs were published in 1984.

Vasylyko Romanovych [Vasyl'ko Romanovych], b 1199, d 1271. Rus' prince; son of Roman Mstyslavych. After the death of his father (1205) he and his mother and brother, Danylo, were exiled to Poland. Taking advantage of the power struggles involving Galician boyars, Hungarians, and Poles, the brothers undertook the process of reclaiming the Principality of Galicia-Volhynia. In 1227 Vasylyko was granted rule over Lutske, Peresopnytsia, and Brest by Danylo, and in 1238 he received western Volhynia as his realm, including the capital, Volodymyr. He was forced to acknowledge Tatar suzerainty after the Tatars' invasion of Rus', although he continued to rule largely unimpeded. In

1259 he was ordered to burn all his fortifications except Kholm. After Danylo's death in 1264 Vasylo became the eldest representative of the Romanovych dynasty and the de facto ruler of all Galicia-Volhynia.

Vasylo Rostyslavych [Vasyl'ko Rostyslavyč], b ?, d 28 February 1124. Rus' prince; son of Rostyslav Volodymyrovych. He and his brothers, Volodar and Riuryk, are regarded as the cofounders of Halych principality. They formed a loose alliance with Byzantium and the Cumans in order to maintain their independence from the grand prince of Kiev to the east and from Hungary and Poland to the west. Vasylo became the prince of Terebovlia in 1092. He was blinded by *Davyd Ihorevych in Zvenyhorod (other sources say in Bilhorod) in 1097 after the Liubech congress of princes. The instigator of the assault, the Kievan prince *Sviatopolk II Iziaslavych, then invaded Volhynia (1100) but was unable to seize power in the Rostyslavych realm. Vasylo was defended by Volodymyr Monomakh and Davyd and Oleh Sviatoslavych, and ruled Terebovlia until he died. He probably founded the town of Vasyliv at the confluence of the Seret and the Dniester rivers.

Bishop Pavlo Vasylyk

Evstakhii Vasylyshyn

Vasylyk, Pavlo, b 8 August 1926 in Boryslavka, Pere-myshl county, Galicia. Ukrainian Catholic bishop. He was tutored in theology by V. Pynyla and I. Hotra. After being arrested in 1947, he was held in a number of concentration camps in Central Asia. He was ordained a deacon in 1950 in Kazakhstan. Upon his release in 1956 he settled in Buchach, Ternopil oblast, where he was ordained a priest of the underground Ukrainian Catholic church by Bishop M. Charnetsky. He was rearrested in January 1959 and imprisoned in Mordovia until 1964. In 1974 he was consecrated assistant bishop of Ivano-Frankivske eparchy by Bishop Y. Fedoryk. Following the policies of perestroika and new religious tolerance, he was the first Ukrainian Catholic bishop openly to proclaim his status; he emerged from the underground in August 1987.

Vasylykha. A folk dance for girls performed in a circle with one or two people in the middle. The *vasylykha* is a slow dance which begins in 3/4 time and increases in tempo to 2/4 time. It originated in the Kiev region.

Vasylyshyn, Evstakhii [Vasylyšyn, Evstaxij], b 24 December 1897 in Ternopil, Galicia, d 29 June 1974 in Winnipeg. Community leader in Canada. He joined the Ukrainian Sich Riflemen in 1918 and was wounded in the battle for Lviv. After the war he was a member of the Ukrainian Military Organization. Having emigrated to Canada in 1924, he became a founder and president (1928–30, 1945–7, 1950–2) of the *Ukrainian War Veterans' Association of Canada. He was also a founder of the Ukrainian Canadian Committee (now Congress) and the Ukrainian Cultural and Educational Centre in Winnipeg. As director (1949–50) of the European office of the Ukrainian Canadian Relief Fund, he helped to resettle many Ukrainian war refugees in Canada.

Antin Vasynchuk

Pavlo Vasynchuk

Vasynchuk, Antin [Vasyn'čuk] (Vasylichuk), b 1885 in Kholm, d 13 May 1935 in Kholm. Agronomist and civic and political leader; brother of P. *Vasynchuk. In the revolutionary period he was a member of the Central Rada and the UNR government's director of repatriation for the displaced inhabitants of the Kholm and Podlachia regions. He was a founder and president of the Ridna Khata society (1920) and copublisher of the weekly *Nashe zhyttia* (1921–8) in Kholm. He also set up Ukrainian co-operatives. In 1922 he was elected to the Polish Sejm, where he presided over the Ukrainian caucus (1922–4).

Vasynchuk, Pavlo [Vasyn'čuk] (Vasylichuk), b 2 August 1893 in Kholm, d 1944 in Kholm. Lawyer, economist, and civic and political leader; brother of A. *Vasynchuk. A graduate of the Kiev Commercial School and the law faculty of Kiev University, he participated in the revolutionary events in Kiev in 1917 and worked as director of the press office of the UNR Ministry of Food Supplies. At the beginning of 1918 he represented the UNR government on the international repatriation commission in Kovel. After returning to Kholm he copublished *Nashe zhyttia* with his brother and in 1920 was arrested with him for bringing out its eighth issue. In 1922 and 1928 he was elected to the Polish Sejm. He was a founder and the first president of the *Sel-Soiuz party (1924). A convinced socialist who opposed communism, he did not support Sel-Souiz's merger into *Sel-Rob. Breaking ranks with the latter group in December 1926, he reconstituted Sel-Soiuz and established *Selians'kyi shliakh as its organ. In 1944 he acted as a repre-

sentative of the UNR government-in-exile and as the Ukrainian liaison of the clandestine Polish home government. He was murdered by the Polish underground.

Vatchenko, Oleksii [Vatčenko, Oleksij], b 25 February 1914 in Yelyzaveto-Kamianka, Katerynoslav gubernia, d 22 November 1984 in Kiev. Stalinist CPU and government leader. A graduate of Dnipropetrovske University (1938), he worked as a teacher and then an education official in Dnipropetrovske. In the 1950s he rose through the Party hierarchy to the positions of first secretary of Khmelnytskyi (1959–63), rural Dnipropetrovske (1963–4), Cherkasy (1964–5), and Dnipropetrovske (1965–7) oblast Party committees; member of the CC CPU (1960–84) and its Politburo (1966–84); and CC CPSU candidate (1961–6) and member (1966–84). He served as president of the Ukrainian and a vice-president of the USSR supreme soviets (1976–84). A protégé of L. Brezhnev and a close associate of V. Shcherbytsky, in 1968 he initiated the Party campaign to ban O. Honchar's novel *Sobor* (The Cathedral), and in 1971–2 he helped engineer the downfall of CPU first secretary P. Shelest, whose policies he opposed.

Pope John Paul II and Cardinal Myroslav Liubachivsky paying their respects to the late Cardinal Yosyf Slipy

Vatican. A city-state in Rome and the center of the Catholic church. It was recognized as an independent state under the terms of the Lateran Treaty of 1929 between the Italian government and the Holy See. It covers a territory of approx 0.4 sq km and includes St Peter's Basilica, the papal palaces, the Vatican Library, Vatican Radio, a number of other buildings, and properties outside the city (eg, Castel Gandolfo, the pope's summer residence).

According to tradition, ties between the papacy and Ukrainian territory date from the 1st century, when the Roman emperor Trajan exiled *St Clement I to Crimea. Clement died a martyr in Chersonese Taurica, and some of his relics were reputedly taken to Kiev and deposited in the Church of the Tithes. After the adoption of Christianity in Kievan Rus', Popes John XV (988 and 991) and Sylvester II (1000) sent emissaries to Kiev, and Prince Volodymyr the Great sent representatives to Rome (991 and 1001). Bruno von Querfurt, while traveling on a mission to the Pechenegs ca 1006, visited Volodymyr in Kiev. Prince Iziaslav Yaroslavych sent his son Yaropolk to Rome in 1075 to enlist the help of Pope Gregory VII in his fight for control of Kiev. G. da Pian del Carpini headed a mission

from Pope Innocent IV to the Mongols in 1245–7 and began negotiations with Princes Danylo and Vasylo Romanovych that led to the 1253 coronation of Danylo by an apostolic delegate. In the 15th century the Kievan metropolitan *Isidore lived in Rome, and Yu. *Drohobych published *Judicium prenosticon Magistri Georgii Drogobicz de Russia*, the first book written by a Ukrainian, there in 1483. It contained a dedication to Pope Sixtus IV.

A new era in Ukrainian relations with the Vatican began in 1595, when several Ukrainian and Belarusian bishops wrote to the Holy See to initiate the Church Union of *Berestia. Since then there has been close contact between the Ruthenian or Ukrainian Catholic church and the Vatican. Many bishops and metropolitans (eg, Y. Rutsky, R. Korsak, M. Terletsky, Ya. Susha) traveled regularly to Rome, which served as the legal center of the Halych metropolity following the destruction of the Catholic church in Ukraine in 1946. The Ukrainian Catholic church has been formally represented at the Vatican since 1626 by a procurator of the Kievan metropolitan and Basilian order, who was based at the Church of ss Sergius and Bacchus from 1639 to 1880. Beginning with I. Morokhovsky (1596) and Y. Rutsky (1599), many Ukrainians attended St Athanasius Greek College, founded in the mid-16th century to train Eastern rite theologians. Over 50 Ukrainian Basilian theologians were educated in the international college of the Congregation for the Propagation of the Faith, which was responsible for the affairs of the Uniate church from 1622 until the creation of the *Congregation for Eastern Churches in 1917. From 1845 Ukrainian Catholic priests were trained at the Greek College, which was called the Greek-Ruthenian College until 1897, when Pope Leo XIII sanctioned the establishment of *St Josaphat's Ukrainian Pontifical College. The college was based near the Church of ss Sergius and Bacchus until 1932, when Pope Pius XI had a new building constructed outside the Vatican, and the original premises became a study center for the Basilian order. In the 1960s the building came to house the parish offices and a museum of Ukrainian art.

In addition to these older bodies, several other institutions of the Ukrainian Catholic church were moved to the Vatican after the liquidation of the church in Ukraine, or established there or near there since then. These include the headquarters of the Sisters Servants of Mary Immaculate and of the Basilian order of nuns, the Ukrainian Minor Pontifical Seminary, the Studite Monastery in Castel Gandolfo, the *Ukrainian Catholic University, and St Sophia's Church. Important Ukrainian church figures (or their relics) are buried at the Vatican, including St Yosafat Kuntsevych (in St Peter's Basilica), R. Korsak (in ss Sergius and Bacchus Church), and Y. Sembratovych (in the crypt of St Sophia's Church).

The Vatican library and archives contain many documents and monuments relating to Ukraine. These include papal correspondence concerning Ukrainian affairs, beginning with letters from Pope Gregory VII to Prince Iziaslav Yaroslavych from 1075. There are also many reports and documents from papal nuncios in Poland and elsewhere who were charged with gathering information for the Vatican. The archives of the congregations for the Propagation of the Faith and the Eastern Churches are especially rich in these materials, as are the holdings of the Greek College and the various monastic orders or congregations. Many of the first works dealing with Ukrainian

church history to be published abroad (eg, biographies of Y. Kuntsevych [1643] and Ya. Susha [1665] and I. Kulchytsky's outline history of the Ukrainian Catholic church [1733–4]) were published at the Vatican, and major series of Vatican documents pertaining to Ukraine were initiated in the 19th century and especially in the interwar period. These resources and the other notable structures at the Vatican have attracted Ukrainian scholars and artists, and other Ukrainians, since the 18th century.

The Vatican has been the site of several conclaves of Ukrainian bishops (held in 1929, 1932, 1955, and regularly since the late 1960s), and since 1946 the apostolic visitor for Ukrainians in Western Europe has been based there.

Vatican-Ukrainian diplomatic relations. The Vatican maintains diplomatic relations with various states (currently 132). In November 1918, after the dissolution of the Austro-Hungarian Empire, Pope Benedict XV issued a directive calling for the establishment of friendly relations with all the nations of the empire (including Ukraine) that had formed independent states. Prior to that, in April 1918, he had sent A. Ratti as an apostolic visitor to Poland and Lithuania to study Ukrainian affairs. Relations were maintained through the apostolic delegates in Constantinople, Washington, and Rome before M. Tyshkevych arrived in February 1919 and was formally accredited as a consul to the Holy See from Ukraine (he had been sent by the Directory government). He was succeeded by Rev F. Bonne; P. Karmansky represented the Western Ukrainian National Republic. In 1920 Ratti was succeeded by G. Genocchi as apostolic visitor to Ukraine. He was never permitted to visit Soviet Ukraine, and carried out his duties from Poland. After the consolidation of Soviet power in eastern Ukraine and the conclusion of the 1925 concordat with Poland, which implicitly recognized Polish control over Western Ukrainian territories, the Vatican cut off formal diplomatic relations with Ukraine until Ukraine's renewed independence in 1991. Archbishop A. Franco became the first papal nuncio to Ukraine in 1992. (See also *Italy, *Ukrainian Catholic church, and *Church, history of the Ukrainian.)

Vatra. The name of several Ukrainian student organizations. The most renowned Vatra student society was formed in Lviv in 1892. It merged with the socialist *Academic Brotherhood in 1896 and formed the *Academic Hromada. A group of Ukrainian students studying mining engineering in Příbram (Czechoslovakia) named themselves the Vatra society in 1898–1914, as did a group of students of veterinary medicine in Lviv in 1926–39.

Vatra (Bonfire). A publishing house of the Plast scouting organization in Transcarpathia, founded in Uzhhorod by L. Bachynsky. In the years 1924–9 it issued 25 booklets, with a combined pressrun of 38,000 copies. Among them were several plays by S. Cherkasenko, Plast handbooks by Bachynsky, and translations of stories by E.T. Seton and S.

Lagerlöf. Vatra closed down after Bachynsky was expelled from Czechoslovakia.

Vatra (1887)

Vatra (Bonfire). A literary miscellany published in Stryi in 1887 and edited by V. Lukych to commemorate the 25th anniversary of T. Shevchenko's death and 25 years of Yu. Fedkovych's literary career. Published therein were original contributions and some reprints: stories by D. Mordovets, P. Myrny, I. Franko and V. Luchakovsky; poems by O. Psol, O. Konysky, S. Rudansky, V. Samiilenko, P. Kulish, M. Starytsky, V. Kotsovsky, U. Kravchenko, S. Vorobkevych, and Fedkovych; biographical sketches of Konysky by V. Hrechulevych, P. Ohiiievsky-Okhotsky, O. Shyshatsky-Illich, P. Morachevsky, P. Kuzmenko, and A. Svydnytsky; Mordovets's autobiography; articles by M. Drahomanov (on an old verse about the destruction of Hell by Christ), O. Barvinsky (on the lives and works of Shevchenko and Fedkovych), M. Kostomarov (on the destruction of Baturyn), D. Lepky (on folk beliefs about domestic animals), Konysky (on archives in Ukraine), M. Sumtsov (on Ukrainian surnames), and V. Lukych (on Hungarian-ruled Ruthenia); book reviews (O. Ohonovsky on a novel by Konysky; Franko on Mordovets's writings); and several pages of literary and historical notes by V. Lukych.

Vatulia, Oleksii [Vatulja, Oleksij], b 14 August 1891 in Trubaitsi, near Khorol, Poltava gubernia, d 20 May 1955 in Kiev. Stage and film actor. He completed study at the Ly-

Oleksii Vatulia

senko Music and Drama School in Kiev (1916) and then played in Molodyi Teatr (1917–19) and was one of the founders and a leading actor of the Kiev Ukrainian Drama Theater (1920–55, except 1927–8, when he worked in the Kharkiv Chervonozavodskiyi Ukrainian Drama Theater). His repertoire ranged from roles in ethnographic plays to the title roles in Sophocles' *Oedipus Rex* and E. Toller's *Hinkemann*. He acted in the films *Kira Kiralina* (1928) and *Neskoreni* (The Undefeated, 1945) and was well known as a reciter, particularly of T. Shevchenko's poetry.

Vatutine or **Vatutyne**. IV-12. A city (1989 pop 20,700) on the Shpolka River in Zvenyhorodka raion, Cherkasy oblast. It was founded in 1946 as the workers' settlement Shakhtynske, was renamed in 1949, and was granted city status in 1952. It is an industrial center with lignite, granite, and kaolin mines, a briquette factory, and a refractory-materials plant.

Nikolai Vavilov

Rev Mykhailo Vavryk

Vavilov, Nikolai, b 25 November 1887 in Moscow, d 26 January 1943 in Saratov, Russia. Russian geneticist; full member of the AN URSS (now ANU), the USSR Academy of Sciences, and the All-Union Academy of Agricultural Sciences (VASKhNIL) from 1929. He is considered to be the Soviet Union's most prominent plant breeder and is referred to as the 'Mendeleev of biology.' A graduate of the Moscow Agricultural Institute (1911), he taught at Saratov University (1917–21) and directed the All-Union Institute of Plant Cultivation (1924–40). He rose to prominence during the period of collectivization and was the founder and first director of VASKhNIL. In 1935 T. *Lysenko's attack on genetics as a bourgeois, capitalist, and idealist science useless to agriculture led to Vavilov's demotion to vice-president of VASKhNIL. Vavilov was harassed, and openly broke with Lysenko in 1939. He was arrested in August 1940 while on a collecting expedition in Western Ukraine and was found guilty of espionage and sabotaging Soviet agriculture. His death sentence was commuted, but he died of malnutrition in a Saratov prison. In 1955 he was posthumously rehabilitated, and in recent years he was portrayed as a hero in Soviet publications.

Vavryk, Mykhailo (Wawryk), b 16 December 1908 in Laskivtsi, Terebovlia county, Galicia, d 1 March 1984 in Hawthorne, New York. Basilian priest and scholar; full

member of the Shevchenko Scientific Society from 1961. He completed his term in the novitiate at the Krekhiv Monastery and studied at the Pontifical Oriental Institute (1934–7) and the Pontifical Institute of Christian Archaeology (1937–9) in Rome. He served as vice-rector of *St Josaphat's Ukrainian Pontifical College (1938–48), director of the Ukrainian program on Vatican Radio (1939–42), and a chaplain for the interned members of the Division Galizien after the war. In 1948–60 he taught theology and did missionary work in North America. He then returned to Rome to become chaplain of St Josaphat's College and then general consultor of the Basilian order (1963–76). Vavryk was a specialist on the history of the Ukrainian church and of the Basilian order. His publications include *Po vasyliians'kykh monastyriakh* (At Basilian Monasteries, 1958); *Narys rozvytku i stanu vasyliians'koho chynnu XVII–XX st.* (A Survey of the Development and Status of the Basilian Order of the 17th–20th Centuries, 1979); and articles in *Analecta Ordinis S. Basilii Magni / Zapysky ChSVV* (which he also helped edit), the *Encyclopedia of Ukraine*, and elsewhere.

Vazhynsky, Porfyrii [Važyns'kyj, Porfyrij] (Skarbek-Vazhynsky), b 5 August 1732 in Ashmiany, near Vilnius, d 9 March 1804 in Kholm. Uniate bishop. He studied in Rome before becoming a professor of philosophy in Polatsk and then rector of Basilian schools in Buchach and Volodymyr-Volynskiyi. He was protoarchimandrite of the order in 1772–80 and 1788–89, and was consecrated bishop of Kholm in 1789. As bishop he was active in the efforts to revive Halych metropolity.

VChK. See Cheka.

Vdovychenko, Maksym [Vdovyčenko] (pseud of Maksym Havryliuk), b 4 May 1876 in Zozivka, Lypovets county, Kiev gubernia, d 2 January 1928 in Aubun-la-Tiche, France. Poet and translator. He contributed to *Literaturno-naukovyj vistnyk* (1900–10), *Maiak* (1913), and *Rada* (1913, under the pseud Syvy). His collection *Na khvyl'nykh smutku* (On the Waves of Sorrow) was published in Kiev in 1911.

Vecherniaia Odessa (Evening Odessa). A Russian-language organ of the Odessa City Council and, until 1992, the city Party committee, published six days a week since July 1973. In 1980 the newspaper appeared in a pressrun of 123,000.

Vechernii Donetsk (Evening Donetske). A Russian-language organ of the Donetske City Council and, until 1992, the city Party committee, published six days a week since July 1973. In 1980 the newspaper appeared in a pressrun of 230,000.

Vechernytsi (aka *vechornytsi*, *dosvitky*, *priadky*, *popriakhy*, *odenky*). Evening or night gatherings of young men and women, usually at the home of a childless widow, an *otamansha*, who was responsible for keeping moral standards and order on such occasions. The girls paid her for use of the house's fuel and food and sometimes for her labor. The *vechernytsi* season lasted from the end of the fieldwork in the fall until Lent. There were two types of gatherings: working *vechernytsi*, at which the young women

Vechernytsi (oil, 1881) by Ilya Repin

spun or embroidered, and recreational *vechernytsi*, with music and dancing. The latter gatherings usually took place just before or during a holiday. *Vechernytsi* often began with work and ended with eating, games, singing, and dancing. In some localities the young men and women stayed all night, sleeping in pairs on the straw-covered floor. The chief purpose of the *vechernytsi* was to enable the participants to work in a group and to enable young people who lived in remote parts of the village or on distant farmsteads to become acquainted with each other. During the work the participants told stories and anecdotes, shared the latest news, sang songs, and told fortunes. Most courtships, leading eventually to marriage, began at such gatherings. For this reason the community tolerated a certain amount of sexual freedom at *vechernytsi*. The church, however, regarded them as sinful and opposed them. When factory products made home production, particularly spinning, obsolete, the *vechernytsi* lost their work-related function and became simply recreational. During the Soviet period they virtually disappeared and were replaced by dances in the village clubs or buildings of culture. The *vechernytsi* are frequently described in Ukrainian literature and staged in theater.

M. Mushynka

Vechernytsi (Evening Get-togethers). A Ukrainophile literary weekly 'for amusement and learning.' It was edited and published in the vernacular by F. *Zarevych in Lviv from 1 February 1862 to 2 May 1863 (59 eight-page issues). With the 35th issue V. *Shashkevych became the main collaborator, and he edited the last nine issues. Published therein were poems, stories, literary and publicistic articles, historical articles, editorials, notes, and correspondence, and dictionary materials by V. Shashkevych, I. Verkhratsky, and others. Works by writers from Russian-ruled Ukraine were taken (and translated, if necessary) from *Osnova* (St Petersburg) and other sources. The magazine had 600 subscribers.

Vechirnia hodyna (Evening Hour). A monthly popular literary magazine published in Cracow from November 1942 to 1944 by the Ukrainske Vydavnytstvo publishing house in a pressrun of up to 15,000 copies. The editors were S. Hordynsky and V. Chaplenko.

Vechirnii Kharkiv (Evening Kharkiv). An organ of the Kharkiv City Council and, until 1992, the city Party com-

mittee, published six days a week since 1969. Its pressrun increased from 100,000 in 1970 to 158,000 in 1979. In 1980, however, probably as a result of official restrictions imposed on the growth of the Ukrainian-language press, its run was reduced to 84,000.

Vechirnii Kyiv

Vechirnii Kyiv (Evening Kiev). A former organ of the Kiev City Council and the city Party committee, published six days a week since 1951. It succeeded the Russian-language *Vechirniy Kiev* (1927–30) and the Ukrainian-language *Bil'shovyk* (1932–9). *Vechirnii Kyiv* has been one of the most widely read newspapers in Ukraine. Its pressrun increased from 100,000 in 1960 to 367,000 in 1975. In the late 1970s, however, as a result of the official imposition of restrictions on the growth of the Ukrainian-language press and policy of Russification, its pressrun was reduced, to 200,000 by 1980. In 1983 a parallel Russian-language edition was established with an initial pressrun of 47,000, and the pressrun of the Ukrainian edition was reduced to 188,500. By 1989, only 130,000 copies of the Ukrainian edition were being printed, while the pressrun of the Russian edition was 330,000. Since 1990 it has been an independent commercial paper edited by V. Karpenko, a member of the Ukrainian Supreme Council. In 1991 the pressrun was 500,000, and subscriptions to the Ukrainian edition increased to 300,000.

Vedel, Artem [Vedel'] (born Vedelsky), b 13 April 1767 in Kiev, d 26 July 1808 in Kiev. Composer, conductor, singer (tenor), and teacher. After studying at the Kievan Academy he went to Moscow in 1787 to conduct the choir of Governor-General P. Yeropkin. In 1792 he returned to Kiev to conduct General A. Levanidov's private choir and in 1796 accompanied Levanidov to Kharkiv to conduct the collegium choir there. This period (1792–8) saw the height of Vedel's musical creativity. In 1798 Levanidov was removed from his post by Paul I, leaving Vedel without a benefactor. He returned to Kiev in search of a choir posting and even contemplated joining a monastery to achieve this end. Instead he was banished to a mental asylum in 1799 after church authorities attributed to him some irreverent marginal notes scribbled in a religious book. The incarceration ended Vedel's creative work and led to his premature death.

Vedel, whose musical legacy consists entirely of church

music for choir a cappella, is considered the chief representative of the Cossack baroque style in Ukrainian music. More than 80 of his compositions have been identified, including sacred concertos, one liturgy, one all-night vigil, works in honor of the Virgin Mary and the Nativity, and paschal hours. Vedel's most popular works are his concerto *On the Rivers of Babylon* and his trio *Open the Gates of Repentance*. A selection of his compositions is included in I. Sonevytsky's anthology, *Sacred Choral Music a Cappella of A. Vedel* (New York 1990).

I. Sonevytsky

Vedmitsky, Oleksander [Vedmic'kyj] (pseud: Meteor, Ol. Meteor, O. Sashko), b 22 December 1894 in Pryluka, Poltava gubernia, d 18 October 1963 in Orsk, Siberia. Writer. A teacher from 1913, he graduated from the Poltava Teachers' Institute in 1918. In 1924 he took up journalism and joined the peasant writers' group Pluh. Later he was an associate of the Taras Shevchenko Scientific Research Institute (Kharkiv), where he completed his graduate studies in 1932. He began publishing in a Pryluka newspaper in 1917. His poems, humorous sketches, stories, literary criticism, and scholarly articles appeared in Soviet Ukrainian periodicals from 1924 to 1933. Published separately were his poetry collections *Pid zahravoiu povstan'* (Under Red Skies of Insurrections, 1923), *V oreoli: Ahitkartyny* (In the Halo: Agitpictures, 1924), *Shumyt' topolia* (The Poplar Rustles, 1927), *Pokosy* (Hay Gatherings, 1929), and *Vuhil'* (Coal, 1931); the feuilleton collection *Z lykhtarem po selakh* (Around Villages with a Lantern, 1925); the humor book *Ahitatory* (Agitators, 1927); the story collection *Khalabuda i strybnunets'* (The Hut and the Jumper, 1930); and studies of the Literary Discussion of 1925-8 (1932) and Soviet literature in the period of socialist reconstruction (1932). He became a literature docent in 1934, headed the department of literature at the Orsk Pedagogical Institute in the 1950s, and published a Russian book on T. Shevchenko's exile in Orenburg (Orenburg 1960).

Vegetable farming (*horodnytstvo*). A branch of agriculture involved in the growing of vegetables. It is labor-intensive and consequently employs many field-workers. It forms a basis for the development of the vegetable-processing industry (canning and freezing).

The vegetables grown in Ukraine belong to various botanical families domesticated in different parts of the world and brought to Ukraine by many routes. The most widespread in Ukraine (1981) are tomato (24.4 percent), cabbage (19.2 percent), cucumber (17 percent), red beet and carrot (11.9 percent), and onion, all of which together occupy over 80 percent of the area sown to all vegetables (491,000 ha). Potatoes, which form a separate category not included among vegetables in agricultural statistics, occupy a considerably larger area (1,653,000 ha in 1981). Less widespread vegetables in Ukraine are radishes, turnips, swedes, celery, pepper, garlic, horseradish, brussels sprouts, kohlrabi, eggplant, asparagus, and squash. Garden herbs, seeds, and spices are considered a category of vegetables. The more common ones in Ukraine are

poppy, dill, caraway, origanum, anise, and fennel. Garden-grown legumes (pulses, lentils, beans, and green peas), sweet corn, and gourds (melons, watermelons, and pumpkins) are generally included, but field-grown legumes, gourds, and corn (generally used for feed) are considered separate categories. (In 1981, field-grown legumes occupied 1,415,000 ha, field-grown roots and gourds for feed, 726,000 ha, corn for grain, 1,866,000 ha, and corn for silage and green fodder, 3,396,000 ha.) In 1988, vegetables occupied 498,000 ha, or 1.5 percent of the total sown area of Ukraine. Their concentration was more pronounced on irrigated land in the southern steppe, where they occupied 179,000 ha, or 7.7 percent of the sown area.

Among the vegetables grown in the Princely era were pulses, peas, lentils, onion, garlic, celery, carrots, and cabbage. In general, however, vegetable farming was poorly developed. The first improved vegetable gardens were cultivated by monasteries, such as the Kievan Cave Monastery. New families of vegetables, including cucumbers, muskmelons, and watermelons, began to spread in the 15th century. By the 16th century parsley, parsnips, kohlrabi, and lettuce had arrived, mostly from Italy. In the 17th century cauliflower, radishes, spinach, and beans were added; in the 18th century potatoes were introduced; and in the 19th century eggplant, peppers, and tomatoes began to be grown in Ukraine.

Before the First World War and until collectivization vegetable farming was largely a peasant enterprise with little, if any, commercial significance. Commercial vegetable farming arose mainly around large cities (Kiev, Kharkiv, Odessa, Mykolaiv, Kryvyi Rih, Kherson, Dnipropetrovske, and in the Donbas), resorts, and hospitals and sanatoriums. A few small rural areas also developed a specialty in vegetable farming. Commercial vegetable farming was usually conducted by Germans, Russian Old Believers, and Bulgarians. After collectivization a number of state farms were set up to replace the private entrepreneurs in commercial vegetable farming, but the overwhelming bulk of the vegetables continued to be produced on the subsidiary gardens of the collective farmers and state-farm workers and the private plots of other individuals. Only after the Second World War was a concerted effort made to produce more vegetables on specialized state farms. The proportion of the private plots in the sown area of vegetables then fell from 56 percent in 1940 to 45 percent in 1955, 36 percent in 1960, and 27 percent in 1987.

The total area sown to vegetables has grown over time. From 196,000 ha in 1913 (within Ukraine's 1938 borders), it grew to 402,000 ha in 1928, declined during collectivization, and then expanded again to 488,000 ha in 1940. In addition about 70,000 ha were acquired with the annexation of Western Ukraine. The Second World War brought another reduction; the area had failed to recover its former size by 1950 and was still marginally short in 1960 and 1970; it surpassed the 1940 level only in 1973. Yields, like the sown area, have increased over time, though they were also reduced by calamities such as collectivization and the Second World War. The harvests followed a similar pattern. In the postwar period the harvest per person (a measure of the physical availability of vegetables for the population) has indicated an overall improvement. Only 1940 was an anomalously abundant year, when the private farms of Western Ukraine were incorporated into the republic's total output.

Vegetable production: sown areas, yield, harvest, 1913–87

	1913	1940	1950	1960	1970	1980	1987
Sown areas (1,000 ha)							
Ukraine	267	486	374	474	466	498	513
USSR	648	1,507	1,303	1,476	1,499	1,715	1,713
Yield (centners/ha)							
Ukraine	na	113	62	103	120	138	157
USSR	84	91	72	111	138	150	159
Harvest (million t)							
Ukraine	na	5.5	2.3	4.9	5.8	7.2	8.1
USSR	5.5	13.7	9.3	16.6	21.2	27.3	29.2

The Ukrainian SSR accounted for about 30 percent of the USSR area sown to vegetables. The Ukrainian SSR produced considerably more vegetables per person than did the USSR (see the table). The per capita consumption in the Ukrainian SSR was also higher, but not to the same degree. The difference indicates that about one-fifth of the harvested vegetables were shipped out of Ukraine to other republics, chiefly the RSFSR. The shipment of vegetables to Russia (notably to Moscow and St Petersburg) was common even before the revolution, especially in the spring and early summer (vegetables can be harvested in Ukraine one to two months earlier than in Russia).

The comparative climatic advantage as well as the presence of local urban markets stimulated vegetable farming in specific regions of Ukraine. The heat-loving melons, for example, are grown predominantly in the steppe, the Left-Bank forest-steppe, and, beyond the borders of Ukraine, in the Kuban region. State farms whose specialties include the production of field tomatoes are also located mostly in the steppe. The highest share of sown area devoted to vegetables is found in raions adjacent to large cities, in the cities of the Donbas, and around food-processing centers in cities such as Cherkasy, Kherson, Dzhankoi, Symferopil, and Izmail. Some areas developed a specialty in a particular vegetable, such as the Nizhen region in cucumbers and onions, the Oleksandriia region in watermelons and muskmelons, the Stryi region in cabbage, the Zalishchyky region in early tomatoes, and the Kutya area (south of Kolomyia) in onions.

In addition to field cropping there was considerable development of early vegetable production in greenhouses or under cold frames, especially near Kiev and Kharkiv and in the Donbas. More recently the production has been expanded with the use of long, semicylindrical structures under polyethylene cover (a technique less expensive than greenhouses) and of individual plant or row coverings in the fields (a technique requiring less work and capital expenditure than with cold frame coverings).

The production of selected seeds for vegetable farming in Ukraine before the First World War was inadequately developed. Seed supply had to be supplemented with imports from abroad, notably from Germany. In Ukraine under Russian rule, agricultural extension service was provided by the zemstvos through their instructors, courses, and schools in Uman, Kiev, and Poltava. In Western Ukraine under Austria-Hungary, the *Silskyi Hospodar agricultural society in Lviv supported vegetable growers through its gardening-orcharding section and sponsored vegetable gardening and orcharding courses, exhibitions, and contests for young people. After the Revolution of 1917 agricultural experimental research in

Ukraine was reorganized, and the production of selected seeds was improved to the extent that Ukraine was able to satisfy its own needs and even provide seed material for the Russian SFSR. The main scientific research center for the development of regionalized varieties of vegetable and melon seeds is the Ukrainian Scientific Research Institute of Vegetable and Melon Growing in Merefa. It co-ordinates the efforts of scientists involved in selecting and testing seeds at a network of research stations, in Kiev, Odessa, Voznesenske, Kherson, Symferopil, Melitopil, Dnipropetrovske, Donetsk, Luhanske, Poltava, Sumy, Nizhen, Chernihiv, Mliiv (west of Cherkasy), and other locations.

Vegetable-oil industry. A branch of the *food industry that processes *oil plants (primarily sunflowers) to make vegetable oil, margarine, mayonnaise, glycerol, soap, fat concentrates, and other products. The production of oil from plants has a long history in Ukraine, but until the 20th century it was a poorly developed industry. As late as 1913 there were only five factories employing over 50 workers in the industry in Ukraine; they produced only 6.3 percent of the vegetable oil in the Russian Empire. Since the 1920s the industry has grown substantially. The output of vegetable oil increased from 158,700 t in 1940 to 449,200 t in 1960 and 1,071,300 t in 1970. Then it declined to 941,300 t in 1980 and 846,300 t in 1985, but it increased again, to 1,057,600 t in 1990. In the mid-1960s Ukraine accounted for over one-third of the vegetable-oil production in the USSR. The output of margarine products increased steadily, from 15,200 t in 1940 to 82,200 t in 1960, 151,400 t in 1970, 263,900 t in 1980, and 288,500 t in 1990. The output of soap (with a minimum content of 40 percent vegetable oil) also increased, from 99,200 t in 1940 to 226,400 t in 1970 and 278,200 t in 1982. The vegetable-oil industry in Ukraine is most developed in the south and east. Major factories and manufacturing complexes are located in Donetsk, Odessa, Kharkiv, Poltava, Dnipropetrovske, Zaporizhia, Vinnytsia, and Chernivtsi oblasts. The industry is also well developed in the Kuban.

Vegetation regions. Geographical areas characterized by distinct assemblages of plant communities. Ukraine is divided into four broad vegetation zones: (1) the European broad-leaved forest region, (2) the European-Siberian

VEGETATION REGIONS

forest-steppe region, (3) the Eurasian steppe region, and (4) the Euxinian province of the European broad-leaved forest region. Within those zones anomalies exist that are governed by other factors, such as soils and elevation. Thus, in northern and northwestern Ukraine (Polisia), where sandy soils prevail, the broad-leaved forest zone contains pine and oak-pine forests. The mountains are characterized by altitudinal zonation of vegetation, in response to increasingly colder and wetter conditions with higher elevations. Thus, the broad-leaved forests of lower elevations merge, at higher elevations, into coniferous forests and then, at the highest elevations of the Carpathians and the Caucasus Mountains, give way to alpine meadows.

Plant communities in Ukraine have evolved and changed over time. In the Eocene period the territory of what is now Ukraine consisted of shallow seas and low islands covered by subtropical vegetation (palms, laurels, myrtles, eucalypti, sequoias, and cypress). Increasing continentality following the rise of the Carpathian Mountains and the disappearance of the Paratethys Sea during the Pliocene brought about a change in vegetation: representatives of the subtropics were gradually displaced by deciduous broad-leaved species (beech, oak, chestnut, walnut, and tulip tree). In the south, drier conditions gave rise to the prevalence of grassland.

During the Pleistocene epoch of the Quaternary period a significant cooling (the Dnieper glaciation) caused the impoverishment of forests and a reduction of their area. In northern Ukraine the pine-birch forests prevailed. Broad-leaved species survived in refuge areas (the Carpathian foothills, the Volhynia-Podilia and the Dnieper uplands, the Donets Ridge, the Crimean Mountains, and the Cauca-

sus). The forest-steppe (with the presence of pine, larch, and birch) survived near the ice front; to the south of it the steppe vegetation was even less significantly affected by glaciation.

In the postglacial (Holocene) period the climatic warming gradually restored most broad-leaved trees and grasses of the steppe from their areas of refuge to areas that almost corresponded to their previous extent. In the mid-Holocene mixed needle-leaved and broad-leaved forests were common, with pine, oak, linden, willow, elm, hazel, and (in swampy areas) alder. In the Carpathian Mountains the pine was replaced by the spruce. By the late Holocene the forest communities were enriched by moisture-loving species such as the beech, fir, and spruce. In Western Ukraine hornbeam gained significant distribution. In Subcarpathia and in the Carpathian Mountains beech and coniferous forests with spruce and fir became established. A more humid climate during the late Holocene was conducive to considerable expansion of peat bogs in the northern and northwestern part of Ukraine. The steppe attained its northern limits during the middle Holocene period.

With the agricultural colonization of the steppes from the 10th century, field crops replaced much of the grasslands and non-native plants were introduced into the region. Today most of the land area of Ukraine is covered by vegetation planted or sown by people. In 1981, of the total land area of Ukraine (60.4 million ha), 70.5 percent (42.5 million ha) was agricultural lands, either cropped or used for hay and pasture (see *Land use). The nonagricultural lands, some 24.8 percent of the total land area, may be considered as still supporting natural vegetation. Such remnant areas of natural vegetation, although modified by

centuries of human activity, provide some clues as to what the plant communities must have been like on most of the remaining land areas. Of particular importance in this respect are the forests, which constitute a significant share of the land area in Polisia (26 percent), the Carpathians (39 percent), and the Crimean Mountains (36 percent).

The first attempts to regionalize the vegetation of Ukraine were made by O. Fomin (1925) and Ye. Lavrenko (1927). They were soon followed by schemes for the regionalization of the forests (P. Pohrebniak, 1928), steppes (Yu. Kleopov and Lavrenko, 1933) and wetlands (V. Matiushenko, 1925; D. Zerov, 1938) of Ukraine. Further work on the regionalization of vegetation was conducted after the Second World War by Lavrenko (1947), Zerov (1949), M. Popov (1949), V. Povarnitsyn (1957), H. Bilyk and Ye. Bradis (1962). The most recent geobotanical regionalization of Ukraine (accomplished within the broader framework of the European part of the USSR) was worked out by Lavrenko and T. Isachenko (1977) and then modified by Yu. Sheliakh-Sosonko and T. Andriienko (1985).

Velehrad congresses. International gatherings held in 1907, 1909, 1911, 1924, 1927, 1932, and 1936 in Velehrad, Moravia, the missionary center of St Cyril and Methodius and the burial place of St Methodius. The congresses, which were attended by Catholic and Orthodox theologians, church historians, bishops, and other church figures from the various Slavic nations, were devoted to the study and advancement of the idea of church unification. The first three congresses were initiated and chaired by Metropolitan A. *Sheptytsky. Other prominent Ukrainian Catholic participants were Bishops Y. Kotsylovsky, M. Charnetsky, P. Goidych, D. Niaradi, and Y. Stoika and Revs Y. Slipy, P. Verhun, and A. Khira (there was no formal participation by Ukrainian Orthodox leaders). Materials from the congresses were published mostly in Latin (the official language of the congresses) in *Acta Conventus Velehradensis*, *Acta Academiae Velehradensis*, and *Opera Academiae Velehradensis* (publications of the Velehrad Academy, an institution founded at the 1911 congress), and the journal *Slavorum litterae theologicae*.

Veles (aka Volos). The old Slavic god of cattle, wealth, and trade. He was one of the chief deities in the pantheon of pagan Rus'. In concluding treaties with the Byzantines the Kievan princes swore an oath to Perun and Veles. With the adoption of Christianity St Vlas (Vlasii) replaced Veles as the protector of livestock.

Veliaminov, Stepan [Vel'jaminov], b and d ? 18th-century Russian general; head of the first *Little Russian Collegium. He was sent by Peter I to Ukraine in 1722, ostensibly to direct the collegium, and also to usurp the authority of the hetman and the Cossack *starshyna*. He was recalled to St Petersburg in 1727, when the collegium was abolished.

Vellansky, Danylo [Vellans'kyj] (real name: Kavnyk), b 11 December 1774 in Borzna, Nizhen regiment, d 15 March 1847 in St Petersburg. Physician and philosopher. He studied at the Kievan Mohyla Academy (1789), at the St Petersburg Medico-Surgical Academy (1796–1802), and abroad in Jena and Würzburg, where he attended lectures by F. *Schelling and L. Oken. After returning to St Petersburg in 1805, he served as a lecturer and eventually professor (1814–37) at the Medico-Surgical Academy. He wrote, in Russian, over 20 works on medicine, physics, and philosophy, including books on medicine as a fundamental science (1805), physiology (1812), Oken's system (1815), and experimental, observational, and speculative physics (1831). Vellansky accepted Schelling's *Naturphilosophie* uncritically and applied his chief ideas (ie, the unity and evolution of nature, the struggle of opposites, and the three-stage dialectic) to systematize the empirical materials in medicine, physiology, and physics. In epistemology he admitted the need for experience but stressed the contribution of reason. His writings influenced the Russian thinkers M. Pavlov and V. Odoevsky, as well as M. Maksymovych and some Ukrainian Romantics. Vellansky and his contributions are discussed in Z. Kamensky's book on Russian philosophy and Schelling (Moscow 1980).

Mykola Velychkivsky

Velychkivsky, Mykola [Velyčkivs'kyj], b 1 February 1882 in Zhytomyr, Kiev gubernia, d 17 July 1976 in Irvington, New Jersey. Economist and community leader; member of the Shevchenko Scientific Society from 1963 and of the Ukrainian Academy of Arts and Sciences in the US. A graduate of the Kiev Commercial Institute (1914), in the 1920s he held the chair of agricultural sciences at the Kamianets-Podilskyi Agricultural Institute, the chair of statistics at the Luhanske Co-operative Institute, and then the chair of agricultural sciences at the Zhytomyr Institute of Technical Cultures. In the 1930s he occupied similar positions in Voronezh, Novochoerkassy, and Rostov-na-Donu. He returned to Ukraine during the Second World War, becoming a professor at Kiev University and rector of the Kiev Polytechnical Institute. In 1941 he was elected president of the Ukrainian National Council in German-occupied Ukraine. A postwar refugee in Germany, he taught at the Ukrainian Higher School of Economics in Munich before emigrating to the United States. Velychkivsky authored many works on Soviet agricultural policy and Ukraine's economy, including *Sil's'ke hospodarstvo Ukraïny i koloniiial'na polityka Rosii* (The Agriculture of

Ukraine and the Colonial Policy of Russia, 1959) and *Nashi vtraty v lisyvnyts'vi* (Our Losses in the Forest Industry, 1959).

Velychko, Hryhorii [Velyčko, Hryhorij], b 1863 in Mykolaiv, Stryi circle, Galicia, d 1932 in Kharkiv. Economist and historian; member of the Shevchenko Scientific Society from 1899. He taught in Galician gymnasiums and published many popular works and articles on Ukrainian geography and economics, including an article on the political and trade relations between Rus' and Byzantium in the 10th and 11th centuries (ZNTSh, vol 6, 1891), a demographic map of the Ukrainian-Ruthenian people (1896), and an entry on Galicia in the Russian-language encyclopedia published by Brockhaus and Efron (vol 14, 1892).

The title page of Samiilo Velychko's chronicle (1720)

Velychko, Samiilo [Velyčko, Samijlo], b 1670 in the Poltava region, d after 1728 in Zhuky, Poltava region. Cossack chronicler and political activist. He studied at the Kiev Mohyla Academy and mastered the Latin, German, and Polish languages. He served as general secretary to V. Kochubei in Dykanka, and in 1705 he transferred to the General Military Chancellery. He was relieved of his post after the execution of Kochubei in 1708; thereafter he lived in Zhuky, where he devoted himself to writing and teaching. He translated into Ukrainian the German anthology *Cosmography*, which he published with an introduction in 1728. Velychko's principal work was a chronicle (4 vols, 1720) describing the events of 1620–1700; it has not been preserved in full.

The first volume examines the events of 1648–59; the second volume, those of 1660–86; and the third, of 1687–1700. The fourth volume, the largest (2,041 pages), contains various documents from the 17th century. This first systematic history of the Cossack state refers to contemporary sources, Ukrainian (S. Zorka's *Diariush*, I. Gizel's *Synopsis*, the works of I. Galiatovsky), Polish (S. Okolski, S. Twardowski), and German (S. Puffendorf), and quotes from many documents. The first volume contains a number of distortions as well as plagiarisms from other histories. The second and third volumes are based on Velychko's personal observations and partly on documents of the General Military Chancellery.

Velychko's chronicle was written in the Ukrainian bookish language of the 18th century, with clearly dis-

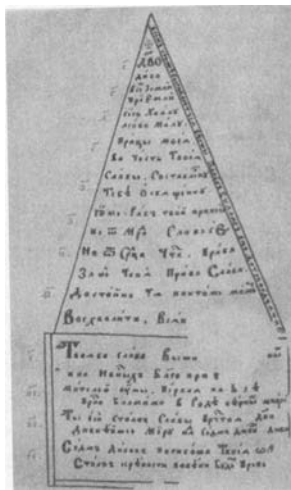

cernible elements of dialect. Stylistically it is highly rhetorical and patriotic. In one place the author describes himself as 'a true son and servant of Little Russia.' Velychko paints a moving picture of the era of the *Ruin, and he portrays the Cossacks as righteous defenders of Ukraine and B. Khmelnytsky as a second Moses. The chronicle contains many anecdotes and stories that enhance its literary value. The manuscript was illustrated by 10 portraits of hetmans, from B. Khmelnytsky to I. Mazepa. Some historians, such as M. Kostomarov, S. Solovev, M. Maksymovych, V. Antonovych, O. Levytsky, D. Bahalii, and P. Klepatsky, have considered Velychko's chronicle a reliable historiographical source; others, including G. Karpov, V. Ikonnikov, M. Petrovsky, I. Krypiakevych, and O. Ohloblyn, have viewed with skepticism its stated sources, particularly the accounts of S. Zorka.

The chronicle was published by the Kiev Archeographic Commission as *Letopis' sobytii v Iugo-Zapadnoi Rossii v XVII v.* (Chronicle of Events in Southwestern Russia in the 17th Century, 4 vols, 1848–64). The first volume was reprinted by the Archeographic Commission of the VUAN as *Skazanie o voine kozatskoi s poliakami* (Account of the Cossack War with the Poles, 1926). It was translated into contemporary Ukrainian by Valerii Shevchuk and published in the journal *Kyiv* (1986, nos 10–11 and 1987, nos 1–5, 7, 10, 12; with an introduction by V. Krokoten) and separately (vol 1, 1991).

A. Zhukovsky

A figural poem from Ivan Velychkovskyy's 'Mleko'

Velychkovskyy, Ivan [Velyčkovs'kyj], b ?, d 1726. Poet and archpriest of Poltava. He wrote *Virshi het'manovi Samoilovychevi* (Poems for Hetman Samoilovych) and two manuscript collections of Ukrainian poetry, 'Zegar ...' (Clock ..., 1690) and 'Mleko ...' (Milk ..., 1691). His works ably capture the stylistic qualities of the baroque era. He

also wrote panegyrics in Polish and Latin, some on the subject of L. Baranovych (published in Chernihiv ca 1680–3). His works were erroneously attributed (by M. Petrov) to his brother Lavrentii, but subsequent scholars (V. Peretts, D. Chyzhevsky) rectified the mistake. A full collection of his unpublished poetry was published in 1972.

Archimandrite Paisii Velychkovsky

Bishop Vasyl Velychkovsky

Velychkovsky, Paisii [Velyčkovs'kyj, Pajisij] (secular name: Petro), b 21 December 1722 in Poltava, d 15 November 1794 in Neamț Monastery, Rumania. Orthodox monk, ascetic, and writer; son of I. *Velychkovsky. He studied at the Kievan Mohyla Academy (1735–9) but withdrew in order to devote himself completely to monastic life. He visited a number of monasteries in the Kiev and Chernihiv regions and became a novice at the St Anthony of the Caves Monastery in Liubech before being tonsured at the St Nicholas Monastery near Medvedivka (1741). After brief stays at the Kievan Cave Monastery and the Motronynskiy Trinity Monastery, he moved to Wallachia, where he stayed at monasteries in Trăisteni (near Focșani), Cîrnul, and Poiana Mărului. In 1746 he traveled through Constantinople to Mt Athos, where he was accepted into the Monastery of Christ Pantocrator. In 1750 he was raised to the second degree of monasticism and took the name Paisii, and in 1758 he was ordained a priest (hieromonk). At Mt Athos Velychkovsky began attracting a number of Slavic and Wallachian monks, and together they founded the St Elijah's Hermitage in 1757 under the Christ Pantocrator Monastery.

While on Athos, he studied the works of the church fathers and translated several from Greek into Ukrainian and Rumanian. Although most of these works remained in manuscript, some were published in the 19th century, including his translation of the ascetic work *Dobrotoliubie* (The Love of Goodness, 1793); prologues, translations, and comments on various lives of saints; and his autobiography (English trans, by J. Featherstone, *The Life of Paisij Velyčkovs'kyi*, 1989).

In 1763 the Moldavian hospodar invited Velychkovsky to reform monastic life in Moldavia. Together with 64 other monks, he left Athos and settled in the monastery in Dragomirna (in Bukovyna). From there he and 350 monks moved to the Secul Monastery in 1775. Finally, in 1779, Velychkovsky moved to the most important Moldavian monastery, in Neamț, where he was made archimandrite in 1790. He reorganized Moldavian monastic life, stress-

ing asceticism, poverty, communal living, and intellectual work. His translation into Slavonic of the *Philocalia* revived the Hesychast tradition throughout Moldavia, Ukraine, and Russia, and under his leadership the Neamț Monastery emerged as an important center for Slavonic theology and philosophy.

Velychkovsky stands as one of the major figures of Orthodox spirituality in the 18th century, and he is considered to be the father of the Orthodox monastic revival. His labors and example influenced generations of clergy, both monastic and secular, as well as laity, throughout the 19th and 20th centuries. He was canonized by the Russian Orthodox church in June 1988 on the occasion of the millennium of the Baptism of Rus'.

Velychkovsky, Vasyl [Velyčkovs'kyj, Vasy'l'], b 1 June 1903 in Stanyslaviv (now Ivano-Frankivske), d 30 June 1973 in Winnipeg. Redemptorist priest and bishop of the underground Ukrainian Catholic church. He took monastic vows, was ordained (1925), and served as a missionary priest in Volhynia (1925–35) before being named hegumen in Stanyslaviv. When the Soviet authorities liquidated the Ukrainian Catholic church after the war, he was arrested for refusing to convert to Russian Orthodoxy and sentenced to 10 years' hard labor in the gulag. After he was released in 1955, he lived under KGB surveillance. In 1959 he was secretly consecrated bishop of Lutske by Y. Slipy in Moscow. In 1968 he was again arrested and sentenced to three years of strict-regime imprisonment in the Donetsk region. Upon his release in 1972, he was permitted to emigrate to his family in Yugoslavia. From there he moved to Rome and then Canada. Velychkovsky is the subject of a biography by S. Bakhtalovsky (1975).

Velyhorsky, Ivan [Velyhors'kyj], b 9 June 1889 in Serafyntsi, Horodenka county, Galicia, d 21 July 1955 in Toronto. Linguist and pedagogue; member of the Shevchenko Scientific Society (NTSh). He studied at Vienna University (1910–14; PH D, 1923) and from 1921 taught in gymnasiums in Chortkiv, Stanyslaviv, and Yavoriv. In the 1930s he published articles on Serafyntsi's Pokutian dialect and family names, V. Stefanyk's and M. Cheremshyna's use of the Pokutian dialect, children's vocabulary, and diminutive and augmentative words in *Ridna mova* (Warsaw). In 1949 he emigrated to Canada from Germany. He was secretary of the NTSh in Canada, contributed articles on the etymology of first names to *Ukrains'kyi robitnyk* (1951), and wrote the brochure *The Term and Name 'Canada'* (1955).

Velyka Bahachka [Velyka Bahačka]. IV-14. A town smt (1988 pop 5,700) on the Psol River and a raion center in Poltava oblast. It arose at the beginning of the 17th century

and was called Bahachka until 1925. In 1649 it became a company center of Myrhorod regiment. In the 19th century it was a village in Myrhorod county, Poltava gubernia. In 1925 the town was made a raion center. Today it is an agricultural town with a mixed-feed factory and a flour mill.

Velyka Blyznytsia. A Scythian burial ground of the late 4th to early 3rd century BC located on the Taman Peninsula. It was excavated in 1863–6 and 1883–5. The site appears to have been the burial plot of a wealthy family that adhered to the cult of Demeter.

Velyka Homilsha fortified settlement. A Scythian fortress settlement of the 5th to 3rd century BC near Velyka Homilsha, Hotvald raion, Kharkiv oblast. Excavated in 1949 by S. *Semenov-Zuser and in 1967–8 by B. *Shramko, the settlement covers an area of 7 ha and was surrounded by a thick wall and trenches. Remains of handmade pottery, milling devices, bronze arrowheads, and Greek amphoras were found at the site. A burial ground, where researchers excavated 10 Scythian kurhans, was located near the settlement.

Velyka Kamianka River [Velyka Kam'janka]. A right-bank tributary of the Donets River. It is 100 km long and drains a basin area of 1,810 sq km. The river is situated in southern Luhanske oblast and a short stretch of Rostov (RF) oblast and is used for water supply. It passes through the city of Krasnodon.

Velyka Lepetykha [Velyka Lepetyxa]. VI-14. A town smt (1988 pop 10,800) on the Kakhivka Reservoir and a raion center in Kherson oblast. It was founded by a French landowner in 1792, and developed into a farming and trading center. In the 19th century it belonged to Mariupol county, Tavriia gubernia. Today it is a river port with a grain elevator and a creamery.

Velyka Mykhailivka [Velyka Myxajlivka]. VI-10. A town smt (1988 pop 6,000) on the Kuchurhan River and a raion center in Odessa oblast. It was founded at the end of the 18th century and was called Hrosulove (Grosulove) until 1945. Today it is an agricultural town with a number of food-processing enterprises.

Velyka Novosilka. VI-17. A town smt (1988 pop 7,800) on the Mokri Yaly River and a raion center in Donetske oblast. It was founded in 1779 and was called Velykyi Yanyzol until 1946. In 1965 it was granted smt status. It is a farming town with a dairy, a bakery, and a canning factory.

Velyka Oleksandrivka. VI-14. A town smt (1988 pop 7,800) on the Inhulets River and a raion center in Kherson oblast. It was founded in 1784 and was called Novooleksandrivka for a few decades. In the 19th century it was part of Kherson county, Kherson gubernia. Today it has a canning factory, winery, and vegetable-oil factory.

Velyka Pysarivka. III-16. A town smt (1988 pop 5,900) on the Vorskla River and a raion center in Sumy oblast. The village of Pysarivka arose in 1709 and is first mentioned in a historical document of 1732 as Velyka Pysarivka. In the second half of the 18th century the village

provided care for blind bandura players. In the 19th century it belonged to Bohodukhiv county, Kharkiv gubernia. Because of poor soil many inhabitants engaged in the trades. In 1959 the village was given smt status. It is an agricultural town with a starch and a mixed-feed factory and a branch of the Okhtyrka creamery.

Velyka Rika River. See Rika River.

Velyka Vys River [Velyka Vys']. A river that flows for 166 km through Kirovohrad oblast and along the border of Cherkasy oblast before converging with the Hnylyi Tikych to form the Syniukha River. It drains a basin area of 2,860 sq km. The city of Novomyrhorod is situated on it.

Dmytro Velykanovych

Velykanovych, Dmytro [Velykanovyč], b 1886, d ? Educator and civic and political leader in Galicia. A gymnasium teacher, he organized Ukrainian teachers' associations and was active in the Ukrainian Teachers' Mutual Aid Society. In the 1930s he was a member of the Central Committee of the Ukrainian National Democratic Alliance (UNDO). From 1928 to 1939 he served as an UNDO deputy to the Polish Sejm and secretary of the Ukrainian Parliamentary Representation. In 1940 he was arrested and deported by the Soviets. He died in a prison camp.

Velyke zertsalo (The Great Mirror). The title of a manuscript collection of 273 tales, apocrypha, legends, religious and historical teachings, anecdotes, and other texts that circulated among preachers (eg, I. Galiatovsky, A. Radyvylovsky) in Ukraine in the mid-17th century. It was a translation of selections from the Polish *Wielkie zwierciadło przykładów* (Cracow 1621 and 1633), which itself was a translation of the Latin *Speculum exemplorum*, published in the Netherlands in 1481 and revised by J. Meyer as *Speculum Magnum exemplorum* (1605). The tales were used to reinforce the church's teachings and morality, and several became part of Ukrainian oral literature.

Velyki Mosty. III-5. A city (1989 pop 6,500) on the Rata River in Sokal raion, Lviv oblast. It was first mentioned, as Mosty or Mostky, in historical documents in 1472. In 1559 it was granted the rights of *Magdeburg law and was renamed. After the partition of Poland in 1772, it was transferred to Austria. It was restored to Poland only in the interwar period. In 1939 it was incorporated into the Ukrainian SSR and in 1940 it was granted city status. Today it has a haberdashery factory and a brick plant.

The iconostasis inside the Church of the Transfiguration in Velyki Sorochyntsi

Velyki Sorochyntsi [Velyki Sorochynci]. III-14. A village (1967 pop 5,300) on the Psol River in Myrhorod raion, Poltava oblast. It was first mentioned in historical documents in the 1720s. The village boasts the baroque Church of the Transfiguration (built in 1732), with a wooden iconostasis, and a literary museum dedicated to N. Gogol, who was born in Velyki Sorochyntsi.

Velykoanadol Forest Project (Velykoanadol'skyi lisovyi masyv). A man-made forest complex situated approx 50 km from Donetsk. The project was started in 1843 by V. Graff, a recent graduate of the St Petersburg Forestry Institute, as a research center dealing with steppe afforestation. Graff worked there until 1866 before moving to teach elsewhere. The project was established as a scientific research center in 1893 in conjunction with V. Dokuchaev's research into drought prevention. Its organizer and first director was Yu. Vysotsky. The center's purpose was to create and study a variety of forests in a steppe environment. Research has continued at the site to the present day. The site now has a total area of 2,920 ha, of which 2,200 ha are forested.

Velykodolynske [Velykodolyns'ke]. VII-11. A town smt (1988 pop 8,700) in Ovidiopil raion, Odessa oblast. It was founded in 1803 and was known as Velyka Akarzha until 1944. Its factories make reinforced-concrete products and structures and ceramic products.

Velykodolynske archeological site. An upper Paleolithic camping ground near Velykodolynske, Ovidiopil raion, Odessa oblast. Excavations in 1959 and 1961 by P. Boryskovsky recovered nearly 19,000 flint pieces and the bones of wild animals which served to provide a valuable body of data concerning the prehistory of this region.

Protoarchimandrite Atanasii Velyky

Velyky, Atanasii [Velykyj, Atanasij] (Welykyj, Athanasius G.), b 5 November 1911 in Turyнка, Zhovkva county, Galicia, d 24 December 1982 in Rome. Churchman and historian; member of the Shevchenko Scientific Society from 1953. He studied philosophy and theology in Krystynopil (1938–40) and at the Ukrainian Free University in Prague (PH D, 1944) and the Gregorian University in Rome (TH D, 1948). He also studied the history of the Eastern church at the Pontifical Oriental Institute (1946–8) and paleology at the Vatican. He joined the Basilian monastic order in 1933, and was ordained in 1946. He was vice-rector (1948–53 and 1955–60) and prorector (1961–3) of St Josaphat's Ukrainian Pontifical College in Rome. From 1960 to 1965 Velyky served as president of the Ukrainian Theological Scholarly Society and secretary of the Vatican's Preconciliar and Conciliar Commission on the Eastern Churches. Thanks to his efforts the commission adopted a resolution on the need for establishing a Kievan patriarchate. He was superior general (1963–76) and then consultant general of the Basilian order. He was also a consultant to the Congregation for Eastern Churches and the Commission for the Revision of the Canon Law of the Roman and Eastern Churches. He headed the Bible Commission of the Basilian order that prepared the first Ukrainian translation of the Bible from the original languages.

In 1949 Velyky revived and expanded **Analecta Ordinis S. Basilii Magni*. He published a number of important documentary collections: *Actae S. Congregationis de Propaganda Fide, 1622–1862* (5 vols, 1953–5), *Documenta Pontificum Romanorum Historiam Ucrainae Illustrantia, 1075–1953* (2 vols, 1953–4), *Litterae S. Congregationis de Propaganda Fide, 1622–1862* (7 vols, 1954–7), *Epistolae Metropolitanorum Kioviensium Catholicorum, 1613–1839* (9 vols, 1956–80), *Litterae Nuntiorum Apostolicorum, 1550–1900* (14 vols, 1959–77), *Documenta Unionis Berestensis eiusque Auctorum, 1590–1600* (1970), *Litterae Episcoporum, 1600–1900* (5 vols, 1972–81), and *Litterae Basilianorum, 1601–1760* (2 vols, 1979). He established the series *Ukrainska dukhovna biblioteka* (The Ukrainian Spiritual Library), which published over 70 titles, 17 of which he wrote. His book on religious persecution in Ukraine, *Bila knyha* (The White Book, 1952), was translated

into German, English, and Spanish. He also wrote a history of the Sisters Servants of Mary Immaculate (1968), *Svitla i tini* (Lights and Shadows, 1969), *Ukrains'ke khrystyianstvo* (Ukrainian Christianity, 1969), and *Z litopysu khrystyians'koi Ukraïny* (From the Chronicle of Christian Ukraine, 9 vols, 1968–77). He contributed many entries to *Entsyklopediia ukraïnoznavstva* and *Encyclopedia of Ukraine* and drafted the missive from the Ukrainian Catholic hierarchy on the anniversary of St Olha and the official statement issued by the Ukrainian bishops regarding the release from Siberia of Metropolitan Y. Slipy.

I. Patrylo

Velykyi Bereznyi [Velykyj Bereznyj]. V-3. A town smt (1988 pop 6,600) on the Užh River and a raion center in Transcarpathia oblast. It was first mentioned in historical documents in 1427, when it was under Hungarian rule. At the end of the 17th century the village was annexed by Austria, and in the interwar period it belonged to Czechoslovakia. In 1945 it was transferred from Hungary to the Ukrainian SSR. The town manufactures kitchen furniture and canned foods and bottles mineral water. It has a fine park, planted in the 19th century.

Velykyi Burluk [Velykyj Burluk]. III-18. A town smt (1988 pop 4,600) on the Velykyi Burluk River and a raion center in Kharkiv oblast. It was mentioned in historical documents in the 1670s. Today it is an agricultural town with a cheese factory and bakery. The village church built in the 1830s has been preserved.

Velykyi Burluk River [Velykyj Burluk]. A left-bank tributary of the Donets River that flows for 93 km through Kharkiv oblast and drains a basin area of 1,130 sq km. The river has its source along the southern slopes of the Central Upland. Parts of it are used for water supply.

Velykyi Bychkiv [Velykyj Byčkov]. VI-5. A town smt (1988 pop 9,200) on the Tysa River in Rakhiv raion, Transcarpathia oblast. It was mentioned in historical documents at the end of the 14th century. In the interwar period it was an active center of the Ukrainian nationalist movement in Transcarpathia. Under Soviet rule it was promoted to smt status (1947). Today it is an industrial town with a wood-chemicals manufacturing complex (est 1868), forest-products manufacturing complex, canning factory, and handicrafts factory.

Velykyi Dil [Velykyj Dil]. V-4. A Volcanic Carpathian mountain group located between the Liatorytsia and the Borzhava rivers in Transcarpathia oblast. The highest peak in the group is Mt Buzhora (1,085 m). The slopes of the mountains in the group are covered with beech forests and are sparsely populated. In contrast, the lowland area surrounding the group is heavily populated and is an active center of viticulture.

Velykyi Kuialnyk River [Velykyj Kujal'nyk]. A river that flows for 150 km through Odessa oblast before emptying into the Kuialnyk Estuary on the Black Sea coast. It drains a basin area of 1,860 sq km. Sections of the river commonly dry out during summers of low precipitation and leave behind a series of individual ponds.

Velykyi Luh. The floodplains of the Dnieper River south of Khortytsia Island. They were covered with forests, meadows, and marshes and were used by the Zaporozhian Cossacks in the 16th to 18th centuries as a refuge and hunting ground. In folk songs the region was called *batko* (father), and symbolized security and freedom.

Velykyi Utliuk River [Velykyj Utljuk]. A river that flows for 83 km through southwestern Zaporizhia oblast before emptying into the Utliuk Estuary along the Sea of Azov coast. It drains a basin area of 810 sq km. The river is used in part for industry. Sections of it tend to dry out seasonally.

Velykyi Yanysol. See Velyka Novosilka.

Vendzylovych, Myron [Vendzylovyč], b 26 August 1919 in Solynka, Lisko county, Galicia. Architect. A graduate of the Lviv Polytechnical Institute (1949), he has designed many buildings in Lviv, including the physics complex at Lviv University (1967), the computing center (1968), the Dynamo sports complex (1970), and the Institute of Applied and Decorative Arts (1972).

Venedi. Numerous tribes that occupied the territory between the Oder and the Vistula rivers in the first centuries AD and then moved along the Buh and the Sian rivers into the Dniester River region. The Venedi are mentioned by the ancient historians Pliny the Elder, Tacitus, Ptolemy, and Jordanus. Copying German archeologists, some historians in the past incorrectly called them Vandals. Most Slavic archeologists, including the Ukrainians Ya. Pasternak and M. Smishko, considered the Venedi to be ancestors of the West Slavs and identified them with members of the Przeworsk culture. Other scholars (including Soviet ones) took 'Venedi' to be the primordial name of the Slavs who inhabited the forest-steppe belt and Polisia between the Dnieper River and the Carpathian Mountains, as well as the southern part of Poland to the Oder River, at the beginning of the millennium.

Venedyktov, Lev, b 6 October 1924 in Tambov, Russia. Choir conductor. In 1949 he graduated from the Kiev Conservatory and after a decade joined its faculty. From 1941 he worked as a conductor with army ensembles at the front and the Red Flag Song and Dance Ensemble of the Kiev Military District, and in 1953–86 as chief choirmaster of the Kiev Theater of Opera and Ballet. In 1986–91 he was the theater's director. He took part in such operas as H. Maiboroda's *Yaroslav the Wise*, D. Shostakovich's *Katerina Izmailova*, P. Tchaikovsky's *Queen of Spades* and *Eugene Onegin*, and M. Mussorgsky's *Boris Godunov*.

Venelin, Yurii (nom de plume of Heorhii Hutsa), b 3 April 1802 in Velyka Tybava, Transcarpathia, d 7 April 1839 in Moscow. Slavist; member of Moscow University's Society of Russian History and Antiquities from 1833. An early Transcarpathian *Russophile, he studied at the Uzhhorod gymnasium and theological seminary and at Lviv University (1822–3). After emigrating illegally to Russian-ruled Bessarabia in 1823, he worked there as a teacher at the Kishinev seminary until 1825 and researched the folkways of the Bulgarian colonists. Having found a patron in I. *Orlai, he studied medicine at Moscow University (1825–9). One of the 'spiritual fathers' of the Russian

Yurii Venelin

*Slavophiles, he also collected Ukrainian folk songs and corresponded with the Ukrainian scholars M. Maksymovych and I. Sreznovsky. Six of his articles were published in I. Svientsitsky's 1906 book of materials on the history of the Transcarpathian Ruthenian revival. T. Bait-sura's Ukrainian-language monograph about Venelin was published in Bratislava in 1968.

Venereal diseases. The name given to a group of contagious diseases spread through sexual intercourse, including *syphilis, gonorrhea, lymphogranuloma venereum, chankroid, and AIDS (Ukrainian: SNID – *syndrom nabutoho imunodefitsytu*). The stigma and shame associated with sexually transmitted diseases makes them hard to acknowledge, treat, or eradicate. As with most infectious diseases, they are most virulent in times of physical and economic hardship. In Ukraine wars, mobilization of armies, and population migration (eg, the industrialization of the Donbas) have all served to increase the incidence of venereal diseases.

In Western Ukraine under Austro-Hungarian rule, medical dispensaries were organized to deal with venereal diseases. At the end of the 19th century 2 percent of the Hutsul region population was registered as infected with syphilis. In Russian-ruled Ukraine there were no specific medical institutions to deal with the overall question of venereal diseases before 1917, and aid was given on a small scale in general medical institutions. The first *poly-clinic specifically for the treatment of venereal and dermatological diseases was founded in Odessa in 1917. Also at that time medical institutes, societies, scientific research centers, medical dispensaries, and venereological stations were established in Kharkiv, Kiev, and smaller towns and villages throughout the country, particularly in the Donbas. By 1927 there were 80 venereological dispensaries for the urban and 125 for the rural population. Research is still conducted at the Kharkiv *Scientific Research Institute of Dermatology and Venereology (est 1924 on the basis of an existing polyclinic), which publishes the collection *Dermatologiiia i venerologiiia*.

The Ministry of Health in the Ukrainian SSR had the legal right to force those infected with venereal diseases into treatment and hospitalization, to register all cases of venereal disease, to follow up with inquiries into the family life of the infected, and to bring to justice those who knowingly spread venereal diseases (up to five years' detention, one year's hard labor, or a strict fine). A sharp increase in reported cases (a fraction of the estimated total), mainly among teenagers, young adults, and homosexuals, has

been noted in recent years. The cases of acute and chronic gonorrhea in the Ukrainian SSR per 100,000 population numbered 99.5 (148 in the USSR) in 1980, 82.7 (113) in 1985, and 73.5 (86.3) in 1987.

The Soviet Union was slow to acknowledge the presence of AIDS victims within its borders. The USSR Ministry of Health in early 1990 admitted that 28 patients had contracted AIDS, and that 19 of them had died. The number of HIV carriers was recorded at 457, of whom more than 200 were children. It was estimated that by 1992 the number of HIV carriers would be 24,000. The Soviet Union imposed mandatory testing for the AIDS virus on African (sometimes all) foreign students and all visitors staying longer than three months, and reserved the right to demand that they leave the country. The puritanical stance of the USSR and the state of its *public health system made it difficult to educate the public at large, particularly teenagers, about the dangers of AIDS. In Odessa a Prophylactic Center against AIDS was opened in October 1991.

P. Dzul

Ukrainian-Venezuelan members of the Plast and SUM Ukrainian youth associations at a public meeting to commemorate Gen Roman Shukhevych

Venezuela. A country in South America (1990 pop 19,405,429), with an area of 912,050 sq km. Caracas is the capital. There were few Ukrainians in Venezuela prior to the Second World War. Between 1947 and 1950 approx 3,400 Ukrainians arrived from displaced persons' camps in Europe; they were joined by a small number of Ukrainians from Czechoslovakia, Yugoslavia, France, and Colombia. Many of the displaced persons quickly departed to North America and left the number of Ukrainians in Venezuela (including the native-born) at an estimated 1,500 in 1968. Of this number, 800 resided in Caracas, and a total of approx 350 in the cities of Valencia, Puerto Caballo, and Maracay. The remainder are dispersed elsewhere. Still further departures had reduced the community in the whole of Venezuela to approx 800 by 1987. No municipalities bear Ukrainian names, although there are two streets in the Alta Vista and Los Magallanes districts of Caracas which (from 1950) bear the name 'Ucrania.' All Ukrainians in Venezuela are naturalized citizens.

Ukrainians in Venezuela are predominantly urbanized (90 per cent). Many had tried settling on the land, but unaccustomed to farming in tropical conditions, most of them soon moved to the cities. In the late 1960s about 40

Ukrainian-Venezuelan 'Cossacks' during carnival festivities in Caracas

percent of the Ukrainians were unskilled and semiskilled laborers; another 35 percent were engaged as merchants, artisans, and entrepreneurs; 15 percent were in the liberal arts professions; and 10 percent were farmers and rural laborers. The majority were home owners.

The *Ukrainian Hromada (Spanish: Asociación de Ucrucianos en Venezuela) was established in 1948 and obtained state approval as a nonpolitical organization and as the legal representative body for Ukrainians in Venezuela. The hromada maintained branches outside Caracas in Valencia, Maracay, and Barquisimeto. Its headquarters are situated in the organization's own Ukrainian People's Home in Caracas. The following groups have also been active in Venezuela: the Federation of Ukrainian Women, the Society of Ukrainian Youth, the Plast Ukrainian Youth Association, the Ukrainian Youth Association (SUM), the Society of Ukrainian Engineers, the Association of Ukrainian Veterans, the Chornomortsi Sports Society, the Committee for the Liberation of Ukraine, and the Prosvita reading club. Ukrainian-language programs have been broadcast in Caracas.

Ukrainian Catholics constitute (1980) approx 58 percent of the Ukrainian community in Venezuela. The remainder are Orthodox (approx 38 percent) and Protestant. Both the Catholics and the Orthodox founded their parishes in 1948. The Ukrainian Autocephalous Orthodox church has two churches, one in Caracas and one in Valencia.

The Ukrainian community in Venezuela, particularly in Caracas and Valencia, has a fairly high level of identity retention, although the number of Ukrainians not fluent in the Ukrainian language is considerable. Some of the more noted Ukrainians who lived in Venezuela were P. Horsky, O. Halchenko, V. Krychevsky, H. Mazepa, K. Belsky, V. Yemets, L. Martyniuk, and K. Koliankivska.

Venglovsky, Ivan [Vengl'ovs'kyj], b 1884, d ? Lawyer and civic and educational activist in Bibrka county, Galicia. He was a member of the Central Committee of the Ukrainian National Democratic Alliance. In 1939 he was deported by the Soviets. He disappeared in the labor camps.

Venhlovsky, Yurii [Venhlovs'kyj, Jurij] (Wenhlovsky, Yuriy), b 4 December 1921 in Berteshiv, Bibrka county, Galicia. After emigrating to Australia in 1949, he became a church and OUN activist. He was the founder of the Prosvita firm in Melbourne as well as manager, writer, and editor of the weekly *Tserkva i zhyttia*.

Venhlovsky, Yurii, Jr [Venhlovs'kyj, Jurij] (Wenhlovsky, Juri), b 1945 in Ulm, Germany. Diplomat; son of Yu. *Venhlovsky. He moved to Australia in 1949 and became an officer (lt-col) in the Australian army after graduating from cadet school. He saw service in Vietnam (1968-70) and was awarded the Military Cross. He later graduated from the military academy and rose to the rank of adjutant general at army headquarters. In 1987 he was appointed defense attaché to Korea and Australia, UN national senior adviser, and Commonwealth Alliance officer.

Bookplate designs by Tyrs Venhrynovych

Venhrynovych, Tyrs [Venhrynovyč] (Wenhrynowycz), b 21 September 1924 in Drohobych, Galicia. Graphic artist and painter of Ukrainian origin in postwar Poland. Since graduating from the Cracow Academy of Fine Arts (1952) he has directed the drawing department of the Institute of the History of Material Culture of the Polish Academy of Sciences in Cracow and devoted his free time to art. As a member of the Union of Polish Artists he has had over 50 solo exhibitions in Poland and has also exhibited in Edmonton, New York City (1986), Brockport, New York (1987), and Lviv (1989). A master of line, wood, metal, and plaster engraving, he has illustrated books and created many prints and over 500 bookplates. A series of 120 prints depicts Lemko and Boiko churches. As a painter he has done mostly landscapes, particularly of the Lemko region and Cracow, but also genre paintings and icons.

Vepr River (Polish: Wieprz). A right-bank tributary of the Vistula River. It is 234 km long and drains a basin area of 10,422 sq km. The upper reaches of the river flow through the southern part of the Kholm region.

Verba, Antin. See Serednytsky, Antin.

Verba, Prokip, b 7 July 1919 in Tokarivka, Kharkiv county, Kharkiv gubernia, d 20 July 1988 in Kharkiv. Economist; corresponding member of the AN URSR (now ANU) from 1972. A graduate of the Kharkiv Financial-Economic Institute (1941) and the Leningrad Financial Academy (1952), he worked in the Kharkiv branch of the State Bank (1945–50), the Kharkiv oblast Higher Party School, the Kharkiv branch of the Odessa Credit-Economic Institute, and finally, Kharkiv University, where he held the chair of finance and credit (1966–88). He wrote or co-authored monographs and many articles on finance, economic management, and administration, including *Rentabel'nost' promyshlennogo predpriatiia i puti ee povysheniia* (The Profitability of the Industrial Enterprise and Ways to Increase It, 1967) and *Effektivnost' i kachestvo* (Efficiency and Quality, 1977).

Verbytsky, Andrii [Verbyc'kyj, Andriij], b 1788, d 27 April 1859. Scholar and litterateur. A professor at Kharkiv University (1816–39), from 1811 to 1829 he published, in Russian, the first almanacs in Ukraine, a handbook subtitled 'Ukrainian Notes' (1821), and the daily newspaper *Khar'kovskie izvestiia* (1817–18). He wrote textbooks on Russian literature and grammar and Latin versification.

Mykhailo Verbytsky

Verbytsky, Mykhailo [Verbyc'kyj, Myxajlo], b 1815 in Uliuch, Sianik circle, Galicia, d 7 December 1870 in Mlyny, Yavoriv county, Galicia. Composer, conductor, and Catholic priest. Typical of the semiprofessional composers in 19th-century Galicia, he studied in the Peremyshl Cathedral Music School with A. Nanke and later took private lessons with F. Lorenz. He is best known for composing the Ukrainian national anthem *Shche ne vmerla Ukraïna* (Ukraine Has Not Yet Perished, to a text by P. Chubynsky). His other significant contributions consist of church music for mixed and male choir; music for 18 plays, operettas, and vaudevilles; a number of overtures and polonaises for orchestra; and choral music to texts by T. Shevchenko, I. Hushalevych, Yu. Fedkovych, and M. Shashkevych.

Verbytsky, Mykola [Verbyc'kyj] (pseuds: Mykolai-chyk Bilokopyty, M. Antiokhov, Chernihovets Ya., Tsybulka), b 13 February 1843 in Chernihiv, d 10 December 1909 in Chernihiv. Writer, publicist, and teacher. He studied at the universities of Kiev (1859–60, 1861–4) and St Petersburg (1860–1). In 1863 he took part in an underground satirical journal, *Pomyinytsia*. He then taught in gymnasiums in Poltava (1864–5) and Chernihiv (1865–74). While in Chernihiv he was active in the Hromada of Kiev, edited the Chernihiv zemstvo miscellany, was a town councillor, and published feuilletons in *Kievskii telegraf*, *Nedelia*, and the local press. His first few Ukrainian poems, written in the style of T. Shevchenko, and a story appeared in 1862 in *Osnova* and *Chernigovskii listok*. From 1904 he published a few poems in *Literaturno-naukovyi vistnyk* and Ukrainian literary almanacs and miscellanies.

Verbytsky, Oleksander [Verbyc'kyj], b 27 September 1875 in Sevastopol, Crimea, d 9 November 1958 in Kiev. Architect; full member of the USSR Academy of Architecture. A graduate of the St Petersburg Institute of Civil Engineers (1898), he moved to Kiev, where he worked as an architect for the Southwestern Railway (1901–33). He designed railway stations, depots, warehouses, hospitals, many country villas, and some apartment buildings in Kiev in the Moderne style. He helped set up the Kiev Architectural Institute in 1918 and taught there (1918–24) and at the Kiev State Art Institute (1924–30, 1937–53) and Kiev Civil-Engineering Institute (1930–7). He also designed the large hotel in what is now Khmelnytsky Square in Kiev, a bridge across the Volga in Gorkii (with Ye. Paton), the Kiev Railway Station (built in 1927–33), a grain elevator in Odessa, a sugar refinery in Verkhniachka, and a paper factory in Malyna. He enjoyed painting and produced many oils and watercolors. A book about Verbytsky by S. Kokhan and S. Kileso was published in Kiev in 1966.

Verbytsky, Tymofii [Verbyc'kyj, Tymofij], b ?, d ca 1642. Early printer. He probably worked at K. Stavrovet'sky's itinerant press in Pochaiv and Rokhmaniv in Volhynia (1618–19) before joining the Kievan Cave Monastery Press (1621–4). In 1624 he established his own press in Kiev with the assistance of Metropolitan Y. Boretsky and printed a Horologion (1625, 1626) and a Psalter (1628), and the first primer printed in Kiev. From ca 1635 he ran the press in Câmpulung, which had been given to the Wallachian hospodar M. Basarab by Metropolitan P. Mohyla, and printed a Sacramentary there.

Verekundova, Nataliia, b 13 May 1908 in Pavlovskoe, Voronezh gubernia, Russia, d 10 February 1987 in Kiev. Ballerina. She completed study at the Leningrad Choreography School (1926) and then was the leading soloist in the Kiev Theater of Opera and Ballet and, from 1949, its ballet master. From 1946 she taught in the Kiev Choreography School.

Veres, Roman. See Weres, Roman.

Veresaev, Vikentii [Veresajev, Vikentij] (pen name of Smidovich, Vikentii), b 16 January 1867 in Tula, Russia, d 3 June 1945 in Moscow. Russian writer. In the years 1890–2 he worked as a physician in Yuzivka (now Donetsk) and wrote a book of sketches about the miners there

(1892). Later he edited the Russian edition of *Pesni Tarasa Shevchenka* (The Songs of Taras Shevchenko, 1911) and the important collection *Gogol' v zhizni* ([N.] Gogol in [His] Life, 1933). His autobiographical *Zapiski vracha* (A Doctor's Notes, 1901) appeared in a Ukrainian translation in Lviv in 1903 and in Kharkiv in 1929. A Ukrainian edition of his selected works (2 vols) was published in Kiev in 1956.

Ostap Veresai

Veresai, Ostap [Veresaj], b 1803 in Kaliuzhyntsi, Pryluka county, Poltava gubernia, d April 1890 in Sokyryntsi, Pryluka county, Poltava gubernia. Kobza player and singer (tenor). A peasant who became blind in his early youth, he studied from 1818 with S. Koshovy and other kobzars. By the 1860s he was the most renowned performer of Ukrainian epic and historic songs. In 1873 he appeared in recital for the Southwestern Branch of the Imperial Russian Geographic Society and in 1875 concertized in St Petersburg. His repertoire included the dumas *Kinless Fedir*, *Three Brothers from Azov*, and *Oleksii Popovych*. Veresai's artistry was studied by ethnographers such as O. Rusov and P. Chubynsky, as well as by M. Lysenko, who wrote a monograph on the works in Veresai's repertoire (1873, 1978).

Vereshchagin, Leonid [Vereščagin], b 29 April 1909 in Kherson, d 20 February 1977 in Moscow. Physicist; full member of the USSR Academy of Sciences from 1966. A graduate of the Odessa Institute of People's Education (1928), he worked at the Ukrainian Physical-Technical Institute in Kharkiv (1934–9) and the Institute of Organic Chemistry of the USSR Academy of Sciences in Moscow (1939–54), and directed the academy's High Pressures Laboratory (from 1954) and its Institute of High-Pressure Physics (from 1958). His chief publications deal with the physics of superhigh pressures and the methods of measuring physical properties under high pressures. Under his supervision the first synthetic diamonds in the USSR were produced in 1960. An edition of his selected works was published in Moscow in 1982.

Vereshchahin, Fedir [Vereščahin], b 30 May 1910 in Mykolaiv, Kherson gubernia. Stage director. He completed study at the Kiev Institute of Theater Arts (1941) and during the war worked in the theater of the 21st Red Army at the front. Then he worked in the Kirovohrad Ukrainian Music and Drama Theater (1944–5), in the Izmail Ukrainian Music and Drama Theater (1945–8), and, as artistic and administrative director, in the Vinnytsia Ukrainian Music and Drama Theater (1948–86).

Vereshchak, Vadym [Vereščak], b 6 May 1914 in Pryluka, Poltava gubernia. Film and television cameraman. He completed study at the State Institute of Cinema Arts in Moscow (1947) and worked in the Riga Artistic Film Studio (1947–53, pupil of E. Tisse) and then in the Kiev Artistic Film Studio, notably on the film production of O. Korniiuchuk's *Zahybel' eskadry* (The Destruction of the Squadron, 1966).

Vereshchynsky, Yosyf [Vereščyns'kyj, Josef] (Wereszczyński, Józef), b 1530? in Zbarazh, d 1 February 1599. Roman Catholic bishop of Kiev. An aide to the Orthodox bishop of Kholm, he converted to Roman Catholicism and became (1581) abbot of a Benedictine monastery in Poland and later (1589) the Catholic bishop of Kiev. The author of theological and satirical works, he was particularly renowned for tracts urging war against the Turks and Tatars and supporting Polish colonization of the steppe.

Vereshchytsia River [Vereščytsia]. A left-bank tributary of the Dniester River that flows southward for 91 km through Lviv oblast and drains a basin area of 955 sq km. The river has small weirs constructed at intervals for almost its entire length. The town of Horodok is situated along it.

Veretenchenko, Oleksa [Veretenčenko], b 25 October 1918 in Bilyi Kolodiaz, Vovchanske county, Kharkiv gubernia, d 15 March 1993 in Detroit. Poet. From 1925 he lived in Kharkiv, where he studied at the Kharkiv Pedagogical Institute. A postwar refugee, since 1949 he has lived in Detroit. He began publishing in 1935 and is the author of the poetry collections *Pershyi hrim* (First Thunder, 1941), *Dym vichnosity* (The Smoke of Eternity, 1951), and *Zamors'ki vyna* (Overseas Wines, 1974) and the historical narrative poem *Chorna dolyna* (The Black Valley, 1953). He also translated G. Byron's *Mazeppa* into Ukrainian (1959) and edited the first posthumous edition of V. Svidzinsky's poetry (1975).

Vergennes, Charles de, b 28 December 1717 in Dijon, France, d 13 February 1787 in Versailles. French diplomat. He financially sponsored the émigré supporters of Hetman I. Mazepa. His friend H. Orlyk recommended him for the position of French ambassador to Constantinople (1754–68). There de Vergennes played a role in Turkey's protest against the formation of New Serbia in Ukraine (1753) and its declaration of war on Russia (1768).

Verhanovsky, Volodymyr [Verhanovs'kyj], b 7 March 1876 in Lukavytsia Vyzhnia, Stryi county, Galicia, d 26 November 1946 in Pramer, Austria. Jurist and law scholar; from 1914 full member of the Shevchenko Scientific Society. After graduating in law from Lviv University (LLD, 1900) he conducted research in Berlin and Vienna and in

1908 began lecturing on Austrian civil law at Lviv University. In the interwar period he was a professor and dean of the law faculty at the Lviv (Underground) Ukrainian University (1921–3) and, from 1929, a member of the highest court of appeal in Galicia. He taught law at Lviv University (1939–41). His publications include *Pro pobichnu interventiuiu* (On Lateral Intervention, 1903) and *Zmina pozovu* (Altering the Summons, 1912).

Rev Petro Verhun while in Soviet exile

Verhun, Petro, b 18 November 1890 in Horodok, Galicia, d 7 February 1957 in Angar, Krasnoiarsk krai, RSFSR. Ukrainian Catholic priest. He studied theology in Prague and completed a D TH at the Ukrainian Free University (1926) before being ordained in 1927 in Lviv. That year he moved to Berlin to serve as pastor for Ukrainian Catholics throughout Germany, and in 1940 he became apostolic visitor there. For many years the only Ukrainian Catholic priest in Germany, he was an active preacher, published religious pamphlets, and issued a newsletter. Verhun was arrested by the Soviets in June 1945 and exiled to Siberia, where he was imprisoned until 1955. A biography, by P. Romanyshyn, was published in 1988.

Verkhatsky, Mykhailo [Verxac'kyj, Myxajlo], b 17 May 1904 in Lohkvytsia, Poltava gubernia, d 16 February 1973 in Kiev. Stage director, pedagogue, and theatrical historian. He completed study at the Kharkiv Music and Drama Institute (1930, pupil of L. Kurbas) and then worked in Berezil (1926–33, from 1929 as assistant director), Veselyi Proletar, and the Kharkiv Young Spectator's Theater (1934–41) and taught in the Kharkiv (1930–3), Tashkent (1945–52), and Kiev (1952–72) institutes of Theater Arts.

Verkhivsky, Oleksander [Verxivs'kyj], b 1827 in the Chernihiv region, d 1882. Church historian and biblical scholar. He served as a regimental physician and devoted his spare time to historical and biblical studies. He compiled (but did not complete) a dictionary of biblical history (5 vols, 1871–6) and a dictionary of church history (1881–). He knew 12 ancient and modern languages.

Verkhivtseve [Verxivceve]. v-15. A city (1989 pop 11,700) in Verkhnodniprovske raion, Dnipropetrovske oblast. It was founded in 1884 as a railway station on the Donbas–Kryvyi Rih and the Katerynoslav–Dolynska lines. Until 1904 the settlement was called Liubomyrivka. In 1956 it was granted city status. Most of its enterprises belong to the railway industry, and many of its residents work in Dniprodzerzhynske.

Verkhnia Lypytsia settlement. A settlement of the 1st to 2nd century near Verkhnia Lypytsia, Rohatyn raion, Ivano-Frankivske oblast. Excavations in 1960–4 uncovered the remains of eight pit and semi-pit dwellings with hearths and storage pits. Other artifacts found included pottery, tableware, iron knives, and Roman coins.

Verkhnia Tersa River [Verxnja Tersa]. A left-bank tributary of the Vovcha River that flows for 107 km through Zaporizhia and Dnipropetrovske oblasts and drains a basin area of 1,680 sq km. The river is 15–20 km wide and has a valley 1.5–2.5 km wide. It is used for water supply and irrigation (although it becomes very shallow in the summer).

Verkhni Rohachyk [Verxnij Rohačyk]. vi-15. A town smt (1988 pop 7,300) and a raion center in Kherson oblast. It was founded in 1786 and granted smt status in 1967. It is an agricultural town with a mixed-feed factory and a creamery.

Verkhni Saltiv. A village in Vovchanske raion, Kharkiv oblast, where Alan catacomb tombs of the 6th to 9th century were discovered. They were excavated in 1904–20 and in 1946. Virtually every tomb had three or four people buried in it with a variety of grave goods, including pottery vessels, iron swords, battle axes, knives, and jewelry.

Verkhnodniprovske [Verxn'odniprovs'ke]. v-15. A city (1989 pop 23,900) on the Dniprodzerzhynske Reservoir and a raion center in Dnipropetrovske oblast. It was established by the Zaporozhian Cossacks in the 17th century as a winter settlement. By 1780 it had developed into the village of Hryhorivka, which in 1785 was renamed Novohryhorivka, and in 1806, Verkhnodniprovske. In 1956 it was granted city status. Today the city is an industrial center with a cast-iron foundry, automobile repair plant, paper factory, and dairy.

Verkhnodniprovske Mining and Metallurgical Complex (Verkhnodniprovskiy hirnycho-metalurhiinyi kombinat). An enterprise of the metallurgical industry, located in Vilnohirske, Dnipropetrovske oblast. Construction of the first upgrading plant began in 1956 and was completed in 1961. A second plant was opened in 1968. The complex processes zirconium, rutile, and ilmenite concentrates, zirconium dioxide, and other metals and alloys. The primary source of raw materials is a local deposit of titanic sand.

Verkhovyna [Verxovyna]. A common designation for the highland region of the Middle-Carpathian Depression in the upper reaches of the Stryi, the Opir, the Liatorytsia, and the Velyka Rika river basins. The Verkhovyna area is inhabited by the Boikos, although local people also refer to themselves as *verkhovyntsi*, or Highlanders. A number of popular Ukrainian folk songs praise the Verkhovyna region and its natural beauty.

Verkhovyna [Verxovyna]. v-5. A town smt (1988 pop 5,800) on the Chornyi Cheremosh River and a raion center in Ivano-Frankivske oblast. Known as Zhabie until 1962, it was first mentioned in historical documents in 1424. Until 1772 it was under Polish rule, and subsequently under

A view of Verkhovyna

Austrian and Polish (1919–39) rule. After the Second World War it became part of the Ukrainian SSR. In 1962 the village was granted smt status. It has a forest-products manufacturing complex and a mineral-water bottling plant.

Verkhovyna Regional Studies Museum. See Stryi Regional Studies Museum.

Verkhovyna Subcarpathian Song and Dance Ensemble (Prykarpatskyi ansambl pisni i tantsiu Verkhovyna). A professional performing collective founded in Drohobych in 1946. The ensemble consists of a chorus, dance troupe, and folk orchestra. It collects and performs folk music of the Subcarpathian region as well as contemporary works of Soviet Ukrainian composers. Its artistic directors have been O. Korchynsky (1946–70), O. Volynets (1970–81), and M. Duda (since 1983).

Vasyl Verkhovynets

Ivan Verkhratsky

Verkhovynets, Vasyl [Verxovynec', Vasyl'] (pseud of Vasyl Kostiv), b 5 January 1880 in Saryi Mizun, Dolyna county, Galicia, d 11 April 1938 in Kiev. Composer, ethnographer, conductor, folklorist, and teacher. He taught singing at the Poltava Pedagogical Institute and the Lyсенko Music and Drama Institute in Kiev and chaired the Department of Fine Art at the Poltava Institute of People's Education (1919–32). Verkhovynets is the author of the first Ukrainian ethnochoreographic textbooks, *Ukrains'ki narodni tantsi* (Ukrainian Folk Dances, 1913) and *Teoriia*

ukrains'koho narodnoho tanka (Theory of the Ukrainian Folk Dance, 1919; four later edns). His collection *Vesnianochka* (Spring Song, 1925) includes descriptions of 210 children's games with 226 songs and melodies. He wrote numerous popular songs and choral works based on Lesia Ukrainka's, I. Franko's, M. Rylsky's, and his own poems. He also arranged many folk songs, dance tunes, and theater pieces. In 1912 he wrote a detailed account of a traditional wedding in Shpychyntsi village, Skvyra county, Kiev gubernia, which included 140 wedding songs and 70 melodies. The wedding was staged that year in the Sadovsky Theater, and an account was published with historical notes in 1914.

Verkhovynka, Lesia [Verxovynka, Lesja] (pseud of Yaroslava Kuchkovska, née Lahodynka), b 3 March 1903 in Diliatyn, Nadvirna county, Galicia, d 21 February 1936 in Diliatyn. Writer. Her poems and stories appeared in *Moloda Ukraina*, *Novi shliakhy*, *Nova khata*, *Svit dytyny*, and other Galician periodicals. She also wrote a cycle of stories about Hutsul life, among them *Stare lykho* (Old Evil, 1923) and *Nevistka* (Daughter-in-law, 1929); plays for children, such as 'Imenyi Vlodka' (Vlodko's Name Day); and a number of autobiographical stories, such as 'Kazka mynulikh lit' (A Story of Bygone Years, 1923) and 'Probudzhennia' (Awakening, 1930).

Verkhovynsky, Andrii. See Voloshyn, Avhustyn.

Verkhvata [Verxvata]. A village on the Rata River in the Roztochia Upland, now in Lublin voivodeship, Poland. It was the site of a Basilian monastery (1678–1806), which was known for its miracle-working icon of the Holy Theotokos. With the closing of the monastery, the icon was transferred in 1810 to Krekhiv.

Verkhratsky, Ivan [Verxrats'kyj] (pseud: Ivan Chaika, Liubart Horovsky, Losun, Petro Pravdoliub, Liubart Spivomyr, Ivan Shchypavka), b 26 April 1846 in Bilche Zolote, Borshchiv county, Galicia, d 29 November 1919 in Lviv. Natural scientist and philologist; full (and later honorary) member of the Shevchenko Scientific Society (NTSh) from 1899 and the first chairman of its Mathematical-Natural Science-Medical Section. He studied at Lviv University (1865–8) and in Cracow (1874), worked as a Realschule and gymnasium teacher in Drohobych (1868–71), Lviv (1871–9, 1891–1908), and Stanyslaviv (1879–90), and founded the natural science cabinet at the Academic Gymnasium in Lviv and the NTSh Ethnographic Museum. He specialized in the flora and fauna, especially insects, of Galicia. He wrote numerous works, including the first Ukrainian high-school textbooks in zoology (1895, 1906) and botany (1905); the first Latin-German-Ukrainian dictionary of natural science nomenclature and terms (7 fascicles, 1864–1908); materials for a Ukrainian dictionary (1877); a register of vernacular botanical terms and nomenclature (1892); materials on mineralogical terminology (*Zbirnyk Matematychno-pryrodochno-likars'koi sektsii NTSh*, vol 13 [1909]); pioneering studies of the Maramureş (1883), Sian (1894, 1900), Transcarpathian (1901), Lemko (1902), Bukovynian (1908), and Dniester (1912) dialects; and liberal-populist polemical articles criticizing the Galician Russophiles and their use of the *yazychiie. His attempts at classifying and determining the etymologies of the dialects were dilettantish, but his descriptions of them

and data about their lexicon remain an important empirical source. In the 1870s Verkhratsky also wrote poetry and translated Polish verse into Ukrainian, and in 1880 he published the Stanyslaviv literary-scholarly newspaper *Dennytsia*, in which he included his own poems, stories, and articles under various cryptonyms.

R. Senkus

Boris Verkin

Ivan Vernadsky

Verkin, Boris, b 8 August 1919 in Kharkiv, d 12 June 1990 in Kharkiv. Low-temperature physicist; AN URSR (now ANU) full member from 1972. A graduate of Kharkiv University (1940), he joined the ANU Physical-Technical Institute in Kharkiv and served as its director in 1960–88. There in 1949 he discovered, with B. *Lazarev, quantum oscillations of magnetic susceptibility. He initiated the establishment of the ANU Physical-Technical Institute of Low Temperatures in Kharkiv in 1960 and was its director until 1988. Cryogenic instrumentation and superconducting magnets, in the development of which Verkin actively participated, have played an important role in low-temperature materials science and in cryomedicine.

Verlan, b and d ? 18th-century haidamaka leader. A captain of manorial Cossacks in the service of Prince Lubomirski in the Sharhorod district, he emerged as a leading figure in the uprising which engulfed most of Podilia early in 1734. By the summer the rebel forces, organized in a regiment, had taken Brody, Zhvanets, and Kremianets and were advancing on Kamianets-Podilskyi and Lviv. A large Polish force then quelled the rebellion. Verlan and a number of his supporters fled to Moldavia; his subsequent fate is unknown.

Vermenych, Andrii [Vermenych, Andrii], b 4 July 1897 in Hradyzke, Kremenchuk county, Poltava gubernia, d 20 September 1979 in Dnipropetrovske. Stage actor and singer (baritone). He began his career in D. Haidamaka's troupe (1916) and worked in various Ukrainian touring troupes until 1930. Then he was an actor in the Donbas Theater of Musical Comedy. In 1934 he completed study at the Moscow Theater Institute (by correspondence) and joined the Dnipropetrovske Ukrainian Music and Drama Theater.

Vermenych, Volodymyr [Vermenych], b 3 August 1925 in Borysy, Kremenchuk okruha, d 11 December 1986 in

Kiev. Composer, conductor, and teacher. A graduate of the conducting (1954) and composition (1970) faculties at the Kiev State Conservatory in the class of M. Dremluha, he taught singing and led school choruses in Kiev (1952–60) and lectured at the Kiev Pedagogical Institute (1963–5) before devoting himself exclusively to composing. His works include the cantata for chorus and orchestra *Song about the Stormy Petrel* (1970); choruses to texts by I. Nekhoda, L. Tatarenko, and A. Kaspruk; and solo songs to texts by M. Synhaisky, V. Korotych, and others.

Verna, Petro, b 5 January 1877 in Hora, Pereiaslav county, Poltava gubernia, d 3 April 1966 in Hora. Wood carver. He carved portraits of T. Shevchenko (1912) and I. Kotliarevsky (1950) and compositions inspired by the works of N. Gogol (*Taras Bulba with Sons* [1913]), Shevchenko (*Perebendia* [1947], *My 13th Year Was Coming to an End* [1947]), and Kotliarevsky (*The Aeneid* [1948]). K. Promenetsky's book about him was published in 1958.

Vernadsky, George [Vernads'kyj, Jurij], b 20 August 1897 in St Petersburg, d 12 June 1972 in New Haven, Connecticut. Historian; son of V. *Vernadsky. He studied in Moscow and St Petersburg. Having emigrated to the United States via Prague (1926–7), he joined the history department at Yale University and was a full professor there in 1946–56. He was instrumental in developing the university's Slavic holdings and gained renown as one of the foremost English-language Russian historians. His major achievement was the five-volume *History of Russia*, which included *Ancient Russia* (1943), *Kievan Russia* (1948), *The Mongols and Russia* (1953), *Russia at the Dawn of the Modern Age* (1959), and *The Tsardom of Moscow* (1967). Although of Ukrainian descent and well versed in Ukrainian history, he integrated the history of the Ukrainians into his general scheme of Russian history. His most Ukrainophile work was a biography of Hetman B. Khmelnytsky, *Bohdan, Hetman of Ukraine* (1941). A festschrift in his honor was published in 1964.

Vernadsky, Ivan [Vernads'kyj], 24 May 1821 in Kiev, d 27 March 1884 in St Petersburg. Economist; father of V. *Vernadsky. He studied philosophy and Slavic philology at Kiev University and political economy at St Petersburg University. He taught at Kiev University and completed his PH D dissertation on the Italian school of political economy at Moscow University (1849). He taught political economy at Moscow University (1851–6), served as an adviser to the Ministry of Internal Affairs in St Petersburg (1857–67), and was director of the Kharkiv branch of the State Bank (1868–76). He published and edited the weekly paper *Ekonomicheskii ukazatel'* (later *Ukazatel' politiko-ekonomicheskii: Statisticheskii i promyshlennyi zhurnal*, 1857–61) and a supplement (1859–61) devoted specifically to economic topics, which became a separate, but irregularly published, journal titled *Ekonomist* (1861–5).

As an economist Vernadsky was interested in a variety of problems, including the history of economic thought, methodology, theoretical and practical statistics, international trade, and agriculture. His many publications include *Ocherk teorii potrebnosti* (An Outline of the Theory of Needs, 1857), *Istoricheskii ocherk prakticheskoi statistiki* (A Historical Survey of Practical Statistics, nd), *Politicheskoe ravnovesie v Anglii* (Political Balance in England, 1855), *Ocherk istorii politicheskoi ekonomii* (An Outline of the His-

tory of Political Economy, 1858), and *O mene i tovgovle* (On Barter and Trade, 1865). Vernadsky also wrote many publicistic articles on economic, social, and political topics. He argued for the complete emancipation of the peasants and the introduction of individual, capitalist farming and advocated a laissez-faire approach to all economic issues.

Volodymyr Vernadsky

Vernadsky, Volodymyr (Vladimir) [Vernads'kyj], b 12 March 1863 in St Petersburg, d 6 January 1945 in Moscow. Pioneering geochemist, mineralogist, and crystallographer, philosopher of science, political activist, and politician; full member of the Russian (later USSR) Academy of Sciences from 1912, the VUAN from 1918, and the Czechoslovak and Yugoslav academies of sciences from 1926, corresponding member of the French Academy of Sciences from 1928, and member of the Ukrainian Scientific Society in Kiev, the Poltava Prosvita society, the Shevchenko Scientific Society, and the Volhynian Scientific Society; son of I. *Vernadsky and father of G. *Vernadsky. After graduating from St Petersburg University (1885) he did graduate work there and in Munich and Paris (1888–9) and was elected president (1886) of the United Council of Regional Student Organizations in the Russian Empire. He taught at Moscow University (1891–1911; professor from 1898) and was a member of the Russian State Council (1906–11). Vernadsky had close genealogical, personal, and intellectual links to Ukraine. From 1889 to 1918 he spent part of nearly every summer in Poltava gubernia. In 1890 he researched the soils of Kremenchuk county as a member of V. *Dokuchaev's soil-science expedition.

After the February Revolution of 1917 Vernadsky chaired the Agricultural Scholarly Committee of the Russian Ministry of Agriculture, returned to Moscow University as chairman of its department of mineralogy and geology, and was appointed (in August) the Russian deputy minister of education in charge of all universities and scientific institutions. After the Bolshevik coup he fled to Ukraine. In 1918, at the behest of M. Vasylenko and the Hetman government, he headed the group of Ukrainian scholars that drafted the detailed project for founding the UAN. In 1918–19 he served as the first UAN president, organized the UAN chemical laboratory and Commission for the Study of Ukraine's Natural Productive Forces, was active in the geological and agricultural scholarly committees of Ukraine, and lectured at Kiev University. Although he was a liberal supporter of the idea of 'Russian' unity

and a vocal opponent of the Bolsheviks, Whites, and the UNR Directory, he resigned from the Russian Constitutional Democratic party because of the Russian chauvinism of its Ukrainian wing. In 1919, while visiting Rostov, he was unable to return to Ukraine and ended up in the White-controlled Crimea, where he was a professor and rector of Tavriia University in Symferopol in 1920.

In 1921 Vernadsky returned to Petrograd and organized the Radium Institute there. In 1922 he went to Paris to work with M. Curie and lecture at the Sorbonne. In 1926 he returned to Russia, and from 1928 until his death he directed the USSR academy's Radium Institute and Laboratory for Geochemical Problems, the precursor of the Institute of Geochemistry and Analytical Chemistry (est 1947), in Leningrad. Under Soviet rule Vernadsky was a spokesman for preserving the academy's autonomy and for freedom of thought and travel. In the 1930s he headed the academy's new commissions on the Permafrost and Heavy Water, began the building of the first Soviet cyclotron, and oversaw the development of Soviet radiogeology and biochemistry. In 1940 he cofounded the academy's Uranium Commission and was elected its vice-chairman.

Vernadsky's ideas became the core of new directions in geology, mineralogy, and hydrogeology, and he is regarded as the founder of Soviet geochemistry and biogeochemistry. He wrote extensively about philosophical issues in science, popularized the concepts of the biosphere and noosphere, and developed radiogeological and radiochemical concepts. Vernadsky's scholarly works include books of lectures on crystallography (1894) and mineralogy (1908), a classic study on the fundamentals of crystallography (1904), an unfinished descriptive mineralogy of the Russian Empire (vol 1, pts 2 [1909], 4–5 [1912, 1914], vol 2, pt 1 [1918]), two volumes of studies and speeches (1922), a history of the minerals of the earth's core (4 vols, 1923, 1927, 1933–4), the pioneering *La Géochimie* (1924) and *La Biosphère* (1929), and a book of biochemical studies conducted in 1922–32 (1940). The summation of his life's work, a monograph on the chemical structure of the earth's biosphere and its surroundings, was published in censored form in 1965, 20 years after his death. Also censored were his 'thoughts of a naturalist' on space and time in nature and on scientific thought (2 vols, 1975).

Vernadsky has been a very popular figure in Russia and Ukraine, particularly since the 1960s. Many books and articles about him have appeared, as have posthumous Russian editions of his collected works (5 vols, 1954–5, 1959–60), selected works (1959), collected works on biogeochemistry (1967), the history of science (1981), and crystallography (1988), and writings on the history of science in Russia (1988). A Ukrainian edition of his selected works was published in Kiev in 1969.

S. Trofimenko

Vernydub. A mythical character in Ukrainian folktales. Vernydub (literally, 'oak uprooter') is a giant who can up-

root mighty oaks and use them as weapons or roadblocks. He often appears with other heroic figures, such as Vernyhora ('Mountain Mover'), Lomykhashcha ('Bush Thrasher'), Misyzalizo ('Iron Kneader'), Tovchykamin ('Stone Crusher'), and Valybuk ('Beech Breaker').

Vernyhora. A mythical figure in Ukrainian folktales. Vernyhora is a giant who can level mountains with a push of his shoulder. He usually appears in the role of the protagonist's ally and helps him to free his fiancée or to defeat a dragon or a witch. Vernyhora is also the name of a legendary figure in the historical novels of Polish writers of the Ukrainian school (M. Czajkowski, J. Słowacki, S. Wyspiański, and others), in which he is depicted as a peasant seer of the 18th century who foresaw the future of Poland and Ukraine.

Vernyhora. A publishing house founded by P. *Kashynsky in 1916 in Kiev. By the end of 1917 it had issued some 30 publications: popular books and pamphlets on Ukrainian history and culture, a school grammar, fables, poetry, stories, political pamphlets, a map of Ukraine, placards, and translations of D. Defoe's *Robinson Crusoe*, Molière's *Tartuffe*, and F. Nietzsche's *Thus Spoke Zarathustra*. It continued operating in Kiev until 1921. A branch of Vernyhora functioned in Vienna from 1918 to 1923. Kashynsky renewed the press in Munich in 1946 and published a few more works there until 1948 (eg, M. Dolnytsky's geography of Ukraine, I. Krypiakevych's history of Ukraine, and M. Terletsky's histories of the Middle Ages and the modern world).

Hryhorii Verovka

Verovka, Hryhorii [Ver'ovka, Hryhorij], b 25 December 1895 in Berezna, Chernihiv county, Chernihiv gubernia, d 21 October 1964 in Kiev. Composer, conductor, and pedagogue. He began his musical studies at the Chernihiv seminary, learned composition theory from B. Yavorsky (1918–21), and graduated from the Kiev Conservatory (1933). He taught at the Lysenko Music and Drama Institute (1923–7) and the Kiev Conservatory (1931–64). Verovka achieved his renown as artistic director and principal conductor of the Ukrainian (later *Verovka) State Chorus, from 1943 until his death. In 1948–52 he also headed the

*Union of Composers of Ukraine. His works include the cantatas *Tam na hori za Dnipro* (There, on the Hill beyond the Dnieper, 1924), *To ne viter* (It Is Not the Wind, 1941), and *Ne spochyvajte* (Do Not Rest, 1956); chamber music; pieces for folk orchestra; choruses; songs; and arrangements of Ukrainian folk songs.

The Verovka State Chorus

Verovka State Chorus (Derzhavnyi akademichnyi ukrainskyi narodnyi khor im. H. Verovky). A professional performing collective founded as the Ukrainian State Choir in Kharkiv in 1943 and based in Kiev since 1944. The ensemble consists of a mixed chorus, dance troupe, and folk orchestra. Its repertoire includes traditional and recent Ukrainian folk songs, works of contemporary Ukrainian composers, and classical music, and its style is based on a refined form of traditional Ukrainian folk harmonizations. The ensemble is the largest collective of its kind in Ukraine and the most influential in artistic terms. Notwithstanding a routine amount of propaganda in its performances, during the Soviet period the ensemble fostered traditional forms of music-making and supported Ukrainian folk artists, such as N. *Matviienko, V. Martynenko, I. Melnychenko, P. Pavliuchenko, N. Tsiupa, and V. Boiko. The chorus has made numerous recordings on the Melodiya label and has concertized throughout the former USSR and abroad. Its artistic directors have been H. *Verovka (1943–64), E. *Skrypchynska (1964–6), and A. *Avdiievsky (since 1966). The group was named after Verovka in 1964.

Versailles, Treaty of. The treaty negotiated at the 1919 *Paris Peace Conference between the victorious Allied and Associated Powers and the new Polish and Czechoslovak republics on the one hand, and Germany on the other. It was signed at Versailles on 28 June 1919 and was in many respects identical to the Treaty of *Saint-Germain with Austria. The Treaty of Versailles went into effect on 10 January 1920. The Allied Powers reiterated their recognition of Poland's sovereignty and independence, its membership in the League of Nations, and its incorporation of portions of the former German Empire defined in the treaty with Germany. Persons habitually resident in Polish-occupied territories were recognized as Polish nationals, but they could abandon Polish nationality within two years after the coming into force of the treaty. Poland agreed to articles guaranteeing all of its citizens basic human, civil, and political rights and freedoms and providing its minorities (Germans, Ukrainians, Jews, Belarusians) with adequate facilities for the use of their language before the courts; with the right to use their own language and to exercise their religion in their own charitable, religious, and social institutions, schools, and other educational establishments; with public education facilities

adequate for ensuring that in the primary schools instruction would be given to their children in their own language; and, in towns and districts where there was a considerable proportion of such minorities, with an equitable share of public funds for educational, religious, or charitable purposes. A separate article stated that the aforementioned stipulations constituted obligations of international concern and should be placed under the guarantee of the League of Nations, and that any dispute arising therefrom would be referred to the Permanent Court of International Justice. Chapter 2 of the treaty defined Poland's diplomatic and commercial relations with the Allied and Associated states and its adherence to existing telegraphic and radio-telegraphic, railway, sanitary, and other conventions.

R. Senkus

Vershigora, Petr [Veršigora, Pjotr], b 16 May 1905 in Severynivka, near Rybnytsia, Bessarabia, d 27 March 1963 in Moscow. Soviet Russian actor, military figure, and writer. He graduated from the Odessa Conservatory (1930) and worked as an actor. He became a director at the Kiev Artistic Film Studio in 1939. During the Second World War he was a Soviet partisan commander with the rank of major-general. He wrote three books of reminiscences about S. Kovpak's partisan forces in Western Ukraine.

Versification. Excluding folk poetry and recently discovered examples dating back to Kievan Rus', the first documentary evidence of versification in Ukraine dates from the late 16th century. It includes the poems in the Ostrih Bible (1581) and A. Rymsha's *Khronolohiia* (Chronology). In the early 17th century, verse began to develop rapidly. Initially, Ukrainian poetry consisted of syllabic verse, usually with 11, 12, or 13 syllables, with a caesura after the 6th or 7th. The rhyme scheme was predominantly contiguous and based on verbal endings. That pattern persisted until the late 18th century.

In the late 18th century (I. Kotliarevsky's period), syllabo-tonic verse appeared; it has been the dominant form in Ukrainian poetry since then. Iambic dimeter and tetrameter are the most common forms (Kotliarevsky wrote in the latter measure, as did T. Shevchenko in some works). Iambic unrhymed pentameter was also used (in Lesia Ukrainka's dramatic poems). The *Neoclassicist group of poets used Alexandrine iambic hexameter. Although less common, trisyllabic meter (dactyls, amphibrachs, anapests) is also used in Ukrainian poetry – dactylic hexameter with trochees, for example. M. Zerov used the last-named form, as well as combinations of pentameter and hexameter.

Polymetric forms with no set number of syllables in feet, or feet per line, have come to dominate modern poetry; they are known as *vers libre* or free verse. Such forms combine feet of varying lengths and often border on rhythmic prose (the early works of P. Tychyna provide an example). *Dolnyks* (fixed stress lines – usually three) are also used. The stress remains constant per line of verse by singling out individual words regardless of the number of their constituent syllables (eg, in O. Vlyzko's works).

The use of strophes in Ukrainian poetry is rich and varied, although odd-numbered strophes are avoided because they are asymmetrical. Two-line strophes are very rare in modern poetry, as are three-line strophes, which are more often used in chain rhymes (*aba*, *bcb*, etc) and in

tercets of iambic pentameter (I. Franko, Yu. Klen, M. Orest). The most widely used strophe is the quatrain, which is the dominant form in folk songs. The most common rhyme schemes are the *abab* or *abcb* patterns (the latter is typical of folk songs and of some of Shevchenko's poetry). The five-line strophe occurs rarely but is used by Franko, Lesia Ukrainka, and most often, Tychyna. More common is the iambic pentameter or hexameter six-line strophe. Seven-line strophes are also rare but occur in Lesia Ukrainka's poetry. The eight-line strophe, or octave, occurs widely; in its canonic form it bears an *abababcc* rhyme scheme. That pattern appears in the work of P. Kulish, V. Samiilenko, Franko, the Neoclassicists, T. Osmachka, and others. Nine-line and 10-line strophes occur rarely, although Kotliarevsky's *Eneida* (Aeneid) is written in a 10-line form (*ababccdeed*). The 20th century has seen the appearance of heterometric strophes, such as those in Tychyna's works. More infrequent are complex strophic (logaoedic) forms derived from ancient classical poetry, such as Alcaic, Asclepiadean, and Sapphic, which appear in the work of Zerov and Orest.

Poetic forms that appeared in medieval Romance poetry, such as the sonnet, triolet, rondelle, rondo, and sestina, were not represented in Ukrainian verse until much later. The first sonnets in Ukrainian poetry were written in the mid-19th century, and the form was subsequently developed by Franko, M. Cherniavsky, and succeeding generations of writers. In the 20th century the sonnet became common and was brought to a high level of sophistication by Zerov and M. Rylsky. Sonnetoids (sonnets with departures from the standard metrical arrangement and rhyme scheme) have also been written in Ukrainian (most recently by E. Andiiivska). Sonnet cycles have been written by M. Zhuk, V. Bobynsky, O. Tarnavsky, and I. Kalynets. Triolets have been written by M. Drai-Khmara, Tychyna, M. Vorony, and D. Zahul; sestinas, by M. Zhuk and L. Mosendz.

In the early 1930s, versification went into decline as a result of pressures exerted on Ukrainian literature and culture in general. The efflorescence of poetic devices during the 1920s was denounced as a feature of formalism and suppressed in favor of the primitivistic mimicry of folk poetry as practiced by a younger generation of writers.

Versta. See Weights and measures.

Vertebny, Vadym [Vertebnyj], b 11 September 1930 in Kiev. Nuclear physicist. A graduate of Kiev University (1952), in 1970 he joined the AN URSS (now ANU) Institute for Nuclear Research, where he has worked on cross sections of neutron-induced reactions and nuclear-reactor design and development. Since 1976 he has also been a professor at Kiev University.

A *vertep*

Vertep. A venerable form of Ukrainian *puppet theater, regarded as distinct from the Polish *szopka*, the Belarusian *betleika*, and the Russian *petrushka*. The origins of the name *vertep* may be related to the verb *vertytysia* 'to whirl,' as do rays about a star. The *vertep* performance is a standardized enactment of the Nativity with merry interludes depicting secular life, in the style of an *intermede. There are 10 to 40 *vertep* characters, typically among them a sacristan, angels, shepherds, Herod, three kings, Satan, Death, Russian soldiers, gypsies, a Pole, a Jew, a peasant couple, and various animals. All the hand puppets are usually operated by one person, the *vertepnyk*. The *vertep* is also the two-level stage in the form of a building in which the performance takes place, the religious part on the upper level and the secular part on the lower.

Vertep performances date back to the late 16th century. They reached their height in popularity in the second half of the 18th century. Many students from the Kievan Mohyla Academy contributed to the development of *vertep* puppet theater; its two-part performance was in part a reflection of the academy's style of theatrical productions. Itinerant precentors were also responsible for popularizing *vertepy*. In time the specifications as to *vertep* stage architecture; the number, character, and construction of the puppets; and costumes, music, and scripts became well defined. The foremost village *vertepy* were in Sokyrnytsi, Baturyn, and Mezhyhiria. The secular part in *vertep* performances often contained references to contemporaneous events; a Zaporozhian Cossack puppet, for example, appeared during the reign of Catherine II.

Vertep theater declined in the mid-19th century. It has retained a symbolic significance, as in the miniature Nativity scene displayed in Ukrainian homes during the Christmas season and in the Christmas carolers dressed up as *vertep* characters. In the 20th century *vertep* theater

has been revived as a *zhyvyi* 'live' *vertep*, with live actors faithfully re-creating the traditional village *vertepy*, by, for example, L. Kurbas's Molodyi Teatr, the Lviv Ukrainian Drama (Zankovetska) Theater, the Avant-Garde Ukrainian Theater in Toronto, and the New Generation Theater in Cleveland.

Dziga Vertov

Yevhen Vertyporokh

Vertov, Dziga (real name: Kaufman Denys), b 2 January 1896 in Bialystok, Poland, d 12 February 1954 in Moscow. Film director and cinema theoretician. From 1926 he worked in the All-Ukrainian Photo-Cinema Administration, where he produced the films *Odyndatsiatyi* (The Eleventh, 1928) and *Liudyna z kinoaparatom* (Man with a Movie Camera, 1929) and his first sound movie, *Symfoniia Donbasu* (Symphony of the Donbas, 1930). He used split screens, multiple superimpositions, and variable speeds in an attempt to support his theoretical claim concerning the power of the camera eye – techniques which influenced international filmmakers. Accused of formalism in 1937, he subsequently worked mainly on Soviet documentaries and newsreels.

Vertyporokh, Yevhen [Vertyporox, Jevhen], b 17 April 1898 in Liashky Korolivski, Peremyshliany county, Galicia, d 12 January 1973 in Toronto. Organic chemist and community leader; full member of the Shevchenko Scientific Society (NTSh) from 1934. A graduate of the Danzig Polytechnic (1926; doctorate, 1929), he worked there in the department of organic chemistry and technology (1926–34), headed the Ukrainian Hromada in Danzig (1932–4), and was a department head in the largest Polish pharmaceutical company in Warsaw (1935–41). He chaired the general chemistry department of the Lviv Medical Institute and was dean of the Lviv Pharmaceutical Institute (1942–4). A postwar refugee, he was a professor of chemistry at the UNRRA University in Munich (1946–7) and dean of the pharmaceutical faculty at the Ukrainian Technical and Husbandry Institute there (1947–8). In 1948 he settled in Toronto, where he founded and was the long-term president of the NTSh in Canada (1949–73). In 1966 he was elected a fellow of the Chemical Institute of Canada.

Verv. A clan-territorial rural unit in ancient Ukraine, consisting of one or more villages and peasant homesteads. Smaller than a volost, the *verv* corresponded to the Polish *opole*, the Serbian *okolyna*, and the Novgorod-Muscovite *pogost*. Originally the *verv* might have been a clan unit, which developed on a territorial basis after the dissolution of the clan system and the advancement of civic relations over kinship relations. The *verv* also encompassed newcomers, foreigners, and tradesmen who lived on its territory. All its members were called *liudii*.

The *verv* was governed by the *kopa* or **viche*. It was also an administrative entity and had a *community court, whose members were bound by collective responsibility (see **Hromada*). If a crime was committed, the *verv* was responsible for conducting the investigation (*honyty slid*), and if it failed to find the culprit, the community assumed responsibility for the crime committed on its territory. The *verv* performed the duties of a tax collector for the prince and constituted a military defense unit. In the Christian period the *verv* became an administrative unit with its own church.

The main source of information about the *verv* is *Ruskaia Pravda*, which includes 15 articles on the subject. Another source is the Polatsk Statute (15th–17th centuries). Among scholars K. Bestuzhev-Riumin and A. Yefymenko emphasize the clan character of the *verv*, and M. Vladimyrsky-Budanov, V. Sergeevich, and R. Lashchenko argue for its territorial-civic character.

V. Markus

Vervain (*Verbena*; Ukrainian: *verbena, telezniak*). Annual and perennial grasses and small shrubs with showy, phloxlike flowers in various shades of blue, purple, yellow, and white. Large-flowered plants are usually called verbenas. Medicinal or European vervain (*V. officinalis*) grows in Ukraine as a weed. It was used in folk medicine to treat a number of ailments, including kidney stones. Another native species is *V. supina*. *V. hybrida* is cultivated for decoration in parks and gardens.

Hryhorii Verves

Mykhailo Verykivsky

Verves, Hryhorii, b 15 April 1920 in Petrove, Oleksandriia county, Kherson gubernia. Slavist; AN URSR (now ANU) corresponding member since 1978. In 1942 he graduated from the Unified Ukrainian University in Kzyl Orda, Kazakhstan (see **Kiev University*), and in 1945 he began postgraduate studies at the Institute of Literature of

the ANU. Subsequently he became a scholarly secretary, senior associate, and department head at the institute. He is a specialist on Ukraine's literary relations with the rest of the Slavic world, particularly with Poland, and has written many articles and books, on topics such as A. Mickiewicz in Ukrainian literature (1955), I. Franko and the question of Ukrainian-Polish literary and civic relations from the 1870s to 1890s (1957), the main problems in 19th-century Ukrainian-Polish literary relations (1958), J. Słowacki and Ukraine (1959), W. Orkan and Ukrainian literature (1962), T. Shevchenko and Poland (1964), the traditional and the innovative in 20th-century Slavic poetry (1968), M. Rylsky in the circle of Slavic poets (1972), Ukrainian literature in a general Slavic context (1978), J. Iwaszkiewicz (1978), Mickiewicz (1979), and Polish literature and Ukraine (1985). Editions of his literary essays have been published in Polish (1972) and Ukrainian (1976, 1983). Verves edited a book of essays on literary relations among the socialist countries (1980) and was chief editor of the Institute of Literature's edition of articles on Ukrainian literature in a general Slavic and world literary context (5 vols, 1987–).

R. Senkus

Veryha, Vasyl, b 3 January 1922 in Kolodribka, Zali-shchyky county, Galicia. Librarian, community activist, and journalist; member of the Shevchenko Scientific Society. A veteran of the Division Galizien, he emigrated to Canada in 1951, where he worked as a librarian at the University of Toronto (1961–87). He has played an active role in Ukrainian community affairs, particularly in Ukrainian veterans' associations (co-editor of *Visti kombatanta* in 1965–74), and contributed to the Ukrainian press. He published an English-language booklet on the status of national languages in Soviet television broadcasts (1972), a monograph on the Galician Socialist Soviet Republic of 1920 (1986), and several books dealing with the history of the Division Galizien, including *Dorohamy druhoi svitovoi viiny* (Along the Roads of the Second World War, 1981) and *Pid sontsem Italii* (Under the Sun of Italy, 1984). In 1988 he was elected secretary general of the World Congress of Free Ukrainians.

Verykivsky, Mykhailo [Verykivs'kyj, Myxajlo], b 20 November 1896 in Kremianets, Volhynia gubernia, d 14 June 1962 in Kiev. Composer, conductor, and teacher. He graduated from the Kiev Conservatory (1923) in the composition class of B. Yavorsky and then conducted the Kiev Opera (1926–8), the Kharkiv Opera (1928–35), and symphony orchestras in Kiev, Kharkiv, Moscow, and Ufa. He also taught at the Lysenko Music and Drama Institute and the Kiev Conservatory. His works include the ballet *Pan Kanovsky* (1930, 2nd edn 1953); the Shevchenko-based operas *The Captain* (1938) and *The Servant Girl* (1940; premiered 1943); operas to texts by L. Hlibov, M. Kotsiubynsky, and O. Vyshnia; an oratorio on Marusia Bohuslavka; five cantatas; a concerto for piano and orchestra (1950); a number of orchestral works; a large body of piano music; chamber and church music; original choral works and arrangements of Ukrainian folk songs for chorus; about 70 original solo songs and settings of Ukrainian folk songs for voice and piano; children's songs; and music for radio and films. N. Zhurova published a monograph about Verykivsky in 1972.

Verzylov, Arkadii, b 22 December 1867 in Kovchyn, Chernihiv county, Chernihiv gubernia, d ? Historian. A pupil of V. Antonovych, in the 1920s he taught at an agricultural *tekhnikum* in Chernihiv and did research at the historical-philological division of the VUAN. His scholarly publications include a study of trade in Ukraine in 1480–1569 (in *Zemskii sbornik Chernigovskoi gubernii*, 1898, nos. 1–4, and separately, 1899), a description of daily life in the medieval period in the Chernihiv region, and an account of the Chernihiv Hromada (both in *Chernihiv i pivnichne Livoberezhzhia*, 1928). His recollections about M. Kostomarov and V. Antonovych appeared in *Ukraina* (1928, no. 6).

Vesela bryhada (Happy Brigade). A children's magazine published by the Communist Youth League of Ukraine and the People's Commissariat of Education, semimonthly in 1931–3 and then monthly to 1937 in Kharkiv. It contained materials on extracurricular activities and education. In August 1937 it was merged with **Pioneriia*.

Vesele. VI-15. A town smt (1988 pop 11,900) and raion center in Zaporizhia oblast. It sprang up in 1812 as a village of runaway serfs and army recruits. In 1957 it was granted smt status. The town has a powdered-milk factory, a grain elevator, a canning factory, and an asphalt plant.

Veseli Bokovenky [Veseli Bokoven'ky]. A dendrological park situated along the Bokovenka River valley in Dolynska raion, Kirovohrad oblast. Established in 1893 according to a design by the fresco painter I. *Padalka, the park initially consisted of 109 ha of landscaped area. In 1924 it was nationalized, and in 1962 a selection station for the Ukrainian Scientific Research Institute of Forest Management and Agroforest Amelioration was added to it and the park area thereby increased to 543 ha. Veseli Bokovenky contains over 960 species and varieties of local and imported trees and bushes, including rare specimens of mountain oak, yellow cypress, and yellow poplar.

Veselka (Rainbow). A publishing house of children's literature in Kiev. It was founded in 1934 as Dytvydav. It ceased functioning after the German invasion of 1941, renewed operations in 1956, and was renamed in 1964. Veselka has published books of prose, poetry, folktales, proverbs, science fiction, popular-educational literature, songs, and games for children and teenagers. These include anthologies and single-author editions of works by Soviet Ukrainian and Russian writers, reprints of Ukrainian and Russian classics, and anthologies and single-author editions translated from the literatures of the USSR (especially Russian) and other countries. Since 1976 Veselka has published an annual collection of articles about Ukrainian children's literature and writers, *Literatura, dity, chas* (Literature, Children, Time). In 1981–5 Veselka issued 1,230 titles with a combined pressrun of 206 million copies. A 631-page bibliography of the books it and Dytvydav published in the years 1934–84 appeared in Kiev in 1985.

Veselka (Rainbow). A literary monthly published in 1922–3 in the internment camp for veterans of the Army of the UNR in Kalisz, Poland. It contained literary contributions and articles on culture and the arts, primarily by internees in the camp. The journal was edited by a board

that included Ye. Malaniuk, M. Selehi, I. Zubenko, A. Korshnivsky, F. Krushynsky, and A. Padolyst. Writers associated with the journal also organized literary evenings, acting courses, and other events.

Veselka (Rainbow). A semimonthly for Ukrainian children in the Prešov region of Slovakia, published by the Czechoslovak Youth League. It first appeared in Russian in September 1951 as *Pionerskaia gazeta*. From 1953 it was published in Ukrainian as *Pioners'ka hazeta*, and since 1968 it has been called *Veselka*. Initially the magazine was published in Bratislava, but since 1965 it has appeared in Košice. Among its editors have been A. Konchok, Z. Hanudel, L. Starunska, V. Bodnar, and M. Bobak.

Various covers of *Veselka*

Veselka (Rainbow). A monthly children's magazine published in Jersey City, New Jersey, since September 1954 by the Ukrainian National Association. Edited by V. Barahura, B. Hoshovsky, R. Zavadovych, and other members of the Association of Ukrainian Writers for Young People, it contains fairy tales, stories, poems, games, puzzles, and songs. The magazine's subscriptions dropped from a high of approx 6,000 in 1954 to approx 1,000 in 1984.

Veselovska, Zinaida [Veselovs'ka, Zinajida], b 4 July 1900 in Kharkiv, d ? Linguist. After completing her graduate studies at the Kharkiv Institute of People's Education (1920s) she taught at Kharkiv University. She wrote articles on the language of H. Kvitka-Osnovianenko (1927), the language and stress in P. Berynda's lexicon (1927, 1929), Ukrainian and Russian vernacular terms used in hemp and flax cultivation (1929), and the grammar of workers' speech (1934) and was a coauthor of an advanced course book on the Ukrainian language edited by L. Bulakhovsky (1929). Her research in the 1950s and 1960s culminated in a monograph on stress in East Slavic languages from the late 16th to the early 18th century.

Veselovsky, Aleksandr [Veselovskij], b 16 February 1838 in Moscow, d 23 October 1906 in St Petersburg. Russian literary scholar and ethnographer; corresponding

member from 1876 and full member from 1881 of the Russian Academy of Sciences. He graduated from Moscow University in 1859. He worked in Spain and studied in Berlin, Prague, and Italy before becoming a professor at St Petersburg University in 1872. In his writings on Slavic and world literature he combined the historical-cultural and comparative approaches. He analyzed many Rus' legends, literary monuments, and apocrypha in a European context and described the literary influence of the Byzantine Empire on medieval Europe as an intermediary between the West and the East. Using parallels in Slavic, Byzantine, and Western European sources, he produced a comparative structural analysis of the *bylyny* (Rus' epics) against the background of Ukrainian folklore and constructed a genre of 'Kievan *bylyny*' that had once existed in southern Rus'. Among his many works are books on Slavic tales about Solomon and Kitovras and the Western legends of Morolf and Merlin (1872, his PH D diss) and on the southern Rus' *bylyny* (1885), a series of investigations of Rus' spiritual poems, and reviews of ethnographic studies by V. Antonovych, M. Drahomanov, and P. Chubynsky. An edition of his collected works (vols 1–6, 8, 16, 1908–38), a book of his selected articles (1939), and his book on historical poetics (1940) were published posthumously. A bibliography of his works is found in a collection of articles published in his memory in Prague in 1921. Books about him have been written by B. Engelgardt (Petrograd 1924) and I. Gorsky (Moscow 1975).

R. Senkus

Veselovsky, Nikolai [Veselovskij, Nikolaj], b November 1848 in Moscow, d 12 April 1918 in St Petersburg. Russian archeologist. He graduated from St Petersburg University (1873) and taught there from 1890. Although a specialist in Oriental studies, he made some valuable archeological finds in Southern Ukraine, particularly the *Solokha kurhan and *Kamiana Mohyla. He posited that the numerous *stone *baby* in the region were Turkic in origin.

Veselovsky, Roman [Veselovs'kyj], b 1 February 1937 in Tashkent, Uzbekistan. Chemist. A graduate of the Kazan Chemical Technology Institute (1959), since 1959 he has worked at the AN URSR (now ANU) Institute of the Chemistry of Large-Molecule Bonds. In 1978 he became a department head. A specialist in adhesion phenomena in polymer systems, he developed the theory for new biodestructive polymers and created the technology to produce and apply them in medicine.

Veselovsky, Serhii [Veselovs'kyj, Serhij], b ca 1878 in Podilia, d ? Economist and politician. Before the Revolution of 1917 he graduated from the Kiev Polytechnical Institute. A member of the Revolutionary Ukrainian party and then the Ukrainian Social Democratic Workers' party, in 1917 he sat on both the Central and the Little Rada. In 1918 he was appointed consul in Petrograd by the Hetman government and then a professor of statistics at the new Ukrainian State University of Kiev. In the 1920s he headed the Agricultural Scientific Committee of Ukraine, taught at the Kiev Agricultural Institute (formerly a department of the Polytechnical Institute), and chaired the Department of Agricultural Economics. He was repressed during the Stalinist terror of the 1930s and fled to the West during the Second World War.

Veselyi Lviv. A theater of small forms, established in Lviv in 1942 under the artistic direction of playwright Z. *Tarnavsky. Its predecessors were the theaters Tsvirkun (1930–1) and Bohema (1933–4). Veselyi Lviv performed humorous and satirical sketches, monologues, songs, and dances with its own dance group, female quartet, and orchestra. It was active until 1944; its scope and style were revived by O. *Lysiak in the United States (1958–70).

Veselynov. VI-12. A town smt (1988 pop 7,400) on the Chychykliia River and a raion center in Mykolaiv oblast. It was founded at the end of the 18th century and named after its owners, the Veselynov family. In the 19th century the village belonged to Ananiv county, Kherson gubernia. In the second half of the century it was called Oleksandrivka. The town was granted smt status in 1960. Today it has a powdered-milk factory, a mixed-feed factory, and a hemp-processing mill.

Veshniak, Fedir [Vešnjak], b ?, d 1650. Cossack officer. A registered Cossack, he became colonel of Chyhyryn regiment at the beginning of the Cossack-Polish War in 1648. He was a trusted adviser to Hetman B. Khmelnytsky and wielded great influence in the military and organizational affairs of the Hetmanate. He carried out diplomatic missions for Khmelnytsky, including discussions in Warsaw in 1648 and Moscow in 1649, and was acting hetman on several occasions.

A painting depicting *vesnianky-hahilky* by Ivan Trush (oil, 1905)

Vesnianky-hahilky (also known in Galicia as *haiivky*, *iahilky*, *hahulky*, *halahilky*, *iaholoiky*, *maivky*, and *rohulky*). Ritual folk songs sung by girls in conjunction with ritual dances and games from early spring until the Feast of the Holy Trinity, particularly at Easter. In some regions they were sung only at Easter. They were performed in the village street, churchyard, cemetery, or pasture. Originally their purpose was to persuade the mysterious forces of nature to provide the people with a bountiful harvest and a happy life. The magical function of the songs was eventually forgotten, and they became entertainment.

The *vesnianky* season opened as a rule with a farewell to winter, which took place on Candlemas, the day marking the meeting of winter and summer and their strength, or at the first sighting of migratory birds. A straw or wooden image of winter called *Smert* (Death), *Mara* (Specter), or *Kostrub* (Slob) was burned or drowned to the singing of

vesnianky, and then spring, sometimes personified by a girl in a flower and herb wreath, was welcomed with ritual dances, such as *Mosty* 'Bridges' and *Vorotar* 'Gatekeeper'. The dialogue, 'O beautiful spring, what have you brought us?' – 'I have brought you summer, a pink flower, winter wheat, and all sorts of fragrant things,' was sung. In some localities bird-shaped bread was baked and tossed by children into the air to represent birds in flight. Many *vesnianky* were addressed to birds, groves and woods, and trees and flowers, asking them to assist the coming of spring.

The oldest *vesnianky* are those associated with ritual portrayal of plant growth and farm work (*Mak* 'Poppy', *Proso* 'Millet', *Ohirochky* 'Cucumbers', *Khmil* 'Hops', *Khrin* 'Horseradish', *Hrushka* 'Pear', *L'on* 'Flax') and the behavior of birds (*Horobchuk* 'Sparrow', *Soloveiko* 'Nightingale', *Husky* 'Geese', *Kachky* 'Ducks', *Kachuryk* 'Drake'), animals (*Vovk* 'Wolf', *Lysytsia* 'Fox', *Zaichyk* 'Bunny'), domestic animals (*Baran* 'Ram', *Kozel* 'Goat'), and insects (*Zhuk* 'Beetle'). Most of the *vesnianky* that have survived include motifs of courtship, the invitation to dance, female charms, true love, and the marriage proposal, but they also include mockery and satiric couplets about young men and women. These songs are of more recent origin. Sometimes they are accompanied a dance or game. Their purpose is to attract young suitors. These *vesnianky* are closely related to *wedding songs and *lyrical songs; they are a kind of prologue to forthcoming weddings. Many of them contain echoes of ancient family and social practices, such as the abduction and ransoming of girls, and the decisive role of the girl's mother in the setting up of the marriage. Some *vesnianky* contain references to the Princely era, mention of Dazhboh, images of Prince Roman, talk of tribute in honey, and battle accounts. The Cossack era is depicted in many songs about the wanderings of the peasant Cossacks, the campaigns, the Cossack's separation from his beloved, and various Cossack exploits. The genre reflects many historical periods and often deforms the concrete details. Some *vesnianky*, such as *Dunai*, *Vorotar*, and *Mosty*, originated in Western Europe and were brought to Ukraine. The songs are rich in imagery, associations, antitheses, similes, and especially psychological parallelism. The simple but moving melodies have a deep rhythmic structure punctuated with frequent exclamations. **Ryndziivky*, a form of *vesnianky*, were sung at Easter by young men in the Yavoriv area in Galicia.

In Soviet Ukraine the *vesnianky* began to disappear after the revolution and were completely gone by the end of the famine of 1933. Today they are sung only by professional and amateur ensembles. In the Ukrainian communities of Western Europe and North and South America they remain a part of the Easter celebrations. They continue to be performed by young people in the churchyard after the blessing of the Easter bread.

The *vesnianky* began to be recorded systematically only in the mid-19th century. They can be found in almost every song collection: there are 91 in Ya. Holovatsky's *Narodnye pesni z Galitskoi i Ugorskoi Rusi* (Folk Songs of Galician and Hungarian Ruthenia, 1878) and 184 (and 108 melodies) in V. Hnatiuk's *Haiivky* (1909). To date the fullest collection is O. Dei's *Ihry ta pisni* (Games and Songs, 1963), which contains 368 texts and 129 melodies. The *vesnianky* had an important influence on the development of lyric poetry in Ukrainian classical literature (H. Skovoroda, M. Shashkevych, T. Shevchenko, I. Franko, Lesia Ukrainka).

In music they were exploited by P. Nishchynsky, M. Lysenko, M. Leontovych, S. Liudkevych, and others. They were presented on stage in the ethnographic-realist plays of M. Starytsky, I. Karpenko-Kary, and I. Tobilevych and were depicted on canvas by I. Trush, O. Kulchytska, Ya. Surmach, and others. In recent times they have made their way onto film and television. In 1988 Czechoslovak television filmed *Lety mii vinochku* (Fly, My Wreath), with screenplay by M. Mushynka, based on the Ukrainian *vesnianky* of the Prešov region.

The Vesnivka choir

Vesnivka (Spring Song). A female choir of about 60 singers in Toronto. Founded in 1964 as a church choir for the St Nicholas Ukrainian Catholic parish, the group has staged concerts in Toronto, Rome, Chicago, Montreal, and New York. It has toured Canada (1976); Britain (1980); Germany, Austria, and France (1983); Brazil (1986); and Ukraine (1991). Its repertoire includes Ukrainian and French-Canadian folk songs, classical music by composers such as W. Mozart, F. Schubert, and J. Brahms, and modern music. A. Hnatyshyn wrote a Liturgy for the choir in 1968. The choir performed M. Lysenko's operetta *Koza Dereza* (Billy Goat's Bluff) in 1973 and 1979. The ensemble took first place in the CBC Radio choir competitions in 1984 and 1986. Since the beginning the choir's founder, K. *Zorych-Kondracki, has served as its conductor and musical director.

Vesolovsky, Bohdan [Vesolovs'kyj], b 30 May 1915 in Vienna, d 17 December 1971 in Montreal. Composer of light music. He studied music at the Lysenko Higher Institute of Music. Displaced by the Second World War, he emigrated to Canada in 1949. He became famous because of

the many highly popular dance tunes (tangos and slow waltzes) he composed, such as 'Pryide shche chas' (The Time Will Come), 'Namaliui meni nich' (Paint Me a Night), and 'Lety tuzhlyva pisne' (Fly Sorrowful Song). His dance tunes were performed best by the baritone A. Derbish.

Vesolovsky, Yaroslav [Vesolovs'kyj, Jaroslav], b 1881, d 21 June 1917 in Vienna. Journalist and political leader. He edited **Postup* (1903–5) in Kolomyia and then **Bukovyna* (1904–6) in Chernivtsi. From 1907 he worked in Lviv, where he contributed to and then edited **Dilo* and **Pys'mo z Prosvity* (1907–8). During the First World War he was an official of the Ministry of Foreign Affairs in Vienna in charge of the Ukrainian and Russian press, as well as a member of the Presidium of the General Ukrainian Council.

Vestments (*ryzy*). Garments worn by clergymen or their assistants while conducting church services. In the Ukrainian church they are modeled on vestments used in the Byzantine church. They are most commonly made of gold or silver brocade, although the Ukrainian church occasionally uses vestments made out of linen decorated with embroidery. The style of vestments worn corresponds with the rank of the clergyman, more elaborate vestments and a greater number of them being worn by the higher clergy. A deacon's vestments consist of a deacon's sticharion, a sacklike tunic with brocaded sleeves; an orarion, a long cincture which is passed under the right arm and over the left shoulder; and maniples, or brocaded cuffs. A priest's vestments consist of a priest's sticharion, a long shirtlike tunic; an epitachelion, a silk stole representing the priest's authority which is worn around the neck and then along the front of the sticharion; a cincture (or zone), a belt made of the same material as the stole and used to secure it; maniples; and a chasuble, or phelonion, a large capelike outer garment, usually with extensive and rich brocade work. A bishop's vestments include a priest's sticharion, stole, cincture, and maniples together with a *nabedrenyk*, a diamond-shaped piece of stiff brocade attached to the cincture on the right side, symbolizing the word of God or, more concretely, a 'spiritual sword'; a saccos, a sacklike chasuble which resembles the outer garments worn by Byzantine emperors; an omophorion, or bishop's orarion, a wide band of brocade which is wrapped about the shoulders and hangs both in front and in back; and a mantle which is used for processions.

The color of vestments used during a church service varies according to the observance. White or gold is worn on Sundays, feast days, and holy days; red is worn for a funeral or the feast day of a martyr; purple is worn during Lent; green is worn on Pentecost and on all days of the week following it; and blue is worn on Marian feast days. The vestments are put on by a priest one at a time, to the accompaniment of prayers noting their symbolism. The vestments worn by the Ukrainian Catholic and Ukrainian Orthodox clergy are similar in form, particularly the deacon's sticharion, the chasuble, and the omophorion.

Vetch (*Vicia*; Ukrainian: *vyka*). A grassy plant of the pea family Fabaceae (Leguminosae), also known as tare. In Ukraine the cultivated annual species are the most important – the spring or common vetch (*V. sativa*) and the winter or hairy vetch (*V. villosa*). They are planted mixed with oats or barley to yield highly nutritional green fodder, silage, and hay. Early feed is obtained by mixing vetch with winter wheat and rye. Like other legumes vetch adds nitrogen to the soil. All vetch species are valuable nectar bearers.

Veterinary Code of the Ukrainian SSR (Veterynarnyi kodeks URSR). A code of laws on the state veterinary service adopted by the All-Ukrainian Central Executive Committee on 13 March 1925. It consisted of 112 articles grouped into four sections: (1) the organization and tasks of the veterinary service, (2) methods of dealing with epidemic and infectious animal diseases, (3) veterinary-sanitary care, and (4) government agencies and the rights and duties of veterinary officials. As Soviet administrative law became centralized, the code was repealed by the Central Executive Committee, on 20 January 1937, and replaced by the Veterinary Statute of the USSR, passed on 27 October 1936. A new Union statute of nine sections and 62 articles was adopted on 22 December 1967. The first three sections deal with the organization and duties of veterinary workers, sections four and five with quarantine, sections six and seven with veterinary inspection of transported and slaughtered livestock, section eight with the use of chemical substances in veterinary practice, and section nine with sanctions for violating the law.

Veterinary medicine. A discipline which deals with the diagnosis, treatment, and prevention of animal diseases as well as the study of their continuous relationship to human beings. In Ukraine, from the prehistoric period up to the beginning of the 19th century, veterinary science as a branch of folk medicine was practiced by soothsayers, local healers, shepherds, furriers, blacksmiths, and barbers. Veterinary medicine as a profession emerged in Rus' in the 10th to 13th centuries, and some laws were passed to combat epizootics in the 16th and 17th centuries.

Veterinary hospitals appeared in the first half of the 19th century as parts of military bases and commands. In Ukraine under Russian rule, veterinary dispensaries or hospitals in urban or rural areas were controlled by gubernial veterinary inspectors of the Veterinary Administration of the Ministry of the Interior or, in the case of the military, by the Military Veterinary Department of the Military Medicine Command. A similar system of inspectors existed in Western Ukraine under Austro-Hungarian rule. In the late 1880s, veterinary medicine was still in a relatively primitive state, although it had been taught as a subject at Kharkiv University as early as 1805. In 1835 a veterinary technical school was established in conjunction with Kharkiv University, in 1852 the Veterinary School of Higher Learning was founded, and in 1871 the Kharkiv Institute of Veterinary Science was created. Veterinary institutes were founded in Lviv (1880) and Kiev (1920).

Despite some progress in the academic branch, there was no organized network for the sanitary inspection of meat, and only after 1879 was a concerted attempt made to control epizootic disease by transferring the administration of meat inspection to the zemstvos. In the system of zemstvo medicine a network of veterinary stations

was created, and many veterinary schools and laboratories were founded, of which the biggest were located in Kherson and Katerynoslav. By the beginning of the 1890s the cattle plague had been almost eliminated, but debilitating diseases of domestic animals, such as tuberculosis, leptospirosis, brucellosis, salmonellosis, and hoof-and-mouth disease, were still widespread. The years of the revolution saw the return of the epizootic diseases, including the cattle plague.

From the 1920s, veterinary medicine was administered by the veterinary department of the Commissariat of Agriculture of the Ukrainian SSR. It consisted of numerous veterinary departments, scientific and educational institutions, and production entities for drugs and instruments. Regional veterinary departments were made up of a network of dispensaries, veterinary-bacteriological laboratories, high schools and seminars, senior personnel of veterinary doctors and inspectors in cities, veterinary stations, and hospitals. The growth and development of the veterinary network in 1923–8 was abruptly halted by forced collectivization and the liquidation of private farms. In 1934, measures were again taken to re-establish the veterinary network. In 1937 the government in Moscow centralized all Soviet administrative law by abolishing the Veterinary Code of the Ukrainian SSR and substituting for it the Veterinary Code of the USSR. The decree of the Council of Ministers of the USSR and the CC of the CP in 1953 to transfer the zootechnical and veterinary personnel from their regional administrations to the machine and tractor sections brought about a crisis in agriculture in the Ukrainian SSR.

In Western Ukraine under Polish rule (1920s to 1930s), veterinary medicine was the responsibility of the veterinary department of the Ministry of Agriculture. That ministry controlled the voivodeship inspectors and the regional veterinary doctors, as well as an independent group of veterinary doctors who belonged to self-governing organizations. These institutions admitted very few Ukrainians. At the initiative of the *Sil'skyi Hospodar society a network of Ukrainian veterinary doctors was formed in 1933 in conjunction with the dairies of the *Maslosoiuz. After the Second World War the Soviet Union annexed Western Ukraine and abolished all existing organizations.

Today veterinary research is conducted at the *Ukrainian Scientific Research Institute of Experimental Veterinary Science, at the *Ukrainian Veterinary Scientific Research Institute, at the Ukrainian Agricultural Academy, at the Kharkiv and Lviv Zootechnical-veterinary institutes, and in departments of veterinary science at Odessa University and the Bila Tserkva Agricultural Institute. The journals *Visnyk sil'skohospodars'koi nauky* and *Tvarynnytstvo Ukrainy* and the collection *Veterynariia* publish research and works pertaining to veterinary science in Ukraine.

Vetukhiv, Mykhailo [Vetuxiv, Myxajlo], b 25 July 1902 in Kharkiv, d 11 June 1959 in New York. Biologist, geneticist, and civic figure; member of the Shevchenko Scientific

Mykhailo Vetukhiv

Oleksa Vetukhiv

Society from 1947; son of O. *Vetukhiv. After graduating from the Kharkiv Agricultural Institute (1923), he taught (1926–34) at the Poltava Agricultural Institute, the Kharkiv Veterinary Institute, and Kharkiv University. In 1934 he was forced to move to Moscow, where he taught at the Moscow Veterinary-Zootechnical Institute and headed the genetics section of the All-Union Institute of Experimental Veterinary Medicine. After returning to Kharkiv in 1941, he was rector of the university there (1942–3). In 1944 he emigrated to Germany and cofounded the Ukrainian Free Academy of Sciences (UVAN). He served in Germany as a minister for the UNR government-in-exile (1945). Later, in the United States, he was executive vice-president of the Ukrainian Congress Committee of America (1949–55) and head of UVAN in the United States (from 1950). He prepared analyses of Soviet scientific research for the Institute for the Study of the USSR. His postulate, known as Vetukhiv's breakdown, notes the substantial loss of breeding potential among second-generation hybrid plants.

Vetukhiv, Oleksa [Vetuxiv], b 27 March 1869 in Ternova, Vovchanske county, Kharkiv gubernia, d 1941. Ethnographer and linguist. A student of O. *Potebnia, in the 1920s he was a professor at the Kharkiv Institute of People's Education and director of the ethnography and regional studies section of the Department of the History of Ukrainian Culture. He belonged to the Kharkiv Historical-Philological Society and the Potebnia Committee. His special interests were the dialects of Slobidska Ukraine and methodology. His chief work was *Zagovory, zaklinaniia, oberegi i druzie vidy narodnogo vrachevaniia, osnovannye na vere v silu slova* (Charms, Incantations, Precautions, and Other Forms of Folk Healing Based on Faith in the Power of the Word, 2 vols, 1902, 1907). He also wrote many articles and several textbooks in linguistics, in which he propagated Potebnia's ideas.

Vexillology. The study of the history, symbolism, use, design, manufacture, and other aspects of *flags. Vexillology is a relatively new science and is closely related to *heraldry. Ukrainian flags were first mentioned in a 14th-century Spanish book. A great deal of valuable information about them is found in Polish works, particularly J. Długosz's *Insignia seu clenodia incliti Regni Poloniae* (15th century) and K. Niesiecki's *Korona Polska ...* (The Polish Kingdom ..., 4 vols, 1728–43), and in old Ukrainian and

Cossack chronicles. Vexillology in Ukraine was begun at the start of the 20th century by the historians D. Yavornytsky and I. Krypiakevych. The independent Ukrainian governments of 1917–21 sparked an interest in such studies, but contributions were mostly of a popular nature. Several scholarly studies, particularly of Cossack flags, were published in Soviet Ukraine. In the 1930s S. Shramchenko published studies on Ukrainian naval flags of 1917–20 in Galician periodicals. Postwar émigré scholarship was initiated by M. Bytynsky and continued by R. Klymkevych, V. Trembitsky, and others.

Viacheslav Volodymyrovych [Vjačeslav Volodymyrovych], b 1083, d 1155. Kievan Rus' prince; son of Volodymyr Monomakh, brother of Yaropolk and Hlib Volodymyrovych and Yurii Dolgorukii. He ruled in Smolensk (from 1107), Turiv (1125–32, 1134–46), and Pereiaslav (1132–4, 1142). He was briefly in Kiev (18 February to 5 March 1139) after Yaropolk died, but was ousted by Vsevolod Olhovych. In 1142 he reclaimed Pereiaslav and turned over its rule to his cousin, Iziaslav Mstyslavych, who later ousted him from Turiv. Viacheslav is mentioned in chronicles as the ruler of Peresopnytsia in 1149. Yurii granted him the rule of Vyshhorod ca 1150. That year also Viacheslav became a coruler of Kiev with Iziaslav, and after Iziaslav's death in 1154, Viacheslav coruled with Rostyslav Mstyslavych.

Vialov, Oleh [Vjalov], b 23 January 1904 in Tashkent, Turkestan general gubernia, d 1 June 1988 in Kiev. Geologist; member of the AN URSR (now ANU) from 1948, and president of the Ukrainian Paleontological Society from 1977. After graduating from Leningrad University in 1928, he worked in the city at the Geological Committee, the All-Union Scientific Research Institute of Geological Prospecting for Petroleum, the Leningrad Mining Institute, and Leningrad University. After the war he chaired the paleontology department at Lviv University (1945–59) and headed the tectonics department of the ANU Institute of the Geology and Geochemistry of Fossil Fuels (1949–87). He took part in geological expeditions in the Carpathian Mountains, the Crimean peninsula, and the Antarctic. Vialov published numerous papers in regional geology, tectonics, stratigraphy, paleontology, and hydrogeology.

Viaticians (*viatychi*). A Slavic tribe that lived in the basin created by the upper and middle sections of the Oka River and the upper Don River. According to the Primary Chronicle they were descendants of the *Liakhs. In the 9th and 10th centuries the Viaticians paid tribute to the Khazars, and in the 10th and 11th centuries they were a part of Kievan Rus'. The cities of Moscow, Koltesk, Didoslav, and Nerinsk were established in the territories inhabited by the Viaticians in the 11th and 12th centuries. In the mid-12th century their lands were divided between Suzdal and Chernihiv principalities. After the 14th century the Viaticians were no longer mentioned in chronicles because they mixed with Finnish tribes and became the Russian people.

Viazlov, Andrii [Vjazlov, Andrij], b 1862 in Volhynia, d 16 October 1919 in Kamianets-Podilskyi, Podilia gubernia. Lawyer and civic activist. A civil judge and a member of the circuit court, he was a deputy to the First Russian State

Andrii Viazlov

Duma in 1906 and a member of the Ukrainian caucus there and the Autonomists' Union. During the First World War he served on the *Committee for the Relief of the Population of Southern Russia Suffering from Military Actions and played an important role in determining its plan of action. He was a member of the Society of Ukrainian Progressives and from 1917 sat on its council. Later he joined the Ukrainian Party of Socialists-Federalists. During the rule of the Central Rada he was the gubernial commissioner for Volhynia (1917) and then a general judge (1918). Under the Hetman government he was appointed senator and, in October 1918, minister of justice in F. Lyzohub's cabinet. With the hetman's downfall he left politics and assumed the presidency of the Ukrainian Red Cross. While retreating with the UNR Army he died of typhus.

A metal badge of the Sich Rifleman corps incorporating a cluster of viburnum berries (1919)

Viburnum (*Viburnum*; Ukrainian: *kalyna*). A deciduous shrub and small tree of the honeysuckle family Caprifoliaceae, with ornamental leaves and white or pink flowers. Of the approx 200 species of viburnum 2 are native to Ukraine. The most abundant is the common *viburnum* (*V. opulus*), also known as the European cranberry, highbush cranberry, or water elder, a small tree reaching 4–5 m in height. It has maplelike leaves that turn red in autumn and clusters of shiny, bright, translucent red, edible berries. A widely cultivated sterile variety (*V. opulus* var. *roseum*) is known as snowball or guelder rose. The wood of viburnum is used in the manufacturing of small articles. The sap extracted from the bark in early spring is used as a hemostatic. Fresh berries, which contain vitamin C, are used as a cold remedy. The European wayfaring tree (*V. lantana*; Ukrainian: *hordovyna*) grows west of the Dnieper River. In Ukrainian folklore the viburnum is a popular

subject of many songs, and it is also used as a national symbol, especially in the folksong 'Hei u luzi chervona kalyna pokhylylasia' ('O, in the Meadow the Red Viburnum has Bowed Low'), where *kalyna* symbolizes Ukraine.

Vicegerency (Ukrainian: *namisnytsvo*; Russian: *namest-nichestvo*). A territorial-administrative unit introduced in the Russian Empire in the late 18th century by Catherine II. In Ukraine the following vicegerencies were set up: Kharkiv in 1780, Kiev, Novhorod-Siverskyi, and Chernihiv in 1781, Katerynoslav in 1783, Voznesenske in 1795, and Iziaslav (renamed Volhynia in 1795), Bratslav, and Podilia in 1793. The districts were administered by vicegerents, who had the powers of a governor-general. In 1797 the vicegerencies were abolished and replaced by gubernias. The term was also used to note the office of the Galician vicegerent.

Vicegerent (*namisnyk*). A high administrative official who governs a country or a province as the sovereign's direct deputy. In Kievan Rus' vicegerents governed the regions outside cities and towns. In the Grand Duchy of Lithuania they initially had broad powers, but by the 15th century they were merely managers of the royal estates. In the Russian Empire vicegerents were the tsar's deputies in cities and counties. When Catherine II reformed the territorial system in 1775, vicegerents became equal to governors or governors-general. In the Austrian Empire the vicegerent was the highest royal administrator of a crownland (called *gubernator* before 1848). In 1866–1914 all the vicegerents of Galicia were appointed from the Polish nobility. During the war the position was filled by Austrian generals.

Viche (Russian: *veche*). A general meeting of the citizens of a Kievan Rus' town or city that was called to discuss important matters facing the community. The origins of the *viche* were in a tribal *court system, which was a characteristic governing entity for all East Slavic peoples. In terms of its legal authority the *viche* was a manifestation of popular rule, analogous to the popular meetings held in the cities of ancient Greece and in Western European cities during the Middle Ages. In the larger ('senior') *cities and towns of the various principalities, the *viche* evolved into a high-level body that competed in jurisdiction with the offices of the prince and of the *Boyar Council. It also gained importance after the waning of the princes' authority in the late 11th century and later, as the role of the general citizenry in the political life of the principalities increased in importance.

The first *viche* to be chronicled was held in Bilhorod in 997; it was followed by others in Novgorod the Great (1016), Kiev (1068), Volodymyr-Volynskyi (1097), Zvenyhorod (1147), Rostov (1157), Pereiaslav (1175), and Smolensk (1185). Others were held in smaller cities (*pryhorody*), where they were largely limited to municipal administrative matters. Members of a *pryhorod* had the right to take part in the *viche* of their senior city; eventually they came to be represented by a **tysiatskyi* (deputy of 1,000 citizens).

The *viche* was called irregularly, as required, by the prince or one of the boyars or at the initiative of a group of citizens. It was usually attended by the prince, boyars, the bishop, and members of the clergy. It was held on the grounds of the prince's estate or in the church square or market square; in Kiev it was held in the court of the St

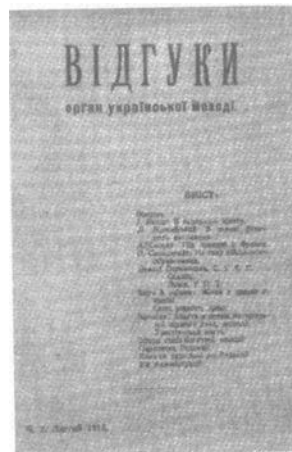

Sophia Cathedral. The order of business was conducted by the prince or the bishop (in Kiev by the metropolitan), or occasionally by a *tysiatskyi*; there were no standard rules for debate, however, or for the adoption of resolutions. In principle resolutions were adopted unanimously, but actually they were decided by a democratic majority of those in attendance.

The jurisdiction of the *viche* was also not rigidly defined, though certain matters were undoubtedly within its prerogative. They included matters of war and peace (particularly a levy en masse), some matters of foreign policy, the *election of a prince to the throne (if he was not an heir apparent or a conqueror) or his expulsion therefrom, the drawing up of agreements (*riady*) with the prince, and the ratification of laws (see *Legislation). Occasionally the *viche* would demand the removal of certain officials of the prince's government or become a court in the event of abuses of political power. The decisions of the *viche* in senior cities were binding on the whole principality.

As an organ of state power the *viche* was not as influential in Ukrainian principalities as it was in Novgorod, Polatsk, or Pskov. In contrast to those northern principalities, however, where the prince usurped all power for himself, the *viche* in Ukraine remained equal in power to other governing bodies. Only in Halych principality was it subject to the higher authority of the Boyar Council. The *viche* declined after the absorption of Ukraine by the Grand Duchy of Lithuania and by Poland, where it was replaced by *dietines of the nobility. In the 16th to 18th centuries the *viche* functioned as a *community court and served as a model for the proceedings of the *General Military Council of the Hetmanate. In the late 19th century the term *viche* was revived in Galicia as the name for large public assemblies called to discuss Ukrainian politics.

Vidhuky

Vidhuky (Echoes). A student journal published in Lviv in 1913 (a total of four issues). Edited by I. Chmola, it criticized the ideological tone and socialist views of *Zhytie*, the major Ukrainian student organ of the time, and advocated a program of physical fitness and military training for students, in preparation for a possible war that would decide the fate of Ukrainian independence.

Vidomosti Heneral'noho tserkovnoho upravlinnia UAPTs u Velykii Britanii (News of the General Church Administration of the Ukrainian Autocephalous Orthodox Church [UAOC] in Great Britain). An official quarterly publication of the UAOC in Britain, published in London since 1950.

Vidomosti Verkhovnoi Rady Ukraïns'koï Radians'koï Sotsialistychnoi Respubliky (News of the Supreme Soviet of the Ukrainian Soviet Socialist Republic). An official organ of the Supreme Soviet of the Ukrainian SSR, published in Kiev from 1941. Interrupted by the war, its publication was resumed in 1944, first monthly and then weekly. Published in parallel Ukrainian and Russian editions, it contains new laws and resolutions passed by Ukraine's Supreme Soviet, and decrees and proclamations of the Presidium of the Supreme Soviet. It also published the texts of international treaties and agreements ratified by the presidium, information about the work of the permanent committees of the Supreme Soviet, and details about changes in the administrative-territorial division of the Ukrainian SSR. It is now called *Vidomosti Verkhovnoi Rady Ukraïny*.

Vidriz. See Weights and measures.

Vidro. See Weights and measures.

Vidrodzhennia (Rebirth). A democratic, nonpartisan daily newspaper published in Kiev in 1918. The editor was P. Pevny.

Vidrodzhennia (Rebirth). A temperance journal published monthly in 1928–39. In 1928–9 it was called *My molodi*, and appeared in Rohatyn under the editorship of M. Chaikovsky and Yu. Kamenetsky. In 1930 it became the organ of the *Vidrodzhennia society and was renamed. Thenceforth it was published in Lviv and edited by Kamenetsky and then S. Parfanovych-Volchuk. The journal condemned smoking as well as drinking and advocated a healthy lifestyle. In 1930 it appeared in a press-run of 4,000 copies.

Vidrodzhennia society (Rebirth). A Ukrainian temperance society founded in 1909 in Lviv in response to a resolution of the First Educational-Economic Congress. Its purpose was to discourage the Ukrainian population from consuming alcohol and smoking. Since alcohol and tobacco were state monopolies, its temperance message coincided with the struggle of the Ukrainians against the Polish occupation of Galicia, and in the 1930s its activities expanded considerably. The society's head office was in Lviv. By 1937 it had a membership of 6,400, organized in 18 branches and 122 circles in the towns and villages of Galicia. In addition to conducting anti-alcohol courses, lectures, public meetings, and anti-alcohol plebiscites, it published the monthly *Vidrodzhennia* (1928–39), the youth supplement *My molodi*, and a series of popular brochures. Its chief activists were I. Rakovsky, S. Parfanovych, Yu. Kamenetsky, P. Vovchuk, I. Kostiuk, I. Herasymovych, and M. Tsenko.

Vidrodzhennia society (Spanish: Renacimiento). A Ukrainian-Argentinian educational society established in

Buenos Aires in 1939. The group had its genesis in a number of Sokil sports associations and Riflemen hromadas (modeled on the Ukrainian War Veterans' Association of Canada) that were established from the early 1930s. In 1938 these groups organized an Argentinian wing of the *Organization for the Rebirth of Ukraine (ODVU). In order to deflect the possibility of suppression, the overtly political ODVU was dissolved in 1939 and reconstituted as Vidrodzhennia. After the Second World War Vidrodzhennia and the Prosvita society in Argentina established a relief committee to help displaced persons resettle in Argentina. The Vidrodzhennia society is affiliated with the Melnyk faction of the OUN. In 1952 it founded the first Ukrainian credit union in the country, which later set up two additional branches. The association has published **Nash klych* since its inception, and it established a women's section in 1974. In the 1980s the society maintained a central office with four branches. It has also sponsored choirs, drama groups, dance troupes, and Saturday schools.

Vidrodzhennia Ukraïny (Rebirth of Ukraine). A Ukrainian-language organ of the press bureau of the Austrian Ministry of War, published in Vienna in 1918. Initially it was called *Vidrodzhennia*. The editor was I. Nimchuk.

Vidumershchyna. In Kievan Rus', the land or other property left by a deceased *smerd without a male heir. This property was transferred to the prince, and if the smerd had any daughters, they received some compensation from him. From the 14th century the prince did not take *vidumershchyna* if the smerd's daughter married someone capable of military service. *Vidumershchyna* also applied to some extent to deceased boyars' estates. In the Cossack period the state took the estate only if the deceased had no relatives, or if he died intestate. In medieval times under Polish rule, livestock was transferred to a noble instead of *vidumershchyna* when a peasant died.

Pupils and teachers of the Ukrainian school in Vienna in 1957. Sitting, from left: A. Hnatyshyn, M. Dzerovych, Yu. Kostiuk, Rev M. Hornykevych, Rev V. Gavlich, Mrs Gross, Mr Kolotylo, Mr Tarko

Vienna. The capital of Austria (1988 pop 1,482,825), situated on the Danube River. It is a national and international political center with a vibrant cultural history.

Before 1772 Ukrainian contact with the city was sporadic. Trade relations with Ukraine had existed since the

Princely era. Ukrainians (notably the Transcarpathian polemicist M. Andrella) had studied at the University of Vienna since the 16th century. In 1683 Yu. *Kulchytsky was instrumental in lifting the Turkish siege of the city, while Hetman S. Kunytsky led a Cossack force into battle against the Turks on its outskirts. Kulchytsky later founded Vienna's first coffeehouse, had a street named after him, and had a monument erected in his honor in 1885.

With the Austrian annexation of Galicia (1772) and Bukovyna (1774) Ukrainian ties with the city increased substantially. Vienna served as a training ground for Ukrainian parliamentarians and civil servants as well as for the Ukrainian Greek Catholic clergy. In 1774 Empress Maria Theresa and Emperor Joseph II established an 'Oriental Academy' that was to serve as a school for Eastern rite clergymen. This was the first *Barbareum. It had trained many theological and lay scholars by the time it was supplanted by the Greek Catholic Theological Seminary in Lviv in 1784. That same year St Barbara's Church was organized as a Ukrainian Catholic parish; it soon became a center of Ukrainian community life in Vienna. A crown boarding school where lay students of various nationalities and Ukrainian candidates for the clergy stayed and studied together was established in the city in 1804. When it was closed in 1847, 30 Ukrainians were living there. The facilities subsequently housed the Central Theological Greek Catholic Seminary (the so-called Second Barbareum), which was attended by an average of 50 students annually until its liquidation in 1892.

The Ukrainian community in Vienna consisted of government officials, among them figures such as A. Dolnytsky, O. Haninchak, M. Harasymovych, I. Kopystiansky, O. and Ye. Lopushansky, T. Luchakivsky, V. Mykhalsky, Yu. Romanchuk, I. Savytsky, A. and I. Vitoshynsky, Yu. Vyslobotsky, and R. Zalozetsky; general laborers who were permanent residents; students and military personnel who were temporarily in the city; various politicians (including members of the Austrian parliament) and journalists; and those who came to local sanatoriums. There were also some emigrants (such as A. Rozumovsky) from Russian-ruled Ukraine. At the outbreak of the First World War there were 3,000 Ukrainians living in Vienna. Before 1914 Vienna University (particularly the Slavists F. Miklosich and V. Jagić) trained a number of Ukrainian scholars, including I. Franko, O. Ohonovsky, M. Osadtsa, and S. Smal-Stotsky. Other notable graduates were the optometrist M. Borysykevych, the urologist T. Hrynchak, the chemist I. Horbachevsky, and the physicist I. Puliui.

The number of Ukrainian students in the city increased consistently over the years. In 1868 they established Sich, the oldest Ukrainian students' society. R. Sembratovych established the monthly *X-Strahlen* in 1900 and then joined with V. Yavorsky to edit **Ruthenische Revue* (1903-5), which was later renamed **Ukrainische Rundschau* (1906-14). Ya. Vesolovsky, a former editor of *Dilo*, worked as the Ukrainian and Russian press commissioner for the Austrian Ministry of Foreign Affairs. Community organizations included the student Sich, the workers' society Rodyna, the St Barbara's Brotherhood, the Zemliaky society, and the Ukrainska Besida society.

After the outbreak of the First World War the number of Ukrainians in Vienna increased to 15,000 because of the Russian occupation of Galicia and Bukovyna. The city briefly served at this time as a virtual capital of Ukrainian

political and cultural life. The Supreme Ukrainian Council (established in 1914, renamed the General Ukrainian Council on 5 May 1915), the *Union for the Liberation of Ukraine, the Military Executive of the Ukrainian Sich Riflemen, the Ukrainian Parliamentary Representation, and the editorial offices of countless transplanted Ukrainian newspapers from Galicia and Bukovyna were all active in the city. New periodicals were established (published in Ukrainian and German), including *Vistnyk Soiuzu vyzvolennia Ukraïny*, *Ukrainische Nachrichten* (1914-16), and *Ukrainische Korrespondenz*. New organizations included the Ukrainian Cultural Council, the Ukrainian Relief Committee, and the Ukrainian Women's Union.

After the signing of the Treaty of Brest-Litovsk the UNR government maintained an embassy in Vienna (staffed by H. *Sydorenko and A. *Yakovliv), as did the Hetman government (V. *Lypynsky was ambassador) and the Western Ukrainian National republic (ZUNR; represented by V. *Singalevych and M. *Vasylo). H. Besidovsky and Yu. *Kotsiubynsky served as consular officials for the Soviet Ukrainian republic in Vienna.

After the dissolution of the Austro-Hungarian Empire the Ukrainian population in Vienna dropped briefly, but it rebounded after the arrival of the ZUNR government under Ye. *Petrushevych in late 1919. In 1920-3 Vienna vied with Prague in importance as a Ukrainian émigré center. New organizations emerged, including Yednist, Postup, the Ukrainian Club, and the Union of Ukrainian Journalists and Writers. The Ukrainian Free University and the Ukrainian Sociological Institute were established initially in Vienna, in 1920-1 (both later moved to Prague). About 400 students attended various Viennese institutions of higher education in this period. The headquarters of many political parties also moved to Vienna and published various periodicals, including *Ukrains'kyi prapor* (the organ of ZUNR), *Boritiesia - poborete!* (the organ of M. Hrushevsky's Socialist Revolutionaries), S. Vityk's Sovietophile *Nova hromada*, V. Vynnychenko's *Nova doba*, V. Vyshyvany's *Soborna Ukraïna, Na perelomi* (edited by O. Oles), and the nonpartisan *Volia* (published by V. Pismanchevsky). V. Lypynsky published his series *Khliborob's'ka Ukraïna* (Agricultural Ukraine) in Vienna, and T. Savula opened his bookstore in the city. The Dzvin, Vernyhora, Dniprosouiz, Zemlia, Chaika, and other publishing houses issued numerous titles, ranging from textbooks to fiction. Most of these were banned from distribution in Ukraine.

After the Polish annexation of Galicia in 1923, much of the Western Ukrainian emigration moved back to Galicia. The result was the closure of many Ukrainian presses and publishing houses and most community organizations in Vienna. The number of Ukrainians in the city declined to 3,000 or 4,000, mainly workers, pensioners, and lesser civil servants, and some professionals. Ukrainian community life continued in the form of various jubilees, civic meetings, and demonstrations. The last included assemblies and actions against the *Pacification in 1930, against religious persecution in the USSR, and against the man-made famine in Ukraine in 1933 (Cardinal T. Innitzer, the archbishop of Vienna, led a multid denominational and international committee formed to provide relief for its victims). In 1929 the Congress of Ukrainian Nationalists was held in Vienna, at which the *Organization of Ukrainian Nationalists (OUN) was formed. The writer O. *Hrytsai worked in Vienna in 1914-45.

After the annexation of Austria by Germany in 1938, the Nazi authorities abolished the 15 existing Ukrainian organizations and societies. In their place branches of the *Ukrainian National Alliance and the *Ukrainian Institution of Trust in the German Reich were formed.

During the Second World War the number of Ukrainians in the city increased again, particularly after 1944, when a wave of refugees arrived and increasing numbers were conscripted for forced labor. In 1944 and early 1945 representatives of the Cracow-based Ukrainian Central Committee and the Ukrainske Vydavnytstvo publishing house published *Krakivs'ki visti* in Vienna. Soviet forces captured the city on 15 April 1945 and immediately began repatriating those citizens who had not managed to flee to the West. Among those deported were V. Kurmanovych, S. Naklovych, T. Voloshyn, W. Habsburg-Lothringen (V. Vyshyvany), and Mykola Zalizniak. After the signing of a peace treaty between Austria and the USSR on 15 May 1955, some former residents returned to Vienna following a 10-year period of incarceration.

After 1955 Vienna once again became an émigré center and the headquarters of the Coordinating Council of Ukrainian Organizations of Austria and the Ukrainian Central Relief Alliance in Austria. Other active community organizations included the Ukrainian Women's Union in Austria, the Union of Ukrainian Philatelists, and the Bukovyna society. Individuals active in the immediate postwar period have included S. Bush, M. Ivanovych, Yu. Kostiuk, S. Naklovych, D. Rakhlytsky, V. Zalozetzy-Sas, B. Yaminsky, and I. and O. Zhupnyk. St Barbara's Church has a renowned choir conducted by A. Hnatyshyn and a church brotherhood led by I. Zhupnyk. According to the parish records of 1989, there are 1,400 Ukrainians living in Vienna. Many of them, particularly the young, have been entirely assimilated. Ukrainian Catholics in the city are served by Rev O. Dzerovych, and the Orthodox by Rev P. Dubytsky.

Many libraries, archives, and museums in Vienna have valuable holdings of materials on Ukraine and Ukrainians, particularly the National Library, which preserves Ukrainian publications of Bukovyna and Galicia from 1772–1918 as well as a large collection of maps.

M. Hornykevych, A. Zhukovsky

Vienna, Congress of. A conference of representatives of the major powers involved in the Napoleonic Wars, which met in Vienna from September 1814 to June 1815 to settle the boundaries of the European states after Napoleon's defeat. The congress decided to turn the *Congress Kingdom of Poland, including the Kholm and Podlachia regions, over to the Russian Empire. The Ternopil region, which in the Treaty of Schönbrunn (1809) had been transferred to Russia, was returned to Austria. A key figure in the Russian imperial delegation to the congress was A. *Rozumovsky.

Vienna Arbitration. The name given to two agreements signed in Vienna by Germany and Italy in 1938 and 1940 repealing the Treaty of *Trianon and ceding considerable territory from Czechoslovakia and Rumania to Hungary. The first of the agreements (2 November 1938) compelled Czechoslovakia to surrender to Hungary the southern areas of Slovakia and parts of Ukrainian Transcarpathia. The latter area constituted 1,545 sq km of territory, with a

population of 182,000 (of whom 30,000 were Ukrainians), and included the region's capital, Uzhhorod, as well as the cities of Mukachiv and Berehove. The second arbitration (30 August 1940) saw northern Transylvania ceded by Rumania to Hungary and did not affect Ukrainians specifically. The Vienna arbitrations were annulled in the Paris peace treaties of 1947.

Vigenère, Blaise de, b 1533, d 1596. French diplomat and historian; secretary to the duke of Nivernais and inventor of a cryptographic substitution system. He wrote *La description du royaume de Pologne et pays adjacents ...* (1573), in which he recorded accurate descriptions of Galicia, Volhynia, and Podilia. K. Antonovych, the wife of V. Antonovych, translated Vigenère's work into Russian and published it in Kiev as 'Opisanie pol'skogo korolevstva i porubezhnykh s nim stran' in *Memuary otnosiashchiesia k istorii luzhnoi Rusi* (Memoirs Dealing with the History of Southern Rus', ed V. Antonovych, 1890).

Vihorlat Mountains [Vyhorlat] (aka Vihorlat-Huta). An effusive mountain belt situated in eastern Slovakia between the valleys of the Laborets and the Uzh rivers. Reaching elevations of over 1,000 m, the group is deeply dissected by valleys. Its main peaks are Vihorlat (1,074 m) and Snynskyi Kamin (1,007 m), both extinct volcanoes with remains of craters and lakes. The mountains are covered with beech forests. The area is sparsely populated except for the Uzh Valley and a small belt of viticulturists along the mountain approaches. The Vihorlats are situated in Ukrainian ethnic territory.

Vii [Vij]. A figure from Ukrainian demonology. As described in N. Gogol's short story, he was covered with earth and had an iron face and long eyelids drooping to the ground. He could see things invisible to ordinary humans.

Vii's'ko Ukraïny (Ukraine's Army). A journal of military science and military history published in Kiev since 1992. It was established by the Chief Administration of the Ukrainian National Guard and the Association of Officers of Ukraine and is supported financially by the 'For Ukraine's Democratization' fund and the Society of Veterans of the Ukrainian Insurgent Army in the United States. Its first editors in chief are V. Korkodym and V. Labunsky.

Vii's'kovo-naukovyi vistnyk heneral'noho shtabu (Military-Scientific Herald of the General Staff). A monthly organ of the General Staff of the Ukrainian army, published in Kiev in 1918 under the *Hetman government.

Viiit (Polish *wójt*, from Old German *Voit*, from Latin [*ad*]-*vocatus*). The head of a town self-governed by *Magdeburg law in 14th- to 18th-century Ukraine. The position was initially a hereditary one. The *viiit* was responsible to the town's owner (usually the monarch or a magnate) and was appointed by him, usually from among the rich burghers. He presided over the town's administration, treasury, lands, properties, police, and *lava court, and shared his powers with the town council (see *Magistrat), whose members were elected by agreement of the *viiit* with the burghers. For his services he received part of the town's taxes and court payments. The *viiit* could pass on or

sell his position to someone else. If the town purchased it, the *viit* was thenceforth elected by the burghers. In the 17th- and 18th-century Hetman state the *viit* was elected, but the election was subject to ratification by the hetman or his representative. Under tsarist rule the position was abolished together with Magdeburg law in 1831. In Western Ukraine, under Austrian rule the *viit* was the head of a village **hromada*, and under interwar Polish rule he was the chief administrator of a **gmina*. A study of Kiev's *viity* is found in V. Shcherbyna's collection on Kiev's history (1926).

Viitovyč, Petro [Vijtovyč], b 1862 in Peremyshl, Galicia, d 1936 in Lviv. Sculptor. After graduating from the Vienna Academy of Arts (1890) he settled in Lviv, where he produced many decorative sculptures for building façades and interiors. His early works include *Persius, Slave, Spear Thrower, Kidnapping of a Sabine Woman* (1888), and *After Bathing* (1888). He sculpted the façade and the allegorical figures *Trade* and *Labor* at the Main Railway Station in Lviv (1900–4), sculptures on the façade of and inside the Lviv Opera (eg, *Glory*), the crucifixion scene and figures inside St Elizabeth's Church in Lviv, and reliefs inside the Dominican church in Lviv.

Staff members of the Vik publishing house in 1903. Sitting, from left: Oleksander Lototsky, Vasyl Domanytsky, Serhii Yefremov; standing: Fedir Matushevsky, Volodymyr Durdukivsky

Vik (Era). A publishing house established in Kiev in 1895 by several students (future political and cultural leaders V. Domanytsky, O. Lototsky, F. Matushevsky, V. Durdukivsky, S. Yefremov, V. Prokopovych, and others) under the influence of O. Konysky. In 1896–7 it issued only

five short stories and tales in pamphlet form, most of which were reprinted from the journal *Osnova* (1861–2) and earlier periodicals. Over time it published a series of 23 books of poetry and prose by Konysky, T. Shevchenko, A. Krymsky, I. Franko, I. Nechui-Levytsky, L. Hlibov, S. Rudansky, M. Vovchok, M. Kotsiubynsky, V. Stefanyk, and others with a combined pressrun of 73,000 copies; 70 books and brochures aimed at enlightening the peasantry (375,000 copies); 21 books and pamphlets on political topics (25,000 copies); 10 editions of the selected works of Nechui-Levytsky, Franko, P. Myrny, B. Hrinchenko, I. Karpenko-Kary, and other writers (30,000 copies); and 16 books (50,000 copies) not part of any series, including the massive literary anthology *Vik* (3 vols, 1900, 1902), compilations of some of the best and most important literary works of the 19th century, and an anthology commemorating I. Kotliarevsky, **Na vichnu pam'iat' Kotliarevos'komu* (In Eternal Memory of Kotliarevsky, 1904). Despite the strict tsarist censorship of Ukrainian-language works and the official persecution of the Ukrainian cultural movement, *Vik* managed to publish 91 books by 1905 (when the Ems Ukase was rescinded) and 140 by 1918, with a combined pressrun of approx 560,000 copies. Its books contributed to the growth of national consciousness among many Ukrainians under tsarist rule.

Vikna

Vikna (Windows). A Sovietophile literary, art, and political monthly published in Lviv from November 1927 to September 1932. In 1929 it became the organ of the writers' group **Horno*. Among the contributors were its editors, V. **Bobynsky* and S. Tudor, and other Western Ukrainian left-wing writers, such as Ya. Halan, O. Havryliuk, A. Ivanchuk, P. Kozlaniuk, Ya. Kondra, S. Masliak, A. Mykhailiuk, V. Myzynets, D. Osichny, M. Sopilka, and K. Tkach. The journal also printed works and reviews by Soviet Ukrainian writers and critics. *Vikna* included translations of Soviet Russian and Belarusian literature by Bobynsky, Halan, Kozlaniuk, and M. Yohansen; book reviews; a theater supplement; articles criticizing D. Dontsov, the *Vistnyk* group, and the Polish regime; a literary and art chronicle; and news of cultural and political developments in Soviet Ukraine. *Vikna* was subject to censorship and confiscation and was finally closed down by the Polish authorities. O. Kizlyk's systematic index of its contents (Lviv 1966) and Y. Tsokh's bibliography of Western Ukrainian belletristic works in it (Kiev 1981) have been published.

Vikonka, Daria [Vikons'ka, Darija] (pseud of Ivanna-Karolina Malyska, née Fedorovych), b 1892 in Vienna, d 23 October 1945 in Vienna. Writer; daughter of V. *Fedorovych and wife of M. *Malysky. She was educated in England, and traveled widely in Western Europe. Her sketches and articles on art appeared in *Literaturno-naukovyi vistnyk* from 1922 on. She also used the pseudonym I. Fedorenko. In the 1930s she contributed to *Dazhboh* and *Zhinocha dolia*. She wrote a collection of poetic dialogues about art and love, *Rais'ka iablinka* (The Crab Apple Tree, 1931), a book about J. Joyce (1934), and the book *Za sylu i peremohu* (For Power and Victory, 1938).

Viktiuk, Yurii [Viktjuk, Jurij], b 28 August 1944 in Lviv. Graphic artist. Since graduating from the Lviv Institute of Applied and Decorative Arts (1974) he has concentrated on Ukrainian ethnographic themes and experimented with folk-art motifs and their adaptations. Line is the dominant element in most of his works, such as the 1970 linoprint series 'Folk Talents,' his illustrations to Ukrainian folk songs (1983), and the 'Seven Strings' series of illustrations to the poetry of Lesia Ukrainka (1986).

Iryna Vilde

Oleksander Vilinsky

Vilde, Iryna [Vil'de] (pseud of Daryna Polotniuk), b 5 May 1907 in Chernivtsi, d 30 October 1982 in Lviv. Writer. She graduated from Lviv University in 1933 and then worked as a teacher and contributed to the journal *Zhinocha dolia* in Kolomyia (1933–9). Under Soviet rule she wrote for *Pravda Ukraïny* as a special correspondent and headed the Lviv branch of the Writers' Union of Ukraine. Her work was first published in 1930. Some of her works from the prewar period are *Povist' zhyttia* (The Novelette of Life, 1930), the anthology of short stories *Khymerne ser-tse* (The Whimsical Heart, 1936), the novelettes *Metelyky na shpyl'kakh* (Pinned Butterflies, 1936) and *B'ie vos'ma* (The Clock Strikes Eight, 1936), and novelettes based on the life of the intelligentsia and students, such as *Povmolitni dity* (Grown-up Children, 1939). Her postwar works include *Istoriia odnogo zhyttia* (The History of One Life, 1946), *Nashi bat'ky roziishlysia* (Our Parents Have Separated, 1946), *Stezhynamy zhyttia* (Along the Paths of Life, 1949), *Iabluni zatsvoily vdruhe* (The Apple Trees Have Blossomed Again, 1949), *Kury* (Chickens, 1953), *Nova Lukavytsia* (1953), *Zhyttia til'ky pochynaiet'sia* (Life Is Just Beginning, 1961), and *Troiandy i ternia* (Roses and Thorns, 1961). In all of those works Vilde showed herself a master at describing the life of Galicians from a variety of social classes. The work

most highly rated by literary critics is the novel *Sestry Richynski* (The Richynsky Sisters, 2 vols, 1958, 1964), in which she portrays the intelligentsia and townspeople from a wide range of social backgrounds. A collected edition of Vilde's works, *Tvory* (Works, 4 vols, 1967–8), has been published, as well as a Russian translation in five volumes (1958).

I. Koshelivets

Vilensky, Dmytro [Vilens'kyj], b 18 June 1892 in Shepetivka, Iziaslav county, Volhynia gubernia, d ? Soil scientist and geobotanist. In the late 1920s and the 1930s he chaired the melioration subdepartment at the Ukrainian Institute of Applied Botany and the geobotanical section of the chair of soil studies at the Kharkiv Agricultural Institute. Then he moved to Kiev and Moscow to work in research institutions. His scholarly publications included a botany textbook (1928) for use in agricultural institutes and articles on soil salinity.

Vilensky, Illia [Vilens'kyj, Illja], b 14 March 1896 in Kremenchuk, Poltava gubernia, d 28 February 1973 in Kiev. Composer. He studied composition with V. Kalafati at the St Petersburg Conservatory (1914–18) and later was affiliated with the Kiev Young Spectator's Theater. His works include the operas *Horbokonyk* (The Hunchbacked Horse, 1936) and *Ivasyk Telesyk* (1949, 2nd edn 1971), the musical comedies *Sorochyntsi Fair* (1935) and *Shelmenko the Orderly* (1962), orchestral suites, incidental and chamber music, film scores, choruses, art songs, and arrangements of Ukrainian folk songs.

Vilenska-O'Connor, Valeriia. See O'Connor-Vilinska, Valeriia.

Vilinsky, Mykola [Vilins'kyj], b 14 May 1888 in Holta (now part of Pervomaiske), Ananiv county, Kherson gubernia, d 9 September 1956 in Kiev. Composer and pedagogue. He graduated from (1919) and then worked at (1920–41) the Odessa Conservatory. He later taught in Tashkent (1941–4) and Kiev (1944–56) and headed the Faculty of Composition at the Kiev Conservatory from 1948. His works include the cantata *Moldavia* (1939), three symphonic suites (1932, 1933, and 1944), chamber music, pieces for piano, and songs. He also edited the piano works of M. Lysenko for publication in the 1950s.

Vilinsky, Oleksander [Vilins'kyj], b 1872, d 1928 in Poděbrady, Czechoslovakia. Mechanical engineer and civic leader. He lectured (from 1908) at the Kiev Polytechnical Institute and other schools. He was a member of the Society of Ukrainian Progressives and the Ukrainian Scientific Society in Kiev. In 1917 he became a member of the Central Rada and was appointed director of the Department of Vocational Education at the UNR General Secretariat of Public Education. In 1918 he was appointed consul general for Ukraine in Geneva. From 1923 he taught at the Ukrainian Husbandry Academy in Poděbrady, from 1925 as a professor of mechanical engineering. His publications include technical papers in Ukrainian, German, and Rus-

sian and the textbook *Narysna heometriia* (Projective Geometry, 1923).

Vilkhivsky, B. See Hrinchenko, Borys.

Vilkhovy, Petro [Vil'xovyj], b 25 September 1900 in Viazivok, Pavlohrad county, Katerynoslav gubernia, d 14 October 1975. Writer. After completing journalism courses sponsored by the CP(B)U Central Executive Committee in 1925, he worked as an editor of the newspaper *Kolhospne selo*. From 1935 to 1940 he was an editor at the Derzhlitvydav publishing house. From 1945 to 1959 he was a plenipotentiary with the Council for Religious Cults of the Ukrainian SSR Council of Ministers. He began publishing prose in 1921, and in the 1920s he belonged to the writers' group Pluh. Among his works are the prose collections *Zubata baba* (The Toothy Granny, 1927), *Tryfonove ozero* (Tryfon's Lake, 1962), *Sertsem do sertsia* (Heart to Heart, 1965), and *U Topolynomu* (In Topolyne, 1966) and the novels *Neboiany* (1928), *Zelena fabryka* (The Green Factory, 2 vols, 1930, 1934), and *Na berehakh dvokh rik* (On the Banks of Two Rivers, 1956).

Village (*selo*). A rural settlement, the inhabitants of which are occupied primarily in agriculture. The legal definition of village and the classification criteria for settlements in Ukraine have changed considerably over time. Hence, it is difficult to compare the number or distribution of villages in different historical periods. Since 1965 the legal definition of village has been based on Ukraine's Code on the Method for Transforming, Evaluating, Naming, and Registering Certain Settlements, which essentially treats villages as settlements that are neither *cities nor *urban-type settlements. It was Soviet policy for 70 years to obliterate the difference between rural and urban life. Yet there are still significant differences between villages and cities in Ukraine.

The village Snizhkyv in Valky raion, Kharkiv oblast

In medieval times most rural inhabitants in Ukraine lived on individual or family homesteads ranging from a **dym* to a *dvoryshche*, which consisted of 40 to 50 members of an extended family. In the 16th century, villages – that is, larger and more complex settlements of unrelated individuals – began to emerge. The process was promoted by the spread of the seigneurial economy, the intensification of *serfdom, population growth, and the need for protection against Tatar raids. Formerly separate homesteads

and other small settlements merged into villages to form unified economic and social entities. The pace of the process was rapid in Galicia and Right-Bank Ukraine, where the population density was relatively high, and serfdom was most intensive, and slower in Left-Bank Ukraine, which was colonized in the late 16th and the 17th centuries by runaway peasants from the Right Bank. The threat of Tatar raids in Left-Bank and Southern Ukraine was the strongest impetus to compact settlement. Yet the colonists often set up family homesteads in the sparsely settled territory. Even in the late 18th century it was not uncommon for several conjugal families to live together in a single economic unit. When the Tatar threat was removed toward the end of the 18th century, the steppes were settled in a planned manner by large landholders who brought in whole peasant colonies. Thus villages became common in steppe Ukraine. After the emancipation of the serfs in 1861, many peasants in the region left the villages to settle on individual farmsteads (see **khutir*).

A street in an old village in Left-Bank Ukraine

Villages in Ukraine are laid out in a number of patterns depending largely on the terrain and natural environment: linear, chain, complex linear, irregular, radial, and regular. In the linear or 'ribbon' layout the cottages are evenly spaced on one or both sides of the road, and the gardens stretch at right angles from the road. The form is common in Belarus, Russia, and western Polisia in Ukraine. The chain village is similar to the linear one: the houses, less regularly spaced, are strung along a road that is usually winding and long. Chain settlements are characteristic of the Carpathian Mountains and foothills, except for the Hutsul region. There are several variants of the complex linear layout. The multistreet variant consists of two or more parallel streets with houses situated on one or both sides. Horseshoe-shaped villages sprang up along river bends or on small lakes. Fork- or star-shaped settlements developed at road or river junctions. The most common village form in Ukraine is the irregular one, particularly the cluster (*hurtove*) variant. It is characterized by crooked streets running in an irregular pattern and eventually leading to an open yard. Usually the shape of the village is roughly circular or elliptical. The radial village is built around an open core, usually a common square or plaza. The regular village has a grid layout and is square or rectangular in shape. Such settlements devel-

oped mostly in the 19th century in the open steppes of southern Ukraine.

Four distinctive settlement zones can be distinguished in Ukraine: the northwest (particularly Polisia), the Carpathian, the forest-steppe, and the southern steppe. In each zone the location and layout of the villages are different. In the northwest, villages are set far away from bodies of water because of poor drainage and swampy conditions. Because of the scarcity of arable land, the settlements are small and spaced far apart. The linear village is the most common type in the region. The mountainous terrain of the Carpathians ruled out large farm settlements. Villages are mostly located in the valleys and are usually built in chain formation. Some nucleated settlements can be found on terraces along the southern slopes of mountains or hills. The forest-steppe zone was settled before the development of guidelines or regulations; its favorite form is the irregular cluster village. Radial settlements are also common in the region, because the central square often functioned as a defense zone from the raiding Tatars. Southern Ukraine, which was colonized only after the 18th century, is marked by planned regular villages.

The collectivization of agriculture in Ukraine under the Soviet regime resulted in some significant changes in village life and layout. The **machine tractor stations (MTS)* quickly appropriated certain political and administrative functions and thus undermined the traditional government of the village. Without radically altering the physical appearance of the village the change to collectivized farming brought in its wake new facilities and buildings at the outskirts of existing villages. New construction practices gave rise to a preference for the grid pattern.

The village has long been an important symbol in Ukrainian literature and culture. Glorification of rural life and

the extensive use of themes and images from Ukrainian folklore were characteristic of Romantic and realist writers and artists (eg, T. Shevchenko, P. Kulish, I. Nechui-Levytsky), most of whom were of rural origin, from the early 19th century on. Since the cities and much of the elite of Ukraine were either Russified or Polonized, the village and the peasantry came to represent the Ukrainian nation. The village was portrayed as the cradle of the Ukrainian national renaissance, an idealization that remained a facet of Ukrainian life well into the 20th century. In early Ukrainian political thought the village was idealized by M. Kostomarov, especially in his 'Dve russkie narodnosti' (Two Rus' Peoples), which stressed the uniqueness of the Ukrainian village vis-à-vis the Russian village.

(For the structure and government of the village community see **Hromada*.)

Village assembly (*sil'skyi skhod*). In Russian-ruled Ukraine a general meeting of the household heads that was the chief governing body of the village **hromada*. From 1797 it was restricted to appanage and state peasants. In 1861 the newly emancipated serfs were allowed to participate. The assembly had limited powers: it divided

land under its jurisdiction among its members, distributed the tax burden, and elected village officials, such as the *starosta* and *sotskyi*.

In the Soviet period the village assembly was a general meeting of the residents of a rural district governed by a rural council.

Village center (*selianskyi budynok* or *selbud* 'peasants' building'). A rural cultural and extramural educational institution established in Soviet Ukraine by the regime in the 1920s to compete with the local *Prosvita society branch. In 1921 there were 4,007 Prosvita branches and 116 village centers. After the liquidation of the Prosvita society by the Bolsheviks in 1922, the communist-dominated village centers expanded rapidly, to 4,550 by 1929. Usually each center maintained a library, and the larger ones had auditoriums for theatrical performances and facilities for various artistic, educational, and sports activities. During collectivization the village centers were replaced by collective-farm clubs and by rural 'palaces of culture' run by the Ministry of Culture. (See also *Reading house.)

Vil'na dumka (Free Thought). The first Ukrainian-language newspaper in Australia. It was founded by V. Shumsky, O. Pytliar, B. Podolianko, and O. Siversky, and has been published in Sydney since July 1949, biweekly to October 1950 and then weekly. Since the early 1950s Shumsky has been the chief editor and the publisher. From April 1956 to January 1957 the paper was called *Vil'na dumka – Ukrain's'kyi shliakh*.

Vil'na spilka (Free Association). A semimonthly organ of the *Ukrainian Party of Socialists-Federalists, published in Kiev in 1917.

Vil'na Ukraïna (Free Ukraine). A monthly journal of literature, politics, and scholarship, published by A. Shablenko in St Petersburg in 1906 as an organ of the *Ukrainian Social Democratic Workers' party. It was edited by I. Lychko (nos 1–2) and then by S. Petliura, M. Porsh, and P. Poniatenko. The journal was closed down by the tsarist authorities after they confiscated issue no. 5–6. At the same time, Shablenko was sentenced to a year in prison for his revolutionary activities.

Vil'na Ukraïna (Free Ukraine). An organ of the Union of Ukrainian Autonomists-Federalists (later the *Ukrainian Party of Socialists-Federalists), published in Uman in 1917 under the editorship of A. Kaminsky.

Vil'na Ukraïna (Free Ukraine). The official newspaper of the Lviv city and oblast Party committees and soviets, published five days a week in Lviv from November 1939 to June 1941 and from 1944 to 1991. The newspaper's pressrun was increased from 88,000 in 1960 to 230,000 in 1980, but by 1990 it had been reduced to 192,000. By contrast, the pressrun of the Russian-language newspaper of the Lviv oblast Party Committee and Soviet, *L'vovskaia pravda* (est 1946), was increased from 38,000 in 1960 to 111,250 in 1980.

Vil'na Ukraïna (Free Ukraine). A journal published by the *Ukrainian Free Society of America in Detroit and, from 1961, New York City. Edited by a board headed for

Vil'na Ukraïna (Detroit)

many years by V. Lysy, it appeared quarterly from 1954 to 1967 and then once or twice a year to 1972 (a total of 67 issues). The journal contained valuable articles and memoirs pertaining to the history of Ukrainian socialism, the revolutionary period of 1917–20, the OUN, and the Ukrainian Insurgent Army; analyses of Soviet Ukrainian politics, economics, education, and demographic changes; and critiques of Ukrainian émigré politics, particularly of the OUN (Bandera faction), the Ukrainian Congress Committee of America, and the Ukrainian National Council.

Vil'na ukrains'ka shkola (Free Ukrainian School). An organ of the *All-Ukrainian Teachers' Association, published in Kiev in 1917–19. It published articles on pedagogy and teaching methodology and devoted particular attention to the development of a modern Ukrainian education system. The editors were S. *Cherkasenko and then O. *Doroshkevych, and prominent contributors included V. Durdukivsky, O. Muzychenko, S. Rusova, S. Siropolko, P. Kholodny, Ya. Chepiha-Zelenkevych, and I. Yushchysyn.

Vil'ne slovo (Free Word). A newspaper published by the *Union for the Liberation of Ukraine for Ukrainians serving in the Russian army interned in the POW camp in Salzwedel, Germany, in 1916–18. It appeared semimonthly, weekly, and then semiweekly under the editorship of P. Karmansky and, in 1918, Z. Kuzelia. It was succeeded by *Shliakh*, the organ of the Ukrainian government's commission for the repatriation of prisoners.

Vil'ne zhyttia (Free Life). A daily newspaper published by the Prosvita society in Odessa in 1918. It was edited by V. Chekhivsky and V. Ponomarenko.

Vil'ne zhyttia (Free Life). A newspaper of the Ternopil oblast and city councils and, until 1991, Party committees, published five days a week in Ternopil from October 1939 to June 1941 and since 1944. Its pressrun was increased from 45,000 in 1960 to 99,000 in 1970, 128,000 in 1980, and 131,000 in 1988.

Vilner, Volodymyr [Vil'ner], b 21 March 1885 in Hrodna, Belarus, d 9 August 1952 in Kiev. Stage director of Lithuanian origin. He completed drama courses at St Petersburg University (1912) and acted in the St Petersburg Novyi Teatr (from 1911). Then he worked as a director in

Kharkiv (1918–20) and as principal stage director in the Kiev Ukrainian Drama Theater (1938–41) and the Kiev Theater of Musical Comedy (1947–50).

Vilnianske [Vil'nians'ke]. VI-16. A city (1988 pop 17,800) on the Vilnianska River and a raion center in Zaporizhia oblast. It was founded in 1840 and named Sofiivka. In 1935–66 it was called Chervonoarmiiske. It was given city status and renamed Vilnianske in 1966. Its factories manufacture tableware, instruments, and plastics.

Vilnius (Ukrainian: Vilna; Polish: Wilno). The capital (1989 pop 582,000) of *Lithuania, situated at the confluence of the Vilnia and the Neris rivers. Vilnius was founded in the 13th century and became the capital of the Grand Duchy of Lithuania in 1323. From 1795 to 1915 it was a gubernial center in the Russian Empire. From 1920 to 1939 it was occupied by Poland, and from 1940 to 1991 it was the capital of the Lithuanian SSR. In 1991 Vilnius became the capital of independent Lithuania.

In the 16th and early 17th centuries Vilnius was a major center of Ruthenian (Ukrainian and Belarusian) and Polish cultural and religious life. It was the cradle of Ruthenian printing: F. *Skoryna established a press there ca 1520. P. Mstislavets produced an edition of the four Gospels (1575) and a psalter (1576) there. His press was later taken over by the *Mamonich brothers. The works of the Orthodox polemicist S. *Zyzanii, L. *Zyzanii's Slavonic grammar (1596), and M. *Smotrytsky's *Threnos* (1610) were also published there.

In the late 16th century there were 14 Catholic and 9 Orthodox churches and monasteries in Vilnius. The most famous was the Holy Spirit Monastery (est 1584, founded by the Vilnius Brotherhood), which received the right of stauropegion in 1588 from Patriarch Jeremiah. S. *Kosiv, K. *Stavrovetsky-Tranquillon, and I. *Kozlovsky-Trofymovych studied at the Vilnius Brotherhood School attached to the monastery, and M. Smotrytsky taught there. Y. *Kuntsevych was a monk and archimandrite at the Basilian monastery in Vilnius. The Jesuit college in Vilnius also attracted many Ukrainians. P. *Skarga was its rector in 1574–9 and became the rector of its successor, the Vilnius Academy.

In 1829–30 T. *Shevchenko lived in Vilnius. In 1986 a statue of him was erected on the campus of Vilnius University. In the 1920s, under Polish rule, over 200 Western Ukrainians studied at Vilnius University and were active in a Ukrainian student hromada there, which frequently collaborated with Belarusian students in Vilnius. Until 1939 Vilnius was a major Eastern European studies center. The collections of documents published by the Vilnius Archeographic Commission (39 vols, 1865–1915) are a valuable source for the study of Ukrainian history, as are materials preserved in Vilnius's museums, libraries, and archives (particularly of the monasteries).

In 1989 some 13,000 Ukrainians lived in Vilnius. There they founded the main branch of the Hromada of Ukrainians of Lithuania in December 1988. The Vilnius branch runs an amateur choir and a Sunday school (est 1989) that provides lessons in Ukrainian and Lithuanian history and in the Ukrainian language. It also publishes the Hromada bulletin *Prolisok*, which contains articles on Ukrainian history, culture, and literature and on current events. The branch organizes lectures by speakers and performances

by actors and singers from Ukraine. A Ukrainian program is broadcast monthly by Lithuanian state radio in Vilnius.

A. Zhukovskiy

Vilnohirske [Vil'nohirs'ke]. V-15. A city (1989 pop 24,000) in Verkhnodniprovske raion, Dnipropetrovske oblast. It was founded in 1956 as a workers' settlement and was granted city status in 1964. It is an industrial city that manufactures electrovacuum glass, reinforced-concrete products, silicate brick, and canned foodstuffs. It is the home of the *Verkhnodniprovske Mining and Metallurgical Complex.

Vilny, Volodymyr [Vil'nyj], b 13 February 1921 in Velykomykhailivka, now in Pokrovske raion, Dnipropetrovske oblast, d 2 October 1981 in Kiev. Writer. He graduated from the Kiev Pedagogical Institute in 1946. His poetry was first published in 1938. The poetry collections *Liubliu zhyttia* (I Love Life, 1949), *Dai ruku, tovarysh* (Give Me Your Hand, Comrade, 1957), and others appeared thereafter. In later years Vilny wrote mainly prose: the novelettes *Zdrastuite, mam!* (Greetings, Mother, 1964), *Tak pochynalos' kokhannia* (Thus Love Began, 1969), and *Den' neskinchenyi* (The Unfinished Day, 1974); the novels *Ty na sviiti odna* (You Are the Only One in the World, 1963), *Zhytni hory* (Mountains of Rye, 1972), *Vohnenni troiandy* (Fiery Roses, 1976), *Komu spivaiut' zhavoronky* (For Whom the Larks Sing, 1976); and other works. Vilny also wrote publicistic prose.

Vil'nyi holos (Free Voice). A daily newspaper published in Poltava in 1918.

Vil'nyi kozak (Free Cossack). An organ of the Central Council of the *Free Cossacks, published in 1917–18 in Uman and Bila Tserkva. The editors were M. Levytsky and S. Kinash.

Vilshanka [Vil'shanka]. V-11. A town smt (1988 pop 5,600) on the Syniukha River and a raion center in Kirovohrad oblast. It was founded at the end of the 17th century by Cossacks and runaway serfs and was called Maslove. In the 1740s it was renamed Vilshanka and made part of Myrhorod regiment. A large Bulgarian colony was settled there in 1774. In 1967 the village was granted smt status and made a raion center. It is an agricultural town with a mixed-feed factory.

Vilshanka, Treaty of. An agreement between the Cossacks and Poles reached in October 1617 at Sukha Vilshanka (near Tarashcha), in the Kiev region. The Cossack *starshyna*, headed by Hetman P. *Sahaidachny, and the commissioners of Crown Hetman S. Żółkiewski ended their negotiations with two separate declarations, in

which there were some discrepancies. The number of registered Cossacks was to be determined by the Polish Sejm; the decision was made, however, to exclude townsmen (tradesmen, merchants, tavern keepers, reeves, and burgomasters) who had joined the Cossack Host within the previous two to three years. The registered Cossacks were allowed to elect their hetman, and their choice was to be confirmed by the Polish king. The Cossacks were to stay in their usual localities without migrating into the free lands, and they were to desist from attacking the Crimea and Turkey.

Vilshanka River [Vil'sanka] (aka Vilshana). A right-bank tributary of the Dnieper River that flows for 100 km through Cherkasy oblast before emptying into the Kremenchuk Reservoir. It drains a basin area of 1,260 sq km. Sections of the river are used for water supply and irrigation. The city of Horodyshe is situated on its middle course.

Vilshany [Vil'shany]. III-16. A town smt (1988 pop 9,100) on the Losyk River in Derhachi raion, Kharkiv oblast. It was founded in the 1650s by refugees from the Kiev region led by Capt S. Kovalevsky. The town received smt status in 1938. It has a furniture, a sewing, and a brick factory.

Vilshenko, Yaroslav. See Lototsky, Antin.

Vilshyna, Ostap [Vil'shyna] (pseud of Yurii Panteleichuk), b 14 March 1899 in Rohizna (now part of Chernivtsi), d 15 May 1924 in Lenkivtsi (now part of Chernivtsi), Bukovyna. Poet. During and after the First World War he studied at the Chernivtsi Teachers' Seminary. There he organized a secret Ukrainian literary circle in 1919. To avoid Rumanian military service he fled to Uzhhorod, in Transcarpathia, in 1921, where he worked for the Committee of Ukrainian Refugees. When he returned to Bukovyna in 1922, he was imprisoned for two months and then forced to do military service in Bessarabia. He deserted and died soon thereafter of an illness. As a poet he was influenced by Yu. Fedkovych, T. Shevchenko, and I. Franko. His patriotic and lyrical poems appeared from 1921 in periodicals published in Chernivtsi (eg, *Kamieniari*, *Promin'*), Lviv (*Svit dytyny*), and Uzhhorod. He also wrote poetry for children.

Vilshytsky, Fedir. See Potushniak, Fedir.

Vimina, Alberto (Bellunese or da Ceneda; assumed names of Michele Bianchi), b 1 March 1603 in Belluno, Republic of Venice, d 1667 in Italy. Italian adventurer, diplomat, and travel writer. In 1650 he was engaged by the Venetian consul to Vienna and the papal nuncio to approach Hetman B. Khmelnytsky in Chyhyryn about forming an anti-Ottoman coalition. In 1656, after returning to Lviv, Vimina prepared several accounts of his journey (one of which was published in 1890 as *Relazione dell' origine e dei costumi dei Cosacchi* and reprinted in Russian translation in *Kievaskaia starina*, 1899) and wrote a broader survey of the Cossack-Polish War titled *Historia della guerre civili di Polonia*, which was published posthumously in Venice in 1671 (repr, Milan 1861).

Vinaikin, Vasyl [Vinajkin, Vasyl'], b 9 January 1924 in Shamkino, Chuvash Autonomous oblast, RSFSR. Sculptor. In 1953 he graduated from the Kiev State Art Institute, where he studied under M. Lysenko. He sculpted a statue of B. Khmelnytsky (1954) and *Youth* (1957) and collaborated on the monument commemorating the 'reunification' of Ukraine and Russia in Pereiaslav-Khmelnytskyi (1961) and the monument to Soviet victims of the Nazis erected in Kiev's Darnytsia raion (1970).

Vincenz, Stanisław, b 30 November 1888 in Sloboda Rungurska, Kolomyia county, Galicia, d 28 January 1971 in Lausanne, Switzerland. Polish writer and essayist. He spent his childhood and youth in the Hutsul Region. He studied at Vienna University and worked for a few years as a journal editor in Warsaw. Later he lived in Hungary (1940-6) and Germany (1946-7), near Grenoble, France (1947-64), and in Lausanne. From 1947 he contributed to the Polish journal *Kultura* (Paris). Fluent in the Hutsul dialect and well versed in Hutsul folkways and lore, he wrote an epical tetralogy about the Hutsul region's past and present, *Na wysokiej potoninie: Obrazy, dumy i gawędy z Wierchowiny Huculskiej* (In the High Mountain Pasture: Pictures, Elegies, and Tales from the Hutsul Highland, 1936 [rev edn 1956], 1970, 1974, 1979; repr 1983). An abridged English translation of the first volume, *On the High Uplands*, was published in New York in 1955, and Ukrainian translations of it were serialized in the Lviv journal *Zhovten'* (1969-71). Several editions of Vincenz's philosophical, cultural, and political essays and reminiscences were published in the West and in Poland between 1965 and 1983; they include *Wspomnienia o Lwowie* (Reminiscences of Lviv, 1967) and *Dialogi Lwowskie* (Lviv Dialogues, 1968).

Mykola Vinhranovsky

Vinhranovsky, Mykola [Vinhranovs'kyj], b 7 November 1936 in Pervomaiske, Mykolaiv oblast. Writer, actor, film director, and translator. He graduated from the All-Union Institute of Cinematography (1960) in Moscow and has worked at the Kiev Artistic Film Studio, where he played the lead role in Yu. Solntseva's film *Povist' polumianykh lit* (The Tale of Flaming Years, 1961). He has written film scripts and directed the feature films *Eskadra povertaie na zakhid* (The Squadron Turns Westward, 1967), *Bereh nadii* (The Shore of Hope, 1967), *Duma pro Brytanku* (Duma about Brytanka, 1969), and *Klymko* (1984) and several documentaries. Vinhranovsky gained prominence in

the early 1960s as a leading poet of the **shestydesiatnyky*. He has published the poetry collections *Atomni preliudy* (Atomic Preludes, 1962), *Sto poezii* (A Hundred Poems, 1967), *Poezii* (Poems, 1971), *Na sribnim berezi* (On the Silver Shore, 1978), *Kyiv* (Kiev, 1982), *Hubamy teplymy i okom zolotym* (With Warm Lips and a Golden Heart, 1984), and *Kin' na vechirunii zori* (The Horse on the Evening Star, 1987); over 20 stories, including *V hlybyni doshchiv* (In the Depth of the Rains, 1980; about the making of a film); and, since 1970, several poetry books for children, for which he was awarded the Shevchenko Prize in 1984. Editions of his selected prose (1985; 1987 in Russian translation) and poetry (1986) have been published.

Vinkivtsi [Vin'kivci]. IV-8. A town smt (1988 pop 6,500) on the Kalius River and a raion center in Khmelnytskyi oblast. It was first mentioned in historical documents in 1493, when it was under Polish rule. In 1672–99 it was occupied by Turkey. After the partition of Poland in 1793, it was annexed by Russia. The village was granted smt status in 1957. It has a canning, a cheese, a mixed-feed, and a brick factory.

The Jesuit college (1617) in Vinnytsia

Vinnytsia [Vinnyc'ja]. IV-9. A city (1990 pop 379,000) on the Boh River and an oblast and raion center since 1932. It was first mentioned in historical documents in 1363, as a Lithuanian fortress. The settlement gradually developed from a farming village into a manufacturing and trade center. By the 16th century it held regular fairs, had several guilds, and traded with cities on the Black Sea coast. As a frontier town Vinnytsia was exposed to Tatar attack: between 1400 and 1569 it was raided 30 times. In 1558 a new fortress was built on a river island, and then a new town sprang up on the right bank. From 1569 Vinnytsia was under Polish rule. In 1598 it was made the administrative center of Bratslav voivodeship, and in 1640 it was granted the rights of **Magdeburg law*. An Orthodox brotherhood was set up by the burghers in the 1570s. It sponsored a school, which operated for almost two centuries. In 1632 a college was set up at the brotherhood Monastery of the El-

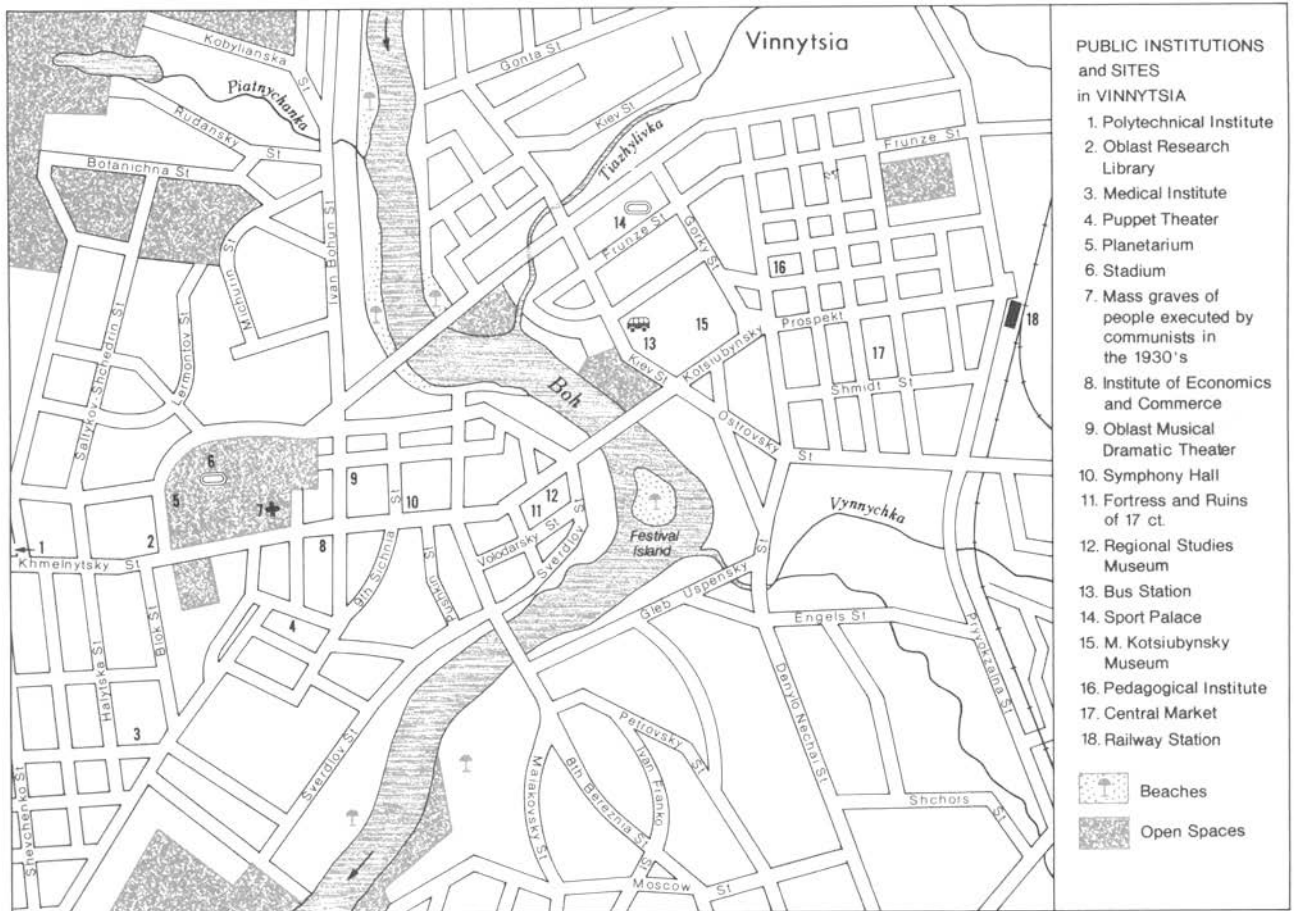

A bridge in Vinnytsia

evation of the Cross. At the same time the Poles established two monasteries and a Jesuit college (1642). After being liberated from the Poles by M. Kryvonis in 1648, Vinnytsia became a regimental center (1653–67). Under I. Bohun's command it withstood a major Polish siege in 1651. After being reoccupied by Poland in 1667, it was captured by the Turks, and entered a period of economic decline (1672–99) until it once more came under Polish control. In the 18th century its inhabitants revolted repeatedly against their Polish overlords and with the help of the haidamakas seized the town in 1702–4, 1734, 1750, and 1764. In 1793 Vinnytsia was annexed by the Russian Empire and became the administrative center of Bratslav vicegerency and a county center in Podilia gubernia (1797–1925). It developed rapidly in the second half of the 19th century. The Kiev–Balta railway line (1871) linked the town with Kiev, Odessa, St Petersburg, and Moscow. Vinnytsia became the gubernia's leading exporter of foodstuffs and trading center. The population grew from 10,000 in 1860 to 30,000 in 1897. About 35 percent of the population was Jewish in 1897 (45 percent in 1910).

During the revolutionary period the city changed hands several times. In 1919 it was the seat of the Supreme Command of the Ukrainian Galician Army. At the beginning of 1920 the Revolutionary Committee of the Red Ukrainian Galician Army was stationed there. Then the

The Mykhailo Kotsiubynsky Literary Memorial Museum in Vinnytsia

government of the UNR stayed there for a brief period. Under the Soviet regime Vinnytsia became an important cultural center. It was the home of the Cabinet for the Study of Podilia (est 1924), which was tied to the VUAN, and the Vinnytsia Branch of the National Library of Ukraine. Under the German occupation (1941–4) the atrocities committed by Soviet security forces were exposed (see *Vinnytsia massacre), but new crimes were committed by the Nazi forces, particularly against the Jewish population.

After the Second World War the city developed into a large industrial and communications center. Its population rose from 93,000 in 1939 to 211,400 in 1970 and 314,000 in 1979. Vinnytsia accounts for nearly 50 percent of the oblast's industrial output. Its machine-building and metalworking enterprises produce instruments, radio devices, ball bearings, and tractor assemblies. The main chemical plants produce superphosphate fertilizer and paint. The large food industry consists of meat packing, oil and fat processing, canning, confectionery manufacture, distilling, and brewing. The largest enterprises of the light industry are the clothing and footwear consortia. The building-materials industry produces reinforced concrete and bricks. Woodworking and furniture manufacturing make a sizable contribution to the economy.

The city's educational facilities include 9 secondary special schools and 12 vocational schools, 3 institutes (pedagogical, polytechnical, and medical), and branches of the Ukrainian Agricultural Academy (est 1982) and the

Kiev Trade and Economics Institute (est 1969). Its chief cultural institutions are the Ukrainian Music and Drama Theater, a puppet theater, a philharmonic society, a literary museum dedicated to M. *Kotsiubynsky, who was born in Vinnytsia, and a regional studies museum. The N. Pirogov Museum (est 1947) is just outside the city. The main architectural monuments are the Dominican (est 1624), Jesuit (1610–17), and Capuchin (1760) monasteries and the wooden churches of St George (1726) and St Nicholas (1746).

Vinnytsia Chemical Plant (Vinnytskyi khimichnyi zavod). A chemical industry plant located in Vinnytsia. Built in 1912 to produce superphosphates (10,000 t in 1914), the plant was expanded after the Revolution of 1917 and especially after the Second World War. It is an important producer of mineral fertilizers (817,000 t in 1977) and detergents.

Vinnytsia Instrument Plant (Vinnytskyi instrumentalnyi zavod). A machine and instrument factory founded in Vinnytsia in 1946. The plant was totally rebuilt and modernized in 1958–67. It produces mainly metal-cutting machines, including reamers, mills, countersinks, and over 1,500 other specialized and standard products.

Vinnytsia massacre. A series of executions of thousands of citizens of the city of Vinnytsia and its surrounding area, perpetrated in 1937–8 by the NKVD during the

A mass grave of victims of the Vinnytsia Massacre

*Yezhov terror. The massacre was not the only action of its kind; many were carried out by the Soviet state security in prisons throughout the Ukrainian SSR. But the Vinnytsia massacre gained particular notoriety because of the extent to which it was made public. In an attempt to discredit the previous Soviet regime by highlighting the atrocities it had perpetrated, the German occupational forces, following the lead of various witnesses, exhumed the bodies of the massacre's victims between May and July 1943. To supplement the examinations made by German and Ukrainian doctors, the German authorities invited an international commission of medical experts to investigate the corpses found in 66 mass graves in the Vinnytsia area. Forensic scientists from Belgium, Bulgaria, Croatia, Finland, France, Hungary, Italy, Holland, Rumania, Sweden, and Slovakia participated in July 1943. It was reported that a total of 9,439 bodies (including 169 women) were recovered. Most of the victims had been shot in the back of the head; some had been buried alive. Only 10 percent of them were identified, largely on the strength of documents found on their persons, items of clothing, body markings, or other documents interred by the NKVD at another site. Among those identified were persons whose

Foreign physicians performing an autopsy of the remains of a victim of the Vinnytsia Massacre

families had been told they had been sent to prison camps without right of correspondence. According to the testimony of Vinnytsia's citizens there were other graves, but the Germans were unable to investigate because they were eventually forced to retreat. The fact that the German Gestapo itself used the NKVD prisons and installations for mass murder prevented a comprehensive investigation of the NKVD's actions in other cities, towns, and villages, both in the 1937–8 period and during the Soviet retreat of 1941.

Vinnytsia oblast. An administrative territory in central Ukraine, formed on 27 February 1932. It has an area of 26,500 sq km and a population (1990) of 1,925,600. The oblast is divided into 26 raions, 17 cities, 29 towns (smt), and 615 rural councils. The capital is *Vinnytsia.

The Rosava Valley in Vinnytsia oblast

Physical geography. The oblast consists largely of a rolling plain which slopes down toward the south and southeast. The southwestern part consists of the Podolian Upland, and the northeastern part, of the Dnieper Upland. The climate is temperate continental: the average January temperature is -5°C , and the average July temperature is 19.6°C . The annual precipitation ranges from 480 to 590 mm. The Boh River, the tributaries of which include the Zhar, the Riv, the Selnytsia, the Dokhna, the Sob, the Snyvoda, and the Udych, runs through the oblast in a southeasterly direction. The Dniester, the tributaries of which include the Murafa, the Liadova, the Nemiia, the Rusava, and the Markivka, flows along the oblast's southern border. Chernozems are the main soil type in the northeastern part of the oblast; gray, heavy gray, and light gray soils predominate in the central part; and deep chernozems and podzolized chernozems are common in the southeast and the Dniester region. Part of the forest-steppe belt, the oblast has maintained some forests of oak, hornbeam, maple, ash, and linden.

History. The territory was inhabited as early as the Paleolithic period. From the 10th to 12th centuries it was part of Kievan Rus', and in the 13th century, part of the Principality of Galicia-Volhynia. In the 13th century it came under the Golden Horde. The Grand Duchy of Lithuania gained control of the region in the 14th and 15th centuries and in 1569 transferred the territory to the Polish Commonwealth, where it formed part of Bratslav voivodeship. Vinnytsia regiment (1648–67) was part of the Hetman state, before it was recaptured by Poland and then con-

quered by Turkey (1672–99). In 1793, after almost another century of Polish rule, the territory was annexed by the Russian Empire in 1793 and absorbed into Podilia gubernia (1797–1925). Under the Soviet regime Vinnytsia okruha was set up in 1925, dissolved into raions in 1930, and reconstituted as an oblast in 1932.

Population. The majority of the oblast's population in 1989 was Ukrainian (91.5 percent). The largest minority was Russian (5.9 percent). The most densely populated parts are around Vinnytsia and along the Dniester River. About 45 percent of the population is urban. The major city is Vinnytsia, and *Zhmerynka, *Mohyliv-Podil'skyi, *Koziatyn, *Haisyn, *Khmilyk, *Tulchyn, and *Ladyzhyn represent significant secondary centers.

Industry. The main industries in the oblast are food processing (41.8 percent of the industrial output in 1983), machine building and metalworking (22.6 percent), light industry (11.6 percent), and electric power (5.7 percent). The food industry consists mostly of sugar refining: there are 39 refineries in the oblast, the largest ones being in Haisyn, Kyrnasivka, Bershad, and Pohrebyshche. The by-products are used by distilleries in such centers as Bar, Kalynivka, and Trostianets. The largest meat packers are in Vinnytsia, Trostianets, Haisyn, Bar, Koziatyn, and Tulchyn. Dairy products, fruit canning, flour milling, and brewing are also important branches of the food industry. Machine-building plants manufacture tractor parts in Vinnytsia, sugar refining machinery in Kalynivka, instruments in Vinnytsia, and other kinds of machinery in Bar, Mohyliv-Podil'skyi, and Turbiv. The main branch of light industry is clothes manufacturing; there are 39 sewing factories, of which the largest are in Vinnytsia, Mohyliv-Podil'skyi, Bar, Haisyn, Khmilnyk, and Koziatyn. The other important branches are footwear, fur, and knitwear manufacturing and handicrafts. The electric energy to run industry is supplied by the Dniester Hydroelectric Complex near Mohyliv-Podil'skyi, the thermoelectric plant in Ladyzhyn, and the thermoelectric substation in Vinnytsia. Other significant industries in the oblast are the chemical industry (fertilizers, consumer products, cleaning substances), furniture-making, and the building-materials industry.

Agriculture. About 62 percent of the oblast's gross output consists of agricultural production. In 1986 there were 577 collective and 101 state farms in the oblast. The total area devoted to agriculture was 2,044,000 ha, of which 89.8 percent was cultivated, and the rest was hayfield and pasture. Drained land amounted to 36,900 ha, and irrigated land, 32,000 ha. Of the cultivated land 50.6 percent was devoted to grain crops, mostly winter wheat and barley, but also legumes, corn, oats, and buckwheat; 14.2 percent to industrial crops (sugar beets, sunflowers, and tobacco); 27.9 percent to feed crops; and 7.3 percent to vegetables, melons, and potatoes. The Dniester region is known for its orchards (apples, pears, apricots, and cherries). Animal husbandry consists of beef- and dairy-cattle farming, hog raising, and sheep and goat farming. Poultry farming, bee-keeping, and fish farming are supplementary branches.

Transportation. In 1989 there were 1,262 km of rail track, 163 km of which were electrified, in the oblast. The main lines running through the oblast are Kiev–Odessa, Kiev–Lviv, Vapniarka–Znamiianka, Vapniarka–Yampil, Koziatyn–Berdychiv–Kalynkovychi, Koziatyn–Pohrebyshche–Uman, and Vinnytsia–Haivoron. The main junctions are Vinnytsia, Zhmerynka, and Vapniarka. The

highway network consisted of 9,500 km of road, 8,200 km of which were paved. The major highways in the oblast are Kiev–Zhytomyr–Vinnytsia–Khmelnitskyi, Vinnytsia–Nemyriv–Mohyliv-Podil'skyi, Nemyriv–Yampil, and Nemyriv–Uman. Both the Boh and the Dniester rivers are navigable. Vinnytsia and Mohyliv-Podil'skyi serve as river ports. An airport is situated in Vinnytsia. The Urengoi–Uzhhorod gas pipeline passes through the oblast.

BIBLIOGRAPHY

Istoriia mist i sil URSR: Vinnyts'ka oblast (Kiev 1972)

Vinnytsia Pedagogical Institute (Vinnytskyi pedahohichnyi instytut). An institute of higher learning for training teachers under the jurisdiction of the Ministry of Education of Ukraine. Established in 1938 as the Vinnytsia Pedagogical Institute, the school had earlier been a *teachers' institute (1912–20 and 1934–8), a *pedagogical tekhnikum (1921–30), and one of the *institutes for social education (1930–4). It has seven faculties: history, philology, physics-mathematics, English language, natural science–geography, music education, and physical education. A total of 4,260 students attended classes in 1976–7, 2,660 as day students. The library has nearly 500,000 volumes. In 1937 the institute was named after N. Ostrovsky.

Vinnytsia Polytechnical Institute (Vinnytskyi politekhnichnyi instytut). An institute of higher learning under the jurisdiction of the Ministry of Higher and Secondary Special Education of Ukraine. It was established in 1974 on the basis of a branch of the Kiev Polytechnical Institute. The institute has six faculties: energetics, machine construction, computing technology, radio technology, civil engineering, and general technology. It offers evening and correspondence courses as well as a graduate program. In 1977–8 a total of 6,594 students were registered in courses.

Vinnytsia regiment. An administrative territory and military formation set up in 1649 in Right-Bank Ukraine. Its first center was Kalnyk; hence, it was known initially as Kalnyk regiment. The regiment was divided into 19 companies, which numbered 2,000 registered Cossacks. In 1653 the regimental center was transferred to Vinnytsia. The regiment was devastated in the 1670s by factional fighting among Right-Bank Cossacks. In 1678 it was incorporated into Bratslav regiment. I. Mazepa and I. Skoropadsky made unsuccessful attempts to revive the regiment. Its most famous colonels were I. Bohun (1651–8) and I. Sirko (1658–60).

Vinnytsia Regional Studies Museum (Vinnytskyi kraieznavchyi muzei). A museum founded in 1919 as the Vinnytsia Historical and Folkways Museum. In 1978 it had 50,000 items, including valuable archeological, numismatic, and ethnographic collections and artworks, exhibited in natural science, pre-Soviet history, Soviet society, and fine art sections. Museums dedicated to the history of the Decembrist movement (in Tulchyn) and the Soviet-French partisan V. Poryk (in Poryk, Khmilnyk raion) are also sections of the museum, and the Mohyliv-Podil'skyi Regional Studies Museum is a branch. Guides to the museum were published in 1972 and 1984.

Vinnytsia Ukrainian Music and Drama Theater (Vinnytskyi ukrainskyi muzychno-dramatychnyi teatr im. M. Sadovskoho). A theater established in 1940. It has staged classical Ukrainian and Russian and Soviet plays, G. Lessing's *Emilia Galotti*, an adaptation of V. Hugo's novel *Notre-Dame de Paris*, B. Brecht's *Der kaukasische Kreidekreis*, and M. Arkas's *Kateryna*. Among its members have been F. Vereshchahin, A. Ovcharenko, M. Pedoshenko, I. Sadovsky, and I. Sikalo.

Vinnyts'ka pravda (Vinnytsia Truth). A newspaper of the Vinnytsia oblast and city Party committees and councils, published six days a week from 1944 to 1991. The Podilia Gubernia Party Committee began publishing a paper in Russian in 1917. It changed names several times before switching to Ukrainian as *Chervonyi krai* (1924–31) – under which name it was published three and, from 1926, two times a week as the paper of the Vinnytsia and Tulcha okruha Party committees – and then as *Bil'shovvys'ka pravda* (1932–41), the paper of the Vinnytsia Oblast Party Committee. The paper's pressrun increased from 35,000 in 1950 to 135,000 in 1970 and 213,000 in 1980.

Vino. In medieval Rus', a payment from a bridegroom to the parents or relatives of the bride. It is mentioned in *Povist' vremennykh lit* and other early sources. Initially, this was a significant sum, but with time it was reduced to a symbolic value. In *Kormchaia kniga* and according to Lithuanian-Ruthenian law until the 16th century, *vino* is the dowry the bride brings into the marriage. The dowry usually consisted of both money and goods, such as livestock and clothing. In *Ruskaia Pravda* and the Lithuanian Statute, the term is used to identify the property given by the bridegroom to his bride in compensation for her dowry. The property was used jointly during the marriage, but in the event of the husband's death it remained with the widow.

Vinochok dlia podkarpats'kykh ditochok (Garland for Subcarpathian Children). A children's magazine published semimonthly in 1920 and monthly in 1921–3 in Uzhhorod by the Subcarpathian Ruthenian school board. In 1924 it appeared as a supplement to **Nash ridnyi krai* in Tiachiv. The editors were I. Pankevych, Ya. Rozvoda, and A. Markush.

Vinok rusynam na obzhynky
(pt 1)

Vinok rusynam na obzhynky (A Garland for Ruthenians during the Harvest). The title of two miscellanies published in Vienna in 1846 and 1847 by I. Holovatsky. They were among the first Ukrainian-language literary publications and played an important role in the early development of Ukrainian literature. The first contained A. Dobriansky's article on the Christianization of Rus', Ya. Holovatsky's articles on M. Shashkevych and Serbian folk songs and his translations of over 20 songs, I. Danylovych's article on Lithuanian-Ruthenian law, and over 25 poems and poetic translations by Shashkevych. The second volume included A. Mohylnytsky's article on the duties of Austrian subjects; stories and poems by I. Vahylevych, M. Ustyianovych, I. Holovatsky, Mohylnytsky, and L. Dankevych; and poems, articles on ethnographic and historical subjects, translations, and transcriptions of folktales by Holovatsky.

Pastor Georgii Vins

Aleksandr Vinter

Vins, Georgii, b 4 August 1928. Prisoner of conscience. The secretary of the Council of Churches of Evangelical Christians and Baptists and a Baptist pastor in Kiev, he was imprisoned in labor camps in 1966–9 for his religious activities. He was rearrested in March 1974, and sentenced in 1975 to five years in camps in the Yakut ASSR and five years' exile. He was released in April 1979 as a result of an agreement between the US and USSR governments, and given asylum in the United States. There he founded and heads the International Evangelical Christian Baptist Representation and published the *Prisoners' Bulletin: Voice of the Persecuted Church in the Soviet Union*.

Vinter, Aleksandr, b 10 October 1878 in Staroseltsi (now Stara Wies), Siedlce gubernia (now in Poland), d 9 March 1958 in Moscow. Specialist in energetics; full member of the USSR Academy of Sciences from 1932. He studied at the Kiev Polytechnical Institute and in St Petersburg. He designed and built the first peat-burning electric generating station in the Russian Empire. After the First World War he directed the construction of many major electric power stations in the USSR (including the Dnieper Hydroelectric Station, the largest power station in Europe at the time), the Dnieper Industrial Complex, and the Dniprobud trust. After 1944 he held important positions in the energy hierarchy of the USSR and contributed significantly to its energy planning, including the planning of the energy complexes of central Ukraine.

Vintskovsky, Dmytro [Vinckovs'kyj] (pseuds: D[imiri]trii or D[mytro] iz O[stry], D[mytro] iz nad D[nestra]), b 15 November 1846 in Ostra, Bukovyna, d 25 October 1917 in Kiev. Writer. He published his first story in *Nedilia* in 1865 while still a student at the Drohobych gymnasium. He worked as a teacher in Suceava (1873–4), Chernivtsi (1875–7), and Lviv (1877–83) and from 1884 as a bank clerk in Lviv. His popular articles and pedestrian poems and stories appeared in various Russophile periodicals, including those of the Kachkovsky Society and the Stauropigion Institute. The Kachkovsky Institute published his educational brochures for the peasantry in the 1880s.

Vintskovsky, Yaroslav. See Yaroslavenko, Yaroslav.

Violet (Ukrainian: *fialka*). The common name for annual and perennial plants of the family Violaceae, representing over 500 species of herbs and low shrubs worldwide. Over 30 species grow in Ukraine in forests, meadows, and marshes, with multicolored, violet, yellow, or white flowers. The sweet violet (*Viola odorata*) and the weedy *V. tricolor* grow wild and are also cultivated as ornamentals. The European tricolor violet and the Asiatic *V. altaica* served as parent species of the most popular garden violet, the pansy (Ukrainian: *bratky*, *bratchyky*), a hybrid developed centuries ago.

Violin (*skrypka*). A bowed string instrument. Older types of this instrument existed in Ukraine as early as the 9th century. The *hudok* (medieval fiddle) is depicted on an 11th-century fresco in Kiev's St Sophia Cathedral. In the territories of Western Ukraine a three-stringed fiddle (*skrypysia*) was known from the 14th century. The modern violin, developed in Italy, was introduced into Ukraine at the beginning of the 17th century and became extremely popular as a folk instrument in ensembles of **troisti muzyky*. Vibrato, a modern violin technique, originated in Western Ukraine and Poland and was first described by M. Praetorius in *Syntagma musicum* (1618). During the 17th and 18th centuries interest in the violin led to the growth of Western-style orchestras in Ukraine. In the early 19th century H. *Rachynsky became Ukraine's first touring concert violinist, and in the 20th century O. *Krysa and S. *Staryk have emerged as outstanding Ukrainian violinists. Well-known contemporary Ukrainian violin makers include T. Pidhorny and V. Mochalov.

Viper. See Snake.

Viper's bugloss (*Echium*; Ukrainian: *syniak*). A coarse, bristly Old World weed or shrub of the family Boraginaceae, a valuable nectariferous plant and a source of beebread. All parts of this plant are poisonous, including the showy, blue, tubular flowers. In Ukraine the bugloss, or blueweed (*E. vulgare*), grows everywhere. Its seeds contain nearly 30 percent oil, used in the manufacturing of paints. The red tower-of-jewels (*E. roseum*, formerly *E. rubrum*) grows on the steppes, in pine forests, and in forest clearings; the bark of its roots was used to obtain a carmine red textile dye.

Vira (Faith). A co-operative savings and loan association established in Peremyshl in 1894 by T. Kormosh. It became a model for several other co-operatives established in Galicia, especially the Provincial Credit Union (later Tsentrobank). Vira was dissolved by the Soviet authorities in 1939.

Vira i kul'tura (Faith and Culture). A journal of religious thought published in 1953–67 in Winnipeg by the Ukrainian Theological Society. The publication was the successor to *Nasha kul'tura* (1947–51) and *Slovo istyny* (1951–3). Edited by Metropolitan Ilarion (I. *Ohiienko), it dealt with theological, religious, and historical topics related to the Ukrainian Orthodox church. It also contained chronicles of religious life in Ukraine and the West; book reviews; and essays on literature, philosophy, art and architecture, and ethnography. After Ilarion's death in 1972 the theological society was revived and renamed in his honor (see *Metropolitan Ilarion Theological Society). It has published a number of *Vira i kul'tura* annuals which deal with many of the same topics as its namesake.

Vira i nauka (Faith and Science). An organ of the Ukrainian Evangelical Reformed church, published in Stanyslaviv (now Ivano-Frankivske) in 1925 and Kolomyia in 1926–39. It appeared monthly and, for a short time, semi-monthly. The journal published articles on religious topics and on the Evangelical movement in Western Ukraine, North America, and elsewhere. Its editors were P. Krat, V. Fediv, L. Buchak, V. Mykytchuk, and M. Kostiv. In 1930 it appeared in a pressrun of 2,000 copies.

Vira ta derzhava (Faith and the State). An official bi-weekly publication of the Hetman government's Ministry of Religious Denominations. Edited by V. Rybysky, the publication appeared briefly in Kiev in 1918, in a bilingual Ukrainian-Russian format.

Virah, Yulii, b 13 September 1880 in Khust, Transcarpathia, d 22 March 1949 in Mukachiv, Transcarpathia oblast. Painter. He studied at the Munich Academy of Arts (1898–1903) and in Budapest and Paris. He painted the murals inside the church of the Chernencha Hora monastery, near Mukachiv (1906–13), and portraits and genre paintings, such as *I Will Not Be a Monk* (1911), *Portrait of Mother* (1929), *Old Man with a Hat* (1932), and *From the Market* (1937). A catalog of his memorial exhibition was published in 1950.

Virgin lands (*tsilynni zemli*). Uncultivated land suitable for agriculture. Except for official preserves and sanctuaries there are no virgin lands in Ukraine today. Until the second half of the 18th century virtually all of Southern Ukraine and the Kuban was virgin land. At the end of the 18th century 90 percent of the land in those regions was still untilled; by mid-19th-century, 50 percent; and by the beginning of the 20th century, 20 percent. Much of the virgin land was used for sheep and cattle grazing. By the 1940s the last tracts of virgin land in Ukraine and the Kuban had been brought under cultivation.

In the late 19th century Ukrainian peasants from Russian-ruled Ukraine settled and brought under cultivation virgin lands in Central Asia and the *Far East. Peasants from Western Ukraine brought much of the prairie land of western Canada under the plow.

In 1953 N. Khrushchev initiated a major virgin lands campaign to increase agricultural production in the USSR. By 1964 almost 42 million ha had been brought under cultivation in Central Asia, the Volga and Ural regions, western Siberia, and the Far East. The campaign involved a massive propaganda effort and an unprecedented mobilization of labor and technical resources throughout the USSR. By 1956 some 80,000 young Ukrainians had 'volun-

teered' to work in Kazakhstan and Siberia. In addition two-thirds of all graduates of Ukrainian agricultural institutes were sent to work in the east, and tens of thousands of students worked there during summer vacations. The whole campaign was only a partial success: much of the land was of marginal quality, the climate was not always suited to agriculture, and some of the topsoil was blown away. The failure of the campaign was one of the pretexts for ousting Khrushchev from power in 1964, and the entire policy was abandoned soon afterward.

Virnyk, Davyd, b 22 July 1898 in Uiryntsi, Vinnytsia county, Podilia gubernia. Economic historian. After graduating from the Kiev Co-operative Institute in 1926, he taught at various institutes of higher education in Kiev and directed a department of the AN USSR Institute of Economics (1936–68). From 1966 he held the chair of political economy at the Ukrainian Agricultural Academy. Virnyk is known for his works in the history of Ukrainian economic thought, which follow the Party line and stress Soviet economic achievements, Russian-Ukrainian brotherhood, and Ukrainian indebtedness to Russian scholarship. He coauthored or coedited several works, including the two-volume *Rozvytok narodnoho hospodarstva Ukraïns'koi RSR* (The Development of the National Economy of the Ukrainian SSR, 1967) and *Narysy z istorii ekonomichnoi dumky na Ukraïni* (Essays in the History of Economic Thought in Ukraine, 1956).

Virology (*virusolohiia*). The branch of microbiology that studies viruses. The bacteriologist D. Ivanovsky observed that the agent that caused the tobacco mosaic disease could pass through the finest filter whereas bacteria could not; he wrote his doctoral thesis on the experiment at Kiev University in 1903. Modern virology began when W. Twort in 1915 and F. d'Hérelle in 1917 independently discovered viruses that infect bacteria. In the 1930s V. Ryzhkov and other scientists at Kharkiv University again studied the tobacco mosaic disease. In 1934, 40 types of bacteriophages were described and studied at the AN USSR (now ANU) Institute of Microbiology and Epidemiology (est 1928), renamed the ANU Institute of Microbiology and Virology in 1963, when a department of virology was created there. Entomopathogenic viruses have been studied at the ANU Institute of Zoology since 1953. Studies in medical virology have been carried out at the Kharkiv Scientific Research Institute of Microbiology, Vaccines, and Serums (est 1908), the Odessa Scientific Research Institute of Virology and Epidemiology (est 1920), and the Kiev Scientific Research Institute of Infectious Diseases (est 1949).

Scientists working with viruses have included H. Ruchko, F. Serhienko, H. Frenkel, and S. *Moskovets. The study of viral diseases of farm animals resumed after the Second World War in Kharkiv at the Institute of Zoology under S. *Hershenzon and continued at the *Kharkiv Zootechnical-Veterinary Institute under M. Revo, the *Ukrainian Scientific Research Institute of Experimental Veterinary Science under I. Kulesko, and the Ukrainian Agricultural Academy under V. *Nikolsky. Questions of virology are dealt with in the journal *Microbiologicheskii zhurnal*, published in Russian by the ANU.

P. Dzul

Pavlo Virsky

Virsky, Pavlo [Vir's'kyj], b 25 February 1905 in Odessa, d 5 July 1975 in Kiev. Ballet dancer, ballet master, and choreographer. He completed study at the Odessa Music and Drama School (1927) and studied in the Moscow Theater Tekhnikum (1927–8). He was a soloist and ballet master in the Odessa Theater of Opera and Ballet (1923–31); ballet master in the Kharkiv, Odessa, Dnipropetrovske, and Kiev theaters of opera and ballet (1931–7) and the Ensemble of Song and Dance of the Kiev Military District (1939–42); and artistic director of the ballet group of the Red Army Ensemble (1942–55). He organized the *State Dance Ensemble of Ukraine in 1937 and was its ballet master and artistic director from 1955. In 1962 his ensemble toured the United States and Canada. In 1977 the ensemble was named after him. Virsky's biography, by Yu. Stanishevsky, was published in Kiev in 1962.

Virzhikovsky, Roman [Viržykovs'kyj], b 28 July 1891 in Poti, Georgia, d 5 October 1938. Geologist. He graduated from Kiev University in 1916. In 1928 he was appointed a professor at the Kiev Hydromelioration Institute and head of the Ukrainian Scientific Research Institute of Hydraulics and Melioration. After moving to Kharkiv in 1935, he served as a government consultant on hydrogeological research. He was the author of a Ukrainian textbook in hydrogeology (1932) and of several geological maps of Podilia and Moldavia. He was arrested during the Stalinist terror in 1938, and died in prison.

Visnyk (Herald). A Ukrainian Orthodox newspaper published in Winnipeg since April 1924. Until 1928 it appeared monthly and was called *Pravoslavnyi vistnyk*. Since then it has appeared semimonthly, from 1954 as the official organ of the Ukrainian Orthodox Church of Canada. The editors have included Revs S. Savchuk, V. Kudryk, Ye. Hrytsyna, and S. Yarmus.

Visnyk (Herald). A monthly (in 1951–2 quarterly) organ of the Organization for the Defense of Four Freedoms for Ukraine published in New York since 1947. It contains nationalistic articles on political, cultural, and historical topics and reports on the activities of the organization. The journal has a circulation of approx 2,000.

Visnyk Akademii budivnytstva i arkhitektury URSR (Herald of the Academy of Construction and Architecture of the Ukrainian SSR). A quarterly published in Kiev from 1958 to 1964 by the Academy of Construction and Architecture. The journal's predecessors were *Visnyk Akademii arkhitektury URSR* (1946–52) and *Arkhitektura i budivnytstvo* (1953–7). *Visnyk* contained scholarly articles on construction and architecture and surveys of developments in those fields in Ukraine and abroad. Its editor was I. Litvinov.

Visnyk Akademii nauk Ukrain's'koi RSR (Herald of the Academy of Sciences of the Ukrainian SSR). A monthly journal of the AN URSR (now ANU), published in Kiev under that title from 1947 until 1991, when it became the *Visnyk Akademii nauk Ukrainy*. The journal began to appear irregularly (from 1 to 12 times a year) in Kiev in 1928 as *Visti Vseukrain's'koi akademii nauk*. In was titled *Visti Ukrain's'koi akademii nauk* in 1935 and *Visti Akademii nauk URSR* in 1936–46, and for some time was incorporated into *Dopovidi AN URSR*. The journal documents the organization of scholarship in Ukraine in articles on the planning and co-ordination of research and the training of academics, devotes considerable attention to the practical application of scholarship in the economy and the development of technology and industry, and reports on scientific discoveries and achievements, scholarly bodies, and scholarly conferences and symposia. In 1990 its editor in chief was I. Lukinov.

Visnyk radians'koi iustytzii (Herald of Soviet Justice). An organ of the People's Commissariat of Justice of the Ukrainian SSR and the Society of Ukrainian Jurists, published in Kharkiv (a total of 185 issues) from 1922 to 1930. It appeared in Russian as *Vestnik sovetskoi iustitsii na Ukraine* (1922–8) and then in Ukrainian (1929–30), first monthly (1922–3), then semimonthly. It published theoretical articles on Soviet law, official pronouncements and documents of Soviet legal bodies, and articles on the administration of justice in Ukraine. In 1931 it was merged with *Chervone pravo* to form *Revoliutsiine pravo*.

Visnyk sil's'kohospodars'koi nauky (Herald of Agricultural Science). A monthly agricultural journal published by the Ministry of Agriculture of Ukraine in Kiev since 1957. It has popularized developments in agricultural sciences and assisted in improving farming practices in Ukraine. The journal saw a steady decrease in its press-run, from 5,400 in 1960 to 2,900 in 1980. Ca 1991–2 it was renamed *Visnyk ahrarnoi nauky*.

Visnyk Ukrain's'koi Hreko-Katolyts'koi Tserkovy v Zakhidnii Evropi (Herald of the Ukrainian Greek Catholic Church in Western Europe). A monthly religious journal published in Paris in 1940 and 1945–52, originally as *Visnyk Ukrain's'koi Hreko-Katolyts'koi Tserkovy u Frantsii*. Edited by Rev I. Yatskiv, it contained church news and articles on religious and other topics.

Visti (News). A weekly political newspaper published in Lviv in 1933–4 and edited by R. Kulchytsky and B. Kravtsiv. Because it was pro-OUN, issues were frequently confiscated by the Polish authorities, and the paper was eventually suppressed. It was succeeded in July 1936 by *Holos natsii*.

Visti (1933–4)

Visti (News). A weekly newspaper for Galician Ukrainians forced to work in Germany, published in Berlin in 1942–5 by B. Kravtsiv. The chief editor was H. Stetsiuk.

Visti (News). A newspaper published since 1945 in Brussels by the Ukrainian Relief Committee in Belgium, semi-monthly and then monthly to 1973, twice in 1974, and bimonthly since 1976. The editors have included K. Mulkevych, M. Dzoba, Ya. Pryshliak, and V. Popovych.

Visti. See *Muzychni visti*.

Visti Bratstva kolyshnykh voiakiv I Ukrain's'koi dyvizii UNA. (Herald of the Brotherhood of Former Soldiers of the First Ukrainian Division of the Ukrainian National Army). A press organ of the veterans of the Division Galizien, established in October 1950 in Munich. Initially it was a monthly journal of 4 to 12 pages; in December 1951 it became a bimonthly of 24 to 40 pages. Its editors were O. Lesniak, O. Horbach, and L. Ortynsky (from 1952). It was succeeded by *Visti kombatanta*.

Visti kombatanta

Visti kombatanta (Veterans' News). A journal published since 1961 by the United Ukrainian War Veterans in America and the Brotherhood of Former Soldiers of the First Ukrainian Division of the Ukrainian National Army in association with the Brotherhood of Ukrainian Sich Riflemen, Former Members of the Ukrainian Insurgent Army, and the Ukrainian War Veterans' Association of Canada. It appeared quarterly in New York City until 1964; since 1965 it has been published bimonthly in Toronto. The editors have been I. Kedryn-Rudnytsky (since 1961), Yu. Tys-Krokhmalik (1961–4), V. Veryha (1965–74), and M. Maletsky (since 1974). The journal contains articles and memoirs pertaining to Ukrainian military formations in the years 1917–21 and 1939–50, and articles on military strategy, the Western and Soviet armed forces, in-

ternational and Soviet politics, and contemporary Ukrainian affairs. Its more than 325 contributors include V. Fedorovych, O. Horodysky, R. Kolisnyk, A. Komarnytsky, F. Korduba, R. Krokhmaliuk, Ya. Kurdydyk, B. Pidhainy, V. Simiantsiv, P. Samutyn, M. Sulyma, and V. Trembitsky. An author and subject index to the journal for the years 1961–85 was published in 1987.

Visti Tsentral'noho komitetu Komunistychnoi partii (bil'shovykiv) Ukraïny (News of the Central Committee of the Communist Party [Bolshevik] of Ukraine). A CP(B)U information bulletin founded in Kharkiv in April 1921. Until March 1928 it came out in Russian, and then in Ukrainian. The magazine published the decisions, directives, instructions, and reports of the CC as well as articles on Party work. In March 1930 it was reorganized and renamed *Partaktyvist*, then *Partrobitnyk Ukraïny* (Kharkiv–Kiev, 1933–41, 1945–6), and finally *Partiine zhyttia* (Kiev, 1946–9).

Visti ukrains'kykh inzheneriv (Ukrainian Engineers' News). A quarterly (initially monthly, then bimonthly) journal published in New York since 1950 by the Ukrainian Engineers' Society of America and the Ukrainian Technical Society of Canada (from 1956). It is the official organ of the World Federation of Ukrainian Engineers' Societies. It contains articles on various aspects of science and technology, especially developments in these fields in Soviet Ukraine. The editors have been R. Wolchuk, Z. Turkalo, S. *Protsiuk, S. Genyk-Berezovsky, Ya. Verhanovsky, O. Moroz, and Yu. Honcharenko.

Visti Vseukraïns'koï akademii nauk. See *Visnyk Akademii nauk Ukraïns'koï RSR*.

The Visti VUTsVK supplements *Literatura, nauka, mystetstvo* and *Kul'tura i pobut*

Visti VUTsVK (VUTsVK News). The major newspaper of the Soviet Ukrainian government, published daily in May–September 1919 in Kiev, from May 1920 to November 1934 in Kharkiv, and then again in Kiev to May 1941. Called *Visty VUTsVK* until 1929, it was the organ of the *All-Ukrainian Central Executive Committee (VUTsVK) and, from 1937, the *Supreme Soviet of the Ukrainian SSR.

It contained republican, all-Union, and world news, official Party government pronouncements, and political analyses and commentaries. Under its first editors, V. *Blakytyn and Ye. Kasianenko, it also devoted considerable attention to cultural issues and emerged as one of the most influential organs supporting the *Ukrainization policy of the 1920s. At that time, contributors included prominent writers and political figures, many of whom were former *Borotbists or former members of other Ukrainian parties. The weekly cultural and literary supplements *Literatura, nauka, mystetstvo* (1923–4) and *Kul'tura i pobut* (1924–8) published some of M. Khvylovy's most important contributions to the *Literary Discussion of 1925–8, and writings by other members and supporters of the writers' group Vaplite. *Visti VUTsVK* also published contributions to the forthcoming official conference on Ukrainian orthography held in Kharkiv in 1927, and a supplement on co-operative affairs (1927–8). In the late 1920s it was one of the most influential and popular papers in Ukraine; it reached a daily circulation of 74,000 in 1929, at a time when only 48,000 copies of the official *Pravda*, the central Party organ in Moscow, were sold in the Ukrainian SSR.

Under Stalinist rule the quality of the paper rapidly declined, and severe restrictions on its freedom of expression reduced it to a tool of the totalitarian state. By 1938 almost all of its former editors and contributors had fallen victim to the terror. That year the paper was renamed *Visti Rad trudiashchykh URSR*, and in 1941 it was amalgamated with *Komunist* (renamed **Radians'ka Ukraïna*).

Visti z Ukraïny. See *News from Ukraine*.

Vistnyk (Vienna)

Vistnyk (Herald). An official government newspaper for Ukrainians in the Austrian Empire, published in Vienna from February 1850 to 1866 as the continuation of **Halycho-ruskii vistnyk*. Frequent subtitle changes included *Porremenne pis'mo ... rusynov avstriiskoi derzhavy* (1850–1), *Dlia rusynov avstriiskoi derzhavy* (1852), *Chasopys' politicheskaiia dlia rusynov avstriiskoi derzhavy* (1857), and *Chasopys' uriadova ... dlia rusynov avstriiskoi derzhavy* (1865). It contained decrees and laws passed by parliament and articles on political, religious, and educational issues. The paper appeared three times a week (1850–1, 1861–2), semiweekly (1852–60, 1863–5), and weekly (1866). It was edited by I. Holovatsky (1850–2) and, later, by Yu. Vyslobotsky.

Vistnyk (Herald). A monthly journal of politics, literature, culture, scholarship, and community affairs published in Lviv in 1933–9 as the continuation of **Literaturno-naukovyi vistnyk*. Under D. *Dontsov, its publisher and chief editor, *Vistnyk* became one of the most influential journals in Western Ukraine, especially among students and young adults. It propagated a militant nationalist ide-

Vistnyk (Lviv)

ology, advocating the 'national-political slogans of the new Europe and the psychological rebirth of the nation,' and strongly condemned Marxism, communism, the Soviet Union, freemasonry, Russophiles, and even Ukrainian liberal-democrats and socialists. Articles, prose, and poetry were contributed by many prominent Western Ukrainian and émigré writers and publicists. *Vistnyk* attracted 1,500 subscribers. From 1934 it published a separate quarterly book series, with pressruns of up to 5,000 copies, featuring works by Dontsov and biographies of European nationalist and fascist leaders. The journal ceased publication in September 1939 with Dontsov's arrest by the Polish authorities.

Vistnyk Derzhavnoho sekretariatu osvity i viroispovidannia (Herald of the State Secretariat of Education and Religion). An irregular organ of the State Secretariat of Education and Religion of the Western Ukrainian National Republic, published in Stanyslaviv in 1919. It contained official decrees and communiqués of the secretariat.

Vistnyk Derzhavnoho sekretariatu viis'kovykh sprav (Herald of the State Secretariat of Military Affairs). An official organ of the Ministry of Military Affairs of the Western Ukrainian National Republic, published from December 1918 to the end of May 1919. From July 1919 to the end of 1919 it was published as *Vistnyk ukrains'koho viis'ka*. Its editor was Lt I. Bobersky.

Vistnyk derzhavnykh zakoniv i rozporiadkiv Zakhidnoi Oblasty Ukrainais'koi Narodnoi Respubliky

Vistnyk derzhavnykh zakoniv i rozporiadkiv Zakhidnoi Oblasty Ukrainais'koi Narodnoi Respubliky (Herald of State Laws and Regulations of the Western Province of the Ukrainian National Republic). The official gazette of the National Rada and State Secretariat of the Western Province of the UNR, published in Stanyslaviv in 1919 (a total of 11 issues). It succeeded *Zbirnyk zakoniv, rozporiadkiv, ta obizhnykiv proholoshenykh Derzhavnym Sekre-*

tariatom Zakhidnoi Oblasty Ukrainais'koi Narodnoi Respubliky, one issue of which appeared in December 1918.

Vistnyk Heneral'noho Sekretariatu Ukrainy (Herald of the General Secretariat of Ukraine). The official gazette of the General Secretariat of the Central Rada, published in Kiev from fall 1917 to early 1918 as the successor to *Visty z Ukrainais'koi Tsentral'noi Rady*. It contained official proclamations of the government and articles on political and economic affairs. Its editor was Yu. Tyshchenko. In early 1918 it was succeeded by **Vistnyk Rady Narodnikh Ministriv Ukrainais'koi Narodnoi Respubliky*.

Vistnyk Holovnoho Komisariatu Uriadu Ukrainais'koi Narodnoi Respubliky (Herald of the Chief Commissariat of the Government of the UNR). The official gazette of the UNR government, published in Zhytomyr in 1920 during the joint Polish-Ukrainian offensive against the Bolsheviks.

Vistnyk Kholms'koho huberniial'noho starostva (Herald of the Kholm Gubernial Starostvo). A newspaper published in Brest, Belarus, by the Kholm gubernial starosta of the Hetman government in 1918. It published news and articles about developments in the Kholm region and Podlachia. The editor was I. Bazylevych.

Vistnyk Narodnoho doma (Herald of the People's Home). A Russophile organ of the 'People's Home in Lviv' published monthly in 1882–1914 and then irregularly in 1921 and 1924. The journal began to appear after Russophiles had gained control of the People's Home and appeared initially in **yazychiie* before switching to literary Russian. It contained reports on the home's activities, literary works (primarily by Russian authors), and articles on scholarly and cultural topics. Many of the most prominent Russophiles of the time edited the journal and contributed articles to it.

Vistnyk Odesy (Odessa Herald). A daily newspaper published in Odessa in 1918.

Vistnyk ODVU (ODVU Herald). An organ of the 'Organization for the Rebirth of Ukraine (ODVU)', published monthly in New York in 1932–4 and then semimonthly in Philadelphia to June 1935. Edited by Ye. Skotsko, it contained news of the organization and articles on political affairs written mainly from an OUN perspective. It was succeeded by **Natsionalist* and *Ukraina*.

Vistnyk Rady Narodnikh Ministriv Ukrainais'koi Narodnoi Respubliky (Herald of the Council of National Ministers of the UNR). The official gazette of the UNR cabinet, published in early 1918 in Kiev. It contained official proclamations and articles on political and economic topics. When the Hetman government was established in April 1918, it was replaced by *Derzhavnyi vistnyk*.

Vistnyk Soiuzu vyzvolennia Ukrainy (Herald of the Union for the Liberation of Ukraine). An organ of the 'Union for the Liberation of Ukraine', published in Vienna semimonthly and then weekly from October 1914 to November 1918 (a total of 226 issues); in 1918 it was titled *Vistnyk polityky, literatury i zhyttia*. The paper propagated

Vistnyk Soiuzu vyzvolennia Ukrainy

Ukrainian independence, the interests of which, it argued, would be served by the defeat of the Russian Empire by the Central Powers. It remains an excellent source of information about political developments in Western and Russian-ruled Ukraine during the First World War and after the February Revolution of 1917. *Vistnyk* reported extensively on Ukrainian life in German and Austrian POW camps and in Central Europe, and on foreign attitudes toward the Ukrainian question. It also published prose, poetry, and literary and art criticism. The editors were V. Doroshenko, M. Vozniak, and A. Zhuk.

Vistnyk Ukrain's'koho viddilu Narodn'oho komissariatu u spravakh natsional'nykh (Herald of the Ukrainian Section of the People's Commissariat for Nationality Affairs). The official gazette of the RSFSR People's Commissariat for Nationality Affairs, published in Ukrainian from 23 July 1918 to 18 February 1919 in Moscow (10 issues). It contained official resolutions, decrees, and appeals of the commissariat and of the newly formed Soviet Ukrainian government, and articles on political and current affairs.

Vistnyk Ukrain's'koho viis'kovoho heneral'noho komitetu (Herald of the Ukrainian Military General Committee). A periodical of the Ukrainian Military General Committee under the Central Rada, published from May to November 1917.

Vistnyk Ukrain's'koï Narodn'oi Respubliky (Herald of the Ukrainian National Republic). An official organ of the UNR government, published in Kiev, Vinnytsia, and Kamianets-Podilskyi in 1918–19. It contained official orders, decrees, and texts of all UNR laws. In 1919 it was called *Vistnyk derzhavnykh zakoniv*. The publication also appeared in 1920 in Tarnów, Poland, after the evacuation of the UNR government from Ukraine.

Vistula River (Ukrainian: Vysla; Polish: Wisła). The largest river in Poland, which flows for 1,068 km and empties into the Baltic Sea. The river drains a basin area of 194,300 sq km, nearly 35,000 sq km of which are in Ukrainian ethnic territory (approx 15,000 sq km of that area are in Ukraine). A number of its major tributaries, including the Sian and the Buh, originate in Ukraine or near its border. The Vistula is connected with Ukraine's inland water system through the Dnieper-Buh Canal.

Visty z Luhu (News from Luh). A monthly organ of the *Luh sports society, published in Lviv in 1926–39. It was

edited by R. Dashkevych, F. Fedorchak, and A. Kurdydyk. In 1930 it appeared in a pressrun of 1,000 copies.

Visty z Ukrain's'koï Tsentral'noi Rady

Visty z Ukrain's'koï Tsentral'noi Rady (News from the Ukrainian Central Rada). An irregular organ of the *Central Rada, published in Kiev from April to the autumn of 1917. It contained the Rada's proclamations, government news, and reports on political developments throughout Ukraine and the Russian Empire. It is an excellent source of information on the early struggle for Ukrainian independence. The paper was edited by several Rada functionaries, including M. Yeremiiv, I. Steshenko, O. Vus, and V. Skrypnyk. *Visty* was succeeded by **Vistnyk Heneral'noho Sekretariatu Ukrainy*. The first nine issues of *Visty* were reprinted in the émigré journal *Ukrain's'kyi istoryk* (1978–9, 1981, 1984, 1986).

Visty z Zaporozha (News from the Zaporozhia). A monthly journal published and edited in Lviv in 1910–14 by S. Demydchuk and then I. Bobersky. It contained articles on sports, hiking, physical fitness, and hunting aimed at members of the *Sich and *Sokil societies.

Vitalii [Vitalij], b ? , d ca 1640. Writer and translator. A hieromonk at the Dubno Monastery, he died there as its hegumen. He was the author of *Dioptra ...* (Dioptry ..., 1612), a collection of his bookish religious, philosophical, and didactic poems and elegies and translations of moral rules from Greek and Latin. The collection was popular in the 17th century and was reprinted several times elsewhere.

Vitchyzna

Vitchyzna. A literary, art, and political monthly publication of the Writers' Union of Ukraine. It was founded in response to the resolution of the CC of the All-Union Communist Party (Bolshevik) of 23 April 1932 regarding the

dissolution of literary organizations. Under the title *Radians'ka literatura* it was published in Kharkiv in 1933 and in Kiev from 1934 until the outbreak of the Second World War. In 1941 its office was evacuated to Ufa, where the journal was published as *Ukrains'ka literatura*. From November 1943 it was published in Moscow, and in March 1944 it was once again published in Kiev under the editorship of Yu. *Yanovsky. During that second Kiev period the content of the journal benefited from the temporarily liberal censorship brought about by wartime conditions. Since January 1946 the journal has been published as *Vitchyzna*. In a resolution of 4 January 1946 the CC of the CP(B)U harshly criticized the publication for its nationalist tendencies of the previous period and changed the members of the editorial board. Following Yanovsky, the editors of *Vitchyzna* were O. Honchar, L. Novychenko, V. Kozachenko, O. Poltoratsky, D. Kopytsia, who was fired in 1962 for lack of 'political attentiveness,' and his replacement, L. Dmyterko. After Dmyterko's death in 1985, O. Hlushko became editor of *Vitchyzna*. During the 1930s many of those who wrote for *Vitchyzna* were killed in the Stalinist terror (among others, the editor-in-chief, I. Kulyk, and the members of the editorial board M. Khyvlov [who committed suicide] and I. Mykytenko). Until the mid-1980s the journal adhered to the official Party line and had little popularity – a circulation of barely 20,000. Only in 1985, when the movement for the rebirth of the Ukrainian language and Ukrainian culture gained momentum, did *Vitchyzna* begin to print previously banned writers. By 1989 its circulation had grown to 40,000.

I. Koshelivets

Viticulture. A branch of agriculture dealing with the cultivation of grapes. Grape-growing in Ukraine dates back at least 2,500 years. Until the end of the 15th century, when it was conquered by the Turks and Tatars, the Black Sea coast was known for its viticulture and wine making. The Moslem religion of the newcomers banned both industries. They were restored in Southern Ukraine in the 18th century, when Russia won control of the Black Sea coast. Catherine II encouraged not only Ukrainians and Russians but also Germans and Austrians to settle the region. Colonists experienced in viticulture were in particular demand.

Grape harvest time at the Koktebel state farm in the Crimea

The distribution of viticulture in Ukraine is determined largely by temperature. In most regions the soil and precipitation are suitable for viticulture, but the ripening period for grapes limits commercial viticulture largely to the area south of the 48th parallel. Except for Transcarpathia and the *Crimean southern shore, which are protected by high mountains from the cold northern winds, all vine-

yards in Ukraine have to be covered with earth to prevent freezing during the winter.

The phylloxera, which devastated vinifera grapes throughout the world, arrived in Ukraine toward the end of the 19th century and by 1914 had infested all southwestern Ukraine. To overcome the problem peasants and small landowners planted resistant vines, such as American varieties and French-American hybrids. Quality and productivity were not high. In spite of repeated efforts to eradicate American and hybrid varieties, they are still an important part of Ukrainian vineyards. The costlier method, of grafting vinifera vines onto phylloxera-resistant American rootstocks, guaranteed consistent production of high-quality grapes but was affordable only by the larger landowners.

Until 1980 Ukraine had the largest area of vineyards in the Soviet Union. From 1986 it was in third place, after Azerbaijan and Moldavia. The reduction in vineyard area resulted largely from the discontinuation of low-quality and unproductive vineyards devoted mostly to American and hybrid varieties. In 1990 there were 176,000 ha of vineyards in Ukraine, 143,000 of which were productive. The gross harvests of grapes in the last 50 years are given in the table.

Grape harvests in Ukraine, 1940–90

	1940	1960	1970	1980	1985	1990
Gross output (in 1,000 t)	161	423	904	886	430	836
Yield (in centners per ha)	21.8	34.3	37.6	49.3	30.9	57.4

There are three major viticultural regions in Ukraine, each with its microregions: the steppe, the Transcarpathian, and the Crimean region. The first is divided into many subregions. The Odessa subregion, with 78,000 ha of vineyards, 4,000 of which are irrigated, consists of two zones, the viticultural area of Odessa oblast east of the Dniester River, and the area between the Dniester and Danube rivers. The 12 state farms in the first zone produce varieties such as Hybrids, Rkatsiteli, Aligote, Johannisberg Riesling, Cabernet Sauvignon, Leanka, Pinot, and Italian Riesling. The 13 state farms in the second zone produce Hybrids, Rkatsiteli, Aligote, Cabernet Sauvignon, Johannisberg Riesling, Leanka, and Sereksiia grapes. The Mykolaiv-Kherson subregion covers Mykolaiv oblast and the Right-Bank portion of Kherson oblast. It has 17,000 ha of vineyards, belonging to 16 state farms and producing grapes such as Aligote, Rkatsiteli, Johannisberg Riesling, Cabernet Sauvignon, and Hybrids. The Left-Bank Kherson subregion covers the Left-Bank portion of Kherson oblast. Largely phylloxera-free, its 26,000 ha of vineyards occupy the sandy soil of the Lower Dnieper River. The region produces varieties such as Kabassia, Johannisberg Riesling, Plavai, and Cabernet Sauvignon. The Zaporizhia subregion includes two viticultural areas in Zaporizhia oblast, located on the left bank of the Dnieper River and on the Azov Sea coast. It has 4,000 ha of vineyards.

The Transcarpathian region is a relatively narrow belt at an altitude of 200–250 m, running southeast from Uzhhorod to Vynohradove and on to the Tysa River. Its 11,000 ha of vineyards are divided among 11 state farms. The

grapes cultivated there include Leanka, Italian Riesling, Rose Traminer, Muller Thurgau, Furmint, Harslevelu, and Isabella. The Crimean region includes 85,000 ha of vineyards, 11,000 of which are irrigated. It is divided into two subregions by the Yaila Mountains and into 24 microregions. The three major viticultural enterprises in the region are the Masandra Wine-Making Complex, based in Yalta and covering the southern shore, the Zolota Balka Wine-Making Complex, based at Sevastopol and covering the southwestern part of the Crimea, and the Crimean Wine Trust, which includes viticultural areas in the steppe region of the Crimea. The grapes grown in the Crimea include Aligote, Cabernet Sauvignon, Merlot, Saperavi, Rkatsiteli, Johannisberg Riesling, White Muscat, Rose Muscat, Sercial, Verdelho, and Feteasca. The other viticultural areas of Ukraine account for only 1 percent of the commercial grape output.

The main viticultural research institutions in the Steppe region are the *Ukrainian Scientific Research Institute of Viticulture and Wine Making in Odessa, the Zaporizhia Oblast Agricultural Experimental Station in Zaporizhia, the Lower Dnieper Scientific Research Station for Sands Afforestation and Viticulture in Tsiurupynske, Kherson oblast, the *Odessa Agricultural Institute, the Kherson Agricultural Institute, the (formerly All-Union) Antiphyloxera Scientific Research Station of the (formerly) All-

Union Research Institute of Plant Protection in Odessa, and the Dniester Experimental Station of Horticulture and Viticulture in Chernivtsi. In the Crimea the main research institutions are the (formerly All-Union) Scientific Research Institute of Viticulture and Wine Making in Yalta and the Crimean Agricultural Institute in Symferopil. In Transcarpathia the oblast agricultural experimental station in Berehove does research on grape growing. (See also *Grapes and *Wine-making industry.)

R. Hutton

Vitkovsky, Ivan [Vitkovs'kyj], b 1777, d ca 1844 in Kharkiv. Composer, violinist, conductor, and educator. He studied with J. Haydn in Vienna and then taught music at Kharkiv University and the institute for daughters of the nobility (1805-15, 1821-30). He organized the first public concerts and set up the first music store (1812) and the first piano factory (1813) in Kharkiv. His compositions include an oratorio (1805) and six fantasies for violin and piano (1807).

Vitkovsky, Oleksander [Vitkovs'kyj], b 1888 in eastern Podilia, d 1945 in Harbin, Manchuria. Ukrainian commu-

nity leader in Manchuria. He emigrated to Manchuria in 1932 and became the last president of the Ukrainian National Colony, an umbrella organization founded in 1935 in Harbin. He was arrested and executed by Soviet troops who occupied Manchuria in 1945.

Vitoshynsky, Aital [Vitošyns'kyj, Ajtal'], b 1875 in Galicia, d 1937. Lawyer. He was a member of the Supreme Court in Vienna until 1918 and then presided over the Military Codification Commission of the UNR in Kiev. In 1919 he was appointed legal adviser to the Ukrainian diplomatic mission in Prague, and in 1923, counsel to the Government-in-exile of the Western Ukrainian National Republic in Vienna.

Vitoshynsky-Dobrovolia, Yosyp-Mykhailo [Vitošyns'kyj-Dobrovolja, Josyp-Myxajlo], b 1857, d 1931. General of the Austrian army. A brigadier general, he was one of the four Ukrainians to hold general officer rank in the Austrian army. During the First World War he commanded the 130th Brigade on the eastern front. His brigade was part of the corps that included the Legion of Sich Riflemen. He was with the Ukrainian Galician Army in central Ukraine during 1919–20, but did not occupy any official position.

Otaman Dmytro Vitovsky

Semen Vityk

Vitovsky, Dmytro [Vitovs'kyj], b 8 November 1887 in Medukha, Stanyslaviv county, Galicia, d 8 July 1919 near Ratibor, Silesia, Germany. Military officer. A student activist at Lviv University, he later organized educational and paramilitary organizations in Stanyslaviv. During the First World War he served in the Legion of Ukrainian Sich Riflemen as a company commander and carried out special assignments. He was chairman of the *Ukrainian Military Committee, which staged the *November Uprising in Lviv. He was briefly (1–5 November 1918) the first commander of the Ukrainian Galician Army and then minister of defense of the Western Ukrainian National Republic (until 13 February 1919). On 1 January 1919 he was promoted from major to colonel. After serving on the Ukrainian National Rada (February–April 1919) he attended the Paris Peace Conference as a member of the Western Ukrainian delegation. On the return flight his plane crashed, and he was killed.

Vityk, Semen, b 1876 in Drohobych county, Galicia, d 1937. Galician trade union organizer and political leader. He was a founding member of the Ukrainian Social Democratic party and the leader of the wing that collaborated with the Polish Socialist party. In 1907 and 1911 he was elected to the Austrian parliament, where he began increasingly to stress Ukrainian national rather than class interests. In 1918–19 he became a member and vice-president of the Ukrainian National Rada and of the presidium of the Labor Congress in Kiev. After emigrating to Vienna in 1919, Vityk developed pronounced Sovietophile sympathies and opposed both Ukrainian governments-in-exile. He published the monthly **Nova hromada* (1923–5). He emigrated to Soviet Ukraine in the late 1920s and was given a number of important journalistic posts in Kharkiv. In March 1933 he was arrested, and he disappeared in prison.

VKP(B). See Communist Party of the Soviet Union.

Vlachs or Wallachians (*volokhy*). An eastern Romance people, the ancestors of the *Rumanians, who lived in the territories of what is now *Rumania and south of the Danube River from ca 500 AD. The earliest mention of the Vlachs is in the Primary Chronicle under the year 898. Because of invasions by the Tatars the Vlachs continued to move from beyond the Carpathian Mountains to the territory between the Carpathians and the Dniester River, the Prešov region, and *Moldavia, and thus displaced the Slavic population. The independent Vlachian principalities of Wallachia (Muntenia) and Moldavia arose in the 14th century. Although the Ukrainian term Voloshchyna (Wallachia) designates the entire ancient territory of Rumania, in Ukrainian historiography it often refers specifically to Moldavia.

Vladimir. See Volodymyr the Great.

Mikhail Vladimírsky-Budanov

Vladimírsky-Budanov, Mikhail [Vladimírskij-Budanov], b 1838 in Borozdino, Tula gubernia, d 7 April 1916 in Kiev. Russian historian. He studied at Kiev University (1868) and was a professor of the history of Russian law there from 1875. He was also editor in chief for the Kiev Archeographic Commission (from 1882) and head of the Historical Society of Nestor the Chronicler (from 1887). Among his important works are *Nemetskoe pravo v Litve i Pol'she* (German Law in Lithuania and Poland, 1868; repr in Ukrainian translation in the series *Ruska istorychna*

biblioteka [Ruthenian Historical Library], vols 23–4), *Ocherki iz istorii litovsko-russkogo prava* (Essays in the History of Lithuanian-Ruthenian Law, 1882), *Istoriia universiteta sv. Vladimira* (A History of St Vladimir [Kiev] University, 1884), and the major study *Obzor istorii russkogo prava* (A Survey of the History of Russian Law, 1886; 6th rev edn 1909). He also compiled an anthology in the history of Russian law (3 vols, 1872–5), which served as the basic source book in its field until the 1950s.

Leaders of the Ukrainian community in Vladivostok in 1920. Sitting, from left: Vasyl Shkalych, Kutenko, Yurii Hlushko-Mova, Col Fedir Steshko, Ivan Tadzaman, Oleksii Makarenko, Mykola Kobliansky; standing: Orlyk, Hnat Kyselytsia, Vitalii Zhuk, Kost Strelbytsky, Teodosii Kovtun, Mykola Novytsky, Shkliarenko, Lemishko, Hryhorii Kucherenko

Vladivostok. A city (1989 pop 648,000) on the Pacific coast, and the administrative center of Primorskii krai in Russia. It is the eastern terminal of the Trans-Siberian Railway and an important commercial and naval port on Zolotoi Rog Bay. Its growth was spurred by the building of the railway: its population rose from 66,000 in 1914 to 108,000 in 1926 and 206,000 in 1939. A Ukrainian colony existed in Vladivostok from its very beginning (1860) and by 1914 exceeded 2,000. In 1907–8 a Ukrainian student hromada was organized at the Oriental Institute. There was also a clandestine Ukrainian political circle in the city. With the outbreak of the revolution Vladivostok became a center of the Ukrainian movement in the Far East. At the beginning of 1917 a local hromada, with over 1,500 members, sprang up. In the next three years a Prosvita society, the Ukrainiska Khata club, the Ukrainian Colony, and the Union of Oil and Telegraph Workers were founded. The Far Eastern Territorial Council established its secretariat in Vladivostok and held its third session there in November 1920. The city was the seat of the Vladivostok Okrug Council. The weekly **Ukrainets' na Zelenomu klyni* and the daily *Shchyre slovo* came out in the city. When the Soviets occupied Vladivostok in 1922, Ukrainian political organizations were suppressed. According to the 1926 census there were 6,000 Ukrainians in the city.

Vladko, Volodymyr, b 8 January 1901 in St Petersburg, d 21 April 1974 in Kiev. Writer. In the 1920s he studied at the Voronezh Institute of People's Education. After the Second World War he headed the Main Repertoire Committee of the Ukrainian SSR (1947–51) and was chief editor of *Radians'ke mystetstvo* (1947–8) and director of the Ukrainian department of *Literaturnaia gazeta* (Moscow, 1951–6).

Volodymyr Vladko

He began publishing sketches, feuilletons, and theater reviews in 1922. Between 1930 and 1932 he published several popular booklets about Ukraine's industries, the collection of travel stories *Troie za odnym marshrutom* (Three on One Itinerary, 1931), and the science-fiction novel *Idut' robotari* (The Robots Are Coming, 1931). He is known as the Ukrainian Jules Verne for his widely read science-fiction novels *Arhonaavy Vsesvitu* (Argonauts of the Universe, 1935; rev edn 1956), *Chudesnyi henerator* (The Miraculous Generator, 1934), *Syvyi kapitan* (The Gray Captain, 1959), *Pozychenyi chas* (Borrowed Time, 1962), *Fioletova zahybel'* (Violet Annihilation, 1965), and *Zaliznyi bunt* (Iron Rebellion, 1967). He also wrote the best-selling historical fantasy novel *Nashchadky skifiv* (Descendants of the Scythians, 1939; rev edn 1958; English trans 1986) and the story collections *Dvanadsiat' opovidan'* (Twelve Stories, 1936) and *Charivni opovidannia* (Spellbinding Stories, 1962) and translated English and Russian literature into Ukrainian. An edition of his works in five volumes appeared in 1970–1.

Vladych, Leonid [Vladyč] (né Ioann Roizenberg), b 17 November 1913 in Zhytomyr, d 5 June 1984 in Kiev. Art historian and critic. A graduate of the Leningrad Institute of Painting, Sculpture, and Architecture (1958), he taught at the Kiev State Art Institute from 1960 and received his candidate's degree in 1964. He wrote many articles and introductions to exhibition catalogs and compiled many art albums. He wrote books about the artists O. Pashchenko (1947, 1957), I. Izhakevych (1955), T. Yablonska (1958), O. Shovkunenko (1960, 1983), L. Pozen (1961), and V. Kasiian (1978) and about T. Shevchenko's album *Zhivopisnaia Ukraina* (Picturesque Ukraine, 1963) and self-portraits (1973), and books of essays about Soviet Ukrainian graphic book art (1967) and Soviet Ukrainian poster artists (1989).

Vlasenko, Nataliia, b 3 January 1929 in Kharkiv. Experimental solid-state physicist. A graduate of Kharkiv University (1952), in 1966 she joined the AN URSS (now ANU) Institute of Semiconductors in Kiev as head of the department conducting research in photo- and electroluminescence. Vlasenko has designed a number of novel solid-state light sources and devices, including an electroluminescent solid-state laser.

Vlasenko, Paraska, b 10 November 1900 in Skoptsi (now Veselynivka), Pereiaslav county, Poltava gubernia, d 6 October 1960 in Kiev. Master of decorative folk painting. She designed kilims and embroidery patterns, paint-

Paraska Vlasenko in front of one of her wall paintings

Petro Vlasjuk

ed decorative panels, tiles, and vases, and took part in decorating the walls of the Ukrainian pavilion at the All-Union Agricultural Exhibition in Moscow (1938–40), the Palace of Culture in Nova Kakhivka, and other buildings. In 1937 she won a silver medal at an international exhibition in Paris. She taught (1939–49) at what is now the Kiev School of Applied Art and worked as a designer at the Institute of Monumental Art of the Academy of Architecture of the Ukrainian SSR (1949–57).

Vlasenko, Vasyl, b 16 September 1921 in Yablunka, Kiev county. Chemist; AN URSS (now ANU) corresponding member since 1976. A graduate of the Kiev Polytechnical Institute (1948), he has worked since 1958 at the ANU Institute of Physical Chemistry. His research involves process technology as applied to industrial catalysis, with emphasis on the fundamental problems of the selection and preparation of heterogeneous catalysts. He has made significant contributions to the elucidation of mechanisms in important industrial catalytic processes.

Vlasenko-Bojczun, Anna, b 15 February 1917 in Pomykivtsia, Brody county, Galicia. Philologist, journalist, and community figure. She studied at Lviv (M PHIL, 1942), Syracuse (1964), and the Ukrainian Free (PH D, 1965) universities. Since emigrating to the United States in 1949 she has taught at Mary College (Bismarck, ND, 1966–70) and the Ukrainian Catholic University (since 1972). She has published collections of onomastic and literary studies (1977), essays and reviews (1983), travel accounts (1984), and *Onomastic Works* (1984, with a bibliography of her works).

Vlasjuk, Dmytro [Vlasjuk], b 25 July 1902 in Odessa. Scenery designer. He studied at the Kiev State Art Institute (1921–7, class of V. Meller) and worked in Berezhil and then as a designer in the Kharkiv, Kiev, and Odessa Ukrainian drama theaters. He also taught at the Kharkiv Theater School (from 1931) and the Kharkiv Theater Institute.

Vlasjuk, Petro [Vlasjuk], b 16 February 1905 in Chemeryske, Zvenyhorodka county, Kiev gubernia, d 20 March 1980 in Kiev. Agrochemist, plant physiologist, and soil scientist; full member of the AN URSS (now ANU) and the All-Union Academy of Agricultural Sciences from 1948. He graduated from the Uman (1926) and Leningrad (1930) agricultural institutes and then taught at the former institute (1931–47) and at Kiev University (1947–56). He

went on to serve as director of the ANU Institute of Plant Physiology and Agrochemistry and was president of the Ukrainian Academy of Agricultural Sciences (1956–62). Vlasjuk published numerous scientific and popular articles dealing with agrochemistry, plant physiology, and soil science. He showed that manganese acts as a strong oxidizing agent during ammonia feeding of plants but as a strong reducing agent during nitrate nourishment, and that manganese increases the efficiency of carbon dioxide transformation during photosynthesis. He introduced the use of industrial wastes as a source of microelements in fertilizers and contributed to the applications of radioactive labeling in plant research and the use of radiation methods for inducing plant mutation.

Vlasov, Aleksandr, b 1 November 1900 in Kosha, Tver gubernia, Russia, d 25 September 1962 in Moscow. Russian architect; president of the USSR Academy of Architecture (1955–6) and vice-president of the Academy of Construction and Architecture of the Ukrainian SSR (1956–62). After graduating from the Moscow Higher Technical School (1928) he worked as an architect, taught at the Moscow Architectural Institute (from 1931), and studied at the upgrading faculty of the USSR Academy of Architecture (to 1936). After the Second World War he served as chief architect of Kiev (1944–50) and Moscow (1950–5). He supervised the reconstruction of the Khreshchatyk in Kiev and the general plan for the rebuilding of Kiev (1945–7).

Vlasov, Andrei, b 1 September 1900 in Lomakino, Nizhnii Novgorod gubernia, Russia, d 2 August 1946 in Moscow. Soviet Russian military commander; the highest-ranking Soviet collaborator with the Germans during the Second World War. In January 1942 he was promoted to lieutenant general, and in March he took command of the Second Shock Army, which had been encircled during its advance toward Leningrad. Despite the army's starvation and imminent annihilation, J. Stalin refused to allow it to retreat. It was finally routed in June 1942, and Vlasov was taken prisoner on 11 July and sent to a POW camp near Vinnytsia.

Incensed by Stalin's disastrous military direction and already aggrieved by the Stalinist collectivization, terror, and military purges of the 1930s, Vlasov turned against Stalin and co-operated with the Wehrmacht and A. Rosenberg's Ostministerium as a propagandist. Consequently nearly 1 million Russian, Ukrainian, and other Soviet soldiers in German POW camps enlisted to fight in Wehrmacht units (Osttruppen) on the eastern front, and thousands of others deserted from the Red Army to do so. A. Hitler, pathologically mistrustful of the *Untermenschen* and Vlasov's intentions, suspended Vlasov's propaganda in June 1943, and in September he had all Osttruppen transferred to the western front.

The impending defeat of Germany again altered the Nazi leaders' attitude. In September 1944 H. Himmler promised Vlasov Waffen SS support to create, train, and command a genuine liberation army from among the Soviet citizens in the Wehrmacht and over 3 million prisoners of war and *Ostarbeiter*. Vlasov formed and chaired the independent Committee for the Liberation of the Peoples of Russia (KONR) in Prague in November 1944 with the aim of uniting all anti-Bolshevik forces of Soviet citizens in the German-occupied territories. The *Ukrainian National Committee and other non-Russian organizations,

however, refused to join the KONR; they rejected its Russian imperialist, nationalist ideology and Vlasov's claim to speak on behalf of the non-Russians, and disbelieved its promise that the non-Russians would have national self-determination after the destruction of Bolshevism (in response to which mistrust the KONR established its own eight-member Ukrainian Committee, chaired by F. Bohatyrchuk). Approx 300,000 men, 30–40 percent of them ethnic Ukrainians, were transferred to the Armed Forces of the KONR, more popularly known as the *Russian Liberation Army (ROA). Only one 20,000-man division, commanded by Col S. Buniachenko, became fully operational; it fought briefly along the Oder River in mid-April 1945. Vlasov and the division then headed west to avoid the advancing Red Army and surrendered with other ROA units to American forces on 11 May. The next day the Soviet authorities stopped an American convoy and removed Vlasov from it without opposition. He, Buniachenko, and 10 other members of his staff were hanged after over 14 months of imprisonment and a three-day closed trial for treason, espionage, and terrorism by the Military Collegium of the Soviet Supreme Court. Hundreds of thousands of surrendered ROA personnel were forcibly repatriated to the USSR, with American and British military collusion, and deported to Soviet concentration camps. (See also *Repatriation.)

R. Senkus

Ivan Vlasovsky

Orest Vlokh

Vlasovsky, Ivan [Vlasovs'kyj] (Wlasowsky), b 15 August 1883 in Vilshany, Kharkiv county, Kharkiv gubernia, d 10 October 1969 in Toronto. Orthodox church historian and theologian, and civic leader. A graduate of the Kiev Theological Academy (1908), he taught (1908–18) in various gymnasiums in the Poltava region (Lokhvytsia, Zolotonosha, Konotop) before becoming principal of a gymnasium in Lutske (1918–26). In the interwar period he worked on the Ukrainization of the Orthodox church in Volhynia. With A. Richynsky he organized the Ukrainian church council in Lutske in 1927. He was a member of the

commission for the translation of liturgical texts into Ukrainian (1932–9), general secretary of the Mohyla Society in Lutske and editor of its organ *Za sobornist'*, a member of the Metropolitan's Council of the Polish Autocephalous Orthodox church and editor of the journal **Tserkva i nariid* (1935–8), and secretary of the Volhynia Theological Consistory in Kremenets (1934–9). He was one of the founders of the Prosvita society in Lutske and a deputy to the Polish Sejm (1928–30) from the Ukrainian Socialist Radical party. For his political activities he was imprisoned by the Polish authorities several times.

During the Second World War, Vlasovsky assisted in the rebirth of the *Ukrainian Autocephalous Orthodox church (UAOC) in Ukraine, and served as adviser to Metropolitan P. Sikorsky and secretary of the administration of the UAOC in Lutske (1942–3). He fled from the advancing Soviet army to Prague and then Munich in 1945, where he was director of the chancellery of the UAOC Synod and of the Theological Academy of the UAOC. In 1948 he emigrated to Canada. In Winnipeg he was a professor of St Andrew's College (1949–50) and edited the renewed journal *Tserkva i nariid* (1949–51) before moving to Toronto. Vlasovsky authored numerous works on church history and other subjects, including *Kanonichni i istorichni pidstavlydliia avtokefalii Ukraïns'koi Pravoslavnoi Tserkvy* (The Canonical and Historical Bases for the Autocephaly of the Ukrainian Orthodox Church, 1948), *Korotka istoriia Pravoslavnoi Tserkvy* (A Brief History of the Orthodox Church, 1948), *Narys istorii Ukraïns'koi Pravoslavnoi Tserkvy* (An Outline of the History of the Ukrainian Orthodox Church, 4 vols in 5 books, 1955–66; the first 2 vols in English as *Outline History of the Ukrainian Orthodox Church*, 1956, 1979), and *Kyievo-Pechers'ka Lavra ta ii istorychne znachennia* (The Kievan Cave Monastery and Its Historical Significance, 1966). A memorial book in his honor, containing a bibliography of his works, was published in Toronto in 1974.

A. Zhukovsky

VLKSM. See Communist Youth League of Ukraine.

Vlokh, Orest [Vlox], b 2 July 1934 in Lviv. Solid-state physicist and civic activist. A graduate of Lviv University (1957), he has worked as a researcher and now is a professor of physics and the holder of the chair of nonlinear optics there. In his research on nonlinear optical effects in crystals, Vlokh has obtained significant results on the role of spatial dispersion in electromagneto- and piezo-optical effects. He has done pioneering work on electrogyration, a nonlinear parametric effect in dielectrics, and has written a monograph on the effects of spatial dispersion in parametric crystal optics (1984). In 1989 he became head of the Popular Movement of Ukraine in Lviv oblast, and in 1990 he was elected deputy to the Supreme Council of the Ukrainian SSR.

Vlyzko, Oleksa [Vlyz'ko], b 17 February 1908 in Korosten, Novgorod gubernia, Russia, d 14 December 1934 in Kiev. Poet. He studied at the philological faculty of the Kiev Institute of People's Education. He belonged to the literary organizations Molodniak and the All-Ukrainian Association of Proletarian Writers and later worked on the futurist journal *Nova generatsiia*. His first published poem was 'Sertse na nord' (Heart to the North) in the journal *Hlobus* (1925.) Although Vlyzko paid the obligatory tribute to the Soviet way of life, his poetry was character-

Oleksa Vlyzko

Kostiantyn Vobly

ized by a search for new socialist forms of artistic expression, a cheerful romanticism, a love of the sea as a primal element, and interest in the adventures and passions of people of strong character. Vlyzko's poetry appeared in such collections as *Za vsikh skazhu* (I'll Speak on Everyone's Behalf, 1927), *Poezii* (Poems, 1927), *Zhyvu, pratsiuu* (I Live and I Work, 1930), *Knyha baliad* (The Book of Ballads, 1930), and *P'iatyi korabel'* (Fifth Ship, 1933). In December 1934 he was arrested, accused of counterrevolutionary diversionary activities, and shot along with 28 other writers and cultural activists. During the Khrushchev 'thaw' he was rehabilitated. A posthumous collection was published in 1963, *Vybrani poezii* (Selected Poems).

Vobly, Kostiantyn [Voblyj, Kostjantyn], b 27 May 1876 in Tsarychanka, Kobeliaky county, Poltava gubernia, d 12 September 1947 in Kiev. Economist, statistician, and geographer; full member of the VUAN and AN URSR (now ANU) from 1921. After completing study at the Kiev Theological Academy (1900) he graduated from Warsaw University and worked with the Warsaw statistical committee. From 1906 he lectured at Kiev University, where he wrote his MA thesis, *Oчерки по истории пол'скоi фабричної промисленности* (Outlines of the History of Polish Factory Industry, 1909). His research in Berlin, Vienna, and Paris culminated in a PH D dissertation on the third professional-industrial census in Germany at Kiev University (1911). Before the Soviet period he lectured at Kiev University and the Kiev Co-operative Institute (director in 1917–19). From its inception Vobly was involved with the VUAN: he was head of its social-economic division from 1925, president of its Society of Economists, vice-president of the academy (1928–30), chairman of the Commission for the Study of the Economy of Ukraine (1927–30), chairman of the chair of commercial trade and industrial economics, chairman of the Department of Economic Geography (1939–42) at the Institute of Economics, and the institute's director (1942–7).

Vobly was a prolific writer who published numerous separate works on political economy, economic geography, economic theory, the agrarian question, industry, trade, and finance. His monographs include *Statistika* (Statistics, 1908; 6 edns), *Osnovy ekonomii strakhovaniia* (The Foundations of Insurance Economics, 1915; 2 edns), *Nachal'nyi kurs politicheskoi ekonomii* (A Beginning Course

in Political Economy, 1918; 2 edns), *Ekonomicheskaia geografiia Ukrainy* (The Economic Geography of Ukraine, 1919; 5 edns), *Narysy z istorii rosiis'ko-ukraïns'koi tsukrovoburiakovoï promyslovosti* (Essays in the History of the Russian-Ukrainian Sugar-Beet Industry, 3 vols, 1928–31; 2 more volumes remain unpublished), and *Organizatsiia truda nauchnogo rabotnika* (The Organization of the Work of the Scientific Worker, 1943).

Vocational-technical education (*profesiino-tekhnichna osvita*). An educational network of programs for the training of the work force and for the upgrading of its skills, established during the Soviet period. Vocational-technical education is provided in *vocational-technical schools, *tekhnikums, *technical schools, and institutions offering *secondary special education. There are also numerous schools and courses organized at the enterprise level which provide on-the-job training. Instruction at the individual brigade level is also widely practiced. Some 8.6 million workers and white-collar staff have received training at the enterprise or collective farm to upgrade their qualifications. (See also *Professional and vocational education.)

Vocational-technical schools (*profesiino-tekhnichni uchyllyshcha*, or PTU). Educational institutions established in 1958 under the jurisdiction of the Chief Administration for Professional and Technical Education of the Council of Ministers of Ukraine. They offer vocational education for young people joining the labor force after completing eight years of general education. The schools, which have day and evening programs, tend to recruit young people with low academic achievement levels. PTU specialize according to branches of production. There are urban and rural vocational-technical schools affiliated with various enterprises to provide practical experience. There is a unified curriculum established for each individual occupation. Vocational training forms 60–70 percent of the curriculum, the remaining time being spent on general education subjects. Urban PTU have one- to three-year programs of study; rural PTU have one- to two-year programs. In 1965 there were 754 PTU in Ukraine with an enrollment of 284,000. Between 1959 and 1964 a network of *technical schools was established. The PTU provide practical training and the final two years of compulsory general education for students with an incomplete secondary education (see *Eight-year school). After three years of study and practical work students who pass their final examinations are awarded both a general education certificate and a vocational diploma. The PTU network has grown rapidly in recent years. In 1986 there were 1,100 such schools, with 742,000 students. PTU still exist to provide pupils with basic work training without the general education component. The majority of PTU courses are evening and shift courses that allow workers to study at times compatible with their work shifts.

B. Krawchenko

Vodiany, Mykhailo [Vodjany], Myxajlo] (Vodianoi), b 23 December 1924 in Kharkiv, d 13 September 1987 in

Odessa. Stage actor and comedian. In 1939–41 he studied in the Leningrad Theatrical Institute, and in 1943–5 he worked in the Piatigorsk Operetta Theater. In 1945–6 he performed in the Lviv Philharmonic and in 1947–53, in the Lviv Theater of Musical Comedy. From 1954 he worked in the Odessa Theater of Musical Comedy.

Vodianyk. See Demonology in Ukraine.

Vodianytsky, Volodymyr [Vodjanyč'kyj], b 6 January 1894 in Konstantynohrad (now Krasnohrad), Poltava gubernia, d 30 November 1971 in Sevastopol, Crimea. Zoologist and hydrobiologist; corresponding member of the AN USSR (now ANU) from 1957. A graduate of Kharkiv University (1916), he founded the Novorossiisk Biological Station (1921), taught at Rostov-na-Donu University (1939–42, 1944–5), and directed the ANU Sevastopol Biological Station (1945–62) and the ANU Institute of the Biology of Southern Seas (1963–8). He researched the acclimatization of invertebrates in Ukrainian reservoirs and the productivity of the Black Sea.

Vodolazhchenko, Olha [Vodolazčenko, Ol'ha], 1888–? Historian. A scholarly associate of the Kharkiv Scientific Research Chair of the History of Ukrainian Culture during the 1920s, she wrote on the history of Ukraine and the history of education in Slobidska Ukraine. She was arrested and deported to Siberia ca 1937–8.

Vohni (Fires). A publishing co-operative established in Lviv in 1929 to publish works and manuals by writers belonging to the Plast scouting association (eg, B. Kravtsiv, A. Richynsky, Ye. Pelensky, I. Manastyrsky). After Plast was banned by the Polish authorities in 1930, Vohni continued to propagate the organization's ideology through the journal *Vohni* (1931–9), edited by Pelensky, J. Rudnyckyj, V. Karkhut, and Ya. Hladky. Vohni also published the monthly magazine **Na slidi*.

Voiakovsky, Mykola [Vojakovs'kyj], b 12 June 1899 in Bohdanivka, Skalat county, Galicia, d 12 May 1972 in Brooklyn, New York. Ukrainian Catholic priest and community activist. A graduate of the Lviv Theological Seminary, he was ordained in 1925 and then served as a parish priest in Galicia. At the outset of the Second World War he fled to Vienna and then went to serve Ukrainian workers in the Sudetenland. In 1945–8 he served as acting apostolic visitor and administrator of Ukrainian Catholics in Germany. He organized religious life for Ukrainian refugees in the displaced persons' camps in Germany; organized the theological seminary in Hirschberg; and published the church organ, liturgical books, and a *shematyzm* of the church in Germany (1947). In 1949 he moved to the United States. Voiakovsky was a prolific writer who frequently contributed articles to religious periodicals in Ukraine and the United States. He also published three volumes of his collected sermons (1949, 1954, 1969), several short monographs on religious topics, and a collection of his writings and memoirs (1971).

Voice of America (VOA). A US government agency that broadcasts news and entertainment worldwide. Administered by the US Information Agency and closely tied to the State Department, VOA emerged at the end of the Second

World War from several offices and departments that had been established to broadcast American war propaganda and news to Nazi-occupied Europe. After the war VOA began devoting most of its efforts to countering communist influence around the world (especially in the Third World and Soviet-occupied Eastern Europe). VOA has provided an American perspective on international affairs, served as an alternative source of news about international and internal developments in other countries, and informed foreigners about life in the United States in English (some programs are read in a special simplified English) and dozens of other languages. With the intensification of the Cold War, VOA began beaming signals directly to the USSR from transmitters in the United States, Western Europe, and Asia. Russian-language broadcasts were begun in February 1947. Much of the programming commented on Soviet affairs and exposed the totalitarian nature of the Soviet system. In response, the Soviet authorities began electronically jamming VOA signals in February 1948. In November 1949 daily half-hour Ukrainian programs were begun; they were followed in the next few years by broadcasts in the Baltic languages, Armenian, Georgian, Tatar, Azeri, and Turkic. By December 1954 the Ukrainian program was one hour daily, and the broadcasts were specially beamed to Ukrainians in Soviet Central Asia as well as in Ukraine. There have been several directors of the Ukrainian section of Voice of America, including N. Hryhoriiv, V. Kedrovsky, Ye. Zelevska, M. Terpak, O. Drahan, M. Frantsuzhenko, and V. Biliaiv.

Voice of Canada. See Radio Canada International.

Voievidka, Yaroslav [Vojevidka, Jaroslav], b 5 March 1882 in Petranka, Kalush county, Galicia, d 30 March 1920 in Pishchanka, Balta county, Podilia gubernia. Army officer. After serving in the Austrian army during the First World War, he joined the Ukrainian Galician Army in December 1918 and organized the First Artillery Regiment of the First Brigade of the Ukrainian Sich Riflemen. As commander of the regiment he was promoted on 22 June 1919 to major. He was killed by the Bolsheviks.

Yaroslav Voievidka

Voievidka, Yaroslav [Vojevidka, Jaroslav], b 26 October 1909 in Chernivtsi, Bukovyna, d 25 January 1981 in Reno, Nevada. Obstetrician and gynecologist. A graduate of Cracow University (1934), he served as a specialist in its hospital clinic. He was deputy director from 1941 and director from 1943 of the gynecological and obstetrical clinic

of the Lviv Medical Institute. A postwar refugee in Germany from 1945, he was president of the *Ukrainian Medical Charitable Service (1948–9), president of the Ukrainian Physicians' Association in Germany, and director of the Ukrainian polyclinic in Munich. In 1950 he emigrated to the United States, where he ran his own clinic in New York, helped found the Ukrainian Medical Association of North America, and was its president (1955–7) and editor of its journal (1956–7). His publications dealt with hysterectomy and the history of Ukrainian medical organizations.

Voin [Vojin']. A fortress town in Kievan Rus', located in Pereiaslav principality, on the right bank of the Sula River approx 1.5 km from its junction with the Dnieper River (near present-day Voinska Hreblia, Hlobyne raion, Poltava oblast). Voin had a strategic importance in the system of fortified towns which was built by Vsevolod Yaroslavych in the 980s along the Sula River as a line of defense against marauding nomadic tribes to the south. Voin was first mentioned in a chronicle under the year 1055 as the site of a victory by the prince of Pereiaslav, Vsevolod Yaroslavych, over the Torks. It was again mentioned under the year 1079 in conjunction with the internecine warfare among Rus' princes, in which the Cumans also took part; under the year 1110, when Rus' forces met the Cumans outside its walls; and under the year 1147, when Voin was the site of a peace treaty between the Kievan prince Iziaslav Mstyslavych and the Cumans.

The Voin fortress and harbor (diorama by O. Kazansky)

The exact location of Voin was discovered in 1897 by V. *Liaskoronsky, and the site was excavated in 1956–9 under the direction of the AN URSR (now ANU) Institute of Archeology. It was situated on a terrace, well protected by waterways, and consisted of a fortress surrounded by a moat and double-constructed walls of wood and earth. Together with the open-air trade and crafts district beyond its walls, the site covered 27.6 ha. The inside of the fortress was a protected area in which the traders kept their stores. It also housed a garrison of soldiers. To the west of the settlement was a burial ground. Excavations at the site unearthed armor and weapons (swords, spears, battle-axes), personal items (knives, scissors, keys, bone combs, clasps, bracelets, rings, crosses, bronze Byzantine coins), tableware (jars, amphorae, iron pots, glass dishes), and work articles (hammers, nails, blacksmiths' tongs, wire, carpenters' axes, a loom).

Voin existed as an important economic and military center in Rus' for nearly three centuries. It was sacked in 1186 during a major offensive by the Cumans on military installations along the Sula River. Subsequently Voin was partially rebuilt, only to be razed in 1240 by the Tatars. Today its ruins are submerged beneath the waters of the Kakhivka Reservoir.

A. Zhukovsky

Voinar, Meletii. See Wojnar, Meletius.

Voinarovsky, Andrii [Vojnarovs'kyj, Andriij], b ca 1689, d ca 1740 in Yakutsk, Siberia. Hetman state political and military figure. He was the son of a highly placed Volhynian aristocrat and O. Mazepa, the sister of Hetman I. Mazepa. He completed his studies at the Kievan Mohyla Academy. He was considered to be one of Mazepa's most trusted aides and his confidant. The hetman sent him on various special missions, including an attempt to allay Russian suspicions in October 1708 by visiting A. Menshikov's headquarters in the Siversk region and explaining the gradual approach of Mazepa's army. When Mazepa made his break with Muscovy, Voinarovsky became the primary liaison officer between the Ukrainian and the Swedish armies. After the defeat at Poltava he conveyed Charles XII to Turkey. After Mazepa's death he inherited the hetman's estate. This precipitated a break with other *starshyna* and P. Orlyk. In 1711–12 he lived in Istanbul as the special envoy of Charles XII. He remained in Turkish-controlled territories until 1715, with sojourns in Wroclaw and Vienna. On 12 October 1716, en route to Sweden, he was seized by agents of Peter I and handed over by the Hamburg Senate to the Russian authorities. He was taken to St Petersburg and imprisoned in the Peter and Paul Fortress. In 1723 he was exiled to Yakutsk, where

A. Zhukovsky

Voinarovsky-Stolobut, Tyt [Vojnarovs'kyj-Stolobut], b 16 February 1856 in Liatske Shliakhetske, Tovmach county, Galicia, d 21 February 1938 in Lviv. Greek Catholic priest, economist, and civic leader. After graduating in theology from Lviv University (1878) he was ordained, and served as parish priest in various villages in Kolomyia county. In 1907 he was elected as a candidate of the National Democratic party to the Austrian parliament. To promote land distribution he inspired the founding of the Zemlia society in 1908 and the Land Mortgage Bank in 1909. Having been appointed canon of the metropolitan chapter and general administrator of the metropolitan's estates he moved in 1910 to Lviv, where he persuaded Metropolitan A. Sheptytsky to donate estates in Korshiv and Myluvannia to farming schools. He was also active in the *Sil'skyi Hospodar society as its vice-president (1918–21) and president (1929–36) and was vice-president of the Lviv Agricultural Chamber (1934–6). He devoted much of his time to economics and (usually under the pseudonym Danylo Zhuravel or T. von Slepowron) wrote articles and books on economic questions. For these and other works he was awarded an honorary doctorate by the Ukrainian Husbandry Academy. His memoirs were published in *Istorychni postati Halychyny XIX–XX st.* (Historical Figures of Galicia in the 19th and 20th Centuries, 1961).

Voinovsky, Petro [Vojnovs'kyj], b 8 September 1913 in Stanivtsi Dolishni, Bukovyna. OUN leader and military officer. He joined the OUN in 1933 and rose to deputy (1940) and then chief of the OUN in Bukovyna. In 1941 he prepared an anti-Soviet revolt and organized the *Bukovynian Battalion, which marched to Kiev. The leadership of the OUN (Melnyk faction) appointed Voinovsky chief military co-ordinator for central Ukraine and military rep-

resentative on the Ukrainian National Council in Kiev (1941–2). During 1943 he served at the OUN military headquarters in Lviv. After being arrested by the Gestapo in January 1944, he spent over eight months in the Bratz concentration camp. In 1949 he emigrated to the United States, where he was active in the Ukrainian community, especially in veterans' organizations. In 1973 the UNR government-in-exile promoted him to colonel.

Voishelk Mindovhovyč. See Vaišvilkas.

Voitenko, Vasyl [Vojtenko, Vasyl'], b 13 January 1881 in Volokytyne, Putyvl county, Kursk gubernia, d 16 June 1951 in Kharkiv. Opera singer (dramatic tenor). From 1912 he appeared on the stages of St Petersburg, Baku, Kharkiv, and Kiev. He was a founder and soloist of the Dnipropetrovske Opera and Ballet Theater (1930–41), and taught at the Kharkiv Conservatory (1944–51). His main roles were Andrii in M. Lysenko's *Taras Bulba*, Grigorii in I. Dzerzhinsky's *Tikhii Don* (The Quiet Don), and Hermann in P. Tchaikovsky's *Queen of Spades*.

Voitiuk, Yakiv [Vojtjuk, Jakiv], b 1894 in Siltse, Kholm county, d 1937 on Solovets Islands. Civic and political leader. He studied in the historical-philological faculty of Moscow University for two years and belonged to a socialist student circle. During the First World War he served in the Russian army in the Ternopil region, and in 1919 he organized the Polisia Sich in Kobryn to fight the Poles. In 1922 he was elected to the Polish Sejm, where he was secretary of the Ukrainian Parliamentary Representation and then founder and chairman of the Ukrainian Social Democratic caucus (1924) and chairman of the Communist parliamentary faction. In 1928 he emigrated to Soviet Ukraine. He was arrested in 1933 and sentenced to 10 years but then executed in 1937 for 'belonging to a counterrevolutionary organization.'

Voitkevych-Pavlovych, Vasyl [Vojtkevych-Pavlovyč, Vasyl'], b ?, d 1920? Lawyer and legal scholar. He helped found the Ukrainian Law Society in Kiev (1917–20) and later served as its president. He lectured at the Ukrainian State University of Kiev (1918–19). In 1920 he served as legal adviser to the VUAN and as member of its Commission on Legal Terminology.

Voitkovsky, Vasilii [Vojtkovskij, Vasilij], b ? , d 1904. Russian church figure and publicist. From 1850 to 1869 he served as pastor of the Russian Orthodox church in Üröm, near Budapest. During that time he was a member of M. *Raevsky's coterie and was instrumental in the spread of Russophile tendencies among Transcarpathia's Ruthenians. He had a great influence on Rev I. *Rakovsky, a leader of the Transcarpathian revival, and became his main adviser. Under Voitkovych's de facto editorship Rakovsky published the papers *Zemskii pravitel'stvennyi vestnik dlia Korolevstoa Ugorskago* (1850–9) and **Tserkovnaia gazeta* (1856–8). Rakovsky and Voitkovych reworked the manuscript of O. Dukhnovych's grammar of the Transcarpathian dialect and published it as a grammar of literary Russian. As a professor of church history and theology at New Russia (Odessa) University from 1869, Voitkovych maintained contacts with Transcarpathian scholars and teachers, particularly those who had emigrated to the Russian Empire. He wrote in Russian about the Uniate church under Austria, the religious movement in Galicia, and the church-rite issue in Galicia, and translated into Russian Dukhnovych's history of Prešov eparchy (1877).

Voitsekhivka burial site. A Copper and Bronze Age burial ground near Voitsekhivka (now Kolosivka), Polonne raion; Khmelnytskyi oblast. Excavations in 1924 and 1949 revealed a burial site of an entire family of the *Globular Amphora culture – one man, two women, six children, and a slave. Individual, pair, and group burials from the *Komariv culture were uncovered in the sites dating from the Bronze Age. Grave goods included pottery and bronze and stone items.

Voitsekhivsky, Osyp [Vojcexivs'kyj], b 1793 in Ivanivka, Uman county, Kiev vicegerency, d 17 November 1850 in Kazan, Russia. Physician and sinologist. A graduate of the Kievian Mohyla Academy and the St Petersburg Medico-Surgical Academy (1819), he worked in China as a physician (1819–32). In 1829 a monument was erected to Voitsekhivsky in Peking for his dedicated fight against cholera and other epidemics. He served at Kazan University as the first professor of Chinese and Manchurian literature in Russia. He translated a number of works by Chinese thinkers into Russian and compiled a Chinese-Manchurian-Russian dictionary.

Voivode (Ukrainian: *voievoda*; Polish: *wojewoda*; Russian: *voevoda*). An ancient Slavic term for the leader of *voi* ('warriors'). He was elected by the tribal assembly in times of war. In Kievan Rus' the term referred initially to the commander of a prince's Varangian guard and then to the commander of his army in times of war or to his vicegerent and garrison commander in a particular town. In the 13th- and 14th-century Western Ukrainian principalities it occasionally designated the joint administrator and military commander of a certain territory.

In the Grand Duchy of Lithuania and the Lithuanian-Ruthenian state a voivode was a noble appointed for life by the grand duke to be the governor and military commander of a province, called a *zemlia* ('land') or, beginning in 1413, a *voivodeship (palatinate), in accordance with the Polish model; he was simultaneously a member of the *Council of Lords. Towns self-governed by *Magdeburg law were exempt from his powers. In the 14th- to 16th-

century Polish Kingdom and, after the 1569 Union of Lublin, the Polish-Lithuanian-Ruthenian Commonwealth, a voivode was a lord appointed for life by the king to govern a voivodeship; he was simultaneously a member of the Royal Council and its successor, the Senate. His authority was weakened after the creation of starostas and noble dietines. The starosta assumed the role of commander of the royal army and chief justice in the voivodeship, and the voivode was responsible for leading the levy en masse among the nobility, trying Jews, regulating commercial prices, and controlling weights and measures there. The position was abolished after the partition of Poland in 1772.

In Muscovy a voivode was a regimental commander and, from the early 17th century, the tsar's chief administrator and military commander in a province or county and its capital, usually for a term of one to three years. After the Treaty of Pereiaslav in 1654, the term was applied to the commanders of the fortresses and Russian garrisons of Kiev, Pereiaslav, Chernihiv, Uman, Nizhen, and, during the hetmancy of I. Briukhovetsky, Hadiache, Poltava, Myrhorod, Lubni, Hlukhiv, and other towns in Ukraine. The voivodes were subordinated to the *Little Russian Office and to the tsar himself. The military rank of voivode was abolished in 1708, during the reign of Peter I, but the term was retained as a designation of government rank. From 1718–20 on a voivode was the administrator, chief of police, and chief justice (from 1722) in a gubernial subunit, the *provintsiia*. From 1730 he was appointed for two years, and from 1760, for five years. The position was abolished in most of Russian-ruled Ukraine in 1775 and in Slobidska Ukraine in 1780–2.

In interwar Poland, which occupied most of Western Ukraine, a voivode was the state-appointed governor of a province called a voivodeship. The position was abolished in the Polish People's Republic in 1950.

R. Senkus

Voivodeship (*voievodstvo*; Polish: *województwo*). An administrative-territorial unit equivalent to a palatinate in the 13th- to 16th-century Kingdom of Poland and the 16th- to 18th-century Polish-Lithuanian Commonwealth. It was governed by a *voivode with the help of several castellans and other officials. After the introduction of *dietines each voivodeship was an autonomous unit and a separate electoral region with its own noble assembly, court, administration, army, and taxes. After the Union of Lublin Ukrainian ethnic territory was divided among Belz, *Bratslav, *Kiev, *Podlachia, *Podilia, *Rus', and *Volhynia voivodeships under Polish rule, and Berestia voivodeship under Lithuanian rule. *Chernihiv voivodeship was added in 1635. From 1815 to 1837 the Congress Kingdom of Poland was divided into eight commission-governed voivodeships; Lublin and Podlachia voivodeships included Ukrainian ethnic territories. The interwar Polish Republic was divided into provinces called voivodeships. Western Ukrainian ethnic territories were located in Lviv, Stanyslaviv, Ternopil, Volhynia, and Polisia voivodeships and parts of Cracow, Lublin, and Białystok voivodeships. (See also *Administrative territorial division.)

Vojvodina. See Bačka and Serbia.

Volcanic Ukrainian Carpathians. The southwesternmost belt of the *Carpathian Mountains, located between the Tysa Lowland and the Polonynian Beskyd and Inner Carpathian Valley. The mountains rise steeply for 600–900 m above the Tysa Lowland to an elevation of 900–1,100 m. They consist mostly of effusion centers joined by lava streams that were created during the sinking of the Inner Carpathians through volcanic eruptions during the Miocene epoch. The volcanic deposits include trachytes, andesites, rhyolites, and tuffs.

The Volcanic Carpathians stretch from the Laborets River in the northwest to the northern Rumanian border (south of the Maramureş Basin) in the southeast. Transverse valleys of the Tysa River and its tributaries divide the mountains into the following groups: the Vyhorlat (1,074 m), Makovytsia (978 m), Syniak (1,014 m), Velykyi Dil (1,086 m), Tupyi (878 m), and Hutyn (1,093 m) mountains. The massive and broad ranges are dotted with picturesque volcanic rings (the remains of craters) and cones. The mountains are almost unsettled and are covered with oak and beech forests.

The foothills of the Volcanic Carpathians form a narrow band to the west. They are formed of tuffs and andesites. The land is highly productive – corn, wheat, and grapes are all grown there – and densely populated. The most important cities of Transcarpathia (Mukachiv, Vynohradiv, Užhorod) are found in the passes formed by rivers through the foothills. A few isolated volcanic regions are found in the vicinity of Berehove, in the Tysa Lowland.

V. Kubijovyč

Volchuk, Roman. See Wolchuk, Roman.

Vole (Ukrainian: *polivka*, *norytsia*). Any of the numerous rodents of the family Cricetidae, most particularly of the genus *Microtus*; also known as the meadow vole, field vole, or meadow mouse. Because it feeds on various plants and often damages crops and trees, the vole is one of the worst agricultural pests in Ukraine. Species include the common grey vole (*M. arvalis*), the social vole (*M. socialis*), the steppe vole (*Lagurus lagurus*), the underground vole (*M. subterraneus*) in Western Ukraine, the snow vole (*M. nivalis*) in Caucasia, and the water vole or water rat (*Arvicola terrestris*; Ukrainian: *ondatra*), which lives a semi-aquatic life and is hunted for its fur. Some voles are carriers of disease organisms.

Volga Bulgars. Turkic-speaking nomads from Asia who appeared with the Huns in the Black Sea steppes in the 5th century AD and set up a confederation in the middle Volga and Kama region in the 10th century. After migrating into the region between the Sea of Azov and the northern Caspian they were attacked by the Avars in 558 and then subjugated by the Turkic Kaganate. Under the leadership of Kubrat the Bulgar tribes formed a union and established a state in the 630s with Phanagoria as capital. After Kubrat's death (ca 650) the tribes divided into two rival hordes. Weakened by internal fighting, the Bulgars were displaced by the Khazars: some of them fled to the Danube region and occupied the eastern Balkans, others moved east to the Volga-Kama region, and the third and smallest group, known as the Black or Inner Bulgars, stayed in the Azov steppe.

At first the Volga Bulgars were subject to the Khazar

Kaganate. In 922 Khan Almas, the ruler of Bulgar city, began uniting the Bulgar tribes against the Khazars. After Prince Sviatoslav Iohorevych conquered the Khazars (965) the Bulgar confederation flourished as a major trading power. The Bulgars conducted a considerable amount of trade with Kievian Rus'. The princes of Rus' conducted several campaigns (in 977, 985, 994, and 997) against the Volga Bulgars and concluded a treaty in 1006 that gave Rus' merchants access to Bulgar markets. In the 12th century Bulgar trade was redirected northward toward Vladimir-Suzdal. The Bulgars were subdued by the Tatars in 1236–41, and continued their commercial activities under the Golden Horde. In the 1390s they were weakened by Tamerlane's invasion, and in the 1430s they succumbed to attacks from Muscovy.

Volga German ASSR. An autonomous Soviet republic formed in 1924 out of the Volga German Autonomous Oblast (est 1918). The region, covering 28,200 sq km along the Volga River, was colonized by *Germans beginning in the 1770s. Its capital was Pokrovsk (renamed Engels in 1931). According to the Soviet census of 1926 most of the republic's population (66.4 percent) was German (379,600); after the Russian minority (20.4 percent), the second-largest minority was Ukrainian (12 percent, or 68,600 people). The Ukrainian population lived in compact islands and constituted the largest ethnic group in Pokrovsk (51.3 percent) and Staraiia Poltavka (44.8 percent) raions. In September 1941 the German population was deported to the east, and in 1945 the republic was abolished.

Volhynia (Ukrainian: *Volyn*). A historical region of northwestern Ukraine, located north of Podilia, south of Polisia, east of the Buh River, and west of the upper parts of the Teteriv and the Uzh rivers. Its area is approx 70,000 sq km, and its population exceeds 4 million. Volhynia's borders have changed considerably over the centuries, shifting consistently from west to east. In the 12th century the principality of Volhynia was larger than the present region. It extended to the Wieprz River in the west and to the Narev and the Yaselda rivers in the northwest and thus encompassed the present *Kholm region and *Podlachia. Until 1170 it also encompassed the *Belz land in the south. Under Poland the smaller *Volhynia voivodeship (1569–1793) did not reach west beyond the Buh River, but included new territory to the east and southeast. Within the Russian Empire *Volhynia gubernia consisted approx of the same territory, except for the Zbarazh region, but expanded east to the upper Teteriv and the Uzh rivers. Even its capital, Zhytomyr, belonged once to Kiev, not Volhynia principality. After the 1921 partition of Volhynia between Poland and the Ukrainian SSR the western part became Volhynia voivodeship. Today Volhynia encompasses most of Volhynia, Rivne, and Zhytomyr oblasts, and parts of the former Volhynia gubernia belong to other oblasts – the Kremianets region, to Ternopil oblast, and the Zaslav (now Iziaslav) and the Starokostiantyniv regions, to Khmelnytskyi oblast. Berdychiv and Radomyshl counties of the former Kiev gubernia now belong to Zhytomyr oblast. Volhynia is usually associated with the territory of the former Volhynia gubernia, which covered 71,700 sq km and in 1914 had a population of 4,190,000. The present Volhynia, Rivne, and Zhytomyr oblasts cover

70,200 sq km and have a total population of 3,777,000 (1989 census).

Physical geography. Volhynia is the meeting ground of two distinct landscapes: the glacial, characteristic of *Polisia, and the plateau, characteristic of *Podilia. From south to north the following landscape zones appear: (1) the *Podolian Upland, (2) *Little Polisia, (3) the *Volhynia-Kholm Upland, and (4) Volhynian Polisia. East of Slavuta the zone of depressions that forms Little Polisia disappears, leaving only two zones. The northward-flowing Ikva and Horyn rivers have cut deeply into the Podolian plateau and turned it into an eroded upland with mesas and pinnacles. The *Kremianets Mountains, rising to 407 m above sea level, are the most picturesque part of Volhynia. The Podolian Upland is separated from the Volhynia-Kholm Upland by a zone of depressions. The upper *Buh Depression and the depressions of the Styr, the Ikva, and the Horyn rivers, all ranging in elevation from 200 to 220 m, are separated by low divides. Although they are of tectonic origin dating back to the Paleozoic era, their present appearance is attributed to the Pleistocene period, when meltwaters, blocked by the continental glacier, ponded in the upper Buh Depression and spilled eastward, leaving behind fluvioglacial deposits. As a result depressions are outwash plains, particularly in Little Polisia, east of the Ikva River at the foot of the Kremianets Mountains, where the depression changes to a broad valley. The Volhynia-Kholm Upland rises some 40–80 m above the depressions. The undulating plain has an elevation of 240–300 m. It is built of chalk in the west and granite in the east and is overlain with a thick layer of loess. In the north it descends abruptly to Volhynian Polisia.

Prehistory. The earliest settlements in Volhynia date back to the Lower Paleolithic period. Flint tools of the Acheulean culture have been uncovered in the Kremianets region. There are more finds from the Upper Paleolithic (around Kremianets, Dubno, Rivne) and even more from the Mesolithic period (tools of the Swiderian and its successor, the Campignian, cultures). During the Neolithic (5000–2500 BC) and the Eneolithic (2500–1800 BC) periods Volhynia was relatively densely peopled by an agricultural tribe that developed flint tools and linear-band pottery (the Buh culture). Then the first immigrants from the south (the Trypilian culture), from Silesia (the Volute Pottery culture), and from the northwest (the Stone-Cist Grave culture) appeared. In the Bronze Age (1800–800 BC), the population of Volhynia quickly assimilated immigrants from Silesia (Lausitz culture), and adopted from them the cremation of the dead. It established trade with Transcarpathia, where it acquired bronze weaponry. Toward the end of the Bronze Age the culture evolved into the Vysotske culture. Its carriers, according to Herodotus, were the Nevrians. In the Sarmatian-Roman period (50 BC to 200 AD) Volhynia's contacts with the Dniester and Dnieper regions and the Roman trading stations on the Black Sea increased.

History. The first historical name of the people of Volhynia was *Dulibians. In the 10th century that name was replaced by *Buzhanians (found also in Western sources) and *Volhynians.

The name Volhynia (*Volyn*) probably comes from a fortified town from before the 10th century, located at the confluence of the Buh and the Huchva rivers. Archeologists have discovered many artifacts from the 6th to 9th

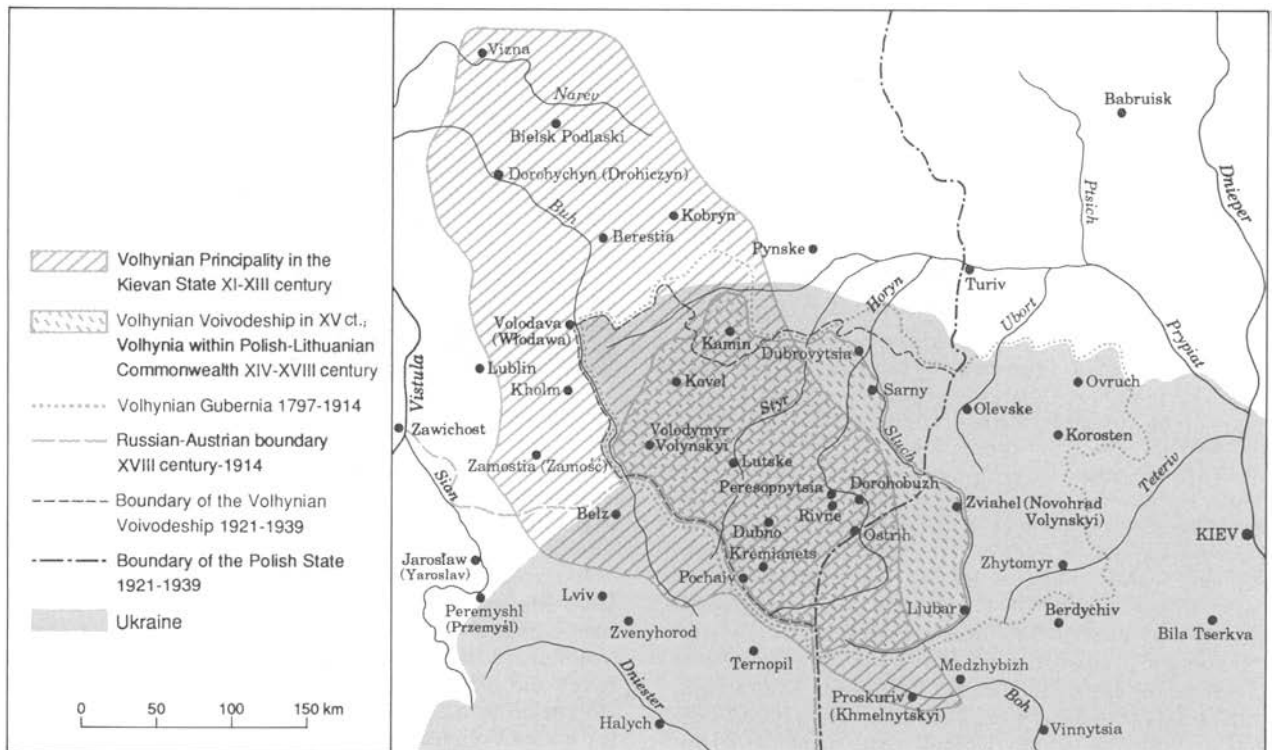

Western Volhynia

centuries, including Roman and Arab coins, at the site. The Arab geographer Mas'ūdī (10th century) called Volhynia Valinana, its inhabitants, the Dulaba, and their king, Vand Slava.

In the 9th century Volhynia came under the sway of the Great Moravian state. By the beginning of the 10th century the Dulibians were subject to Kiev. In 981 and 993 Prince Volodymyr the Great secured the lands along the Sian River and beyond the Buh River and built Volodymyr-Volynskiy (988), which he gave to his son, Vsevolod. In the 990s a Volhynian eparchy was established. From 1015 to 1030 Volhynia was the battleground of Polish-Rus' wars. After the death of Yaroslav the Wise Volhynia was inherited by Ihor Yaroslavych and then by Iziaslav Yaroslavych, his son Yaropolk (d 1087), and his grandson, Yaroslav Sviatopolkovich (d 1123). During that period Volhynia acquired political individuality. In the 1120s it passed into the hands of the Monomakh dynasty, and in 1154, to the Iziaslav dynasty (Mstyslav and Yaroslav).

Having subordinated the Galician boyars and beaten foreign invaders Roman Mstyslavych established a large state encompassing Volhynia, Galicia, and Kiev and known as the Principality of Galicia-Volhynia. After protracted wars with Hungary and Poland his son Danylo reclaimed all of Volhynia (1227) and Galicia (1230s) and granted western Volhynia to his brother, Vasylo. Galicia-Volhynia survived the Mongol invasion (1240–1). After Danylo's death (1264) eastern Volhynia was ruled by his son, Mstyslav, and after Vasylo's death western Volhynia was inherited by his son, Volodymyr (d 1288). After Volodymyr's death Mstyslav Danylovych briefly brought most of Volhynia under his rule. In the second half of the 13th century Mazovia principality became subject to Volhynia.

At the beginning of the 14th century Volhynia and Galicia were reunited under Yurii Lvovych and maintained under the rule of his grandson, Yurii. In 1349, however, the state was partitioned, and Volhynia fell under the control of *Liubartas. By the beginning of the 15th century Volhynia was a distinct principality within the Grand Duchy of Lithuania. Its local princes supported Švitrigaila in his bid to gain the Lithuanian throne. From 1452 to 1569 Volhynia was a province of the Grand Duchy of Lithuania consisting of Volodymyr, Lutske, and Kremianets starostvos. It came under increasing Polish administrative and economic influence, but maintained the church traditions, customs, and way of life of the Princely era. In the 15th

VOLHYNIA

and 16th centuries the princely and noble families, who led a continuing struggle against the Tatars, consolidated their privileged positions in society. As the Turks and Tatars blocked access to the Mediterranean markets, Volhynia strengthened its trade with the Baltic ports. In the 16th century the flow of Polish nobles and tradesmen into Volhynia, which was one of the most densely populated Ukrainian regions, increased. As Polish influence grew, the condition of the Volhynian peasantry became more difficult.

After the Union of *Lublin (1569) Volhynia became a Polish crown voivodeship without losing its internal autonomy and Ukrainian character. The union, however, accelerated the Polonization of the administration and the upper estates of Volhynia. The struggle against Roman Catholicism and the Ukrainian national-cultural movement at the beginning of the 17th century was expressed in the writings of the opponents and the supporters of the Church Union of *Berestia (1596), the Orthodox opposition to the Reformation in Hoshcha, Lutske, and elsewhere, the activities of the Orthodox brotherhoods in Ostrih, Volodymyr, and Lutske, and the founding of the *Ostrih Academy, schools in Volodymyr-Volynskiy, Lutske, Dubno, and elsewhere, and printing presses in Ostrih, Pochaiv, Derman, Kremianets, Kostiantyniv, and Chetvertnia.

The insurrections of K. Kosynsky (1591–3) and S. Nalyvaiko (1595) received wide support in Volhynia. During B. Khmelnytsky's uprising rebel groups led by M. Kryvonis, I. Donets, and M. Tyt were active there. Some of the battles of the *Cossack-Polish War of 1648–57 took place in Volhynia (Zbarazh, Vyshnevets, Brody, and Berestechko). Nevertheless Volhynia never became part of the Hetman state but remained a province of Poland. After B. Khmel-

nytsky's death heavy Polish oppression and Tatar raids forced much of the Ukrainian population to emigrate to Left-Bank Ukraine. The Ukrainian nobility in Volhynia lost its political significance. As the Uniate church spread, the Polish authorities granted the Uniate Lutske eparchy jurisdiction over the remaining Orthodox clergy. In the 18th century the *haidamaka uprisings (1734, 1768) received popular support in Volhynia.

After the partitions of Poland (1772, 1793, and 1795) Volhynia, with the exception of the southern part of Kremianets county, which was taken by Austria in 1772, became part of the Russian Empire. At the beginning of the 19th century Volhynia gubernia, with Zhytomyr as its capital, was set up. But the region continued to be dominated by the Polish nobility, and the position of the Ukrainian peasantry remained unchanged. The Polish language prevailed. The school superintendent, T. Czacki, opened many Polish schools, and the Kremianets Lyceum (1819–31) served as a Polish educational center.

The Polish Insurrection of 1830–1 provoked the Russian government to introduce an anti-Polish Russification policy, particularly in Volhynia, which was part of Kiev general gubernia. The Kremianets Lyceum, Polish schools, and many Roman Catholic and Uniate monasteries were closed down. In 1838 the Uniate Church in Volhynia was abolished. The Lithuanian Statute was replaced by Russian law, and Russian became the language of the courts and government. The emancipation of the serfs (1861) and another Polish uprising (1863) weakened the Polish nobility. In the 1860s a program of rapid and comprehensive Russification was launched. Russian official circles set up a center for Black Hundreds propaganda at the Pochaiv Monastery. Volhynia was cut off from the Ukrainian national revival of the late 19th and early 20th

centuries. Until 1911 it did not even have *zemstvos*, which in other gubernias provided a measure of self-government and within permitted limits supported Ukrainian cultural expression.

The process of national rebirth began in Volhynia only with the Revolution of 1917. A. Viazlov, a native of Volhynia, was appointed gubernia commissioner by the Central Rada. Networks of Ukrainian schools, Prosvita reading rooms, and co-operatives were organized. With the Bolshevik advance against Ukraine, in February 1918 Volhynia became the battleground of UNR forces and the Seventh Russian Army. Zhytomyr served as a temporary seat of the Central Rada. In the spring of 1919 Rivne became a temporary capital of the UNR, whose army fought the Bolsheviks in eastern Volhynia, then the Poles in western Volhynia, and again the Bolsheviks in 1920. In November 1921 the Volhynian military group under Gen Yu. Tiutiunnyk staged a raid which inspired many popular revolts against the Bolsheviks (see *Winter campaigns).

In 1921 Volhynia was partitioned according to the Peace Treaty of Riga: the eastern part was annexed by the Ukrainian SSR, the western part by Poland. Eastern Volhynia experienced the same changes as the rest of Soviet Ukraine. In the early 1920s much of the evacuated population returned to Volhynia. The Volhynian intelligentsia was active in the Ukrainization movement of the 1920s, but became a victim of Stalinist terror in the 1930s. Collectivization and industrialization changed the economic and social profile of Volhynia.

The position of western Volhynia was unique. In the 1920s the national rebirth was promoted by a sizable group of Ukrainian intelligentsia, who had close contact with activists in the Kholm region, Podlachia, and Galicia. There was a united and fairly strong Ukrainian representation from Volhynia in the Polish Sejm and Senate. Volhynian and Galician political groups worked closely together. Ukrainian co-operatives in the two voivodeships were linked organizationally, and their Prosvita societies co-operated with one another in spite of official prohibition and the establishment of the Sokal border. Nevertheless the authorities managed to fragment and then influence the Ukrainian political movement in Volhynia. The *Volhynian Ukrainian Alliance advocated loyalty and collaborated with the Polish regime. The Polish government's *Pacification and policy of terror in the 1930 elections weakened the Ukrainian parties. The governor of Volhynia, H. Józewski, tried to isolate Volhynia from Galicia. The authorities took strong measures to suppress Ukrainian national and cultural activity: in 1928–32 they closed down the Prosvita societies in Kremianets, Ostrih, Dubno, Rivne, Kovel, Volodymyr, and Lutske (along with 134 branches). On the eve of the Second World War there were only 8 Ukrainian elementary schools in Volhynia, compared to 443 in 1922–3, 1,459 Polish schools, and 520 bilingual schools, where most subjects were taught in Polish. There were three Ukrainian private secondary schools, but not one state school. Printed matter from Galicia was not allowed into Volhynia. In 1934, Volhynian co-operatives were subordinated to Polish co-operatives. In the border zone, which covered about one-third of Volhynia, the terror against Ukrainians was intensified: political activists were imprisoned, and people were forcibly converted to Roman Catholicism or to the Uniate church. The OUN reacted to the repressions by stepping up its activities, and Ukrainian deputies from Volhynia,

such as Mstyslav *Skrypnyk, protested strenuously in the Sejm.

In 1939 western Volhynia was occupied by the Soviet armed forces and annexed by the Ukrainian SSR. Two oblasts, Volhynia and Rivne, were formed out of it, and the Kremianets region was attached to Ternopil oblast. In 1941, as Soviet forces retreated, they committed mass murders in the prisons of Lutske, Dubno, and other cities. Initially the German occupational authorities that replaced them tolerated the revival of Ukrainian civic and religious life. But as soon as the Reichskommissariat Ukraine had been set up, in the fall of 1941, the German terror intensified. The Ukrainians of Volhynia responded with armed resistance. The Germans secured the cities and railway lines, but not the countryside. They staged punitive raids on the villages, which they burned and killed their defenseless inhabitants. In the spring of 1944 the resistance was redirected against the Soviet occupational forces.

Volhynia played an important role in the recent history of the Ukrainian Orthodox church. In the early 1920s a group of Ukrainian Orthodox priests and laity in Volhynia began to Ukrainianize the Orthodox eparchy that had been Russified until 1917. The Mohyla Society in Lutske and a number of church brotherhoods were active in the work. The Kremianets Seminary and the Orthodox faculty at the University of Warsaw trained Ukrainian Orthodox priests. When the Bolsheviks dissolved the Ukrainian Autocephalous Orthodox church (UAOC) in 1930, Polish-ruled western Volhynia became its chief stronghold. After the German occupation of that part of Volhynia Bishop P. *Sikorsky of Lutske became metropolitan (1942) and revitalized the UAOC. In 1943 the hierarchy of the UAOC fled to the West. Under Soviet rule the Orthodox parishes of Volhynia were forced to submit to the patriarch of Moscow.

Population. The average population density of Volhynia is 54 persons per sq km (1989 figures). The highest densities occur in the southern (80 persons/sq km) and central (65 persons/sq km) parts of Volhynia, average densities in the zone of depressions (55 persons/sq km), and the lowest densities in Polisia (40 persons/sq km). Because of lagging industrialization the proportion of the population that is urban is one of the lowest in Ukraine. In western Volhynia it was 12.1 percent in 1931 and 46.6 percent in 1987; in eastern Volhynia it was 20.5 percent in 1939 and 51.2 percent in 1987. In all of Volhynia it was only 8 percent in 1897, 17 percent in 1939, and 48 percent in 1987. The largest cities in Volhynia are (1989 figures) Zhytomyr (292,000), Rivne (228,000), Lutske (198,000), Berdychiv (92,000), Korosten (72,000), Kovel (69,000), Novovolynske (53,500), and Novohrad-Volynskyi (55,000).

Until the mid-19th century non-Ukrainians accounted for nearly 20 percent of the population. Among them were Jews, Poles, Ukrainian-speaking Roman Catholics, and a few Russians. After the abolition of serfdom the landlords sold some of their estates and deforested lands to colonists. Some 20,000 Czechs settled in Volhynia (mostly in Dubno, Zdolbuniv, and Rivne counties), nearly 100,000 Germans (usually on newly cleared land) in Volodymyr-Volynskyi, Lutske, Zhytomyr, and Zviahel counties, and Poles mostly in Volodymyr-Volynskyi, Kostopil, and Zviahel counties. The proportion of the Ukrainians in the population declined to 70 and even 65 percent. During the First World War the Russian government deported some

Traditional Volhynian dress

of the German colonists. After 1920 the number of Poles in western Volhynia increased (see table 1).

The Second World War changed the national composition of Volhynia (see table 2). Most Jews not evacuated by the Soviets were killed by the Germans. At the end of the war almost all the Germans and Czechs left, and many Poles, particularly from western Volhynia, changed places with Ukrainians living in Poland. An increasing influx of Russians and Belarusians strengthened the influence of the Russian language in the region.

Economy. Volhynia is an agrarian land with low industrial development, especially in the western part. At the beginning of the 1930s some 78 percent of the population was employed in agriculture, and only 8 percent in industry. In 1987, 52 percent of the population was rural, and most of it based its livelihood on agriculture.

Most of the sown area in 1940 was devoted to grain (73 percent), including rye (29 percent), oats (15 percent),

TABLE 1
Ethnic composition of Volhynia, 1897–1931 (percentages)

	Western Volhynia	Eastern Volhynia	All Volhynia	
	1931	1926	1897	1931
Ukrainians	70.4	68.6	70.1	69.9
Jews	9.8	9.0	12.2	9.5
Poles and Ukrainian-speaking				
Roman Catholics	15.2	11.7	6.2	13.9
Russians	1.1	2.5	3.7	1.5
Germans	2.2	7.3	5.7	3.9
Czechs	1.1	0.4	0.9	1.0
Others	0.2	0.5	1.2	0.3

wheat (14 percent), and barley (9 percent). Feed crops occupied 11 percent, potatoes, 9 percent, and industrial crops (sugar beets, flax, hemp, hops, and tobacco), 7 percent of the cultivated land. By the 1970s grain accounted for only about 44 percent of the sown area and feed crops had increased to 32 percent, potatoes and vegetables, to 14 percent, and industrial crops, to 10 percent. Grain yields rose from about 12 centners per ha in 1940 to over 20 centners per ha in the 1970s. Southern Volhynia produced a grain and hop surplus. In northern Volhynia forestry and animal husbandry (dairying and hog farming) prevailed.

Industrial development in Volhynia has been hampered by lack of energy resources, by competition from the more developed central regions of the Russian Empire, the USSR, and Poland, and by the region's exposed position between two unfriendly powers. After the Second World War the political and economic conditions for industrialization along the western Soviet frontier improved. The development of the *Lviv-Volhynia Coal Basin has strengthened the local base for power generation. The Rivne and Khmelnytskyi nuclear power stations have made Volhynia a power exporter. Pipelines feed the major cities of Volhynia with natural gas for industrial as well as domestic use. The oil pipeline crossing Volhynia transported only Soviet crude oil to the West and contributed nothing to Volhynia's economy.

The most important industry in Volhynia is the food industry. Based on local raw materials, it accounts for over one-third of the value of industrial goods. Its major branches are grist milling, sugar refining, liquor distilling, brewing, fruit and vegetable canning, meat packing, milk processing, and butter making. Sugar refining has expanded to western Volhynia. Berdychiv has the only malt kiln in Ukraine. Other food-processing operations are more or

TABLE 2
Ethnic composition of Volhynia after the Second World War (percentages)

¹Rivne and Volhynia oblasts

²Zhytomyr oblast

less ubiquitous. Second in importance are the lumber, woodworking, furniture, wood-chemical, and pulp and paper industries. The large woodworking plants and furniture factories in Kovel, Lutske, Rivne, Sarny, Zhytomyr, Korosten, and Malyn are based on the forest resources of Volhynian Polisia. The Kostopil prefabricated-house-building plant is the largest of its kind in Ukraine. Paper mills at Korostyshiv, Malyn, Myropil, and Chyzhivka account for 20 percent of the forest-based industrial output of the region. Third in importance, light industry accounts for less than one-quarter of the region's industrial output. The machine-building and metalworking industries have developed only in the last three decades. They produce equipment for the chemical and food-processing industries (Berdychiv, Korosten), metal-cutting machines (Zhytomyr, Berdychiv), road-building (Korosten) and farm machinery (Novohrad-Volynskiy, Kovel, Rivne), tools (Zhytomyr, Lutske, Rivne), automobiles (Lutske), and railway equipment (Kovel). Volhynia's chemical industry produces fertilizers (Rivne), synthetic fibers (Zhytomyr), pharmaceuticals (Zhytomyr) and plastics (Lutske). The building-materials industry is well developed and supplies other regions. Crushed stone and asbestos-cement (Zdolbuniv) are used for prefabricated cement products. Granite, labradorite, basalt, and other rock quarrying provides fine building stone. Local kaolin clays and sand are used for manufacturing pottery, china, and glass, particularly in a cluster of small towns between Zhytomyr and Rivne. The mining of bog iron ores is obsolete, but the discovery and development of ilmenites has given rise to non-ferrous metallurgy at Irshanske, which produces titanium dioxide and phosphate fertilizers. The most important industrial centers in Volhynia are *Zhytomyr, *Rivne, *Lutske, *Novohrad-Volynskiy, *Kovel, and *Zdolbuniv.

Volhynia eparchy. An Orthodox eparchy with its see in Zhytomyr. It was created at the turn of the 19th century, after the Russian Empire acquired Volhynia in the partitions of Poland. It comprised the territory of Volhynia gubernia and included most of the former eparchies of *Volodymyr-Volynskiy and *Lutske. In the 19th century it was one of the largest and wealthiest eparchies of the Russian Orthodox church, with over 1,800 parishes (1907) and 4 women's and 10 men's monasteries, including the *Pochaiiv Monastery. In 1917, in addition to the titular bishop, the eparchy had three vicar bishops (in Volodymyr-Volynskiy, Kremianets, and Ostrih). In the early 20th century, under Bishop A. *Khrapovitsky, the eparchy became a major center of Russian ultranationalism, and many clergymen and monks there supported the Black

Hundreds movement. The *Volynskie eparkhial'nye vedomosti*, the official eparchial organ published from 1861 to 1917, contains much information about the eparchy and its history (including the history of Volodymyr-Volynskiy and Lutske eparchies), and M. Teodorovych published a five-volume history and description of the eparchy in 1888-1903.

In the interwar period most of the territory of Volhynia eparchy was in Poland. In the 1930s the bishop of Volhynia, O. Hromadsky, had his see in Kremianets and vicars in Lutske (P. Sikorsky) and Ostrih (S. Ivanovsky). Many Ukrainian church organizations were active in the eparchy, including the *Mohyla Society, and several publications appeared there.

During the Second World War the *Ukrainian Autocephalous Orthodox church (UAOC) established the eparchy of Lutske and Kovel (under Sikorsky), with vicars in Rivne (Bishop P. Artemiuk) and Dubno (Bishop V. Lysytsky). With the rebirth of the UAOC in the early 1990s, two eparchies (Rivne-Zhytomyr and Lutske) have been re-established.

Volhynia gubernia. An administrative-territorial unit in Russian-ruled Right-Bank Ukraine that replaced *Volhynia vicegerency in 1797. The gubernial capital was Novohrad-Volynskiy and, from 1804, *Zhytomyr. From 1799 the gubernia's territory (71,737 sq km) was divided among 12 counties: Dubno, Kovel, Kremianets, Lutske, Novohrad-Volynskiy, Ostrih, Ovruch, Rivne, Starokostiantyniv, Volodymyr-Volynskiy, Zaslav, and Zhytomyr. The gubernia's population grew from 1,212,800 in 1811 to 1,314,100 in 1838, 1,469,400 in 1851, 1,602,700 in 1863, 2,196,000 in 1885, 2,989,500 in 1897, and 4,189,000 in 1914. In 1897 the population was 70.1 percent Ukrainian, 13.2 percent Jewish, 6.2 percent Polish, 5.7 percent German, 3.5 percent Russian, 0.9 percent Czech, and 0.1 percent Belarusian. Only 7.8 percent of the population was urban, of which nearly 51 percent was Jewish and 7.6 percent Polish. In 1914 the gubernia had the lowest percentage (8.4 percent) of urban dwellers among the nine Ukrainian gubernias.

In 1905 almost half of the gubernia's land was still owned by the gentry, of which 69 percent was Polish in 1885. Land hunger and poverty forced many peasants to resettle in Siberia or to emigrate to North America. Industry - consisting primarily of sugar-beet refining, distilling, weaving, flour milling, and tanning - occupied only 7.4 percent of the population and was generally poorly developed, although the gubernia was the primary producer of woolen cloth in Ukraine. Under Soviet rule the gubernia's western counties were ceded to Poland in the 1921 Peace Treaty of Riga. In 1925 the gubernia was abolished, and the territory of the remaining counties (31,860 sq km) was distributed among Korosten, Shepetivka, and Zhytomyr (later Novohrad-Volynskiy) okruhas.

R. Senkus

Volhynia oblast. An administrative territory (1989 pop 1,062,000) in northwestern Ukraine, formed on 4 December 1939. It has an area of 20,100 sq km and is divided into 15 raions, 11 cities, 21 towns (smt), and 352 rural councils. The capital is *Lutske.

Physical geography. The territory of the oblast consists largely of a flat plain which slopes down from 190-200 m in the south to 140-150 m in the north. The central and

northern parts are covered by the Polisian Lowland and are marked by extensive floodplains, rivers and lakes, forests, and swamps. The terrain is flat, with some gentle rolling and moraine hills. The southern part of the oblast lies in the Volhynia-Kholm Upland and is dissected by ravines and valleys. The oblast has a moderate continental climate: the average January temperature is -4.5°C , and the average July temperature is 19°C . The annual precipitation is 550–660 mm. Much of the oblast's territory (32.4 percent) is forested. The more common trees are spruce, pine, oak, linden, and hornbeam. There are 224 lakes, covering an area of 14,429 ha. The oblast lies along the watershed between the Baltic and Black Sea basins, but most of its rivers belong to the latter. The major rivers are the Buh, the Prypiat, the Turiiia, the Stokhid, and the Styr. Podzolized dark gray soils and chernozems are prevalent in the southern part of the oblast, and soddy podzolic, soddy, and meadow soils are common in the central and northern regions. Extensive coal deposits are found in the Lviv-Volhynia Coal Basin.

Population. The majority of the oblast's population is Ukrainian (94.6 percent in 1989), and the main minority is Russian (4.4 percent). The southern part of the oblast is settled more densely than the northern part. Urban dwellers account for 51.9 percent of the population. The major cities are Lutske, *Kovel, *Volodymyr-Volynskiy, and *Novovolynske.

Industry. The main industries are food processing (29.4 percent of the industrial output in 1983), light industry (25.7 percent), machine building and metalworking (21.7), forestry and woodworking (7.1) and building-materials manufacturing (5.4 percent). The major branches of the food industry are sugar refining (Volodymyr-Volynskiy, Lutske, Ivanychi), meat packing (Lutske, Novovolynske, Kovel), canning (Lutske, Volodymyr-Volynskiy, Ivanychi), and dairy goods. The light industry consists of footwear, linen (Kovel, Manevychi, Stara Vyzhivka), textile (Lutske, Novovolynske, Kovel), and artificial leather (Lutske, Novovolynske, Kovel, Volodymyr-Volynskiy) plants. Instruments, electrical equipment, agricultural machinery, automobiles, and ball bearings are the major products of the machine-building industry, which is concentrated in Lutske, Kovel, Novovolynske, and Rozhyshe. Furniture-making is the main branch of the woodworking industry; its main centers are Kyvertsi, Tsuman, Kovel, Lutske, Volodymyr-Volynskiy, and Manevychi. The oblast also has a large coal industry and a building-materials industry which produces bricks, reinforced concrete, and sheet roofing.

Agriculture. In 1986 farming accounted for 60 percent of the oblast's output. There were 341 collective and 46 state farms and 2 poultry factories. About 1,073,000 ha of land were devoted to agriculture, of which 62.4 percent was cultivated, and 37 percent was hayfield and pasture. Of the agricultural land 343,000 ha were drained, and 2,600 ha were irrigated. The major drainage projects are on the Tsyri, the Melnytsia, and the Turiiia rivers. The cultivated land was devoted mostly (41.7 percent) to grain crops (rye, wheat, barley, buckwheat), followed by fodder crops (36.1 percent), industrial crops (sugar beets and flax, 9.3 percent), and potatoes and vegetables (12.9). Animal husbandry produced 49.8 percent of the farm output. It is concentrated on beef- and dairy-cattle raising and hog farming. Sheep and poultry are raised also.

Transportation. In 1986 there were 621 km of rail track in the oblast. The main lines running through the oblast are Kiev–Kovel–Brest, Kovel–Lutske–Lviv, Kiev–Zdolbuniv–Lutske, and Kovel–Lublin. The largest junction is Kovel. The highway network consists of 5,800 km of road, of which 4,600 km are paved. The major highways are Kiev–Rivne–Lutske–Kovel–Brest, Kiev–Korosten–Kovel–Kholm, Kovel–Novovolynske–Lviv, and Lutske–Lviv. The Styr River is navigable and feeds into the Dnieper-Buh Canal system. Lutske serves as a river port. It also has an airport.

(For the history of the oblast see *Volhynia.)

Pryroda Volyns'koï oblasti (Lviv 1975)

Volhynia Research Society (Russian: Obshchestvo issledovatelei Volyni). A regional studies society in Zhytomyr from 1900 to 1917. Its chairman was the governor of Volhynia gubernia, M. Melnikov. The vice-chairman was P. *Tutkovsky. Members of the society's council were O. *Fotytsky, V. *Kravchenko, V. Dvernytsky, Yu. Shulikov, A. Księżopolski, N. Bellonin, R. Renning, and T. Zakusylo. The treasurer was A. Brzozowska. The society published the serial *Trudy* (13 vols, 1902–15), containing studies of Volhynia's geography, geology (mainly by Tutkovsky), natural environment, ethnography, and history. In 1902 it established what is now the *Zhytomyr Regional Studies Museum. Part of the society's library is preserved at the ANU Central Scientific Library in Kiev.

Volhynia vicegerency. An administrative unit established in 1793 after Russia's annexation of Volhynia from Poland. The vicegerency consisted of the entire Volhynia voivodeship and the southern portion of Kiev voivodeship. Until 1795 its capital was Iziaslav; hence, it was known as Iziaslav vicegerency. Then the capital was moved to Novohrad-Volynskiy, and the vicegerency was renamed. When the vicegerencies were replaced by gubernias in 1797, the largest part of the territory was included in Volhynia gubernia. Only Radomyshl county was transferred to Kiev gubernia.

Volhynia voivodeship. An administrative territory of the Polish Commonwealth in the 16th to 18th centuries. The voivodeship was formed after the Union of Lublin (1569) and divided into Lutske, Volodymyr, and Kremianets counties. Its capital was Lutske. Most of the land in the province was owned by either Polish or Polonized Ukrainian magnates, such as the Ostrozky, Wiśniowiecki, Zasławski, Lubomirski, and Sanguszko families. The peasants and townsfolk took part in B. Khmelnytsky's uprising in 1648 and the haidamaka rebellions of the 18th century. After the partition of Poland in 1793, the territory was annexed by Russia. In the interwar period (1919–39) the territory was again under Polish control and was called a voivodeship. When Western Ukraine was annexed by the USSR in 1939, the voivodeship was divided into Volhynia and Rivne oblasts.

Volhynia-Kholm Upland. The most northwesterly section of the Volhynian Upland region. With a length of approx 200 km and a width of 80 km, the formation has an average elevation of 220–250 m and rises to 342 m at its

highest point. It slopes downward from its southern to its northern reaches. The upland contains a number of plateaus, which are dissected by the Buh, the Styr, and the Horyn rivers as well as their tributaries and lie on top of Cretaceous deposits. In its western reaches the deposits sit on top of the carboniferous Lviv-Volhynia Coal Basin. Karst landscape formations are found in the region; the natural vegetation is generally of a broadleaf forest variety.

Volhynian Chronicle. See Galician-Volhynian Chronicle.

Volhynian dialects. See South Volhynian dialects.

Volhynian Regional Studies Museum (Volynskiy kraieznavchyi muzei). A museum founded in Lutske in 1929 on the basis of local archeological and ethnographic collections. During the Second World War its entire holdings were either plundered or destroyed. After the war the museum was rebuilt. In the mid-1970s over 47,000 exhibit items were held in its natural science, pre-Soviet history, Soviet history, atheism, and art sections. The Partisan Glory Memorial Complex in Lobna (Liubeshiv raion), the Partisan Glory Museum in Kivertsi raion, and the Volodymyr-Volynskiy Historical Museum are also sections of the museum, and the Lesia Ukrainka Literary Memorial Museum in Kolodiazhne (Kovel raion, est 1949) is a branch. A guide to the museum was published in 1967, and guides to the Lesia Ukrainka museum appeared in 1969, 1971, 1976, and 1984.

Volhynian Ukrainian Alliance (Volynske ukrainske obiednannia). A pro-government political party in Polish-ruled western Volhynia in the 1930s. It was set up by Ukrainian émigrés from central and eastern Ukraine with the help of the Polish voivode H. Józewski. Its candidates, who ran on the list of the Polish Nonparty Bloc of Co-operation with the Government, won some seats in the Polish Sejm and Senate, where they formed a faction separate from the Ukrainian Parliamentary Representation. For its loyalty to Poland the alliance looked to gain some concessions from the government, particularly in church and cultural affairs, but it had little success. The alliance had little influence among the local Ukrainian population. The presidents of the party were P. Pevny and (from 1935) S. Tymoshenko. The chief activists included M. Bury, M. Volkov, O. Kovalevsky, and S.(M.) Skrypnyk. The party published *Ukrains'ka nyva* and (from 1936) *Volyns'ke slovo*.

Volhynian Ukrainian Music and Drama Theater (Volynskiy ukrainskyi muzychno-dramatychnyi teatr im. T. Shevchenka). A theater established in 1940 in Lutske. Its repertoire has consisted mostly of Ukrainian and Russian classical and Soviet plays. Since 1978 its artistic director has been Ye. Olshevsky.

Volhynians (*volyniany*). An East Slavic tribe that inhabited Volhynia, northeastern Galicia, and the Buh River basin from the prehistoric period. According to some scholars, the tribe was known at one time as the *Dulibians. In the 9th and 10th centuries the Volhynians came under Kievan Rus', and thereafter they were gradually integrated into the Ukrainian nation.

Volhynia-Podilia Plate (also 'Platform'). A Precambrian geological formation underlying the Volhynia-Kholm and Podilian uplands. With a crystalline foundation of up to almost 200 m in its western reaches, the plate has several layers of subsequent sedimentary deposits and contains coal and basalt.

The Volhynia-Podilia Upland

Volhynia-Podilia Upland. A name used to designate a series of uplands in the Dnieper's right-bank region. They include the Podolian and Volhynia-Kholm uplands, the Roztochia, and the Pokutian-Bessarabian and Dnieper uplands.

Volia. A cultural-educational society sponsored by the Ukrainian Social Democratic party (USDP) of Galicia in 1903-24. Volia was formed in an attempt by the USDP to counter the Polonization of Ukrainian workers. The first (and central) branch was established in Lviv, and by 1909 there were branches in eight other Galician and Bukovynian centers. Early in 1924 the Polish government outlawed the group. The longtime leader of Volia was P. *Buniak.

Volia (Freedom). A voluntary organization in Lviv of Ukrainian domestic and security workers for the defense of their professional interests. It was active from 1932 to 1944, with a brief interruption during the first Soviet occupation of Galicia in 1939-41. In 1939 it had 1,500 members. The president of Volia was I. Zhminkovsky.

Volia (Freedom). A semimonthly organ of the *Ukrainian Social Democratic party, published in Lviv in 1900-4 and 1905-7 by M. Hankevych. Edited by Hankevych (to 1905), V. Levynsky (to 1906), A. Zelib (1903), and S. Vityk (1906-7), the paper advocated co-operation between Ukrainian and Polish socialists. Volia was succeeded by **Zemlia i volia*.

Volia (Freedom). A political weekly published in Vienna from June 1919 to November 1921; the last three issues appeared as *Volia Ukrainy*. Edited by V. Mursky, Z. Adelsberger, L. Shopak, and V. Pisiachevsky (pseud: A. Horlenko), Volia reported extensively on political developments in Ukraine and is a good source of information on the last years of the struggle for Ukrainian independence. It also covered Ukrainian émigré affairs and Western policies toward Ukraine, and published excerpts from

German, French, and British papers; reviews; and a chronology of events.

Volia naroda (Will of the People). A weekly newspaper published by Galician Russophile socialists in Lviv in 1921–8. It succeeded the newspaper **Prikarpatskaia Rus'* and initially used a Russified etymological orthography. After the final defeat of the Whites, *Volia naroda* supported Soviet rule in Ukraine. Gradually, probably on orders from the Comintern, the newspaper was Ukrainized in an attempt to appeal to Ukrainian socialists in Galicia. In 1923 it appeared twice a week in Russian and once in Ukrainian, and from 1924 it appeared only in Ukrainian. From 1926 it was the organ of **Sel-Rob*. It criticized both Ukrainian nationalists and Russophile conservatives who opposed the USSR, but it did not support the Soviet Ukrainization policy. The editors were K. Pelekhaty and K. Valnytsky.

Volian, Vasyl [Voljan, Vasył'], b 1832 in Nynovychi, Sokal county, Galicia, d October 1899 in Vienna. Physician and Bukovynian civic leader. A resident of Chernivtsi from 1866, he was a populist who eventually joined the Russophile camp. In 1890 he was elected to both the Bukovynian Diet and the Austrian parliament. His support of the Rumanian faction in the diet from 1898 turned the Ukrainian public against him. In his will he left his fortune to the Ukrainian tradesmen of Chernivtsi.

Volianske Lake [Voljans'ke ozero]. II–5. A lake situated in the northern part of Volhynia oblast near the Belarusian border. The lake, 4–6 m deep, is 2.5 km long and an average of 1.6 km wide, with an area of 4.05 sq km. It is connected by canals with both the Prypiat River and the Dnieper-Buh Canal.

Rev Ivan Voliansky

Voliansky, Ivan [Voljans'kyj] (Wolansky), b 1857 in Yabluniv, Husiatyn county, Galicia, d 1926 in Dychkiv, Ternopil county. The first Ukrainian Greek Catholic priest in the United States. He was sent to the United States in 1884 by Metropolitan S. Sembratovych at the request of the Ukrainian community in Shenandoah, Pennsylvania. There he established the first Ukrainian Greek Catholic parish and built a church. He also organized a branch of the Brotherhood of St Michael; a church choir; a reading room; a school; and a printing house, where he began publishing the newspaper **Ameryka* in August 1886. In 1889 he returned to Galicia, and in 1896–8 he did mission-

ary work among Ukrainians in Brazil. In 1917–20 he was a missionary in the Kholm region. Although he had intended to return to the United States after the war, doing so did not prove feasible, and he remained as the pastor of Dychkiv.

Voliansky, Ivan [Voljans'kyj], b 1887, d 1950s in Argentina. Lawyer and political leader in Galicia. A lawyer in Stanyslaviv, he was active in the Ukrainian community. For many years he served as president of the county branch of the Ridna Shkola society and director of a branch of the Land Mortgage Bank. From 1933 he headed the Ukrainian Catholic People's party, and in 1935–9 he was its representative in the Polish Sejm.

Voliansky, Oleh [Voljans'kyj] (Wolansky), b 15 April 1914 in Kolomyia, Galicia. Psychiatrist. A graduate of Poznań University (MD, 1939), he emigrated to the United States in 1950. He worked as a psychiatrist in state hospitals and schools in New York, was an active member of the Ukrainian Medical Association of North America (president in 1971–2), and contributed regularly to *Likars'kyi visnyk* and *Svoboda*.

Voliansky, Pavlo [Volians'kyj], b 27 January 1888 in Otynia, Tovmach county, Galicia, d 30 June 1944 in Poznań. Pedagogue and community activist. He graduated from Chernivtsi University in 1913, having specialized in the Ukrainian and German languages. From 1916 he taught at the **Peremyshl* State Gymnasium and played an active role in local Ukrainian musical and theatrical circles. He was forced into retirement in 1937 by the Polish authorities, ostensibly for medical reasons. In 1939 he moved to Poznań to work in the university library. During the war he sheltered and assisted numerous Western Ukrainian intellectuals who had fled the Soviet occupation of their homeland.

Volk, Ihor, b 12 April 1937 in Zmiiv, Kharkiv oblast. Pilot and cosmonaut. He studied in Kirovohrad, Moscow, and Ordzhonikidze. He was a member of the Soviet cosmonaut group from 1978, and was on the flight of the Soiuz T-12 spacecraft (17–29 July 1984) which successfully docked with Saliut-7 and Soiuz T-11.

Volkhovsky, Feliks [Volxovs'kyj], b 15 March 1846 in Poltava, Poltava gubernia, d 3 August 1914 in London. Revolutionary populist and writer. After graduating from the Richelieu Lyceum in Odessa (1863) he audited law courses at Moscow University and joined the Ukrainian Student Hromada in Moscow. In 1867, after the hromada had been investigated and banned by the authorities, he founded the Ruble Society. The society was to hire itinerant teachers to spread literacy in rural areas and collect ethnographic, historical, and economic data. In 1875 Volkhovsky wrote in Ukrainian a populist propagandist brochure for the peasantry printed by O. Terletsy in Vienna. Volkhovsky was often detained for investigation (1866, 1868, 1869–71, and 1874–8) and was finally exiled to Siberia. He escaped in 1889 and made his way to London, where he wrote revolutionary pamphlets and edited the monthly *Free Russia*. He corresponded with M. Drahomanov, M. Pavlyk, I. Franko, M. Vovchok, Lesia Ukrainka, who translated one of his pamphlets into Ukrainian,

and M. Kotsiubynsky, whose *Tini zabutykh predkiv* (Shadows of Forgotten Ancestors) Volkhovsky translated into Russian (1912).

Volkhv. A pagan priest in pre-Christian Rus'. *Volkhvy* were believed to possess mystical powers, particularly the ability to predict the future. The first literary reference to a *volkhv* occurs in the Primary Chronicle under the year 912; there, the priest-soothsayer predicts Prince Oleh's death. With the adoption of Christianity the pagan priests came under persecution and sometimes tried to channel social discontent against the church.

Dmytro Volkov

Mykola Volkovych

Volkov, Dmytro (Dmitrii), b 3 July 1925 in Leningrad. Theoretical physicist; AN URSS (now ANU) corresponding member since 1976 and full member since 1988. A graduate of Kharkiv University (1952), in 1956 he joined the ANU Physical-Technical Institute in Kharkiv, where he is now head of the theoretical physics department. Most of Volkov's research deals with the quantum electrodynamical basis for the phenomenology of fundamental particles and their interactions. He has done pioneering work in the new fields of supersymmetry and superspace, and has contributed significantly toward a unified theory of fundamental interactions.

Volkov, Fedir. See Vovk, Fedir.

Volkov, Sergei, b 16 November 1935 in Moscow. Chemist; AN URSS (now ANU) corresponding member since 1978. After graduating from the Moscow Chemical-Technological Institute in 1959 he joined the ANU Institute of General and Inorganic Chemistry. His research has dealt with high-temperature inorganic chemistry, especially with inorganic and co-ordination compounds in ionic or molecular melts and in the gas phase; gas transport reactions involving co-ordination compounds; and the quantum chemistry of inorganic compounds. He has contributed to the furthering of chemical processes by means of laser beams.

Volkovych, Ioanykii [Volkovyč, Joanykij]. Seventeenth-century Lviv priest and lecturer at the Lviv Dormition Brotherhood School. He was the author of a passion play titled *Rozmyshlian'ie o muts'ie Khrysta Spasytel'ia nasheho* (Reflections on the Sufferings of Christ Our Saviour,

1631). Written in verse as a dialogue, it is one of the earliest examples of dramatic literature in the Ukrainian language.

Volkovych, Mykola [Volkovyč], b 8 December 1858 in Horodnia, Chernihiv gubernia, d 11 July 1928 in Kiev. Surgeon; full member of the VUAN in 1928. A graduate of Kiev University (1882), he was a professor there (1903–22) and head of the medical research department of the Kiev division of the Chief Science Administration of the People's Commissariat of Education (1922–8). A pioneer of modern surgery in Ukraine, he founded the Kiev Surgical Society (1908), established a school of surgeons, invented special instruments for treating fractures, introduced an osteoplastic operation for tibiofibular joint tuberculosis and plastic closure of a vesicovaginal fistula, performed a laminectomy (1894) and intracapsular resection of a knee joint (1896), and designed an incision for appendectomy (1898) and the tyre for shoulder joint immobilization (Volkovych tyre, 1908). He wrote numerous works on the surgical treatment of rhinoscleroma, gallstones, appendicitis, bone and joint injuries, and throat cancer.

Volksdeutsche. In Nazi terminology Germans who resided outside German territory. Under the provisions of the Nazi-Soviet pacts of 18 September 1939 and 5 September 1940 Germany was granted the right of repatriation of Germans who lived in the Western Ukrainian territories that had been incorporated into the Ukrainian SSR. Over 250,000 of them moved. A number of Ukrainians (about 10,000) who were able to convince the resettling committees of their mixed parentage, or who presented some other claim, left with the Volksdeutsche. Once in Germany the Ukrainians were housed in temporary camps. Some of them took German citizenship, but most remained active in Ukrainian circles in the Generalgouvernement. Some Poles who resettled as Volksdeutsche worked in the German administration in Ukrainian territory, where they displayed anti-Ukrainian attitudes. In time the administrative positions of the German occupation were handed over to actual Volksdeutsche.

Volleyball (*vidbyvanka, sittkivka, voleibol*). In the 1920s volleyball quickly became one of the most popular sports in Ukraine. In 1927, 64 teams competed for the championship of the Ukrainian SSR. A year later the Ukrainian team captured first place at the first All-Union Spartakiad. In 1948 the USSR Volleyball Federation (est 1932) joined the International Volleyball Federation. Today over 1 million people in Ukraine play volleyball. The European Cup-Winners' Cup was captured by the Odessa women's team Burevisnyk in 1961, the Luhanske men's team Zirka in 1973, and the Luhanske women's team Iskra in 1976. Ukrainian volleyball teams took first place at the Spartakiads of the Peoples of the USSR in 1956, 1967, and 1975. Ukrainian players were also part of the men's volleyball teams that won Olympic gold medals in 1964, 1968, and 1980.

In interwar Galicia the Ukrainian Sports Union conducted national volleyball competitions every year. Abroad, the *Ukrainian Sports Federation of the USA and Canada has staged annual competitions since 1957. In 1975 the Ukraina (Toronto) men's volleyball team won the Canadian national championship.

Volnenko, Anatolii, b 21 November 1902 in Kharkiv, d 21 August 1965 in Kiev. Scenery designer. He studied at the Kharkiv Art Institute (1921–9, pupil of S. Prokhorov and O. Khvostenko-Khvostov) and then worked in the Kharkiv Theater of Opera and Ballet (1925–35), in theaters in Russia (1936–50), and in the Kiev Theater of Opera and Ballet (from 1951). He also illustrated the journal *Chervonyi perets*.

Vol'noe slovo (Free Word). A political newspaper published by Russian democratic émigrés in Geneva from August 1881 to April 1883. It advocated political freedom and constitutionalism in the Russian Empire. Because it also denounced radical socialism and the terrorism practiced by Russian revolutionary groups, some historians believe that it was actually supported by the Russian government or individuals close to it. *Vol'noe slovo* was initially edited by A. Malshinsky. He was closely assisted by M. *Drahomanov, who submitted articles on the Ukrainian question and other topics, and became the editor in 1883. Under Drahomanov's editorship *Vol'noe slovo* stressed federalist and socialist ideals. The paper ceased publication because of a lack of funds.

Volnovakha [Volnovaxa]. VI-18, DB IV-2. A city (1989 pop 25,300) and a raion center in Donetsk oblast. It originated in 1881 as a railroad settlement during the construction of the Olenivka–Mariupol branch line and developed into a major railway junction. In 1938 it was granted city status. Its main industry is railway transportation, which its metalworking and building-materials industries serve.

Volobuiev, Mykhailo [Volobujev, Myxajlo], b 24 January 1900 in Mykolaiv, Kherson gubernia, d 1932. Economist of Russian origin. A lecturer at the Kharkiv Tekhnikum of the National Economy, he published a major article, 'Do problemy ukrains'koi ekonomiky' (On the Problem of the Ukrainian Economy), in *Bil'shovyk Ukrainy* (1928, nos 1–2), the main theoretical journal of the CC CP(B)U. Rejecting the view that the Russian Empire was a unified economic system, he argued that Ukraine should be studied as a separate national-economic entity with its own path of development, and that its separateness should be respected under the Soviet regime. He defended Ukraine's right to control its economic development and its national budget. Volobuiev showed how central control of the economy combined with Russian chauvinism resulted in exploitation of Ukraine. His arguments gained wide support in Ukraine but were attacked vehemently by Party authorities as 'bourgeois nationalist' and anti-Soviet. He was forced to recant his ideas in a letter to *Komunist* (1928) and in a two-part article in *Bil'shovyk Ukrainy* (1930) titled 'Proty ekonomichnoi platformy natsionalizmu (Do krytyky volobuiivshchyny)' (Against the Economic Platform of Nationalism [Toward a Criticism of Volobuievism]). He was arrested eventually and perished in the Soviet terror of the 1930s.

Volobuiev, Yevhen [Volobujev, Jevhen], b 30 July 1912 in Varvarivka, Vovchanske county, Kharkiv gubernia. Painter. In 1940 he graduated from the Kiev State Art Institute, where he studied under F. Krychevsky. He painted landscapes and genre paintings, such as *At Noon* (1947), *Springtime* (1949), *Morning* (1954), *On an Animal*

Farm (1957), *On the Dnieper* (1960), and *First Greenery* (1975).

Volochinnia. A ceremonial visit on Easter Monday paid to relatives, friends, priests, midwives, and other community figures by young people. The visitors brought greetings and presents of small Easter breads (*kolachi*) and Easter eggs and sang ritual carol-like songs known as *ryndziivky. This originally pagan custom was opposed by the church and was gradually eliminated. Some remnants of it survived in Yavoriv county in Galicia until the end of the 19th century.

Volochyske or **Volochyska** [Voločys'ke or Voločy-s'ka]. IV-7. A city (1989 pop 23,600) on the Zbruch River and a raion center in Khmelnytskyi oblast. It was first mentioned in historical documents in 1463, as the settlement of Volochyshche. The current name goes back to 1545. From 1569 to 1793 it was under Polish rule, and then, under Russian rule. A border town, it was a crossing point between the Russian and Austrian empires and, in the interwar period, between the USSR and Poland. In November 1920 it was a battleground between UNR and Bolshevik forces. In 1970 it was granted city status. Today the city has a metalworks, canning factories, and a sugar refinery.

Volodar Rostyslavych [Rostyslavyč], b ?, d 19 March 1124. Rus' prince; son of Rostyslav Volodymyrovych. Volodar and Davyd Ihorevych of Volhynia invaded Tmutarokan on 18 May 1081 and ruled there until they were ousted by Oleh Sviatoslavych in 1083. Volodar and his brothers, Vasylo and Riuryk, ruled Halych principality from ca 1084. He was granted the rule of Peremyshl by Vsevolod Yaroslavych after Riuryk died (1092). He and Vasylo defeated the Kievan prince, *Sviatopolk II Iziaslavych, in 1097 and the Hungarians in 1099 in a critical battle near Peremyshl. They formed an alliance with Byzantium and the Cumans, which was cemented in 1104 by the marriage of Volodar's daughter, Iryna, to the son of the Byzantine emperor Alexis Comnenus.

Volodarka. IV-10. A town smt (1988 pop 7,300) on the Ros River and a raion center in Kiev oblast. It was first mentioned in historical documents, as Volodarev, in 1150. There are several kurhans from the Kievan Rus' era in the vicinity. It has a cheese and a brick factory.

Volodarske [Volodars'ke]. VI-18. A town smt (1988 pop 9,600) on the Kalets River and a raion center in Donetsk oblast. It originated in the early 19th century as the *khutir* of Y. *Hladky, named after the otaman of the Azov Cossacks. In 1855 the name was changed to Nikolske, and in 1924, to Volodarske. The village was granted smt status in 1965. It has several food-processing enterprises and a regional museum.

Volodarske-Volynske [Volodars'ke-Volyns'ke]. III-9. A town smt (1988 pop 8,200) on the Irsha River and a raion center in Zhytomyr oblast. It was first mentioned in historical documents in 1545, as Oleksandropil. Later it was called Horoshky (1607–1912), Kutuzove (1912–21), and Volodarske (1921–7). For two centuries (1569–1793) it was under Polish rule. In 1683–99 the village was visited by S. Palii's and Z. Iskra's Cossack detachments, who stirred up

resistance to the Polish landowners. In 1793 Horoshky was annexed by the Russian Empire and granted to M. Kutuzov. In 1924 the village was given smt status. Until the 1930s there were many German colonies in its vicinity. Today it is a mining center for granite, quartz, labradorite, and topaz. The town has a mineralogical museum.

Volodava (Polish: Włodawa). II-4. A town (1989 pop 15,000) on the Buh River and a county center in Chełm voivodeship, Poland. It has a 17th-century castle which belonged to the Potii family. On the eve of the Second World War approx 27 percent of the county's population was Ukrainian, 30 percent **kalakut*, 33 percent Polish, and 10 percent Jewish. After the war all the Ukrainians were forcibly resettled.

Volodkovych, Fylyp [Volodkovyč], b 6 June 1697 in Navasëlki, near Vilnius, d 2 February 1778 in Uman. Uniate bishop. He joined the Basilian order and studied theology at the papal seminary in Braunsberg. He was superior of the monastery and school in Volodymyr-Volynskiy and then hegumen of a monastery in Lublin. In 1730 he became archimandrite of the Dubno and Derman monasteries, and in 1731 he was consecrated bishop of Kholm and Belz. In 1755 he was appointed coadjutor to Metropolitan F. Hrebnytsky despite opposition from the Polish nobility. He became bishop of Volodymyr-Volynskiy the next year, and in 1762 he succeeded Hrebnytsky as metropolitan of Kiev and titular archimandrite of the Kievan Cave Monastery, although he remained in Volodymyr-Volynskiy. During his tenure as metropolitan, Catherine II of Russia actively sought to destroy the Uniate church throughout Right-Bank Ukraine. Volodkovych also faced opposition from the haidamakas and went into hiding during the Koliivshchyna revolt.

Volodymyr, son of Algirdas (Volodymyr Olhievych), b ?, d 1394. Prince of the Gediminas dynasty. He ruled from 1362 as the first Lithuanian prince of Kiev. During his reign he was compelled to recognize the suzerainty of the Tatar khan, and his coins bore a Tatar seal. When Kiev was taken by Vytautas, Volodymyr was replaced by Skirgaila, and fled to Moscow. He returned to Lithuania ca 1398, went into Vytautas's service, and was granted a small holding in Belarus.

Volodymyr Andriiovych [Andriiovyč], b ?, d 28 January 1170. Rus' prince; son of Andrii Volodymyrovych the Good. In 1146 he received towns in the Volodymyr principality from his uncle, Viacheslav Volodymyrovych, but he was ousted by Iziaslav Mstyslavych shortly thereafter. In the subsequent struggles for Kiev with Yurii Dolgorukii of Suzdal, Volodymyr shifted loyalties and was granted Dorohobuzh, Peresopnytsia, and lands up to the Horyn River by Yurii (1157). In 1159 he supported Rostyslav Mstyslavych's bid to rule Kiev. In 1169 (after Rostyslav's death) he intended to take the Kievan throne, and he blocked Mstyslav Iziaslavych by joining Andrei Bogoliubskii's coalition, which plundered Kiev in 1169. In retaliation Mstyslav waged a campaign through Volodymyr's territories and elevated his son, Volodymyr (Mstyslavych), to rule after Volodymyr died.

Volodymyr Davydovych [Davydovyč], b ?, d 12 May 1151. Rus' prince; elder son of Davyd Sviatoslavych. He received lands in the Siversk principality from his cousin, Vsevolod Olhovych, in 1127. After helping Vsevolod take the Kievan throne in 1139, he was granted the Chernihiv principality, which he ruled until his death. In 1142 Vsevolod also gave Volodymyr and his brother, Iziaslav, several towns, including Dorohychyn. When Iziaslav Mstyslavych became grand prince of Kiev in 1146, tensions between the Olhovych and Monomakh princely families continued to rise. In 1148 Iziaslav surrounded Chernihiv and ravaged a large part of the principality. Volodymyr then joined Yurii Dolgorukii of Suzdal in his fight against Iziaslav. Volodymyr was killed in battle near the Ruta River.

Volodymyr Ihorevych [Ihorevyč], b 8 October 1171, d 1212. Rus' prince; son of Ihor Sviatoslavych. The Hypatian Chronicle mentions him as ruler of Putyvel in 1185. He was taken prisoner during his father's campaign against the Cumans, and escaped to Siversk after two years of captivity. After the death of Roman Mstyslavych in 1205, Volodymyr was chosen by Galician boyars to rule the Principality of Galicia, to which he lay claim through his mother, Yevfrosyniia, the sister of the last Rostyslavych ruler in Galicia, Volodymyr Yaroslavych. Galician boyars and his brother, Roman of Zvenyhorod, organized a Hungarian-backed revolt against Volodymyr in 1207 (or 1209), and he escaped to Putyvel. An attempt to retake Galicia resulted in his being ousted by Danylo Romanovych (1211).

A hryvnia minted during the reign of Volodymyr Monomakh

Volodymyr Monomakh [Monomax] (Volodymyr I Vsevolodovych), b 1053, d 19 May 1125 in Kiev. Grand prince of Kiev (1113–25); son of *Vsevolod Yaroslavych. He was named Monomakh after his mother, who was the daughter of the Byzantine emperor Constantine Monomachos (some 20th-century historians dispute the relation, alleging that Soviet scholars invented it for their own purposes). While his father was alive, Volodymyr ruled the Smolensk (from 1067) and Chernihiv (1078–94) principalities, led 13 successful military campaigns in his father's name, and participated in diplomatic missions. He became prince of Pereiaslav in 1094. After the death of Sviatopolk II Iziaslavych and the Kiev Uprising of 1113, he ascended to the Kievan throne.

Volodymyr was one of the outstanding statesmen of the medieval period in Ukraine. He sought to strengthen the unity of Rus' and the central authority of the Kievan prince. He struggled against the deterioration of dynastic solidarity in Kiev and attempted to unite the princes

against the Polovtsian (Cuman) threat. He initiated the *Liubech congress of princes (1097), at which the order of succession (*rota* system) was radically reformed, and he organized the congresses of princes in Vytychiv (1100) and Dolobske (1103), at which joint campaigns against the Polovtsians were agreed upon.

During his tenure in Kiev, Volodymyr introduced a number of legal and economic reforms. He called a meeting to address the social problems which had caused the Kiev uprising of 1113, and issued *Volodymyr Monomakh's Statute (which was added to **Ruskaia Pravda*). The reforms, including the limitation of interest on loans and the abolition of servitude as a method of debt payment, brought about radical improvements to terms of credit in Rus'. Volodymyr was also the author of **Poucheniie ditiam* (Instruction to [My] Children, ca 1117), which was entered into the Laurentian Chronicle along with a letter he wrote to Oleh Sviatoslavych, the prince of Chernihiv. His *Poucheniie* was a didactic and autobiographical work of high literary quality, in which he condemned the internecine struggles of princes and promoted the idea of a unified state. The narrative voice of the testament is that of a courageous warrior and a wise and judicious ruler.

Volodymyr married *Gytha, the daughter of the English king Harold II, and founded the Kievan, Smolensk, and Suzdal lines of the *Riurykide dynasty. In 1966 *Debrett's Peerage, Baronage, Knightage, and Companionage* published the statement that Queen Elizabeth II was descended from Volodymyr Monomakh. He was the last prince of Rus' to preside over a unified state. He is buried in the St Sophia Cathedral in Kiev.

Volodymyr Monomakh's Statute (*Ustav Volodymyra Monomakha*). A legal code drafted by Prince Volodymyr Monomakh, representatives of the boyars, and several officials during the *Kiev Uprising of 1113. It contained several concessions to the burghers and lower estates of the city, made to appease the rebellious commoners. It regulated and improved the status of the *zakupy, thereby restricting the power of the boyars. It banned usury (limiting interest rates to 25 percent per annum) and prohibited the enslavement of an indebted merchant whose indebtedness was accidental. It also defined the status of *kholopy. The text of the statute, composed of 69 articles, is contained in the expanded version of **Ruskaia Pravda*. It was an important source for criminal, civil, and procedural law in Kievan Rus'.

Volodymyr Mstyslavych [Mstyslavyč], b 1132, d 30 May 1171 in Kiev. Rus' prince; son of Mstyslav I Volodymyrovych. He supported his brother Iziaslav Mstyslavych as prince of Kiev in 1146-54, and was granted in return the Osterskyi Horodets (now Oster) lands in 1147 and Dorohobuzh in 1153. After his brother Sviatopolk died in 1154, Volodymyr ruled in Volodymyr-Volynskiy,

but he was chased out by his nephew, Mstyslav Iziaslavych. He ruled in Slutske, Riazan, and, again, Dorohobuzh before being proposed by Rostyslavych dynasty members as grand prince of Kiev in 1171. He held that position for only four months before his death.

Volodymyr Riurykovich [Rjurykovyč], b 1187, d ca 1239. Rus' prince; son of Riuryk Rostyslavych. He ruled in Pereiaslav (1206) and Smolensk (1215), and he became grand prince of Kiev in 1223. His reign was threatened in 1235 by the invasion of Mykhail Vsevolodovych of Chernihiv and Iziaslav Volodymyrovych, which he repelled with the aid of Danylo Romanovych of Galicia. He was captured by the Cumans in 1235 as the struggle for Kiev continued, and in 1236, after his freedom was purchased, he deposed Yaroslav Vsevolodovych and returned to the Kievan throne.

A silver coin minted during the reign of Volodymyr the Great

Volodymyr the Great (Valdamar, Volodimer, Vladimir), b ca 956, d 15 July 1015 in Vyshhorod, near Kiev. Grand prince of Kiev from 980; son of *Sviatoslav I Ihorovych and *Malusha; half-brother of *Yaropolk I Sviatoslavych and *Oleh Sviatoslavych; and father of 11 princes by five wives, including *Sviatopolk I, *Yaroslav the Wise, *Mstyslav Volodymyrovych, and *Saints Borys and *Hlib Volodymyrovych. In 969 Grand Prince Sviatoslav I named his son Volodymyr the prince of Novgorod, where the latter ruled under the guidance of his uncle, *Dobrynia. In 977 a struggle for power broke out among Sviatoslav's sons. Yaropolk I, who was then the grand prince of Kiev, seized the Derevlianian land and Novgorod, thereby forcing Volodymyr to flee to Scandinavia. In 980 Volodymyr returned to Rus' with a Varangian force, expelled Yaropolk's governors from Novgorod, and took Polatsk after a battle in which Prince Rogvolod of Polatsk was slain. Volodymyr took Rogvolod's daughter, *Rohnida, as his wife. Later that year he captured Kiev and had Yaropolk murdered, thereby becoming the grand prince, and married Yaropolk's Greek widow.

Over the next 35 years Volodymyr expanded the borders of *Kievan Rus' and turned it into one of the most powerful states in Eastern Europe. After taking the *Cher-

ven towns and Peremyshl from Poland (981) and waging successful wars against the *Viaticians (981–2) and *Radimichians (984) he united the remaining East Slavic tribes, divided his realm into lands, and installed his sons or viceroys to govern them, dispense princely justice, and collect tribute. In 983 Volodymyr waged war against the *Yatvingians and thereby gained access to the Baltic Sea. In 985 he defeated the *Khazars and *Volga Bulgars and secured his state's eastern frontier. Volodymyr devoted considerable attention to defending his southern borders against the nomadic *Pechenegs and *Chorni Klobuky. He had lines of fortifications built along the Irpin, the Stuhna, the Trubizh, and the Sula rivers and founded fortified towns (eg, Vasyliv, Voin, and Bilhorod) that were joined by earthen ramparts.

Volodymyr attributed his victory over Yaropolk to the support he received from pagan forces, and had idols of the deities Perun, Khors, Dazhboh, Stryboh, Simarhl, and Mokosh erected on a hill overlooking his palace in Kiev. Later he became convinced that a monotheistic religion would consolidate his power, as Christianity and Islam had done for neighboring rulers. His choice was determined after the Byzantine emperor Basil II turned to him for help in defeating his rival, Bardas Phocas. Volodymyr offered military aid only if he was allowed to marry Basil's sister, Anna, and Basil agreed to the marriage only after Volodymyr promised to convert himself and his subjects to Christianity. Volodymyr, his family, and his closest associates were baptized in December 987, when he took the Christian name Vasylii (Basil). Soon afterward he ordered the destruction of all pagan idols. The mass baptism of the citizens of Kiev took place on 1 August 988 (see *Christianization of Ukraine), and the remaining population of Rus' was slowly converted, sometimes by force. In 988 Volodymyr sent several thousand warriors to help Basil regain power and married Anna, and in 989 he besieged Chersonese Taurica, took it from Bardas Phocas, and returned it to Basil.

The Christianization of Rus' was essentially engineered by Byzantium. Byzantium supplied the first hierarchs and other missionary clergy in Rus' and introduced Byzantine art, education, and literature there. During Volodymyr's reign the first schools and churches were built, notably the Church of the *Tithes in Kiev. The adoption of Christianity as the official religion facilitated the unification of the Rus' tribes and the establishment of foreign dynastic, political, cultural, religious, and commercial relations, particularly with the *Byzantine Empire, *Bulgaria, and *Germany. Relations with Poland improved after Volodymyr's son Sviatopolk I married the daughter of Prince Boleslaw I the Brave in 992. Volodymyr received papal emissaries in 986, 988, 991, 992, and 1000 and sent his own envoys to Rome in 993 and 1001.

After Anna's death in 1011, Volodymyr married the daughter of Count Kuno von Enningen. Toward the end of his life his sons Sviatopolk of Turiv and Yaroslav of Novgorod challenged his rule. Having defeated Sviatopolk, Volodymyr died while preparing a campaign against Yaroslav and was buried in the Church of the Tithes. He was succeeded briefly by Sviatopolk.

The Rus' clergy venerated Volodymyr because of his support of the church, but he was canonized only after 1240. Thereafter he was referred to as 'the holy, equal to the Apostles, grand prince of Kiev.' The oldest extant mention of him as St Volodymyr is found in the Hypatian

Chronicle under the year 1254, and his feast day, 28 July (15 July OS), was first celebrated in 1263.

Volodymyr Vasylykovich [Vasyl'kovyč], b ?, d 10 October 1289 in Luboml. Rus' prince; son of Vasylo Romanovych. He was prince of Volhynia from 1270 or 1272, described in the Galician-Volhynian Chronicle as a 'great bibliophile and philosopher' who built towns, castles, and churches, promoted ecclesiastical art and literature, and compiled a large library. During his rule Volhynia enjoyed a period of prosperity and expansion into Belarussian territories, as well as the acquisition of Mazovia. Volodymyr refrained from the political intrigues undertaken by his cousin, the Galician prince Lev Danylovych, although he was forced to repulse several incursions by Lithuanian princes in the 1270s and to provide auxiliary support for Tatar incursions into Poland in 1280, 1283, and 1287. In 1288 he turned over his authority to his cousin, Mstyslav Danylovych. The Galician-Volhynian Chronicle ends with Volodymyr's death.

Volodymyr Yaroslavych [Jaroslavyč], b 1151, d ca 1199. Rus' prince; son of Yaroslav Osmomysl of Halych and Olga, the daughter of Yuri Dolgorukii. After Yaroslav's death in 1187, Volodymyr received the Peremyshl land. He forced his stepbrother, Oleh, out of Halych and claimed the Galician throne in 1188. He was ousted by the boyars, who wished to invite Roman Mstyslavych of Volhynia to rule, and sought refuge in Hungary. The Hungarian king Béla III imprisoned Volodymyr and sent his own son, Andrew, to govern Galicia. Volodymyr escaped in 1189 and returned to Galicia with the assistance of King Frederick Barbarossa. The boyars and the local population welcomed his return and incited a popular revolt. Volodymyr regained his authority and ruled as the last of the Rostyslavych dynasty in the Principality of Galicia-Volhynia. He maintained friendly relations with Riuryk Rostyslavych of Kiev and Vsevolod Sviatoslavych of Suzdal.

Volodymyrets [Volodymyrec']. II-7. A town smt (1988 pop 8,000) and raion center in Rivne oblast. It was first mentioned in historical documents in 1570, when it belonged to the Czartoryski family of Polish magnates. After the partition of Poland in 1793, it was annexed by Russia and assigned to Lutske county in Volhynia gubernia. In the interwar period Volodymyrets was occupied by Poland. In 1943 a company of the Ukrainian Insurgent Army under Lt I. Perehiiniak operated in the vicinity and fought the Germans. Today the town has a starch and syrup factory, a flax-processing plant, and a dairy. There is a historical museum and a park dating back to 1827.

Volodymyrivka. A multi-occupational site along the tributary of the Boh near Volodymyrivka, Novoarkhanhelske raion, Kirovohrad oblast. Excavated in the 1930s and

1940s by S. Magura, T. Passek, among others, the site yielded eight Paleolithic occupations and a large Trypilian settlement. The artifacts uncovered included many fine pottery pieces, earthenware figures of women, models of homes, bones of wild and domestic animals, and various flint, horn, and bone items. The excavation of the entire Trypilian settlement, the only Trypilian site to be totally excavated, uncovered the remains of some 200 structures arranged into five concentric circles. The immense size of the site, in which all structures appear to have been used contemporaneously, suggests that the larger Trypilian sites may have served as proto-urban centers.

Volodymyrko (Volodymyr Volodarovych), b 1104, d February 1153. Rus' prince; son of Volodar Rostyslavych and father of Yaroslav Osmomysl. He became prince of Zvenyhorod and Belz in 1124 and then began a campaign to bring all the lands in Galicia under his control. He attempted to wrest Peremyshl from his brother, Rostyslav, in 1125–6 but did not succeed. In 1141, after his cousin, Ihor (Ivan) Vasytkovych, died, Volodymyrko established Halych as the capital of his principality, but he faced incursions by Poles (1142) and Bulgars (1144) as well as an uprising of his subjects (1144). He captured Pryluk in 1146 and successfully defended it and Zvenyhorod against Vsevolod Olhovych. Looking to expand his holdings further, in 1149 he sided with Yurii Dolgorukii of Suzdal against Iziaslav Mstyslavych of Kiev. The alliance resulted in attacks on Galicia by Iziaslav's ally, King Géza of Hungary, which lasted until 1152, when Volodymyr managed to establish peace with the king through diplomacy and bribes.

Volodymyrsky, Adriian [Volodymyrs'kyj, Adrijan], b 16 April 1875 in Lypovets, Kiev gubernia, d 18 January 1936 in Rostov-na-Donu, RSFSR. Specialist in congenital diseases. A graduate of Kiev University (1900), he conducted research on the development and education of children with physical and psychological handicaps. In 1917 he lectured at the Pedagogical Academy in Kiev, and in the 1920s he served as a professor at the Kiev Medical Institute and the Kiev Institute of People's Education. His publications dealt with reflexology and educational hygiene.

Volodymyr-Volynskiy [Volodymyr-Volyns'kyj]. III-5. A city (1989 pop 40,900) on the Luha River and a raion center in Volhynia oblast. One of Ukraine's oldest cities, it is first mentioned in the chronicles under the year 988, as the fortified trading town of Volodymyr and the seat of an eparchy. In the 12th century it was the center of a principality, and in 1199 it became part of the Principality of Galicia-Volhynia. Frequent Tatar attacks (1240, 1260, 1491, and 1500) brought about its decline. In the late 14th century it came under Lithuanian rule, and in 1431 it obtained the rights of *Magdeburg law. From 1569 the town belonged to the Polish Commonwealth. Prince K. Ostrozky set up a school there in 1577, and a Basilian college operated there in the 18th century. In 1795 the town was annexed by the Russian Empire. It was renamed Volodymyr-Volynskiy, and served as a county center in Volhynia gubernia. During the First World War the Ukrainian Sich Riflemen opened the first Ukrainian school there, in 1916, and the Graycoats division was stationed there, in 1918. In the spring of 1919 the town was captured by the Polish army. In the interwar period Volodymyr-Volynskiy was a

Volodymyr-Volynskiy, with the Dormition Cathedral (1160) and its campanile (1494) in the foreground

county center under Polish rule. In 1943–6, units of the Ukrainian Insurgent Army operated in the surrounding forests. Today the city is an industrial and communications center. It has a sugar refinery, canning plant, winery, dairy-products plant, sewing factory, flax-processing plant, and furniture factory. Its chief architectural monuments are the remains of the 12th- to 13th-century fortifications, the foundations of 10th- to 14th-century residential buildings, the Dormition Cathedral (1160, restored at the end of the 19th century), St Basil's Church (13th–14th century), and the Renaissance bishops' palaces (16th century). Hermit cells and an old monastery complex have been preserved in nearby *Zymne.

Volodymyr-Volynskiy eparchy. One of the oldest eparchies of the Ukrainian church and by tradition second in importance only to the eparchy of Kiev. The first mention of an eparchy with its see in Volodymyr-Volynskiy and comprising much of the territory of the principality of Volodymyr-Volynskiy dates from 992. The first known bishop was Stefan. At various times the eparchy included much of the territory of Right-Bank Ukraine and Belarus. In 1596 the bishop of Volodymyr-Volynskiy, I. *Potii, joined the Uniate church. Although Orthodox forces continued to struggle for control of the eparchy and even had Y. Kurtsevych consecrated as Orthodox bishop of Volodymyr in 1620, the eparchy remained Uniate until the end of the 18th century. Prominent Uniate bishops in that period included L. Zalensky (1679–1708), L. Kishka (1711–28), and P. Volodkovych (1758–78). With the partitions of Poland the territory of the eparchy came under Russian rule. The Uniate church was soon destroyed there, and the new Orthodox eparchy of Volhynia, comprising the territory of Volhynia gubernia, was established, with its see in Zhytomyr.

Volodymyr-Volynskiy principality. A principality of medieval Rus', covering the upper and middle reaches of the Buh River and the tributaries of the Prypiat. It was formed in the 10th century out of territories inhabited by the Volhynians. Vsevolod, the son of Volodymyr Sviatoslavych, was its first ruler. The Liubech congress of

princes in 1097 awarded the principality to Davyd Ihorevych, and the Vytychiv congress of princes in 1100 overturned that decision in favor of Sviatopolk II Iziaslavych. Volodymyr Monomakh seized the territory and placed it under his son, Andrii (1118–34). Then it was ruled by Iziaslav Mstyslavych for two decades (1134–54). After his death the principality was divided among his sons, and became independent of Kiev. Volodymyr-Volynskyi principality reached its apex under Roman Mstyslavych (1170–1205), who strengthened the power of the prince over the boyars and merged the principality with Halych principality in 1199, thereby creating the Principality of *Galicia-Volhynia.

Volodyslav Kormylchych [Kormyl'čyč], b and d ? 12th- to 13th-century Galician boyar. He opposed the establishment of a central leadership in Galicia. Roman Mstyslavych banished him from Galicia, but when he died in 1205 Volodyslav returned and began inciting the boyars to strengthen their hold on power. Roman's sons were forced to flee to Hungary, and the sons of Ihor Sviatoslavych were invited to rule as nominal figureheads. After they were ousted in 1211, Volodyslav himself made an attempt to take over (1213), but the Hungarian king Andrew invaded Galicia and placed his own son, Kálmán, on the throne. Volodyslav was taken to Hungary (1214), where he died.

Voloka. See Weights and measures.

Voloka land reform. A *land reform introduced in 1557 in Ukrainian and Belarusian territories, during the rule of the Polish king Sigismund II Augustus, through laws known as *ustavy na voloky*. It had been initiated by Sigismund I in the early 16th century, and continued into the early 17th century. It consisted of a redistribution, consolidation, and revaluation of state-owned, communal, and individual peasant lands and resulted in increased income for the state treasury. The reform established the first official land registry in the Polish-Lithuanian Commonwealth and aimed to standardize peasant landholdings and obligations. Free peasants received one *voloka* (33 *morgy*, or approx 20 ha) and bonded peasants (*otchychi*) received one-third of a *voloka*. *Putni* and *pantsyrni* boyars and starostas received two *voloky*. Noblemen were entitled to compensation (*odminy*) for reallocated land, but peasants were not. In addition parcels of approx 20 *voloky* were set aside for export grain production. Initially the *voloka* land reform was implemented on state-owned lands; then it was carried out on aristocratic holdings. Peasants who participated in the new *land tenure system were subjected to new duties. It was opposed by them because it disrupted old forms of ownership and agricultural practice, and because it did away with communal land use (as in the *dvoryshche*) and their freedom of movement.

Picheta, V. *Agrarnaia reforma Sigizmundy-Avgusta v Litovsko-Russkom gosudarstve* (Moscow 1958)

A. Zhukovsky

Volokh, Omelian [Volox, Omeljan], b 1886 in Kalnybolotska *stanytsia*, Kuban, d November 1937 in Solovets Islands. Revolutionary military figure. He was an otaman commanding the Second Ukrainian Regiment (1917), the

Haidamaka Regiment (1918), and the Zaporozhian Corps and Haidamaka Brigade (1919). On 1 December 1919 he attempted an uprising against the Directory. Although it was unsuccessful, he made away with the treasury and went over to the Bolshevik side.

Volokh, Petro [Volox], b 1699 in Wallachia, d May 1768 in Kiev. Jeweler. He worked at the Kievan Cave Monastery. His most important work is the Royal Gate for the iconostasis of Kiev's St Sophia Cathedral, designed by S. Taranovsky and made by Volokh and I. Zavadovsky in 1747. The now nonexistent silver gate was carved with plant ornamentation and bas-reliefs of the Annunciation, Christ's Presentation at the Temple, the Evangelists, King David, and other biblical figures.

Volokh, S. See Prokopovych, Viacheslav.

Pavel Volokidin (self-portrait, oil, 1921)

Volokidin, Pavel, b 22 December 1877 in Arkharovo, Orel gubernia, Russia, d 16 March 1936 in Kiev. Painter. He studied at the Odessa Art School (1898–1905) under K. Kostandi and G. Ladyzhensky and at the St Petersburg Academy of Arts (1905–6). A member of the *Society of South Russian Artists in Odessa from 1910, he taught at the Odessa Art Institute (1918–34) and at the Kiev State Art Institute (1934–6). Volokidin painted expressive portraits and colorful landscapes and still lifes, including *Woman in a Black Dress* (1908–11), *Reflection in the Water* (1915), *Still Life with a Red Tray* (1927), *Peonies* (1928), portraits of I. Severyn (1919), Z. Haidai (1935), and O. Syrotenko (1935), several portraits of his wife, and *Woman in a Shawl* (1935). An album of his works was published in Moscow in 1981.

Volosenko, Pavlo, b 1876 in Tysmenytsia, Tovmach county, Galicia, d 27 April 1958 in Flushing, New York. Engineer and civic activist; corresponding member of the Shevchenko Scientific Society. As a student of mechanical engineering at the Lviv Polytechnic he was active in student organizations and took part in the student *secession of 1901. After completing his studies in Vienna, Zurich, and Lviv he worked on the staff of *Hromads'kyi holos*, the organ of the Ukrainian Radical party. In 1909 he moved to Kharkiv, where he set up his own office of sanitation technology. He joined the *Osnova* and *Prosvita* societies and was active in Ukrainian community life. During the First World War he was deported by the Russian authorities to Kazan. In 1918 he held an important post in the UNR Ministry of Highways. In 1922 he was elected president of the Society of Ukrainian Engineers in Lviv, and from 1926 he

managed his own sanitation and construction firm in that city. After emigrating to the United States following the Second World War, he wrote a number of memoirs.

Voloshchak, Andrii [Vološčak, Andrij] (pseud: Vasyl Boiko, Ivan Kos), b 31 August 1890 in Mshanets, Turka county, Galicia, d 6 August 1973 in Lviv. Poet. He studied at the Peremyshl gymnasium (1904–12) and at Lviv (1912–14, 1918–19) and Prague (1916–18) universities. He was blinded while in the Austrian army in 1914. His first poem appeared in *Dobra novyna* (Lviv) in 1909. In the interwar years he lived in Drohobych, Peremyshl, Staryi Sambir, and, from 1933, Lviv. In the 1930s he belonged to the writers' group Horno and contributed to *Vikna* and *Znannia*. His first collection, *U t'mi horiu* (In the Darkness I Burn), was published in 1934. Under Soviet rule (in 1941 and from 1946 on) he published over 10 poetry collections. Editions of his selected poems appeared in 1961, 1971, and 1974.

Voloshchak, Ostap (Evstakhii) [Vološčak], b 1 October 1835 in Yavoriv, Galicia, d 10 July 1918 in Vienna. Botanist; member of the Shevchenko Scientific Society from 1914 and of the Vienna and Cracow academies of science. A graduate in law and biology of Vienna University, he was a founding member of the *Sich student society of Vienna in 1868. From 1884 he was a professor of zoology and botany at the Lviv Polytechnical Institute. He researched the flora of the Carpathian Mountains, particularly the Eastern Carpathians and Pokutia.

Voloshenko, Inokentii [Vološenko, Inokentij] (pseud: Petro Vovk, Pavlov, Vishniakov), b 1848, d 1908 in Poltava. Revolutionary populist. He studied at Odessa University. In 1876 he spread revolutionary literature among the Kuban Cossacks. In 1879, as a member of V. *Osinsky's terrorist group in Kiev, he was arrested and sentenced to 10 years of hard labor in Siberia. He escaped in transit in 1880, was captured one month later, and had 11 years added to his sentence. After being transferred to the Peter and Paul Fortress in St Petersburg in 1882, he was returned to Siberia in 1884. From 1890 he lived in exile in Transbaikal oblast, and in 1906 he returned to Ukraine.

Voloshkevych, Heorhii [Vološkevyč, Heorhij], b 1 August 1911 in Zhytomyr, Volhynia gubernia. Metallurgist and specialist in welding technology. He studied in Kiev and since 1941 has worked at the Institute of Electric Welding of the AN URSR (now ANU). He has developed a number of new electric welding processes, including an electro-flux method of welding, and an extensive theoretical basis for studying such processes.

Voloshko, Yevhen [Vološko, Jevhen], b 16 March 1927 in Luhanske. Literary scholar and critic. A graduate of the Voroshylovhrad Pedagogical Institute (1951), he has been a candidate of sciences since 1968. He taught for 10 years in secondary schools in the Donbas and was a lecturer in Ukrainian literature at the Co-operative Institute and Higher Military-Political School in Donetsk. Since 1980 he has chaired the department of Ukrainian literature at Donetsk University. He has written, in Russian, four books on the literature and writers of the Donbas (1961, 1968, 1975, 1980), including Greek and Jewish writers and Ukrainian-Russian literary relations, and one book on the

birth and development of proletarian poetry in Ukraine (1966). He has also edited a collection of Ukrainian writings about the Russian writer M. Sholokhov (1985). In recent years he has studied the life and works of B. Lepky.

Rev Avhustyn Voloshyn

Voloshyn, Avhustyn [Vološyn], b 17 March 1874 in Kelechyh, Transcarpathia, d 1946 in a Soviet prison. Greek Catholic priest and leading cultural and political figure in Transcarpathia. A graduate of the Uzhhorod Theological Seminary and the Higher Pedagogical School in Budapest, he served as a professor (1900–17) at and director (1917–38) of the Uzhhorod Teachers' Seminary. He edited and published **Nauka* (1903–14), the only Ukrainian newspaper in Ukrainian lands under Hungarian rule, *Svoboda* (1922–38), and the annual *Misiatsoslov* (1901–21). In 1922 he helped found **Blahovistnyk*. His Hungarian-language practical grammar of the Little Russian (Ruthenian) Language (1907; repr 1920), which was awarded a prize by the Academy of Sciences in Budapest, defended the vernacular and the view that it was part of the Ukrainian language.

As a founding member of the Ruthenian People's Council in Uzhhorod and then president of the *Central Ruthenian People's Council Voloshyn played an important role in Transcarpathia's process of national self-determination in 1918–20. In 1919–20 he sat on the provisional autonomous executive of Subcarpathian Ruthenia. He was one of the founders and the president (1923–39) of the *Christian People's party. In 1925 he was elected as its candidate to the Czechoslovak parliament. At the same time he was a leading member of various cultural and economic institutions: president of the Pedagogical Society of Subcarpathian Ruthenia, an organizer of the Teachers' Hromada of Subcarpathian Ruthenia, honorary president of the Uzhhorod Prosvita society, and a founder of the Subcarpathian Bank and the Co-operative Union. His role in the building of the Carpatho-Ukrainian state was critical. On 26 October 1938 he was appointed premier of an autonomous government by the president of Czechoslovakia, and on 15 March 1939 the Diet of *Carpatho-Ukraine elected him president of an independent state. After the Hungarian invasion Voloshyn emigrated to Prague and devoted himself to research and teaching at the Ukrainian Free University. On 21 May 1945 he was arrested by the Soviet secret police and deported to the USSR, where he soon died in prison.

Voloshyn wrote a number of elementary- and secondary-school textbooks in grammar, physics, and chemistry (coauthor, M. Velyhorsky), readers, and pedagogical text-

books for teachers. Later, in Prague, he wrote a general survey of pedagogy in several volumes. He was the author of other books, such as *O pys'mennom iazytsi podkarpatskykh rusynov* (On the Literary Language of Subcarpathian Ruthenians, 1921), *Spomyny* (Recollections, 1923, 1959), and *Dvi politychni rozмовy* (Two Political Conversations, 1923). His contributions to belles lettres were signed with the pseudonym A. Verkhovynsky and include two populist plays, *Marusia Verkhovynka* (Marusia from the Highlands, 1931) and *Bez Boha ni do poroha* (Not Even a Start without God, 1935).

V. Markus

Voloshyn, Ivan [Vološyn], b 10 October 1905 in Kiev, d 15 August 1973 in Kiev. Writer. He began publishing in 1925 in Kiev periodicals. From 1928 on he wrote sketches for newspapers and worked as a graphic artist. He was also a researcher at the AN URSR (now ANU) Institute of Ukrainian Folklore (1938–42, 1945–51). Among his works are the prose collections *Sady tsvitut'* (The Orchards Are Blooming, 1950), *Samotsvity* (Gems, 1952), *Naddniprians'ki vysoty* (The Dnieper Heights, 1953), *Z moria narodnoho* (From the People's Sea, 1955), *Dni khudozhnyka* (Days of the Artist, 1958), *Ozero sered dibrovy* (The Lake amid the Grove, 1959), *Misiachne sriblo* (Lunar Silver, 1961), and *Sontse u rosi* (The Sun in Dew, 1964); and the novels *Khudozhnyky* (Artists, 1963) and *Sashko Roden'* (1966).

Mykhailo Voloshyn

Rostyslav Voloshyn

Voloshyn, Mykhailo [Vološyn, Myxajlo], b 1878, d 29 July 1943 in Lviv. Lawyer. In the 1930s he was a member of the Lviv Chamber of Advocates, and he acted for the defense in many political trials. He served on the Central Committee of the Ukrainian National Democratic Alliance (1925–39) and on the boards of several Ukrainian cooperatives. For many years he conducted the *Boian chorus in Lviv. During the German occupation he presided over the Lviv Chamber of Advocates.

Voloshyn, Rostyslav [Vološyn] (pseud.: A.S. Borysenko, Pavlenko), b 1911 in Volhynia gubernia, d 22 August 1944 in Drohobych oblast. Revolutionary and political leader. He was a founding member of the OUN and its organizer in Volhynia, and for his political activities he was imprisoned by the Polish authorities. During the German occupation he was one of the principal organizers of the UPA (1942–3) and a member of the OUN (Bandera faction)

Leadership (1943–4). In August 1943 he chaired the Third OUN Congress, in November 1943 the First Conference of the Captive Nations of Eastern Europe and Asia, and in July 1944 the First Congress of the *Ukrainian Supreme Liberation Council (UHVR). He was elected general secretary of internal affairs in the UHVR. He was killed in combat with NKVD troops.

Volosiansky, Ivan [Volosjans'kyj], b 1861 in Staryi Sambir, Sambir county, Galicia, d 19 April 1930 in Sokal, Galicia. Greek Catholic priest, cultural figure, and ethnographer. After graduating from the Greek Catholic Theological Seminary in Lviv, he was ordained in 1885 and served as pastor in various villages of Sambir county. He organized reading rooms, temperance societies, and rural schools. In politics he supported the populists and was a member of the National Democratic party. His main ethnographic interest was the life of tradesmen and guilds, and his studies appeared in *Zoria* from 1886. After being assigned to Krakovets parish in Yavoriv county in 1898, he organized and headed the local branch of the Prosvita society, helped to establish a Ukrainian gymnasium in Yavoriv, and campaigned for electoral reform in 1905–7.

Volost (Russian: *vlast*). In Old Ukrainian the term meant 'power' or 'government.' During the Princely era it was also used, like the earlier term *zemlia*, to refer to the princely state, especially in relation to the appanage principalities, and sometimes to its population. In the 11th to 13th centuries a *volost* was an administrative-territorial division consisting of several *hromady*, headed by a *volostel* or *starosta*. The *volost* center was usually called a *pryhorod*, headed by a *horodnychyi*.

As the medieval Ukrainian states disintegrated, the term fell out of use. In 1861 the *volost* (or *gmina*) was introduced by Alexander II in the Russian Empire as an administrative unit of rural self-government; it was composed of several village *hromady* and had limited administrative and judicial powers. The *volost* was governed by a board which included the *volost starshyna*, village starostas, tax collectors, and a scribe. The *volost* assembly, which included those officials plus deputies of the rural population (1 per 10 farmsteads), oversaw the elections of local officials, candidates to county *zemstvo* assemblies, and members of the *volost* court, which settled minor disputes. Under the Ukrainian national government in 1917–20, the *volost* was implemented as a secondary self-governing entity, between the *zemlia* and the *hromada*. *Volosti* continued to function under the Soviet regime until the administrative reform of 12 April 1923, when they were replaced by raions. The 1,989 *volosti* of the Ukrainian SSR were then reorganized into 706 raions.

A. Zhukovsky

Volost court. A rural court for peasants in the Russian Empire. *Volost* courts were established in 1861 with the emancipation of the serfs. Until then, justice was administered by the landowners. *Volost* courts were composed of a president and from 3 to 11 judges, all of whom were elected by *volost* assemblies for a one-year term. They handled disputes and litigations between peasants involving sums of less than 100 rubles, and punished minor offenders. They also had the authority to mete out corporal punishment. The *volost* courts were abolished in 1918.

Volove. See Mizhhiria.

Carpathian highlands in Volovets raion

Volovets [Volovec']. v-4. A town smt (1988 pop 6,200) on the Vicha River and a raion center in Transcarpathia oblast. It was first mentioned in historical documents in the 15th century, when it was under Hungarian rule. From the end of the 17th century the village belonged to Austria, and in the interwar period, to Czechoslovakia. In 1957 it was granted smt status. The town has a mineral-water bottling factory, a lumber mill, and a compression station on the Urengoi-Uzhhorod gas pipeline. The folk-art gallery and Plai tourist base attract visitors from outside the region to the town.

Volovyk, Hryhorii, b 29 May 1902 in Konotip, Chernihiv gubernia, d 7 July 1967 in Lviv. Stage director. He completed study at the Lysenko Music and Drama Institute (1923) and then worked as artistic director of the Chernihiv Ukrainian Music and Drama Theater (1926–41, with interruptions) and the Transcarpathian Ukrainian Music and Drama Theater in Uzhhorod (1948–53). He also staged plays in Kirovohrad, Vinnytsia, and other cities.

Volska, Frantsishka [Vol's'ka, Franciška] (née Lekhno-Vasiutynska), b 1863, d 1930. Community activist in Kiev. During the First World War she organized relief for Galician prisoners in Russian-ruled Ukraine, and in 1917 she founded the Hromada of Ukrainian Catholics. She published Ukrainian-language children's literature and edited the magazine *Voloshky* (1917).

Volsky, Serafym [Vol's'kyj], b 13 January 1911 in Svirneve, Balta county, Podilia gubernia. Historian. He graduated from Odessa University (1940), worked as a CP functionary (1940–53), and headed the Department of

CPSU History at the Odessa Institute of Naval Engineers (from 1953). He was an author in the collective work *Ukrains'ka RSR u Velykii vitchyzniansii viini Radians'koho Soiuzu 1941–1945 rr.* (The Ukrainian SSR in the Great Patriotic War of the Soviet Union of 1941–5, 1967).

Voluntary Society for Assistance to the Army, Air Force, and Navy (Dobrovlne tovarystvo spryannia armii, aviatsii i flotu; Russian: Dobrovolnoe obshchestvo sodeistviia armii, aviatsii i flotu, or DOSAAF). A mass organization in the USSR that promoted military knowledge and training among civilians, especially young people, under the guidance of the CPSU and Komsomol. Established in 1927 as the Society for the Promotion of Defense and Aviation and Chemical Construction, it was split in 1948 into three societies paralleling the three main branches of the armed forces, which were merged as the DOSAAF in 1951. The DOSAAF provided, through local clubs, paramilitary and civil-defense instruction, disseminated patriotic propaganda, and promoted military sports, such as flying, helicoptering, gliding, parachuting, driving, motorcycling, cross-country skiing, shooting, and the martial arts. In Ukraine the DOSAAF was headed by a CC usually chaired by a general. It published the weekly **Patriot Bat'kivshchyny*.

Volunteer Army. See Denikin, Anton.

Volunteer regiments (*okhotnytski polky*). Military units in Left-Bank Ukraine from the 1670s to 1770s, formed of volunteers who were paid, armed, and provisioned by the Hetmanate government. They were divided into infantry (see *Serdiuk regiments) and cavalry (see *Mercenary regiments). The volunteer regiments were not named after their territory, as the town regiments were, but after their commanders, as in Novytsky's, Maksymiv's, Yavorsky's, and Kozhukhovsky's regiments. They were not attached to a particular territory, and frequently changed the location of their headquarters. In general the number of Cossacks in volunteer regiments was lower than in town regiments. At the beginning of the 18th century the Hetmanate had seven volunteer regiments.

Volykivska, Iryna [Volykivs'ka] (real surname: Pidopyrhora), b 5 May 1902 in Zasullia, Romen county, Poltava gubernia, d 29 January 1979 in Odessa. Opera singer (dramatic soprano). She studied acting under P. Saksahansky and graduated from the Lysenko Music and Drama Institute (1928). She sang with opera companies in Kiev, Kharkiv, Tbilisi, Moscow, Alma-Ata, and Odessa (1929–30, 1936–41, 1944–57). Her repertoire included *Natalka* in M. Lysenko's *Natalka from Poltava*, *Odarka* in S. Hulak-Artemovsky's *Zaporozhian Cossack beyond the Danube*, *Myroslava* in B. Liatoshynsky's *Zolotyj obruch* (The Golden Ring), *Tatiana* in P. Tchaikovsky's *Eugene Onegin*, *Yaroslavna* in A. Borodin's *Prince Igor*, and *Aida* in G. Verdi's *Aida*.

Volyn (Volhynia). A publishing house founded in August 1941 in German-occupied Rivne by a former member of the Polish Sejm, S. Skrypnyk (now Patriarch Mstyslav). It was managed by O. Petliura and, from November 1941, the prominent publisher in interwar Lviv, I. Tyktor. Volyn published the nationalist weekly and then semiweekly

Volyn'

newspaper *Volyn'* (1941–4, 233 issues), edited by U. Samchuk and then Ye. Mysechko and P. Zinchenko, with the assistance of Ye. Lazor, R. Bzhesky, and V. Shtul; the monthly children's magazine *Orlenia* (1941–3), edited by P. Zinchenko; the farming journal *Ukrains'kyi khlivorob* (1942–3, 10 issues), edited by P. Kolisnyk; books that had been banned under Soviet rule; and anticommunist brochures. *Volyn'* was widely read in Volhynia, and its press-run grew from 20,000 in 1941 to 102,000 in 1942. Tyktor and many of *Volyn's* staff were imprisoned by the Gestapo in 1942–3; six of them (including Kolisnyk) were executed.

Volyn. See Volhynia.

Ananii Volynets

Stepan Volynets

Volynets, Ananii [Volyneč', Ananij], 1894–1939. Ukrainian partisan activist. An agronomist by profession, during the revolutionary period in Ukraine he commanded troops in Haisyn county, Podilia gubernia, and was an organizer of the Free Cossacks. He published the newspaper *Povstanets'* and participated in the 1919 uprising which overthrew the Hetman government and in the anti-Bolshevik *partisan movement in Ukraine until the end of 1920. Then he lived in western Volhynia. He was executed by the Soviet occupation forces.

Volynets, Ivan [Volyneč'], b 1896 in Peremyshl, Galicia, d 22 February 1956 in São Caetano do Sul, Brazil. Wrestler. In interwar Galicia he was a popular wrestler; he worked in the Lviv and Peremyshl regions as a coach for the Ukrainian Sports Union and organizer for the Luh society. A postwar refugee, he emigrated to Brazil, where he served as president of the Sobornist society in São Paulo, for which he acquired the first People's Home there.

Volynets, Stepan [Volyneč'], b 22 January 1895 in Lviv, d 10 April 1969 in Winnipeg. Journalist and civic and political leader. During the revolutionary period he fought in the ranks of the Ukrainian Sich Riflemen and in the UNR Army. In the 1920s he completed his education at the Lviv (Underground) Ukrainian University and Vienna University. He held high posts in the Communist Party of Western Ukraine. In 1928–30 he was a deputy to the Polish Sejm and secretary of its Sel-Rob caucus. His political sympathies later shifted, and from 1933 he was active in the Front of National Unity and its publications *Bat'kivshchyna*, *Ukrains'ki visti*, and *Peremoha*. During the Second World War he directed the Institute of Public Education under the Ukrainian Central Committee and sat on the Military Board of the Division Galizien. After leaving Ukraine in 1944, he edited the paper *Ukrains'ke slovo* in Blomberg, Germany. In 1949 he settled in Canada, and in 1957 he was appointed editor of **Ukrains'kyi holos*. He wrote *Peredvisnyky i tvortsi lystopadovoho zryvu* (The Precursors and Creators of the November Uprising, 1965).

Petro Volyniak

Volyniak, Petro [Volynjak] (pseud: Chechet), b 29 September 1907 in Korets, Novohrad-Volynskyi county, Volhynia gubernia, d 29 December 1969 in Toronto. Journalist, writer, and political figure. He made his debut as a writer in the early 1930s with stories in the Kiev journals *Zhyttia i revoliutsiia* and *Molodyi bil'shovyk*. He was arrested in the mid-1930s and sentenced to forced labor on the White Sea–Baltic Waterway. After his release in 1941, he returned to Ukraine. A postwar refugee, he founded the Novi Dni publishing house in Salzburg, Austria, which issued the daily *Ostanni novyny*, the weekly *Novi dni*, the literary monthly *Litavry*, and other periodicals and books, and wrote the story collections *Zemlia klyche* (The Land Beckons, 1947) and *Pid Kyzhurtom* (Beneath Kyzhurt, 1947), children's books and readers, and *Kuban': Zemlia ukrains'ka, kozacha* (Kuban: A Ukrainian, Cossack Land, 1948). In 1949 he emigrated to Canada. In Toronto he published and edited the monthly magazine **Novi dni* from 1950, was the deputy leader of the émigré *Ukrainian Revolutionary Democratic party, and published Ukrainian schoolbooks and belletristic works. A posthumous collection of his articles and stories appeared in 1975.

Volyns'ka nedilia. See *Nedilia*.

Volynsky, Petro [Volyns'kyj], b 13 February 1893 in Olyka, Lutske county, Volhynia gubernia, d 12 April 1982 in Kiev. Literary scholar and teacher. He graduated from

the Nizhen Historical Philological Institute (1916) and worked as a teacher. In the 1920s he lectured in Ukrainian literature at the Nizhen Institute of People's Education, and from 1929, at the Kiev Institute of People's Education and the Kiev Pedagogical Institute. He was made a professor in 1954, and headed the department of Ukrainian literature at the Kiev Pedagogical Institute (1947–76). He published studies of the history of Ukrainian literature of the 19th and early 20th centuries (especially the works of I. Kotliarevsky, T. Shevchenko, I. Franko, and Lesia Ukrainka). The following monographs have appeared: *Ivan Kotliarevskiy: Zhyttia i tvorchist'* (Ivan Kotliarevsky: Life and Works, 1951), *Teoretychna borot'ba v ukrains'kii literaturi: Persha polovyna XIX st.* (The Theoretical Struggle in Ukrainian Literature: The First Half of the 19th Century, 1959), and *Ukrains'kyi romantyzm u zv'iazku z rozvytkom romantyzmu v slov'ians'kykh literaturakh* (Ukrainian Romanticism in Relation to the Development of Romanticism in Slavic Literatures, 1963). He also published the textbooks *Istoriia ukrains'koi literatury* (The History of Ukrainian Literature, 3 vols, 1964–9) and *Osnovy teorii literatury* (The Fundamentals of the Theory of Literature, 1962), among others.

Volyntseve. A Slavic settlement of the 7th to 8th century near Volyntseve, Putyvl raion, Sumy oblast. Excavations in 1948, 1953, and 1965–6 uncovered the remains of 35 pit dwellings with hearths, three workshops, and three ritualistic burials of adolescents in grain storage pits at the settlement site. Excavations of the burial site revealed 19 earthenware cremation urns buried in plots without kurhans. Pottery fragments, knives, sickles, arrowheads, bronze and silver adornments, and items of daily use were also found.

Volyntsivske Reservoir [Volyncivs'ke vodoxovyšče]. A water reservoir on the Bulavynka River in Donetsk oblast. The reservoir has a surface area of 320 ha, a volume of 13.6 million cu m, and a usable volume (in dry years) of 8 million cu m. It was constructed in 1936 to regulate water supply for the city of Yenakiiëve. It was rebuilt in 1946 after the Second World War and then used for reserve water supply and irrigation after Yenakiiëve started obtaining its water through the Donets-Donbas Canal system. The banks of the reservoir have been seeded with trees to provide a shelterbelt.

Vonatovych, Varlaam [Vonatyvych] (Vanatovych, secular name: Vasyi), b ca 1675 in Jaroslaw, Galicia, d 17 January 1751 in the Tikhvin Monastery, near Novgorod, Russia. Orthodox church leader. After completing his theology training in Moscow he entered the service of the Russian Orthodox church and became archimandrite of the Tikhvin Monastery in 1719. Along with several other Ukrainian churchmen he participated in drawing up the reforms of the Russian church that culminated in the adoption of the *Dukhovnyi reglament* and the creation of the Holy Synod. In 1722 Vonatovych was named archbishop of Kiev and Halych. This appointment was a great blow to the Ukrainian church because it meant that the eparch of Kiev no longer had the dignity of metropolitan, and that his jurisdiction was limited to Right-Bank Ukraine and did not include the Ukrainian eparchies in the Hetmanate. Vonatovych continued to press for the re-

turn of the metropolitan's title and authority over the rest of the Ukrainian church province. He also attempted to maintain control over the Kievan Mohyla Academy and to prevent the secularization of Ukrainian monasteries. In 1730 he was arrested on trumped-up charges of treason by local Kievan authorities supported by T. *Prokopovych, and was defrocked and imprisoned in St Cyril's Monastery in Belozersk. After he was pardoned and released in 1740, he retired to the Tikhvin Monastery. A comprehensive biography of Vonatovych was published by A. Rybolovsky in *TKDA* (1908, nos 2–3).

Voritskyi Pass [Voric'kyj pereval] (aka Veretskyi or Tukholskyi pereval). v–4. A pass (elevation 841 m) in the High Beskyds situated on the watershed between the Stryi and the Liatorytsia rivers along the border between Lviv and Transcarpathia oblasts. An important historical road linking Mukachiv and Stryi runs through the pass.

Vorkuta. A city (1989 pop 116,000) situated north of the Arctic Circle on the Vorkuta River in the Komi AR, in northern Russia. It was founded in 1931 as a center of the Pechora Coal Basin and was granted city status in 1943. The region was developed mostly by penal labor from the nearby concentration camps filled with political prisoners and common criminals. Almost half the inmates were Ukrainians. After the Second World War many of the prisoners were Soviet soldiers who had been German POWs and nationalist resistance fighters from Western Ukraine. The prison population at this time was estimated at approx 90,000 (compared with 30,000 inhabitants of the city). At the end of the 1940s two clandestine organizations were formed in the camps, the Ukrainian Liberation Organization and the Ukrainian Cossack Front. When the release of political prisoners and improvements in camp regime introduced in 1954 were rescinded, the prisoners staged an uprising (1955). An account of life in the Vorkuta camps is provided in H. Kostiuk's memoirs *Okaianni roky* (The Accursed Years, 1978).

Vorobets, Toma [Vorobec'] (Thomas Worobec), b 1 July 1899 in Peremyshliany, Galicia, d 16 February 1986 in Chicago. As a volunteer to the Ukrainian Sich Riflemen he fought in defense of the Lviv citadel. After completing his medical studies at the Lviv (Underground) Ukrainian University and Prague University (MD, 1928) he practiced medicine in Terebovlia and founded the Ukrainian Hygienic Society there. He was director of the tuberculosis dispensary and the Ukrainian Red Cross in Lviv (1940–1), and a lecturer at the Lviv Medical Institute and director of its tuberculosis clinic (1941–4). He was president of the Ukrainian Medical Charitable Service in Germany (1945–8) and then emigrated to the United States, where he became head of the Department of Pulmonary Diseases at Veterans' Hospital in Downey, Illinois (1954). He wrote in English and Ukrainian on tuberculosis chemotherapy.

Vorobiov, Anatolii [Vorobjov, Anatolij], b 30 November 1900 in Mytrofanivka, near Salyhr, Perekop county, Tavriia gubernia, d 26 October 1955 in Kiev. Physiologist; corresponding member of the AN URSR (now ANU) from 1951. A graduate of the Kharkiv Medical Institute (1926), he taught at the Kharkiv Stomatology Institute (from 1936) and the Lviv Medical Institute (from 1945) and then

became director of the ANU Institute of Physiology (1952). His research mainly concerned the physiology of digestion and nerve function.

Vorobiov, Mykola [Vorobjov], b 12 October 1941 in Melnykivka, Smila raion, Cherkasy oblast. Poet of the **shestydesiatnyky* generation. He began publishing in Soviet periodicals in 1962. In 1970 the publication of his first collection was canceled by Soviet censors for political reasons, and he was blacklisted until 1984, when some of his poems appeared in *Ukraina*. A selection of his poems appeared in the émigré journals *Suchasnist'* (1971) and *Vyzvolnyi shliakh* (1972). He has published several collections of lyric poetry: *Pryhadai na dorohu meni* (Remind Me for the Road, 1985) and *Misiats' shypshyny* (Moon of the Wild Rose, 1986), *Obrii ozhyny* (The Horizon of a Blackberry, 1987), *Prohulianka odyntsem* (A Walk Alone, 1990), and a volume of selected poems, *Verkhovnyi holos* (The Supreme Voice, 1991). He has also published verses for children, *Luhova krynychka* (A Meadow Well, 1987) and *Zeleni traviani zaichyky* (Green Grass Bunnies, 1991). A selection of his poetry appeared in Toronto in 1992 in a bilingual Ukrainian-English edition, *Misiats' shypshyny/Wild Dog Rose Moon*.

Volodymyr Vorobiov

Hryhorii Vorobkevych

Vorobiov, Volodymyr [Vorobjov] (Vorohev, Vladimir), b 27 July 1876 in Odessa, d 31 October 1937 in Kharkiv. Anatomist; full member of the AN URSR (now ANU) from 1934. A graduate of Kharkiv University (1903), he served as a department chairman at the Kharkiv Women's Medical Institute (1910–17), Sofia University (1919–21), and the Kharkiv Medical Institute (1921–37) and as scientific director of the Ukrainian Institute of Experimental Medicine (1927–37). One of the pioneers of the functional approach to anatomy, he founded a large school of Soviet anatomists, investigated the innervation of organs, developed the macro-microscopic method of determining the anatomic structure of an organ, and embalmed V. Lenin. He wrote *Anatomiia liudyny* (Human Anatomy, vol 1, 1934) in Ukrainian and compiled the first Soviet *Atlas anatomii cheloveka* (Atlas of Human Anatomy, 5 vols, 1946–8). In 1936 his work was attacked by the Party, but later the USSR Academy of Medical Sciences created an anatomy award in his name. Monographs about him to mark the centenary of his birth appeared in 1976, by K.

Kulchytsky et al (in Ukrainian) and A. Novomynsky (in Russian).

Vorobkevych, Hryhorii [Vorobkevč, Hryhorij] (pseud: Naum Shram), b 10 January 1838 in Chernivtsi, d 24 November 1884 in Chernivtsi. Poet, priest, and community leader; brother of S. *Vorobkevych. He graduated from the Chernivtsi Orthodox Theological Seminary in 1860. He was ordained, and served as a pastor in Horoshivtsi (to 1867), Lviv (1867–70), and Toporivtsi (1881–4) and was also a spiritual adviser at the Chernivtsi seminary (from 1870), a catechist and teacher at the Chernivtsi Orthodox Realschule (from 1872), and an active member of the Ruska Besida and Ruska Rada societies in Chernivtsi. From 1868 on he published poems in Galician and Bukovynian periodicals (eg, *Pravda, Rodimy listok*). He wrote narrative poems about the B. Khmelnytsky era, such as 'Bohun,' 'Bohdan pido L'vovom' (Bohdan [Khmelnysky] at the Gates of Lviv), and 'Berestechko,' and patriotic and lyrical verse. He also translated from Russian into Ukrainian M. Kostomarov's study of B. Khmelnytsky. An edition of his poetry appeared in Chernivtsi in 1904.

Sydir Vorobkevych

Vorobkevych, Sydir [Vorobkevč] (Isydor; pseud: Danylo Mlaka, Demko, Demko Makoviichuk, Morozenko, Isydor V., S. Volokh, Semen Khryn), b 17 May 1836 in Chernivtsi, d 19 September 1903 in Chernivtsi. Writer, composer, and community figure in Bukovyna; honorary member of the Shevchenko Scientific Society. He was ordained after completing his studies at the Chernivtsi Orthodox Theological Seminary in 1861, and then served as a parish priest in Davydeny and Ruska Moldavytsia. He completed studies at the Vienna Conservatory in 1868 and returned to Chernivtsi to teach music and singing in the seminary. In 1875 he became a professor of theology at Chernivtsi University. From 1878 to 1884 he was president of the Ruska Besida society in Chernivtsi. Vorobkevych played an important role in the Ukrainian national revival in Bukovyna in the late 19th century through his literary and musical activity.

As a composer Vorobkevych was best known for his popular works, such as the operettas *Kaspar Rumpel'maier* (1874), *Zoloty mops* (The Golden Pug, 1879), and *Pani moloda z Bosnii* (The Bride from Bosnia, 1880). He also composed liturgical songs, music for psalms, choral pieces to words by T. Shevchenko, and original songs for solo voice. His writings on musical topics included a cycle of sketches of Ukrainian composers and textbooks on music theory and harmony.

Vorobkevych's literary work was published first in 1863, in B. Didytsky's *Halychanyn*, and later in *Pravda*, *Zoria*, *Bukovyna*, and numerous other periodicals. His sojourn in Kiev in 1874 greatly influenced his literary development. As a writer Vorobkevych was noted for his lyric poetry (over 1,000 works); poems in German; historical poems, such as 'Kyfor i Hanusia' (1868), 'Nechai' (1877), and 'Tymosh Khmel'nyts'kyi' (1885); and short stories and historical dramas, such as *Vasyl'ko Rostyslavych* (1882), *Petro Sahaidachnyi* (1884), and *Kochubei i Mazepa* (1891). He also wrote two volumes of sermons, *Nauka dlia naroda* (Teachings for the People) and *Nadhrbni propovidi* (Grave-side Sermons), and edited the Ukrainian section in the church periodical *Candela* in Chernivtsi. Collections of his works include *Tvory* (Works, 3 vols, 1909–21), *Tvory* (Works, 1986), and *Vybrani tvory* (Selected Works, 1987).

A. Zhukovsky

Vorokhta in 1920

Vorokhta [Voroxta]. v-5. A town smt (1988 pop 4,900) on the Prut River in Yaremche raion, Ivano-Frankivske oblast. It was founded in the 17th century and was granted smt status in 1960. Surrounded by coniferous and beech forests, the town is a popular tourist resort. It has sanatoriums for tuberculosis patients, a sports base, and a wooden church from the 18th century.

Vorona, Oleksander, b 25 May 1925 in Skadovske, Tavriia gubernia. Graphic artist and mural artist. He studied under O. Shatkivsky, V. Manastyrsky, and R. Selsky at the Lviv Institute of Applied and Decorative Arts (1948–51) and under V. Myronenko at the Kharkiv Art Institute (1951–4). He has designed political posters; stained-glass windows, such as *Native Land*, in the Building of Culture in Verhun, Cherkasy raion (1970, codesigner); large murals, such as *Revolution*, *Science*, *Victory*, and *Labor*, at Kiev University (1967, with A. Bazylevych and Yu. Ilchenko); and mosaics, such as *Science*, on the façade of the Zhytomyr Polytechnical Institute (1976).

Voronets, Petro [Voronec'], b 8 July 1871, d 27 October 1923. Mathematician and mechanician. After completing his studies at Kiev University in 1896, he taught there (professor from 1908). Voronets made contributions to differential equations, vector analysis, dynamics, analytic mechanics, and, in particular, nonholonomic mechanics. In 1909 he derived the equation of motion of nonholonomic systems in a form which included functions depending

Petro Voronets

only on time, generalized co-ordinates, and certain linear functions of generalized velocity. He obtained his famous equation through the generalization of the Hamilton-Ostrohradsky principle for nonholonomic systems and used it to solve a number of problems in mechanics and other fields.

Voronezh Massif. A tectonic formation in Voronezh and Kursk oblasts consisting of Precambrian crystalline rock that surfaces near the Don River between Pavlovsk and Bohuchar. It includes Devonian, Jurassic, Cretaceous, and Paleogene formations. The massif was separated from the Ukrainian Crystalline Shield in the Upper Devonian period by the appearance of the Dnieper-Donets Trough. It forms part of the Central Upland and is rich in iron-ore deposits.

Voronezh region. The northeastern region of *Slobidska Ukraine, which in the 19th and early 20th centuries constituted Voronezh gubernia and in 1934 was reorganized into Voronezh oblast of the Russian SFSR (68,400 sq km; 1939 pop 3,550,000). The southern part of the oblast, including the cities of Valuiky, Ostrohozke, Rozsosh, and Bohuchar, was in Ukrainian ethnographic territory (31,300 sq km). In 1926, 1,009,000 of the 1,450,000 inhabitants of that territory (69.6 percent) were Ukrainians. In 1954 the southwestern part of Voronezh oblast was transferred to the newly created Belgorod oblast; Voronezh oblast was left with 52,400 sq km (1985 pop 2,460,000), of which the Ukrainian ethnographic territory covered 16,000 sq km (1979 pop 135,200 Ukrainians).

Voroniaky [Voronjaky]. A section of the Holohory-Kremianets Ridge in the Podolian Upland that runs from east to west for approx 70 km from upper Zolochivka to the Ikva River in Lviv and Ternopil oblasts. With a prevailing elevation of 350–400 m, the formation drops off sharply in the northwest when it reaches Little Polisia. Its highest point is Vapniarka Hill (467 m). It is dissected by tributaries of the Buh, the Styr, and the Ikva rivers. Its plateaus are generally arable, and oak and beech forests are found along its ridges and ravines. Meadows and marshes are located along the banks of the rivers that run through the formation.

Voronin, Prokhor, b 3 July 1885 in Tsvizhyn, Vinnytsia county, Podilia gubernia, d 24 April 1940, Kiev. Writer. He was expelled from the Kamianets-Podilskyi Teachers' Seminary in 1904 for his involvement in a Ukrainian rev-

olutionary circle. From 1906 on he published stories under various pseudonyms in *Hromads'ka dumka*, *Rada* (1907–13), *Ukrains'ka khata* (1909–14), *Moloda Ukraïna* (1911), and *Dzvinok* (1912–13). The collections *Iak ia vyhrav u tovarysha vchytelia samovara* (How I Won from My Friend the Teacher's Samovar, 1909) and *Shchaslyvyi den' Flora* (Flor's Lucky Day, 1910) appeared separately. In the 1920s he lived in Kharkiv, belonged to the writers' group *Pluh, and contributed to periodicals for the peasantry. A large collection of his stories, *Na zazhynkakh* (At the Harvest), was published in 1927. He disappeared during the Stalinist terror.

St Michael's Church (1776) in Voronizh

Voronizh [Voronizh]. II-14. A town smt (1988 pop 9,700) on the Osota River in Shostka raion, Sumy oblast. The town mentioned in the chronicles under the year 1177 was destroyed. At the beginning of the 17th century a *khutir* arose on its site. It grew quickly; by 1654 it was a company town of Nizhen regiment. With the abolition of the Hetman state Voronizh became part of Hlukhiv county in Novhorod-Siverskyi vicegerency, then Little Russia gubernia (1796–1802), and then Chernihiv gubernia. Two sugar refineries were built in the 19th century. Today it produces sugar and mixed feed. Its 18th-century St Michael's Church is a tourist attraction.

Voronko, Platon [Voron'ko], b 1 December 1913 in Chernechchyna, Okhtyrka county, Kharkiv gubernia, d 10 August 1988 in Kiev. Poet and children's writer. A former Soviet partisan commander, after the Second World War he was an editor of *Dnipro*, the vice-chairman of the Writers' Union of Ukraine and vice-chairman of its Kiev branch, and a deputy to the Ukrainian Supreme Soviet (from 1980). From 1944 on he published over 30 collections of civic and lyric poetry and over 30 books of poems, tales, and plays for children. Much of his writing reflects

his love for and knowledge of Ukrainian folklore and folk songs. He was awarded the Stalin Prize in 1951, the Shevchenko Prize in 1972, and the Lesia Ukrainka Prize in 1976. Many articles and three books, by P. Serdiuk (1963), S. Rusakiiiev (1973), and L. Horlach (1973), have been written about him. An edition of his works in four volumes appeared in 1982–3.

Voronovych, Mykhailo [Voronovyč, Myxajlo], b ?, d 1918. State figure. A large landowner and former governor of Bessarabia, he was one of the key participants in the coup which put P. Skoropadsky in power on 29 April 1918, and president of the congress of the All-Ukrainian Union of Landowners at which the Hetman government was proclaimed. He served as an associate to the minister of internal affairs in F. Lyzohub's cabinet and as minister of information in the S. Gerbel government. He was killed in late 1918 during the uprising which toppled the Hetman government.

Voronovytsia [Voronovytsja]. IV-9. A town smt (1988 pop 6,900) in Vinnytsia raion, Vinnytsia oblast. It was first mentioned in a historical document in 1545. In 1956 it was granted smt status. The town has a canning plant, a sugar refinery, and brick, asphalt, and sewing factories. Its 18th-century palace and aviation and astronautics museum are tourist attractions.

Voronovytsia archeological sites. A group of Paleolithic sites along the Dniester River near Voronovytsia, Kelmentsi raion, Chernivtsi oblast. Excavations in 1951–3 revealed hearths, many flint pieces, and the bones of wild animals. The sites are best known for the discovery of the first Paleolithic dwellings in Ukraine.

Vorontsov, Danylo [Voroncov], b 23 December 1886 in Propoisk, Mahiliou gubernia, Belarus, d 12 July 1965 in Kiev. Physiologist; member of the AN URSS (now ANU) from 1957. After graduating from St Petersburg University (1912) he worked at the Moscow laboratories of M. Vvedensky (1912–16) and at Odessa University (1916–22). He taught at Smolensk University (1922–30), the Kazan (1930–5) and Kiev medical institutes (1935–41), and Kiev University (from 1944). He established and directed the electrophysiology laboratory at the ANU Institute of Physiology (1956). He wrote *Obshchaia elektrofiziologija* (General Electrophysiology, 1961) and cowrote *Fizicheskii elektroton nervov i myshts* (Physical Electrotonus of Nerves and Muscles, 1966).

Vorontsov, Mikhail [Voroncov, Mixail], b 30 May 1782 in St Petersburg, d 18 November 1856 in Odessa, Kherson gubernia. Russian statesman and military figure. He was raised in England (educated at Cambridge University) and possessed huge tracts of land in Cherkasy county and the Crimea. He attained the rank of major general in 1812 and commanded the Russian troops occupying France in 1815–18. He was governor-general of New Russia oblast (from 1823) and Bessarabia oblast (from 1828) until 1844. Although he opposed the revolutionary movement, he maintained an effective liberal bureaucratic structure. During his tenure the population of Odessa nearly doubled, agricultural development in Southern Ukraine increased dramatically, and a host of public institutions and civic societies were established in the region. In 1844–54

Prince Mikhail Vorontsov

Heorhii Vorony

Vorontsov was vicegerent of Caucasia. His grandiose palace at Alupka, in the Crimea, was turned into a museum. A. Rhinelander published a full account of his life and career in *Prince Michael Vorontsov: Viceroy to the Tsar* (1990).

Vorony, Heorhii [Voronyj, Heorhij] (also Yurii), b 28 April 1868 in Zhuravka, Pyriatyn county, Poltava gubernia, d 20 November 1908 in Warsaw. Mathematician; corresponding member of the St Petersburg Academy of Sciences from 1907. A graduate of St Petersburg University, he taught at the University of Warsaw from 1894. His fundamental works are devoted to the theory of numbers. His first major results were obtained in the theory of algebraic numbers, particularly in the theory of irrationalities of the third degree, where he made an exhaustive analysis of the problem concerning the basis of a cubic field and developed the necessary computational methods for determining the decomposition of various classes of real numbers. He also developed algorithms which provide a generalization of continuous fractions. In 1894–1908 he made significant contributions to the arithmetic theory of quadratic forms and the analytic theory of numbers. Together with H. Minkowski, Vorony is regarded as the founder of the geometric theory of numbers. Many of Vorony's ideas and his work were developed further by some members of D. Grave's Kiev school of algebra, such as B. Delone. Most of Vorony's work was not published during his lifetime and appeared only in 1952–3 in the three-volume complete collection of his writings. It is only recently that he has received the recognition he deserves.

W. Petryshyn

Vorony, Marko [Voronyj], b 5 March 1904 in Chernihiv, d 3 November 1937 in the Solovets Islands. Poet; son of M. *Vorony. In the mid-1920s he published his poems in *Literaturno-naukovyj vistnyk* in Lviv, under the pseudonym Marko Antiokh. Under the same name he later published verse in *Chervonyi shliakh*, *Zhyttia i revoliutsiia*, *Hlobus*, and other journals. Collections of his poetry include *Chervoni kravatky* (Red Ties, 1930) and *Forvard: Chotyry zoshyty virshiv* (Forward: Four Notebooks of Poetry, 1932). He was arrested in March 1935 and was sentenced to eight years' imprisonment in the Solovets Islands. On 9 October 1937 he was resented by an NKVD tribunal to death by firing squad.

Marko Vorony

Mykola Vorony (portrait by Mykhailo Zhuk, watercolor and pencil, 1917)

Vorony, Mykola [Voronyj] (pseud: Arlekin, Vishchy Oleh, Homo, Siriuk, Kondratovych, and others), b 7 December 1871 in Rostov-na-Donu, Don Cossack province, d 7 June 1938 in Odessa. Poet, journalist, and theater director. He studied at the Kharkiv and Rostov pedagogical institutes, but his studies were interrupted by his arrest for political activity. He remained under tsarist police surveillance for three years and then emigrated to study at Vienna and Lviv universities. He became director of the Ukrainian theater in Ternopil. In 1897 he returned to Russian-ruled Ukraine, acted in the troupes of M. Kropyvnytsky and P. Saksahansky, and joined the Revolutionary Ukrainian party. In 1901 he worked in the Chernihiv zemstvo administration and wrote drama criticism. After the February Revolution Vorony directed the National Theater in Kiev. In 1920–1 he was a senior attaché with the UNR government-in-exile in Warsaw, and then moved to Lviv, where he taught at the Lysenko Higher Institute of Music and its drama school. He emigrated to Soviet Ukraine in 1926, taught at the Kharkiv Music and Drama Institute, and worked as a screenwriter, critic, and translator in Kiev.

Vorony began writing poetry while he was still a student. He was one of the first Ukrainian modernists; his modernist manifesto of 1901 provoked a lively discussion. One of his most prominent opponents was S. Yefremov. Vorony consciously opposed the realist and folkloric poetry; he introduced the motifs of the city and a subjective mood and worked with a variety of strophes and meters. He was criticized, however, for his superficial 'cult of beauty' and for a paucity of themes and images. Collections of his verse include *Lirychni poezii* (Lyrical Poems, 1911), *V siaivi mrii* (In the Aura of Dreams, 1913), *Za Ukrainu* (For Ukraine, 1921), and *Poezii* (Poems, 1929). His works on theater include *Teatr i drama* (Theater and Drama, 1913, 1989) and *Dramatychna prima donna* (A Dramatic Prima Donna [a study of L. Linytska], 1924).

In 1934 Vorony was arrested by the NKVD and exiled for three years to Voronezh. From 1937 he lived in Hlyniane, now in Dobrovelychkivka raion, Kirovohrad oblast. He was rearrested there, and on 29 April 1938 he was sentenced to death by firing squad. After J. Stalin's death he was rehabilitated, and in 1959 a collection of his poetry, *Vybrani poezii* (Selected Poems), was published.

I. Koshelivets

Vorony, Yurii [Voronyj, Jurij], b 1895 in Poltava gubernia, d ? Surgeon; son of the mathematician H. *Vorony. In the 1920s he lectured at the Kharkiv Medical Institute and was a member of the editorial board of *Ukraïns'kyi medychnyi arkhiv*. Then he became a professor at the Kiev Medical Institute. His publications dealt with the influence of the nervous system on the development of tumors.

Voropai, Oleksa [Voropaj], b 9 November 1913 in Odesa, d 20 July 1989 in Leeds, England. Ethnographer and writer; member of the Ukrainian Academy of Arts and Sciences. A graduate in agronomy (1940), he emigrated to England after the Second World War and obtained doctoral degrees in Slavic ethnology (1957) and biology (1961) at the University of London. He published collections of Ukrainian folk songs (1952), Ukrainian folk riddles (1955), and calendric rituals – *Zvychai nashoho narodu* (The Customs of Our People, 2 vols, 1958, 1966). He wrote four books of recollections, beginning with *V dev'iatim kruzi* (1953; trans: *The Ninth Circle*, 1954), which deals with the famine of 1933.

Voroshilov, Kliment [Vorošilov], b 4 February 1881 in Verkhnie (now a part of Lysychanske), near Luhanske, Slovianoserbske county, Katerynoslav gubernia, d 2 December 1969 in Moscow. Soviet Russian political and military leader. In 1918 he commanded detachments of Red Army partisans recruited from miners of the Donets Basin. In November 1918 he was appointed people's commissar of internal affairs of the Ukrainian SSR and commander of the Kharkiv Military District. In May 1919 he suppressed N. Hryhoriiv's anti-Bolshevik uprising. After the imposition of Soviet rule he was the USSR people's commissar of military and naval affairs (from 1925) and of defense (from 1934), as well as marshal of the Soviet Union (from 1935). In 1942–3 he co-ordinated Soviet partisan activity on German-occupied territories in Ukraine and Belarus. He was a steadfast supporter of J. Stalin, a member of the Politburo of the CC CPSU (1926–60), vice-chairman of the Council of Ministers of the USSR (1946–53), and chairman of the Presidium of the Supreme Soviet of the USSR (1953–60). For his opposition to N. Khrushchev's policies he was removed from his post in 1960, along with other leading Stalinists. He was rehabilitated under L. Brezhnev, and the city of Luhanske, which had been called Voroshylovhrad in 1935–58, was again renamed Voroshylovhrad in 1970 (reinstated as Luhanske in 1990).

Vorozhba [Vorožba]. II-15. A city (1989 pop 8,900) on the Vyr River in Bilopillia raion, Sumy oblast. It was settled by peasants from Right-Bank Ukraine. It was first mentioned in a historical document in 1653. At the end of 1917 it was the staging point for the Bolshevik army that invaded Ukraine. It obtained city status in 1959. The city is a railway junction. Most of its inhabitants work in transportation. Its metalworking plants serve the needs of the railway industry.

The Vorskla River

Vorskla River (also Vorsklo). A left-bank tributary of the Dnieper River that flows for 452 km through Belgorod (RF), Sumy, and Poltava oblasts and drains a basin area of 14,700 sq km. The river valley in Ukraine ranges from 10 to 12 km in width. The right bank of the river is quite high and is marked by numerous gullies; the left bank is low-lying. The floodplain is covered with meadows, deciduous forest, and some marshland. The river itself contains numerous shoals and sandbars. The average discharge near its mouth is 36 cu m/sec. The Vorskla freezes over from early December to March and is used for water supply and irrigation. The major centers along the river include Poltava and Kobeliaky. The main tributaries are the Vorsklytsia and the Boromlia on the right and the Merlo, the Kolomak, and the Tahamlyk on the left.

Vorzal [Vorzel']. III-11. A town smt (1988 pop 9,100) under the jurisdiction of the Irpin municipal council in Kiev oblast. It was founded in 1900 and granted smt status in 1938. Surrounded by forests, Vorzel is a resort town. It has 7 sanatoriums, 4 of them for children, 5 rest homes, and 15 campsites.

Voskobiinyk, Mykhailo [Voskobijnyk, Myxajlo] (Voskobiynyk, Michael), b 21 November 1918 in Myrhorod, Poltava gubernia. Historian, journalist, and po-

Mykhailo Voskobiinyk

Marko Vovchok (portrait by Mykhailo Zhuk, lithograph, 1925)

litical activist; full member of the Shevchenko Scientific Society. A graduate of Kharkiv University (1941), he fled to Germany during the Second World War and then emigrated to the United States and completed his studies at Syracuse University (1964) and the University of Pennsylvania (PH D, 1972). He edited **Ukrains'ki visti* (1945–53) in Neu-Ulm. He taught history at Syracuse University (1958–64) and Central Connecticut State University (1966–87). He also served as president of the *Ukrainian Revolutionary Democratic party (1975–) and chairman of the council of the Ukrainian Democratic Alliance. In 1989 he became head of the *Ukrainian National Council.

Voskoboynykov, Mykhailo [Voskoboynykov, Myxajlo], b 28 April 1873 in Pavlovsk, Voronezh gubernia, Russia, d 1942. Zoologist. A graduate of Moscow University (1896), he worked with O. Severtsov at Tartu (1899–1903) and Kiev universities, where he specialized in the comparative anatomy of vertebrates and functional evolutionary morphology. He headed Kiev University's vertebrate zoology section (1917–42) and was founding director of the morphology section of the VUAN and AN URSR (now ANU) Institute of Zoology (1927–42).

Voskrekasenko, Serhii, b 19 October 1906 in Lazirtsi, Kaniv county, Kiev gubernia, d 16 May 1979 in Kiev. Poet and journalist. He began publishing in the Komsomol press in 1928. In the years 1931–76 he published 30 collections of poetry, much of it humorous and satirical. He also translated Soviet Russian and Belarusian poetry into Ukrainian. Posthumous editions of his works appeared in 1980 and 1984.

Votchal, Yevhen [Votčal, Jevhen], b 26 October 1864 in Borzna, Chernihiv gubernia, d 1 April 1937 in Kiev. Plant physiologist; full member of the VUAN and AN URSR (now ANU) from 1921. A graduate of Kazan University (1889), he was a professor at the Kiev Polytechnical Institute (1898–1932) and one of the organizers of the Scientific Institute of Selection (1922, later the All-Union Scientific Research Institute of Sugar Beets). Votchal studied transpiration in agricultural plants and the physiological principles underlying selection, and contributed to the development of the Soviet turpentine industry. He established the Ukrainian school of *plant physiology.

Vovcha River [Vovča]. A left-bank tributary of the Samara River that flows for 323 km through Donetsk and Dnipropetrovske oblasts and drains a basin area of 13,300 sq km. It has 19 tributaries that are over 10 km in length, most of which dry up in the summer months. The river is used for industry and irrigation. The city of Pavlohrad is situated on it.

Vovchak, Nestor [Vovčak] (Volchak), b 1903 in Ustie Ruske, Gorlice county, Galicia, d 11 June 1958 in Toronto. Lemko activist. After emigrating to Canada (1924) he became active in communist organizations and helped organize the first branch of the Lemko Association in Winnipeg (1929). Later, after moving to Toronto, he organized new branches of the association and supported the purchase of the Carpathian People's Home. He served as general secretary of the Carpatho-Ruthenian Society.

Vovchanske [Vovčans'ke]. III-17. A city (1989 pop 24,100) on the Vovcha River and a raion center in Kharkiv oblast. It was founded in 1674 as the Cossack *sloboda* of Vovchi Vody. In the 18th century its military significance declined, and it became a county administrative center. In 1780 it was granted city status, and in 1776 its name was changed from Vovcha to Vovchanske. In the middle of the 19th century the town had eight or nine fairs a year. The main commodities were cattle and sheep. In the second half of the century it developed as an industrial center. Today the city's factories produce building materials, asphalt, vegetable oil, cotton thread, and furniture.

Vovchok, Marko [Vovčok] (pseud of Mariia Vilinska), b 22 December 1834 in Ekaterininskoe, Orel gubernia, Russia, d 10 August 1907 in Nalchik, in Caucasia. Writer. In 1851 she married Opanas *Markovych, who had been a member of the Cyril and Methodius Brotherhood, and moved from Orel to Ukraine. From 1851 to 1858 she lived in Chernihiv, Kiev, and Nemyriv and studied the Ukrainian language and Ukrainian traditions and folklore and wrote *Narodni opovidannia* (Folk Stories), which was published in 1857. It met with immediate acclaim in Ukrainian literary circles, particularly from T. Shevchenko and P. Kulish, and in Russia (it was translated into Russian and edited by I. *Turgenev as *Ukrainskie narodnye rasskazy* [Ukrainian Folk Tales, 1859]). In 1859, after a short stay in St Petersburg, Vovchok moved to Germany. She spent some time in Switzerland, England, and Italy but stayed the longest in Paris. In 1862 a two-volume edition of *Narodni opovidannia* was published, and individual works were published in the journals *Osnova*, *Meta*, and *Vechnytsi*. From 1867 to 1878 Vovchok lived in St Petersburg, where owing to the prohibition against the Ukrainian language she wrote and translated for Russian journals. She wrote in Russian *Zhivaia dusha* (The Living Soul, 1868), *Zapiski prichetnika* (The Notes of a Participant, 1870), *V glushi* (In the Backwoods, 1875), and several other novels. From 1878 Vovchok lived in northern Caucasia, and in 1885–93 in Kiev gubernia, where she continued her work on Ukrainian folklore and a dictionary. At the beginning of the 1900s she renewed her contact with Ukrainian publishers.

Elements of realism appear mainly in her short stories about Ukrainian peasants living under serfdom and about the difficult plight of women. Other works continue the

tradition of ethnographic romanticism and are typified by strong characters and willful heroes. Also in that tradition are the children's stories 'Dev'iat' brativ i desiata sestrytsia Halia' (Nine Brothers and the Tenth Sister Halia, 1863), 'Karmeliuk' (1865), and 'Marusia' (1871), the last-named of which was popular for some time in France in the translation of P.J. *Stahl (*Maroussia, d'apres la légende de Marko Wovzog*, 1878). Vovchok's prose markedly influenced the development of the Ukrainian short story in the second half of the 19th century. Editions of Vovchok's works have been published in Ukrainian in Kiev in 7 vols (1964–7) and 3 vols (1975). Several books about Vovchok have been written by her grandson, B. Lobach-Zhukenko, and an edition of her *Ukrainian Folk Stories* (trans N. Pedan-Popil) was published in Saskatoon in 1983.

M. Hlobenko

Ivan Vovchuk

Gen Andrii Vovk

Vovchuk, Ivan [Vovčuk] (Wowchuk), b 12 September 1902 in Kharkiv, d 14 May 1979 in Pittsburgh. Journalist and political activist. After graduating in agronomy from Kharkiv University (1926) he worked as a research associate of the Kharkiv Plant Breeding Institute. In 1944 he was elected vice-president of the Ukrainian Supreme Liberation Council. As an émigré he was active in the Bandera faction of the Organization of Ukrainian Nationalists and served as president of the *Central Representation of the Ukrainian Emigration in Germany (1949–50) and editor of the paper *Natsional'na trybuna* (1950–2). In 1953 he emigrated to the United States, where he became a leading figure in the *Organization for the Defense of Four Freedoms for Ukraine and edited its *Visnyk*. His articles on political issues appeared in various nationalist newspapers and journals.

Vovchyi Grot. A middle Paleolithic (Mousterian culture) cave shelter near Nova Mazanka, Symferopil raion, Crimea. Discovered in 1880 and excavated in 1936–7 by O. Bader, the site yielded the remains of hearths, flint tools (mainly for scraping and cutting), and the bones of mammoths, cave bears, and other wild animals.

Vovk, Andrii, b 15 October 1882 in Delky, Poltava gubernia, d 11 February 1969 in Neu-Ulm, West Germany. Senior army officer. A regular officer in the Russian army during the First World War, in 1917 he Ukrainianized

Russian army units on the Rumanian front and then joined the UNR Army. He was commander of the Fifth Infantry Rural Division (1918) and the Fourth Rifle Division (1919), and deputy commander of the Kiev Division during the First Winter Campaign. In the summer of 1920 he briefly commanded the Kiev Division. He was one of the founders of the Society of Former Soldiers of the UNR Army (1924) and first president of the *Ukrainian Military History Society (1925). In 1940–2 he was president of the Ukrainian Hromada in Germany, and after the war he remained in West Germany. He was promoted to brigadier general by the UNR government-in-exile, and headed its military department (1957–61).

Fedir (Khvedir) Vovk

Vovk, Fedir (Khvedir) (Volkov), b 17 March 1847 in Kriachkivtsi, Pyriatyn county, Poltava gubernia, d 30 June 1918 in Zhlobin, near Homel, Belarus. Ethnographer, anthropologist, and archeologist; member of the Shevchenko Scientific Society (NTSh) from 1899. A graduate of the Nizhen gymnasium and Odessa and Kiev universities (1871), he was active in the Kiev Hromada and a founder of the Southwestern Branch of the Imperial Russian Geographic Society (1873). After spending two years abroad he did archeological research in Kiev gubernia and Volhynia (1878–9) and then fled abroad again because of tsarist persecution. From 1887 he studied anthropology, comparative ethnography, and archeology in Paris. In 1905 he was permitted to return to Russia to become custodian of the Aleksander III Ethnographic Museum and lecturer in anthropology at St Petersburg University. He established a Ukrainian section at the museum and was active in the Imperial Russian Geographic Society, particularly in preparing an ethnographic, anthropological, and archeological map of Russia. His doctoral dissertation, *Variations squelettiques du pied chez les primates et chez les races humaines* (Paris 1900), was awarded the Godard Prize. In 1904–6 he participated, along with I. Franko, I. Rakovsky, Z. Kuzelia, and L. Hankevych, in several anthropological and ethnographic expeditions in Galicia, Bukovyna, and Transcarpathia. Assisted by his students, he amassed vast collections of ethnographic materials and anthropological measurements from various regions of Ukraine, on which he built the geography and anthropology cabinet at St Petersburg University. He was a member of the Ukrainian Scientific Society in Kiev (from 1907) and of many European learned societies. He was appointed a professor at Kiev University in 1917 but died on his way to Ukraine.

Vovk's main contributions to anthropology were 'Ukraintsy v antropologicheskom otnoshenii' (Ukrainians with Respect to Their Anthropology, *Ukrainskii vestnik*, 1906; German trans in *Ukrainische Rundschau*, 1908), 'Antropometrychni doslidy ukrains'koho naselennia Halychyny, Bukovyny, i Uhorshchyny: Hutsuly' (Anthropometric Research on the Ukrainian Population of Galicia, Bukovyna, and Hungary: The Hutsuls, 1908), and 'Antropologicheskie osobennosti ukrainskogo naroda' (Anthropological Peculiarities of the Ukrainian People, in **Ukrainskii narod v ego proshlom i nastoiashchem*, 2 [1916], and *Materiialy do ukrains'koi etnologii*, 10 [1908]). In these works he argued that Ukrainians are a separate group of Slavs, related to the Southern Slavs (Dinaric type). His chief ethnographic works were 'Etnograficheskie osobennosti ukrainskogo naroda' (Ethnographic Peculiarities of the Ukrainian People, in *Ukrainskii narod v ego proshlom i nastoiashchem*, 2 [1916]), 'Rites et usages nuptiaux en Ukraine' (*L'Anthropologie*, 2-3 [1891-2]), 'Le traineau dans les rites funéraires de l'Ukraine' (*Revue de traditions populaires*, 9 [1895]), 'Zadunaiskaia Sech po mestnym vospominaniiam i razskazam' (The Danubian Sich in Local Recollections and Stories, *Kievskaiia starina*, 1883, nos 1, 2, 4), and 'Russkie kolonii v Dobrudzhe' (Russian Colonies in Dobrudja, *Kievskaiia starina*, 1889, nos 1-3). He contributed also to the study of archeology, botany, geography, and literary scholarship. He was a founder of the Ethnographic Commission of the NTSh, its chairman for several years, and editor of its *Materiialy do ukrains'koi etnologii*. His students included some well-known scholars such as I. Rakovsky, L. Chykalenko, A. Nosiv, and P. Yefymenko. A selection of his work was published in Ukrainian in Prague, as *Materiialy do ukrains'koi etnografii ta antropologii* (Materials in Ukrainian Ethnography and Anthropology, 1928). A bibliography of his works was published in Kiev in 1929.

M. Mushynka

Ivan Vovk

Vira Vovk

Vovk, Ivan (professional name: S. Jascove), b 25 September 1921 in Kryvchunka, Tarashcha county, Kiev gubernia. Composer and pianist. He studied at the Odessa Conservatory (1935-9). Having emigrated in 1945, he graduated (1954) from the César Franck music school in Paris and then worked as a piano teacher in San Francisco (1955-77) and Curitiba, Brazil. His works include the opera *Zakhar Berkut*, a concerto for violin and orchestra, and a score of a liturgy for mixed choir, as well as music to V. Sosiura's poem 'Liubit' Ukrainu' (Love Ukraine).

Vovk, Nataliia, b 13 October 1896 in Skoptsi (now Veselynivka), Pereiaslav county, Poltava gubernia, d 16 October 1970 in Kiev. Master kilim weaver. She wove ornamental kilims, using traditional motifs, and thematic kilims designed by professional artists, such as K. Voroshilov and S. Budenny *Reviewing a Parade of Red Cossacks* (1936), T. Shevchenko (1938), and *Unification of the Ukrainian People* (1954).

Vovk, Vira (pseud of Vira Selianska), b 2 January 1926 in Boryslav, Drohobych county, Galicia. Writer, literary scholar, and translator. Having been forced to emigrate by the Second World War, Vovk studied German language and literature in Germany, at Tübingen and Munich universities (1945-9), and completed her studies with a doctorate in 1950 at the Catholic University of Rio de Janeiro, where she remained as a lecturer and, in 1968-80, professor of comparative literature. Since 1980 she has taught at the Federal University in Rio. Vovk writes in three genres: poetry, prose, and drama. By far the most voluminous is her poetic output. Eight collections have appeared so far: *Iunist'* (Youth, 1954), *Zoria providna* (The Leading Star, 1955), *Elehii* (Elegies, 1956), *Chorni akatsii* (Black Acacias, 1961), *Liubovni lysty kniazyni Veroniky do kardynala Dzhovannibattisty* (Love Letters of Princess Veronika to Cardinal Giovannibattista, 1967), *Kappa Khresta* (Kappa of the Cross, 1969), *Meandry* (Meanders, 1979), and *Mandalia* (Mandala, 1980). The poetry, which began as often derivative, formally unsophisticated lyricism, developed in her later collections into the highly complex and rhythmical free verse of her 'elegies' and the intricate multirhythms of her 'ballads,' in which she mixes dialogue with narration and bilingual texts. Two major motifs flow through her poetry, exotic geography (the result of displacement) and religious mysticism. The interest in mysticism and myth carries over into her less-voluminous prose, which consists of the collections *Legendy* (Legends, 1954), *Kazky* (Fairy Tales, 1956), *Dukhy i dervishi* (Spirits and Dervishes, 1956), and the novel *Vitrazhi* (Stained-Glass Windows, 1961). Of special interest are her bilingual prose works, such as *Sviatyi hai* (The Holy Grove, 1983) and *Karnaval* (Carnival, 1986). In the realm of poetic drama Vovk has written *Smishnyi sviatyi* (The Funny Saint, 1968), *Tryptykh* (Triptych, 1982), and *Ikonostas Ukrainy* (Iconostasis of Ukraine, 1988). Most of her publications, from the 1970s on, are exquisite esthetic productions with hand-inserted illustrations by Ukrainian artists (Z. Lisovska, M. Dzyndra, J. Solovij, and others) or Vovk's own paper cutouts.

Vovk has devoted a great deal of time to translation into Ukrainian and into Portuguese and German. An annotated anthology of modern Portuguese and Brazilian poetry, *Zelene vyno* (Green Wine), appeared in 1964. She also collaborated in an anthology of Quebec poetry (1972) and in translations of F.G. Lorca with W. Burghardt, H. Kochur, and others. In addition to many of her own poems, she has rendered into Portuguese *Antologia da Literatura Ucraina* (1959), several anthologies of Ukrainian stories and folktales (*Lendas Ucrainianas* [1959], *A Canoa no mar* [1972], *Galos bordados* [1972], *Contos populares ucranianos* [1983]), and a series of translations of some individual Ukrainian works by H. Skovoroda (1978), T. Shevchenko (1980), I. Franko (1981), V. Stefanyk (1982), and Lesia Ukrainka (1983). Her scholarly writing is mostly in Portuguese and German.

D.H. Struk

Vovk, Yurii, b 21 March 1899 in Kiev, d 14 November 1961 in Prague. Graphic artist and painter. He studied at the Ukrainian State Academy of Arts in Kiev (1918–20) and in Rome (1920–2). In 1922 he settled in Prague, where he graduated from the Ukrainian Studio of Plastic Arts. He served on the executive of the Scythians, an international artists' association, and exhibited his works at its show in Prague (1931). Vovk worked as a book illustrator for publishing houses in Prague. He illustrated novels by I. Franko, A. Kashchenko, and B. Lepky, published in Czech translation; story collections by Yu. Borolych (1953, 1956, 1960) and F. Ivanchov (1954, 1957); a collection of V. Zozuliak's plays (1955); and a novel by M. Shmaida (1957). He did many portraits in pencil and charcoal, including ones of A. Procházka (1953), K. Stakhovsky (1954), and inhabitants of the Prešov region.

Vovk-Karachevsky, Vasyl [Vovk-Karačevs'kyj, Vasyl'], b 8 May 1834 in Brytany (now Duboluhivka), Nizhen county, Chernihiv gubernia, d 8 March 1893 in Kiev. Civic figure, writer, and physician. He graduated from the medical faculty of Kiev University (1856) and then worked as a justice of the peace and judge. He was involved with the Old Hromada of Kiev, which often met at his home, and contributed to journals, such as *Osnova* and *Pravda*. His major writings consisted of translations for several volumes of O. Barvinsky's series, *Rus'ka istorychna biblioteka* (The Ruthenian Historical Library). He also published original historical essays and publicistic works. His reminiscences appeared in *Kievskaiia starina* in 1901.

Vovkushivsky, Hryhorii [Vovkušivs'kyj, Hryhorij], b 1866, d ? Lawyer. He was secretary of the Commission on Legal Terminology of the Social-Economic Division of the VUAN, and served on the editorial board of *Rosiis'ko-ukraïns'kyi slovnyk pravnychoi movy* (The Russian-Ukrainian Dictionary of Legal Language, 1926).

Vovky (Wolves). An UPA battalion in the Hrubeshiv-Kholm region. In the spring of 1944 a company was originally formed to defend the Ukrainian population against the Polish Home Army, Soviet partisans, and Nazi police. In 1945 the unit grew into a battalion, and by 1946 it consisted of three combat companies. Its chief mission became to defend the population against the Polish regime and Soviet border troops. The Vovky Battalion operated in the 28th Tactical Sector of the Sixth Military District of the UPA-West. It became known for its frequent raids, a rocket attack on a Polish police garrison, and a joint operation with the underground Polish Home Army against Soviet and Polish government forces in Hrubeshiv in May 1946. Its commanders were Maj A. Sydoruk (nom de guerre: Yahoda, 1944–5), Capt Ye. Shtendera (Prirva, 1945–6), and Capt V. Soročhak (Berkut, 1946–7). The unit suffered heavy casualties during *Operation Wisła and was demobilized in September 1947. A chronicle of its operations, titled *Vovky*, was published in 1948.

Vovnyhy burial sites and settlement. Two Upper Paleolithic burial grounds of the late 4th to early 3rd millennium BC near Vovnyhy, Solone raion, Dnipropetrovske oblast. Excavations in 1949 and 1952 revealed the remains of 161 individuals, all of whom were covered with a thick layer of red ocher. Grave goods recovered included pottery sherds, flint fragments, and pendants with deer teeth.

Voynich, Ethel Lillian (née Bull), b 11 May 1864 in Cork, Ireland, d 28 July 1960 in New York. English writer, and author of articles on Eastern Slavic folklore and Slavic music. She corresponded with M. Pavlyk. Her first published writings were translations from Russian writers. She then learned Ukrainian and began translating Ukrainian folk songs ('Oi hore tii chaitsi' [O Woe to the Seagull] and others). In 1911 she published a collection of translations (of six poems) of T. Shevchenko and his biography, *Six Lyrics from the Ruthenian of T. Shevchenko*. Her novel *The Gadfly* was published twice in Ukrainian translation (*Ovid*, 1929 and 1985), and a translation of her novel *Jack Raymond* was published in 1930.

Vozhakivsky, Symon [Vožakivs'kyj], b 1911, d 6 June 1984 in Irvington, New Jersey. Nationalist revolutionary and community figure. In 1941 he established contact with an OUN expeditionary force in the Kirovohrad region and helped to organize an OUN underground network and the nucleus of what became the UPA-South. As a postwar refugee in Germany, he was one of the founders of the *Ukrainian Youth Association (SUM) and its president in 1949. After emigrating to the United States he headed SUM (1952–3) and was active in other Ukrainian-American organizations of the Banderite faction. He also chaired the Commission on Culture and Science of the Ukrainian Congress Committee of America.

Voznesenka hoard. A cache of approx 1,400 silver and gold items found near Voznesenka (now part of Zaporizhia). Found in 1930 in a 7th- to 8th-century Slavic military fortress during the building of the Dnieper Hydroelectric Station, the hoard included such items as numerous weapons (swords, arrowtips, knives), horse trappings, and valuable adornments, including a silver eagle and lion from the tops of standards. The total weight of the hoard's gold items is 1.246 kg; its silver items weigh 1.782 kg.

Voznesenske [Voznesens'ke]. VI-12. A city (1989 pop 44,500) on the Boh River and a raion center in Mykolaiv oblast. The city was founded by a decree of Catherine II in 1795 at the site of a Cossack winter settlement called Sokoly. During the 19th century Voznesenske developed into an important manufacturing and trading center of New Russia gubernia. It held three fairs a year and traded in lumber and salt. It was granted city status in 1938. Today it is an industrial center and railway junction. It is the home of a leather-manufacturing consortium, a conveyor-belt plant, a winery, and sewing, musical-instruments, canning, cheese, and meat-processing factories.

Voznesenske vicegerency. An administrative territory set up in 1795 out of a part of Katerynoslav vicegerency and lands recently acquired from Poland and Turkey. The capital was at first Novomyrhorod and then Voznesenske. In 1797 the vicegerency was abolished, and its territory was distributed among New Russia, Kiev, and Podilia gubernias.

Vozniak, Ivan [Voznjak], b 1865, d 1914. Civic activist. He was director of the Shevchenko Scientific Society printing press in Lviv. A founder of the *Ukrainian Social Democratic party, he served as chairman of its executive council and president of the Volia workers' society.

Mykhailo Vozniak

Vozniak, Mykhailo [Voznjak, Myxajlo], b 3 October 1881 in Vilky-Mazovetski (now Volytsia), Rava Ruska county, Galicia, d 20 November 1954 in Lviv. Literary scholar. He graduated from Lviv University in 1908, was a professor there from 1939, and was director of the department of Ukrainian literature at that university from 1944. He was a full member of the VUAN from 1929 (which later became the AN URSR and is now the ANU), was barred from membership during the 1930s, and was reinstated as a full member in 1939. He began to publish his work in 1902, and for many years he worked on Shevchenko Scientific Society publications and commissions. He is the author of many studies on the history of Ukrainian literature (he adhered to the historical-cultural approach), in particular on the Galician rebirth during the 19th century, including *Pysannia Markiiiana Shashkevycha* (The Writings of Markiiian Shashkevych, 1911) and *Prosvitni zmahannia halyts'kykh ukraintsv 19 v.* (The Enlightenment Efforts of Galician Ukrainians in the 19th Century, 1912), and on Ya. Holovatsky, I. Vahylevych, and M. Ustyianovych. His works include *Rizdviani i velykodni virshi – Oratsii zi zbirnyka kintsia XVII–pochatku XVIII v.* (Christmas and Easter Poems: Orations from a Collection of the Late 17th and Early 18th Centuries, 1910), *Materiialy do istorii ukrains'koi pisni i virshi* (Materials for the History of the Ukrainian Song and Verse, 3 vols, 1913–25), and *Pochatky ukrains'koi komedii (1619–1819)* (The Beginnings of Ukrainian Comedy [1619–1819], 1919). Vozniak's most notable work is *Istoriia ukrains'koi literatury* (The History of Ukrainian Literature, 3 vols, 1920–4) from its beginnings to the 18th century. Vozniak published the anthology *Stare ukrains'ke pys'menstvo* (Old Ukrainian Literature, 1929) and many popular publications, notable among which are *Kyrylo-metodiiv's'ke bratstvo* (The Cyril and Methodius Brotherhood, 1921) and *Iak probudylosia ukrains'ke narodne zhyttia v Halychyni za Avstrii* (How Ukrainian National Life Awakened in Galicia under Austrian Rule, 1924). He also published a great number of works on folklore and on old and modern literature. A posthumous collection of Vozniak's articles about the literary work of I. Franko, *Z zhyttia i tvorchosty I. Franka* (From the Life and Works of I. Franko), was published in 1955.

I. Koshelivets

Voznyi. See *Ditskyi*.

Voznytsky, Borys [Voznyc'kyj], b 16 April 1926 in Ulbarove (now Nahirne), Dubno county, Volhynia. Art gallery director. Since graduating from the Leningrad Institute of Painting, Sculpture, and Architecture (1962) he has directed the *Lviv Art Gallery. A member of the International Council of Museums (ICOM) and vice-president of its Soviet section, he is a dedicated collector of the art treasures of Galicia and Volhynia, and has built a fine collection of contemporary Lviv painting at the gallery and directed the restoration of the Olesko Castle as a branch of the gallery. As an art historian he specializes in 17th- and 18th-century Western Ukrainian art, particularly the work of Y. Kondzelevych, and in 18th-century sculpture, with a concentration on J. Pinzel. For his contributions he was awarded the 1990 Shevchenko State Prize.

Vpered (Forward). A weekly organ of the 'independent' faction of the *Ukrainian Social Democratic party (USDP) in Galicia, published by P. Buniak in Lviv from December 1911 to March 1913. Its primary aim was to build support for the trade union movement among Ukrainian workers. *Vpered* was edited by V. Levynsky, Yu. Bachynsky, and A. Chernetsky. The paper was renewed in late 1918 and appeared daily and then semimonthly to 1924. Until 1923 it provided general coverage of political and economic developments. In this period its editors included L. Hankevych, Buniak, Chernetsky, I. Ivashko, I. Kvasnytsia, S. Pashkevych, and A. Holovka. In 1923–4 *Vpered* again served as a pro-Soviet USDP organ, under the editorship of M. Parfanovych, S. Volynets, and S. Rudyk.

Vpered (Forward). A weekly (at times semiweekly) organ of the Social Democratic party of Subcarpathian Ruthenia, published in Uzhhorod in 1922–38 as the successor to **Narod*. Until 1926 it appeared in the Transcarpathian dialect, and from then in literary Ukrainian. *Vpered* was edited by Ye. Puza, S. Klochurak, D. Nimchuk, and S. Dovhal.

Vpered (Forward). A monthly paper for Ukrainian workers, published by the left *Vpered* faction of the *Ukrainian Revolutionary Democratic party in Munich from April 1949 to December 1959. It contained articles on developments in Soviet Ukraine, international politics, and Ukrainian émigré life written from a democratic socialist perspective. The editors were I. Maistrenko, V. Holubnychy, B. Levytsky, E. Bobykevych, and V. Ryvak. H. Kostiuk and V. Sabal (pseud: V. Chorny) were regular contributors.

Vpered. See *Pravda*.

Vrabel, Mykhailo [Vrabel', Myxajlo] (Vrábely, Mihály) (pseud: Ivan Hazda, Vorobei), b 1866 in Vyrava, Zemplén komitat, Transcarpathia, d 4 January 1923 in Budapest. Transcarpathian folklorist, teacher, and journalist. After graduating from the Uzhhorod Teachers' Seminary he taught in the Prešov region and in Ruski Krstur, in the Bačka region. He collected Transcarpathian folklore and published a collection of folk verses, *Russkii solovei* (The Ruthenian Nightingale, 1890), and one of the Maramureş region's songs and *kolomyiky*, *Uhroruski narodni spivanky* (Hungarian-Ruthenian Folk Songs, 1901). He was editor of the weekly *Nedilia* (1899–1918) for Transcarpathia's Ruthenians. In 1898 he published a primer which was used in Ruthenian schools in the Bačka region and Transcarpathia and was reprinted several times.

Vrabel, Oleksander [Vrabel'], b 26 February 1931 in Ivanivtsi, Transcarpathia. Opera singer (baritone). He graduated from the Lviv Conservatory (1960). In 1957 he joined the Lviv Theater of Opera and Ballet, where he has been appearing in the lead roles in P. Tchaikovsky's *Eugene Onegin*, W. Mozart's *Don Giovanni*, and G. Verdi's *Rigoletto*, and as Hnat in K. Dankevych's *Nazar Stodolia* and Hurman in Yu. Meitus's *Stolen Happiness*.

Vasyl Vrazhlyvy

Ivan Vrona

Vrazhlyvy, Vasyl [Vražlyvyj, Vasyl'] (pseud of Vasyl Shtanko), b 1903 in Opishnia, Zinkiv county, Poltava gubernia, d 8 December 1937 in the Solovets Islands. Writer. He was a member of the literary organizations Vaplite and Prolitfront. His first collection of short stories was *Viaru* (In the Ravine, 1924). Subsequently he published *Zemlia* (Earth, 1925), *Zhyttia biloho budynku* (The Life of a White Building, 1927), *Vovchi bairaky* (The Wolf Thickets, 1927), *Molodist'* (Youth, 1927), *Shist' opovidan'* (Six Stories, 1930), *Hlyboki rozvidky* (Deep Inquiries, 1932), *Peremoha* (Victory, 1932), a long novelette, *Bat'ko* (Father, 1929), and a novel, *Sprava sertsia* (A Matter of the Heart, 1933). In December 1934 he was arrested, and in 1935 he was sentenced to 10 years' imprisonment in a concentration camp. He was subsequently resentenced, to death by firing squad.

Vremennik Stavropigiiskogo instituta s mesiatsoslovom (Periodical of the Stauropegeion Institute with a Menology). A serial of the *Stauropegeion Institute in Lviv that appeared annually in 1864–1915 and 1923–39. It contained valuable articles on history and culture by A. Petrushevych, Ya. Holovatsky, P. Svystun, and other leading Russophiles in Galicia.

Vretsona, Hryhorii [Vrec'ona, Hryhorij], b 8 October 1839 in Vynnyky, Lviv county, Galicia, d 2 November 1901 in Lviv. Pedagogue and education activist. He taught in Galician village schools (1862–77) until moving to Lviv, where he was a teacher from 1877. He was active in Ukrainian community affairs in Lviv and was a member of many organizations, including Prosvita, Narodna Torhovia, and the Shevchenko Scientific Society. He wrote extensively for Galician newspapers and journals, and edited and published **Shkol'na chasopys'* in 1880–9.

Vretsona, Yevhen [Vrec'ona, Jevhen], b 1 October 1905 in Vynnyky, Lviv county, Galicia, d 4 February 1975 in Basel. Political leader of the OUN and the Ukrainian Supreme Liberation Council (UHVR). After graduating in chemistry from the Higher Technical School in Prague (1933) he edited the sports weekly *Hotovi* in Lviv and contributed to *Tekhnichni visti*. As an OUN member he participated in organizing the Carpathian Sich (1938–9). After the Second World War he was active in the External Representation of the UHVR and contributed to *Suchasna Ukraina* and *Suchasnist'*.

Vrona, Ivan, b 29 September 1887 in Otroch, Kholm county, Lublin gubernia, d 5 January 1970 in Kiev. Art scholar and critic, and political figure. After serving two years of exile in Siberia for revolutionary activities he studied law at Moscow University (1910–14) and art at K. Yuon's studio in Moscow (1912–14) and in schools in Kiev (1918–19). In 1918 he joined the *Borotbists, and in 1920 the CP(B)U. In 1921 he was elected to the All-Ukrainian Central Executive Committee. In the 1920s Vrona helped organize the *Kiev State Art Institute and served as its first rector; he taught there later (1930–3, 1945–8). He was also a founder and leader of the *Association of Revolutionary Art of Ukraine (ARMU), whose program he defined in his *Mystetstvo revoliutsii i ARMU* (The Art of the Revolution and ARMU, 1926), and served as director of the Kiev Museum of Western and Eastern Art and chief inspector of art education of the People's Commissariat of Education. His art criticism was published in *Zhyttia i revolutsiia* and *Krytyka*. In 1933 Vrona was arrested and sent to a western Siberian labor camp. He was released in 1936 and rehabilitated in 1943. After being allowed to return to Ukraine in 1944, he became a research associate of the AN URSR (now ANU) Institute of Fine Arts, Folklore, and Ethnography and wrote monographs on the artists Karpo Trokhymenko (1957), M. Derehus (1958), and A. Petrytsky (1968) and two chapters for vol 5 of the ANU history of Ukrainian art (1967).

Vronchenko, Mykhailo [Vrončenko, Myxajlo], b 1801 in Kopyts, Mahiliou gubernia, Belarus, d 26 October 1855 in Kharkiv. Geodesist and army general. He enlisted in the Russian army before completing his studies at Moscow University. His main achievements were a topographic survey of Moldavia, Wallachia, and Rumania (1828–33), a two-volume geographic survey of Asia Minor (1838–40), and a major survey of Southern Ukraine in 1848–54. He also translated some of W. Shakespeare's tragedies and G. Byron's poems.

Vronsky, Makar [Vrons'kyj], b 14 April 1910 in Barysau, Minsk gubernia, Belarus. Sculptor. He studied under M. Helman and M. Lysenko at the Kiev State Art Institute until 1945 and taught there from 1949. His sculptures include compositions, such as *Lesia Ukrainka* (1947) and *Ustym Karmaliuk* (1948); portraits of I. Kavaleridze (1957) and M. Amosov (1961); the monuments to T. Shevchenko in Palermo, Ontario (1950, with O. Oliinyk), and Shevchenko, Kazakhstan (1982); and the Eternal Glory monument in Lutske (1977).

Vronsky, Vakhtanh [Vrons'kyj, Vaxtanh] (real surname: Nadiradze), b 28 August 1905 in Tbilisi, d 27 February 1988 in Kiev. Ballet dancer, ballet master, and

choreographer. In 1923 he completed study at the Tbilisi Ballet School. Until 1940 he worked outside Ukraine. In 1940–54 he was the principal ballet master in the Odessa and in 1954–73 in the Kiev theater of opera and ballet. In 1961–73 he worked simultaneously as principal ballet master and artistic director of the Kiev Ballet on Ice, and in 1977–80, the Moscow Ballet on Ice. Since 1981 he has been the artistic director of the Kiev Theater of Classical Ballet. In 1959 he made (with V. Lapoknysh) a film of K. Dankevych's ballet *The Lily*.

Mikhail Vrubel: the *Theotokos* in the iconostasis of St Cyril's Church in Kiev

Vrubel, Mikhail [Vrubel', Mixail], b 17 March 1856 in Omsk, Russia, d 14 April 1910 in St Petersburg. Russian painter and designer; member of the St Petersburg Academy of Arts from 1905. After graduating from the St Petersburg Academy of Arts in 1884, he lived in Kiev. There he supervised the restoration of the frescoes in St Cyril's Church by the students of the Kiev Drawing School and restored several sections himself. He painted the church's

icons and frescoes *Theotokos and Child*, *Descent of the Holy Ghost*, *St Cyril*, *St Athanasius*, and *Mourning at the Sepulcher*; the ornamental designs in the side naves of St Volodymyr's Cathedral (his mural sketches were turned down); and oils and watercolors, such as *Girl against the Background of a Persian Carpet* (1886), *Oriental Fairy Tale* (1886), and *Hamlet and Ophelia* (1888). From 1889 he lived in Moscow. He was obsessed with the Demon figure as a symbol of individual pride and rebellion and painted several versions of it. Many of his secular works are fine examples of Russian symbolism.

Vruchyi. See Ovruch.

Vsekhsviatsky, Sergei [Vsexsvjatskij, Sergej], b 20 June 1905 in Moscow. Astrophysicist. A graduate of Moscow University (1925), he taught in institutes in Moscow and Kalinin. In 1939 he joined the faculty of Kiev University. He has written over 270 works on the physics of comets and solar activity, including the monograph *Physical Characteristics of Comets* (1958; English trans 1964), shorter books on that subject (1974, 1979), and a monograph on the nature and origin of comets (1967).

Vsesvit

Vsesvit. A political, community, literary, and art illustrated journal published in Kharkiv in 1925–34, at times as a weekly, at others as a biweekly. One of its founders was V. *Blakytny; the editor-in-chief was Ye. Kasianenko, and the managing editor was O. Kopylenko. The staff of illustrators included O. Dovzhenko, A. Petrytsky, and V. Kasian. The journal was revived in July 1958 under the editorship of O. Poltoratsky. Subsequent editors have been D. *Pavlychko, V. *Korotych, and O. *Mykytenko. It was the only publication in Soviet Ukraine devoted to foreign literature, and it featured, until recently, primarily translations of Communist and 'progressive' authors in the West and of writers in other socialist countries and the Third World. Since for a long time it was the only source of contact with Western literature, it has been widely popular. It has been published with the co-operation of the *Ukraina Society for Friendship and Cultural Relations with Foreign Countries and the Writers' Union of Ukraine.

Vsesvitnia Biblioteka (Universal Library). A publishing house in Zolochiv, Galicia, founded and operated by

I. Kalynovych. In 1913–14 and 1918–26 it published popular educational pamphlets and booklets and translations of literary classics, including an edition of A. Pushkin's plays (1914) and the *Song of Roland* (1918).

Vseukrainskyi strakhovyi soiuz. See Strakhsoiuz.

Vsevolod Olhovych [Ol'hovyč], b ?, d 1 August 1146 in Vyshhorod, north of Kiev. Rus' prince; son of Oleh Sviatoslavych. He succeeded his father in Novhorod-Siverskyi in 1115 and successfully forced his uncle, Yaroslav Sviatoslavych, out of Chernihiv in 1127. With the support of the Cumans he displaced the ineffectual Viacheslav Volodymyrovych from the Kievan throne in 1139, after the death of Yaropolk II Volodymyrovych, and turned over Chernihiv to his cousin, Volodymyr Davydovych. Vsevolod was the first of the Sviatoslavych dynasty to rule in Kiev, and he maintained his grip on power by manipulating rival princely factions. Dissatisfaction arose among his subjects because of his exploitive rule, and his main administrative officials in Kiev, Ratsha and Tudor, were accused of ruining the city. Vsevolod also clashed with the Kievan metropolitan, Mykhail, over the question of appointing bishops. In 1145 Vsevolod appointed his brother, Ihor, as his successor, hoping thereby to establish a family claim to the principality. When he died the following year, a popular revolt broke out in Kiev against the Olhovych family and their officials, and the throne was claimed by the Monomakh descendant, Iziaslav Mstyslavych.

Vsevolod Sviatoslavych [Svjatoslavyč] (Bui-Tur), b ?, d 17 May 1196. Rus' prince; grandson of Oleh Sviatoslavych. He took part in numerous battles against the Cumans, including the campaigns led by his brother, Ihor, in 1185 and 1191. His gallantry was celebrated in *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign), which mentions that he was the prince of Kursk; the Hypatian Chronicle describes him as the ruler of Trubchevsk (or Trubetsk, on the Desna River).

Vsevolod Sviatoslavych Chermny [Svjatoslavyč Čermnyj], b ?, d 1212 or September 1215. Rus' prince; son of Sviatoslav III Vsevolodovych and father of Mykhail Vsevolodovych. He took part in campaigns against the Cumans in 1183 and 1191. He became prince of Chernihiv ca 1204, probably after the death of his brother, Oleh. In 1206–10 he unsuccessfully fought Riuryk Rostyslavych and Mstyslav Romanovych for the Kievan throne.

Vsevolod Yaroslavych [Jaroslavyč], b 1030, d 13 April 1093. Rus' prince; fifth (and favorite) son of Yaroslav the Wise and father of Volodymyr Monomakh. He received lands in the Pereiaslav, Upper Volga, Rostov-Suzdal, and Belozersk regions after his father's death in 1054 and for nearly two decades maintained the peace of the realm through close co-operation with his elder brothers, Iziaslav and Sviatoslav II Yaroslavych. One of the crowning achievements of that period was the confirmation in 1072 of the so-called *Pravda Iaroslavychiv* (see **Ruskaia Pravda*), an extensive revision of their father's law codes. Fighting between the princes started in 1073, when Vsevolod rose up against Iziaslav at Sviatoslav's bidding. Iziaslav then fled abroad, Sviatoslav emerged as the grand prince of Kiev, and Vsevolod took the throne of Cherni-

hiv. Upon Sviatoslav's death in 1077, Iziaslav returned to Kiev, but he died the following year while helping Vsevolod to defend Chernihiv from their nephew, Oleh Sviatoslavych. Vsevolod then ascended the Kievan throne (1078) and placed his own son, Volodymyr Monomakh, in Chernihiv. The remainder of Vsevolod's reign saw continued fighting among the Rus' princes, although without serious challenges to Vsevolod's own position. It also witnessed considerable artistic and cultural development, including the building of the *Vydubychi Monastery near Kiev.

Vuhlehirske [Vuhlehirs'ke]. v-19, DB III-4. A city (1989 pop 12,800) under the jurisdiction of the Yenakieve city council in Donetsk oblast. It originated in 1879 as the railway settlement of Khatsapetivka. It was renamed in 1957 and promoted to city status the following year. It has a coal mine and a coal enrichment plant.

Vuiakhevych-Vysochynsky, Mykhailo [Vujaxevyč-Vysočyns'kyj, Myxajlo] (religious name: Meletii), b ca 1625, d 1697. Cossack officer and church figure, descended from Ukrainian Galician nobility. He was a scribe at the Kievan Cave Monastery (1654) and then served as general chancellor under hetmans Ya. Somko (1661–2) and P. Doroshenko (1669–76), general judge under I. Samoilovych and I. Mazepa (1683–91), and acting hetman in the field (1689). From 1691 he was archimandrite of the Kievan Cave Monastery.

Vuiko

Vuiko (Uncle). A humoristic magazine published semi-monthly in Winnipeg from May 1924 to mid-1925 by Ya. *Maidanyk. It chronicled the humorous misadventures of Vuiko Shtif Tabachniuk (Uncle Steve Tabachniuk), an ignorant and boorish Ukrainian-immigrant comic-strip character Maidanyk had introduced to the Ukrainian-Canadian press. It satirized the low level of culture among Ukrainian pioneers as well as the pretensions of Anglo-Canadian society. The journal was especially noted for its illustrations (by Maidanyk himself) and for its humorous

language, a rich mixture of Ukrainian, English, and other languages filled with slang, Galicianisms, and jargon. One issue of the *Vuiko kalendar* also appeared. After the demise of the magazine, a 'Vuiko Shtif' comic strip appeared as a supplement to *Kanadiis'kyi ukrainets*' (1927–9).

Yurii Vukhnal

Vukhnal, Yurii [Vuxnal', Jurij] (pseud of Ivan Kovtun), b 5 October 1906 in Chornobaivka, Iziium county, Kharkiv gubernia, d 15 July 1937. Writer and humorist; member of the writers' groups Pluh, Molodniak, Prolitfront, and the All-Ukrainian Association of Proletarian Writers. He lived in Kharkiv from 1923, and from that time he began to publish his humorous stories in the newspapers *Sil's'kohospodars'kyi proletar* and *Komsomolets' Ukrainy* and in periodicals such as *Chervonyi perets*' and *Molodniak*. Among his works published separately were the collections of humorous stories *Chervoni parostky* (Red Shoots, 1925), *Tovarysh i tovaryshok* (The Comrade and the Little Comrade, 1926), and *Zhyttia i diial'nist' Fed'ka Husky* (The Life and Deeds of Fedko Huska, 1929) and the novels *Iastruby* (Hawks, 1929), *Aziiats'kyi aerolit* (The Asiatic Aerolite, 1931), and *Iunbund* (Youth League, 1932). In 1936 Vukhnal was arrested, and he was shot in a prison. In the 1950s he was rehabilitated, and editions of his selected works, *Zhyttia i diial'nist' Fed'ka Husky* (1960) and *Tovarysh i tovaryshok* (1963), were published.

Vydubychi Monastery (Vydubetskyi or Vydubyskyi manastyr). An architectural monument of the 11th to 18th century in Kiev. The monastery known as Vydubychi was founded ca 1070 by Grand Prince Vsevolod Yaroslavych on the southern edge of Kiev by the Dnieper River. Vsevolod and his descendants (eg, Grand Prince Volodymyr Monomakh) were the monastery's principal patrons. In 1088 the stone St Michael's Cathedral was completed at the monastery. The monastery was damaged by the Cumans in 1096. A century later P. Mylonih built a support wall under the monastery's slope to prevent landslides. In the early 17th century (until 1637) the monastery belonged

The Vydubychi Monastery, with St George's Cathedral in the center

to the Uniate church; then it reverted to the Orthodox church. The eastern part of St Michael's Cathedral collapsed after the Dnieper flooded it in the 1580s, and was rebuilt with the financial support of Metropolitan P. Mohyla as a two-story wooden structure. It was rebuilt again in its present form in 1766–9 by M. Yurasov. The present monastery complex dates back to the late 17th and early 18th century, when the baroque St George's Cathedral (containing a magnificent iconostasis with five rows of icons) and a refectory building (containing the Trinity Church), financed by Col M. Myklashevsky (1696–1701), and a campanile, financed by Hetman D. Apostol (1727–33), were built. In the 19th century the monastery ran a hospital for clerics, a school, an orphanage, and a home for retired priests. Many luminaries were buried in its cemetery. In the 1920s the monastery was abolished, and its buildings and churches were used by workers' clubs and, later, converted into military warehouses by the Soviet authorities. The monastery's iconostases and cemetery were destroyed. Today the ANU Institute of Archeology has use of the buildings, all of which were restored in 1967–82. In 1968–9 the restricted archive kept in St George's Cathedral, which contained over 500,000 books, incunabula, prerevolutionary periodicals, and UNR and ANU documents, was destroyed by four mysterious fires that ravaged the building.

Vydybida-Rudenko, Palladii (secular name: Petro), b 29 June 1891 in Strilchyntsi, Bratslav county, Podilia gubernia, d 1 September 1971 in Sea View, Staten Island, New York. Orthodox church and community leader. He graduated from the Kamianets-Podilskyi Theological Seminary and the mathematics faculty of Kiev University (1916) and then worked in the co-operative movement in Vinnytsia. An active member of the Society of Ukrainian Progressives and a delegate to the Central Rada, he was made director of the finance department of the UNR government in November 1918 and deputy finance minister in 1919. After moving to Polish-occupied Volhynia, he was ordained in 1921 and served as a parish priest and member of the church consistory. In 1934 he moved to Warsaw and became secretary of the metropolitan's office

and administrator of the Polish Autocephalous Orthodox church's pension fund. In 1935 Vydybida-Rudenko took monastic vows and was named an archimandrite soon after. In February 1941 he was ordained in Warsaw as archbishop of Cracow and the Lemko region. He was subsequently also named bishop of Lviv, and was elected chancellor of the Autocephalous Orthodox church in the Generalgouvernement. A postwar refugee, he lived in Germany from 1944 (in Passau, Munich, and Regensburg), before settling in the United States in 1950. From 1951 to his death he headed the *Ukrainian Autocephalous Orthodox Church in Exile.

Vyhoneivske Lake [Vyhoneivs'ke ozero]. 1–6. A lake situated in northwestern Polisia in southern Belarus near the Ukrainian border. The lake has a surface area of 26.5 sq km and a depth of 2.7 m.

Vyhovsky [Vyhovs'kyj]. Descendants of a boyar family line from Ovruch county. Ostap Vyhovsky (d 1663) was vicegerent of the Kiev fortress under the voivode A. Kysil and a member of the Kiev Epiphany Brotherhood. His sons were Hetman Ivan *Vyhovsky, Danylo *Vyhovsky, and Kostiantyn Vyhovsky, a colonel of Turiv-Pynske regiment and general quartermaster (from 1658). Vasyl Vyhovsky (a colonel) and his relatives were also members of the line. Illia and Yurii Vyhovsky were exiled to Siberia in 1659. Some members of the family were hierarchs of the Catholic church, among them Oleksander Vyhovsky (b 1649, d 1714) and Yosyf *Vyhovsky. In the early 20th century descendants of the Vyhovsky line lived in Volhynia, Podilia, and Kiev gubernias.

Vyhovsky, Danylo [Vyhovs'kyj], b ?, d 1659. Cossack officer. The son-in-law of B. Khmelnytsky, he occasionally undertook some diplomatic missions for the hetman. In 1655 he laid siege to Lublin, and in 1659 he expelled a Muscovite force from Kiev. He was captured by the Muscovites and tortured to death in Kaluga.

Hetman Ivan Vyhovsky

Vyhovsky, Ivan [Vyhovs'kyj], b ?, d 19 March 1664 in Olkhiivka, near Korsun. Hetman of Ukraine in 1657–9 and close confederate of B. Khmelnytsky. He studied at the Kievan Mohyla Academy, worked in the Kiev civic court, and joined the Lutske Brotherhood. Before the Khmelnytsky uprising he was secretary to a Polish starosta in Lutske, and in 1648 served in a crown force under the command of S. Potocki. He was captured by the Tatars at

the Battle of Zhovti Vody. His release was arranged by Khmelnytsky, who admired his learning and experience. Vyhovsky then joined forces with the hetman, together with his brothers, Danylo and Kostiantyn (colonel of Pynske-Turiv Regiment). He became the military chancellor and then general chancellor; he participated in diplomatic negotiations and drafted some of the more important treaties of the time. After Khmelnytsky's death he became the guardian of and second-in-command to Yu. Khmelnytsky. He was chosen hetman at the Korsun Council in 1657, and immediately entered into an agreement with Charles x Gustav of Sweden in the hope of establishing an independent Ukraine that would extend as far as the Vistula River. He was assisted in those negotiations by Yu. *Nemyrych. At the same time Vyhovsky understood the relative weakness of the fledgling Ukrainian state and was willing to consider a rapprochement with the Polish Commonwealth.

Vyhovsky ran into problems when internal opposition to his command began to grow. A revolt, led by the Zaporozhian otaman Ya. *Barabash and the colonel of Poltava regiment, M. *Pushkar, culminated in a bloody confrontation near Poltava in June 1658. Vyhovsky, who emerged victorious but weakened, decided to sever his ties with Muscovy and concluded the Treaty of *Hadiache with Poland on 16 September 1658. The agreement proposed to bring Ukraine back into the Commonwealth as the autonomous Grand Duchy of Rus'. In response to the signing of the treaty Muscovy sent a large force under Prince A. Trubetskoi to stop the hetman. Vyhovsky annihilated the Muscovite troops on 8 July 1659 near Konotip, with Polish and Tatar aid. The victory was short-lived. Widespread dissatisfaction with the Hadiache agreement and the possibility of renewed Polish influence in Ukraine gave rise to a revolt headed by T. Tsiutsiura, V. Zolotarenko, and others, who were supported by the Zaporozhian leader, I. Sirko. Vyhovsky was forced to flee to Hermanivka, in the Kiev region, in September 1659, and his title of hetman was officially revoked at a council in Bila Tserkva. He was later made voivode of Kiev and starosta of Bar by the Polish king. He joined the Lviv Dormition Brotherhood in 1662 and actively defended the interests of the Ukrainian Orthodox citizenry. He was later denounced by P. Teteria as a leader of a Cossack insurrection, and was shot by the Poles near Korsun.

Vyhovsky has been considered in Ukrainian historiography a leading statesman who strove for the freedom and independence of Ukraine. Soviet historians, however, have portrayed him as a traitor of his people.

B. Krupnytsky, A. Zhukovsky

Vyhovsky, Yosyf [Vyhovs'kyj, Josyf], b 1657 in Zamość, d 17 January 1730 in Rozhyshche, Volhynia. Uniata bishop; nephew of Hetman I. Vyhovsky. He joined the

Uniate church and entered the Basilian monastery in Suprasl. In June 1710 King Augustus II nominated him as bishop of Lutske and Ostrih to succeed Bishop D. Zhabokrytsky, who had been exiled to the Solovets Islands by Peter I of Russia. He was ordained bishop of Mstislau in 1713 and became bishop of Lutske and Ostrih after Zhabokrytsky's death in 1715. In Lutske he convinced the Brotherhood of the Elevation of the Cross to accept church union. He rebuilt the cathedral in Lutske and introduced strict discipline among the clergy. He participated in the Zamostia Synod of 1720. In 1727 he introduced mandatory celibacy for the clergy of his eparchy, although he agreed to ordain married candidates for the priesthood if they divorced their wives.

One of Vylkove's canals

Vylkove. VIII-10. A city (1989 pop 11,500) in the Danube River delta in Kiliia raion, Odessa oblast. Because of its numerous streams and canals it is known as the 'Ukrainian Venice' or 'Venice on the Danube.' It was founded in 1746 as the settlement of Lypovanske in territory that was under Turkish rule, and in 1762 was granted city status. In 1812 it was awarded to the Russian Empire and was renamed. In the interwar period (1918-40) it was occupied by Rumania. The city's main industry is fishing. It has a branch of the Antarktyka fishing consortium, a boat repair yard, and a research base of the ANU Institute of Hydrobiology. Nearby is a state preserve called Dunaiski Plavni.

Vynnychenko, Volodymyr [Vynnyčenko], b 27 July 1880 in the village Velykyi Kut, Yelysavethrad county, Kherson gubernia, d 6 March 1951 in Mougins, France.

Volodymyr Vynnychenko

Volodymyr Vynnychenko
(self-portrait)

Writer, statesman, and politician. Vynnychenko began to study law at Kiev University in 1901 but, owing to his expulsion in 1902 for 'revolutionary' activities, he never completed his studies. He was a member of the *Revolutionary Ukrainian party (RUP) and, later, the executive committee of the *Ukrainian Social Democratic Workers' party (USDRP) and editor of its journal *Borot'ba*. To avoid arrest for his political activities Vynnychenko fled abroad many times between 1903 and 1917 and returned clandestinely to Ukraine or Russia. An unsuccessful clandestine return earned him a year in prison (1903-4). During the First World War Vynnychenko lived in Moscow illegally, and in 1917 he returned to Ukraine to take part in the struggle for Ukraine's independence. As leader of the USDRP he was chosen one of two vice-presidents of the Central Rada and then the first president of the *General Secretariat, the autonomous government of Ukraine. During the Hetman government he headed the oppositional *Ukrainian National Union, and then, from its creation in 1918 until February 1919, the *Directory of the Ukrainian National Republic. Upon disagreeing with the rightist and pro-Entente politics of the Directory Vynnychenko left for Vienna, where he tried to mobilize Ukrainian socialists abroad and to negotiate with V. Lenin an independent socialist Ukrainian state. His attempts in 1920 to reach a similar end while in Ukraine also proved unsuccessful, and Vynnychenko emigrated and finally settled in France. Though he maintained contact with some Soviet Ukrainian leaders he never returned to Ukraine. He devoted himself almost exclusively to his literary career.

Vynnychenko began writing while he was a student, during which time he produced stories depicting the working-class milieu, which he knew best. His first story, 'Krasa i syla' (Beauty and Strength, 1902), created a sensation and brought him almost immediate recognition. In both his heroes (the working classes, the *déclassé*, petty criminals, and, finally, revolutionaries) and his themes he abandoned the former populist didactic piety for the more risqué contemporary revolutionary life, which is often tinged with explicit sexual tensions and wry humor, and is presented in a dynamic, impressionistic narrative style and a language bold enough to use the most current patois (*surzhyk*). His short stories were extremely popular as a re-

sult. More a poser of problems than a stylist, Vynnychenko did not polish his work; often it seems hurried and even tendentious. The desire to postulate solutions to various social and moral problems led Vynnychenko to drama, where he could more readily examine, as if in a moral laboratory, the consistency of human behavior with the accepted morality, especially the morality of the 'new revolutionary man.' In the 20 plays he wrote (many of them translated and staged in various theaters of Europe) Vynnychenko examined closely the frequent disparity between deed and 'noble word,' aim and moral code. The proclaimed equality of the sexes is debunked in *Bazar* (Bazaar, 1910), the notion of spiritual love, in *Dysharmoniiia* (Disharmony, 1906), the acceptability of 'surrogate motherhood,' in *Zakon* (The Law, 1923), and the belief that 'a noble end justifies the means,' in *Hrikh* (The Sin, 1920). Other no less interesting plays are *Velykyi Molokh* (The Grand Moloch, 1907), *Brekhnia* (The Lie, 1910), and *Chorna pantera i bilyi vedmid* (The Black Panther and the White Bear, 1911). Having found that moral codes were often set to protect the interests of a dominant group, Vynnychenko sought to find a way in which humans could live a truly moral life, and came to the notion 'To thine own self be true' as the only viable moral law. Promulgated best in his novel *Chesnist' z soboiu* (Honesty with Oneself, 1906), the notion provoked misunderstanding and criticism. Vynnychenko was accused of strict individualism and total amorality.

In all, 11 novels appeared during Vynnychenko's lifetime, of which *Zapysky kyrpatoho Mefistofelia* (Notes of Pug-nosed Mephistopheles, 1917) and *Soniashna mashyna* (The Sun Machine, 1928; the first Utopian novel in Ukrainian literature) stand out. Of the three novels which appeared posthumously, *Slovo za Toboiu, Staline* (It's Your Word Now, Stalin, 1971) is interesting as an example of Vynnychenko's political thinking after he developed his own moral world order, which he called 'concordism.' He propagated that concept in the novel *Nova zapovid* (The New Commandment, 1949). Throughout his life Vynnychenko kept a detailed diary, of which two volumes have been published (*Shchodennyk* [Diary, vol 1, 1980; vol 2, 1983]). They provide some insight into his artistic, personal, and political life. Of historical interest is Vynnychenko's three-volume memoir of the struggle for Ukraine's independence, *Vidrodzhennia natsii* (Rebirth of a Nation, 1920).

Until recently Vynnychenko was proscribed in Ukraine, and his works have not been republished since the 24-volume edition of 1926–30. In the West interest in him was maintained primarily as a result of the efforts of H. *Kostiuk, under whose guidance the standing Commission for the Study and Publication of the Heritage of Volodymyr Vynnychenko was established at the Ukrainian Academy of Arts and Sciences in the US. The commission is the custodian of the Vynnychenko archives, housed at Columbia University in New York.

D.H. Struk

Ivanna Vynnykiv: *Flowers* (oil)

Vynnykiv, Ivanna (née Nyzhnyk), b 7 August 1912 in Lviv, d 10 January 1993 in Mougins, France. Painter and ceramist. She studied at the Novakivsky Art School in Lviv. In the 1930s she was a member of *RUB and the *Association of Independent Ukrainian Artists and took part in their exhibitions. Her portraits, landscapes, and still lifes combined an impressionist use of color with an expressionist brush stroke. A postwar refugee, Vynnykiv came to Paris to study art in 1948. She exhibited at the Salon d'Automne and Salon des Artistes Indépendants. From 1958 she lived in Mougins, near Cannes, in V. Vynnychenko's former home. There she founded a ceramics atelier with Yu. *Kulchytsky in 1960. More recently Vynnykiv created impressive, colorful wall hangings, using various fabrics. Some (eg, *Yaroslavna*) have a Ukrainian theme; others (eg, *Wedding Party* and *Three Riders*, in the Mougins town hall) treat more universal subjects.

Vynnykiv, Nataliia, b 1920, d 1942. Nationalist figure. In 1941 she was one of 59 OUN members arrested by the Soviet police and sentenced at a show trial in Lviv. Her death sentence was commuted to life imprisonment. After the German invasion of Ukraine she was released, but later she was executed by the Gestapo in Kiev.

Vynnyky. IV-5. A city (1989 pop 12,100) on the Marunka River just outside Lviv in Lviv oblast. It originated in the second half of the 13th century and attained city status in the late 19th century. Vynnyky is an industrial center with a tobacco factory, a branch of the Yunist Textile and Haberdashery Consortium, and a workshop of the Kharchoprodukt canning factory. It was one of the first places

in Galicia to erect a statue of T. Shevchenko. A Roman Catholic church in the baroque style (1737) has been preserved there.

Vynnytska, Iryna. See Pelenska, Iryna.

Vynnytsky, Antin [Vynnyč'kyj], b?, d 1679. Orthodox bishop. In 1650 he was consecrated bishop of Peremyshl, and in 1663 he was elected metropolitan of Kiev and ex-arch of the patriarch of Constantinople in Ukraine by the pro-Polish supporters of Hetman P. Teteria, who sought to block the candidacy of Y. *Neliubovych-Tukalsky, a supporter of P. Doroshenko. The latter candidate was also elected metropolitan (he served in 1663–75), however, and the two hierarchs divided the metropolity, with Vynnytsky gaining jurisdiction over the western Ukrainian eparchies (Galicia, Podilia, Volhynia) and Neliubovych-Tukalsky administering Right-Bank Ukraine, Belarus, and Lithuania. Vynnytsky remained in Galicia throughout his term. In 1667–8 he also served as administrator of Lviv eparchy. After the death of Neliubovych-Tukalsky he tried to assume control over the entire metropolity but was opposed by Moscow.

Vynnytsky, Inokentii [Vynnyč'kyj, Innokentij], b ?, d 1700. Bishop of Peremyshl. He was ordained by Y. Shumljansky as the Orthodox bishop of Peremyshl in 1680, and he secretly joined the Uniate church in 1681. The public declaration of his action and the open conversion of his eparchy were delayed, however, because of Vynnytsky's desire to be the sole Uniate bishop there. The 1691 transfer of the sitting Uniate bishop of Peremyshl, I. Malakhovsky, resolved the issue, and the whole eparchy formally joined the union in 1692. A biography of Vynnytsky by B. Balyk appeared in *AOBM* (1978).

Sydir Vynnytsky

Metropolitan Yurii Vynnytsky

Vynnytsky, Sydir [Vynnyč'kyj], b 1839, d 1922. Civic and political leader in Bukovyna. An active participant in the populist movement, he helped the populists gain control of the Ruska Rada society in 1885 and served as president of the People's Home in Chernivtsi (1887–98). In 1897–1901 he was a deputy to the Austrian parliament.

Vynnytsky, Yurii [Vynnyč'kyj, Juriij] (secular name: Havryil), b ?, d 22 November 1713. Uniate metropolitan. He studied at the Jesuit college in Peremyshl before entering the monastery in Lavriv in 1700. Later that year he was

consecrated bishop of Peremyshl. Vynnytsky reformed his eparchy, which had joined the Uniate church in 1692. He was administrator of Mukachiv eparchy from 1707 and of Lviv eparchy from 1708. In 1708 he was nominated as metropolitan of Kiev, but his installation was delayed until 1710 because his candidacy was opposed by the pope.

An 18th-century Catholic monastery in Vynohradiv

Vynohradiv. v-4. A city (1989 pop 25,200) on the Tysa River and a raion center in Transcarpathia oblast. Until 1946 it was known as Sevliush or Sevlus. The settlement originated in the 9th century around the Slavic fortress of Kanko. At the end of the 11th century it came under Hungarian rule and was renamed Sevliush. At the end of the 17th century it was annexed by Austria, and in 1919 it was awarded to Czechoslovakia. Officially part of Ukraine since 1945, it was granted city status in 1946. Today the city is an industrial and communications center. It is the home of the Elektron Manufacturing Consortium, a plastic sanitary-products plant, and sewing, footwear, canning, and cheese factories. Its architectural monuments include the remains of the medieval castle, the Perényi palace (15th century), a Franciscan church (14th–15th century), and a 16th-century church.

Vynohradov, Andrii, b 14 October 1875 in Suzdal, Vladimir gubernia, Russia, d 2 November 1933 in Donetsk. Metallurgist. He studied in Katerynoslav (now Dnipropetrovske) and taught at the Dnipropetrovske (1908–31) and Donetsk (from 1931) mining institutes. He

made important discoveries and inventions in the field of the granular structures of steel. In particular he obtained a fundamental physical and structural understanding of the grain structure of high-strength Damascus-type steels. He also developed a basic theoretical concept of the effect of the laminar structure in steel on its wear resistance, and the effect of rolling on the laminar structure. A biography of Vynohradov, by E. Shevchenko, was published in Kiev in 1951.

Vynohradsky, Serhii [Vynohrads'kyj, Serhij] (Winoogradsky, Sergei), b 13 September 1856 in Kiev, d 31 August 1946 in Brie-Comte-Robert, near Paris. Microbiologist; corresponding member of the Russian Academy of Sciences from 1894, honorary member of the USSR Academy of Sciences from 1923, and member of the French Academy of Sciences (Institut de France), the Royal Society of London, and scientific societies in Germany, Sweden, Italy, Czechoslovakia, Holland, India, and the United States. After graduating from the natural sciences faculty of St Petersburg University (1881, PH D 1884) he did research on the physiology of sulfur bacteria at Strasbourg University (1885–8) and discovered the phenomenon of autotrophism (1887). At Zürich University (1888–91) he studied microbial agents in oxidization and nitrification and isolated two new genera (*Nitrosomonas* and *Nitrosococcus* or *Nitrobacter*) in the latter process. Vynohradsky was head of the microbiology division at the Institute of Experimental Medicine in St Petersburg (1891–1905, director from 1902), where he discovered that certain anaerobic organisms use atmospheric nitrogen in metabolic processes. With V. Omeliansky and D. Zabolotny he analyzed the hydrolysis of cellulose. From 1922 he led the agricultural microbiology laboratory of the Pasteur Institute in Paris. His discoveries concerning the physiology of nitrification and nitrogen fixation by soil bacteria helped to establish bacteriology as a major biological science.

Ye. Roslytsky

Vynohradsky, Vitalii [Vynohrads'kyj, Vitalij], b 24 October 1925 in Lebedyn, now in Sumy oblast. Writer. A former editor of the papers *Prykarpats'ka pravda* (Ivano-Frankivske) and *Literaturna Ukraïna* (1975–80), he is the author of the prose collections *Hlybynni shliakhy* (Interior Roads, 1966), *Katrusyna dolia* (Katrusia's Fate, 1967), *Chekai mene na svitanku* (Await Me at Dawn, 1973), and *I nastav svitanok* (And Dawn Arrived, 1979, 1986).

Vynokurov, Serhii, b 4 May 1899 in Odessa, d 1955. Physician and biochemist. In the 1920s he conducted research in the department of pathophysiology at Odessa University and in the Ukrainian Biochemical Institute in Kharkiv. He was the founder and director of the Kharkiv Institute of Nutrition. He was a professor at medical institutes in Kharkiv (1932–8) and Kiev (1938–55) and headed the vitamin laboratory of the AN URSR (now ANU). He wrote numerous scientific works, including textbooks on the physiology of digestion.

Vynsky, Hryhorii [Vynskyj, Hryhorij], b 1752 in Pochep, Starodub regiment, d after 1818. Writer. A Ukrainian petty noble, he studied at the Kievan Mohyla Academy. Vynsky served in the Russian army in St Petersburg (1770–5) and lived there until 1779, when he was imprisoned for his freethinking (he translated and disseminated

works of the French Enlighteners) and was forced to live in exile in Orenburg gubernia. He stayed there after being amnestied in 1805. Late in his life he wrote his memoirs, *Moë vremia* (My Time, pub 1914); they are a valuable source for the study of Ukrainian society in the late 18th century.

Vyra. The highest monetary penalty imposed for the killing of a free man in Kievan Rus'. It was paid to the prince by the transgressor who had escaped blood vengeance. With the abolition of vengeance, it became the only penalty for killing, and was imposed by the ruler on the murderer, or on the community if the offender was unidentified (it was then called a *verov*). The rate was 40 *hryvni* for killing a free man; 80 *hryvni*, an official of the prince; and 20 *hryvni*, an unfaithful wife or a handicapped individual. There was no *vyra* for a slave, only compensation for loss of property. **Ruskaia Pravda* mentions a *vyra* for libel. The *vyra* was collected by a special official known as a *vyrnyk*.

Vyrhan, Ivan (pseud of Verhun), b 1 June 1908 in Matviivka (now Klishchyntsi), Zolotonosha county, Poltava gubernia, d 12 January 1975 in Kharkiv. Poet and prose writer. He was a member of the literary organization *Pluh and began to publish his work in 1927. He was arrested in 1940, and from 1941 to 1944 he was imprisoned in labor camps in the Soviet Arctic. He published the collections of verse *Ozbroïena lirika* (Armed Lyricism, 1934), *Sad druzhby* (The Garden of Friendship, 1935), and *Shchastia-dolia* (Fortune-Fate, 1938). His collections of verse from the postwar period include *Povorot sontsia na lito* (The Return of the Sun to Summer, 1947), *Kvituchi berehy* (The Blossoming Banks, 1950), *V rozpovni lita* (In the Fullness of Summer, 1959), *Nad Suloiu shumliat' iavory* (The Maples are Rustling on the Banks of the Sula, 1960), and *Sertse* (Heart, 1969). He also published the collections of short stories *Vasylyna* (1960), *Darynka z bratykom* (Darynka and Her Brother, 1961), and *Krasa* (Beauty, 1966). He compiled a Ukrainian-Russian phraseological dictionary together with his wife, M. Pylynska, which was published in the journal *Prapor*.

Yevhen Vyrovyy (portrait by Kateryna Antonovych)

Vyrovyy, Yevhen [Vyrovyyj, Jevhen], b 26 February 1889 in Smila, Cherkasy county, Kiev gubernia, d 17 May 1945 in Prague. Educator and civic activist. After graduating from a teachers' institute in Hlukhiv he taught in a commercial school in Katerynoslav (1910–19). He presided

over the local Prosvita society, belonged to the Society of Ukrainian Progressives, and contributed to the paper *Dniprova khvyliia*. In 1919 he chaired the cultural-educational commission of the Labor Congress in Kiev. He was the founder and director of *Ukrainske Vydavnytstvo in Katerynoslav, and he continued to publish books even after he had left for Kamianets-Podilskyi and emigrated to Berlin and then Prague. He also directed the *Ukrainian Civic Publishing Fund in Prague. He contributed articles to *Knyholiub* and edited several stamp albums. His collection of Ukrainian stamps was displayed at international exhibitions and became widely known. As NKVD agents arrived at his apartment to arrest him, Vyrovny committed suicide.

Arystyd Vyrsta

Vyrsta, Arystyd (Wirsta, Aristide), b 22 March 1922 in Barbivtsi, Bukovyna. Musicologist, teacher, and violinist; member of the Shevchenko Scientific Society (since 1977). He received his PH D degree in musicology from the Sorbonne (1974). In 1950 he was engaged as concertmaster by the Belo Horizonte Symphony Orchestra in Brazil. He was subsequently soloist of chamber orchestras in Vienna, Rome, and Paris. He was on the music faculty of the Sorbonne (1975–87), where he lectured on musicology. Since 1976 he has been a professor at the Ukrainian Free University (Munich). Vyrsta has contributed articles on Ukrainian music and musicians to French, German, and English music encyclopedias.

Vyrsta, Temistokl (Wirsta, Themistocle), b 15 October 1923 in Ispas, Bukovyna. Painter; brother of A. Vyrsta. He studied architecture at the Royal Academy in Bucharest and art at the Academy of Fine Arts in Paris. A postwar refugee, since 1950 he has lived in Paris, where he worked as an architect until the late 1950s. His early paintings were figurative. Later he became a lyrical expressionist, stressing color rather than form or composition, and ultimately he evolved into an abstractionist. Some of his works depict imaginary landscapes and flowers and employ various light effects. Solo exhibitions of his works have been held in Paris (1959), Bern (1964), Ancona, Italy (1967), Montreal (1970), Detroit (1970), New York (1982), and Toronto (1982). An album of his works was published in Paris in 1975.

Vyshcha Shkola (Higher School). A state publishing conglomerate founded in 1973, consisting of the Vyshcha

An acrylic painting by Temistokl Vyrsta

Shkola publishing house (est 1968) in Kiev, which maintains editorial offices at Donetsk and Odessa universities; the university publishing houses of Kiev (est 1949), Kharkiv (est 1949), and Lviv (est 1946); and the Chief Editorial Office of the *Ukrainska Entsyklopediia*. The conglomerate prints and publishes educational and research materials, textbooks, scholarly monographs, and serials (eg, *Ukrains'ke movoznavstvo*, *Ukrains'ke literaturoznavstvo*, *Inozemna filolohiia*, *Problemy slov'ianoznavstva*, *Zhurnalistyka*, *Bibliotekoznavstvo i bibliohrafiia*, and *Polihrafiia i vydavnycha sprava*) produced by faculty members of, and used at, Ukraine's postsecondary, technical, and specialized secondary schools, as well as reprints of classic and representative works of Ukrainian, Russian, and foreign literature. In 1979 the Vyshcha Shkola publishing house issued 650 books and brochures with a combined press-run of 5.3 million copies.

Vyshensky, Ivan [Vyšens'kyj] (pseud: Feodul), b ca 1550 in Sudova Vyshnia, Galicia, d after 1620 in Mt Athos, Greece. Orthodox monk and polemicist. Biographical information on him is sparse. He passed some of his youth in Lutske and was connected with the *Ostrih Academy scholars (eg, H. Smotrytsky). Ca 1576–80 he entered a monastery at Mt Athos. There are 15 known works by Vyshensky: seven epistles, six treatises, a dialogue, and a story. His most important works were directed against the Church Union of *Berestia and were written in the late 1590s. In 1600–1 he prepared a collection of the 10 works he had written by then and sent it to the Lviv Dormition Brotherhood, probably in the hope of having it printed. Titled 'Knyzhka' (Book), it did not appear in print at that time, but its transcriptions circulated widely in Ukraine. In 1604–6 he visited Ukraine and quarreled with the leaders of the Lviv Brotherhood.

Vyshensky's writings stand out among Ukrainian polemical works of the 16th and 17th centuries by virtue of both their literary merit and their ideological content. He did not simply reject the Uniate church and Catholicism.

Grounded in Byzantine asceticism, he sharply criticized temporal life and the entire church and secular hierarchy and urged a return to the simplicity of old Christian brotherhood in order to bring about God's Kingdom on earth. He rejected as pagan both secular education and learning on the one hand and old, pre-Christian folk traditions on the other. Stylistically, Vyshensky drew upon the traditional forms of the epistle dialogue and polemical treatise and often mixed these genres. In strong, colorful language he depicted the moral decadence of the upper classes, particularly of the clergy, and contrasted them with poor peasants and simple monks. Exalted feelings alternate with harsh satire and sarcasm. An abundance of epithets and similes, the dramatic use of rhetorical questions and exhortations, ironic portrayals of everyday detail, a rich vocabulary, and the use of the vernacular make his writings lively and persuasive. His style owes much to Byzantine sermons and is closely related to the polemical writings of his Ukrainian (M. Smotrytsky) and Polish (P. Skarga, M. Rej) contemporaries. It is one of the finest examples of the baroque style. Published first in *Arkhiv Iugo-Zapadnoi Rossii* (1887), his works were studied by I. Franko, A. Krymsky, I. Zhytetsky, M. Sumtsov, M. Hrushevsky, M. Vozniak, D. Chyzhevsky, V. Peretts, O. Biletsky, L. Makhnovets, A. Pashuk, S. Pinchuk, P. Yarenko, and Valerii Shevchuk, among others. I. Eremin prepared two editions of Vyshensky's works (1955, 1959), and Shevchuk has translated them into contemporary Ukrainian (1986).

Vyshhorod [Vyshorod]. III-11. A city (1989 pop 18,700) on the Dnieper River and a raion center in Kiev oblast. It is first mentioned in the chronicles under the year 946, as the residence of Princess *Olha. Vyshhorod was a strategic fortress that defended the northern approach to Kiev. It repelled Cuman attacks in 1093, 1136, and 1146. In 1240 it was destroyed by the Mongols. In the 15th and 16th centuries Vyshhorod was merely a village owned by the Mezhyhiria Transfiguration Monastery. In 1934-37 and 1947 archeologists uncovered the remains of houses and smithing, bronzing, and pottery implements. In 1968 Vyshhorod was promoted to city status. It is the site of the Kiev Hydroelectric Station and of the first accumulation power station built in the USSR.

Vyshkivskiy Pass [Vyshkivs'kyj pereval] (aka Torunskiy pereval). V-4. A Carpathian mountain pass (elevation 988 m) between the Rika and the Mizunka rivers along the border between Ivano-Frankivske and Transcarpathia oblasts. A highway connecting Dolyna and Khust passes through it.

Vyshkove [Vyshkove]. A town smt (1988 pop 8,300) on the Tysa River in Khust raion, Transcarpathia oblast. It was first mentioned in historical documents in 1271. In 1976 the village was given smt status. Surrounded by oak and beech forests, it is the home of the Transcarpathian Mercury Research and Application Complex and quarries

of building stone. Archeologists have discovered the remains of a Ukrainian settlement from the 13th and 14th centuries in the town.

Vyshnevetska, Raina [Vyshnevec'ka, Rajina] (née Mohylianska), b 1589, d 1619. Distinguished Ukrainian benefactor in the 17th century; daughter of the Moldavian hospodar J. Movilă; first cousin of the Kiev metropolitan P. Mohyla. She married Prince *Michal Korybut Wisniowiecki, the palatine of Kiev; J. *Wisniowiecki was their son. Vyshnevetska opposed the Polish persecution of the Ukrainian Orthodox church and supported the Orthodox clergy, especially I. Kopynsky. She was a patron of monasteries in Pryluka, Hustynia, Ladan, and Lubni.

Vyshnevetsky. See Wisniowiecki.

Prince Dmytro Vyshnevetsky

Vyshnevetsky, Dmytro [Vyshnevec'kyj] (Wisniowiecki), b ?, d 29 October 1563 in Istanbul. The first Cossack otaman in the history of Ukraine, a founding member of the Cossack nobility, and a landowner in southern Volhynia; nephew of K. Ostrozky. In the 1550s he was starosta of Cherkasy and Kaniv. He built a fort (ca 1552) on the island of Mala *Khortytsia, in the Dnieper River. He recruited Cossacks for war against the Tatars, which he waged with the help of Lithuania and Muscovy, and he traveled to Turkey to enlist the aid of the Ottoman Empire in 1553. In 1557-61 he served the Muscovite government and then again organized wars against the Tatars, but his attempts to form an alliance to do battle in the Crimea failed in 1561. In 1563, during a military campaign in Moldavia, he was defeated, taken prisoner by the Turks, and executed. Vyshnevetsky is the hero of the folk song about Baida. Soviet historians disputed the fact that he founded the *Zaporozhian Sich and that he is the folk hero Baida.

Vyshnevetsky, Mykhailo. See Michal Korybut Wisniowiecki.

Vyshnevsky, Ahapyt [Vyšnevs'kyj] (Antonii), b 16 July 1867 in Volhynia, d 1926? Ukrainian bishop of the Russian Orthodox church. A graduate of the Kiev Theological Academy (1896), he served as bishop of Uman (from 1902), Chyhyryn (from 1908), and Katerynoslav (from 1911). After 1917 he supported the movement for the autocephaly of the Ukrainian church and the Ukrainization of his eparchy. He also took part in meetings with the government of the Ukrainian National Republic and S. Petliura, which participation led a Russian ecclesiastical court to relieve him of his duties and force his retirement. He was arrested by the Soviet authorities in 1922 and died in incarceration.

Vyshnevsky, Dmytro [Vyšnevs'kyj], b 1871, d ? Historian; specialist in the history of education in Ukraine. He wrote *Kievskaiia akademiia v pervoi polovine 18 st.* (The Kiev Academy in the First Half of the 18th Century, 1903) and a series of articles in *Kievskaiia starina* on the life of the students of the Kievan Mohyla Academy (1896, nos 1–3), the wages of the professors (1896, no. 6), and the general educational policy of the academy (1904, no.2).

Vyshnevsky, Karl [Vyšnevs'kyj], b 11 October 1805, d 3 April 1863 in Verbka, Liatychiv county, Podolia gubernia. Veterinarian. A graduate of Vilnius University (1830), he was a professor at Kharkiv University (from 1837) and founder of its practical veterinary school (1839). He was the first in the Russian Empire to raise the issue of insuring livestock. His publications in Russian, Polish, and Latin dealt with cattle plague, glanders, and influenza.

Vyshnevsky, Volodymyr [Vyšnevs'kyj], b 20 July 1897 in Tesluhiv, Dubno county, Volhynia gubernia, d 5 July 1961 in Paris. Orthodox church leader. A graduate of the Orthodox theological faculty of Warsaw University (1928), in 1928–39 he served as a priest in Podlachia and carried out missionary work in 50 parishes in the region. During the Second World War (1941–3) he administered 84 parishes of the *Ukrainian Autocephalous Orthodox church (UAOC) in the Kovel region and then became secretary to Archbishop N. Abramovych (1944). From 1948 he was a parish priest in Paris; later he was administrator of the UAOC in France (from 1950) and in Switzerland, Italy, and Spain (from 1953). Vyshnevsky was also secretary of the Synod of the UAOC (from 1952) and a member of the Higher Council (1956).

Vyshnia, Ostap [Vyšnja] (pseud of Pavlo Hubenko), b 11 November 1889 in Chechva (now Hrun), Zinkiv county, Poltava gubernia, d 28 September 1956 in Kiev. Writer, humorist, and satirist. He participated in the struggle for Ukrainian independence in 1917–20 and moved to Kamianets-Podilskiy with the UNR government in 1919, where he began publishing a column in Ukrainian newspapers. He was imprisoned by the Soviets in 1920 and released in 1921 as a result of the intervention of V. *Blakytny. He continued publishing his feuilletons, in the newspapers *Visti*, *Selians'ka pravda*, and *Radians'ke selo* and in the journal *Chervonyi perets*. From 1920 to the early 1930s Vyshnia published a number of collections of his writings, including *Dila nebesni* (Heavenly Doings, 1923), *Komu vesele, a komu sumne* (For Some It's Funny, For Some It's Sad, 1924), *Rep'iashky* (Little Burrs, 1924), *Lytsem do sela* (Facing the Village, 1926), and *Ukrainizuiemos'* (We Are

Ostap Vyshnia

Becoming Ukrainized, 1926). There was also a series of thematic collections, including *Vyshnevi usmishky sil's'ki* (Vyshnia's Rural Merriment, 1923), *Vyshnevi usmishky kryms'ki* (Vyshnia's Crimean Merriment, 1925), *Vyshnevi usmishky literaturni* (Vyshnia's Literary Merriment, 1927), *Vyshnevi usmishky teatral'ni* (Vyshnia's Theatrical Merriment, 1927), and *Vyshnevi usmishky zakordonni* (Vyshnia's Merriment from Abroad, 1930). Owing to his popularity among the peasantry, Vyshnia's works had one of the largest pressruns among Ukrainian writers in the 1920s.

In 1933 Vyshnia was charged with nationalism and plotting terrorist actions against the Party leadership. He was arrested and imprisoned in various northern concentration camps, whence he was released in 1943. His collection of war writings, *Zenitka* (The Anti-Aircraft Gun, 1944), those directed against Ukrainian nationalists, *Samostiina dirka* (The Independent Little Hole, 1945), and his later works, including *Vesna – krasna* (Spring Is Beautiful, 1949), *Mudrist' kolhosna* (Collective-Farm Wisdom, 1952), *A narod viiny ne khoche* (But the People Don't Want a War, 1953), and *Velyki rostit'* (May You Prosper, 1955), were written in the spirit of the official Party line and were not as well received as those of the 1920s. Several editions of Vyshnia's complete works have been published, including *Usmishky* (Merriment, 4 vols, 1928), and *Tvory* (Works, 2 vols, 1956; 7 vols, 1963–5; and 5 vols, 1974–5). A small selection of his stories appeared in English translation as *Hard Times* (1981).

I. Koshelivets

Vyshnivets or Vyshnevets [Vyšnivec' or Vyšnevec']. IV-6. A town smt (1988 pop 4,100) on the Horyn River in Zbarazh raion, Ternopil oblast. It was first mentioned in historical documents in 1395. For about two centuries (mid-16th to 1744) it was the residence of the *Wiśniowiecki family, who built a castle (1640), a Carmelite monastery (17th century), and a palace (1720) there. It was captured by B. Khmelnytsky's Cossacks in 1648 and destroyed by the Tatars in 1653, 1666, and 1672. At the partition of Poland in 1793, the village became part of Kremianets county in Volhynia gubernia. In 1846 it was visited by T. Shevchenko, and in 1848, by H. de Balzac. It became a town smt in 1960. Today its old park, palace, and 17th-century castle ruins are tourist attractions.

Vyshnivsky, Oleksander [Vyšnivs'kyj], b 12 August 1890 in Zalyvna, Oleksandrivske county, Katerynoslav gubernia, d 12 October 1975 in Detroit. Senior army officer. A regular officer in the Russian army during the First World War, he joined the UNR Army in 1917. In the

Col Oleksander Vyshnivsky

Dmytro Vyslotsky

following three years he commanded, at the rank of colonel, the First Regiment of the Bluecoats, the Seventh Regiment of the Third Iron Rifle Division, and the Third Separate Cavalry Regiment. He distinguished himself and was seriously wounded in action near Vapniarka in July 1919. In the interwar period he lived in Poland, and after the Second World War he emigrated to the United States. He was promoted to major general by the UNR government-in-exile. He wrote *Povstans'kyi rukh i otamaniiia* (The Partisan Movement and Warlordism, 1973) and *Trahediiia 3-oi divizii Armii UNR* (The Tragedy of the Third Division of the UNR Army, 1963).

Vyshyvany, Vasyl. See Habsburg-Lothringen, Wilhelm.

Vyslotsky, Dmytro [Vysloc'kyj] (pseud: Vano Hunianka), b 4 November 1888 in Labova, Nowy Sącz county, Galicia, d 27 December 1968 in Lviv. Lemko community leader, journalist, and writer. As a law student at Lviv University he edited the socialist paper *Lemko* (1912), in which he printed his own verses, stories, and articles. During the war he was imprisoned in the *Thalerhof concentration camp and sentenced to death. Saved by a general amnesty, he emigrated to Canada (1922) and then to the United States (1927), where he set up the semimonthly *Lemko*. He was one of the founders of the first branch of Lemko-Soiuz in Winnipeg. At the first national convention of Lemko-Soiuz in 1931 he was elected secretary and editor of its weekly paper *Lemko*. Besides editing *Lemko* and its successor, *Karpats'ka Rus'* (1939-45), he wrote plays, short stories, songs, and political pamphlets in the Lemko dialect. In 1946 he returned to Ukraine and settled in Uzhhorod, where he continued to write articles and literary pieces for the communist press in the United States.

Vyslotsky, Oleksander [Vysloc'kyj], b 1897 in Hai Starobridski, Brody county, Galicia, d ? Civic and political activist. During the First World War he served in the Ukrainian Sich Riflemen and then headed the Brody county branch of the Ukrainian National Democratic party. In 1928 he was elected to the Polish Sejm. In 1940 he was arrested by the Soviet secret police and disappeared in prison.

Vysochan, Hnat [Vysočan], b and d ? A 17th-century Galician peasant leader. Born in Vyktoriv village near Halych, he founded the villages of Sloboda Vysochanska and Bodnariv, and he is mentioned in municipal documents of Halych (1609). In the early 1620s he organized a peasant detachment, which attacked Tatar raiding parties on their way to the Crimea and freed their captives. The force also staged rebel actions against local feudal lords. It was active for over 20 years and grew to approx 15,000 in number. With the outbreak of the Cossack-Polish War in 1648, Vysochan sided with B. Khmelnytsky against the Poles and led an uprising in the Pokutia region, during which he was seriously wounded. His son, Semen, then took over the detachment.

Vysochan, Semen [Vysočan], b ? in Vyktoriv near Halych, Galicia, d 1666. Cossack officer; son of H. Vysochan. A graduate of the Lviv Dormition Brotherhood school, he succeeded his father as leader of a guerrilla regiment consisting of approx 15,000 peasants, which operated in Pokutia in 1648 and was headquartered in Otynia (Hutsul region). Despite some initial successes the uprising in Galicia was quelled by Polish forces, and Vysochan and a number of his followers were forced to retreat to Bratslav. He later distinguished himself at the siege of Vinnytsia in 1651, and in 1661 he became colonel of Lysianka regiment. He was arrested by I. Briukhovetsky in 1666 and exiled to Siberia. Vysochan's exploits provided the basis for T. Mykytyn's historical novel *Polkovnyk Semen Vysochan* (Colonel Semen Vysochan, 1968).

Vysochansky, Pavlo [Vysočans'kyj], b June 1892 in Viknyne, Zvenyhorodka county, Kiev gubernia, d ? Organizer and historian of the co-operative movement. From 1915 he organized Ukrainian co-operatives in the Poltava region. Then he served on the executives of the Dni-prosoiuz co-operative (1919-21), the All-Ukrainian Association of Consumer Co-operative Organizations (1922-3), and the Ukrainbank. From 1927 he directed the Kiev Co-operative Institute. He wrote several works on the Ukrainian co-operative movement, including *Nacherk rozvytku ukraïns'koi spozhyvochoi kooperatsii* (An Outline of the Development of Ukrainian Consumer Co-operatives, 2 vols, 1925), *Korotka istoriia kooperatyvnoho rukhu na Ukraïni* (A Short History of the Co-operative Movement in Ukraine, 1925), *Kooperatyvnyi prodazh* (Co-operative Selling, 1928), and *Kooperatyvnyi kredyt* (Co-operative Credit, 1929). He was arrested in 1930 and exiled to Saratov. After serving his term he directed the financial department of a mining concern in Karaganda. He was last heard from in 1941.

Vysokopillia [Vysokopillja]. VI-14. A town smt (1988 pop 5,000) and raion center in Kherson oblast. It was founded in 1869 by German colonists from Tavriia gubernia and was called Kronau until 1915. Today it is an agricultural town with several food-processing enterprises.

Vysokovykh, Volodymyr [Vysokovyč], b 28 January 1854 in Haisyn, Podilia gubernia, d 26 May 1912 in Kiev. Anatomical pathologist, bacteriologist, and epidemiologist. A graduate of Kharkiv University (1876), from 1895 he was a professor at Kiev University. He helped organize and taught at the Women's Medical Courses in Kiev and directed efforts to control the plague and cholera in

Kharkiv (1892), Bombay (1896), Odessa (1902, 1910), and Kiev (1906). His chief achievement was the discovery of the reticuloendothelial system, and he wrote *O kholere* (On Cholera, 1907) and *Patologicheskaiia anatomiia* (Pathological Anatomy, 2 vols, 1911, 1913).

Vysokyi [Vysokyj]. A town smt (1988 pop 14,100) in Kharkiv raion, Kharkiv oblast. It was founded in 1903. Most of the residents work in Kharkiv. The town has two children's sanatoriums, a rest home, and several camping grounds.

Vysotske culture. A late Bronze to early Iron Age culture of the 10th to 6th centuries BC that existed in the area of Lviv and Ternopil oblasts. It was named in the 1930s after a site excavated near Brody. The people of this settlement lived in unfortified settlements located along rivers in semi-pit dwellings. Major economic activities included agriculture, animal husbandry, and metalworking. Full body burial with the deceased placed in a supine position was the culture's norm, although cremation was also common. Artifacts unearthed at excavations included tulip-shaped and biconical pottery, earthenware sculptures decorated with bird images, stone and metal implements and weapons, and bronze adornments.

Vysotsky, Serhii [Vysoc'kyj, Serhij], b 15 July 1923 in Poltava. Historian and archeologist. After graduating from Kiev University (1956) he worked at the St Sophia Museum and the AN URSR (now ANU) Institute of Archeology (from 1967; as a section head from 1981). He has specialized in the history and culture of Kievan Rus', particularly graffiti and frescoes, and he was one of the managers of the restoration of Kiev's *Golden Gate. His works include *Zolotyie vorota v Kieve* (The Golden Gates in Kiev, 1982) and *Kievskie graffiti XI-XVII vv.* (Kievan Graffiti of the 11th–17th Centuries, 1985).

Yurii (Heorhii) Vysotsky

Illia Vytanovych

Vysotsky, Yurii [Vysoc'kyj, Jurij] (Heorhii), b 19 February 1865 in Mykytivka, Hlukhiv county, Chernihiv gubernia, d 6 April 1940 in Kharkiv. Forester and soil scientist; full member of the All-Union Academy of Agricultural Sciences from 1934 and of the AN URSR (now ANU) from 1939. He graduated from the Petrovskoe Agricultural Academy near Moscow in 1890. He joined V. Dokuchaev's expedition to study the causes of drought in Southern Ukraine and oversaw the forestation works at the *Ve-

lykoanadol Forest Project in the Mariupol region (1892–1904). He taught at Kiev University (1917–19) and was appointed a professor at Tavriia University, the Crimean Agricultural Institute, and the Belarusian Agricultural Institute in Minsk (1923–6). He served as a department head at the Kharkiv Institute of Agriculture (1926–30) and as consultant at the All-Union Scientific Research Institute of Forest Management and Agroforest Amelioration in Kharkiv (1930–40). He was a leading authority on steppe soils and a founder of soil hydrology in arid regions. Vysotsky introduced the oroclimatic classification table for soils, first calculated the forest and field moisture balance, and developed the theory of the transgressive role of forests. His numerous scientific works include *Pokrovovedenie* (Topsoil Science, 1925) and *Materialy po izucheniiu vodookhrannoï i vodoreguliruiushchei roli lesov i bolot* (Materials for the Study of the Water-Conserving and Water-Regulating Role of Forests and Marshes, 1937). Collections of his selected works were published in 1960 and 1962.

Vysova (Polish: Wysowa). IV-2. A Lemko village on the Ropa River, now in Gorlice county, Nowy Sącz voivodeship, Poland. Because of its mineral springs it developed into a health resort in the 19th century. In the 1930s an average of 700 patients a year visited Vysova. A Lemko wooden church from the early 19th century has been preserved there. In 1939, 890 of Vysova's 1,020 inhabitants were Ukrainian.

Vysun River [Vysun']. A right-bank tributary of the Inhulets River that flows for 196 km through Mykolaiv oblast and drains a basin area of 2,670 sq km. The river is up to 20 m wide and 0.8 to 1.5 m deep, with a valley (in its lower reaches) up to 3 km wide. It is used for water supply and irrigation, although sections of it dry up routinely in the summer months.

Vytanovych, Illia [Vytanovyč, Illja], b 9 August 1899 in Burshtyn, Rohatyn county, Galicia, d 30 December 1973 in New York. Historian, pedagogue, and co-operative activist; member of the Shevchenko Scientific Society from 1933. He served in the ranks of the Ukrainian Sich Riflemen, the Ukrainian Galician Army, and the Army of the UNR. He studied at Lviv (Underground) Ukrainian University and Lviv University (1923–7), taught at the economic school of the Ridna Shkola society (1927–37), and directed the Co-operative Lyceum in Lviv (1937–40). A postwar refugee, he was a professor at the Ukrainian Technical and Husbandry Institute and the Ukrainian Free University in Munich from 1946 and then emigrated to the United States in 1949. He was a longtime associate of *Entsyklopediia ukraïnoznavstva* (Encyclopedia of Ukraine) and a founding member of the Ukrainian Historical Association. He wrote on economic history, in which field is his major work, *Istoriia ukraïns'koho kooperatyvnoho rukhu* (History of the Ukrainian Co-operative Movement, 1964). He also wrote studies of the Cossack army under Hetman P. Sahaidachny and of the methodology and historiography of M. Hrushevsky.

Vytautas the Great (Polish: Witold; Ukrainian: Vytovt'), b 1350 in Lithuania, d 27 October 1430 in Trakai fortress, on an island in Lake Galvė, Lithuania. Grand duke of Lithuania from 1392; grandson of Gediminas and brother

of *Žygimantas. Vytautas stood for Lithuanian independence and allied with the *Teutonic Knights to oppose the union with Poland that was advocated by his cousin, King Jagiełło (Jogaila). In 1384, fearing the growing power of the order, he was reconciled with Jagiełło, who granted him the rule of Hrodna, Brest-Litovsk, and Podlachia. After the death of Liubartas (1385) he annexed Volhynia, including Lutske and Volodymyr. When Jagiełło chose *Skirgaila to rule Lithuania (1387), however, Vytautas again enlisted the support of the Teutonic Knights, as well as Muscovy. He besieged and devastated Vilnius, and in 1392 he was again reconciled with Jagiełło, whereupon he was granted the rule of the whole Grand Duchy of Lithuania.

In order to strengthen his position Vytautas began taking over the lands of Ukrainian and Belarusian appanage princes, and in 1396 he deposed Jagiełło's brother, the Kievan prince Volodymyr (son of Algirdas). He also defeated the princes of Podilia, Volhynia, and Chernihiv and became resolutely anti-Muscovite in his policies. He signed treaties with the Russian princes of Tver, Riazan, and Pronsk, who were against Moscow's centralist policy, and in 1395 he took over Smolensk, an important strategic and commercial center. Vytautas built fortifications in the south and expanded the borders of the *Lithuanian-Ruthenian state, particularly to the south and east, where they reached the Black Sea between the lower Dnieper and the Dniester rivers. He was defeated in 1399, however, at the Vorskla River in a joint Ukrainian-Belarusian-Lithuanian campaign against the Tatars, and the defeat forced him into another alliance with Poland. It took Vytautas nearly 10 years to regain control of the eastern lands. He recaptured Smolensk in 1404, and in 1410 he and Jagiełło crushed the Teutonic Knights at Tannenberg and halted their eastward advance. The joint victory strengthened the Polish-Lithuanian union, and the formal Union of *Horodlo was signed in 1413. During the remainder of his rule Vytautas contributed to the expansion of trade and artisanship in Lithuanian-ruled territory, and he introduced *Magdeburg law in many of its cities. But the limitation of the political rights of Orthodox citizens aroused considerable hostility against Vytautas among Ukrainian and Belarusian noblemen, who turned to *Švitrigaila for support.

A. Zhukovsky

Vytvytsky, Ivan [Vytvyč'kyj], b 1901 in Vytvytsia, Doly-na county, Galicia, d late August 1939. Journalist. A veteran of the Ukrainian Galician Army, after the First World War he studied law at Lviv University and became a member of the Ukrainian Military Organization. While working as an editor for the newspaper *Novyi chas* in Lviv, he received a scholarship from I. Tyktor to study journalism in Berlin. After returning to Lviv in 1934, he wrote on international politics for *Novyi chas*. In his articles and public talks he especially criticized Hitler's *Mein Kampf*. In the general panic that preceded the Nazi invasion of Poland he was arrested by the Polish police and shot.

Vytvytsky, Stepan [Vytvyč'kyj], b 13 March 1884 in Uhornyky, Tovmach county, Galicia, d 19 October 1965 in New York. State figure and political activist. While studying law at the universities of Lviv and Vienna he headed the Academic Hromada in Lviv and the Sich society in Vi-

Stepan Vytvytsky

enna. He was a cultural and civic activist in Drohobych county. In 1915–18 he was a member of the editorial board of the newspaper *Dilo*, editor of the weekly *Svoboda* in Lviv, a member of the Ukrainian *National Democratic party and of the political committee which prepared the declaration of 1 November 1918 by the *Ukrainian National Rada, and secretary of the Rada. As a member of the delegation from the Western Ukrainian National Republic (ZUNR) to the Labor Congress in Kiev he participated in the ratification of the union of the UNR and ZUNR on 22 January 1919. He became state secretary of external affairs, and he represented the Western Province of the UNR in negotiations with the Entente for a truce with Poland. In November 1919 he was deputy to the head of the UNR Directory's mission in Warsaw, a position from which he resigned in protest against the Treaty of Warsaw (1920). Vytvytsky directed the Department of External Affairs of the ZUNR government-in-exile in Vienna, and in 1921–3 he headed the ZUNR missions in Paris and London. In 1924–39, after returning to Galicia, he worked as a lawyer and was active in the leadership of the *Ukrainian National Democratic Alliance (UNDO) in Drohobych. He was an UNDO representative to the Polish Sejm (1935–9) as well as deputy head of UNDO and of the *Ukrainian Parliamentary Representation (from 1938). As a postwar refugee Vytvytsky was vice-president of the *Central Representation of the Ukrainian Emigration in Germany (1945) and participated in establishing the *Ukrainian National Council; he became vice-president of its executive organ and director of its office of external affairs in 1949. In 1951 he emigrated to the United States, and he represented the executive organ there. He was elected president of the *Government-in-exile of the UNR in 1954 and re-elected at its fifth session in 1961.

A. Zhukovsky

Vytvytsky, Vasył. See Wytwycky, Wasyl.

Vytvytsky, Yosyp Dominik [Vytvyč'kyj, Josyp], b 1813 in Volhynia gubernia, d 20 February 1866 in Kiev. Composer, pianist, and pedagogue. He studied music with his father, an organist in Berdychiv, and then worked as a music teacher in Podilia and Volhynia gubernias. In 1840–65 he taught piano at the finishing institute for the daughters of the nobility in Kiev. His works consist largely of piano pieces based on Ukrainian, Polish, and Russian folk themes, such as *The Ukrainian Girl*, *Chumak*, and *The Neighbor's House Is White*.

Vytychiv congress of princes. A conference of Kievan Rus' princes that took place on 10 August 1100 in Vytychiv, 40 km south of Kiev on the right bank of the Dnieper River. It was called by *Volodymyr Monomakh to settle differences among the princes and unite them in battle against the Cumans. The Primary Chronicle states that among the assembled were Sviatopolk II Iziaslavych of Kiev, Volodymyr Monomakh, Oleh Sviatoslavych of Chernihiv, and Davyd Ihorevych of Volhynia (who blinded Vasylko Rostyslavych of Terebovlia). For his violation of a treaty signed at the Liubech congress (1097), which had caused much internal strife, Davyd was forced to give up Volodymyr-Volynskyi. The chronicle describes Volodymyr's call for unity and Davyd's antagonism. A number of successful campaigns against the Cumans, fought by a united force, followed the Vytychiv congress.

Vyzhnytsia [Vyžnycja]. v-6. A city (1989 pop 5,500) on the Cheremosh River and raion center in Chernivtsi oblast. It was first mentioned in historical documents at the end of the 15th century, when it was part of the Moldavian principality. In 1774 it was annexed by Austria. An opryshok band was active in the area in 1817–30. In 1867 Vyzhnytsia obtained the rights of a trading town. During the interwar period the town was occupied by Rumania. It was granted city status in 1940. Today it is a resort center and is known for its handicrafts (kilim weaving, embroidery, wood carving, and metalworking). It has a historical and a decorative art museum.

Vyzvol'na polityka (Liberation Politics). A journal of the émigré OUN (Bandera faction). Approx 20 issues were published in 1946–9 in Germany. It was edited by I. Vovchuk and M. Myronenko.

Vyzvol'nyi shliakh (Liberation Path). A monthly serial of the émigré OUN (Bandera faction) in Great Britain, founded in January 1948. Except for the first few issues, it has been published in London. Until 1950 it was available only to the faction's members. Since April 1951 it has been

Vyzvol'nyi shliakh

published by Ukrainian Publishers Ltd, and since 1954 it has appeared in a journal format. It contains the faction's programmatic documents and ideological articles; journalistic and scholarly articles on Soviet Ukrainian politics and economics, international politics, and the history of the OUN and Ukrainian Insurgent Army; articles on Ukrainian history, archeology, society, literature, music, and art; prose and poetry by émigré writers and members of the OUN underground; literary translations; historical and political memoirs; reprints of works by Soviet Ukrainian writers of the 1920s and the *shestydesiatnyky*; samvydav literature and political documents; book reviews; news and analyses of the Ukrainian national opposition in Ukraine; and a chronicle of life in Ukraine and the émigré community. The journal was edited initially by a board consisting of P. Oliinychenko, R. Borkovsky, I. Ratushny, and V. Vasylenko. H. Drabat was managing editor from 1948 and chief editor from 1955 to 1977. He was succeeded by S. Halamai and, in 1979, by an editorial board headed by I. Dmytriv. In the 1950s and 1960s L. Poltava and V. Derzhavyn served as literary editors. Among the contributors have been many publicists, writers, and scholars, most of them affiliated with the Bandera faction.

W

Wächter, Otto von, b 8 July 1901 in Vienna, d 1949 in Rome. A Nazi functionary. A baron and a lawyer by profession, in 1934 he was the political leader of the failed Austrian SS putsch in Vienna. During the Second World War Wächter served as an SS Brigadeführer and (from April 1944) Gruppenführer. As governor of Cracow (from 1939) and the Distrikt Galizien (from November 1941) in the German-occupied *Generalgouvernement of Poland Wächter was more sympathetic to the *Ukrainian Central Committee and the Galician Ukrainians' national aspirations than were other Nazi administrators, and he removed many aggressively anti-Ukrainian bureaucrats under his command. In 1943 he conceived the idea of creating the Waffen SS *Division Galizien and convinced the SS Reichsführer, H. Himmler, to agree to it; he failed, however, to convince Himmler that it should be called the Division Ukraine. Wächter appointed the members of the *Military Board of the Division Galizien and generally had good relations with them. In 1945 he was the commander in chief of all Waffen SS divisions made up of non-Germans. After Germany's capitulation he received asylum at the Maria dell' Anima Monastery in Rome.

Wadowice. A town (1983 pop 14,600) and county center in Bielsko-Biała voivodeship, Poland. In 1919–20 it was the site of a concentration camp in which the Polish regime kept Ukrainians from Galicia. Almost 1,500 of the 15,000 prisoners died of typhus. Then the camp held interned soldiers of the UNR Army. As in other internment camps, the Ukrainian internees organized a cultural and educational program that included literacy and Ukrainian studies courses, choirs, a theater, a library, and a credit union.

Wages. A payment on a regular basis for labor or services according to a contract. In the USSR wages were regulated by the state. The USSR Council of Ministers established a general wage fund with separate pools and rates for every republic, ministry, economic branch, and individual job category. The trade unions were only consulted as to the setting of the rates. At the local level the enterprise administration classified workers by category and established the specific rates. Workers dissatisfied with their classification could appeal to a wage-rate commission at the enterprise but did not have the practical right to strike. By establishing the general wage fund for the entire USSR and the individual republics, the central government regulated the basic wages of the entire work force and the proportion of wages to the GNP. It also allowed the government to use wage rates to influence other economic policies.

Immediately following the Revolution of 1917, during the period of War Communism, wages were often paid in goods and services rather than money, owing to the debasement of Soviet currency and the influence of radical

economic ideas that rejected money as an exchange medium. Under the New Economic Policy monetary wages were reintroduced. They remained low because services such as lunch and housing continued to be subsidized by the employer or state. Wages in the co-operative or private sectors were generally higher.

With the introduction of rapid industrialization in the late 1920s, wages rose quickly. At the same time the gap between wages paid to unskilled workers and skilled workers, technicians, managers, and Party and government officials widened, especially after J. Stalin's criticism of egalitarianism in 1931. Wage differentials, it was believed, would increase productivity and worker discipline. The other important features of Stalinist wage policy were the conversion to piecework, which became widespread after 1934, and the use of bonuses to reward workers. By the 1950s over 70 percent of all industrial workers in Ukraine were paid on a piecework basis; at the same time, some 35 percent of all wages were paid as bonuses for overtime work or for overfulfilling quotas in either quantity or quality of production. In general, workers in heavy industry received higher wages than workers in light industry, trade, and services. The most disadvantaged sector was agriculture, where wages were calculated on the basis of the *workday.

In absolute terms wages rose steadily from the 1930s to the mid-1950s. Average monthly wages for all industrial workers and managers (before taxes and social security deductions) increased from 52 rubles in 1925 to 115 in 1932, 237 in 1937, 319 in 1940, and 643 in 1953. Their real value, however, probably decreased, because the ruble's buying power was reduced by price inflation and the shortage of consumer goods (see *Standard of living). At the same time wage differentials continued to increase. In 1955, for example, whereas workers with average qualifications at medium-sized factories in Ukraine earned about 800 rubles a month, chambermaids received 450, secretaries 780, teachers 1,300, doctors 1,400, accountants 1,650, engineers 1,780, army generals 3,850, university professors 5,000, academicians 6,800, directors of medium-sized factories 7,400, and ministers 10,500 rubles. The differentials were intended to secure the support of privileged segments of the population and to encourage development in certain sectors of the economy.

In 1955–64, after N. Khrushchev's consolidation of power, a major reform of the wage system was undertaken. Rates were standardized to remove wage discrepancies between workers in similar jobs, differentials were reduced somewhat, a higher minimum wage was introduced (300 rubles a month in urban and 270 rubles in rural areas), some extremely high wage rates were reduced, and piecework and bonuses were partially eliminated or reduced. For the next two decades the wage system changed little, although some Soviet economists urged greater differentials.

Average monthly wage (in rubles) of blue- and white-collar workers in Ukraine, 1960–90

Sector	1960	1970	1980	1990
Industry	93.2	130.1	176.9	277.5
Agriculture	53.7	96.0	136.3	260.3
Transportation	78.3	120.9	168.2	257.0
Communications	59.7	92.3	134.8	217.8
Construction	85.6	135.0	175.7	308.7
Trade	54.1	88.0	125.4	213.4
Information computing	–	87.7	119.6	222.5
Consumer services	52.5	87.5	123.3	185.7
Health care	55.6	85.0	115.3	162.7
Education	71.9	105.0	130.2	176.1
Culture	44.9	77.1	102.7	143.2
Art	56.6	86.8	129.1	176.6

Credit and insurance	66.6	103.7	147.8	366.2
State administration	78.8	114.1	144.4	304.9
All workers in Ukraine	78.3	115.2	155.1	247.3
All workers in USSR	80.6	122.0	168.9	–

The table above shows the average pretax wage by branch of the economy in Ukraine since 1960 (the currency reform in 1961 exchanged 10 old for 1 new ruble; the figures for 1960 have been converted into new rubles). Overall, average wages in the state sector in Ukraine were lower than for the entire USSR: the ratio between average annual wages in Ukraine and in the USSR as a whole was 0.97 to 1 in 1960 and 0.92 to 1 in 1980. The difference is partly attributable to the preponderance of lower-paying jobs in the Ukrainian economy, especially in the agricultural, service, and light-industrial sectors. Ukrainian wages, however, were considerably lower than those in the Russian SFSR: the ratio between wages in Russia and in the USSR as a whole was 1.03 to 1 in 1960 and 1.07 to 1 in 1987. Throughout the USSR wages for women were lower than for men, because the economic sectors employing mostly women offered the lowest wages.

B. Balan, V. Holubnychy

Wagner, Marcel (né Shevchynsky), b 2 June 1904 in Dorohiv, Stanyslaviv county, Galicia, d 24 November 1973 in Hillside, New Jersey. Lawyer; first American state legislator of Ukrainian origin. He emigrated to the United States with his family in 1905, graduated from Fordham University (1926), and then practiced law in Jersey City. In the 1940s he served four terms in the New Jersey state assembly; later he held various state appointments, one as a compensation judge (1962–73). His community involvements included acting as legal counsel to the Ukrainian Congress Committee of America during its formative years and to the Ukrainian American Relief Committee.

Wagtail (*Motacilla*; Ukrainian: *plyska*). A slender songbird of the family Motacillidae that constantly pumps its long tail up and down. Its body length is 18–20 cm, and its weight 16–25 g. Four species are known in Ukraine: the white (*M. alba*) and yellow (*M. flava*) wagtails nest all over Ukraine, the gray wagtail (*M. cinerea*) favors the Crimean and Carpathian mountains, and the yellow-headed wagtail (*M. citreola*) is a migrant bird that visits Ukraine in summer. Wagtails nest on the ground but roost in trees. They feed on insects, spiders, and butterflies and so are considered to be valuable birds.

Walawa (Ukrainian: Valiava). A village in the Peremyshl area (now in Poland), near which a small Rus' fortified settlement and burial site were found. The site was excavated in 1939 by Ya. Pasternak. Earlier (1926) a unique find had been made in the region when a Paleolithic skull was washed up by the Sian River. In 1939, 740 of Walawa's 760 inhabitants were Ukrainian.

William Wall

Alexander Walter

Wall, William [Voloxatjuk, Vasył'], b 11 July 1911 in Ethelbert, Manitoba, d 7 July 1962 in Winnipeg. Canadian senator of Ukrainian origin. Wall was educated at the University of Manitoba (M ED, 1939) and served as a school principal and administrator for the Winnipeg school board. He was the first Ukrainian to be appointed to the Canadian Senate, in 1955 as a Liberal from Manitoba. He was also president of the Ukrainian Catholic Council of Canada (1946–53).

Wallachia or **Walachia**. See Rumania.

Wallachian Church. See Dormition Church in Lviv.

Wallachian law (*voloske pravo*). Customary law that in the 14th and 15th centuries governed settlements in Wallachia and spread to pastoral communities in Galicia and Transcarpathia. The name is associated with the migration of Wallachian shepherds through the Carpathian Mountains as far west as Moravia. Wallachian law does not have any determinate national traits, and little is known about the nationality of its original carriers. Because of the small number of ethnic Wallachians in the area, it is reasonable to assume that, long ago, Ukrainian communities were also founded on Wallachian law. The law arose out of a pastoral way of life. The village community was headed by a hereditary *kniez* (literally, 'prince'),

who convened the *viche* (assembly) to decide communal issues. Several villages governed by the law formed a *kraïna*, a judicial-administrative district headed by a *kraïnyk*. The *kraïnyk* presided over semiannual judicial assemblies. The community was collectively responsible for the wrongdoings of its members and for various levies. Taxes and other fees were usually paid in kind, in livestock, cheese, or wool; a third went to the *kniez*, and the rest to the village's owner. The inhabitants of many villages under Wallachian law were required to do military service. Eventually, many became serfs of the gentry.

Wall-materials industry. A branch of the construction-materials industry that produces materials for making interior and exterior walls. Wall materials are produced by the *brick, *building-ceramics, *asbestos-cement, and *reinforced-concrete industries.

Walnut (*Juglans regia*; Ukrainian: *horikh voloskyi* or *horikh hretskyi*). A deciduous tree of the family Juglandaceae, 20–30 m tall, and with a thick, rounded crown, large aromatic leaves, and edible fruit (nut). In Ukraine walnuts grow from northern Polisia south to the shores of the Black Sea. They grow well in moist, sunny places and can withstand temperatures of -35°C . One tree yields 65–100 kg of edible nuts rich in oil (up to 77 percent), which is used in the production of high-quality printing inks and varnishes. Walnut wood is used in the manufacture of furniture and in the production of dyes and india ink. Walnut leaves and husks yield some medicinal preparations and tannin. The ripe walnut kernels are consumed whole and in baked goods.

Walter, Alexander, b 9 January 1818 in Revel, Estonia, d 1889. German anatomist and physiologist. A graduate of Tartu University (1841), he lectured on physiological anatomy at Kiev University (1843, as professor from 1847). In 1874 he was appointed medical inspector of civilian hospitals in Warsaw. In his numerous publications he dealt with the physiological effects of heat and cold in organisms, the production of heat in animals, and the sympathetic nervous system. His *Kurs anatomii chelovecheskogo tela* (*A Course in the Anatomy of the Human Body*, 1852) went through several editions, and he was the founder and editor of the paper *Sovremennaiia meditsina* (1860–81).

Walter, Anton, b 24 December 1905 in St Petersburg, d 13 July 1965 in Kharkiv. Experimental physicist; AN URSS (now ANU) full member from 1951. A graduate of the Leningrad Polytechnical Institute (1926), in 1930 he joined the Ukrainian Physical-Technical Institute (renamed the ANU Physical-Technical Institute) in Kharkiv, where he became centrally involved in the development and construction of nuclear-particle accelerators. In 1932 Walter was a member of the research group (with G. *Latyshev, A. *Leipunsky, and K. *Synelnykov) that accomplished for the first time in the USSR the transmutation of one stable nucleus (lithium) into another (helium). Walter became a leading specialist in accelerator design and in associated vacuum and high-voltage technology. In 1937, together with K. Synelnykov, he built a 2.5-MeV electrostatic particle accelerator, which at the time was the most powerful in Europe. After the Second World War, Walter contributed significantly to the design of the Kharkiv 2-GeV linear

Anton Walter

electron accelerator. From 1937 he was a professor at Kharkiv University.

War Communism. A term used to describe the Soviet economic policy from June 1918 to March 1921. The policy was designed to abet the Bolshevik war effort by means of state control over all sectors of the economy and forced *agricultural procurement. In Ukraine the system came into operation between 1919 and 1921. Factories, enterprises, trade, and transport were nationalized, and all market and labor relations were regulated by the state. Able citizens between the ages of 16 and 50 were eligible for compulsory labor conscription. Trade unions were stripped of their independence in April 1919, when the Bolsheviks convoked the First All-Ukrainian Trade Union congress to subordinate them to the state; that was followed by their absorption into all-Russian bodies. Such measures, coupled with the disorders caused by the Ukrainian-Soviet War and the Allied blockade, resulted in general economic chaos. Real wages fell, an extensive black market emerged, and inflation soared; the situation was particularly exacerbated when the Commissariat of Supplies began to dispense food free of charge, from December 1920. Such conditions encouraged a flight of workers from Ukrainian cities; thus, by 1921 there were only 260,000 factory workers left in Ukraine (half the pre-revolution figure).

War Communism also provoked chaos in the countryside. *Committees of Poor Peasants (*komnezamy*) were set up and charged with the forced collection of foodstuffs for the state. Members of those *komnezamy* were allowed to retain for themselves up to 25 percent of what was collected. Subsequently squads were sent across the countryside to fulfill grain deliveries. The requisitions were met with fierce resistance by the peasantry. During the course of 1920 about 1,000 food requisitioners were killed by peasants in Ukraine. The policy was largely unsuccessful: of the 2,624,000 t of grain demanded from Ukrainian sources in 1920, only 159,000 t were extracted. It has been argued that the requisition measures were a factor contributing to the famine of 1921. The discontent and disorder that War Communism bred impelled the Bolsheviks to abandon the policy in favor of the *New Economic Policy.

S. Cipko

Warbler. A small (to 25 cm), insectivorous, migratory songbird of the family Sylviidae, consisting of several genera. Its drab plumage is brownish with a lighter under-

side; males and females look alike. Warblers build their nests in shrubs, reeds, and bushes, and on the ground. In Ukraine they live in Polisia, in Carpathian forests, in the forest-steppe zone, and in the Crimea. Eleven species of reed, bush, tree, and grasshopper warblers (Ukrainian: *ocheretianka*) are represented by the genera *Acrocephalus*, *Locustella*, *Phragmaticola*, *Cettia*, and *Horeites*; five species of leaf or willow warblers (Ukrainian: *vivcharyk*) by the genus *Phylloscopus*; and five species of tree and scrub warblers (Ukrainian: *slavka*) by the genus *Sylvia*.

Patricia Warren

Warren, Patricia (pseud: Patricia Kilina [Patrycja Kylyna]), b 21 June 1936 in Helena, Montana. Poet, translator, and writer. Warren studied English literature and worked as an editor for *Reader's Digest* (1959–80). After marrying G. *Tarnawsky she learned Ukrainian and began to appear in print under her Ukrainian pseudonym. She is the author of three collections of Ukrainian poetry, *Trahediia dzhmeliv* (Tragedy of Bees, 1960), *Legendy i sny* (Legends and Dreams, 1964), and *Rozhevi mista* (Roseate Cities, 1969). Her poetry is characterized by striking imagery and a certain estrangement evolving from a non-native approach to the Ukrainian language. Warren also wrote in English the novel *The Last Centennial* (1972) and, together with Tarnawsky, translated *Ukrainian Dumy* (1979).

The Ukrainian Chamber Choir of Warsaw (director: Yaroslav Poliansky)

Warsaw (Polish: Warszawa). The capital and largest city (1988 pop 1,651,200) of Poland, located in the center of the country on the Vistula River. As the capital of the Polish-Lithuanian Commonwealth Warsaw long attracted Ukrainian nobles (the Sviatopolk-Chetvertynsky, Ostrozky, Urusky, and other families had palaces there until 1944),

Cossacks, and merchants (who had warehouses on the Vistula). The members of those strata were particularly numerous in Warsaw, but clergymen and burghers (representatives of the *brotherhoods) were also present in the city during sessions of the Diet. Since 1721 there has been a Basilian monastery in Warsaw; it once owned the Lazienki park.

After Warsaw became part of the Russian Empire in the early 19th century, many Ukrainian activists spent time there. At the beginning of the 20th century, when Ukrainian cultural and political life was undergoing intense development, links with Ukraine became stronger. In that period many Ukrainians studied at Warsaw University, because of government restrictions on enrollment in institutions of higher education in Ukraine. A Ukrainian student hromada was formed, with 120 to 150 members. In 1910 Ukrainian students formed an illegal revolutionary organization, the Union of Ukrainian Youth of Poland. The increasing activization of the Ukrainian movement contributed to the awakening of national consciousness among the numerous imperial civil servants of Ukrainian origin, both in Warsaw and in other Polish cities. In Warsaw there was also a fairly large colony of Ukrainians from the nearby Kholm region and Podlachia.

In the 1920s and 1930s Warsaw became one of the centers of the Ukrainian political emigration, particularly for émigrés associated with the UNR. In the fall of 1919 a UNR diplomatic mission was in Warsaw, where it signed in the name of the Directory the Treaty of *Warsaw with Poland. The former president of the UNR, M. Hrushevsky, stayed in Warsaw briefly (fall 1919), and the UNR's supreme otaman, S. Petliura, lived there from 1920 to 1923. Petliura's deputy A. Livytsky settled permanently in Warsaw, as did some other members of the UNR's government-in-exile and UNR civilian and military activists. After the conclusion of the Peace Treaty of Riga a diplomatic mission from the Ukrainian SSR, headed by O. Shumsky, was also in Warsaw. Warsaw was the center of the *Ukrainian Central Committee in Poland, which was a vital organization for Ukrainian emigrants. Other groups active in Warsaw included the Ukrainian Military History Society, the Union of Ukrainian Emigrant Women in Poland, the Union of Ukrainian Engineers and Technicians in Emigration, the Ukrainian Juridical Society, the Society of Ukrainian Veterans, the Society of Friends of the League of Nations, the Society to Aid Students of Higher School, and the Women's Hromada (est 1924). In time the Ukrainian colony in Warsaw grew to 2,000 or 3,000 owing largely to the arrival of workers and students from Galicia and the so-called northwestern lands. Warsaw was the temporary home of Ukrainian Sejm deputies and senators as well as Ukrainian journalists. The Ukrainian Student Hromada was revived, and the fraternity Zaporizhia was established; a social center, the Ukrainian Club, came into existence in 1928. The Promethean League of Nations Enslaved by Moscow (see *Promethean movement) was centered in Warsaw and had a Ukrainian section. Church life centered around the Orthodox cathedral in the Praga section of Warsaw and around the Greek Catholic church and Basilian monastery on Miodowa Street. From 1929 scholarly life centered around the *Ukrainian Scientific Institute in Warsaw, with its valuable library and publications. Warsaw University had a department of Orthodox theology and chairs of Ukrainian language and history. Also im-

portant for Ukrainian studies were the Polish Oriental Institute and the *Institute for Nationalities Research. In 1932 the Ukrainian Economic Bureau was established, which published statistical yearbooks. Valuable archival and museum materials for Ukrainian studies were preserved in the Orthodox Metropolitan Archive-Museum, in the Zamoyski and Krasiński libraries, and in the Archiwum Akt Dawnych; many Ukrainian-related archival materials perished, however, in 1944. The Ukrainian scholars who lived in Warsaw included P. Andriievsky, S. Balei, V. Bidnov, L. Chykalenko, D. Doroshenko, M. Korduba, O. Lototsky, I. Ohiienko, I. Shovheniv, R. Smal-Stotsky, and P. Zaitsev; the writers included N. Livytska-Kholodna, Yu. Lypa, Ye. Malaniuk, and O. Teliha; and the painters, P. Andrusiv, N. Khasevych, P. Kholodny (the younger), P. Mehyk, graduates of and lecturers at the Academy of Arts, and members of the artists' group *Spokii. Between 1918 and 1939 over 40 Ukrainian periodicals appeared in Warsaw. In 1921–2 Warsaw had a daily Ukrainian newspaper, **Ukrains'ka trybuna*, edited by O. Salikovsky; and in 1926–7 it had the newspaper **Ukrains'ka nyva*. Prior to 1939 Ukrainian journals published in Warsaw included **Za nezalezhnist'*, **Za derzhavnist'*, the monthlies **Nasha kul'tura* and **Ridna mova*, the literary-artistic bimonthly **My*, and **Biuletyń Polsko-Ukraiński*. V. Ostrovsky's publishing firm and the publishing houses Variah and Nasha Kultura were located there. In Warsaw appeared *Studii do ukrains'koi hramatyky i filolohii* (edited by Smal-Stotsky and later also Ohiienko), the publications of the Ukrainian Scientific Institute, numerous Orthodox publications (from the metropolitan printing press), the series Biblioteka ukrains'koho derzhavnyka (The Library of the Ukrainian State-Builder), and the publications of Spokii.

During the Second World War the Ukrainian Relief Committee, a branch of the *Ukrainian Central Committee in Cracow, was active in Warsaw, with numerous sections and organizations. The Ukrainian colony in Warsaw grew rapidly when Ukrainians fled there to escape communist rule.

After the war and the establishment of a communist government in Poland Ukrainian activity in Warsaw declined notably, both because of the numerical decrease of Warsaw's Ukrainian population and because of the restrictions put on associations and the press, especially Ukrainian ones, by the communist regime. The situation of Ukrainians was particularly bleak in the first decade after the war, when Poland was combating the *Ukrainian Insurgent Army on its territory and Stalin was still alive. In 1956 Ukrainians in Poland were allowed to have an organization, albeit under the control of the Ministry of Internal Affairs – the *Ukrainian Social and Cultural Society (as of 1990 the Alliance of Ukrainians in Poland [OUP]), with headquarters in Warsaw. Warsaw also revived as a center of publishing for Ukrainians in Poland. The weekly newspaper **Nashe slovo* began to appear in 1956, as did its supplements, the cultural review *Nasha kul'tura* (since 1958) and the children's periodical *Svitanok*. The OUP calendar as well as the Orthodox church calendar (in the Ukrainian language until 1977, since then multilingual) has been published in Warsaw; since 1988 a Ukrainian Catholic church calendar has also appeared. Since 1953 there has been a department of Ukrainian philology at Warsaw University. Warsaw has developed as a center of Ukrainian studies. Scholars, mainly Polish, who have

been active in the field since the Second World War include the historians A. Chojnowski, Ye. Misylo (a Ukrainian), M. Papierzyńska-Turek, A. Poppe, J. Radziejowski, R. Torzecki, and Z. Wójcik; the literary historians M. Jakóbiec, S. Kozak (a Ukrainian), A. Serednytsky (a Ukrainian), E. Wiśniewska, V. Nazaruk (a Ukrainian), T. Holynska (a Ukrainian), and F. Nieuważny; and the linguists P. Zwoliński and Z. Stieber. As in the interwar period the Orthodox cathedral remained a center of Ukrainian religious life. In spite of intense persecution in the late 1940s, Ukrainian Catholicism in Warsaw survived into the postwar period; both a Ukrainian Catholic community and the Basilian monastery continued to exist, although the monastery converted to the Latin rite in order to do so.

With the end of communist rule in Poland in 1989, Ukrainians in Warsaw undertook new initiatives. In 1989 the Basilian fathers published the first issue of a scholarly journal devoted to Ukrainian studies, *Varshavs'ki ukraïnoznavchi zapysky*.

M. Kovalevsky, J.-P. Himka, A. Zięba

Warsaw, Grand Duchy of. An administrative territory in Poland set up by Napoleon in 1807. It was formed out of the Polish regions of the Kingdom of Prussia, to which were added in 1809 the regions acquired by Austria under the Second Partition of Poland, including Zamość and Cracow. After Napoleon's defeat the Congress of Vienna divided the grand duchy. A small portion (Poznań) was awarded to Prussia, Cracow and its environs were set up as a free state (under an allied protectorate), and most of the territory was reconstituted as the *Congress Kingdom of Poland under the indirect jurisdiction of the Russian Empire.

Warsaw, Treaty of. An agreement between the Polish government and the government of the Ukrainian National Republic (UNR), signed in Warsaw on 21 April 1920. The pact centered on the promise of Polish military assistance to the UNR in exchange for a recognition of Poland's claims to the western Ukrainian lands. It was signed under desperate circumstances by the Directory of the UNR, and caused a major falling out between Galician Ukrainians and the UNR.

Despite a formal merger of the UNR and the Western Ukrainian People's Republic (ZUNR) in January 1919, the two republics held differing opinions regarding Poland. For the leaders of the ZUNR Poland remained the foremost enemy; the leaders of the UNR perceived their main threat to be Russia. In January 1919 the first mission of the UNR (V. Prokopovych) arrived in Warsaw to test the possibility of an anti-Bolshevik agreement. The issue became particularly pertinent after the Red Army seized Kiev on 5 February 1919; UNR troops were driven back to Volhynia and Podilia, and the *Ukrainian-Soviet War increased in intensity.

On 25 May B. Kurdynovsky, a representative of the Directory, and Prime Minister I. Paderewski signed an agreement which foresaw the recognition by Poland of an independent Ukraine; military assistance was promised by Poland in exchange for a renunciation by the UNR of all claims to eastern Galicia and a portion of Volhynia west of the Styr River. As a result of the intensification of combat in eastern Galicia in conjunction with the *Ukrainian-Polish War the convention was never realized.

Subsequent negotiations with Poland were tempered by the UNR's changing military fortunes and its relations with the ZUNR and the Ukrainian Galician Army (UHA). On 7 June 1919 a delegation of the Polish Supreme Command and a military delegation of the UNR commenced negotiations in Lviv concerning an armistice. The command of the UHA did not feel obliged to observe those negotiations, and at the same time it launched a counterattack on the Galician front (the *Chortkiv offensive). The campaign faltered, however, and by July the Poles had forced the UHA and the ZUNR out of Galicia. The UHA forces then joined the UNR Army in a successful campaign that had taken Kiev by the end of August. The UNR's military fortunes then declined drastically. On 1 September an armistice was signed between the Polish command and that of the UNR. On 21 October the UNR concluded a secret agreement with the Poles which made it possible for its troops to cross into the territory occupied by Polish divisions in order to regroup and receive additional arms. By late 1919 the Ukrainian forces were no longer capable of continuing the war. On 5 December Petliura left for Warsaw, where he hoped to obtain support for a renewed campaign from Poland and possibly, through Poland, the Entente powers. He met in the Polish capital with a UNR diplomatic mission led by the UNR's deputy prime minister, A. Livytsky, which had arrived earlier in October.

The Livytsky mission had already issued a declaration, on 2 December, regarding the principles of a political and military convention with Poland, which noted, among other items, the willingness of the UNR to renounce its claims to the territories west of the Zbruch River. The declaration, which foreshadowed the agreement of 21 April 1920, met with sharp protests from the Galician members of the mission. It was also criticized harshly by a gathering of Galician Ukrainian politicians in Vienna on 9 December 1919.

The next stage of the Polish-Ukrainian talks began in January 1920. The Poles exerted great pressure on the Ukrainian delegation and played on the military and political weakness of the UNR government. They also made it difficult for the ministers of the UNR government to maintain contacts with members of the Directory who were in Poland. On 22 January Petliura and Livytsky presented J. Piłsudski with a list of complaints concerning the conduct of the Polish authorities.

The final edition of the text of the treaty was drafted in April. The main points of the agreement, signed by Livytsky and J. Dąbski, resolved that (1) Poland would recognize the independence of Ukraine and the Directory of the UNR under Petliura's leadership as its legitimate government; (2) the Polish-Ukrainian frontier would run along the Zbruch River, following the former Austrian-Russian frontier, across the Kremianets Mountains, along the eastern boundary of Rivne county, and then along the Prypiat River; (3) both governments would not enter into any conventions with third parties contrary to the treaty; (4) the Polish and Ukrainian minorities in both countries would be granted reciprocal national and cultural rights; and (5) the land question in Ukraine would be resolved by a constituent assembly, and in the interim the interests of Polish landowners in Ukraine would be dealt with through separate accords. The treaty also noted that a military convention was to follow, and that it was to be regarded as an integral part of the agreement. On 24 April a

military convention concluded that the Ukrainian and Polish armies would act as allies, but under Polish command; the Ukrainian side would organize its own administration in the liberated territories; Poland would equip three Ukrainian divisions, for which it would later be reimbursed; Ukraine would supply food for the armies operating in Ukraine; and Polish evacuation from Ukraine would begin at the request of one of the sides of the treaty.

The Treaty of Warsaw brought protests from the Galician leaders as well as from leading Ukrainian political authorities (M. Hrushevsky, V. Vynnychenko). The UNR government of I. Mazepa resigned in protest, and was replaced by the cabinet of V. Prokopovych in May 1920. Four days after the signing of the Treaty of Warsaw (25 April 1920) Polish and Ukrainian troops (two divisions) began marching on Kiev.

Constantine Warvariv at the 17th session of the UNESCO General Assembly

Warvariv, Constantine [Varvariv, Konstantyn], b 4 November 1924 in Povorske, Kovel county, Volhynia gubernia, d 6 April 1982 in Washington, DC. American diplomat. A postwar refugee, after graduating in international law from Heidelberg University (1949) he emigrated to the United States and continued his studies in public law at Columbia University (MA, 1952). He joined the State Department in 1961 and was promoted to the offices of deputy director for UNESCO affairs (1971), deputy representative to UNESCO (1974), and director of transportation and communication at the State Department's Bureau of International Organizations. In 1977 a KGB attempt to blackmail him into working for Soviet intelligence was unsuccessful and provoked official American protest. Warvariv pursued an interest in the diplomatic history of Ukrainian-American relations and wrote a number of articles in this field.

Washington, DC. The capital (1990 pop 606,900; 1980 metropolitan pop 3,060,000) of the United States. In 1988

The unveiling of the Taras Shevchenko monument in Washington by President Dwight Eisenhower in June 1964

there were approx 4,900 Ukrainians living in the area. The Ukrainian community in Washington dates from the late 1930s, when federal jobs began to attract Ukrainians from other states. By 1940 there were over 30 families in the district, and the American-Ukrainian Society was formed. In 1949 the Alliance of Ukrainians in Washington assumed leadership in local Ukrainian cultural and social life. The community grew rapidly through the 1950s and 1960s as new immigrants and American-born Ukrainians assumed professional positions at the Ukrainian section of the Voice of America, the Library of Congress, and various federal agencies. A monument to T. Shevchenko was unveiled in 1964. The Ukrainian Catholic parish of the Holy Family and the Ukrainian Orthodox Church of St Andrew were organized, and St Josaphat's Ukrainian Catholic Seminary was transferred to Washington from Philadelphia. In the 1970s a branch of the Ukrainian Catholic University was founded, and in the 1980s the Ukrainian National Shrine of the Holy Family was built. The *Washington Group, a local association of Ukrainian-American professional and business people, was inaugurated in 1984. As the capital of the country, Washington has been the scene of Ukrainian-American lobbying efforts since the formation of the first representative Ukrainian associations in 1915 and 1916. In 1977 these efforts were supplemented by the establishment of an information bureau in the capital by the Ukrainian Congress Committee of America.

Washington Group, The (TWG). The group, established as the Association of Ukrainian-American Professionals in 1984 in Washington, DC, provides a forum for activities that preserve and promote Ukrainian heritage. With its headquarters in the capital of the United States, TWG focuses much of its activity on informing the public and the government about issues of concern to Ukrainian Americans. It publishes a monthly newsletter, submits letters and articles to the media, sponsors the Distinguished Speaker Series, and holds annual leadership conferences. The membership of TWG grew from 54 in 1984 to nearly 400 in 1991. Its president is Lydia Chopivsky-Benson.

Wasik, Walter [Vasik], b 1 May 1930 in Sambir, Galicia. Photographer and film producer. After emigrating to

Canada in 1948, Wasik studied at the Brooks Institute of Photography in California (1955–6) and at the Institute of Photography in New York (1961–3). He organized the Ukrainian Film Club of Oshawa, Ontario, and the Canukr film production company. He made several short documentary films and produced three full-length feature films, *Zhorstoki svitanky* (Cruel Dawns, 1965), *Nikoly ne zabudu* (I Shall Never Forget, 1969), and *Marichka* (1974).

Wasilewska, Wanda [Vasylevs'ka, Vanda], b 21 January 1905 in Cracow, d 29 July 1964 in Kiev. Polish communist writer; daughter of L. Wasilewski and wife of O. *Korniichuk. She moved to Kiev from Lviv in 1939. In 1944 she was deputy leader of the Committee for the National Liberation of Poland, and later she was a deputy to the Supreme Soviet of the USSR. Her first published work appeared in 1921. Together with Korniichuk she wrote the libretto to K. Dankevych's opera *Bohdan Khmelnytskyi*. She received the Stalin Prize in 1943. Most of her novels and stories have been translated into Ukrainian, and an edition in eight volumes was published in 1966–8.

Leon Wasilewski

Wasilewski, Leon, b 24 August 1870 in St Petersburg, d 10 December 1936 in Warsaw. Polish political activist and journalist. A prominent figure in the Polish Socialist party and editor of its official organ *Przedświt*, he studied, among other places, at the University of Lviv. There he developed a firsthand understanding of Ukrainian concerns. He published articles on Ukrainian issues in the Polish, Russian, and Ukrainian press. He advocated the idea that co-operation was necessary among the peoples oppressed by the tsarist regime. After the establishment of a Polish state Wasilewski was called upon on numerous occasions to deal with Ukrainian and Soviet issues. In 1919 he led negotiations with V. *Prokopovych in Warsaw and H. Sydorenko in Paris. He participated in the preparation of the Peace Treaty of Riga (1921). During the years 1921–3 he was leader of the Polish delegation to settle Polish-Soviet and Polish-Rumanian border disputes. In 1926 he headed a government committee on the eastern provinces and national minorities, which argued against the policy of national assimilation. Wasilewski even proposed to divide eastern Galicia into Polish and Ukrainian regions. He maintained connections with Ukrainians through the *Promethean movement (as a member of the Promethean Club in Warsaw), the Polish-Ukrainian Society, and the *Biuletyn Polsko-Ukraiński*. His writings include several works on nationality issues in Eastern Europe,

particularly Ukrainian affairs, among them *Sovremennaiia Galitsiia* (Contemporary Galicia, 1898), *Ukraina i sprawa ukraińska* (Ukraine and the Ukrainian Question, 1919), *Ukraińska sprawa narodowa w jej rozwoju historycznym* (The Ukrainian National Question in Its Historical Development, 1925), and *Sprawa ukraińska jako zagadnienie międzynarodowe* (The Ukrainian Question as an International Issue, 1934).

A. Zięba

Wasteland. See Land use.

Water management. An important branch of the national economy, concerned with the rational use of water resources and the prevention of damage caused by water. Water management developed in Ukraine only in the 20th century, although some branches of it can be dated back to earlier times. Hydraulic structures were built in the ancient cities of the Black Sea coast and later in Kiev and other cities of Kievan Rus'. Water power began to be used in flour mills and sawmills in the 13th century. In the 15th century, ponds were dug and rivers dammed to provide more waterpower. In the late 18th century a number of canals were constructed to connect the Dnieper River with the rivers of the Baltic Basin. The first hydroelectric power station, the Tyvriv Station, was built in 1912 on the Boh River.

In the forest and forest-steppe belts subterranean waters were the main source of supply. In the south, rivers also served that purpose, and water was stored in artificial ponds and dams before the streams ran dry. Wells and water-carriers were used to supply water. Modern pumping stations began to be built only in the 1870s, in Kiev, Lviv, Odessa, Kharkiv, and Chernihiv. By 1915 only 33 cities in Russian-ruled Ukraine had such stations. Sewerage and water purification were limited. In that respect Galicia was ahead of all other regions. Irrigation was not widely used, except in some areas near southern Ukraine's larger cities. Drainage of land began in the 19th century.

Land development and deforestation disrupted the country's water system in the 19th century. The need for water management became apparent. Erosion spread and flooding became common as rivers became shallower and the water flow irregular. In the south the land area requiring irrigation grew larger and larger. At the end of the 19th century, research in water management and systematic irrigation and drainage work were started in Ukraine. Major contributions in the field were made by V. Dokuchaev, Yu. Vysotsky, P. Kostyshev, B. Williams, and M. Maksymovych. Little hydrotechnical work was accomplished before 1914, however. Plans to flood the Dnieper Rapids, build hydroelectric stations, and construct navigable canals to connect the Dnieper and Desna rivers, the Donets River, and the Donets Basin were interrupted by the First World War. By 1917 only 17,400 ha in Ukraine had been irrigated, and only 454,000 ha had been drained.

In 1918–19, during the period of Ukrainian independence, water-management plans were drafted. A department of water management was established in the Ministry of Transport and was headed by I. Shovheniv. The Hydrology Commission of the Ukrainian Academy of Sciences did research that was relevant to water management.

An ambitious project for using the water resources of the Dnieper Basin for transportation, irrigation, and power generation was worked out in the 1920s. Called the Great Dnieper Project (see *Dnieper River), it was connected with a large-scale electrification plan prepared by *GOELRO. Its first stage was completed with the construction of the *Dnieper Hydroelectric Station (1927–32) and involved the flooding of the Dnieper Rapids. The plans for *land melioration were not implemented, and the excessive deforestation and destruction of small ponds resulted in water shortages.

During the Second World War water installations were almost totally destroyed. In the 1950s work on the Great Dnieper Project was resumed. Hydroelectric power stations were built at Kakhivka (1950–6), Kremenchuk (1954–60), Dniprodzerzhynske (1956–64), Kiev (1960–8), and Kaniv (1963–75), and the *Dnieper Cascade of Hydroelectric Stations was thereby completed. The six reservoirs thus created hold 43.8 billion cu m of water. At the same time a number of irrigation canals were built in southern Ukraine. By 1965, 540,000 ha had been irrigated. With further intensive development, by 1985 the republic had 2.4 million ha under irrigation. Considerable work was also done on the reclamation of marshes and swampland, and by 1985, 2.9 million ha had been reclaimed (see *Drainage of land). Flood-control projects, especially in the mountainous areas of western Ukraine, were co-ordinated with power generation, water-supply, and land reclamation projects. Ukraine has 871 reservoirs, holding 51.7 billion cu m of water, and over 24,000 ponds.

Water shortage is a serious problem in Ukraine. In the past Soviet authorities regarded environmental protection as an unnecessary burden on the economy. Until the last two decades Soviet water management was based on the assumption that some natural resources were virtually inexhaustible. The planners of vast hydroelectric energy programs gave little consideration to unavoidable water loss. It was only in the 1970s that alarm about limited water resources was raised. Water management in Ukraine is complicated by the number of poorly co-ordinated agencies in the field and the lack of suitable legislation. In the debate on water management the powerful agricultural and industrial ministries, which are the main water users, have generally rejected the calls for conservation and pollution control.

B. Krawchenko

Water pollution. See Pollution.

Water polo (*vodnyi miach, vodne polo*). In Ukraine, water polo became popular in the early 1920s, in the southern cities of Odessa and Mykolaiv and in the Crimea. In the 1930s it spread to Kiev, Kharkiv, and Dnipropetrovske, and intercity competitions were held. In 1948 the USSR Water Polo Federation was founded and joined the International Federation of Amateur Swimming. Several Ukrainians, such as O. Zakharov and V. Rozhkov, played on the USSR teams that captured the gold medal at the 1972 and 1980 Olympics, the world championship in 1975, and the European championship in 1966 and 1970.

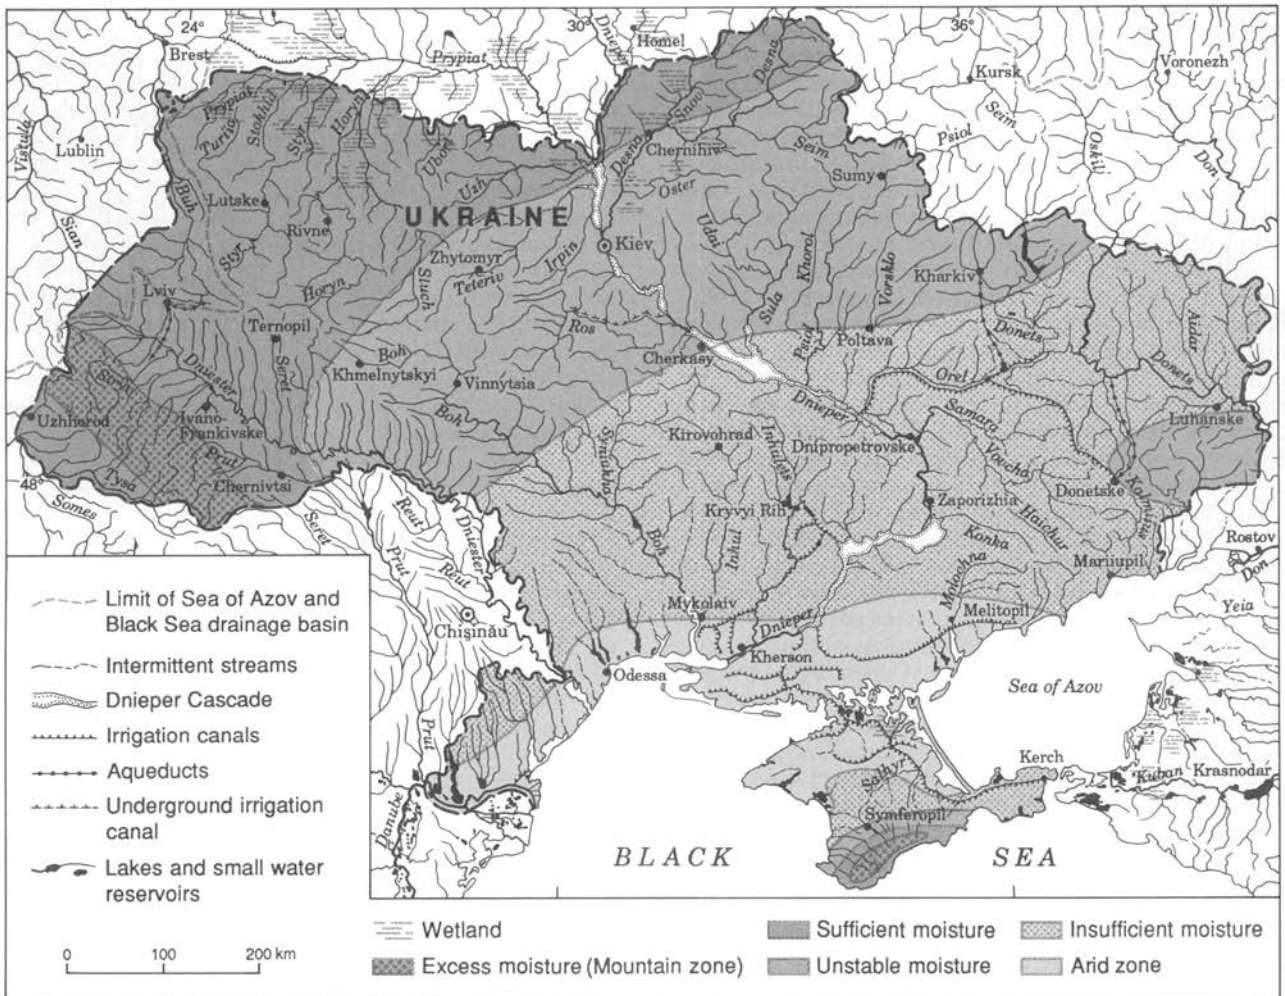

Water reservoir (*vodoskhovyshche, vodoimyshche*). Artificial water reservoirs are created to control flooding, to regulate water flow for hydroelectric generation and other uses, to store drinking water, and for irrigation. In Ukraine the largest reservoirs, created during the construction of the *Dnieper Cascade of Hydroelectric Stations, are found along the Dnieper River. The Dnieper Reservoir (Dniprovske vodoskhovyshche), created in 1932 during the construction of the *Dnieper Hydroelectric Station, covers an area of 410 sq km. The other reservoirs on the river are the *Kaniv, *Kakhivka, *Kiev, *Kremenchuk, and *Dniprodzerzhynske reservoirs. Smaller reservoirs along the Donets and the Dniester rivers mostly store drinking water. In recent years some small reservoirs have been created for fish farming. In 1988 there were 1,057 reservoirs in Ukraine containing an estimated 55 billion cu m of water.

Water resources. The combined amount of surface water (in seas, *rivers, *lakes, *water reservoirs, and canals) and groundwater (see *Underground water). Whereas surface water is renewed rapidly through hydrologic cycling, groundwater is renewed slowly, the rate depending

Major water reservoirs in Ukraine

Name of reservoir	River	Surface area (sq km)	Capacity (cu km)	
			in use	full
Kiev	Dnieper	922	1.17	3.78
Kaniv	Dnieper	582	0.28	2.48
Kremenchuk	Dnieper	2,252	9.10	13.50
Dniprodzerzhynske	Dnieper	567	0.27	2.45
Dniprovske	Dnieper	410	0.84	3.30

Starobesheve	Kalmius	9	0.03	0.04
Karachunivske	Inhulets	44.8	0.29	0.31
Symferopol	Salhyr	3.23	0.03	0.04

on hydrological conditions. The main source for both is precipitation, of which most evaporates or infiltrates the ground, leaving in Ukraine about 16 percent as runoff.

The water resources of Ukraine are scanty. On a per capita basis in Ukraine surface runoff constitutes only 1,000 cu m/person/year, one of the lowest rates among the republics of the former USSR. That meager water supply supports 51.7 million people (1989 census).

Historically, territorial patterns of industrial and agricultural demand in Ukraine were never in close accord with the geographical distribution of surface water (see the map). The notable exceptions are in the mountainous areas, where precipitation exceeds evaporation by two to three times, and also in Subcarpathia, western Podilia, Volhynia, and Polisia, where precipitation generally exceeds evaporation. Many industrialized areas, such as the Donbas and the metropolitan areas of Kharkiv and Kryvyi Rih, have notoriously low water availability. The major agricultural areas located in the Black Sea Lowland and the Crimean Lowland are characterized by a semiarid climate with very low moisture supply during the vegetative period.

There are only three major rivers in Ukraine suitable for multipurpose river basin development: the Dnieper, with an average flow of 40–42 cu km/yr; the Dniester (only its upper and middle courses, as well as a small delta, for the rest of the river passes through the Moldova), discharging 7–8 cu km/yr into the Dniester Estuary; and the Donets (a tributary of the Don River), releasing 4–5 cu km/yr. The Boh River (approx 2–3 cu km/yr) has an intermittent flow and is used solely for local water supply. Only the Dniester, in its upper and middle courses, has a well-developed tributary drainage system. With the exception of the Inhulets River, the Dnieper (downstream of Kiev) and the Donets do not have stable tributary inflow. Those rivers flow through semiarid lands, with a few small tributaries providing only meager seasonal inflow.

Water quantity and quality in the drainage system of Ukraine are experiencing increasing degradation. The degradation is only marginally related to the disparity in location between the availability of river water and the demand for it. The ongoing depletion and worsening water quality in the Ukrainian watercourses has been closely related to the political system instituted by the Soviet regime. The roots of present-day water resources mismanagement may be found in the accelerated industrialization and all-out collectivization policies that began at the end of the 1920s. The sweeping program for hydroelectric dam construction and river navigation initiated at that time had poor, if any, scientific and technical justification, and served mostly propaganda purposes. Numerous storage reservoirs with large evaporation surfaces (6 large reservoirs on the Dnieper, 1 on the Don, 1 on the Kuban, and 3 smaller ones on the Dniester), as well as flow diversions to the Donbas for industrial and municipal uses and to the Crimea for irrigation and water supply, severely depleted water reserves, and pollution sharply worsened their quality. Average water withdrawals from the Dnieper have reached 31–32 cu km/yr, and from the Dniester, approx 4–5 cu km/yr. The Donets has been completely used up, and its flow is controlled by interbasin water transfer from the Dnieper. Some of the withdrawn water returns to the rivers via point and nonpoint sources, carrying deadly contaminants, such as cyanides, ammonia, phenols, PCBs, and heavy metals.

Irreversible losses and the pollution of fresh water have become even more dramatic as a result of Soviet agricul-

tural policies. Following collectivization and the man-made famine (which resulted in the loss of 6 to 9 million lives), the most experienced farmers, who over the centuries had developed highly productive dry farming practices, disappeared. Facing an imminent crisis in farm production, the postwar leaders expanded irrigation agriculture to the point where it became (by 1975) the prime water user. A huge network of highly inefficient irrigation systems (160,000 km of unlined canals) was built in southern Ukraine. Now, more efficient closed conduits (41,000 km) are also in place. Although agricultural output was raised at the cost of high capitalization and water demand, the food supply could not satisfy the growing population because of mismanagement and alarming losses. Still, the environmental impact from large-scale irrigation has been disastrous. Rivers and aquifers have become polluted by fertilizers and organic wastes. Eutrophication, oxygen depletion, and mass fish kills have occurred nearly every summer. More energy and machinery are necessary for water purification if the resources are to be made suitable for drinking and irrigation.

At the same time decreased river flows have reduced the energy output from hydroelectric plants, and shoreline erosion has increased the siltation of the reservoirs, thereby impeding navigation. More and more water has to be withdrawn for purposes of washing out the salts brought to the soil surface by saline seeps from irrigation and for ameliorating deep salty aquifers. Some small rivers (the Kalmius, the Inhulets, the Samara, the Oskil, and the Donets) have been turned into industrial sewers devoid of life. Many others have become silted up, and their watercourses have disappeared.

The estuaries have been most severely affected. The reduction or elimination of the annual spring floods, the intrusion of salt water from the sea, and pollution have had deleterious effects on the reproduction of anadromous and semianadromous fish. Practically no commercial fishery now exists in the Dnieper and the Dniester estuaries.

Since 1973 the formerly healthy coastal waters of the northwestern Black Sea have been affected by near-bottom hypoxia (or even anoxia), which has turned richly populated bottom areas into fetid deserts each summer. Since 1987 the famous Odessa beaches have been closed to all recreational activities except sailing. In 1980, fish losses were estimated at approx 46 to 51 million rubles a year. The only relatively healthy habitat remains in the Danube Delta. The effects of river basin development have spread far into the Black Sea and have impeded fish migration from the Mediterranean.

Past and present freshwater management practices have affected huge areas and have caused disruptions in potable water supply, acute and chronic toxic contamination, and even outbreaks of epidemics (notably cholera in 1970–1). Some regions, such as the Donbas and the Kherston Steppe, have been brought to the brink of water shortages that prevent the normal functioning of society. Even severe rationing of water cannot ensure the uninterrupted activity of industries and municipalities. Above-average precipitation in the years 1986–8 brought only temporary relief from water shortages.

Ukraine is now recognized as an area with a water resources crisis. It suffers from a legacy of indiscriminate exploitation, driven by ambitious plans to increase output

by transforming the environment. In recent years water deficiency in Ukraine has been meliorated by an above-average atmospheric moisture supply, but dry years are bound to bring about serious hardships. The demand for water is continuing to rise, pollution from point and non-point sources is increasing, treatment facilities are scarce and outdated, effective environmental legislation and regulatory agencies are lacking, and prices that would reflect the scarcity of resources have not yet been introduced. Unless water resource management is improved quickly, Ukraine's water resource situation will likely worsen. (See also *Rivers, *Underground water, and *Wetlands.)

Water spangle (*Salvinia*; Ukrainian: *salviniia*). Tiny aquatic ferns in the family Salviniaceae, also known as gloating moss. They have a whorl of three leaves, two of them round and emergent and the third submerged and finely divided, functioning as a root. There are 10 species of *Salvinia* worldwide; only *S. natans* (Ukrainian: *salviniia plavaiucha*) is found in Ukraine, where it grows in slowly moving rivers and lakes. It is a rare plant, listed as an endangered species in Ukraine.

Water sports. See Rowing and canoeing, Swimming, Water polo, and Yachting.

Water transportation. See River transportation and Sea transportation.

Watermelon (*Citrullus*; Ukrainian: *kavun*). A sweet fruit of the gourd family Cucurbitaceae. The plant's vines grow along the ground, with branched tendrils, deeply cut leaves, and yellow flowers. The sweet, juicy flesh of the fruit may be white, reddish, or yellow. Watermelons range in weight from 1 or 2 kg to 20 kg or more. The fruit consists of up to 88 percent water and is thirst-quenching; it also contains much sugar (from 5 to 13 percent) and some vitamin A and C. Of the three known species, table watermelon (*C. vulgaris* or *C. lanatus*) and *C. colocynthisoides* (used for feed) grow in Ukraine, primarily in Zaporizhia, Kherson, Dnipropetrovske, and Odessa oblasts.

Several Ukrainian varieties have been developed. They are very popular among Ukrainians and are eaten fresh as a dessert or even as a main course, pickled, candied, or boiled to make juice. (See also *Melon.)

Wawrykow, Mary [Vavrykiv] (née Zakus), b 1912 in Wakaw, Saskatchewan, d 15 April 1977 in Winnipeg. Ukrainian-Canadian community leader and judge. Wawrykow completed her education at the University of Manitoba (L B, 1934) and worked as a lawyer until her appointment as a family court judge in Winnipeg in 1968. She was prominent in Ukrainian Catholic activities and in the women's sections of the Ukrainian Canadian Committee (now Congress). She was appointed Queen's Counsel in 1965.

Waxwing (*Bombycilla*; Ukrainian: *omeliukh, svyrystel*). An elegant-looking, crested songbird of the family Bombycillidae, 20 cm long. The Bohemian waxwing (*B. garrulus*), which winters in Ukrainian territory, is gray-brown with yellow, red, and white markings.

Weatherfish (*Misgurnus fossilis*; Ukrainian: *viun*). An elongated, scaly, whiskered Old World fish of the carp family Cobitidae, found in almost all Ukrainian fresh waters, especially in small stationary reservoirs. Also known as loach, weatherfish are not numerous and hence are of little commercial value, but they are widely used in laboratories for gonadotropic research.

Weaving (*tkatstvo*). Weaving has been practiced in Ukraine for many centuries. Using flax, hemp, or woolen thread, weavers have produced various articles of folk *dress, towels, *kilims, blankets, tablecloths, sheets, and covers. The colors, ornamentation, and even the techniques of weaving varied from region to region. By the 14th century weaving had developed into a cottage industry. Weavers' guilds modeled on Western European examples were founded in Sambir (1376), Lviv, and elsewhere in Galicia. They tried to improve weaving techniques and the quality of the products. Later, artistic textiles and kilims were manufactured by small enterprises established by magnates in Brody (1641), Lviv, Nemyriv, Zalishchyky, Korsun, Korets, Kiev, and Horokhiv. In 17th-century Left-Bank Ukraine the Cossack *starshyna* established similar enterprises to make decorative furnishings on order for the nobility and churches, using imported silk and gold thread. Eventually such thread was manufactured in Ukraine. Weaving manufactories flourished from the mid-17th to the mid-19th century. Their owners sometimes imported weavers from Turkey, Armenia, and Persia. Thus Oriental designs became popular in Ukraine. In the 17th century Emmanuel of Corfu (Korfynsky) established a factory for luxurious silk and gilded textiles in Lviv. Many weavers were trained there, and they disseminated their craft throughout Ukraine. In the 18th century large decorative weaving factories sprang up in Kholm, Buchach, Brody, Sokal, Medzhybizh, and Stanyslaviv. From the 1650s on the development of weaving as a cottage *textile industry intensified in Ukraine. The town of *Krolevets became one of the largest centers of artistic folk weaving. Ukrainian textiles were popular abroad, where they were called 'Ruthenian textiles' by foreign merchants. Hetman K. Rozumovsky's factory in Baturyn manufactured a wide assortment of artistic textiles, including tapestries with floral designs for his palaces in Baturyn, Hlukhiv, and Kozelets and colorful wool cloth for the uniforms of his Cossack guard units. In the mid-19th century commercial weaving began declining. To reverse the trend and to improve the technology and the artistic level of weaving, various zemstvos created weaving schools (eg, in Dihtiari and Shylovychi, in Chernihiv gubernia) and weaving departments in technical-industrial schools. In late-19th-century Austrian-ruled Galicia, renewed interest in folk-weaving techniques and designs prompted the opening of weaving schools and kilim-weaving shops in villages such as Vikno, Kosiv, and Hlyniany. To promote the merits of Galician folk weaving, exhibits of their wares were included in industrial and agricultural expositions. There they won awards and

attained a reputation as far abroad as North America.

In early Soviet Ukraine efforts were made to revive handicraft and commercial artistic weaving. The School of Ukrainian Folk Masters was set up in Kiev in 1920 and then reorganized into the Kiev State School of Applied Art. It gathered together many noted folk artisans, who passed on their skills and knowledge to their students. Since the 1930s the main centers of artistic weaving in Soviet Ukraine have been *Bohuslav and Pereiaslav-Khmelnytskyi in Kiev oblast, Krolevets in Sumy oblast, *Dihtiar in Chernihiv oblast, and Reshetylivka and Velyki Sorochyntsi in Poltava oblast. After the Second World War weaving artels were organized in those centers and in Galicia (particularly Lviv, Kosiv, and Yavoriv), Bukovyna, and Transcarpathia, where artistic commercial and domestic weaving has continued developing. Weavers are trained at *tekhnikum*s of folk handicrafts; designers are educated at schools of applied art in Lviv, Vyzhnytsia, and Krolevets or at departments of artistic textiles at institutes of decorative and applied art in Kiev, Kharkiv, and Lviv. Mass-produced woven ornamental articles are made at the Kherson, Donetsk, and Ternopil cotton-manufacturing complexes, the Kiev, Darnytsia, and Lutske silk-manufacturing complexes, and the Kyianka Kerchief Factory in Kiev. (See also *Kilim weaving and *Textile industry.)

Weber, Friedrich Christian, b and d ? Envoy from Brunswick-Hannover to the Russian Empire in 1714–20. His reminiscences, which provide a valuable source of information about Ukraine in the period shortly after Hetman I. Mazepa, were published in French (*Memoirs*, 1720) and German (*Das veränderte Russland*, 1721).

Wedding. The marriage ceremony with its accompanying festivities. In Ukraine the traditional wedding was a well-planned ritual drama, in which the leading roles were played by the bride and bridegroom, called princess and prince, and the other clearly defined roles (match-maker, groomsman, bridesmaids) by the couple's parents, relatives, and friends. The wedding combined the basic forms of folk art – the spoken word, song, dance, music, and visual art – into a harmonious whole. It was reminiscent of an ancient theatrical drama with chorus, whose spectators were also actors. The rituals date back to pre-Christian times (traces of *matriarchy, the abduction of

the bride) and were influenced extensively by medieval practices (ransoming the bride, simulating a military campaign, the fighting between two camps, addressing the guests as princes and boyars, and the church ceremony). The ceremony included traces of ancient customs, which had lost their original, mainly magical, significance and had become mere play. Gradually the church ceremony assumed the central role in the wedding.

Amvrosii Zhdakha: *Ukrainian Wedding: Greeting of the Bride* (watercolor, 1890s)

The traditional Ukrainian wedding usually took place in the early spring or the autumn and lasted several days. It was divided into many acts or episodes: (1) the match-making (*svatannia*) – discussions about the marriage between the bridegroom's representatives (*starosty* or *svaty*) and the bride's parents or relatives; (2) the inspection (*ohliadyny*, *obzoryny*, *rozhliadyny*) – a visit by the bride's relatives to the bridegroom's house for the purpose of assessing his wealth; (3) the betrothal (*zaruchyny*, *rukovyny*, *khustky*) – the marriage agreement between the young couple, symbolized by the joining of hands; (4) the branch (*hiltse viltse*) – a ceremonious dressing of a green tree with flowers, ribbons, and ears of wheat; (5) the wreaths (*vinky*) – a ritual making of wreaths using periwinkle, the symbol of virginity; (6) the invitation (*zaproshuvannia*) of guests to the wedding; (7) the seating (*posad*) of the betrothed couple in the place of honor at the table; (8) the unbraiding (*rozpleteny*) – the ritual combing of the bride; (9) the wedding bread (*korovai*) – the baking and decorating of the ritual bread from flour donated by all the wedding participants; (10) the blessing (*blahoslovlennia*) of the couple by the bride's parents before the couple's departure for church; (11) the marriage ceremony (*vinchannia*) in church, usually on a Sunday; (12) the return (*povernennia*) to the bride's house; (13) the fetching (*poizd*) – the arrival of the bridegroom's relatives at the bride's house to claim her, and their cold reception; (14) the introduction (*predstaoliuvannia*) – an attempt by the bride's relatives to substitute other girls for the bride; (15) the reconciliation (*pomyrennia*) – the presentation of gifts to the bride's parents and the establishment of peace between the two families; (16) the division (*rozpodil*) – the cutting and distributing of the wedding bread among the wedding guests; (17) the departure (*vid'izd*) of the bride with her belongings to her husband's house; (18) the interception

(*pereima*) – the capture of the bride by a group of young people, and her ransoming; (19) the reception (*zustrich*) – the welcoming of the bride in her new home by her mother-in-law; (20) the chamber (*komora*) – the defloration of the bride in the bridal chamber; (21) the invitation (*perez-va*) – the public announcement of the bride's virginity and invitation of her parents to the bridegroom's house; (22) the supplements (*prydatky*) – a visit of the bride's relatives to the bridegroom's house, marking the climax of the wedding; (23) the toasting (*perepii*) – the postwedding feast at the house of the bride's parents; and (24) the gypsying (*tsyhanshchyna*) – the collecting of means for further merrymaking by the wedding guests throughout the village. This wedding 'scenario' became well established in the 16th to 19th centuries and had many regional variations. Each act in the drama involved magic ceremonies, wedding songs, and rituals.

A wedding in Mykolaiv oblast in 1986

After the revolution the Soviet regime treated the traditional wedding, with its church ceremony, as a bourgeois vestige and launched a campaign against it. The concept of 'free love,' which was widely promoted in its place, proved to contribute to the dissolution of family life; hence, in the early 1920s marriage registration was made compulsory, and to give the event some solemnity, people were urged to combine the registration with a 'red wedding.' This ceremony, it was hoped, would supplant the traditional wedding. In essence the 'red wedding' was another public meeting, featuring a presidium, speeches, and a march with red banners and slogans. The ceremony did not catch on and by the late 1920s had been forgotten. In the countryside young people continued to hold the traditional wedding, and members of the intelligentsia and most urban residents simply registered marriages without any ceremony.

Forced collectivization, man-made famine, and terror, followed by the Second World War, led to the disappearance of the traditional wedding in Soviet Ukraine. It was revived after the war and provoked a reaction from the regime. The authorities encouraged 'red weddings,' 'Komsomol weddings,' 'collective-farm weddings,' and other forms of wedding, incorporating in them certain old traditions that appeared 'progressive.' But these new weddings failed to catch on. To divert young people from church marriages, the Communist party and the government decided to build 'marriage palaces,' later renamed

'happiness palaces.' The first marriage palace was opened in Kiev in July 1960, and by 1963 there were a hundred of them in Ukraine. Five thousand clubs and palaces of culture, also, were adapted for marriage registration ceremonies. Folklore specialists at the Academy of Sciences, the universities, and other institutions were instructed to design a 'contemporary Soviet wedding,' composers, to write new wedding songs, and poets, to write special wedding verses.

On 15 July 1972 the Presidium of the Supreme Soviet of the Ukrainian SSR adopted a law on the official marriage ritual: the marriage registration ceremony would be conducted by the 'ritual matchmaker' – a member of the Soviet of Workers' Deputies – assisted by the staff of the civil registry office. The law specified how the officials were to be dressed, how the hall was to be decorated, and what the speeches were to contain. Couples who agreed to a Komsomol wedding were rewarded handsomely: often the entire cost of the wedding was covered by the couple's collective farm, plant, or institution, and the couple was given access to a special store stocked with generally unavailable goods. Despite these incentives the imposed wedding ceremony was not accepted widely in Ukraine. The 1986–8 campaign for an 'alcohol-free wedding' was also a failure. Most young people, especially in the villages, continue to prefer the traditional wedding with a church ceremony. A good number of those who went through a Komsomol wedding also married secretly in a church. Many of the traditional wedding rituals are no longer practiced, and those that have been preserved (the blessing, the wedding bread) are considerably simplified.

In Ukrainian communities abroad the traditional wedding has retained some archaic elements; in the 1950s, for example, Ukrainians in Rumania still practiced the ritual of abduction of the future bride. Guests at a Ruthenian wedding in Yugoslavia, where weddings of 500 guests are not uncommon, are still decorated with *rushnyky* (see **Rushnyk*). Ukrainians in Canada and the United States hold on to some elements of the traditional wedding as an expression of national identity.

The earliest references to Ukrainian folk weddings can be found in medieval chronicles, church sermons, and religious works of the 11th to 15th centuries. There are descriptions of weddings from the 16th to 18th centuries, written mostly by foreign visitors to Ukraine (J. Lasitzki, G. de Beauplan, G. Kalinovskiy). In the 19th and early 20th century, detailed descriptions of weddings in various regions of Ukraine were published. F. Vovk's historical study of the Ukrainian wedding, however, remains unsurpassed. Among recent books published in Ukraine on the traditional and contemporary wedding M. Shubravskaya's work is noteworthy. The traditional wedding is described frequently in Ukrainian literature – in H. Kvitka-Osnovianenko's *Marusia* and *Svatannia na Honcharivtsi* (Matchmaking at Honcharivka), for example; T. Shevchenko's *Nazar Stodolia* and *Naimychka* (The Hired Girl); Yu. Fedkovych's *Liuba-zhuba* (Love Is Fatal), *Sertse ne povchyty* (You Can't Teach the Heart), and *Beztalanne zakokhannia* (Hapless Love); I. Franko's *Velykyi shum* (The Great Noise) and *Ukradene shchastia* (Stolen Happiness); M. Kotsiubynsky's *Tini zabutykh predkiv* (Shadows of Forgotten Ancestors); and in the works of Ukrainian Soviet writers, such as M. Stelmakh, L. Kostenko, and I. Chendei. It has been depicted since the 18th century by Ukrainian

painters, such as K. Trutovsky, M. Pymonenko, I. Izha-kevych, A. Zhdakha, A. Bazylevych, V. Zadorozhny, T. Yablonska, H. Yakutovych, F. Humeniuk, and I. Marchuk, and by non-Ukrainian painters, such as M. Shibanov, V. Tropinin, I. Sokolov, and J. Brandt.

Wedding songs. Ritual songs that accompany the different stages of a traditional *wedding. They form the largest subgroup of lyrical folk songs on family life. The earliest reference to wedding songs in the written sources dates back to 1096, and the first published samples of wedding songs appeared in 1820. Since then they have been included in virtually every anthology of Ukrainian folk songs. The AN URSR (now ANU) collection *Vesil'ni pisni* (Wedding Songs, 1982) contains 2,256 songs, 1,662 of them with the melody. No Slavic nation has a larger repertoire of wedding songs. Although all ritual songs have gradually lost their magical meaning, wedding songs retained such a meaning longer than other songs. They can be divided into four groups according to their role in the wedding: songs that are closely tied to only one event in the wedding, for example, the wedding bread, branch, or wreath rituals; songs that accompany several stages of the wedding; songs that may be sung during various parts of the wedding; and songs whose relation to the wedding has been forgotten. Songs of the first group are the oldest. Wedding songs can also be divided according to the various stages of the wedding. M. Shubravska divided them into 45 groups and some subgroups. In fact there is no wedding ritual without an accompanying song. The majority of wedding songs deal with family life, and many of them contain traces of the primeval matriarchal order. But there are also reminders of later epochs. The basic themes are the hardships awaiting the young couple, particularly the bride in her new home with the groom's parents; separation from one's beloved; the forced marriage to a repugnant man; the understanding mother; the cruel mother-in-law; and the tender feelings of the young cou-

ple. Many of the songs have melancholy melodies similar to those of carols and laments. Today wedding songs have disappeared almost completely from the wedding ceremonies. They are performed only on stage in a stylized and dramatized form by folk ensembles. Attempts to replace the traditional songs with 'contemporary' ones have been unsuccessful.

M. Mushynka

Weevils. See Seed beetles.

Węgliński, Lew, b and d ? Polish poet in 19th-century Galicia. In 1858 he published in the Latin alphabet a three-volume collection of poems written in Ukrainian, *Nowyi poezyi maloruskii* (New Little Russian Poems). In 1885 he published two poetry books in Cracow titled *Zvuky od nashykh sel i nyv* (Sounds from Our Villages and Fields) under the pseudonym Lirnyk Naddnistrianskyi and a collection of satirical stories, *Hirkyi smikh* (Bitter Laughter), under the pseudonym Kost Pravdoliubets.

Olympic champion Ihor Rybak

Weight lifting (*vazhka atletyka*). The first weight-lifting circle in Ukraine was founded in Kiev in 1895 by Ye. Harnych-Harnytsky. At the turn of the century the Kievian physicians V. Kramarenko and A. Anokhin did much to promote the sport in Russian-ruled Ukraine. The first competition in the Southwestern krai of the Russian Empire was held in 1908, and many Ukrainian athletes took part in the All-Russian Olympiads in Kiev (1913) and Riga (1914). World records in the snatch, clean and jerk, and press in various weight categories were set by the Ukrainians K. Pavlenko (1914), M. Urytsky (1914), F. Hrynenko (1914), and S. Tonkoei (1917).

In the early years of Soviet rule, weight lifting became a popular sport. At the first All-Ukrainian Olympiad in 1922, the champions in three weight categories were Krylov, Lukashevych, and Bohdanov. The 1924 USSR weight-lifting championships were held in Kiev, and Kiev athletes placed second overall. In the 1930s the Ukrainian G. Popov established many world, USSR, and Ukrainian records, and from 1935 Ukrainian athletes were part of USSR teams sent to international weight-lifting competitions. In 1937 the Ukrainian team took first place overall at a USSR championship for the first time, and in 1938 Ya.

Kutsenko became the first Ukrainian athlete to lift a combined total of over 400 kg in the snatch, clean and jerk, and press. At the 1938 USSR championships Ukrainians set five of eight possible all-Union records, and on the eve of the Second World War, H. Novak became one of the leading weight lifters in the world. By 1939, out of 35 Soviet records (27 of them higher than world records), 17 had been set by Ukrainian athletes.

Since 1952, Ukrainians have taken part in the *Olympic Games as part of the USSR team. In 1956 I. Rybak from Kharkiv became the first Ukrainian to win an Olympic gold medal in weight lifting (lightweight). Ukrainians who have become world champions in various weight categories are L. Zhabotynsky (four times), P. Korol (three times), Yu. Zaitsev (twice), S. Rakhmanov (twice), V. Kryshchysyn, H. Ivanenko, V. Ustiushyn, S. Poltoratsky, A. Pysarenko, V. Beliaev, and H. Novak. Eighty-six USSR records have been set by H. Novak, 58 by Ya. Kutsenko, 24 by M. Kasianyuk, 23 by V. Kryshchysyn, and 20 by L. Zhabotynsky. In the postwar period new world records in various weight categories have been set by Ya. Kutsenko (1946), I. Maltsev (1948), O. Donskoi (1949), V. Piven (1949), P. Kirshon (1954), F. Osypa (1955), P. Matiukha (1957), V. Tymoshenko (1958), A. Zhytetsky (1958), V. Beliaev (1962), L. Zhabotynsky (1963), V. Berlizov (1963), H. Troitsky (1964), V. Andreev (1965), V. Shishov (1967), O. Kidiaev (1968), V. Kryshchysyn (1969), B. Pavlov (1969), S. Batishchev (1970), and Yu. Yablonovsky (1970).

Weights and measures. As agriculture, manufacturing, and commerce evolved in Ukraine from medieval times, so did various means of measuring their output and value. Weights and measures were not standardized, however; they were approximate, and varied spatially and temporally until the rise of modern centralized states. In medieval Ukraine, as elsewhere, a popular metrology was well developed. Units of linear measurement were originally named after parts of the human body and their dynamics: *palets* ('finger' [digit]); *likot* ('elbow' [cubit]); *stopa* ('foot'); *krok* ('step'); *mala piad* ('small palm' [the span of the extended thumb and forefinger]); *velyka piad* ('large palm' [the span of the extended thumb and little finger]); and *sazhen* or *siazhen* (from the verb *siahaty* ['to reach']), measured variously as the breadth of the horizontally extended arms (*makhovyi sazhen*), two large steps, or the distance between the toes of the left foot and the fingertips of the vertically raised right arm (*kosovyi* or *kosyi sazhen*). Large distances were measured in units called *verstva* or *versta* (a 'small' *verstva* equaling 500 *sazhni* and a 'large' *verstva* equaling 1,000 *sazhni*), *popryshche* (ie, 1,000 steps), *perestril* (ie, the distance an arrow shot from a bow could travel, roughly 60–70 m), and *hin* (originally the length of a plowed field), which came to equal 60 *sazhni* (a 'small' *hin*), 80 *sazhni* (a 'middle' *hin*), and 240 large steps or 185 m (a 'large' or 'good' *hin*, corresponding to the Roman *stadium*).

Area was measured in units of *desiatyna* ('tenth' or 'tith' of a sq *verstva*), *vyt* (6–8 *desiatyny*), and *sokha* ('plow', ie, 400–600 *desiatyny*). Mass was measured in units of *zolutnyk* (named after a gold coin equaling the weight of a

10th- to 11th-century Byzantine solidus, or 4.3 g), *pochka* (ie, 1/20 *zolutnyk*), *hryvnia* (literally 'fur collar' [cf German *Griffel*, ie, 96 *zolutnyky* or 1 Byzantine *litra*, which was then also used in Ukraine), *ansyr* (ie, 128 *zolutnyky* [approx 546 g], cf German *Ganzer*), *puđ* (ie, 40 *hryvni* or 1 Hellenic gold talent), *kentar* or *kontar* (ie, 3 *pudy*), and *berkovets* (ie, 10 *pudy*, named after the Viking trade center of Birka, in Sweden), and *kap* (4 *pudy* of silver). Various Byzantine weights, such as the didrachm (approx 2 *zolutnyky*), were also used in the 11th and 12th centuries.

Volume, particularly of grain, was measured out in units of *horst* ('handful') and in various wooden domestic receptacles: *oslynka*, *lukno* (possibly equaling the later *harnets*), *vidro* ('pail'), *chetveryk* (corresponding to a Roman quadrant), *korets* (cf Greek *choros*, later also a unit of mass [approx 50 kg under Polish rule and 6 *pudy*, ie, approx 100 kg, under Russian rule], *mishok* ('sack'), and *mirka* ('measure', approx 6 *pudy* and later approx 12.5 kg under Polish rule). Salt was measured out in receptacles called *holovazhnia* and *puz*, and honey and mead were measured out in large receptacles called *koloda* ('log', ie, 10–12 *vidra*) and *provara*. Liquids were measured out in receptacles called *kobel* (cf German *Kübel*), *skord*, *vidro* (approx 12 L), *bochka* ('barrel'), and *kad* (or *okova*, an iron-banded barrel weighing 12–14 *pudy*). Grain sheaves, fruits, vegetables, eggs, coins, and other items were measured out in quantities of *kopa* (ie, 60 pieces) and *polukopa* (*polukipok* for sheaves, ie, 30 pieces).

Under Lithuanian and Polish rule German commercial units of measurement were widely used in Ukraine in addition to customary units. The *tsal* (Polish: *cal*, from German *Zoll*), equaling the width of the thumb (later 24.8 mm), became the basic linear measurement; 12 *tsali* equaled a *stopa*, and 24, a *likot* (Polish: *tokieć*). Distances were measured in miles of various lengths: 7,422 m (the German *Meile*), 9,278 m (the Ukrainian *mylia*), and 5,566 m (the Polish *mila*). Land area was measured in units of *morg* (Polish: *mórg*, from German *Morgen*); originally designating the size of a field that could be plowed using a pair of oxen in a morning, a 'royal' *morg* equaled 0.5985 ha, and a 'Lithuanian' *morg*, 0.7123 ha; they were divided into 300 *pruty* ('rods', Polish: *pręty*). Land was also measured in units of *lan* (Polish: *lan*, German: *Lehen*, from Latin *laneus*); a small ('Flemish' or 'Chełmno') *lan* was 30 *morgy* (approx 16.8 ha), and a large ('Franconian') *lan* was 43.5 *morgy* (approx 25 ha). With the introduction of the **voloka* land reform, from 1557 on land was measured in units of *voloka* (Polish: *woloka*), that is, the amount of land a peasant could harrow in a day (30 [later 33] *morgy*). Mass was measured in units of *funt* ('pound', German: *Pfund*); weighing from 398 g (the 'Cracow' *funt*) to 405.5 g (the 'Szczecin' *funt*), the *funt* was divided into 2 *hryvni* (Polish: *grzywna*), or 32 *luty* (Polish: *lut*), or 8,400 *asy*. Thirty-two *funt* made up a 'Warsaw' *kamin* ('stone', Polish: *kamień*), and 26, a 'Cracow' *kamin*; 5 *kamini* made up a *tsentnar* (German: *Centner*, Polish: *centnar*). The basic unit of volume was the *harnets* (Polish: *garniec*, approx 3 L), which was divided into 4 *kwarty* ('quarts') or 16 *kvatyryky*. Seventy-two *harnetsi* made up a *bochka* ('barrel'). Quantities were measured out in dozens (*tuzin*, from French *douzaine*).

In the Ukrainian lands that came under Russian rule a standardized Russian metrology, developed in the early part of the 18th century, was introduced and retained, with some minor changes, until 1927. A *versta* (1,066.8 m) had 500 *sazhni*; 1 *sazhen* (2.133 m) had 3 *arshyny*; and 1 ar-

shyn (originally a Turkic measure, Russian: *arshin*, 71.1 cm) had 16 *vershky* (1 *vershok* equaled 4.44 cm). Alternately, 1 *sazhen* had 7 *futy*; 1 *fut* ('foot', 30.48 cm) had 12 *diuimy*; 1 *diuim* ('inch', cf Dutch *duim*, 2.54 cm) had 10 *linii*; and 1 *linia* ('line', 2.54 mm) had 10 *tochky* ('points'). Land area was measured in *desiatyny*: from 1753, 1 *desiatyna* was 2,400 sq *sazhni* (1.09 ha), and 1 sq *sazhen* (4.55 sq m) was 9 sq *arshyny* or 49 sq *futy*. The basic unit of dry volume was the *chetvert* (209.9 L), which had 2 *miry*, or 8 *chetvertyky*, or 64 *harntsi*. Liquids were measured in units of *bochka* (491.96 L), which had 40 *vidra*; 1 *vidro* (12.3 L) had 10 *kukhli* ('ladles') or 20 *pliashky* ('bottles'); 1 *pliashka* (0.61 L) had 5 *charky* ('cups') or 10 *shkalyky* ('half-cups'). Mass was measured in units of *berkovets* (163.8 kg), which had 10 *pudy*; 1 *pud* had 40 *funty*; 1 *funt* (409.5 g) had 32 *loty*; 1 *lot* (12.8 g) had 3 *zolutnyky*; and 1 *zolutnyk* (4.27 g) had 96 *doly* (1 equaled 44.4 mg).

In the Western Ukrainian lands that fell under Austrian imperial rule, Lower Austrian metrology was introduced and became the only legal system in 1855. Lengths were measured in units of *sazhen* (1.9 m) and *likot* (77.8 cm); 1 *sazhen* had 6 *stopy* (1 equaled 31.6 cm). Distances were measured in 7.58-km postal miles. Agricultural land was measured in 0.575-ha units of *morg* (German: *Joch*).

Many other measurements were also used in 19th- and 20th-century Ukraine. Lengths, particularly of cloth, were measured in units of *mira* (76 cm), which had 30 *tsali*; of *stina* or *stinka* (approx 7 m); and of *postav* (approx 28 m). Several other land measurements were widespread: *chvertka* (8–10 *desiatyny*), *zahin* (5–6 *desiatyny*), *vidriz* (3 *desiatyny*), *riza* (2 *desiatyny*), *polurizka* (0.25 *zahin* or 1.50 *desiatyny*), *pishak* (11 *morgy*), *klitka* (12 *morgy*), *den* ('day'), that is, the amount of land that could be plowed in a day (approx 0.75 *desiatyna*), and *upruh*, that is, the amount of land that could be plowed using a pair of oxen in a third of a day. Large volumes, particularly of lumber, were measured in *cu sazheni*. In Southern and Western Ukraine the *oko* (originally a Turkic unit, 1,248–1,283 g or 1–1.5 L) was used and, for weighing wax, lead, sugar, and tobacco, the *kamin* (24, 30, 32, or 36 *funty*).

Most of the old units of measurement gradually fell into disuse after the official adoption of the metric system in the Austro-Hungarian Empire in 1875, partially in the Russian Empire in 1899, and in the USSR in 1925.

Weir, John [Vyvjurs'kyj, Ivan], b 23 October 1906 in Broad Valley, Manitoba, d 23 November 1983 in Toronto. Journalist, publicist, and community leader. Weir was a member of the Communist Party of Canada from 1927 and sat on its central committee after 1934. He edited the Party's newspapers *Worker* (1935–6), *Daily Clarion* (1936–9), and *Canadian Tribune* (1943–6, 1970–3) as well as the procommunist *Svit molodi* (1927–9) and *Ukrainian Canadian* (1947–54). He was on the executive of the *Association of United Ukrainian Canadians and national secretary of the Canadian Slav Committee (1958–61). In 1940–2 he was interned by the Canadian government. Weir translated works by T. Shevchenko, I. Franko, and Lesia Ukrainka into English.

Welding (*zvariuvannia*). Research on electric welding in Ukraine was begun early in the 20th century by specialists such as M. *Benardos, M. Slavianov, and D. Dulchevsky. By the end of the 1920s V. Nikitin in Dnipropetrovske, R. Lashkevych in Kharkiv, and V. Nauman in Mariupil had organized welding into a systematic science. In 1929, on Ye. *Paton's proposal, the department of engineering structures was set up in the VUAN (now ANU) in Kiev. In 1934 the department was reorganized into the *Institute of Electric Welding, which in the 1950s became the chief center of welding research in the USSR; the laboratories of the leading plants in Ukraine came under its supervision. Welding research is also carried out at the *Institutes of Electrodynamics of the ANU, the institutes of ferrous metallurgy in Dnipropetrovske (est 1953) and Donetske (est 1960), and the *Ukrainian Scientific Research Institute of Metals. In 1939–40 Ukrainian scientists invented a method of constructing all-welded bridges. In 1953 the largest such bridge in the world was built over the Dnieper River in Kiev.

Welding and related research has been done in Ukraine by Paton and V. Shevernitsky (the strength of welded structures), K. *Khrenov, N. Kytsiak, and M. Matiiko (underwater welding and cutting of metals), H. *Voloshkevych (welding metal in the vertical position), Paton and Voloshkevych (electro-slag welding, which can join metals of any thickness), D. *Dudko (welding in carbon dioxide settings), V. *Lebedev, S. *Kuchuk-Yatsenko, I. Chernenko, and V. Cherednychok (continuous flash welding for joining rails and serial production), A. Asnis, B. Kasatkin, and M. Hapchenko (the vibrational immunity of welded joints and structures), Khrenov, V. Moravsky, and S. Svechnikov (electric condensation welding of small-gauge metals), and H. Raievsky and O. Rozenberg (the assembly of petroleum tanks from sheet metal).

Ukrainian scientists, such as S. Hurevych, O. *Romaniv, and V. Volkov, were the first to introduce in industry the welding of titanium and its melt under flux. D. Rabkin developed the mechanized welding of aluminum and its melt under flux, and B. *Medovar the mechanized welding of rust-resistant and thermal steels, and copper. B. Lebedev and V. Sosnovsky mechanized welding tasks in the construction of smelting furnaces and applied complex mechanization in the construction of the largest blast furnace in the world (No. 9 of the Kryvyi Rih Metallurgical Plant). Plasma-arc and electronic-radiation recasting were tested in ferrous and nonferrous metallurgy by B. *Movchan. Articles on welding technology have appeared in the specialized journal *Avto gennyi robotnik* (1932–9) and the monthly *Avtomaticheskaia svarka* (1948–), published in Kiev by the Institute of Electric Welding and translated into English in Cambridge, UK.

Welling, Gottard, 1624–59. Swedish diplomat. He was sent to Ukraine in 1657 for discussions with Hetman B. Khmelnytsky. His personal account of the mission confirms that Khmelnytsky set his policies and conducted his affairs independently of Muscovy. A full account of the proceedings was provided by a second Swedish legate, J. Hildebrandt (published as *Dreyfache Koenigl. Schwed. Legations-Reiss-Beschreibung in Siebenbuergen, die Ukrain ... den Legaten An 1656 et 1657*, 1937).

Welykyj, Athanasius. See Velyky, Atanasii

Wenhlowsky, Juri. See Venhlovsky, Yurii, Jr.

Weres, Roman [Veres], b 27 November 1907 in Paryshchi, Nadvirna county, Galicia, d 11 January 1980 in Chicago. Librarian; member of the Shevchenko Scientific Society. He was educated at Lviv (1930) and the Ukrainian Free (1947) universities. He emigrated to the United States in 1955 and obtained an MLS from Western Michigan University (1958). He worked in libraries in Adrian and Chicago, Michigan, and became president of the Ukrainian National Museum in Chicago and the Ukrainian Library Association of America. He compiled *Ukraine: Selected References in the English Language* (2nd edn, 1974) and *Index of Ukrainian Essays in Collections Published outside the Iron Curtain* (9 vols, 1967–75).

Werewolf (*vovkulaka*). A mythological creature who changes from a man into a wolf at night to eat animals, humans, or corpses and returns to human form at sunrise. According to folk beliefs, some persons, whose mothers had unexpectedly seen a wolf, had eaten meat from an animal killed by a wolf, or had been impregnated during a religious ban on sexual activity, were born werewolves. Others were changed into werewolves by a witch's or sorcerer's spells. Ukrainian beliefs about werewolves were similar to those of other European peoples.

Werkschutz. A paramilitary formation organized by the German authorities in occupied territories during the Second World War for guarding industrial sites, particularly plants involved in war production. The *Werkschutz* units had a military structure and were commanded by locally recruited officers who were subordinate to German commanders or administrative bodies. The first Ukrainian units arose in 1940 in the Generalgouvernement to guard the steel mills in Stalowa Wola and Starachowice. They were formed mostly of officers and soldiers of the former Legion of Ukrainian Nationalists. Later, similar units were organized in other towns of the Generalgouvernement and, from 1941, in the Galicia district and Reichskommissariat Ukraine.

Westerfeldt, Abraham van (Westervelt), b ?, d between 24 and 30 April 1692 in Rotterdam. Dutch artist. While in the service of the Lithuanian hetman J. Radziwiłł (1649–53), he witnessed the Cossack-Polish War and depicted it in his paintings. Eighteenth-century copies of some of these works have been preserved. They include *Cossack Envoys*, *Audience with Radziwiłł*, *General View of Kiev from the Dnieper*, and *Defeat of the Lithuanian Flotilla by the Cossacks on the Dnieper*. He also sketched landscapes in Kiev, including views of the Golden Gate, the St Sophia Cathedral, and the Kievan Cave Monastery. It has been

conjectured that W. Hondius's engraving of B. Khmelnytsky was copied from a portrait by Westerfeldt.

Western Beskyd. The part of the Carpathian *Beskyds lying between the Biala and Topla river valleys in the west, the Slanské Mountains to the south, and the Low Beskyds in the east. Only the eastern reaches of the Western Beskyds lie in ethnic Ukrainian territory, in a region in southern Poland and northeastern Czechoslovakia. Within that area a number of notable mountain and mountain groups are located, including the Yavoryna group (1,116 m) and the Cherhiv Mountains (with Mt Menchil at 1,157 m) and the *Spišská Magura (1,158 m) and the Levoča Mountains (up to 1,300 m). Those two main areas are separated by a rocky plain. The ridges of the formation generally are broad and smooth, sparsely populated, and covered with woods and meadows. Most of the area's population can be found in its lower-lying reaches. The Ukrainian inhabitants of the Western Beskyd, generally *Lemkos, were forcibly resettled after the Second World War and can be found today only in the Prešov region of Slovakia.

Western Buh River (Zakhidnyi Buh). The official Soviet name of the *Buh River, used to differentiate it from the Southern Buh (*Boh) River.

Western Caucasia (Zakhidnii Kavkaz). The western section of the Great Caucasus Range. It runs for approx 500 km from the Kerch Strait in the northwest to the source of the Kuban River in the southeast. The Black Sea area of Western Caucasia (in the RF) has extensive Ukrainian settlement (see *Kuban) whereas only the northwestern corner of the Abkhaz AR (also included in this geographic zone) has any significant Ukrainian population. (See also *Caucasia.)

Western Province of the Ukrainian National Republic (Zakhidnia oblast Ukrainskoi Narodnoi Respubliki, or ZOUNR). The name assumed by the Western Ukrainian National Republic after the proclamation of union with the UNR. According to the resolution of the Ukrainian National Rada, passed in Stanyslaviv on 3 January 1919, and the proclamation of the Directory of the UNR, issued on 22 January 1919, the two states merged into one, with ZOUNR preserving its territorial autonomy. The final union of the two states was to be settled by the Constituent Assembly of Ukraine. Until then the Ukrainian National Rada and the State Secretariat were invested with civil and military power on the territory of the ZOUNR. Only the commands of the armed forces at the front were merged, a joint delegation was sent to the Paris Peace Conference (1919–20), and a common currency was introduced. For a brief while Ye. *Petrushevych, the president of the Ukrainian National Rada, was a member of the Directory. The Directory set up a special ministry for the ZOUNR, which was later abolished. When the UNR mission to Warsaw declared on 2 December 1919 that the government of the UNR had no interest in the territory of Western Ukraine, the government of the ZOUNR (see *Dictatorship of the Western Province of the UNR), including its delegation in Paris, rejected the joint institutions with the Directory and began to conduct its own, independent policy. At the beginning of 1920 the ZOUNR government-in-exile and its delegation in Paris returned to the former

name of the state, the Western Ukrainian National Republic, and began to call its territory Eastern Galicia, because that name had been used in mid-1919 in the documents of the Paris Peace Conference.

M. Stakhiv

Western Ukraine (Zakhidnia Ukraina). The designated name of the territories of the renewed Ukrainian state created in what had been part of the Austro-Hungarian Empire, defined by the Ukrainian National Rada (UNRada) in a resolution of 19 October 1918 in Lviv. Western Ukraine encompassed 'Eastern Galicia bordered by the Sian River, but including the Lemko region; northern Bukovyna, including the towns of Chernivtsi, Storozhynets, and Seret; and the Ukrainian region of northeastern Hungary' (Article 1, Resolutions of the UNRada). That entity became the *Western Ukrainian National Republic (ZUNR) by the constitution of 13 November 1918.

The term 'Western Ukraine' was also used popularly to designate the ZUNR or to describe all the Ukrainian territories occupied by Poland, Czechoslovakia, and Rumania in the interwar period. After 1939 'Western Ukraine' referred to the Ukrainian territories which in that year became part of the Ukrainian SSR, as distinct from central and eastern Ukraine, which were a part of the Ukrainian SSR in 1920–39. In Soviet terminology 'Western Ukraine' designated the historical or geographic territories that became the Lviv, Ivano-Frankivske, Ternopil, Volhynia, and Rivne oblasts.

The Government-in-exile of the Western Ukrainian National Republic in Vienna in 1920. Sitting, from left: Lev Petrushevych, Lev Syroichkovsky, Kost Levytsky, Pres Yevhen Petrushevych, Volodymyr Singalevych, Roman Perfetsky, Yaroslav Selezinka, Myron Havrysevych; standing behind Perfetsky is Olha Basarab.

Western Ukrainian National Republic (Zakhidno-Ukrainska Narodnia Respublika, or ZUNR). A nation-state established on the Ukrainian ethnic territory of former Austria-Hungary on 19 October 1918 by the Ukrainian National Rada in Lviv. The Constitution of 13 November 1918 determined its name and defined the territory of the ZUNR as that which encompassed the Ukrainian regions of the Austrian crownlands of Galicia and Bukovyna and the Transcarpathian komitats of Szepes, Sáros, Zemplén, Ung, Bereg, Ugocsa, and Máramoros. A Ukrainian government took power on 1 November 1918 in Galicia, on 6 November in Bukovyna, and on 19 November in Transcarpathia. The governments in the last two territories were short-lived. In spite of the Ukrainian-Polish War

(November 1918 to July 1919) the government of the ZUNR held out longest in eastern Galicia.

The *Ukrainian National Rada, a legislative council, was the state's ruling body before the calling of the Constituent Assembly of the ZUNR. The *State Secretariat was its executive branch. Its power was eventually transferred to the *Dictatorship of the Western Province of the Ukrainian National Republic.

On 1 December 1918 the State Secretariat of the ZUNR concluded a preliminary agreement with the Directory of the UNR on the union of the two Ukrainian states. The agreement was approved by the Ukrainian National Rada on 3 January 1919 and by the Directory on 22 January. The union was proclaimed in a special proclamation of 22 January. Thenceforth the ZUNR assumed the name *Western Province of the Ukrainian National Republic. But the union was not fully implemented: the government bodies of the ZUNR continued to operate separately (see *Dictatorship of the Western Province of the UNR). When the UNR government recognized Polish rule in Ukrainian territory west of the Zbruch River, the ZUNR government rejected its policies completely.

In July 1919 Poland occupied most of the territory of the ZUNR and tried to get Entente recognition for its rule in Galicia. Although the Supreme Council of the Peace Conference representing the Entente instructed Poland on 25 June to occupy Ukrainian Galicia temporarily, it recognized Galicia's special status. On 20 November it drafted a treaty with Poland on the autonomy of eastern Galicia under the higher administration of Poland for 25 years, but the Poles rejected that treaty. The *Conference of Ambassadors of the great powers of the Entente finally recognized (12 March 1923) the Polish occupation, albeit with the provision that eastern Galicia was to remain autonomous.

Wetlands (*bolota*). Land areas with excessive moisture that provide a habitat for moisture-loving plants, the remains of which often accumulate to form peat. Wetlands may form along watercourses with impeded drainage, in and around shallow bodies of water with low shorelines, and in areas of humid climate (even away from bodies of water) where the soil is inadequately aerated, and decaying processes are impeded. Wetlands may be classified into three types according to the supply of water-borne minerals, the type of peat cover, and the nature of the vegetation: lowland (eutrophic), upland (oligotrophic), and transitional (mesotrophic).

Wetlands in Ukraine belong principally to the lowland and the transitional types. Upland wetlands make up no more than 10 percent of its wetlands by area alone. Ukrainian wetlands may also be subdivided according to vegetation into three types, sphagnum, grassy, and wooded. Sphagnum wetlands (which correspond to the upland wetlands) are found mostly in western Polisia and the Carpathian Mountains. Among the grassy wetlands the most widespread are sedge wetlands; they are followed closely by high grass wetlands consisting of reeds, cattails,

and rushes. High grass wetlands are widespread in the floodplains of the forest-steppe and steppe zones. Wooded wetlands, including the alder, birch, and willow-pine subtypes, are found mainly in Polisia.

Wetlands occupy about 1 million ha, or 1.7 percent of the land surface of Ukraine. They claim the most significant share of the territory in the forest belt (5–30 percent of a given raion), much less in the Left-Bank forest-steppe (2–5 percent), even less in the Right-Bank forest-steppe (up to 2 percent), and the least in the steppe (up to 1 percent). The most extensive wetlands are found in Polisia, along both sides of the Prypiat River, especially in its western reaches (Volhynia and Rivne oblasts), where they occupy large expanses and extend along river valleys. Grassy wetlands known as *hala* occupy up to 90 percent of the wetlands in that region. Central Polisia has fewer wetlands, particularly along the Dnieper River. More wetlands are found in the Chernihiv Polisia, notably on the Dnieper-Desna Divide (the Zamhlai Marsh) and on the floodplains of little rivers. In Western Ukraine pockets of wetlands occur along rivers such as the Buh, the Styr, the Dniester (the Sambir Marsh), and the Tysa (the Chorne Boloto or Black Marsh). The Left-Bank forest-steppe has wetlands mostly in the floodplains of rivers such as the Sula, the Udai, and the Khorol. In the Right-Bank forest-steppe isolated wetlands are encountered in only a few river valleys. In the steppe zone the typical wetlands are found in floodplains known as *plavni*. Those reach their largest expanses in the mouths of major rivers, notably the Danube, the Dnieper, and the Kuban.

The economic exploitation of wetlands in their natural state for agriculture or forestry has offered limited returns. Hay harvested from grassy wetlands has generally been coarser than that from meadows, and wooded wetlands have yielded relatively low value in small trees. The harvesting of reeds, cattails, and berries has provided only marginal income to those engaged in handicrafts or food processing. Only the extraction of peat for fuel has provided a major industrial benefit. Furthermore, wetlands hindered transport and were conducive to the breeding of locusts and mosquitoes. Accordingly, the drainage of wetlands in Ukraine was considered to be a wise economic policy (see *Drainage of land).

The amount of drained agricultural land in Ukraine surpassed three million hectares in 1987. Some of the drained areas have been retained as hayfields; others have been plowed for the growing of crops, such as oats, buckwheat, cabbage, potatoes, and clover. As a consequence of the drainage the area of wetlands declined to approx one million hectares in the 1980s.

The combined effect of drainage and the reduction in area of the wetlands has increased spring flooding and reduced the summer flow of the Prypiat and other rivers that were formerly flanked by wetlands. Wetlands not only act like a sponge, regulating the water flow of rivers, but also serve as a buffer against shoreline and riverbank erosion. Furthermore, wetland vegetation (notably reeds and cattails) has a high capacity to act as a pollution filter (an important consideration when surface water is to be used for drinking). Finally, wetlands serve as refuges for wildlife, which is becoming impoverished as a result of the extinction of species. Because of their valuable ecological functions, wetlands are now being viewed as natural ecosystems that should be subject to conservation.

Part of the monument to Ukrainian soldiers who died in the Wetzlar POW camp (sculptor: Mykhailo Parashchuk, limestone and sandstone, 1918)

Wetzlar. A town (1990 pop 51,400) on the Lahn River in Hessen, Germany. During the First World War a POW camp for soldiers of the Russian army was established there. There were over 10,000 Ukrainians among its inmates. Supported by the *Union for the Liberation of Ukraine, the camp's educational department set up an elementary school, an amateur theater, a library, and a press (*Prosvitnii lystok* and then *Hromads'ka dumka*) for the Ukrainians. A Sich society and Orthodox and Methodist congregations were also active there.

Wheat (*Triticum*; Ukrainian: *pshenytsia*). A cereal grass of the Gramineae (Poaceae) family, one of the oldest and most important cereal in *crop cultivation, particularly in Europe and North America. Of the thousands of known species of wheat by far the most common is bread wheat (*T. vulgare* or *aestivum*; Ukrainian: *pshenytsia miaka*); it produces a soft grain that is used for making bread flour. Durum, or macaroni, wheat (*T. durum*; Ukrainian: *pshenytsia tvrda, boroshno*) yields a hard grain used in making pastas; club wheat (*T. compactum*) is used to make flour for cakes, crackers, and pastries.

Most wheat is grown for human food. Some 10 percent is retained annually for seed, and small quantities are used in making starch, paste, malt, dextrose, gluten, alcohol (see *Liquor and spirits distilling), and other products. The former USSR was the world's largest single producer of wheat, with Ukraine accounting for the major share. Ukraine is popularly known as 'the breadbasket of Europe.'

Wheat has been known in Ukraine since the Neolithic period (5th to 4th millennium BC), when it was grown along the Buh and Dniester rivers. By the 6th century BC it was an important export from southern Ukraine to Greece and Rome. In the early Princely era it was partially displaced in importance by *barley and *rye. Conditions were favorable in the steppe and eastern Ukraine for

large-scale commercial farming of wheat. The steppe proved to be well suited to growing superior winter wheats (spring wheat had predominated in western and central Ukraine).

Wheat production (see *Grain production) has generally expanded during the 20th century – except following the forced *collectivization of agriculture in the late 1920s and early 1930s and the subsequent man-made *famine in Soviet Ukraine – although the total area sown with wheat has declined from 8,858,000 ha in 1913 to 7,568,000 ha in 1990. The decline has been accomplished primarily through a significant increase in average yields: in 1913 grain yield in centners per hectare was 11.8 for winter wheat and 7.5 for spring wheat, and by 1986–90 the respective figures were 36.4 and 27.3. New varieties of wheat and more effective farming techniques (see *Agriculture) in the south, relying on extensive *irrigation, have been developed. Some 7,970,000 t of wheat was harvested in 1913; in 1986–90 average annual harvests equaled 23,510,000 t. In Soviet Ukraine wheat production was concentrated on large state farms in Odessa, Mykolaiv, Kherson, Kirovohrad, and Crimea oblasts. Production of spring wheat was negligible; it had been displaced by harder winter wheat strains.

An important scientific research establishment is the *Myronivka Institute of Wheat Selection and Seed Cultivation. There were 11 varieties of spring and 34 varieties of winter wheat in Ukraine in 1983. The most common varieties of winter wheat grown in Ukraine are Bezostaia 1 and Myronivka 808. Other popular soft winter wheat varieties are Myronivka Jubilee, Odessa Jubilee 16 and 55, and Illich. The *selection and development of new wheat strains has a long history in Ukraine; many Ukrainian varieties are also grown in other countries. The famous Red Fife wheat, which emerged as the most important wheat in Canada in the mid to late 19th century and has set world standards for hard winter wheat, was based on a wheat that was developed in Galicia.

Wheel- and wagon-making. Wheeled vehicles and sleds have been built in Ukraine since ancient times. In the 19th century wheelwrights were found in virtually every village, although many practiced their craft seasonally. In some parts of the country the craft was especially well developed: in Zinkiv, Lubni, and Hadiache counties of Poltava gubernia; in Starobil'ske, Okhtyrka, and Bohodukhiv counties of Kharkiv gubernia; and, to a lesser degree, in Radomyshl, Chyhyryn, and Tarashcha counties of Kiev gubernia. Wheels and wagons from those areas were sold in Southern Ukraine and other regions where local craftsmen could not meet the demand. With the modernization of transport in the 20th century, wheel- and wagon-making declined in importance.

White Croats (*bili khorvaty*). A proto-Slavic tribe that was part of an alliance of *tribes in Subcarpathia. They migrated westward and to the Balkan Peninsula in the 7th century. They are believed to be the ancestors of certain *Ukrainians, specifically the *Hutsuls. In the Primary

Chronicle they are mentioned twice in an undated tribal survey and also, later, as Oleh's allies in his Byzantine campaign (907) and as the target of a campaign by Volodymyr the Great (993). There has been much controversy about the origin and migrations of the White Croats. Among Ukrainian historians Ya. Holovatsky, O. Partytsky, M. Hrushevsky, Ya. Pasternak, and M. Smishko have written about the tribe.

White Sea Canal. A slave-labor project. A massive subarctic construction project, it was one of the most ambitious showpieces of the First Soviet Five-year Plan. It also marked the first use of forced labor in the Soviet Union for a large-scale economic undertaking. In just 20 months, from September 1931 to April 1933, prisoners using primitive technology excavated over 2.5 billion cu m of rock in a stretch of approx 227 km to connect Lake Onega with the White Sea. There are no accurate figures on how many people perished; the literature speaks of over 100,000 or even a quarter of a million deaths. Among the victims were numerous Ukrainians, such as activists arrested in connection with the show trial of the *Union for the Liberation of Ukraine and, especially, deported *kulaks.

Whitefish (*Coregonus*; Ukrainian: *syh, riapushka, peliad*). A valuable silvery food fish of the family Salmonidae, generally found in cold northern lakes, often in deep water. Whitefish (*C. peled*) was introduced in Ukraine in 1929; it acclimatized well in local ponds, where it matures earlier than in lakes. Commercial whitefish breeding was established in *Pushcha-Vodytsia.

Wiert, Adrian Carton de, b 5 May 1880 in Brussels, d 5 June 1963 in Cork county, Ireland. British military and diplomatic figure. In 1918 he was appointed second-in-command of the British military mission in Poland, and in 1919–24 he led the mission. In January 1919 he mediated negotiations between the Poles and the Western Ukrainian National Republic, in which S. Petliura also participated. His experiences in Poland and Ukraine are noted in his autobiography, *Happy Odyssey* (1950).

Wild horse (*Equus caballus*; Ukrainian: *tarpan*). An extinct predecessor of the domestic horse, measuring 107–136 cm at the shoulders. It was gray with a black mane, a black tail, and a black stripe down its back. Once wild horses were commonly found in the steppes and forest-steppes of Ukraine, but because of land cultivation and natural displacement they disappeared completely. The last specimen was caught in 1886 near the village of Novovorontsovka, Kherson gubernia. Some experts claim that *tarpan* and the Przewalski horse are of the same species. *Tarpan* horses were rederived in the 1930s by selection of primitive horses and are preserved in the *Bilovezha Forest.

Wildlife protection and management. See Environmental protection, Nature preserves, and Wildlife refuge.

Wildlife refuge (*zakaznyk*). An area of land or a body of water designated for the purpose of protecting some specific plants or animal species. Such areas do not constitute fully rounded natural complexes, as in nature preserves (*zapovidnyk*). The most common wildlife refuges were established to protect valuable wild animals and birds by means of the prohibition of hunting on their territory for

10 years or more. Fishing refuges protect spawning grounds or young fish. A landscape refuge may protect a picturesque river valley or lake so that its esthetic qualities will be maintained for the benefit of outdoor recreation and tourism. Small plots of forest, steppe, or wetlands may be designated as plant refuges for the purpose of protecting their unique flora. Geological features such as caves or sites rich in fossils may also be protected. Even a site of historical significance may be designated as a *zakaznyk*.

Wildlife refuges were established on the basis of decisions made by the Council of Ministers of Ukraine or by local (oblast or even raion) councils. Activities on their sites were regulated by the republican government, the organs responsible for the protection of nature, and the executive committees of local councils. Legislation concerning the refuges was adopted by all USSR republics. Hunting, fishing, logging, grazing, hay cutting, and mining were usually prohibited on the refuges. In 1986 the Ukrainian SSR had 1,490 *zakaznyky* of various kinds, occupying a total area of 597,600 ha. (See also *Nature preserves.)

I. Stebelsky

Willow (*Salix*; Ukrainian: *verba*). A shrub or tree of the family Salicaceae, valued for ornamentation, shade, timber, and erosion control. Pussy willow, the male form of several shrubby species, has woolly catkins that harbingers the coming of spring. In Ukraine pussy willow branches are used on Palm Sunday instead of palm fronds. At least 30 species of willow are found in Ukraine, where they grow along riverbanks and canal banks, road ditches, and dam slopes. Willow wood is light and soft; it rots easily. It is used for making hand-carved articles, cores for veneers, furniture, barrels, boxes, crates, and some musical instruments, including the *bandura. Twigs of the common or silky osier (*S. viminalis*) are used for basket weaving and fence construction. In unforested areas willow is used as a construction material. Goats and sheep feed on the leafy branches of young willows. The bark is used in tanning leather. The hybrids with droopy branches are called weeping willows (*S. babylonica*). Certain willows are the source of salicylic acid, used in the manufacture of pain relievers.

Wilson, Thomas Woodrow, b 28 December 1856 in Staunton, Virginia, d 3 February 1924 in Washington, DC. Democratic president of the United States (1913–21). Rev P. *Poniatyshyn's efforts resulted in Wilson's signing on 2 March 1917 a public law resolution to designate a day on which funds could be raised in the United States for the relief of the Ukrainians, 'especially ... in war-stricken Galicia, Bukovina, and other Provinces of Austria.' Wilson proclaimed 21 April 1917 as Ukrainian Day in the United States. On 22 March 1917 his government was the first to recognize formally the Russian Provisional Government, and later it advanced it nearly 188 million dollars. It persistently refused, however, to do or say anything that would recognize Ukrainian national aspirations.

In his famous Fourteen Points Address to Congress on 8 January 1918, Wilson offered peace between the United States and the Central Powers based on the 'evacuation of all Russian territory' by the forces of the Central Powers and the preservation of the territorial integrity of the Russian Empire (point 6), on the 'freest opportunity of autonomous development' for 'the peoples of Austria-

Hungary' (point 10), and on the establishment of an independent Polish state on territories 'inhabited by indisputably Polish populations' (point 13).

From December 1918 to June 1919 Wilson headed the American delegation at the *Paris Peace Conference. There he labored to convince Britain and France to accept his Fourteen Points; succeeded in incorporating in the Treaty of Versailles a provision for the creation of the *League of Nations; drew up the 'Prinkipo proposal' for an immediate end to the Russian Civil War and the convocation of a peace conference (accepted only by the Bolsheviks); vehemently objected to the enlargement or prolongation of Allied military intervention in 'Russia'; and advocated a plebiscite in eastern Galicia to resolve the Ukrainian-Polish War. Wilson betrayed his imperative principle of national self-determination, however, by his stubborn commitment to the preservation of 'Russia's' territorial integrity (without, however, recognizing the Soviet government). He did not recognize the January 1918 UNR declaration of independence, and agreed to recognize Poland's annexation of eastern Galicia in 1919 on the condition that Ukrainians there would have autonomy.

R. Senkus

Wind energy. The harnessing of wind power by means of windmills has been practiced in Europe since the 11th century. Windmills were also known in Ukraine, especially in the forest and forest-steppe regions. They were used to power grain mills and sometimes to pump water. The first windmills appeared in Ukraine in the late 16th century. Some windmills are still used today. The first modern electricity generator using wind power in Ukraine was built in the 1930s near Sevastopil under the direction of Yu. *Kondratiuk; it had a capacity of 100 kw. In the late 1980s there were approx 9,000 wind generators in the former USSR (some 600,000 in the world in 1967). They serve mostly very small localities with no other sources of electricity and account for an insignificant share of Ukraine's total power output.

Windsor. A city (1981 pop 192,000; metropolitan pop 246,000) on the Detroit River in southwestern Ontario. Ukrainian workers were attracted to Windsor in the 1920s by the automobile industry. In 1925 the Ukrainian Catholic parish of ss Volodymyr and Olha was organized, and in 1939 it completed its church. The Orthodox community set up a parish in 1927 and built St Volodymyr's Church in 1937. The Ukrainian People's Home (est 1926) and the Prosvita society (est 1932) organized plays, concerts, and Ukrainian schools. Politically active émigrés from Galicia set up a branch of the Ukrainian National Federation and its affiliate veterans' and women's associations in the mid-1930s. Postwar émigrés established a branch of the Canadian League for Ukraine's Liberation (1953). The Ukrainian Credit Union in Windsor has grown steadily since 1946. Ukrainian businessmen and professionals organized their own association in 1952. In 1981 the city's Ukrainian population stood at 8,100. But only 1,430 inhabitants claimed Ukrainian as their sole mother tongue in 1991.

Wine-making industry. Modern wine making in Ukraine began at the end of the 18th century, shortly after the Black Sea region was annexed by Catherine II. After 1860 the imperial household department purchased land

A reserve of 1905 Tokay wine at the Masandra winery

on the south shore of the Crimea that was suited for viticulture. The Livadiia estate near Yalta soon became the leading wine-making center in Ukraine. The department's estates became the nucleus of the *Masandra Wine-Making Complex, which dominated the Crimean southern shore after the 1917 Revolution. Wine making in the steppe region was undertaken primarily by large landowners or German colonists, who were selected partly for their wine-making ability. Wine making in the Transcarpathian region developed as part of the larger Hungarian wine-making industry.

Today there are 123 primary wineries in the three wine regions of Ukraine. Most of them belong to state farms that process their own grapes and those from neighboring collective farms. There are several secondary wineries, where wine from the primary wineries is further processed and bottled. The most important are located in Kiev, Dnipropetrovske, Symferopil, Odessa, Kherson, Lviv, Donetsk, Makiivka, and Yalta. The champagne industry, which has plants in Kiev, Kharkiv, Odessa, Artemivske, Sevastopol, and Novyi Svit, is a separate industry.

In 1985 over 488 million L of more than 208 different named wines were produced in Ukraine, in addition to 492 million L of several varieties of champagne. By 1990 the quantity had dropped to 267 million L of wine and 488 million L of champagne. Some 77 of them were branded wines – high-quality wines, which are aged under special conditions. The rest were ordinary wines, which normally are bottled and sold within a year after harvesting. White wines outnumber red wines, because in most regions it is difficult to grow red grapes with sufficient color for a proper red wine. Unlike wines from Right-Bank Ukraine, wines made in Left-Bank Ukraine, including the Crimea, do not have a stable acid level and require the addition of citric acid for proper taste.

The steppe region produces 11 branded wines. The

Odessa region produces three white wines, Leanka Ukrainska, Perlyna Stepu, and Sylvaner Dnistrovskiyi, and one red, Oksamyt Ukrainy. The Kherson region produces two whites, Naddniprianske and Rkatsiteli Beryslav; a white dessert wine, Beryslav Dessert; and a rosé dessert wine, Lydia Kakhovska. The Izmail region has a red table wine, Shabo, and a rosé dessert wine, Starokozache, and the Zaporizhia region has a white dessert wine, Berdianske.

Transcarpathia produces nine branded wines. The Berehove microregion makes two white table wines, Berehovskye and Transcarpathian Riesling, and the Vynohradiv microregion produces the whites Kvity Polonyny, Promenyste, and Zakarpatske. The Serednie microregion has a white, Serednianske. Perlyna Karpat is made throughout Transcarpathia. The Mukachiv microregion makes a rosé, Rozheve stolove, and a white, Troianda Zakarpattia.

The Crimea produces 54 branded wines. The white table wines are Feteasca Krymska, Kokur Nizhnohorskyi, Kuldzhinskyi, and Sylvaner Feodosiyskyi. The white fortified wines are Madeira Al'Minska and Sherry Krymskyi. The Zolota Balka Wine-Making Complex produces five branded wines: the white table wines Aligote Zolota Balka, Riesling Al'Kadar, and Rkatsiteli Inkerman, the red table wine Cabernet Kachynske, and the red dessert wine Al'Minsk. On the south shore 43 branded wines are produced, 29 by the Masandra Wine-Making Complex, and 14 by the Maharach Experimental Station. Masandra produces the red table wine Alushta; the white dessert wines Kokur Dessert Surozh, Muscat Koktebel, Muscat White Dessert, Muscat White Pivdenoberezhnyi, Muscat White Chervonyi Kamin, Muscat White Livadiia, Pinot Gris Aidanil, Soniashna Dolyna, and Tokai Pivdenoberezhnyi; the rosé dessert wines Muscat Rosé Dessert, Muscat Rosé, and Pivdenoberezhnyi; the white fortified wines Madeira Krymska, Madeira Masandra, Port White Pivdenoberezhnyi, Port White Krymskyi, Port White Surozh, and Sherry Masandra; and the red fortified wines Port Red Pivdenoberezhnyi, Port Red Krymskyi, Port Red Livadiia, and Port Red Masandra. Maharach produces experimental quantities of the red table wine Rubinovyi Maharach; the white dessert wines Maharach no. 25, Muscat White Maharach, Pinot Gris Maharach, and Serdolik Tavridy; the red dessert wine Bastardo Maharachskyi; the rosé dessert wine Muscat Rosé Maharach; the white fortified wines Maharach no. 23, Maharach no. 24, Port White Maharach, and Sertsial; and the red fortified wines Maharach no. 22 and Port Red Maharach. (For bibliography see *Viticulture.)

R. Hutton

Winnipeg. The capital of and the largest city (1989 pop 564,474) in *Manitoba, situated at the confluence of the Red and Assiniboine rivers. After the Canadian Pacific Railway reached it in 1885, it became the central railway and immigration dispersal point through which European immigrants passed en route to settling in western Canada.

Winnipeg was the main center of Ukrainian life in Canada before the Second World War. It had the first newspapers: the Liberal **Kanadiis'kyi farmer* (est 1903), the Protestant **Ranok* (1905), the socialist **Robochyi narod* (1909), the communist **Ukrains'ki robotnychi visty* (1919), the Orthodox **Ukrains'kyi holos* (1910), and the Catholic **Kanadiis'kyi rusyn* (1911). The first Ukrainian urban cultur-

Prime Minister John Diefenbaker at the unveiling of the Taras Shevchenko monument outside the Manitoba Legislative Building in Winnipeg in July 1961; at the far left is Sen Paul Zyuzyk.

al society in Canada, the Shevchenko Reading Association, was formed in Winnipeg in 1899. Equally important were several community organizations which developed varying degrees of national status: the Ukrainian National Home, Ukrainian Canadian Citizens' Committee, Ukrainian National Committee, Ukrainian Central Committee, and Ukrainian Labour Temple. The co-ordinating body of the majority of organized Ukrainians, the *Ukrainian Canadian Committee (now Congress), was formed in 1940, in the city its headquarters since then. Winnipeg's pre-eminent position during this period reflected the fact that its Ukrainian community was up to five times larger than that in any other Canadian city. This situation changed considerably after the Second World War, and by 1971 both Edmonton and Toronto had Ukrainian populations roughly equal in number and influence to Winnipeg's.

The Ukrainian presence in Winnipeg was initially concentrated almost exclusively in the city's multiethnic and working-class districts: the North End, Point Douglas, and Brooklands. Although largely unskilled and frequently discriminated against, the city's Ukrainians had made respectable advances by 1939 in the retail trade, the service industry, manufacturing, transportation, and the professions, especially education and law. In 1943 the Ukrainian Professional and Businessmen's Club was organized. The city's Ukrainian population grew (according to census figures) from 3,600 (1911) to 7,000 (1921), 21,459 (1931), 28,162 (1941), 41,997 (1951), 53,918 (1961), and 64,305 (1971). The 1981 figures show a total of 79,350 Ukrainians in Winnipeg. In 1991, 18,590 of the inhabitants claimed Ukrainian as their sole mother tongue. Since the 1940s Ukrainians have constituted 10 percent or more of the city's total population.

The first Ukrainian alderman (T. Stefanyk) was elected in 1911, and the first city-based Ukrainian members of the provincial legislature (W. Kardash and S. Krawchyk) in 1941. Among the city politicians of Ukrainian ancestry, the best known was undoubtedly Mayor S. *Juba (1956-77), who in 1973 twinned Winnipeg with the city of Lviv.

Winnipeg regularly hosts triennial conventions of the Ukrainian Canadian Congress (KUK) and is the headquarters of the Ukrainian Catholic and Orthodox churches of

St Nicholas's Ukrainian Catholic Church in Winnipeg

Canada as well as of KUK. It is also the home of the *Ukrainian Cultural and Educational Centre (Oseredok), *St Andrew's College, the *Ukrainian Academy of Arts and Sciences in Canada, the O. Koshets Choir, the Rusalka dance ensemble, and the Osvita Foundation. It boasts a monument to Taras Shevchenko on the grounds of the Manitoba legislature, a monument to community victims of the 1932–3 Soviet Ukrainian man-made famine on the grounds of city hall, and 15 Ukrainian Catholic and 4 Ukrainian Orthodox churches. Since 1979 a Ukrainian-English bilingual program has been offered in a number of Winnipeg schools. Ukrainian language and literature are taught at the University of Manitoba.

O. Gerus

Winter, Eduard, b 16 September 1896 in Grottau (now Hrádek), Bohemia, d 3 March 1982 in East Berlin. German historian; full member of the East German Academy of Sciences (EGAS) from 1948. A graduate of Innsbruck University and the German-language Ferdinand University in Prague, he was a professor at Ferdinand University (1922–45), Martin Luther University in Halle (1946–51; rector, 1948–51), and Humboldt University in East Berlin (from 1950). At the EGAS he headed the Institute of USSR History, the history department of the Institute of Slavistics, and the Working Group for the History of the Slavic Peoples. He wrote many works on East European cultural and religious history, among them *Byzanz und Rom im Kampf um die Ukraine, 955–1939* (1942; Ukrainian trans 1944), as well as a monograph on the papacy and tsarism and Vatican policy vis-à-vis the USSR (1961; Russian trans 1964, 1977). He also edited *Die Deutschen in der Slowakei und in Karpathorussland* (1926), coedited an edition of I. Franko's selected German writings on Ukrainian history and culture (1963), and contributed to an East German collection of essays on T. Shevchenko (1976). Festschriften in his honor were published in 1956 and 1966.

Winter campaigns. Offensives of the Army of the Ukrainian National Republic behind the lines of the Volunteer (White) and Bolshevik armies in 1919–20 and 1921.

The First Winter Campaign lasted from 6 December 1919 to 6 May 1920. As conventional military action in the

*Ukrainian-Soviet War became impossible, the UNR government decided to demobilize those units unfit for battle and to send its battle-ready troops behind enemy lines to conduct partisan warfare until it could set up a regular front. The participating UNR troops were commanded by Gen M. *Omelianovych-Pavlenko. His assistant was Gen Yu. *Tiutiunyk, and his chief of staff was Col A. Dolud. Permanent political officers were assigned to the army to maintain liaison among the government, the troops, and the civilian population. Prime Minister Isaak Mazepa kept in touch with the army and even accompanied it for a while. The combat troops consisted of the following groups (renamed divisions in February 1920): Zaporizhia (commanded by Gen A. Huly-Hulenko), formed from the remnants of the Zaporozhian Corps; Kiev (commanded by Gen Tiutiunyk), formed from the remaining troops of the Sich Riflemen; and Volhynia (commanded by Gen O. Zahrodsky). At first the units operated in the Yelysavethrad region between the Red Army and A. Denikin's forces. When the Bolshevik-Denikin front moved southward, the Ukrainian units penetrated east behind the Bolshevik lines, and in February 1920 they crossed the Dnieper River into the Zolotonosha region. In April the raiding army fought its way back to the Ukrainian forces on the Polish-Bolshevik front, which it reached finally on 6 May in the vicinity of Yampil.

The participants in the First Winter Campaign marched almost 2,500 km and fought for the following locations: Lypovets, Zhashkiv, Uman, Kaniv, Cherkasy, Smila, Zolotonosha, Olviopil, Holovanivske, Haisyn, Voznesenske (capturing major items from the 14th Soviet Army), Ananiv, and Balta. Estimates of the number of officers and men who took part in the campaign range from 3,000 to 6,000.

The Second Winter Campaign (also known as the Ice Campaign or the November Raid) took place in November 1921, while the UNR government and its disarmed army were in Poland, and the partisan movement was still active in Ukraine. The goal of the raid behind the Bolshevik lines was quite bold: to unify the partisan operations and to sweep the Soviet regime from Ukraine. Detachments of volunteers from the interned soldiers of the UNR in Poland formed what was called the Ukrainian Insurgent Army. It was commanded by Gen Tiutiunyk, and its chief of staff was Col Yu. Otmarshtain.

The main Volhynia group (800 men) was commanded by Tiutiunyk, and the Podilia group (400 men), by Lt Col M. Palii and, later, Col S. Chorny. Gen Huly-Hulenko's Bessarabia group did not undertake any serious operations and after a few days returned from Ukraine to Rumanian territory. The men in all the groups were poorly armed and clothed. The Podilia group set out on 25 October and fought its way through Podilia, where it crushed a Soviet cavalry regiment and transformed itself into a cavalry group. It reached the village of Vakhnivka, 60 km north of Kiev, and then returned through Volhynia to cross the Polish border on 29 November. The Volhynia group set out on 4 November and captured Korosten on 7 November but was unable to defend it. The group then moved as far east as the village of Leontivka. Having lost any hope of meeting with the Polisia group and replenishing supplies, it turned west. During the return march it was encircled by H. Kotovsky's cavalry near the town of Bazar, in the Zhytomyr region. Many of its men were killed in battle at Mali Mynky on 17 November, but the

majority (443) were captured: 359 of them were executed at Bazar on 23 November, and the rest (84) were handed over to Bolshevik police. Only 120 men and the staff broke out of the encirclement, and they had fought their way to the Polish border by 20 November. The Second Campaign was the last operation of the UNR Army against the Bolshevik forces occupying Ukraine.

Wirsta. See Vyrsta.

Wista. A Polish scientific journal of ethnography and folklore, published in Warsaw in 1887–1905 and 1916–17. It printed studies in ethnology, comparative folklore, and the relation of folklore to literature and folklore materials of various genres. Many Ukrainian scholars, including I. Franko, M. Storozhenko, M. Sumtsov, and M. Yanchuk, contributed articles and materials to the journal. It published samples of Ukrainian folklore – legends, sayings, dumas, songs, tales, and magic spells – as well as notices and reviews of books on Ukrainian ethnography and folklore.

Wisła River. See Vistula River.

Wisłok River (Ukrainian: Vyslok or Vyslik). A left-bank tributary of the Sian River that flows for 228 km through Slovakia and Poland and drains a basin area of 3,540 sq km. In Rus' times most of the river and its basin area formed part of the Kievan or Galician-Volhynian realm. Ukrainians inhabited the upper part of the river (in addition to forming a few pockets of Ukrainian settlement between the Wisłok and the Sian) until the late 1940s, when they were forcibly resettled during *Operation Wisła.

Wisłoka River (Ukrainian: Vysloka). A right-bank tributary of the Vistula River that flows for 163 km through Poland. The upper reaches of the river are situated in the Lemko region.

Wiśniewska, Elżbieta, b 18 January 1931 in Radziwiłłów Mazowiecki, Poland. Slavist. She received her M PHIL in Ukrainian literature from Warsaw University (1955) and has worked as an assistant at the Polish-Soviet Institute in Warsaw (1955–7) and as a scholarly associate of the Institute of Slavic Studies of the Polish Academy of Sciences (since 1958). Since 1957 she has contributed articles on I. Franko, M. Kotsiubynsky, V. Stefanyk, Lesia Ukrainka, and other Ukrainian writers to *Slavia Orientalis*, *Vsesvit*, *Radians'ke literaturoznavstvo*, and the Ukrainian Warsaw paper *Nashe slovo*. She is the author of Polish monographs on Kotsiubynsky (1973; her 1970 doctoral diss) and on Stefanyk and his relations with Polish modernists (1986).

Wiśniowiecki (Vyshnevetsky) [Vyšnevec'kyj]. A branch of the Nesvizky Ukrainian princely family from

Volhynia, that is, the Turiv-Pynske *Riurykide dynasty. Prince Fedir Nesvizky is considered the progenitor and ancestor of four princely families: Vyshnevetsky (Wiśniowiecki), *Zbaraski, Porytsky, and Voronetsky. The surname Vyshnevetsky derives from *Vyshnivets in Volhynia. Among the members of the Vyshnevetsky family were Ivan Vyshnevetsky, the starosta of Propoisk and Chechersk (1536–43); Andrii Vyshnevetsky, the castellan of Volhynia (1569) and voivode of Bratslav; Prince Dmytro *Vyshnevetsky (Baida), who founded the Zaporozhian Sich; Kostiantyn Vyshnevetsky, the starosta of Zhytomyr (1583); and Kateryna Vyshnevetska, who married the grand hetman of Lithuania, Hryhorii Khodkevych.

Between the late 16th and the early 17th centuries the Vyshnevetsky family converted to Catholicism and became Polonized. In the 17th century its members held key posts in the Polish government, notably Jeremi *Wiśniowiecki and his son, *Michał Korybut Wiśniowiecki. The Vyshnevetsky (Wiśniowiecki) family line ended in 1744 with the death of the Lithuanian grand hetman, Michał Serwacy Wiśniowiecki (1680–1744). Polish chroniclers (M. Strykowski and B. Paprocki) incorrectly linked the family of Prince Fedir Nesvizky with the family of Fedir Korybutovych. That error resulted in the legend of the Lithuanian-Ruthenian origins of the Vyshnevetsky family from the descendants of Gediminas. It was later corrected by historians such as W. Semkowicz and V. Seniutovych-Berezhny.

L. Wynar

Jeremi Wiśniowiecki

Wiśniowiecki, Jeremi, b 1612, d 20 August 1651 near Pavoloch. Polish magnate, starosta of Ovruch, and voivode of Rus' voivodeship (from 1646); father of *Michał Korybut Wiśniowiecki. He studied in Rome, Padua, Bologna, and the Netherlands. He colonized large estates in the Lubni region and neighboring territories in Left-Bank Ukraine. The region, including 50 cities, towns, and villages, became known as Vyshnevechchyna. In 1640 it had 7,630 homesteads; by 1645 it had a population of 230,000 and 38,000 parcels of land and supported a garrison of 12,000 soldiers. In the 1630s Wiśniowiecki gained notoriety for persecuting the Ukrainian Orthodox population, and in 1637 he suppressed a Cossack rebellion. In 1648, in the early stages of the *Cossack-Polish War, he was expelled from Vyshnevechchyna. In the course of the war against B. Khmelnytsky he fled with his forces from Py-

liavtsi and was assigned to defend Lviv. He fled again to Zamostia in 1648 and was one of the commanders of the defense of Zbarazh in 1649. He opposed the chancellor J. Ossoliński and attempted to impede the signing of the Treaty of *Zboriv. He distinguished himself in the Battle of Berestechko (1651). He opposed any negotiations with the Cossacks and supported harsh reprisals against insurrectionists. His unprecedented cruelty was particularly felt in Volhynia. In general, Polish histories have portrayed Wiśniowiecki as a hero, and he was depicted as such by H. Sienkiewicz in the novel *Ogniem i mieczem* (With Fire and Sword, 1884). But 20th-century historiographers have taken a more critical view of him.

Witch (*widma*). According to folk beliefs a woman with magical powers to harm people and animals. Ukrainians attributed various evils to witches – hailstorms, droughts, lack of milk in cows, diseases, and crop failure. Witches were portrayed as beautiful young women or ugly old hags. Some were born witches; others acquired the art from other witches or devils. Flying on brooms, witches gathered after major Christian feasts on Lysa Hora (Bald Mountain) near Kiev. Although witches were widely feared, there was no systematic or large-scale persecution of them in Ukraine. Unlike the Catholic church authorities in medieval Europe, the church authorities in Ukraine never showed any interest in such actions. Private actions against witches usually led to lenient verdicts. The peasants used various spells and rituals to safeguard themselves and their livestock from witches.

Witer, Andrew [Viter, Andrij], b 23 February 1946 in Leonberg, Germany. Canadian management consultant and politician. A graduate in economics of Sir Wilfrid Laurier University, he served as MP from the Progressive Conservative party in Toronto's High Park constituency in 1984–8. During his term of office he was instrumental in representing to the federal government Ukrainian-Canadian concerns over unsubstantiated allegations stemming from the creation of the Deschênes Commission of Inquiry on War Criminals. Witer has been active in the World Congress of Free Ukrainians.

Witkowski, Wiesław, b 7 January 1927 in Warsaw. Polish Slavist. After graduating from Cracow University (1952) he lectured in its department of Russian philology (full professor in 1978). His works include monographs on the phonetics of P. Berynda's 1627 Slavonic-Ruthenian lexicon (doctoral diss, 1964) and the language of I. Galiatovskiy's works against the background of 17th-century Ukrainian literature (habilitation diss, 1969), an anthology of Rus' and Russian historical-linguistic texts (with T. Lehr-Splawiński, 1965), a booklet on the Ukrainian language (1968), a survey article on the Ukrainian language in a Polish handbook on Ukraine (ed M. Karaś and A. Podraza, 1970), and a survey of Polish studies of Ukrainian linguistics in *Studia z filologii rosyjskiej i słowiańskiej* (14 [1987]).

Witos, Wincenty, b 1 January 1874 in Wierzchosławice (near Tarnów), Poland, d 3 October 1945 in Cracow. Polish political figure. A self-educated peasant, Witos was a member of the Galician provincial diet (1908–14) and the Austrian parliament (1911–18). He was a cofounder and leader of the Piast Polish Peasant party in Galicia, and he emerged as an important political figure in the interwar Polish state, in which he served as longtime member of the Sejm (1919–33) and as prime minister three times (1920–1, 1923, 1926). He maintained a strongly anti-Ukrainian position throughout his political career. He supported the colonization and Polonization of eastern Galicia and Volhynia. In 1923 he introduced provisional courts in Volhynia and proscribed the use of the word 'Ukrainian' in all official terminology. He was an opponent of the federalist concepts of J. Piłsudski and a supporter of the restriction of the electoral and educational rights of the Ukrainian minority in Poland. From 1933 to 1939 he was an émigré in Czechoslovakia, from which he issued statements in opposition to the so-called *Normalization policy. His views on Ukrainians are expressed in (among other works) his autobiography, *Moje Wspomnienia* (My Memoirs, 3 vols, 1964–5).

Witte, Jan de, b ca 1716, d 22 December 1785 in Kamianets-Podilskiyi. Flemish engineer and architect. As a military engineer in the Polish army, he designed the Dominican Church in Lviv (1749), the barracks and command headquarters in Kamianets, and the fortifications and church of the Carmelite monastery in Berdychiv (1754). From 1768 he commanded the Kamianets-Podilskiyi fortress.

Władysław II Jagiełło. See Jagiełło.

Władysław III Warneńczyk, b 31 October 1424 in Cracow, d 10 November 1444 near Varna, Bulgaria. King of Poland and Hungary; son of Władysław II Jagiełło. He ascended to the throne in 1434 while still a minor, and gained the Hungarian crown in 1440, largely owing to the efforts of his manipulative adviser, Z. Oleśnicki, the bishop of Cracow. Władysław led a major campaign against the Turks in the Balkans in 1443, which ended in a rout at the Battle of Varna, in which he died fighting.

Władysław IV Vasa, b 19 April 1595 in Łobzów, near Cracow, d 20 May 1648 in Merecz, Lithuania. Polish king (1632–48); son of Sigismund III Vasa. In need of assistance in his wars against Muscovy (1612 and 1617–18) and the Ottoman Empire (1621), he ignored the Polish Senate's opposition and forged an alliance with the Ukrainian Cossacks, in which he arranged to satisfy their religious demands. At the elected Sejm of 1632 he headed the commission which drafted the 'Measures for the Appeasement of the Ruthenian People of the Greek Faith that Live in the Kingdom of Poland and the Grand Duchy of Lithuania,' by which Ukrainian Uniate and Orthodox metropolies were both granted legal jurisdiction (the latter had been outlawed by the Polish authorities in 1596). After the cessation of hostilities with Muscovy, however, Władysław did not honor those measures. Cossack armies commanded by I. Sulyma destroyed Kodak in 1635; the P. Pavliuk rebellion erupted in 1637; and D. Hunia and Ya. Ostrianyn led an insurrection in 1638. All those were brutally suppressed, and through the 'ordination' of 1638 the

Cossacks were put under the command of Polish officers. In 1646 Władysław initiated secret talks with Cossack leaders (especially B. Khmelnytsky), in preparation for an anti-Turkish war. He again promised to renew the Cossacks' privileges, but neither the plans for war nor the promises were realized.

Władysław Łokietek, b ca 1260–1, d 2 March 1333 in Cracow. King of Poland from 1320. He actively engaged in external politicking and had several clashes with the Teutonic Knights. He brought a number of regions in Great and Little Poland, Pomerania, and Danzig under his control. The Galician prince Lev Danylovych provided him with military support during his campaign to seat himself in Cracow. The alliance between the two leaders was further strengthened through a dynastic marriage between Władysław's sister, Eufemia, and Lev's son, Yurii Lvovich.

Władysław Opolczyk, b ?, d 8 May 1401. Galician ruler of Silesian Piast origin. In 1372–8 he governed as prince of Galicia (Halych-Ruthenia) by the authority of the Hungarian king Louis I.

Włodawa. See Volodava.

Wójcicki, Kazimierz-Władysław, b 3 March 1807 in Warsaw, d 2 August 1879 in Warsaw. Polish writer, publisher, archeologist, and ethnographer. After taking part in the 1830 Polish uprising he moved to the Pokutia region, where he studied the customs and lore of the local people, developed connections with Polish Ukrainophiles in Lviv, and followed the growth of the Ukrainian national movement. He published the materials he had collected in *Pieśni ludu Biało-Chrobatów, Mazurów i Rusi znad Bugu* (Songs of the White Croatian, Mazovian, and Ruthenian People from along the River Buh, 1836) and *Klechdy starożytnie, podania i powieści ludu polskiego i Rusi* (Old Folk Legends, Stories, and Tales of the Polish People and Ruthenia, 1837) and wrote an essay on the historical and agricultural proverbs of the people of Poland and Ruthenia (1840). After returning to Warsaw in 1843, he worked as an archivist, a newspaper editor, and a publisher.

Wójcik, Zbigniew, b 29 October 1922 in Warsaw. Polish historian. A graduate of Warsaw University (PH D, 1947), he served in Warsaw on the chief directorate of the state archives (1950–9), directed the Office of Scientific Works (1953–9), and taught at the Institute of History of the Polish Academy of Sciences (from 1959, as professor from 1971) and became chairman of its Scholarly Council (1981). He has written books in Polish on the 1667 Treaty of Andrusovo and its origin (1959), the Cossacks in the Polish Commonwealth (1960; 3rd edn 1968), the 16th- to 18th-century Polish diplomatic service (1966), Polish-Russian relations in 1667–72 (1968), the history of Russia from 1533 to 1801 (1971), 16th- to 17th-century world history (1973), Polish foreign policy vis-à-vis Turkey and Russia in 1674–9 (1976), and King Jan III Sobieski (1983). He also edited, with an introduction, a Polish edition of E. Lassota

von Steblau and G. Le Vasseur de Beauplan's descriptions of Ukraine (1972).

Rev Meletius Wojnar

Col Arnold Wolf

Wojnar, Meletius [Vojnar, Meletij], b 15 October 1911 in Bosko (Besko), Sianik county, Galicia, d 22 July 1988 in Glen Cove, New York. Basilian scholar; member of the Shevchenko Scientific Society from 1966. He studied at the Basilian Fathers' seminary and college and the Gregorian University in Rome (JCD, 1949). He was ordained in 1938, and became rector of St Josaphat's Ukrainian Pontifical College (1953–4) in Rome and a professor of Oriental canon law at the Catholic University of America (1954–74). He wrote several authoritative studies of the Basilian order in Ukraine, including *De Regimine Basilianorum Ruthenorum a metr. J. V. Rutskyj restauratorum* (1949), *De Capitulis Basilianorum* (1954), *Vasyliiany v ukrains'kim narodi* (The Basilians within the Ukrainian Nation, 1955), and *De Protoarchimandrita Basilianorum (1617–1804)* (1958), and articles on Eastern canon law in *Analecta Ordinis S. Basilii Magni/Zapysky ChSVV* and elsewhere.

Wolchuk, Roman [Volčuk], b 22 February 1922 in Łańcut, Poland. Ukrainian civil and structural engineer. He studied in Lviv, Vienna, and Graz and emigrated to the United States in 1949. From 1959 he worked as a consultant in New York, where he established his own company, Wolchuk and Mayrbaurl (1963–82). Among his important projects were the design of the KCS railroad bridge over the Arkansas River in Oklahoma, the rebuilding of the Benjamin Franklin suspension bridge in Philadelphia and the Triboro Bridge in New York, and the first orthotropic steel plate redecking of the Champlain Bridge in Montreal and other major steel bridges in America. He prepared the *AISC Design Manual for Orthotropic Steel Plate Deck Bridges* and wrote other manuals and numerous technical papers. He was president of the Ukrainian Engineers' Society of America and editor of *Visti ukrains'kykh inzheneriv* (1950–60).

Wolf, Arnold, b 1877 in Prostějov, Moravia, d 24 November 1924 in Prostějov, Czechoslovakia. Senior commander of the Ukrainian Galician Army (UHA), of German origin. While on duty in the Austrian army in the Sian region, he came in contact with Ukrainians and developed a sympathy for their aspirations. In November 1918 he traveled to Western Ukraine and volunteered for service

in the UHA. Assigned as commander of the Berezhany (3rd) Brigade, in July 1919 he took command of the Second Galician Corps and in August he led the Northern Army Group during the offensive on Kiev. For his bravery and command performance Wolf was promoted to the rank of colonel and, later, brigadier general. In 1920, together with A. Kravs, he led the remainder of his troops into Czechoslovakia, where they were interned for several years; he was the senior commander of UHA veterans in Czechoslovakia until 1923.

Wolf (*Canis lupus*; Ukrainian: *vovk*). The largest of the wild members of the dog family Canidae. A powerful and intelligent social animal, the wolf inhabits both open and timbered areas throughout Ukraine (except the Crimea). Wolves are common in the forests of north Polisia, in steppe gullies, and in the Carpathian Mountains; they hunt in pairs or packs, mostly at night. As carnivores wolves perform the important natural function of controlling the population of herbivores, but they also kill domesticated animals; for that reason wolf hunting is permitted year round.

Woloshyn, George [Vološyn, Jurij], b 15 October 1943 in Kupnovychi, Rudky county, Galicia. Lawyer and administrator. After serving in the US army (1969–71) he completed his professional studies at the City University of New York (MBA, 1972) and Fordham Law School (1974). He was active in Ukrainian-American student life and the *Organization for the Defense of Four Freedoms for Ukraine. He worked as finance manager for the New York Transit Authority and associate director for the US Office of Personnel Management, and headed the National Preparedness Directorate, which is responsible for industrial mobilization, telecommunications, and warning in major emergencies. In 1988 he was received into the Sovereign Military Order of the Temple of Jerusalem in recognition of his contribution to NATO and free-world security.

Wołoszynowski, Joachim, b 1870 in the Podilia region, d ? Co-operative organizer, of Polish descent. He was director of the Hurt co-operative union in the Lutske region, which included local Ukrainian co-operative ventures that had separated from their central body in Lviv. He also organized a number of small village co-ops throughout the district and published the regional co-op journal *Svitova zirnytsia* in 1906–13. With the beginning of the revolution Wołoszynowski developed an ever-increasing Polonophile perspective that estranged him from the *Ukrainian co-operative movement.

Women. In Russian-ruled Ukraine in 1897, for every 1,000 men there were 1,008 women. That near balance was broken by the loss of many male lives during the First World War and ensuing Ukrainian-Soviet and Ukrainian-Polish wars. Consequently, for every 1,000 men over 20 years old in Soviet Ukraine in 1926, there were 1,090 women. A still greater imbalance developed as a result of Soviet repression and the Second World War, the primary victims of which were men. In the early 1990s in Ukraine, women constituted the majority (54 percent) of Ukraine's population. In Ukrainian immigrant communities in the West, however, they constituted a minority.

The social role and position of women vary greatly, ac-

ording to the level of cultural development of a particular society. In 20th-century Ukraine women's rights and obligations have been, *de jure* if not *de facto*, nearly equal to men's, with the exception of certain religious functions. Women have been exempt from military service, and only in times of war have they been recruited to fulfill certain duties. The laws of most European and other Western countries recognize a range of privileges for women (special working conditions, maternity leave, and protection of the mother, etc), but a significant number of women have been and remain economically dependent on men, and in places their dependence has been reinforced by legislation.

From ancient times to the 20th century. In primitive societies the position of women was equal and at times even superior to that of men (see *Matriarchy). The prehistoric cultures of Ukraine were matriarchal, as is confirmed by archeological findings and ethnographic research. After patriarchy took hold, women were forced into a subordinate position and were even treated as men's property. During the transition from a tribal society to rule by a Christian princely state in medieval Kievan Rus', the primitive view of women as property disappeared. Various sources attest to the consolidation and regulation of monogamous bonds between men and women. In the family the role of the mother in raising and educating children became equal to that of the father.

The **Ruskaia Pravda* reflected the legal norms and societal view of women's status, marriage, and family in Rus'. According to that document the murderer of a woman was judged and punished in the same manner as the murderer of a man. In contrast to Roman and Germanic law, Rus' law did not delimit women's status and privileges. A widow was not assigned a legal guardian, as in other medieval states, but acted in place of her deceased husband. A guardian was assigned only to her children, and only if she remarried. As long as a widowed woman was the head of the family, she retained all rights, including the right to decide (if it was not stated in the father's will) when to grant sons their independence and patrimony. Once the family property was divided, the mother kept and governed her share; she could not, however, give it to someone outside the family. Daughters fared worse: they were excluded from inheritance and were entitled only to an allowance. If a woman slave bore her owner's child, she and the offspring were granted their freedom but were not eligible to inherit from the owner's estate. The liberal treatment of women in *Ruskaia Pravda* stemmed from East Slavic customary law.

Women's legal status in Rus' was linked to their socio-economic status. Working alongside her peasant, merchant, or noble husband, a woman had the knowledge and experience to be capable of managing all their property after the husband's death. Noble women wielded influence in state affairs, and some became regents – Princess *Olha in Kiev, Anna (the widow of Prince Roman Mstyslavych) in Halych, and Yanka (the daughter of Prince Vsevolod Yaroslavych, hegumen of St Andrew's Monastery in Kiev), who traveled to Constantinople to invite a metropolitan to Kiev. Many European princesses were wed to Kievan grand princes (eg, a Byzantine princess, Anna, married Volodymyr the Great; Ingigerth, the daughter of Olof Skötkonung of Sweden, married Yaroslav the Wise; and Gytha, the daughter of Harold II of

England, married Volodymyr Monomakh), and Rus' princesses married foreign monarchs (eg, *Yelysaveta Yaroslavna married Harald III of Norway, *Anna Yaroslavna married Henry I of France, Anastasia Yaroslavna married Andrew I of Hungary, *Yevpraksiia Vsevolodivna married Henry IV of Germany, and *Yevfrosyniia Mstyslavna married Géza II of Hungary).

During the period of the Lithuanian-Ruthenian state women's legal status was defined by the *Lithuanian Statute, which incorporated the principle of gender equality into its criminal and civil articles. Like men, women were the subject of specific laws and regulations, and they were granted legal rights without any basic restrictions. Criminal norms guaranteed the complete protection of women and in particular cases specified special protection (eg, during pregnancy). To protect her dowry a husband gave his wife a writ guaranteeing her ownership of one-third of his immovable property and thus securing her financial independence. Daughters were not eligible to inherit immovable property, however, because land ownership derived from military service.

The Cossack period, with its constant wars and uprisings, like the earlier period of the Mongol-Tatar invasion, gave rise to a new type of woman, who ran the domestic economy and defended her home and family with arms while her husband was away at war (eg, O. *Zavisna). Women also fought in insurgent units during the Cossack-Polish War. Many women were captured by the Tatars and sold as slaves for Turkish harems. In Turkish captivity some used their talents to exercise considerable influence over their husbands (eg, *Roksoliana, the wife of Sultan Süleyman I Canuni).

The socioeconomic status of most women was shaped by the increasing enserfment of the lower classes. The absence of men as a result of frequent wars made women more responsible than men for supporting a family. They also carried more of the burden of *corvée*. Of Ukrainian noblewomen, many became Polonized. Others, however, actively supported the Ukrainian church and their own culture. Eminent examples were A. Olshanska, who funded the translation of the Peresopnytsia Gospel; Ye. *Hulevychivna, who donated her property to the Kiev Epiphany Brotherhood Monastery; and R. Vyshnevetska, O. and S. Chartoryska, and A. Hoiska, who were benefactors of various monasteries.

In the Cossack Hetman state women's legal status was still defined by the Lithuanian Statute and by certain local customary norms, until the adoption of the *Code of Laws of 1743. The code specified harsher penalties for killing or insulting a woman than a man, holding that a woman was physically less able to defend herself. The murderer of an unmarried woman, however, as of a slave, serf, or prisoner of war, was subject only to a monetary fine, or **holovshchyna*.

Women's economic standing was determined by their social estate. Wives of free peasants toiled together with their husbands and were basically their social equals. Women serfs, however, were the principal victims of exploitation and had no legal protection. Male serfs could often flee to the free lands of the Zaporozhian Cossacks, but female serfs were forced to remain behind and fulfill onerous *corvée* and eke out a living to support their families. The lives of peasants improved during and after the Cossack-Polish War of 1648–57, when latifundia were

abolished in Left-Bank and, for a while, Right-Bank Ukraine. At that time the development of artisanship and manufacturing intensified, and as a result numerous female peasants and burghers were employed in weaving, pottery, and kilim enterprises. An important role in the growth of artistic crafts was played by nuns, who developed the production of vestments and other items for religious use.

In the Hetman state many women of Cossack *starshyna* families played important roles in social and political life. Hanna, the wife of Hetman B. Khmelnytsky, for example, was influential in the final years of his rule and even issued *universals. Hetman I. Mazepa often turned to his mother, Maryna, for counsel, and the wife of S. Palii effectively commanded the Bila Tserkva regiment during her husband's absence. In the 17th and 18th centuries many such women were persecuted and punished by the Russian state. P. Myloradovych, the widow of a Pereiaslav colonel and mother of émigré Mazepists, for example, spent several decades in Siberian exile.

The dissolution of Cossack society under Russian rule led to a decline in the leadership role of women. After the loss of a native elite, and with Russification (or Polonization, in the cities of Western Ukraine), national consciousness was most preserved among the peasantry. The primary conduits of that consciousness were women, who through their story-telling and singing imparted knowledge of Ukrainian history and culture to their children.

From the end of the 18th century, when Ukraine was partitioned between the Russian and Austro-Hungarian empires, women's status was determined by the Russian law code, which was based on the Napoleonic Code, and the Austrian civil code, which was based on Roman law. The lot of noblewomen improved because they were allowed to inherit land and estates. Middle-class women were generally dependent on their fathers, brothers, and husbands and did not earn incomes outside the home. The worst oppression remained the fate of serf women. They had no legal protections and were oppressed by their husbands as well as their owners, and bore the brunt of exploitative *corvée*, domestic chores, and work in the cottage industry.

During the Ukrainian social and cultural revival of the 19th century many middle-class women gained prominence as writers, actors, and cultural activists. Many more were teachers and contributed to the growth of literacy and elementary education. Before the First World War women did not have suffrage or many of the other fundamental rights, such as the right to higher education, the freedom to enter and work in the professions, and political equality. Those became the main goals of the *women's movement, which emerged in the late 19th century. Women were granted suffrage only in 1914 in Austrian-ruled Galicia and Bukovyna and only after the February Revolution in Russian-ruled Ukraine. The UNR Constitution of April 1918 proclaimed complete gender equality and rejected any differences in rights or obligations between men and women.

Soviet Ukraine. All Soviet constitutions and laws have proclaimed and defined equality between men and women. For example, Article 33 of the 1978 Constitution of the Ukrainian SSR stated that women are guaranteed equal access to higher education and professional training and equality in work, wages, advancement opportunity, and

civic and cultural activity. Special provisions addressed the protection of women's health and work and ensured conditions whereby women could combine work with maternity, through moral and material support, such as paid maternity leaves and other perquisites for pregnant women and mothers, and a shorter workday for mothers of infants.

After the October Revolution the Soviet state announced that women's emancipation was one of its most important goals. Hidden behind the declaration was the practical consideration that women would play an important role in the work force because of the shortage of men brought about by the human losses of the First World War and revolutionary upheavals of 1917–21. The need for a female work force became particularly pronounced following the adoption of rapid industrialization policies in 1928, and the Stalinist state began promoting the cult of the large family and motherhood by initiating a system of prizes and awards for women producing many children ('mother-heroines'). The campaign was at odds with the earlier Soviet legalization of *abortion in 1920 and the ideas and practice of sexual liberation that gained currency in the 1920s. Eventually Stalinist conservatism and the unrestricted expansion of labor resources triumphed, and abortion was made illegal in 1936; it was not legalized again until 1955.

Women suffered the same mass-scale repressions as men during the collectivization of agriculture and the man-made famine and Stalinist terror of the 1930s. Many peasant women actively opposed the regime and led uprisings against the local authorities (the so-called *babski bunty*), especially after many of the men had been deported or killed. In the postwar period a significant number of women were active in the *dissident movement, which began in the 1960s, and were unjustly persecuted, incarcerated, and abused.

The Soviet state consistently denied women access to political and economic leadership positions. In 1990, for example, women constituted only 28.5 percent of CPU members, and at the final (28th) CPU congress, only 7 percent of delegates. In 1990 as well, women accounted for only 5.3 percent of Ukraine's industrial senior management. The participation of women in various Soviet elected Party and state organs never exceeded 30 percent. In 1988, women accounted for only 26.5 percent of all full and candidate members of the CPU CC and CPU oblast committees and 30.4 percent of all full and candidate members of CPU raion and city committees. As a rule, in the Party apparatus women were usually involved in ideological work, which was considered secondary to work in industry or agriculture. With the decline of communist power and the rise of alternative political forces after 1985, women failed to compete successfully with men, and their share in elected organs even declined.

Under Soviet rule no women served as government ministers or senior diplomats in Ukraine. Women rarely occupied senior positions in scholarship, despite the fact that in 1987, for example, the 81,582 women employed in science and scholarship constituted 38 percent of the work force in that sector. In education and medicine, sectors in which women have dominated and account for almost 80 percent of the work force, only some 20 percent were in leadership positions. Women were almost completely absent from leadership positions in cultural and art institu-

tions and professional organizations, and from chief editor positions of newspapers and journals, despite the fact that many women made important contributions to literature, art, culture, and science.

Throughout the Soviet period the economic and political equality of men and women remained an ideological myth. Statistics show that women belonged to the exploited stratum of Soviet Ukrainian society. In present-day Ukraine the role of women has not changed. They constitute 52 percent of Ukraine's entire work force, which is higher than the highest percentage among all developed countries, that of the United States (45 percent). Women account for 80 percent of Ukraine's workers performing heavy physical labor. Because such labor requires minimal qualifications and is the lowest paid, women's wages are on average 25–30 percent lower than men's. Over 25 percent of the female work force is employed in the construction industry, and millions of women work on night shifts and in conditions formally banned by labor legislation.

Soviet women were officially organized in the Committee of Soviet Women, which had branches in all Soviet republics, including Ukraine. Special journals devoted to women's issues (see *Women's press) were published in the interwar period. From 1946 **Radians'ka zhinka* appeared monthly; in the late 1980s it became possible for that journal to begin devoting serious attention to the social, economic, domestic, and sexual exploitation of women in Soviet society. Issues of concern in Western feminism and radicalism and the struggle for true political equality, however, have never really been raised, let alone discussed, in Ukraine. Feminist organizations do not exist, feminist theory is not part of political science and sociology, and there have been no serious studies on the economic, political, social, and cultural dimensions of the women's question. Women did, however, become increasingly involved in the restructuring democratization processes of the late 1980s and early 1990s and joined the new political parties, social organizations, and ecology movement. Their activation and election to political leadership positions has been slow, however. Of the 1,109 delegates at the constituent congress of the *Popular Movement of Ukraine (Rukh) in September 1989, only 89 (8 percent) were women.

Only three women were elected to the Rukh executive. At the 1990 Rukh congress only 10.24 percent of the 2,020 delegates were women, and only 2 of 45 executive positions were filled by women. Women constituted only 16.3 percent of the deputies from Ukraine elected to the USSR Congress of People's Deputies in 1989 and only 13 (2.9 percent) of the 450 deputies elected to the Ukrainian Supreme Soviet in 1990. Patriarchal, sexist, and even misogynist attitudes and hostility to the ideas of feminism and women's emancipation are widespread in Ukrainian society, even among supposedly enlightened strata, including various leaders of Rukh and the many new political parties.

Women's Association of the Canadian League for Ukraine's Liberation (Obiednannia zhinok Ligy vyzvolennia Ukraïny). An organization formed in 1952 out of the Women's Section (est 1949) of the *Canadian League for Ukraine's Liberation. It has carried out various cultural and educational work and contributed a page to the Toronto weekly *Homin Ukraïny*. In 1988 the association had 21 branches (14 in Ontario) and some 1,000 members. Its presidents have been M. *Solonynka (1952-75), O. Zaverukha (1975-81), M. Shkambara (1981-7), and L. Shust (1987-).

Women's education. See Education of women.

Women's Hromada in Bukovyna (Zhinocha hromada na Bukovyni). A cultural and charitable organization of Ukrainian women active in Bukovyna in 1906-40. By 1918 it had 14 branches and approx 600 members throughout the region. The society organized nurseries, an orphanage, a tailor's workshop and sewing school, a girls' residence, and folk-art workshops in Chernivtsi. It also published Hutsul and Podilian embroidery designs; participated in arts and crafts exhibitions in Chernivtsi (1912), Vienna (1912), The Hague, and Kiev (1913); and organized exhibitions of Hutsul handicrafts (1927) and Bukovynian folk costumes (1935) in Chernivtsi. The leading members of the Women's Hromada were E. Kumanovska, K. *Malytska, E. Smal-Stotska, K. Kostetska, Z. Hrushkevych, Ye. Halip, Ye. Korduba, E. Sterniuk, M. Levytska, V. Lukashevych, O. *Huzar, A. Fedorovych, and I. Hordiichuk.

Women's Hromada in Kiev (Zhinocha hromada). A clandestine women's group founded in the autumn of 1901 by prominent members of Kiev's nationally conscious Ukrainian intelligentsia: M. Chykalenko (Ye. Chykalenko's wife), L. Drahomanova (M. Drahomanov's wife), M. *Hrinchenko, O. *Romanova, L. Shulhyn (Ya. Shulhyn's wife), L. *Starytska-Cherniakhivska, M. Stepanenko (Ivan Steshenko's sister), M. Tymchenko (Ye. Tymchenko's wife), and V. Zhytetska. Younger women, such as H. *Chykalenko-Keller and V. Chykalenko (M. Chykalenko's daughters), M. Hozhenko (later B. Matiushenko's wife), N. Hrinchenko (B. and M. Hrinchenko's daughter), I. Kosach (Lesia Ukrainka's sister), M. and Ye. Livytska (A. Livytsky's wife and sister), K., H., and Mariana *Lysenko (Mykola Lysenko's daughters), Ye. Shcherbakivska (D. and V. Shcherbakivsky's sister and later M. Pavlovsky's and V. Krychevsky's wife), N. Shulhyn (L.

and Ya. Shulhyn's daughter), O. *Steshenko, and K. Yarmut (later Ye. Holitsynsky's wife) also joined the Hromada. The members secretly collected dues, distributed Ukrainian educational pamphlets and books in the Ukrainian countryside, and materially supported and helped several talented young peasant women while they trained in Kiev to become village teachers. The Hromada ceased functioning during the Revolution of 1905, which made its conspiratorial activities redundant.

Women's Hromada in Lviv (Zhinocha hromada). A women's organization that arose out of the merger of the *Club of Ruthenian Women and the *Circle of Ukrainian Women in 1909. In Lviv the Hromada organized public lectures, founded a girls' dormitory, ran subsidized cafeterias and emergency kitchens, expanded the activity and branches of the Trud women's co-operative, and popularized the Domestic Servants' Aid Society and the Ukrainska Zakhoronka nursery school society. It and its branches in 14 Galician counties and smaller village groups conducted cultural, educational, and charity work among Galicia's Ukrainian women and waged a campaign for women's suffrage. The Hromada's first head was M. Biletska. Prominent members were K. *Malytska, O. Luchakovska, O. Budzynovska, O. Zalizniak, O. Krushelnytska-Okhrymovych, E. Verhanovska, M. Mudrak, and M. Izhytska. On Malytska's initiative, in 1912 the Hromada proposed the creation of the For Ukraine's Needs fund, which gave considerable support to the Ukrainian Sich Riflemen. In 1917 the Hromada was transformed into the *Union of Ukrainian Women.

Women's movement. In Ukraine the development of organized groups of women sharing common goals and common interests was hampered by the nonexistence of a Ukrainian state and the severe limitations placed upon Ukrainian community organizations by various foreign authorities. Nevertheless, from the 1880s on, Ukrainian women managed to create effective organizations under all the states that occupied Ukraine - the Russian and Austro-Hungarian empires and interwar Poland, Rumania, Czechoslovakia, Hungary, and even the USSR. Women's organizations were also established by immigrant women in Europe and the New World. Ukrainian women's organizations were primarily self-help and community-oriented in nature. The members were not initially interested in feminism, women's liberation, or traditional women's causes such as the struggle against prostitution and the promotion of philanthropy, education, and suffrage. Instead the thrust of the women's movement in Ukraine was similar to that under all colonial regimes: it addressed the needs of the entire community, and not only of women. Organized Ukrainian women sought to expand the role of women in existing institutions and the national-liberation struggle and to ameliorate poverty, disease, and illiteracy. They adapted to existing institutions and mores and, instead of challenging society, highlighted the importance of the family and of the economic and socializing role of the mother. They also, however, maintained their political independence and did not become adjuncts of male-dominated political parties. As the women's organizations grew, opposition forced women to articulate a feminist agenda. Interest in feminism among those women developed as a result of their activism.

The beginnings of the Ukrainian women's movement date from the tsarist suspension of university courses for women in Kiev in 1883. The ban led to the creation of the first independent women's study circle, on the initiative of O. Dobrohaieva. The society was informal because all organizations had to be sanctioned by the police. Attempts by Kievan women to gain permission for the creation of a ladies' club from the 1880s on succeeded only after the Revolution of 1905. Women in Kiev and Kharkiv established branches of imperial women's organizations, such as the Society of Mutual Aid for Working Women and the Society for the Protection of Women. The Ukrainian branches developed distinctive forms of activity. In Kharkiv women founded schools under the aegis of the *Kharkiv Literacy Society. There Khrystyna *Alchevska became the major spokesperson for adult education and ran the oldest and largest adult literacy school in Ukraine. In the 1870s, women in Kiev organized the Hospice for Children of the Working Class; it functioned until 1917.

The women's movement in Kiev was characterized by close co-operation between Ukrainian, Jewish, and Russian women. There in 1901 an exclusively Ukrainian women's organization, the *Women's Hromada in Kiev, was founded. Because specifically Ukrainian organizations were banned by the tsarist regime, the hromada, and other such groups that sprang up in the major cities of Russian-ruled Ukraine and in St Petersburg (where there was a large Ukrainian community), functioned clandestinely and met under the guise of ladies' teas. After the Revolution of 1905, when public organizations were legalized, the hromada's members functioned openly; they successfully lobbied the Union of Equality for Women for recognition of the rights of non-Russian women and for a federal structure in the imperial organization. Women joined *Prosvita societies and the *co-operative movement that sprang up following the revolution and frequently established women's sections in local Prosvita and co-operative branches.

In Austrian-ruled Galicia community organizations were able to develop legally. Institutes for widows and orphans, founded under Austrian pressure by Ukrainian Catholic clergy in the early 1800s, sought to alleviate the position of women in priests' families. The institutes accustomed women to take interest in public and economic concerns. In some Galician towns, such as Peremyshl, the institute and the women connected with it were instrumental in establishing schools for girls. In 1868, when the first *Prosvita society was created in Galicia, women created an unofficial auxiliary force to it. The first woman formally inducted into the Prosvita society was I. Sembratovych-Osterman, in 1871. The first separate women's organization with a formal statute and structure was the *Society of Ruthenian Ladies, founded on 14 December 1878 in Lviv. The society remained technically in existence until 1939, but in the early 1880s it came under the domination of a conservative faction who sought to circumscribe the role and activities of women.

On 8 December 1884 N. *Kobrynska, under the influence of moderate socialism and J.S. Mill's *On the Subjection of Women*, organized the first public meeting of Galician women in Stanyславiv (now Ivano-Frankivske). About 100 women from various Galician towns and villages attended the meeting and officially established the short-lived Society of Ruthenian Women. In 1887 Kobrynska

and O. Kosach, who wrote under the pen name of O. *Pchilka, published, with the help of I. Franko, the first literary miscellany by Ukrainian women living under both Austrian and Russian rule, **Pershyi vinok* (First Wreath). Kobrynska's feminist socialism was not popular, however, and her subsequent publishing and organizational ventures had little support. But the Society of Ruthenian Women, with its program of the enlightenment of women, the creation of community day-care centers, and publishing for women, caught the imagination of Western Ukrainians. Branches of the society were formed, and other women's organizations with similar programs later emerged in several Galician towns. The most influential were the *Club of Ruthenian Women, founded in Lviv in 1893 and modeled on British ladies' clubs, and the Circle of Ukrainian Girls, founded in Lviv in 1901 and renamed in October 1905 the *Circle of Ukrainian Women. Affiliates of both organizations were established in the towns and villages of Galicia, and the two organizations fused in 1909 into the *Women's Hromada in Lviv. The *Women's Hromada in Bukovyna was created in 1906 in Chernivtsi.

Women were also the prime, although not the sole, force behind the formation of the Ukrainka Zakhoronka society for day-care centers in 1901 and the Domestic Servants' Aid Society in 1903. Ukrainian women were among the first in the Austrian Empire to draft petitions for the right of women to attend state gymnasiums and universities and to organize prosuffrage rallies (some of them jointly with Polish and Jewish women). Between March and December 1908 they published the socialist women's journal **Meta* (revived in 1919–20 as **Nasha meta*). They also edited a supplement to the most influential Galician Ukrainian newspaper, *Dilo*, under the title *Zhinoche dilo*.

The women set up day-care centers, sewing and other trade courses, and co-operatives; experimented with cooking, gardening, and poultry-raising courses in the villages; ran subsidized cafeterias and emergency kitchens; and founded dormitories for girls. Societies for domestics were established in the towns to help peasant girls adjust to urban life. Sometimes Greek Catholic parish priests initiated the creation of women's social clubs in an attempt to offset Polonization. The first *Marian society was founded in Lviv in 1904, and spread to other cities; its members engaged in Christian philanthropy and self-betterment.

Organized women repeatedly discussed the need for unity, and a number of conferences were held in attempts to initiate it. The women also expected to be included in the leadership of the Ukrainian movement in Galicia. After Ukrainian community leaders refused to have women's organizations represented at a major gathering, representatives of leading women's organizations, reinforced by Ukrainian women university students, held a clandestine meeting of their own on 14 December 1912, at which they expressed the need for organized armed struggle for Ukraine's independence in case of war and set up a national emergency fund and first-aid and military training for women.

During the First World War Western Ukrainian women served as nurses in the Austrian army and fought in the ranks of the *Ukrainian Sich Riflemen. During the First World War under Russian rule, Ukrainian women ran hospitals under the auspices of the Tatiana Society and the Society to Aid Victims of War in Southern Russia. They

also helped the many Western Ukrainians who were forcibly evacuated east during the Russian occupation of Galicia.

After the February Revolution of 1917, women on the territory of the UNR organized the All-Ukrainian Women's Hromada, whose members were active in community and relief work, education, public health, and care of orphans. That organization affiliated itself with the International Council of Women and sought outside medical aid for the epidemic-ravaged country. In the Western Ukrainian National Republic a similar organization of women arose, and the two attempted to work together. Ukrainian independence did not last long enough for the organization to develop fully. During the Ukrainian-Soviet War many women were engaged in combat and military reconnaissance activity; some even headed their own units and became legendary figures.

Ukrainian delegates at the 1921 congress of the International Women's League for Peace and Freedom held in Vienna. First row, from left: Kharytia Kononenko, Nadiia Surovtsova, Valeriia O'Connor-Vilinska, Oksana Khrapko-Drahomanova, Milena Rudnytska; second row: N. Tabakar, Olha Halahan, Olena Zalizniak, Ivha Loska, Oksana Lototska-Tokarzewski, N. Kovaliv; third row: Olena Sichynska-Levytska, N. Daskaliuk, N. Udovychenko, Blianka Baranova (Bachynska)

Under Bolshevik rule all independent women's organizations were disbanded and banned, and women who had been in their forefront (eg, O. Pchilka) were excluded from public life. The only sanctioned organizations were those that were affiliated with the CP(B)U and had as their goal the mobilization of support for the Party. Russian and Jewish Bolshevik women, who were not, by and large, sympathetic to Ukrainian autonomy and culture, were brought into the countryside to work with the peasants. They experienced serious opposition, especially from peasant women who did not understand Russian. Only in 1924, when M. Levkovych became head of the Women's Section (Zhinviddil) of the CP(B)U, did those organizations make headway in the villages. They sought to politicize women through mass rallies, introduced literacy programs, initiated two women's journals, *Selianka Ukrainy* (1924–31) and the Russian-language *Rabotnitsa*, and provided programs of health care and hygiene and information on the new law codes legalizing gender equality. The Zhinviddil also used women to glean information on anti-

Soviet conspiratorial activities and to find out which peasants hid food and harbored priests. In 1926 Levkovych was replaced by the Russian O. Pilatskaia so that any collusion between Ukraine's increasingly vocal and popular National Communists and women would be prevented. In 1930 the Zhinviddil and its locals were disbanded, and the women's question was proclaimed solved in the Soviet Union.

Ukrainian peasant women were in the forefront of spontaneous resistance to forced collectivization and grain-requisitioning campaigns. Millions died in the man-made famine of 1932–3 or were sent during the terror of the 1930s to concentration camps, where they perished.

Under Soviet rule women gained formal equality, but not real autonomy or full human rights. In 1945 the All-Union Soviet Women's Society was established, mainly to participate for propaganda purposes in international gatherings of women. Women in Soviet society, while legally equal, in effect bore the double burden of the need to work outside the home and at the same time to care for the family and the home in conditions of extreme want, with shortages of basic necessities and food. Many of the laws benefiting women were abolished in the 1930s, and thereafter the traditional role of the woman as mother was bolstered by a series of incentives and distinctions awarded to women who bore six or more children ('mother-heroines').

In the late 1980s, women became actively involved in Ukrainian political life. In early 1990 new women's organizations were founded: the Union of Ukrainian Women, which focuses on national rather than women's concerns and promotes traditional Ukrainian family values; the Women's Hromada of the Popular Movement of Ukraine, which focuses on ecological issues and issues of political independence; and the Organization of Soldiers' Mothers of Ukraine, which has publicly protested against violations of human rights in the armed forces and the sending of Ukrainian soldiers to serve outside Ukraine. The first non-communist women's newspaper in Soviet Ukraine, *Halychanka*, began publication in Lviv in October 1990 with a circulation of 10,000 copies. In 1993 the All-Ukrainian Women's Hromada was founded; M. Drach is the president, and L. Skoryk is the honorary president.

In Polish-, Czechoslovak-, and Rumanian-ruled Western Ukraine and in countries where Ukrainian emigrants settled in the interwar period, Ukrainian women established politically autonomous organizations. The Lviv-based Union of Ukrainian Women (UW, 1921–39) was the largest per capita women's organization in Europe. Founded through the fusion of a number of existing women's organizations, it and related organizations outside Galicia developed an effective system of self-help and modernization programs in towns and villages. Under the dynamic leadership of M. Rudnytska the UW spread to encompass over 100,000 members in Galicia. It organized day care, trade courses, agricultural programs, dormitories, and fresh air funds and instituted women's press publications. Through involvement in the union, women became accustomed to political work. In 1928 Rudnytska was elected to the Polish Sejm, where she was a spokesperson for the Ukrainian cause and was particularly effective in the Educational Commission. Two women, O. Levchanivska and O. Kysilevska, were elected to the Polish Senate. The Union of Ukrainian Women of Vol-

hynia (1921–38) and similar organizations in Bukovyna and Transcarpathia co-operated closely with the Union of Ukrainian Women.

The cover of the official publication of the First Ukrainian Women's Congress (Stanyславiv, 1934)

The work of the UWW was so effective that other politically diverse women's organizations emerged. All of them, including the *Union of Ukrainian Working Women (1931–9), the Nasha Khata co-operative, and the Marian societies, co-operated with the UWW. Most rallied to its defense when it was attacked in the mid-1930s by the Western Ukrainian political right. The *Union of Ukrainian Emigrant Women in Poland (1921–39) and in Rumania (1923–40) and the *Ukrainian Women's Union in Austria (1920–38) and Czechoslovakia (1923–?) had close relations with the UWW. Women's clubs in Canada and the United States fused to create the Ukrainian National Women's League of America (UNWLA, est 1925) and the *Ukrainian Women's Association of Canada (UWAC, est 1926), which worked closely with the UWW, patterned their community organizations and self-help programs closely upon those of UWW, and materially aided the European groups. In 1937 the *World Union of Ukrainian Women was formally inaugurated to co-ordinate the work of all women's organizations outside the USSR.

During the Second World War all independent women's organizations were dissolved. Under German rule Ukrainian women managed to create in Lviv the *Women's Service to Ukraine, which provided the little help it could to children, women, and forced laborers sent to Germany, until it was disbanded by the German occupational authorities.

After the war Rudnytska sought to resurrect the Union of Ukrainian Women in the *displaced persons' camps in Germany and Austria. She was edged out, however, and a new organization, the *Ukrainian Women's Alliance in Germany, was established in 1945 through the efforts of I. *Pavlykovska, who objected to Rudnytska's refusal to have women support the émigré political parties. Fraternal organizations were soon created in the refugees' new host countries: the *Ukrainian Women's Association in France, the *Ukrainian Women's Alliance in Belgium, the *Association of Ukrainian Women in Great Britain, the *Ukrainian Women's Association of Argentina, the *Ukrainian Women's Association in Australia, and the *Ukrainian Women's Alliance in Venezuela. The UNWLA and the new émigré organizations joined together to create the *World Federation of Ukrainian Women's Organizations (SFUZhO) in 1948. That body has since then

The presidium of the First World Congress of Ukrainian Women (Philadelphia, 1948)

united all Ukrainian women's organizations in the West, except the UWAC and the women's section of the pro-communist *Association of United Ukrainian Canadians.

Other SFUZhO members are the *Ukrainian Women's Organization of Canada (est 1934), the *Ukrainian Catholic Women's League of Canada (est 1944), and the *Women's Association of the Canadian League for Ukraine's Liberation (est 1952); in the United States, the *United Ukrainian Orthodox Sisterhoods (est 1961) and the Women's Association of the *Organization for the Defense of Four Freedoms for Ukraine (est 1967); the Society of Ukrainian Women (est 1951) of the *Federation of Ukrainians in Great Britain; the *Organization of Ukrainian Women in Brazil (est 1952); and in Argentina, the women's sections (est ca 1939) of the Prosvita and *Vidrodzhennia societies.

Halychanka, the organ of the recently revived Union of Ukrainian Women

Women's press. In Ukraine, as in other countries, the *women's movement found it necessary to establish its own press organs, in which it could discuss issues of interest to women and encourage women to take part in the national liberation movement and be active in community affairs.

The literary miscellanies **Pershyi vinok* (The First Wreath, 1887) and **Nasha dolia* (Our Fate, 3 vols, 1893, 1895–6) were the precursors of women's periodicals. Published by the pioneering Western Ukrainian feminist N. Kobrynska, they elucidated the theoretical foundations of feminism, the social and political status of women, and their most immediate tasks. The first feminist journal, **Meta*, was published by the Circle of Ukrainian Women, in Lviv in 1908. It was followed by *Zhinoche dilo*, a supplement to the Lviv daily *Dilo* in 1912, edited by O. Kysilevska; *Zhinochyi vistnyk*, a semimonthly published by the Ukrainian Women's Union in Kiev in 1917; **Nasha meta*, a journal published by the Ukrainian Social Democratic party in Lviv in 1919–20; and *Zhinochyi vistnyk*, a weekly supplement to *Dilo* in 1921, edited by M. Rudnytska.

As women's organizations in Western Ukraine expanded in the 1920s, the demand for women's periodicals increased. In 1925, O. Kysilevska and the Kolomyia branch of the Union of Ukrainian Women (SU) began publishing the monthly (later biweekly) **Zhinocha dolia*, and the Ukrainske Narodne Mystetstvo co-operative association began publishing the magazine **Nova khata* in Lviv. Both periodicals continued to appear until the outbreak of the Second World War. In the 1930s openly partisan journals were established. The Union of Ukrainian Working Women affiliated with the Ukrainian Socialist Radical party issued **Zhinochyi holos* (1931–9), and the SU published an official semimonthly, **Zhinka* (1935–8), which supported the Ukrainian National Democratic Alliance; *Ukraïinka* (1938–9), a popular magazine for peasant women, edited by M. Strutynska; and **Hromadianka* (1938–9).

Until 1990 the few women's periodicals in Soviet Ukraine served as communist propaganda tools. They include the magazines for peasant women *Komunarka* (1920–34), *Selianka Ukraïny* (1924–31), and **Kolhospnysia Ukraïny* (1932–41) in Kharkiv; *Rabotnitsa i domashniaia khoziaika* (1926–7, 7 issues), a supplement to *Shkval*, the Russian-language journal published in Odessa; and the republican monthly **Radians'ka zhinka* (now *Zhinka*), published in Kiev since 1946. The first independent women's periodical was *Halychanka* (est October 1990), the biweek-

ly paper of the revived Union of Ukrainian Women in Lviv.

In Canada the first Ukrainian separate women's periodicals were the communist *Holos robotnytsi* (1923–4) and **Robotnytsia* (1924–37) in Winnipeg. From 1934 to 1949 the Ukrainian Women's Organization of Canada published a regular section in the pro-OUN weekly *Novyi shliakh* in Winnipeg, and since 1950 it has issued its own monthly magazine, **Zhinochyi svit*. From 1929 to 1959 the Ukrainian Orthodox church-affiliated Ukrainian Women's Association of Canada published a special page in another Winnipeg weekly, *Ukraïns'kyi holos*; since then it has issued its own monthly magazine, **Promin'*. In 1970 the Ukrainian Catholic Women's League of Canada began publishing its quarterly magazine, *Nasha doroha*, in Winnipeg, edited by A. Baran and V. Buchynska.

In the United States the first Ukrainian periodicals for women were *Rannia zoria* (1919–20) in Chicago, edited by V. Simenovych; the Ukrainian National Women's League of America's (UNWLA) monthly magazine *Zhinochyi svit* (1933–4) in Pittsburgh; and *Zhinka* (1939–40) in Detroit, edited by M. Beck. In 1938 the UNWLA began publishing a page of news in the Philadelphia paper *Ameryka*; since 1944 it has published its own monthly magazine, **Nashe zhyttia*, in Philadelphia and, since 1975, New York. From 1949 the World Federation of Ukrainian Women's Organizations published a page in *Nashe zhyttia*. In 1963 it established its own quarterly, **Ukraïinka v sviti*, and since 1973 it has published an English-language annual issue, *Ukrainian Woman in the World*. In 1975 the United Ukrainian Orthodox Sisterhoods began publishing a quarterly magazine, *Vira*, in South Bound Brook, New Jersey, edited by H. Petrenko. Since late 1975 the *Ukrainian Gold Cross has issued an irregular bulletin in Rochester, New York, edited by M. Povkh.

Elsewhere in the Western world, Ukrainian women published eight issues of the journal *Ukraïinka* (1945–6) in Hannover, Germany. The Ukrainian Women's Alliance in Germany published the monthly *Hromadianka* (1946–50) in Augsburg, edited by L. Kovalenko and M. Dontsov, and an irregular informational leaflet. In England the O. Teliha Ukrainian Women's Association has published an irregular magazine, *Lastivka*, edited by V. Smereka, and a page in the bulletin of the Federation of Ukrainians in Great Britain. The Ukrainian Women's Association in Australia published a quarterly magazine, *Nashe slovo*, in Sunshine, Victoria, in 1966–77. Women's pages are also published in weeklies such as *Ukraïns'ka dumka* in London (by the Association of Ukrainian Women in Great Britain), *Nash klych* in Buenos Aires (by the Vidrodzhennia Organization of Ukrainian Women), *Ukraïns'ke slovo* in Buenos Aires (by the Prosvita Alliance of Ukrainian Women), *Homin Ukraïny* in Toronto (by the Women's Association of the Canadian League for Ukraine's Liberation), and *Nashe slovo* in Warsaw.

O. Zalizniak

Women's Service to Ukraine (*Zhinocha sluzhba Ukraïni*). A women's association established in Lviv just after the Soviet retreat from Galicia in June 1941. Its purpose was to render social assistance to the needy, particularly to political prisoners, prisoners of war, and starving children. The organization was inspired by K. Malyska and was headed by M. Biliak. Following directives from

the German authorities the association was absorbed by the *Ukrainian Central Committee, and ceased to operate as an independent body.

Wood carving (*rizblennia khudozhne*). One of the chief branches of the decorative and applied arts in Ukraine. For many centuries the common people carved wooden plates, spoons, bowls, canes, furniture, cards, sleds, gates, beams, and gables and decorated them with designs organically linked with the practical function of those objects. Richly carved crosses and three-armed candlesticks played an important role in family and religious rituals. The carving of iconostases and church objects, which flourished particularly in the 16th and 17th centuries, was distinct from the popular form of the art. It was mostly thematic and large-scale, and its ornamentation, unlike folk ornamentation, was mostly floral and done in relief. Very few examples of pre-19th-century carving have survived. In the 19th century the influence of larger market forces was profound: carvers began producing purely decorative objects, and middlemen, who organized the distribution of such objects, began demanding new and alien designs. Under Soviet rule wood carving had been a highly organized handicraft industry, supported and exploited commercially by the state.

A carved wooden cross (1872) from the village of Stari Kutu (now in Kosiv raion, Ivano-Frankivske oblast)

Because of its remoteness, its forest resources, and the artistic talent of its inhabitants the *Hutsul region has been by far the leading center of wood carving in Ukraine. The distinctive, traditional Hutsul style was developed further in the 19th and 20th centuries by master carvers, such as the *Shkribliak family, M. *Mehedyniuk, and V. *Devdiuk. The ornamentation of Hutsul wood carving is flat-carved and geometric. It is enriched with inlays of colored wood, bone, metal wire, mother-of-pearl, and beads. The works of contemporary Hutsul masters, such as the *Korpaniuk family, I. *Balahurak, M. *Tymkiv, and the *Toniuk family, have been sold throughout the world.

In central and eastern Ukraine, folk designs are flat-carved with mostly geometric (rosettes, zigzags, and semicircles) and occasional floral motifs. The incisions are

deeper, and the relief is higher. The folk tradition of the Poltava region was popularized in the 19th century by the *Yukhymenko family. In the 20th century a number of folk masters turned to thematic carving. P. *Verna, for example, carved portraits of literary characters.

A carved wooden cheese box with brass inlay and embossing (1971) by Volodymyr Guz of Kosiv

In Transcarpathia V. *Svyda has developed a distinct style based on the local tradition of wood carving. He has also inspired and trained a younger generation in this art. The Lemko tradition of wood carving is known for its animal figures and floral ornamentation. Many families (eg, the *Odrekhivskys, Sukhorskys, and Orsyysks) have won recognition for their artistic work.

Woodcock, Eurasian (*Scolopax rusticola*; Ukrainian: *slukva, valdshnep, valiushen*). A long-billed, squat game bird related to the snipe, in the family Scolopacidae, with mottled brown plumage well suited to camouflage among dead leaves. In Ukraine the Eurasian woodcock is found in damp mixed and deciduous forests of the Polisia region, in the Carpathian Mountains, in the Crimea, and occasionally in the forest-steppe. A favorite of hunters, it averages 34-38 cm in length and weighs 200-460 g. Eurasian woodcocks feed mainly on earthworms and thus must migrate south with the onset of frost.

Woodcut (*derevoriz*). A pictorial design from a block of wood incised with the grain. With the introduction of the printing press woodcuts were used widely for book *illus-

tration. In the late 18th and early 19th century, wood engraving, in which the design is incised in the end grain, became the chief method of illustration, but soon it was displaced by other techniques. From then the woodcut was used mostly in *printmaking. Today it is one of the main forms of *graphic art.

Woodpecker (Ukrainian: *diatel*). A tree-dwelling, insectivorous bird of the family Picidae, including the genera *Dendrocopus* (*Dryobates*) and *Picus*, with a straight and powerful bill and an extensible barbed tongue. Approximately 10 species can be found in the forests of Ukraine, among them the great spotted woodpecker (*D. major*), green woodpecker (*P. viridis*), gray woodpecker (*P. canus*), northern three-toed woodpecker (*P. tridactylus*), Syrian woodpecker (*D. syriacus*), white-back woodpecker (*D. leucotos*), and medium and small woodpeckers (*D. medius* and *minor*). Woodpeckers are beneficial to the forest industry.

Woodwaxen (*Genista*; Ukrainian: *drik*). A small, yellow-flowered shrub of the family Leguminosae. In Ukraine the dyer's greenweed (*G. tinctoria*) is widespread; it grows in rocky soil in the steppe and forest-steppe zones. A yellow dye for textiles can be obtained from its leaves, stems, and flowers. The smaller thorny woodwaxen (*G. germanica*) is rarer. A tea made of woodwaxen has been used in folk medicine as a purgative and diuretic.

Woodworking industry. A branch of industry that processes wood for use in the *furniture, *construction, and other industries. Rough-cut wood supplied by the *lumber industry is processed to make finished and semi-finished wood products, including veneers. Woodworking emerged as a modern industry only in the late 19th century. The first factories of the industry made furniture, matchsticks, and cabinets. In Russian-ruled Ukraine there were approximately 274 woodworking plants in 1913. They were mostly small enterprises concentrated near Kiev and Sumy.

The industry grew and modernized in the 20th century. Its relative weight in the economy is small, in that it accounts for only a small proportion of the GNP. Its modest size is due primarily to the scarcity of wood resources in Ukraine. Moreover, what lumber is harvested is often transported to mills and factories in Russia for processing. The annexation of Western Ukraine during the Second World War added some forested regions to Ukraine's resources, particularly in Ivano-Frankivske, Lviv, Transcarpathia, and Chernivtsi oblasts. The addition gave rise to a dramatic increase in the output of wood products. Today most of the industry's approx 5,000 factories are organized into manufacturing complexes or consortia that make a wide assortment of wood products. Factories in the southwestern economic region accounted (in 1968) for over half of the industry's output. Ukraine's share in the former USSR output remained low, less than 10 percent of most wood products.

Wool industry. A branch of light industry that processes wool for use in the textile industry. *Sheep farming in Ukraine dates back to the Neolithic period. Mostly coarse-haired sheep were raised to provide individual peasant households with raw wool. Processing was done at home,

usually as a handicraft. Only in the 19th century, when large numbers of sheep were raised in the newly acquired steppe region, was large-scale wool processing begun. During that period the industry was primitive, and its washing and spinning factories were small. Much wool was exported from Ukraine to Western Europe or to Russia in a semiprocessed state. Before the First World War the wool industry was concentrated in eastern Podilia; the Chernihiv region, especially in the vicinity of Klinty (now in the RFR), where there were seven large textile factories; Kharkiv; and Kherson gubernia. In Russian-ruled Ukraine there were, altogether, 3 wool-washing and almost 40 small wool-processing factories, employing some 5,800 workers; that figure does not include the many peasant artisans and craftsmen who processed wool locally. Ukraine's share in the empire's wool output in 1913 was tiny, only 3.4 percent.

The wool industry was partially reorganized in Soviet Ukraine in the 1930s. Raw wool ceased to be imported, and since then only domestically produced wool has been processed. At the same time some synthetic wool factories were built. In 1940 the total wool output was 13,500 t. It increased, to 27,600 in 1960. Since then wool production has stagnated: it fell to 24,800 t in 1970 and then rose to 27,200 t in 1980 and 29,000 t in 1987. In 1987 most of the wool was produced on collective (19,300 t) or state (6,800 t) farms; only 2,700 t was produced by private producers. The wool industry in Ukraine now processes mostly fine wool from Merino and other fine-wooled sheep. (See also *Light industry and *Textile industry.)

B. Balan, B. Wynar

Woolly rhinoceros (*Coelodonta antiquitatis*; Ukrainian: *volokhatyi nosorih*). An extinct Pleistocene rhinoceros. It was a massive animal (over 2 m high at the shoulders) covered in thick, dark brown, woolly hair, with two horns on the anterior skull (the front one up to 1 m long). It fed on grasses, pine needles, and the saplings of young trees. Two carcasses were discovered in Western Ukraine, well preserved in ozocerite, near Starunia, Bohorodchany raion, Ivano-Frankivske oblast. Individual bones have been excavated in many parts of Ukraine. Cave rock paintings and sculptures of the animals have been preserved in several areas.

Work. The history of work in Ukraine has still not been adequately studied. Under Soviet rule all men aged 16 to 59 and women aged 16 to 54 were officially considered employable (see *Labor resources). People formally considered employed were those who earned incomes outside their homes and family *private plots, including underaged and officially retired people working full-time. Formally unemployed people included those between jobs, the ill, the handicapped, military conscripts, students, housewives, and women tending private plots. Growth in the work force has been due largely to the ever-increasing involvement of women therein, from 21 percent of all nonagricultural employees in 1921 to 37 percent in 1940, 50 percent in 1970, and 52 percent in 1987. (In 1987, women constituted 45 percent of Ukraine's collective-farm workers.) The share of women has increased because of high male mortality in the Second World War, male *migration to other Soviet republics, and the inadequacy of a single income for maintaining an entire family.

In 1969, occupations with the highest percentages of women involved were health services (84 percent), banking (76 percent), trade and food services (75 percent), education (71 percent), communications (66 percent), the civil service (58 percent), and public housing services (50 percent). Young people who do not pursue postsecondary studies have constituted another important labor source, particularly since the early 1950s. In 1969, for example, only 20.9 percent of the 371,400 students who completed grade 10 went on to postsecondary institutions.

Under Soviet rule allocation of workers was controlled centrally in Moscow and Kiev. From 1931 annual economic plans projected the number of workers needed by every enterprise and every profession. Vocational and professional schools trained graduates to fulfill these plans, and the USSR and Ukrainian ministries placed graduates in positions they were obliged to occupy for at least three to four years. All-Union ministries often assigned graduates of schools they ran to positions outside Ukraine. Another form of labor allocation was the *organized recruitment of workers system under which local soviets and their employment commissions found work for youths. In the Ukrainian SSR the system was co-ordinated by the Republican Commission for Youth Job placement. At the all-Union level the State Committee for Labor Affairs and Wages of the USSR Council of Ministers and state committees for exploiting the labor resources of individual republics oversaw most matters relating to work.

Officially *unemployment did not exist from 1930 until the late 1980s in the USSR. Consequently, public unemployment records were not available, and *social security was not available to the unemployed. Under Stalinism employees who came to work late or were absent were liable to imprisonment. The communist state exercised absolute control over the population through repression and the internal passport system. *Forced labor was widespread. Between 1940 and 1956, workers could change jobs only with the permission of the management. From 1956, people could change without permission with two weeks' (later a month's) notice, but lost seniority, on which the amount of the retirement *pension they received was based. Dismissal by the management of an enterprise was legally allowed only if the position was eliminated or if there was a general reduction in staff, and only with the approval of the enterprise's trade-union committee. If dismissal occurred for economic reasons (eg, automation), the management was required to find the employee another position with equal pay. As a result many enterprises were saddled with superfluous employees, and the introduction of new technologies was retarded. Employees, however, enjoyed considerable job security, which was considered one of the greatest achievements of communism.

Between 1969 and 1985 the percentage of employees involved in mechanized labor and mechanical repair increased from 42 to 65 percent of Ukraine's nonagricultural work force. The percentage of agricultural workers using or repairing machines and mechanical devices remained low (eg, only 28 percent of all state farmers and 32 percent of collective farmers in 1985). Productivity was very low. In 1969, for example, for every single unit of production four to five times as many workers were required in Ukraine as in the United States and three times as many as in Western Europe. The productivity of skilled industrial

workers in Ukraine was 65 percent of that in the United States in 1970, and the corresponding figure for auxiliary workers was only 15–20 percent. According to official statistics labor productivity in Ukraine was 25 percent lower than in the RSFSR.

According to Soviet economic doctrine, labor productivity should have increased more rapidly than wages. In practice it did not always do so, however, and the methods used to calculate labor productivity were proved faulty. In 1933 the USSR government issued decrees on wages and production norms for the Donbas mines that initiated the centralized regulation of wages. To that date, wages had been arrived at through collective agreements. In 1934 the Soviet Ukrainian government decreed that when employees failed to meet their set production norms, their wages would be determined according to the quantity and quality of production achieved and without a guaranteed minimum wage. Thereafter a minimum wage was not set until 1957 (30 rubles per month, which was gradually increased). In 1971, 40 percent of Ukrainian workers still earned minimum wages.

In 1934 a wage system based on piecework and bonuses was introduced. In 1969 still only 43.8 percent of Ukraine's industrial workers received hourly wages, despite the fact that both K. Marx and V. Lenin had stated that piecework was exploitative and should not exist under socialism. To raise production norms and to force workers to work more intensively J. Stalin introduced *socialist competition, 'Stakhanovism,' and 'shock work,' and under N. Khrushchev 'communist labor brigades' were created.

In 1922 an hourly wage tariff with 17 levels was introduced for blue- and white-collar workers, with a ratio of highest to lowest pay of eight to one. Later the ratio widened because the wages of state and Party bureaucrats grew much faster than those of the rest of the population. Industrial workers, in fact, saw their pay ranges shrink from a ratio between the highest and lowest pay of 3.6 to 1 in 1931, to 3 to 1 in 1951, and 2 to 1 in 1963. Wage reforms in 1962 introduced a six-level tariff for industrial workers. Under Khrushchev the wages of senior bureaucrats were reduced, but after his ouster they were raised again. In 1970 the basic monthly wage for blue- and white-collar workers was 60 and 450 rubles respectively, not including bonuses. Not only did the upper echelon of the **nomenklatura* receive substantial premiums ('blue packets'), they could also buy goods in special 'closed' stores that stocked items that were generally unavailable and were, in addition, untaxed. The difference in wages among the Soviet republics and various occupations was arbitrarily set by the USSR State Committee for Labor and Wages. The most highly paid were miners, fishermen, steelworkers, scientific workers, artists, clock workers, and construction workers. Among the lowest paid were postal workers, telephone operators, doctors and other hospital personnel, state farmers, librarians, teachers, and workers in the sugar and light industries.

In 1741 the workday of industrial workers in Ukraine was 14 to 15 hours six days a week; in 1841, 12 hours; and in 1881, 12 or more hours, usually including overtime (see *Factory legislation). An 1897 tsarist decree limited the workday to 11.5 hours, but that law was widely ignored. During the Revolution of 1905–6, strikes brought about a reduction of the workday to 10.9 and even 8 hours, but by 1908 the 11.5-hour workday had been restored. In 1917 the

Third Universal of the Central Rada declared an eight-hour workday. In 1919 the People's Commissariat of Labor also declared an eight-hour workday and a six-hour workday for 14- to 16-year-olds. In 1929-33 the workday in Soviet industry was reduced to seven hours, and the workweek to five days (four days of work and a day off), because of the massive influx of the peasant labor force into the cities and for antireligious purposes, to force people to work on Sundays. In the 1930s the six-day week was reintroduced, and the eight-hour workday was restored in 1940. During the war years of 1943-5 the workday was extended to 11 hours, and vacations were suspended until 1947. In 1960 the workday for blue- and white-collar workers was shortened to seven hours (Saturdays, to six hours), and in 1967 the five-day workweek with Saturdays and Sundays off was introduced. In the 1970s and 1980s the average workweek in Ukraine was 39.2 hours (except for collective farmers) and 40.5 hours for industrial workers. Although overtime had been banned in 1921 as exploitative, it continued to be practiced because employees wanted to earn more, and management had to fulfill and even overfulfill their quotas. In 1930, blue- and white-collar workers received 12 days of annual paid *vacation; in 1958, 18 days; and in 1960, 20 days. In the late 1980s all employees received a minimum of 15 days of vacation and an average of 22 days.

*Overtime work and vacations were set according to a scale agreed upon by the enterprise's management and trade-union committee. *Trade unions had an important say in collective agreements and the distribution of work-related leaves, housing, and goods and services. Conflicts between management and workers were resolved by special commissions and people's courts. *Strikes were banned under Soviet rule until 1990, except during the brief interval of the *New Economic Policy (NEP) in the 1920s. The rationalization was that workers could not strike against a 'workers' state.' Various strikes occurred nevertheless and were until recently violently suppressed. In 1990 some 130,000 workers struck against about 260 enterprises.

Work safety in Ukraine was poor and ignored completely in many cases (notably the 1986 Chernobyl nuclear accident), despite comprehensive *labor laws. Inspection of factories was created in 1882, but inspectors were and continued to be few and for the most part corrupt. During the NEP, statistics were published on the incidence of work-related accidents, but thereafter, until 1986, the information was a state secret. It was known, however, that the highest number of accidents occurred in mining, construction, and agriculture. Occupational diseases were widespread, particularly in the chemical industry and in mercury, uranium, coal, and iron mines. Average annual absenteeism in Ukraine's industry in 1960-9 was 15 workdays.

In 1987 Ukraine had a work force of 20.7 million people, 14.43 million of them blue-collar workers. Of the total, 7.53 million worked in industry; over 5 million, in agriculture (3.78 million on collective farms); and 1.25 million, in construction. Ethnic Ukrainians constituted 70 percent of the total work force. In industry they made up 68 percent; in agriculture (excluding collective farms), 79 percent; in transportation and communications, 71 percent; in construction, 69 percent; in trade and food services, 73 percent; in public housing management and the nonmanu-

facturing service sector, 68 percent; in public health, fitness, and social security, 68 percent; in education, 74 percent; in culture and art, 70 percent; in science, scholarship, and their services, 59 percent; and in the government apparatus, 73 percent. Of the total ethnic Ukrainian work force, 37 percent worked in industry and 2-9 percent worked in each of the remaining sectors (excluding collective farms).

V. Holubnychy

Work people (*robotni liudy*; Russian: *rabochie liudi*). A term first applied in the early 18th century to state peasants and **posad* people mobilized by the tsarist state to construct canals and wharves. Later, until the mid-19th century, it denoted *possessional peasants and, particularly from the 1760s on, freely hired factory and water-transportation workers. The 'work people' were mercilessly exploited and abused as a labor force in areas where there were few serfs, particularly in the state-owned salt factories of Tor (Slovianske) and Bakhmut (Artemivske) in the Donbas.

Workday (*trudoden*'). A device outside the regular wage system for determining compensation to collective-farm workers for their labor. It was introduced in the USSR in 1930-1 during the forced collectivization of agriculture. Farm jobs were divided into seven to nine categories, based on difficulty or importance. An average job was worth one workday, a job of the first category as little as half a workday, and a job of the ninth category (the operation of heavy machinery) as much as four and a half workdays. In addition workers were rewarded with extra workdays for especially good work or penalized with workday deductions for poor performance. At the end of each year the collective-farm administration divided the farm's profits (in kind and cash) among its members according to the number of workdays accumulated by each worker. Because the farm's income depended largely on the state-set quota of produce that it had to sell the state at artificially low prices, the farm workers were exploited severely in the drive to finance rapid industrialization. In 1932 the average workday for the USSR was worth only 0.42 rubles, in 1937, 0.85 rubles, and in 1952, 1.4 rubles. Farm profits and the value of a workday for each farm were unpredictable from year to year; hence, there was little incentive to work.

In the second half of the 1950s monetary payments replaced payments in kind in the agricultural system, a

change that brought about a rising demand for consumer goods among farm workers. In 1986 the CC CPSU and the USSR Council of Ministers finally decided to abolish the workday and to introduce a guaranteed wage for collective-farm workers.

Workers' and collective-farm theaters (*robotnycho-kolhospni teatry*). *Touring theaters, usually organized by state political education administrations, and known as workers' and peasants' theaters until the 1930s. The first such theater in Ukraine was the Franko First Ukrainian Workers' and Peasants' Theater in Odessa (est 1924 by L. Predslavych). It was followed by the Zatyrykevych-Karpynska Touring Workers' and Peasants' Theater in Romen (est 1925) and the Tobilevych Workers' and Peasants' Theater in Lohvytsia (est 1925). Workers' and peasants' theaters were organized in Zinovivske in 1926 and in Kiev, Kharkiv (Veselyi Proletar), and Zaporizhia in 1927. The Kiev Theater of the Oblast Council of Trade Unions performed in the Donbas from 1929, and the *Lviv Workers' Theater was active in Galicia. Their repertoire consisted mostly of Ukrainian populist-ethnographic classics, with some world classics and contemporary Soviet dramas. From 1929 Soviet dramaturgy became dominant in the repertoire of workers' and collective-farm theaters and consisted mostly of plays published in the magazines *Sil's'kyi teatr* and **Masovyi teatr*. In 1930 workers' and collective-farm theaters were created in Okhtyrka and Artemivske, and in 1932 in Nizhen (*see Nizhen Ukrainian Drama Theater). Their number had reached 22 by 1933, and in 1937–9 there were 29 Ukrainian, 4 Russian, and 1 each of Moldavian, Bulgarian, German, Greek, Jewish, and Polish such theaters. After the Second World War there were only 17 in all, ethnic-minority workers' and collective-farm theaters were eliminated, and the number of Russian theaters increased. In 1961 workers' and collective-farm theaters became oblast theaters.

V. Revutsky

Workers' and Peasants' Alliance Treaty between the RSFSR and the Ukrainian SSR. A state treaty signed by the representatives of the RSFSR and the Ukrainian SSR on 28 December 1920 dealing with common defense and economic development. It recognized 'the independence and sovereignty of each of the parties to the treaty.' The following people's commissariats were to be shared: military and naval affairs, economic affairs, financial affairs, roads, post and telegraph, and labor. These commissariats came under the RSFSR Council of People's Commissariats and had representatives on the Ukrainian Council of People's Commissars. Other commissariats were to be the exclusive responsibilities of the respective republics. In practice the joint commissariats ignored the central organs of the Ukrainian SSR and dealt directly with local authorities. The treaty was an important step toward the creation of the USSR in 1923.

Workers' and Peasants' Government of Ukraine. See Provisional Workers' and Peasants' Government of Ukraine.

Workers' Benevolent Association (Robotnyche zapomohove tovarystvo, or WBA). A pro-communist fraternal association established in Winnipeg in 1922. Closely allied

with the *Ukrainian Labour-Farmer Temple Association, the association provided sick and death benefits to its members and operated a retirement home and orphanage in Parkdale, Manitoba, in 1930–8. Its membership grew from 700 in 20 branches in 1924 to approx 7,000 in 114 branches in 1930 before dropping, as a result of the Depression, to 3,500 in 76 branches and picking up in 1937. After the Second World War the WBA continued to expand its operations, and by 1954 it had 12,478 members, a level it maintained for just over a decade. As the WBA's Ukrainian membership started to decline during the 1950s, it increasingly recruited Russians, Ruthenian immigrants from Transcarpathia, and Poles into its ranks. In 1963 it absorbed the Independent Mutual Benefit Federation, with its Hungarian, Slovak, and Czech members. These practices failed to stem a steady decline in membership that began in the 1970s.

Workers' control. The power of workers to manage the factories or plants in which they work. This power has been sought by socialist and even trade-union movements and has been achieved to some degree in certain countries. A workers' control movement developed in Russia and in Ukraine between 1917 and 1920. Immediately after the fall of the tsarist regime, in March and April 1917, factory committees and other workers' organizations were established in most of the large enterprises in Ukraine. Their purpose was to negotiate with the managers and owners and to dissuade them from acting against the workers. In a number of cities local and regional factory committees as well as workers' soviets were established. In the summer of 1917 trade unions were organized in various branches of industry, and factory committees were turned into trade-union locals at the factory level. When in the course of negotiations managers and enterprise owners refused to make concessions to workers' demands, the factory committees began to take control over the administration, financial records, and order fulfillment. Eventually they began to participate directly in the management of the enterprises. By the spring of 1918 workers' control had been introduced in most of the large enterprises in Ukraine. In its Third and Fourth universals the Central Rada supported the trade unions and proposed to set up organs of state and popular control over the economy in order to deal with the collapse of the economy. This proposal, however, was never realized. Because of the revolutionary turmoil and war many factory owners closed their enterprises and fled the country. Such enterprises were taken over by workers, declared to be under workers' control, and nationalized. In their declarations the Bolsheviks supported workers' control but considered it as only a stage on the route to state ownership and control. The Bolsheviks argued that the rapidly deteriorating economic situation made it necessary to centralize economic power in the hands of the state. In Ukraine workers resisted centralization and tried to retain control of the enterprises. It was this conflict that gave rise to the Workers' Opposition in 1919. After the opposition was defeated and the trade unions were purged, workers' control was abolished. By 1921 all key sectors of the economy were under the control of the state.

In recent years the question of workers' control has re-emerged. Mistrust of the bureaucratic apparatus's management of the economy and of individual enterprises has

spurred the demand for it. In 1990, during the October strikes in support of Ukraine's independence, the Kiev Strike Committee and other committees demanded workers' control over factories. Some workers' groups have argued that workers' control can be realized by the sale of factories to the employees.

Robitnychi kontrol' i natsionalizatsiia promyslovosti na Ukraïni
(Kiev 1957)

V. Holubnychy, B. Krawchenko

Workers' faculties (*robitnychi fakultety* or *robitfaky*). General education schools for adults in the USSR that were designed to prepare students for institutions of *higher education and at the same time train politically dependable cadres. Both daytime (three-year) and evening (four-year) programs were available. Established in Moscow in 1919 and in the Ukrainian SSR in 1921, the faculties were jointly operated by higher educational institutions and the government commissariats in charge of different sectors of the economy. The faculties were limited to workers and peasants nominated by Party, Komsomol, and trade-union organizations. Admission requirements were minimal: the ability to read and write, the ability to perform the first four arithmetical operations, and a basic understanding of political developments. Although the academic background of students in these faculties was poor, almost all graduates of the program could transfer (without entrance examinations) into regular programs in institutions of higher learning. In 1929 workers' faculties in Ukraine had 14,553 students, of whom 51.8 percent were Ukrainians and 24.1 percent were Russians. Members and candidate members of the Communist party represented 35.8 percent of the total enrollment, Komsomol members, 38.6 percent, and students not belonging to the Party, 25.6 percent. Ukrainian was the language of instruction in 62 percent of the workers' faculties. The faculties were closed in 1940.

In 1969 workers' faculties were reopened at institutions of higher education to educate working-class and peasant youths who had completed secondary-school education, and demobilized army personnel.

I. Bakalo, B. Krawchenko

Workers' universities (*robitnychi universytety*). Institutions offering a general continuing education that existed in the USSR and in the Ukrainian SSR from 1925 to 1931. In Ukraine the institutions were under the jurisdiction of the Main Political-Educational Committee of the People's Commissariat of Education of the Ukrainian SSR, which was charged with the development of adult education. The universities offered an evening program designed to upgrade workers' political awareness, educational level, and job-related skills. They also prepared working-class cadres for managerial positions in the economy, trade unions, and political institutions. Established in large industrial enterprises and drawing on the staff of institutions of higher learning, these universities had two departments, socioeconomic and technical, with a two- and three-year program of study respectively. Classes were held four times a week in four-hour sessions. Workers' universities were closed in 1931 with the development of new adult education programs. (See also *People's universities.)

Working Alliance of Progressive Students (Dilove obiednannia postupovoho studentstva, or DOPS). A semilegal Sovietophile union of Western Ukrainian students which existed in 1924–8. The alliance was formed in 1924 when five delegates walked out of a conference of the *Central Union of Ukrainian Students (being held in Poděbrady, Czechoslovakia) because of political disagreements and formed their own students' union. DOPS had branches in Berlin, Vienna, Cracow, and Prague. It was based initially in Prague and later in Lviv. The group maintained a strong pro-Soviet stance and was linked with the Communist Party of Western Ukraine. Among active members of the alliance were B. Dudykevych and S. Oleksiuk.

Working class. Traditionally the working class has been defined as a social *class made up of wage laborers (and their dependents) engaged in material production in *industry or *agriculture who do not own the means of production they use in their labor. The working class thus differs from artisans (see *Crafts), *peasants, and the *intelligentsia. Soviet statistics agencies defined the working class as an aggregate of persons involved in predominantly physical labor in the nationalized sector of the economy. According to that criterion junior service personnel and guards were included in the working class, as were state farmers. Collective farmers were not, because they formally owned the means of production, except the land.

There has been much debate on how to define the working class. Many sociologists in Ukraine and the USSR have argued that collective farmers should be included in definitions of the working class because the division between collective and state farmers is artificial; that is, the ownership of the means of production on a *collective farm is fictitious, and the work performed by collective and state farmers is similar. Moreover, sociologists have argued that the traditional boundaries between white-collar and blue-collar workers must be re-examined in view of recent changes in the economy and because the intellectualization of physical labor (eg, an increase in the number of skilled workers in automated plants) and the proletarianization of intellectual labor (eg, the existence of a large number of low-grade engineers with only specialized secondary educations) have undermined the usefulness of the key criterion used in defining the working class in the USSR, namely, 'predominantly physical labor.' Some sociologists have called for more all-inclusive definitions of the working class that emphasize control over the labor process. According to such definitions all wage laborers excluded from control over the labor process would be considered part of the working class.

Russian-ruled Ukraine to 1917. Because of the late development of capitalism in Ukraine, a modern working class was formed there only in the mid-19th century. Of course, there existed a work force in industry earlier. In the 16th century some free labor (drawn from among peasants, artisans, and Cossacks) was already employed in premanufacturing and manufacturing enterprises (paper, potash and saltpeter works, foundries, and mines). At that time wide use was made of bonded and, later, serf labor in enterprises belonging to *landowners and monasteries. The reintroduction of *serfdom in Ukraine in the late 17th century by Polish and Russian rulers blocked the development of free labor, which is a precondition for the

rise of a working class as a separate social group. In the 18th and the first half of the 19th centuries, most factories in Ukraine utilized bonded or serf labor and were manorial enterprises owned by nobles. State enterprises that used some free labor were rare, and there were relatively few enterprises owned by merchants or foreign colonists that also used free labor. As a result most of the labor force in Ukraine was closely tied to agriculture.

In the mid-19th century, in connection with the expansion of industry and the increase in its mechanization, wage labor became more widespread on manorial enterprises. Besides using the labor of serfs under the *corvée* system of feudal obligations, landowners began offering wages to some of the serfs. The development of the sugar industry and the appearance of large mechanized sugar refineries created new demands for additional labor, which the landowners filled by renting serfs from neighboring estates or by hiring free labor. The growth of industry and the increasing unprofitability of serf labor vis-à-vis free labor undermined the institution of serfdom and hastened the rise of capitalist relations in industry and agriculture and the formation of a working class.

Tsarist government statistics show that in 1825 there were some 15,000 workers in industry in Russian-ruled Ukraine. (The data are incomplete because they do not include workers in distilleries and mines or the work force of Tavriia guberniia.) Almost 60 percent of those workers were concentrated in Kiev, Poltava, Kharkiv, and Chernihiv gubernias. Free wage laborers formed only 25 percent of workers in industry in 1828. Sixty-one percent of the working class in that period worked in fulling mills and the textile industry; 10 percent, in metallurgy and metalworking; 9 percent, in saltpeter works; 5 percent, in paper works; and 15 percent, in other sectors. By 1860 the working class in industry (as defined above) had grown to 85,000 because of the expansion of the labor-intensive sugar industry; 77 percent was concentrated in the aforementioned gubernias. In 1861, free workers constituted 75 percent of all workers.

The figures just given underestimate the real size of Russian-ruled Ukraine's working class. In the mid-19th century the gathering of labor statistics was in its infancy in Europe in general and in the Russian Empire in particular. Moreover, it was difficult to establish the size of the working class because many workers retained their ties to the village economy. O. Hurzhii estimates the size of the working class in 1861 as approx 200,000: 45,000 in the sugar industry, 25,000 in distilleries, 10,000 in the textile industry, 70,000 in water transportation, and 5,000 in mining, to name some of the major sectors. Not included in the figure were hundreds of thousands of agricultural *migrant workers, many of whom traveled long distances to work in Southern Ukraine.

The early working class, especially serf laborers, worked under appalling conditions. The entrepreneurial landowners had the right to punish their serfs, and beatings were common, despite the efforts of some government officials to limit abuses. The average working day was 12 to 15 hours, and payment, especially for serf labor, was minimal. The highest-paid workers were locksmiths and blacksmiths. Labor conditions were best in the newly established machine-building plants and engineering works.

Before 1861 the vast majority of workers in Russian-

ruled Ukraine were Ukrainian. The skilled sectors of that early working class were formed out of urban and rural artisans, many of whom were of Cossack origin, whereas the mass of unskilled workers were from the peasantry. In that period Russians did not predominate in the working class, although many Russians worked in Ukraine, especially as itinerant craftsmen. In 1845 in Kiev gubernia, for example, Russians made up one-third of the 6,000 craftsmen.

The national composition of Ukraine's working class altered dramatically in the second half of the 19th century, because in the postemancipation period (from 1861) industrial capitalism developed much faster in Ukraine than in Russia. The growth was spurred by large-scale foreign investment in Ukrainian industry, particularly in mining and metallurgy. With rapid industrial development a distinct social group of nonagricultural wage laborers came into being. Technicians and engineers arrived from Europe, and the bulk of the labor force, especially in key industrial sectors, was recruited from Russia because suitable labor was in short supply in Ukraine.

Between 1861 and 1870 the average annual number of workers in the nine gubernias of Russian-ruled Ukraine was 142,600. Only 13 percent were located in the steppe gubernias of *Southern Ukraine and the *Donets Basin. By 1900 the working class had grown to 327,400, 46 percent of it in the steppe gubernias. (The figures include only workers in industrial enterprises with motor power with at least 16 workers, or those without motor power with at least 30 workers.) In 1897 there were 425,000 industrial workers in Russian-ruled Ukraine, almost half of them in the steppe gubernias. Over 65,000 workers were employed in mining and metallurgy. The industrial working class made up 7 percent of the employed population. By 1913 a further concentration of workers in mining and metallurgy had taken place. That year the working class numbered 642,308; 45 percent worked in mining and metallurgy.

Census data give some idea of how much of industry's labor needs were met by Russian labor. According to M. Porsh's analysis of the data, 42 percent of the 425,000 industrial workers in Russian-ruled Ukraine were born beyond its borders. Two-thirds of those migrants settled in the industrial south and gravitated toward the large enterprises. In 1892, for example, 80 percent of the labor force in the mines and factories of Yuzivka (now Donetsk) had come from the Moscow area. In 1897 Ukrainians formed 32 percent of the industrial working class, and a quarter worked in the mines, and a third, in metallurgy. Data suggest that the rate of the Ukrainians' industrial *migration tended to increase as the economy grew, and as mechanized agriculture made them increasingly superfluous as an agricultural labor force. In 1871, for example, only 14 percent of Donbas miners originated from the Ukrainian gubernias. By 1914 almost half the new recruits in the mines were Ukrainian. Such changes, however, did not occur on a large enough scale to alter the national composition of the working class before the Revolution of 1917.

The total number of workers in Russian-ruled Ukraine in 1897 (including all nonindustrial sectors except agriculture) is estimated at 1.5 million, of whom 44 percent were Ukrainians. (Seasonal agricultural workers in that period numbered approximately 2 million.) Ukrainians tended to predominate in the most unskilled sectors; over half of the

day laborers were Ukrainian. The vast majority of Ukrainian workers were located in the Right-Bank and Left-Bank gubernias rather than the steppe gubernias. Only a small proportion of Ukrainian workers worked in towns; most labored in enterprises located in rural areas. Russian-ruled Ukraine was characterized by an unusually high proportion of temporary workers in its factory proletariat. Studies of the Donbas reveal that almost all temporary workers there were Ukrainian. Women represented 9.3 percent of industrial workers in 1897; the vast majority worked in the clothing industry, where they accounted for one-third of the total number of workers (including non-industrial ones).

The working class in the steppe gubernias reflects the uneven industrial development of Ukraine. Enterprises in Katerynoslav gubernia (including the Donbas) were relatively modern, utilized much greater horsepower per worker than industries in Russia proper, and employed very large work forces. In 1902, for example, 69 percent of all industrial workers in Russian-ruled Ukraine laboring in factories with over 1,000 employees were in that gubernia. As early as 1894, two-thirds of all enterprises in the gubernia employed not fewer than 500 workers, and the highest-paid workers in the Russian Empire (excluding Finland) worked in the gubernia. Wages in Right-Bank and Left-Bank Ukraine (except in the city of Kharkiv), however, were among the lowest in the empire, and compared to that in Western Europe, the standard of living of workers in Ukraine was very low. In 1910 the average wage of industrial workers in Russian-ruled Ukraine was less than one-quarter that of their Western European counterparts. Housing and working conditions, especially in the mining areas, were among the worst in Europe. In 1897, 52 percent of Ukraine's industrial working class were illiterate (among metallurgists, 33 percent).

The expansion of the Russian defense industry during the First World War resulted in the growth of Ukraine's industrial working class from 631,000 in 1914 to 812,500 in 1916. Using contemporary Soviet definitions, M. Rubach calculated that in 1917 the working class in Ukraine numbered 3.6 million, of whom 893,000 were industrial workers, 121,000 were railway workers, 230,000 were employed in urban artisan production, 300,000 worked in construction, 444,000 labored in village artisan enterprises, 365,000 were servants, 59,000 were employed in trade and urban transportation, and 1.2 million were agricultural laborers. With their dependents the working class thus broadly defined numbered 6.5 million people, or 20.8 percent of the total population of Ukraine in 1917.

Interwar Soviet Ukraine. During the Ukrainian-Soviet War of 1917–21 much of Ukraine's industry was destroyed, and economic chaos resulted in massive depopulation of the population. Soviet compulsory mobilizations of workers and the general militarization of labor did not stop the flight from factories. In 1921 Soviet Ukraine had only 260,000 factory workers, who constituted little more than 1 percent of the total population. During the period of the *New Economic Policy (NEP) economic recovery began, and the working class began to reconstitute itself. The number of factory workers had increased to 360,000 by 1924 and 675,000 by 1927. The total work force (industry, transportation, and communication) more than doubled between 1924 and 1927, from 1.2 to 2.7 million. In 1927, women made up 14 percent of all

workers. What was significant about the new working class was that for the first time in the history of the country the majority of new recruits were Ukrainian.

Trade-union membership data show that the number of Ukrainians had increased from 41 percent of the total membership in 1923 to 57 percent by the autumn of 1929. The most complete record of the working class is provided by the 1926 general population census. It reveals that 55 percent of Soviet Ukraine's 1.1 million workers were Ukrainians, 29 percent were Russians, and 9 percent were Jews. Ukrainians formed 43 percent of the 509,000 workers in industry and manufacturing, 66 percent of the 143,000 workers in transportation, and 81 percent of the 160,000 agricultural workers. During the upsurge in the economy in the second half of the 1920s, the weight of Ukrainians in the working class increased. According to a trade-union census, between the winter of 1926 and the autumn of 1929 the number of Ukrainians in industry increased from 41 to 48 percent; among miners, an occupation Ukrainians traditionally eschewed, it increased from 36 to 40 percent. In the younger age-groups Ukrainians predominated, and they constituted 62 percent of all industrial trainees.

In the tsarist era most workers never attended a Ukrainian-language school or read a Ukrainian-language newspaper or book, and acquired their literacy and elementary exposure to culture in the Russian language. As a result the working class was by and large Russified. During the 1920s, however, as a result of the policy of *Ukrainization, the use of Ukrainian and the popularity of Ukrainian culture increased substantially within the working class. Between 1926 and 1929 the proportion of workers in industry who read Ukrainian publications increased from 22 to 43 percent. By the autumn of 1929 half of the industrial trade unions were conducting their business in Ukrainian.

The new agrarian conditions under the NEP forced many peasants to seek nonagricultural employment to supplement their meager incomes. Between 1926 and 1929, for example, 23 percent of workers in metallurgy still owned land. Because wages in industry were much higher than agrarian incomes, however, and industrial workers had the added advantage of social security and a shorter workday, nonagricultural employment became the chief source of livelihood.

During the First *Five-Year Plan (1928–33) the working class in Ukraine expanded rapidly. Escaping *collectivization and attracted by the higher standard of living and the opportunities for social mobility offered by industrial employment, hundreds of thousands of peasants moved en masse into urban centers and filled the labor needs of rapidly growing industry. By 1930, for example, almost 80 percent of the new recruits in the Donbas mines were Ukrainian peasants. The workers entering industry were also very young. By 1933, 40 percent of Soviet Ukraine's working class were less than 23 years old.

The number of workers in *heavy industry had expanded from 607,000 in 1929 to 1.1 million by 1933 and 1.4 million by 1939. In 1940 the number of workers in Ukraine in all sectors was 4.6 million. Between 1926 and 1939 the social weight of the working class increased in Soviet Ukrainian society from 6.2 percent of the economically active population to 37 percent. By 1939, 29 percent of ethnic Ukrainians were part of the working class and constituted 66 percent of all workers.

The working class that came into existence during the early years of industrialization was formed when Ukrainization was still in force. At that time the influx of ethnic Ukrainian workers gave fresh impetus to the Ukrainization of the *trade unions. By 1932, for example, 56 percent of trade unionists in the Donbas were Ukrainian. By 1933, 88 percent of all factory newspapers, double the figure for 1928, were being published in Ukrainian. In 1933, however, Ukrainization policies implemented within the working class were attacked as counterrevolutionary. The end of Ukrainization coincided with the introduction of a totalitarian factory regime. The working class, like other social classes, became highly atomized and ceased to exist as an interest group.

Western Ukraine to 1939. Under Austro-Hungarian rule Western Ukraine remained economically underdeveloped, even in comparison with Russian-ruled Ukraine. Only at the beginning of the 20th century did some industrial development occur, primarily in Galicia through foreign investment in the petroleum industry. In ethnic Ukrainian eastern Galicia the working class in industry, construction, transportation, and trade numbered 66,100 in 1869 and 75,000 in 1902, not including day laborers and agricultural workers. In 1902 the working class numbered 7,000 in Transcarpathia and 6,000 in Bukovyna.

There were many seasonal migrant workers and day laborers in Western Ukraine. At the beginning of the 20th century, for instance, there were only 4,000 full-time workers in the petroleum industry, but 10,000 seasonal workers. The landless and land-poor peasantry also formed a large corps of agricultural day laborers and seasonal workers. In addition, some 75,000 Ukrainians left Galicia each year between 1907 and 1912 to work on a seasonal basis in Germany (primarily Prussia), Czechoslovakia, Denmark, and Rumania. Some 700,000 to 800,000 emigrated to the United States, Canada, and Brazil.

Ukrainians were poorly represented among full-time workers. In Galicia in 1900, they formed only 15–18 percent of the 20,000 full-time workers, whereas Poles made up 56 percent, and Jews, 25 percent. Women in Galicia in 1900 formed only 9 percent of workers. In Transcarpathia Ukrainians accounted for 20 percent of the permanent labor force.

The standard of living of workers in Western Ukraine was very low. They received subsistence wages and lived in primitive housing. In Lviv in 1910, for example, 48 percent of workers lived in rooms without beds. Seasonal workers, the overwhelming majority of whom were Ukrainians, lived in even worse material conditions.

In the interwar period, conditions in Galicia and Volhynia deteriorated under Polish rule. Emigration abroad was reduced, and there was little industrial development to absorb the surplus rural population. Mass unemployment ensued, especially during the Great Depression. Between 1929 and 1933 the real *wages of workers declined by 45 percent. In 1931 there were 393,700 workers in industry, of whom 34 percent were Ukrainians. Ukrainians accounted for 62 percent of all 341,400 agricultural workers.

Ukraine since 1940. In 1940 there were 4.6 million workers on the territory of present-day Ukraine. During the Second World War some one million were drafted into the Red Army, and many others were evacuated by the Soviets to the east. More than two million people were taken by the Nazis to work in Germany (see **Ostarbeiter*).

During the war Ukraine's economy was devastated, and by 1944 there were only 615,000 workers in Ukraine. Because millions of men died in the war, there was an acute shortage of able-bodied male workers. Thus, in the post-war reconstruction period *women became a major source of industrial labor. By 1950, 38 percent of Ukraine's industrial workers were women. The authorities made access to higher education more difficult in order to stream young people into the working class (see *Social mobility). Through the *organized recruitment of workers over two million workers were placed in jobs between 1946 and 1962, and 812,000 were sent to work outside Ukraine elsewhere in the USSR.

Ukraine's working class numbered 7.9 million by 1960 and 11.6 million by 1970. The number of workers in agriculture (state and collective farmers) declined, however, from 8.7 million in 1959 to 5.8 million in 1970. In 1970 the largest nonagricultural sector of the working class was in trade and the services industry (3.0 million), followed by machine building and the metalworking industry (2.8 million), transportation and communications (2.2 million), construction (1 million), and light industry (960,000). Ukraine's working class was highly concentrated, with two-thirds employed in factories containing over 1,000 workers. Indicative of larger economic problems was the fact that the rapid growth of Ukraine's working class was brought about to a significant degree by a level of productivity much below the USSR norm. What that fact pointed to was inadequate industrial investment and poor mechanization, which in turn produced a conflicting factory regime. In the Donbas, for example, because new investment in mining was meager, workers' safety was allowed to deteriorate, and major unrest occurred as a result. Such inadequacies existed because between 1959 and 1970 half the total capital formed in Ukraine was reinvested in the USSR outside the republic. Consequently the earned income of workers in Ukraine slipped from sixth place among 15 Soviet republics in 1960 to ninth place in 1970.

In the post-Stalin period many of the Draconian labor laws introduced in the 1930s were abolished, and their abolition paved the way for greater labor turnover and mobility – a principal mechanism for expressing workers' dissatisfaction with their pay and working conditions. In 1970, for example, almost 30 percent of workers changed jobs. Moreover, because of the influx of young educated workers into the labor force, the working class as a whole had higher expectations. In 1970, one-third of all workers in Ukraine, and 46 percent of machine-building and metal workers, were under the age of 29. Ukraine's working class was among the best educated in the USSR. In 1979, for example, 28.8 percent of all workers in Russia had secondary educations, and 8.5 percent had either incomplete higher or specialized secondary educations. In Ukraine the corresponding figures were 40 and 9.8 percent, and 63 percent of young people entering the blue-collar work force for the first time had secondary educations.

Women formed 48 percent of Ukraine's working class in 1970. One-third of all workers in Ukraine that year were located in the western or central-western oblasts of the republic. In 1959, 70 percent of the working class was Ukrainian. By 1970 their share had increased to 74 percent. By the mid-1960s, 70 percent of all industrial workers in the republic, 78 percent of railway workers, 72 percent of workers in the chemical industry, and 70 percent

of machine-building and metal workers were ethnic Ukrainians.

In 1980 there were 14.1 million workers in Ukraine, and in 1988, 14.3 million. In 1979, 55 percent of Ukraine's population was classified as belonging to the working class, and 56 percent of ethnic Ukrainians in the republic belonged to that category. In 1987 there were 6.2 million industrial workers in the republic. The average monthly wage for both white- and blue-collar workers in Ukraine in 1987 was 185 rubles. That was below the USSR monthly wage of 202.9 rubles and the RSFSR wage of 216.1 rubles. The per capita family income of Ukraine's industrial workers was 163 rubles in 1988. The largest expense for a working-class family has been food. In 1988 over 35 percent of family income was spent on food.

In recent years, especially since the late 1980s, Ukraine has seen the rise of a working-class movement independent of official trade unions. *Strikes have become a common form of protest against difficult living conditions and shortages of all kinds. Workers challenged the monopoly of power that the Communist party enjoyed until September 1991 and have called for *workers' control, protested the privileges of the elite, supported demands for social and political reform, and, especially in western Ukraine, played an important role in the national movement. Today the working class faces uncertainty with the transition from a command to a market economy. Among the most worrisome consequences of present economic reform is the threat of large-scale *unemployment.

World Anti-Communist League (WACL). An alliance of anticommunist organizations based in over 60 countries, founded in 1967 in Taipei, Taiwan. One of its founding members is the *Ukrainian Liberation Front; the Ukrainian Youth Association (SUM) has been a member since 1968. The other members include the *Anti-Bolshevik Bloc of Nations (ABN), the Asian Pacific Anti-Communist League, the European Freedom Council, and the American Council for World Freedoms. S. *Stetsko has been a permanent delegate of the ABN to WACL. The league holds annual conferences. Its purpose has been to remind the democratic countries of the threat of communism and to struggle for the liberation of nations living under communist subjugation. Reports on the WACL are published in *ABN Correspondence*.

A mass rally at Toronto's Maple Leaf Gardens sponsored by the World Congress of Free Ukrainians during its second convention (November 1973)

World Congress of Free Ukrainians (Svitovyi kongres vilnykh ukraintsiv, or SKVU). An umbrella organization of Ukrainian organizations and institutions in the West, founded on 16-19 November 1967 in New York. Its purpose is to co-ordinate the activities of its member organizations and to support the striving of the Ukrainian people for national independence. Its members include national umbrella organizations, such as the *Ukrainian Congress Committee of America and the *Ukrainian American Coordinating Council (both in the United States), the *Ukrainian Canadian Congress, the Co-ordinating Center of Ukrainian Community, Central, and National Institutions in Europe, the *Federation of Ukrainian Organizations in Australia, the *Ukrainian Central Representation in Argentina, the *Ukrainian Brazilian Central Representation, and the *Ukrainian Hromada in Venezuela; Ukrainian world organizations, such as the *World Federation of Ukrainian Women's Organizations and the *Central Union of Ukrainian Students; various national Ukrainian associations; and the Ukrainian Catholic, Orthodox, and Protestant churches. The presidium of the SKVU has set up special committees to co-ordinate activities in certain fields: the World Council of Ukrainian Social Services to help Ukrainian refugees and needy

Ukrainian communities around the world, the Human Rights Commission to defend political prisoners in the USSR, the World Ukrainian Coordinating Educational Council to set program guidelines and prepare textbooks for Ukrainian schools, the World Council on Scholarship to stimulate and plan research, the World Council for Cultural Affairs to register and encourage development in the arts, the Co-ordination of Ukrainian Youth Organizations to organize youth conferences, the Council of Ukrainian Veterans' Organizations to follow the activities of veterans' associations, and the Ukrainian World Co-operative Council to monitor the development of Ukrainian credit unions in various countries. The Information Service of the SKVU has published a quarterly, *Visnyk SKVU* (since 1974), and a bimonthly *Newsletter* (since 1980). The presidents of the World Congress have been Rev V. Kushnir (1967–77), M. Plaviuk (1978–81), V. Bazarko (1981–3), P. Savaryn (1983–8), and Yu. Shymko (1988–).

World Federation of Ukrainian Medical Associations. See Medical scientific societies.

World Federation of Ukrainian Women's Organizations (Svitova federatsiia ukrainskykh zhinochykh orhanizatsii, or SFUZhO). A women's umbrella organization in the West, founded on 13 November 1948 by the First World Congress of Ukrainian Women in Philadelphia for the purpose of representing Ukrainian women in the Ukrainian community and in international organizations and for promoting the cause of Ukrainian independence. The ten founding members were the *Ukrainian National Women's League of America, the *Ukrainian Women's Organization of Canada, the *Ukrainian Women's Association in France, the *Association of Ukrainian Women in Great Britain, the *Ukrainian Women's Alliance in Germany, the *Ukrainian Women's Alliance in Belgium, the *Ukrainian Catholic Women's League of Canada, the *Ukrainian Gold Cross, the Ukrainian Women's Association of Argentina, and the *Organization of Ukrainian Women in Brazil. In 1959 four more organizations joined the federation: the *Women's Association of the Canadian League for Ukraine's Liberation, the *Ukrainian Women's Union in Austria, the *Ukrainian Women's Alliance in Venezuela, and the *Ukrainian Women's Association in Australia. Today the federation embraces 22 organizations, with a total membership of about 25,000. It conducts a wide-ranging program through different committees: the Educational Committee has designed programs for parents' seminars, lectures, kindergartens, and children's libraries; the Cultural Committee has encouraged the organization of choirs, book clubs, festivals, and exhibits and created a special Mary *Beck literary award; the Welfare Committee ensures support from national welfare programs or directly from the federation; and the Press and Publishing Committee has published a regular page in the monthly **Nashe zhyttia* (since 1949) and **Zhinochyi svit* (since 1975) and its own bulletin, *Zhinka v sviti* (since 1963). In 1956 it published a short history of the Ukrainian women's movement, I. Pavlykovska's *Na hromads'kyi shliakh* (On the Community Way).

The SFUZhO has been active on the international stage: it is an associate member of the General Federation of Women's Clubs in the United States and an affiliate of the Mouvement Mondial des Mères, the International Women's Alliance, and the World Council of Women and par-

ticipates regularly in international conferences. It has sent petitions and appeals to various international organizations in defense of politically persecuted Ukrainian women, the families of political prisoners, women's rights, and the suppressed Ukrainian churches. The SFUZhO was a founding member of the World Congress of Free Ukrainians and has a representative on its executive. Its head office is in Philadelphia. The federation's presidents have been O. *Kysilevska (1948–56), O. *Zalizniak (1956–69), O. *Lototska (1969–71), S. Savchuk (1971–7), L. *Burachynska (1977–82), M. *Kvitkovska (1982–92), and O. Bryzhun-Sokolyk.

BIBLIOGRAPHY

P'iatyi kongres Svitovoi federatsii ukrains'kykh zhinochykh orhanizatsii (Toronto 1988)

World Union of Ukrainian Women (Svitovyi soiuz ukrainok; also known as Vseukrainskyi zhinochyi soiuz). An international representative body of Ukrainian women's organizations, established in Lviv in October 1937. Early in its existence the *National Council of Ukrainian Women (NRUZh) had hoped to assume a central co-ordinating role, but the unwillingness of the *Union of Ukrainian Women (SU) to affiliate itself with an émigré association made this arrangement impossible. The idea received fresh impetus in 1934 at the Ukrainian Women's Congress in Stanyславiv. Women's groups in Galicia (the SU), Europe (the NRUZh), Volhynia, Transcarpathia, Rumania, Poland, Canada, and the United States were brought together as founding members. M. *Rudnytska was elected president, Z. Mirna, secretary, and S. *Rusova, honorary president. The closing down of the SU (the union's strongest and most important member) by the Polish authorities in 1938 and the outbreak of the Second World War in 1939 rendered the union stillborn.

World wars. Two major international conflicts which punctuated 20th-century history and entailed unprecedented destruction and sociopolitical upheaval. Dozens of countries participated in each of the world wars, but the principal belligerents were as follows: in the First World War (1914–18), the Entente (Great Britain, France, Russian Empire), which was joined by the United States in 1917, and the Central Powers (Germany, Austria-Hungary, Turkey, Bulgaria); in the Second World War (1939–45), the Allies (England, France; joined by the USSR and the United States in 1941) and the Axis (Germany, Italy, Japan). Both wars profoundly affected Ukraine.

First World War. Among the primary causes of the First World War was the rivalry between the Habsburg monarchy and the Russian Empire, which between them ruled all Ukrainian lands. Although the main source of Austro-Russian rivalry was a conflict of interests in the Balkans, there was also tension over the Ukrainian question. Russian adherents of *Pan-Slavism had long anticipated the 'reunification' of Habsburg-controlled Galicia and Transcarpathia with Russia, and the imperial authorities had subsidized the activities of *Russophiles there for many years. In the decade preceding the outbreak of war the Russian government spent large sums of money on pro-Russian propaganda in Galicia, Bukovyna, Transcarpathia, and among Ukrainian emigrants in North America.

In December 1912, by which time the outbreak of a Eu-

ropean war seemed to be only a matter of time, representatives of the three major Ukrainian political parties in Galicia, *National Democratic, *Ukrainian Radical, and *Ukrainian Social Democratic, met in Lviv and unanimously agreed that in the event of war the Ukrainian people would support Austria against Ukraine's greatest enemy, the Russian Empire. The same sentiments were expressed by an emigrant from Russian-ruled Ukraine, D. *Dontsov, at a student congress in Lviv in 1913. When war finally broke out in the east in August 1914, the three representative Galician parties formed the *Supreme Ukrainian Council, which pledged its loyalty to the Central Powers and expressed the hope that all of Ukraine would be delivered from Russian rule in the course of the war. Within weeks the council established the *Ukrainian Sich Riflemen, a volunteer unit in the Austro-Hungarian army. Political émigrés from central Ukraine formed the pro-Austrian *Union for the Liberation of Ukraine in Lviv in August.

Ukrainian activists in the Russian Empire feared that the outbreak of war would provide the tsarist authorities with a pretext for the complete suppression of the Ukrainian movement. They therefore hastened to present themselves as loyal to the empire and its war effort. S. *Petliura wrote a declaration of loyalty, which was published in the journal *Ukrainskaia zhizn'*. Another prominent Ukrainian periodical, the Kiev daily **Rada*, also published a declaration of loyalty. The pre-eminent spokesman of the Ukrainian movement in the Russian Empire, the historian M. *Hrushevsky, was in Lviv (in the Habsburg monarchy) when war erupted; he left for Kiev and there distanced himself publicly from the anti-Russian activities of the Union for the Liberation of Ukraine. In spite of those protestations of loyalty a wave of repression engulfed the Ukrainian movement. The authorities closed down most Ukrainian periodicals, including *Rada*, arrested Hrushevsky, and deported him to the interior of Russia.

In August and September 1914 a Russian offensive resulted in the occupation of much of Galicia, including its capital, Lviv, as well as all of Bukovyna. Many prominent Ukrainians fled to Vienna, and the Supreme Ukrainian Council (expanded in May 1915 and renamed the *General Ukrainian Council) and other Ukrainian organizations and periodicals transferred their activities to the Austrian capital as well. Retreating before the rapid and powerful Russian advance, the Austro-Hungarian military authorities proceeded to blame their defeat on the alleged treason of the Ukrainian population, which purportedly sympathized with the Russians. Tens of thousands of Ukrainians, only a minority of whom were actually Russophiles, were brutally repressed; many were shunted off to concentration camps in Austria, including the notorious *Thalerhof, and many others were summarily executed. (A few thousand Ukrainians in Canada were also placed in *internment camps, but because of purported sympathies with the Austrians.)

The Russian occupation of Galicia and Bukovyna was characterized by a pogrom against the Ukrainian movement, complete with mass arrests and deportations, the closing down of newspapers, and the burning of Ukrainian books; among those arrested was the Greek Catholic metropolitan A. *Sheptytsky, who spent most of the rest of the war in a monastery prison in Russia. The Russian occupation authorities, particularly Bishop E. *Georgievsky, persecuted the Greek Catholic church and at-

tempted to convert Galician Ukrainians to Russian Orthodoxy. The Russian administration was aided in all its anti-Ukrainian efforts by the Carpatho-Russian Liberation Committee, a group of Galician Russophiles based in Kiev which returned to Lviv with the conquering Russian army. In large measure the harshness of the occupational regime had its roots in ideology: the Russians regarded Galicia not as a foreign territory but as a natural part of their realm (denied to them for centuries because of Polish influence). Furthermore, in Austrian-ruled Galicia and Bukovyna the Ukrainian movement had developed relatively freely, and exerted considerable influence on Russian-ruled Ukraine, where the members of the Ukrainian movement were persecuted. The imperial authorities wished to stifle the Ukrainian movement there in order to destroy the source of what they considered pernicious 'Mazepist' thinking.

The Russians were driven from Galicia and Bukovyna in the first half of 1915, but returned a year later. The second Russian occupation was somewhat milder, but its essential anti-Ukrainian character remained unaltered until the overthrow of tsarism in March 1917. Shortly thereafter the Russian *Provisional Government appointed the Ukrainian historian and activist D. *Doroshenko as its commissioner for Galicia and Bukovyna. An Austrian administration returned to the region in the summer of 1917.

The interior of the Peremyshl fortress after the German occupation during the First World War

The Central Powers maintained a more positive relationship with the Ukrainian movement after 1914, although they were far from willing to satisfy Ukrainian aspirations. At first Vienna and then Berlin financed the Union for the Liberation of Ukraine, which published many informative brochures on the Ukrainian question and also conducted educational work among Ukrainians from the Russian Empire held in Austrian and German *prisoner of war camps, in an effort to develop their national consciousness. To increase support for the war effort the Austrian central government held out the prospect of concessions to all of Austria's nationalities. It proved impossible, however, to reconcile conflicting national claims, notably those of the Ukrainians and Poles. In late 1915 and early 1916 Prime Minister K. von Stürgkh of Austria promised the General Ukrainian Council that Ukrainian-inhabited eastern Galicia would become a separate province from Polish western Galicia; that territorial

division had been a demand of the Galician Ukrainian movement since 1848. The promise was superseded, however, in November 1916, when Emperor Franz Joseph promised the Poles that the unity of the province would be preserved, and that it would in fact be granted greater autonomy from Vienna – a long-standing political goal of the Polish national movement. In protest the General Ukrainian Council dissolved itself. In its place appeared the Ukrainian Parliamentary Representation, which initially adopted a cooler attitude to Austria than its predecessor had had.

The war had a corrosive effect on the stability of almost all the belligerent states, but it caused the greatest disintegration in the Russian Empire. Largely owing to revolutionary unrest generated by the war, Tsar Nicholas II abdicated in March 1917. In the wake of this democratic revolution the *Central Rada emerged in Kiev as the focus of Ukrainian political activity. The Central Rada took steps to create Ukrainian armed forces, including the *Khmelnysky Regiment, which fought on the world-war front in the fall of 1917. Beginning in May 1917 the Rada also convened a series of *all-Ukrainian military congresses, which passed resolutions essentially supporting the Provisional Government's continuation of the war against the Central Powers. Only small groups on the extreme left of Ukrainian political life (L. *Yurkevych in exile in Switzerland and the International Revolutionary Social Democratic Youth in Galicia) held a position of principled opposition to what they considered an imperialist war.

Continuing the war proved to be a grave error on the part of the Russian Provisional Government; just as the war had contributed to the collapse of tsarism, so too it was a major factor in the victory of the *October Revolution, which swept the Russian Provisional Government from power and brought the Bolsheviks to the helm of the Russian state. As a result of the revolution hostilities were halted on the Russian and Ukrainian fronts. Also as a result the Central Rada called into being the *Ukrainian National Republic in November 1917. In December the UNR found itself at war with Soviet Russia (see *Ukrainian-Soviet War). In January 1918 it declared its full independence from Russia, and in February it concluded separately the Peace Treaty of *Brest-Litovsk with the Central Powers. By that agreement the UNR officially withdrew from the First World War.

In the wake of the treaty the German army helped the UNR forces to reconquer Ukraine. Germany hoped to pressure Soviet Russia to make peace so that it could concentrate its forces on the western front; more important, Germany wanted large quantities of food from Ukraine in order to maintain its increasingly restive population for the duration of the war. To facilitate the extraction of foodstuffs, the Germans deposed the Rada in April 1918 and replaced it with the authoritarian regime of Hetman P. *Skoropadsky. German backing kept Skoropadsky in power, but his position was seriously undermined by the defeat of Germany on the western front in November 1918. Almost immediately the *Directory of the UNR launched an uprising against the hetman, and in December he was deposed.

The defeat of the Central Powers also resulted in the collapse of the Habsburg monarchy and the establishment of the *Western Ukrainian National Republic in November 1918.

Soldiers of the Russian army fraternizing with captured soldiers of the Austrian army near Lviv during the First World War

Because the front moved back and forth across Ukrainian territory, the war brought much physical destruction to Ukraine and crippled its economy for years to come. Much of the damage occurred in Galicia and Bukovyna, which constituted the southern reaches of the Austro-Hungarian eastern front for a long period of time. The political upheaval initiated by the war and the diffusion of weapons as a result of the disintegration of the armies unleashed chaos and civil war.

The peace that followed the First World War was precarious, and undermining it was dissatisfaction with the peace settlement on the part of a number of the nationalities of East Central Europe. Among them were the Ukrainians, who now found themselves divided among the Ukrainian SSR, Poland, Rumania, and Czechoslovakia. The incorporation of Ukrainian territories that had formerly been under Austria-Hungary into the latter three countries was sanctioned by the *Paris Peace Conference and the *Conference of Ambassadors.

Second World War. The prelude to the outbreak of the Second World War was A. Hitler's dismemberment of Czechoslovakia, initiated by the *Munich Agreement of September 1938. The Ukrainian-inhabited province of Czechoslovakia, Subcarpathian Ruthenia (known also as *Carpatho-Ukraine), became autonomous in October 1938. In November large parts of Carpatho-Ukraine were ceded to Hungary on the basis of the *Vienna Arbitration. Though truncated, Carpatho-Ukraine was still regarded by Ukrainians in Poland as a potential Piedmont, the nucleus of a future Ukrainian state. J. Stalin assessed the situation in the same way and let it be known that his attitude to Hitler's Germany would depend in part on the evolution of events in Carpatho-Ukraine. In March 1939, when Hitler did away completely with the Czechoslovak state, he awarded Carpatho-Ukraine to Hungary, which occupied the area and repressed its Ukrainian movement. Thereafter, representatives of Stalin and Hitler began exploratory talks that culminated in the *Molotov-Ribbentrop Pact of 1939.

A secret codicil of the pact provided for the division of Eastern Europe between Germany and the Soviet Union. The first step in the division, and also the start of the Second World War, was the German invasion of Poland on 1 September 1939, following which Britain and France de-

clared war on Germany. Soon thereafter, on 17 September, the Soviet Union occupied Galicia, western Volhynia, and Polisia, areas that had been under Polish rule since the end of the First World War. In November those territories were incorporated into the Ukrainian SSR. Many Ukrainian political activists fled Soviet rule, and Cracow, in the German sector of former Poland, became an important center of Ukrainian émigré life. There the *Ukrainian Central Committee was formally established in the spring of 1940. In June 1940 the Soviets incorporated northern Bukovyna and northern and southern Bessarabia, formerly held by Rumania, into the Ukrainian SSR.

Ukrainians being evacuated to the Soviet interior in 1941

Nazi-Soviet collaboration ended with the German invasion of the Soviet Union on 22 June 1941. The Germans took Lviv in June, Kiev in September, and Kharkiv in October. Ukrainian Galicia was incorporated as a separate administrative district into the *Generalgouvernement (the name which the Germans gave to the bulk of the territory of the former Polish state). Northern Bukovyna and Bessarabia were reincorporated by Germany's ally Rumania. Rumania also occupied Transnistria, the territory between the Dniester and the Boh rivers, including the port of Odessa. Most of the rest of Ukraine became the *Reichskommissariat Ukraine, except for the easternmost parts of Ukraine, which were under direct military occupation, and the Crimea, which was under a separate jurisdiction.

The Second World War in general was characterized by unheard-of violence outside the fields of battle. The violence was particularly brutal in Ukraine. When the Soviets withdrew from Western Ukrainian territory in June 1941, they shot, murdered, or burned to death nearly 20,000 inmates of NKVD prisons. *Nazi war crimes in Ukraine were on a yet greater scale. The Germans killed hundreds of thousands of Ukrainian POWs by starvation, gassing, and other methods. Millions of civilians were also murdered. The Nazis systematically executed members of the former Communist apparatus of Ukraine and randomly killed many other Ukrainians. The Reichskommissar of Ukraine, E. *Koch, for instance, authorized the mass murder of Ukrainians living in an area he wished to make into a hunting preserve. Over two million Ukrainians were also deported to Germany to work as forced laborers, the so-called *Ostarbeiter. Forced labor also existed in Ukrainian territory. The Germans' refusal to permit the dismantling

of collective farms and their massive food requisitions also contributed to the misery of Ukraine's population.

The Nazis singled out the Jews for extermination. Within the first weeks of their invasion of Ukraine the Germans orchestrated a series of pogroms against the Jews in which tens of thousands perished; the Nazis recruited elements of the local population to conduct these first actions against the Jews. Thereafter, the destruction of the Jews became more systematic and was carried out primarily by the Germans themselves. In the Reichskommissariat Ukraine mobile killing units (*Einsatzgruppen*) went from locality to locality and shot the Jewish population. One of the most notorious of their killing grounds was situated at *Babyn Yar in Kiev. In the district of Galicia the Jews were, in the main, transported to killing centers, such as Auschwitz (*Oświęcim concentration camp). The Ukrainian Catholic metropolitan A. Sheptytsky condemned the genocide and registered his protest with Himmler. After the war Nazi leaders were prosecuted at the *Nuremberg trials for their war crimes and crimes against humanity, including those perpetrated in Ukraine.

In spite of the great brutality of the Nazi occupation there was a degree of ambivalence toward it on the part of some sectors of Ukrainian society. The murderous nature of the Nazi regime did not become patently evident until after the attack on the Soviet Union in the summer of 1941. Until that time the majority of Ukrainian nationalists felt that Germany could be an important ally against what seemed the greater evil – the lawless terror of the Soviet Union. That belief was encouraged by the fact that the Soviet regime had clearly revealed its attitude toward Ukrainians, whereas the Germans were still (at least in Ukraine) an unknown quantity. Illusions about the Nazis continued to be fostered by the German minister for the occupied eastern territories, A. *Rosenberg, who held out the prospect of an end to the brutalities as well as the establishment of a Ukrainian state under German protection. There were also certain areas of policy in which the Germans were more tolerant than the Soviets had been. Many churches were reopened during the occupation, and it was possible under the Germans to investigate and publicize some Stalinist crimes (as in the exhumation of the mass graves that bore witness to the *Vinnytsia massacre, and the publication of memoirs concerning the repression of the Ukrainian intelligentsia).

Ukrainians fought on both sides in the Second World War. By far the majority of the Ukrainians, about 4.5 million, fought in the Red Army against the Germans. Others joined the Communist partisans, who included the prominent commander S. *Kovpak. There were also Ukrainian volunteer units in the German army, however, specifically the *Legion of Ukrainian Nationalists (the Nachtigall and Roland units, which marched into Lviv in June 1941 together with the Germans) and the Waffen SS *Division Galizien (est April 1943). By the time the latter unit was formed Ukrainians had no illusions about the nature of the Nazi regime; it seemed likely, however, that Germany was going to lose the war, and Ukrainian nationalists wanted to have trained troops and weapons ready for an eventual confrontation with the Soviets. There were also Ukrainians who fought against both Nazis and Soviets during the war, the members of the *Ukrainian Insurgent Army (UPA). Originally founded by T. *Borovets in 1941, the UPA grew rapidly in the spring of 1943, by which time

THE SECOND WORLD WAR IN UKRAINE

it had come under the political control of the Bandera faction of the Organization of Ukrainian Nationalists (OUN). The UPA continued guerrilla warfare against the Soviet authorities into the mid-1950s. A significant number of Ukrainians, many of them former POWs, ended up in A. Vlasov's *Russian Liberation Army or in the auxiliary units that constituted the *Ukrainian Liberation Army. Ukrainians also served in various Allied formations. Many Galician Ukrainians could be found in the *Polish Second Corps, and a large number of Ukrainian Americans and Ukrainian Canadians served in the wartime armies of their respective countries. The latter group formed the London-based *Ukrainian Canadian Service-

men's Association, which was to play a critical role with respect to displaced Ukrainians at the end of the war.

Ukrainian political and cultural aspirations were frustrated by the Nazi administration. On 30 June 1941 the Bandera faction of the OUN proclaimed an independent Ukrainian state (see *Proclamation of Ukrainian statehood), hoping thereby to place before the Germans a fait accompli. In July, however, the Germans responded by arresting S. *Bandera, Ya. *Stetsko, and many other prominent nationalists of the Bandera faction; others went underground. Both the Bandera and the Melnyk factions of the OUN organized clandestine *OUN expeditionary groups to travel into Eastern Ukraine and agitate among

the population. Most of the Ukrainian organizations that sprang up spontaneously in the wake of the Soviet withdrawal were closed down by the Germans. The legal centers on which Ukrainian cultural and political life focused were the Ukrainian Central Committee in Cracow and the *Ukrainian Regional Committee in Lviv. The primary aim of those committees was to intervene with the German authorities to preserve Ukrainian culture and to mitigate the sufferings of the Ukrainian population. The Germans also maintained a tight control over Ukrainian life outside Eastern Europe, by allowing only selected organizations to continue their activities (eg, the Ukrainian Hromada and *Ukrainian National Alliance) and establishing the *Ukrainian Institution of Trust in the German Reich as a liaison body.

Ukrainian *Ostarbeiter* being herded onto a Germany-bound train in Kiev in 1941

The Germans began to lose the war after the Battle of Stalingrad in the fall and winter of 1942–3. By August 1943 the Soviets had recaptured Kharkiv, and by November they had taken Kiev. In the summer of 1944 the Soviets reached Galicia. A decisive battle for the fate of Galicia was fought at *Brody in July; the German forces, and with them the Division Galizien, were routed. By the fall virtually all of Ukraine was under Soviet control. Germany capitulated on 8 May 1945, but the war against Japan continued until September.

Before the end of the war the territory of the Ukrainian SSR was expanded. The Ukrainian territories that had been taken from Polish and Rumanian rule in 1939–40 were reincorporated as they were reconquered; in addition, Czechoslovakia ceded Transcarpathia to the Ukrainian SSR in June 1945.

The destruction and dislocation in Ukraine caused by the Second World War surpassed even that of the First World War. An estimated 6.8 million Ukrainians were killed, and direct material damage came to 285 billion rubles (1941 prices). About 200,000 Ukrainian *displaced persons ended up in the emigration in the West; the vast majority were returned to Soviet rule through forced *repatriation. The extermination of much of the Jewish population during the war and a series of wartime and postwar population transfers and deportations introduced changes in the national demography of Ukraine. After the expulsion and emigration of most Poles the cities

An example of Nazi scorched-earth tactics in Ukraine (1943)

of Western Ukraine became Ukrainianized and for the first time developed a Russian minority. The once substantial German settlements in Ukraine, particularly in the south, as well as those of the Tatars in the Crimea, disappeared; Ukrainians in the Lemko region were deported from their ancestral territories into the new lands that Poland acquired from Germany (see *Operation Wisła).

A machine-gun nest of the Division Galizien during the Battle of Brody (July 1944)

The victory against the Nazis in 1941–5 became an important source of legitimation for the Soviet regime and figured prominently in its propaganda at home and abroad. The Soviets referred to the war as the Great Patriotic War (*Velyka Vitchyzniana viina*) and made its commemoration ubiquitous: statues, monuments, and military hardware (tanks, airplanes) could be found in public places throughout the USSR (even in villages); Soviet literature and film produced a torrent of factual and fictional works about the war; veterans were granted a prominent place in public celebrations; Stalin was elevated to the stature of a military genius, and his successors (N. Khrushchev and L. Brezhnev) were also given inflated reputations for the roles they had played in the war effort; and 9 May (Victory Day) was declared an all-Union holiday commemorating the German surrender (the calendar date a day later than in Western Europe because of a time

A technician attaching a bomb with the inscription For Ukraine to a Soviet bomber (1944)

difference between Berlin and Moscow). An enormous monument and museum commemorating the Second World War were erected in 1982 near the Kievan Cave Monastery.

In the Ukrainian SSR the 'official' memory of the war was accompanied by an ongoing smear campaign against nationalist opponents of the Soviet regime that sought to portray the nationalists as Nazi collaborators and war criminals. The purpose of the campaign was not to provide a factual account of deeds that had been done during the war years, but to besmirch Ukrainian patriotism of any sort as bourgeois nationalism (and to underscore its incompatibility with Soviet *nationality policy). Consistent targets of official criticism included the Division Galizien, Metropolitan A. Sheptytsky, and the OUN. The UPA could not be dealt with in such a simplistic manner and became conspicuously absent from Soviet Ukrainian publicism and historiography. The UPA was vilified, however, in Polish postwar historiography.

Wormwood (*Artemisia*; Ukrainian: *polyn*). Perennial or annual plants of the Compositae family, also known as absinthe. In Ukraine there are 23 species, some cultivated for medicinal purposes, some used decoratively, and some growing as weeds. Mountain wormwood (*A. absinthium*) grows wild and is used to improve appetite and stimulate the digestive system. Crimean wormwood (*A. taurica*; Ukrainian: *polynok*, *yevshan*) is found along the Crimean coast. Also found in Ukraine are *A. pseudofragrans*, *A. boschniakiana*, and tarragon (*A. dracunculus*), which in its cultivated form contains essential oil, and the leaves and stems of which are used for pickling. Annual wormwood (*A. annua*) grows wild and is cultivated for its fragrance. In Ukrainian folk tradition the fragrance of the wormwood (*yevshan-zillia*) produces nostalgia for the native land.

Lieut-Gov Stephen Worobetz

Anatole Wowk

Worobetz, Stephen [Vorobec, Stefan], b 26 December 1914 in Krydor, Saskatchewan. Surgeon of Ukrainian descent. Educated at the universities of Saskatchewan (1935) and Manitoba (MD, 1940), during the Second World War he was awarded the Military Cross for heroism. Worobetz served as lieutenant governor of Saskatchewan in 1970–6, making him the first Ukrainian Canadian appointed to a viceregal position. In 1984 he was awarded an honorary LL.D degree from the University of Saskatchewan.

Wowk, Anatole [Vovk, Anatol'], b 11 March 1921 in Ukraine, d 9 November 1992 in Edison, New Jersey. Chemist and lexicographer; member of the Shevchenko Scientific Society. A graduate of the Lviv Polytechnical Institute (1944), he emigrated to the United States in 1948, where he worked as a research chemist. Besides contributing research articles to *Analytical Chemistry*, he compiled *A Selective English-Ukrainian Dictionary of Science, Technology, and Modern Living* (2 vols, 1982, 1990) and *English-Ukrainian Dictionary of Color Names and Color Science* (1986). He was one of the cofounders (1965) of the *Ukrainian Terminological Center of America and was its president from 1978.

Wowk, Wira. See Vovk, Vira.

Ol'ha Woycenko

Woycenko, Ol'ha [Vojcenko], b 25 July 1909 in Winnipeg. Editor and researcher. A longtime associate of **Ukraïns'kyi holos* (Winnipeg) and the Trident Press (1927–72), Woycenko was national president of the *Ukrainian Women's Association of Canada (1948–54) and of the women's section of the Ukrainian Canadian Committee (now Congress) (1959–62). The compiler of the monumental *Litopys ukraïns'koho zhyttia v Kanadi* (Annals of Ukrainian Life in Canada, 8 vols, 1961–92), based on information gleaned from the newspaper *Ukraïns'kyi holos*, she also wrote *The Ukrainians in Canada* (1967) and *Slovians'ka literatura v Kanadi* (Slavic Literature in Canada, 1969).

Wrangel, Petr, b 27 August 1878 in Mukuliai, Kaunas gubernia (Lithuania), d 25 April 1928 in Brussels. Russian military and political figure. Following a distinguished career in the Russian imperial army, Wrangel moved to the Crimea when the monarchy was overthrown, in 1917. During the German occupation of Ukraine in 1918, he was invited by Hetman P. Skoropadsky to become his chief of staff, but refused. Instead he became one of the organizers of the loyalist 'White' Volunteer Army headed by A. *Denikin. As a lieutenant general he earned himself an unsavory reputation for his ruthlessness. Wrangel succeeded Denikin as head of the White forces in April 1920. With the Bolsheviks busy fighting an invading Polish army, Wrangel decided to launch an offensive into Ukraine from the Crimea in the summer of 1920. The offensive advanced northward toward the Donbas and Katerynoslav, but peace in the war with Poland in September freed the bulk of Bolshevik troops to meet it. Wrangel's army, harassed also by the forces of N. Makhno's partisans, was pushed back to the Crimea by November 1920. That month he ordered a mass evacuation of his army and sympathizers. In exile he continued his anti-Bolshevik political activities.

Wrestling (*borotba*). In turn-of-the-century Ukraine several prominent Ukrainian wrestlers became internationally known: I. *Piddubny, who scored 11 victories at a tournament in Paris in 1903 and remained an international champion until the 1920s; O. Harkavenko, who competed in Europe and the United States; D. Posunko, whom the Polish world champion, S. Cyganiewicz, was unable to

Viktoriia Kobzarenko (right), winner of the women's 72-kg-weight category at the European Sambo Federation championships held in Kiev in 1992

defeat during a three-hour match in Poltava in 1915; the world champion Z. Yalov; and I. Kalashnykov.

The modern international styles of wrestling – Greco-Roman, freestyle, judo, and sambo – all have had practitioners in Soviet Ukraine. Soviet wrestlers have belonged to the International Amateur Wrestling Federation (IAWF) since 1947. Ukrainian Greco-Roman wrestlers who have won Olympic gold medals are Ya. Punkin (1952, featherweight); I. Bohdan (1960, heavyweight), also the 1958 and 1961 world champion; and O. Kolchynsky (1976 and 1980, super-heavyweight), also the 1978 world champion. V. Trostiansky won an Olympic silver medal (1964, featherweight). Ukrainians who have become Greco-Roman world champions are S. Rybalko (1962 and 1965), O. Kucherenko (1988, light flyweight), and A. Ihnatenko (1988, flyweight).

Ukrainian freestyle wrestlers who have won Olympic gold medals are O. Ivanytsky (1964, heavyweight); O. Medvid (1964, light heavyweight; 1968, heavyweight; 1972, super-heavyweight); B. Hurevych (1968, middleweight), also the 1967 and 1969 world champion; P. Piniġin (1976, lightweight), also the 1975 and 1977–8 world champion; A. Beloglazov (1980, flyweight); I. Mate (1980, heavyweight); and S. Beloglazov (1980 and 1988, bantamweight), also the world champion in 1982 (featherweight) and in 1983 and 1985–8 (bantamweight). V. Syniavsky won a silver medal (1960, lightweight).

Soviet athletes have belonged to the International Judo Federation since 1962. Olympic medals in judo have been won by A. Novikov (1972 bronze, light middleweight); S. Novikov (1976 gold, heavyweight), also the 1973–4 and 1976 European champion; V. Dvoynikov (1976 silver, middleweight); and O. Yatskevych (1980 bronze, middleweight). A. Bondarenko, S. Melnychenko, and V. Saunin have been Soviet and/or European judo champions.

Sambo (an acronym for the Russian *samozaščita bez oružhii* 'self-defense without weapons') is a distinctive form of Soviet self-defense wrestling based on over 20 different styles of wrestling native to the USSR. It was created

by A. Kharlampiev in the 1930s and was officially adopted in 1938 when the USSR Sambo Federation was founded. Sambo wrestlers wear special costumes and compete on a round carpet 6–9 m in diameter. A round lasts 4–6 minutes. There are 10 classes by weight (48 kg to over 100 kg). From 1955 the sport was part of the Ready for Labor and Defense of the USSR mass fitness program, and since 1966 it has been recognized by the IAWF. In 1971 sambo was included in the Spartakiad of the Peoples of the USSR. At the fifth Spartakiad the Ukrainian team won first prize. European sambo championships were introduced in 1972, and world competitions in 1973. The Ukrainians V. Saunin (1974), M. Yunak (1973), and M. Levytsky (1980) have been world champions, S. Novikov was a 1973 European champion, and V. Kobzarenko was a 1992 European champion.

R. Senkus

Writers' Union of Ukraine (*Spilka pysmennykiv Ukrainy*, or SPU). An organization of poets, prose writers, dramatists, and translators. From 1932 until 1991 it was the only litterateurs' organization legally permitted in Soviet Ukraine. It was founded on 23 April 1932 following a resolution of the CC of the All-Union Communist Party (Bolshevik), 'On the Reconstruction of Literary and Artistic Organizations.' In accordance with the resolution all previously existing literary organizations were dissolved (in Ukraine, the All-Ukrainian Association of Proletarian Writers, Pluh, Molodniak, Zakhidnia Ukraina), and a preparatory founding committee was formed to create the single Writers' Union (SP) of the USSR and its republican branches. In the new organizational structure the writers' unions of the republics were subordinated to the SP of the USSR and, thus, dependent on Moscow. Consequently the literatures of the nations of the USSR began to lose their previous national independence. The SP USSR and the SPU were formally established in 1934 at the first All-Union and the first Ukrainian congresses of Soviet writers, respectively. The statute of the SP of the USSR accepted at that meeting bound Soviet writers to active participation in building socialism and loyalty to Soviet state and Party policies. The statute specified that the only method in Soviet literature permitted was that of *socialist realism.

The highest body of the SPU has been the Republic Conference. Beginning with the fifth conference (1966), it has been called every five years. At those conferences the executive administration of the SPU is elected. Members nominate from among themselves a presidium and secretariat, chaired by the first secretary, to deal with current business. The SPU has been headed by I. Kulyk (1934), I. Mykytenko (1934–8), O. Kornichuk (1938–41, 1946–53), M. Rylsky (1943–6), M. Bazhan (1953–9), O. Honchar (1959–71), Yu. Smolych (1971–3), V. Kozachenko (1973–8), P. Zahrebelny (1978–86), and Yu. Mushketyk (since 1986).

In 1934, as a result of the terror of the early 1930s, the membership of the SPU numbered only 206 writers. In 1945 there were 250, in 1958, 500, and during the seventh conference (1976), 922. Its members have been writers who live in the territory of the Ukrainian SSR (now Ukraine), regardless of nationality. The members include a small number of Jews, Belarusians, and Moldavians, and a rather large number of Russians: by 1991 they constituted approximately 20 percent of the total membership. The SPU has had its own publications: *Literaturna Ukraina*, *Vitchyzna*, *Kyiv*, *Zhovten* (now *Dzvin*), and *Prapor* (Berezil

since 1991). Together with the Ukrainian Society for Friendship and Cultural Relations with Foreign Countries, it publishes *Vsesvit*, and with the Institute of Literature of the AN URSS (now ANU), it publishes *Slovo i chas* (*Radians'ke literaturoznavstvo* until 1991) and the Russian-language *Raduga*. Among the assets of the SPU were the publishing house Radianskyi Pysmennyk and the *Literary Fund. Until 1991 the CPU directed the SPU through the Communist faction in the SPU, and the KGB played a more direct role in controlling the SPU. From 1971 the members of the SPU at the writers' conferences were forced to elect KGB officers to so-called secretarial positions in the SPU for 'organizational matters' and thereby give the KGB control over the activities of the SPU and its affiliates. In 1971 Col I. Soldatenko was elected to a secretarial post; he was succeeded by P. Shabatyn in 1976.

The SPU was an organization with privileges based on **nomenklatura* and was directed by the Party. Until the late 1980s it adhered to official Party policy. With its help the post-Stalinist literary revival was quashed, particularly the **shestydesiatnyky*, and the policy of Russification was implemented in the Ukrainian SSR. The SPU did not defend the activists of the opposition movement, and it banned from membership those writers (eg, M. Lukash, O. Berdnyk, H. Kochur, and others) who opposed Russification and defended freedom of speech, Ukrainian language rights, and so forth.

Membership in the SPU continues to increase. At the 1986 conference there were close to 1,100 members. During that conference the policy of the Executive of the SPU changed radically owing to the newly proclaimed policies of Perestroika and Glasnost. Since then, among official organizations, the SPU has led the movement for the rebirth of Ukrainian culture and language, has initiated the foundation of native-language societies, and has actively worked to fill in the so-called blank spots in history and literature (the rehabilitation of B. Hrinchenko, M. Hrushevsky, V. Vynnychenko, M. Khvylovy, H. Mykhailychenko, and many others, and the partial reprinting of their works). In the process those writers previously denied membership in or excluded from the SPU have been granted memberships, and émigré writers have been inducted as members. Among the writers and literary scholars involved in that work have been O. Honchar, D. Pavlychko, I. Drach, Mushketyk, Yu. Shcherbak, S. Plachynda, M. Zhulynsky, and V. Drozd. The 10th conference, in 1991, re-elected Mushketyk as head and declared the Writer's Union separate and independent of the Writer's Union of the USSR. In 1992 the SPU had 1,243 members.

I. Koshelivets

Wyczólkowski, Leon, b 11 April 1852 in Huta Miastkowska, Poland, d 27 December 1936 in Warsaw. Polish painter and graphic artist. He studied art in Warsaw, Munich, and Cracow. From 1879 to 1893 he lived mostly in Ukraine. He painted many landscapes, genre scenes, and portraits of peasants in Ukraine, such as *Fishermen* (1891), *Tilling in Ukraine* (1892), and *Sower* (1896). Among his many series of lithographs are the 'Hutsul Portfolio' (1910) and 'Ukrainian Portfolio' (1910) of landscapes, portraits, buildings, and still lifes.

Bohdan Wynar

Lubomyr Wynar

Wynar, Bohdan [Vynar], b 7 September 1926 in Lviv. Economist, bibliographer, and publisher; full member of the Ukrainian Academy of Arts and Sciences in the US and the Shevchenko Scientific Society; brother of L. Wymar. A postwar refugee, he graduated from the University of Munich (PH D, 1950) and the University of Denver (1958). He taught library science before becoming director of library education (1966–7) and dean of library science (1967–9) at the State University of New York College at Geneseo. Since 1969 he has been president of Libraries Unlimited, a major publisher of library reference materials and bibliographies, and of the *Ukrainian Academic Press. Wynar wrote several monographs in Ukrainian economic history, including *Ekonomichnyi kolonializm v Ukraïni* (Economic Colonialism in Ukraine, 1958), *Ukraïns'ka promyslovis't': Studiiia sovjets'koho kolonializmu* (Ukrainian Industry: A Case Study in Soviet Colonialism, 1964), *Materiialy do istorii ekonomichnykh doslidiv na emigratsii, 1919–1964* (Materials in the History of Economic Studies in the Emigration, 1919–64, 1965), and *Rozvytok ekonomichnoi dumky u Kyïvs'kii Rusi* (The Development of Economic Thought in Kievan Rus', 1974), and articles on economics and other subjects for various journals and for the *Entsyklopediia Ukraïnoznavstva* and the *Encyclopedia of Ukraine*. He has also written, edited, and compiled numerous works in library science and bibliographies.

Wynar, Lubomyr [Vynar, Ljubomyr], b 2 January 1932 in Lviv. Historian and bibliographer; member of the Shevchenko Scientific Society and the Ukrainian Academy of Sciences in the United States; brother of B. Wynar. He earned degrees in Munich at the Ukrainian Free University (PH D, 1957) and in Cleveland (bibliographic studies) and then taught at the Case Institute of Technology (1959–62), the University of Colorado (1962–5), and Bowling Green State University (1965–9) in Ohio before becoming a professor of ethnic studies and library science at Kent State University since 1969 in Ohio. He was a co-founder of the *Ukrainian Historical Association (1965), which he served as academic secretary and has headed since 1981. He has also been the founder and director of the Bibliographical Research Center at Bowling Green State University (1965–9) and the Center for the Study of Ethnic Publications at Kent State University (since 1971). He headed the scholarly council of the World Congress of Free Ukrainians in 1984–8.

Wynar has been the editor of **Ukraïns'kyi istoryk* since

1963. He established 'Ethnic Forum' (now an independent journal) in the *Journal of Ethnic Studies* and has edited it since 1970, and is the editor of the Ukrainian-Jewish Studies Series (since 1984), *Hrushevs'kiana* (since 1980), and *Social Sciences Reference Guide* (since 1986). He has written extensively on a variety of Ukrainian historical and bibliographic topics. Among his more important works are *Ostap Hrytsai* (1960), *Andrii Voinarovs'kyi: Istorychna studiia* (Andrii Voinarovsky: A Historical Study, 1962), *History of Early Ukrainian Printing, 1491–1600* (1962), *Kniaz' Dmytro Vyshnevets'kyi* (Prince Dmytro Vyshnevetsky, 1964), *Istorychnyi atlas Ukraïny* (A Historical Atlas of Ukraine, 1980), *Mykhailo Hrushevs'kyi, 1866–1934: Bibliographical Sources* (1985), *Naivvydatnishyi istoryk Ukraïny, Mykhailo Hrushevs'kyi (1866–34)* (The Most Eminent Historian of Ukraine, Mykhailo Hrushevsky [1866–1934], 1986), and *Ukrainian Scholarship in Exile: The DP Period, 1945–52* (1989). He has also prepared a variety of guidebooks to and compilations of source materials on ethnic groups in the United States and contributed to the *Encyclopedia of Ukraine*.

M. Antonovych

Wyspiański, Stanisław, b 15 January 1869 in Cracow, d 28 November 1907 in Cracow. Polish modernist poet, dramatist, painter, and designer. From 1902 he taught at the Cracow Academy of Fine Arts. A friend of the Ukrainian writers V. Stefanyk and B. Lepky, he introduced Ukrainian themes in his plays *Legion* (Legion, 1900) and *Bolesław Śmiały* (Bolesław the Bold, 1903) and set his play *Sędziowie* (The Judges, 1907) in the Hutsul region. In 1887 he traveled in Galicia and sketched its architectural monuments and landscapes. He knew the collection of Ukrainian art at the Cracow National Museum well. His play *Wesele* (Wedding) influenced V. Pachovsky to write *Son ukrains'koï nochi* (The Dream of a Ukrainian Night), and his paintings influenced the Ukrainian artists O. Novakivsky, M. Holubets, I. Severyn, and M. Zhuk.

Wasyl Wytwycky

Wytwycky, Wasyl [Vytvyc'kyj, Vasył'], b 16 October 1905 in Kolomyia, Galicia. Musicologist, composer, and teacher; full member of the Shevchenko Scientific Society since 1960. He studied musicology at Cracow University (graduating in 1932) and theory at the Cracow Conservatory before becoming a teacher and director of the Pere-

myshl branch of the Lysenko Higher Institute of Music. He was also active in the *Union of Ukrainian Professional Musicians and its publication *Ukrains'ka muzyka* as well as editor of *Dyrygent's'kyi poradnyk* (The Conductor's Handbook) in Lviv. Following the Soviet occupation of Galicia he taught in Lviv, worked in the music section of Lviv Radio, and briefly (1939–41) held a position with the AN URSR (now ANU) Institute of Ukrainian Folklore. Emigrating at the end of the war, he lived in Germany, where he headed the Ukrainian Musicians' Alliance, and from 1949 in Detroit. Wytwycky has written extensively on various aspects of Ukrainian music for the periodical press in Ukraine, Germany, the United States, and Canada and has

served as subject editor of music for *Entsyklopediia ukrainoznavstva* and the *Encyclopedia of Ukraine*. His published works include monographs on M. Berezovsky (1974) and M. Haivoronsky (1954), as well as his own memoirs, *Muzychnymy shliakhamy* (Along Musical Paths, 1989). His compositions include *Diptych* for string orchestra; two string quartets; a piano trio; *Suite for Youth* for violin, cello, and piano; the piano *Sonatina* for four hands; music to the children's plays of N. Zabala and N. Buryk; marches to the words of H. Chuprynka, I. Bahriany, and others; and arrangements of Ukrainian folk songs for choir.

R. Savytsky

Y

Yablochyn Saint Onuphrius's Monastery (Yablochynskiyi manastyr sv. Onufriia). An Orthodox men's monastery located near Bielsk Podlaski (Bilske), in Podlachia (now in Białystok voivodeship, Poland). It was founded in the late 15th century. In the 17th century a larger church, a bell tower, and monks' cells were constructed, and in 1838–40 the complex was surrounded by a stone wall. Until 1914 courses for precentors and catechism teachers were held there, as well as a three-year agriculture program. The monastery was partly destroyed during the First World War, and in the interwar period the Polish government confiscated the school buildings and most of the monastery's land. More damage occurred during the Second World War. Today it is the only functioning Orthodox monastery in Poland. Its library houses a collection of old icons (including one of St Onuphrius from the 15th century) and manuscripts, and since 1974 senior students of the Warsaw Orthodox Theological Seminary have completed their education there. It also holds precentors' courses, and retired priests often live on the premises. In *Pravoslavna tverdnyia Pidliashshia* (The Orthodox Citadel of Podlachia, 1984) M. Syvitsky gives the history of the monastery.

Sofiia Yablonska

Yablonska, Sofiia [Jablons'ka, Sofija] (Jablonska-Oudin, Sophie), b 15 May 1907 in Hermaniv, Lviv county, Galicia, d 4 February 1971 on Île de Noirmoutier, France. Writer and architect. From 1915 to 1921 she lived with her Russophile parents in Russia. In 1927 she left Galicia for Paris. There, under the influence of her friend S. *Levynsky, she decided to travel. Accounts of her exotic travels were published in the Galician women's periodicals *Zhinocha dolia* and *Nova khata* and as the well-received books *Char Marokka* (The Charm of Morocco, 1932), *Z krainy ryzhu ta opiiu* (From the Land of Rice and Opium, 1936), and *Daleki obrii* (Distant Horizons, 2 vols, 1939). In 1950 Yablonska returned with her French husband and three sons to France and lived in Paris and on Île de Noirmoutier, where she designed and supervised the construction of

villas. Published posthumously were her prose collection *Dvi vahy – dvi miry* (Two Weights, Two Measures, 1972) and autobiographical novel *Knyha pro bat'ka: Z moho dytynstva* (Book about [My] Father: From My Childhood, 1977), and M. *Kalytovska's French translations of her works, *L'année ensorcelée: Nouvelles* (1972), *Le charme du Maroc* (1973), *Les horizons lointains* (1977), *Mon enfance en Ukraine: Souvenirs sur mon père* (1981), and *Au pays du riz et de l'opium* (1986).

Tetiana Yablonska: *Betrothed* (1966)

Yablonska, Tetiana [Jablons'ka, Tetjana], b 24 February 1917 in Smolensk, Russia. Ukrainian painter and teacher, of Belarusian descent; full member of the USSR (now Russian) Academy of Arts since 1975. She studied at the Kiev State Art Institute (1935–41) under F. Krychevsky and later taught there (1944–52, 1966–73). Her canvases, most of which are painted in the realist tradition, are often bathed in light and show a highly developed sense of color. They have more in common with impressionism than with socialist realism, even though some have depicted happy collective-farm workers (eg, her famous *Bread*, 1949) and workers (eg, *Evening on the Dnieper*, 1946). In the 1960s, as a result of her interest in Ukrainian folk art and ethnography, her paintings became more decorative, with simplified forms and flattened space (eg, *Young Mother*, 1964; *Summer*, 1967). Ukrainian elements appeared, in works such as *Betrothed* (1966) and *Swans* (1966). By 1969 Yablonska was creating canvases that synthesized her two previous styles, a synthesis that culminated in the powerful, symbolic *Youth* (1969) and *Silence* (1975). In the last decade she has created portraits and numerous landscapes, including *Winter in Old Kiev* (1975) and *Old Apple Tree* (1986), peaceful compositions painted in a subdued, pearly gray palette. A monograph about her by E. Korotkevich was

published in Moscow in 1980, and a large retrospective of her paintings was held at the Kiev Museum of Ukrainian Art in 1987.

D. Zelska-Darewych

Yablonsky, Anatol [Jablons'kyj, Anatol'], b 3 July 1912 in Kiev, d 11 July 1954 in Paris. Painter. An interwar émigré, he studied art in Lviv and, with the financial support of Metropolitan A. Sheptytsky, Paris. He was a member of the Association of Independent Ukrainian Artists in the 1930s and the Labor Association of Ukrainian Pictorial Artists in 1941–4. A specialist in church fresco and icon painting in the Byzantine style, he painted frescoes in the churches of the Studite monasteries in Lviv, Lavriv, and Uhniv, the Studite nunnery in Sukhovolia, and the Basilian nunnery in Lviv, and 18 iconostases for churches and chapels in Galicia and outside Ukraine. Yablonsky often collaborated with P. Kovzhun and M. Osinchuk. A post-war refugee in Germany, in 1950 he settled in Paris. There he illustrated editions of *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign) and I. Franko's *Lys Mykyta* (The Fox Mykyta), prepared albums of drawings of Ukrainian princes and hetmans and of Ukrainian folk costumes, painted icons for Paris's St Volodymyr's Church, and did portraits and landscapes on commission.

Yablonsky, Martyn [Jablons'kyj], b 1801 in Hlohiv in the Lviv region, d after 1875 in Lviv. Painter. He studied art in Lviv, Warsaw, Cracow, and Vienna. He settled in Lviv, where he painted mostly portraits, including ones of his father and son, *Girl with Breakfast on a Tray*, and *Woman's Portrait*. He also painted the iconostasis for the Dormition Church in Lviv and some religious compositions, and restored paintings. He set up a printing shop in Lviv in 1850 and there made lithographs.

Yabluniv kurhans. A group of kurhans of the 1st millennium BC to the 5th century BC near Yabluniv, Kaniv raion, Cherkasy oblast. Excavations in 1876 revealed that all eight kurhans, most of which were Scythian in origin, had been looted long ago, but remains of a funeral feast, local and Greek pottery, and gold, silver, and bronze adornments were recovered.

Yablunivka [Jablunivka]. A village (1972 pop 1,100) in Buchach raion, Ternopil oblast. It was known as Yazlovets until 1947 and was once an important trading town on the Lviv–Moldavia route. The earliest references to it appear in documents in the first half of the 14th century. A prosperous Armenian colony was established in the town. Its magnate owners built a castle there. In the 16th and early 17th centuries they added a Roman Catholic church and a Dominican monastery. After being occupied by the Turks (1672–83), the town never recovered its commercial importance. The 17th-century Armenian cathedral, which was converted into St Michael's Church, was destroyed during the Second World War, but the ruins of the castle (from 1646) and St Anne's Roman Catholic Church have been preserved.

Yachting (*vitrylnyi sport*). The first yacht club in Ukraine was founded in Odessa in 1875. Since then, yacht clubs have been founded in Mykolaiv, Sevastopol, Kherson, Kiev, Dnipropetrovske, and Zaporizhia. In 1913 the first all-Russian yachting competitions were held in Kiev.

Yacht racing was a part of the USSR Spartakiad Games since 1928. The All-Union Sailing Section was set up in 1936 and was renamed the Soviet Federation of Yacht Racing in 1959. It competed in the Olympic Games from 1952 and was a member of the International Yacht Racing Union from 1956. Ukrainian Olympic gold medalists include V. Mankin in the Finn (1968), Tempest (1972), and Star class (1980) and V. Dyrdyra in the Tempest class (1972).

Semen Yadlovsky

Pavlo Yakhno

Yadlovsky, Semen [Jadlows'kyj], b 1879 in the Lemko region, d late August 1929 in Mukachiv, Transcarpathia. Civic leader. After emigrating to the United States in 1890, he became active in the *Ukrainian National Association (UNA) and served as secretary (1904–21), president (1920–5), and administrator of *Svoboda*. In 1915–20 he was involved at the executive level with the UNA-backed Ukrainian-American co-ordinating committees. He died during a visit to Transcarpathia.

Yahn, Aleksandr [Jahn], b 11 March 1848 in Penza, Russia, d 10 February 1922 in Veisbakhivka (now Bilorichystia), Pryluka county, Poltava gubernia. Architect and ceramist. After graduating from the Moscow School of Painting, Sculpture, and Architecture (1863) he studied at the Rome Academy of Arts. From 1876 he lived in Ukraine. He applied the Moderne style in his designs of M. Kochubei's residence in Voronky, Chernihiv gubernia, the Kapnist family's buildings in Velyka Obukhivka, Poltava gubernia, A. Gorchakov's buildings in Tashan, Poltava gubernia, the burial chapel of the Kochubei family in Yaroslavets, Chernihiv gubernia, and A. Rakhmanova's pavilion (1878) and palace (1886) in Veisbakhivka. He organized folk-handicrafts workshops in Voronky, where he revived the making of pottery with Ukrainian folk ornamentation.

Yahniatyn settlement. A *Cherniakhiv culture settlement of the 2nd to 6th century near Yahniatyn, Ruzhyn raion, Zhytomyr oblast. Discovered in 1927 and excavated in 1946–7, the site produced evidence of 10 surface dwellings with wood frames and clay walls along with the remains of 2 two-room pottery workshops (one of which contained traces of a single-layered kiln). Artifacts uncovered at the site include local pottery, imported 4th- to 5th-century amphoras, knives, swords, clasps, and 2nd-century Roman coins.

Yahorlyk Bay [Jahorlyc'ka zatoka]. VII–12. A Black Sea bay situated along the west coast of Kherson oblast. Located between the Kinburn Spit and the Yahorlyk Kut Peninsula, it is 15 km wide at its entrance, 26 km long, and up to 5 m deep. It has a salinity of 14–15 per cent and freezes up only in unusually harsh winters. A number of islands are situated in the bay, with Dovhyi Island in the middle of its entrance. A section of the bay (including a stretch of shoreline) is within the *Black Sea Nature Reserve.

Yahotyn [Jahotyn]. III–12. A city (1989 pop 23,300) on the Supii River and a raion center in Kiev oblast. It was founded in 1552 by Cossacks and peasants fleeing Polish oppression. At the beginning of the 17th century it came under Polish rule and became part of Pereiaslav county in Kiev voivodeship. In 1648 the town became a company center in Pereiaslav regiment. A century later Empress Elizabeth granted the town to Hetman K. Rozumovsky. In 1820 it passed through marriage to Prince N. *Repnin, whom T. Shevchenko visited there several times in the 1840s. In the 19th century the town belonged to Pyriatyn county in Poltava gubernia. Today the city is an agricultural center with several food-processing enterprises, including the Tsukor Research and Refining Consortium, and a building-materials industry. It has a historical museum and an art gallery.

Yahupolsky, Lev [Jahupol's'kyj], b 6 February 1922 in Uman, Kiev gubernia. Organic and fluorine chemist. A graduate of Kiev University (1947), since 1951 he has worked at the AN URSS (now ANU) Institute of Organic Chemistry, where he became a department head in 1965 and a professor in 1967. He has made significant contributions to fluorine chemistry, mainly the study of fluorocyanines and aromatic compounds with diverse fluorinated substituents.

Yaila [Jajla]. The main range of the Crimean Mountains. Its name is sometimes applied to the mountains as a whole. (See *Crimean Mountains.)

Yakemchuk, Roman [Jakemčuk] (aka Yakemtchouk, Romain), b 23 September 1925 in Lviv. Legal scholar; member of the Royal Academy of Sciences Overseas. After emigrating from Ukraine during the war, he completed his studies in Belgium and lectured in political science and international law at the Catholic University in Leuven. A noted specialist in African political and economic development, he has written several monographs on Africa and has been a visiting professor at the University of Zaïre. His works on Ukrainian topics include *L'Ukraine en droit international* (1954), *The Foreign Policy of Soviet Russia* (1956), *L'Ukraine sur le plan diplomatique* (1957), *La ligne Curzon et la IIe Guerre Mondiale* (1957), and *Ukraina iak pidmet mizhnarodnoho prava* (Ukraine as the Subject of International Law, 1962).

Yakhnenko [Jaxnenko]. A family of wealthy industrialists and sugar refiners descended from well-to-do serfs of Count Samoilov in Smila, in the Cherkasy region. Having purchased their own freedom, they gained a fortune through the wholesale trading of industrial products, livestock, and grain. In the 1820s and 1830s, two Yakhnenko brothers (one of them Kindrat Yakhnenko [b 1790, d 1868]) leased mills in Smila and Uman together with F.

*Symyrenko. In the early 1840s they founded the company Braty Yakhnenky i Symyrenko, and in 1843 they built the first steam-powered sugar refinery plant in Ukraine, in Tashlyk. The company expanded its operations to include heavy-machinery production and contributed to the increase in shipping on the Dnieper River. In 1861 the company's assets stood at 4 million rubles. It owned a refining plant (in Horodyshe, Kiev gubernia), sugar refineries (in Ruska Poliana and Tashlyk), ships, mills, and major buildings (in Kiev, Kharkiv, Odessa, and Rostov). As a result of a crisis in the *sugar industry and the lack of credit common in the postreformation period, the company became moribund in the mid-1860s.

Yakhno, Bohdan [Jaxno], b 1899 in Galicia, d 21 September 1984 in Buenos Aires. Co-operative leader and civic activist. During the First World War he fought in the ranks of the Ukrainian Sich Riflemen. After the war he organized consumer co-operatives in Zalishchyky county and worked at the Pokutia Credit Union in Kolomyia. After emigrating to Argentina following the Second World War, he helped organize the Vidrozhennia Ukrainian Co-operative there and served as its director for many years. He was a member of the OUN Leadership (Melnyk faction), the governing bodies of the *Vidrozhennia society, and Ukrainian veterans' organizations.

Yakhno, Pavlo [Jaxno], b 1895, d ? Civic leader in the Far East. In 1918, after participating in the revolutionary events in Ukraine, he went to the *Far East and became an official of the Far Eastern Ukrainian Secretariat in *Vladivostok (1918–21). He was tried and imprisoned by the Soviets in Chita (1923–4), and then settled in Manchuria. He was director of the Ukrainian People's Home in *Harbin, manager of *Man'dzhurs'kyi vistnyk* (1932–7), and a leading member of the Ukrainian National Colony.

Yakhymovych, Fedir (Teodor) [Jaxymovyč], b 11 March 1800 in Belzets, near Zolochiv, Galicia, d 14 April 1889 in Vienna. Scenery designer and painter. A graduate of the Vienna Academy of Arts (1827), he worked in Vienna's theaters and as chief designer at the Royal Vienna Opera (1851–71). He painted portraits, landscapes, religious, historical, and genre paintings, miniatures on ivory, and icons for iconostases in the Greek Catholic churches in Vienna and Cracow and in a Greek monastery in Lebanon. In the last years of his life he worked as an artist at the Royal Gallery in Vienna and painted the interior of the university church (eg, the painting *Banishment from Eden*). His best-known canvases are *The Heroism of David* (1841), *Mary Magdalene* (1842), *Interior of the Piarist Church in Vienna*, *The Baptism of Christ* (1849, until 1944 in the Greek Catholic Episcopal Residence in Peremyshl), and *Interior of St Stephen's Church in Vienna* (1860).

Yakhymovych, Hryhorii [Jaxymovyč, Hryhorij], b 16 February 1792 in Pidbirtsi, Lviv circle, Galicia, d 17 April 1863. Ukrainian Catholic metropolitan, professor, and civic activist. After completing a doctorate of divinity in Vienna (1818) he taught religion and pedagogy at Lviv University and was rector of the Greek Catholic Theological Seminary and a canon of the metropolitan chapter. In 1841 he was consecrated bishop of Lviv and suffragan to Metropolitan M. Levytsky. In 1849–59 Yakhymovych was the bishop of Peremyshl, and in 1860–3 metropolitan of

Metropolitan Hryhorii
Yakhymovych

Dmytro Yakimishchak

Halych. In 1848–51 Yakhymovych assumed the leadership of the *Supreme Ruthenian Council and became the main spokesperson for Ukrainian interests in Galicia during the crisis period of the 1848 revolutions. He was loyal to the Habsburg monarchy and concerned about the social position of the Ukrainian Catholic clergy. Yakhymovych won some short-lived concessions from the monarchy, but failed to realize a major Ukrainian goal – the partition of Galicia and the creation of a separate Ukrainian crownland. At the same time he was instrumental in keeping revolutionary fervor from spreading into eastern Galicia, and thus helped Ukrainians gain a loyalist reputation within the empire as the ‘Tyroleans of the East.’

Yakimishchak, Dmytro [Jakymišćak] (Yakimischak), b 7 October 1888 in Zarichia, Nadvirna county, Galicia, d 18 July 1958 in Winnipeg. Lawyer and political and civic activist. He emigrated to Canada with his parents in 1898, became one of the first Canadian public school teachers of Ukrainian origin, and took part in the first Ukrainian-Canadian teachers’ convention (1907). He graduated in law from the University of Manitoba and was one of the few Ukrainians with a law practice at the time. A member of the Ukrainian Canadian Citizens’ League and a founder of the Ukrainian economic association Lantsiuh, he was elected in 1920 and 1922 to the Manitoba legislative assembly as an independent farmer candidate from Emerson district.

Yakir, Yona [Jakir, Jona], b 15 August 1896 in Kishinev, Bessarabia, d 11 June 1937 in Leningrad. Soviet military and political figure. He commanded Red Guard units in Moldavia and southern Ukraine and then led several Red Army units against the Whites and the Army of the UNR. During the Ukrainian-Soviet War of 1920 he served on the southwestern front, and from December 1920 he commanded the 14th Army. After the war he commanded several military districts, including the Kiev Military District (from 1935). He was elected to the CC CP(B)U several times and became a candidate (1927) and full member (1930) of its Politburo. In 1937, after being appointed commander of the Leningrad Military District, he was arrested in the purge of the Red Army and executed.

Yakovchenko, Mykola [Jakovčenko], b 3 May 1900 in Pryluka, Poltava gubernia, d 11 September 1974 in Kiev. Stage and film actor. He began his career in an amateur circle in Pryluka (1918) and in various Ukrainian touring troupes (1920–7) and then joined the Kiev Ukrainian Drama Theater. He acted in the films *Ukradene shchastia* (Stolen Happiness, 1952), *Martyn Borulia* (1953), and *Zakhar Berkut* (1972).

Hryhorii Yakovenko

Archbishop Borys Yakovke-
vych

Yakovenko, Hryhorii [Jakovenko, Hryhorij], b 2 December 1895 in Katerynivka, Katerynoslav gubernia, d 27 April 1940 in Donetsk. Writer. He was a member of the literary organization *Pluh. He is the author of the novels *Praporshchyyk Holobuzenko* (Warrant Officer Holobuzenko, 1925), *Verbivchany* (1928), *Try elementy* (Three Elements, 1930), and *Borot’ba tryvaie* (The Struggle Continues, 1931). Yakovenko made his mark in literary history with an article attacking M. Khvylovy, which began the *Literary Discussion of 1925–8.

Yakovenko, Valentyn [Jakovenko], b 11 November 1859 in Poltava gubernia, d 20 March 1915. Journalist and publisher, and popularizer of T. Shevchenko’s works. While working as a statistician in Russia in the 1880s, he contributed articles on economic and social problems to progressive Russian journals. He wrote a popular biography of Shevchenko (1894) and published in 1910 the third edition of **Kobzar*, edited by V. Domanytsky, and in 1911 the most complete edition (2 vols) of Shevchenko’s works to that date.

Yakovenko, Volodymyr [Jakovenko], b 1857, d 1923. Psychiatrist. He worked in zemstvo hospitals in Ukraine and Russia and directed the psychiatric hospital he built in Meshcherske, Podilia gubernia (1894–1907). He was dismissed from that position for political reasons. He wrote works on psychiatry and psychiatric care and initiated the first survey of the mentally ill in the Russian Empire.

Yakovkevych, Borys [Jakovkevych], b 8 December 1901 in Mala Klitynka, Starokostiantyniv county, Volhynia gubernia, d 24 March 1984 in Edmonton. Ukrainian Orthodox hierarch. A graduate of the Kremianets Theological Seminary (1923), he served in the Polish army (1924–5),

was ordained (1930), completed a master's degree in theology in Warsaw (1934), and then undertook pastoral work in the Kholm region and Volhynia. During the Second World War he was active in the Ukrainian Social Welfare Committee and helped to save several hundred soldiers imprisoned by the Germans in Volodymyr-Volynskiy. This work, as well as his ties with the Ukrainian Insurgent Army, sent Yakovkevych and his father to a Gestapo prison, from which they managed to escape during the confusion of the German retreat. Yakovkevych settled in Canada in 1948. He was consecrated as bishop of Saskatoon eparchy in 1963 and as archbishop of Edmonton and Western Canada in 1975.

Yakovkin, Avenir [Jakovkin], b 21 May 1887 in Blagoveshchenskii zavod (now Blagoveshchensk), Ufa gubernia, Russia, d 18 November 1974 in Kiev. Astronomer; AN URSR (now ANU) corresponding member from 1951. A graduate of Kazan University (1910), he worked at the Kazan Astronomical Observatory (1910–37) and was a professor at Sverdlovsk (1937–45) and Kiev (1945–51) universities. From 1951 to 1967 he worked at the ANU Main Astronomical Observatory near Kiev, which he served as director in 1952–9. His main contributions were in the study of the motions of celestial bodies, particularly the moon. He discovered the asymmetry of the lunar disc, developed novel methods of measuring the moon's libration, worked out mathematical models of perturbations in the moon's motions, and designed special apparatus for the study of the moon.

Andrii Yakovliv

Feliks Yakubovsky

Yakovliv, Andrii [Jakovliv, Andriij], b 11 December 1872 in Chyhyryn, Kiev gubernia, d 14 May 1955 in New York. Legal scholar and civic and political leader; full member of the Ukrainian Scientific Society in Kiev and the Shevchenko Scientific Society (NTSh, from 1926) and director of the law section of the Ukrainian Academy of Arts and Sciences in the US. After graduating from the law faculties of Yurev (1903) and Kiev (1904) universities, he worked in Kiev as a civil servant and in the treasury department. From 1908 he maintained a legal practice and conducted research in the Kiev archives. During the Ukrainian struggle for independence he was a member of the Central Rada (1917–18, delegate of the cultural organization of Kiev) and the Little Rada (director of its bureau

and consul extraordinary to Austria-Hungary (1918); under the Hetman government he was director of international relations in the external affairs ministry; and under the Directory he was head of the extraordinary diplomatic mission of the UNR in Holland and Belgium (January 1919).

Yakovliv lived as an émigré in Prague from 1923. He served as a professor at the Ukrainian Free University (rector in 1930–1 and 1944–5), a professor of law at the Ukrainian Husbandry Academy in Poděbrady, head of the society of the Museum of Ukraine's Struggle for Independence, and head of the Ukrainian Academic Committee in Prague. In 1939 he became director of the Ukrainian Scientific Institute in Warsaw. After the Second World War he lived in Belgium, and in 1952 he moved to the United States.

Yakovliv ranks as one of the leading researchers in the field of the history of Ukrainian law. Among his works (written in Ukrainian, Russian, French, German, and English) are *Dohovir het'mana B. Khmel'nyts'koho z Moskvoiu r. 1654* (Hetman B. Khmelnytsky's 1654 Treaty with Moscow, 1927), *Pro kopni sudy na Ukraïni* (About Community Courts in Ukraine, 1931), *Ukraïns'ko-moskovs'ki dohovory 17–18 vv.* (Ukrainian-Muscovite Treaties of the 17th–18th Centuries, 1934), *Osnovy Konstytutsii UNR* (The Foundations of the UNR Constitution, 1935), *Das deutsche Recht in der Ukraine* (1942), and *Dohovir Het'mana B. Khmel'nyts'koho z moskovs'kym tsarem Oleksiïem Mykhailovychem 1654: Istorychno-pravnycha studiiia* (The 1654 Treaty of Hetman B. Khmelnytsky with the Muscovite Tsar Aleksei Mikhailovich: A Historical-Juridical Study, 1954), as well as articles in *Zapysky NTSh* on Muscovite treaties with Hetman I. Vyhovskiy (1933), on the authorship of the historical-political tract *Istoriia Rusov* (1937), and on the history of the Ukrainian Code of Laws of 1743 (1949). In his series of studies on 17th-century Ukrainian-Muscovite relations, Yakovliv defended the theory that the Pereiaslav Treaty of 1654 created the conditions for a vassalage relationship akin to that of a protectorate between Ukraine and Russia. Yakovliv was also a philatelist; under the pseudonym Andrii Chyhyrynets he published *Poshtovi marky Ukraïny 1918–1943* (Postage Stamps of Ukraine in 1918–43, 1948).

A. Zhukovsky

Yakubovsky, Feliks [Jakubovs'kyj], b 25 September 1902 in Kiev, d 25 September 1937. Literary scholar and critic. He graduated from the Kiev Institute of People's Education (1926) and worked at the Kiev branch of the Taras Shevchenko Scientific Research Institute. He was a member of the literary organization Zhovten and, later, of the All-Ukrainian Association of Proletarian Writers. He wrote many articles and introductory essays to literary publications. He published the monographs *Syluiety suchasnykh ukraïns'kykh pys'mennykiv* (Silhouettes of Contemporary Ukrainian Writers, 1928), *Vid noveli do romanu* (From Short Story to the Novel, 1929), *Stepan Vasylychenko* (1930), and *Za spravzhni oblychchia* (For Real Faces, 1931). He was arrested by the NKVD in 1937 and shot.

Yakubovsky, Volodymyr [Jakubovs'kyj] (nom de guerre: Bondarenko), b 1915 in Zaliztsi, Zboriv county, Galicia, d 17 June 1947 in Kozova raion, Ternopil oblast. Senior UPA commander. In 1942–3 he organized military training for OUN members, and in December 1943 he be-

Maj Volodymyr Yakubovsky

came chief of staff of the Third Military District (Ternopil oblast) of the UPA-West. In 1944 he also directed a non-commissioned officer school in his district and led a UPA battalion on a combat raid. Then he commanded the Lysonia Group in the Third Military District (1945–7) and was promoted to major. He was killed in combat with MVD troops.

Yakubsky, Borys [Jakubs'kyj], b 27 September 1889 in Illintsi, Lypovets county, Kiev gubernia, d ? Literary scholar and critic. He joined the Bolshevik party in 1905 but left it in 1919. A graduate of Kiev University (1908–14), he was a full member of the VUAN Historical and Literary Society (from 1918), the Ukrainian Scientific Society in Kiev (from 1919), and the scientific research chairs of linguistics, art studies, and Marxism-Leninism in Kiev, and an associate of the VUAN Commission for the Publication of Monuments of Modern Ukrainian Literature and of the Kiev branch of the Taras Shevchenko Scientific Research Institute. Yakubsky was one of the first scholars to apply the sociological method in studying Ukrainian literature. An associate of the *Neoclassicists, he published books on the science of versification (1922), the sociological method in literature (1923), and S. Vasylchenko (1928). His articles on the form of T. Shevchenko's poems (1921), Shevchenko's style (1924) and rhythm (1926), and the sociology of Shevchenko's epithets (1928) appeared in Shevchenko studies compendiums. Yakubsky also published articles in literary theory, on D. Zahul (1928), M. Vorony (1928), Lesia Ukrainka (1928), and Soviet Ukrainian literature, in periodicals such as *Hlobus*, *Literaturna hazeta*, *Zhyttia i revoliutsiia*, *Chervonyi shliakh*, and *Krytyka*. He also edited, with introductions, the collected works of Lesia Ukrainka (7 vols, 1923–5), an anthology of 20th-century Galician and Bukovynian poetry (1930), a subsequently banned AN URSR (now ANU) edition of Shevchenko's complete works (2 vols, 1939), and other works. Though reviled as a formalist, Yakubsky survived the Stalinist terror of the 1930s and was still alive in Kiev in 1943. His subsequent fate is unknown. Despite his contributions he has barely been mentioned in Soviet publications since the 1930s.

R. Senkus

Yakutiia. An autonomous republic in northeastern Siberia and the largest member of the Russian Federation. Until 1991 it was known as the Yakut ASSR (est 1922). Its territory covers 3,103,200 sq km, and its population in 1989 was 1,081,000. The capital is Yakutsk.

In 1989 Ukrainians accounted for 7 percent of Yakutiia's population. They are predominantly highly skilled specialists who work there on a temporary basis. There are also exiles or descendants of exiles deported there by the Soviet or the tsarist regime as far back as the 17th century (see *Siberia). In 1990 the Ukrainian community in Yakutiia set up the Shevchenko Social and Cultural Association in Yakutsk. Its president is V. Taniuk, Yakutiia's deputy minister of culture.

Heorhii Yakutovych: *The Arkan* (linocut, 1960)

Yakutovych, Heorhii (Yurii) [Jakutovyč, Heorhij], b 14 February 1930 in Kiev. Graphic artist; corresponding member of the USSR (now Russian) Academy of Arts since 1983. He studied at the Kiev State Art Institute (1948–54) under V. Kasiian and I. Pleshchynsky and taught there in 1954–7 and 1961–2. A master of different graphic techniques from woodcut to metal engraving, he blends realism with formal experimentation to create a thoroughly modernist impression. The influence of Hutsul folk art is evident in his use of geometric forms. Yakutovych has illustrated editions of M. Kotsiubynsky's novels *Fata morgana* (1957) and *Tini zabutykh predkiv* (Shadows of Forgotten Ancestors, 1966), I. Kocherha's plays *Iaroslav Mudryi* (Yaroslav the Wise) and *Svichyhne vesillia* (Svichka's Wedding, 1962), I. Franko's novel *Zakhar Berkut* (1972), the epic *Povist' pro Ihoriv pokhid* (The Tale of Ihor's Campaign, 1977), V. Stefanyk's story collection *Klenovi lystky* (The Maple Leaves, 1978), the epic *Slovo mynulykh lit* (The Tale of Bygone Years, 1981), and N. Gogol's *Vii* (1985). Many of his prints have been widely reproduced. They include the series 'Ancient Ukrainian Music' (1957), 'Ivan Vyshensky' (1959), 'Oleh Horyslavych' (1959), and 'Arkan' (1960) and two series of postcards on folk-song themes (1960, 1963). Yakutovych served as artistic consultant for the films *Tini zabutykh predkiv* (Shadows of Forgotten Ancestors, 1965; director, S. Paradzhanov) and *Zakhar Berkut* (1971). Books about Yakutovych have been written by Yu. Belichko (1968) in Ukrainian and I. Verba (1970) and L. Popova (1988) in Russian.

W. Wytwycky

Yakutovych, Serhii [Jakutovyč, Serhij], b 21 November 1952 in Kiev. Graphic artist; son of H. Yakutovych. He

studied at the Moscow Printing Institute (1973–7) and graduated from the Kiev State Art Institute (1980). Although he works in a figurative manner, there are elements of surrealism in his etchings and lithographs (eg, *Time*, 1979). The series 'Chords of War' (1980) and 'Foreboding' (1982) reveal his concern with moral issues and judgments and make a statement against the horrors of war and the destruction of humankind.

Fedir Yakymenko

Mykhailo Yalovy

Yakymenko, Fedir [Jakymenko] (also Akymenko), b 20 September 1876 in Pisky, outside Kharkiv, d 8 January 1945 in Paris. Composer, pianist, and teacher; brother of Ya. *Stepovy. At 10 years of age he was sent to St Petersburg, where he sang in the court kapelle; he studied piano with M. Balakirev (1886–95) and graduated (1900) from the St Petersburg Conservatory in the composition class of N. Rimsky-Korsakov and A. Liadov. He then worked as a music teacher in Tbilisi (1901–3), Paris (1903–6), and Kharkiv before returning to St Petersburg to lecture (1914–23) at the conservatory. He emigrated to Prague in 1923 and headed the music section of the Ukrainian Higher Pedagogical Institute. Z. Lysko and M. Kolessa were among his students. He performed as a concert pianist, conducted choirs in tours through Western Europe, and prepared *Praktychnyi kurs harmonii* (A Practical Course in Harmony, 1926). From 1928 he lived in France (Nice, Paris). As a composer Yakymenko belonged to a 20th-century neoromantic school which was influenced by impressionist techniques. His major compositions were instrumental; they include two symphonies, symphonic poems, an orchestral suite, an overture, a trio for strings, a sonata for cello, sonatas for violin, and numerous works for piano (sonatas, sonatas-fantasias, *Ukrainian Suite*, preludes, and études). He also composed works for solo voice (notably to the words of O. Oles), church music, and choir arrangements of Ukrainian folk songs. Many of Yakymenko's works have appeared in German, French, Russian, and Ukrainian publications. His biography, by P. Matsenko, appeared in Winnipeg in 1954.

Yakymenko, Yakiv. See Stepovy, Yakiv.

Yakymivka [Jakymivka]. VII-16. A town smt (1986 pop 12,800) on the Malyi Utliuk River and a raion center in Zaporizhia oblast. In 1833 a colony of state peasants from Tambov and Kursk gubernias was settled there. In the

1870s the town was linked by rail to the ports of the Black Sea, and began to export grain. Today it is the administrative center of an agricultural region with several food-processing plants and a cast-iron foundry.

Yakymovych, Bohdan [Jakymovyč], b 29 January 1952 in Serafyntsi, Horodenka raion, Ivano-Frankivske oblast. Historian and civic figure. A graduate of the Kiev Polytechnical Institute (1974), he has been a scholarly associate of the AN URSR (now ANU) Institute of Social Sciences in Lviv since 1986. He has compiled books on I. Franko in postcards (1987) and the paintings of I. Marchuk (1990), edited and annotated an uncensored edition of I. Krypiakievych's history of Ukraine (1990), edited the UNESCO collection of materials on Franko and world culture (3 vols, 1990), and written articles on Ukrainian history and culture (eg, Ukraine's national symbols, the Ukrainian Sich Riflemen, the Cossacks and their role, the preservation of cultural monuments). Since 1992 he has been head of the Lviv branch of the *Ukraina Society.

Yakymovych, Tetiana [Jakymovyč, Tetjana], b 20 September 1905 in Kiev. Literary scholar. She graduated from the Kiev Institute of People's Education (1926) and worked at the Kiev Pedagogical Institute. In 1931 she began teaching at Kiev University, and from 1949 to 1976 she headed the department of foreign literature there. A former member of the editorial board of *Vsesvit*, she has written books on the French satirical press in the years 1830–5 (1961), the French realist sketch in the years 1830–48 (1963), contemporary French dramaturgy and theater (1968, 1973); the young E. Zola (1971); a book of essays about 19th- and 20th-century French writers (1981); and numerous articles.

Yalovy, Mykhailo [Jalovyj, Myxajlo] (pseud: Yuliiian Shpol), b 5 June 1895 in Dar-Nadezhda, Kostiantynohrad county, Poltava gubernia, d 9 October 1937 in Lodeinoe Pole, northern Russia. Poet, prose writer, and dramatist. He began to publish his work in 1920 in the journals *Shliakhy mystetstva*, *Chervonyi shliakh*, and *Vsesvit*. Yalovy was one of the founders and the first president of *Vaplite. He wrote the poetry collection *Verkhy* (The Peaks, 1923), the comedy *Katyna liubov, abo Budivel'na propahanda* (Katia's Love, or Building Propaganda, 1929), and the novel *Zoloti lyseniata* (Golden Fox Cubs, 1928). In May 1933 Yalovy was arrested, sentenced to 10 years of imprisonment, and dispatched to the labor camps of Siberia. He was resented by a special tribunal in 1937 and shot. The arrest of Yalovy marked the beginning of the P. Postyshev pogrom against the Ukrainian intelligentsia.

Yalpuh Lake [Jalpux] (also Yalpuh). VIII-9. A lake in Odessa oblast situated along the Danube River Delta. The lake is 39 km long and up to 5 km wide, with a prevailing depth of 2 m and a surface area of 149 sq km. Its steep eastern and western sides are dissected by gullies, and the southern end facing the Danube is sandy and low-lying. The lake is fed directly by the Yalpuh River and indirectly (through seepage) by the Danube. Over 40 types of fish and several varieties of waterfowl can be found there. Yalpuh Lake is used for water supply and irrigation. The town of Bolhrad is situated at its northern end.

Yalta [Jalta]. IX-15. A city (1989 pop 89,000) on the southern shore of the Crimean Peninsula. The earliest recorded

Yalta

reference to settlement on the site is a reference to a Greek colony named Yalita (Halita) in the 1st century BC. Control of the area later passed to Byzantium. By the 12th century Yalta (called Dzhalita) had become an established port and fishing village. Genoese traders had control of the town (known as Etalita) in the 13th to 15th centuries, until they were succeeded by the Turks in 1475. Yalta fell under Russian control in 1783 with the annexation of the Crimea. At that time the region around it began to be colonized by estate owners. In 1823 the governor-general of the region, Prince M. Vorontsov, decided to cultivate Yalta as the major settlement on the Crimean south shore. It was not until 1838, however, that it was established officially as a town. Yalta began to expand considerably in the later 19th century because of its growing popularity as a resort and sanatorium center. By 1885 its population was approx 5,000, and by 1895, nearly 10,000. The city came under Soviet control in 1920 and was the site of the *Yalta Conference in 1945.

Yalta is nestled in a scenic location between the Black Sea and the Crimean Mountains. It is particularly noted for its Mediterranean climate, and the city and its surrounding environs have (1975) 65 sanatoriums, 18 health resorts, and 8 boarding hotels with a summer capacity of approx 39,000 beds. Yalta is also a wine-making center; other major economic activities include fish and food processing, tobacco fermentation, and the production of beer and nonalcoholic beverages. A number of notable architectural monuments are situated in and around the city, including the Tavrida Hotel, the Vorontsov Palace, and the ruins of the medieval Isar fortifications and a Byzantine cave church. Also located in the city are a statue of Lesia Ukrainka and the grave of S. Rudansky.

Yalta Conference. The conference of the 'Big Three' Allied leaders held in Yalta, in the Crimea, on 4–11 February 1945. There F.D. Roosevelt, W. Churchill, J. Stalin, and their foreign ministers, military chiefs of staff, and other advisers planned the final defeat of Nazi Germany and determined the political order of postwar Europe. Among the most important decisions reached were those concerning the dismemberment of Germany and Austria into military-occupation zones of the United States, Great Britain, France, and the USSR; the reparations to be imposed on Germany; the prosecution of Nazi war criminals; the *repatriation of American prisoners of war and displaced Soviet citizens (*Ostarbeiter*, prisoners of war, and collaborators with the Germans); Soviet entry into the war against Japan within three months after Germany's defeat

(a top secret protocol); the redrawing of Poland's borders (ie, Poland's withdrawal east of the *Curzon Line, with digressions in some areas of 5–8 km in Poland's favor, in exchange for the incorporation of Germany's eastern borderlands within Poland); the establishment of the Moscow-sponsored Polish Provisional Government of National Unity; the convocation of the *United Nations Conference on International Organization in San Francisco on 25 April 1945; the admission of Soviet Ukraine and Belarus in addition to the USSR as members of the proposed UN General Assembly; and the principle of unanimity and veto in the UN Security Council.

The conference's 'Declaration on Liberated Europe' allowed the USSR to interpret broadly its 'aid' to the countries it 'liberated'; the result was the Sovietization of Eastern Europe and the Cold War. Stalin and his advisers maximally exploited the Soviet military victories against Germany, the Soviet military occupation of most of Eastern Europe, and the need for Soviet participation in the war against Japan to gain an upper hand in the conference's decisions. Roosevelt yielded to most of the Soviet demands. Soviet historians have viewed the conference as the greatest success of Soviet foreign policy. It formally recognized the Soviet annexation of eastern Galicia and Volhynia and western Belarus (ie, half of prewar Poland's territory), sealed Eastern Europe's fate within the Soviet sphere of influence, and strengthened the position of the USSR in world politics.

Yalta Mountain and Forest Nature Reserve (Yaltynskiy hirsko-lisovyi zapovidnyk). Established in 1973 to preserve the forests of the main range of the *Crimean Mountains, the reserve extends for 40 km along the southern shore of the Crimea from Aiu-Dag to Cape Foros and covers an area of 14,600 ha on the mountains' southern slopes. It encompasses some unique landforms: gentle, clay-schist slopes alternate with steep cliffs and exposed magmatic layers. Its rich flora (1,360 species) consists mostly of oak, pine, and beech forests (11,000 ha) and includes some rare plants, such as the English yew and the wild pistachio. Approx 115 plant species are endemic. The most common animals are the red deer, roebuck, boar, badger, and marten. The most scenic sites in the reserve are the Uchansu and Yauzlar waterfalls and the Tarak-Tash and Stavri-Kaia cliffs.

Yalynsky, Semen [Jalyns'kyj], b ? , d after 1695. Printer and engraver. He served as Archbishop L. Baranovsky's secretary and became technical director of the Novhorod-Siverskyi Press (1674–9) and Chernihiv Press (1679 to ca 1684). Besides liturgical books, polemical literature, and moralistic works by L. Baranovych and other writers, he printed school grammars and primers. He signed his illustrations, headpieces, and tailpieces with the initials 'SM.' His *Punkty* (Agreement) with his employer, L. Bara-

novych, is an important document for the history of printing in Ukraine.

Yama. See Siverske.

Yamnychenko, Ivan [Jamnyčenko], b 31 August 1909 in Reshetylivka, Poltava county, Poltava gubernia. Geologist. After graduating from the Kiev Institute of Mining Geology (1935) he worked at the AN URSR (now ANU) Institute of Geological Sciences. His works deal with the stratigraphy and fauna of Mesozoic strata in Ukraine. They include *Struktura i sutnist' biostratyhrafichnoho metodu* (The Structure and Essence of the Biostratigraphic Method, 1976).

Yampil [Jampil']. V-9. A town smt (1986 pop 11,400) at the junction of the Rusava and the Dniester rivers and a raion center in Vinnytsia oblast. It was first mentioned in historical documents in the 16th century, as a trading center of Bratslav voivodeship. At the beginning of the 17th century it was acquired by J. *Zamoyski, who built a castle there. During B. Khmelnytsky's rule it became a company town of Mohyliv and then Bratslav regiment. After being destroyed by S. Lanckoroński's troops in 1651, the town declined to a village. During the 18th century it belonged to the Potocki family. It was annexed by Russia in 1793, and became a county town in Podilia gubernia. Today it is an agricultural center of which the main industry is food processing.

Yampil. [Jampil']. II-14. A town smt (1986 pop 5,700) on the Ivotka River and a raion center in Sumy oblast. It originated at the beginning of the 17th century and was called Klyn until 1674. From the mid-1680s to 1709 and from 1722 to 1781 it was a company town of Nizhen regiment. An agricultural center, it has a dairy and a flax-processing factory.

Stefan Yampolsky

Oleksander Yanata

Yampolsky, Stefan [Jampol's'kyj], b 21 December 1906 in Izium, Kharkiv gubernia. Economist; full member of the AN URSR (now ANU) since 1967. After graduating from the Kharkiv Industrial-Engineering Institute (1932) he worked at several large enterprises and served as rector of the institute (1938–41). After the war he was rector of the Lviv Polytechnical Institute (1944–53) and Odessa Polytechnical Institute (1957–65) and director of the ANU Insti-

tute of Economics (1965–70). He chaired the ANU Council for the Study of the Productive Resources of Ukraine (1970–2) and then the Department of Machine-Building of the Institute of Economics. He was chief editor of the journal **Ekonomika Radians'koï Ukraïny* (1965–74) and of *Entsyklopediia narodnoho hospodarstva Ukraïns'koï RSR* (Encyclopedia of the National Economy of the Ukrainian SSR, 4 vols, 1969–72). Yampolsky is the author of numerous scholarly works, including *Voprosy skorostnogo proektirovaniia i osvoeniia novykh konstruktssii v mashinostroenii* (Questions of Rapid Designing and the Assimilation of New Constructions in Machine Building, 1944), *Skorostnoe osvoenie novykh proizvodstv* (The Rapid Assimilation of New Manufactures, 1949), *Ekonomika osvoeniia novykh konstruktssii mashin* (The Economics of the Assimilation of New Machine Constructions, 1964), *Ekonomicheskie problemy upravleniia nauchno-tekhnicheskim progressom*, (Economic Problems of Managing Scientific and Technological Progress, 1976), and *Ekonomicheskoe upravlenie sozdaniem sistem mashin* (Economic Management through the Creation of Machine Systems, 1981).

B. Wynar

Yanata, Oleksander [Janata], b 9 June 1888 in Mykolaïv, d 1938 in the Kolyma region. Botanist and agronomist of Czech origin; full member of the Shevchenko Scientific Society from 1923 and corresponding member of the VUAN. A graduate of the Kiev Polytechnical Institute, he taught at Kiev University (from 1928) and was secretary of the Ukrainian Scientific Society and a cofounder of **Ukraïns'kyi botanichnyi zhurnal*. Before its liquidation in 1928 he was scientific secretary of the Agricultural Scientific Committee of Ukraine, chairman of its botany section, and editor of **Visnyk sil's'ko-hospodars'koï nauky*. In Kharkiv he organized and directed departments of Applied Botany and Plant Cultivation at the Kharkiv Agricultural Institute. He was arrested in 1933, and died in a labor camp. Yanata's scholarly work dealt with the botany of southern Ukraine and the Crimea, botanical regionalization, and Ukrainian botanical terminology. Much of it has remained unpublished, and his authorship of the first volume of **Flora URSR* (published after his arrest) was uncredited.

Yanchevsky, Mykola [Jančevs'kyj], b 1888, d ? Army officer. During the First World War he served in the Russian army, and in 1917 he helped Ukrainianize units of the 12th Cavalry Division, which joined the Odessa Haidamaka Battalion organized by I. *Lutsenko in late 1917. In 1918–19 he served in other UNR Army units. He was promoted to brigadier general in 1920 and worked in the UNR defense ministry. After emerging from the internment camp in Kalisz, Poland, he was active in the Orthodox church brotherhood and edited the journal *Tabor* in Warsaw.

Yanchuk, Mykola [Jančuk], b 29 November 1859 in Kornytsia, in the Podlachia region of Lublin gubernia, Congress Kingdom of Poland, d 6 December 1921 in Moscow. Folklorist, ethnographer, and playwright. After graduating from Moscow University (1885) he served as editor of *Etnograficheskoe obozrenie* (1889–1916) and custodian of the ethnographic departments at the Dashkov and Rumiantsev museums. In 1921 he became a professor of Belarusian literature and ethnography at Minsk University. He wrote in Russian, Belarusian, and Ukrainian. He is the au-

thor of *Malorusskaia svad'ba v Kornyt'skom prikhode, Konstantinovskogo uezda Sedlet'skoi gubernii* (The Little Russian Wedding in Kornyt'sia Parish, Kostiantyniv County, Siedlce Gubernia, 1886). In 1901 he set up the Musical Ethnography Commission at the ethnographic section of the Society of Lovers of Natural Science, Anthropology, and Ethnography, which popularized Ukrainian musical folklore. The members of its expedition to Poltava gubernia recorded, in May 1912, over 300 Ukrainian songs. Yanchuk wrote some plays in Ukrainian, such as 'Pylyp muzyka' (Pylyp the Musician, 1887), 'Vykhovanets' (The Pupil, 1899), and 'Ne pomozhut' i chary' (Even Charms Will Not Help, 1891).

M. Mushynka

Yanchukov, Oleksander [Jančukov], b 28 December 1910 in Kharkiv, d 18 June 1982 in Lviv. Stage actor. He began his career in the Kharkiv Young Spectator's Theater (1934) and then joined the Lviv Young Spectator's Theater (1944). He played the title role in Yu. Kostiuk's drama *Taras Shevchenko*.

Mykhailo Yanhel

Volodymyr Yaniv

Yanhel, Mykhailo [Janhel', Myxajlo] (Yangel, Mikhail), b 7 November 1911 in Zirianova, near Irkutsk, Siberia, d 25 October 1971 in Moscow. Mechanical engineer, specialist in spacecraft design; full member of the AN URSS (now ANU) from 1961 and of the USSR Academy of Sciences from 1966. He studied in Moscow and worked in various aviation plants, construction offices, and rocket institutes. Most of his later work, particularly in the Soviet space program, remains secret. He is reported to have headed the Soviet space effort, including all the manned and unmanned spaceflights and the spacecraft design bureau, after the death of S. *Korolov. He was prominent in the political elite of the Soviet technical establishment. His main published technical contributions were in the area of applied mechanics and rocket technology.

Yanishevsky, Vasyl [Janiševs'kyj, Vasyl'] (Janischewskyj, Wasył), b 21 January 1925 in Prague. Engineer and Plast activist; member of the Shevchenko Scientific Society and the Ukrainian Academy of Arts and Sciences. He graduated from the University of Toronto (1954) and taught electrical engineering there, as full professor since 1970. His publications deal with high-voltage transmis-

sion, radio interference by high-voltage corona, fault behavior of complex electric power systems, methods of testing underground cables, lightning studies, microgap discharges, and TV interference. He has been president of the *Plast Ukrainian Youth Association in Canada (1968–71) and head of its world executive as well as president of the *Ukrainian Canadian Research and Documentation Centre in Toronto.

Yaniv, Sofiia [Janiv, Sofija] (née Moiseiovych), b 14 November 1908 in Lviv. Civic activist; wife of V. *Yaniv; corresponding member of the Shevchenko Scientific Society (NTSh). As a member of the OUN and its Home Executive she was imprisoned three times by the Polish authorities. Since 1947 she has worked with the NTSh as the secretary of the editorial board of *Entsyklopediia ukraїnoznavstva* (Encyclopedia of Ukraine, 1949 and 1955–90) and as a subject editor for the *Encyclopedia of Ukraine* (vols 1–2, 1984, 1988). She served as the first director of the museum of the Ukrainian Catholic University in Rome (1963–72).

Yaniv, Volodymyr [Janiv] (Janiw, Wolodymyr), b 21 November 1908 in Lviv, d 19 November 1991 in Munich (buried in Sarcelles, near Paris). Political, community, and scholarly figure; full member of the Shevchenko Scientific Society (NTSh, from 1950; honorary member from 1987), the Ukrainian Theological Scholarly Society (UBNT, from 1960), the Ukrainian Academy of Arts and Sciences (UVAN in the US, from 1977; and honorary member of the Canadian UVAN from 1988). He studied history and psychology at Lviv University (1927–34), joined the underground Ukrainian Military Organization (in 1927) and OUN (in 1929), and was active in the Plast scouting organization and the Union of Ukrainian Nationalist Youth. In Lviv he headed the branch of the *Mohyla Scholarly Lectures Society (1930–2); was the first president of the *Union of Ukrainian Student Organizations under Poland (1931–2); edited **Students'kyi shliakh* (1932–4), **Nash klych* (1933), and other nationalist and student periodicals; and was a member of the OUN Home Executive in charge of political affairs (1932–4). For his OUN involvement he was imprisoned by the Polish authorities five times in 1928–33, and from June 1934 to August 1937 he was incarcerated in the Bereza Kartuzka concentration camp and the Lviv Brygidky prison. After the 1939 Soviet occupation of Galicia he moved to Berlin, where he resumed his studies and edited **Ukrains'kyi visnyk* (1940). In June 1941 he became a member of the *Ukrainian National Committee in Cracow, for which act he was imprisoned by the Gestapo. He was released in September 1942 through the efforts of the Ukrainian Central Committee in Cracow and thereupon banished from German-occupied Galicia. He returned to Berlin, where he wrote his PH D dissertation (1944) on the psychological effects of imprisonment.

Yaniv was a prominent figure in the postwar Ukrainian émigré community in Western Europe. He played a key role in the political unification of the *Central Union of Ukrainian Students in 1947 and in the organization of the 1948 ideological congress of émigré Ukrainian student organizations. His primary involvement was with the Ukrainian Free University (UVU) in Munich, where he taught psychology and sociology from 1946 (as a professor from 1955) and was rector from 1968 to 1986, and the

NTSh, in which he served as Philosophical-Pedagogical Commission secretary (1947–50). He was an executive board member (1949–55) and the scholarly secretary of the European NTSh center in Sarcelles (1952–68), and the Historical-Philosophical Section secretary (1955–73), vice-president (1968–85, from 1987), and president (1985–7) of the European NTSh. Yaniv edited *Visti NTSh*, *Khronika NTSh*, and *Zapysky NTSh* (vols 169, 181, 186) and organized NTSh and UVU scholarly conferences and sessions and a scholarly congress on the millennium of the Christianization of Rus'. He was also president of the *Ukrainian Christian Movement (from 1955) and a professor (from 1963) and dean of the philosophy faculty (1963–72) at the Ukrainian Catholic University in Rome, and the Ukrainian representative in international Catholic organizations.

Yaniv began publishing poetry in Galician periodicals in 1926. His political and prison experiences are reflected in his collection *Sontse i graty* (Sun and [Prison] Bars, 1941) and the autobiographical sketches *Lystopadovi fragmenty* (November Fragments, 1941). His religious and introspective lyrical poems and epic ballads appeared separately in the émigré collections *Shliakhy* (Roads, 1951) and *Zhyttia* (Life, 1975). Yaniv also wrote articles on socio- and ethnopsychology. He wrote a booklet (1948) and articles on Nazi concentration camps and their psychological consequences, a habilitation dissertation on Ukraine's psychological Westernness (1949), an UVU mimeographed textbook on sociology (1949), the booklet *The Battle of Kruty* (1958), surveys of Ukrainian culture (1953, 1961), articles on Soviet society, on the Ukrainian student and scouting movements, and on Ukrainian nationalist leaders, scholars, and religious figures, and a history of the UBNT (1970). His selected studies and materials on modern Ukrainian history were published by the UVU in two volumes (1970, 1983). Several articles about him and a bibliography of his works were published in the festschrift *Symbolae in honorem Volodymyri Janiw* (1983).

O. Horbach

Yaniv Brigade of the Ukrainian Galician Army (Yanivska [10] brygada UHA, aka Yavoriv Brigade). A unit of the First Corps of the UHA, formed in January 1919 from contingents that belonged to the Northern Group commanded by Maj A. Dolud. The brigade consisted of four infantry battalions, a machine-gun company, and a technical company. It fought against Polish forces at Briukhovychi, Kulykiv, and Belz, and then at Terebovlia and Ternopil during the Chortkiv offensive. During the Kiev offensive in August 1919 it captured Vinnytsia and Kalynivka from the Bolsheviks, and later it engaged A. Denikin's Volunteer Army in a number of battles in the Haisyn region. In 1920 the brigade was integrated into the Red Ukrainian Galician Army as the Fifth Infantry Regiment, and after revolting against the Bolsheviks it surrendered to the Poles in late April 1920.

Yaniv Cemetery (Yanivskiy tsyvyntar). A major cemetery in Lviv established in 1883. During the First World War the northern part of the cemetery was reserved for interned soldiers who had died of epidemic diseases. Almost 1,000 soldiers of the Ukrainian Galician Army, who died in the Ukrainian-Polish War of 1918–9, are buried there. A special square was set aside for 648 graves of members of the *Ukrainian Sich Riflemen, each marked

A vandalized grave of a soldier of the Ukrainian Galician Army at the Yaniv Cemetery

with a concrete military cross designed by P. Kholodny, Jr, and L. Lepky. Some prominent Ukrainian figures, such as M. Sosenko, Gen O. Tarnavsky, and O. Basarab, were buried at the cemetery. In the interwar period the Ukrainians of Lviv held annual memorial services there for those who had died fighting for Ukraine's independence. In 1971 the Lviv Oblast Executive Committee ordered the graves of the Ukrainian Sich Riflemen to be bulldozed, and the crosses destroyed. Only the graves of O. Tarnavsky and K. Levytsky were left untouched, but even they had their crosses removed. In the late 1980s the national revival in Lviv began with the restoration of some of the graves and commemorative ceremonies at Yaniv Cemetery.

Yanivsky, Bohdan [Janivsk'kyj], b 4 July 1941 in Lviv. Composer and pianist. He graduated from the piano faculty (1967) and the composition faculty (1978) of the Lviv Conservatory. Since 1967 he has served as musical director of the Lviv Young Spectator's Theater. His compositions include more than 100 scores for plays, cartoons, and television films, as well as scores for symphonies, instrumental chamber music, and popular songs.

Yanko, Dmytro [Janko], b 19 October 1930 in Zachepylivka, Novi Sanzhary raion, Poltava oblast. Art scholar. In 1959 he graduated from Kiev University. He has written books about the sculptors O. Kovalov (1977) and O. Skoblykov (1979) and about the memorials and monuments of Kiev (1974) and Ukraine (1982).

Yanko, Oleksander [Janko], b 1882 in Novi Sanzhary, Kobeliaky county, Poltava gubernia, d ? Revolutionary leader. After the February Revolution he returned from political exile in Siberia and was elected to the CC of the *Ukrainian Party of Socialist Revolutionaries (UPSR) and as a representative from Poltava gubernia to the Ukrainian Central Rada (at the All-Ukrainian Peasants' Congress in June 1917) and the Russian Constituent Assembly (in November 1917). He headed the UPSR caucus in the Little Rada. He was one of the leaders of the centrist faction at the Fourth UPSR Congress in May 1918, and he played an important role in the November 1918 uprising against the Hetman government as a member of the *Ukrainian National Union and head of the *Peasant Association and

UPSR Organizational Committee. From January 1919 he supported the position of government by workers' and peasants' councils based on the UPSR concept of the 'toiling masses.'

Yankovsky, Marko [Jankovs'kij], b 17 October 1915 in Astrakhan, Russia, d 27 April 1980 in Symferopil, Crimea. Stage designer. A graduate of the Astrakhan Art School (1938) and Kharkiv Art Institute (1941), where he studied under O. Khvostenko-Khvostov, in 1945–52 he worked at theaters in Nalchik, in Subcaucasia, and Tomsk, in Siberia. From 1953 to 1980 he was principal stage designer at the Crimean Russian Drama Theater in Symferopil.

Liubov Yanovska

Feofil Yanovsky

Yanovska, Liubov [Janovs'ka, Ljubov], b 30 July 1861 in Mykolaivka, Borzna county, Chernihiv gubernia, d 1933 in Kiev. Writer and community activist. She worked as a teacher in Lubni county, Poltava gubernia, and founded Sunday schools. From 1905 she lived in Kiev. She initially wrote in Russian and then changed to Ukrainian. Her first short story in Ukrainian was 'Zlodiika Oksana' (Oksana the Thief, 1897). Yanovska wrote over 100 short stories, novelettes, and novels, most of which were not published during her lifetime, and some of which were never finished. Her works deal with the life of the peasants and the intelligentsia, are written in a realist style, and reflect a populist philosophy. The publication of her first short story was followed by the drama *Povernuvsia z Sybiru* (He Returned from Siberia, 1897), the novelette *Horodianka* (The Townswoman, 1900), and the comedy *Na zelenyi klyn* (To the Far East, 1900). Many of her works were reprinted or first published during the period of Ukrainian statehood in 1918 and in the early years of the Soviet regime, in particular the plays *Lisova kvitka* (Forest Flower, 1918), *Zhertvy* (Sacrifices, 1918), *Liuds'ke shchastia* (Human Happiness, 1918), *Na sinozhati* (At the Haying Meadow, 1918), and *Dzvin, shcho do tserkvy sklykaie, ta sam u nii nikoly ne buvvaie* (The Bell That Calls People to Church but Never Goes There Itself, 1918). Yanovska ceased writing after 1916, but her works, greatly influenced by I. Nechui-Levytsky, P. Myrny, and to a lesser degree, M. Kotsiubynsky, remained popular for many years. The collected works of Yanovska were published in 1930, 1959, 1991.

I. Koshelivets

Yanovsky, Amvrosii [Janovs'kyj, Amvrosij], b 1810, d 1884. Galician educator and political leader. He served as director of the *Academic Gymnasium of Lviv and gymnasium inspector in Galicia. For many years he sat in the Galician Diet (1861–83) and the Austrian parliament. He chaired the textbook commission for Ukrainian gymnasia (from 1862) and was the first president of the Ruthenian Pedagogical Society (later *Ridna Shkola).

Yanovsky, Borys [Janovs'kyj], b 31 December 1875 in Moscow, d 19 January 1933 in Kharkiv. Composer, conductor, and music critic. A graduate of Kiev University (1903), he studied music privately with E. Ryb and was a conductor and music critic in Kiev until 1910. He then (1910–18) worked as a conductor and critic in St Petersburg and Moscow. In 1918 he settled in Kharkiv, where he taught at the music tekhnikum and the music and drama institute. His compositions include 10 operas, notably *Sorochynski Fair* (1899) and *Black Sea Duma* or *Samilo Kishka* (1927); two ballets; orchestral pieces; chamber works; violin and piano music; works for chorus; art songs; and settings of Ukrainian folk songs.

Yanovsky, Feofil (Teofil) [Janovs'kyj], b 24 June 1860 in Mynkivtsi, Nova Ushytsia county, Podilia gubernia, d 8 July 1928 in Kiev. Internal medicine specialist; full member of the VUAN from 1927. After graduating from Kiev University (1884) he worked in its medical faculty and then served as a professor at the internal medicine clinic of Odessa (1904–5) and Kiev (1905–19) universities. He was director of the internal medicine clinic of Crimea University (1919–21) and headed the internal medicine department at the Kiev Medical Institute (from 1921). His publications dealt with the clinical treatment of tuberculosis and diseases of the lungs, kidneys, gastrointestinal tract, and circulatory system. He established a school of internal medicine specialists and was a longtime president of the All-Ukrainian Congress of Therapeutists. He initiated the establishment of many tuberculosis sanatoriums in Ukraine, and the Kiev Tuberculosis Institute was named in his honor (1928).

Yanovsky, Oleksii [Janovs'kyj, Oleksij], b 1739, d ? Architect. After graduating from the St Petersburg Academy of Arts (1764) he worked as a builder for Hetman K. Rozumovsky. In 1765–71 he built a palace and church designed by J.-B.-M. Vallin-Delamothe in Pochep. Governor-General P. Rumiantsev invited him, in 1778, to design the Trinity Church, the residence of the governor-general, and the court buildings in Hlukhiv.

Yanovsky, Volodymyr [Janovs'kyj], b 15 April 1876 in Ortalan, Symferopil county, Tavriia gubernia, d 14 November 1966 in Bakhchysarai, Crimea oblast. Painter. After graduating from the St Petersburg Art School of the Society for the Promotion of the Arts in 1899, he returned to Crimea and settled in Yalta. He painted landscapes and genre paintings, using mostly watercolors. They include *Ochakiv in Flames* (1905), *View of Bakhchysarai* (1948), and *Flowering Orchards* (1957).

Yanovsky, Yurii [Janovs'kyj, Jurij], b 27 August 1902 in Maierove *khutir* (now Nechaivka), Yelysavethrad county, Kherson gubernia, d 25 February 1954 in Kiev. Writer.

Yurii Yanovsky

Stepan Yanovych

From 1927 Yanovsky lived in Kharkiv, and from 1939, in Kiev. He began publishing poems in Ukrainian in 1924, and in 1927 the poetry collection *Prekrasna Ut* (The Beautiful Ut) appeared, after which he began writing prose. The neoromantic short stories from Yanovsky's early period have been published as *Mamutovi byvni* (The Mammoth's Tusks, 1925) and *Krov zemli* (The Blood of the Earth, 1927). Yanovsky is considered, with M. Khvylovy, one of the best neoromantic writers in Ukrainian literature in the first half of the 20th century. The sea, which he portrayed romantically, was his favorite subject, as is most clearly seen in his first novel, *Maister korablia* (The Shipbuilder, 1928). He subsequently published *Chotyry shabli* (Four Sabers, 1931), which was harshly criticized and was banned for a long time. In that novel he described in a Romantic manner the spontaneous popular movement in reborn Ukraine during the period of the struggle for independence. Yanovsky returned to the same subject in *Vershnyky* (1935; English trans: *The Horsemen*, 1989), although there, owing to the pressure of Stalinist censorship, he applied the official interpretation. The work is a finely wrought novel composed of short stories. One of the short stories, 'Podviine kolo' (Double Circle), deals with the tragedy of fratricidal conflict during the time of the Revolution.

In the period prior to the Second World War Yanovsky wrote several film scenarios (eg, *Hamburg, Fata morgana*, and *Sertsia dvoikh* [The Hearts of Two]), the plays *Zavoio-vnyky* (The Conquerors, 1931) and *Potomky* (The Descendants, 1940), among others, and *Korotki istorii* (Brief Histories, 1940), a collection of witty short stories. During the war Yanovsky was an army war correspondent and an editor of the journal *Ukrains'ka literatura*. In 1945 he covered the Nuremberg Trials. Yanovsky's best work from the postwar period is *Zhyva voda* (Live Water, 1947), in which the image of the undying nation, reborn after the catastrophe of war, appears. The work was harshly criticized as 'nationalist,' and Yanovsky was forced to rewrite it in accordance with the principles of *socialist realism and to republish it in a weaker version under a different title, *Myr* (Peace, 1956). Yanovsky capitulated as an artist only toward the end of his life, when he produced *Kyivs'ki opovidannia* (Kiev Stories, 1948), a collection of mediocre quality. Yanovsky's early works are classics of the Ukrainian literary rebirth of the first half of the 20th century. His writings have been published individually and in several

editions of collected works: (4 vols, 1931–2; 2 vols, 1954; 5 vols, 1958–9, 1982–3).

I. Koshelivets

Yanovych, Stepan [Janovyč] (real surname: Kurbas), b 28 October 1862 in Kuropatnyky, Berezhany county, Galicia, d 10 September 1908 in Staryi Skalat, Skalat county, Galicia. Actor, singer (tenor), and stage director; father of L. *Kurbas. In 1884–98 and 1900 he worked as an actor in the Ruska Besida Theater (from 1891 also as director), and in 1898–9 he led his own troupe (with K. Pidvysotsky) in Kamianets-Podilskyi. As an actor he played a range of roles, from those in Ukrainian populist plays to those in classical operettas. As a director he staged I. Franko's *Uchytel'* (The Teacher) and F. von Schiller's *Die Räuber* (where he played the role of Karl Moor). He retired in 1902 as a result of illness.

Yanovych, Volodymyr [Janovyč], b 1869 in Solotvyna, Nadvirna county, Galicia, d 22 December 1931 in Stanyslaviv, Galicia. Physician and civic and political leader. After completing his studies at Vienna University he practiced medicine in Vienna and, from 1902, in Stanyslaviv. For 30 years he played a leading role in most of the local Ukrainian organizations and institutions: he served as president of the Stanyslaviv branch of the *Prosvita society (1904–30) and founded the local branch of Sokil (1902), the Ukrainska Khata society, the Ukrainska Mishchanska Kasa co-operative, the Narodnyi Dim Credit Association, and the Zoria trades society. He supported many of these organizations financially and donated buildings to house their offices, schools, and residences. During the First World War he was deported by the Russians, but he returned in 1918. In the 1920s he was a leading member of the Ukrainian National Democratic Alliance. For his contribution to Ukrainian society he was elected an honorary member of the Prosvita society in 1929.

Yanovycheva, Vanda [Janovyčeva] b 11 November 1867 in Chernivtsi, d 24 August 1950 in Kharkiv. Stage actress; wife of S. *Yanovych and mother of L. *Kurbas. She worked in the Ruska Besida Theater (1885–98), in S. Yanovych's theater (1898–9), and in Kyidramte (1920–1).

Yanushevych, Hanna [Januševyč], b 27 December 1907 in Haivoron, Haisyn county, Podilia gubernia, d 25 December 1983 in Chernivtsi. Stage and film actress. She completed study at the Lysenko Music and Drama Institute in Kiev (1928) and then acted in the Kiev Ukrainian Drama Theater (1927–31), the Kharkiv Theater of the Revolution (1931–8), and the Chernivtsi Oblast Ukrainian Music and Drama Theater. She appeared in the film *Zemlia* (The Land, adaptation of O. Kobylanska's novel, 1954).

Yanzhul, Ivan [Janžul'], b 14 June 1845 in Vasylykiv county, Kiev gubernia, d 1914. Economist; full member of the Russian Imperial Academy of Sciences from 1893. After completing his master's dissertation on English indirect taxation (1874) he was appointed a lecturer in

financial law at Moscow University. Two years later he wrote a doctoral dissertation on English free trade (pub, 2 vols, 1882). Besides teaching he served as factory inspector of the Moscow district (1882–7) and sat on commissions preparing factory legislation. A prolific writer, he published many articles in the Russian press about economic developments and thinking in Britain and the United States, a collection of essays on economic policy and legislation (2 vols, 1884), a history of factory industry in Poland (1887), and a textbook of financial law. He advocated government intervention in the economy.

Yarema, Mariia [Jarema, Marija] (Jarema, Maria), b 24 November 1908 in Staryi Sambir, Galicia, d 1 November 1958 in Cracow. Sculptor and painter. After studying at the Cracow Academy of Arts under X. Dunikowski (1929–35) she lived in Paris and Vienna. She belonged to the Cracow Group of artists (1933–9) and evolved as a sculptor from expressionism to abstractionism (eg, *Nude* [1938] and *Dance* [1955]). After the Second World War she was one of the leading members of Poland's Group of Modern Plastic Artists. She also used watercolors and tempera, and in the course of her experimentation with monotype and mixed media (monotype and tempera) she created surreal (eg, *Horses, Dancers, Knights*) and abstract works. In her monotypes she explored motion through overlapping surfaces (eg, *Filters, Rhythms* [1956], *Penetrations*, and *Spins*). From 1935 she worked as a scenery designer and actor with the Cracow experimental Cricot theater.

Yarema, Oleksa [Jarema], b 1855, d 1930. Educator and civic activist in Galicia. He taught classical languages at the Academic Gymnasium of Lviv (1885–91) and the Pere-myshl State Gymnasium (1892–1909) and then served as principal of the Ukrainian Girls' Institute in Peremyshl (1910–21). He was also president of a number of Ukrainian organizations, including the Peremyshl branch of Prosvita. He was a deputy of the Ukrainian National Rada of the Western Ukrainian National Republic.

Yakym Yarema

Yarema, Yakym [Jarema, Jakym], b 23 March 1884 in Ar-lamivska Volia, Mostyska county, Galicia, d 15 December 1964 in Lviv. Psychologist, philosopher, literary scholar, and educator. A graduate of Graz University (1908), he was a professor at the Ukrainian Higher Pedagogical Institute in Prague (1923–30) and director of the Ukrainian Gymnasium in Czechoslovakia (1925–7). After returning to Galicia he taught at the Ridna Shkola gymnasium in

Ternopil. After the Second World War he headed the Department of Foreign Languages at the Lviv Veterinary Institute. He wrote an introductory philosophy textbook (1924), a psychology textbook (1925), a book on educational psychology (1926), studies of T. Shevchenko, I. Franko, M. Shashkevych and T. Masaryk, and *Ukrains'ka dukhovist' v ii kul'turno-istorychnykh vyjavakh* (Ukrainian Spirituality in Its Cultural-Historical Manifestations, 1937).

The Hutsulshchyna tourist lodge in Yaremche

Yaremche or Yaremcha [Jaremčë or Jaremča]. v-5. A city (1989 pop 9,400) in the Prut River Valley in Ivano-Frankivske oblast. It was founded in 1895, and incorporated the villages of Yamna and Dora, which date back to the end of the 16th century. In 1738–45 O. *Dovbush and his opryshok band were active in the vicinity. In 1963 Yaremche was granted city status. Situated 665 m above sea level and surrounded by mountain peaks, the town is famous for its health and recreational resorts. A third of its inhabitants are employed in the tourist industry. There are 2 tourist bases, a youth camp, 6 rest homes, and 2 sanatoriums specializing in the treatment of tuberculosis, rheumatism, and nervous disorders.

Yaromenko, Hnat [Jaromenko], b 9 February 1874 in Bakhmach, Konotip county, Chernihiv gubernia, d 8 August 1915 in Bakhmach. Painter and graphic artist. He graduated from the Kiev Drawing School (1897) and the St Petersburg Academy of Arts (1904), where he studied under V. Makovsky. He painted portraits of family members and O. Lazarevsky (1900), self-portraits, still lifes, such as *Still Life with a Melon*, and landscapes, such as *Volodymyr's Hill in Kiev*. He produced a series of satirical paintings and caricatures during the Revolution of 1905.

Yaromenko, Vasyl [Jaromenko, Vasyl'], b 1 November 1895 in Rohyntsi, Romen county, Poltava gubernia, d 6 March 1976 in Lviv. Stage and film actor. He played in a semiprofessional troupe in Romen under I. Kavaleridze (1918–21) and then became one of the founders of the Zankovetska Theater in Kiev (since 1944 the Lviv Ukrainian Drama Theater) and worked in it until his death. His large repertoire (over 150 roles) included Iago in W. Shakespeare's *Othello* and Taras Shevchenko in V. Malakov and D. Shaknevsky's *Peterburz'ki nochi* (Petersburg Nights). He also acted in K. Hubenko and V. Kharchenko's literary-musical composition *Ukraina v boroti'bi* (Ukraine in Struggle, 1944) and in the film *Nazar Stodolia* (1954).

Yaromenko, Vasyl [Jaromenko, Vasyl'], b 12 February 1932 in Sianno, Vitsebsk oblast, Belarus. Literary scholar. He received a candidate's degree from the Kiev Pedagog-

Vasyl Yaremko (1895-1976)

John Yaremko

ical Institute in 1964. Since 1973 he has been a docent of Ukrainian literature at Kiev University. In 1989 he was elected vice-president of the newly created Ukrainian Language Society and a member of the Kiev Regional Coordinating Council of the Popular Movement of Ukraine. He has written nearly 200 scholarly articles and a history of Ukrainian journalism (1983), and he has edited, in most cases with introductions and notes, the works of B. Hrinchenko (2 vols, 1963), M. Kulish (1968), P. Kulish (1970), O. Oles (1971), M. Pavlyk (1985), and V. Svidzinsky (1986), and anthologies of folk dumas, songs, and ballads (1970), 17th- and 18th-century Kievan poets (1982), and Ukrainian poetry of the 16th (1987) and 17th (1988) centuries.

Yaremko, John [Jaremkō], b 10 August 1916 in Welland, Ontario. Lawyer and politician of Ukrainian descent. He graduated from Osgoode Hall Law School in Toronto and was called to the Ontario bar in 1944. He was the first Ukrainian Canadian elected to the Ontario legislature, as the Progressive Conservative member for Bellwoods in 1951. Re-elected in 1955, 1959, 1963, and 1971, Yaremko held numerous cabinet posts, including minister of transportation (1958-60), provincial secretary and minister of citizenship (1960-6), minister of public welfare (1966-7), minister of family and social services (1967-71), provincial secretary (1971-2), and solicitor general (1972-6). He was appointed Queen's Counsel in 1953.

Yaremych, Stepan [Jaremyč], b 3 August 1869 in Halaiky, Tarashcha county, Kiev gubernia, d 14 October 1939 in Leningrad. Art scholar and artist. He graduated from the Kievan Cave Monastery Icon Painting Studio (1887) and the Kiev Drawing School (1894) and studied under N. Ge. In 1900 he moved to St Petersburg, where from 1918 he worked as a curator and restorer at the Hermitage. Under M. Vrubel's supervision he painted murals in St Volodymyr's Cathedral in Kiev. His landscapes include *Kniazha Hora, near Kaniv, View of the Dnieper, and Field*. He wrote the first book about M. *Vrubel (1911) and articles on 16th- and 17th-century art at the Kievan Cave Monastery (1900) and St Andrew's Church in Kiev (1903).

Yareshchenko, Oleksander [Jareščenko], b 12 September 1890 in the Poltava region, d ca 1938. Archbishop of the *Ukrainian Autocephalous Orthodox church (UAOC). He graduated from the Moscow Theological Academy

Archbishop Oleksander
Yareshchenko

Rev Stepan Yarmus

and the Institute of Road Engineering in St Petersburg and then became head of the Poltava railway (1920-1). At the UAOC sobor of 1921 Yareshchenko was consecrated bishop of Poltava. He worked in Lubni (1921-3), where he organized 50 Ukrainian parishes and the okruha council of the UAOC for the district. Then he became archbishop of Kharkiv (1923-6) and organized the UAOC in Slobidska Ukraine. Yareshchenko was vice-chairman of the All-Ukrainian Orthodox Church Council and a member of the Ideological Commission of the UAOC (1924-6). An accomplished preacher who strongly opposed communism, in 1926 he was one of the first UAOC hierarchs to be arrested and imprisoned (in Moscow, then sent to Tashkent). He was released briefly in 1934, and lived in Kursk. He was then exiled to Siberia, where he died.

Yarkovsky, Pavlo [Jarkovs'kyj], b 1781, d 24 May 1845 in Kiev. Librarian and bibliographer. He is considered to be the first Ukrainian library scientist. He headed the libraries of the Volhynia Gymnasium (Kremianets Lyceum) and Kiev University and taught the first courses in library science. His bibliography course was described by R. Rozet in *Sovetskaia bibliografija* (no. 42 [1956]).

Yarmachenko, Mykola [Jarmačenko], b 6 September 1928 in Cheremoshna, now in Poliske raion, Kiev oblast. Pedagogue. He graduated from the Kiev Pedagogical Institute (1951). He taught there until 1973 and served as prorector (from 1968). A specialist on education for the deaf, in 1973 he became director of the Scientific Research Institute of Pedagogy of Ukraine.

Yarmolyntsi [Jarmolynci]. IV-7. A town smt (1986 pop 8,500) near the Ushytsia River and a raion center in Khmelnytskyi oblast. It was first mentioned in a historical document in 1400, when it was under Polish rule. In 1445 a castle was built there, and in 1455 the town was granted the rights of *Magdeburg law. After the partition of Poland in 1793, it was annexed by Russia and became part of Proskuriv county in Podilia gubernia. In July 1919 Yarmolyntsi was the site of battles between the UNR and Bolshevik armies. Today the town has several food-processing plants and two brick factories.

Yarmus, Stepan [Jarmus'] (Jarmus), b 25 May 1925 in Lidykhiv, Kremenets county, Volhynia gubernia. Ortho-

dox church leader. He emigrated from Ukraine in 1944 and settled in England in 1947. There he studied pastoral theology and was ordained in 1956. He continued his study of theology at St Andrew's College, the University of Winnipeg, and the San Francisco Theological Seminary (PH D, 1981). He served as a parish priest in Saskatchewan before becoming a lecturer (1969) and then a professor (1977) at St Andrew's College, and editor of *Visnyk*, the official church bulletin (1969–75), and *Vira i kul'tura* (from 1981). From 1983 to 1990 he served as head of the presidium of the Ukrainian Orthodox Church of Canada consistory. Yarmus has written several works on the history of Ukrainian philosophy, including a study of the 19th-century philosopher P. Yurkevych (1979) and a monograph on the spirituality of the Ukrainian nation (1983). He has also published collections of Yurkevych's writings, textbooks on homiletics and general theology, and works on church history.

Yaropolk Iziaslavych [Jaropolk Iziaslavyč], b ?, d 22 November 1086. Prince of Volhynia and Turiv; son of the Kievan prince *Iziaslav Yaroslavych. He married Iryna (Kunigunde), the daughter of Count Otto of Orlamünde-Reichlingen. In 1073 he and his father and brother, Sviatopolk, were expelled from Kievan Rus'; they traveled to Poland and then to Germany. In 1075 Yaropolk petitioned Pope Gregory VII for support and was officially recognized as the 'King of Rus'. The petition was recorded, along with miniatures of Yaropolk and his wife, in the *Trier Psalter.

In 1077 Yaropolk returned to Kiev with his father and was granted the rule of Vyshhorod volost. In 1078 he mounted a campaign against Oleh Sviatoslavych of Chernihiv, in which his father was killed. That event marked the separation of Volhynia (with Volodymyr-Volynskiy and Turiv-Pynske) from Kiev principality. Yaropolk ruled Volhynia with the agreement of the Kievan prince Vsevolod Yaroslavych, but he faced constant conflicts with the Rostyslavych dynasty. In 1084 his rule in Volhynia was overthrown by them and Davyd Ihorevych. In 1085 he petitioned Vsevolod to grant him Dorohobuzh and was refused; he took up the sword against Vsevolod but was forced to retreat from Volodymyr-Volynskiy and Lutske into Poland. He was killed by the assassin Neradets (who was probably a secret agent of Riuryk Rostyslavych) and buried in the Church of St Peter in Kiev.

A. Zhukovsky

Yaropolk I Sviatoslavych [Jaropolk Svjatoslavyč], b ca 958–60, d 980 (possibly 11 June). Grand prince of *Kievan Rus'; eldest son of Sviatoslav I Ihorevych. He ruled the Kiev principality from 970, and when his father died in 972 he became ruler of all Rus'. He maintained ties with Western Europe and with Emperor Otto I the Great. In 973 his emissaries participated in the parliament in Quedlinburg, and in 979 he received a papal delegation in Kiev. He took a Greek wife and had good relations with Byzantium. Yaropolk's wish to unite all of Rus' under his rule gave rise to conflicts with his brothers, *Oleh Sviatoslavych and *Volodymyr the Great. In 977, when Oleh murdered the son of Yaropolk's voivode Svineld, Yaropolk killed Oleh in a battle near Ovruch, and thus gained control of the *Derevlianian territories. He captured Novgorod in 980 and drove out Volodymyr, who

enlisted the aid of the *Varangians, regained Novgorod in the same year, and took over Kiev soon thereafter. Yaropolk fled to Roden, where he was murdered at Volodymyr's behest. In 1044 Yaroslav the Wise transferred Yaropolk's remains (and those of Oleh), having baptized them, to the Church of the Tithes in Kiev.

Yaropolk II Volodymyrovych, b 1082, d 18 February 1139 in Kiev. Prince of Pereiaslav (1113–32) and grand prince of Kiev (1132–9); son of Volodymyr Monomakh. He participated in his father's campaigns against the Polovtsians (Cumans) in 1103, 1109, 1111, and 1113 and defeated them roundly in 1116 and 1120. Yaropolk lived in harmony with his father and his older brother, Mstyslav I Volodymyrovych the Great. As grand prince Yaropolk minded the unity of the Kievan state and battled with the Olhovych family of Chernihiv princes (particularly Vsevolod II Olhovych), who desired to capture the Kiev throne and enlisted the aid of the Polovtsians in their attempt to do so. As mentioned in the chronicles, Yaropolk distinguished himself by his courage and won great fame for his successful campaigns against the Polovtsians. He married Olena, the daughter of an Ossetian prince, whom he had taken prisoner during one of the campaigns against the Polovtsians. Yaropolk was buried in the Yanchyn Monastery in Kiev.

Roman Yarosevych

Yarosevych, Roman [Jarosevyč], b 1861 in Bedrykivtsi, Zalishchyky county, Galicia, d 28 May 1934 in Stanyславiv, Galicia. Physician and political activist. After graduating in philology from Lviv University he taught at a gymnasium in Kolomyia. He then studied medicine in Cracow and, finally, opened an office in Borsheviv. A member of the Ukrainian Radical party and then the Ukrainian Social Democratic party, he was elected in 1897 to the Austrian parliament. In 1908 he chaired the clandestine committee which organized M. *Sichynsky's escape from prison. In the 1920s he was elected president of the Alliance of Railway Physicians of the Stanyславiv Directorate of Polish State Railways.

Yaroshchuk, Vadym [Jaroščuk], b 2 April 1966 in Kryvyi Rih. Swimmer. A member of the USSR swimming team since 1984, he set USSR records in the 400-m individual medley (IM) in 1985 and 1987, the 200-m IM in 1986 and 1987, and the 200-m butterfly in 1987; was the 1986 and 1987 USSR champion in the 200- and 400-m IM; and won sil-

ver and bronze medals at the 1986 world swimming championships and at the 1987 European championships, two gold medals at the 1987 ESSO International Swim Meet in Toronto, and two 1988 Olympic bronze medals (the 200-m IM and the 4 × 100-m medley relay).

Mykola Yaroshenko

Volodymyr Yaroshenko
(1898–1937)

Yaroshenko, Mykola (Nikolai) [Jarošenko], b 13 December 1846 in Poltava, d 7 July 1898 in Kislovodsk, Stavropol krai. Painter. He audited courses at the St Petersburg Academy of Arts (1867–74) and became a leading member of the *Peredvizhniki society (from 1876). His genre paintings, such as *Stoker* (1878), *Prisoner* (1878), *Student* (1881), *Life Is Everywhere* (1888), and *Peasant Girl* (1891), depict social problems. He produced genre paintings, portraits of famous Russians, and many Caucasian landscapes. While staying in Poltava in 1865 and 1876 and Kiev in 1874, 1876, and 1878–9, he painted genre scenes, such as *Blind Cripples near Kiev* (1879) and *Beggars at the Kievan Cave Monastery* (1879–80). His *Village Choir* (1894) is also a Ukrainian genre scene, and his *Student* (1881) depicts a Ukrainian, P. Chyrko. Many of his works were bequeathed to the Poltava Art Museum. Books about Yaroshenko have been written, in Russian, by V. Prytkov (1960), V. Porudominsky (1979), and I. Polenova (1983).

Yaroshenko, Mytrofan [Jarošenko], b 1858 in Vradiivka, Ananiv county, Kherson gubernia, d 18 September 1926 in Chernihiv. Actor and theater director. He worked in the troupes of M. Kropyvnytsky (1883–4), M. Starytsky (1885–94), and O. Sukhodolsky (1894–8) and led his own troupe (1899–1915), which toured (besides Ukraine) Moldavia, the Kuban, and Crimea.

Yaroshenko, Semen [Jarošenko], b 1846 in Kherson, d 1917. Mathematician. After graduating from Odessa University (PH D, 1871), he worked there as a professor (from 1871) and rector (1881–90). He wrote many articles on differential equations, especially on solving equations of the first order, and prepared the first Russian-language monograph on descriptive geometry (1880).

Yaroshenko, Volodymyr [Jarošenko], b 4 July 1888 in Myrhorod, Poltava gubernia, d 2 July 1957 in Kiev. Linguist. A graduate of St Petersburg University (1912), from 1926 to 1934 he was a VUAN research associate and compiled dictionaries. He wrote the first detailed study of the Ukrainian language in 14th- and 15th-century Moldavian charters (1909; pub 1931) and articles on the phonetic transcription of Ukrainian (1919) and Ukrainian medical terminology (with I. Kyrychenko, 1934), and he coedited the VUAN Russian-Ukrainian dictionary (vol 2, fasc 2–3, 1932–3).

Yaroshenko, Volodymyr [Jarošenko], b 1898 in Yakhnyky, Lohkvytsia county, Poltava gubernia, d 13 July 1937 in Kiev. Poet, prose writer, and playwright. He began to write in Russian, and his poetry was first published in 1915. His first collection of poetry, *Stikhi* (Verses), was published in 1917. After the revolution he wrote in Ukrainian and belonged to the literary organizations *MARS and Pluh. His poetry was published in the collections *Luny* (Echoes, 1919), *Shcho do choho* (What Belongs Where, 1924), *Cherez resheto* (Through the Sieve, 1924), *Bozha kooperatsiia* (God's Co-operation, 1925), *Dobre roby – dobre i bude* (Work Well – Things Will Be Fine, 1925), and *Baiky* (Tales, 1926). He also published a collection of short stories, *Kryminal'na khronika* (A Criminal Chronicle, 1927), the novel *Hrobovyshche* (The Cemetery, 1928), film scenarios, and translations from Russian. In the early 1920s Yaroshenko's drama *Shpana* (Riff-Raff) achieved popularity; it was staged in 1922–3 in the Berezil theater. Yaroshenko was arrested on 26 February 1933 and accused of membership in a nonexistent nationalist organization, but he was released owing to lack of evidence. He was rearrested on 3 November 1936, interrogated, accused of counterrevolution, and shot.

Yaroshevsky, Bohdan [Jaroševs'kyj] (pseud: Stepan Zahorodny), 1869–1914. Ukrainian political activist and writer. Descended from Polonized Ukrainian nobility, he joined the Ukrainian national movement but maintained close ties with Polish socialist circles. He was the leader of the *Ukrainian Socialist party, which attracted Ukrainianized Poles, and editor of its periodical *Dobra novyna*. His political articles appeared in *Przegląd krajowy*, *Przedświt*, *Naprzód*, and *Krytyka*, and his poems and short stories, in *Rada*, *Hromads'ka dumka*, and *Literaturno-naukovyi vistnyk*.

Yaroshevsky, Oleksander [Jaroševs'kyj], b 25 August 1887 in Pryluka, Poltava gubernia, d 11 November 1977 in Prague. Construction engineer. After completing his studies at the Ukrainian Husbandry Academy in Poděbrady (1931), he worked on many road, bridge, and water-diversion projects in Czechoslovakia. In 1939 he patented an accumulative central heating radiator. He was also a strong supporter of the Ukrainian branch of the Slovak Pedagogical Society in Bratislava and translated a number of Slovak-language textbooks into Ukrainian.

Yaroshevsky, Yurii [Jaroševs'kyj, Jurij] (secular name: Hryhorii), b 18 November 1872 in the Podilia region, d 8 February 1923 in Warsaw. Orthodox hierarch and pedagogue. A graduate of the Kiev Theological Academy (1896), he contributed to *ZNTSh* in Lviv. He was tonsured in 1898 and became rector of the Tula Theological Semi-

Metropolitan Yuri
Yaroshevsky

Yevheniia Yaroshynska

nary. After being consecrated as a bishop in 1906, he served as vicar of Tula and Poltava eparchies, rector of the St Petersburg Theological Seminary (1910), bishop of Kaluga and then Minsk (1913), and archbishop of Kharkiv (1919). He emigrated to Italy by way of Serbia in 1920, and moved to Poland in 1921 to administer a portion of Minsk eparchy that had come under Polish control. He was elevated to the office of metropolitan of Warsaw by Patriarch Tikhon in 1922. As metropolitan he sanctioned the publication of *Pravoslavna Volyn'* as a Ukrainian-language church organ, allowed the introduction of vernacular Ukrainian into liturgical services, and initiated translations into Ukrainian of church texts. He also supported the granting of autocephaly to the Orthodox church in Ukraine, although he questioned the canonicity of the Ukrainian Autocephalous Orthodox church. He was murdered at his residence in Warsaw by the fanatic Russian monk Smaragd, a former rector of the Kholm Theological Seminary who opposed Yaroshevsky's efforts to break ties with the Moscow patriarchate.

Yaroshevych, Andrii [Jaroševyč, Andrij], b 1875, d ? Economic geographer and historian, and statistician. In the 1920s he was a professor at the Kiev Institute of the National Economy. He wrote on the economic history of Ukraine and on the history of the **khutir* in the Kiev region; his history of the potash industry in Ukraine remained unpublished. He was fired from his job in the early 1930s, and disappeared during the Stalinist terror.

Yaroshevych, Hryhorii [Jaroševyč, Hryhorij] (real surname: Manko), b 30 November 1885 in Pidlypne, Konotip county, Chernihiv gubernia, d 1974 in Toronto. Singer (baritone) and actor. He began his theatrical career in M. Kropyvnytsky's troupe (1905) and worked in O. Suslov's and other troupes and then was a soloist at the Kharkiv Theater of Opera and Ballet (1925–7), the Kharkiv Chervonozavodskiyi Ukrainian Drama Theater (1928–33), and the Kiev Theater of Opera and Ballet (1934–41). He also acted in the film *Natalka Poltavka* (Natalka from Poltava, 1936). After the Second World War he emigrated to Canada.

Yaroshynska, Yevheniia [Jarošyns'ka, Jevheniia], b 18 October 1868 in Chukiv, Bukovyna, d 21 October 1904 in Chernivtsi. The first Ukrainian woman writer and folklor-

ist in Bukovyna. In 1882 she began writing stories in German, two of which she published in a Viennese periodical (1886–7). From 1886 on she published, in Ukrainian, stories about the peasantry and intelligentsia, feminist and populist articles, and literary translations in Chernivtsi and Lviv periodicals (*Biblioteka dlia molodizhi*, *Bukovyna*, *Bat'kivshchyna*, *Narod*, *Zoria*, *Dzvinok*, *Literaturno-naukovyi vistnyk*, *Promin'*) and in the annual *Bukovyns'kyi kalendar*. A self-educated person, she worked as a teacher in Bridok (1893–5) and Raranchi (now Ridkivtsi, 1896–9) and was active in the Ruska Shkola society. Published separately were three booklets of her children's stories (1901–2) and a novel about the corrupt, Rumanianized Orthodox clergy, *Perekynchyky* (Turcoats, 1903). She also collected embroidery and Easter egg designs, which she published in German and Czech periodicals, and wrote an article about Bukovynian wedding rituals. For her collection of 450 Bukovynian folk songs (pub finally in 1972) she received a silver medal and a monetary award from the Russian Geographic Society in 1888. Editions of her works were published in Kiev in 1958 and 1968. V. Holubets's bibliography of works by and about her appeared in Lviv in 1969.

Yaroslav. See Jaroslaw.

Yaroslav, Battle of. A clash between the army of the Galician-Volhynian prince, *Danylo Romanovych, and Hungarian-Polish forces near Yaroslav (now *Jaroslaw), Galicia, on 17 August 1245. Hungary and Poland took advantage of the weakened condition of the Principality of *Galicia-Volhynia after the Tatar invasion of 1241 to seize Ukrainian territories. They exploited the hostility of Galician boyars toward Prince Danylo and invaded Galicia, led by the expelled prince of Chernihiv, Rostyslav Mykhailovych (son-in-law of the Hungarian king, Béla IV). In the summer of 1245 Béla joined with Polish forces and Galician boyars under Rostyslav's command and besieged Yaroslav. Danylo's army, along with a detachment of Polovtsians (Cumans), set out from Kholm to defend Yaroslav, and proved victorious in a battle on the Sian River. The Hungarian voivode Fila was slain, and the boyar leader Volodyslav was taken prisoner and later executed. Danylo's definitive victory quelled Polish and Hungarian aggression and boyar rebellions. It also enabled Danylo to strengthen his authority and to raise the principality's prestige.

Yaroslav Iziaslavych [Jaroslav Izjaslavyč], b ?, d ca 1180. Prince of Turiv, Novgorod, Volodymyr-Volynskiy, and Lutske; son of the Kievan prince Iziaslav Mstyslavych and brother of Mstyslav Iziaslavych. In 1173–4, aided by the Rostyslavych family, he controlled the Kievan throne and extracted heavy tributes from the population, including the clergy, monasteries, and resident foreign merchants. The burden he imposed aroused considerable hostility, and Yaroslav was deposed. In Lutske he contributed to the establishment of a local bishopric. He married the daughter of the Czech king Vladislav II.

Yaroslav Osmomysl [Jaroslav], b ?, d 1 October 1187 in Halych. Galician prince; son of *Volodymyrko. He is first mentioned in the chronicles under the year 1150, when he married Olga, the daughter of *Yurii Dolgorukii. In *Slovo*

Monument on the site of Prince Yaroslav Osmomysl's grave in Krylos, Halych raion, Ivano-Frankivske oblast

The marble sarcophagus of Grand Prince Yaroslav the Wise inside Kiev's St Sophia Cathedral

o polku Ihorevi (The Tale of Ihor's Campaign) Yaroslav is given the appellation Osmomysl (possessed of eight senses, ie, wise and perceptive). Upon his assumption of the throne in 1153, Halych principality was in conflict with Kiev principality and a number of Volhynian cities. Yaroslav was ready to accept the primacy of *Iziaslav Mstyslavych of Kiev, but the Galician boyars were opposed. Iziaslav launched a campaign against the Galicians and defeated them at Terebovlia, on the Seret River.

Iziaslav's death in 1154 ushered in a period of peace between Kiev and Galicia, apart from the tenure of Iziaslav III Davydovych (1158–61), whom Yaroslav defeated with the assistance of Mstyslav Iziaslavych in 1159. That year Yaroslav also fought against his cousin, Ivan Rostyslavych *Berladnyk, who made an unsuccessful attempt from the Danube lowlands to conquer Galicia. Yaroslav maintained good relations with Yurii Dolgorukii and participated in campaigns against the Polovtsians (about which an account is given in *Slovo o polku Ihorevi*). He also lived in relative harmony with his neighbors in Poland and Hungary, the Byzantine emperor, and Frederick I Barbarossa. Yaroslav did not interfere in the conflict between Byzantium and Hungary, but after he harbored his relative, Andronicus I Comnenus (cousin of the Byzantine emperor, Manuel I), in 1164, his relations with Constantinople soured. In 1174 he supported Yaroslav Iziaslavych's ascent to the Kievan throne.

Yaroslav expanded his principality by annexing the territories between the Dniester River and the Carpathian Mountains and the Danube lowlands. His large standing army made him one of the mightiest princes of Rus'. Many Galician cities were built up and fortified during his reign. In 1153–7 the Dormition Cathedral was built in princely *Halych.

The Galician boyars initially aided Yaroslav, particularly in his war with Iziaslav, but as they grew richer through trade, they transformed themselves into a hereditary aristocracy and began interfering in Yaroslav's state and personal affairs. In 1172 he left his wife, Olha, and took a boyar's daughter, Nastasiia, as his mistress. The boyars rebelled and forced him to reinstate Olha, and had Nastasiia

burned as a witch. Olha withdrew to a convent in Suzdal and died in 1182. Yaroslav's last wishes were to grant *Oleh Yaroslavych (Nastasiia's son) the rule of Halych, and Peremysl to Volodymyr, Olha's son, but the boyars expelled Oleh after Yaroslav died.

Yaroslav Sviatopolkovych [Jaroslav Svjatopolkovyč] (Yaroslavets Sviatopolchych), b ?, d 15 August 1123. Rus' prince; son of Sviatopolk II Iziaslavych and son-in-law of Mstyslav I Volodymyrovych. In 1100 (or 1097) he was placed in Volodymyr-Volynskyyi by his father, who wished to replace the insubordinate Davyd Ihorevych; Sviatopolk's decision was ratified at the *Vytychiv congress of princes. In 1117 Yaroslav refused to recognize the suzerainty of the Kievan prince Volodymyr Monomakh and was forced to flee to Poland and then Hungary. He re-established himself in Volodymyr-Volynskyyi in 1118 with the aid of Hungarian troops, but was again challenged following a revolt by his boyars, who supported Volodymyr. In 1123 Yaroslav, with the help of Hungarian and Polish forces, laid siege to Volodymyr-Volynskyyi, where he was killed in battle.

Yaroslav the Wise [Jaroslav Volodymyrovych 'Mudryj'], b 978, d 20 February 1054 in Kiev. Grand prince of Kiev from 1019; son of Grand Prince *Volodymyr the Great and Princess *Rohnida of Polatsk; half-brother of *Sviatopolk I, *Mstyslav Volodymyrovych, and *Saints Borys and *Hlib Volodymyrovych; father of seven princes, including *Iziaslav, *Sviatoslav II, and *Vsevolod Yaroslavych. During his father's reign Yaroslav governed the lands of Rostov (from ca 988) and Novgorod (from 1010). While ruling Novgorod, which became his main power base, he rebelled against his father by refusing to pay the yearly tribute of 2,000 silver *hryvni* to Kiev. His father died in 1015 while preparing an expedition to subdue Novgorod, and after his death Yaroslav waged war against his brother Sviatopolk I for the Kievan throne. He defeated Sviatopolk and his Pecheneg allies at Liubech in 1015 and assumed the title of grand prince. In 1018, however, Sviatopolk and his father-in-law, Boleslaw I of Poland, defeated Yaroslav's army at the Buh River and drove Yaroslav from Kiev. In 1019 Yaroslav and his Novgorodian army routed Sviatopolk at the Alta River and regained the Kievan throne.

To retain his authority in northern Rus', in 1021 Yaroslav fought and defeated his cousin Briachyslav Iziaslavych of Polatsk, thereby gaining his loyalty. Yaroslav's half-brother Mstyslav Volodymyrovych of Tmutorokan and Chernihiv, who was vying for control of southern Rus', proved to be a more stubborn opponent. After being defeated by him at Lystven, near Chernihiv, in 1024, Yaroslav was forced to cede to Mstyslav all of Left-Bank Ukraine except Pereiaslav principality. An accord between them was reached in Horodok in 1026, and Yaroslav assisted Mstyslav in his 1029 campaigns against the *Yasians and Kasogians, thereby extending his realm to the Caucasus. Mstyslav in turn helped Yaroslav consolidate his power west of the Dnieper. In 1030 Yaroslav con-

quered lands between Lake Peipus and the Baltic Sea and founded there the city of Yurev (named after Yaroslav's Christian name, Yuri-Georgii), now Tartu in Estonia. In 1030–1, with Mstyslav's help, he regained the *Cherven towns from Boleslav I and annexed the Polish-ruled lands between the Sian and the Buh rivers, where he founded Yaroslav (now *Jaroslāv).

After Mstyslav's death in 1036, Yaroslav annexed his lands and became the unchallenged ruler of Kievan Rus' except the Polatsk land, which remained under Briachislav. In 1038–42 he waged successful campaigns against the Lithuanian *Yatvingians, Mazovia (as the ally of his brother-in-law, Casimir I of Poland), and the Baltic Yamians and Chudians. In 1043, however, his military expedition against Constantinople, led by his son Volodymyr of Novgorod and the chiliarch Vyshata, ended in disastrous defeat.

To defend his state from the attacks of nomadic tribes, Yaroslav fortified the southern frontier by building along the Ros, the Trubizh, and the Sula the towns of Korsun, Kaniv, Pereiaslav, Lubni, and Lukoml and lines of ramparts, castles, and outposts. In 1037 he routed an army of *Pechenegs that had attacked Kiev, and initiated construction of the St Sophia Cathedral to commemorate his victory. During Yaroslav's reign the cities of *Kiev, Novgorod, Chernihiv, Pereiaslav, Volodymyr-Volynskiy, and Turiv were considerably transformed. Over 400 churches were built in Kiev alone, which was turned thereby into an architectural rival of Constantinople. Yaroslav's walled inner city in Kiev covered an area of nearly 60 ha. It was entered through the *Golden, Polish, and Jewish Gates, and the St Sophia Cathedral stood in the center, encircled by large palaces.

To strengthen his power and provide order in social and legal relations in his realm, Yaroslav arranged for the compilation of a book of laws called 'Pravda Iaroslava' (Yaroslav's Justice), the oldest part of the **Ruskaia Pravda*. During his rule Christianity spread and grew stronger in Rus' (he actively suppressed paganism), and the organizational and hierarchical structure of the Rus' church was established. In 1039 the existence of the *Kiev metropoly was confirmed in writing as being under the jurisdiction of the Patriarch of Constantinople. Yaroslav issued a statute defining the rights of the church and clergy. Apart from Constantinople's right to confirm the appointment of the metropolitan, the Rus' church was autonomous, and in 1051 Yaroslav initiated the sobor of bishops that chose *Ilarion as metropolitan of Kiev. The first *monasteries in Rus' were formally established during Yaroslav's reign. He founded a primary school and library at the St Sophia Cathedral and sponsored the translation of Greek and other texts into Church Slavonic, the copying of many books, and the compilation of a chronicle (1037–9).

Yaroslav strengthened the international role of Kievan Rus' through dynastic unions. He married Ingigerd, the daughter of King Olaf Skötkonung of Sweden, and arranged marriages for his daughters *Yelysaveta, *Anna, and Anastasiia with Kings Harald III of Norway, Henry I of France, and Andrew I of Hungary respectively. His son Iziaslav married Gertrude, the daughter of Mieszko II of Poland; Vsevolod, the Byzantine princess Maria, of the Monomachus line; Sviatoslav, the granddaughter of Emperor Henry II; and Volodymyr, Oda, the daughter of Count Leopold von Stade. The monarchs Olaf II Haralds-

son and Harald III of Norway and Edmund II Ironsides of England sought asylum at Yaroslav's court, and he concluded alliances with Emperors Henry II, Conrad II, and Henry III.

During Yaroslav's reign the influence of the *Varangians was limited exclusively to the military; administrative and governing functions were assumed largely by indigenous viceroys (eg, Vyshata, I.Tvorymyrych, Dobrynia's son Kosniatin [Kostiantyn]). As a European power Kievan Rus' reached its zenith under his rule. To ensure the unity of his state, Yaroslav introduced primogeniture, according to which his eldest living son, Iziaslav of Turiv, was to succeed him as grand prince and ruler of the Kiev and Novgorod lands; Sviatoslav would rule the Chernihiv land to Murom, and Tmutorokan; Vsevolod, the Pereiaslav and Rostov lands; Ihor, the Volodymyr-Volynskiy land; and Viacheslav, the Smolensk land. As a result Kievan Rus' would never again be united.

Yaroslav was buried in the St Sophia Cathedral, where his marble sarcophagus has been preserved.

A. Zhukovskiy

Yaroslav Vsevolodovych [Jaroslav Vsevolodovyč], b 1139, d 1198. Rus' prince; son of Vsevolod Olhovych. He ruled in Starodub after the death of his father. He is mentioned in the Hypatian Chronicle under the year 1159 as the ruler of Ropesk, which was in the Snov River basin in Chernihiv lands. He was granted the rule of Chernihiv principality ca 1177–9 by his brother, Sviatoslav Vsevolodovych. Yaroslav threatened the unity of Rus' by refusing to participate in joint campaigns against the Polovtsians in 1184 and 1185, and he even caused one to be scuttled in 1187. After the death of Sviatoslav Yaroslav supported Riuryk Rostyslavych in his campaign to take the Kievan throne.

Yaroslavenko, Yaroslav [Jaroslavenko, Jaroslav] (actual surname: Vintskovsky), b 30 March 1880 in Jaroslāv, Galicia, d 26 June 1958 in Lviv. Composer, music publisher, and conductor. He studied music at the Lviv Conservatory (1898–1900) and then completed a degree (1904) in engineering (his subsequent profession) at the polytechnical institute. Yaroslavenko conducted two choruses in Lviv, Sokil and Zoria, and helped organize (1906) the music publishing house *Torban, which he directed for more than three decades. His compositions include the opera *The Witch* and three operettas; pieces for piano, including songs of the Sich Riflemen; choral works to texts by T. Shevchenko, I. Franko, U. Kravchenko, and others; solo songs to texts by T. Shevchenko, I. Franko, and others; and church music. He is best remembered in Western Ukraine for his patriotic 'Sokil March' and the Ukrainian Plast (scout) anthems 'Flower of Ukraine' and 'Hey, Plastuny.'

Yaroslavska, Dariia [Jaroslavs'ka, Darija] (pseud of Dariia Stoliarchuk; née Borodaikevych), b 25 April 1905 in Stanyslaviv (now Ivano-Frankivske). Writer. Her first novel, *Polyn pid nohamy* (Wormwood Underfoot), appeared in Lviv in 1938. As a postwar émigré in the United States she has contributed to Ukrainian periodicals there and written six novels about the experiences of displaced

Daria Yaroslavka

Sylvester Yarychevsky

persons: *Pomizh berehamy* (Between Shores, 1953), *V obimakh Mel'pomeny* (In Melpomene's Embrace, 1954), *Ū N'iu-lork* (Her New York, 1959), *Povin'* (The Flood, 1964), *Ostriv Di-Pi* (DP Island, 1969), and *Pid chuzhi zori* (Toward Foreign Stars, 1971). A collection of her short prose, *Prapor* (The Banner), appeared in 1981.

Yaroslavsky, Petro [Jaroslavs'kyj], b 1750 in Okhtyrka, Slobidska Ukraine, d after 1810. Architect. He studied art at Kharkiv College and architecture under V. Bazhenov in Moscow (1773–5). From 1781 he was assistant architect of Kharkiv vicegerency (later gubernia). He prepared the city plans for Kharkiv and other towns of the vicegerency, and he designed the vicegerent's hall (1782–5), the food warehouse (1785–7), the post office (1804), and residential buildings in Kharkiv. Among his important works are the churches in Babai (1782), Okhtyrka (1783), Sumy (1790), Kostiantynivka (1797), and Parkhomivka (1808). He also designed government buildings in Kursk and in Chernihiv and Novhorod-Siverskyi. His buildings show the influence of the Ukrainian baroque and classical traditions.

Yarovy, Mykhailo [Jarovyj, Myxajlo], b 12 February 1864 in Moshny, Cherkasy county, Kiev gubernia, d 18 February 1940 in Kiev. Painter and graphic artist. A graduate of the Moscow School of Painting, Sculpture, and Architecture (1888), he painted portraits and genre paintings, such as *Inspection at the Betrothed's*, *Meeting of Cyclists*, *Lirnyk*, and *Two Generations* (1894). His works were displayed at exhibitions of the Moscow Society of Friends of the Arts and the Society of Kiev Artists (1891–1916). He was one of the first illustrators of A. Chekhov's stories (1903–9).

Yarovynsky, Borys [Jarovyns'kyj], b 11 March 1922 in Poltava. Composer and conductor. A graduate of the Moscow (1942) and Kharkiv conservatories (1949), he has served as a conductor and music consultant for a variety of music and drama groups in Kharkiv. His main compositions include the opera *Lieutenant Schmidt* (1970), the ballets *The Seasons* (1959) and *Maryna* (1967), the musical comedy *The Magic Ray* (1976), symphonies (1948, 1960, 1964, and 1980), oratorios, cantatas, concertos, film scores, art songs, and arrangements of Ukrainian folk songs. In 1979 he edited and reorchestrated the national anthem of the Ukrainian SSR and orchestrated K. Dankevych's opera *Bohdan Khmelnytsky*.

Yarrow (*Achillea*; Ukrainian: *derevii, kryvovnyk*). A perennial medicinal herb of the family Asteraceae, with clusters of small white or pink flowers and aromatic fernlike leaves. Of the 23 species in Ukraine the common yarrow or milfoil (*A. millefolium*) grows as a weed. Liquid extract of its leaves and inflorescence has anti-inflammatory and hemostatic properties; it was used in folk medicine to stimulate the appetite. Endemic to Ukraine is the yellow-flowered 'naked' yarrow (*A. glaberrima*), which grows only on the granite rocks in the Kamiani Mohyly Nature Reserve in Donetsk oblast.

Yarychevsky, Sylvester [Jaryčevs'kyj, Syl'vester] (pseud: Landsman, Leonyd, Shalvyr), b 14 January 1871 in Rohatyn, Galicia, d 30 March 1918 in Seret, Bukovyna. Writer. He studied at Lviv (1891–4) and Vienna (1896–1901) universities. In 1891 he joined the Ruthenian Radical party. In 1909 he moved to Seret to teach and to run a residence for Ukrainian students. During the First World War he was Seret's burgomaster. From 1891 on he published stories (including some of the first Western Ukrainian stories dealing with urban themes and Vienna), poems, articles, and feuilletons in many Western Ukrainian periodicals, mostly in *Bukovyna*. In 1906 he contributed translations of contemporary German poetry to *S'vit*. Published separately were his dramatic allegory *Nebesni spivtsi* (Heavenly Bards, 1902), his prose-poem collection *Sertse movchyt'* (The Heart Stays Silent, 1903), his novella collections *Na fyliakh zhyttia* (On Life's Waves, 1903) and *Mizh terniam i tsvitom* (Between Thorns and the Bloom, 1905), his poetry collection *Pestri zvuky* (Varied Sounds, 1904), his fairy tale in verse *Horemyr* (1906), and his five-act play *Pochatok kintsia* (Beginning of the End, 1913). A two-volume edition of most of his extant poetry, prose, and dramas (some previously unpublished), edited with an introduction by M. Laslo-Kutsiuk, was published in Bucharest (1977, 1978).

Yaryhina, Antonina [Jaryhina], b 8 March 1908 in Kiev. Ballerina and pedagogue. She completed study at the Kiev (1924) and Leningrad (1929) choreography schools, and then danced in the opera and ballet theaters in Kiev (1924–32 and 1936–41), Odessa (1932–5), and Lviv (1944–6). She taught at the Odessa (1932–5) and Kiev (1946–51) choreography schools and at the Kiev Institute of Theater Arts (1951–72).

Yarylo [Jarylo]. The Rus' god of the spring sun, who awakens summer, love, and passion. Although extant accounts from Rus' times provide little information about Yarylo, they underline the fact that he was regarded as a major deity and a symbol of spring and rebirth. Many of his magical functions were transferred to *St George following the Christianization of Ukraine. Traces of the cult of Yarylo could be found in parts of Ukraine (particularly Podilia) until the early 20th century, most notably his ritual burial in the spring. Nevertheless, these were quite weak in Ukraine and actually better preserved in eastern and central Russia and parts of Belarus. Linguists have noted that the *yar* stem of Yarylo's name is used widely in the Ukrainian language, for a variety of words invoking light, warmth, or strength.

Yarymovych, Michael [Jarymovyč, Myxajlo], b 13 October 1933 in Bialystok, Poland. Ukrainian-American

Michael Yarymovych

Vasyl Yashchun

aeronautical engineer; fellow of the American Institute for Aeronautics and Astronautics and member of the American Astronautical Society, the French Academy of Air and Space, the NASA Advisory Council, the Shevchenko Scientific Society, and the Ukrainian Academy of Arts and Sciences. After studying at New York University and Columbia University (DE, 1959) he worked in private industry and for the US federal government. He was director of the NATO Advisory Group for Aerospace Research and Development, chief scientist of the US Air Force, deputy for requirements for research and development of the air force, technical director of the Manned Orbiting Laboratory Program, chief of systems engineering in NASA's Apollo Applications Program, and assistant director for flight systems in NASA's Office of Manned Spaceflight. In 1977 he joined Rockwell International Corporation and managed research and engineering programs involving the Space Shuttle, rocket propulsion, satellites, high-energy lasers, and military and executive aircraft. From 1981 he was in charge of advanced systems development for the corporation, and since 1986 he has been associate director of its Strategic Defense Center.

Yaryn, Viacheslav [Jaryn, V'jačeslav], b 3 October 1883 in St Petersburg, d 30 March 1968 in Kiev. Civil engineer and specialist in reinforced concrete; member of the Ukrainian SSR Academy of Construction and Architecture from 1954. He studied in St Petersburg and worked at railroad offices in Galicia and Kiev (1915–19). He taught at the Kiev Polytechnical Institute (1921–30) and the Kiev Civil-Engineering Institute (from 1930). He directed the construction of a bridge over the Dnieper River (1928–9).

Yaryzhka alphabet. The derogatory name for the Russian alphabet in which, according to the Ems Ukase (1876), all Ukrainian-language publications in the Russian Empire had to appear. This regulation remained in effect until 1905. The *yaryzhka* is named after *yery*, the name of the Russian letter ы. Its orthography was phonetic, with the exception of the etymological *jer (ѣ) at the end of words after a consonant.

Yasenysky, Volodymyr [Jasenyc'kyj], b 1844 in Sambir, Galicia, d 31 August 1934 in Chernivtsi. Judge and civic leader. In 1868 he was one of the founders of the

Prosvita society in Lviv. From 1873 he worked in Chernivtsi as an assistant judge and played an important role in developing Ukrainian institutions, such as Ruska Besida, the People's Home, and the Fedkovych Bursa. As a member of the municipal council (1890–1918) he defended the interests of the Ukrainian community. In 1915 he was elected to the General Ukrainian Council in Vienna.

Yashchun, Vasyl [Jaščun, Vasyl'] [Jaszczun, Wasyl], b 24 January 1915 in Shnyriv, Brody county, Galicia. Philologist, pedagogue, and poet; full member of the Shevchenko Scientific Society. In 1949, after studying Slavic philology at Karl Franz University in Graz (PH D, 1948), he emigrated to the United States, where he served as a professor of Slavic languages and literatures at Pittsburgh University (1965–81) and was a member of its senate. His scholarly works deal mainly with linguistics and include *A Dictionary of Russian Idioms and Colloquialisms* (1967) and *Hovir Bridshchyny* (The Dialect of Brody County, 1972). His published collections of verse include *Diisne i mriine* (The Real and the Dreamed, 1981), *Z nvy i dorih zhyttia* (From the Fields and Roads of Life, 1986), and *Do svitla* (To the Light, 1988). The 216th vol of *ZNTSh* (1991) contains the selected papers of Yashchun in Slavic studies.

Yashchurzhytsky, Khryzant [Jaščuržyns'kyj, Xryzant], b 1852, d ? Archeologist and ethnographer. He studied at Kiev and Warsaw universities and then taught Russian in Odessa's secondary schools. He was a member of the Odessa Hromada. He published a study of J. Hus's teachings and a comparative study of Ukrainian and Russian folk songs (1880); articles on Ukrainian folk songs, tales, and rituals in *Kievskaja starina* (1888–98) and *Iuzhnyi sbornik* (Southern Anthology, 1892); and archeological notes in *Izvestiia Tavricheskoj uchenoi arkhivnoi komissii* and *Iz mira iskusstva i nauki* (From the World of Art and Science, 1887).

Yashek, Mykola [Jašek], b 23 November 1883 in Paniutyn, Pavlohrad county, Katerynoslav gubernia, d 17 August 1966 in Kharkiv. Bibliographer and literary critic. A graduate of Kharkiv University (1909), he worked as a librarian and bibliographer in various academic institutions in Kharkiv. In the 1920s he published a bibliography of materials in the years 1903–21 (1921) and over 10 articles in Shevchenko studies in *Znannia*, *Chervonyi shliakh*, and other journals. Together with A. *Leites he compiled *Desiat' rokiv ukrains'koi literatury (1917–1927)* (Ten Years of Ukrainian Literature [1917–27], 2 vols, 1928), an important biobibliographic and documentary source and his most important contribution to Ukrainian bibliography. In 1929, with Yu. *Mezhenko, he copublished a bibliography of translated literature. His last major work was a bibliography of V. Lenin's writings on culture and literature (1933). During the Stalinist repressions Yashek stopped publishing; he was rehabilitated in 1963, and published an article on Shevchenko in 1964.

Yasians (*yasy*). Old Rus' name for the *Alans, ancestors of the Ossetes, a Sarmatian people who spoke a northern Iranian language. In the 1st centuries BC and AD they settled the expanses of Eastern European steppe lands between the Dnieper River and Subcaucasia. They established their own distinct culture, of which traces remain in burial

mounds and catacombs of the 2nd to 4th centuries. Initially the Yasians were nomadic shepherds and gatherers, but later they settled and established a reputation for artisanship in ceramics, jewelry, and metalworking. In the 4th century they were ruled by the Huns, and some Yasians moved westward with the Vandals (as far as Spain and northern Africa); others moved to the Caucasian interior. The territories of the remaining Yasians were occupied by Avars in the 6th century and by Khazars in the 7th to 10th centuries. In the 9th and 10th centuries Christianity spread among the Yasians from Byzantium and Georgia. They recognized the suzerainty of Sviatoslav I Ihorevych in 963. In 1024 they fought alongside Mstyslav I Volodymyrovych against Yaroslav the Wise, only to be conquered by Mstyslav in 1029. In the 13th century a new wave of Yasians appeared in the Black Sea coastal steppes and established settlements in the Crimea and Moldavia (the city of Iași was probably named after them). Their state and culture were annihilated by the Mongols. Archaeological research confirms that they maintained wide-ranging international relations with their neighbors, including Kievan Rus'.

A. Zhukovsky

Lev Yasinchuk

Yasinchuk, Lev [Jasinčuk], b 30 July 1882 in Bilobozhnytsia, Chortkiv county, Galicia, d 12 October 1963 in Brooklyn, New York. Pedagogue and community activist. He taught in a succession of village schools in Galicia and Bukovyna in 1905–14, having been dismissed several times for his community work. In 1923, after serving in the Ukrainian Galician Army and then being arrested twice in Bukovyna under the Rumanian regime, he moved to Galicia. There he served as administrative director of *Ridna Shkola in 1923–39 and played an important role in its organizational expansion. He also served as the last head of the Union of Ukrainian Private Office Employees and traveled twice to Canada and the United States as a representative of Ridna Shkola. He was inspector of Polish schools in Lviv (1939–40) and then of elementary schools

in Galicia (1941–4). He emigrated to Austria in 1945 and to the United States in 1949. His writings include the memoirs of his travels abroad, *Za okeanom* (Across the Ocean, 1930); *50 lit Ridnoi shkoly, 1881–1931* (50 Years of Ridna Shkola, 1881–1931, 1931); *Ridna shkola v idei i zhytti* (Ridna Shkola in Concept and in Reality, 1934); *Ukrains'ke doshkylia* (Ukrainian Preschool, 1936); and submissions about education in Bukovyna and Lviv to regional and municipal histories. He also wrote numerous articles for professional journals in Galicia and Bukovyna and for newspapers in Kiev (*Rada*), the United States (*Svoboda*), Canada, and Argentina.

Yasinia [Jasinja]. v-5. A town smt (1986 pop 7,900) on the Chorna Tysa River in Rakhiv raion, Transcarpathia oblast. It was first mentioned in a historical document in 1583. On 9 November 1918 the Hutsul Republic, which was part of the Western Ukrainian National Republic, was declared in Yasinia. Today the town is a manufacturing center for forest products and a tourist center with three tourist bases. It has a wooden church built in 1824.

Yasnikov, Aleksandr [Jasnikov], b 25 July 1923 in Milovskoe, Vladimir gubernia, Russia. Chemist; AN URSS (now ANU) corresponding member since 1969. A graduate of the Ivanovo Chemistry and Technology Institute (1947), he joined the ANU Institute of Organic Chemistry in 1950. His research has dealt with the mechanism of chemical and biochemical reactions and the synthesis of organic analogs mimicking the activity of enzymes in photosynthesis processes. He established the mechanism of phosphorylation in plant chloroplasts.

Yasnopolsky, Leonid [Jasnopol's'kyj], b 1 February 1873 in Kiev, d 23 May 1957 in Moscow. Economist; full member of the VUAN and AN URSS (now ANU) from 1925; son of M. *Yasnopolsky. A graduate of St Petersburg University (1895), he taught economics there (1895–1902). After the Revolution of 1917 he worked for the government of the UNR and served as its economic consultant in negotiations with the Bolsheviks. He also taught at Kiev University and the Kiev Institute of the National Economy. In 1926–30 he headed the VUAN Commission for the Study of the Productive Resources of Ukraine and edited many of its publications. After the destruction of the VUAN he moved to Moscow. He returned to Kiev only after the war, to work at the ANU Institute of Economics. Yasnopolsky was a prolific writer. His more important works are *Ocherki russkogo biudzhethnogo prava* (Essays on Russian Budgetary Law, 1912), *Vosstanovitel'nyi protsess v nashem denezhnom obrashchenii i zadachi valiutnoi politiki* (The Reconstruction Process in Our Monetary Circulation and the Tasks of Monetary Policy, 1927), and studies of the mineral resources and economic development of the Donets and Dnieper basins.

Yasnopolsky, Mykola [Jasnopol's'kyj], b 1846 in Kiev, d 1920? Economist and statistician. After graduating from the law faculty of Kiev University he taught political economy at the Novo-Aleksandriia Agricultural and Forestry Institute, the Nizhen Lyceum, and the Kiev Higher Courses for Women. Then he served as a professor of commercial law at Kiev University (1889–1914). His major work was the two-volume *O geograficheskom raspredelenii gosu-*

darstvennykh dokhodov i raskhodov Rossii (On the Geographic Distribution of State Income and Expenditures in Russia, 1891–7), which showed how the peripheral territories were exploited by the tsarist capitals. He also wrote a number of important articles on the economic backwardness and future of Ukraine (1871), the railway lines from Ukraine to the Baltic (1868), and Ukraine's trade with Poland and the Baltic countries (1873).

Yasny, Oles. See Savytsky, Oleksii.

Yastreb, Liudmyla [Jastreb, Ljudmyla], b 10 April 1945 in Krasnikovka, Saratov oblast, Russia, d 8 August 1980 in Odessa. Painter. She graduated from the Odessa Art School (1964) and worked for the Art Fund. She took part in some of the exhibitions held in private apartments in Odessa in the 1970s and in the 1975 and 1976 exhibitions of Ukrainian nonconformist artists held in a private apartment in Moscow. Yastreb organized a solo exhibition of 100 of her paintings in her own studio in 1976. Women, her favorite subject, dominated her work. Her early paintings, such as *Women in Red, Blue, and Yellow* (1975), tended to be figurative but were not realistic. Later her work became more and more abstract, as in *Large Bathers* (1979). Some of her best canvases were painted near the end of her brief life. They were large overall compositions, full of light and painted with spontaneous, energetic brush strokes in the manner of American abstract expressionism (eg, *Bright Composition*, 1978). A posthumous exhibition of her works was organized in 1983. The studio of Yastreb and her husband, V. *Maryniuk, was a gathering place for Ukrainian artists in Odessa.

Yastrebov, Fedir [Jastrebov], b 28 November 1903 in Sudogda, Vladimir gubernia, d 30 June 1973 in Kiev. Historian. He graduated from Kiev University (1926) and then worked at the All-Ukrainian Association of Marxist-Leninist Scientific Research Institutes, the VUAN (in the Department of Marxism-Leninism), and the AN URSS (now ANU) Institute of History (1936–63). He researched the sociopolitical history of Ukraine in the 19th century, especially Ukrainian revolutionary movements. He also coauthored general surveys of Ukrainian history, including *Kyivs'ka Rus' i feodal'ni kniazivstva XII–XIII st.* (Kievan Rus' and the Feudal Principalities of the 12th–13th Centuries, 1939; with K. Huslysty), *Narys istorii Ukrainy* (Outline of the History of Ukraine, 1942; with L. Slavin and K. Huslysty), and *Istoriia Ukrainy: Korotkyi kurs* (History of Ukraine: A Brief Course, 1941; with S. Belousov, K. Huslysty, O. Ohloblyn, M. Petrovsky, and M. Suprunenko), in which he wrote the chapters on Ukraine in the early 19th century and on the development of capitalism in Ukraine. In 1947 he was criticized by the CC CP(B)U for 'examining the history of the Ukrainian people independently from the history of other peoples of the Soviet Union.' After the Second World War Yastrebov contributed chapters on 18th- and 19th-century Ukraine to two editions of *Istoriia Ukrainy'koi RSR* (The History of the Ukrainian SSR, vol 1, 1953; 2nd edn 1967) and chapters on the sociopolitical movements in 19th-century Kiev to *Istoriia Kyieva* (History of Kiev, vol 1, 1960).

A. Zhukovskiy

Yastrebov, Vladimir [Jastrebov], b 18 July 1855 in Krivaia Luka, Samara gubernia, Russia, d 2 January 1899

in Kherson. Ethnographer and archeologist. After graduating from the University of Odessa (1876) he taught history in Yelysavethrad, conducted archeological research in Kherson gubernia, and collected ethnographic material. He published articles on the archeological treasures of Kherson gubernia (1893), Chersonese Taurica (1883), and the kurhans in Smila, and two collections – *Maloruskiiia prozvishcha Khersonskoi gubernii* (Little Russian Surnames of Kherson Gubernia, 1893) and *Materialy po etnografii Novorossiiskago kraia* (Materials in the Ethnography of New Russia Krai, 1894).

Yuliiian Yastremsky

Yastremsky, Yuliiian [Jastrem's'kyj, Julijan] (Jastremsky, Julian), b 1910 in Winnipeg. Architect; full member of the Shevchenko Scientific Society. After graduating from the University of Manitoba (1932) and Columbia University (1942) he worked as an architect at the National Housing Agency and the Bethlehem Steel Co in New York. He set up his own firm in New York in 1947 and went on to erect buildings such as the Cathedral of the Immaculate Conception and Christ the King Church in Philadelphia, St John the Baptist Church in Newark, New Jersey, a traditional Ukrainian wooden church in Barnesboro, Pennsylvania, the Holy Trinity Church in Westfield, New Jersey, St Mary's Church in Vancouver, British Columbia, St John the Baptist Cathedral in Ottawa, Ontario, the building of the Ukrainian National Association in Jersey City, New Jersey, St Josephat's Seminary in Washington, DC, and St Basil's Seminary in Stamford, Connecticut. A number of his articles on Ukrainian church architecture were published in *Arka* (1947–8).

Yastrub. See Karpenko, Dmytro.

Yasynovsky, Mykhailo [Jasynov's'kyj, Myxajlo], b 13 May 1899 in Odessa, d 29 August 1972 in Odessa. Internal medicine specialist; full member of the USSR Academy of Medical Sciences from 1963. After graduating from the Odessa Medical Institute in 1922, he taught there (as professor from 1934). He was chief physician of internal medicine of the Black Sea Fleet (1943–5). From 1959 he chaired a department of the Ukrainian Scientific Research Institute of Health Resort Science in Odessa. His publications dealt with viral hepatitis, rheumatism, and disorders of the blood-forming organs. A biography of him was published in Kiev in 1977.

Yasynsky, Mykhailo [Jasyn's'kyj, Myxajlo] (Michail Janskiij), b 11 October 1862 in Mezhyrich, Kaniv county,

Kiev gubernia, d 25 September 1935 in Nis, Yugoslavia. Jurist and legal historian. He graduated from Kiev University and became a docent there and then a professor in 1901. He was a member of the *Kiev Archeographic Commission and edited two collections of documents on 16th- to 18th-century courts for its *Arkhiv Iugo-Zapadnoi Rossii* (Archives of Southwestern Russia). He also served as secretary of the Historical Society of Nestor the Chronicler. By 1917 he had published several works on *Lithuanian-Ruthenian law, including studies of local statutes of the Lithuanian-Ruthenian state (1897), the court system (1901), and the Lutske Tribunal (1900), and works on the peasant movement in Russia (1890) and the *zakupy (1904). After the Revolution of 1917 Yasynsky emigrated to Yugoslavia, where he became a professor at Ljubljana University and wrote on Serbian and Slovenian legal history. Yasynsky's archives are preserved at the Central Scientific Library of the ANU and in Prague. Bibliographies of his works were published in St Petersburg in 1904 and Belgrade in 1931.

Yasynsky, Mykhailo [Jasyns'kyj, Myxajlo], b 21 November 1889 in Kiev, d 12 May 1967 in Kiev. Bibliographer and historian. He graduated from Kiev University (1914), and after the Revolution of 1917 he directed the Ukrainian division of the National Library of Ukraine (now the *Central Scientific Library of the ANU). He published articles on bibliographic methodology and Ukrainian bibliography in *Bibliotechnyi zbirnyk* (1927–8), *Metodolohichni zbirnyk* (1927), and elsewhere. He was arrested during the Stalinist terror in 1936 but was eventually released and rehabilitated. In 1965 he published a biography of the ethnographer M. Komarov.

Metropolitan Varlaam
Yasynsky

Yasynsky, Varlaam [Jasyns'kyj], b ca 1627 in Right-Bank Ukraine, d 22 August 1707. Orthodox churchman and Kievan metropolitan. He was rector of the Kievan Mohyla College (1665–73) and hegumen of the Kiev Epiphany Brotherhood (1665–73), St Michael's Golden-Domed (1673–7), and St Nicholas's (1680–4) monasteries. As hegumen of the Kievan Cave Monastery (1684–90) he defended the independence of the monastery from the Kievan metropolitan and accepted stauropigion from the Moscow patriarch. During his tenure as Kievan metropolitan (1690–1707) he did much to raise the level of education among the clergy in his see. With the support of Hetman I. Mazepa he also was able to defend many rights and privileges for the Kiev metropol vis-à-vis Moscow, and to improve the teaching and the level of students at the Kievan Mohyla College, which was given the status of

an academy in 1694. But he was not able to prevent the spread of the Church Union of Berestia to the remaining three Orthodox eparchies in Right-Bank Ukraine, or to stem the influence of the Moscow patriarchate in Chernihiv eparchy.

Yasynuvata [Jasynuvata]. V-18, DB III-3. A city (1989 pop 39,300) on the Kryvyi Torets River and a raion center in Donetske oblast. It was founded as a railway station in 1872 and was given city status in 1938. Today the city is an important railway junction. Its machine-building and metalworking plants serve the railway industry. It also manufactures reinforced-concrete products.

Yatran River [Jatran']. A right-bank tributary of the Syniukha River that flows for 104 km through Cherkasy and Kirovohrad oblasts and drains a basin area of 2,170 sq km. Two water reservoirs and a hydroelectric station are located on the river, which is also used for industry, water supply, irrigation, and fishing.

Yatsenko, Oleksander [Jacenko], b 19 January 1898 in Hovtva, Kobeliaky county, Poltava gubernia, d 31 January 1978 in Kharkiv. Biologist. A graduate of the Kharkiv Agricultural Institute (1928), he worked at the Scientific Research Institute of Animal Husbandry of the Forest-Steppe and Polisia of the Ukrainian SSR (1931–78). He codeveloped the Lebedyn breed of *great horned cattle.

Yatsenko, Oleksander [Jacenko], b 11 October 1929 in Snizhne, Donets okruha, d 6 January 1985 in Kiev. Philosopher. A graduate of Kiev University (1954), he taught at the Zhytomyr Agricultural Institute (1959–66) and Kiev University (1966–9) and was a senior associate at the AN URSR (now ANU) Institute of Philosophy (1969–80). From 1980 he headed the philosophy department of the Institute for the Upgrading of Social Science Lecturers at Kiev University. A specialist in Marxism-Leninism as a worldview, he wrote, in Russian, on goal positing and values (1977), on the worldview content of the categories and laws of the materialist dialectic (1981, coauthor), and on the humanism of the dialectico-materialist worldview (1984, coauthor).

Yatsenko, Volodymyr [Jacenko], b 21 April 1915 in Savkivka, Zolotonosha county, Poltava gubernia. Painter and art scholar. A graduate of the Kharkiv Art Tekhnikum

Volodymyr Yatsenko: *Wind* (1969)

(1937), he completed his studies at the Kharkiv Art Institute while it was based in Samarkand (1942). He has served as director of the Kharkiv Art Museum (1944–52) and the Kiev Museum of Ukrainian Art (1970–88). He has painted landscapes and historical canvases, such as *T. Shevchenko among Peasants* (1940), *Ustym Karmaliuk* (1947), *On the Dnieper* (1957), *On Chernecha Hora* (1960), *New Buildings in Kiev* (1965), *Dnieper Banks* (1967), *Beginning of March* (1979), and *Native Fields* (1984). He wrote a book about M. Samokysh (1945) and edited an album of his works (1979).

Rev Ivan Yatsentii

Mykhailo Yatskiv

Yatsentii, Ivan [Jacentij], b 7 March 1896 in Cherniv, Rohatyn county, Galicia, d 9 December 1970 in Oshawa, Ontario. Evangelical pastor and community leader. After emigrating to the United States he studied theology at the Bloomfield Seminary in New Jersey. He served as a pastor in Passaic, New Jersey, and, from 1939, in Oshawa. Yatsentii was first elected vice-president of the *Ukrainian Evangelical Alliance of North America in 1926. He served for many years on the executive in a variety of positions, including that of president (from 1964). He was also a long-time member of the presidia of the Ukrainian Canadian Committee and the World Congress of Free Ukrainians.

Yatskiv, Mykhailo [Jackiv, Myxajlo] b 5 October 1873 in Lesivka, Stanyславiv county, Galicia, d 9 December 1961 in Lviv. Writer; member of the modernist group *Moloda Muza. Yatskiv began his literary career in 1900 with a collection of prose miniatures, *V tsarstvi satany: Ironichno-sentymental'ni kartyny* (In the Kingdom of Satan: Ironic-Sentimental Scenes), which was influenced by Western modernists, and in particular C. Baudelaire and E.A. Poe and their predilection for the 'darker' elements in life. Yatskiv transformed these motifs into naturalistic sketches of the brutality of life. Besides other collections of miniatures and short stories (*Kazka pro persten'* [Tale of a Ring, 1907], *Chorni kryla* [Black Wings, 1909], *Adagio Consolante* [1912]) Yatskiv wrote the novelette *Ohni horiat'* (Fires Are Burning, 1902), the social study *Blyskavytsi* (Lightning Rods, 1913), and the novel *Tanets' tinei* (Dance of Shadows, 1916–7; repub as *V labetakh* [In the Clutches, 1956]). His longer works are on the whole weaker than his miniatures, especially the pretentious *Blyskavytsi* and the rather publicistic *Tanets' tinei*, where there is more disenchantment with the bureaucratic milieu of the Dnister Insur-

ance Society, where Yatskiv worked, than artistic creativity. In 1921 Yatskiv edited the newspaper *Ridnyi krai*, and after the Soviet takeover of Western Ukraine he worked in the Lviv Library of the AN URSS (now ANU). A volume of his collected works, *Muza na chornomu koni* (Muse on a Black Horse), appeared in 1989.

D.H. Struk

Yaroslav Yatskiv

Petro Yatsyk (Jacyk)

Yatskiv, Yaroslav [Jackiv, Jaroslav], b 25 October 1940 in Danylche (now part of Kalynivka), Rohatyn raion, Stanislaviv oblast. Astronomer; AN URSS (now ANU) corresponding member since 1979 and full member since 1985. A graduate of the Lviv Polytechnical Institute (1960) and Moscow University, he worked at the Poltava Gravimetric Observatory (1960–2). He has been at the ANU Main *Astronomical Observatory near Kiev since 1962, and became its director in 1975. A specialist in astrometry, geodynamics, and earth rotation, he has developed novel methods of measuring earth rotation using laser beams from artificial satellites; has made very accurate measurements of the earth's poles; has compiled a catalog of 'inherently weak' stars; and was the first scientist to analyze completely the free nutation of the earth. He headed the Soviet program for tracking the comet Galileo during its recent flyby. Yatskiv has been vice-president of the International Astronomy Union (1982–9), head of the ANU Commission for Space Research, head of the Science and Culture Committee for Relations with Ukrainians Abroad, and chief editor of the journal *Kinematika i fizika nebesnykh tel*.

Yatsko [Jac'ko], b and d ? Icon painter in Vyshnia, Galicia, in the middle of the 17th century. He worked in the Boiko region. He painted the iconostasis of the church in Dnistryk, near Staryi Sambir (1653), and the icons *The Last Judgment* (1656) and *Crucifixion* (1656) in the church in Domashyn, Transcarpathia.

Yatsyk, Petro [Jacyk] (Jacyk, Peter), b 7 July 1921 in Synvidsko Vyzhnie, Stryi county, Galicia. Businessman, civic activist, and patron of Ukrainian learning. After emigrating to Canada in 1949, he established a successful building and land development firm. He was a founding member of the Patronat NTSh and a supporter of the *Entsyklopediia ukraїnoznavstva* project in Sarcelles. From the 1960s he assisted the Harvard Ukrainian Research Institute by donating money, raising funds, and serving on the institute's visiting committee. He financed the Peter

Jacyk Collection of Ukrainian Serials at the University of Toronto Library. In 1989 the Peter Jacyk Centre for Ukrainian Historical Research was established at the University of Alberta with a one-million-dollar donation from Yatsyk and a double matching grant from the province of Alberta. Through the Peter Jacyk Education Foundation he has supported other initiatives in Ukrainian scholarship and education, including the endowment of the Peter Jacyk Lectureship in Ukrainian Studies at the University of London (1991).

Kostiantyn Yatsymyrsky

Yakiv Yatsynevych

Yatsymyrsky, Kostiantyn [Jacymyrs'kyj, Kostjantyn] (Yatsimirsky, Konstantin), b 4 April 1916 in Polohy, Haysyn county, Podilia gubernia. Analytical, inorganic, and physical chemist; AN URSR (now ANU) corresponding member since 1961 and full member since 1964. A graduate of Tashkent University (1941), he taught at the Ivanovo Chemistry and Technology Institute (1946–62), directed a laboratory at the ANU Institute of General and Inorganic Chemistry (1962–9), became a professor at Kiev University in 1962, directed the ANU Institute of Physical Chemistry (1969–82), and headed a department there from 1983. From 1963 he was a member of the ANU presidium and an academic secretary, and from 1965 he was editor in chief of the journal *Teoreticheskaia i eksperimental'naia khimia*. Yatsymyrsky's research has dealt primarily with the coordination chemistry of metal complexes, especially thermochemistry, and the use of spectroscopic and radiospectroscopic methods of determining their structure and bonding parameters. He studied the structure and properties of lanthanide complexes in aqueous and nonaqueous media, invented an original method for determining stability constants, and devised original catalytic methods for the determination of trace quantities of various elements. His most recent work was in bioinorganic chemistry. He has published over 280 papers and 5 books, among them *Kinetic Methods of Analysis* (English trans 1966) and *Instability Constants of Complex Compounds* (coauthor; English trans 1960).

S. Trofimenko

Yatsynevych, Yakiv [Jacynevych, Jakiv], b 27 October 1869 in Bila Tserkva, Kiev gubernia, d 25 April 1945 in Kropotkin, Stavropol' krai. Conductor, composer, and teacher. A student at the Kiev Theological Seminary, he took private music lessons with M. Lysenko. He served as

accompanist and assistant conductor of Lysenko's chorus in Kiev (1891–1904), conductor of the Kiev University Chorus (1899–1912), musical director of several Ukrainian theaters (1906–17), conductor of the Odessa Choral Association (1924–30), music teacher in Zaporizhia (1930–40), and folk ensemble director in Maikop (1940–5). His works include the symphony *The Year 1905*, the oratorio *Pieta* (text by P. Tychyna), instrumental music for violin and piano, choral songs (to texts by B. Hrinchenko, O. Oles, Lesia Ukrainka, and others), solo songs (to texts by Lesia Ukrainka and others), and church music.

Yatvingians (*yatvingy, yatviahy*; Polish: *Jacwingowie*). One of four Lettish tribes that lived on the frontiers of Kievan Rus', northwest of the Ukrainian tribes. Ethnically similar to the Lithuanians, the Yatvingians settled mainly between the middle Neman and the upper Narva rivers, in a territory known as Sudovia. They are first mentioned in a treaty between Rus' and Byzantium dated 944. The Yatvingians were warlike and frequently engaged the armies of Kievan princes. The Kievan campaigns against them included those of Volodymyr the Great (983), Yaroslav the Wise (1038, 1040, 1044), and Volodymyr Monomakh (1112–13). The Galician-Volhynian princes Roman and Danylo, allied with the princes of Mazovia, finally subdued them. From 1283 most of the Yatvingian territory was occupied by the *Teutonic Knights. The rest became part of the Grand Duchy of Lithuania, and its inhabitants were assimilated into the Lithuanian people; others had been Polonized (in Mazovia) by the 15th century.

Rev Mytrofan Yavdas

Yavdas, Mytrofan [Javdas'], b 17 June 1903 in Yaky-move, Myrhorod county, Poltava gubernia, d 29 December 1966 in Waterbury, Connecticut. Orthodox priest and church leader. He studied at the Poltava Institute of People's Education before being ordained a priest in the Ukrainian Autocephalous Orthodox Church (UAOC) in 1925. In 1929 he was arrested by the GPU and sentenced to seven years in a hard labor camp. He returned to Ukraine in 1937. During the wartime German occupation of Ukraine he assisted in the rebirth of the UAOC in the Dnipropetrovske region before fleeing to the West. As a post-war refugee in Germany he joined the UAOC (Conciliar) in 1947, served as administrator of the church in Western Europe from 1950, organized pastoral courses, and published the church's bulletin. Yavdas moved to the United States in 1957. There he served as pastor in Waterbury,

helped organize the Metropolitan Vasyl Lypkivsky Orthodox Brotherhood, and edited its organ *Tserkva i zhyttia*. In 1956 he published *Ukrains'ka Avtokefal'na Pravoslavna Tserkva/The Ukrainian Autocephalous Orthodox Church, 1921–36*.

The former town hall (now a secondary school) in Yavoriv

Yavoriv [Javoriv]. IV-4. A town (1989 pop 14,200) on the Shklo River and a raion center in Lviv oblast. It was first mentioned in a historical document in 1408, when it was under Polish rule. The town developed into a prosperous manufacturing and trading center on the Lviv–Jaroslaw trade route, and in 1569 it was granted the rights of *Magdeburg law. After being captured by anti-Polish rebels in 1648, the town was retaken and fortified by its Polish owner. With the partition of Poland in 1772, it was annexed by Austria. Many German colonists settled there. In the 19th century Yavoriv became a county center. The development of the railways ushered in its economic decline. The town maintained its reputation for fine handicrafts, however. In the interwar period it was under Polish rule. Today the town is an industrial center with a plastics and a canning factory. It has a historical and an ethnographic museum and two wooden churches, the Dormition Church (17th century) and the Church of the Nativity of Christ, with a bell tower (1760).

Yavorivsky, Volodymyr [Javoriv's'kyj], b 11 October 1942 in Teklivka, Kryzhopil raion, Vinnytsia oblast. Writer and political figure. He graduated from Odessa University (1963) and has worked as a newspaper editor, television scenarist, and, most recently, deputy chief editor of the Kiev journal *Vitchyzna*. As a writer he gained prominence in the late 1970s. He is the author of the prose collections *A iabluka padaiut'* (Meanwhile Apples Fall, 1968), *Hrono styhloho vynohradu* (A Cluster of Ripe Grapes, 1971), *Kryla, vyhostreni nebom* (Wings Sharpened by the Sky, 1975), *Tut, na zemli* (Here, on Earth, 1976), and *Z vysooty veresnia* (From the Height of September, 1984); the publicism collections *I v mori pam'iataty dzherelo* (Even in the Sea to Remember the Source, 1980) and *Pravo vlasnoho imeni* (The Right of One's Own Name, 1985); and the novels *Lantsiuhova reaktsiia* (Chain Reaction, 1978), *Ohlian'sia z oseni* (Look Back from Autumn, 1979), *Avtoportret z uivavy* (Self-Portrait from Imagination, 1981), *A teper – idy* (And Now, Go, 1983), and *Vichni Kortelisy* (Eternal Kortelisy,

Volodymyr Yavorivsky

Dmytro Yavornytsky

1988). His recent work about the Chernobyl nuclear disaster appeared in English translation under the title 'Maria and Wormwood at the End of the Century' in *Soviet Literature* (1988, no. 2). In the late 1980s he was active in the Ukrainian national revival and was elected as a deputy to the Ukrainian parliament, where he has belonged to the opposition group *Narodna Rada* and chaired the commission on the consequences of the Chernobyl disaster.

Yavorivsky, Yevhen [Javoriv's'kyj, Jevhen], b 19 September 1893 in Kolomyia, Galicia, d 11 November 1954 in Detroit. Journalist and civic activist. He completed philological studies at Vienna University in 1914. After the First World War he taught secondary school in Chortkiv and Yavoriv (1922–30). After being dismissed from his teaching position for political reasons he worked in Lviv for the newspaper *Novyi chas* and for Samoosvita publishers. He was a member of the chief executive of the Ukrainian Socialist Radical party and was active in its youth organization, *Kameniar*. After emigrating to the United States in 1950, he joined the editorial board of *Vil'na Ukraina* and a number of Ukrainian civic and cultural organizations. In addition to journalistic articles he wrote a book on Greek mythology, the collection of short stories *Sered kul' i granat* (Amid Bullets and Grenades, 1922), the tragedy *Zradnyk* (Traitor, 1923), and the novel *Zaky more perelechu* (By the Time I Fly across the Sea, 1938).

Yavornytsky, Dmytro [Javornyc'kyj] (Evarnitsky), b 7 November 1855 in Sontsivka (now Borysivka), Kharkiv county, d 5 August 1940 in Dnipropetrovske. Historian, ethnographer, and lexicographer; full member of the Shevchenko Scientific Society from 1914 and of the VUAN from 1929. He studied at Kharkiv University (1877–86) and taught Russian history in gymnasiums in Kharkiv (1881–6) until he fell out of favor with the local authorities because of his 'separatist' (pro-Ukrainian) tendencies. He then taught in St Petersburg (1896) and Moscow (as a lecturer on the history and archeology of the Ukrainian Cossacks at Moscow University from 1897) and became director of the Museum of Antiquities of Katerynoslav Gubernia (later the *Dnipropetrovske Historical Museum) in 1902, a position he held for the rest of his life. He also worked at the Dnipropetrovske Institute of People's Education (1920–33, as head of its Chair of Ukrainian

Studies in 1925–9) and co-ordinated archeological and documentational work undertaken in the areas to be flooded by the building of the Dnieper Hydroelectric Station (1927–32).

Yavornytsky's scholarly interest, the history of the Zaporozhian Cossacks, earned him the nickname 'Father of the Zaporozhians.' During the 1880s he wrote many articles for *Kievskaia starina* and the preface for the 1885 edition of T. Shevchenko's *Haidamaky*. He published several major works about the Cossacks, including *Ivan Dmitriievich Sirko* (1894) and *Istoriia zaporozhskikh kozakov* (History of the Zaporozhian Cossacks, 3 vols, 1892–7; 2nd trans edn: *Istoriia zaporiz'kykh kozakiv*, 1990–1). His *Iz ukrainskoi stariny* (From the Ukrainian Past, 1900; 2nd trans edn: *Z ukrains'koi starovyny*, 1991) was illustrated by S. Vasylykivsky and M. Samokysh. He used both primary and archival sources in his research and published a selection of them as *Istochniki dlia istorii zaporozhskikh kozakov* (Sources for the History of the Zaporozhian Cossacks, 2 vols, 1903). As director of the Katerynoslav museum he undertook numerous field expeditions and archeological digs, by means of which he increased the museum holdings from 5,000 to 80,000 items; after his death the museum was named in his honor. He also wrote several regional studies, including *Zaporozh'e v ostatkakh stariny i predaniakh naroda* (The Zaporizhia in Relics of the Past and Legends of the People, 1888; illus by I. Repin) and *Do istorii stepovoï Ukraïny* (Toward the History of Steppe Ukraine, 1929).

Yavornytsky also had a strong interest in ethnography, folklore, and lexicography. He published the valuable collection *Malorossiiske narodnye pesni, sobrannye v 1878–1905 gg.* (Little Russian [Ukrainian] Folk Songs, Collected in 1878–1905, 1906; repub: *Ukrains'ki narodni pisni, naspivani D. Iavornyts'kym: Pisni ta dumy z arkhivu vchenoho* [Ukrainian Folk Songs, Collected by D. Yavornytsky: Songs and Dumas from the Archives of a Scholar, 1990]). He contributed to B. Hrinchenko's Ukrainian dictionary and published *Slovyk ukrains'koi movy* (Dictionary of the Ukrainian Language) as an addendum to it in 1920.

Yavornytsky was a friend of I. Repin, who painted his portrait as the scribe in his monumental *Zaporozhian Cossacks Write a Letter to the Turkish Sultan* (1886). Although his scholarly works were often criticized as romantic and unsystematic, his promotion of the Zaporozhian past influenced the development of national consciousness in Ukraine in his day. In the late 1980s and early 1990s there was a great upsurge of interest in Yavornytsky and his works in Ukraine.

 A. Makuch

Yavorsky, Boleslav [Javors'kyj], b 22 June 1877 in Kharkiv, d 26 November 1942 in Saratov, RSFSR. Musicologist, pianist, and educator. He graduated from the Kiev Music School (1898) and the Moscow Conservatory (1903), and served as professor of the Kiev Conservatory (1916–21) and the Lysenko Music and Drama Institute

(1918–21) and director of the People's Conservatory in Kiev (1917–21). He was appointed professor at the Moscow Conservatory (1938–42). His students included M. Leontovych, H. Verovka, M. Verykivsky, P. Kozytsky, V. Verkhovynets, and E. Skrypchynska. His musical theories are promulgated in *Stroenie muzykal'noi rechi* (The Structure of Musical Speech, 3 vols, 1908) and *Struktura melodii* (The Structure of Melody, 1929) and analyzed in G. McQuere's *Russian Theoretical Thought in Music* (1983). He also composed an opera, *The Tower of October* (1930), and some piano and vocal music.

Yavorsky, Fedir [Javors'kyj], b 1780 in Kiev, d 21 April 1828 in St Petersburg. Physician. After being educated at the Kievan Mohyla Academy and the St Petersburg Medico-Surgical Academy (1802–7), he worked as P. Zahorsky's assistant (1807–10) and became chief surgeon of the St Petersburg Admiralty Hospital (1813–21), chief physician of the Caucasian health resort (1821–4), and municipal physician of St Petersburg (1827–8). He performed the first successful ligation of the popliteal artery in the Russian Empire.

Yavorsky, Ivan [Javors'kyj], b 1856, d 23 April 1930 in Strilbychi, Sambir county, Galicia. Greek Catholic priest active in Galician civic and political life. A leading member of the National Democratic party, he served as a deputy to the Galician Diet and fought for the improvement of Ukrainian schools and the founding of a Ukrainian gymnasium in Stanyslaviv. He was an organizer of the agrarian strike in 1902 and of the mass campaign for a universal, secret, and direct vote to the Austrian parliament (1905–6). He founded many Prosvita reading rooms in Sambir county. In 1918–19 he was a member of the Ukrainian National Rada.

Matvii Yavorsky

Yavorsky, Matvii [Javors'kyj, Matvij], b 27 November 1885 in Korchmyn, Rava Ruska county, Galicia, d 3 November 1937. Historian; full member of the VUAN and the Belarusian Academy of Sciences from 1929. Yavorsky graduated in law from Lviv University (1910). A former officer of the Ukrainian Galician army, he joined the CP(B)U in 1920. Although originally trained in law, he became a Marxist historian, much influenced by the Russian historian M. Pokrovsky. He headed the historical section of the *Ukrainian Institute of Marxism-Leninism (UIML) and, from 1926, *Ukrholovnauka*, a body that supervised all scholarly work in Soviet Ukraine. He was also a member of the VUAN Presidium and the secretary of its Histor-

ical-Philological Division. Among his major works are *Narys istorii Ukraïny* (Outline History of Ukraine, 2 vols, 1923–4; repr, Adelaide, Australia 1986), *Narysy z istorii revoliutsiinnoi borot'by na Ukraïni* (Sketches of the History of the Revolutionary Struggle in Ukraine, vol 1, 1927; vol 2, pt 1, 1928), *Ukraïna v epokhu kapitalizmu* (Ukraine in the Epoch of Capitalism, 3 vols, 1924–5), and *Istoriia Ukraïny v styslomu narysi* (History of Ukraine in a Concise Outline, 1928). Veteran Ukrainian historians, such as D. Bahalii, considered his work too dogmatic and marred by the subordination of facts to theoretical constructs. Stalinist Party leaders and historians, however, began to criticize his work at the end of 1928, by charging that he gave primacy to national concerns over class, and that he viewed Ukrainian history as a process distinct from Russian history. His theory of the origins of Ukrainian communism was criticized with particular severity. The 11th Congress of the CP(B)U, held in June 1930, condemned the 'anti-Marxist theory of Yavorsky' and equated it with the national deviations of O. Shumsky, M. Khvylovy, and M. Volobuiev. Yavorsky was purged from the CP(B)U in 1930 and arrested in March 1931 and charged with membership in a fictitious underground military organization. He was exiled to a labor camp on the Solovets Islands, where he was executed by the NKVD in 1937. He was rehabilitated in 1989.

J.-P. Himka

Oleksa Yavorsky

Metropolitan Stefan Yavorsky

Yavorsky, Oleksa [Javors'kyj], b 25 March 1896 in Kotuziv, Pidhaitsi county, Galicia, d 11 April 1987 in Toronto. Lawyer and political and civic activist. A veteran of the Austrian army and the Ukrainian Galician Army in 1919, he worked as a notary upon his return to civilian life in 1920. At the same time he studied law at the Lviv (Underground) Ukrainian University and then at Cracow University (1925–9) and was active in various local organizations in Pidhaitsi. He belonged to the Ukrainian Military Organization and served as chairman of the county committee and as member of the Central Committee of the *Ukrainian National Democratic Alliance (UNDO). In 1928 and 1930 he was elected as a candidate of UNDO to the Polish Sejm. After opening his own law office in Pidhaitsi in 1935, he defended Ukrainian political activists in the courts. In 1944 he was entrusted with the welfare of the families of Division Galizien soldiers. In 1948 he emigrated to Canada, where he was active in émigré political organizations.

Yavorsky, Stefan [Javors'kyj] (secular name: Semen), b 1658 in Yavoriv, Galicia, d 27 November 1722 in Moscow. Orthodox hierarch, theologian, poet, and philosopher. A graduate of the Kievan Mohyla College (ca 1684), he completed his education in Polish Jesuit colleges: he studied philosophy in Lviv and Lublin and theology in Poznań and Vilnius. After returning to Kiev in 1687, he renounced Catholicism, became an Orthodox monk (1689), and taught rhetoric (1690), philosophy (1691–3), and theology (1693–8) at the Mohyla College. He was hegumen of St Nicholas's Monastery in Kiev from 1697; in 1700 he was appointed metropolitan of Riazan and Murom in Russia, and on 1 December 1701, exarch in Moscow of the Russian Orthodox church, by Emperor Peter I. Yavorsky helped Peter to reform the church and education. Eventually his defense of church autonomy, criticism of Peter, opposition to T. *Prokopovych, and intolerance of Protestantism cost him the tsar's favor. In 1712 he was forbidden to preach, and in 1718 he was forced to live in St Petersburg and subjected to constant harassment and political inquiry. In 1721 Peter appointed him president of the *Holy Synod, an institution Yavorsky abhorred. Yavorsky wrote religious verses and panegyrics (eg, to Hetman I. Mazepa and Peter I), polemical treatises, and baroque sermons. His major work is the anti-Protestant dogmatic treatise *Kamen' very ...* (The Faith's Rock ..., written 1718, published 1728, and reprinted 1729, 1730, 1749, and 1841–2). In his philosophical lectures in Kiev he presented the scholastic systems of logic, physics, and metaphysics; he often sided with J. Duns Scotus and William of Ockham against the Thomists.

Vasyl Yavorsky

Yavorsky, Vasyl [Javors'kyj, Vasyl'], b 1854 in Yavora, Turka county, Galicia, d 22 May 1926 in Nowy Sącz, Galicia. Lawyer and political and civic leader in Galicia. He collaborated with A. Chaikovskyy in organizing the Ukrainian community of Berezhany and represented the town in the Austrian parliament (1900–7). As parliamentary

deputy he exposed the tax machinations of Polish magnates in Galicia and defended the Sich societies from Gov A. Potocki's persecution. With R. Sembratovych and A. Kos he founded the journals **Ruthenische Revue* (1903–5) and **Ukrainische Rundschau* 1905–15) to inform the general public about Ukrainian issues. After retiring from politics he settled in Nowy Sącz, where he founded the Lemko Bank, a student residence, and a branch of the Prosvita society. At his initiative a Greek Catholic church was also built there. He made generous donations to Ukrainian organizations.

Volodymyr Yavorsky

Mykola Yefremov

Yavorsky, Volodymyr [Javors'kyj], b 27 July 1876 in Ropcha, Chernihiv gubernia, d 24 September 1942 in Ufa, Bashkiria. Organic chemist; AN URSR (now ANU) full member from 1934. A graduate of Kiev University (1901), he worked and taught there (1901–21, 1935–9) and at the Kiev Polytechnical Institute (1921–35), where he chaired the department of organic chemistry. He directed the Sector of Organic Chemistry at the ANU Institute of Chemistry and the ANU institutes of Organic Chemistry and Technology (1939–41) and Inorganic and Organic Chemistry (1941–2). Yavorsky researched mainly the synthesis of unsaturated alcohols and alkenes using Grignard reagents, and also organic azides and their transformations into triazoles, tetrazoles, and triazenes.

Yazlovets. See Yablunivka.

Yazlovsky, Borys [Jazlovs'kyj], b 1 September 1894 in Kiev, d ? Legal historian. In the early 1920s he taught law at the Kiev Institute of the National Economy. He also served as secretary of the Society of Ukrainian Jurists and as a member of the VUAN Commission for the Study of Ukraine's Customary Law. Two of his articles were published in the commission's *Pratsi* (1925, 1928). He was arrested in 1929 and again in 1937; his subsequent fate is unknown.

Yazychiie. The derogatory name for the bookish language in which the Galician, Bukovynian, and Transcarpathian **Russophiles* wrote in the 19th and early 20th centuries. Based on the earlier bookish **Slavonic-Ruthenian* language, the *yazychiie* was a combination of Church Slavonic and Russian that included Western Ukrainian vernacular elements and Polonisms and had a Ukrainian

pronunciation. It was used in Lviv periodicals, such as *Slovo* (1861–87), *Naukovyi* (later *Literaturnyi*) *sbornik*" (1865–73, 1885–90, 1896–7), *Vremennik*" *Stavropigiiskogo instituta* (1864–1915), and *Věstnik*" *Narodnoho doma* (1882–1914), as well as in two Bukovyna periodicals: *Pravoslavnaia Bukovina* (1893–1904) and *Bukovinski vědomosti* (1895–1909). The Galician Populists and Radicals (eg, I. Franko) condemned its use.

Ych Oba. See Trybratni Mohyly.

Yedynets, Yosyp [Jedynec', Josyp], b and d ? Lviv builder in the first half of the 18th century. He built Lviv's St George's Monastery (1732–8) and took part in preparing the foundations of St George's Cathedral in 1744.

Yefimov, Viktor [Jefimov], b 5 March 1921 in Nykopol, Katerynoslav county, Katerynoslav gubernia. Metallurgist specializing in metal casting; full member of the ANU (formerly AN URSR) since 1973. He studied in Dnipropetrovske and has worked at the ANU Institute for Problems of Casting since 1964, as director since 1966. He has contributed to research on physicochemical, hydrodynamic, and thermodynamic aspects of casting and crystallization processes in castings.

Yefrem [Jefrem]. Church hierarch of the late 11th century. A monk from the Kievan Cave Monastery, he traveled to Constantinople, where he acquired a copy of the Studite monastic rules that were adopted at the Kievan Cave Monastery. He later became bishop of Pereiaslav. According to some sources, he subsequently became the second locally born metropolitan of Kiev, ca 1089–97.

Yefremov, Ernest [Jefremov], b 14 November 1934 in Staline (now Donetsk). Mining engineer; corresponding member of the ANU (formerly AN URSR) since 1985. He graduated from the Dnipropetrovske Mining Institute (1957) and has worked at the ANU Institute of Geotechnical Mechanics since 1962. His main research interests are the mechanics of blasting and new technologies for mineral extraction.

Yefremov, Fedir [Jefremov], b 1874, d 1947 in Odessa. Forester and land meliorator. He worked at the Ukrainian Scientific Research Institute of Forest Management and Agroforest Amelioration in Kharkiv (1931–6) and lectured at the Odessa Agricultural Institute (1937–47). His research dealt with shelter belts and the stabilization of shifting sands and slopes. He wrote numerous works, mostly in Ukrainian.

Yefremov, Mykola [Jefremov] (Efremov, Nicholas), b 7 May 1904 in Myshkovske, d 13 September 1962 in New York. Geologist and mineralogist; full member of the Ukrainian Academy of Arts and Sciences in the US and the Shevchenko Scientific Society from 1949. After graduating from the Don Polytechnic Institute in Novochoerkassk in 1929, he completed graduate studies at the Leningrad Mining Institute in 1938. During his exile in Siberia he worked as a geologist-pro prospector (1930–3). Then he taught at Rostov University (1935–8, 1941–3) and the Institute of Geology in Moscow (1938–9) and worked as a mineralogist at the Lviv Museum of Natural History (1943–5). He emigrated from Ukraine after the Second World War

and taught at the UNRRA University in Munich (1945–8) and the Ukrainian Technical and Husbandry Institute (1945–51). He was a senior fellow in various research programs on the USSR in the United States and in 1958 he joined the faculty of the Middlebury College Institute of Soviet Studies.

Yefremov researched various aspects of geology in Northern Caucasia and the Mariupil region and studied the iron-ore deposits of the Taman and Kerch peninsulas. He discovered 12 new minerals, one of which, yefremovite, was named after him. He wrote numerous works on economic geology, geochemistry, crystallochemistry, mineralogy, the processing technology of mineral raw materials, and agrochemistry.

Petro Yefremov

Serhii Yefremov

Yefremov, Petro [Jefremov], b 24 December 1883 in Palchyk, Zvenyhorodka county, Kiev gubernia, d ? Literary scholar; brother of S. *Yefremov. In the 1920s he was a professor of Ukrainian literature at the Dnipropetrovske Institute of People's Education, a member of the Dnipropetrovske Scientific Society of the VUAN, and the first editor of the Dnipropetrovske journal *Zoria. From 1905 he contributed to the journals *Kievskaiia starina*, *Literaturno-naukovyi vistnyk*, *Svitlo*, *Knyhar*, and *Zoria*; the almanacs *Rada*, *Nova rada*, and *Sich*; and the literary and artistic collection *Vyr revoliutsii* (The Vortex of Revolution, 1921). He explored the problems of naturalism and studied the development of the historical novel in Ukrainian literature. He wrote articles about the works of T. Shevchenko, P. Kulish, M. Drahomanov, I. Karpenko-Kary, D. Markovych, L. Yanovska, B. Lepky, P. Karmansky, A. Krymsky, and many others. He was arrested in 1929 and sentenced at the 1930 show trial of the *Union for the Liberation of Ukraine. His further fate is unknown. He was rehabilitated in 1989.

Yefremov, Serhii [Jefremov, Serhij] (Iefremov), b 18 October 1876 in Palchyk, Zvenyhorodka county, Kiev gubernia, d 10 March 1939 in Vladimir prison, Russia. Literary journalist, historian, critic, and political activist; member of the Shevchenko Scientific Society from 1923 and the VUAN from 1919. He studied law at Kiev University before devoting himself to literary scholarship. He was a leading member of the *Ukrainian Democratic Radical party and its successor, the *Society of Ukrainian Progressives (TUP),

which he transformed into the *Ukrainian Party of Socialists-Federalists (and then headed). His contributions on political and literary topics to publications such as *Zoria*, *Pravda*, *Zapysky NTSh*, *Literaturno-naukovyi vistnyk*, *Kievskaiia starina*, *Nova hromada*, *Hromads'ka dumka*, *Rada*, *Nova rada*, *Ukraina*, *Zapysky Istorychno-filolohichnoho viddilu VUAN*, and *Literatura* were highly regarded. Yefremov served as vice-president of the VUAN governing council, secretary of its historical-philological division, and member of many of its commissions (notably the commission for publishing the classics of modern Ukrainian literature). He was also one of the directors of the Vik publishing house (1895–1918). He suffered several arrests under the tsarist regime for his writings and political activity.

In 1917 Yefremov became a member of the *Central Rada and its deputy head, a member of the Little Rada, general secretary of international affairs in the General Secretariat, and a member of the Ukrainian delegation that negotiated with the Provisional Government. Yefremov was the chief defendant in the 1929 show trial of the so-called *Union for the Liberation of Ukraine, which he was accused of heading. The death sentence he received in 1930 was later commuted to 10 years' imprisonment. He served the first seven of those in the Yaroslavl political prison and the remainder in the Vladimir prison. He died several months before the end of his sentence.

As a literary critic Yefremov was the most prominent representative of the late populist or neopopulist current, which, despite fierce criticism from those who stressed the primacy of sociological or esthetic criteria, enjoyed widespread support during the revolutionary years and still exerts an influence today. Claiming that the esthetic principle was completely inappropriate for a history of Ukrainian literature, he outlined three governing ideas in the development of that literature: (1) 'the element of personal freedom, a continuous emancipatory current'; (2) 'the idea of national liberation'; and (3) 'the progressive populist current in content and form.' Using service to the nation and norms of the literary language as criteria upon which to judge literature, Yefremov placed little value on the writing of the 17th and 18th centuries, which he considered artificial, scholastic, and divorced from 'real life.' He concentrated his attention on the history of modern literature, in which field he published a series of important monographs, chiefly on writers of the 19th century: *Marko Vovchok* (1907), *Shevchenko* (1914), *Spivets' borot'by i kontrastiv* (Singer of Struggle and Contrasts 1913; *Ivan Franko* in the 1926 edition), *Mykhailo Kotsiubyns'kyi* (1922), *Karpenko-Karyi* (1924), *Ivan Nechui-Levyts'kyi* (1925), and *Panas Myrnyi* (1928). He is responsible for editing many classics of Ukrainian literature (again primarily of the 19th century), for which he provided introductions, and notes: by L. Hlibov, Y. Hrebinka, T. Shevchenko, O. Konysky, I. Kotliarevsky, M. Kotsiubynsky, B. Hrinchenko, and others. One of his most important publications is the academic edition of Shevchenko's *Diary and Letters* (1927–8), which contain Yefremov's articles and commentary.

In an article that appeared in *Kievskaiia starina* in 1902, Yefremov voiced his hostility toward the modernists. Using the works of H. Khotkevych, O. Kobylanska, N. Kobrynska, K. Hrynevych, and others as examples, Yefremov condemned what he regarded as 'modish currents,' 'caricaturish form,' enthusiasm for symbolism and decadence, and, above all, a failure to delve deeply into

life in order to 'expose social sores' and heal them. In the 1924 edition of his *Istoriia ukrain'skoho pys'menstva* (History of Ukrainian Writing) Yefremov devoted a new chapter to the 'revolutionary' literature of 1919–24 in which he modified his populist methodology by accepting the importance of formal considerations, and made insightful comments on Soviet writers. From the 1930s Soviet literary criticism never acknowledged Yefremov's contributions to literature and wrote practically nothing about him. Yefremov's views on literature are most fully expressed in his *Istoriia ukrain'skoho pys'menstva* (1911), the third edition (1917) of which became the most widely read literary-scholarly work of the revolutionary years.

Col Serhii Yefremov

Aleksandra Yefymenko

Yefremov, Serhii [Jefremov, Serhij], b 1893, d 18 December 1966 in Astoria, New York. Senior army officer. Serving as an officer in the Russian army, in 1917 he Ukrainianized Russian army units in the Katerynoslav region and was sent as a delegate to the First and Second All-Ukrainian military congresses. In 1918 he commanded a regiment, which fought the Red Army around Katerynoslav. Then he served, at the rank of lieutenant colonel, as a special staff officer at the UNR Army headquarters. In the interwar period he lived in Transcarpathia, and in March 1939 he served, at the rank of colonel, as commander of the Carpathian Sich. After the Second World War he emigrated to the United States, where he was a founding member of the United Ukrainian War Veterans in America.

Yefym [Jefym], b and d ? Wood engraver at the Kievian Cave Monastery Press in the second half of the 18th century. He illustrated and decorated books, such as *Akafisty i kanony* (Akathists and Canons, 1783 and 1786) and *Sluzhby prepodobnym otsem pecherskim* (Services by the Venerable Father of the Caves, 1785), and made prints on religious themes, such as *The Great Martyr Barbara* (1781) and *Dormition* (1785).

Yefymenko, Aleksandra [Jefymenko] (Russian: Efimenko; née Stavrovskaia), b 30 May 1848 in Varzuga, Kola county, Arkhangelsk gubernia, Russia, d 18 December 1918 on Lubochka *khutir*, near Pysarivka, Vovchanske county, Kharkiv gubernia. Russian historian and ethnographer; full member of the Imperial Russian Geographic, Moscow Psychological, Kharkiv Historical-Philological, and Kiev Juridical societies and honorary member of the Poltava Learned Archival Commission. She worked as a teacher in Kholmogory. There she married the exiled P. *Yefymenko in 1870 and was consequently forbidden to teach. Instead she researched and published studies on the dialect, socioeconomic history, and folkways of Arkhangelsk gubernia and on Russian customary law. In the 1880s and 1890s Yefymenko was an active member of the Kharkiv Historical-Philological Society. She published book-length articles on the history of Ukrainian-Polish conflicts, the history of Right-Bank Ukraine, and Ukrainian church brotherhoods and guilds, and shorter ones in defense of the Ukrainophiles and on customary law (including the role of women in peasant families), community courts, and peasant relations in Ukraine, the haidamakas, the Little Russian Collegium, the Turbair uprising, the nobility in the Hetman state, dress and household items in Slobidska Ukraine, the Ukrainian language in elementary schools, and Ukrainian writers, such as H. Skovoroda, I. Kotliarevsky, N. Gogol, T. Shevchenko, and V. Antonovych. Twenty-four of her articles were reprinted as the collection *Iuzhnaia Rus'* (Southern Rus', 2 vols, 1905) by the St Petersburg Shevchenko Society. Her monographs in Russian on the history of the Ukrainian people (2 pts, 1906; 2nd edn 1990; Ukrainian trans 1922, ed D. Bahalii) and the history of Ukraine and its people (1907) were widely read. In 1903 she delivered the first speech at the unveiling of Kotliarevsky's monument in Poltava. From 1907 to 1917 she taught Russian and Ukrainian history at the Bestuzhev Higher Courses for Women in St Petersburg. She was the first woman in the Russian Empire to be awarded an honorary PH D (in Russian history, by Kharkiv University, 1910). Yefymenko was murdered by bandits, together with her daughter, Tatiana, at their homestead. In 1919 Bahalii's annotated bibliography of her works was published by the UAN in the *Zapysky* of its historical-philological section, and her elementary-school textbook on Ukrainian and Russian history was published in Russian and Ukrainian in Kharkiv. P. Markov's book about her appeared in Kiev in 1966.

R. Senkus

Yefymenko, Heorhii [Jefymenko, Heorhij], b 30 January 1917 in Katerynoslav (now Dnipropetrovske). Metallurgist; corresponding member of the ANU (formerly AN URSSR) since 1973. He studied and taught at the Dnipropetrovske Metallurgical Institute, where he also served as rector. From 1951 he was a functionary in the CC of the CPU. He was assistant to the minister (1955–9) and then minister (1973–84) of higher and specialized secondary education for the Ukrainian SSR. He contributed some technical work in the field of iron smelting and other areas of ferrous metallurgy.

Yefymenko, Petro [Jefymenko], b 1835 in Velykyi Tokmak, Berdianske county, Tavriia gubernia, d 20 May 1908 in St Petersburg. Historian and ethnographer; husband of

Petro Yefymenko, Sr

Petro Yefymenko, Jr

A. *Yefymenko and father of P. *Yefymenko. He studied at Kharkiv and Moscow universities (1855–7) and belonged to clandestine student circles. He wandered through Ukraine gathering historical and ethnographic materials. In 1859 he was arrested and exiled for 10 years to Perm and then Arkhangelsk. Upon returning to Ukraine in 1876, he settled in Kharkiv and devoted himself to historical and ethnographic research. In 1884–8 he was editor of *Khar'kovskii kalendar*, in which he opened a special bibliographic section and published a list of P. Chubynsky's works. He contributed articles to *Osnova*, *Chernigovskii listok*, and *Kievskaiia starina* on folk spells (1874), the cottage industry of the Sumy region, and folkways in the 17th and 18th centuries and compiled a bibliography of Ukrainian literature. Under the pseudonym P. Odinets he wrote a booklet on Ukrainian populism (1906).

Yefymenko, Petro [Jefymenko], b 21 November 1884 in Kharkiv, d 18 April 1969 in Leningrad. Archeologist; full member of the AN USSR (now ANU) from 1945; son of A. and P. *Yefymenko. After graduating from St Petersburg University (1912), he travelled through Europe, Africa, and the Orient, and then (1917–19) worked at museums in Moscow and Leningrad. While a research associate with the Leningrad Institute of the History of Material Culture (1919–46), he also served as a lecturer (1924–39) and then professor (1939–46) at Leningrad University. A specialist in the Paleolithic, he led archeological expeditions in east central Ukraine and the Don region. He became director of the ANU Institute of Archeology in 1945. During his tenure (to 1955) the institute launched new periodicals and published the first general survey of Ukrainian archeology, *Narysy starodavn'oi istorii Ukraïns'koi RSR* (Essays on the Ancient History of the Ukrainian SSR, 1959).

Yehorov, Yevhen [Jehorov, Jevhen], b 17 May 1917 in Lyman (now Krasnyi Lyman), Izium county, Kharkiv gubernia. Painter and graphic artist. After graduating from the Kharkiv Art Institute (1949) he taught at the Kharkiv Industrial Design Institute and in 1972 became its rector. His prints include lithograph portraits of V. Myronenko (1954), I. Franko and M. Cheremshyna (1956), and T. Shevchenko (1961). He has painted series, such as 'Through France' (1961–2), 'Party Veterans' (1967), and 'My Comrades in Arms' (1975–80), and murals, in the Horlivka Palace of Culture.

Yeia River [Jeja]. A river in northern Kuban that flows for 311 km through Krasnodar krai before emptying into the Yeiske Estuary along the coast of the Sea of Azov. It drains a basin area of 8,650 sq km. It is well stocked with fish. Sections of the river usually dry up during the summer, although its lower reaches are quite marshy.

Yeiske [Jejs'ke] (Russian: Eisk). VII-19. A city (1990 pop 79,000) on the Sea of Azov and a raion center in Krasnodar krai, RF. It has a port, which exports grain and fish, a large machine-building and metalworking industry, and a popular health resort. According to the 1926 census, Ukrainians represented 42 percent of the city's population and 74 percent of the raion's population.

Yeiske Estuary [Jejs'kyi lyman]. VII-19. An estuary situated at the mouth of the Yeia River along Tahanrih Bay in the Sea of Azov. The estuary is nearly 20 km long and 12 km wide and is sheltered from the sea in part by the Yeiske Spit. The city of Yeiske is situated on its west side.

Yelanets [Jelanec']. VI-12. A town smt (1985 pop 4,900) on the Hnylyi Yelanets River and a raion center in Mykolaiv oblast. It was founded at the beginning of the 19th century as a peasant colony and called Hnylyi Yelanets. In 1810–58 it was known as Novomoskovske, and until 1925 it was part of Yelysavethrad county in Kherson gubernia. Today it is a farming center with several food-processing enterprises.

Yelchenko, Yurii [Jel'chenko, Jurij], b 23 July 1929 in Kharlyk, Kiev okruha. CPU and government leader. After graduating from the Kiev Polytechnical Institute (1952) he rose in the Komsomol to the positions of secretary (1958–9), second secretary (1959–60), and first secretary (1960–8) of the Ukrainian organization. As a CC CPU member since 1961, he has served the Party as head of its Department of Agitation and Propaganda (1973–80), first secretary of the Kiev Party Committee (from 1980), secretary for ideology (1988–9), and chairman of the new CC CPU Commission for Internationality Affairs (from 1989). He was a member of the CPU Politburo from 1981 and of the CC CPSU from 1981. He served one term as Ukraine's minister of culture (1971–3).

Yeletskyi Dormition Monastery (Yeletskyi Uspenskyi manastyr). One of the oldest monasteries in Ukraine, situated in Chernihiv; founded in 1069 by Sviatoslav II Yaroslavych on the site of an apparition of an icon of Mary in a fir tree (the name of the monastery derives from the Old Church Slavonic *yel' 'fir'*). The monastery was sacked in 1239 during the Tatar invasion, and not restored until 1445–99. It was damaged again in the early 17th century when the Poles occupied Chernihiv. At that time it was also put under Uniate control. After the Khmelnytsky uprising the monastery returned to Orthodoxy and underwent a revival under Archimandrite L. Baranovych (1657–69) and Archimandrite I. *Galiatovskiy (1669–88). The complex was restored, and a bell tower, refectory, and other buildings were added. In the late 18th century the monastery's properties were nationalized by the Russian state, and the monastery was granted first-class status. It was closed under Soviet rule and severely damaged during the Second World War. Restored in the early 1950s, it is now a museum preserve.

The cathedral of the Yelets'kyi Dormition Monastery

The central feature of the monastery is the Cathedral of the Dormition, which was built in the late 11th century. It is a three-nave structure typical of the Chernihiv architectural style of that time. The original single cupola was complemented in the 17th century by three smaller cupolas. At the same time, a baroque façade and a side altar (where the monastery's patron, Ya. *Lyzohub, was buried) were added to the structure. The bell tower is hexagonal in shape, built in three layers with a single dome on top. Other surviving structures include three buildings containing the monks' cells.

Dobrovol'skii, P. *Chernigovskii Ielets'kii Uspenskii pervoklassnyi monastyr': Istoricheskoe opisanie* (Chernihiv 1900)

Yeleva, Kostiantyn [Jeleva, Kostjantyn], b 17 May 1897 in Kiev, d 19 November 1950 in Kiev. Graphic artist and theatrical scenery designer. After graduating from the Kiev State Art Institute (1922) he taught there. He was a member of the *Association of Revolutionary Art of Ukraine (1925–32) and contributed articles on art to *Hart*. He designed the scenery for L. Kurbas's staging of *Haidamaky* (1920) and propaganda posters; created several colored-pencil print series, such as 'Samarkand' (1941–3), 'Zagorsk' (1944), and 'Kiev – Kaniv' (1945–50); and did paintings, such as *The Strike Is Broken*, *Portrait of a Typist* (1927), *Portrait of M. Helman* (1943), and landscapes. A catalog of an exhibition of his paintings came out in 1955.

Yelizarov, Viktor [Jelizarov] (Elizarov), b 7 August 1911 in Pashkovo, Tula gubernia, Russia. Architect; full member

of the Academy of Building and Architecture of Ukraine since 1958. In 1937 he graduated from the Moscow Architecture Institute. After the war he collaborated with a team of architects in planning and developing the Khreshchatyk (1949–57) and designing the communications center (1952), the Exhibition of Economic Achievements of the Ukrainian SSR (1951–8), the Khreshchatyk metro station (1960), and the Dnipro Hotel (1964), all in Kiev.

Yelovych-Malinsky, Ostafii [Jelovyč-Malins'kyj, Ostafij], b and d ? Greek Catholic bishop of Lutske in 1607–21. He was a Volhynian nobleman and a supporter of unification. His tenure as bishop was marked by stormy relations between Orthodox and Catholic supporters in the region, which ultimately rendered his position untenable.

Yelyniak, Vasyl. See Eleniak, Wasyl.

Yelysaveta Yaroslavna [Jelysaveta Jaroslavna], b ?, d 1076. Rus' princess; elder daughter of Yaroslav the Wise. In 1044 she married the renowned Norse warrior-prince (and king of Norway from 1047) *Harald III Hardraade, who had been a member of Yaroslav's retinue in the early 1030s. She retained her name and her faith while in Scandinavia and reportedly had two daughters (Ingrid and Maria) with Harald. After his death in 1066, she married Harald's Danish rival, Sweyn II.

Yelysavethrad. See Kirovohrad.

Yemchenko, Andrii [Jemčenko, Andrij], b 28 October 1893 in Mykhailivka, near Kamianka, Chyhyryn county, Kiev gubernia, d 18 February 1964 in Kiev. Physiologist; corresponding member of the AN URSS (now ANU) from 1957. A graduate of the Kiev Medical Institute (1925), he was head of the human and animal physiology department at Kiev University (1933–64). A specialist in the physiology of heart and higher nervous activity and digestion, he wrote the handbook *Fiziolohiia tvaryn i liudyny* (The Physiology of Animals and Man, 1952) with D. Vorontsov.

Yemelianenko, Pavlo [Jemeljanenko], b 5 July 1905 in Bobrykova-Petrivska stanytsia, Tahanrih county, Don Cossack province, d 13 November 1947 in Moscow. Specialist in the production processes of pipes; corresponding member of the AN URSS (now ANU) from 1939. He studied and taught at the Dnipropetrovske Metallurgical Institute. From 1941 he headed various all-Union pipe production facilities and contributed significantly to pipe manufacturing research, particularly in the development of seamless pipes, pipe welding, and numerical methods of the optimization of pipe dimensions.

Yemelianov, Oleksandr [Jemel'janov], b 30 October 1932 in Kharkiv. Economist; corresponding member of the AN URSS (now ANU) since 1979. Since graduating from the Kharkiv Industrial-Engineering Institute in 1955, he has worked at the All-Union Institute of the Coal Industry (1956–8), the Kharkiv Industrial-Engineering Institute (1958–62), and the Scientific Research Institute of Economics of the State Planning Committee of Ukraine (1965–), where he was appointed director in 1971. His scholarly works deal with economic planning and the improvement

of economic performance. They include the monographs *Obshchestvennoe proizvodstvo: Dinamika, tendentsii, modeli* (Social Production: Dynamics, Tendencies, Models, 1980) and *Ekonometriia i prognozirovanie* (Econometrics and Prognostication, 1985).

Fedir Yemets (right) and his students in his studio in Salzburg (1947)

Yemets, Fedir [Jemec'], b 1894 in Sharivka, Bohodukhiv county, Kharkiv gubernia, d ? Sculptor; brother of V. *Yemets. An interwar émigré, he graduated from the Berlin Academy of Arts in 1929 and served as an assistant and then a professor there. A postwar refugee in Austria, in 1949 he emigrated to Venezuela. He worked in various media, particularly bronze. He created busts (eg, of H. Skovoroda) and large sculptures, such as *Dying Otaman*, *Dance*, *Bath*, *Sleeping Lion*, and *Mother*, in a classical-realist style.

Vasyl Yemets

Rostyslav Yendyk

Yemets, Vasyl [Jemec', Vasyl'] (Yemetz, Wassyl), b 2 August 1890 in Sharivka, Bohodukhiv county, Kharkiv gubernia, d 6 January 1982 in Los Angeles. Bandura player; singer and teacher. He learned how to play the bandura from blind kobzars living near his family's holdings and started to perform when he entered university in Kharkiv (and later Moscow) in 1911–12. He organized and

directed the first banduryst chorus in Ukraine in Kiev in 1918 and (after emigrating in 1920) an ensemble in Prague. He taught students in Poděbrady. He toured extensively throughout Western Europe, the United States, and Canada, finally residing in Hollywood from 1937. He authored the book *Kobza i kobzari* (The Kobza and Kobza Players, 1923) and wrote articles on the bandura and bandurysts in Ukrainian, Czech, and French. A collection of memoirs, photographs, press clippings, and articles about or in praise of him was published in 1961 as *Vasyl' Iemets': U zolote 50-richchia na sluzhbi Ukraïni* (Vasyl Yemets: On His Golden 50th Anniversary of Serving Ukraine).

Yemilchyne [Jemil'čyne]. III-8. A town smt (1985 pop 7,200) on the Ubort River and a raion center in Zhytomyr oblast. It was first mentioned in 1585, as the village of Mezhyrichka, owned by Prince K. *Ostrozky. Until 1793 it was under Polish rule. It was annexed by Russia, and became part of Novohrad-Volynskiy county in Volhynia gubernia. Its current name has been in use since the end of the 19th century. Yemilchyne has a flax-processing factory and some food-processing enterprises.

Yenakiieve [Jenakijev]. V-19, DB III-4. A city (1990 pop 120,000) on the Bulavyn River in Donetske oblast. It was founded in 1883 as a coal-mining town. In 1925 it was granted city status. Today it is one of the largest industrial centers in the Donbas. Besides 10 coal mines it has a large metallurgical plant, a coke-chemicals plant, a cement factory, a pipe plant, light industry, and some food-processing enterprises.

Yenakiieve Metallurgical Plant (Yenakiivskiy metalurhiinyi zavod). A large metallurgical plant located in Yenakiieve, in the Donets Basin. It was established by a Russian-Belgian company in 1895 and went into production in 1897. It produced steel, cast iron, and rolled metal and by 1913 was one of the largest metallurgical plants in the Russian Empire. Until 1921 it was called the Petrovskii Plant. It was destroyed during the Second World War and then rebuilt. It continues to produce steel, cast iron, and rolled metal. In the 1970s the plant employed almost 1,700 workers.

Yendyk, Rostyslav [Jendyk], b 28 April 1906 in Zaluche, Kolomyia county, Galicia, d 16 February 1974 in Munich. Anthropologist, belletrist, and publicist; full member of the Shevchenko Scientific Society from 1933. He received a PH D in anthropology from Lviv University. As a postwar émigré he was a professor at and rector (1961–74) of the Ukrainian Technical and Husbandry Institute in Munich and a member of the Ukrainian National Council. He wrote books on the anthropological traits of the Ukrainian people (1934) and the racial structure of Ukraine (1949) and numerous other studies in anthropology and demography; a novella about O. Dovbush, *Proklin krovy* (The Curse of Blood, 1934); books about A. Hitler (1934) and D. Dontsov (1955); the poetry collections *Bili nochii* (White Nights, 1936), *Tytan* (Titan, 1948 [long poems]), and *Triolyety* (Triolets, 1953); the prose collections *Rehit Aridnyka* (The Devil's Laughter, 1937), *V kaidanakh rasy* (Fettered by Race), *Zov zemli* (Call of the Earth, 1940), and *Zhaha* (Desire, 1957); and a book of nationalist essays, *Slovo do brativ* (A Word to [My] Brothers, 1955).

Yenina, Vira [Jenina], b 2 May 1906 in Novotroitske, Berdianske county, Tavriia gubernia, d 26 November 1977 in Kiev. Writer. She graduated from the Kiev Art Institute (1929) and worked for publishing houses in Kharkiv and Kiev. She wrote the novels *Holubyi potik* (The Azure Stream, 1948), *Rozstupylisia hory* (The Mountains Parted, 1951), *Nahoroda* (The Award, 1955), *Nova trembita* (The New Trembita, 1955), *Ukrains'ka kvitka* (A Ukrainian Flower, 1959), *Vyrok vvažhaty umovnym* (Consider the Sentence Conditional, 1962), *Mynule ne mynaie* (The Past Does Not Pass, 1965), and *Istyny rozkryvaiut'sia povoli* (Truths Reveal Themselves Slowly, 1971); three story collections (1958, 1967, 1970); and a book of memoirs about the Second World War (1974).

Yenkovsky, Avgustyn [Jenkovs'kyj], b 18 October 1833 in Sachuriv, Transcarpathia, d 1923 in Steblivka, Transcarpathia. Inventor; member of the French Academy of Sciences from 1893. A priest by training, he completed theological studies in Užhorod and served as a priest in Mukachiv eparchy. In the 1860s he invented a machine for reaping and binding sheaves. He took it to Kostroma in 1873 for manufacturing, but the factory could not fulfill his technical requirements. Yenkovsky had insufficient funds to patent his device; a nearly identical reaping machine was produced soon afterward by the McCormick Company in the United States. The prototype of Yenkovsky's steamship, submitted for patenting in Berlin in 1896, is in the Berlin Patent Museum. He also invented a regulated weaving loom.

Yeremenko, Terentii [Jeremenko, Terentij], b 21 April 1902 in Novovelychkivska stanytsia, near Katerynodar, Kuban oblast. Specialist in petroleum and natural gas and doctor of technology. He studied at the Don Polytechnical Institute. He taught at the Lviv Polytechnical Institute (1945–63) and worked at the Ukrainian Scientific Research and Planning Institute of the Petroleum Industry in Kiev. His main contributions are in the area of pipelines for petroleum and natural gas drilling and exploration.

Yeremenko, Valentyn [Jeremenko], b 12 August 1911 in Kreminna, Kupianka county, Kharkiv gubernia, d 31 October 1992. Physical chemist and material scientist; AN USSR (now ANU) full member since 1969. A graduate of Kharkiv University (1936), he taught there (1939–41) and at Kiev University (from 1944) and worked at the ANU institutes of Ferrous Metallurgy (1940–53), Metaloceramics and Special Alloys (1953–60), and Problems of Material Science (1960–5). He developed theories on the wetting of solids (metals, alloys, oxides, carbides, borides) by molten metals, studied the surface properties of pure metals and binary alloys (including titanium) at various temperatures, constructed phase diagrams of binary and ternary metallic systems, and made contributions to chemical thermodynamics and heterogeneous equilibria.

Yeremenko, Vasyl [Jeremenko, Vasyl'], b 16 December 1919 in Dmytrivka, Oleksandriia county, Kherson gubernia. Scenery designer. In 1944 he joined the Kirovohrad Ukrainian Music and Drama Theater, and in 1966 he became its principal designer, noted for his brightly colored scenery.

Yeremenko, Viktor [Jeremenko] (Eremenko), b 26 July 1932 in Kharkiv. Experimental solid-state physicist; AN USSR (now ANU) full member since 1978. After graduating from Kharkiv University (1955) he worked at the ANU Institute of Physics in Kiev. In 1961 he returned to Kharkiv to head the magneto-optical research department at the ANU Physical-Technical Institute of Low Temperatures. Yeremenko discovered and investigated exciton and exciton-magnon processes in antiferromagnetic crystals, light dispersion on parametric spin waves in nonlinear antiferromagnetic resonance, and the linear dependence on the magnetic-field strength of the double diffraction of light (a codiscovery). He is a leading authority on the interaction of electromagnetic waves with magneto-ordered crystals.

Yeremiichuk-Yeremiiv, Denys [Jeremijčuk-Jeremijiv], b 27 January 1866 in Novi Mamaivtsi (now Novosilka), Bukovyna, d ? Church activist and professor of theology. He graduated in theology from Chernivtsi University in 1890 and was ordained a priest the same year. He taught theology at a gymnasium in Chernivtsi before becoming a professor of pastoral theology at Chernivtsi University (1899–1936); there he taught his subject in Ukrainian until the 1920s and in Rumanian thereafter. He headed the Association of Ukrainian Orthodox Priests in Bukovyna and, with Ye. Vorobkevych, wrote a number of religious textbooks for primary schools.

Mykhailo Yeremiiv

Yeremiiv, Mykhailo [Jeremijiv, Myxajlo], b 7 February 1889 in Novoselytsia, Zhytomyr county, Volhynia gubernia, d 16 September 1975 in Geneva. Journalist and civic leader. As a student at the Kiev Polytechnical Institute he was twice arrested for his Ukrainian activities. In April 1917 he became a student representative to the Central Rada and then a member of its executive committee (representing the Ukrainian Social Democratic Workers' party [USDRP]) and secretary to the Central Rada (1917–18). He was editor in chief of **Visty z Ukrain's'koi Tsentral'noi Rady* (1917–18) in Kiev and a board member of the USDRP's daily newspaper *Robitnycha hazeta* (1917–19). An opponent of the Hetman government in 1918, he was assigned in 1919 by the UNR Directory as secretary of the UNR mission in Rome, where he edited *La Voce del Ucraina* (1919–20).

From 1920 Yeremiiv lived abroad: in Vienna, where he wrote for the journal *Volia*; in Prague; in Poděbrady, where he lectured at the Ukrainian Husbandry Academy (1924–6); and, from 1926, in Paris, where he was a professional journalist and worked with the *Promethean movement. In 1928 he founded the *Ofinor press agency, of which he was director and editor in chief (1928–44). Be-

cause of Soviet diplomatic pressure he was forced to leave France in 1936. He emigrated to Geneva, where the head office of Ofinor was relocated. During the Second World War he founded a Ukrainian refugee aid committee, which was subsequently named Comité Suisse d'Aide aux Réfugiés Ukrainiens. Even in his later years Yeremiiv continued to work with Ukrainian and non-Ukrainian newspapers and published many informational pamphlets on nationalities issues in the USSR, the 1917 Revolution, and Bolshevism.

A. Zhukovsky

Vasyl Yermakov

Vasyl Yeroshenko

Yermakov, Vasyl [Jermakov, Vasyl'] (Ermakov, Vasili), b 11 March 1845 in Tserukha, Mahiliou gubernia, Belarus, d 16 March 1922 in Kiev. Ukrainian mathematician; corresponding member of the St Petersburg Academy of Science from 1884. He graduated from Kiev University in 1868 and taught there and at the Kiev Polytechnical Institute (from 1899). His contributions are in the fields of analysis, differential equations, mechanics, and the theory of functions.

Yermilov, Vasyl [Jermilov, Vasyl'] (Ermilov, Vasili), b 22 March 1894 in Kharkiv, d 4 December 1967 in Kharkiv. Painter and graphic designer. He studied at the Art Trade School Workshop of Decorative Painting in Kharkiv (1905–9), the Kharkiv Art School (1910–11), and the Moscow School of Painting, Sculpture, and Architecture (1912–13). In 1918 he joined the avant-garde Union of Seven group in Kharkiv and designed the script for its album *Sem' plius tri* (Seven Plus Three, 1918). Under Soviet rule Yermilov designed posters, 'agit-trains,' street decorations, billboards, the interiors of public buildings (eg, the murals in the foyer of the Kharkiv Circus and the Red Army Club in Kharkiv), theatrical sets, displays, packaging, and journal and book covers; he also directed the art department of the All-Ukrainian Bureau of the Russian Telegraph Agency (1920–1) and taught at the Kharkiv Art Tekhnikum (1921–2) and Kharkiv Art Institute (1922–35). He received several international prizes for his graphic designs, including a gold medal at the 1922 Leipzig International Graphics Exhibition and an award at the 1928 Köln International Press Exhibition. While a member of the *Avanhard group (1926–9) he was graphic designer of its newspaper *Doba konstruktsii*, its journal *Mystets'ki materialy Avanhardu*, and, with V. *Polishchuk, the three issues of *Biuletен' Avanhardu*. From 1927 he was also a

Vasyl Yermilov and one of his designs

member of the *Association of Revolutionary Art of Ukraine. Yermilov's synthesis of formalist esthetics, folk designs, and traditional painting methods (including egg tempera) was an important contribution to the development of Ukrainian design of the 1920s. His distinctive style of constructivist collage and typographic design, called constructive-dynamism or spiralism, developed distinctly and in parallel with Russian constructivism. Because of his formalist interests Yermilov was forced out of the Soviet art arena in the late 1930s. In the last years of his life he again taught at the Kharkiv Art Institute (1963–7). A book about him by Z. Fogel was published in Moscow in 1975.

N. Mykytyn

Yermoliev, Yurii [Jermol'jev, Juri] (Ermolev), b 3 February 1936 in Karachev, Briansk oblast, Russia. Mathematician and cyberneticist; corresponding member of the AN URSR (now ANU) since 1976. Since completing his studies at Kiev University in 1959, he has worked at the Computing Center and the Institute of Cybernetics of the ANU in Kiev. He has contributed to the theory of graphs, optimal control of deterministic and stochastic systems, and stochastic programming.

Yerofeiv, Ivan [Jerofejiv], b 8 October 1882 in Andrushivka, Berdychiv county, Kiev gubernia, d 27 November 1953 in Vorzel, near Irpin, Kiev oblast. Writer, literary scholar, historian, and ethnographer. A graduate of Kiev University (1907), he lectured at higher educational institutions in Kiev and Kharkiv and worked in the 1920s as a research associate of the Department of the History of Ukrainian Culture at the All-Ukrainian Academy

of Sciences. He was repressed in the 1930s, and resumed his scholarly activities in the 1940s. He wrote a book on the *dumas* (1910), articles on N. Gogol, H. Skovoroda, and T. Shevchenko, and the novel *Oleksa Dovbush* (1945); and compiled, with Ye. Cherkaska, a collection of documents on U. Karmaliuk.

Yeroshenko, Vasyl [Jerošenko, Vasył'], b 13 January 1890 in Obukhivka, Belgorod county, Kursk gubernia, d 23 December 1952 in Obukhivka. Writer, poet, and pedagogue, whose works were written in Japanese and Esperanto. He was blinded at the age of four. He completed studies at a Moscow school for the blind (1908) and later studied at the Royal College for the Blind in Norwood, England. Through his studies Yeroshenko mastered English, Esperanto, French, German, Russian, and Swedish. In 1914 he was sent to Japan by the Russian Esperanto Society to teach Esperanto at Tokyo University. There he mastered Japanese and began to publish his verses, stories, and plays in the Japanese press. He traveled extensively in the Far East and taught Esperanto in Shanghai (1921) and Beijing (1922), and from 1923 he taught Japanese and other Oriental languages at the Communist University of the Workers of the East in Moscow. During the Stalinist terror he was arrested in 1929; he was imprisoned for 5 years in the Chukhotka labor camp and for another 11 years in Turkmenistan, and was released in 1945. He was reimprisoned for his refusal to work as a translator for the NKVD and was not released until 1951. He died soon afterward of cancer. Three collections of his works were published in Japan in the 1920s, and a three-volume collection was published there in 1959 (repr 1961). A volume of his works in Ukrainian translation was published under the title *Kvitka spravedyvosti* (Flower of Justice, 1969). Biographical novels about Yeroshenko have been written by I. Takasugi in Japanese (1982) and by A. Kharkovskiy in Russian (1978).

Yeroshevych, Petro [Jeroševyč], b 1870, d 1945. Senior army officer. A regular officer in the Russian army, by 1917 he commanded, at the rank of major general, the Ninth Russian Army Corps on the Russian southwestern front. He completely Ukrainianized his corps, but the Central Rada government ordered it demobilized. In August 1919 in the Kiev offensive, he commanded a two-division group. He was deputy defense minister in the UNR government and inspector-general of the UNR Army. From 1921 he lived in Poland, until he was arrested by the NKVD in 1945. His recollections of the wars for Ukrainian independence were published in *Za derzhavnist'*, vols 8 and 9 (1938, 1939).

Yershov, Anatolii [Jeršov, Anatolij], b 10 January 1899 in Tolkachevka, Lgov county, Kursk gubernia, Russia, d ? Historian and numismatist. In the 1920s he taught at the Nizhen Institute of People's Education and was an associate of the Kharkiv Institute of the History of Ukrainian Culture. His articles on guilds and currency in 17th- and 18th-century Left-Bank Ukraine and on the historiography of several Cossack chronicles appeared in the *Zapysky* collections of the Nizhen institute, the Shevchenko Scientific Society, and the Historical-Philological Division of the VUAN. He disappeared during the Stalinist terror of the 1930s.

Yershova, Yevheniia [Jeršova, Jevhenija], b 25 December 1925 in Smila (now in Cherkasy oblast). Ballerina. She studied at the Kiev Choreography School. In 1944–65 she was a soloist in the Kiev Theater of Opera and Ballet, where she danced leading roles in H. Zhukovsky's *Rostyslava*, K. Dankevych's *The Lily*, and M. Skorulsky's *The Forest Song*.

Yerzhykovsky, Serhii [Jeržykovs'kyj, Serhij], b 23 March 1895 in Vilnius, d 15 December 1989 in Kiev. Painter. He graduated from the Kiev State Art Institute (1928), where he studied under F. Krychevsky, and taught there for many years (1935–69). His works include *Love* (1934), *Artillerymen at Stalingrad* (1945), the portraits *Tetianka* (1965) and *O. Shovkunenko* (1970), wartime caricatures and drawings (1941–4), and landscapes (eg, *Morning on the Dnieper*, 1957). An album of his works came out in 1977.

Yeselson, Boris [Jesel'son], b 8 May 1917 in Mariupol. Experimental low-temperature physicist. A graduate of Kharkiv University (1939), from 1938 he worked at the AN URSR (now ANU) Physical-Technical Institute in Kharkiv. In 1963 he became a department head at the ANU Physical-Technical Institute of Low Temperatures in Kharkiv. Yeselson has investigated the temperature dependence of quantum fluids and quantum crystals, and codiscovered quantum diffusion in solid helium. He has also contributed to the improvement of cryotechnology.

Yeshchenko, Vadym [Ješčenko], 1878–? Engineer. A member of the Ukrainian Party of Socialists-Independents, he was head of railway transportation in eastern Ukraine, general secretary of roads in the General Secretariat of the Central Rada (1917–18), deputy minister of roads under the Hetman government, and director of the UNR Ministry of Roads (1918).

Yevdokymov, Mykola [Jevdokymov] (Evdokimov, Nikolai), b 7 April 1868 in Kharkiv, d 5 April 1940 in Kharkiv. Astronomer. A graduate of Kharkiv University (1890), he worked at the Kharkiv Astronomical Observatory from 1893 and was its director from 1917 to 1930. From 1914 he was also a professor at Kharkiv University. His main contributions were in measuring parallaxes of celestial objects and in developing instrumentation for such measurements. In 1935 he headed the effort in Kharkiv to establish a Unified Time Service. Yevdokymov wrote a practical astronomy handbook and a series of popular-science books.

Yevfrosyniia Mstyslavna [Jevfrosynija], b and d ? Rus' princess; granddaughter of Volodymyr Monomakh. She married King Géza II of Hungary ca 1145, thereby cementing an alliance that provided Hungarian support for her brother, Iziaslav Mstyslavych, in his campaign against Volodymyrko of Galicia.

Yevmynka settlement. A Trypilian settlement of the mid-3rd millennium BC near Yevmynka, Kozelets raion, Chernihiv oblast. Excavations in 1925–6 and 1965 uncovered a pit dwelling with a hearth in a corner, flint, stone, and bone tools, and fragments of ornamented pottery painted black and red.

The entrance to an arcade complex built in Yevpatoriia in the 19th century

Yevpatoriia [Jevpatorija]. VIII-14. A city (1990 pop 109,000) and port on the coast of the Black Sea in the Crimea. In the 6th and 5th centuries BC the Greek colony of *Kerkinitidis stood at the site. In the 2nd century BC it was captured by the Scythians. At the end of the 15th century the Turks built a fortified town there. Called Hezlev (Kozlov in Russian), it developed into a trading center and became the target of Zaporozhian raids (1588, 1675). After Russia's annexation of the Crimea the town was renamed Yevpatoriia, and a port was constructed. In the 19th century the town exported grain and farm products and manufactured salt. It has been an important resort, transportation, and manufacturing center. Almost 60 percent of its residents are employed in over 100 sanatoriums, rest homes, and recreational resorts in the vicinity. Sunbathing, mud baths (Mainak Lake), and hot saltwater baths are used to treat bone tuberculosis, rheumatism, respiratory ailments, and skin diseases. There are metalworking, food-processing, textile, and furniture plants in the city. A mosque built in 1552 has been preserved.

Yevpraksiia Mstyslavna [Jevpraksija], 1108–72. Rus' princess; granddaughter of Volodymyr Monomakh. She was renowned for her study of medicine, which she undertook from an early age. For applying her knowledge of anatomy, hygiene, diagnosis, and therapy among the nobility as well as the peasantry, she was given the appellation 'Dobrodiia' (Benevolent). She prepared the first medical text written in Rus', titled *Mazi* (Ointments), on the basis of information compiled from many sources. The work was all the more notable because it avoided ritualistic medical practices and superstitions that were common at that time, and instead relied on techniques of folk medicine and early principles of pharmacology. In 1122 Yevpraksiia married the Byzantine prince Alexius, son of John II Comnenus.

Yevpraksiia Vsevolodivna [Jevpraksija] (Prakseda, also Adelheid or Adelaïde), b 1071 in Kiev, d 9 June 1109 in Kiev. Daughter of the Kievan prince Vsevolod Yaroslavych; sister of Volodymyr Monomakh. She was the wife of Henry the Tall of Northern Saxony, and after he died she married the German emperor Henry IV in Köln in 1089. He treated Yevpraksiia with extreme brutality. In 1090, during a campaign in Italy, he had her imprisoned in Verona. In 1093 she escaped to Canossa (northern Italy),

to her husband's foes, Conrad and Mathilde of Tuscany. Through their intercession, she obtained the protection of Pope Urban II. In 1095 she publicly denounced Henry at the councils of Constanza and Piacenza for his immorality and depravity; he was anathematized and eventually forced to abdicate. Yevpraksiia returned through Hungary to Ukraine (1096) and entered a convent in Kiev (1106). She was buried in the Kievan Cave Monastery. Her biography inspired a wealth of literature, including P. Zahrebelny's novel *Ievpraksiia* (1975), which appeared in French translation as *Eupraxie: Princesse kiévienne* (1984). Most German historians condemn her conduct because it was exploited by Henry's enemies.

Mykola Yevshan

Yevshan, Mykola [Jevšan] (né Fediushka; other pseudos: Lebedyk, Yavir), b 19 May 1890 in Voinyliv, Kalush county, Galicia, d 23 November 1919 in Vinnytsia. Literary critic. Yevshan studied German and Ukrainian at Lviv University and supported his studies by employment in the Shevchenko Scientific Society's [NTSh] library, as the society's secretary and as personal secretary of M. *Hrushevsky. After being expelled from Lviv University for political reasons he continued his studies at the University of Vienna. His scholarly career was interrupted by the First World War. He served in the Ukrainian Galician Army and died from typhus during the Ukrainian-Polish War.

Yevshan began his critical writings very early and soon was a regular contributor to **Ukraïns'ka khata* and to **Literaturno-naukovyï vistykyk*, of which he became a coeditor. His critique of I. Franko in *Bdzhola* (1908) brought him notoriety, but it was his insistence on the esthetic values of literature that made him appear on the side of the nascent 'modernist' tendencies and in opposition to the populism of the established literary masters. Although accused of propagating 'art for art's sake,' Yevshan was a follower of the esthetic philosophy of J.-M. Guyau as espoused in Guyau's *Les problèmes de l'esthétique contemporaine* (1884, translated into Ukrainian in 1913). In his major critical work, *Pid praporom mystetstva* (Under the Flag of Art, 1910), Yevshan follows Guyau in stressing that humans

possess a creative altruistic life force, and that to create the beautiful and the ennobling is their need and imperative. Yevshan thus denigrates literary writing without esthetic values to the level of publicistic pamphlets and praises authors, such as V. Stefanyk, in whose writings he sees the true merging of social purpose and esthetic form. Yevshan's other critical writings were few; they consisted of various articles in journals as well as the more substantive pamphlet *Kudy my pryshly* (To Where We Have Come, 1912) and a monograph on T. Shevchenko (1911).

D.H. Struk

Yevsuh River [Jevsuh] (also Yevsiuh). A left-bank tributary of the Donets River that flows southward for 82 km from a source in the Central Upland through Luhanske oblast and drains a basin area of 1,190 sq km. It has a water reservoir and is used for irrigation.

Yevtymii [Jevtymij]. Bishop of Chernihiv in the 15th century. As the only Ukrainian bishop not to recognize the authority as metropolitan of Kiev of Hryhorii II Bolharyn, who had been nominated by Pope Callistus III and confirmed by the pro-Union patriarch of Constantinople Gregory Mammias, he was forced to flee from his eparchy to Muscovy in order to escape persecution.

Yevtymiiia Volodymyrivna [Jevtymijia] (Yevfymiiia), b. ?, d. 4 April 1139. Rus' princess; daughter of Volodymyr Monomakh. She was married to the Hungarian king Kálmán in 1112 in a bid to strengthen Rus'-Hungarian diplomatic relations, but was sent back to Kiev in 1113. Their son, Borys, was not recognized by Kálmán as an heir to the Hungarian throne. Nevertheless Borys pursued the title over a long period of time after he came of age.

Yevtymovych, Varfolomii [Jevtymovyč, Varfolomij], b. 28 August 1888 in Perehoniivka, Vasylykiv county, Kiev gubernia, d. 8 February 1950 in Mittenwald, Germany. Military figure. A lieutenant colonel in the UNR Army, in early 1918 he commanded a company of Free Cossacks in the defense of Kiev. Later he served as a staff officer in the Zaporozhian Corps of the UNR Army. As an interwar émigré he was active in the hetmanite movement, and he published a book of recollections (1937) and articles about the 1917-20 revolutionary period in Galician and émigré periodicals. During the Second World War he was in charge of the *Military Board of the Division Galizien.

Yew, English (*Taxus baccata*; Ukrainian: *tys yahidnyi, nehni-derevo*). An ornamental evergreen, a shrub or tree of the family Taxaceae. The yew is a slow-growing tree that is long-lived, tall (reaching heights of 20-30 m), and rot-resistant. The foliage and seeds contain a toxic alkaloid that can harm some animals, especially horses. In Ukraine the English yew grows in the Carpathian and Crimean mountains. One of the oldest representatives of Ukrainian flora, it is slowly disappearing and is at present under state protection. Its hard, fine-grained, lustrous, reddish wood is valued in cabinetmaking and underwater construction.

Yezhov terror (*yezhovshchyna*). The mass repressions in the Soviet Union in 1937-8 conducted by N. Yezhov (b. 1895, d. 1939?) as commissar of internal affairs (head of the NKVD). The reasons for the mass terror have never been fully explained. It began with a resolution of the CC of

the All-Russian Communist Party (Bolshevik) in March 1937 calling for wider repressions. According to N. Khrushchev, in the course of 1937 the number of arrests increased tenfold compared to 1936. Testimony and evidence about the subversive activities of the detainees and the existence of various underground and intelligence organizations were fabricated by the secret police. Bolshevik leaders, such as G. Piatakov, K. Radek, N. Bukharin, and A. Rykov, were tried and executed. A group of military officers, including Marshal M. Tukhachevsky, were shot. Throughout the USSR about 300,000 people were executed, and 3,500,000 deported to concentration camps.

In Ukraine 162,000 members of the CP(B)U, representing 35 percent of its total, disappeared during the Yezhov terror. About 98 percent of the Party's Central Committee and Ukraine's government and 80 percent of the oblast committees of the party and the oblast executive committees of the oblast soviets were arrested. The ranks of lecturers in higher educational institutions, teachers, physicians, agronomists, engineers, and technicians were decimated. Prominent Party and government officials in Ukraine, such as P. Postyshev, S. Kosior, V. Zatonsky, M. Popov, O. Shlikhter, A. Khvyliya, and V. Balitsky, vanished. H. Hrynko, I. Dubovy, and Y. Yakir were executed. P. Liubchenko, the prime minister of Ukraine, committed suicide. The academicians M. Kravchuk and Ye. Oppokiv were sent to labor camps. Writers such as I. Mykytenko, I. Kulyk, B. Kovalenko, I. Kyrylenko, and M. Filiansky disappeared without a trace.

Yezupil. See Zhovten.

Yiddish. A language based primarily on several Middle High German dialects with significant influences from Hebrew, Aramaic, and Romance and Slavic languages. It is written using a slightly modified Hebrew alphabet. The Yiddish spoken by Jews living in Ukrainian ethnolinguistic territory is clearly distinguished from the northeastern dialect (characteristic of Belarus, Lithuania, and Latvia) and the central dialect (characteristic of Poland and west Galicia).

Often referred to as the southeast dialect, Ukrainian Yiddish is profoundly marked by the influence of the Ukrainian language. In terms of grammar, for example, Yiddish shows evidence of a form of the Ukrainian aspect, which is absent from Middle High German (*ikh hob geshribn* 'I have written' versus *ikh hob ongeshribn* 'I have completed writing'). Yiddish also has absorbed a multitude of Ukrainian conjunctions, prepositions, and adverbs, such as *i ... i, take, nu* 'both ... and, indeed, well'. The rich variety of Ukrainian diminutives was adapted to Jewish names (eg, *Moyshenyu, Khayimke*, diminutive of *Moyshe* and *Khayim*), and Ukrainian names were sometimes given to Jewish children, particularly girls (eg, *Badane*, from *Bohdana*). The Yiddish vocabulary has also been enriched by countless Ukrainian words, such as *khrayn* (from *xrin*, 'horseradish'), *zayde* (from *did*, 'grandfather'), and *nudnik* (from *nudnyj*, 'boring'). Although several attempts have been made to classify the areas of human activity in which Ukrainian words penetrated Yiddish, the influence extended perhaps too widely to allow such classification, from the profane (*paskudne*, from *paskudnyj* 'loathsome') to the sacred (*praven*, from *pravtyty* 'to perform [a religious ceremony]').

The flowering of Yiddish literature in Ukraine is exem-

plified by one of the greatest writers in this language, *Sholom Aleichem (1859–1916). He legitimized the Ukrainian dialect by writing almost exclusively in that medium. The years he spent in the townlet of Voronkiv have been immortalized in his characters of the fictional Kasrilevke in *Fiddler on the Roof*.

With the establishment of Soviet Ukraine, Yiddish was made the official language of the Jewish proletariat to the exclusion of the classical Jewish language, Hebrew. A Yiddish press and theater briefly flourished in the 1920s, but the alphabet was 'modernized' by the removal of terminal forms of five letters, and great effort was expended to remove all Hebrew and Aramaic 'bourgeois' influences from Yiddish. Beginning in the 1930s, Yiddish was increasingly proscribed by Soviet authorities. With the loss of hundreds of thousands of Ukrainian Jews in the Holocaust, and the postwar harassment of Yiddish writers, Ukrainian Jewry turned increasingly to Ukrainian and Russian as vernacular languages. As a direct result of the most recent changes, a handbook of Yiddish (including rudiments of morphology, an anthology of literary work, short biographies of famous authors, and a brief history of Jews in Ukraine) was published in Kiev in 1991.

H. Abramson

Yoffe, Abram [Joffe], b 29 October 1880 in Romen, Poltava gubernia, d 14 October 1960 in Leningrad. Physicist; full member of the USSR Academy of Sciences from 1929 and the Shevchenko Scientific Society from 1929. A graduate of the St Petersburg Technological Institute (1902) and Munich University (doctorate, 1905), he was a physics professor at the St Petersburg (later Leningrad) Polytechnical Institute (1913–48) and the Crimean University in Symferopil (1918–25). He was also director of the Physical-Technical Institute (1944–51) and Institute of Semiconductors (1955–60) of the USSR Academy of Sciences. As early as 1931 he recognized the role of electrons in semiconductors and laid the foundation for the technology of thermoelectric cooling devices and thermoelectric generators. It was on Yoffe's initiative and with his direct involvement that physical-technical institutes were established in Kharkiv (1928) and Dnipropetrovske (1933). Yoffe's monographs published in English translation include *The Physics of Crystals* (1955–60), *Semiconductor Thermoelements and Thermoelectric Cooling* (1957), and *Physics of Semiconductors* (1960).

Yohansen, Maik [Johansen, Majk] (Mykhailo) (pseud.: V. Vetselius, M. Kramar), b 5 November 1895 in Kharkiv, d 27 October 1937 in Kiev. Poet, prose writer, screenwriter, translator, literary theorist, and linguist. He wrote in Russian until 1917, and wrote only in Ukrainian after 1919. He belonged to the writers' organizations Hart and *Vaplite. His collections of poetry include *D'horì* (To the Pinnacle, 1921), *Revoliutsiia* (The Revolution, 1923), *Proloh do komuny* (Prologue to the Commune, 1924), *Krokovoe kolo* (The Dancing Circle, 1923), *Dorobok* (The Gain, 1924), *lasen* (The Ash, 1930), and *Poezii* (Poems, 1933). He wrote

Maik Yohansen

interesting experimental prose, using the technique of *uchudnennia*, that is, of making the ordinary appear strange or miraculous, and rendering his subject with a humorous edge. His collections of stories include *17 khvyllyn* (Seventeen Minutes, 1925), *Podorozh doktora Leonardo po Slobozhans'kii Shvaitariï* (Doctor Leonardo's Travels through the Switzerland of Slobidska Ukraine, 1928), and *Podorozh liudyny pid kepom* (The Journey of a Man under a Cap, 1932). His works in literary theory include *Elementarni zakony versyfikatorii* (Elementary Rules of Versification, 1922) and *Iak buduvaty opovidannia* (How to Construct a Story, 1926).

Yohansen studied linguistics under L. Bulakhovsky and A. Syniavsky and wrote studies on phonetics (descriptions of literary and dialectal Ukrainian pronunciation, particularly of the Shyshaky and Myrhorod regions) and on the compilation of dictionaries. He compiled a Russian-Ukrainian dictionary with M. Nakonechny, K. Nimchynov, and B. Tkachenko (1926) and a Russian-Ukrainian dictionary of folk sayings with Mlodzinsky. He participated in the creation of a standard *orthography in 1928 and worked on a project for the Latinization of Ukrainian script. He was arrested during the Yezhov terror and was sentenced to death by firing squad. He was posthumously rehabilitated.

I. Koshelivets

Yonker, Anna [Jonker] (née Huminilovych), b 25 December 1888 in Kalush, Galicia, d 6 May 1936 in Winnipeg. Community figure and patron of Ukrainian organizations. After emigrating to Canada early in the century, she lived in Winnipeg. There she organized relief for war victims in Galicia as a member of the Central Committee of the Ukrainian Red Cross Society of Canada. She also made generous donations to the Mohyla Ukrainian Institute, the Ukrainian Red Cross, and various cultural groups in Winnipeg and was the leading figure in an independent women's hromada in Winnipeg.

Yorkton. A city (1981 pop 15,000) in southeastern Saskatchewan, founded in 1882. The first Ukrainian colony of 51 families was established in the area in 1897. As the heavy influx of immigrants continued, Ukrainians began to constitute a majority of the local population. In 1904 a group of Belgian *Redemptorist Fathers led by Rev A. Delaere came to serve the Ukrainian community in Yorkton. They built a monastery (1913) and St Mary's Church

The Ukrainian Catholic Church of Our Lady of Perpetual Help (1914; enlarged 1954–5) in Yorkton

(1914) and set up a minor and major seminary and a printing press at the monastery. Besides books the Redemptorists published a monthly magazine, *Holos spasytelia*, and a theological quarterly, *Lohos*. Until 1957 Yorkton was the provincial house of the Ukrainian Redemptorist order. The Ukrainian Orthodox parish of the Holy Transfiguration (est 1920) hosted, in 1924, the Fourth Sobor of the Ukrainian Greek Orthodox Church of Canada. Two Catholic boarding schools (eventually high schools) were founded by Bishop N. Budka, the Sacred Heart Institute (est 1916, renamed Academy in 1945) for girls, run by the *Sisters Servants of Mary Immaculate, and St Joseph's College (1920–72) for boys. In the 1980s a Ukrainian cultural center was built by the Catholic community.

Yorysh, Volodymyr [Joryš], b 25 November 1899 in Katerynoslav, d 21 June 1945 in Kiev. Composer and conductor. He was educated in Katerynoslav, where he graduated in piano (1917) from the music school and in conducting and composition (1917–24) from the music *tekhnikum*. In 1928–34 he conducted opera theaters in the city and from 1934 the Kiev Theater of Opera and Ballet. Among his works are four operas, including *Karmeliuk* (1930) and *Poem about Steel* (1932); the ballet *The Devil's Night* (1943); *Ukrainian Bazaar* for symphony orchestra; and a string quartet. He was also the author of unsuccessful and unstylish remakes of M. Lysenko's *Natalka from Poltava* and Š. Hulak-Artemovskyy's *Zaporozhian Cossack beyond the Danube*.

Yosyfovych, Dmytro [Josyfovych] (pseud: O[rest] D[ubensky], Or. D-b, Vasyl R[ilenko]), b 6 November 1867 in Novi Skomorokhy, Rohatyn county, Galicia. Writer. From 1888 on he contributed poems and stories to Western Ukrainian periodicals, such as *Zoria*, *Dilo*, *Dzvinok*, *Bukovyna*, *Literaturno-naukovyi vistykyk*, and *Nedilia*. He translated into Ukrainian J.W. von Goethe's *Iphigenie auf Tauris* (1895), ballads by F. von Schiller, and stories by V. Korolenko and G. Danilevsky.

Young naturalists (*iuni naturalisty* or *iunaty*). Young students, 10 to 15 years of age, who participated in an organized extramural program that deepened their knowl-

edge of the life sciences and developed their farming skills. The movement dates back to 1918, when the first groups of Nature's Friends arose. Members were organized into groups, societies, or clubs linked with schools, Pioneer palaces, or agricultural teaching institutions. *Stations of young naturalists played an important role in the movement. The activities of the groups consisted of experiments and practical projects conducted in laboratories, or on experimental plots or farms under the supervision of biology teachers, scientists, and agricultural specialists. Exceptional young naturalists took part in agricultural exhibitions, and the Exhibition of Economic Achievements of the USSR in Moscow maintained a permanent young naturalist pavilion. In the early 1960s the Union-wide movement had a membership of about two million students, organized in close to 60,000 groups. In Ukraine there were about 600,000 members, in 25,000 groups. The magazine *Iunyi naturalist* was published in Russian for members of the movement.

Young spectator's theater (*teatr yunoho hliadacha*). The official Soviet designation for a professional drama theater that performed for children and youth.

In Ukraine at the end of the 19th century, amateur and professional theaters staged productions for children, among them M. Lysenko's children's operas *Koza dereza* (Billy Goat's Bluff, 1888), *Pan Kots'kyi* (Sir Catsky, 1891), and *Zyma i vesna* (Winter and Spring, 1892) and M. Kropyvnytsky and K. Stetsenko's rhymed folktales plays *Lysychka, kotyky, i pivnyk* (The Vixen, Cat, and Rooster), *Po shchuchomu velinniu* (At the Pike's Behest), and *Ivasyk Telesyk* (all in 1906–7). The UNR government created a Commission for the Organization of Children's Theaters. The first Ukrainian professional children's theater existed in Kiev in 1918–19, but its activities were limited.

After the establishment of Soviet rule the first children's theaters in the USSR were in Petrograd, Saratov, Katerynodar, and Kiev. Children's theaters in Ukraine were founded in Kharkiv (1920, since 1945 the *Lviv Young Spectator's Theater), Kiev (1924, today the *Kiev Young Spectator's Theater), Dnipropetrovske (the Pioneer Pedagogical Children's Theater, 1927–39), Mykolaiv (1927, today the *Mykolaiv Ukrainian Theater of Drama and Musical Comedy), Odessa (1931, today the *Odessa Young Spectator's Theater), and Luhanske (the Donets Young Spectator's Theater, 1931–9; since 1945 the Kirovohrad Russian Drama Theater). Their repertoire consisted largely of dramatizations of stories and folktales. The first Soviet plays for children appeared in the late 1920s, written by authors such as O. Biletsky, I. Kocherha, S. Vasylchenko, O. Kopylenko, A. Shyian, and P. Voronka.

The programming of young spectator's theaters was controlled by the Moscow Central Children's Theater and integrated with the Soviet educational system and the Komsomol. Productions are geared to the age-group of the audience: preschool children attend dramatizations of children's stories and fairy tales, such as C. Perrault's *Puss 'n Boots* and *Little Red Riding Hood*, H.C. Andersen's *The Nightingale*, A. Biletsky's *Khubeana*, and D. Shkliar's *Bula i Yula*; primary schoolchildren attend adventure, historical, and biographical plays, such as V. Sukhodolsky's *Taras's Youth*, E. Shvarts's *The Dragon*, A. Yakovlev's *Pioneer Pavlik Morozov*, and A. Shyian's *Flying Ship*; and secondary-school students attend plays from the Soviet repertoire

and world and Ukrainian classics, including O. Kobylianska's *Zemlia* (The Land), I. Kocherha's *The Black Waltz*, F. Schiller's *Wilhelm Tell*, and H.B. Stowe's *Uncle Tom's Cabin*. After the Second World War an emphasis was placed on 'ideological' plays about heroic fighting, the friendship of nations, or young people working in commerce and scholarship.

Additional young spectator's theaters appeared in Ukraine – the *Kharkiv Young Spectator's Theater (est 1960), the Dnipropetrovske Young Spectator's Theater (est 1963), the Donetsk Oblast Russian Young Spectator's Theater (est 1971 in Makiivka), the *Zaporizhia Young Spectator's Theater (est 1979), and the Sumy Theater for Children and Youth (est 1981). In 1987 there were nine young spectator's theaters in Ukraine (13 in 1964). As theatrical entertainment for children, they have been less popular than *puppet theaters.

V. Revutsky

Young Ukrainian Nationalists (Molodi ukrainski natsionalisty, or MUN; also known as Molod ODVU, or Ukrainian American Youth for the Rebirth of Ukraine). A national youth association in the United States affiliated with the *Organization for the Rebirth for Ukraine (ODVU) and embracing the ideology of the OUN. It was founded in 1933 as a means of involving American-born youth in Ukrainian activities. Its aims were to aid the liberation struggle in Ukraine and to inform the American public about Ukraine's fight for independence. Branches of MUN were set up in 10 US cities during the 1930s. Typical local activities included sports and paramilitary drills as well as the staging of plays. The association published the quarterly *Trident* and, in the 1960s, the internal newsletter *MUN Beams*.

Holy Trinity Ukrainian Catholic Church in Youngstown

Youngstown. A city (1980 pop 115,000) in Pennsylvania at the heart of a steel-manufacturing region, with a Ukrainian population of approx 9,500. Immigrants from the Lemko region and Transcarpathia began to settle in the city during the 1880s, their influx peaking in the early 1900s. The first Greek Catholic parish was established by immigrants from Transcarpathia at the beginning of the century, and the second by immigrants from Galicia in 1909. The first Ukrainian Orthodox parish arose in 1922. By the end of the 1930s the city had approx 6,000 to 7,000 Ukrainians. This figure doubled after the Second World War. In the interwar period a Ukrainian National Day and a Ruthenian Day were held annually. At the end of the 1940s a local branch of the Ukrainian Congress Committee of America, the Plast Ukrainian Youth Organization, the Ukrainian Youth Association, and the Ukrainian Catholic Youth League in America were set up. Today there are 12 branches of Ukrainian fraternal associations as well as several church choirs and Ukrainian schools active in the city.

Yovenko, Svitlana [Jovenko], b 20 September 1945 in Kiev. Lyric poet, literary critic, and translator. She graduated from Kiev University (1968) and worked as an editor for the Dnipro publishing house (1968–77). Since 1977 she has been poetry editor of the journal *Vitchyzna*. She is the author of the poetry collections *Holube polum'ia* (Azure Flames, 1969), *Oblychchia vitru* (Face of the Wind, 1975), *Buzok u sichni* (Lilac in January, 1977), *Dialoh* (Dialogue, 1978), *Oblychchia spravzhnia myt'* (A Face's True Moment, 1979), *Mist cherez osin'* (Bridge across Autumn, 1981), *Ty – khto poruch* (You, Who Are Close By, 1983), *Chas liubovi* (Time of Love, 1984), *Nerozkrytyi konvert* (Unopened Envelope, 1987), and *Vich-na-vich* (Eye to Eye, 1989).

Valentyna Yudina

Yudina, Valentyna [Judina], b 7 May 1904 in Kiev, d 14 February 1984 in Kiev. Musicologist. After graduating from the Lysenko Music and Drama Institute (1930) she continued her studies there and at the Kharkiv Music and Drama Institute until 1934. She worked as a music editor in radio broadcasting and in theaters. The collected works of M. Lysenko (20 vols, 1950–9), K. Stetsenko (5 vols, 1963–6), Ya. Stepovy (3 vols, 1964–6), and V. Kosenko (1966–8) were prepared for publication by her. She prepared the piano scores of S. Hulak-Artemovskyy's *Zaporozhian Cossack beyond the Danube*, M. Lysenko's *Natalka from Poltava*, and K. Stetsenko's *Matchmaking at Honcharivka*, in addition to publishing articles and reviews.

Yugoslavia. A country in southeastern Europe (1989 pop 23,710,000), with an area of 255,800 sq km. Established in 1911, from 1945 to 1992 Yugoslavia was a federation of six socialist republics: *Bosnia and Hercegovina (capital, Sarajevo), Macedonia (Skopje), Slovenia (Ljubljana), *Croatia (Zagreb), Montenegro (Titograd), and *Serbia (Belgrade), which includes the autonomous territories of Vojvodina (capital, Novi Sad) and Kosovo (Priština). Its population is multinational and incorporates the major southern Slavic peoples. In 1981 it was home to 8.2 million Serbs, 4.5 million Croats, 2.0 million Bosnian Muslims, 1.8 million Slovenians, 1.8 million Albanians, 1.4 million Macedonians, 600,000 Montenegrins, and smaller minorities of Hungarians, Gypsies, Turks, Slovaks, Bulgars, Rumanians, and others. There are about 50,000 Ukrainians living in Yugoslavia, most of them in the *Bačka region of Serbia, the eastern reaches of Croatia, and northern Bosnia. Their (noncontiguous) settlements lie along an axis running roughly from Banja Luka to Novi Sad.

St Nicholas's Church in Ruski Krstur

Yugoslavian-Ukrainian relations. Relations between Southern Slavs (particularly Serbs, Croats, and Slovenes) and Ukrainians have existed since the days of Kievan Rus' and the first southern Slavic states. Contacts were maintained through the activities of such figures as Andrii of Sianik, D. Kantakuzin, S. Nemanjić, V. Nykolsky of Transcarpathia, P. Serb Logotet, I. Serbyn, L. Serbyn, and Yelysei of Kamianets-Podilskyi. Many Southern Slavs were later found in the ranks of the Ukrainian Cossacks, and in the late 18th century a substantial colony of Serbs settled in Southern Ukraine (see *New Serbia). The national revival of the Southern Slavic peoples in the 17th to 19th centuries was greatly influenced by the Kievan Cave

Monastery (and its publishing house) and the Kievan Mohyla Academy. Among the influential activists of the academy were L. Baranovych (bishop of Chernihiv) and his Serbian translator, G.S. Venclović. Serbian graduates of the academy included Metropolitan V. Jovanović, Bishop S. Končarević, D. Novaković, J. Rajić, A. Stojkov Tarbuk, and G. Zelić. In the 19th century the works of V.S. Karadžić and T. Shevchenko proved influential in the relations between Ukrainians and Serbs. Ukrainian activists, including V. Antonovych, M. Drahomanov, Yu. Fedkovych, I. Franko, V. Hnatiuk, F. Kolessa, Lesia Ukrainka, M. Lysenko, M. Maksymovych, O. Navrotsky, M. Starytsky, and the *Ruthenian Triad, also contributed to such relations through their written works or activities. Those who have either translated Ukrainian works or examined them in scholarly treatments include D. Ilić, S. Novaković, and S. Rašković (Serbians); V. Jagić, A. Harambašić, and A. Šenoa (Croatians); and J. Abram (a Slovene).

Serbian-Ukrainian relations increased during and immediately after the First World War. In August 1916 two Serbian volunteer divisions were formed in Odessa from groups of prisoners of war. After seeing action in Dobruja, they were transferred to Salonika and became part of the Serbian army. From June 1917 to March 1918, the Yugoslavian Revolutionary Union was active in Ukraine among the approx 20,000 POWs from Yugoslavia interned

The Ukrainian Catholic church in Lipovljani

by the Russians. Headed by M. Čanak, most of the union's members sided with the Bolsheviks after the October Revolution, and many of them joined the Red Guards and fought against the Central Rada. In June-July 1919 a Yugoslavian Soviet of Workers' and Soldiers' Deputies was based in Kiev.

As the Soviet state emerged surrounded by a *cordon sanitaire* of countries hostile to it, enmity between Eastern and Southern Slavs grew significantly. The foreign and domestic policies of the Southern Slavic kingdoms were anti-Soviet and anticommunist, and Yugoslavia became a haven for émigrés from the former Russian Empire. Many of these émigrés were Ukrainians who had been military and civilian supporters of the White Russian forces, although some had been activists of the UNR and Western Ukrainian National Republic (ZUNR) governments, or hetmanites. Because of the greater influence exercised by the émigré Russian nationals on the Yugoslavian government and the king, most Ukrainians quickly moved on to West-

ern Europe and the Americas. Those who remained usually assimilated with the Russian émigré community or were dispersed among the Ukrainian settlements in Vojvodina, Bosnia, and Croatia.

Some efforts at establishing government contacts between Ukraine and Yugoslavia were made in 1919. The ZUNR government had a mission in Belgrade that actively worked for the normalization of relations, but it had no success in gaining diplomatic recognition.

A Ukrainian military-medical mission established in Belgrade in the spring of 1919 (headed by a Dr Verbenets, assisted by P. Franko and V. Hankivsky) likewise was not officially recognized, although its activities were tolerated. The mission was eventually turned over to D. Doroshenko and renamed the Ukrainian Red Cross in the Balkans. Its most important undertaking was arranging for the transport of Ukrainian prisoners and providing assistance to refugees. It remained active until October 1919, when it was moved to Bucharest.

The blessing of Easter food baskets in Devjatina (1969)

In the interwar era the Serbian Orthodox church oversaw the Ukrainian Orthodox congregations in Transcarpathia (to 1945) and established the Orthodox Mukachiv-Prešov diocese. Yugoslavian cultural and academic circles maintained relations with their Ukrainian counterparts, particularly the Shevchenko Scientific Society (NTSh) in Lviv. Serbs who were accepted as full members of the NTSh included A. Belić, S. Bošković, J. Erdeljanović, J. Cvijić, D. Goranović-Kramberger, F. Ilešić, T. Maretić, S. Novaković, M. Petrović, B. Popović, and Đ. Šurmin. After the crisis over Carpatho-Ukraine in 1938–9 many refugees from Carpatho-Ukraine went (via Rumania) to Yugoslavia, where they received assistance and shelter from the local government and Ukrainian community.

Postwar ties between Yugoslavia and Ukraine depended on relations with the USSR as a whole. The first treaty of friendship, mutual assistance, and postwar co-operation between the two states was signed on 11 April 1945. Until the break between the Soviet Union and Yugoslavia in 1948, relations were lively but were conducted mainly through the central governments. This pattern was resumed after a normalization of relations that resulted from a declaration signed on 2 April 1955.

There were general cultural and economic relations between the Ukrainian SSR and the constituent Yugoslavian republics, particularly Croatia. Delegations from the Ukrainian SSR represented the Soviet Union at international trade fairs in Zagreb in 1961, 1974, and 1980. A treaty on economic, academic, and cultural co-operation was signed by Croatia and Ukraine. In 1979, days of Ukrainian culture were held in Croatia, and in the following year Croatian culture was celebrated in Ukraine.

Since 1945 the works of I. Franko, O. Honchar, L. Kostenko, M. Kotsiubynsky, Lesia Ukrainka, D. Pavlychko, T. Shevchenko, V. Stefanyk, M. Stelmakh, M. Vovchok, and Yu. Yanovsky have been translated into the various languages of Yugoslavia; the works of Serbian (I. Andrić, B. Čipčić, R. Domanović, D. Maksimović, P. Nehoš, B. Nušić, and S. Sremac), Croatian (M. Krleža, V. Novak, A. Šenoa), Slovene (I. Cankar, F. Prešeren, O. Župančič), and Macedonian (S. Janevski and others) writers have been translated into Ukrainian.

A. Menac (of Zagreb) and A. Koval (of Kiev) jointly published the *Ukrains'ko-khorvats'kyi abo serbs'kyi slovnyk* (Ukrainian-Croatian or Serbian Dictionary, 1979). A seven-volume history of world literature published in Zagreb (1977) contains a comprehensive survey of Ukrainian literature from its origins to the present day, written by S. Subotin.

P. Mitropan, a Yugoslavian literary scholar of Ukrainian origin, produced editions of T. Shevchenko's *Kobzar* (1969, 1980). A collection of works by Lesia Ukrainka, *Lomykamen* (Stone Breaker, 1971), was published in Požarevac. In 1980 the Institute of Literature and Art in Belgrade, the Serbian Matica association, and the Serbian People's Theater in Novi Sad jointly published V. Erčić's monograph *Manuil (Mihail) Kozachynskij i njegova tragedokomedija* (Mykhail Kozachynsky and His Tragicomedy, 1980). A selection of poetry by V. Holoborodko, translated by S. Rašković, was included in the two-volume anthology of contemporary world poetry published in Belgrade in 1983.

Leading contributors to the popularizing of Ukrainian literature in Yugoslavia have been J. Badalić, R. Bordon, D. Davidov, F. Dobrovoljc, A. Flaker, S. Hasparević, D. Grujić, J. Hrvačanin, B. Kreft, D. Maksimović (recipient of the I. Franko Prize of the Ukrainian SSR in 1982), D. Medaković, A. Menac, M. Mitropan, J. Moder, V. Nedić, M. Nikolić, R. Pajković, M. Pavić, S. Rašković, S. Subotin, and F. Vurnik.

Those who have popularized Yugoslavian literature in Ukraine include I. Aizenshtok, O. Biletsky, I. Bilodid, Y. Chykyrysov, M. Drai-Khmara, Z. Honcharuk, A. Horetsky, V. Hrymych, M. Huts, A. Lirnychenko, R. Lubkivsky, M. Lukash, A. Lysenko, A. Malyshko, N. Neporozhnia, D. Palamarchuk, S. Panko, Ye. Pashchenko, D. Pavlychko, L. Pervomaisky, V. Polishchuk, M. Rylsky, S. Sakydon, F. Shevchenko, M. Yohansen, I. Yushchuk, and O. Zholdak.

Yugoslavia and Ukraine have also established exchanges of performing groups as well as of individual artists. The Slovene National Opera Theater of Ljubljana, the Chamber Ensemble, the Kolo dance ensemble, and M. Cangalović, O. Marković, M. Radev, and others have performed in concert tours in Ukraine. The actors of the Kiev State Opera and Ballet Theater, as well as various choirs and dance groups, have staged productions in Yugoslavia. The Yugoslavian Dramatic Theater of Belgrade (1956, 1965), the Serbian National Theater of Novi Sad (1966), the Atelier 212 Experimental Theater of Belgrade (1968), and the Montenegrin National Theater of Titograd (1973) have

all staged productions in Ukraine. The Kiev Ukrainian Drama Theater company took part in an international theater festival held in Belgrade in 1982, where it put on I. Franko's *Ukradene shchastia* (Stolen Happiness) as translated by S. *Rašković. In 1980, an exhibition of Croatian sculpture was held in Kiev.

Ukrainians in Yugoslavia. About 40,000 Ukrainians settled in Yugoslavia, after arriving as groups of farmers, in the Bačka region (Ruski Krstur, 1746; Kočura, 1765; Novi Sad, 1780; Stari Vrbas, 1848; Đurđevo, 1870; Gospođinci, 1870; Orahovo, Kula, Novi Vrbas, Bođani, after 1945) and the Srem region (Šid, 1800; Petrovce, 1836; Bačinci, 1850; Mikluševci, 1858; Berkasovo, 1880; Sremska Mitrovica, 1886; Rajevo Selo, 1889; Piškorevci, 1900; Andrijaševci, 1900; Inđija, 1946). Other settlements were established in Slavonia (Magič-Mala and Sibirj, 1900; Lipovljani and Kaniža, after 1900) and southwestern Bosnia (Kozarac near Prijedor, 1890; Devetina, 1898; Prnjavor, Derventa, Kamenica, Lipnica, Hrvaćani, Stara Dubrava, Lišnja, Cerovljani near Bosanska Gradiška, Banja Luka, 1910).

All of these settlements were Greek Catholic, but they differed in ethnic background and dialect and consisted of two main groups. Some are the Bačka-Srem Rusyns (Ruthenians; around 30,000) who settled in the Bačka region from 1745, upon arriving from the Zemplén, Borsod, Abaúj-Torna and Sáros komitats. In the early 20th century they elevated their transitional mixed Ukrainian-Slovak dialect to the status of a literary language, which is now used in schools, the press, radio programs, church services, and sermons. The others are Bosnian-Slavonian and Bačka Ukrainians (about 15,000) who arrived from 1898 to the 1900s from eastern Galicia and the Lemko region. Most of them speak Ukrainian. The political and economic conditions of the Second World War caused many of the latter group to migrate to Slavonia (Vukovar, Mikluševci, and Petrovci), Srem (Sremska Mitrovica), and Bačka (Bođani, Kula, Novi Vrbas, Savino Selo, and Zmajevó).

The first settlers of the Bačka region in the 18th century were free peasants who settled on state-owned land, paid tithes, and performed corvée labor. Their numbers were increased by new immigrants who arrived after the abolition of serfdom in the Austrian Empire in 1848 and helped to create new settlements in the Bačka and Srem regions. The original Bačka settlers were sheltered from Hungarization or Serbianization through a government-supported network of church parishes and schools, and maintained enough dynamism to assimilate the later arrivals as far as language is concerned.

Until the First World War Ukrainian community life was centered around the church. Priests and, later, teachers were the only members of the intelligentsia. Initially the Bačka parishes were under the authority of the Hungarian Roman Catholic diocese of Kalocsa, but in 1778 they were joined to the newly established Croatian Uniate eparchy of Križevci (which already ran a theological seminary in Zagreb). Its bishops included Transcarpathian (H. Palkovych and Y. Drohobetsky) and Bačka (H. Bukatko, Y. Herbut, A. Horniak-Kukhar, S. Miklovsh, and D. Niaradi) Ukrainians, who looked after the development of Ukrainian cultural life as well as the conduct of religious services. In 1919 the Ruthenian Popular Enlightenment Society was established (under the auspices of the clergy) in Novi Sad and headed by Rev M. Mudry. It sponsored theatrical and choral groups, reading rooms, and educa-

tion courses and grew to include branches in numerous villages. The founder of its printing press in Ruski Krstur was Bishop D. Nariadi. In 1921–41 Rev Y. Bindas edited the annual *Ruski kalendar*. Other publications included the weekly *Ruski novini* (1921–41), the children's monthly *Nasha zahradka* (1937–41), almanacs, individual literary works, textbooks for primary school, and religious publications. All such activity was proscribed by the occupying Hungarian authorities in 1941–44, and existing publications were destroyed. A group of the secular intelligentsia, supported by Transcarpathian and Serbian Russophiles, established the Cultural-National Alliance of Ruthenians (Rusyns) in Yugoslavia in 1933 in Vrbas. In 1934–41 they published their weekly, *Russkaia zaria*, edited by Y. Kočiš, and in 1935–40 an annual, *Ruski narodni kalendar Zaria*, edited by N. Olear. These were printed in the local Bačka dialect and in Russian. In 1945 members of this group worked to remove the Ukrainophile clerical intelligentsia.

Ukrainian settlers in northern Bosnia came mostly from Galicia (and, infrequently, from Transcarpathia) in the late 19th or early 20th century and set up on poor land that often had to be cleared of forests. Thus, it was not until the 1930s that their work resulted in any significant economic improvement. Community activities centered on the establishing of churches, reading rooms, credit unions, and co-operatives. Courses in Ukrainian were also taught, initially by the clergy but later also by Ukrainian students returning from Zagreb. The first Ukrainian clergyman to serve among the people in this region was A. Segedi (1897–1909). Metropolitan A. Sheptytsky came to the area in 1902 and 1913. In 1907 Y. Zhuk was made vicar general for the Ukrainian settlements under the auspices of the Roman Catholic archdiocese of Sarajevo. In 1910 a Studite monastery was established in Kamenica, to which many priests from Galicia came, but it was closed down in 1922. Kamenica was also the site of the apostolic administrative offices (headed by Rev O. Baziuk, 1914–24), a state of affairs which set the stage for the joining of these parishes with *Križevci eparchy.

The Ukrainian community in urban centers, such as *Zagreb, Sarajevo, and *Banja Luka, consisted largely of former officials of the Austrian administration and, later, of Ukrainian government officials, in exile or as diplomatic representatives. The ZUNR government had a mission in Zagreb in 1919 headed by D. Lukiiianovych. In 1922 the *Prosvita society established headquarters in Zagreb (headed successively by A. Kravets and V. Voitanivsky), with branches in Ukrainian settlements in Bosnia, Slavonia, and Srem and also in Belgrade. The community in Zagreb was involved mainly with establishing relations with Croats and disseminating political and cultural information about Ukrainians. This included *Spomenitsa* (Memorial Book, 1922), a commemorative volume published on the 60th anniversary of Shevchenko's death, and articles in the Croatian press (*Hrvatska smotra*, *Hrvatska straža*, *Hrvatska revija*, *Hrvatski dnevnik*, *Hrvatski narod*, *Novi vijek*, and *Obzor*). In 1932 a group of students from Prague established a students' hromada affiliated with the Prosvita in Zagreb. Proboiem, a student nationalist organization founded in 1937, assembled a choir conducted by M. Vintoniv. It embarked on a tour of many Ukrainian settlements and did much to raise local Ukrainian national consciousness.

New Ukrainian publications began appearing in Yugo-

slavia from the 1930s. *Ridne slovo* was published in 1933–41 under the editorship of M. Firak, and in 1937–41 O. Biliak edited a Ukrainian almanac. *Dumka* (est 1936), the official organ of the local Ukrainian nationalist movement, was initially a bimonthly and then a biweekly in 1942–4. It appeared in Zagreb and Ruski Krstur in standard Ukrainian and in the Bačka dialect; the editors were S. Salamon and M. Buchko. From 1941 it served also as the official organ of the Ukrainian Representation in Croatia, headed by V. Voitanivsky, and was associated with the Melnyk faction of the OUN. During the Second World War a Ukrainian Legion (with approx 1,500 men) was organized by the Ukrainian Representation to fight on the Eastern front under the Croatian Home Army. The Germans, however, decided to use it for action in Croatia. The legion was partially wiped out in the process, and then fell apart. Its soldiers and their families were later subject to reprisals. After the war the Tito administration and Soviet security forces used the legion as a pretext to attack the Ukrainian intelligentsia and clergy; as a result Ukrainian community groups in Zagreb and Belgrade were disbanded. As well, a large number of Ukrainians migrated within Yugoslavia from Bosnia to the Srem or Bačka regions or emigrated to Poland or (illegally) to Australia and South America. In the 1950s, Ukrainian cultural and educational institutions in Bosnia began to revive under the auspices of official Ukrainian educational councils in Prnjavor and Banja Luka. In 1966 they managed to establish a Ukrainian radio program in Banja Luka and initiated Ukrainian language courses in schools in Prnjavor and Lišna. All the same, the center of Ukrainian cultural life had shifted markedly to the Bačka region.

About 1,500 Bačka-Srem Ukrainians had taken part in the Titoist resistance. In the postwar period, therefore, the Yugoslavian authorities supported the Bačkans' cultural activities within certain limits. The Bačka dialect was introduced in nine elementary schools, at the gymnasium in Ruski Krstur, and in local churches. In 1949 a radio station in Novi Sad began broadcasting a program in the Bačka dialect, and since then Bačka television programming has been introduced. A lectureship in the Bačka-Rusyn (Ruthenian) language was established at the university in Novi Sad. The church, however, faced strong repression, and clergymen were removed from their traditional position as community leaders. Anti-Ukrainophile sentiments were expressed openly (albeit only occasionally) in official reports or the press.

New publications, such as the weekly *Ruske slovo* (since 1945), the children's monthly *Pionerska zahradka*, the literary quarterly *Shvetlosts*, and *Nova dumka*, were established to continue the activities of earlier newspapers or journals (albeit in a manner that followed a new official line).

H. *Kostelnyk initiated Bačka literature with his poem-*idyll* *Z moioho valala* (From My Village, 1904) and his subsequent emotional and philosophical verse. He also wrote works on religion and ethnography, in addition to publishing (with D. Bindas) a collection of Bačka folk songs (1927). Other Bačka works published in the interwar years include Ya. Feisa's collection of poetry, *Pupche* (The Bud, 1929), and *Rus'ko-ukraïns'kyi al' manakh* (Ruthenian-Ukrainian Almanac, 1936), an anthology of prose. A number of Ukrainian and Russian plays were also translated into the dialect. P. Riznych (also a translator) and Ye. Sherehii staged many such productions in 1939–41, as well as many of their own plays (mostly melodramas). After 1945 literature and the-

ater became dominated by the motifs of socialist realism and memoirs of the war. Typical works were *Orache* (The Tillers, 1954) and *Na shvytaniu* (At Dawn, 1952) by M. *Kovach, *Vona n'evynovata* (She Is Not to Blame, 1954) by E. Kociš, and *Ohen' v notsy* (Fire in the Night) by J. Sabadoš. A number of collections of poetry have been published, including *Antologiya poezyi bachvansko-srymskykh ruskykh py-satel'okh* (Anthology of Poetry of Bačka-Srem Rusyn/Ruthenian Writers, 1963) and *Antologiya dzetsyn'skei poezyi* (Anthology of Children's Poetry, 1964). *Odhuk z rovniiny, zbornik prypovedkikh, 1941–61* (A Call from Level Ground: A Collection of Proverbs, 1941–61, 1961) is an anthology of prose works.

The linguistic norms of Bačka Ukrainians are set out in *Hramatyka bachvansko-ruskei besedy* (Grammar of the Bačka Ruthenian Language, 1923) by H. Kostelnyk and in *Gramatyka* (Grammar, 1965) by M. Kociš.

The leading compiler of Bačka Ukrainian folklore was V. Hnatiuk, who published a study of Ruthenian settlements in the Bačka region in the *Zapysky* (1898) of the Shevchenko Scientific Society and an ethnographic study of Hungarian Ruthenia in *Etnohrafichnyi zbirnyk* (vol 9, 1900; vol 25, 1909; vol 30, 1911). O. Tymko published a collection of folk songs with transcriptions of melodies, *Nasha pisnia* (Our Song, 3 vols, 1953–4), and an anthology of children's songs, *Maly solovei* (The Little Nightingale, 1953). V. Gzhanets published a collection of choral arrangements, *Pysni iugoslavianskykh rusynokh* (Songs of Yugoslavian Rusyns [Ruthenians], 1946).

Yuhasevych-Skliarsky, Ivan [Juhasevyč-Skljars'kyj], b 1741 in Prikra, Prešov region, Slovakia, d 15 December 1814 in Nevytske, Transcarpathia. Folklorist. He studied in Lviv and from 1775 taught church music and served as a church administrator and village elder in Nevytske, near Uzhhorod. The three collections of music compiled by him included secular songs and 30 *hirmoi* and were richly illustrated with his own drawings. The last collection, compiled in 1811, contained 224 folk songs, including many humorous and satirical songs. He also prepared several handwritten calendars. The one for 1809 contained 370 folk sayings and was the first collection of Ukrainian proverbs. It was edited by I. Pankevych and published in a collection of the Slavic Institute in Prague (1946) and then as part of Ye. Nedzelsky's *Z ust narodu* (From the People's Mouth, 1955).

Yukhnove culture. An archeological culture of the 6th to 2nd century BC which existed along the upper reaches of the Desna and Seim rivers. It was identified by M. Vovodsky in the 1940s and named after a site excavated in the Novhorod-Siverskyi region by D. Samokvasov in the 1870s. The people of this culture engaged mainly in agriculture, animal husbandry, hunting, fishing, and bronze and iron metal-working. Their southern settlements also traded with northern Black Sea centers and had contacts with the tribes of the forest-steppe region of Left-Bank Ukraine. Excavations at culture sites revealed the remains of wooden fortifications, bone, iron, and bronze implements and weapons, and pottery.

Ihor Yukhnovsky

Mariia Yunak

Yukhnovsky, Ihor [Juxnovs'kyj], b 1 September 1925 in Kniahynne, Dubno county, Volhynia. Theoretical physicist; AN URSR (now ANU) full member since 1982. Since graduating from Lviv University (1951) he has taught there and, from 1959, directed the department of theoretical physics. Since 1969 he has headed the Lviv branch of the ANU Institute of Theoretical Physics, which in 1991 became a separate ANU institute. As a result of his research, a school of statistical condensed-matter physics arose in Lviv. Under his guidance and with his full participation, in research using the collective-variables method, the first microscopic treatment of electrolytic solutions including all interparticle forces was carried out, and resulted in a comprehensive theory of electrolytes. He achieved breakthroughs in the elaboration of a microscopic theory of phase transitions. Yukhnovsky worked out a quantum-statistical method of collective variables and formulated a quantitative theory of helium IV. Significant results have also been obtained by Yukhnovsky and his school in the theory of metals and in crystal optics. His monograph *Phase Transitions of the Second Order: Collective Variables Method* (1987) has been published in English. Since 1990 Yukhnovsky has been a member of the Ukrainian Supreme Council, where he has headed the People's Council opposition. He has played a key role in the revival of the Shevchenko Scientific Society, has directed the Lviv-based Western Scientific Center of the ANU, and has been a member of the ANU presidium. In October 1992 he was appointed first deputy prime minister of the Ukrainian government. In March 1993 he resigned from this position.

O. Bilaniuk

Yukhymenko [Juxymenko]. A family of master wood carvers. Fedot (b 2nd half of the 19th century in Velyki Budyshcha, Zinkiv county, Poltava gubernia, d early 20th century in Budyshche) sculpted figures in the round, large wooden statues for the Kochubei palace in St Petersburg, iconostases, furniture, and household articles. At his workshop he trained carvers, such as V. Harbuz, P. Krem-pokha, and V. Reva. His son, Prokip (b 20 July 1870 in Budyshche, d January 1931 in Poltava), specialized in bas-reliefs (eg, *Cossack*, *Banduryst*, 1902), sculptures in the round, furniture, and album covers. He carved the choir balustrades and columns for the Poltava Zemstvo Building (now the Poltava Regional Studies Museum) and the decorative cartouches on the exterior of the Museum of the History of the Battle of Poltava (1908–9). He also taught at the Poltava Tekhnikum of Industrial Co-operation (1928–31).

Yukhymenko, Ivan [Juxymenko], b 14 October 1892 in Kharkiv, d 6 February 1943 in Kazan, RSFSR. Stage director and pedagogue. He began his career in Russian troupes in Ukraine (1915) and then played in Molodyi Teatr in Kiev (1917–18) and in the State Drama Theater (1918–19). In 1920 he moved to Kharkiv and founded a theater-studio with Ya. Mamontov, and from 1925 he taught in the Kharkiv Music and Drama Institute and directed in the Kharkiv Workers' and Peasants' Theater. He directed in the Leningrad Zhovten Theater (1928) and was artistic director of the Dnipropetrovske (1929–32) and Odessa (1933–7) Ukrainian drama theaters. He was accused of nationalism and was arrested, and probably died in prison.

Yunak, Mariia [Junak, Marija], b 15 February 1902 in Kiev, d 1 August 1977 in Kiev. Painter and muralist. She studied at the Ukrainian State Academy of Arts, Kiev Institute of Plastic Arts, and Kiev State Art Institute under M. *Boichuk (1920–7). She was an instructor at Boichuk's studio in Kiev and was part of the groups he led that painted the frescoes in the Peasant Sanatorium in Odessa (1928) and the Kharkiv Chervonozavodskyi Ukrainian Drama Theater (1934). From the early 1930s Yunak worked as a graphic artist and designed posters, books, and textiles, and also as a film animator, muralist, and magazine illustrator. From 1947 she worked at the Institute of Monumental Art and Sculpture of the Academy of Architecture of the Ukrainian SSR. Her early works show the influence of the Byzantine icon and Ukrainian folk art. They include *Fairy Tale* (1921), *Girl in a Kerchief* (1921), and *Ukrainian Women* (1921).

Yunakiv, Mykola [Junakiv], b 6 December 1871 in Chu-huiv, Kharkiv gubernia, d 1 August 1931 in Tarnów, Poland. Military leader. He studied at the Nikolai Academy of the General Staff in St Petersburg (1894–7), defended his dissertation on the Swedish campaign in Ukraine in 1708–9 (1910), and became a professor of military history (1911), which post he was forced to resign in 1914 for attempting to implement teaching reforms at the academy. During the First World War he was chief of staff of the Russian Fourth Army and commander of the Eighth Army on the Rumanian front. In December 1917 Yunakiv joined the Ukrainian army and headed the main educational administration of the defense ministry. In August 1919 he was appointed chief of the joint staff of the UNR Army and the Ukrainian Galician Army, and co-ordinated

Gen Mykola Yunakiv

Hnat Yura

the advances on Kiev and Odessa. On 10 October 1919 he was promoted to the rank of major general, the highest in the UNR Army. During 1920 Yunakiv briefly headed the defense ministry and the Supreme Military Council of the UNR under S. Petliura. He emigrated to Poland, where he contributed to the Ukrainian Military History Society, worked as a member of the editorial collective of *Za derzhavnist'*, and published 'Materialy dlia moho zhyttie-pysu' (Materials for My Autobiography, in *Tryzub*, no. 289/290 [1931]).

A. Zhukovsky

Yunge, Ekaterina [Junge], b 5 December 1843 in St Petersburg, d 1 February 1913. Russian painter. The daughter of Count F. *Tolstoi, she met T. Shevchenko at her father's home in St Petersburg and received art lessons from him. From 1882 to 1887 she taught art in Kiev. Her reminiscences about Shevchenko and M. Kostomarov were published in a volume of her memoirs of the years 1843–60 (1913).

Yunokomunaryvske [Junokomunaryvs'ke]. V-19, DB III-4. A city (1989 pop 25,100) on the Bulavynka River in Donetsk oblast, under the jurisdiction of the Yenakiieve municipal council. It was founded in 1908 as a mining settlement called Buhne. In 1924 it was renamed Yunkom, and in 1965 it was granted city status and given its current name. The city is an industrial center with three coal mines.

Yunytsky, Anatolii [Junyc'kyj, Anatolij], b 31 March 1912 in Nizhen, Chernihiv gubernia, d 12 May 1976 in Lutske, Volhynia oblast. Stage actor. He began his career in the amateur theater Chervonyi Zhovten (1932) and in various workers' and collective-farm theaters. From 1945 he acted in the Volhynian Ukrainian Music and Drama Theater.

Yupko, Lev [Jupko], b 29 October 1911 in Kramatorske, Izium county, Kharkiv gubernia. Metallurgical engineer. He studied in Moscow, the Donbas, and Zaporizhia. From 1956 he served as director of the giant metallurgical concern Zaporizhstal, where he introduced many innovative modern processes in iron smelting and steel production, particularly the use of natural gas in the manufacturing of iron.

Yura, Hnat, b 8 January 1888 in Fedvar (now Pidlisne), Oleksandriia county, Kherson gubernia, d 18 January 1966

in Kiev. Theatrical director and actor. He began his professional career in S. Maksymovych's troupe in 1907 and then worked in the Ruska Besida Theater (1913–14) and in Molodyi Teatr (1917–19), in which he led the traditional (non-experimental) faction. He helped found the touring Franko New Drama Theater in Vinnytsia in 1920 and was its artistic director until 1961 (see *Kiev Ukrainian Drama Theater). Yura often staged productions from the repertoire of Molodyi Teatr, and he also staged numerous plays from the contemporary European repertoire. As an actor he was best known in the role of simpletons, including Tereshko and Kramariuk in I. Karpenko-Kary's *Suieta* (Vanity) and *Zhyteis'ke more* (The Sea of Life), Kopystka in M. Kulish's *97*, Luka in M. Gorky's *Na dni* (The Lower Depths), and Schweik in *Pryhody bravoho soldata Shveika* (The Adventures of the Brave Soldier Schweik, based on J. Hašek). He also acted in the films *Prometheus* (1936), *Zaporozhian Cossack beyond the Danube* (1937), *Karmeliuk* (1938), and *Taras Shevchenko* (1950). In 1945–61 Yura taught at the Kiev Theater Institute. His autobiography is titled *Zhyttia i stsena* (Life and the Stage, 1965); a biography, by Yu. Boboshko, was published in Kiev in 1980.

V. Revutsky

Yura, Terentii [Jura, Terentij], b 22 April 1884 in Fedvar (now Pidlisne), Oleksandriia county, Kherson gubernia, d 9 May 1973 in Kiev. Actor; brother of H. Yura and O. Yura-Yursky. He played in the Ukrainian touring troupes of S. Maksymovych, O. Sukhodolsky, T. Kolesnychenko, and others in 1907–17 and then led his own troupe, Surma, in Oleksandriia (1917–20) and was a leading actor in the Kiev Ukrainian Drama Theater (1921–57). He played various roles, from the Zaporozhian Cossack Tur in O. Kornii-chuk's *Bohdan Khmel'nyts'kyi* to Moliere's *Tartuffe*. He also acted in O. Dovzhenko's film *Ivan* (1932).

Yurasov, Mikhail [Jurasov, Myxajlo], b and d ? Architect. He built a number of 18th-century buildings in Kiev. These fine examples of the baroque style include the student residence at the St Sophia Monastery (1763–7), the altar chamber of St Michael's Cathedral at the Vydubychi Monastery (1770–5), and the hegumen's residence at that monastery (1770–5).

Yura-Yursky, Oleksander [Jura-Jurs'kyi], b 23 June 1895 in Fedvar (now Pidlisne), Oleksandriia county, Kherson gubernia, d 30 December 1968 in Kiev. Actor, stage director, and reciter. He acted in Molodyi Teatr (1917–19) and then with his brother, H. *Yura, founded the Franko New Drama Theater in Vinnytsia (1920; later the Kiev Ukrainian Drama Theater), where he was a leading actor until 1948 (except in 1925–7, when he worked as stage director in the Donetsk Theater). His large repertoire extended from the role of Makar in I. Karpenko-Kary's *Suieta* (Vanity) to the title role in W. Hasenclever's *Ein besserer Herr*. From 1948 he worked in the Kiev State Philharmonic Society as a reciter.

Yurchak, Vasyl [Jurčak, Vasyl'], b 26 August 1876 in Skala-Podilska, Borshchiv county, Galicia, d 28 September 1914 in Terebovlia, Galicia. Actor and singer (tenor). He began his career in the choir of the Ruska Besida Theater (1896), soon made his stage debut as Andrii in S. Hulak-

Vasyl Yurchak

Oleksander Yurchenko

Artemovskyy's *Zaporozhets' za Dunaïem* (Zaporozhian Cossack beyond the Danube), and stayed with that theater until his death. In his acting he combined profound lyricism with utmost simplicity and was a master of complete transformation in character and comic roles. Among them were Kuksa in M. Kropyvnytsky's *Poshylyts' v durni* (They Made Fools of Themselves), Zahonystyi and Mykola in I. Franko's *Uchytel'* (The Teacher) and *Ukradene shchastia* (Stolen Happiness; for this role he was highly praised by the author), and Sirko in V. Pachovsky's *Sontse ruiny* (Sun of the Ruin). A biography, by S. Charnetsky, was published in Lviv (1916).

Yurchakova, Hanna [Jurčakova], b 22 December 1879 in Terebovlia, Galicia, d 6 July 1965 in Lviv. Stage actress; wife of V. Yurchak. She worked in the Ruska Besida Theater (1899–1914), Ternopilski Teatralni Vechory (1915–17), K. Rubchak's troupe (1918–20), and the New Lviv Theater. In 1922–35 she led amateur groups in Ternopil and Lviv.

Yurchenko, Liudmyla [Jurčenko, Ljudmyla], b 14 March 1943 in Kharkiv. Opera singer (mezzo-soprano). After graduating from the Kiev Conservatory (1969) she joined the Kiev Theater of Opera and Ballet as a soloist. She has appeared in roles such as Aksinia in I. Dzerzhynsky's *Tikhii Don* (Quiet Don), Liubasha in N. Rimsky-Korsakov's *The Tsar's Bride*, Carmen in G. Bizet's *Carmen*, and Orpheus in C. Gluck's *Orpheus and Eurydice*.

Yurchenko, Oleksander [Jurčenko], b 18 November 1904 in Kiev, d 26 June 1962 in Munich. Historian of law, Sovietologist, and civic figure; member of the Shevchenko Scientific Society from 1958. A graduate in law from the Kiev Institute of the National Economy (1926) and the Kiev Institute of Trade and Distribution (1933), he worked as a researcher for the VUAN Commission for the Study of the History of Western-Ruthenian and Ukrainian Law (1926–1) and taught in secondary schools and institutes of higher education (1926–41). A postwar refugee in Germany, he became a professor of Soviet law at the Ukrainian Free University in Munich as well as an associate of the Institute for the Study of the USSR (from 1954), an activist in the Ukrainian National State Union party, and an executive member of the Ukrainian National Council (1952–4 and 1957–62). He wrote a number of studies about the le-

gal status of the Ukrainian SSR and the nature of Soviet federalism, including a posthumously published monograph entitled *Ukrains'ko-rosiis'ki stosunky pislia 1917 r. v pravnomu aspekti* (Ukrainian-Russian Relations after 1917 from a Legal Aspect, 1971).

Yurchenko, Petro [Jurčenko], b 22 August 1900 in Medvyn, Radomysh county, Kiev gubernia, d 23 June 1972 in Kiev. Architect and art scholar. He graduated from the Kiev State Art Institute in 1928, and until 1941 he taught there and at the Kiev Civil-Engineering Institute (1928–41). He codesigned the Ukrainian Government Building (1927) and Promin apartment subdivision (1929) in Kharkiv and the Kursk Railway Station in Moscow (1932). In Kiev he designed the second story of the Askoldova Mohyla rotunda (1935) and the amphitheater near it (1936–7). He studied Ukraine's architectural monuments together with H. Lohvyn and Yu. Nelhorovsky and reconstructed many of them (eg, A. Kysil's palace, the Kiev city hall, and the campanile of St Michael's Golden-Domed Monastery). He wrote articles and books on the folk dwellings of Ukraine (1941) and the wooden architecture of Ukraine (1949, 1970) and contributed chapters to books on the history of architecture in Ukraine (vol 1, 1957), the history of Ukrainian art (vols 3 and 5, 1968, 1967), and Ukrainian folk art (vol 3, 1962).

Yurchenko, Vasyl [Jurčenko, Vasyl'], b 26 May 1950 in Dnipropetrovske. Canoeing champion. He won world championships in the 10,000-m Canadian singles in 1973, the 1,000-m singles in 1974, the 1,000-m and 10,000-m singles in 1975, and the 1,000-m pairs in 1977; the 1976 Olympic silver medal in the 1,000-m singles; and many Ukrainian and USSR championships.

Yurchuk, Vasyl [Jurčuk, Vasyl'], b 19 August 1921 in Brodetske, Berdychiv county, Kiev gubernia. Soviet historian and CP activist. A graduate of Kiev University (1942), he taught the history of the CPSU there (1949–52, 1954–5) and at Ulan Bator University (1952–4) and then headed the department of CPSU history at the Ukrainian Agricultural Academy (1955–74) and directed the CC CPU Institute of Party History (1974–89). He wrote 'Borot'ba KP Ukraïny za vidbudovu i rozvytok narodn'oho gospodarstva, 1945–1952' (The Struggle of the CPU for the Rebuilding and Development of the National Economy in 1945–52, 1965 [PH D diss]), *Diial'nist' M.V. Frunze na Ukraïni* (The Activities of M. Frunze in Ukraine, 1952), and *Dvadtsiatyi z'ïzd KP Ukraïny* (The 20th Congress of the CPU, 1961); contributed to collective works on the history of the CPU (1971, 1977), the history of the Kiev oblast CP organization (1967), and the history of the Komsomol in Ukraine (1971); and served on the editorial board of the journal *Komunist Ukraïny*.

Yurchuk, Vira [Jurčuk], b 6 May 1941 in Lublin, Poland. Painter. A postwar refugee, she has lived in Canada since 1949. She graduated from the Ontario College of Art (1963). Most of her better-known works, such as *Inheritors of the Earth* (1982) and *Angel over Toronto* (1983), are acrylics on canvas, but she has also done mixed-media works, such as *Growing* (1980) and *Autumn Landscape* (1980), holographs, such as *Profiles* (1981) and *Window* (1981), and several murals, including *Ukrainians in Canada*, at the St Demetrius Residence in Toronto (1982). In the 1960s she

did illustrations for the Plast children's magazine *Hotuis'*. Thematically her work has evolved from abstract landscapes and still lifes to symbolic compositions on womanhood and her Ukrainian heritage. Solo exhibitions of her works have been held in Toronto (1967, 1980) and Ottawa (1977), and she has participated in many group shows.

Yurchyshyn, Volodymyr [Jurčyšyn], b 9 March 1925 in Zaiachivka (now part of Klekotyna, in Sharhorod raion, Vinnytsia oblast). Economist and agronomist; corresponding member of the All-Union Academy of Agricultural Sciences since 1975. After graduating from the Uman Agricultural Institute (1953) he worked at the Ukrainian Academy of Agricultural Sciences, where he served as rector in 1968–76. Since then he has chaired a department at the Ukrainian Scientific Research Institute of the Economics and Organization of Agriculture. Yurchyshyn's works deal with the economy and organization of fruit farming and the management of agricultural production complexes.

Yurev. See Tartu.

Yurevych, Mykhailo [Jurevyč, Myxajlo], b 1707, d ? Kievan jeweler. His works include the silver Royal Gates (1748) and altar decorations (1751) in the Dormition Cathedral of the Kievan Cave Monastery.

Vasyl Yuriev

Lev Yurkevych

Yuriev, Vasyl [Jur'jev, Vasyl'], b 20 February 1879 in Ivanovska Virga, Penza gubernia, Russia, d 8 February 1962 in Kharkiv. Selection and plant cultivation scientist; full member of the AN URSR (now ANU) from 1945. A graduate of the Kharkiv Agricultural Institute (1905), he worked at the Kharkiv Selection Station (1909–56, from 1944 as director), taught at the Kharkiv Agricultural Institute (from 1937), and headed the ANU Institute of Genetics and Selection (1946–56) and the Ukrainian Scientific Research Institute of Plant Cultivation, Selection, and Genetics (from 1956). He was one of the founders of the Soviet selection and seed cultivation industry and the creator of many productive varieties of winter and spring wheat.

Yurii Dolgorukii [Jurij Dolgorukij] (Yurii I Volodymyrovych), b ca 1090, d 15 May 1157 in Kiev. Rus' prince; sixth son of *Volodymyr Monomakh and *Gytha. His appellation, 'the Long-handed,' was assigned posthumously

by chroniclers who deplored his interventions in the affairs of Kiev principality. While his father was alive, Yurii brought the Rostov-Suzdal territories in the north firmly under his control. In 1125, upon the death of his father, Yurii transferred his capital to Suzdal and became the sovereign ruler of Rostov-Suzdal principality. After the death of his elder brother, Mstyslav I Volodymyrovych (1132), Yurii seized Pereiaslav by force; after eight days he was ousted by his brother Yaropolk II Volodymyrovych (then the prince of Kiev). The takeover of Pereiaslav resulted in a conflict between Yurii and his brothers which ended in his defeat in 1135. He was compelled to relinquish all of his southern land claims and return to Suzdal.

During Yurii's reign the economic and political might of the northern principalities grew. The cities of Pereiaslav-Zaleskii, Yurev (now Tartu), and (allegedly) Kostroma were built by him. Yurii is considered to be the founder of Moscow, which is first mentioned in 1147 and which he fortified in 1156. He formed appanage principalities in northeastern Rus', which he divided among his sons, and he established the Moscow branch of the *Riurykide dynasty. The Rostov-Suzdal principality ruled by Yurii later became the nucleus of *Russia.

In 1149, taking advantage of the internecine strife in Kievan Rus' to the south, Yurii allied himself with the Polovtsians (Cumans) and set out on a campaign against *Iziaslav Mstyslavych. He defeated Iziaslav and took over Kiev, but in 1150 he had to relinquish the city. He returned to Kiev, but Iziaslav II defeated him decisively in 1151 at the Ruta River and sent him back to Suzdal. Yurii captured Kiev a third time in 1155 and remained there. In order to strengthen his position in the south he granted his sons appanages in those territories. He was not liked by the Kievan citizens; he was poisoned at a banquet hosted by the Kievan boyar Petrylo. He was buried in the Transfiguration Church in Berestove. After his death the local population rose in rebellion against the remnants of his rule. The north-south hostilities intensified under the rule of Yurii's son, *Andrei Bogoliubskii.

BIBLIOGRAPHY

Ianovskii, A. *Iurii Dolgorukov* (Moscow 1955)

A. Zhukovsky

Yurii II Boleslav [Jurij] (Troidenovych), b ca 1306, d 7 April 1340 in Volodymyr-Volynskii. Last ruler of the Principality of Galicia-Volhynia (1323–40); son of Trojden II of Mazovia and grandson of Yurii Lvovych. He was initially known as Boleslaw and raised as a Catholic, but he converted to Orthodoxy, and he ascended to the throne of Volodymyr-Volynskii principality. He maintained relations with Lithuania (he married Yevfymia-Ofka, daughter of the grand duke of Lithuania, Gediminas) and the Teutonic Knights, with whom he signed treaties in 1325, 1327, 1334, 1335, and 1337. He was met with hostility by Poland and Hungary, however. Yurii sought to strengthen his rule by supporting towns and burghers, protecting German colonists, and encouraging the influx of foreigners. Under his rule Sianik was granted rights under *Magdeburg law. The boyars rebelled against him, and he was poisoned in suspicious circumstances. His death marked the end of the Romanovych dynasty of Galician-Volhynian princes as well as the end of the *Princely era of Ukraine.

Yurii Lvovych [Jurij L'vovyč], b ca 1252–7 (or 1262), d 23 April 1308 (or 1315). Ruler of the Principality of Galicia-Volhynia; son of *Lev Danylovych. He ruled in Kholm and Podlachia, and after his father's death he united all the lands of Galicia-Volhynia into a principality, with its capital in Volodymyr-Volynskyi. During his tenure Poland regained the Lublin region (1302), and Hungary seized a part of Transcarpathia, but his reign was largely peaceful, and his principality flourished economically. His title was 'King of Rus', Prince of Lodomeria.' Yurii enjoyed favorable foreign relations; he maintained a particularly close alliance with the princes of Kujavia, in Poland, and married Eufemia (Yevtymiiia), the sister of Władysław Łokietek. When the Kievan metropolitan moved his see north to Vladimir, Yurii obtained the assent of Constantinople to establish *Halych metropolity (1303), in which the eparchies of Halych, Volodymyr-Volynskyi, Peremyshl, Lutske, Kholm, and Turiv were included. Yurii was succeeded by his sons, Andrii and Lev Yuriiivych.

Yurii's Temple

Yurii's Temple (Yuriiieva bozhnytsia). A medieval architectural monument in Oster, Chernihiv oblast. Named in honor of Prince *Yurii Dolgorukii, it is the only remnant of St Michael's Church, which was built ca 1098, during the reign of Prince Volodymyr Monomakh. The original church was destroyed during the Mongol invasion in 1240. It was rebuilt, but it was closed after being hit by lightning in 1753 and was later dismantled. The temple consists of a single rectangular room with a large semicircular apse containing two high, arched windows. There are two large pillars on the west wall, and a system of arched vaults is attached to the walls. The structure is capped by a vaulted wooden roof. The only surviving example of the medieval Pereiaslav style of church architecture, the temple was restored in 1907, 1924, and 1950. Its most significant feature is its three frescoes, which were painted between 1098 and 1125 in the Kievan style. The one placed highest portrays the Orante with two archangels garbed in ornamental gowns with pearls. Under it is a scene of the Eucharist with two figures of Christ, and under that is a depiction of the apostles. The frescoes were restored in 1977–80 by V. Babiuk.

Yurk, Yurii [Jurk, Jurij], b 5 May 1905 in Mykolaivka, Katerynoslav county, Katerynoslav gubernia, d 16 January 1976 in Symferopil. Geologist and mineralogist. After graduating from the Kharkiv Institute of Vocational Education in 1932, he was a research associate of the AN URSSR (now ANU) Institute of Geological Sciences. He became the director (1956–73) and then a department head (1973–6) of the Institute of Mineral Resources. Most of his research was devoted to the geology and mineralogy of the Ukrainian Crystalline Shield and to the genesis and commercial potential of various minerals.

Yurkevych, Lev [Jurkevych] (pseud: L. Rybalka, E. Nicolet), b 1884 in Kryve, Skvyra county, Kiev gubernia, d late 1917 or early 1918 in Moscow. Ukrainian Marxist; son of O. *Yurkevych. He joined the clandestine *Revolutionary Ukrainian party in 1904 and was a founding member of the *Ukrainian Social Democratic Workers' party (USDRP) in 1905. Later he was elected a USDRP CC candidate member. He went abroad in 1907 to complete his university studies, which he had begun at Kiev University in 1903. After his father's death in 1911, he lived in France, Lviv, and Switzerland (from 1914). Using his sizable inheritance, he funded and edited the Lviv USDRP monthly **Nash holos* (1910–11) and subsidized the Kiev journal **Dzvin* (1913–14). Under the pseudonym L. Rybalka he wrote and published brochures in Kiev on the national question and the working class (1913) and classes and society (1913). In *Dzvin*, his brochures, and *Borot'ba* (7 issues, 1915–16), the Geneva-based organ he funded and edited under the pseudonym E. Nicolet, Yurkevych polemicized against D. Dontsov's 'bourgeois nationalist' proposal that Ukraine separate from Russia and federate with Austria, and condemned the Ukrainian bourgeoisie in the Russian Empire (as servile supporters of tsarism) and the émigré *Union for the Liberation of Ukraine (as agents of Austrian and German imperialism). His open letter to the Second International Socialist Conference in Kienthal in 1916 was published in Lausanne as the brochure *L'Ukraine et la guerre*.

Yurkevych also criticized the chauvinist, centralist thinking of the Russian Bolsheviks and advocated the need for Ukrainian autonomy and a separate Ukrainian proletarian revolution and Ukrainian social democratic workers' party. V. Lenin denounced his views and in 1914 conspired to undermine his influence. In 1917 in Geneva, Yurkevych published a brochure in Russian on the Russian Social Democrats and the national question that was one of the earliest critiques of Lenin's positions on democratic centralism and the national question (English trans in *Journal of Ukrainian Studies*, Spring 1982). Yurkevych died after the February Revolution before being able to return to Ukraine. A biography of him, by V. Levynsky, was published in Lviv in 1927.

M. Yurkevich

Yurkevych, Osyp [Jurkevych], b 12 February 1855 in Kryve, Skvyra county, Kiev gubernia, d 24 November 1910 in Kiev. Community leader and co-operative organizer. After graduating in medicine from Kiev University (1881) he practiced in Kharkiv, in the Chernihiv region, and in Kornyn, Kiev gubernia. He was a member of the Old Hromada of Kiev. Beginning in 1901 he organized consumer co-operatives in Kornyn, Kryve, and other towns. With the appearance of a Ukrainian press after the

1905 Revolution, he contributed articles on co-operatives and rural life to various journals and papers. Some of them came out in the collection *Suchasni sil's'ki maliunky: Pershyi rik spivrobotnytstva u vil'nii presi* (Contemporary Village Paintings: The First Year of Contributions to the Free Press, 1907). He served on the board of directors of the Kiev Credit Union and on the auditing commission of the Kiev Consumers' Union.

Pamfil Yurkevych

Anatol Yuryniak

Yurkevych, Pamfil [Jurkevych], b 28 February 1826 in Lipliave, Zolotonosha county, Poltava gubernia, d 16 October 1874 in Moscow. Philosopher and educator. After graduating from the Kiev Theological Academy (1851) he was appointed supervisor of the philosophy class, assistant inspector (1854–6), lecturer in philosophy and German (1857), and associate professor of philosophy (1858) there. From 1861 he served as professor of philosophy at Moscow University and taught pedagogy at a teachers' seminary.

Although Yurkevych wrote little in philosophy (only 6 articles and 1 review out of a total of 7 articles, 3 reviews, and 2 books), his writings are noted for their originality, critical insight, and lucid style. His purpose was to reconcile and unify into one worldview faith and knowledge, metaphysics and science, and rationalism and empiricism. To this end he subjected the dominant movements in modern philosophy to a profound and severe critique in which he pointed out the strengths and weaknesses of the idealist tradition (1859) and exposed the failings of materialism as metaphysics (1860). He rejected the rationalist tendency to reduce all mental life to thought and argued for the diversity and depth of the human spirit. In his most interesting and sophisticated work, on reason according to Plato's teaching and experience according to I. Kant's teaching (1865–6), he pinpointed the source of Kant's errors and showed the necessity of reinstating Platonism (or rather his version of Platonism) as the foundation of knowledge. Although Yurkevych did not work out a philosophical system that would satisfy his philosophical demands, he indicated how and where adequate solutions must be sought. His philosophical program and many of his ideas were adopted by his student, V. Solovev, who constructed the most comprehensive and systematic philosophical theory in the history of Russian thought. Yurkevych also published a book of lectures on education (1865) and the best textbook on pedagogy (1869) in the Russian Empire at the time.

T. Zakydalsky

Yurkevych, Viktor [Jurkevych], b 7 January 1899 in Aleksandropol (now Leninakan), Armenia, d ? Historian. In the 1920s he studied under M. Hrushevsky at the Kiev Scientific Research Chair of the History of Ukraine, and from 1927 he worked for the VUAN Commission for the Study of Modern Ukrainian History. He was a specialist in 16th- and 17th-century Ukrainian social history. He contributed articles to VUAN serials and wrote a monograph about the eastward migration of Ukrainians and the colonization of Slobidska Ukraine in the time of Hetman B. Khmelnytsky (1932). He was arrested during the Yezhov terror of 1937 and sent to a concentration camp, where he perished.

Yurko, William [Jurko, Vasyl'], b 11 February 1926 in Hairy Hill, Alberta. Politician and nuclear engineer of Ukrainian-Rumanian origin. Yurko was educated at the universities of Alberta and Michigan. He was elected in 1969 to the legislature of Alberta as the Progressive Conservative member for Strathcona East, and re-elected in 1971 and 1975. While serving as minister of the environment (1971–5) and minister of housing and public works (1975–8) he played a large role in the establishment of the *Ukrainian Cultural Heritage Village as a provincial historic site. He was elected to the federal House of Commons in 1979 as member for Edmonton East and was re-elected in 1980. Yurko is the author of *Parliament and Patriation: The Triumph of Unilateralism* (1984).

Yurynets, Volodymyr [Jury nec'], b 1891 in Olesko, Zolochiv county, Galicia, d 1937. Philosopher and literary critic; VUAN full member from 1929. He studied mathematics and philosophy at Lviv, Berlin, Paris, and Vienna (PH D) universities. After graduating from the Institute of Red Professors in Moscow (1924) he lectured at the Communist University of the Eastern Peoples and Moscow University. In 1925 he moved to Kharkiv, where he taught dialectical materialism and chaired the sociology department at the Ukrainian Institute of Marxism-Leninism. From 1931 he chaired the philosophy department at the All-Ukrainian Association of Marxist-Leninist Scientific Research Institutes (VUAMLIN). Yurynets knew 10 languages and was familiar with the history of and current developments in Western thought. His articles in *Pod znamenem marksizma* on E. Husserl's phenomenology (1922, nos 11–12) and S. Freud's methodology (1924, nos 8–9) attracted wide attention. He expounded K. Marx's and F. Engels's doctrines of dialectical and historical materialism and defended them from 'bourgeois nationalist' criticisms (*Prapor marksyzmu*, 1927, no. 1; 1929, no. 6), and coauthored a textbook on dialectical materialism (1932). His chief ambition, however, was to develop a Marxist esthetics, and to this end he explored critically G. Lessing's esthetic theory (*Krytyka*, 1929, no. 3), I. Kant's theory of judgment (*Hart*, 1927, nos 2–3),

and G. Plekhanov's contribution to the sociology of art (*Molodniak*, 1927, no. 5). He argued that universal esthetic criteria were possible only in a classless society. Yurynets also took a keen interest in Ukrainian literature: he participated in the *Literary Discussion of the 1920s, in which he criticized M. Khvylovy and the Vaplite writers' group, and wrote a book on P. Tychna's poetry (1928). In 1933 Yurynets was branded as a 'bourgeois idealist,' expelled from the Party, and removed from his academic posts. About a year later he was denounced by the Party as an enemy of the state and was arrested. He perished in a Soviet prison or labor camp. Although he was posthumously rehabilitated in the 1960s, he has hardly been discussed, and his works have not been republished.

T. Zakydalsky

Yuryniak, Anatol [Jurynjak, Anatol'] (pseud: B. Syvenko), b 8 December 1902 near Proskuriv (now Khmelnytskyi), Podilia gubernia. Pedagogue and writer. As a postwar refugee he worked as an editor of *Ukrains'ki visti* in Neu-Ulm. A resident of the United States (Detroit, Chicago, and Los Angeles) since 1949, he has contributed to Ukrainian periodicals there and has been active in the Ukrainian Democratic Youth Association, the Ukrainian Orthodox church, and the Ukrainian Cultural Center in Los Angeles. Published separately have been his plays *Na dalekykh shliakhakh* (On Distant Roads, 1955) and *Spravzhnia narechena* (A Real Fiancée, 1967); the collections of literary criticism and publicism *Literaturnyi tvir i ioho avtor* (The Literary Work and Its Author, 1955) and *Krytychnym perom* (With a Critical Pen, 2 vols, 1974, 1987); the textbooks *Tvorchi komponenty literaturnoho tvoru* (Creative Components of a Literary Work, 1964), *Zasoby i sposoby poetychnoho vyslovu* (Devices and Means of Poetic Expression, 1966), *Literaturni zhanry* (Literary Genres, 1979), and *Literaturni zhanry maloi formy* (Small-Form Literary Genres, 1981); the poetry collection *Liudiam i sobi* (For People and Myself, 1964); and the prose collection *Kamikadze padaie sam* (Kamikadze Falls Alone, 1973).

R. Senkus

Yurzhenko, Oleksandr [Jurzenko], b 29 August 1910 in Barativka, Kherson county. Physical chemist. A graduate of the Vologda Technological Institute (1932), he taught at postsecondary schools from 1935 (from 1949 as a professor) and was a prorector at Lviv University (1957–60) and rector of Odessa University (1960–70). From 1971 he taught in Kiev. His research dealt with the mechanism and kinetics of olefin polymerization processes in emulsions, and with hydrocarbon oxidations.

Yushanly River [Jušanly]. A left-bank tributary of the Molochna River that flows westward for 94 km in southern Zaporizhia oblast and drains a basin area of 700 sq km. Its water level drops considerably during the summer, and some sections of the river routinely dry out.

Yushchenko, Kateryna [Jušchenko], b 8 December 1919 in Chyhyryn, Kiev gubernia. Mathematician and cyberneticist; corresponding member of the AN URSR (now ANU) since 1976. After graduating from the University of Central Asia in 1942, she worked at the ANU Institute of Mathemat-

ics (1946–57) and then at the Institute of Cybernetics and Kiev University. Yushchenko has made significant contributions to the theory of probability and obtained important results in the area of local limit theorems for multidimensional distributions as well as the development of algorithms connected with language programming.

Yushchenko, Oleksa [Jušchenko], b 2 August 1917 in Khoruzhivka, Sumy county, Kharkiv gubernia. Writer. From 1945 to 1987 he published poetry collections, books of poetry for children, a book about the Soviet Ukrainian song (1964), a collection of songs (1967), a book of humor and satire (1973), and books of sketches, essays, and memoirs titled *Bezsmertnyky* (The Immortal, 3 vols, 1974, 1978, 1982) and *V pam'iaty moiï* (In My Memory, 1986). He has written the lyrics to many Soviet Ukrainian songs. In 1983 he was awarded the Tychna Prize.

Yushchenko, Oleksander [Jušchenko], b 3 December 1869 in Vodotecha *khutir*, near Hlukhiv, Chernihiv gubernia, d 13 June 1936 in Kharkiv. Psychiatrist; full member of the AN URSR (now ANU) from 1934. A graduate of Kharkiv University (1893), he worked in Kharkiv, Warsaw, and St Petersburg (to 1897), was a professor at Tartu, Voronezh, and Northern Caucasia universities (1916–30), and worked at the Kharkiv Institute for the Upgrading of Physicians and the Ukrainian Institute of Clinical and Social Psychology (from 1930) and at the Ukrainian Psychoneurological Academy (from 1932). One of the founders of the biochemical approach in psychiatry, he studied reflexes of the sympathetic nervous system in animals and humans, the relation of nutrition and blood chemistry to childhood paralysis, various nervous and mental diseases, and the delineation of various psychic types.

Yushchyshyn, Ivan [Juščyšyn], b 1883, d ? Educator. While working as an elementary-school teacher in the villages of Zbarazh county, Galicia, he served as secretary of the Ukrainian Teachers' Mutual Aid Society in Lviv and chairman of its Pedagogical Research Commission as well as editor of the journal **Uchytel'* (1911–14). During the First World War he was deported to Irkutsk by Russian authorities. In 1918 he directed the Department of Public Education in the Ministry of Education in Kiev and edited *Derzhavnyi vistnyk* there. After the war he continued to teach in Zbarazh county, edited *Uchytel's'ke slovo* for many years, and wrote articles on educational theory and methodology. His fate after 1939 is unknown.

Yushkov, Serafim [Juškov], b 4 May 1888 in Trofimovshchina, Penza gubernia, Russia, d 18 August 1952 in Moscow. Russian historian; corresponding member of the AN URSR (now ANU) from 1939. He taught at the universities of Moscow and Leningrad and worked at the ANU Institute of History. He specialized in medieval states and law and published a number of works on the Princely era of Ukraine, including ones on the statute of Grand Prince Volodymyr the Great (1925), the *Ruskaia Pravda* (1935, 1950), and the history of feudalism in Kievan Rus' (1939).

Yushkov, Stanislav [Juškov], b 21 March 1950 in Kasli, Cheliabinsk oblast, RSFSR. Painter. Since 1953 he has lived in Ukraine. A graduate of the Kharkiv Industrial Design Institute (1972), he has worked as a stained-glass artist. Yushkov paints mainly in watercolors, because he likes to work

Stanislav Yushkov: *Understanding Each Other* (watercolor, 1986)

quickly to capture his prevailing mood. Such compositions as *Broken Line* (1985) and *Dialogue with Time* (1988) are indicative of the symbolic themes and language of his work.

Yuskiv, Teodor [Jus'kiv] (pseud: Teren), b 1911 in Potochyshche, Horodenka county, Galicia. Opera singer (baritone). He studied voice with A. Didur in Lviv and made his debut with the Lviv Opera in G. Donizetti's *La Favorita* in 1937. He performed in such operas as G. Verdi's *La Traviata* and *Rigoletto*, G. Rossini's *The Barber of Seville*, W. Mozart's *The Marriage of Figaro*, and G. Bizet's *Carmen*, in Poland, Germany, Norway, and France. After the war he gave concerts in Germany, and in 1949 he emigrated to the United States. He wrote *Natsional'no-derzhavna motyvatsiia tvorchosty S. Liudkevycha* (*The National-Statist Motivation of the Work of S. Liudkevych*, 1984) and contributed music reviews to the Ukrainian press.

Yuz Oba. A group of hills south of Kerch in which a number of 4th-century BC kurhans were found. Excavations of the kurhans in 1858–60 and in the 1880s revealed that they housed the remains of nobles from *Panticapaeum, the capital of the Bosporan Kingdom. Most of the kurhans were 8.5–12 m tall and 160–200 m wide and were stone vaulted. In one of the kurhans the remains of a priestess of the cult of Demeter were recovered. Among the grave goods found were carved wooden sarcophagi (some inlaid with amber), gold crowns, jewelry, mirrors, and high-quality vases.

Yuzefovich, Mikhail [Juzefovič, Mixail], b 29 June 1802, d 2 June 1889. Russian administrator and cultural ac-

tivist in Kiev. He was a trustee of the Kiev school district (1842–58) and head of the Kiev Archeographic Commission (1857–89). As one of the founders of the *Southwestern Branch of the Imperial Russian Geographic Society he presided over the commission in charge of building the monument to B. Khmelnytsky in Kiev. He was fiercely opposed to the Ukrainophilism of many of the branch's members, and in May 1875 he submitted a memorandum to the tsarist authorities in St Petersburg denouncing the group and its work as subversive. His action resulted in the establishment of an imperial commission (of which he was a key member), whose recommendations lay the groundwork for the repressive *Ems Ukase of 1876, also commonly known as Yuzefovich's Law.

Yuzivka. See Donetske.

Sen Paul Yuzyk

Yuzyk, Paul [Juzyk, Pavlo], b 24 June 1913 in Pinto, Saskatchewan, d 9 July 1986 in Ottawa. Scholar and Canadian senator. The son of a Ukrainian immigrant coal miner, Yuzyk was educated at the University of Saskatchewan and the University of Minnesota (PH D, 1958). He taught Slavic studies and history at the University of Manitoba (1951–63) and Soviet and Eastern European studies at the University of Ottawa (1963–78). Appointed to the Canadian Senate in 1963 as a Progressive Conservative for Manitoba, Yuzyk was a major advocate of multiculturalism and a key figure in its establishment as a state policy in Canada. He was active in international parliamentary organizations and often represented Canada abroad. He was president of the *Ukrainian National Youth Federation (MUNO, 1934–6) and of the *Ukrainian Cultural and Educational Center (Oseredok) in Winnipeg (1955–71). His historical writings, notably *The Ukrainians in Manitoba: A Social History* (1953, 1977), were among the earliest efforts to present the viewpoint of Ukrainians on their history in Canada. His other works include *Ukrainian Canadians: Their Place and Role in Canadian Life* (1967), *A Statistical Compendium on the Ukrainians in Canada, 1891–1976* (1980, with W. Darcovich), and *The Ukrainian Greek Orthodox Church of Canada, 1918–1951* (1981).

Z

Z nevoli (From Captivity). A literary miscellany published in 1908 in St Petersburg. It contained poetry and prose by O. Kovalenko, M. Cherniavsky, K. Maksymenko, P. Kapelhorodsky, Yu. Budiak, Kh. Alchevska, Lesia Ukrainka, A. Krymsky, P. Tenianko, A. Kashchenko, M. Kotsiubynsky, S. Cherkasenko, B. Hrinchenko, I. Lypa, O. Lutsky, N. Onatsky, and others. The collection was interpreted as antitsarist and was banned by the authorities; most of the copies were confiscated and destroyed.

Z potoku zhyttia (From the Stream of Life). A literary miscellany published in Kherson in 1905. Edited by M. Kotsiubynsky and M. Cherniavsky, it contained original poetry and prose by Kotsiubynsky, Cherniavsky, L. Yanovska, I. Franko, P. Myrny, A. Chaikovsky, A. Krymsky, N. Kybalchych-Kozlovska, O. Kobylianska, I. Nechui-Levytsky, M. Vorony, O. Lutsky, B. Hrinchenko, H. Hryhorenko, L. Starytska-Cherniakhivska, M. Verbytsky, and M. Starytsky. The contributions were written in response to Kotsiubynsky and Cherniavsky's appeals to Ukrainian writers to transcend peasant themes.

Za derzhavnist' (For Statehood). A serial published by the Ukrainian Military History Society in Kalisz and Warsaw (9 vols, 1925–39) and later by the Ukrainian Military History Institute in Toronto (2 vols, 1964, 1966). The editor of the entire collection was Gen M. *Sadovsky. It is an important source for the history of the struggle for Ukraine's independence. It consists of recollections, eyewitness accounts, materials on the different units of the UNR Army, and photographs.

Za markso-lenins'ku pedahohiku (For a Marxist-Leninist Pedagogy). A pedagogical journal and the organ of the *Scientific Research Institute of Pedagogy of the Ukrainian SSR, published in Kharkiv in 1931–2. It replaced *Ukrains'kyi visnyk eksperymental'noi pedahohiky ta refleksolohii and followed the Stalinist line in education. It favored the Russification of the Ukrainian school system and stressed Communist ideology and practice in education.

Za nezalezhnist' (For Independence). A bulletin of the *Ukrainian Central Committee in Poland, published monthly in Warsaw in 1934–6 and then every two months to 1939. Edited by P. Shkurat, it primarily reported on the activities of the committee.

Za Radians'ku Ukraïnu! (For Soviet Ukraine!). An organ of the CC CP(B)U and Supreme Soviet of the Ukrainian SSR, published three times a week in 1941–3 in various places, during the German occupation of Ukraine. One to two million copies were dropped from airplanes behind the German lines each month. The chief editor was the poet M. Bazhan; he was assisted by prominent writers and

cultural figures, such as W. Wasilewska and O. Kornii-chuk.

Za sobornist' (For Unity). An irregular journal of the Mohyla Society in Lutske, nine issues of which appeared in 1932–5, under the editorship of I. *Vlasovsky. The journal supported the establishment of an autocephalous Ukrainian Orthodox church under the aegis of the patriarchate of Constantinople, and close ties to other Orthodox churches. It published some articles in Belarusian and Russian.

Za sto lit: Materialy z hromads'koho i literaturnoho zhyttia Ukraïny XIX i pochatku XX stolittia (In One Hundred Years: Materials from the Community and Literary Life of Ukraine in the 19th and Early 20th Centuries). A serial published in Kiev by the Commission for the Study of Modern Ukrainian History (est 1926) of the historical section of the VUAN. Six volumes of *Za sto lit* were issued from 1927 to 1930. They were edited by M. *Hrusevsky, and their authors included H. Zhytetsky, M. Vozniak, V. Miiakovsky, S. Shamrai, Y. Hermaize, F. Savchenko, B. Sheveliv, S. Rusova, T. Slabchenko, S. Kozub, Yu. Tsyhanenko, O. Riabinin-Skliarevsky, and Ya. Aizenshtok. They are valuable sources for Ukrainian historiography.

Liubov Zabashta

Zabashta, Liubov [Zabašta, Ljubov], b 3 February 1918 in Pryluka, Poltava gubernia. Writer. She graduated from the Odessa Water Institute (1941) and has worked as an engineer. She began publishing in 1935. Since 1950 she has published over 15 poetry collections, the narrative poem *Oleksa Borkaniuk* (1954), a collection of plays and dramatic poems (1963), two books of poetry for children, and the novels *Kryla Arsena Dorosha* (The Wings of Arsen Dorosh, 1968), *Tam, za rikoiu – molodist'* (There, across the River, Is

Youth, 1970), *Budynok moho dytynstva* (The Building of My Childhood, 1983), and *Krylati moi korabli* (My Winged Ships, 1983). Three of her more recent dramatic poems are about T. Shevchenko, Lesia Ukrainka, and the legendary Marusia Churai. Editions of her selected works appeared in 1958, 1968, 1977, 1982, and 1987.

Zabashta, Vasyl [Zabašta, Vasyl'], b 11 June 1918 in Babenkove, Iziium county, Kharkiv gubernia. Painter. A graduate of the Kiev State Art Institute (1951), he joined its faculty in 1955. He has painted portraits and genre paintings in the socialist realist manner, such as *P. Tchaikovsky at the Home of M. Lysenko* (1954), *In the Years of the Underground* (1955), *Recollections of Ukraine* (1964), *Kulak Vengeance* (1971), *Victory Salute* (1975), and *The Banduryst H. Tkachenko* (1978).

Zabashtansky, Volodymyr [Zabaštans'kyj], b 5 October 1940 in Brailiv, Zhmerynka raion, Vinnytsia oblast. Poet of the **shestydesiatnyky* generation. At the age of 18 he lost his sight and both arms in an industrial accident. He is the author of the collections *Nakaz kameniariv* (The Order of the Quarriers, 1967), *Vira v liudynu* (Faith in Man, 1971), *Moia vuz'kokoliika* (My Narrow-Gauge Railroad, 1973), *Hranitni krapli* (Granite Droplets, 1975), *Syni skeli* (Blue Cliffs, 1978), *Krytseiu riadka* (With the Steel of a Line, 1977), *Vaha slova* (The Weight of the Word, 1980), and *Treba stoiaty* (One Must Stand, 1986). In 1986 he was awarded the Shevchenko Prize. An edition of his selected works appeared in 1988.

Zabelin, Ivan, b 29 September 1820 in Tver (now Kalinin), d 13 January 1909 in Moscow. Russian historian and archeologist; honorary member of the Russian Academy of Sciences from 1907. He worked in the Kremlin armory (1837–59), served on the Imperial Archeological Commission (1859–76), and taught Russian history and antiquity at Moscow University (1879–88). Among his works on the history of material culture is *Istoriia russkoi zhizni s drevneishikh vremen* (History of Russian Life from the Earliest Times, 1876–9; 2nd edn 1908–12). During expeditions to Ukrainian territories he studied several sites of note, including the Tsybalka kurhans, Chortomlyk (1862–3), and Velyka Blyznyiysia (1864). Zabelin was one of the driving forces behind the establishment of the Moscow Historical Museum, of which he was the de facto director in 1883–4.

Zabila. A family line of nobility and Cossack officers from the Chernihiv region. It was established by Petro *Zabila, who was a general quartermaster in the Hetmanate. His descendants were notable political and cultural activists of the 17th to 19th centuries. Petro's sons were Stepan *Zabila, Vasyl Zabila, who was a general flag-bearer in 1690, and Taras Zabila, whose son, Mykhailo, was a general judge in 1728–40. The poet Viktor *Zabila and the wood-carver Parmen *Zabila also belonged to the line.

Zabila, Natalia, b 5 March 1903 in St Petersburg, d 6 February 1985 in Kiev. Poet, prose writer, and playwright. She studied at the Kharkiv Institute of People's Education and worked first as a teacher and then in the editorial office of various journals; for some time she was editor of the periodical *Barvinok*. She began to publish her own

Natalia Zabala

work in 1924. Zabala wrote her first poetry in a modernistic style, which she was forced to abandon in response to Soviet political pressure. Her poetry appeared under the following titles: *Dalekii kraï* (Distant Lands, 1927), *Sonia-shni reli* (Sunny Lyres, 1928), and *Budivnyche* (Constructional, 1930). From the 1930s on she wrote mainly for children: *Iasochchyna ialynka* (Weasel's Christmas Tree, 1934), *Veseli maliuky* (Happy Youngsters, 1951), *Opovidannia, kazky, povisti* (Stories, Tales, and Novels, 1962), *Dyvovyzhni pryhody khlopchyka Iurchyka ta ioho dida* (The Strange Adventures of Little Boy George and His Grandfather, 1964), *Pro babyni kazky* (About Grandmother's Tales, 1978), *Try chverti viku* (Three-Quarters of an Age, 1978), and many others. Zabala also retold in verse *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign, 1940) and translated A. Pushkin, M. Lermontov, and N. Nekrasov from Russian. The most complete edition of her collected works is *Tvory v chotyry'okh tomakh* (Works in Four Volumes, 1971–3).

Zabila, Parmen (Zabello), b 9 August 1830 in Monastyryshche, Nizhen county, Chernihiv gubernia, d 25 February 1917 in Lausanne. Sculptor. A graduate of the St Petersburg Academy of Arts (1857) and a member of the academy from 1869, he sculpted bas-relief portraits of the Kochubei family, busts of T. Shevchenko (1869, 1872), portraits of M. Saltykov-Shchedrin (1879), V. Makovsky (1894), and V. Borovykovsky, the statue of A. Herzen at his grave in Nice (1872), and a bust for the monument to N. Gogol in Nizhen (1881).

Zabila, Petro, b 1580 in Borzna, Chernihiv region, d 1689. Cossack leader. An administrator of Polish crownlands, he switched loyalties in 1648 and joined B. Khmelnytsky's forces. He was made colonel of Borzna regiment (1649, 1654–5) and captain of Borzna company (1652–61), which position his descendants inherited and held until the abolition of the Hetmanate. In 1654 and 1655 he traveled to Moscow as the emissary of I. Zolotareno, the acting hetman of Ukrainian Cossacks in Belarus. He supported I. Vyhovsky and served as general judge (1663–9) under I. Briukhovetsky, whom he represented in Moscow (1665). Under D. Mnohorishny he was general quartermaster (1669–87) and also served as Mnohorishny's representative in Moscow. In 1672 Zabala participated in a plot against Mnohorishny, aiming to seize power himself. His plan failed, and I. Samoilovych became hetman.

Zabila, Stepan, b and d ? 17th-century Cossack officer; son of Petro Zabila. A veteran of the Chyhyryn and Crimean campaigns as well as an envoy to Moscow for I. Samoilovych in 1672, he was a captain in Borzna company (1674–7) and then general flag-bearer (1678–83) and colonel of Nizhen regiment (1687–94).

Zabila, Viktor, b 1808 on the Kukurivshchyna estate (now Zabilivshchyna), Borzna county, Chernihiv gubernia, d 1869 in Borzna. Romantic poet. From the early 1830s he lived on his father's estates, where he was visited by T. Shevchenko, V. Shternberg, and M. Glinka. He began to publish his work in the 1830s, in *Lastôvka* (1841). In 1906 I. Franko published Zabila's collection *Pisni kriz' sl'ozy* (Songs through Tears). Zabila's poetry, with its motifs of sorrow and sadness, was neither highly original nor of great significance, but his songs 'Hude viter vel' my v poli' (The Wind Is Blowing Much in the Field) and 'Ne shche-bechy soloveiku' (Don't Sing, Nightingale), set to music by Glinka, achieved great popularity. Zabila also wrote music to some of his own works and performed them with bandura accompaniment. Glinka and Shevchenko wrote about him in their memoirs.

Lidiia Zabiliasta

Danylo Zabolotny

Zabiliasta, Lidiia [Zabiljasta, Lidija], b 8 September 1953 in Oleno-Kosohorivka, Kirovohrad raion. Opera and concert singer (soprano). In 1979 she graduated from the Kiev State Conservatory in the vocal class of Z. Khrystych and began singing with the Kiev Theater of Opera and Ballet. She has won numerous music competitions, including a first prize and gold medal at the 1982 Tchaikovsky International Competition in Moscow, and has toured France, Finland, Canada, and the United States. Among her major roles are Marguerite in C. Gounod's *Faust*, Mimi and Chio-Chio-San in G. Puccini's *La Bohème* and *Madame Butterfly*, Tatiana in P. Tchaikovsky's *Eugene Onegin*, Natalka and Maryltsia in M. Lysenko's *Natalka from Poltava* and *Taras Bulba*, and Oksana in S. Hulak-Artemovsky's *Zaporozhian Cossack beyond the Danube*.

Zablonsky, Kostiantyn [Zablons'kyj, Kostjantyn], b 18 June 1915 in Khrystynivka, Cherkasy county, Kiev gubernia. Mechanical engineer and specialist in the design and theory of machines. He studied and worked at the Odessa Polytechnical Institute, as rector from 1969. He developed

a mathematical theory that allows exact calculations for mechanical transmission systems.

Zablotsky-Desiatovsky, Pavlo [Zabloc'kyj-Desjatovs'kyj], b 15 July 1814 in Chernihiv gubernia, d 14 July 1882 in Krymky, Zvenyhorodka county, Kiev gubernia. Physician; full member of the Russian Imperial Academy of Sciences. A graduate of Moscow University (1835), he was an adjunct professor of surgery (1842–6) and a professor of forensic medicine (1846–69) at the St Petersburg Medico-Surgical Academy and served as court physician (1843–9). In 1847 he was the first to use chloroform as an anesthetic in the Russian Empire. The founding president of the Russian Surgeons' Society (1882), he wrote scientific works on surgery and venereology, including *Rukovodstvo k izucheniiu i lecheniiu sifiliticheskikh boleznei* (A Guide to the Study and Treatment of Syphilitic Diseases, 1857).

Zabludów (Ukrainian: Zabludiv). A town (1983 pop 1,800) in northern Podlachia in Białystok voivodeship, Poland. During 1567–8 a printing press was founded there and was run by I. *Fedorovych and P. Mstsislavets. The first printed works to come out were the *Zabludów Gospel (1568–9) and a psalter with breviary (1570).

Zabludów Gospel. The first published Church Slavonic didactic gospel. It was printed in 1568–9 by I. *Fedorovych and P. Mstsislavets at the press of the Lithuanian grand hetman H. Khodkevich in Zabludów (Ukrainian: Zabludiv) in northern Podlachia. Khodkevych wanted the gospel to be published in the vernacular so that it would be comprehensible to the common people, but Fedorovych and Mstsislavets printed it in Church Slavonic.

Zaboi. A literary organization of the Donbas region, founded in 1925. It initially consisted of Russian writers and was led by the critic O. Selivanovsky. When Ukrainization was at its peak, it began attracting Ukrainian writers. Its membership included I. Le, H. Bahliuk, V. Haivoronsky, K. Herasymenko, B. Pavlivsky, V. Ivanov-Kramatorsky, M. Rud, A. Trylisky, M. Sobolenko, B. Semenov, P. Chebalin, and D. Tkach. During the attacks on Ukrainian culture in the 1930s, most of its members were shot or arrested and exiled. Its official organ was a journal of the same name. When the Writers' Union of Ukraine was formed in 1932, Zaboi ceased to exist.

Zaboi. A literary journal (141 issues) of Donetske writers, established in 1923 by the Artemivske newspaper *Kocheharka*. It was initially published in Russian, and then Ukrainized in the mid-1920s. In 1924 it was made the official organ of the organization of the same name and was edited by H. Bahliuk. In 1932 the journal was renamed **Literaturnyi Donbas*.

Zabolotny, Danylo [Zabolotnyj], b 28 December 1866 in Chobotarka (now Zabolotne), Olhopil county, Podilia gubernia, d 15 December 1929 in Kiev. Microbiologist and epidemiologist; full member of the VUAN from 1922 and its president in 1928–9; full member of the USSR Academy of Sciences from 1929. A graduate in physics and mathematics of Odessa University (1891) and in medicine of Kiev University (1894), he was the founding director of the first bacteriology department in the Russian Empire, at the St

Petersburg Women's Medical Institute (1898–1928), and of the first epidemiology department in the world, at Odessa University (1920). He was rector of the Odessa Medical Institute (1921–4), taught at the Leningrad Military Medical Academy (1924–8), and founded and directed the VUAN Institute of Microbiology and Virology (1928). Zabolotny achieved important results in his research on plague, cholera, syphilis, gangrene, diphtheria, typhus, and dysentery; he conducted expeditions to India, Mongolia, and China to study the plague. He discovered (with I. Savchenko) bacilli-carrying and vibrio cholera (1893), and proved (1911) that the bacteria causing plague are transmitted to humans by wild rodents. A cofounder of the International Society of Microbiologists, Zabolotny wrote *Osnovy epidemiologii* (Fundamentals of Epidemiology, vol 1, 1927). Compilations of his studies were published as *Izbrannyye trudy* (Collected Works, 2 vols, 1956–7) and *Vybrani pratsi* (Selected Works, 1969). Biographies of him have been written by H. Golubev (1962), V. Bilai (1966), and Ye. Kryzhanivsky (1971), and there is a museum in his honor in Zabolotne, where he is buried.

Volodymyr Zabolotny

Metropolitan Rafail
Zaborovsky

Zabolotny, Volodymyr [Zabolotnyj], b 13 August 1898 in Karen, Pereiaslav county, Poltava gubernia, d 3 August 1962 in Kiev. Architect; president of the Academy of Architecture of the Ukrainian SSR (1945–56) and full member of the USSR Academy of Construction and Architecture from 1950. After graduating from the Kiev State Art Institute in 1927, he joined its faculty and in 1940 became a professor. He supervised the design and construction of over 70 blocks in interwar Kiev and many urban housing developments and workers' settlements in the Donbas and Kryvyi Rih region (1929–33), and designed the Palace of Culture at the Dzerzhinsky Metallurgical Plant in Dniprodzerzhynske (1932) and the Building of the Supreme Soviet in Kiev (1936–9). He wrote studies on Ukrainian architecture, including a book on the first 30 years of Soviet architecture in Ukraine (1948). A booklet about him by L. Hrachova was published in Kiev in 1967.

Zaborovsky, Rafail [Zaborovs'kyj, Rafajil] (secular name: Mykhailo), b 1677 in Galicia, d 22 October 1747 in Kiev. Orthodox bishop. He studied at the Kievan Mohyla Academy and the Moscow Theological Academy, where

he later taught rhetoric (1718). After serving as a chaplain in the Russian navy he became archimandrite of the Tver Monastery and a member of the Holy Synod in 1723. In 1725 he was consecrated bishop of Pskov. He was elevated to the office of archbishop of Kiev by the tsar in 1731, and he later convinced the church authorities to restore Kiev eparchy as a metropolity, whereupon he took the title 'Metropolitan of Kiev, Halych, and Little Russia' in 1743. A supporter of Archbishop T. Prokopovych, Zaborovsky carried out the Russian government's policy of destroying the autonomy of the Ukrainian church by instituting the *Dukhovnyi reglament* of 1721 and other synodal ukases. He did, however, raise the academic standards and improve the economic standing of the Kievan Mohyla Academy. He published a new statute for the academy, reformed the curriculum (adding new courses in more modern disciplines), and provided much money for the expansion of the academy's buildings and for scholarships for poor students. The academy even briefly became known as the Mohyla-Zaborovsky Academy. The bell tower of the Kievan Cave Monastery (1736–45), the bell tower of the St Sophia Cathedral, the baroque Zaborovsky Gate, and a number of other buildings were constructed during his tenure as metropolitan. A biography of him by P. Orlovsky appeared in *TKDA* (1908).

A. Zhukovsky

The Zaborovsky Gate

Zaborovsky Gate (Zaborovskoho brama). The main entrance to the grounds of the former residence of the metropolitan of Kiev. It was built in 1746–8 in the baroque style by J. Schädel in the wall encircling the St Sophia Cathedral and was financed by Metropolitan R. Zaborovsky. The gate had columns with Corinthian capitals, volutes, mascarons, and acanthus leaves. In the 1920s its opening was walled up, and its façade was reconstructed by V. Krychevsky. It was restored again in 1946–8.

Zaborowski, Tymon, b 18 April 1799 in Lychkivtsi near Husiatyn, Galicia, d 20 or 28 March 1828 in Lychkivtsi. Polish pseudoclassical and Romantic poet in Galicia; a representative of the Ukrainian school in Polish literature. He studied at the Kremianets Lyceum (1810–17), where he belonged to the so-called Writers' Club along with J. Korzeniowski. Many of his works are on Ukrainian themes and Ukrainian-Polish relations. They include the narrative poems 'Bolesław Chrobry, czyli zdobycie Kijowa' (Bolesław the Brave, or the Conquest of Kiev) and 'Bojan,' the patriotic collection 'Dumy podolskie za cza-

sów panowania tureckiego w tej ziemi' (Podilian Dumas from the Time of Turkish Rule in That Land, pub in *Haliczanin*, vol 2, 1830), and the dramatic poems 'Bohdan Chmielnicki' (Bohdan Khmelnytsky) and 'Tajemnica, czyli Borys i Milwiana' (The Secret, or Borys and Milwiana), about the era of Yaroslav the Wise. An edition of his collected writings was published in Warsaw in 1936.

Zabuzky, Semen [Zabuz'skyj] (also Zabusky), b and d ? 17th-century Cossack officer. Prior to the Battle of Pyliavtsi in 1648, he defected from B. Khmelnytsky's Cossack army to the Poles. In the summer of 1649 he was designated hetman of Ukraine by Jan II Casimir Vasa, who hoped to replace Khmelnytsky with a loyal leader. Toward the end of 1650 he was instructed to amass a mercenary army to take into Ukraine, but the campaign did not materialize. Historical sources provide no information about Zabuzky's subsequent fate.

Zachariasiewicz, Jan, b 1 September 1825 in Radymno, Peremyshl circle, d 7 May 1906 in Kryvcha, Peremyshl county, Galicia. Polish Galician writer and radical democrat. In the years 1844–9 and 1851–65 he worked as a journalist and newspaper editor in Lviv. He wrote many publicistic novels about Galician society. They include 'Uczony' (The Scholar, 1855), based loosely on the life of I. Vahylevych, *Święty Jur* (St George's Cathedral, 3 vols, 1862), in which he criticized the Uniate clergy, and *Jarema* (Yarema, 1863), about conflicts between the Polish gentry and the Ukrainian peasantry. He was a popular writer in his time. An 11-volume edition of his collected works was published in 1886–8.

Zacharjewicz, Juljan, b 17 July 1837 in Lviv, d 27 December 1898. Polish architect. He was educated in Lviv and Vienna, and served as a railway engineer in Austria and Galicia (1858–71) before becoming a professor of the Lviv Polytechnic. In Lviv he designed the buildings of the Polytechnic (1872–7), the Industrial Museum (1874), the Savings Bank (1888–91), the Franciscan Church, and buildings in the Kostolivka district. He also restored a Roman Catholic church in Stryi and the castle in Husiatyn.

Zachepylivka [Začepylivka]. IV-16. A town smt (1990 pop 5,100) on the Berestova River and a raion center in Kharkiv oblast. It was founded in the first half of the 17th century by the Cossacks. From 1802 it was a *volost* center in Kostiantynohrad county, Poltava gubernia. The town was raised to smt status in 1968. It has a food industry and an embroidery workshop of the Kharkiv Handicrafts Consortium.

Zadeka, Martyn. See Hak, Anatol.

Zaderej, Andrew [Zaderej, Andrij], b 1921 in Yampil, Podilia gubernia. Engineer and inventor; member of the New York Academy of Sciences since 1980. He studied at the Kiev Polytechnical Institute but was displaced by the Second World War, and emigrated to the United States in 1949. He founded the Monitron and Nitron electronics companies in Indiana. Zaderej works in the fields of electronic and computer technology, bioelectronics, and medical electronics. He invented the first three-dimensional vector electrocardioscope and an electrogenic seed-treat-

ing machine, which is in worldwide use. His numerous electronic devices and systems also include an all-electric automobile, high-efficiency electric lamps, a sound-recorder, single-phase inductors, a solid state ignition, and thermally activated switches.

Zadniprovsy, Mykhailo [Zadniprovs'kyj, Myxajlo], b 9 January 1924 in Kamianka (now in Cherkasy oblast), d 9 June 1980 in Kiev. Stage and film actor. He completed study at the Kiev Institute of Theater Arts (1950) and then worked in the Kiev Ukrainian Drama Theater, where he played the title roles in T. Shevchenko's *Nazar Stodolia* and A. D'Ennery and F. Dumanoir's *Don Cezar de Bazan*. He also acted in the film *Dolia Maryny* (Maryna's Fate, 1953).

Zadontsev, Anton [Zadoncev], b 16 August 1908 in Stavydla, Oleksandrivske county, Katerynoslav gubernia, d 5 December 1971 in Dnipropetrovske. Biologist; corresponding member of the AN URSR (now ANU) from 1951 and full member of the All-Union Academy of Agricultural Sciences from 1960. A graduate of the Bila Tserkva Agricultural Institute (1929), he worked at the All-Union Scientific Research Institute of Corn (1932–71, from 1941 as director). His research mainly concerned the agrophysiological aspects of the hardiness and productivity of winter wheat.

Dezyderii Zador

Zador, Dezyderii [Dezyderij], b 20 October 1912 in Uzhhorod, d 16 September 1985 in Lviv. Composer, pianist, pedagogue, and conductor. A graduate of the Prague Conservatory (1934), he studied composition with V. Novak and piano with V. Kurz and then concertized in Czechoslovakia, Hungary, and Rumania. From 1945 he was a key figure in organizing musical life in Transcarpathia, as director of the Uzhhorod Music School and artistic director of the Transcarpathian Philharmonic Orchestra. In 1963 he moved, to teach at the Lviv Conservatory. His works include the cantata *The Carpathians* (1959), the symphonic poem *Verkhovyna* (1971), concertos for piano (1965) and for dulcimer (1982), incidental and chamber music, pieces for piano, choruses, art songs, and arrangements of folk songs.

Zadoretsky, Petro [Zadorec'kyj], b ? in Strilychi, Bibrka county, Galicia, d 9 May 1967 in New York. *Sich organizer and community activist. As a young man he set up a Sich society in his village, and after emigrating to the

United States in 1896 he organized and led a Sokil society (renamed Sich in 1914) in New York. He subsequently was active in establishing a network of Sich societies and served as supreme otaman in 1918–19. During the interwar period he was a strong supporter of the Organization for the Rebirth of Ukraine.

Ivan Zadorozhny

Bishop Maksym Zadvirniak

Zadorozhny, Ivan [Zadorožnyj], b 10 March 1916 in Horodenka, Galicia, d 11 February 1972 in Stamford, Connecticut. Conductor and singer (baritone). He studied at the Greek Catholic Theological Academy in Lviv and the Lysenko Higher Institute of Music before emigrating to Germany (1944) and then to the United States (1949). There he appeared in opera productions and conducted church choirs and choruses such as *Dumka* (New York) and *Prometheus* (Philadelphia). He achieved his greatest renown as conductor of the Ukrainian Bandurist Chorus (Detroit).

Valentyn Zadorozhny: *Mother* (1969)

Zadorozhny, Valentyn [Zadorožnyj], b 7 August 1921 in Kiev, d 21 October 1988 in Kiev. Painter. In 1951 he graduated from the Kiev State Art Institute, where he studied under K. Yeleva, A. Petrytsky, and O. Shovkunenko. He has painted stylistically original historical and genre canvases, such as *Bohdan Khmelnytsky Leaving His Son Tymish as Hostage with the Crimean Khan* (1954), *Kobzar's Song* (1962–4), *At the Site of Past Battles: My Countrymen* (1964–5), the triptych *Mother* (1969), *My Village and I* (1975–7), *Marusia Churai* (1972–8), and *Soldiers' Mothers* (1985–6). He has also designed posters and the stained-glass triptych *T. Shevchenko and the People*, at Kiev University (1967), the mosaic panel *My Fatherland*, at the Dormash Plant's Palace of Culture in Kremenchuk (1969), and the stained-glass window *Cosmos* (1974) and mural *Birth of Technical Thought* (1975), in the Pavlohrad Palace of Culture.

Zadunaiska Sich. See Danubian Sich.

Zadvirniak, Maksym [Zadvirnjak], b 1882 in Podilia gubernia, d ? Bishop of the Ukrainian Autocephalous Orthodox church. He was ordained in 1915 and became bishop of Proskuriv in 1923. He was arrested in 1930 and sent to the Solovets Islands, where he died.

Zafiiovska, Liubov [Zafijovs'ka, Ljubov] (Safjowska, Lubow), b 25 June 1901 in Kielce, Poland, d 20 April 1969 in New York. Ukrainian botanist and cytologist; member of the Shevchenko Scientific Society from 1950. A graduate of Kiev University (1930, 1937), she worked at the VUAN Institute of Botany (1930–3) and taught at Kiev University (1933–42) and Poznań University (1942–5). After emigrating to the United States in 1951, she did research on embryology and the cell physiology of plants at Chicago (1958–9) and Fordham (from 1961) universities.

Zagórski, Tadeusz, b 1866, d 1934. Polish activist in Western Ukraine. A lawyer by profession, he was head of the Polish People's Committee in Ruthenia and J. Piłsudski's representative to the General Staff of the UNR Army (1919–20). He later lived in Volhynia, where he edited the newspaper *Przegląd Wotyński*.

Zagreb. The capital (1990 pop 649,586) of Croatia and its chief cultural and educational center. It is also a religious and educational center of *Križevci eparchy, which has jurisdiction over Greek Catholic Ukrainians in the Bačka region and Slovenia. ss Cyril and Methodius's Church and Greek Catholic Seminary, with a secondary school, are located in Zagreb. In 1981 there were 381 Ukrainians in the city (120 of whom were listed as Ruthenians).

In 1919 a mission of the Western Ukrainian National Republic, headed by D. *Lukianovych, was stationed in Zagreb. After the First World War a small community of Ukrainian émigrés formed there, and the university attracted some young people from Galicia. In the interwar period a Prosvita Society (est 1922), the Union of Ukrainian Students (1927), and the Dnipro student society were active there. The student community helped publish the bimonthly *Dumka*. In 1941–4 a quasiconsular representation headed by V. Voitanytsky was maintained in Zagreb by the OUN (Melnyk faction). Today a Ukrainian cultural-educational association is active in the city. Since 1966 guest

ss Cyril and Methodius Church and Seminary in Zagreb

lecturers from Ukraine have taught Ukrainian language and literature at the department of Russian philology of Zagreb University. As well, an exchange program exists between Kiev and Zagreb universities, and occasional cultural exchanges take place between the two cities.

Zahaikevych, Bohdan [Zahajkevyc̣h], b 5 February 1887 in Ternopil, Galicia, d 20 August 1967 in Irvington, New

Bohdan Zahaikevych

Volodymyr Zahaikevych

Jersey. Educator, collector, and civic activist; brother of V. *Zahaikevych; member of the Shevchenko Scientific Society and the Ukrainian Academy of Arts and Sciences in the US. After graduating from Lviv University he taught secondary school in Peremyshl. During the First World War he served in the Ukrainian Galician Army. In 1922 he returned as a teacher to Peremyshl, where he also became director of the Stryvivor Museum and president of the Boian society. After emigrating to the United States in 1950, he devoted his time to the Shevchenko Scientific Society's regional studies series of regional collections and was editor of the Peremyshl volume.

Zahaikevych, Volodymyr [Zahajkevyc̣h], b October 1876 in Ternopil, Galicia, d 7 June 1949 in Mittenwald, Bavaria, West Germany. Lawyer and political leader; brother of B. *Zahaikevych. A graduate of Lviv University, he opened a law office in Peremyshl in 1909 and played a leading role in the economic and political life of the region. A member of the National Democratic party, he became a deputy to the Austrian parliament in 1912. With the disintegration of the Austrian Empire he was elected to the Ukrainian National Rada and a month later was imprisoned in a Polish concentration camp for a year. In the interwar period he acted as defense counsel in many political trials and was elected as a candidate of the Ukrainian National Democratic Alliance to the Polish Sejm in 1928 and 1930. He was deputy speaker of the Sejm (1928–30). During the Second World War he served on the court of appeal in Cracow. In 1944 he left Ukraine for Vienna and then Bavaria.

Zahalna Knyhozbirnia (General Library). A publishing house owned and operated in Kolomyia, Galicia, by D. Nykolyshyn from 1914 to 1935. It published 36 books of literature, primarily by Nykolyshyn and U. Kravchenko; reprints of T. Shevchenko's works; and translations of classical literature (eg, by Plato, Ovid, Cicero, and Demosthenes) by Nykolyshyn.

Oleksander Zaharov

Zaharov, Oleksander (real surname: Fessing), b 17 January 1877 in Yelysavethrad, Kherson gubernia, d 12 November 1941 in Saratov, Russia. Theatrical director and actor. After graduating from the Moscow Philharmonic School he began his career in various Russian theaters in Moscow and St Petersburg. He moved to Kiev and became artistic director of the *State Drama Theater (1918–

19) and the Shevchenko First Theater of the Ukrainian Soviet Republic (1919–21). Subsequently he became artistic director of the Ukrainiska Besida Theater (1921–3) in Lviv and the Ruthenian Theater of the Prosvita Society (1923–5) in Uzhhorod. After returning from Prague (where he had worked with M. *Sadovsky) to Ukraine in 1926, Zaharov worked in the Zankovetska Theater (until 1927) and directed the Kharkiv Chervonozavodskiyi Ukrainian Drama Theater (until 1928). A director of the realistic-psychological school, in Ukrainian theaters he successfully staged plays by V. Vynnychenko, Lesia Ukrainka, Ya. Mamonov, H. Ibsen, G. Hauptmann, and W. Shakespeare. He was severely criticized for his productions of L. Starytska-Cherniakhivska's *Rozbiinyk Karmeliuk* (The Robber Karmeliuk) and Vynnychenko's *Hrih* (Sin), and left Kharkiv to work in Russian provincial theaters. Zaharov lectured at the Kiev Music and Drama Institute and the Ukrainian Drama School in Lviv. A biography by N. Nikeiev was published in Kiev in 1969.

V. Revutsky

Zahirnia, Mariia. See Hrinchenko, Mariia.

Zahirny, Nykolai. See Kachala, Stepan.

Zahorianska, Kateryna [Zahorjans'ka, Kateryna], b 8 September 1898 in Odessa, d 2 April 1985 in Kiev. Stage actress. She completed study at the Lysenko Music and Drama Institute (1920) and acted in the Shevchenko First Theater of the Ukrainian Soviet Republic (1919–25) and in the Odessa Ukrainian Music and Drama Theater (1925–60, with interruptions).

Zahorodia [Zahoroddja]. The higher (elevations up to 180 m) and dryer section of Polisia, situated between the Pyna and the Yaselda rivers in southern Brest oblast, Belarus. The region consists of a slightly rolling plain. Its soils (clays, moraines, and sands), generally better than those in the rest of Polisia, allow for extensive agricultural development and a greater population density. The inhabitants of the region are predominantly Ukrainian. Its main center is Pynske.

Zahorovsky [Zahorovs'kyj]. A Ukrainian noble family from Volhynia. The family was founded by Petro (d 1546), a mayor of Lutsk and the father of V. *Zahorovsky. O. Fotynsky wrote *Iz semeinoi khroniki dvorian Zahorovskikh vo vtoroi polovine XVI v.* (From the Family Chronicle of the Nobles Zahorovsky in the Second Half of the 16th Century, 1900).

Zahorovsky, Mykola [Zahorovs'kyj], b 16 July 1893 in Odessa, d 1934. Hydrobiologist. A professor at the Odessa Institute of People's Education and the Institute of the National Economy in the 1930s, he was a pioneer in the study of the biocenosis of the Black Sea.

Zahorovsky, Oleksander [Zahorovs'kyj], b 1850 in the Kiev region, d 1919 in Odessa. Law historian. A graduate of Kiev University (1871), he served as a professor at Kharkiv (1880–92) and Odessa (1892–1919) universities. The most important of his works are *Istoricheskii ocherk zaima po russkomu pravu do kontsa 13 st.* (Historical Survey of Credit According to Russian Law to the End of the 13th Century, 1875), *O razvoide po russkomu pravu* (On Divorce

According to Russian Law, 1884), and *Kurs semeinogo prava* (A Course in Family Law, 1902; 2nd edn 1909).

Zahorovsky, Vasyl [Zahorovs'kyj, Vasył'], b ?, d 1577 or 1580 in the Crimea. Volhynian nobleman; son of P. Zahorovsky. He worked in Volhynia as a tax official for the Polish kingdom and as vicegerent of Bratslav, in Podilia. During the Crimean Tatars' invasion of Volhynia (1576) he was taken captive. In confinement he recorded his testament (1577), in which he paid particular attention to the upbringing of his children. That cultural-historical document was published in *Arkhiv Iugo-Zapadnoi Rossii* (1859). Zahorovsky died in captivity.

Zahorska, Melaniia [Zahors'ka, Melanija] (née Khodot), b 1837 in Pokoshychi, Krolovets county, Chernihiv gubernia, d 1892 in Pokoshychi. Popular singer (soprano). Lacking formal training, she frequently performed in the Chernihiv amateur theater (directed by O. Markovych) and at folk song concerts. Much of her Ukrainian folk song repertoire was written down by M. Lysenko, and part was published in his *Zbirnyk ukrains'kykh narodnykh pisen'* (A Collection of Ukrainian Folk Songs, vol 3, 1876).

Zahorsky, Ivan [Zahors'kyj], b 26 November 1858 in Bobrynets, Kherson gubernia, d 24 August 1904 in Katerynoslav (now Dnipropetrovske). Comic actor. He began his career in Russian provincial touring troupes and then worked in M. Kropyvnytsky's (1889–1900) and P. Sakhansky's troupes (1900–3).

Zahorsky, Ivan [Zahors'kyj] (real surname: Podzikunov), b 1861 in Kharkiv, d 20 April 1908 in Odessa. Comic actor. He began his career in the Savin Russian Theater in Kharkiv (1879) and then worked in M. Kropyvnytsky's (1880–8) and M. Sadovsky's (1888–1900) troupes, on the Russian stage (1900–6), in O. Suslov's troupe (1907), and in Sadovsky's Theater (1907–8).

Zahorsky, Petro [Zahors'kyj], b 20 August 1764 in Ponornytsia, Novhorod-Siverskyi county, Chernihiv gubernia, d 1 April 1846 in St Petersburg. Anatomist and physiologist; full member of the Russian Imperial Academy of Sciences. Educated at Chernihiv College (1776–82) and the St Petersburg Army Hospital Medical School (1784–5), in 1797 he was appointed an adjunct professor (from 1880 professor) of the St Petersburg Medico-Surgical Academy. He discovered the nuclei of the abducent, accessory, and hypoglossal cranial nerves. He established the first school of anatomists in the Russian Empire and wrote the first anatomy textbook, *Sokrashchennaia anatomia, ili rukovodstvo k poznaniuu stroeniia chelovecheskogo tela* (An Abridged Anatomy, or Guide to the Study of the Structure of the Human Body, 1801).

Zahrava (Crimson Sky). A semimonthly political journal published in Lviv by D. *Dontsov from April 1923 to mid-1924. Initially it was financially supported by the Ukrainian Military Organization (UVO), and its regular contributors were UVO members (eg, D. Paliiv, V. Kuchabsky, M. Matchak, and V. Kuzmovych). Aimed at a peasant readership, the journal propagated an uncompromising form of integral nationalism. In 1924 Dontsov and Zahrava's supporters organized a distinct political party, the *Ukrainian Party of National Work. The journal served as its organ.

Zahrava (1923-4)

Pavlo Zahrebelny (1924-)

Zahrava (Crimson Sky). A literary and artistic monthly published by the DP Association of Ukrainian Writers and Journalists in Augsburg, Germany, in 1946. Four issues appeared.

Zahrava Theater. The foremost theater in Western Ukraine during the interwar period, organized by V. *Blavatsky in Peremyshl in 1933 from the cast of an extant Zahrava theater (est 1931 by O. Stepovy) and from part of the cast of the *Tobilevykh Theater. Zahrava continued the innovative experimentation of *Berezil: it introduced the chorus in its adaptations of V. Stefanyk's *Zemlia* (The Earth) and plastic-mass scenes in B. Lepky's *Baturyn*; modernized the text of M. Starytsky's *Oi, ne khody, Hrytsiu ...* (Don't Go to the Party, Hryts ...); performed new Ukrainian dramas of national-political, historical, and religious significance, such as O. Oles's *Obitovana zemlia* (The Promised Land), Z. Tarnavsky's *Taras Shevchenko*, and H. Luzhnytsky's *Duma pro Nechaia* (Duma about Nechai) and *Holhota* (Golgotha); and staged modern European plays, including M. Pagnol and P. Nivoix's *Les Marchands de gloire* and S. Maugham's *The Sacred Flame*. In 1938 Zahrava united with the Tobilevykh Theater to form the Kotliarevsky Theater (later the *Lesia Ukrainka Theater).

Zahrava Theater. See Toronto Zahrava Theater.

Zahrebelny, Oleksander [Zahrebel'nyj], b 24 February 1937 in Dnipropetrovske. Opera singer (bass). After graduating from the Kiev Conservatory (1968) he joined the Kiev Theater of Opera and Ballet as a soloist. His repertoire includes the name-parts in M. Glinka's *Ruslan and Liudmila*, M. Mussorgsky's *Boris Godunov*, and H. Maiboroda's *Yaroslav the Wise*, as well as Mephistopheles in C. Gounod's *Faust* and Boris Timofeevich in D. Shostakovich's *Katerina Izmailova*. Zahrebelny also performs as a chamber singer.

Zahrebelny, Pavlo [Zahrebel'nyj], b 25 August 1924 in Soloshyne, now in Kobeliaky raion, Poltava oblast. Writer and community and political activist. His first published work appeared in 1949, and his first collection of stories was *Kakhoivs'ki opovidannia* (Kakhivka Stories, written with Yu. Ponomarenko, 1953). In addition to other collections of stories he began writing novels, which were set during the Second World War and were mostly propa-

gandistic. They included *Evropa-45* (Europe-45, 1959; English trans 1977), *Evropa: Zakhid* (Europe: The West, 1961), and *Shepit* (The Whisper, 1966). Also propagandistic are his novels with contemporary settings, which are uneven and filled with seemingly irrelevant information: *Den' dlia pryideshn'oho* (A Day for the Future, 1964), *Z pohliadu vichnosti* (From the Point of View of Eternity, 1970; English trans 1978), *Perekhodymo do liubovi* (We Turn to Love, 1971), *Rozhin* (The Acceleration, 1976), *Levyne sertse* (Lionheart, 1978), and others. Zahrebelny also wrote a number of historical novels in which history is rather freely interpreted, including *Dyvo* (The Apparition, 1968), *Smert' v Kyievi* (Death in Kiev, 1973), *Levpraksia* (1975), and *Roksolana* (1979). His best work is a historical novel in the form of a monologue, *Ia, Bohdan* (I, Bohdan, 1983), about Hetman B. Khmelnytsky. In it he employs a rich lexicon and shows a mastery of style. Because it was a novel written under pressure of the official Soviet theme of the 'unification of peoples,' however, it suffers from historical falsification. Zahrebelny has also written essays, plays, and screenplays. He has been active in the administration of the Writers' Union of Ukraine, in which he served as first secretary (1979-86).

BIBLIOGRAPHY

 Fashchenko, V. *Pavlo Zahrebel'nyi: Narys tvorchosti* (Kiev 1984)
 I. Koshelivets

Zahrebelny, Pavlo [Zahrebel'nyj], b 22 June 1934 in Rozhdestvenske, now in Drabiv raion, Cherkasy oblast. Stage actor and director. He completed study at the Kiev Institute of Theater Arts (1960) and then worked as an actor in the Ternopil Music and Drama Theater and, since 1974, as its principal stage director. He played the title role in M. Rylsky and B. Tiahno's *Taras Bulba*.

Zahretsky, Dmytro [Zahrec'kyj], b 8 September 1924 in Odessa, d 5 March 1980 in Odessa. Choir conductor. Upon graduating from the Odessa Conservatory in 1949, he joined its faculty and became artistic director and chief conductor of the choir kapelle of the Odessa Philharmonia (1949-55). Then he served as chief choirmaster of the Odessa Opera and Ballet Theater, at which he helped stage more than 50 operas. He was a coauthor of *Khorove aranzhuvannia* (Choir Arranging, 1977).

Zahrodsky, Andrii [Zahrods'kyj, Andrij], b 2 December 1886 in Zelenkiv, Uman county, Kiev gubernia, d 30 November 1948 in Kiev. Philologist. After graduating from Warsaw University (1912) he taught Russian and Ukrainian in Kiev. He was a docent at Kiev University (1938-41, 1944-8) and worked at the Institute of Pedagogy in Kiev (1943-8). He wrote a Ukrainian grammar for use in high schools (1938), which was reprinted annually until 1959, and articles on Ukrainian orthography and the methodology of teaching Ukrainian.

Zahrodsky, Oleksander [Zahrods'kyj], b 10 April 1889 in Zelenkiv, Uman county, Kiev gubernia, d 4 August 1968 in New York. Senior military officer. After joining the UNR Army in 1918, he commanded a battalion, a regiment, and a division of the *Zaporozhian Corps and served as a deputy corps commander (1919). In the First Winter Campaign (1919-20) he was in charge of the Second Volhynian

Gen Oleksander Zahrotsky

Dmytro Zahul (portrait by Mykhailo Zhuk, crayon, 1919)

Division, and on his return he served as deputy commander of the UNR Army. He attained the rank of brigadier general. During his service he participated in about 100 battles and was wounded five times. In the Polish internment camp at Kalisz he was active in the educational and cultural program for Ukrainian soldiers. After the Second World War he emigrated to the United States, where he continued to be active in the Ukrainian community, veterans' organizations, and the military staff of the UNR government-in-exile, which promoted him to major general and lieutenant general.

ZAHS (Zapysy aktiv hromadianskoho stanu; Russian: Zapysy aktov grazhdanskogo sostoiانيا, or ZAGS). The office of the Registry of Documents of Civil Status in the USSR, run by the MVD and oblast, raion, city, and rural soviets. ZAHS offices registered all births, deaths, marriages, divorces, adoptions, and name changes. They were created in Soviet Russia in 1918 and in Ukraine in 1919 as a replacement for church registers. All ZAHS offices were under the jurisdiction of the NKVD until 1931, when the central office in Soviet Ukraine came under the jurisdiction of the Presidium of the Central Executive Committee of the Ukrainian SSR, and other offices were placed under the executive committees of oblast, raion, city, and rural soviets. In 1941 all ZAHS offices were again placed under the jurisdiction of the NKVD, and for the first time a central USSR office was created at NKVD headquarters in Moscow. In 1946 the MVD replaced the NKVD. From 1958 the Ministry of Justice of the Ukrainian SSR was responsible for training ZAHS staff in procedures. Civil registration in the USSR did not escape political interference. During the 1932-3 man-made famine in Ukraine, for example, ZAHS offices falsified death certificates to hide the real scope of the catastrophe.

Zahul, Dmytro (pseud.: I. Maidan, B. Tyverets), b 28 August 1890 in Miliie, Bukovyna, d 1944 in Kolyma. Writer. He belonged to the Muzahet group of symbolist poets. He later joined the Zakhidnia Ukraina group. His first published works appeared in the newspaper *Bukovyna* in 1907. Later he published in *Hart*, *Hlobus*, *Zhyttia i revoliutsiia*, *Chervonyi shliakh*, and other journals and almanacs. Collections of his poetry include *Z zelenykh hir* (From the Green Mountains, 1918), *Na hrani* (On the Edge, 1919),

Nash den' (Our Day, 1923), *Motyvy* (Motifs, 1927), and the posthumous *Vybrane* (Selections, 1961). He also wrote a textbook, *Poetyka* (Poetics, 1923), a collection of essays in literary criticism, *Literaturna chy literaturshchyna?* (Literature or Literary Hackwork?, 1926), and a collection of translations, *Vybir nimets'kykh baliad* (A Selection of German Ballads, 1928). He was arrested on 26 February 1933 and sentenced to 10 years' imprisonment in concentration camps. An edition of his poems was published in Kiev in 1990.

Mykola Zaiachkivsky

Zaiachkivsky, Mykola [Zajačkivs'kyj], b 21 November 1870 in Tyshkivtsi, Horodenka county, Galicia, d 11 February 1938 in Lviv. Civic and business organizer. A graduate in theology and law of Lviv University, he was director of the Ukrainska Besida Theater (1900) and inspector and then director of Narodna Torhovia in Lviv. During the First World War he was deported to Siberia by the Russian authorities (1914-17). With the outbreak of the revolution he worked in the co-operative movement in Kiev (1917-18). After the war he served as president of a number of organizations, such as the Burgher Brotherhood, the Ukrainian Emigrant Aid Society (1925-38), Sokil (1922-33), and the Ridna Shkola society (1936-8). He was a member of the Trade and Industry Chamber in Lviv and an honorary member of the Union of Ukrainian Merchants and Entrepreneurs.

Zaiachkivsky, Myron [Zajačkivs'kyj] (pseud.: Kosar), b 18 November 1897 in Kolomyia, Galicia, d 1937. Communist organizer. During the First World War he was captured and interned in a Russian POW camp. In 1920 he fought in the Red Army and joined the CP(B)U. After the war he worked as a lecturer and edited a Party newspaper in Berdychiv and then headed the Department of Agitation and Propaganda of the Uman Okruha Party Committee (1924-6) and the CC CP(B)U Department of Agitation in Kharkiv (1926-8). Upon returning to Galicia for underground work he was elected to the CC of the Communist Party of Western Ukraine, and directed its operations from the Party center in Berlin. After the purge of the Vasylykiv faction from the Party he was promoted to its Politburo. In 1933 he was called to Moscow. He was arrested in 1934 and sent to a concentration camp, where he was executed by the NKVD.

Zaiachkivsky, Tyt [Zajačkivs'kyj], b 1846 in Lopianka, Stryi circle, Galicia, d 25 March 1926 in Dora, Nadvirna county, Galicia. Judge and civic figure; son of Rev Y. *Zaiachkivsky. He studied law at Lviv University and then worked in several smaller centers before returning to Lviv, where he eventually became a judge. Continually active in local Ukrainian civic life, he served as a deputy to the Galician Diet in 1895–1901.

Rev Yosyp Zaiachkivsky
(1810–94)

Mykola Zaitsev

Zaiachkivsky, Yosyp [Zajačkivs'kyj, Josyp], b 1810, d 1894. Greek Catholic priest and civic activist in Galicia. In 1848 he was a member of the Ruthenian Council in Stryi. During the 1860s he (together with S. Kachala) was a leading figure in the nascent Ukrainian national movement in Galicia and one of the founders of the *Prosvita society. He was elected honorary member of Prosvita.

Zaiachkivsky, Yosyp [Zajačkivs'kyj, Josyp], b 14 June 1889 in Bilobozhnytsia, Chortkiv county, Galicia, d 20 March 1952 in Merano, Italy. Basilian priest. He was hegumen of the Basilian monasteries in Dobromyl (1920–7) and Drohobych (1927–30) and then secretary (1930–49) and general consultator (1949–52) of the Basilian order in Rome. He also served as rector of *St Josaphat's Ukrainian Pontifical College (1948–52) and as a member of the commission responsible for codifying Eastern rite canon law.

Zaiats, Mykhailo [Zajac', Myxajlo], b 18 December 1899 in Horozhanka Mala, Rudky county, Galicia, d 1941. Lawyer and political activist. While working as a lawyer in Lviv he belonged to a Russophile Marxist group associated with the paper *Volia naroda*. He served on the secretariat of the People's Will party (PNV) from April 1926 and on the Central Committee of Sel-Rob, which originated from PNV's merger with Sel-Soiuz, from October 1926. Eventually he became a member of the Communist Party of Western Ukraine, and he was arrested by the Polish authorities several times in the 1930s. After the occupation of Galicia by Soviet forces in 1939, Zaiats was an editor of *Vil'na Ukraina* until June 1941, when he was arrested by the Soviet secret police. He died in a labor camp.

Zaiats, Yuliiian [Zajac', Julijan], b 30 May 1880, d 2 September 1971 in Lviv. Legal adviser to the Greek Catholic

metropolitan consistory in Lviv. He was a member of the Supreme Administrative Tribunal in Warsaw and president of the Court of Appeal in Lviv (1941–4).

Zaifert, Ihor [Zajfert], b 7 December 1909 in Ukraine, d 3 October 1972 in Detroit. Opera and concert singer (tenor). He graduated from the Kharkiv Conservatory and then performed in the Kharkiv (1942–3) and Poltava opera theaters and the Ukrainian Opera Ensemble in Germany (1946–8). He made recordings of arias from G. Verdi's *Rigoletto* and R. Leoncavallo's *I Pagliacci*, as well as of art songs by M. Lysenko and D. Sichynsky. Zajfert was a leading soloist in the Ukrainian Bandurist Chorus.

Zaika, Viktor [Zajika], b 2 May 1936 in Ulan-Ude, Buryat ASSR. Hydrobiologist; corresponding member of the AN URSS (now ANU) since 1978. A graduate of Leningrad University (1958), he worked at the ANU *Institute of the Biology of Southern Seas (1962–82, from 1977 as director). His major research interests include marine parasitology (particularly with respect to fish), the theory of animal growth, biological productivity, and biocenology. Zaika wrote *Chornoe more* (The Black Sea, 1983) and *Scientific Production of Aquatic Anvertebrates* (English trans, 1973).

Zaivevych, Anastasii [Zajvevyč, Anastasij], b 1842 in Lubni, Poltava gubernia, d 1931? in Lubni. Agronomist and plant physiologist. A graduate of Odessa University (1870), he taught at Kharkiv University (1877–1919). He was a key figure in the development of scientific agricultural research in the territories of the Russian Empire. He founded the Poltava and Solonytsia experimental farms, the Kharkiv Selection Station, and the Lubni Research Station of Medicinal Plants.

Zaikin, Viacheslav [Zajikin, Vjačeslav], b 1896, d ? Legal and church historian. His works on the Ukrainian church and church law include a series of articles on Christianity in Kievan Rus' (1926–30) and the monographs *Uchastie svetskogo elementa v tserkovnom upravlenii, vybornoe nachalo i 'sobornost' v Kievskoi mitropolii v XVI i XVII vekakh* (The Participation of the Secular Element in Church Administration, The Electoral Principle, and 'Conciliarity' in Kiev Metropoly of the 16th and 17th Centuries, 1930), *K voprosu o položenii pravoslavnoi tserkvi v pol'skom gosudarstve v XIV–XVII vekakh* (On the Question of the Status of the Orthodox Church in the Polish State in the 14th–17th Centuries, 1935), and *Zarys dziejów ustroju Kościoła wschodniostowiańskiego* (An Outline of the History of the Structure of the Eastern Slavic Church, 1939).

Zaitsev, Mykola [Zajcev], b 5 November 1894 in Pisky, Kharkiv gubernia, d 30 May 1978 in New Jersey. Chemical engineer; full member of the Shevchenko Scientific Society from 1947. A graduate of the Prague Polytechnic, he taught at the Ukrainian Technical and Husbandry Institute (UTHI) in Poděbrady, Czechoslovakia (1924–35) and was the chief chemist at the Kosmos-Werke chemical concern in Czechoslovakia (1937–45). A postwar refugee, he was a professor and protector at the UTHI in Regensburg, West Germany (1945–57), and then emigrated to the United States, where he worked as a research chemist. He contributed to various areas of organic chemistry, particularly the chemistry of fats.

Pavlo Zaitsev

Vasyl Zakharchenko

Zaitsev, Pavlo [Zajcev], b 23 September 1886 in Sumy county, Kharkiv gubernia, d 2 September 1965 in Munich. Literary scholar and political figure; member of the Shevchenko Scientific Society from 1938. After completing his studies in law (1908) and Slavic philology (1913) at St Petersburg University he worked as a gymnasium teacher in Petrograd, researched the life of T. *Shevchenko, and belonged to the Society of Ukrainian Progressives. In 1917 he moved to Kiev and became a member of the Central Rada. He was head of the chancery of the General Secretariat of Education in 1917, director of the general department in the Hetman government's Ministry of Education and Art in 1918, and head of the cultural-educational department of the UNR Army in 1920. He was also a lecturer at the Ukrainian Scientific Pedagogical Academy (1917), a member of the Council of the Ukrainian Scientific Society in Kiev (1918–20), and editor of the quarterly **Nashe my-nule* (1918–19), other publications of the Drukar publishing house (as chief editor), and vol 1 of the VUAN *Zapysky Istorychno-filolohichnoho viddilu* (1918).

From 1913 on Zaitsev was a recognized authority in the field of Shevchenko studies. He found many of Shevchenko's unpublished writings and drawings and wrote numerous textual and biographical studies, a book on Shevchenko and the Poles (1934), and an important biography of Shevchenko (1955; abridged English trans 1988). He also edited the 1914 Petrograd edition of Shevchenko's **Kobzar*. From 1921 to 1941 he lived in Warsaw, where he was a regular contributor to *Ukrains'ka trybuna* under the pseudonym L(uka) Hrabuzdov(ych), an associate of the Ukrainian Scientific Institute, and chief editor of its canonical edition of T. Shevchenko's works (13 vols, 1934–8). From 1941 on he lived in Germany. In 1948 he became director of the Shevchenko Studies Institute at the Ukrainian Free Academy of Sciences and a professor at the Ukrainian Free University in Munich.

R. Senkus

Zaitsev, Yuvenalii [Zajcev, Juvenalij], b 18 April 1924 in Mykolaivka-Novorosiiska, now in Sarata raion, Odessa oblast. Hydrobiologist; corresponding member of the AN URSS (now ANU) since 1969. A graduate of Odessa University (1949), he was director of its hydrobiology station (1949–56) and worked at the Odessa branch of the ANU Institute of the Biology of Southern Seas (1958, from 1972 as

director). His research interests include hydrobiology, ichthyology, and the conservation of organic marine resources. He discovered neuston complexes of organisms.

Zaitseva, Tetiana [Zajceva, Tetjana], b 31 December 1898 in Velykomykhailivka, Oleksandrivske county, Katerynoslav gubernia, d 24 March 1964 in Kiev. Linguist and lexicographer; wife of the historian I. *Boiko. After graduating from the Kharkiv Institute of People's Education (1927) she continued her graduate studies at the Kharkiv branch of the VUAN Institute of Linguistics. She wrote her candidate's dissertation on the syntax of T. Shevchenko's *Kobzar* (1943) and after the war worked as a senior associate at the Institute of Linguistics in Kiev. Her articles deal with Ukrainian stylistics, T. Shevchenko's language, and the history of Ukrainian lexicography. She was a coeditor of the AN URSS (now ANU) Ukrainian-Russian dictionary (6 vols, 1953–63).

Zaitsiv, Dmytro [Zajciv], b 1897, d ? Zoologist and entomologist; full member of the Shevchenko Scientific Society from 1943. A lecturer at the Kharkiv Agricultural Institute during the 1930s, he studied beetles in various regions of the USSR as well as in the Lemko region and identified a large number of species in Ukraine. After the Second World War he was a displaced person in Germany and then emigrated to Brazil.

Zakarpats'ka pravda (Transcarpathian Truth). An organ of Transcarpathia oblast Party committee and soviet, published six days a week in Uzhhorod from November 1944 to 1991. It succeeded **Karpats'ka pravda*. Since 1946 and 1960 respectively, Hungarian- and Russian-language editions of the newspaper were also published. In 1980 the pressruns of the three editions were as follows: 158,000 Ukrainian, 158,000 Russian (up from 55,000 in 1976), and 38,000 Hungarian.

Zakerzonnia. The popular name used for the territories west of the *Curzon Line that were inhabited by Ukrainians. Zakerzonnia included the *Lemko and *Sian regions, parts of Liubachiv, Rava Ruska, and Sokal counties, the *Kholm region, and *Podlachia. During the Second World War the OUN and UPA military units in Zakerzonnia were commanded by Ya. Starukh (code name: Stiah). After the Second World War those lands (approx 19,000 sq km) were transferred to Poland, according to the Soviet-Polish agreement of 16 August 1945. Virtually all the Ukrainians in Zakerzonnia (approx 1,500,000) were then forcibly resettled to other regions of Poland, during *Operation Wisła.

Zakhara, Ihor [Zaxara], b 27 December 1943 in Lviv. Philosopher. After graduating from Lviv University he taught there. He now works at the ANU Institute of Social Sciences in Lviv. A specialist in the history of 16th- to 18th-century Ukrainian philosophy, he has contributed many articles to journals and collections, written a monograph on S. *Yavorsky and his philosophy (1982), and prepared and annotated a collection of Yavorsky's philosophical works in Ukrainian translation (3 vols, 1992–3).

Zakharchenko, Vasyl [Zaxarčenko, Vasył'], b 13 January 1936 in Hutyrivka, Poltava raion. Writer, journalist, and political prisoner. He wrote the prose collections *Spi-*

vuchy korin' (The Singing Root, 1964), *Tramvai o shostii vechora* (The Tram at Six in the Evening, 1966), *Stezhka* (The Path, 1968), *Dzvinok na svitanni* (The Bell at Dawn, 1981), *U p'iatnytsiu pislia obidu* (Friday after Lunch, 1982), and *Lozovi koshyky* (Willow Baskets, 1986). In 1972 he was expelled from the Writers' Union of Ukraine for participating in the Ukrainian national movement. Later that year he was arrested and sentenced to five years in labor camps in Perm oblast. There he participated in various prisoners' protests. In July 1977 he issued a public recantation and was released and 'rehabilitated.'

Zakharchuk, Yevhen [Zaxarčuk, Jevhen], b 1 June 1886 in Romanove Selo, Zbarazh county, Galicia, d 15 July 1936 in Kiev. Actor and singer (baritone). He began his theatrical career in the Ruska Besida Theater (1901–6) and then worked in Sadovsky's Theater (1906–18), the State People's Theater in Kiev (1918–19), the Kharkiv Ukrainian People's Theater (1924–8), and the Kharkiv Chervonozavodskiyi Ukrainian Drama Theater. He was arrested in 1933, and died in a Soviet prison.

Zakharenko, Ivan [Zaxarenko], b 1839, d 1908. Theater director and playwright. He managed an amateur theater in Osnova, near Kharkiv (1899), and later led his own troupe. He wrote the dramas *Chervoni cherevycky* (The Red Shoes, based on an N. Gogol story), *Kliate sertse* (The Cursed Heart), and *Zakliuvana holubka* (The Pecked Dove).

Zakhariasevych, Teodor [Zaxarijasevyč], b 1759, d 1808. Ukrainian Catholic priest and professor. A vice-rector of the Greek Catholic Theological Seminary in Lviv, he taught church history at the Studium Ruthenum and translated into Ukrainian the standard church history text then used in the Austrian empire, M. Dannenmayer's *Institutiones historiae ecclesiasticae Novi Testamenti*. His translation was published in Lviv in 1790.

Halyna Zakhariasevych-Lypa: *Crowd* (watercolor, 1959)

Zakhariasevych-Lypa, Halyna [Zaxarijasevyč-Lypa], b 28 April 1910 in Rakhynia, Dolyna county, Galicia, d 10 June 1968 in Lviv. Graphic artist; wife of Yu. *Lypa. A graduate of the Vienna School of Applied Arts (1938), after the Second World War she studied music and singing at the Lviv Conservatory (1945–8). In 1951 she found work as a textile designer. Her drawings, watercolors, and batiks are often based on Ukrainian folklore and are lyrical in mood. She did a postcard series and a series of illustrations to I. Franko's poem 'Kameniar'i' (The Stonecutters).

Zakharivka. See Frunzivka.

Zakharko, Ivan [Zaxarko], b 1851 in Lviv, d 25 September 1919 in Chernivtsi. Actor, theater director, and publisher. He worked as an actor in O. Bachynsky's troupe (until 1893) and in the Polish Theater in Cracow (1893–1900) and led the Bukovynian People's Theater (1900–10). In Chernivtsi he kept a printing shop, where he published Ukrainian literature.

Zakharov, Fedor [Zaxarov], b 25 September 1919 in Aleksandrovskoe, Smolensk gubernia, Russia. Painter. A graduate of the Moscow Art Institute (1950), he has lived in Yalta and painted colorful landscapes, such as *Alushta* (1953), *Before the Storm* (1954), *Evening in Sudak* (1957), *Blooming Almond* (1961), *Sedniv Vistas* (1964), *Early Spring* (1968), *Autumn Snow* (1970), *Autumn Evening* (1977), and *Stormy Sea* (1984).

Zakhidni visty. See *Ukrains'ki visti*.

Zakhidnia Ukraina. An organization of revolutionary writers. It was established in Kiev in 1925, as a division of the organization *Pluh, and existed as an independent entity from 1926. It consisted largely of writers originally from Western Ukraine, among them V. Atamaniuk, D. Bedzyk, V. Bobynsky, M. Hasko, D. Zahul, P. Hirniak, V. Gadzinsky, V. Gzhytsky, L. Dmyterko, Y. Zazuliak, M. Irchan, M. Kachaniuk, M. Kichura, M. Kozoris, M. Marfiievych, H. Piddubny, D. Rudyk, I. Tkachuk, A. Turchynska, A. Shmyhelsky, M. Sopilka, and Rostyslav Zaklynsky. Upon the formation of the Writers' Union of Ukraine (1932–4), it was liquidated, and most of its members were either repressed or shot.

The organization controlled a publishing house and issued a publication of the same name, in which the works of its members were published. From 1930 to 1933 a number of Soviet publicist and fictional works were published in the Masova biblioteka (Mass Library) book series.

Zakhidnia Ukraina

Zakhidnia Ukraina (Western Ukraine). A magazine dealing with art, literature, politics, and community news in Kharkiv. It was published irregularly in 1927 and monthly from 1930 to 1933. It was the official organ of the literary organization of the same name and was edited by V. Atamaniuk, who was followed by M. Irchan, I. Tkachuk, V. Gzhytsky, Y. Zazuliak, and D. Zahul. The contributors, primarily members of the organization, wanted 'to emphasize the proletarian class direction and to relay

the class struggle of workers in Western Ukraine in their works.' The magazine's illustrators were V. Kasiian, B. Kriukov, and Ya. Strukhmanchuk.

Mykhailo Zakhidny

Bohdan Zaklynsky

Zakhidny, Mykhailo [Zaxidnyj, Myxajlo], b 9 June 1885, d 17 October 1937 in Berezhany, Galicia. Lawyer and political leader. While practicing law in Berezhany he was president of the local branch of the Prosvita society. In 1927 he assumed leadership of the *Ukrainian Party of Labor, a Sovietophile organization, and in the following year he was elected as its candidate to the Polish Sejm. Eventually he dropped his pro-Soviet sympathies.

Zaklynsky, Bohdan [Zaklyns'kyj], b 9 August 1886 in Stanyslaviv (now Ivano-Frankivske), d 12 April 1946 in Lviv. Teacher and ethnographer; son of Roman Zaklynsky. A teacher (from 1910) in Ukrainian schools in Galicia and Transcarpathia, he prepared textbooks (including primers) and methodological works concerning styles of writing for children. While teaching in various villages, he conducted ethnographic field research, much of which remains in manuscript form in the libraries of the AN URSR (now ANU). He also gathered items for the ethnographic museum of the Shevchenko Scientific Society in Lviv. In 1917 he wrote a popular study of Ukrainian folk dwellings, *Zhyttie ukrains'koho naroda* (The Life of the Ukrainian People), which was published in Vienna. From 1944 Zaklynsky worked in the Lviv branch of the Institute of Fine Arts, Folklore, and Ethnography of the ANU.

Zaklynsky, Kornylo [Zaklyns'kyj], b 1857 in Mariampil, Stanyslaviv circle, Galicia, d 13 February 1884 in Lviv, Galicia. Historian; brother of Roman Zaklynsky. He attended the gymnasium in Stanyslaviv (1869–77) and co-founded a branch of the Prosvita society there. In 1877 he moved to Lviv to further his studies in history, with a specialization in Cossack history. He founded a literary-historical circle and became a member of Ruska Besida and the Academic Brotherhood. He contributed articles on Cossack history, particularly the foreign relations of the Cossacks, and reworkings of historical articles by V. Antonovych and M. Kostomarov to *Zoria*, *Dilo*, *Vesna*, and other Galician periodicals. Zaklynsky died of tuberculosis; much of his research and literary work remains unpublished.

Kornylo Zaklynsky
(1857–84)Kornylo Zaklynsky
(1889–1966)

Zaklynsky, Kornylo [Zaklyns'kyj], b 1 August 1889 in Lviv, d 1 April 1966 in Prague. Pedagogue and literary critic; son of Roman Zaklynsky. In the early 1920s, after studying at Vienna and Lviv universities, Zaklynsky was forced to move to Transcarpathia because of political circumstances. There he became a teacher at the Berehove gymnasium (1920–38) and an active promoter of the *Plast Ukrainian Youth Association and the *Prosvita society. In 1939 he was arrested and imprisoned briefly by the Hungarians, and then moved to Prague. There he taught at the Ukrainian gymnasium and was the director of a Ukrainian museum. He wrote scholarly articles (particularly in Czech journals) about Ukrainian literary figures from Transcarpathia and the Prešov region as well as several school texts. Zaklynsky was a strong supporter of the *Museum of Ukrainian Culture in Svydnyk, to which he donated his personal library.

Zaklynsky, Oleksii [Zaklyns'kyj, Oleksij], b 27 March 1819 in Ozeriany, Stanyslaviv circle, Galicia, d ca 1894 in Bohorodchany Stari, Stanyslaviv county, Galicia. Greek Catholic priest and civic and political activist. He was a member of the Supreme Ruthenian Council and its delegate to the Slavic Congress in Prague (1848). In 1873–9 he was a deputy to the Austrian parliament. His memoirs were published in 1890 as *Zapiski Alekseia Zaklynskogo prikhodnika Starykh Bogorodchan* (Notes of Oleksii Zaklynsky, Pastor of Stari Bohorodchany).

Zaklynsky, Roman [Zaklyns'kyj], b 1852, d 1931. Western Ukrainian pedagogue and education activist. Zaklynsky was a founding member of the *Ridna Shkola society and a coeditor of the society's educational publication series, *Biblioteka dlia ditei* (Library for Children). He wrote many books for popular consumption, including *Heohrafiia Rusy* (The Geography of Rus', 1887).

Zaklynsky, Rostyslav [Zaklyns'kyj] (pseud: Viun), b 20 October 1887 in Stanyslaviv (now Ivano-Frankivske), Galicia, d 18 September 1974 in Lviv. Literary scholar and publicist; son of Roman *Zaklynsky and brother of Kornylo and Bohdan. He was active in the Ukrainian Radical party. From 1910 he contributed to Lviv periodicals, such as *Hromads'kyi holos*, *Shliakhy*, and *Iliustrovana Ukraïna*, and he was an editor of the dailies *Nove zhyttia* (1918–19)

Rostyslav Zaklynsky

and *Narod* (1919) in Stanyslaviv. From 1920 on he lived in Soviet Ukraine. He taught in postsecondary schools in Kamianets-Podilskyi and Kiev and belonged to the writers' group *Zakhidnia Ukraina. He contributed articles about Galician writers and book reviews to journals such as *Zhyttia i revoliutsiia* and *Zakhidnia Ukraina*. In 1933 he was arrested and sent to a labor camp in the Soviet Arctic. He was released in 1946, and returned to Lviv. He continued to teach in Ivano-Frankivske oblast (from 1948 to 1956) and in Lviv (from 1957).

Zakon i pravo (Law and Jurisprudence). (Law and Jurisprudence). Monthly legal journal published in Kiev by the Chas publishing house and edited by M. Kushnir. Only a few issues appeared, starting in November 1918. They contained articles on Ukrainian legal history and legal theory, bibliographies, professional news, and statutes passed by the UNR government.

Zakon sudnyi liudem (The Law for Judging People). A 9th-century compilation of laws based on the Byzantine legal manual *Ecloga* and adapted for use by the Southern Slavs. It was commonly referred to in Rus' as 'Constantine's missal' (*Sluzhebnyk Konstiantyna*) and was accepted as an unofficial source of Byzantine law. The code had an influence on the development of Rus' law.

Zakovorot, Petro, b 1871 in Kupievakha-Huty, Bohodukhiv county, Kharkiv gubernia, d 5 March 1951. One of the founders of the Soviet school of fencing. In 1899 and 1900 he won the world fencing championship. After the 1917 Revolution he taught fencing and trained many famous fencers and coaches. In 1935 he won the Ukrainian fencing championship.

Zakrevsky [Zakrevs'kyj]. A family line of Cossack officers that originated with Yosyp Zakrevsky, a general standard-bearer (1762) and general quartermaster (he was married to the sister of K. Rozumovsky). Yosyp's son, Andrii Zakrevsky (b 1742, d 1804), was director of the Academy of Art (1783) and head of the Medical Collegium (1789) in St Petersburg. Yosyp's great-grandsons were Viktor (b 1807, d 1858), Mykhailo (nd), and Platon (b 1801, d 1882) Zakrevsky; they were estate owners in Pyriatyn county (Poltava gubernia), members of the *Mochemordy Society, friends of Ya. de Balmain, and noteworthy progressives. They were also friends of T. Shevchenko, who painted a renowned portrait of Platon's wife, Hanna

Zakrevska, in 1843. The jurist Hnat Zakrevsky and the historian-ethnographer Mykola *Zakrevsky were also part of the family line.

Zakrevsky, Mykola [Zakrevs'kyj] (pseud: N. Shaginian), b 21 June 1805 in Kiev, d 10 August 1871 in Moscow. Historian, ethnographer, and writer. A graduate of Kharkiv University, he continued his studies at Dorpat University, worked as a teacher in Revel (now Tallinn), and lived in Moscow from 1859. He wrote *Ocherk istorii g. Kieva* (An Outline of the History of the City of Kiev, 1836), *Letopis' i opisanie g. Kieva* (A Chronicle and Description of the City of Kiev, 1858), and *Opisanie Kieva* (A Description of Kiev, 2 vols, 1868). He also researched Ukrainian folklore and published a collection of dumas, songs, proverbs, and riddles in *Starosvetskii bandurista* (Old World Banduryst, 3 vols, 1860–1), the third volume of which contained a dictionary of Little Russian idioms (over 11,000 words). Part of his collected data, including materials for two dictionaries, remained in manuscript form in Katerynoslav (Dnipropetrovske). Zakrevsky was an ardent defender of the right of Ukrainians to literature in their native language.

Zakrzhevsky, Yulijan [Zakrzhev's'kyj, Julijan] (Zakrevsky), b 29 September 1852 in Kosiv, Galicia, d 8 May 1915 in Kazan, Russia. Opera singer (tenor). He studied music in Lviv and Italy. He sang as a soloist with the Italian Opera in Kiev (1878–82) and with the Bolshoi Theater in Moscow (1882–4). He also sang in Prague, Vienna, Cracow, Kazan, Kharkiv (1893–5), and Perm. His repertoire included Hermann in P. Tchaikovsky's *The Queen of Spades*, Jontek in S. Moniuszko's *Halka*, and Rademes in G. Verdi's *Aida*. In his concerts he popularized Ukrainian songs.

Zakup. A semifree bondsman in Kievan Rus' (11th–12th centuries) and later in the Grand Duchy of Lithuania (14th–16th centuries). Legally the *zakupy* were free people, but in actual fact they were equal in status to slaves as a result of their voluntarily assumed dependence on their landlord or a particular institution. People became *zakupy* by agreeing to a loan (*kupa*), with their personal bondage as a guarantee. **Ruskaia Pravda* defined the relationship of the *zakup* with the landlord and categorized the *zakupy* into those who worked in the households (*dvirni*) and those who worked in the fields (*roleini*). The landlord had the right to mete out corporal punishment, but he could not kill or sell a *zakup*. The *zakup* had the right to bring charges against the landlord before the prince's court, to own property, to enter into agreements, and to appear in court as a witness. The repayment of the debt made the *zakup* a free man, but an attempt to escape before repayment could reduce him to a slave (*kholog*).

Under Lithuanian rule in Ukraine the *zakupy* were debtors, known as *zakupni* (equivalent to the *dvirni*) or as *liudy v peniazikh* (equivalent to the *roleini*). Relations between the landlord and the *zakup* were based on a bilateral private legal agreement, and the Lithuanian Statute only stated the amount which the *zakup* was obliged to repay annually. The *zakupni* would repay their debt by labor, whereas the *liudy v peniazikh* would repay an equivalent value from the yearly harvest. *Zakupy* who did not manage to repay their debt would become serfs (*nepokhozhi seliany*). (See also *Feudalism and *Land tenure system.)

V. Markus

Zalensky, Lev [Zalens'kyj], b 1648 in Liubechi, near Lutske, Volhynia, d 1708 in Volodymyr-Volynskyi, Volhynia. Uniate metropolitan of Kiev. A nobleman, he joined the Basilian order as a novice in the Byten Monastery. He then studied in Olmouc, in Moravia, in Vilnius, and at the Gregorian University in Rome (1673–6). In 1678 he became bishop of Volodymyr after the death of his uncle, V. Korchak-Hlynsky. In 1694 he succeeded K. Zhokhovsky as metropolitan of Kiev while retaining his position as bishop of Volodymyr. During his tenure the bishops of Lviv (Y. Shumliansky) and Lutske (D. Zhabokrytsky) joined the Uniate church. Zalensky fled to Saxony during the Russian-Swedish War, when Muscovite armies occupied Volhynia.

Zalensky, Volodymyr [Zalens'kyj], b 7 February 1847 in Shakhvorostivka, near Myrhorod, Poltava gubernia, d 21 October 1918 in Sevastopol. Zoologist and embryologist; member of the St Petersburg Academy of Sciences from 1897. A graduate of Kharkiv University (1867), he was a professor at Kazan (from 1871) and Odessa (from 1882) universities and director of the Zoological Museum in St Petersburg (from 1897). He specialized in the comparative embryological development of invertebrates and chordates.

Irena Zaleska

Osyp Zalesky

Zaleska, Irena [Zales'ka] (née Kobziar), b 1918 in Lviv, d January 1988 in Australia. Actress. Together with her husband, S. *Zalesky, she studied drama with Y. Hirniak and O. Dobrovolska and performed at the Lviv Opera theater in the 1940s. They continued their acting careers in Germany after the Second World War. In Australia they cofounded the Les Kurbas Theater in Melbourne in 1950 and toured the country with their productions. They appeared in several Ukrainian-Australian TV specials, and they presented the first Ukrainian-language radio program in Melbourne in 1966. Noted for her poetic recitals, Zaleska toured the United States and Canada in 1973 with great success. She taught Ukrainian dancing in her Rhythmo Plastic Dance Studio in Melbourne for 25 years.

Zaleski, Józef Bohdan, b 14 February 1802 in Bahatyrka, Tarashcha county, Kiev gubernia, d 31 March 1886 in Villepreux near Paris. Polish Romantic poet; an early, major representative of the *Ukrainian school in Polish literature. From 1812 he studied at the Basilian school in Uman. There he befriended S. Goszczyński and M.

Grabowski and formed with them the group Za-Go-Gra. In 1820 he moved to Warsaw. After participating in the Polish Insurrection of 1830–1 he fled to France. Most of Zaleski's Byronic lyrics, historical elegies (eg, about K. Kosynsky, I. Mazepa, and the Battle of Khotyn), and narrative poems and ballads (eg, 'Rusałki' [The Water Nymphs], 'Duch od stepu' [Spirit from the Steppe]) reflect his idealized love and longing for an idyllic Ukrainian land. Many of his poems are stylized imitations or reworkings of Ukrainian folk songs. In 1866 he published a poem dedicated to the recently deceased T. Shevchenko. He also wrote some poems in Ukrainian; they were first published in the 1890 Cracow edition of his works. The fullest editions of his works (4 vols, 1877) and correspondence (5 vols, 1900–4) were published in Lviv. J. *Tretiak wrote a major critical biography of him (3 vols, 1911, 1913, 1914).

Zaleski, Waclaw, b 18 September 1799 in Olesko, Galicia, d 24 February 1849 in Vienna. Polish folklorist and writer. A graduate of Lviv University, he served in the civil service, taught mathematics, wrote verses and plays, and collected folklore. His *Pieśni polskie i ruskie ludu galicyjskiego* (Polish and Ruthenian Songs of the Galician People, 1833), published under the pseudonym Waclaw z Oleska, was one of the first collections of Ukrainian folk songs. It contains an instrumental score by K. Lipiński. The work was regarded highly, and it encouraged the development of Ukrainian ethnography. Later it was criticized for its use of Latin script for Ukrainian transcription. Zaleski also translated Ukrainian folk poetry into German (1861).

Zalesky, Mykola [Zales'kyj], b 1835, d ? Pharmacist. After graduating from Kharkiv University in 1860, he worked in its therapy and obstetrics clinic. For several years he specialized in medical chemistry abroad. In 1868 he was appointed a docent of toxicology and forensic medicine, and in 1885, a professor of pharmacology, at Kharkiv University. His publications dealt with the composition of human and animal bones and the role of the kidneys in producing urea.

Zalesky, Osyp [Zales'kyj], b 16 April 1892 in Trostianets Malyi, Zolochiv county, Galicia, d 13 March 1984 in Buffalo. Musicologist, educator, conductor, and composer. He completed studies in musicology with A. Chybinsky at the Lviv Conservatory (1911–14) and then worked as a gymnasium teacher. He founded, directed, and taught at the Stanyslaviv branch of the Lysenko Higher Institute of Music; conducted choruses in Lviv, Stanyslaviv, Yaroslav, and Vienna; and owned (1913–30) the musical publishing house Lira. From 1955 he taught music theory at the Buffalo branch of the Ukrainian Music Institute of America. Zalesky's writings include the pioneering *Pohliad na istoriiu ukrains'koï muzyky* (A Look at the History of Ukrainian Music, 1916), *Muzychnyi slovnyk* (A Music Dictionary, 1925), *Korotkyi narys istorii ukrains'koï muzyky* (A Concise Sketch of the History of Ukrainian Music, 1951), *Zahal'ni osnovy muzychnoho znannia* (General Principles of Musical Knowledge, 1958), and *Mala ukrains'ka muzychna entsyklopediia* (A Small Ukrainian Music Encyclopedia, 1971). He also composed choral works, solo songs, and piano miniatures.

Zalesky, Petro [Zales'kyj] (also Zalisky), b 1867 in Slobidska Ukraine, d 1929 in Yugoslavia. Ukrainian civic and political figure. The Hetman government appointed him as starosta of Kharkiv gubernia in 1918, but later removed him for his reluctance to implement the use of Ukrainian in his administration. During the 1920s he wrote several works regarding military tactics (particularly cavalry), as well as an essay on governing in Ukraine for *Khliborobs'ka Ukraina* (1925).

Zalesky, Stepan [Zales'kyj], b 16 December 1915 in Lviv, d 31 October 1970 in Melbourne. Stage actor. He worked in the Lviv Opera Theater and studied in the Lviv Theatrical Studio (1942–4) and then was a leading actor in the Theater-Studio of Y. Hirniak and O. Dobrovolska in West Germany (1945–9). He moved to Australia in 1950, where he acted in the Les Kurbas Theater and, from 1958, taught in his own Theater Studio.

Zalesky, Viacheslav [Zales'kyj, V'jačeslav], b 3 September 1871 in Kharkiv, d 10 November 1936 in Kharkiv. Physiologist and plant biochemist; corresponding member of the VUAN from 1925. He graduated from Kharkiv University in 1893 and was a professor there from 1903 until his death. He researched the manner of and conditions for protein synthesis in plants, phosphorus metabolism, and the role of iron. He proved that plants can synthesize proteins from nitrate and carbohydrates in the absence of light, and was the first to isolate the enzyme carboxylase in plants.

Zalishchyky

Zalishchyky [Zališčyky]. v-6. A town (1989 pop 13,200) on the Dniester River and a raion center in Ternopil oblast. It was first mentioned in a historical document in 1340. From the 15th century the town was under Polish rule. In 1766 it was granted the rights of *Magdeburg law. After the partition of Poland in 1772, it was annexed by Austria, and in 1868 it became a county center of Galicia. In the interwar period (1919–39) it was again occupied by Poland. Today it is a river port and a climatological resort area that attracts 10,000 visitors a year. Zalishchyky has three resorts, a children's tuberculosis sanatorium, and a tourist base. Grapes, peaches, morels, and tobacco are grown in its vicinity. The chief architectural monuments are a 17th-century Roman Catholic church and an 18th-century city

hall, palace, and park. In 1927 a large settlement of the Trypilian culture was discovered there.

Maksym Zalizniak (portrait from the Motronynskyi Trinity Monastery)

Mykola Zalizniak

Zalizniak, Maksym [Zaliznjak], b ca 1740 in Medvedivka, Chyhyryn region, d ? Haidamaka leader of the *Koliivshchyna rebellion. In response to the Confederation of *Bar and the Polish vendetta against the Ukrainian peasantry, he organized a rebel group of Zaporozhian Cossacks in *Kholodnyi Yar. By late May 1768 they controlled Medvedivka, Zhabotyn, Smila, Cherkasy, Korsun, Kaniv, Bohuslav, Moshny, Fastiv, Kamianyi Brid, Lysianka, and Zvenyhorodka. Together with I. *Gonta's forces they captured Uman (the trading center of Right-Bank Ukraine) on 20–21 June 1768. Zalizniak was proclaimed hetman and began governing the territories according to the Cossack order. On 8 July 1768 he and virtually all of his leading *starshyna* were arrested by Gen M. Krechetnikov, who was commissioned by Empress Catherine II. Zalizniak was given a life sentence of hard labor in the ore mines of Nerchinsk, where he probably died. He became the subject of Ukrainian historical songs and epic literary works, including T. Shevchenko's 'Haidamaky,' 'Kholodnyi iar,' and 'Nevol'nyk' (The Captive) and Yu. Mu-shketyk's novel *Haidamaky* (1957).

B. Krupnytsky

Zalizniak, Mykola [Zaliznjak], b 1888 in Melitopil, Tavriia gubernia, d 1950. Civic and political activist; husband of O. *Zalizniak. During the First World War he worked in Vienna as a journalist and publisher and was active in the *Union for the Liberation of Ukraine. He headed the UNR mission in Finland in 1919–20 and then returned to Vienna. In 1945 he was arrested by the Soviet secret police and sentenced to 15 years in prison, where he perished. He translated popular scientific works and wrote articles and numerous pamphlets about Ukraine and contributed to a collection of memoirs about the Peace Treaty of Brest-Litovsk (1928).

Olena Zalizniak

Saint Yov Zalizo

Zalizniak, Olena [Zaliznjak] (née Okhrymovych), b 1886 in Senechiv, Dolyna county, Galicia, d 12 June 1969 in Montreal. Educator and civic leader; sister of Yu. *Okhrymovych and wife of M. *Zalizniak. While studying at Lviv University she was active in student organizations and the Circle of Ukrainian Women. Upon graduating in 1913, she taught at the girls' gymnasium of the Basilian Sisters and the teachers' seminary of the Ukrainian Pedagogical Society. During the First World War she made her way to Vienna, where she was active in the Society for Aiding Wounded and Imprisoned Soldiers and then served as president of the Ukrainian Women's Union (1920–2). After returning to Lviv in 1926, she was appointed director of the trade school at the Trud women's co-operative. At the beginning of the Second World War she fled to Vienna, and in 1950 she emigrated to Canada, where she was active in the Ukrainian Women's Organization of Canada. In 1956–69 she served as president of the *World Federation of Ukrainian Women's Organizations. Her articles appeared in women's magazines, such as *Nova khata*, *Zhinka*, *Zhinochyi svit*, and *Nashe zhyttia*.

Zalizniak. A student society active in Chernivtsi in the mid-1930s. Established in July 1934 by a breakaway faction of the *Chornomore student society, the group espoused a militant nationalist orientation. Its members were involved in legal and clandestine publishing and were supporters of the newspaper **Samostiinist'* in Chernivtsi. It was closed by the Rumanian authorities in March 1937 following a demonstration at an anniversary commemoration of T. Shevchenko, and its leaders (including D. Kvitkovsky, V. Todoriuk, and M. Nadasiuk) were tried and sentenced to prison terms.

Zaliznyi strilets' (Iron Rifleman). A newspaper published three times a week in 1920–2 by the soldiers of the Third Iron Rifle Division in the Polish internment camp in Kalisz. Its editor was Capt I. Zubenko.

Zalizo, Yov (Zhelizo; secular name: Ivan), b 1551 in the Kolomyia region, d 28 October 1651 in Pochaiv. Monk and saint of the Ukrainian Orthodox church. He was tonsured at the Transfiguration Monastery in Uhornyky when he was 12 years old, and made a hieromonk in 1581. In 1584 Prince K. Ostrozky invited him to become hegumen of the

Dubno Monastery. There he founded a brotherhood whose members transcribed church books. Ca 1597 he left for the *Pochaiv Monastery, where he served as hegumen for the next 50 years. He introduced a strict *Studite monastic order at the monastery and continued administrative and educational activities. Under his leadership the monastery was expanded, and gained fame throughout Ukraine. He persuaded the Orthodox magnates F. and Ye. Domashovsky to fund the building in 1649 of the Church of the Holy Trinity, in which a miracle-working icon of the Mother of God was placed. Zalizo actively defended the Orthodox church, and in 1628 he participated in the Kiev synod that condemned M. Smotrytsky's attempts to extend the church union. He translated much patristic literature and composed sermons. A selection of these works was published in *Kievskaiia starina* in 1885; the originals were taken from the monastery in 1932 to Warsaw, where they subsequently perished.

Zalizo was greatly revered during his life, and many miracles were associated with him. His relics were discovered in 1659 by Metropolitan D. Balaban, who had him canonized. He was known popularly as the Venerable Yov; his feast is celebrated several times during the year. His life, by the monk Dosyfei, was published in Pochaiv in 1791.

A. Zhukovsky

Zalozetsky, Mykola [Zalozec'kyj], b 21 October 1895 in Nyrkiv, Zalizchyyky county, Galicia, d 13 January 1993 in Winnipeg. Pharmacist, community leader, and journalist. He emigrated in 1906 with his parents to Canada, where he graduated from the University of Manitoba (1925) and was active in the Ukrainian community in Winnipeg. He served as president of St Andrew's College (1946–70), the Winnipeg branch of the Mohyla Society, the Ukrainian National Home (1967–9), and the Friends of the Ukrainian National Council (1976–7). He was a founder of the Order of St Andrew. His articles and verses appeared under various pseudonyms in the Ukrainian press, including *Ukrains'kyi holos*, *Novyi shliakh*, and *Promin'*.

Roman Zalozetsky-Sas

Zalozetsky-Sas, Roman [Zalozec'kyj-Sas], 1861–1918. Engineer and civic leader; full member of the Shevchenko Scientific Society, son of V. *Zalozetsky-Sas. He completed his university studies in Lviv, Vienna, and Zurich and served as a professor at the Lviv Polytechnical Institute.

He was president of the *Sil'skyi Hospodar society, a founder and director of the Prosvita society's Commercial School in Lviv (1911–15), and a member of the Galician Diet (1913–15). In 1915 he was appointed councillor at the Ministry of Public Works in Vienna. He served as an agent of French and British oil companies and was granted the honorary title of British consul for Lviv in 1904. His publications dealt with technological questions, particularly of the petroleum industry, and economic problems.

Zalozetsky-Sas, Vasyl [Zalozec'kyj-Sas, Vasyl'] (pseud: Panko iz Halychanova), b 7 February 1833 in Pohorilivka, Bukovyna, d 2 February 1915 in Hirne, Stryi county, Galicia. Greek Catholic priest and writer in Galicia. He contributed poems and historical stories to Russophile periodicals, such as *Slovo*, *Halychanyn*, *Halytskaia Rus'*, *Rodimyi listok*, and *Prolom*. An edition of his complete works (3 vols, 1907–9) was published in Lviv.

Volodymyr Zalozetsky-Sas
(1884–1965)

Volodymyr Zalozetsky-Sas
(1896–1959)

Zalozetsky-Sas, Volodymyr [Zalozec'kyj], b 28 July 1884 in Chernivtsi, d 13 July 1965 in Ysper, Niederösterreich, Austria. Bukovynian political, cultural, and civic leader, diplomat, and art scholar. He studied at the universities of Chernivtsi, Vienna, Munich, and Florence and obtained doctorates in law as well as archeology and art history. From 1910 he served as a member of the Austrian central committee for the preservation of art and historical monuments in Vienna and as chief conservator of historical relics and art in the non-Germanic provinces of the monarchy. Having been mobilized to serve in the Austrian army in 1914, he was captured by Russian forces. In the fall of 1918 he returned to Bukovyna, where he became a member of the Ukrainian Regional Committee and of the Bukovynian delegation to the Ukrainian National Rada of the Western Ukrainian National Republic (ZUNR). On 10 November 1918 he became head of the Ukrainian government in Bukovyna, and in 1919 the ZUNR government appointed him to take part in the talks with the so-called Little Mission of the Entente powers. This appointment led to his position as councillor and chargé d'affaires of the Extraordinary Diplomatic Mission of the ZUNR in Bern.

In 1920 Zalozetsky-Sas returned to Bukovyna. He became involved in political work and was cofounder and head of the *Ukrainian National party (UNP) in Bukovyna

(1927–38) as well as official Ukrainian representative to the Rumanian government. He was elected a senator (1928–32 and 1934–8) and member of parliament (1932–4). A champion of the political, cultural, and religious rights of the Ukrainians under Rumanian rule, he served as a delegate to the national minorities section of the League of Nations in Geneva in 1928–38. In 1940 Zalozetsky-Sas headed the Ukrainian National Hromada in Rumania, and in 1944 he moved to Vienna, where he remained active in community and cultural affairs.

Zalozetsky-Sas was honorary president of many Bukovynian cultural and civic organizations as well as founder and head of the Ukrainian Museum of Ethnology in Chernivtsi (1927–40). He researched the art and ethnography of Bukovyna and wrote *Künstler oder Kunsthistoriker* (1924), *Die Ostereier der ukrainischen Huzulen* (1942), and *Ein Huzulenteller* (1944) as well as the play *Henii narodu* (The People's Genius, 1932).

A. Zhukovsky

Zalozetsky-Sas, Volodymyr [Zalozec'kyj-Sas] (Zaloziecky, Wladimir), b 10 July 1896 in Lviv, d 12 October 1959 in Graz, Austria. Art historian; son of R. *Zalozetsky-Sas; member of the Shevchenko Scientific Society from 1932. After graduating from Vienna University (PH D, 1918) he taught there and worked for the UNR diplomatic mission in Vienna. He served on a Czechoslovak government board for the preservation of cultural monuments in Uzhhorod (1922–4), lectured at the Ukrainian Free University in Prague (1924–6), and held the chair of art history at the Ukrainian Scientific Institute in Berlin (1926–39) and Greek Catholic Theological Academy in Lviv (1930–9). From 1939 he lectured at Vienna University, and from 1947 he was a professor at Graz University. He was a founder of the Osterreichisch-Byzantinische Gesellschaft in Vienna (1945). He wrote many articles and books, among them *Gotische und barocke Holzkirchen in den Karpathenländern* (1926), *Oleksa Novakivs'kyi* (1934), *Die Sophienkirche in Konstantinopel und ihre Stellung in der Geschichte der abendländischen Architektur* (1936), *Geschichte der altchristlichen Kunst* (1936), *Byzanz und Abendland im Spiegel ihrer Kunsterscheinungen* (1936), *Geschichte der altchristlichen Kunst* (1936), and *Die byzantinische Baukunst in den Balkanländern und ihre Differenzierung unter abendländischen und islamischen Einwirkungen* (1955).

Zalozny, Petro [Zaloznyj], b 1 January 1866 in Rashivka, Hadiach county, Poltava gubernia, d 8 April 1921 in Rashivka. Pedagogue and linguist. A graduate of Kiev University (1889), he worked as a teacher in his home village. He wrote *Korotka hramatyka ukrains'koi movy* (A Short Grammar of the Ukrainian Language, 2 vols, 1906, 1913), a work which assisted considerably in standardizing Ukrainian grammatical terminology, and contributed poetry to Ukrainian almanacs and periodicals.

Zaloznyi route. A surface trade route from Kiev to the Middle East. There are two major theories as to the origin of the name: from *za lozy* (beyond the willows), and from *zavoloznyi* (trans-Volga). The route is mentioned in historical sources of the 11th and 12th centuries, and according to archeological evidence it was already in existence in the 8th century. Known also as the Kiev–Azov route, it ran from Kiev along the left bank of the Dnieper River

through Pereiaslav, Lukoml, and Ltava (Hovtva) to the upper Mozh River (a right tributary of the Donets River) and then to the upper Samara River and along the upper Kalmiuis River to the mouth of the Don River and along the Azov Sea to Tmutorokan. From there it continued on to Asia Minor and the Middle East. The Zaloznyi route is mentioned in the Primary Chronicle under the years 1168, 1170, and 1185. It was not a safe route; frequently cut off by steppe hordes, it required fortified defenses in order to be maintained by the Rus' rulers.

Zalukva. A village, now in Halych raion, in Ivano-Frankivske oblast, near which a Rus' settlement site was excavated in 1883 by I. Sharanevych and Rev L. Lavretsky. The stone foundation of an ancient church (Holy Redeemer), a stone sarcophagus, bronze pendant crosses, and the lead seal of Bishop Kosma of Halych (1160s) were found at the site.

Zalutsky, Vasyl [Zaluc'kyj, Vasyl'] (real name: Orobets), b 30 January 1895 in Zaluche, Sniatyn county, Galicia, d 15 July 1973 in Edmonton. Painter and graphic artist. During the First World War he served in the Ukrainian Sich Rifleman, and in 1918 he fought with them in central Ukraine, where he stayed. After graduating from the Kiev Printing Institute he worked as a book illustrator in Kiev, Kharkiv, and Moscow. A postwar refugee in Germany, at the Augsburg DP camp he illustrated *Syn Ukraïny* (Son of Ukraine), U. Samchuk's *Iunist' Vasylia Sheremety* (Youth of Vasyl Sheremeta), and *Tysiacha i odna nich* (A Thousand and One Nights), designed theatrical scenery, and began painting oils. In 1949 he emigrated to Canada. In Edmonton he designed scenery, painted icons for St George's Church, and created greeting cards depicting Ukrainian folk customs.

Opanas Zalyvakha: *Self-Portrait*

Zalyvakha, Opanas [Zalyvaxa], b 26 November 1925 in Husynka, now in Kupianka raion, Kharkiv oblast. Non-conformist artist. Zalyvakha grew up in the Far East, where his parents resettled in 1933. He was expelled from the Leningrad Art Institute in 1947 for not conforming to socialist realism but was readmitted after J. Stalin's death, and graduated in 1960. He then headed the art council in Tiumen, Russia, where his first solo exhibition was held, in 1961. In December 1961 he moved to Ivano-Frankivske.

There his second solo exhibition (April 1962) was closed down by the Party authorities for 'decadent tendencies.' In 1964 Zalyvakha, A. *Horska, and L. *Semykina were commissioned to create a stained-glass panel for the vestibule of Kiev University's main building. Depicting T. Shevchenko embracing a woman, it was destroyed on orders of Kiev's Party secretary, V. Boichenko. Zalyvakha was arrested in August 1965 and sentenced at a closed trial in March 1966 to five years in a hard-labor camp in Mordovia for disseminating samvydav literature. After his release in 1970, he was forced to work as a laborer in Ivano-Frankivske, but continued painting. The first solo exhibition of his paintings, sculptures, and ceramics in 26 years was held in Lviv in December 1988 at the Ukrainian State Museum of Ethnography and Crafts. A second was held in Ivano-Frankivske in May 1989. Throughout the years Zalyvakha has experimented. Despite stylistic variation, from the figurative (*Woman from the Poltava Region*, 1965) to the abstract (*Primeval-Mother*, 1975) and the stylized (*Skovoroda*, 1977), his subject matter has remained deeply rooted in his Ukrainian heritage and in Ukrainian history, as is evident in works such as *Chumak Supper* (1970) and *Berestechko* (1980s). Zalyvakha has painted numerous icons of the Mother of God, including *Carpathian Mother of God* (1960s), *Cossack Madonna* (1970s), and *The Protectress* (1988). He has used the three-faced compositions of 18th-century icons of the Trinity to create contemporary secular icons, such as *Crying Ox* (1975), in which two human faces are intertwined with that of a beast of burden. He has painted many portraits of T. Shevchenko, of friends, and of family. Concerns about his fate and his nation's fate have resulted in works such as *Lira Player*, 1933 (1973) and *Fate* (1982).

D. Zelska-Darewych

Zalyvchy, Andrii [Zalyvčyj, Andrij], b 26 October 1892 in Mlyn, Hadiache county, Poltava gubernia, d 13 December 1918 in Chernihiv. Political activist. For his membership in the Kharkiv cell of the Socialist Revolutionary party he was arrested in 1915 and exiled to Turgansk, Siberia. In early 1917 he returned to Ukraine, where he served as a member of the Central Rada, representing the *Ukrainian Party of Socialist Revolutionaries (UPSR). He was one of the founders of the left faction of the UPSR, which later founded the *Borotbist party. His collection of autobiographical stories, *Z lit dytynstva* (From Childhood Years, 1919), was published posthumously.

Zamishantsi. The Lemko name for the inhabitants of 10 Ukrainian villages (1939 pop 7,300) between Rzeszów and Krosno, about 30 km away from Ukrainian ethnic territory. Their dialect is close to the eastern Lemko dialect, except that it has some Boiko elements and a heavily Polonized lexicon. It was studied by I. Verkhratsky and I. Zilynsky.

Zamorii, Petro [Zamoriij], b 25 June 1906 in Vysunske, Kherson county, Kherson gubernia, d 26 March 1975 in Kiev. Geologist and geomorphologist. He graduated from the Kherson Agricultural Institute in 1926. He became section head at the AN URSR (now ANU) Institute of Geological Sciences in 1941, a professor at Kiev University in 1950, and served as president of the Ukrainian Geographical Society (1956–64). He primarily studied Quaternary deposits and the geomorphology of Ukraine and the Urals and ex-

plained the effect of neotectonics on the relief of Quaternary deposits. He established the basic genetic types of scattered mineral deposits. He edited the periodical *Fizychna heohrafiia ta heomorfolohiia* (1973–5) and wrote numerous books on Quaternary deposits in Ukraine (1961).

The main square and town hall of Zamość

Zamość (Ukrainian: Zamostia). III-4. A city (1989 pop 60,700) in the southwestern Kholm region, at present the administrative center of Zamość voivodeship in Poland. Zamość was founded in 1580 by the Polish chancellor J. Zamoyski, and quickly became an important economic, military, and cultural center (particularly with the establishment of the *Zamostia Academy in 1594). The town was besieged by B. Khmelnytsky in 1648 and taken by I. Mazepa in 1705. It was incorporated into the Russian Empire as part of Kholm gubernia. The 1918 Peace Treaty of Brest-Litovsk was to have made Zamość part of Ukraine, but subsequent events established it as part of Poland. In 1920 Zamość was the site of a battle between the Sixth Division of the Sich Riflemen under M. Bezruchko and the Bolshevik cavalry army under S. Budenny. A small number of Ukrainians lived in Zamość until 1944; in 1945 there were approx 8,000 Ukrainians and over 10,000 Polonized Ukrainians living in the surrounding county.

Zamość was an important religious center in Ukrainian history. In 1589 Zamoyski allowed the Orthodox residents of the town to build the Church of St Nicholas, which became renowned for its iconostasis painted by masters from Constantinople. A brotherhood established by the church was sanctioned by the patriarch Theophanes. The brotherhood sponsored a school. In 1699 the brotherhood adopted the Catholic faith, and the church was given to the Basilian monastic order, which ran a monastery there in 1706–1864. The Synod of *Zamostia took place in 1720. A second Ukrainian church, the Church of the Dormition, was built in Zamość in 1592 and was taken over by the Basilians in 1758.

A. Zhukovsky

Zamostia, Synod of. A church synod held in August–September 1720 in Zamość (Zamostia), during the tenure of Metropolitan L. Kyshka. It was a provincial synod of the Kiev Uniate metropol, the goal of which was to review church life and the liturgical customs of the Ukrainian and Belarusian Catholic church. Preparations for it began in 1715; it was initially to have been held in Lviv but

was moved because of an epidemic. The synod was approved by the pope and presided over by his nuncio, Grimaldi. It was attended by the metropolitan, 7 bishops, and 129 priests and monks, and the Lviv Stauropegeion Institute sent 2 lay representatives. Metropolitan Kyshka and Bishop A. Sheptytsky were particularly influential participants in the deliberations. The synod condemned the Russian Filipian heresy, widespread in Ukraine and Belarusia at the time. It also ratified several important changes concerning *church rite and discipline, including the addition to the *Creed of the *filioque* clause used in the Roman Catholic church, and commemoration of the pope. The synodal decrees upheld the strong Latinization trend in the church, and were approved by the Holy See in 1724. The synod regulated church administration, made efforts to improve the education of priests, and ordered all Uniate monasteries in the province to join the Basilian order. Most of the resolutions were reconfirmed by the *Lviv Synod of 1891.

The Synod of Zamostia resolutions entered the canon of basic church law. The act and resolutions were published as *Synodus Provincialis Ruthenorum habita in civitate Zamostiae anno 1720* (1724 and several subsequent edns).

The mace of the Zamostia Academy

Zamostia Academy (Zamostska or Zamoiska akademiia). An institution of higher education founded in 1595 by J. Zamoyski, chancellor of the Kingdom of Poland; located in Zamostia (Zamość), a city in the Kholm region. The academy was operated by Jesuits, but initially it had a secular program of studies. Talented scholars were recruited to the school, and for many years it was the best educational institution of its kind in the Polish Commonwealth. Seven chairs of study were established there: civil law, Polish law, moral philosophy, physics and medicine, logic and metaphysics, mathematics, and rhetoric. Additional courses included readings from the authors of antiquity, beginner's rhetoric, syntax, grammar, and orthography. The study of Latin, Greek, and Polish was compulsory. In addition to Poles, Lithuanians, Prussians, Livonians, and other foreigners, many Ukrainians (both Catholic and Orthodox) studied at the academy and later became promi-

ment church or cultural leaders (figures of note include S. Kosiv, I. Kozlovsky-Trofymovych, and K. Sakovych). After the death of its founder and benefactor in 1605, the academy lost its initial dynamism and became increasingly clerical in its orientation. In 1784 the Austrian government closed the academy and replaced it with a secondary school.

Zamoyski. A family line of Polish magnates, originating with Tomasz Łaziński, who purchased a large estate in the Stara Zamość region (hence the Zamoyski name) in the early 15th century. Members of the family occupied important state positions in the Polish kingdom and played a significant role in Ukrainian affairs. The most notable family figure was Jan Zamoyski (1542–1605), the Polish chancellor and royal grand hetman. He was a close political adviser to Stephen Báthory and later a supporter of Sigismund III Vasa (although he eventually came into conflict with him). He also founded the Zamostia Academy in 1595.

Zamoyski, Jan, b 19 March 1542, d 3 June 1605 in Zamość, Poland. Polish magnate and statesman; father of T. Zamoyski. He was a major force in Polish politics, a close adviser to King Sigismund II Augustus and Stephen Báthory, and, later, a strong opponent of Sigismund III Vasa. He was named crown chancellor in 1578 and head of the army in 1581. He established an academy in Zamość in 1595.

Zamoyski, Tomasz, b 1591, d 1638. Polish nobleman; son of J. Zamoyski. A graduate of the Zamostia Academy, he was a voivode of Podilia (1618) and Kiev (1618–29), crown vice-chancellor (1629–35), and crown chancellor (from 1635). In his official capacities he concluded a treaty with the Cossacks in 1619 and conducted negotiations with them in 1625. He supported the promotion of the Ukrainian statesman A. *Kysil.

Ivan Zamsha

Ivan Zamychkovsky

Zamsha, Ivan [Zamša], b 8 October 1895 in Rozkishna, Tarashcha county, Kiev gubernia, d 15 November 1978 in New York. Economist and co-operative organizer. From 1918 he was active in the co-operative movement in Kiev. In 1922 he was appointed assistant head and then head of the financial department of the All-Ukrainian Association of Consumer Co-operative Organizations (Vukoop-

spilka). After graduating from the Kiev Co-operative Institute in 1923, he taught there and at other institutions. He was arrested in 1930 and 1931 but subsequently released, and he continued to teach in Kiev. During the war he headed the financial department of the Vukoopspilka in Kiev. A postwar émigré in Germany, he oversaw the financial department of the Central Ukrainian Relief Committee and helped found the Ukrainian Higher School of Economics in Munich, at which he served as a professor and chairman of the economic planning department. In 1952 he emigrated to the United States, where he managed the finances of the Ukrainian Academy of Arts and Sciences and continued his research. He published some articles on the history of the Ukrainian co-operative movement, the Vukoopspilka, M. Tuhan-Baranovsky, and economics in the USSR.

Zamychkovsky, Ivan, b 8 January 1869 in Kiev, d 15 July 1931 in Kiev. Stage and film actor. He began his career in the Kiev Russian Operetta Theater under I. Setov (1887). In 1896 he led an amateur theatrical group in Kiev. He was an actor in the Ukrainian National Theater (1917–18), the State Drama Theater (1918–19), the Shevchenko First Theater of the Ukrainian Soviet Republic (1919–25), and the Odessa Ukrainian Drama Theater (1925–31). He also acted in the films *Taras Shevchenko* (1926), *Taras Triasylo* (1927), and *Dva dni* (Two Days, 1927). A biography, by I. Duz, was published in Kiev (1962).

Zamyrailo, Viktor [Zamyrajlo], b 23 November 1868 in Cherkasy, d 2 September 1939 in Petrodvorets, Leningrad oblast, Russia. Graphic artist and theatrical scenery designer. He studied at the Kiev Drawing School (1881–4) and under M. Vrubel in Kiev. He took part in painting the murals in St Volodymyr's Cathedral in Kiev (1885–90). In 1897 he began designing Russian posters and books, including editions of N. Gogol's works (1913), J. Swift's *Gulliver's Travels* in Russian (1918), and A. Blok's *Dvenadtsat* (Twelve, 1924). Later he turned to designing scenery. In the Soviet period he served as a professor at the Higher State Artistic and Technical Institute in Leningrad (1925–9).

Zander. See Pike perch.

Mariia Zankovetska

Zankovetska, Mariia [Zan'kovec'ka, Marija] (née Adasovska; married name: Khlystova), b 4 August 1854 in Zanky, now in Nizhen raion, Chernihiv oblast, d 4 October 1934 in Kiev. Actress, singer, and theater activist.

Zankovetska was educated in a Chernihiv private school and at the Helsinki Conservatory. She debuted in 1882 in I. Kotliarevsky's *Natalka from Poltava* as a member of M. Kropyvnytsky's troupe, which production heralded the rebirth of Ukrainian professional theater, heavily repressed since the Ems Ukase of 1876. Zankovetska performed as leading actress in the troupes of Kropyvnytsky (1882–3, 1885–8, 1899–1900), M. Starytsky (1883–5), and M. Sadovsky (1888–98), in Saksahansky's Troupe (1900–3), in O. Suslov's troupe (1903–4), in the Society of Ukrainian Actors (1915–17), and in the State People's Theater (1918–22). She appeared at the All-Russian Congress of Stage Workers in 1897, where she demanded the termination of censorship in Ukrainian theater. In 1909–15 she directed amateur groups in Nizhen and Krolevets. Her last performance on stage was in Kiev in 1922, and that same year a theater in her name was founded. Zankovetska's stage career spanned over 30 dramatic-heroic roles from the populist-ethnographical repertoire, which she played with innate subtlety and intelligence. Among them were Olena in M. Kropyvnytsky's *Hlytai, abo zh pavuk* (The Profiteer, or the Spider), Katria and Aza in M. Starytsky's *Ne sudylos'* (Not Destined) and *Tsyhanka Aza* (The Gypsy Aza), Sofiia and Kharytyna in I. Karpenko-Kary's *Beztlanna* (The Hapless Maiden) and *Naimychka* (The Hired Girl), Natalia in P. Myrny's *Lymeryna* (The Saddler's Daughter), and Zinka in L. Yanovska's *Lisova kvitka* (The Forest Flower). Her best performances were opposite M. Tobilevych (Sadovsky), and her talent was praised by K. Stanislavsky. She was less successful in comic roles and in the non-Ukrainian repertoire. She starred in the films *Natalka from Poltava* (1910) and *Ostap Bandura* (1923). She was the author of a book of memoirs, and biographies of her have been published in Kiev (1950, 1953, 1982). In 1964 a museum in her honor was established in Zanky.

V. Revutsky

Zankovetska Theater. See Lviv Ukrainian Drama Theater.

Zaozirny, John [Zaozirny], b 26 June 1947 in Calgary. Lawyer and politician of Ukrainian descent. He was educated at the University of Calgary, University of British Columbia (LLB, 1972), and London School of Economics (LLM, 1973). In 1979 he was elected to the legislature of Alberta as Progressive Conservative member for Calgary Forest Lawn. He was re-elected in 1982, at which time he was appointed minister of energy.

Zap, Karel Vladislav, b 8 January 1812 in Prague, d 1 January 1871 in Benešov, Bohemia. Czech writer, historian, and geographer. In the years 1836–44 he worked as a civil servant in Lviv. There he studied Ukrainian history, ethnography, and literature and had ties with leaders of the Galician revival (eg. M. Shashkevych, I. Vahylevych, Ya. Holovatsky, D. Zubrytsky). He published articles about Galician affairs and ethnography in Czech periodicals and wrote books on life in Eastern Europe (1843) and his travels in Galicia (1844); the travel book is a valuable ethnographic source. He was critical of the Polish landowners' oppression of the Ukrainian peasantry and considered the Ukrainians a distinct nation. He also translated N. Gogol's *Taras Bul'ba* and articles by Holovatsky, Vahylevych, and P. Kulish into Czech.

Zapałowicz, Hugo, b 15 November 1852 in Lublin, d 20 September 1917. Polish botanist. He studied the phytogeography of the flora of the Beskyds and the Pokutia and Maramureş regions of the Carpathian Mountains and wrote *Krytyczny przegląd roślinności Galicji* (A Critical Survey of the Vegetation of Galicia, 3 vols, 1906–11).

Zapasko, Yakym, b 28 August 1923 in Rozsishky, Uman county, Kiev gubernia. Art historian. He graduated from the Ukrainian Printing Institute in Lviv in 1950 and received his candidate's degree in 1958. Zapasko has taught at the Lviv Institute of Applied and Decorative Arts since 1959 and now heads its Department of Art History. He has written monographs on the ornamentation of Ukrainian manuscript books (1960), the first Ukrainian printer, I. Fedorov (1964), book art in 16th- to 18th-century Ukraine (1971), the Ukrainian folk kilim (1973), I. Fedorov's artistic heritage (1974), and old printed books published in Lviv (1983, with O. Matsiuk), and many articles on the history of Ukrainian book art and Ukrainian decorative and applied arts. Zapasko and Ya. Isaievych compiled a valuable catalog of old printed books published in Ukraine in 1574–1800 (3 vols, 1981, 1984).

Zapiski Imperatorskogo Khar'kovskogo universiteta (Annals of the Imperial Kharkiv University). A scholarly journal published quarterly by Kharkiv University from 1874 to 1917, with an interruption from 1884 to 1893. It contained much information about *Slobidska Ukraine and the Kharkiv region. Among its editors was D. *Ovsianiko-Kulikovsky (1894–1904).

Zapiski Imperatorskogo Novorossiiskogo universiteta (Annals of the Imperial New Russia University). A scholarly journal published by the Richelieu Lyceum and then Odessa (New Russia) University from 1853. Initially the journal published articles from all disciplines, especially historical linguistics and literature. After 113 volumes had appeared, the journal was divided into separate series: history-philology (14 vols of which appeared in 1909–18), physics-mathematics (12 vols in 1910–19), law (14 vols in 1909–17), and medicine (9 vols in 1909–19). Among its editors in the 19th century were A. Pavlov, S. Yaroshenko, and A. Kochubinsky.

Zapiski Imperatorskogo Odesskogo obshchestva istorii i drevnostei (Notes of the Imperial Odessa Society of History and Antiquities). A publication of the Odessa Society of History and Antiquities, which appeared irregularly in 1844–1919, altogether in 33 volumes. It contained articles on archeology, epigraphy, numismatics, history, ethnography, geography, and the economy of Southern Ukraine, as well as reports of the activities of the society. Also published was M. Popruzhenko's index to vols 1–30 (1914).

Zapiski o Iuzhnoi Rusi (Notes on Southern Russia). A two-volume collection of materials concerning the Cossack period, published by P. *Kulish in 1856–7 with the financial assistance of two magnates of the Chernihiv region, H. Galagan and V. Tarnovsky. The first volume consists of dumas, songs collected by Kulish, and legends about B. Khmelnytsky, S. Palii, leading Zaporozhians, Cossack battles against the Tatars, and struggles of the

Cossacks against the Church Union of Berestia. The second volume contains folktales recorded by L. Zhemchuzhnikov, an account of a meeting with the kobzar O. Veresai, accounts of haidamaka campaigns (the manuscript of S. Zakrevsky), a number of articles on history, ethnography, and linguistics, and a series of documents on the history of the Hetmanate in the 18th century. Because of censorship T. Shevchenko's poem 'Naimychka' (The Hired Girl) was first published in the collection, as a work of an unknown author. M. Kostomarov and Shevchenko greeted the collection with enthusiasm; M. Maksymovych met it with guarded criticism.

Florian Zapletal

Frederick Zaplitny

Zapletal, Florian, b 10 June 1884 in Bochoř, Moravia, d 16 October 1969 in Prague. Czech scholar and journalist. He studied at Prague, Vienna, Moscow, and Petrograd universities. In 1919–21 he served as chief of the press service in Transcarpathia and collected historical and ethnographical materials there. He wrote over 160 articles on the history, culture, architecture, and politics of Transcarpathia and the books *Rusini a naši buditelé* (Ruthenians and Our Awakeners, 1921), *Horjanská rotunda* (The Horiyan Rotunda, 1923), and *A.I. Dobrjanskij a naši rusini r. 1849–51* (A.I. Dobriansky and Our Ruthenians in 1849–51, 1929). In 1967 he turned over part of his valuable archive and library to the Svydnyk Museum of Ukrainian Culture, and in 1973 his widow entrusted over 500 of his photographic glass plates from the 1920s to M. Mushynka in Prešov. An album based on these plates, *Wooden Churches in the Carpathians*, was published in 1982 with the help of P. Magocsi.

Zaplitny, Antin [Zaplitnyj], b 14 June 1890 in Hlibiv, Skalat county, Galicia, d 1 July 1968 in Detroit. Lawyer and civic leader; member of the Shevchenko Scientific Society from 1963. A graduate of Vienna University, he served as Terebovlia county commissioner for the Western Ukrainian National Republic (1919). He opened a law office in Terebovlia in 1926 and presided over the local branches of the Prosvita society, the Ridna Shkola society, and the Ukrainian National Democratic Alliance. In 1944 he fled to Germany, and in 1950 he emigrated to the United States, where he continued to be active in the Ukrainian community.

Zaplitny, Frederick [Zaplitnyj, Fedir], b 9 June 1913 in Oak Brae, Manitoba, d 19 March 1964 in Dauphin, Manitoba. Canadian politician of Ukrainian descent. After graduating from the teachers' college in Dauphin, he became active in the Co-operative Commonwealth Federation (CCF). In 1945 and 1953 he was elected an MP for the Dauphin riding, and in 1950–2 served as a councillor in Dauphin. In Ottawa he took an active interest in Ukrainian affairs.

Zaporizhia [Zaporizžja]. The name of the military and political organization of the Ukrainian *Cossacks and of their autonomous territory (approx 80,000 sq km) in *Southern Ukraine from the mid-16th century to 1775. The name was derived from the territory's location 'beyond the [Dnieper] Rapids' (*za porohamy*). Its center was the *Zaporozhian Sich. The Zaporizhia's territory – the 'Liberities of the [Cossack] Host beyond the [Dnieper] Rapids' – was situated to the south and east of Polish-ruled *Right-Bank Ukraine, from which it was separated by the Boh River, its tributaries the Syniukha and the Velykyi Vys, and the Tiasmyn River, a tributary of the Dnieper. To the northeast it bordered on the Left-Bank *Hetman state along the Dnieper River and its tributary, the Orel. To the east it was separated from Russian-ruled *Slobidska Ukraine by the Donetsk River. To the southeast it bordered on the lands of the Don Cossacks along the Kalmiuis River. The Zaporizhia extended southward deep into the steppe, where it bordered on the *Crimean Khanate and reached, between the Berda and the Kalmiuis rivers, the Sea of Azov.

The Cossacks gained renown in the late 15th century as defenders of the Lithuanian-Ruthenian state against the Crimean Tatars, while serving the Cherkasy and Kaniv starostas and living as free brigands in the uncolonized steppe frontier of the Polish state. The rise of the Zaporizhia resulted from the increasing colonization of that frontier by Ukrainians fleeing serfdom and other Polish-Lithuanian oppression. There they established homesteads and, to defend themselves from Tatar raids, built fortified camps (*sichii*), which were later united to create a central fortress, the Zaporozhian Sich, under the leadership of D. *Vyshnevetsky on the island of Mala Khortytsia (ca 1552). The anti-Polish Cossack rebellions of the 1590s, 1620s, and 1630s originated in the Zaporizhia and resulted in the growth of the military and political strength of the *Zaporozhian Host.

The Zaporizhia played a key role in the early period of the *Cossack-Polish War of 1648–57. During the following period, of the so-called *Ruin, it influenced the course of events, if at times only negatively, particularly during the hetmancy of I. Briukhovetsky and when I. *Sirko was the Zaporozhian otaman (1660–80). The politically unsophisticated Zaporozhian leaders were often exploited by Muscovy and Ottoman Turkey and the Crimean Khanate, which succeeded in pitting the Zaporizhia against the Hetman state. With the *Eternal Peace of 1686 the Zaporizhia became a Muscovite protectorate; it retained its autonomy while recognizing the authority of the hetman. Soon Russian armed forces appeared in the Zaporizhia, and with time they established their own forts to control the Cossacks, notably a fort 2 km from the *New Sich (1735).

Under Otaman K. *Hordiienko the Zaporizhia became an ally of Hetman I. *Mazepa and Charles XII in 1709. In re-

tialiation Russian forces destroyed the *Chortomlyk Sich and, after their victory at the Battle of Poltava, mercilessly persecuted the Zaporozhians, thereby forcing them to flee to Crimean Tatar territory, where the Zaporozhians founded the new *Oleshky Sich. After Hordiienko's death in 1734, the Zaporozhians, having fared badly under the Tatars and not having their ranks replenished with new refugees from Ukraine, once again accepted Russian suzerainty and returned to their former lands. Thenceforth the Zaporizhia and the *New Sich were directly under the control of the Russian governor-general of Kiev. In 1752 the Russian government designated areas of Serbian colonization on Zaporozhian territory – *New Serbia in the northwest and *Sloviano-Serbia in the northeast – and used the colonists to subdue the Cossacks.

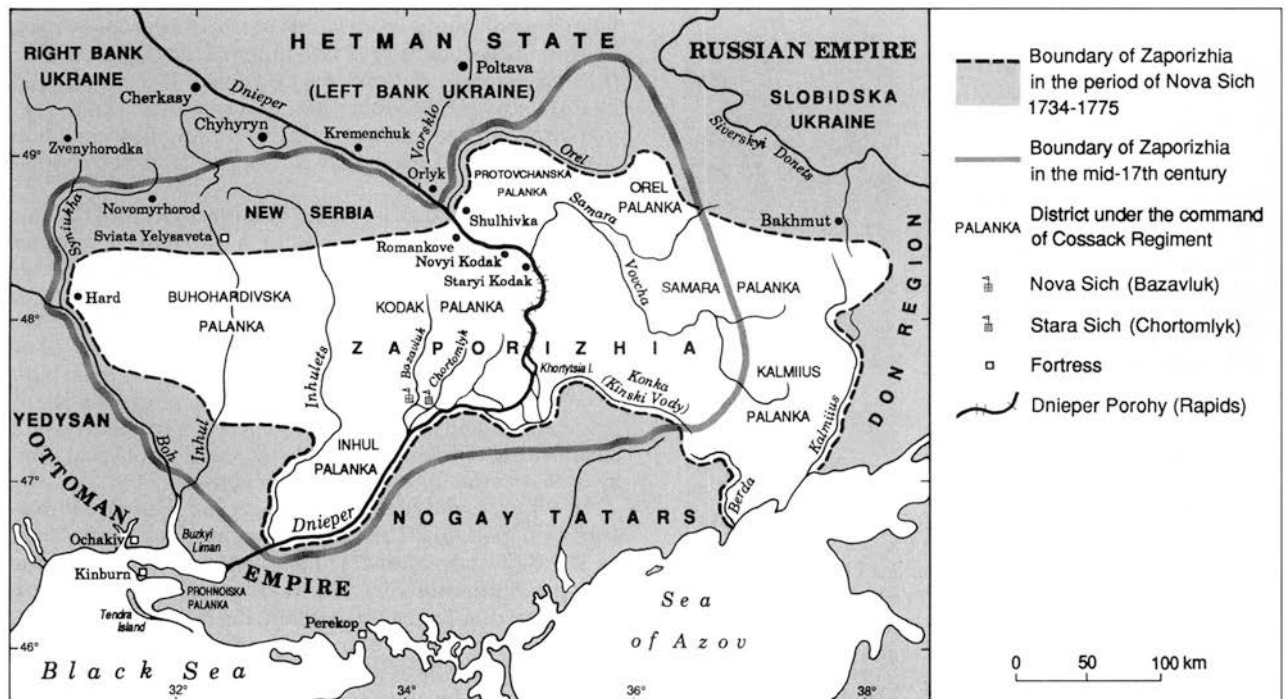

By the late 17th century a unique sociopolitical order had evolved in the Zaporizhia; with certain changes, it existed until the end of the 18th century. The order was based on the political equality of all Zaporozhian Cossacks regardless of their social origins. The principle of general elections was applied to all representative bodies, including the supreme *Sich Council, the central administrative body, known as the Kish of the Zaporozhian Sich, the *Kish otaman and his *starshyna* (the Kish judge, chancellor, osaul, and quartermaster), and the otamans of the Zaporozhian *kurins. Those elected figures constituted the Council of Officers, a collegial administrative body. Outside the Sich appointed colonels commanded districts called *palankas (eight in the 18th century).

At the Sich the Zaporozhian Host (army) was traditionally divided into 38 kurins (the number of kurins was actually higher, because several existed outside the Sich), each with several hundred Cossacks. Numerous homesteads (see *Zymivnyk) on the territory of each palanka were inhabited by married Cossacks (since only unmar-

ried Cossacks could dwell at the Sich) and peasants, who engaged in individual farming. Collective farming was undertaken by each kurin. Fishing, hunting, and cattle raising were the chief occupations in the Zaporizhia. Agriculture became particularly developed under its last otaman, P. *Kalnyshesky (1765–75), when peasants were readily welcomed as free settlers. The Zaporizhia also played an important commercial role because of its location on the trade route from the Crimea to Poland, the Hetman state, and Russia.

Although Zaporozhian society was originally egalitarian, by the mid-18th century a higher stratum of *zhatni* or *starshi tovaryshi* ('notable' or 'senior fellows') had come into being. Most Cossack officers were elected from among them. The 'fellows' accumulated wealth on their *zymivnyky* and were able to hire both free peasants and *Cossack helpers to work for them. The Cossacks and peasants did not constitute closed estates. Movement from one to the other was possible and was regulated by the Kish according to its military and war needs. In 1762 nearly 33,700 Cossacks and over 150,000 peasants lived on Zaporozhian territory. By the time it was abolished, over 200,000 peasants lived there. As a result of the stratification that occurred in the 18th century, there was frequent popular unrest among the commoners and even several uprisings (the largest in 1768). The Zaporizhia supported the *haidamaka uprisings and the *Koliivshchyna rebellion in Polish-ruled Ukraine; the rebellion was led by a Zaporozhian Cossack, M. Zalizniak.

In the second half of the 18th century the Zaporozhian Cossacks were forced to struggle constantly against the encroachments of the mainly Serbian and Rumanian colonists sponsored by the Russian government. The tsarist state increasingly limited the Zaporozhians' rights, freedoms, and self-government, particularly after the aboli-

THE ZAPORIZHIA

tion of the Hetman state in 1764. On 15–16 June 1775, on orders from Catherine II, the Russian army under Gen P. Tekeli razed the New Sich. In her manifesto of 14 August 1775 Catherine officially abolished the Zaporozhian Host, calling it a 'political monstrosity.' Many of the Zaporozhians were forced into *military settlements, and later became *state peasants. Some 10,000 fled to Ottoman territory and founded the *Danubian Sich there. From among those who remained under Russian rule the *Boh Cossack Army and, later, the *Black Sea Cossacks were formed. The lands of the Zaporizhia were incorporated into *New Russia and *Azov gubernias and distributed among the Russian and Ukrainian landowners.

Downtown Zaporizhia

Zaporizhia [Zaporižzja]. VI-16. A city (1990 pop 891,000) on the Dnieper River and the administrative center of an oblast and raion. It is a river port, a railway junction, and the second-largest industrial city in the *Dnieper Industrial Region. Until 1921 the city was called Oleksandrivske.

The city grew up around Oleksandrivske fortress, which was built in 1770, and which formed a link in the defensive front (the Dnieper Line) against the Tatars. The vicinity, situated at the southern end of the Dnieper Rapids, had long been a stopping point for travelers and traders on the Dnieper route. The Cossack stronghold of

*Khortytsia had been located on the island opposite the new settlement. After Russia's annexation of the Crimea in 1783, the fortress lost its military importance. Many of its demobilized soldiers settled in or around Oleksandrivske, which became a small administrative-commercial town. From 1806 it was a county center in Katerynoslav gubernia. Its agriculture-based economy grew slowly: the town's population increased from 1,700 in 1824 to only 3,700 in 1861. Oleksandrivske's rapid growth did not begin until the 1870s. After being linked by rail to Moscow in 1873 and Sevastopol in 1875, the town became a major transfer point, at which commodities (notably grain) were transferred from rail to river barges for shipment downriver to the seaports. At the same time its own industry, particularly farm-machine building, developed. By 1910 there were three large machine-building plants in Oleksandrivske. The completion of a railway line from the Donbas to Kryvyi Rih in 1902 stimulated the growth of metallurgy. The city's population grew from approx 7,000 in 1885 to 19,000 in 1897 and 38,000 in 1910. The city in 1897 was 43 percent Ukrainian, 28 percent Jewish, and 25 percent Russian.

During the revolutionary period the city was heavily damaged before Soviet rule was entrenched in 1920. It was rapidly rebuilt, and expanded northward and to the western bank of the Dnieper. The construction of the Dnieper Hydroelectric Station nearby provided the energy for the extensive growth of the metallurgical industry in the 1930s. Using iron ore from Kryvyi Rih, manganese ore from Nykopol, and coal from the Donbas, Zaporizhia soon became the second-largest (after Dnipropetrovske) metallurgical center in the Dnieper region. Some of its major enterprises were expanded or founded during the interwar period, including the Komunar machine (now automobile) plant, the Zaporizhstal metallurgical plant, the Instrumental Steels Plant (later Dniprospepsstal), and the Dnieper Aluminum Plant (est 1930). The city's population rose abruptly, from 56,000 in 1926 to 290,000 in 1939. During the Second World War much of the city, including the hydroelectric station, was destroyed. It was occupied by the Germans in October 1941 and recaptured by the Soviet army in October 1943. Its industry and power station were rebuilt and expanded during postwar reconstruction.

Today Zaporizhia is the sixth-largest city in Ukraine. The old town is spread out along a low-lying terrace on the left bank of the Dnieper directly across from Khortytsia Island. The new town is situated several kilometers to the north. Its main street runs south for more than 10 km from the hydroelectric dam to the railway station. The area between the old and new towns has slowly been built up with residential districts. The city encompasses Khortytsia Island and the right bank. There are rest homes and sanatoriums on Khortytsia Island. Public transport consists of streetcars, buses, and trolleybuses.

Metallurgy and machine building are the main industries of Zaporizhia. They include some giant plants, such as the Zaporizhstal and Dniprospepsstal steel mills, the Dnieper Aluminum Plant, the titanium-magnesium plant, the Zaporizhia Transformer Plant, the Komunar Automobile Plant, an engine plant, and an electric instruments factory. The chemical industry, which sprang up after the last war, includes the Kremniopolimer plant, which manufactures synthetic leather, petroleum refineries, and anti-

The Dnieper Hydroelectric Station dam in Zaporizhia

biotic and yeast factories. The building-materials industry produces reinforced-concrete structures, bricks, and pre-fabricated wall sections. The food industry includes confectionery factories, two breweries, and meatpacking plants. The light industry produces mainly clothing and footwear.

The city is an educational and research center. It has a university and 3 institutes (the Machine-Building, the Medical, and the Industrial), 14 secondary special schools, and 25 vocational schools. There are many research institutes specializing in areas such as transformer design, titanium, special alloys, and ferrous metals. The city's cultural facilities include a regional studies museum, an art museum, a philharmonic society, and three theaters (Ukrainian music and drama, puppet, and young spectator's). The chief architectural monuments are the remains of the Sich fortifications (1735–9) on Khortytsia Island, the zemstvo building (1912), and the Dnieper Hydroelectric Station dam.

Zaporizhia Art Museum (Zaporizkyi khudozhnii muzei). A museum established in 1971 in Zaporizhia. It is divided into two departments, fine art and decorative and applied art. In its collection are works by painters, such as M. Pymonenko, S. Svitoslavsky, A. Petrytsky, O. Shovkunenko, M. Hlushchenko, and T. Yablonska, and decorative artists, such as D. Holovko, T. Pata, and Yu. Korpaniuk.

Zaporizhia Dnipropetsstal Electrometallurgical Plant (Zaporizkyi elektrometalurhiinyi zavod Dnipropetsstal im. A.M. Kuzmina). An enterprise of the ferrous metallurgical industry, built in Zaporizhia in 1929–32. Until 1939 it was part of the Dnieper Industrial Complex; then it became a separate enterprise. It was evacuated during the war, and resumed production only in 1948. Equipped with the latest technology, it produces various steel alloys, high-grade rolled steel, and forged steel.

Zaporizhia Iron-ore Complex (Zaporizkyi zalizorudnyi kombinat). An iron-ore-mining and -processing complex located near Dniprorudne, Zaporizhia oblast. Construction of the plant began in 1960, and it opened in

1969. It processes iron ore from the Bilozerka Iron-ore Basin. The ore is found at a depth of 243–280 m and has an iron content of 46–69 percent. The complex has a processing capacity of 7 million t of ore annually.

Zaporozhets cars at the Zaporizhia Komunar Automobile Plant

Zaporizhia Komunar Automobile Plant (Zaporizkyi avtomobilnyi zavod Komunar). An automobile plant established in Zaporizhia in 1958 on the basis of an agricultural-machinery enterprise that had been created in 1923 by the merging of four older factories. In 1930 it was the first factory in the USSR to build combines. After the Second World War the plant produced combines, seeders, reapers, and other agricultural machines. In 1958 it was converted to produce four-passenger subcompact cars. Since 1963 it has built the popular Zaporozhets, the Tavriia, and four car models for the handicapped. Its output increased rapidly from 40,600 cars in 1965 to 150,000 cars in 1978. In 1977 the plant was joined with automobile plants in Lutske, Melitopil, and Dnipropetrovske to form the AvtoZAZ Automobile Manufacturing Consortium.

Zaporizhia oblast. An administrative territory (1989 pop 2,081,000) in southern Ukraine, formed on 10 January 1939. It has an area of 27,200 sq km and is divided into 18 raions, 14 cities, 22 towns (smt), and 240 rural councils. The capital is *Zaporizhia.

Physical geography. Most of the oblast lies within the Ukrainian Crystalline Shield. Its northeastern part lies in the Dnieper Lowland, its southern part, in the Black Sea Depression, and its southeastern part, in the Azov Upland. Its surface is lightly dissected and slopes gently from the northwest to the southeast. The Azov coastline is marked by a number of spits. The oblast is rich in mineral resources: coal, iron and manganese ore, natural gas, and building materials (granite, limestone, clay). The soils are mostly (75 percent) chernozems, common chernozems in the north and saline chernozems in the south. The oblast has a moderate continental climate with cold, dry winters and hot, dry summers. The average January temperature is -4°C in the south and -5°C in the north, and the average July temperature is 24°C and 23°C respectively. The annual precipitation is 400–500 mm in the north and 300–350 mm in the south. Some of the smaller rivers dry up during the summer. The main rivers are the Dnieper, the Molochna, the Obytochna, the Berda, and the Ufliuk. The oblast

lies in the European forest-steppe geobotanical province. Most of its arable land is cultivated; only 3–4 percent of the surface, mostly ravines and swampy bays on the coast, is covered with natural steppe vegetation. Forests (mainly white acacia, maple, oak, ash, and elm) cover 3.4 percent of the oblast's area and are located largely in the eastern part.

History. The territory of the oblast was inhabited as early as the Paleolithic period. From the 7th century BC it was controlled by the Scythians. They were forced by the Sarmatians to retreat southward in the 3rd and 2nd centuries BC. After the Sarmatians the Huns, Avars, and Khazars dominated the steppes. Kievan Rus' was unable to establish effective control of the region after it vanquished the Khazars in 965. Control fell to the Pechenegs and Cumans and then the Tatars and the Crimean Khanate. In the 16th century the Zaporozhian Cossacks established themselves in the region along the Dnieper Rapids and for centuries resisted Turkish and Polish attacks. By the end of the 18th century Russia, with the help of the Cossacks, defeated the Turks and Tatars and promptly crushed the Zaporozhian Sich. It annexed the territory and assigned it to New Russia gubernia (1797–1802) and then divided it between Katerynoslav gubernia and Tavriia gubernia. In the revolutionary period the territory was divided among many local otamans, including the most prominent of them, N. *Makhno, and witnessed much violence.

Population. According to the 1989 census, Ukrainians accounted for 63.1 percent of the oblast's population, Russians for 32 percent, Bulgarians for 1.7 percent, and Jews for 0.7 percent. The population density was 76.5 people per sq km. The highest density is in the industrialized northwestern part. About 76 percent of the population is urban. The largest cities are Zaporizhia, *Melitopil, and *Berdianske.

Industry. Almost 82 percent of the oblast's total output is produced by its industries. The major industries are machine building and metalworking (42.1 percent of the industrial output), ferrous and nonferrous metallurgy, food processing, and light industry. The largest machine-building and metalworking plants are Zaporizhia's transformer, automobile, and grinding-tools plants and Berdianske's road-building machine and cable plants. Zaporizhia is the chief center for metallurgy. The chemical and petrochemical industry, which is concentrated in Zaporizhia and Berdianske, produces polymers, petroleum grease, varnishes, and enamels. The main branches of light industry are sewing (Melitopil and Zaporizhia), footwear manufacturing (Zaporizhia, Berdianske, Vasylivka), and knitwear (Melitopil and Berdianske). The food industry processes oils and fats, flour, meat, fruit, and fish. Its main centers are Zaporizhia, Melitopil, Berdianske, Vasylivka, Tokmak, and Huliai Pole. The building-materials industry is concentrated in Zaporizhia, Polohy, Melitopil, Dniprorudne, Berdianske, and Tokmak.

Agriculture. In 1989 there were 276 collective farms and 109 state farms in the oblast. The total area of farmland was 2,243,000 ha, of which 86.7 percent was cultivated, 9 percent was pasture, and 2.2 percent was hayfield. A total of 273,000 ha were irrigated, mainly by the Kakhivka Reservoir. Over half of the sown area (51.8 percent) was devoted to grain crops (winter wheat, spring barley, and corn). The other main crops were industrial (11.6 percent), mostly sunflowers, fodder (32 percent), and melons, veg-

etables, and potatoes (4.6 percent). There are some large vineyards in the south. Truck farming is well developed in suburban regions. Animal husbandry accounts for 59.6 percent of the agricultural output. Its main branch is beef and dairy-cattle farming. Overfishing and pollution have put an end to fishing in the Sea of Azov.

Transportation. In 1989 there were 993 km of railroad track in the oblast, of which 287 km were electrified. The main railway junctions are Zaporizhia, Polohy, Melitopil, and Tokmak. The trunk lines that cross the oblast are Moscow–Symferopil, Volnovakha–Zaporizhia–Nykopil, and Zaporizhia–Berdianske. The highway network consisted of 6,700 km of road, of which 6,400 km were paved. The main highways are Moscow–Symferopil, Zaporizhia–Mariupol, and Zaporizhia–Berdianske. Zaporizhia is the main river port, and Berdianske the main sea port, of the oblast. Both cities have an airport.

Istoriia mist i sil URSR: Zaporiz'ka oblast' (Kiev 1970)

Zaporizhia Regional Studies Museum (Zaporizkyi kraieznavchyi muzei). A museum founded in Zaporizhia in 1920 as a historical museum, under the direction of Ya. Novytsky. From 1927 to 1929 it was called the Museum of the Revolution. The museum was devastated during the Second World War, but it was subsequently rebuilt, and opened as a regional studies museum in 1948. In 1979 it had nearly 70,000 exhibit items in its four divisions – natural sciences, archeology, prerevolutionary history, and Soviet history – including valuable objects from the Cossack period and materials pertaining to the construction of the Dnieper Dam. The museum oversees smaller museums in Husarka (Kuibyshev raion) and Polohy, and the state historical preserve on Khortytsia Island is a branch. A guidebook to the museum was published in 1972.

Zaporizhia Transformer Plant (Zaporizkyi transformatornyi zavod). A plant of the power industry, built in Zaporizhia in 1947–9. It produces over 600 products, particularly high-power transformers with a capacity of 100 kw to 1 million kw, transformer parts, and other machinery used to transmit electricity for domestic and industrial use.

Zaporizhia Ukrainian Drama Theater. See Lviv Ukrainian Drama Theater.

Zaporizhia Ukrainian Music and Drama Theater (Zaporizkyi ukrainskyi muzychno-dramatychnyi teatr). A theater established in 1929 as the Kiev Theater of Small Forms. In 1930 it was reorganized into the second Kiev Oblast Touring Theater. In 1932–41 it was in Zhytomyr, and since 1944 it has been in Zaporizhia. Its repertoire has consisted mostly of Soviet and world classics. Among its leading members have been V. Mahar, S. Smiiian, M. Ravytsky, M. Hrynko, Yu. Lishansky, A. Morozova, K. Parakoniev, A. Troshchanovsky, and Ye. Khutorna.

Zaporizhia University (Zaporizkyi universytet). The university was established in Zaporizhia in 1984 on the basis of the Zaporizhia Pedagogical Institute (founded in 1930). In 1985–6 it had five faculties and 3,249 students, and in 1988 it had 4,510 students.

Zaporizhia Young Spectator's Theater (Zaporizkyi teatr yunoho hliadacha). A theater established in 1979 as an oblast touring theater. It has staged Ya. Stelmakh's *Pryvit, synychko* (Welcome, Titmouse) and K. Chukovsky's *Mukha-tsokotukha* (The Chatterbox Fly).

Molten pig iron being poured into an oven at the Zaporizhstal mill

Zaporizhstal (from *zaporizhska stal* 'Zaporizhia steel'). One of the largest steel plants in Ukraine. It was built in Zaporizhia in 1930–3. By the Second World War the plant had 4 blast and 10 Martin furnaces in operation. The machinery was evacuated at the outset of the war, and the plant was rebuilt in 1944–7. Since then it has been considerably expanded and modernized. The factory produces cold and hot rolled and sheet steel, iron slabbing and castings, and various specialized metal products. It was the first plant in the USSR to practice continuous steel-pouring. In the 1970s the plant employed over 7,000 workers. It is the source of much air pollution.

Zaporizka Sich. A military unit of the Army of the UNR organized in November 1918 in Katerynoslav. Its initial cadres came from the Railway Guard Corps. In April 1919 it was reorganized into the Second Sich Division. It was commanded by Otaman Yu. Bozhko. Its top combat strength was 1,200 soldiers. The division suffered heavy losses during 1919. Some of the survivors took part in the First Winter Campaign (1919–20) in the ranks of the Volhynian Division.

Zaporozhchenko, Ivan [Zaporožčenko], b 24 February 1872 in Artiukhivka, Romen county, Poltava gubernia, d 11 March 1932 in Olava, Romen raion, now in Sumy oblast. Kobzar. After being blinded at the age of six, he learned to play the bandura and then wandered through Ukraine, the Crimea, and the Kuban. He supported the revolutionary movement in the early 1900s and disseminated revolutionary literature. He composed approx 60 songs about the 1905 Revolution, the First World War, and the 1917 Revolution.

Participants in the celebration of Zaporozhe's centenary in Vienna in 1961

Zaporozhe. The oldest Ukrainian student fraternity, active in Chernivtsi in 1906–40. The group was founded by Ukrainian students who were active in non-Ukrainian (German, Rumanian) fraternities but desired one of their own. Fencing was initially the focal point, but over the years Zaporozhe sponsored an active cultural and social program that included a choir, a traveling drama ensemble, dance classes and social evenings, and community activity (particularly in organizing co-operatives, reading societies, and *Sich societies in villages in Bukovyna). The group also provided the impetus for the formation of a popular local Ukrainian sports club, *Dovbush. Zaporozhe fraternities were also formed in Lviv, Warsaw, Danzig (now Gdańsk), Prague, and Vienna. In 1931 they all met in Stanyslaviv (Ivano-Frankivske) for a conference that established a co-ordinating body for the fraternities. The group was banned in 1925 after an incident with a Rumanian school inspector at a Ukrainian concert, but it was reconstituted in 1928 after a nominal name change from academic society (*tovarystvo*) to Cossack fellows (*kozats'tvo*). In 1937, activities sponsored by Zaporozhe were prohibited after another incident involving fraternity members and the Rumanian authorities. Zaporozhe was liquidated after the Soviet occupation of Bukovyna in 1940 but was re-established by former members in the West after the war.

Zaporozhets, Oleksander [Zaporožec'], b 12 November 1905 in Kiev, d 1981 in Moscow. Psychologist; full member of the USSR Academy of Pedagogical Sciences (APN) from 1968. In 1922–3 he studied acting in Kiev and appeared in four Berezil productions. He graduated from Moscow University (1930), worked at the Ukrainian Psychoneurological Institute in Kharkiv, and held the chair of psychology at the Kharkiv Pedagogical Institute (1933–41). After the Second World War he directed the laboratory of preschool-child psychology at the APN Institute of Psychology in Moscow, and in 1960 he became director of the APN Institute of Preschool Education in Moscow. His doctoral dissertation (1958) on the development of voluntary movements was published in 1960. He wrote many pioneering works on child psychology (on the development of perception, reasoning, and the psyche and on the

Oleksander Zaporozhets

origin and nature of emotions), motor functions, and preschool education, including a psychology textbook for preschool teachers (1953, 1955, 1961, 1965) that was translated from Russian into Ukrainian (1961), Czech (1954), Bulgarian (1954), Polish (1954), Latvian (1955), Slovak (1958), and Lithuanian (1969). Some of his studies appeared in English. A two-volume posthumous edition of his works was published in Moscow in 1986; it includes a bibliography of his works and his reminiscences about L. Kurbas.

The right and left sides of the flag of the 2nd Infantry Regiment of the Zaporozhian Corps

Zaporozhian Corps. One of the regular formations of the *Army of the Ukrainian National Republic in 1918–20. It varied in strength, from 3,000 to 15,000, and structure, from a detachment to a brigade, division, corps, and group.

At first the unit was known as the Separate Zaporozhian Detachment, which was formed on 9 February 1918 out of several small military entities. It consisted of two infantry and one cavalry battalion, an artillery company, and support units and was commanded by Brig Gen K. Prisovsky. The detachment took part in the first phase of the Ukrainian-Soviet War.

In March–April 1918 it was expanded into a brigade and a separate division, both under Brig Gen O. Natiiv. The division consisted of four infantry regiments (under Cols O. Zahrodsky, P. Bolbochan, O. Shapoval, V. Sikevych) as well as cavalry (Col V. Petriv), engineering (Col O. Kozma), artillery (Col O. Parfeniv), mobile artillery (Col O. Almazov), armored-car (Capt O. Boldyryv), and aviation (Col M. Baraniv) regiments. With the support of German troops it cleared Left-Bank Ukraine, the Donets region, and the Crimea of Bolshevik forces, and then in June–November 1919 guarded the Ukrainian-Russian border. In the anti-Hetman revolt the division threw its support behind the UNR Directory.

In November–December 1918 the division was reorga-

nized into a two-division corps under the command of P. *Bolbochan, who was also the commander of the anti-Bolshevik front in Left-Bank Ukraine. The division commanders were O. Zahrodsky and V. Osmolovsky. After intense fighting against Soviet forces the corps was cut off from the UNR Army in April 1919 and had to cross Rumanian territory to reach Galicia and Volhynia. En route all its supplies were confiscated by the Rumanians. After O. Volokh's brief command, Col I. Dubovy conducted the retreat through Rumania. In May 1919 the corps was restructured into the Zaporozhian Group, under Capt V. Salsky's, then Gen M. Omelianovych-Pavlenko's, command. It consisted of the Sixth Division (under O. Zahrodsky), the Seventh Division (V. Osmolovsky), and the Eighth Division (Col H. Bazylevsky).

Modified for partisan warfare, the group took part in the First Winter Campaign (1919–20). After the campaign it was redesignated the First Zaporozhian Rifle Division and placed under the command of Brig Gen A. Huly-Hulenko (replaced later by Brig Gen H. Bazylevsky). The chief of staff was Col M. Stefaniv. Its subordinate units included three infantry brigades (commanded by I. Dubovy, I. Lytvynenko, and I. Trotsky), an artillery brigade (Col S. Loshchenko), the Black Zaporozhian cavalry regiment (Col P. Diachenko), a technical battalion (Col M. Herasymiv), an officer school (Col Rymarenko-Lymarenko), and a reserve brigade (Col V. Osmolovsky). The division took part in all the battles of the UNR Army before it crossed the Zbruch River into Western Ukraine under Polish rule on 21 November 1920.

Zaporozhian Cossacks. See Cossacks, Zaporizhia, and Zaporozhian Sich.

Zaporozhian Host (Viisko Zaporizke). The name of the armed forces of the *Zaporizhia in the 16th to 18th centuries and the official name used by the Cossacks for the *Hetman state. B. Khmelnytsky's title of 'hetman of the Zaporozhian Host' signified that he was the head of state.

Zaporozhian Lowland. See Black Sea Lowland.

Zaporozhian Ridge (Zaporizka hriada). A narrow belt of crystalline rocks in the Dnieper channel that connects the Dnieper Upland with the Azov Upland.

Zaporozhian Sich (Zaporizka Sich). The name of several Cossack keeps on the Dnieper River that were the centers of the *Zaporizhia. The first Sich was established ca 1552 by Prince D. *Vyshnevetsky on Mala Khortytsia Island in the Dnieper River, near present-day Zaporizhia. It was besieged and destroyed by Crimean Tatars in 1558. The new *Tomakivka Sich was built 60 km to the south on a now-inundated island near present-day Marhanets. It was also razed by Tatars, in 1593, and a new Sich was built on Bazavluk Island, now also inundated, farther south near the mouths of the Chortomlyk and the Pidpilna

A Zaporozhian Cossack (19th-century lithograph)

rivers. A fourth Sich was built at nearby Mykytyn Rih, the site of present-day Nykopol; it is first mentioned in 1628 and was captured by Hetman B. Khmelnytsky in 1648. The *Chortomlyk Sich was also built nearby, at the mouth of the Chortomlyk, in 1652. It was destroyed by a Russian force on 25 May 1709, after Otaman K. Hordiienko and his Zaporozhian Host allied with Hetman I. Mazepa and Charles XII of Sweden against Peter I. The Zaporozhians then built a Sich at the mouth of the Kamianets River, but it was destroyed in 1711. Zaporozhian Cossacks who escaped from Russian persecution to lands controlled by the Crimean Khanate built the *Oleshky Sich on the lower Dnieper in 1711. In 1734 they returned to Russian-controlled Ukraine and built the *New Sich on the Pidpilna River. That last Sich was destroyed by a Russian army on 15–16 June 1775.

Coat of arms of the Zaporozhian Host (wood engraving from a 1622 edition of Kasiiian Sakovych's poems)

The naval flag of the Zaporozhian Host (18th century)

The Zaporozhian Sich (drawing by an unknown artist)

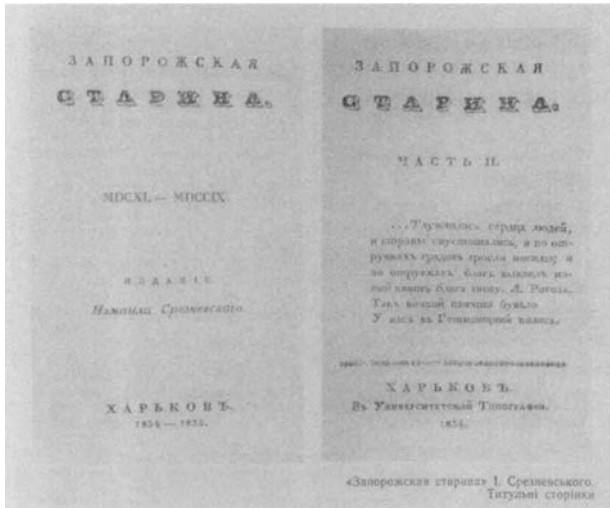

Five of the eight Siches, including the most historically important ones, were located on or near floodplains of the Dnieper. All of them were protected by ramparts topped by a palisade with towers and openings for cannons. Inside was a square bounded by the barracklike Cossacks' quarters (see *Kurin). A church, a school, officers' residences, and other administrative and military buildings stood in the middle of the square. The church and its clergy were under the authority of the archimandrite of Kiev's Mezhyhiria Transfiguration Monastery. The area in front of the church was the center of social and political life and the place where the Sich councils were held. A bazaar situated outside the ramparts attracted Zaporozhian traders and merchants from other parts of Ukraine, Poland, and Russia. The *kish*, or garrison, at the Sich numbered in the thousands, at times even tens of thousands.

Zaporozhskaia starina

Zaporozhskaia starina (Zaporozhian Antiquity). A folkloric journal published in Kharkiv from 1833 to 1838 (six issues altogether). Edited by I. *Sreznevsky, it contained historical songs, stories, dumas, and other materials on the history of the Cossacks. Although much of the material was apocryphal and several of the dumas forged, the journal stimulated interest in Ukrainian history and the Cossacks. According to its editor *Zaporozhskaia starina* was intended to demonstrate the importance of Ukrainian folk literature and its relationship to historical chronicles and legends. The journal was closely associated with the *Kharkiv Romantic School.

Zaporoz'ka dumka (Zaporozhian Thought). A semi-weekly paper published in 1921–3 by UNR Army soldiers held in the Polish internment camp at Wadowice.

Zapysky Chyna sv. Vasyliia Velykoho. See *Analecta Ordinis S. Basilii Magni/Zapysky ChSVV*.

Zapysky Fizychno-matematychnoho viddilu VUAN (Annals of the VUAN Physical-Mathematical Division). A scholarly serial (16 issues) published in Kiev in 1923–31. Edited by M. Krylov, P. Tutkovsky, O. Fomin, I. Shmalhauzen, and M. Kholodny, it contained articles on mathematics, physics, chemistry, and biology in Ukrainian, German, and French, and reported on international developments in these fields and on the work of the various VUAN institutes and commissions involved in theoretical and applied science.

Zapysky Istorychno-filolohichnoho viddilu VUAN (Annals of the Historical-Philological Division of the VUAN). A serial published irregularly in Kiev in 1919–31 (27 volumes in all) by the VUAN. The editors in chief were A. Krymsky and M. Hrushevsky. It contained articles and materials on the history of Ukraine up to 1917 and the history of Ukrainian culture, folklore, and ethnography, as well as on art, linguistics, literary scholarship, and Slavic

studies. It also contained official notices and minutes of the meetings of the historical-philological division, reports on the work of the historical section, bibliographic surveys, and book reviews. Separate volumes were devoted to the literary or scholarly contributions of T. Shevchenko, V. Antonovych, M. Sumtsov, M. Biliashivsky, D. Bahalii, and A. Krymsky. Volumes 6, 11, 17, 20, and 24 were published as *Pratsi Istorychnoi seksii VUAN*. With the purge of the academy in 1931, the *Zapysky* were discontinued.

Zapysky Naukovoho tovarystva im. Shevchenka (Annals of the Shevchenko Scientific Society [NTSh]). A scholarly journal of the NTSh, published from 1892 until the Second World War in Lviv. The first four issues, under the de facto editorship of O. Konysky, appeared irregularly until 1894. Under the editorship of M. *Hrushevsky (1895–1913; also one of the most prolific contributors), *Zapysky NTSh* became a prominent quarterly, then bi-monthly, publication, dealing with all areas of Ukrainian studies and publishing some works in other disciplines. Most of its articles dealt with history, philology, and ethnography, and its notable sections were the bibliographies, book reviews, and chronicles of scholarly affairs. A catalog of its first 20 volumes was published in Lviv in 1898. An index to the volumes (1892–1982) was prepared by M. Boiko in 1984.

Contributors to the *Zapysky* included the Western Ukrainian scholars and publicists B. Barvinsky, M. Vozniak, V. Herasymchuk, V. Hnatiuk, I. Dzhydzhora, M. Zubrytsky, O. and F. Kolessa, O. Konysky, M. Korduba, I. Krevetsky, I. Krypiakevych, Z. Kuzelia, S. Rudnytsky, I. Svientsitsky, I. Sozansky, K. Studynsky, S. Tomashivsky, I. Franko, and V. Shchurat, and the central Ukrainian scholars V. Peretts, O. Hrushevsky, V. Modzalevsky, O. Lototsky, S. Maslov, and V. Lypynsky.

After the First World War the publication was transformed into an irregular series of scholarly collections and monographs. In 1924 *Zapysky NTSh* was split into two separate subseries: works of the historical-philosophical section (ed. I. Krypiakevych) and works of the philological section (ed. K. Studynsky, Ya. Hordynsky, and V. Simovych). In the interwar period, in addition to the older scholars who began publishing works before the war, contributors included M. Andrusiak, A. Androkhovych, E. Borschak, I. Bryk, Ya. Hordynsky, I. Zilynsky, I. Ohienko, Ya. Pasternak, M. Tershakovych, and M. Chubaty. Until the onset of Stalinism a few Soviet Ukrainian scholars were also permitted to publish their works (eg. K. Hrushevskia and F. Savchenko).

In total 155 volumes of the *Zapysky* appeared in Lviv before 1939. After the Second World War the publication was renewed at first in Germany and then in other countries where the NTSh was established (the United States, Canada, Australia). Over 60 volumes have appeared, covering a wide range of topics. The renewed NTSh in Lviv (see *Shevchenko Scientific Society) took over the publication of *Zapysky NTSh* (from vol 221, ed O. Kupchynsky and M. Ilnytsky).

Zapysky Nizhens'koho instytutu narodnoi osvity (Annals of the Nizhen Institute of People's Education). A scholarly journal, 12 issues of which appeared in 1925–33. It contained articles on Ukrainian and world history, literature, and ethnography, written by V. *Riezanov, M.

Petrovsky, K. Shtepa, A. Yershov, and others. Some historical documents also appeared in the journal, as well as articles on scientific topics and pedagogy. Riezanov and Petrovsky were its editors. The journal was renamed *Zapysky Nizhens'koho instytutu sotsiial'noho vykhovannia* in 1932 and *Zbirnyk Nizhens'koho instytutu sotsiial'noho vykhovannia* in 1933.

Zapysky Sotsiial'no-ekonomichnoho viddilu VUAN (Annals of the Social-Economic Division of the VUAN). A scholarly serial published in Kiev in 1923–7 (altogether, six volumes in four books). It contained articles on Ukrainian economic history, on economic, legal, and social theory, and on contemporary economic developments. It also published biographies and obituaries of prominent Ukrainian economists (eg, M. Tuhan-Baranovsky, B. Kistiakovsky, V. Hordon, and I. Kamanin) and reviews of Western and Soviet works on economics, law, and sociology. Contributors included academics such as M. Vasylenko, M. Ptukha, Ye. Slutsky, B. Landau, F. Taranovsky, and A. Kryster. The editor was M. Vasylenko.

Zapysky Ukraïns'koho naukovooho tovarystva v Kyievi (Annals of the Ukrainian Scientific Society in Kiev, or ZNTK). An irregular publication of the *Ukrainian Scientific Society in Kiev, 18 volumes of which appeared between 1908 and 1918, most of them edited by M. *Hrushevsky. The journal contained articles in almost all areas of Ukrainian studies, especially history, literature, and linguistics. Among its many prominent contributors were V. Peretts, O. Levytsky, I. Kamanin, M. Vasylenko, M. Biliashivsky, M. Petrov, B. Buchynsky, M. and O. Hrushevsky, B. Hrinchenko, V. Modzalevsky, V. Dobrovolsky, V. Shcherbyna, and the Russians A. Shakhmatov and G. Ilinsky. In 1924 ZNTK was renewed as a subseries of **Zbirnyk Istorychno-filolohichnoho viddilu VUAN*, under the editorship of M. Hrushevsky and with the numeration continued. The collections **Za sto lit* also appeared as part of the series.

Zaremba, Volodyslav (Zareba, Władisław), b 27 June 1833 in Dunaivtsi, Ushytisia county, Podilia gubernia, d 24 October 1902 in Kiev. Composer, pianist, and pedagogue of Polish descent. He studied music with A. Kocipiński in Kamianets-Podilskyi and from 1862 taught piano and choral singing in girls' schools in Kiev. His works include *Muzyka do Kobzaria* (Music to the *Kobzar*), a collection of 30 songs to words by T. Shevchenko, and piano pieces based on Ukrainian folk songs.

Zaretsky, Viktor [Zarec'kyj], b 8 February 1925 in Bilopillia, Sumy okruha, d 23 August 1990 in Kiev. Painter. A graduate of the Kiev State Art Institute (1953), he taught there and worked as a graphic artist. He painted realistic genre canvases in the Donbas and in Chornobyl raion, such as *Flax Gathering* (1960) and *Girls* (1962). He collaborated with his late wife, A. *Horska, and other artists in creating large mosaics and mixed-media murals, such as *Prometheus*, *Earth*, and *Fire*, in Secondary School No. 47 in Donetske, *The Tree of Life* and *Dream-Bird*, in the Ukraina restaurant in Mariupol, and *The Flag of Victory*, in the Young Guard Museum in Krasnodon. For signing a public letter protesting against the political trials of Ukrainian artists and intellectuals in 1965–6 he was reprimanded by the Party and ostracized by the Union of Artists. In the

Viktor Zaretsky: *Green (The Future)* (oil, 1987–8)

1970s he abandoned socialist realism in favour of an art nouveau style. His favorite themes became women and nature. The threat of ecological disaster is expressed sharply in his paintings *Beauty Abandons the Earth*, *Sign of Calamity*, *Ozone Hole*, and *Atomic Winter*. His recent works include Klimtesque paintings, such as *Angels* (1988) and *Portrait of Liudmyla Kozachenko* (1987). A catalog of his works was published in 1991.

Zarevo (The Glow). An artists' group formed by graduates of the Cracow Academy of Fine Arts. It was active from 1933 to 1936 and organized annual exhibitions. The president was D. Ivantsev, and the members included Ye. Bozhyk, O. Vynnytsky, O. Kasarab, Yu. Kulchyt'sky, N. Kysilevsky, A. Nakonechny, and V. Prodan.

Zarevo Ukrainian Student Association. A Ukrainian student organization formed in 1949. Ideologically aligned with the OUN (Melnyk faction), this nationalist group promoted the concept of 'national solidarity' and published the newspaper *Rozbudova derzhavy*. An offshoot of its activity in the United States was **Smolokyp*, an activist group formed to address the human rights issue in Ukraine. The more prominent members of Zarevo have been M. Antonovych, P. Stercho, M. Plaviuk, A. Zhukovsky, B. Wymar, and P. Dorozhynsky.

Zarevych, Fedir [Zarevyč] (pseud: Yurko Vorona, Fedko Klepailo, F.Z., V., V.Yu., Yu.V.), b 30 September 1835 in Slavske, Stryi circle, d 12 January 1879 in Skole, Stryi county, Galicia. Writer and journalist. He began publishing in 1860 and edited the first Galician Ukrainian journal, **Vechnytsi* (1862–3), and the anti-Russophile newspaper **Rus'* (1867). He contributed political articles and nearly 20 stories (eg, 'Khlops'ka dytyna' [The Peasant Child]) and novellas (eg, 'Syn opryshka' [The Opryshok's Son], 'Zahubdush' [The Cutthroat]) on social themes to those periodicals and to *Meta*, *Nyva*, *Osnova*, *Pravda*, and *Rusalka*. He also wrote a drama, 'Bondarivna' (The Cooper's Daughter, 1872). As a publicist he championed the Ukrainian peasantry and criticized the Poles, the Russophiles, and Austrian policies. In 1872 he became a member of the executive board of the Prosvita society, and he served for

a year as director of the Ruska Besida Theater. As a cultural and political figure he followed in the footsteps of the Ruthenian Triad and was a precursor of I. Franko. An edition of his works was published in Lviv in 1901.

Zarichia [Zaričča]. The southwestern area of Polisia, situated within the triangle formed by Kovel, Brest, and Pynske. The region consists of treeless marshland (42 per cent), wetland forest (20 per cent), dry forest (24 per cent), and a small portion of dry arable land (14 per cent). Its marshy regions are located near the Prypiat, the forests in its western reaches, and its arable areas to the south. A number of smaller centers are found there (Ratne, Kamin-Koshyrskiy, Liubeshiv); no major cities are situated in the region.

Zarichne [Zarične]. II-7. A town smt (1990 pop 6,600) on the Styr River and a raion center in Rivne oblast. It is first mentioned in a historical document in 1480, as Pohost or Pohost Zarichnyi. In 1569 it was transferred from Lithuanian to Polish rule. After the partition of Poland in 1795, it was annexed by Russia and belonged to Pynske county in Minsk gubernia. In the interwar period Zarichne was occupied by Poland. In 1946 it was renamed Zarichne, and in 1959 it was granted smt status. Besides a small food industry it has a flax-processing plant and a lumber mill.

Yefrosyniia Zarnytska

Zarnytska, Yefrosyniia (Zinaida) [Zarnyc'ka, Jefrosynija Zinajida] (real surname: Azhuridi), b 16 February 1867 in Odessa, d 30 June 1936 in Pervomaiske, Mykolaiv oblast. Stage actress and singer (soprano). She completed musical school in Odessa (1886) and then acted in the troupes of M. Kropyvnytsky (1888–93), O. Suslov and O. Sukhodolsky (1894–8), Suslov again (1898–1909), and B. Orshanov (1909–14) and in the Petrograd Ukrainian Drama Theater (1919–24) and the Kharkiv Chervonozavodskiy Ukrainian Drama Theater (1927–30). As a singer she performed in ethnographical plays as well as in classical operettas.

Zarub. A fortified city of Kievan Rus' (11th–13th centuries) located near the present village of Zarubyntsi,

Pereiaslav-Khmelnytskyi raion, Kiev oblast. Built on the right bank of the Dnieper River opposite the mouth of the Trubizh River, it probably served as an important river crossing. It is mentioned in the chronicles under the years 1096, 1146, 1151, 1156, and 1223 in connection with campaigns against the Cumans. The site was excavated first in 1899 by V. Khvoika, who unearthed a burial site that gave its name to the *Zarubyntsi culture. Later excavations in 1948 undertaken by the AN URSS (now ANU) Institute of Archeology discovered the remains of two stone churches decorated with frescoes, mosaics, and tiles that belonged to the local monastery (11th–12th centuries).

Zarubin, Aleksandr, b ca 1881, d January 1920 in Rostov. Russian political figure. He was a leading member of the Russian Party of Socialist Revolutionaries in Ukraine, which he represented in the Central Rada in 1917. He was appointed minister of postal and telegraph services in the UNR by the Little Rada, and resigned in January 1918 following the declaration of independence of the UNR.

Zarubyn, Ivan, b 1835, d 1904. Surgeon. A graduate of Kharkiv University (1856), he completed his doctoral thesis (1861) and specialized abroad. He was a professor (from 1865) of theoretical surgery at Kharkiv University and organized a hospital clinic at the university, therapy and surgery clinics at the Alexandrian Hospital, and a hospital for the poor.

Zarubyntsi culture. An archeological culture of the mid-3rd century BC to early 2nd century AD which existed along the middle reaches of the Dnieper River and in areas along the Boh, Seim, and Tiasmyn rivers. It was named after a site excavated by V. *Khvoika in 1899. The people of this culture lived in (usually) fortified settlements in surface and semi-pit dwellings with hearths. They engaged in agriculture, animal husbandry, hunting, fishing, and craft production and traded with Black Sea centers. Cremation was the usual form of burial, with remains placed in urns and buried in shallow graves along with bronze adornments, glass jewelry, pottery, implements, and weapons. The culture maintained a patriarchal social order. Scholars regard these people as proto-Slavs. Major sites of the culture found in Ukraine include the Korchuvate burial site, Pylypenko's Hill, and the Sakhnivka settlements.

Zarudny [Zarudnyj]. A family line descending from Cossack *starshyna* holding posts in Myrhorod and Izium regiments. It was established in the mid-17th century by Fedir Zarudny. His son, Hryhorii Zarudny, was an osaul (1688–90) and judge (1690–1708) in Myrhorod regiment. Hryhorii's son, Ivan Zarudny (d 1748), was a captain of Izium regiment; his descendants were estate owners in Poltava and Kharkiv gubernias. The brother of Serhii *Zarudny, Mytrofan (b 1834, d 1883), was a lawyer who worked for the imperial Senate, the Ministry of Justice, and the Odessa court in the 1860s and wrote the legal guidebook *Zakon i zhizn'* (The Law and Life).

Zarudny, Ivan [Zarudnyj], b ?, d 1727 in St Petersburg. Architect and wood sculptor. He studied at the Kievan Mohyla College and worked as an architect for Hetman I. Mazepa in Baturyn. In 1690 Mazepa sent him to Moscow.

The Campanile Church of the Archangel Gabriel in Moscow designed by Ivan Zarudny

There Zarudny built Mazepa's home and the arch of triumph (1696) commemorating the Russian victory at Azov. He then studied abroad, and in 1701 he returned to Moscow, where he became the chief architect. He introduced various Ukrainian architectural forms and methods in Russian architecture. In Moscow he designed and supervised the building of the famous Campanile Church of the Archangel Gabriel (1704-7) commissioned by Count A. Menshikov, the Trinity Cathedral at the Zaikonospasskii Monastery, the Church of St John the Warrior, several other arches of triumph, a hospital (1706), and the building of the Holy Synod (1723). In 1707 the Holy Synod appointed Zarudny director of icon and all other painting in the Russian Empire. Zarudny himself designed several iconostases, including ones in the Transfiguration Cathedral in Tallinn (1719) and in the cathedral at the Peter and Paul Fortress in St Petersburg (1722-7).

Zarudny, Mykola [Zarudnyj], b 25 September 1859 in Hriakove, near Chutove, Poltava county, d 19 March 1919 in Tashkent. Zoologist and ornithologist. He undertook 17 research expeditions (from 1879) through Central Asia and Persia, and from 1906 he worked in Tashkent. He published numerous works in ornithology and some works in geography. His biography was written by N. Bobrynsky (1940).

Zarudny, Mykola [Zarudnyj], b 20 August 1921 in Orikhovets, Skvyra county, Kiev gubernia, d 25 August

1991 in Kiev. Socialist-realist novelist and popular dramatist. He is the author of the novels *Moi zemliaky* (My Countrymen, 1950), *Na bilomu sviti* (In the Wide World, 1967), *Uran* (Uranium, 1970), and *Hileia* (1973) and of over 20 plays, notably *Veselka* (The Rainbow, 1958), *Mertvyi boh* (The Dead God, 1960), *Dorohy, iaki my vybyraemo* (Roads We Choose, 1971), *Pora zhovtoho lystia* (The Time of Yellow Leaves, 1972), *Pid vysokymy zoriamy* (Under the High Stars, 1976), *Tyl* (The Rear, 1977), *Rehion* (The Region, 1981), *Bronzova vaza* (The Bronze Vase, 1985) and *Porom* (The Ferry, 1987). He was awarded the Shevchenko State Prize in 1978 for *Tyl*. A four-volume edition of his works (1981-2) and D. Shlapak's book about his dramaturgy (1981) were published in Kiev.

Zarudny, Oleksander [Zarudnyj], b 1891, d February 1918 in Kiev. Political and state figure. A leading member in the left wing of the Ukrainian Party of Socialist Revolutionaries, he was a representative to the Central Rada and a minister of land affairs in the UNR. He was shot by Bolsheviks engaged in reprisals after M. Muravev seized Kiev.

Zarudny, Serhii [Zarudnyj, Serhij], b 29 March 1821 in Kharkiv gubernia, d 30 December 1887 near Nice, France. Legal scholar of Ukrainian descent, senator, and prominent jurist. After graduating in mathematics from Kharkiv University (1842) he took a position in the justice ministry in Moscow and, in 1849, became its chief consultant. He played a key role in the judicial reform of 1864, which liberalized the Russian legal system. He wrote a number of studies, including *Sudebnye ustavy s rassuzhdeniiami, na koikh oni osnovany* (Court Statutes with the Reasoning on Which They Are Based, 1866) and *Grazhdanskoe ulozhenie italianskogo korolevstva i russkie grazhdanskije zakony* (The Civil Code of the Italian Kingdom and Russian Civil Laws, 1870), and translated Beccaria and Dante.

Zarulsky, Stanislav [Zarul's'kyj], b and d ? Historian of Polish origin. He was a captain in the Russian army in the later 18th century. His *Opisanie o Maloi Rossii i Ukraine* (A Description of Little Russia and Ukraine), based largely on Polish and Russian sources, provided a short survey of Ukrainian history from antiquity until 1775, from a markedly conservative, pro-Russian, and monarchist point of view. It was published as part of the *Chteniia* of the Moscow University Historical Society (1848, no. 8).

Zarvanytsia [Zarvanycja]. IV-6. A village (1973 pop 650) on the Strypa River in Terebovlia raion, Ternopil oblast. It was first mentioned in a historical document in 1458. Its 13th-century icon of the Theotokos attracted many pilgrims. A Trypilian culture settlement of the 3rd millennium and two Scythian burials of the 7th and 6th centuries BC have been discovered in its vicinity.

Zarytska, Kateryna [Zaryc'ka], b 5 November 1914 in Kolomyia, Galicia, d 29 August 1986 in Lviv. Civic and nationalist leader; daughter of M. Zarytsky. She became a member of the OUN underground in 1930. In 1934, while a student of mathematics at the Lviv Polytechnical Institute, she was arrested by the Polish authorities for her involvement in the assassination of B. *Pieracki and sentenced at the Warsaw Trial to a four-year prison term. Shortly after

Kateryna Zarytska

Yevheniia Zarytska

her release in 1939, she married M. *Soroka. In 1940 she was again arrested, that time by the Soviet authorities, and imprisoned for her membership in the OUN. Having been released after the German occupation of Western Ukraine, she became the regional co-ordinator of the OUN women's section and head of the *Ukrainian Red Cross. She was arrested by the MGB in 1947 and sentenced to a 25-year term, which she served in Russian prisons (to 1968) in Verkhneuralsk and Vladimir and in a concentration camp in Mordovia. After her release in 1972 she lived in Ternopil oblast.

Sofiia Zarytska: *Loneliness* (oil, 1952)

Zarytska, Sofiia [Zaryc'ka, Sofija], b 21 August 1903 in Peremyshl, Galicia, d 17 April 1972 in Chennevières, France. Painter and graphic artist; cousin of Ye. *Zarytska. She studied art under O. Novakivsky in Lviv (1920–3) and at the Prague Academy of Arts (1924–8). After moving with her husband, P. *Omelchenko, to Paris she joined the Salon des Artistes Indépendants and displayed her works at its annual exhibitions and at exhibitions of the Salon d'Automne in Paris and the Association of Independent Ukrainian Artists in Lviv. After the Second World War her work was shown at group exhibitions almost annually in Paris and the United States. Emphasizing line rather than color, she expressed herself in oil, tempera, and monotype. The main themes of her work were motherhood, childhood, and female friendship. Representative of her work are paintings such as *Woman and Girls* (1950) and monotypes such as *Girl's Head* (1950) and *Two Girls* (1954). Zarytska, together with many of her and Omelchenko's works, perished in a house fire.

Zarytska, Yevheniia [Zaryc'ka, Jevhenija] (Zareska, Eugenia), b 9 November 1910 in Rava Ruska, Galicia, d 5 October 1979 in Malmaison, near Paris. Opera and concert singer (mezzo-soprano). She studied under A. Didur at the Lviv Conservatory and made her debut at the Lviv Opera (1937) as Leonora in G. Donizetti's *La Favorita*. She also studied in Vienna, where she won first prize in the International Festival of Song (1938), and from 1939 she lived in Italy, where she performed at La Scala as Dora-bella in W. Mozart's *Così fan tutte* and appeared in Italian feature films. She sang throughout Europe and North America, under the conductors P. Hindemith, I. Stravinsky, W. Furtwängler, E. Ormandy, and C. Guilini. Her operatic repertoire consisted of over 30 roles, including the Countess in Tchaikovsky's *The Queen of Spades*, the name-part in G. Bizet's *Carmen*, Margaret in A. Berg's *Wozzeck*, and Martha in M. Mussorgsky's *Khovantchina*.

Zarytska recorded for many international labels. She sang the role of Marina in the award-winning HMV recording of M. Mussorgsky's *Boris Godunov*. Her album of Ukrainian songs, titled *Chants d'Ukraine* (issued in 1956 by Paris Columbia), includes works by M. Lysenko, K. Ste-tsenko, M. Verykivsky, L. Revutsky, B. Kudryk, V. Barvin-sky, N. Nyzhankivsky, V. Baltarovych, and M. Kolessa.

Zarytsky, Ivan [Zaryc'kyj], b 24 January 1929 in Hlo-byne, Kremenchuk okruha. Glass artist. After graduating from the Kiev School of Applied Art (1948) and the Lviv Institute of Applied and Decorative Arts (1954) he worked at the Kiev Artistic Glass Plant. His works include plates, vases, table sets (*Wedding Set* [1975] and *Spring Set* [1977]) and glass sculptures, such as *Odarka* and *Karas* (1965).

Zarytsky, Myron [Zaryc'kyj], b 23 May 1889 in Mohyl-nytsia, Terebovlia county, Galicia, d 19 August 1961 in Lviv. Mathematician. After completing his studies at Vi-enna (1907) and Lviv (1912) universities, he worked as a gymnasium teacher in Galicia and then lectured at Lviv (1939–50) and Uzhhorod (1950–5) universities. He made contributions to set theory, mathematical logic, the theory of probability, and function theory.

Zasenko, Oleksii, b 4 October 1907 in Liubartsi, Pe-reiaslav county, Poltava gubernia. Literary scholar. He

graduated from Kiev University in 1934. After the Second World War he was director and chief editor of the Radianskyi Pysmennyk publishing house and a department head at the Derzhlitvydav publishing house. The deputy director of the AN URSR (now ANU) Institute of Literature from 1950 to 1973, he also taught at the Kiev Pedagogical Institute. In 1963 he became a doctor of philological sciences. Among his works are a book of critical essays (1962) and monographs on M. Vovchok and foreign literature (1958), Vovchok's life and works (1964), O. Makovei (1968), and M. Cheremshyna (1974). In 1983 he published a book of memoirs about his contemporaries.

Zasiadko, Oleksander [Zasjadko], b 1779 in Lutenka, near Hadiach, in the Poltava region, d 8 June 1837 in Kharkiv. Inventor and innovator, rocketry expert, military engineer and major-general. He studied at a military academy and served as an artillery officer in the Russian army. Zasiadko was one of the first persons in Europe to see the value of rockets in combat. In 1815, on his own initiative, he started to experiment with gunpowder-propelled rockets and developed many types of combat and signaling rockets and mobile rocket launchers, including the first multiple-rocket launcher. His rockets were used successfully in 1825 in the Caucasus; after they were accepted for use by the Russian army, they were mass-produced in St Petersburg. Zasiadko was appointed director of an artillery school and a rocketry factory and received other important positions. In 1827 he was put in command of the artillery forces of the Russian army. During the Russo-Turkish War of 1828–9 his rockets were used to break the sieges of Varna and other Turkish cities. Zasiadko's inventions had a profound influence on the further development of military rocketry. A crater on the back side of the Moon is named after him.

L. Onyshkevych

Zasiv (Sowing Time). A weekly newspaper published in Kiev in 1911–12 (a total of 65 issues). It was the continuation of *Selo and had the same basic orientation and major contributors. A popular publication intended for peasants and workers, it reported primarily on developments in the Ukrainian countryside and on the growth of the Ukrainian national movement. *Zasiv* was initiated and edited in 1911 by M. Hrushevsky; in 1912 the paper was published by O. Stepanenko and edited by him, O. Oles, and Yu. Tyshchenko (Siry). The tsarist authorities confiscated issues and frequently imposed fines, and thereby forced the paper to go bankrupt.

Zaskalna archeological site. A multi-occupational Paleolithic site near Bilohirsk, Crimea. Excavations in 1969–78 produced numerous flint tools and weapons and wild animal bones. The site is best known for the discovery of a Neanderthal burial and the recovery of fragments of a Neanderthal skull.

Zaslav. See Iziaslav.

Zaslavsky, David [Zaslavskij], b 13 January 1880 in Kiev, d 28 March 1965 in Moscow. Journalist of Jewish origin. A graduate of Kiev University (1908), he contributed feuilletons and articles to Russian and Yiddish periodicals from 1904. In 1903 he joined the Jewish Workers' Bund

and became involved in Jewish socialist politics in Kiev. Zaslavsky published one of the first Soviet biographies of M. Drahomanov (1924). His second book on Drahomanov (1934) was Stalinist in approach; it viciously maligned him and the entire Ukrainian national movement, including the national Communists. A third book on Drahomanov (1964), cowritten in Ukrainian with I. Romanchenko, was more liberal in tone and interpretation. From 1926 Zaslavsky was a staff writer for *Izvestiia* and *Pravda* and lived in Moscow. His memoirs and several collections of his Stalinist, anti-Zionist, and anti-Israel writings were published posthumously in Moscow.

Zaslavsky, Evgenii [Zaslavskij], b 1 January 1845 in Voronezh, d 25 June 1878 in St Petersburg, Russian revolutionary. He was a student activist in Moscow and St Petersburg, and in the early 1870s he worked in Poltava gubernia, where he spread revolutionary propaganda among the peasants. In 1872 he moved to Odessa, where he founded a workers' library and a printery (1874), spread revolutionary propaganda, and did clandestine educational work among the workers. In May 1875 he founded and led the anarcho-socialist *South Russian Union of Workers. In May 1877, after being arrested in December 1875, he was sentenced to 10 years of hard labor. He died of tuberculosis in a prison hospital. Yu. Bocharov's book about him was published in Moscow in 1926.

Zaslavsky, Mykhailo [Zaslavskij], b 25 January 1925 in Zvenyhorodka now in Cherkasy oblast, d 24 July 1976 in Lviv. Ballet master. He completed study in the ballet studio of the Moscow State Theater Institute (1955) and then worked as principal ballet master in the Ulan-Ude Musical Theater Mongolia and the Lviv Theater of Opera and Ballet (1962–76).

Zasławski. A family line of Ukrainian nobles that had a common origin with the *Ostrozky family in the person of Vasyl Fedorovych (d 1461). His older son, Yurii (Heorhii), inherited the town of Zaslav (also Iziaslav), in Volhynia, and adopted the name Zasławski; his younger son, Ivan, inherited the town of Ostrih. The Zasławski family owned large tracts of land in Volhynia, Podilia, and Bratslav. Other notable family figures included Janusz Zasławski, the voivode of Podlachia (1591) and Volhynia (1604, 1620), his son Oleksander (d 1629), who was a Volhynian palatine (1605) and a voivode of Bratslav (from 1615) and Kiev (from 1628); and Oleksander's son, Władysław-Dominik *Zasławski. The family line died out with Władysław-Dominik's son, Oleksander, in 1673, and its fortunes went to the Lubomirski family.

Zasławski, Władysław-Dominik, b ca 1617–18, d 5 April 1656 in Stare Selo near Lviv. Polish magnate. A major landowner in Volhynia, he occupied army positions from 1636 and was voivode of Sandomierz (from 1645) and Cracow (from 1649). He was one of three commanders designated to lead Polish forces against B. Khmelnytsky's Cossack forces in 1648. His ineptitude and indolence (Khmelnytsky referred to him derisively as *peryna*, or the 'feather-bed') helped bring about the Polish army's crushing defeat at Pyliavtsi in 1648.

Zastavna. v-6. A city (1989 pop 8,300) and raion center in Chernivtsi oblast. It was first mentioned in a historical document in 1583. Until 1774 it was part of the Moldavian principality, and later, of the Austrian Empire and Rumania (1918–40). Under the Soviet regime it was granted city status (1940). Its main industries are food processing and communications. Three 12th- to 13th-century Rus' settlements have been uncovered in the town.

Zastyrets, Yosyp [Zastyrec', Josyp], b 15 August 1873 in Koniushkiv, Brody county, Galicia, d 15 January 1943 in Lviv. Greek Catholic priest, educator, and writer. After graduating from Lviv University (1899) he taught at gymnasiums in Berezhany, Lviv, Buchach, and Ternopil. During the First World War he completed a doctoral thesis on the Crimean War at Vienna University and conducted teachers' courses for Galician and Bukovynian students in Vienna. In 1917 he returned to Lviv, where he taught at the Ukrainian Academic Gymnasium (until 1933) and edited the daily *Nova rada* (1919–20). He wrote short stories, humorous sketches, and articles on historical, educational, and theological issues.

Zatenatsky, Yakiv [Zatenac'kyj, Jakiv], b 6 November 1902 in Velyka Kokhnyvka (now part of Kremenchuk), Poltava gubernia, d 27 May 1976 in Kiev. Art historian. In 1931 he graduated from the Artem Communist University in Kharkiv. He wrote books on the artists M. Pymonenko (1955) and T. Shevchenko (1961) and on Shevchenko and Russian art (1964), Soviet Ukrainian painting (1961), and Ukrainian art in the first half of the 19th century (1965). He also contributed to the fullest edition of Shevchenko's artistic legacy (4 vols, 1961–4) and was a member of the editorial board of the AN URSSR (now ANU) history of Ukrainian art (6 vols, 1966–70).

Zatkovich, Gregory Ignatius. See Zhatkovych, Hryhorii.

Zatonsky, Dmytro [Zatons'kyj], b 2 July 1922 in Odessa. Literary scholar; corresponding member from 1969 and full member since 1990 of the AN URSSR (now ANU); the son of V. *Zatonsky. He graduated from Kiev University (1950), and taught there from 1956 to 1961. He has worked at the Department of the Literature of Western Europe and America of the Institute of Literature of the ANU (1961–74, director since 1986) and was an associate of the Institute of World Literature in Moscow (1974–5). A leading Soviet specialist on 20th-century Western (especially German) literature, he has written many articles; Russian monographs on F. Kafka and the problems of modernism (1965), the art of the novel and the 20th century (1973), and 19th-century European (French) realism (1984); four collections of theoretical essays in Russian; and four collections in Ukrainian, *U poshukakh sensu buttia* (In Search of the Meaning of Existence, 1967), *Pro modernizm i modernistiv* (On Modernism and Modernists, 1972), *Shliakh cherez xx stolittia* (The Path through the 20th Century, 1978), and *Mynule, suchasne, maibutnie* (The Past, Present, and Future, 1982). Some of his works were translated into German and published in East Germany.

Zatonsky, Volodymyr [Zatons'kyj], b 8 August 1888 in Lysets, Nova Ushytsia county, Podilia gubernia, d 29 July

Volodymyr Zatonsky

Hanna Zatyrykevych-Karpynska

1938. Ukrainian Bolshevik leader; VUAN and AN URSSR (now ANU) full member from 1929. A graduate of Kiev University (1912), he taught physics at the Kiev Polytechnical Institute. He joined the Bolsheviks in early 1917 and by May was a Presidium member of the Kiev Party Committee and a deputy to the Kiev Council of Workers' Deputies. After the Bolshevik coup in Petrograd he headed the Bolshevik committee and organized an uprising in Kiev. He was secretary of education in the first Bolshevik government in Ukraine (December 1917 to April 1918), and in January 1918 he was appointed its plenipotentiary in Moscow. From late March to mid-April 1918 he also headed the Bolshevik Central Executive Committee in Ukraine. He played a key role in the creation of the CP(B)U at the *Tahanrih Bolshevik Conference and was elected to the CP(B)U Organizational Bureau. From November 1918 he was a member of the *Provisional Workers' and Peasants' Government of Ukraine (in which he supported the Russian-Ukrainian federalist position), and from December 1920, people's commissar of education. From July to September 1920 he also headed the *Galician Revolutionary Committee in Ternopil.

After the consolidation of Soviet rule Zatonsky was a CC CP(B)U member (1918–27, 1934–7) and a candidate (1923–4) and member (1924–37) of its Politburo. He headed the *All-Ukrainian Association of Consumer Co-operative Organizations (1921–2), the People's Commissariat of Education (1922–3), and the political administration of the Ukrainian Military District (1924–5). He replaced O. *Shumsky as editor of *Chervonyi shliakh* (1926–30) and served as deputy chairman of the Council of People's Commissars and director of the government's Institute of Soviet Construction (1927–33), and chairman of the government's Chemical Engineering Committee (1928–34). In 1933 he replaced M. *Skrypnyk as the people's commissar of education, and in 1934 he became a candidate to the CC of the All-Union Communist Party (Bolshevik). Although Zatonsky did not belong to any national 'deviation' in the CP(B)U and toed the Party line, he gave qualified support to Ukrainization. He wrote a book on the national problem in Ukraine (1926; 2nd edn 1927) and valuable memoirs about the revolutionary period (1929). A collection of his speeches on education was published in 1935. He was arrested by the NKVD together with his wife in November 1937 and later executed.

Zatula, Dmytro, b 11 February 1923 in Baba *khutir*, near Bulatselivka (now Shevchenkove), Zmiiv county, Kharkiv gubernia, d 10 June 1987. Microbiologist; corresponding member of the AN URSR (now ANU) from 1973. A graduate of Kharkiv University (1952), he worked at the Kiev Institute of Epidemiology, Microbiology, and Parasitology (1953–62), the ANU Institute of Microbiology and Virology (1970–7, from 1972 as director), and the ANU Institute for Problems of Oncology. Zatula mainly researched microbiological aspects of malignant tumors.

Zatulyviter, Volodymyr, b 1 March 1944 in Yabluchne, Velyka Pysarivka raion, Sumy oblast. Poet and translator. He graduated from the Sumy Pedagogical Institute (1966) and has worked as a German teacher and journalist. Since 1986 he has been an editor for the Dnipro publishing house. He is the author of the poetry collections *Teoriia kryla* (Theory of the Wing, 1973), *Teperishnii chas* (Present Time, 1977), which won an award, *Tektonichna zona* (Tectonic Zone, 1982), *Pam'iat hlyny* (Memory of Clay, 1984), *Zoriana rechovyna* (Stellar Matter, 1985), *Polotno* (Cloth, 1986), which also won an award, *Chuttia iedynoi rodyny* (Feeling of a Single Family, 1987), and *Pochatkova shkola* (Primary School, 1988).

Zatyркеvych, Mykhailo [Zatyркеvyč, Myxajlo], b 1831 in the Chernihiv region, d 1893. Historian and lawyer. He was a professor at the Nizhen Lyceum (1859–75), where he wrote *O vliianii bor'by mezhdū narodami i sosloviiami na obrazovanie stroia russkogo gosudarstva v domongol'skii period* (The Influence of the Struggle between Peoples and Estates on the Formation of the Russian State System in the Pre-Mongol Period, 1874).

Zatyркеvych-Karpynska, Hanna [Zatyркеvyč-Karpyns'ka] (née Kovtunenka), b 20 February 1855 in Sribne, Pryluka county, Poltava gubernia, d 12 September 1921 in Romen, Sumy county, Kharkiv gubernia. Theater actress. She made her professional debut in M. Kropyvnytsky's troupe in 1883. She worked in M. Starytsky's (1883–5), Kropyvnytsky's (1885–92 and 1896–8), and M. Sadovsky's (1892–6) troupes, as well as in (from 1904) those of D. Haidamaka, O. Suslov, and O. Sukhodolsky; then in Sadovsky's Theater (1917–18) and the State People's Theater (1918–19); and, during her last year, in O. Korolchuk's troupes. An actress of great insight and simplicity, she performed in over 100 roles, the best of which were from the populist-ethnographic repertoire. Among them were Ahrafena in H. Kvitka-Osnovianenko's *Shel'menko-denshchik* (Shelmenko the Orderly), Stekha in T. Shevchenko's *Nazar Stodolia*, and Hapka and Ryndychka in M. Kropyvnytsky's *Zaidyholova* (The Dreamer) and *Po revizii* (After the Inspection). In the non-Ukrainian repertoire she successfully played the character roles of Poshlepkina in N. Gogol's *Revizor* (The Inspector General) and Dulska in G. Zapolska's *Moralność pani Dulskiej* (Madame Dulska's Moral Code). Biographies of Zatyркеvych-Karpynska were published in Kiev in 1956 and 1966.

V. Revutsky

Zauze, Volodymyr (Vladimir), b 18 May 1859 in St Petersburg, d 26 June 1939 in Odessa. Painter and graphic artist. A graduate of the Stroganov School in Moscow (1879), he worked for a while in Dubno and Mykolaiv. In

Volodymyr Zauze: *In the Village* (1916)

1885 he settled in Odessa, where he joined the *Society of South Russian Artists in 1893 and cofounded the *Kostandi Society of Artists in 1922. From 1920 he taught at the Odessa Art Institute. At the beginning of his career he painted mostly watercolor landscapes, such as *First Snow* (1851), *Birch Forest* (1897), and *Autumn* (1897). In the early 20th century he began creating etchings and aquatints depicting landscapes, still lifes, and genre scenes, such as *Noon: Falling Shadows* (1904), *In the Village* (1916), *Woman Feeding Chickens* (1918), *Woods: Tree above a River* (1923), *Chumaks* (1929), *Geese* (1931), *Winter in Ukraine* (1935), and *River* (1936), and line engravings and monotypes, such as *Guarding Soviet Borders* (1931) and *Barricades: 1905* (1925). Ye. Davydova's book about Zauze was published in Kiev in 1966.

Zavadovsky [Zavadovs'kyj]. A family line of Ukrainian nobility and Cossack officers from the Chernihiv region. Yakiv Zavadovsky was a member of I. Samoilovych's court and a judge (1703–5) and acting colonel (1693, 1703–4) in Starodub regiment. His son, Vasyl, and his grandson, Vasyl, took part in the Polish and Turkish campaigns of the 1730s and were fellows of the standard; the latter Vasyl's sons became counts. One of them, Petro *Zavadovsky, was a noted imperial Russian government official; another, Yakiv Zavadovsky, was the last colonel of Starodub regiment (1778–82) and governor of Novhorod-Siverskyi (1794).

Zavadovsky, Ivan [Zavadovs'kyj], b and d ? Kiev goldsmith. In 1747 he and P. *Volokh carved the silver Royal Gates for the iconostasis of the St Sophia Cathedral from a copper model by S. Taranovsky.

Zavadovsky, Ivan [Zavadovs'kyj], b 16 January 1887 in Galicia, d 21 April 1932 in Dnipropetrovske. Linguist and pedagogue. A graduate of Vienna University (1915), he taught Greek and Latin in gymnasiums in Yavoriv and Lviv in Galicia and Tarashcha in Kiev gubernia (1918–23). From 1923 he taught Ukrainian at the Dnipropetrovske In-

stitute of People's Education, where from 1928 he was a professor, dean of the language and literature faculty, and chairman of the Department of Ukrainian Linguistics. He wrote textbooks on the Ukrainian language (1927) and on the foundations of linguistics for students (1928) and teachers (1930; 2nd edn 1931, with L. Bulakhovsky).

Ivan Zavadovsky: *Pines* (tempera, 1974)

Zavadovsky, Ivan [Zavadovs'kyj], b 1937, d 1983 in Lviv. Painter. He graduated from the Lviv Institute of Applied and Decorative Arts in 1964. In the 1960s he experimented with surrealism (eg, *Composition with Donkey's Head*, 1966) and abstraction (*Laughter*, 1967). His later portraits, figural compositions, and landscapes were painted in an expressionistic manner (*Portrait of the Artist*, 1983).

Zavadovsky, Petro [Zavadovs'kyj], b 1739 in the Chernihiv region, d 22 January 1812 in St Petersburg. Ukrainian official in the imperial government, who descended from a Cossack *starshyna* family in the Starodub region. A graduate of the Kievian Mohyla Academy (1760), he was secretary of the Little Russian Collegium (1767) and later worked for the governor-general of Little Russia, P. Rumiantsev. In 1768–74 he was director of the secret chancellery and (according to one biographer) editor of the Treaty of *Küçük Kaynarca (1774). From 1774 he was secretary to and a favorite of Catherine II. He was given large estates in Ukraine and Belarus (his favorite being Lialychi, near the original family estate), and served as a senator, minister of education (1802–10), and honorary head of the State Council's Department of Laws (1810). He introduced a number of reforms, including the granting of autonomy to universities, and was instrumental in establishing Kharkiv University (1805) and a number of other educational institutions in Ukraine.

Zavadovsky, Yevstakhii [Zavadovs'kyj, Jevstaxij] (Zavadov), b and d ? Wood engraver of the second half of the 17th and the beginning of the 18th century. He worked in Kiev and Lviv, where he decorated and illustrated Psalters, 1677, 1697, 1703, 1708), Liturgicons (1681), an Octoechos (1686), a Gospel (1690), an Anthologion (1694), an *Apostol* (1696), and a daily prayer book (1701). His works include engravings of the evangelists Matthew (1681),

John (1683), and Luke (1744), the Crucifixion (1691), God on His Throne (1697), and Christ (1712). He signed his works with the initials EZ.

Roman Zavadovych

Ivan Zavalykut

Zavadovych, Roman [Zavadovyč] (pseud: Roman zi Slavnoi, Fortissimo, R. Rolianyuk, M. Mamorsky), b 18 December 1903 in Slavna, Zboriv county, Galicia, d 31 May 1985 in Chicago. Writer. He graduated from Lviv University (M PHIL, 1938). From 1920 on he contributed poems, stories, fairy tales, and plays for children to periodicals such as *Svit dytyny* and *Moloda Ukraina* in Lviv, *Mali druzi* in Lviv, Cracow, and Augsburg, *Sonechko* in Ellwangen, *Mii pryiatel'* in Winnipeg, and *Veselka* in Jersey City. He also contributed lyric poetry for adults to *Literaturno-naukovyi vistnyk*, *Dzvony*, and *Dazhboh* and articles to *Zyz* (1929–32). After being displaced by the Second World War he emigrated from a DP camp in Germany to the United States in 1949. He was active in the Ukrainian community in Chicago and regularly contributed articles on educational and cultural topics to the daily *Svoboda*. In 1953 he became the honorary president of the *Association of Ukrainian Writers for Young People, which he cofounded in 1947. In 1954 he became a coeditor of the children's magazine *Veselka*. Published separately were 33 of his children's books, among them *Pryhody Gnomyka Romtomtomyka* (Adventures of the Little Gnome Romtomtomyk, 1940, 1964), *Zymovi tsarivny* (Winter Princesses, 1942, 1956), *Charodiini muzyky* (Magic Musicians, 1942, 1970), *Khloptsi z zelenoho boru* (Boys from the Green Wood, 1948, 1973), *Perepolokh* (Fright, 1951), *Soika-shtukarka i inshi opovidannia* (The Trickster Jay and Other Stories, 1953), *Marushka-Chepurushka i Les' Pobihdes' ta inshi veseli opovidannia* (Marushka-Chepurushka and Les Pobihdes and Other Merry Stories, 1969), and *Karpats'kyi charivnyk* (The Carpathian Sorcerer, 1981). He also wrote a collection of religious poems, *Z budniv u sviato* (From Workdays into a Holy Day, 1978).

R. Senkus

Zavadsky, Edvald [Zavad's'kyj, Edval'd], b 2 June 1927 in Millerovo, Rostov oblast. Solid-state physicist; AN URSS (now ANU) corresponding member since 1978. A graduate of the Orsk Pedagogical Institute (1955), since 1966 he has worked at the ANU Physical-Technical Institute in Donetsk. There he has researched the effects of intense magnetic fields on phase transitions in magnetic materials.

Together with O. Halkin, Zavadsky showed that magnetic phase transitions are affected by pressure. He discovered the possibility of inducing new stable phases not attainable under normal conditions.

Zavadsky, Mykhailo [Zavads'kyj, Myxajlo] (Zawadzki, Michał), b 7 August 1828 in Mykhalkivtsi, Liatychiv county, Podilia gubernia, d 19 March 1887 in Mykhalkivtsi. Composer, pianist, and pedagogue of Polish descent. In 1862–3 he studied at Kiev University, and then he taught music in Kiev and Kamianets-Podilskyi. He wrote more than 500 pieces for piano, all of them based on Ukrainian folk themes. These included dumas, shumkas, Cossack marches, rhapsodies, and songs such as 'The Zaporozhian.' He also left an unfinished opera, *Maria*.

Zavadsky, Viktor [Zavads'kyj], b 23 October 1886 in the Poltava region, d 8 May 1973 in Toronto. Jurist. After graduating in law from Kiev University (1909) he worked as a judge in Omsk and then Kiev. During the revolutionary period he was a member of the Central Committee of the Ukrainian Party of Socialists-Federalists. Under the UNR Directory he headed the law department of the Ministry of Justice. He went into exile with the UNR government and in 1929 settled in Warsaw, where he received a judicial appointment. In 1944 he fled to Germany, and eventually he emigrated to Canada. In Ukraine and later in Canada he contributed articles to the Ukrainian press.

Zavaliv. A village (1973 pop 1,300) on the Zolota Lypa River in Berezhany raion, Ternopil oblast. It was first mentioned in historical records in the second half of the 15th century. The remains of a Basilian monastery and a fortress from the 16th century are found there. In August 1915 an Austrian division and the Ukrainian Sich Riflemen broke through the Russian front at Zavaliv.

Zavallia Graphite Complex (Zavallivskyi hrafitovyi kombinat). A graphite-processing complex built in 1931 in Zavallia, Kirovohrad oblast. Its first enrichment plant opened in 1934. The plant was rebuilt and expanded after the Second World War. Since 1958 the graphite ore has been mined in open pits. In 1977, 961,000 t of ore was processed, to produce 58,000 t of graphite.

Zavallia graphite deposit (Zavallivske rodovyshche hrafitu). The largest graphite deposit in Ukraine, located in the western part of Kirovohrad oblast. It was discovered in 1931 and has been mined since 1934. The graphite is found in crystalline veins up to 80 m wide in Precambrian gneisses. The deposit has reserves of approx 25 million t of graphite. The ore is processed at the Zavallia Graphite Complex.

Zavalykut, Ivan, b 1884 in Husiatyn county, Galicia, d 21 March 1975 in Syracuse, New York. Lawyer and civic and political leader. Upon graduating from Lviv University (1911) he practiced law in Husiatyn and then fought in the ranks of the Ukrainian Galician Army. He practiced law in Kopychyntsi, Kolomyia, and Stanyslaviv and played a leading role in local civic life. A candidate of the *Ukrainian National Democratic Alliance, he was elected to the Polish Sejm in 1928 and 1935. After emigrating to the United States in 1950, he was an active organizer for the Ukrainian Congress Committee of America.

Zavarov, Aleksei, b 17 March 1917 in Kolomenskoe, Moscow gubernia. Architect. A graduate of the Kiev State Art Institute (1948), he has worked for various architectural institutions in Kiev. He collaborated on the design and construction of Khreshchatyk Blvd (1949–50), the Green Theater, overlooking the Dnieper (1950), the building of the City Council (1953–6), the October Palace of Culture (1956), the pedestrian bridge over the Dnieper (1957), the Sports Palace (1960), and several residential subdivisions (1957–70).

Anna Zavarykhin

Zavarykhin, Anna [Zavaryxin] (née Indzhilova), b 23 January 1889 in Kishinev, d 11 July 1972 in Toronto. Ballerina. She completed choreography school in Petrograd (1916). In 1922–39 she performed as soloist in Constantinople, Bucharest, France, London (Covent Garden), the Far East, and Latin America. She was a founder of and teacher at the ballet studio Apollon in Toronto (1953–69).

Zavhorodnii, Anatolii [Zavhorodnij, Anatolij], b 28 December 1929 in Znamenka, Altai krai. Artist. He has painted oils, such as *Before the Hunt* (1961), and gouaches, such as the series 'Mykolaiv, Land of Ships' (1966–70), and designed the Victory Park monument in Mykolaiv (1965) and the stained-glass windows of the Palace of Happiness and department store in Mykolaiv (1965–6).

Zavisna, Olena (Zavysna, Mariana), b ?, d November 1654 in Busha, Podilia. During the siege of the fortified town of Busha by a large Polish expeditionary force she took over the command of the garrison after her husband, Mykhailo, was killed. When it was no longer possible to hold out, she set fire to the munitions stockpile and razed much of the town, thereby annihilating the last of the defenders and a large number of the enemy. She was later celebrated in works of historical fiction, notably in a novella and a play by M. Starytsky.

Zavitnevych, Vasyl [Zavitnevych, Vasyl'], b 24 April 1899 in Zamistia, Pryluka county, Poltava gubernia, d 25 March 1983 in New York City. Educator, lawyer, and musicologist. He worked as a teacher in Kiev from 1924 and studied law at the Kiev Institute of the National Economy (1924–5). He graduated from the Kiev Institute of People's Education (1929), worked as a legal consultant to the VUAN, and joined the VUAN Commission for the Study of

Vasyl Zavitnevych

Ukraine's Customary Law. In the 1930s he taught Ukrainian language and literature at postsecondary institutes in Kiev. He emigrated to the United States in 1948, where he served as president of the Scholarly Theological Institute (est 1952) of the Ukrainian Orthodox Church in the USA. He published two studies of Ukrainian customary law (1928), compiled nine volumes of Ukrainian liturgical choral music, and contributed articles to émigré periodicals, such as *Ukrains'ke pravoslavne slovo* and *Novi dni*. His archives are preserved at the Ukrainian Orthodox Museum in South Bound Brook, New Jersey.

Zavitnevych, Volodymyr [Zavitnevych], b 14 April 1853 in Litsviany, Minsk gubernia, Belarus, d February 1927. Historian and archeologist of Belarusian descent. He graduated from the St Petersburg Theological Academy (1879) and studied at the Warsaw Theological School (until 1883). He was a professor of Russian history at the Kiev Theological Academy (1884–1911), a member of the Historical Society of Nestor the Chronicler, and a contributor to *Trudy Kievskoi dukhovnoi akademii* (TKDA). In 1918 he sat on the Scientific Committee of the Ministry of Religions of the Ukrainian State. Zavitnevych conducted archeological excavations in Belarus and Polisia near the Prypiat River, as well as in the Kiev, Kharkiv, and Poltava regions. He wrote studies of the Princely era on the basis of his explorations, such as 'Vladimir Sviatoi kak politicheskii deiatel' (St Volodymyr as a Political Figure, TKDA, 1880; pub separately in 1890) and 'Proiskhozhdenie i pervonachalnaia istoriia imeni Rus' (The Origin and Primordial History of the Name Rus', TKDA, 1892). Among his other works are *Palinodiia Zakharii Kopystenskogo i ee mesto v istorii zapadno-russkoi polemiki XVI i XVII vv.* (Z. Kopystensky's *Palinodiia and Its Place in the History of Southern Russian [Ukrainian] Polemics in the 16th and 17th Centuries, 1883), *Religiozno-nravstvennoe sostoianie N.V. Gogolia v poslednie gody ego zhizni* (The Religious and Moral State of N. Gogol in the Last Years of His Life, 1902), and *Aleksei Stepanovich Khomiakov* (2 vols, 1902–3).

A. Zhukovsky

Zbanatsky, Yurii [Zbanac'kyj, Jurij], b 1 January 1914 in Borsukiv, now in Kozelets raion, Chernihiv oblast. Writer. During the Second World War he served as a partisan

commander and was decorated as a Hero of the Soviet Union. His first published work appeared in 1944. His novels, short stories, and documentary essays devoted to the war include *Taiemnytsia Sokolynoho boru* (The Secret of Sokolyne Forest, 1949), *Lisova krasunia* (The Forest Beauty, 1955), *Iedyna* (The Only One, 1959), and *My – ne z legendy* (We Are Not from a Legend, 1972). His novels *Malynovyi dzvin* (The Crimson Bell, 1958), *Kuiut' zozuli* (The Cuckoos Are Calling, 1975), *Lito v Sokolynomu* (A Summer in Sokolyne, 1953), *Pryvitaite mene druzi* (Greet Me, My Friends, 1956), *Kuriachyi boh* (The Chicken God, 1966), and others are written for young readers. His contemporary, mostly rural-set novels include *Peredzhnyv'ia* (Before the Harvest, 1955) and *Khvyli* (The Waves, 1967).

Zbaraski. A family of Ukrainian nobles in Volhynia that took their name from the town of Zbarazh. According to Polish heraldists the family was descended from Korybut, son of Algirdas, and had a common origin with the Nesvitsky family. Notable family members included Andrii Zbaraski, the founder of the line; his son, Stefan Zbaraski (d 1586), a voivode of Trakai; Andrii's grandson, Janusz *Zbaraski; and Janusz's son, Jerzy (Yurii) *Zbaraski. The Zbaraski line ended in 1631, and its assets were taken over by the Wiśniowiecki family.

Zbaraski, Janusz, b ?, d 1608. Polish military figure. He was voivode of Bratslav and a participant in numerous military campaigns, including a 1575 expedition which defeated a large Tatar force near Zbarazh, the siege of Pskov (1581), the suppression of the revolt led by S. Nalyvaiko (1594–6), and joint Polish-Swedish interventions against Muscovy in the early 17th century. In 1577 Zbaraski sent I. *Pidkova to his death at the hands of Stephen Báthory.

Zbaraski, Jerzy, b 1580, d 1631. Polish civic and military figure. He was castellan of Cracow and an authority on the Cossacks. His extensive correspondence, compiled by A. Sokolowski and published as *Listy ks. Jerzego Zbaraskiego, kasztelana krakowskiego z lat 1621–31* (1878), is a valuable source of information about the Cossacks.

Zbarazh [Zbaraž]. IV-6. A city (1989 pop 15,000) on the Hnizna River and a raion center in Ternopil oblast. It is first mentioned in the chronicles under the year 1211 as

An 18th-century church housing the Zbarazh Regional Studies Museum

the center of an appanage principality in the Principality of Galicia-Volhynia. From the 14th century it was under Polish rule. The fortress and town were destroyed by the Tatars in 1474 and 1598. Owned by J. Wiśniowiecki, the castle was captured by B. Khmelnytsky's forces in 1648 and besieged unsuccessfully in 1649. After the partition of Poland in 1772, Zbarazh was annexed by Austria, and served as a county center (1867–1918). In the interwar period it was under Polish rule. It was occupied by Soviet troops in 1939, and granted city status. Today it an agricultural center with a sugar refinery, winery, brick factory, foundry, and brewery. Its architectural monuments, including a fortress built by V. Scamozzi (1626–31), the Bernardine monastery (1627–30), and two 18th-century churches, are tourist attractions. The remains of a 15th-century fortress and the Transfiguration Church (1600) are found 3 km south of Zbarazh, in Staryi Zbarazh.

Zbihlei, Yosyf [Zbihlej, Josyf] (pseud: Yosyf Dubrova), b 13 March 1938 in Stebník (Stebnyk), Bardejov circle, Slovakia. Poet. He completed medical studies at the Prešov campus of Košice University (1962) and is a practicing physician. A leading 'modern' poet of the Prešov region, he has published poetry since 1955; he has written the collections *Zeleni neony* (Green Neons, 1964), *Vikna bez nizhnosti* (Windows without Tenderness, 1969), *Kosmichni vidlunnia* (Cosmic Echoes, 1980), *Zakruty* (Bends, 1983), *Tak, nespokii* (Yes, Disquietude, 1986), and *Oberezhno – sny!* (Careful, Dreams!, 1987).

Zbirnyk Filolohichnoi sektsii NTSh (Collection of the Philological Section of the Shevchenko Scientific Society). An irregular scholarly series, 23 volumes of which appeared in Lviv in 1899–1937. Since the Second World War another 11 volumes (as of 1984) have appeared in the West. The series consists of monographs and collections of articles on Ukrainian linguistics and the history of Ukrainian literature.

Zbirnyk Istorychno-filolohichnoho viddilu VUAN (Collection of the Historical-Philological Division of the VUAN). An irregular serial of research and documents from various fields of Ukrainian studies. In 1921–31 104 issues and 115 volumes were published, including research in the following areas: the history and historiography of Ukraine (D. Bahalii, M. Hrushevsky, T. Sushytsky, V. Shcherbyna, V. Danylevych, V. Kordt, V. Modzalevsky, P. Klymenko), literature (V. Naumenko, V. Riezanov, M. Markovsky, S. Yefremov, V. Peretts, Hrushevsky, V. Sypovsky, P. Lavrov, V. Petrov), languages (O. Kurylo, Ye. Tymchenko, V. Hantsov, P. Buzuk, V. Rozov), folklore and ethnography (K. Hrushevskia, E. Kagarov, K. Kvitka, M. Levchenko), education (F. Titov, O. Savych), art (H. Pavlutsky), and Oriental studies (A. Krymsky). Anniversary collections were dedicated to Bahalii, Hrushevsky, and Mykola Lysenko. The *Zbirnyk* ceased publication when the historical-philological division of the VUAN was abolished in 1931.

Zbirnyk Istorychno-filosofichnoi sektsii NTSh (Collection of the Historical-Philosophical Section of the NTSh). A series published irregularly by the Shevchenko Scientific Society (NTSh) in Lviv. It began to appear in 1898 at the initiative of M. *Hrushevsky. Altogether 16

volumes came out, 14 of them edited by Hrushevsky. Seven volumes and the first part of the eighth volume of Hrushevsky's *Istoriia Ukraïny-Rusy* (History of Ukraine-Rus') appeared in the series. The 5th volume of the series contained materials from the history of religious life in Galicia in the 18th and 19th centuries; the 15th volume contained B. Barvinsky's biography of Yu. Tselevych, the first head of the NTSh; and the 16th volume contained O. Novytsky's study of T. Shevchenko as a painter.

Zbirnyk Matematychno-pryrodopysno-likars'koi sektsii NTSh (Collection of the Mathematical-Natural Sciences-Medical Section of the Shevchenko Scientific Society). An irregular scholarly series, 32 volumes of which appeared in Lviv in 1897–1938. The series included monographs and collections of articles on scientific topics by a wide variety of scholars. Most of the volumes were edited by I. Verkhratsky, V. Levytsky, and Ye. Ozarkevych.

Zbirnyk Sotsiial'no-ekonomichnoho viddilu VUAN (Collection of the Social-Economic Division of the VUAN). A scholarly series, 37 volumes of which were published in Kiev in 1925–31. The series included several monographs, among them books by Y. Malynovsky (on the history of state institutions among the Slavs), M. Tuhani-Baranovsky (on political economy, esthetics, and philosophy), O. Baranovych (on the settlement of Volhynia in the 17th century), V. Rieznikov (a bibliography of works on Ukrainian demography), K. Vobly (a two-volume history of the sugar-beet industry in Ukraine), and L. Okinshyevych (on the institutions of the Hetman state). Several commissions of the academy published collected works and monographs in the series, including the Commission for the Study of the History of Western-Ruthenian and Ukrainian Law (7 vols, edited by M. Vasylenko), the Commission for the Study of Ukraine's Customary Law (3 vols, edited by A. Kryster and then Y. Malynovsky), the Commission for the Study of Financial Issues (5 vols, edited by L. Yasnopolsky), the Commission for the Study of the Economy of Ukraine (7 vols, edited by Vobly), and the Demographic Institute (1 vol, edited by M. Ptukha).

Zbiruisky, Dionysii [Zbirujs'kyj, Dionisij] (secular name: Dmytro Hrytskovych), b ?, d 18 November 1603. Bishop of Kholm in 1585–1603. He supported church union with Rome and participated in the 1596 sobor that culminated in the Church Union of *Berestia.

Zboriv. IV-6. A town (1989 pop 6,200) on the Strypa River and a raion center in Ternopil oblast. It was first mentioned in historical documents in the 15th century. In the 16th century it was owned by the Zborowski family of Polish magnates, and from 1624, by J. Sobieski. In 1648 its inhabitants revolted against the Poles, and in 1649 B. Khmelnytsky's Cossacks encircled the Polish army in Zboriv. The town was granted the rights of *Magdeburg law in 1689. At the partition of Poland in 1772, the town was annexed by Austria, and eventually it became a county center (1904). In the interwar period it was under Poland. Today it is an agricultural center with a fruit-processing plant and a brick factory. Its baroque church was built in the late 18th century.

Zboriv

Zboriv, Battle of. A victory scored by the armies of B. Khmelnytsky over Polish forces led by Jan II Casimir Vasa, near Zboriv, on the Strypa River, on 15–17 August 1649. After the invasion of Ukrainian territory by a Polish army in the spring of 1649, Khmelnytsky mobilized nearly 360,000 Cossacks. After Khmelnytsky's forces laid siege to Zbarazh, battle lines between Cossack and Polish troops were drawn near Zboriv. The Polish army escaped complete destruction because of the treachery of the Crimean Tatar khan, Islam-Girei III, who feared the rise of Cossack might and forced Khmelnytsky to halt military actions and sign the Treaty of *Zboriv.

Zboriv, Treaty of. A pact between B. Khmelnytsky and Poland, signed on 18 August 1649 near Zboriv. Besides Khmelnytsky, the Ukrainian side was represented by I. Vyhovsky, and the Polish side was represented by A. Kysil, J. Ossoliński, J. Radziwiłł, and W.-D. Zasławski. The central provisions of the pact were the Polish king's affirmation of all Cossack rights and freedoms; the increase of the Cossack register to 40,000, with the provision that peasants who participated in the war but were not accepted into the register were to return to the estates of their landlords (that provision engendered considerable disappointment and the flight of many peasants to Slobidska Ukraine); the transfer of Bratslav, Chernihiv, and Kiev voivodeships to the Cossack administration headed by Khmelnytsky; denial of access to those territories for Polish armies; and the filling of all official positions by

The last page of the Zboriv Cossack Register

Ukrainian Orthodox noblemen, who were elevated to equal status with Catholics. The question of the abolition of the church union, as well as the question of the return of all rights and assets of the Orthodox church, was to be submitted to the Polish Diet for debate. The Orthodox metropolitan of Kiev was to be granted a seat in the Polish Senate. In accordance with an agreement in the treaty the register of the entire Zaporozhian army was accepted by Jan II Casimir Vasa and written down on 16 October 1649. (The register was published in 1874 by O. Bodiansky in *Chtenia v Imperatorskom obshchestve istorii i drevnostei rossiiskikh*.) Although the Zboriv Treaty was ratified by the Diet in January 1650, Poland never complied with it.

A. Zhukovsky

Zborowski, Samuel, b ? , d 26 May 1584. Polish magnate. In 1582 he was sent by the king of Poland, Stephen Báthory, to the Zaporozhian Sich in order to seek Cossack aid for Polish forces fighting in the Livonian wars. The mission failed, and Zborowski fled the Sich in fear of his life.

Zbruch idol (Zbrutskyi idol). A stone statue of an ancient Slavic god (commonly believed to be Sviatovyt, the god of war) discovered in 1848 in the Zbruch River near Horodnytsia, Husiatyn raion, Ternopil oblast. Erected in the 9th or early 10th century, this statue was probably thrown into the river after the Christianization of Rus'. It is basically a tall square pillar standing on a small base (with a total height of approx 2.7 m). At the top of the structure are four facial images set in each cardinal direction and wearing a single noble-style Rus' hat. On the sides are three layers of images that illustrate mythological beliefs of the time: the heavens with the (Slavic) gods living in them; the Earth inhabited by people; and an underworld dominated by evil forces. Since 1851 the idol has been in the Cracow Archeological Museum. Full-size replicas of it can be seen in the Kiev and Moscow historical museums.

Zbruch River [Zbruč]. A left-bank tributary of the Dniester River that flows southward for 244 km along the border between Khmelnytskyi and Ternopil oblasts and drains a basin area of 3,395 sq km. The river is 5–10 m wide in its upper region and 15–20 m (with a 50-m maximum width) in its lower part and has an average depth of

The Zbruch River in Ternopil oblast

1.5–2 m. The river is notable for its meandering course. A water reservoir and small hydroelectric station are situated on it. The Zbruch formed part of the border between the Russian Empire and Galicia (then in the Austrian Empire) in 1772–1917 and then between the Ukrainian SSR and Poland in 1921–39.

Zbura, Ivan, b 1859 in Zvyniach, Chortkiv circle, Galicia, d 28 October 1940 in Edmonton. Pioneer. After emigrating to Canada in 1898, Zbura settled near Star, Alberta. In February 1899 his poem 'Kanadiis'ki emigranty' (Canadian Emigrants), commonly regarded as the first piece of Ukrainian verse written in Canada, was published in *Svoboda* (Jersey City).

Zderkovsky, Myroslav [Zderkovs'kyj], b 1865 in Bena, Pidhaitsi county, Galicia, d 30 January 1929 in Peremysliany, Galicia. Lawyer and civic activist. After serving as a judge for many years, he resigned and opened a law of-

The Zbruch idol

fice in Mostyska. Now free to pursue political interests, he was active in the National Democratic party. In 1918–19 he was a member of the Ukrainian National Rada, and subsequently he went into exile with the government of the Western Ukrainian National Republic. After returning to Galicia in 1921, he practiced law in Mostyska and then Peremysliany and was active in the Ukrainian National Democratic Alliance and civic organizations.

Zdolbuniv. III-7. A city (1989 pop 28,000) on the Ustia River and a raion center in Rivne oblast. It was first mentioned in a historical document in 1497. From 1569 it belonged to the Polish Commonwealth, and from 1793, to the Russian Empire. In the 19th century it was part of Rivne county in Volhynia gubernia. In the interwar period it was occupied by Poland. It was taken by Soviet troops in 1939 and granted city status. Today it is a railway junction with coach and locomotive repair shops, a plastics plant, and a cement factory.

Zdorovlie (Health). A monthly journal of the *Ukrainian Physicians' Society in Lviv, devoted to problems of sanitation and hygiene, published in 1912–14. Its editor was Ye. *Ozarkevych, and its contributors included I. *Horbachevsky.

Zdvyzh River [Zdvyž]. A right-bank tributary of the Teteriv River that flows for 145 km through Zhytomyr and Kiev oblasts and drains a basin area of 1,770 sq km. The river reaches a width of 20 m with a valley of 4 km. It is used for industry, water supply, and irrigation, and a water reservoir is situated on it.

Zdykhovsky, Oleksander [Zdyxovs'kyj], b 12 September 1907 in Muravev-Amursk, Far East, Russia. Opera director. A graduate of the Vinnytsia Music Tekhnikum (1929), he worked as a soloist and stage director at the Second Traveling Opera of Right-Bank Ukraine and the Luhanske Opera and Ballet Theater (1932–41). He was chief stage director of the Donetske Opera and Ballet Theater (1948–68) and artistic director of the Donetske Oblast Building of Cultural Workers. He staged operas such as M. Lysenko's *Taras Bulba*, S. Hulak-Artemovskyy's *Zaporozhian Cossack beyond the Danube*, Yu. Meitus's *The Young Guard*, P. Tchaikovsky's *Mazeppa* and *Little Shoes*, M. Mussorgsky's *Boris Godunov*, G. Bizet's *Carmen*, and C. Gounod's *Faust*.

Zdziarski, Stanisław, b 17 November 1878 in Ternopil, Galicia, d 2 December 1928 in Warsaw. Polish ethnographer and literary scholar. After completing his studies in Lviv, he collected ethnographic materials in Pokutia and published a collection of Pokutian folktales. His major work, *Pierwiastek ludowy w poesji polskiej XIX wieku* (The Folk Element in Polish Literature of the 19th Century, 1901), contains numerous references to Ukrainian folklore.

Zelenak, Edward, b 9 November 1940 in St Thomas, Ontario. Sculptor of Ukrainian origin. He studied at the Meinszinger School of Art in Detroit, the Fort Worth Art Center, and the Ontario College of Art. Toward the end of the 1960s he began making large-scale compositions built of fiberglass modules in the form of cylinders, spheres, and elbows (*Stoattalos*, *Traffic* [1968], *Slingshot* [1969], and

Edward Zelenak with tubular fiberglass works in progress

Untitled #2 [1972]). Since 1961 he has participated in over 30 group exhibitions in Canada, the United States, Paris, Lausanne, and Bologna. Solo exhibitions of his works have been held in Ottawa (1969, 1972), Toronto (1969, 1970), and Washington, DC (1971). In 1972 he was one of five Ukrainian-Canadian artists to exhibit his work at the Ukrainian Institute of Modern Art in Chicago. He teaches art at the University of Western Ontario.

Zelenchuk rivers [Zelenčuk]. Left-bank tributaries of the Kuban River that flow through the Karachai-Cherkess Autonomous Oblast and Stavropol' krai. The rivers, the Zelenchuk Velykyi and the Zelenchuk Malyi, are 180 and 140 km long respectively. Their sources are in the Caucasus Mountains.

Zeleni sviata. See Rosalia.

Zelenin, Dmitrii, b 2 November 1878 in Liuk, Riazan gubernia, d 31 August 1954 in Leningrad. Russian ethnographer and dialectologist; corresponding member of the USSR Academy of Sciences from 1925. A graduate of Yurev (now Tartu) University (1904), he taught at the universities in Kharkiv (1916–25) and Leningrad. His chief works, *Bibliograficheskii ukazatel' russkoi etnograficheskoi literatury o vneshnem byte narodov Rossii, 1700–1910* (A Bibliographic Guide to Russian Ethnographic Literature on the External Life of the Peoples of Russia, 1700–1910, 1913) and *Russische (Ostslavische) Volkskunde* (1927), contain much information about Ukrainian ethnography. He also wrote several articles on the historical relations between the Ukrainian and Russian cultures.

Zeleniv, Ivan, b 1861, d 1918. Venereologist. He served as a professor at Kharkiv (1897–1910) and Moscow universities and as editor of the first venereological journal in the Russian Empire, *Russkii zhurnal kozhnykh i venericheskikh boleznei* (1901–17). He was a founder of the Dermatological Society in Kharkiv (1900) and the All-Russian League for Venereological Diseases (1914). Zeleniv established a school of dermatologists and venereologists in Ukraine.

Zelenodolske [Zelenodol's'ke]. VI-14. A town smt (1990 pop 15,700) in Apostolove raion, Dnipropetrovske oblast. It was founded in 1961 in conjunction with the build-

ing of the Kryvyi Rih Power Station. The town is on the Dnieper–Kryvyi Rih Canal.

Zelenohorsky, Fedir [Zelenohors'kyj], b 1839, d 1909. Philosopher. In 1868 he graduated from Kazan University, where he had studied under M. Troitsky and inherited from him a deep respect for British empiricism. After obtaining a PH D in 1878, he was appointed professor of philosophy at Kharkiv University. He wrote a master's thesis on Aristotle's doctrine of the soul in comparison with the doctrines of Socrates and Plato (1871). In his major work, on the mathematical, metaphysical, inductive, and critical methods of research and proof (1877), he admitted the importance of the inductive method and adopted many empiricist doctrines, such as D. Hume's doctrine of causality, but argued against Troitsky that the other three methods have a legitimate place in philosophy and science. In the 1890s he turned his attention to the history of philosophy in Ukraine and published articles on the influence of H. Skovoroda, J. Schad, and F. Schelling at Kharkiv University.

Zelensky [Zelens'kyj]. A family line of Cossack *starshyna* from Right-Bank that resettled in Left-Bank Ukraine. The notable family members included the brothers Mykhailo and Andrii Zelensky. Mykhailo was colonel of Bratslav and Dniester regiments under B. Khmelnytsky. Andrii was colonel of Podilia regiment and a supporter of I. Vyhovsky and Yu. Khmelnytsky; he eventually became a staunch P. Doroshenko loyalist and an envoy to the Crimea. Dmytro *Zelensky also came from the line.

Zelensky, Dmytro [Zelens'kyj], b and d ? Cossack officer, descended from Right-Bank nobility. A military fellow (1689) and colonel of Lubni regiment (ca 1700–9), he was a relative and trusted adviser of Hetman I. Mazepa. At the Battle of Poltava (1709) he surrendered to the Russians, who imprisoned him and then in 1711 sent him to Siberia, where he died.

Zelensky, Viktor [Zelenskij], b 18 February 1929 in Surochi (now Tabunovka), Balashov raion, Saratov oblast, RSFSR. Materials scientist and solid-state physicist; AN URSS (now ANU) corresponding member since 1978 and full member since 1988. Since graduating from Kharkiv University (1952), he has worked at the ANU Physical-Technical Institute in Kharkiv, where he was appointed an assistant director in 1974 and director in 1988. His main contributions have been in the area of radiation damage to materials, particularly to semiconductors.

Zeleny, Andrii [Zelenyj, Andrij], b 1882 in Kamianka Voloska, Rava Ruska county, Galicia, d 28 August 1937 in Lviv. Pedagogue and education activist. Upon graduation from teachers' college in Lviv, he taught in a number of village schools, where he actively promoted organizations such as the *Prosvita society and *Silskyi Hospodar. During the First World War he worked as a mobilization commissioner, and during the postwar struggle for independence he was a school inspector for the Lviv school district. In 1921 he became director of the *Ukrainian Teachers' Mutual Aid Society. He was also active in the *Ridna Shkola society as an associate editor of the publica-

tions *Uchytel'*, *Uchytel's'ke slovo*, and *Shliakh navchannia i vykhovannia*. He was a leading member of the *Ukrainian National Democratic Alliance.

Zeleny, Danylo [Zelenyj] (pseud of Danylo Terpylo), b 1883 in Trypilia, Kiev county, Kiev gubernia, d November 1919. One of the best-known otamans (warlords) during the Revolution of 1917–21. Zeleny was associated with the left-wing of the *Ukrainian Social Democratic Workers' party (USDRP) (Independents). When that faction broke with the UNR Directory in January 1919, Zeleny led a revolt against the Directory in the vicinity of Obukhiv. The rebellion soon spread from Kiev gubernia to the neighboring Poltava and Chernihiv gubernias. At the peak of his movement Zeleny is said to have commanded over 30,000 troops. In addition to the Directory his troops fought the Bolsheviks and Whites (the Volunteer Army) in 1919. The movement issued several manifestos which reflected the influence of the ideology of the USDRP. Zeleny fell in battle against White forces.

Zeleny, Pavlo [Zelenyj], b 1839, d 1912. Writer and civic activist. He published the paper *Odesskii vestnik* (1877–87) and served as mayor of Odessa (1878). He was a strong supporter of public education and initiated the building of a public library.

Zeleny, Petro [Zelenyj], b 13 October 1908 in Vysloboky, Lviv county, Galicia, d 4 June 1991 in Antwerp, Belgium. Agronomist; full member of the Shevchenko Scientific Society from 1953. He completed his studies at the Lviv Polytechnical Institute (1932) and worked for Silskyi Hospodar (1933–9) as a district agronomist and publications editor. In 1940 he became a research associate at the department of animal physiology at Berlin University, and in 1946 a lecturer at the Ukrainian Technical and Husbandry Institute in Regensburg and Munich. From 1948 he directed a dairy research station in Belgium. Zeleny wrote numerous scholarly articles, in Ukrainian, Polish, German, and Flemish.

Zenon Zeleny

Zeleny, Zenon [Zelenyj], b 2 September 1901 in Dobriany, Lviv county, Galicia, d 2 February 1973 in Toronto. Pedagogue. A graduate of Lviv University (1930), he taught in secondary schools and gymnasiums in Lviv until the Second World War. In 1941–3 he headed the educational committee of the *Ukrainian Central Committee (UTsK), and from 1943, its youth welfare division. In 1948

he emigrated to Canada, where he taught physics and mathematics in secondary schools in Toronto and the surrounding area. He also headed the Association of Ukrainian Pedagogues in Canada and was an active member of the educational council of the *World Congress of Free Ukrainians. In 1965 he published *Ukrains'ke iunatstvo v vyri druhoi svitovoi viiny* (Ukrainian Youth in the Whirlwind of the Second World War), which details his UTsK work among Ukrainian young people.

Zelenyi Klyn. See Far East.

Zelenyi svit, the newspaper of the Zelenyi Svit association

Zelenyi Svit (Green World, or ZS). An ecological association initiated by the writer Yu. *Shcherbak and established in December 1987 under the aegis of the Ukrainian Committee in Defense of Peace. Shcherbak was elected the first chairman, and D. *Hrodzinsky, V. Sakhaev, and Yu. Tkachenko were elected his deputies. In its first year ZS operated as one of the **neformaly* that drew public attention to Ukraine's ecological plight. In November 1988 it was one of the initiators of the first major ecological demonstration in Kiev, which led to new investigations of the Chernobyl nuclear accident. From the outset ZS supported Ukrainian control over energy issues and chemical plants in Ukraine. It sought to educate the public about alleged violations of ecological laws by Moscow-based USSR ministries and advocated a nuclear-free Ukraine and the total shutdown of the Chernobyl and the nearly completed Chyhyryn and Crimean nuclear power stations.

The founding congress of ZS took place in Kiev on 28–29 October 1989. The statute it adopted noted that ZS was a voluntary association of ecological cells and collective members headed by its Green Council and its Control and Inspection Committee. The executive body was declared to be the ZS congress, which was to meet every two years or more frequently if convoked by one-third of the cells.

Initially ZS stated that it would remain apolitical. In practice, however, it soon acquired a political dimension because its activity interfered directly with CPSU, CPU, and USSR government control of Ukraine's economic life. In the spring of 1989 the ZS leader, Shcherbak, was elected a deputy of the USSR Congress of People's Deputies, despite an intensive Party campaign directed against him.

Although ZS has taken an interest in many areas – such as the alopecia outbreak among children in Chernivtsi oblast, the construction of the Danube–Dnieper and other canals, the location of a radar station in Transcarpathia,

the relatively short life span of Ukraine's citizens, the depletion of agricultural land through industrial expansion, and water and air pollution – the Chernobyl issue has remained predominant, and it acted as a catalyst in the formation of the *Popular Movement of Ukraine (Rukh), in which ZS has played a part. ZS has organized two major international 'Eurochornobyl' conferences on the effects of Chernobyl (1989, 1991). The politicization of the issue resulted in the division of ZS on 26 April 1990 and the creation of the Green Party of Ukraine, which was modeled to some extent on the German Green party. Shcherbak resigned as chairman of ZS to head the Green party. In 1991 he was also appointed Ukraine's minister of the environment.

D. Marples

Żeligowski, Edward Witold (pseud: Antoni Sowa), b 20 July 1816 in Mariampol (now Kapsukas), Lithuania, d 28 December 1864 in Geneva. Polish poet. He was exiled for his Polish revolutionary involvement to Petrozavodsk, Orenburg, and Ufa (1851–7). While in exile he developed an epistolary friendship with T. Shevchenko, a fellow exile, and wrote a poem dedicated to him. After his release, until 1860 he lived in St Petersburg, where he copublished the political paper *Słowo* (1859–60) and met Shevchenko. Shevchenko dedicated his poem 'Posadzhu kolo khatyny' (I'll Plant by the Cottage) to Żeligowski and translated several of his poems.

Gen Viktor Zelinsky

Daria Zelska-Darewych

Zelinsky, Viktor [Zelins'kyj], b 1867 in Katerynoslav gubernia, d 14 December 1940 in Sopot, Poland. UNR Army general. In 1918 he was an organizer and commander of the First Division of the *Bluecoats. During 1919–20 he served as chief of the UNR military mission in Poland. After the Ukrainian-Soviet War he was promoted to lieutenant general by the UNR government-in-exile. His memoirs are titled *Syn'ozhupannyky* (Bluecoats, 1938).

Zeliznychnyk (Railwayman). A Ukrainian-language monthly organ of the organization of railway workers, published briefly in Chernivtsi (1910) and then in Lviv (1910–18). Edited by O. Bezpalko, V. Levynsky, T. Melen, and A. Chernetsky, the paper contained articles on political and labor topics.

Zelska-Darewych, Daria [Zel's'ka-Darevyč, Darija], b 12 February 1939 in Włocławek, Poland. Ukrainian-Can-

dian art historian and critic. A graduate of the University of London (PH D, 1990) and a specialist in contemporary Soviet Ukrainian painting, since 1982 she has curated over 16 exhibitions of Ukrainian artists, including the traveling Contemporary Artists from Ukraine exhibition (1982–4) and the M. *Levytsky retrospective in Toronto and Winnipeg, and has written articles about Ukrainian artists in Ukraine, France, Germany, and Canada, a monograph about M. Levytsky (1985), and many entries for the *Encyclopedia of Ukraine*, for which she was the art subject editor (vols 3–5).

Zemanchyk, Ivan [Zemančyk] (Zemansky, Semantiuk), b ?, d 1822. Naturalist and pedagogue. He was raised in Transcarpathia. He became a professor (1787–1804) at Lviv University, where he taught mathematics and physics in Ukrainian at the *Studium Ruthenum. In 1793 he was dean of the Faculty of Philosophy, and in 1803–4 rector of the university. He later became a professor at Cracow University.

Zembnytsky, Yakym [Zembnyc'kyj, Jakym], b 1784 in the Chernihiv region, d 18 November 1851 in St Petersburg. Geologist and educator; full member of the Russian Academy of Sciences. After graduating from the Chernihiv Theological Seminary and the Main Pedagogical Institute in St Petersburg (1807) he taught in several schools in St Petersburg and then obtained a position at St Petersburg University (1819). Under his presidency (1827–42) the Imperial Mineralogy Society expanded its activities and publishing program. He wrote many articles on mineralogy and paleobotany, including an introductory survey of the fossil plants known in his day (1832).

Zemhano, Ihor (real surname: Yutsevych), b 1904 in Kharkiv. Stage and film director. After a brief stay in Berezil, he was a director in the Kharkiv Chervonozavodskyyi Ukrainian Drama Theater (1928, 1931), the Kharkiv Theater of the Revolution (1931–7), and the Odessa State Jewish Theater (1938–41). After 1944 he worked in film and television. His film *Ukrains'ki melodii* (Ukrainian Melodies, 1945) was criticized for 'nationalism.'

Zemka, Tarasii, b ?, d 13 September 1632 in Kiev. Churchman, poet, and printer. He became preacher at the Kievan Cave Monastery in 1625, and hegumen of the Kiev Epiphany Brotherhood Monastery, a teacher at the brotherhood school, and director of the Kievan Cave Monastery Press in 1627. An erudite scholar who knew Greek, Latin, Church Slavonic, and Ukrainian, he edited or translated several Greek theological texts and liturgical books into Ukrainian, including a *Triodion* (1627), *Nomacanon* (1629), and *Liturgicon* (1629). A number of these works included his prefaces or commentary and several of his poems.

Zemlia (Land). A weekly newspaper for Galician Ukrainians forced to work as agricultural laborers in Germany. It was published in 1942–5 by a German farmers' organization in Plauen. The editor was S. Nykorovych.

Zemlia i Volia (Land and Freedom, or ZiV). The name of two Russian revolutionary organizations. The first was founded in St Petersburg in late 1861. It loosely united

several conspiratorial groups of the socialist, democratic, and liberal intelligentsia in various cities of the Russian Empire. In Ukraine ZiV had several small groups, notably in Poltava. The clandestine Warsaw-based Committee of Russian Officers in Poland, headed by the Ukrainian A. *Potebnia, joined ZiV in 1862. ZiV propagated the overthrow of tsarism by a peasant revolution, the abolition of redemption payments, military conscription, and government bureaucracy, and the introduction of peasant, county, and gubernial self-rule and government by a democratically elected, federal popular assembly. It issued several proclamations and two leaflets before it fell apart in the spring of 1864, after most of its members were arrested in the wake of the suppression of the Polish Insurrection of 1863–4.

The second ZiV was formed in 1876 by Russian *populists in St Petersburg. Called originally the Northern Revolutionary Populist Group, the conspiratorial party became known as ZiV after its organ *Zemlia i volia* (1878–9). The goals of the *Southern Rebels group (1875–7) in Ukraine, led by Ya. Stefanovych and V. Debohorii-Mokrievych, were similar to those of the ZiV, and after the group's suppression several of its members (eg, Stefanovych, L. Deich, M. Frolenko, V. Zasulich) joined ZiV. Tsarist repression and arrests defeated the ZiV strategy of agitation and settlement in the villages, and in late 1877 those of its members who were still at large in Kiev, Kharkiv, Mykolaiv, and Odessa began using terrorism as a political weapon against tsarist officials. In August 1879 ZiV split into the terrorist *Narodnaia Volia, headed by A. Zheliabov, and the less violent Chernyi Peredel (Black Repartition) group, headed by G. Plekhanov, which lasted until the mid-1880s.

Zemlia i volia (Chernivtsi)

Zemlia i volia (Land and Freedom). A weekly (later semimonthly and then irregular) organ of the *Ukrainian Social Democratic party, published in Chernivtsi in 1906 and in Lviv in 1907–13, 1919–20, and 1922–4. It was edited in 1906 by M. Ogrodnik; in 1907–13 by M. Hankevych, V. Levynsky, S. Vityk, V. Starosolsky, Yu. Bachynsky, and P. Buniak; and in 1919–22 by M. Filts, P. Buniak, I. Kvasny-

tsia, and A. Chernetsky. From the fall of 1923 it was controlled by a group of supporters of O. Shumsky, a prominent leader of the CP(Б)У, and edited by S. Volynets. The paper was closed down by the Polish authorities in January 1924, after it openly voiced support for the platform of the Comintern.

Zemlia i volia (Land and Freedom). An underground organ of the *Communist Party of Western Ukraine (KPZU), published irregularly in 1925–9. Issues were printed mostly in Germany, but also by an illegal KPZU press near Warsaw, and smuggled into Western Ukraine. For a short time in 1929 both major factions of the KPZU published a journal with the same name.

Zemlia i volia (Land and Freedom). An organ of the Ukrainian section of the Czechoslovak Agrarian party in Transcarpathia, published in Mukachiv semimonthly in 1934–6 and then weekly to 1938. It was edited by S. Klochurak and Yu. Latsanych. In 1935 it published *Molodyi pluhar* as a biweekly supplement for youths.

Zemliak, Vasyl [Zemljak, Vasyl'] (pseud of Vasyl Vatsyk), b 23 April 1923 in Koniushivka, now in Lypovets raion, Vinnytsia oblast, d 17 March 1977 in Kiev. Writer. He graduated from the Zhytomyr Agricultural Institute (1953) and from 1958 worked in publishing. From 1963 to 1966 he was editor in chief at the Kiev Artistic Film Studio. He first published his writings in 1945. Subsequently he became popular as a result of his works on modern village life, such as the novelettes *Ridna storona* (Native Lands, 1956), *Kam'iany Brid* (1957), and *Hnivnyi Stration* (The Angry Stration, 1960). He went on to publish the novelette *Pidpolkovnyk Shymans'kyi* (Lieutenant Colonel Shymansky, 1966), the novels *Lebedyna zhraia* (The Swan Flock, 1971; English trans 1982) and *Zeleni Mlyny* (1976), and the play *Prezydent* (The President, 1975), about S. Allende. Several films based on Zemliak's work have been made.

Zemplén komitat (Ukrainian: Zemplyn). Until 1918 an administrative territory in northern Hungary, with Sátoralja-Ujhely (Nové Mesto) its center. The northern part of the komitat was populated mainly by Ukrainians, and the southern part by Slovaks and Hungarians. In 1910 the region settled by Ukrainians (1,650 sq km) had a population of 48,000, 77 percent of whom were Ukrainian. Since 1919 the Ukrainian and Slovak regions have been part of Slovakia (see *Prešov region).

Zemstvo. A gubernia and county institution for municipal self-government that existed in most European gubernias of the Russian Empire from 1865 until the Bolshevik Revolution. Under pressure from liberal nobles and the intelligentsia, Tsar Alexander II confirmed the Zemstvo Statute on 1 January 1864. Electoral institutions, specifically gubernia and county zemstvo assemblies (decision-making bodies) and zemstvo boards (executive bodies), were introduced in 1865. The jurisdiction of the zemstvos included municipal, economic, social, and educational affairs. They were to manage property, build and maintain roads, undertake measures for the improvement of agriculture, trade, and industry, and oversee medical services, sanitation, public education, veterinary services, insur-

ance, fire prevention, and other activities. The work was financed by special taxes on agricultural land, commercial and industrial properties, and business and guild licenses, as well as direct government subsidies (the latter initially constituted only a small portion of the revenues, but increased substantially after 1905). Provincial zemstvo organizations were established in 1865 in Chernihiv, Kharkiv, Kherson, and Poltava gubernias and in 1866 in Katerynoslav and Tavriia gubernia. They were not introduced in Right-Bank Ukraine (Kiev, Volhynia, and Podilia gubernias) until 1911 because of official concerns about extending local institutions of self-government into areas where a large portion of the nobility was Polish (particularly after the Polish Insurrection of 1863–4).

The zemstvo consisted of a mix of appointed and elected delegates. Separate electoral bodies existed for three classes of delegates, landowners, merchants and industrialists, and peasants. Those provisions were modified in 1890 in a revised Zemstvo Statute, which limited landowner representation to the nobility and turned over the selection of peasant representatives to the provincial governor. Orthodox clergymen and Jews were also forbidden to hold zemstvo offices at that time. All zemstvo positions had a three-year term, and the zemstvo assemblies usually sat once a year. In spite of provisions for representation from various estates, the zemstvo structure was dominated by the gentry both in absolute numbers and in leadership positions. As a rule the delegates from the nobility had more than half the votes in county zemstvo assemblies. They tended to have an even greater representation on the county executive boards and in the gubernia zemstvo organizations. In 1903 the county zemstvo councils in Ukrainian gubernias consisted of 83 percent nobility, 9.3 percent peasantry, and 7.7 percent others. In Kherson gubernia the county councils consisted entirely of nobility. After 1890 the appointed heads of zemstvo administrations were ratified by the governor (for county administrations) and by the minister of the interior (for gubernia administrations). The various zemstvo institutions were placed under the control and supervision of the state administration: all decisions of the zemstvo had to be ratified by the governor or the minister of the interior, who also had the power to nullify them; and elected zemstvo clerks were included in the general state administrative system.

Notwithstanding those limitations the zemstvos carried out a great deal of work in numerous areas of municipal management. They contributed significantly to the development of agriculture in Ukraine by creating a network of county and gubernia agronomists, introducing much-needed agricultural innovations (notably in machinery and equipment, seed, and fertilizer), launching a popular-education movement among the rural population (exhibitions, courses, lessons, popular brochures), establishing a series of agricultural schools, initiating agronomic projects (research stations, soil research, and the like), setting up insurance schemes, organizing a veterinary service, promoting the development of livestock breeding, supporting the co-operative movement, and assisting in the establishment of co-operative credit institutions serving the needs of the peasantry, village tradesmen, and others (see *Agriculture, *Agronomy, and *Agronomy, state and social). Zemstvo institutions built roads and organized the so-called zemstvo post (in areas

not reached by state postal service). Their work in public education was widespread; it started with the establishment of a network of primary schools, which was followed later by secondary and vocational schools (see *Zemstvo schools). Zemstvos commonly supported popular education (Sunday schools, rural and village libraries, vocational courses, public lectures, and the like). They are credited with the introduction of public health programs (see *Zemstvo medicine) in the countryside.

The work of the zemstvos in gathering statistical data and economic information about various regions of Ukraine resulted in the preparation of over 100 studies. In their day those had practical applications and, in some cases, political implications. Today they constitute a valuable source of historical information (see *Statistics).

In spite of their political domination by the nobility and attempts by the state to confine or control their activities, zemstvos developed into a liberal institution. They often attracted liberal nobles and the intelligentsia into their structure. They employed a large number of professional people (frequently referred to as 'the third element') and represented the most viable source of employment for educated persons outside official state service in the bureaucracy or military. Because they were mandated to provide services at a local, county, or gubernia level, the zemstvos commonly developed a greater loyalty to their region and its inhabitants than to the imperial bureaucracy, which functioned as the arm of a highly centralized government. The zemstvos' implicit political potential was already becoming obvious in the 1870s, when they frequently petitioned the tsar to establish a constitution for the empire. In the period of reaction following the assassination of Alexander II in 1881, the functions of local institutions, including the zemstvo, were reviewed. The review ultimately gave birth to the revised Zemstvo Statute of 1890, which increased state control over zemstvo activities. The zemstvo, nevertheless, maintained its liberal character and continued to engage or employ people regarded as politically suspect. The implicit political functions of the zemstvos were assumed by the political parties that emerged in the Russian Empire after the Revolution of 1905.

As an institution of local self-government the zemstvo often reflected the characteristics of its own region. In that respect the zemstvos of Ukraine could claim certain distinctive features, and some (notably those in Chernihiv and Poltava) could be called Ukrainophile in their orientation. The Poltava zemstvo initiated the building of a monument to I. Kotliarevsky in Poltava in 1903. The Poltava Zemstvo building (1905) was deliberately designed in a Ukrainian style by B. Krychevsky. Among the zemstvo employees in Ukraine were Ukrainian intellectuals, many of whom were ill disposed to the tsarist regime. For a good number of them the zemstvo institution served as a school for future involvement in the 1917–20 Ukrainian state. Among the eminent Ukrainian zemstvo activists in the Poltava region were P. Chyzhevsky, F. Lyzohub, B. Martos, O. Obolonsky, I. Prysetsky, and V. Shemet. Notables in the Chernihiv region included P. Doroshenko, I. Petrunkevych, O. Rusov, M. Savytsky, I. Shrah, O. Tyshchynsky, and F. Umanets.

The zemstvos functioned largely independently of one another. The Zemstvo Alliance was formed by zemstvo employees after a congress in Moscow in 1879, but the zemstvo institutions were not united until 1914. Even then

the All-Russian Union of Zemstvos was created to coordinate medical aid for the empire's war effort rather than to expedite common zemstvo policy.

After the outbreak of the Revolution of 1917 the zemstvos became full-fledged institutions of municipal self-government. According to resolutions passed by the Provisional Government (21 May and 9 June 1917), district zemstvo institutions were established, and any citizen could be elected to them. Zemstvo institutions also gained the right to pass binding legislation, and the supervision of the state administration was limited to a review of the legality of their activities. Public safety (the militia) came under their jurisdiction. In Ukraine the zemstvos started a process of Ukrainianization and filled their ranks with Ukrainian political activists. The Kiev newspaper *Zems'ka hazeta* began to publish in Ukrainian.

The All-Ukrainian Union of Zemstvos, founded in April 1918, linked gubernia zemstvo administrations under S. Petliura. The zemstvo institutions later were opposed to the Hetman government, which had begun to assert greater administrative control over them. On 5 September 1918 the Zemstvo Statute was altered, and a curial system of elections was reintroduced. The electoral reform was only partly implemented before the Ukrainian-Soviet War caused the zemstvos to curtail their activities. The UNR government then dissolved the zemstvo assemblies until their re-election and transferred their competency to the appropriate state administrations. The legislation was stillborn, however, as Bolshevik troops established effective control over Ukraine shortly thereafter. The zemstvos were then dissolved, and their functions were assumed by local Soviet councils (soviets).

Zemstvo agronomy. See Agronomy, state and social.

Zemstvo head (Russian: *zemskoi nachalnik*). A judicial and administrative position established in the Russian Empire in 1889. The zemstvo head performed some of the functions of a justice of the peace (particularly in regard to criminal cases) and tried civil cases involving sums up to 3,000 rubles. He also had the authority to impose direct fines and to arrest people. He oversaw the administration of villages and *volosti*. Candidates for the post were chosen from among the local landowners by the governor and were appointed by the minister of the interior.

Zemstvo medicine. A system of medical and sanitary services in Ukraine under Russian rule, implemented as part of the *land reforms in 1865, except in the gubernias of Kiev, Volhynia, and Podilia, where it was implemented in 1911.

Zemstvo physicians gradually established a network of stationary dispensaries, medical clinics, and hospitals, mostly for the peasant population. They were financed by the collection of taxes from the whole population. Medical services were free, with some exceptions where small fees were charged. Zemstvo physicians also took over the care

and treatment of the mentally ill. They were responsible for the control of epidemics of cholera, diphtheria, and syphilis. Smallpox vaccination was also under their jurisdiction. Since they were also responsible for the training of medical personnel, mainly medics and doctors' assistants, zemstvo physicians founded schools for medics, including institutes of bacteriology in Odessa, Katerynoslav, and Chernihiv. Despite the shortcomings of the system and the relatively small number of medical institutions, which could not possibly serve the large population and such a large area, zemstvo medicine played an important part in the growth of medical science and health care in Ukraine. It established and developed, as far as was possible, the stationary medical care unit for the local population, introduced the prophylactic approach to health care, and initiated the recording of sanitation statistics.

Zemstvo schools (*zemski shkoly*). Elementary and, later, secondary and vocational schools in the Russian Empire, established and financed by *zemstvo authorities. Zemstvo schools were established in 1864 in the wake of the agrarian reform and existed until 1917. They played a significant role in democratizing and improving the quality of public education, particularly in the villages. In general, reactionary forces in the tsarist government and the Holy Synod disapproved of the work done by zemstvos in the sphere of public education. Zemstvo schools compared favorably both with schools run by the Ministry of Education and with *parochial schools. The literacy rate was 19.9 percent in 1897 in zemstvo gubernias, and 16.9 percent in non-zemstvo gubernias. Though the zemstvo authorities had the sole responsibility for the organizing and funding of zemstvo schools, the administration of the schools was entirely in the hands of the central government. The zemstvos had no direct jurisdiction over curriculum, teaching methods, or hiring practices. Zemstvo representatives were outnumbered on the district and gubernia school councils created by the state to supervise the zemstvo schools. In 1874 the zemstvos were granted the right to nominate candidates for teaching positions in zemstvo schools. District zemstvos were responsible for the founding of elementary zemstvo schools, and gubernia zemstvos did the organized training courses for teachers, founded museums, libraries, and bookstores to serve zemstvo teachers, and established professional zemstvo schools. In 1898 there were 3,117 zemstvo schools in Ukraine. The figure increased in the period 1900–10 to 4,700 schools, with 460,000 pupils and 8,458 teachers. In 1914, in Tavriia gubernia there were 827 zemstvo schools, in Kherson gubernia, 1,087, in Kharkiv gubernia, 1,248, and in Katerynoslav gubernia, 945. In Right-Bank Ukraine, where the zemstvo structure was not introduced until 1911, the numbers were much lower. By 1912, in

Kiev gubernia there were 149 zemstvo schools, and in Podilia and Volhynia gubernias, only a few isolated schools. Because their formation depended on local initiative, zemstvo schools were often unevenly distributed.

Initially zemstvo schools had a three-year program. In the 1890s a fourth year was added, and by the time zemstvo schools were abolished in 1917, some seven-year schools had been established. The curriculum consisted of religion, reading, writing, arithmetic, and sometimes singing. Texts used at the zemstvo schools were superior to those used at their Ministry of Education and parochial school counterparts and included the primer *Rodnoe slovo* (Native Word) by K. *Ushinsky, the primer *Azbuka* (Alphabet) and simple readers by L. Tolstoy, and *Nash drug* (Our Friend) by N. Korf. Both Ushinsky, a well-known teacher, and Korf, a landowner in Oleksandriia county, Katerynoslav gubernia, were instrumental in the establishment of zemstvo schools. Korf pioneered the economical one-room school system in which a single teacher taught pupils of all ages in a single classroom. Between 1867 and 1872 Korf founded 80 new zemstvo schools in his gubernia.

Although most zemstvo schools were elementary schools, zemstvos at the gubernia level also founded some professional schools. Among them were the Industrial Arts and Ceramics School in Myrhorod and vocational schools in Novomoskovske and Poltava. In the 1870s a zemstvo seminary to train teachers was founded in Chernihiv, but it was closed in 1878 at the insistence of the Ministry of Education. Some zemstvos also established gymnasiums. The first was the Hlukhiv county zemstvo progymnasium, founded in the 1860s, which became a gymnasium in 1876.

County and gubernia zemstvos often came into conflict with the government over the use of Ukrainian in zemstvo schools. In 1870 zemstvo activist M. Konstantynovych raised the language issue at a meeting of the Chernihiv district zemstvo. It was broached again in 1881, at a session of the Chernihiv gubernia zemstvo, by N. Korf. In 1895 the Yelysavethrad zemstvo discussed the use of Ukrainian. In 1904–5, zemstvos passed resolutions concerning the Ukrainian language, but these were rejected by the government. Teachers who used Ukrainian as a teaching aid in zemstvo schools were dismissed.

C. Freeland, S. Siropolko

Zemstvo statistics. See Statistics.

Zenkovsky, Vasiliĭ [Zen'kovskij, Vasilij], b 1881 in Podilia gubernia, d 5 August 1962 in Paris. Russian philosopher and theologian of Ukrainian descent. After graduating from Kiev University (MA, 1912) he taught philosophy there (1912–19) and directed the Institute for Pre-school Education. In the 1918 Hetman government he served as minister of religious affairs in F. Lyzohub's cabinet. A White émigré from 1920, he lived in Belgrade (to 1923); in Prague, where he founded the Russian Pedagogical Institute; and in Paris, where he served as a professor and dean at the Russian Theological Institute. Suspected of pro-German sympathies, in 1939–40 he was imprisoned in a French concentration camp. In 1942 he was ordained an Orthodox priest. Early in his career he wrote on the mind-body problem and defended the theory of interactionism. In the interwar period he contributed to the Russian émigré press and published several monographs in

educational psychology. His chief contribution lies in his studies in the history of Russian philosophy, which encompassed many Ukrainian thinkers: *Istoriia russkoi filosofii* (A History of Russian Philosophy, 2 vols, 1948, 1950; English trans 1953), *Russkie mysliteli i Evropa* (Russian Thinkers and Europe, 1926; 2nd edn 1955; English trans 1953), and *Aus der Geschichte der ästhetischen Ideen in Russland im 19. und 20. Jahrhundert* (1958). He also wrote a book on N. Gogol (1961).

Zerkal, Sava [Zerkal'], b 18 April 1896 in Khmeliv, Romen county, Poltava gubernia, d ? Educator and agronomist. During the First World War he served in the UNR Army. After emigrating to Czechoslovakia, he graduated from the Ukrainian Husbandry Academy in Poděbrady (1928) and worked as an agronomist in Bratislava (1928–45). He founded the *Society of Ukrainian Engineers in Prague (1929). After the Second World War he lectured at the Ukrainian Technical and Husbandry Institute in Munich. In 1949 he emigrated to the United States, where he lectured at the Ukrainian Technological Institute in New York and published the magazine *Ukraïns'ke hromads'ke slovo* (1953–8). He wrote many journalistic articles, a few booklets on Transcarpathia, and *Ruïna kozats'ko-selians'koi Ukraïny* (The Destruction of Cossack-Peasant Ukraine, 1968).

Zerkalo (Mirror). A semimonthly illustrated humor magazine published in Lviv in 1882–6 (in 1883–5 as *Nove zerkalo*). Editors and regular contributors to both magazines included K. Ustyianovych (who also illustrated the journal), V. Nahirny, K. Levytsky, Ye. Olesnytsky, I. Hrabovych, V. Kotsovsky, V. Liskovatsky, V. Masliak, and I. Franko. *Zerkalo* directed most of its satire against the Russophile movement in Western Ukraine.

Zerkalo (Mirror). A semimonthly political humor magazine published in Lviv in 1889–93. It was edited by V. Levytsky and then I. Krylovsky.

Zerkalo (Mirror). A semimonthly humor magazine published in Lviv in 1906–10. It claimed to be the continuation of the magazine with the same title published to 1893, and retained the same numbering system. The editor was O. Dembitsky. In 1910 it appeared as *Nove zerkalo*.

Dmytro Zerov

Mykola Zerov

Zerov, Dmytro, b 20 September 1895 in Zinkiv, Poltava gubernia, d 20 December 1971 in Kiev. Botanist, brother of M. *Zerov; full member of the AN URSR (now ANU) from 1948. A graduate of Kiev University (1922), he taught there (1920–57) and worked for the VUAN and ANU (from 1921), as director of the Institute of Botany in 1946–63. He wrote *Torfovi mokhy Ukrainy* (Peat Mosses of Ukraine, 1928) and *Bolota URSR* (Wetlands of the Ukrainian SSR, 1938) and edited the journal *Ukrains'kyi botanichnyi zhurnal*, the multivolume **Flora URSR, Vyznachnyk roslin Ukrainy* (Field Guide to Plants of Ukraine, 1965), and *Vyznachnyk hrybiv Ukrainy* (Field Guide to Fungi of Ukraine, 1967).

Zerov, Mykola, b 26 April 1890 in Zinkiv, Poltava gubernia, d 3 November 1937 in the Solovets Islands. Poet, translator, and literary historian. He studied philology at Kiev University. From 1917 to 1920 he edited the bibliographical journal *Knyhar*. He was a professor of Ukrainian literature at the Kiev Architectural Institute (1918–20), the Kiev Co-operative Tekhnikum (1935–5), and the Kiev Institute of People's Education (1923–35). He also taught the theory of translation at the Ukrainian Institute of Linguistic Education (1930–3). He was arrested by the NKVD in April 1935 and sentenced to 10 years' imprisonment in the Solovets Islands. On 9 October 1937 he was resented, to death by firing squad.

Zerov's literary activity, both as a poet and as a translator, was in complete harmony with his ideals and theoretical postulates. An avowed classicist and Parnassian, he became the leader of the *Neoclassicists. He concentrated on the sonnet and Alexandrine verse and produced excellent examples of both forms. He translated numerous works of Latin poetry. He also devoted attention to sonnets in other literatures and translated the works of J.-M. Hérédia, P. de Ronsard, J. Du Bellay, A. Mickiewicz, I. Bunin, and others. He wrote criticism on contemporary Soviet Ukrainian literary works, articles on literary translation, and introductions to editions of Ukrainian classics; edited anthologies; and took part in the *Literary Discussion. His published translations include *Antolohiia rym-s'koi poezii* (An Anthology of Roman Poetry, 1920), *Kamena* (1924; 2nd edn 1943), and J. Słowacki's *Mazepa* (1925). Among his poetic works published posthumously and abroad are *Sonnetarium* (1948), *Catalepton* (1952), and *Corollarium* (1958). His literary histories include *Nove ukrains'ke pys'menstvo* (New Ukrainian Writings, vol 1, 1924), *Do dzherel* (To the Sources, 1926; 2nd edn 1943), *Vid Kulisha do Vynnychenka* (From Kulish to Vynnychenko, 1928), and *Lektsii z istorii ukrains'koi literatury* (Lessons on the History of Ukrainian Literature, 1977). In 1958 Zerov was formally rehabilitated, and *Vybrane* (Selections) of his poetry was published in 1966, but a full rehabilitation was blocked by hostility from official critics, such as L. Novychenko and M. Shamota. In the late 1980s, on the initiative of H. Kochur, Zerov's works began to be collected seriously for publication. The fullest edition of his works was published in 1990 in two volumes.

V. Derzhavyn, I. Koshelivets

Zhabche [Žabče]. A village in Lutske county, Volhynia, which became notorious for Polish persecution of Orthodox believers. In the winter of 1929 the parish priest, V. Sahaidakivsky, and 152 parishioners locked themselves in the church for 10 days. The Polish militia broke into the

church, arrested them, and delivered them to the prison in Lutske. The incident aroused protests from Ukrainian delegates in the Sejm representing the Ukrainian National Democratic Alliance (S. Biliak, O. Vysltsky, I. Zavalykut). Zhabche came to symbolize the struggle of Ukrainians in Volhynia against Polonization.

Zhabie. See Verkhovyna.

Zhabie-Seliety Depression. A section of the Middle-Carpathian Depression centered in the area between the Cheremosh and the Suceava rivers. The formation is 10–12 km wide and sits at an elevation of 600–1,000 m. The area is relatively flat and has a high population density. Most of the inhabitants in the region are Hutsuls. Its major centers include Verkhovyna (formerly Zhabie), Seliety, Storozhynets, and Putylyv.

Rev Lev Zhabko-Potapovych

Vladimir Zhabotinsky

Zhabko-Potapovych, Lev [Žabko-Potapovyč, Lev], b 1890, d 8 November 1975 in Crum Lynne, Pennsylvania. Ukrainian Baptist leader and civic activist. The head of the Ukrainian Baptist Missionary Society and the pastor of a church in Lviv during the interwar era, he sought to infuse the Baptist movement there with a strong sense of Ukrainian national identity. He later served as a pastor in Chester, Pennsylvania; edited the newspaper **Pislanets' pravdy*; and wrote *Khrystove svitlo v Ukraini* (Christ's Light in Ukraine, 1952), a history of the Ukrainian Baptist movement.

Zhabokrytsky, Denys Dionysii [Žabokryc'kyj], b 1652, d 1715 in Moscow. Uniate bishop. He was nominated as Orthodox bishop of Lutske by King Jan III Sobieski in 1695 and consecrated by the bishop of Maramureș, Y. Stoika, in 1696. In 1702 he joined the Uniate church and was reconsecrated by Metropolitan L. Zalensky. Tsar Peter I had him arrested and exiled in 1709, first to Kiev and then to Moscow, where he died in prison. S. Kurganovich published a study of him in Kiev in 1914.

Zhabotinsky, Vladimir [Žabotinskij] (Jabotinsky, Ze'ev), b 18 October 1880 in Odessa, d 4 August 1940 near Hunter, New York. Writer, journalist, and Zionist activist. He worked in Bern and Rome as a foreign correspondent for the newspapers *Odesskii listok* and *Odesskie novosti* and then continued his journalistic activity in Odessa, where he became an active Zionist. From 1903 he lived in St Pe-

tersburg, where he espoused a strong Zionist viewpoint in the journals *Evreiskaia zhizn'* and *Razsvet* and undertook extensive organizational work among Jewish journalists and politicians. With the outbreak of the First World War Zhabotynsky approached Britain with a proposal for the creation of a Jewish Legion, in the belief that such an organization would assist in the eventual creation of a Jewish homeland in Palestine. His idea was accepted, although it did not have the impact he had anticipated. After the war Zhabotynsky continued to write and promote the idea of massive Jewish emigration to Palestine.

Zhabotynsky's writings were largely devoted to the national question. He was favorably disposed to Ukrainian national concerns, which he saw as compatible with Jewish ones, and he developed links with Ukrainian activists. Those links caused a falling out with Zionist leaders in 1921, after he had negotiated an arrangement with his friend M. Slavinsky (a representative of the UNR government-in-exile) to have a Jewish gendarmery follow an anticipated invasion force (led by S. Petliura) into Ukraine in order to protect the Jewish population from possible pogroms. Ultimately the controversy prompted Zhabotynsky to resign from the executive of the World Zionist Organization. A collection of his works was published in Ukrainian translation as *Vybrani statyi z natsional'noho pytannia* (Selected Articles on the National Question, 1983).

A. Makuch

Zhabotyn kurhans and settlement. Early Scythian kurhans and a settlement of the 7th to 6th century BC near Zhabotyn, Kamianka raion, Cherkasy oblast. The kurhans were excavated in the late 19th to early 20th century, and the settlement, in 1951–8. The kurhans contained the burials of military and clan nobility in a variety of wooden crypts. Common grave goods included weapons and armor, horse trappings, pottery, and adornments with zoomorphic designs. Excavations of the settlement revealed surface and pit dwellings, religious structures with the remains of sacrificial altars, pottery, and a variety of adornments that testify to local trade ties with the northern Black Sea and Caucasus regions.

Leonid Zhabotynsky

Edvard Zharsky

Zhabotynsky, Leonid [Žabotyns'kyj], b 28 January 1938 in Krasnopillia, Sumy oblast. Heavyweight weightlifting champion. He was the 1964 and 1968 Olympic gold medalist, the 1965 and 1966 world champion, and the 1966 and 1968 European champion. He won many Ukrainian and USSR championships and set 17 world records in 1963–70 and 1973.

Zhabyntsi. A multi-occupational archeological site located near Zhabyntsi, now in Husiatyn raion, Ternopil oblast. Excavations in the late 19th century by A. *Kirkor and G. *Ossowski uncovered the remains of settlements from Trypilian to Rus' times.

Zhalo (Sting). A semimonthly humor and satire magazine. It appeared under the editorship of S. Terletsky, P. Buniak, O. Liubomir, and M. Holubets in Lviv weekly in 1913 and semimonthly in 1914. In 1923 the magazine was briefly renewed by Buniak.

Zhar River [Zhar]. A right-bank tributary of the Boh River that flows eastward for 95 km through Khmelnytskyi and Vinnytsia oblasts and drains a basin area of 1,170 sq km. The river is 5–10 m in width (maximum 40 m) and 0.5–1.5 m in depth, with a valley up to 4 km wide. It is used for water supply, pisciculture, and irrigation.

Zharko, Fedir [Žarko], b 17 June 1914 in Mykhailivka, Cherkasy county, Kiev gubernia, d 17 July 1986 in Kiev. Banduryst. He graduated from the Cherkasy Pedagogical Institute in 1936 and sang as a soloist with the State Banduryst Kapelle of the Ukrainian SSR (1946–74). His repertoire included folk songs, dumas, and songs by Soviet composers. He compiled two collections of songs, which he arranged for voice with bandura accompaniment under the title *Ukrains'ki narodni pisni* (Ukrainian Folk Songs, 1967 and 1969).

Zharsky, Edvard [Žars'kyj], b 1906. Zoologist, ichthyologist, and pedagogue; full member of the Shevchenko Scientific Society from 1960. A director of research fisheries in Galicia, he wrote *Zoloto z hlyny* (Gold from Clay, 1937), *Ryby richok Ukrainy* (Fish of Ukraine's Rivers, 1947), and *Atlas ryb* (Atlas of Fish, 1948). After emigrating to New York in 1949, he taught at the Ukrainian Technological Institute in New York and contributed to *Entsyklopedia ukraїnoznavstva* (1955–84), *Ukraine: A Concise Encyclopaedia* (1963, 1971), and *Encyclopedia of Ukraine* (vols 1–2, 1984, 1988).

Zharsky, Yevhen [Zhars'kyi, Jevhen], b 1834 in Chertizh, now in Zhydachiv raion, Lviv oblast, d 1892 in Lviv. Pedagogue and writer. A teacher of Ukrainian language and literature in Ternopil (from approx 1865), he wrote two epic poems (*Sviatyi vechir* [Christmas Eve] and *Marusia Bohuslavka* [1862]), literary critiques, and numerous articles published in Ukrainian newspapers and journals in Galicia, including *Zoria halytska*, *Vechernytsi*, and *Meta*. He also translated works by J.W. von Goethe and H. Heine into Ukrainian, and in 1877 he published the collection *Poezii* (Poems). In the 1880s he moved to Lviv, where he joined the *Russophiles.

Zhashkiv [Žaškiv]. IV-11. A city (1989 pop 16,900) on the Torch River and a raion center in Cherkasy oblast. It was

first mentioned in historical documents at the beginning of the 17th century, when it belonged to the Ostrozky family. In 1648 it threw off Polish rule and became part of Uman regiment. Zhaskhiv was returned to Poland in 1667 and captured by the haidamakas in 1738. After the partition of Poland in 1793, it was annexed by Russia, and in 1840 it became a volost center in Tarashcha county, Kiev gubernia. In the second half of the 19th century the town had a sugar refinery, brewery, and winery. The construction of a rail link with Pohrebyshche in 1927 encouraged further industrial development. It was granted city status in 1956. Today the city's factories produce sugar, powdered milk, bricks, clothing, and bread.

Hryhorii Zhatkovych

Zhatkovych, Hryhorii [Žatkovyč, Hryhorij] (also Zsatkovich, Gregory Zatkovich), b 1886 in Holubnye, Bereg county, Transcarpathia, d 26 March 1967 in Pittsburgh. Lawyer and political leader. He emigrated in 1891 with his parents to the United States, where he completed law studies and worked for General Motors. Although Zhatkovych himself was not actively involved in community affairs, he had some profile among the immigrant population through the activities of his father, an editor of *Amerikanskii russkii viestnik*. Consequently, in 1918 he was asked by the American Council of Uhro-Rusins to serve as spokesman of its delegation to the Mid-European Democratic Union in Philadelphia. He later went to Uzhhorod to follow through on the results of the plebiscite held by the *American National Council of Uhro-Rusins in 1918, which called for an autonomous Transcarpathia federated with Czechoslovakia. In the summer of 1919 he negotiated the terms of federation in Prague and Paris and on 12 August 1919 became president of the Directorate of Subcarpathian Ruthenia. He was appointed the first governor of Transcarpathia in April 1920, but he resigned a year later over the central government's refusal to grant full autonomy to the region. He returned to the United States, where he wrote several books critical of Czechoslovak policy. During the Second World War he changed his mind and again supported the aim of Transcarpathia's incorporation within Czechoslovakia.

Zhatkovych, Yurii [Žatkovyč, Jurij] (Zsátkovics, Kálmán), b 14 October 1855 in Dravtsi, near Uzhhorod, d 25 September 1920 in Stroine, Berehove county, Transcarpathia. Ukrainian historian, writer, and translator; member of the Shevchenko Scientific Society. Most of his scholarly articles deal with the history of Transcarpathia,

particularly its church figures, eparchy, and monasteries. He was elected to the Hungarian Historical Society for his lengthy study of the struggle between the Eger and Mukachiv dioceses (1884). Under V. *Hnatiuk's influence he became interested in Transcarpathian ethnography and published some articles on the subject in Ukrainian periodicals. He wrote short stories about the life of the common people and translated some works by Marko Vovchok, I. Franko, O. Makovei, O. Storozhenko, and M. Kotsiubynsky into Hungarian. He translated E. Egán's brochure on the economic situation of the Ruthenian peasants in Hungary (1901) into Ukrainian. On the language issue he took a conservative position, although he used a variant of **yazychiie* that was close to the popular vernacular. His textbooks for Transcarpathian Ukrainian schools were banned, but three of them (in geography, history, and social studies) were reprinted 14 times in Slovak. Many of his works remain unpublished.

M. Mushynka

Amvrosii Zhdakha: a postcard drawing illustrating a Ukrainian folk song

Zhdakha, Amvrosii [Ždaxa, Amvrosij] (pseud of Smahlii, Amvrosii), b 18 December 1855 in Izmail, Bessarabia gubernia, d 8 September 1927 in Odessa. Graphic artist. His formal art education was limited to a brief period at the Odessa Drawing School in 1881. He taught at the Volhynian Eparchial School for Women in Kremianets (1908–10), the Odessa Trade and Industry School (1921–4),

and the Odessa Art Institute (1924–7). While working as a bank clerk he was active in the Odessa Hromada and devoted his spare time to painting and to collecting Cossack weapons and folk art. From 1893 to 1914 he painted several series of watercolor illustrations to Ukrainian folk songs. Two of these series (20 pictures) were reproduced in Kiev in 1911–12 as postcards, together with words and scores. Zhdakha also designed book covers and illustrated editions of P. Kulish's *Chorna rada* (Black Council, 1901), M. Komarov's *Opovidannia pro Antona Holovatoho* (Stories about Antin Holovaty, 1901), Ye. Hrebinka's *Chaikovs'kyi*, and T. Shevchenko's *Kobzar* (30 unpublished illustrations).

Zhdanov, Andrei [Ždanov, Andrej], b 26 February 1896 in Mariupil, Katerynoslav gubernia, d 31 August 1948 in Moscow. Russian Bolshevik and Party functionary. He was J. Stalin's close confidant. After the Second World War he was placed in charge of Soviet cultural policy. His 1946 attacks on the literary journals *Zvezda* and *Leningrad* opened a campaign to rid Soviet culture of 'servility before the West' and 'cosmopolitanism.' In the 'Zhdanovshchina' period, Russian culture was promoted and 'Zionism' and 'bourgeois nationalism' were singled out for repression. In Ukraine such works as M. Petrovsky's *Istoriia Ukraïny* (History of Ukraine, 1943) and S. Maslov and Ye. Kyryliuk's *Narys istorii Ukraïnskoï literatury* (Outline of the History of Ukrainian Literature, 1945) were criticized for nationalism. Ukrainian writers were roundly criticized: A. Malyshko, Yu. Yanovsky, O. Kundzich, S. Oliinyk, T. Masenko, L. Smiliansky, O. Dovzhenko, M. Rylsky, V. Sosiura, and O. Vyshnia suffered repression. The editorial staffs of the Ukrainian journals *Vitchyzna* and *Dnipro* were replaced. Similar actions were taken in other spheres of Ukrainian culture. The main effect of this campaign was to push Ukrainian culture closer to Russian. In June 1990 the CC CPU admitted that the Party's cultural policy in the late 1940s and early 1950s had been 'politically incorrect,' and rehabilitated many of the Ukrainian writers who had been prosecuted.

Zhdanov. See Mariupil.

Zhdanov Azovstal Metallurgical Plant. See Mariupil Azovstal Metallurgical Plant.

Zhdanovych, Antin [Ždanovyč], b in the early 17th century, d after 1657. Cossack officer and diplomat. He was a captain of the registered Cossacks in Chyhyryn regiment (to 1648) and then served under B. Khmelnytsky as colonel of Kiev regiment (1649–53 and 1656–7), Cossack envoy to Turkey (1650 and 1651), Poland (1653), and Muscovy (1654), and general judge (1656). During a critical phase of the Cossack-Polish War in 1651 (the Battle of Bertestechko) Zhdanovych was put in charge of defending Kiev from the advancing Lithuanian army of J. Radziwiłł. He gave up the city without a fight after consulting with Metropolitan S. Kosiv about how best to minimize destruction. In 1657 he was appointed acting hetman over an expeditionary force of 20,000 Cossacks sent by Khmelnytsky to support his allies Charles X Gustav of Sweden and György I Rákóczi of Transylvania. The combined army occupied Łańcut, Cracow, Brest, and Warsaw. By the summer of that year the situation had changed, and a

mutiny fomented by Muscovite informers erupted among the Cossacks and brought about the voluntary return of many of them to Ukraine. Zhdanovych also switched his loyalties to I. Vyhovsky and Yu. Khmelnytsky until 1659, when Russian pressure on the Cossack leadership forced his abdication.

Zhdanovych, Oleh. See Shtul, Oleh.

Zhebelev, Sergei [Žebelev, Sergej], b 22 September 1867 in St Petersburg, d 28 December 1941 in Leningrad. Soviet Russian historian and archeologist; member of the USSR Academy of Sciences (AN SSSR) from 1927. He graduated from St Petersburg University (1890) and taught there (1899–1927, as professor from 1904) and worked at the AN SSSR Institute of the History of Material Culture (from 1927) as director of research on antiquities of the northern Black Sea coast. A collection of his essays was published posthumously as *Severnoe Prichernomor'e* (The Northern Black Sea Coast, 1953), and a festschrift in his honor was published in 1968.

Leonid Zhebunev

Zhebunev, Leonid [Žebunev], b 1851 in Oleksandrivske county, Katerynoslav gubernia, d 1919 near Katerynoslav. Revolutionary and civic figure. For his populist involvement he was imprisoned in Katerynoslav (August 1874 to January 1875) and Odessa (December 1881 to April 1883) and then banished to eastern Siberia for five years. After returning to Ukraine he was involved briefly in the Kharkiv Literacy Committee. Around 1900 he became a radical Ukrainophile in Kharkiv (influenced by P. Yefymenko). From 1903 he was active in the Hromada organizations and the Ukrainian Democratic and Democratic Radical parties in Poltava, and Kiev. He became a member of the Society of Ukrainian Progressives in 1908 and contributed to *Literaturno-naukovyi vistnyk*, *Ukraïnskaia zhizn'*, and *Rada*.

Zhelekhivka. A revised version of the phonetic **kulishivka* orthography, introduced by Ye. *Zhelekhivsky in his Ukrainian-German dictionary (2 vols, 1885–6; repr 1982). Its 34-letter alphabet officially replaced *etymological spelling in Galician and Bukovynian schools in November 1892, and its orthographic and lexical norms (many of them based on the *southwestern dialects) were laid out in S. Smal-Stotsky and F. Gartner's 1893 Ruthe-

nian school grammar. The *zhelekhivka* was retained in Galicia until the early 1920s. In Russian-ruled Ukraine it was used after 1905 mainly by M. *Hrushevsky in editing *Literaturno-naukovyi vistnyk* and in his own works. It did not become widely accepted there, however, because of the impact of the orthography propagated by B. *Hrinchenko in his seminal Ukrainian-Russian dictionary (4 vols, 1907–9).

The *zhelekhivka*'s main phonetic and morphological traits were (1) *je* and *ji* (*i*) after dentals (eg, *njis* 'he carried' [but *nis* 'nose'], *ljektsija* 'lesson') to indicate soft pronunciation; (2) the soft sign within the consonant clusters *sv*, *cv*, *zv* before *ja* and *i* to indicate soft pronunciation (eg, *s'via-tyj*, *c'vit*, *z'vir* 'holy, bloom, animal'); (3) 'o' and, elsewhere, *ě* after dentals and instead of *jo* to indicate soft pronunciation (eg, *l'on*, *sěmu* 'flax, this (dative)'); (4) an apostrophe after the prefixes *z-/s-* before vowels (eg, *z'java*, *z'oraty* 'apparition, to plow'); (5) separation of the reflexive particle *sja* from the verb; (6) *g* and *l'* in Greek, Latin, and German loanwords (eg, *fil'ol'ogija* 'philology'); (7) *v* instead of postvocalic *l*, corresponding to the dialectal pronunciation of *l* as *ũ* (eg, *horioka* 'whiskey'); (8) hardened (dialectal) suffixes *-skyj*, *-zkyj*, *-ckyj*, *-sko*, and a softened *n'* before them (eg, *ruskij*, *don'skij* 'Ruthenian, Don'); (9) *y-* instead of *i-* in the initially stressed position (eg, *ynčyj* 'different'); (10) neuter noun endings *-nje*, *-tje* instead of *-nmja*, *-ttja* (eg, *pysanje*, *žytje* 'writing, life'); (11) the endings *-nyje*, *-anyje* in Church Slavonicisms (eg, *voznese nyje* 'ascension'); (12) *-yja* instead of *-ija* in loanwords (eg, *stacyja*, *sesyja* 'station, session'); (13) *-y* instead of *-i* in all singular nouns in the locative case and in feminine nouns in the dative case (eg, *na kony*, *na zemly*, *na poly* 'on the horse, on the land, on the field'); (14) the endings *-y*, *-yj*, *-em*, *-ex* in feminine plural nouns of the third declension and in a separate group of plural nouns (eg, *visty*, *vistyj*, *liudem*, *v očex* 'news (nom), news (gen), people (dat), in the eyes (loc)'); (15) hard endings in third-person verb forms (eg, *xodyt*, *xodjat* 'he walks, they walk'); (16) *-a-* instead of *-o-* in the roots of imperfective verbs (eg, *zarabljaty* 'to earn'); (17) the archaic infinitive ending *-čy* in verbs with the laryngeal *-h-*, and the velar *-k-* (eg, *sterečy*, *pečy* 'to guard, to bake') and archaic retention of *-h-*, *-k-* in the first person singular (eg, *mohu*, *peku* 'I can, I bake'); and (18) in past-tense verbs (and in the present tense of *buty* 'to be'), the first- and second-person singular and plural endings *-jem*, *-jes'*, *-s'mo*, *-s'te* (eg, *buvjem*, *buvj'es'*, *bulys'mo*, *bulys'te* 'I was, you [sing] were, we were, you [pl] were'). (See also *Orthography.)

O. Horbach

Zhelekhivsky, Andrii [Želexiv's'kyj, Andrij], b 11 December 1892 in Kiev gubernia, d 1943. Physicist. A long-time head of the physics department at Kharkiv University and the All-Ukrainian Association of Physicists (est 1926), he wrote several monographs and a university-level physics textbook. In 1943 he was executed by Soviet authorities.

Zhelekhivsky, Yevhen [Želexiv's'kyj, Jevhen] (Zhelekhovsky), b 24 December 1844 in Khyshyevychi, Lviv circle, Galicia, d 2 March 1885 in Stanyslaviv, Galicia. Lexicographer, folklorist, and community figure. After graduating from Lviv University (1869) he taught languages at Ukrainian gymnasiums in Peremysl (1870–2) and Stanyslaviv (1872–85). He was a founding member of the Prosvita so-

Yevhen Zhelekhivsky

cieties in Lviv and Stanyslaviv. Zhelekhivsky is renowned for his *Ukrainisch-Deutsches Wörterbuch*, one of the most important Ukrainian lexicographical works of the 19th century. Letters A–O were published in fascicles from 1882 on and in one volume in Lviv in 1884. Letters P–Ja were edited and supplemented by S. *Nedilsky and published posthumously as a second volume in 1886. The dictionary, which he began to compile in 1869, has approx 65,000 words and is based on the earlier Ukrainian dictionaries of M. Zakrevsky, M. Levchenko, F. Piskunov, and K. Sheikovsky; on published ethnographic collections; on contemporary literary and scholarly works and grammars; and on vernacular lexical data recorded by 92 correspondents, mostly from the *southwestern dialects. It also includes puristic terminological neologisms, many of them nonproductive. With its phonetic orthography it played a key role in forcing out the etymological orthography and *yazychiie* in Galicia and Bukovyna (see *Zhelekhivka). The dictionary was reprinted in Munich in 1982.

R. Senkus

Zhelekhovsky, Yustyn [Želexov's'kyj, Justyn], b 1821, d 1910. Greek Catholic priest and educator. He taught at a gymnasium in Peremysl and contributed to Russophile periodicals in Galicia. He wrote a biography of Bishop I. Snihursky (1894) and articles in church history. His memoirs were published in *Vistnyk Narodnoho doma* in 1909–10.

Zheliabov, Andrei [Željabov, Andrej], b 17 August 1851 in Mykolaivka, Teodosiia county, Tavriia gubernia, d 15 April 1881 in St Petersburg. Russian revolutionary populist of Ukrainian and Russian background. A graduate in law (1871) of Odessa University, Zheliabov is best known as a leading member of the populist terrorist organization *Narodnaia Volia and as one of the driving forces behind the assassination of Tsar Alexander II in 1881. He coauthored some of the group's programmatic proclamations, organized student, worker, and military circles of Narodnaia Volia, and edited its newspaper, *Rabochaia gazeta*. He maintained contacts with the Ukrainian Hromadas in Odessa and Kiev and with M. Drahomanov. Zheliabov was arrested in February 1881, shortly before the assassination of the tsar; he was later tried and executed for his participation in the plot.

Zheliabuzhsky, Ivan [Željabužskij], b 1638, d after 1709. Russian diplomat and statesman. In 1667 he participated in the conclusion of the Treaty of Andrusovo. In 1684 he was sent by Tsar Peter I to obtain an oath of alle-

giance from Hetman I. Samoilovych, and later that year he was appointed voivode of Chernihiv. His *Zapiski* (Notes, 1840) provide a reliable record of the workings of the Russian state in the late 17th century, particularly in the years 1694–1700.

Zheliezniak, Omelian [Željeznjak, Omeljan], b 21 August 1909 in Hrybova Rudnia, Horodnia county, Chernihiv gubernia, d 21 June 1963 in Kiev. Master of ceramic sculpture. He created ceramic toys; animal figurines; genre and historical compositions, such as *Gonta and His Sons* (1956), *Farewell to a Cossack*, and *Kozak-Mamai* (1962); and compositions inspired by the works of T. Shevchenko and N. Gogol, such as *I Was Nearly Fourteen* (1949) and *The Smith Vakula Riding on the Devil* (1954). P. Musiienko and N. Fedorovna's monograph about him was published in Kiev in 1970.

Zheliezniak, Yakiv [Željeznjak, Jakiv], b 10 April 1941 in Odessa. Marksman. He won the 1972 Olympic gold medal in the running-boar event; was a member of the USSR team that won world championships in 1962, 1966, and 1973–5; and was a European champion in 1965 and 1972–3 and a USSR champion in 1965–7 and 1971–6.

Zheltvai, Viktor [Želtvaj], b 1890 in Krachunovo, Transcarpathia, d 1974 in Uzhhorod, Transcarpathia oblast. Greek Catholic priest, educator, and civic activist. A graduate of the Uzhhorod Theological Seminary and the Budapest Pedagogical Academy, he served as director of the Uzhhorod Teachers' Seminary for Women (until 1934). He was a member of the Christian People's party and helped edit its newspapers *Nauka* (1919–22) and *Svoboda* (1922–38). A member of the Ruthenian Club (1919) and the Uzhhorod Prosvita society, he was closely associated with A. Voloshyn and other Transcarpathian Ukrainophiles. He wrote articles and popular brochures, such as *Rozdumai to dobre!* (Think It through Well!, 1921).

Zhelyborsky, Arsenii [Želybors'kyj, Arsenij] (secular name: Andrii), b 1618, d 1663. Orthodox bishop of Lviv (1641–63). He established a printing press at the St George's Cathedral in 1645, oversaw the publication of many church books there, and wrote *Pouchenie novosviashchennomu iereevi* (Instructions to a Newly Consecrated Hierarch, 1642). He also provided the first printing press for the Univ Monastery Press. In 1648 he was rumored to have sent material support to the B. Khmelnytsky forces, but during Khmelnytsky's siege of Lviv in 1648, he and his brother, Adam, served as Polish royal emissaries to the Cossacks. In 1658 he assisted Hetman I. *Vyhovsky in writing the Treaty of Hadiache.

Zhemchuzhnikov, Lev [Žemčužnikov], b 14 November 1828 in Pavlovka, Orel gubernia, Russia, d 6 August 1912 in Tsarskoe Selo, Russia. Russian painter and graphic artist; grandson of Count A. Rozumovsky. A graduate of the St Petersburg Academy of Arts (1852), he lived in Chernihiv and Poltava gubernias in 1852–6 and collected folklore there. He corresponded with and helped the exiled T. Shevchenko. Some of Zhemchuzhnikov's best works are devoted to Ukraine and are influenced by Shevchenko's poetry and art. They include the paintings *Kobzar by the Road* (1854), *Lirnyk Indoors* (1857), and *Cossack*

Lev Zhemchuzhnikov: *Kobzar by the Road* (watercolor, 1854)

Riding to the Sich (1887); the ink drawing *Woman Reaper* (1851); the watercolor portrait *Khymka Zabyiachykha* (1853); the sepia *Cossack in the Steppe* (1853); and the etchings *Ukrainian Girl* (1860), *Ukrainian Man* (1862), and *Abandoned Girl* (1869). Zhemchuzhnikov contributed to **Osnova* (1861–2) and put together an album of his own and other artists' etchings, as a supplement to *Osnova*; it was called **Zhivopisnaia Ukraina* (Picturesque Ukraine) in homage to Shevchenko's album of the same title. From 1875 to 1892 Zhemchuzhnikov was secretary of the Moscow Art Society. A book about him by L. Popova was published in Kiev in 1961, and his memoirs were published in Leningrad in 1971.

Zhenetsky, Stepan [Ženec'kyj], b 28 December 1913 in Mosty Velyki, Zhovkva county, Galicia. Journalist and writer. In the 1930s he contributed to Lviv papers, such as *Narodnia sprava* and *Novyi chas*, and was an assistant editor of *Nove selo*. As a postwar émigré he has been a leading member of the Organization for the Defense of Lemkivshchyna, has edited its organ *Holos Lemkivshchyny* (1958–64) in Yonkers, New York, and has contributed hundreds of articles, humorous stories, and reviews to various Ukrainian-American periodicals. Published separately were his humor and satire collection *Natsiia v pokhodi* (Nation on the Offensive, 1958) and the story collection *Hory mstiat'sia* (The Mountains Take Revenge, 1961).

Zherebko, Orest [Žerebko] (Zerebko), b 15 September 1887 in Horodenka, Galicia, d 23 February 1943 in Blaine Lake, Saskatchewan. Community leader. Zherebko arrived in Canada in 1900 and received a BA from Manitoba College in 1913, the first degree awarded to a Ukrainian in Canada. He continued his studies in Vienna (1913–16). Stranded by the First World War, he worked for the Vienna-based Union for the Liberation of Ukraine (SVU) and was reputed to have written the brochure *Ukrainci v Amerytsi* (Ukrainians in America) under the name O. Kyrylenko. He returned to Canada in 1917, and in 1938 was elected Liberal member of the Saskatchewan legislature for the Redberry constituency. An adherent of the hetmanite philosophy of V. *Lypynsky, he supported the Khliborobaska Ukraina publishing house in Vienna and

Orest Zhrebko

Archbishop Yurii
Zhevchenko

helped finance the publication of Lypynsky's *Lysty do brat'iv khliborobiv* (Letters to Brother Agrarians, 1926).

Zherela do istorii Ukraïny-Rusy (Sources on the History of Ukraine-Rus'). An 11-volume series published by the Archeographic Commission of the Shevchenko Scientific Society in Lviv from 1895 to 1924. The chief editor was M. Hrushevsky. Four volumes contain *illustrations*, detailed 16th- and 17th-century surveys of properties and economic and social conditions in Polish-ruled Western Ukrainian territories. Three contain documents pertaining to Galicia during the 1648–57 Cossack-Polish War. Three others contain documents on the history of the Cossacks to 1632, including reports from papal nuncios in Ukraine at the time. The final volume contains part of Ya. Markovych's diary from 1735 to 1740. Each of the volumes also contains a scholarly introduction and analyses by the volume editors, Hrushevsky, M. Korduba, S. Tomashivsky, and I. Krypiakievych.

Zheriv River [Žeriv] (also Zherev). A left-bank tributary of the Uzh River that flows eastward for 96 km in Zhytomyr oblast and drains a basin area of 1,470 sq km. The river, up to 5 m wide, has a meandering course. It is used for water supply and irrigation.

Zhevaho, Mykola [Ževaho], b 1907 in Kharkiv gubernia, d 1947 in Germany. Painter. He graduated in 1932 from the Kharkiv Art Institute, where he studied under M. Burachek, and he taught there in 1939–41. He painted landscapes, genre and historical paintings, and portraits, illustrated an edition of T. Shevchenko's 'Haidamaky,' and painted frescoes.

Zhevchenko, Yurii [Ževčenko, Jurij], b 17 February 1885 in the Yelysavethrad (now Kirovohrad) region, d ca 1938. Archbishop of the Ukrainian *Autocephalous Orthodox church (UAOC). A graduate of the Yelysavethrad Theological Seminary and Odessa University, he was ordained in 1911 and served as a chaplain in the Russian army (1914–17). During the period of Ukrainian statehood he organized church life in Kiev and was a member of the SS Cyril and Methodius Brotherhood. In 1919 he was chaplain at the Engineering Officer School in Kamianets-Podil'skyi. In 1920 he was one of the organizers of the All-

Ukrainian Orthodox Church Council. He was consecrated in 1922 and served as a bishop of the UAOC in Svyra (to 1924), Poltava (1924–7), and Odessa (1928–9). In 1929 he was arrested and sentenced to eight years' hard labor in Karaganda. His sentence was extended in 1937.

Zhezhava. A multi-occupational archeological site near Zhezhava (now Zelenyi Hai, Zalizchyky raion, Ternopil oblast). It was excavated in 1877 and 1882 by A. Kirkor and others and in 1931 by T. *Sulimirski. Remains of a Trypilian culture settlement, early and late Bronze Age burials, a 9th- to 7th-century BC settlement, an early Slavic settlement of the 6th to 7th century, and three Rus' burial grounds were unearthed at this site.

Zhezherin, Borys [Žežerin], b 27 July 1912 in Kiev. Architect. A graduate of the Kiev Civil-Engineering Institute (1937), he helped plan the reconstruction and expansion of Zhytomyr (1946) and Korosten (1948). He designed the sanatorium complex in Koncha-Zaspa (1949–50) and the Central Pavilion of the Construction Industry at the Republican Exhibition of Economic Achievements in Kiev (1956–7), and codesigned the Zhytomyr Ukrainian Music and Drama Theater (1966) and the Dnipropetrovske Opera and Ballet Theater (1974).

Zhinka (Woman). A monthly and then semimonthly newspaper of the *Union of Ukrainian Women, published in Lviv from January 1935 to May 1938. It contained articles on politics, culture, feminism, education, health, hygiene, home economics, fashion, and child rearing; prose; poetry; and reports on the activities of the union and the women's movement in Western Ukraine and elsewhere. *Zhinka* was edited by O. Fedak-Sheparovych and M. Rudnytska. Regular contributors included S. Rusova, Z. Mirna, K. Hrynevych, S. Parfanovych, I. Gurgula, M. Strutynska, and I. Nevytska. *Zhinka* was subject to Polish censorship, and in 1938 it and the union were suppressed by the Polish authorities. In its place **Hromadianka* was published in 1938–9.

Zhinocha dolia (Woman's Fate). A monthly (1925–6) and semimonthly women's magazine published and edited by O. Kysilevska in Kolomyia in 1925–39. It contained articles on the women's movement in Western Ukraine and elsewhere, feminism, health and hygiene, farming, home economics, child rearing, cultural and political issues, and the women's question in Soviet Ukraine. It also published a separate section about Ukrainian women in North America; the biweekly supplement *Zhinocha volia* (1932–9) for peasant women, edited by M. Stavnycha; the monthly **Svit molodi* (1934–9) for young people, edited by I. Vilde; and four annual almanacs (1927–30). Contributors included U. Kravchenko, S. Rusova, S. Parfanovych, N. Koroleva, M. Duchyminska, M. Omelchenko, D. Vikonska, and S. Yablonska. In 1930 the magazine had a circulation of 2,500.

Zhinochyi holos (Woman's Voice). A women's journal published monthly in Lviv in 1931–5 as a supplement to **Hromads'kyi holos*, and then monthly (to 1937) and semimonthly to 1939 as the organ of the Union of Ukrainian Working Women, an organization affiliated with the Ukrainian Socialist Radical party. Edited by F. Stakhova

with the assistance of I. Blazhkevych, N. Mykytchuk, and I. Muryn, it was concerned primarily with organizing working women in Western Ukraine and published articles on political affairs, child rearing, health, and hygiene, as well as literary works.

Various covers of *Zhinochyi svit*

Zhinochyi svit (Woman's World). A monthly organ of the Ukrainian Women's Organization of Canada, published in Winnipeg from January 1950 to 1973 and in Toronto since then. Before 1950 it appeared as a regular section in the newspaper *Novyi shliakh*. It contains reports on the organization's activities; articles on culture, history, and the women's movement; and a separate page devoted to children. The first editors included K. Kandyba-Lazor, N. Syniavska, and S. Bubniuk. The journal is now edited by a board.

Zhinochyi vistnyk. See Women's press.

Zhivaia mysl' (Living Thought). A Russophile monthly journal published from September 1902 to October 1905 in Lviv (a total of 25 issues). It argued that Ukrainians were part of the Russian nation, and it appeared in literary Russian, unlike many other Galician Russophile publications, which were printed in the artificial Ukrainian-Russian *yazychiie*. The editor was I. Svientsitsky, and the publisher was I. Savchak.

Zhivopisnaia Ukraina (Picturesque Ukraine). A series of etchings by T. Shevchenko depicting Ukrainian landscapes, significant events in Ukrainian Cossack history,

The title page of *Zhivopisnaia Ukraina* (etching by Lev Zhemchuzhnikov, 1861)

and scenes from peasant life. Only one album, of six etchings with commentary by Shevchenko, was published, in St Petersburg in 1844. Shevchenko planned to publish more albums but was unable to do so. In 1861–2 L. Zhemchuzhnikov published, under the same title, an album of 49 etchings by Russian and Ukrainian artists, such as I. Sokolov, K. Trutovsky, A. Beideman, and V. Vereshchagin, as a supplement to the St Petersburg journal *Osnova*.

Zhluktenko, Yurii [Zluktenko, Jurij], b 31 August 1915 in Oleksandrivka, Novomoskovske county, Katerynoslav

The cover of Yurii Zhluktenko's book on the Ukrainian language in Canada (1990)

gubernia, d 4 February 1990 in Kiev. Linguist and translator. After graduating from Kiev University (1946) he completed his graduate studies at the Moscow Pedagogical Institute of Foreign Languages (1954) and lectured at the Kiev Polytechnical Institute and the Kiev Institute of the National Economy, and served as dean of the Faculty of Romance-Germanic Philology (1968–75) and chairman of the English philology department, which he developed, at Kiev University. In 1975–80 he chaired the Romance-Germanic linguistic section he had helped found at the AN URSR (now ANU) Institute of Linguistics. He was one of the founders of comparative and social linguistics in Ukraine. Specializing in English-Ukrainian linguistic relations, he wrote books on the comparative grammar of English and Ukrainian (1960), Ukrainian contacts with English in the United States and Canada (1964), and the Ukrainian language in Canada (1990), and cowrote a book on the comparative grammar of English, Ukrainian, and Russian (1981) and on English neologisms (1983). Many of his articles deal with the syntactic and lexical influence of English on the mother tongue of Ukrainian immigrants in North America. As an educator he coauthored a textbook on Ukrainian for foreign students (1973, 1978) and edited a collection of articles on foreign-language teaching methods (1979). He was a founder (1979) of the translation periodical *Teoriia i praktyka perekladu* and translated Frisian prose and poetry into Ukrainian (*Vsesvit*, 1983, 1984).

T. Zakydalsky

Zhmailo, Marko [Žmajlo], b and d ? Cossack leader. On 5 November 1625 he headed a rebel army against Polish troops under the command of S. Konicpolski which had been sent to enforce Polish authority in Ukraine. The insurgent group was composed largely of non-registered Zaporozhian Cossacks who were veterans of the Khotyn campaign of 1621. Although the uprising failed to destroy the Polish force, it resulted in the adoption of the Treaty of Kurukove as a compromise with the Cossack *starshyna*. Zhmailo's subsequent fate is unknown.

Zhmerynka [Žmerynka]. IV-9. A city (1989 pop 43,100) and raion center in Vinnytsia oblast. It originated as a railway settlement during the construction of the Kiev-Balta railway line (1865). It was granted city status in 1903. During the revolutionary period Zhmerynka was a staging point of the Bolshevik forces advancing on Kiev (1917) and the site of Ukrainian-Bolshevik battles (1919). Today the city is an important railway junction, of several trunk lines. Besides various yards and plants servicing the railway, the city has a winery, a dairy, and a tobacco factory.

Zhohol, Liudmyla [Žohol', Ljudmyla], b 23 May 1930 in Kiev. Textile artist and art scholar. She studied at the Kiev State Art Institute (1948–50), graduated from the Lviv Institute of Applied and Decorative Arts (1954), and received her candidate's degree in 1965. She has designed decorative drapery and cover fabrics and created tapestries, such as *Sun* (1970), *Peacocks* (1970), *Ukrainian Autumn* (1975), *Beloved City* (1976), and *Native Spaces* (1982); batik panels, such as *Oranta* (1969), *Flowers* (1970), and *Birds* (1970); and the kilim *Wedding Wreath* (1971). She has written articles on decorative and applied art and books on textiles in interior design (1968) and decorative art in the contemporary interior (1986).

Archbishop Kypriian Zhokhovskyy (engraving by Oleksander Tarasevych)

Zhokhovskyy, Kypriian [Žoxovs'kyj, Kyprijan], b 1635 near Polatsk, Belarus, d 1693. Uniate metropolitan. He joined the Basilian order as a novice in Byten. From 1658 he studied in Rome, where he earned a doctorate in philosophy and theology and was ordained in 1663. He was in Ukraine from 1665, where he was archimandrite in Derman and then Dubno. In 1671 he was consecrated titular bishop of Vitsebsk; archbishop of Polatsk; and coadjutor to the Kievan metropolitan H. Kolienda (despite opposition from other bishops), whom he succeeded in 1674. As metropolitan he received confirmation for all the rights and privileges of the Uniate church from King Jan III Sobieski and oversaw the conversion of Lutske, Peremyshl, and Lviv eparchies to Catholicism. He was committed to improving the education of priests; renewing the seminary in Minsk; and founding a printing press in Vilnius, where liturgical and theological books and sermons would be printed. He also encouraged the cult of Y. *Kuntsevych. In 1680 he helped organize the Colloquium Lublinsense, a conference of Uniate and Orthodox representatives called by King Jan III Sobieski to attempt to resolve the religious divisions in Ukraine.

Pavlo Zholtovskyy (portrait by M. Shymchuk, tempera 1984)

Zholtovskyy, Pavlo [Žoltovs'kyj], b 8 December 1904 in Mysliatyn, Iziaslav county, Volhynia gubernia, d 30 August 1986 in Moscow. Art scholar. He graduated from the Kiev State Art Institute in 1932 and received his candi-

date's degree in 1955. An associate of the Lviv branch of the AN URSR (now ANU) Institute of Fine Arts, Folklore, and Ethnography, he wrote many articles on Ukrainian art and books on the artistic monuments of the liberation struggle of the Ukrainian people in 16th- to 18th-century Ukraine (1958), artistic metalwork (1972), artistic metal casting in 14th- to 18th-century Ukraine (1973), 17th- and 18th-century Ukrainian painting (1978), the arts in the 16th to 18th centuries (1983), the paintings of the Kievan Cave Icon Painting Studio (1982), and mural painting in 16th- to 18th-century Ukraine (1988). He registered, measured, and photographed hundreds of architectural monuments and acquired many artistic monuments for Ukraine's museums.

Oleksander Zholud: *Self-Portrait* (oil, 1989)

Zholud, Oleksander [Zholud'], b 1951 in Murom, Russia. Painter. He has lived in Ukraine since 1968 and graduated from the Kharkiv Industrial Design Institute in 1973. In the 1980s he began experimenting with intense colors and an expressionist brush stroke. His style has been influenced by the paintings of P. Picasso, M. Chagall, H. Matisse, F. Léger, and Ukrainian, Mexican, Indonesian, and African folk art. His recent works include *Faith, Hope,*

Love (1988), *Atelier* (1988), *Three Models* (1988), *Beauty Contest in a Provincial Town* (1989), and *Emancipation* (1989).

Zhorna (Millstones). A satirical magazine published semimonthly in Lviv in 1933–4. It was edited by R. Pashkivsky and illustrated by R. Chornii and L. Senyshyn.

Zhovkva. See Nesterov.

The Zhovkva Monastery

Zhovkva Monastery (Zhovkivskiy manastyr). A Basilian monastery and religious publishing center in Zhovkva (now Nesterov), Galicia. It was founded in 1682 on the initiative of the bishop of Lviv, Y. Shumliansky, and suffered a major fire in 1690. Rebuilt with the support of the Polish king Jan III Sobieski, it slowly gained stature through the 18th century. The monastery's most important period, however, was in 1895–1946, when it was the site of the Basilians' publishing activity (among the works published was the popular monthly journal **Misionar* and the scholarly **Analecta Ordinis S. Basilii Magni*). In 1939 approx 35 monks ran the monastery's press. The success of its publishing ventures allowed the monastery to undertake extensive renovations from 1907 and to engage Yu. Butsmaniuk during the 1930s to paint the church interior. After the Soviet occupation of Galicia, the monastery and press were closed down, and the monks living there were arrested. A catalog of the Monastery press's publications was published in *Analecta Ordinis S. Basilii Magni* (vol 5, 1967).

Zhovkva School of Artists. In the 17th and 18th centuries Zhovkva (now Nesterov) was one of the main art centers in Western Ukraine. Icon painters, such as D. Roievych, I. Rutkovych, T. Styslovych, V. and K. Petranovych, V. Biliansky, I. Starzhevsky, I. Poliakhovych, M. Krosovsky, and Mykolai, and wood sculptors, such as S. Piatynsky, S. Putiatytsky, Yu. Mykhailovych, and I. Stobensky, worked there. A biographical dictionary of Zhovkva masters was compiled by V. Svientsitska and published in *Ukraïns'ke mystetstvoznavstvo* (1967, no. 1).

Zhovnir, Ivan [Žovnir], 1855–1928. Civic and political figure. An early supporter of the Ukrainian socialist movement among workers in Galicia, he was a member of the CC of the Ukrainian Social Democratic party (1918–19) and a leading exponent of its independentist faction (the Vpered group). He was also a representative in the Ukrainian National Rada of the Western Ukrainian National

Republic and an organizer of the Sich Riflemen in the Peremyshl region.

Zhovten [Žovten']. IV-5. A town smt (1988 pop 3,600) on the Bystrytsia River in Tysmenytsia raion, Ivano-Frankivske oblast. It was first mentioned in a historical document in 1435. Until it was burned down by the Turks in 1594, it was called Cheshybisy. A new village, Yezupil, was built at the site. In 1939 it was renamed Zhovten and promoted to smt status. The town is a railway junction. Neolithic and Trypilian culture settlements and the remains of a medieval rotunda have been uncovered nearby.

Zhovten (October). A small organization of 'workers of proletarian culture,' founded in Kiev in 1924 by former members of the *Association of Panfuturists. Its declaration, signed by V. Desniak, V. Deviatnin, N. Denysenko, Ye. Kaplia-Yavorsky, Khrystyn, I. Le, S. Novin, T. Sliusarenko, Ya. Savchenko, V. Shum (Usenko), M. Tereshchenko, F. Yakubovsky, Yu. Yanovsky, and V. Yaroshenko, stated that the members could not support the writers' groups Pluh and Hart, because neither had a clearly defined program and therefore could not guarantee the full development of a proletarian culture in Ukraine. Zhovten failed to develop a group profile and disintegrated in 1926. Most of its members joined the *All-Ukrainian Association of Proletarian Writers.

Zhovten' (right) and *Dzvin*

Zhovten' (October). The monthly journal of the Writers' Union of Ukraine in Lviv. It was first published, from September 1940 to June 1941, under the name *Literatura i mystetstvo*. It was revived in July 1945 as *Radians'kyi L'viv*, and it was renamed *Zhovten'* with the February 1951 issue. The chief editors have been O. Desniak (1940-1), M. Bazhan (1945-51), Yu. Melnychuk (1951-63), R. Bratun (1963-6), M. Romanchenko (1966-8), and R. Fedoriv (since 1968); R. Lubkivsky (1966-80) and M. Ilnytsky (since 1980) have served as deputy chief editors. *Zhovten'* has published prose, poetry, humor, satire, literary translations (eg, of S. Lem, P. Verlaine, T.S. Eliot, B. Brecht, R.M. Rilke, G. Lessing, W. Faulkner, Michelangelo, Petrarch, C.-P. Baudelaire, R. Frost, J.W. von Goethe), articles on Western

Ukrainian literary and cultural figures, reminiscences, archival materials by and on deceased writers, literary criticism, book reviews, articles on Ukrainian ethnography, art, and theater, commentaries on social issues, news of cultural events and developments, and critiques and exposés of 'Ukrainian bourgeois nationalism.' Among its contributors have been many prominent Soviet Ukrainian writers born or living in the western Ukrainian oblasts. P. Kozlaniuk, P. Panch, M. Stelmakh, H. Tiutiunyk, I. Vilde, V. Gzhytsky, P. Zahrebelny, R. Ivanychuk, Fedoriv, Valerii Shevchuk, V. Yavorivsky, S. Pushyk, and N. Bichuia originally published one or more of their major novels in *Zhovten'*. Since the mid-1980s the journal has played an important role in filling in the 'blank spots' in Western Ukrainian literature and history. It was renamed *Dzvin* in 1990.

R. Senkus

Zhovten Theater in Petrograd-Leningrad. A theater established as the Petrograd Ukrainian Drama Theater in November 1917 on the initiative of the local Ukrainian Hromada. In 1919-24 the theater had the name Shevchenko Ukrainian Communist Theater. In 1924 it joined with the Petrograd Ukrainian Drama Theater (est 1923) to form the Unified Ukrainian Theater, and staged classical and contemporary Ukrainian dramas. In 1929 it ceased its activities, but later that year it was reconstituted as the Leningrad Zhovten Theater, under the auspices of the RSFSR People's Commissariat of Education. Its repertoire consisted mostly of contemporary Ukrainian plays, as well as L. Kurbas's adaptation of T. Shevchenko's poem *Haidamaky* and O. Vyshnia's adaptation of S. Hulak-Artemovsky's opera *Zaporozhian Cossack beyond the Danube*. Leading members were D. Rovynsky, Ye. Kokhanenko, F. Levytsky, Ye. Sydorenko, D. Shostakivsky, and the musicians Yu. Meitus and P. Kozytsky. The Zhovten Theater was active until 1932.

Zhovtenia (Child of [the] October [Revolution]). A monthly magazine for young children, published in Kharkiv (1928-9) and Kiev (1929-41) by the Central Bureau of the Communist Children's Movement, the Communist Youth League of Ukraine, and the People's Commissariat of Education. In 1935 the magazine **Tuktuk* was merged with it.

Zhovti Vody [Žovti Vody]. V-14. A city (1989 pop 62,400) on the Zhovta River in Dnipropetrovske oblast. It originated as a mining town at the end of the 19th century and was first called Zhovta Voda. In 1957 the town was given city status and was renamed. Its main industry is iron-ore mining. It also manufactures radios and synthetic furs.

Zhovti Vody, Battle of. A battle between B. Khmelnytsky's forces and the Polish army, on 16 May 1648, in the swampy upper reaches of the Zhovta River (an eastern tributary of the Inhulets River), near what is now Oleksandriia. Khmelnytsky commanded 8,000 Zaporozhian Cossacks, 4,000 to 5,000 registered Cossacks (who joined him after his first victories over the Poles), and approx 4,000 Crimean Tatars led by Tuhai-Bei. The Polish army, commanded by S. Potocki and J. Szembek, was surrounded and defeated; approx 3,000 Poles were taken prisoner, along with two commanding officers. The victory heralded Cossack successes in the *Cossack-Polish War.

Mykhailo Zhovtobriukh

Andrii Zhuk

Zhovtobriukh, Mykhailo [Žovtobriukh, Myxajlo], b 17 November 1905 in Ruchky, Hadiache county, Poltava gubernia. Linguist. A graduate of the Dnipropetrovske Institute of People's Education (1929), he worked at the AN URSR (now ANU) Institute of Linguistics from 1959 to 1988 and served as head of its Department of Ukrainian Language Theory and Structural-Mathematical Linguistics. He has written over 300 works, including textbooks on modern Ukrainian (1949, 1961), a history of Ukrainian phonetics (1956), and books on the language of the Ukrainian press to the mid-1890s (doctoral diss, 1963) and in the late 19th and early 20th centuries (1970) and on literary Ukrainian (1984). He is the coauthor of textbooks on the Ukrainian language (1st edn 1959) and Ukrainian historical grammar (1957, 1962) and of books on Ukrainian and Russian comparative grammar (1957, 1962, 1978), modern Ukrainian phonetics (1969) and vocabulary and phraseology (1973), modern Ukrainian morphology (1975), the syntax of the word group and the simple sentence (1975), the history of Ukrainian phonetics (1979), word formation in modern Ukrainian (1979), and the East Slavic languages (1987). He also edited a dictionary of H. Kvitka-Osnovianenko's language (1978) and coedited a collection of 18th-century Ukrainian private letters (1987).

Zhuchenko, Fedir [Žučenko], b ? in Poltava, d 1709 in Paris. Political activist. He is mentioned in the 'Register of the Entire Zaporozhian Army' as a Cossack who participated in the B. Khmelnytsky uprisings. In 1659 he spoke out against I. Vyhovsky, and in 1659–91 he intermittently held the post of colonel of Poltava regiment. He supported Yu. Khmelnytsky and I. Samoilovych and participated in the 1678 Chyhyryn campaign and the 1687 and 1689 Crimean campaigns. He opposed I. Mazepa and supported V. Kochubei and I. Iskra. For his support of P. Petryk he was removed from his post, but he remained a 'notable and recognized military fellow.'

Zhuchenko, Mykhailo [Žučenko, Myxajlo], b 1840, d 1880. Lawyer and civil activist. As a law student at Kharkiv University he was active in the Ukrainophile movement and organized Sunday schools. After becoming a lawyer he often defended populists against political charges. He was one of the founders and chief financial supporters of the *Shevchenko Scientific Society in Lviv.

Zhuk, Andrii [Žuk, Andrij] (pseud: A. Andriienko, A. Ilchenko, A. Khrushch, A. Vovchansky), b 14 July 1880 in Vovchyk, Lubni county, Poltava gubernia, d 3 September 1968 in Vienna. Political and co-operative activist and journalist. He was active in the *Revolutionary Ukrainian party (1901–5) and a key organizer of the Union of Ukrainian Railwaymen in Kharkiv. For his involvement he was imprisoned from December 1903 to July 1904. He was elected secretary-general of the *Ukrainian Social Democratic Workers' party (USDRP) at its founding congress in December 1905, and he contributed to the party's organs *Sotsiial-demokrat*, *Vil'na Ukraïna*, *Borot'ba*, and *Slovo*. After being imprisoned again, from August 1906 to January 1907, he was released on bail, and he evaded his trial by escaping in October 1907 to Austrian-ruled Galicia.

While living in Lviv Zhuk headed the USDRP Foreign Group until 1911 and edited the co-operative journal *Ekonomist* (1909–14) and its monthly supplement *Samo-pomich*. He was active in the Prosvita and Silskyi Hospodar societies and contributed to social democratic organs, such as *Zemlia i volia* and *Pratsia*, and to the Ukrainian dailies *Dilo* in Lviv and *Rada* in Kiev. In 1912 he initiated the creation of the Ukrainian Information Committee, dedicated to popularizing the Ukrainian cause in Europe, and was elected its secretary. That year he was expelled from the USDRP.

From 1914 Zhuk lived in Vienna, where he cofounded the *Union for the Liberation of Ukraine, directed its Central Bureau, and managed its publications and contacts with Galicia's Ukrainians. He also served as a member of the *Supreme Ukrainian Council (1914–15), the *General Ukrainian Council (1915–16), and the Central Administration of the Ukrainian Sich Riflemen (1917–22), and as a special commissioner of the Hetman government (1918) and director of the Vienna office of the UNR Ministry of Foreign Affairs (1918–20). Zhuk was also a member of the executive of the *Union of Ukrainian Journalists and Writers Abroad and vice-president of the Committee for the Defense of Western Ukrainian Lands (est 1922). From 1930, in Lviv, he was director of the Bureau of Co-operative Statistics of the *Audit Union of Ukrainian Co-operatives, a member of the executive and the editor of the *Khortytsia co-operative publishing house, secretary of the *Society of Ukrainian Co-operative Leaders (1936–9), and editor of *Kredytova kooperatsiia* (1938–9), the organ of Tsentrobank in Galicia. After fleeing the Soviet occupation of Galicia in 1939, from 1940 he again lived in Vienna. Zhuk wrote many articles on ideological, political, economic, and co-operative topics, as well as firsthand accounts of the Ukrainian national movement before 1920. He also wrote brochures on Ukrainian co-operatives in Galicia (1913), the Ukrainian economic and co-operative press (1931), and Ukrainian co-operatives in Poland (1934) and edited a collection of reminiscences about S. Petliura in his youth (1936). The Andrii Zhuk Collection of books and invaluable documents and archival materials amassed by him is preserved at the Public Archives of Canada.

R. Senkus

Zhuk, Anna [Žuk] (née Nedilko), b 1882 in Vytivka, Poltava county, d 17 January 1976 in Vienna. Political and community figure. While working as a teacher in Kharkiv gubernia in the 1900s, she was a member of the clandestine Revolutionary Ukrainian party and the Ukrainian

Social Democratic Workers' party. For her involvement she spent over a year in a tsarist prison around 1907–8. An émigré from 1909, she married A. *Zhuk and lived in Lviv and Vienna. In Vienna she cofounded the *Ukrainian Women's Union, which she headed in 1922–7 and again in 1963–4.

Zhuk, Irenei. See Zuk, Ireneus.

Zhuk, Liuba. See Zuk, Luba.

Mykhailo Zhuk

Semen Zhuk

Zhuk, Mykhailo [Žuk, Myxajlo], b 2 October 1883 in Kakhivka, Tavriia gubernia, d 7 June 1964 in Odessa. Painter, graphic artist, and writer. He studied at the Kiev Art School (1896–9), the Moscow School of Painting, Sculpture, and Architecture (1899–1900), and the Cracow Academy of Fine Arts (1900–4). From 1905 he taught art in Chernihiv. Zhuk produced many portraits, some of which incorporated cubo-futurist faceting of surfaces (eg, his 1919 portraits of P. Tychyna and L. Kurbas). While teaching at the Odessa Art School (1925–53) he produced a series of 20 lithographic portraits of Ukrainian writers (1925–6), including H. Skovoroda, T. Shevchenko, P. Kulish, I. Franko, M. Kotsiubynsky, and M. Zerov, using formalistic simplification of volumes; created a portrait etching series of Ukrainian artists (1932), including V. Borovykovsky, O. Novakivsky, F. and V. Krychevsky, H. Narbut, and M. Boichuk; and designed posters, bookplates, and book covers, and ceramic designs inspired by folk art.

Zhuk also wrote the poetry collection *Spiivy zemli* (Sings of the Earth, 1912) and contributed poems, stories, fairy tales, plays, and criticism to Ukrainian journals. An album of his works, edited by I. Kozyrod and S. Shevelov, was published in Kiev in 1987.

Zhuk, Radoslav. See Zuk, Radoslav.

Zhuk, Roman [Žuk], b 1955 in Kolomyia, Ivano-Frankivske oblast. Postmodernist painter. He graduated from the Lviv Institute of Applied and Decorative Arts (1978) and taught there in 1978–82. Influenced by both Renaissance and postmodern art, he has created oil paintings in which the symbolism is multifaceted. They include *Chickens* (1972), *She Who Sleeps* (1982), *My Parents* (1987), *Chameleons* (1987), *Cats* (1988), *Nude Woman* (1988), and *Amazon* (1988). He had a solo exhibition in Lviv in 1989.

Roman Zhuk: *Cats* (oil, 1988)

Zhuk, Semen [Žuk], b 16 May 1893 in Kremianets county, Volhynia gubernia, d 26 June 1941 in Sambir, Galicia. Civic and political leader, journalist, and co-operative organizer. A former member of the Ukrainian Party of Socialist Revolutionaries, he was vice-president of the Ukrainian Socialist Radical party and its deputy to the Polish Sejm (1928–30). After serving a prison term for his political activities (1931–3), he was director of the Ukrainian Co-operative Bank in Pochaiv. At the beginning of the German invasion of Soviet Ukraine he was shot by the retreating Soviet secret police.

Zhuk, Serhii [Žuk, Serhij], b 19 October 1885 in Shvaikyna Balka, near Poltava, d in the 1950s in Germany. Sculptor and writer. He became interested in painting and sculpting as a student at St Petersburg University and produced his first sculptures in 1907. In 1916 he founded the Ukrainian Literary and Artistic Society in St Petersburg. After returning to Kiev in 1918, he taught art there and helped set up the Ukrainian State Academy of Arts. In the interwar period he produced many monuments and wrote poetry, stories, and reviews. In 1943 he moved to Lviv. He was a postwar refugee in Vienna and Augsburg. Among his works are busts of Christ, M. Kropyvnytsky, and M. Zankovetska.

Zhuk, Serhii [Žuk, Serhij], b 4 April 1892 in Kiev, d 1 March 1957 in Moscow. Specialist in hydrology and hydro-technology; full member of the USSR Academy of Sciences from 1953. He studied in St Petersburg and was a major general of engineering units in the Red Army. Zhuk headed numerous major hydro-engineering projects, including the Moscow Canal, the Volga-Don Complex, the Volga-Baltic Waterway, and the Lenin Hydroelectric Station on the Volga, as well as the Uglich, the Rybinsk, and other hydroelectric stations. In 1942 he became director of the All-Union Hydroelectric Project Surveying and Scientific Research Institute, which in 1957 was named after him.

Zhuk, Yosyf [Žuk, Josyf], b 1872 in Galicia, d 23 February 1934 in St Petersburg, Florida. Orthodox bishop. He completed a D TH and was ordained a Greek Catholic priest in 1899. He served as prefect (from 1902) and then rector (1907–8) of the Greek Catholic Theological Semi-

nary in Lviv before becoming Greek Catholic vicar-general in Bosnia (1908–14) and then pastor of St Barbara's Church in Vienna (1914–20). He emigrated to North America, where he served as a priest in Toronto (1921–2), Montreal, and Philadelphia (1923–4). A popular priest with a large following, he rejected the Latinizing policies of Bishop K. Bohachevsky and in 1927 led a group of 26 priests in demanding Bohachevsky's removal. He subsequently concentrated on organizing the new Ukrainian Orthodox Church of America, which recognized the authority of the patriarch of Constantinople. In 1932 he was consecrated as the first bishop of the jurisdiction by two Syrian bishops.

Zhukov, Georgii [Žukov, Georgij], b 1 December 1896 in Strelkovka, Kaluga gubernia, d 18 June 1974 in Moscow. Marshal of the Soviet Union. He commanded the Soviet troops fighting the Japanese in Mongolia in 1939 and then was in charge of the Kiev Military District. In 1941 J. Stalin selected him to be chief of general staff and deputy defense minister. When Gen N. Vatutin was mortally wounded by a UPA unit, Zhukov was given command of the First Ukrainian Front (March–May 1944). He formally accepted Germany's surrender and became the supreme Soviet commander in Germany. In 1946 he was commander of Soviet land forces and deputy defense minister. Having played an important role in the power struggle after Stalin's death, he was forced into retirement in 1957.

Zhukov, Konstantin [Žukov], b 1873, d 7 March 1940. Russian architect. In 1887 he graduated from the Moscow School of Painting, Sculpture, and Architecture. In the early 1900s he designed several buildings in Crimea. He also designed the building of the Kharkiv Art School (1913), which has characteristic features of the Ukrainian Moderne, and residential buildings in Vovchanske and Kharkiv.

Zhukovich, Platon [Žukovyč], b 26 September 1857 in Pruzhany, Hrodna gubernia, Belarus, d 13 December 1919 in Petrograd. Belarusian church historian; full member of the Shevchenko Scientific Society from 1910 and of the St Petersburg Academy of Sciences from 1918. He graduated from the St Petersburg Theological Academy in 1881 and taught at seminaries in Polatsk (1881–3) and Vilnius (1883–91) before becoming a lecturer (1891–4) and then professor (1894–1918) at the St Petersburg Theological Academy. His major work was *Seimovaia bor'ba zapadno-russkogo dvorianstva s tserkovnoi uniei* (The Parliamentary Struggle of the Western-Ruthenian Nobility against the Church Union, 6 parts, 1901–12). He also wrote articles on the Church Union of Berestia and on Y. Kuntsevych, K. Ostrozky, and Y. Rutsky, and published an important collection of materials on the Lviv and Kiev church sobors of 1629 (*Zapiski Akademii nauk po Istoricheskofilologicheskoi otdelenii*, vol 7, no. 15). A bibliographical article on Zhukovyč by K. Kharlampovych appeared in *ZIFV*, vol 6 (1925).

Zhukovsky, Antin [Žukovs'kyj] (Anthony Zukowsky), b 27 September 1904 in Pomoriany, Zboriv county, Galicia, d 8 January 1984 in Warren, Michigan. Physician and civic leader. A graduate of Cracow University (1936), he practiced medicine in Zolochiv, Brody, and Radekhiv counties. Because of his political and civic work he was ar-

Antin Zhukovsky

Arkadii Zhukovsky

rested twice by the Polish authorities and imprisoned in Bereza Kartuzka. Having been conscripted by the Germans, he served as a regimental doctor in the Division Galizien. A postwar refugee in Germany, he organized the *Ukrainian Medical Charitable Service and directed a DP hospital in Dillingen. In 1949 he emigrated to the United States and settled in Steele, North Dakota, where he was president of the local branch of the Ukrainian Congress Committee of America.

Zhukovsky, Arkadii [Žukovs'kyj, Arkadij] (Joukovsky), b 12 January 1922 in Chernivtsi, Bukovyna. Historian; member of the Shevchenko Scientific Society (NTSh) since 1972, and foreign member of the Ukrainian Academy of Sciences since 1991. A postwar émigré, he was active in Ukrainian student organizations, particularly as head of the Union of Ukrainian Student Societies in Austria (1947–9) and member of the executive of the Central Union of Ukrainian Students (from 1948), and completed his studies in Graz (1949). He was head of Zarevo (1955–8) and general secretary of the Ukrainian Academic Society in Paris (from 1959). He continued his studies at the Ukrainian Free University (PH D, 1969) and the Sorbonne (PH D, 1976). In 1960 he began teaching at the Institut national des langues et civilisations orientales in Paris, and in 1969, at the Ukrainian Free University in Munich, where he later became prodean of the Faculty of Philosophy. From 1968 he was scientific secretary of NTSh in Europe, and in 1987 he became its head. In 1983 he became president of the *Petliura Ukrainian Library in Paris.

Zhukovsky is renowned as a historian of Bukovyna and of the Ukrainian Autocephalous Orthodox church, which appointed him as a member of its Metropolitan's Council. His publications in those areas include the sections on Bukovynian history in *Bukovyna: Ňi mynule i suchasne* (Bukovyna: Its Past and Present, 1956); a report on the state of religion in the Ukrainian SSR (*ZNTSh*, vol 181 [1966]); and the introduction to *Martyrolohiia ukrains'kykh tserkov* (Martyrology of the Ukrainian Churches, vol 1 of the encyclopedic *Ukrains'ka Pravoslavna Tserkva* [The Ukrainian Orthodox Church], 1987). He also wrote the monograph *Petro Mohyla i pytannia iednosti Tserkov* (P. Mohyla and the Question of Union of the Churches, 1969) and a critical analysis of Mohyla's *trebnyk* in the republished *Trebnyk Petra Mohyly* (1988). Other works by Zhukovsky in the field of history include 'Contributions à l'histoire de l'Académie de Kiev (1615–1817), centre culturel et d'en-

seignement en Europe Orientale' (PH D diss, 1976) and 'L'Ukraine dans les années 1917–1933: Aspect historique' in *Actes du colloque La Renaissance nationale et culturelle en Ukraine de 1917 aux années 1930* (1986, which he also co-edited), as well as articles on the Ukrainization policy, the 1932–3 man-made famine in Ukraine, M. Hrushevsky and the journal *Ukraina*, and the nationalist polemics of M. Drahomanov and B. Hrinchenko.

A longtime associate of *Entsyklopediia ukraïnoznavstva* (or *EU*, Encyclopedia of Ukraine, 10 vols, 1955–84), Zhukovsky became a member of its editorial board in 1971 and its editor in chief after the death of V. Kubijovyč in 1985. As member of the *Encyclopedia of Ukraine* (or *AEU*, 5 vols, 1984–93) editorial board from 1976 and subject editor for religion and history, he contributed a multitude of entries to that work. Zhukovsky and O. Subtelny's article on the *history of Ukraine in *AEU* (vol 2, 1988) was translated, updated, and published in Lviv as *Narys istorii Ukraïny* (1991).

D.H. Struk

Herman Zhukovsky

Col Oleksander Zhukovsky

Zhukovsky, Herman [Žukovs'kyj], b 13 November 1913 in Radziviliv (now Chervonoarmiiske), Dubno county, Volhynia oblast, d 15 March 1976 in Kiev. Composer and pedagogue. He graduated from the Kiev Conservatory (1941) in the composition class of L. Revutsky and later (1951–8) taught music theory at the same institution. His works include the operas *Maryna* (1939), *From a Sincere Heart* (1951), and *First Spring* (1959); the ballets *Rostyslava* (1955), *The Forest Song* (1961), and *The Maiden and Death* (1971); and symphonic suites, cantatas, chamber music, choruses, art songs, arrangements of Ukrainian folk songs, and film scores.

Zhukovsky, Ivan [Žukovs'kyj], b 1810, d 1884 in Pidberetzi, Lviv county, Galicia. Ukrainian Catholic priest and pedagogue. A graduate of Lviv (1830) and Vienna (1834) universities, he was a priest in Lviv and a teacher at the Academic Gymnasium of Lviv (1848–52). At the *Congress of Ruthenian Scholars in 1848, he presented a project for a Ukrainian orthography based on a phonetic system of transcription. This project was rejected, and the congress instead advocated the adoption of the *Maksymovychivka* etymological orthography. Zhukovsky later served as canon of the metropolitans' consistory and then as a parish priest in Pidberetzi.

Zhukovsky, Ivan [Žukovs'kyj], b 4 March 1901 in Kitsman, Bukovyna, d 4 December 1980 in New York. Architect and civil engineer. He studied in Prague (1926) and had his own architectural office in Chernivtsi (1930–41), where he reconstructed the theater of the People's Home. He emigrated to Germany and then to the United States (1950), where he was active in Ukrainian community life. He served as president of the Ukrainian Engineers' Society of America (1958–9) and taught at the Ukrainian Technical Institute in New York. He designed the St John the Baptist Ukrainian Catholic Church in Hunter, New York, and the ss Peter and Paul Ukrainian Orthodox Church in Glen Spey, New York. He published a number of books, including Ukrainian-German dictionaries.

Zhukovsky, Oleksander [Žukovs'kyj] (Zhukivsky), b 1884, d 1925. Colonel of the Army of the UNR and political activist. He was a 'centrist' member of the Ukrainian Party of Socialist Revolutionaries (UPSR) and a member of the Central Rada and the General Military Committee in 1917. He became an adjutant to the UNR minister of defense and the minister of labor in January 1918, and in February he himself became minister of defense. In early 1919 he commanded an independent border corps and led the Kamianets-Podilskyi garrison. He emigrated in 1919 to Prague and then to Vienna, where he became secretary of the Foreign Delegation of the UPSR and worked closely with M. Hrushevsky.

Zhukovsky, Vasiliï [Žukovs'kyj, Vasilij], b 9 February 1783 in Mishenskoe, Tula gubernia, Russia, d 24 April 1852 in Baden-Baden. Russian Romantic poet and translator. As a tutor at the tsar's court from 1815 to 1839, he used his influence to help buy T. Shevchenko's freedom from serfdom. In fact, it was a portrait of Zhukovsky, painted by K. Briullov, which was raffled to collect the necessary funds. Shevchenko dedicated the poem 'Kateryna' to him. Zhukovsky's works have been translated into Ukrainian by P. Hrabovsky and M. Rylsky.

Zhukovsky, Yevhen [Žukovs'kyj, Jevhen], b 1868 in Kitsman, Bukovyna, d 7 April 1944 in Chernivtsi. Agronomist, teacher, and community activist. A graduate of the Higher School of Agriculture in Vienna, he served as director of the agricultural school in Kitsman, the only secondary school of agronomy in Galicia and Bukovyna, in 1896–1918. He then held a post in the Ukrainian Bukovynian government. After being released from his post by the Rumanian authorities he continued to be active in various community and cultural organizations. He published *Uchebnyk ril'nytstva* (Textbook of Agriculture, 1903), which provides a valuable compendium of Ukrainian terminology. He also published numerous articles on agriculture in Ukrainian and German.

Zhuky [Žuky]. A village 10 km north of Poltava. In 1658 Hetman I. Vyhovsky's forces crushed those of Col M. Pushkar, a supporter of Muscovy, at Zhuky. From April to July 1709 the Swedish king Charles XII made his headquarters there. S. Velychko lived in Zhuky in 1708–28 and wrote some of his chronicle in the village.

Zhuliany [Žuljany]. III-11. The southwestern district of Kiev. The settlement Zhelannia was situated there during

the period of Kievan Rus'. During the 17th and 18th centuries the land there was owned by the Kievan St Sophia Monastery. In the fall of 1918 the Sich Riflemen fought the troops of the Hetman government on the site. On 29 August 1919 the united forces of the UNR Army and the Ukrainian Galician Army routed the Bolsheviks at Zhuliany before taking Kiev. During the Soviet period the airport at Zhuliany (est 1924) serviced only internal flights connecting Kiev with the oblast centers of Ukraine.

Zhulkevsky, Ivan [Žulkevs'kyj], b 17 August 1919 in Proskuriv (now Khmelnytskyi), Podilia gubernia. Actor. He has worked in the Khmelnytskyi Ukrainian Music and Drama Theater (1947–52, and since 1963), the Stryi Ukrainian Music and Drama Theater (1952–9), and the Lviv Philharmonic (1959–63).

Mykola Zhulynsky

Col Dmytro Zhupinas

Zhulynsky, Mykola [Žulyns'kyj], b 25 August 1940 in Novosilky, Mlyniv raion, Rivne oblast. Literary scholar and critic; full member of the ANU since 1992. He graduated from Kiev University in 1968 and completed postgraduate studies at the Institute of Literature of the AN URSR (now ANU). In 1991 he was appointed director of the Institute of Literature, and in 1992 he was appointed state adviser to Ukraine on policies pertaining to the humanities and then a deputy prime minister. He is the author of a number of critical essays in Russian and Ukrainian, published in the collection *Nablyzhennia* (The Approach, 1986), and from the mid-1980s he was one of the leading scholars who demanded that works excised from the Ukrainian canon under L. Brezhnev and J. Stalin be once again brought into prominence. His numerous articles on V. Vynnychenko, M. Khvylovy, M. Ivchenko, and others have been published mainly in *Literaturna Ukraina*, and he has delivered papers at plenums of the Ukrainian Writers' Union. In 1992 he was awarded the Shevchenko State Prize for his latest book of literary history, *Iz zabuttia v bezsmertia* (From Oblivion to Immortality, 1990).

Zhupa. The Slavic word for the territorial-administrative districts in Hungary and Czechoslovakia known as *komitats.

Zhupa (Polish: *zupa*). The name given to the larger salt mines and salt-processing facilities in medieval Poland. They were owned by the crown and administered by appointed officials called *zhupnyky* or leased out to church-

men or other notables. Brine from underground pools was evaporated in large cauldrons, and the remaining salt was shaped in conical forms. On Ukrainian territories there were *zhupy* in Sambir, Peremyshl, and Sianik.

Zhupinas, Dmytro [Župinas], b 1892, d ? Military commander. A lieutenant colonel in the UNR Army, he commanded the 1st Odessa and the 24th Sahaidachny Zaporozhian infantry regiments and the Combined Zaporozhian Cavalry Regiment in the First Winter Campaign, as well as the 2nd regiment of the Separate Cavalry Division. He emigrated to the United States in 1952.

Zhurakhovych, Semen [Žuraxovyč], b 6 November 1907 in Sokilka, Kobeliaky county, Poltava gubernia. Writer. Since 1948 he has published many books of stories and novelettes, the most recent being in 1987, and the novel *Kyivs'ki nochi* (Kievan Nights, 1964). He was awarded the Yanovsky Prize in 1985, and a two-volume edition of his selected works appeared in 1987.

Zhurakovsky [Žurakovs'kyj]. A family line of noblemen and Cossack *starshyna* in Left-Bank Ukraine. Mykhailo Zhurakovsky was a captain of Sosnytsia regiment (1649). His son, Yakiv Zhurakovsky (d 1704), was a captain of Hlukhiv company and then colonel of Nizhen regiment (1678–85); he fought in the *Chyhyryn campaigns of 1677–8. Yakiv's sons were Lukiian (colonel of Nizhen regiment in 1701–18) and Vasyl *Zhurakovsky. Lukiian's grandson was Andrii Zhurakovsky, the last colonel of Nizhen regiment (1774–82). Also a member of the line was Irodion Zhurakovsky (d 1736), the bishop of Chernihiv in 1722–33.

Zhurakovsky, Vasyl [Žurakovs'kyj, Vasyl'], b ?, d 1730. Cossack leader. He was general osaul (1710–24) under Hetman I. Skoropadsky and a close associate of P. Polubotok. After Polubotok's departure for St Petersburg in 1723, Zhurakovsky and the general standard-bearer Ya. Lyzohub governed the Hetmanate. He relayed the *Kolomak Petitions to Polubotok in St Petersburg, with the consequence that Polubotok was taken into custody in 1723. The Russian investigator A. Rumiantsev charged Zhurakovsky with conspiracy to promote the autonomy of Ukraine, and Zhurakovsky was imprisoned in St Petersburg (1724–5), after which period he lived in exile in Moscow. Through the intercession of D. Apostol he was allowed to return to Ukraine in 1728.

Zhuravel, Andrii [Žuravel', Andrij], b 1892, d after 1938. Physician. In 1918 he was a member of the Central Rada and of the Ukrainian Sanitation Commission in Berlin. In the 1930s he was a docent at the Ukrainian Tuberculosis Institute in Kharkiv. He was arrested in 1938, and his further fate is unknown.

Zhuravli (The Cranes). A male chorus, founded 1972 in Warsaw by Ya. *Poliansky, the ensemble's first artistic director and conductor. Since 1983 the chorus has been conducted by R. Revakovych. The chorus is affiliated with the Ukrainian Social and Cultural Society in Poland. It has appeared in Warsaw and other Polish cities and has toured Czechoslovakia, the United States, Canada, and Ukraine. Its repertoire incorporates a variety of eras and genres, including folk and historic songs, church music, classical

and romantic pieces, and contemporary works. The group performs compositions by D. Bortniansky, A. Vedel, M. Lysenko, M. Leontovych, K. Stetsenko, I. Vorobkevych, P. Nishchynsky, and P. Maiboroda and arrangements of Ukrainian folk songs by O. Koshyts, A. Avdiievsky, and Ya. Poliansky. It has released several recordings.

Zhuravlivka, Battle of. A military engagement on 26 December 1919 at Zhuravlivka village, Bratslav county, Podilia gubernia, in which the Third Iron Division of the UNR Army defeated the 45th Division of the Red Army and forced it to retreat toward Tulchyn.

Zhuravno, Treaty of. A peace agreement between Poland and Turkey signed on 27 October 1676 at the town of Zhuravno (now in Zhydachiv raion, Lviv oblast). It canceled the annual tribute that had been imposed on Poland by the Buchach Peace Treaty of 1672. By the new agreement Poland recognized the Turkish annexation of Podilia and Hetman P. Doroshenko's right to most of Right-Bank Ukraine, except for the territory of the former Bila Tserkva and Pavoloch regiments. The Polish Sejm refused to ratify the treaty, however, and hostilities between Poland and Turkey continued until 1699.

Zhuravsky, Dmytro [Žuravs'kyj], b 1810 in Mahiliou gubernia, Belarus, d 23 November 1856 in Kiev. Statistician and economist. A graduate of the St Petersburg Cadet school (1829), he worked as a civil servant in Kamianets-Podilskyi and Kiev. In 1851 he was appointed to the position of academic secretary of the Commission for Describing Gubernias of the Kiev District at Kiev University. He edited the commission's works, including the three-volume *Statisticheskoe opisanie Kievskoi gubernii* (A Statistical Description of Kiev Gubernia, 1852), and wrote *O kreditnykh sdelkakh v Kievskoi gubernii* (On Credit Agreements in Kiev Gubernia, 1856), *Ob istochnikakh i upotreblenii statisticheskikh svedenii* (On the Sources and Use of Statistical Information, 1846), and *Statisticheskoe obozrenie raskhodov na voennyya potrebnosti v 1711–1825 g.* (A Statistical Survey of Expenditures on Military Needs in 1711–1825, 1859). Zhuravsky's theoretical and empirical works had an important impact on the development of the fields of statistics and economics in the Russian Empire. M. Ptukha wrote a biography of Zhuravsky in 1951.

Zhurba, Andrii [Žurba, Andriij], b ?, d July 1768 in Bloschchyntsi near Bila Tserkva. Cossack rebel leader. He led a detachment of 300 haidamakas during the Koliivshchyna rebellion of 1768. Aided by forces under M. Shvachka, they took the fortified town of Fastiv and raided the estates of Right-Bank landowners. Zhurba was killed in battle with Russian troops dispatched by Catherine II to suppress the uprising. He was celebrated in folk dumas as a counselor to M. Zalizniak.

Zhurba, Halyna [Žurba] (pseud of Halina Dombrowska), b 29 December 1888 in Teplyk, Haisyn county, Podilia gubernia, d 9 April 1979 in Philadelphia. Writer. The daughter of a Polish noble and a Polonized mother, she was Ukrainianized by the rural environment of her childhood. In 1909 her first, critically acclaimed story collection, *Z zhyttia* (From Life), was published in Odessa. She contributed several stories to the journal *Ukrains'ka khata*; a

Halyna Zhurba

1912 issue of the journal was confiscated by the tsarist censors because of her story 'Koniaka' (The Horse). From 1912 she lived in Kiev and was part of the *Ukrains'ka khata* circle. From 1917 to 1919 she was an editor of the daily *Nova rada*. In 1919 she belonged to the writers' group Muzahet and published her second story collection, *Pokhid zhyttia* (The March of Life). Having fled from Soviet rule in 1920 to the Polish internment camp in Tarnów, in the interwar years she lived with her husband, A. *Nyvynsky, in Zdolbuniv, Volhynia, in Lviv, and in Warsaw. She published the plays *Malanka* (1921) in Tarnów and *Metelytsia* (The Blizzard) and *V pereleti vikiv* (As Years Fly By) in Prague, in M. Shapoval's journal *Nova Ukraïna*. She also published a story in the Soviet journal *Vsesvit* (1925, no. 20). Her major works, two award-winning novels about the Revolution of 1917 in Volhynia, *Zori svit zapovidauiut'* (Stars Forecast the World, 1933) and *Revoliutsiia ide* (The Revolution Is Coming, 2 vols, 1937–8), were published in Lviv. In 1943 her 'sensational' novel *Doktor Kachioni* (Doctor Caccioni) was published in Cracow. As a postwar émigrée Zhurba lived in Germany. After emigrating to the United States in 1950, she published an autobiographical account of her childhood, *Dalekyi svit* (A Distant World, 1955), the first volume of a planned semi-autobiographical trilogy, *Todir Sokir* (1967), and essays, stories, and temperamental articles in émigré periodicals. She insisted on using an idiosyncratic phonetic orthography and many little-known, archaic words in her later works.

R. Senkus

Zhurba, Vasyl [Žurba, Vasyl'], b and d ? Rebel leader. A native of Ukraine who had settled in the Volga region, he was colonel of a rebel detachment in the uprising led by the Don Cossack E. Pugachev (1773–4). He fled to Ukraine to avoid capture by tsarist troops, and he organized and led rebel groups in Left-Bank and Slobidska Ukraine and the Voronezh and Rostov-na-Donu regions which were active for over a year.

Zhurlyva, Olena [Žurlyva] (pseud of Olena Kotova), b 24 June 1898 in Smila, Kiev gubernia, d 10 June 1971 in Kirovohrad. Poet and pedagogue. She graduated from the Kiev Institute of People's Education in 1922 and taught in secondary schools in Kiev, Kharkiv, Dnipropetrovske, Moscow, and Kirovohrad. Before the revolution she published her work in *Literaturno-naukovyi vistnyk* and *Ukrains'ka khata*, and after, in *Chervonyi shliakh*, *Hlobus*, and other periodicals. She was arrested in 1938 by the NKVD and im-

prisoned from 1939 to 1944 in labor camps in the Altai region. Collections of her poetry include *Bahrianyi svit* (The Crimson World, 1930), *Virshi* (Poems, 1958), *Zemlia v tsvitu* (The Earth in Bloom, 1964), and *Chervone lystia* (Red Leaves, 1964). She also wrote children's verse and translated Lesia Ukrainka and V. Stefanyk into Russian.

Zhurman, Illia [Žurman, Illja], b ?, d 1783. Cossack officer and state figure in the Russian Empire. He was a leading civil administrator in Ukraine (1769–74), K. Rozumovsky's deputy to St Petersburg (1750, 1751), and a general judge in the Hetmanate (1756–82). In 1782–3 he was the first governor of Novhorod-Siverskyi vicegerency.

Zhurnal bibliotekoznavstva ta bibliografii

Zhurnal bibliotekoznavstva ta bibliografii (Journal of Library Science and Bibliography). An annual publication of the National Library of Ukraine in Kiev (now the Central Scientific Library of the Academy of Sciences of Ukraine) in 1927–30. It contained articles on theoretical and practical issues in library science and management. It was edited by S. Posternak, M. Saharda, and V. Kozlovsky.

Zhvanchyk River [Žvančyk]. A left-bank tributary of the Dniester River that flows southward for 107 km in Khmelnytskyi oblast and drains a basin area of 769 sq km. The river is 3–5 m wide in its upper course and eventually widens to 10–35 m. It has a drop of 1.9 m/km, with several areas of rapids and waterfalls. Its waters are harnessed for electricity and used for pisciculture.

Zhvanets [Žvanec']. v-7. A village (1972 pop 1,500) near the junction of the Zhvanchyk and the Dniester rivers in Kamianets-Podilskyi raion, Khmelnytskyi oblast. It was first mentioned in a historical document in 1431. At the end of the 16th century the Poles built a castle there, which was destroyed by the Turks in 1620. It was rebuilt, and by 1646 the town had obtained the rights of *Magdeburg law. In 1653 B. Khmelnytsky laid siege to Jan II Casimir Vasa in the castle and was betrayed by his Tatar ally. In 1672–99 the town was occupied by the Turks, and subsequently it declined to a village. In 1793 it was annexed by Russia. Today the ruins of the 16th-century fortress and a 17th-century Roman Catholic church testify to Zhvanets's historical importance.

Zhvanets fortified settlement. A fortified Trypilian culture settlement of the early 3rd millennium BC located near Zhvanets, Kamianets-Podilskyi raion, Khmelnytskyi oblast. Excavations in the 1960s revealed that the massive earthen defensive walls were built over a stone base. Located outside the defensive perimeter was a pottery-making complex with seven double-ledged kilns. The pottery fragments found in this area were often decorated with images of humans, animals, birds, and hunting scenes.

Zhydachiv [Žydačiv]. IV-5. A town (1989 pop 11,200) on the Stryi River and a raion center in Lviv oblast. One of the oldest towns in Ukraine, it is first mentioned in the chronicles under the year 1164, as Udech. At different times it has also been known as Sudachiv, Zidachiv, and Zudechiv. The town was an important trading center on the routes between the Principality of Galicia-Volhynia, Kievan Rus', Western Europe, and the Black Sea. In 1241 it was sacked by the Tatars, and 10 years later it was recaptured by Danylo Romanovych. From the mid-14th century it was under Polish rule, and in 1393 it was granted the rights of *Magdeburg law. The townsmen rebelled against the Polish overlords in 1648 but were soon subjugated. An Orthodox brotherhood arose to resist union with the Roman Catholic church. A cholera epidemic in 1676 reduced the population by half. By the end of the century the town had declined to a village. After the partition of Poland in 1772 Zhydachiv was annexed by Austria, and in 1867 it became a county center in Galicia. In the interwar period Zhydachiv was under Polish rule. Today it is a transportation and industrial center. It has a cellulose and carton, a brick, and a cheese factory.

Zhydiata, Luka [Žyjdjata], b ?, d 15 October 1060 in Novgorod. The first locally born bishop of Novgorod (1036–55 and 1058–60). He was nominated as bishop by Prince Yaroslav the Wise. After the death of Yaroslav, Zhydiata was called to Kiev by Metropolitan Yefremii and imprisoned for three years. When the accusations against him proved to be false, he was freed, and returned to his cathedral. During his tenure the stone St Sophia Cathedral was constructed (1051), the Novgorod Chronicles were compiled, and the Ostromir Gospel was copied. Two of his sermons have survived, and were published in the 19th century.

Zhydove [Žyдове]. A district in the northwestern part of medieval Kiev, settled by Jews. It was entered through the Jewish Gate (1037) in the walled city of Yaroslav the Wise (see the map of *Kiev in the 10th–12th centuries).

Zhydychyn St Nicholas's Monastery (Zhydychynskyi manastyr sv. Mykolaia). A monastery located near Lutske, Volhynia. Records of it date from as early as the 13th century. After the Church Union of Berestia it joined the Uniate church, and in 1608–1826 it was the residence of the Uniate bishop of Lutske-Ostrih, who also served as its archimandrite. The main church and bishop's residence were built in 1723. The monastery was closed in 1839 by Nicholas I.

Zhyhadlo, Ivan [Žyhadlo], b 1876, d? Jurist, teacher, and court official in Poltava gubernia. He was one of the founders of the Ukrainian Law Society in Poltava (1918).

Tried in 1930 for belonging to the *Union for the Liberation of Ukraine, he was exiled to Kazakhstan. In 1943 he emigrated, and in 1958 he settled in the United States. He compiled a Russian-Ukrainian legal dictionary (3 edns, 1918–19) and wrote articles on education and popular scientific topics, and recollections.

Zhyla, Volodymyr. See Zyla, Wolodymyr.

Zhylenko, Iryna [Žylenko], b 28 April 1941 in Kiev. Poet. She graduated from Kiev University (1964), and has worked as a newspaper and journal editor in Kiev. She began publishing in 1962. Among her works are the sketch collection *Bukovyns'ki balady* (Bukovynian Ballads, 1964) and the poetry collections *Solo na sol'fi* (A Solo in Sol-fa, 1965), *Avtoportret u chervonomu* (Self-Portrait in Red, 1971), *Vikno u sad* (Window onto the Orchard, 1978), *Kontsert dlia skrypky, doshchu i tsvirkuna* (Concert for Violin, Rain, and a Cricket, 1979), *Dim pid kashtanom* (The House under the Chestnut, 1981), *Iarmarok chudes* (The Market of Wonders, 1982), and *Ostannii vulychnyi sharmanshchyyk* (The Last Street Barrel Organist, 1985). She has also written children's poetry books, such as *Dostyhaiut' kolosochky* (The Little Grain Ears Are Ripening, 1964) and *Vulychka moho dytynstva* (The Little Street of My Childhood, 1979).

Zhylko, Fedot [Žylko], b 14 March 1908 in Solovtsovtsy, Penza gubernia, Russia. Ukrainian dialectologist. A graduate of the Kiev Institute of Professional Education (1932), he taught Ukrainian language and dialectology in Kiev's postsecondary schools (1938–51). He has headed the AN URSS (now ANU) Institute of Linguistics Dialectology Division since 1950. The coauthor of programs for collecting dialectal data (1939, 1948), he has written a textbook on Ukrainian dialectology (1951), a prospectus for a Ukrainian dialectological atlas (1952), monographs on Ukrainian dialectology (doctoral diss, 1955; rev edn 1966) and the Ukrainian dialects (1958), and many dialectological articles. He edited the periodicals *Ukrains'ka mova v shkoli* (1951–60) and *Dialektolohichniy biuleten'* (nos 6–9, 1956–62), collections of the proceedings of the 10th, 11th, 12th, and 13th republican dialectological conferences (1961, 1965, 1971, 1970), and collections of articles on the Middle Dnieper dialects (1960), Ukrainian linguistic geography (1966), and Ukrainian dialectal morphology (1969). In his dissertation he posited the existence of three original Ukrainian dialectal groups: northern, southwestern, and southeastern.

Zhylko, Yurii [Žylko, Jurij] (pseuds: Istryk, Izhak, Ostiuk Navisny, Yurii Pluzhany, Selianyn Yurchyk), b 28 February 1898 in Pidluzhne, Rivne county, Volhynia gubernia, d May 1938 in Poltava. Writer. In 1923 he graduated from the Poltava Institute of People's Education, worked as a teacher, and belonged to the peasant writers' organization Pluh. From 1922 on his poems and stories appeared in periodicals, such as *Pluh*, *Pluzhany*, *Hlobus*, *Molodyi bil'shovyk*, and *Zoria*. His poetry collection *Polustanok* (The Whistle-stop) appeared in 1930. He died during the Stalinist terror of the 1930s.

Zhylytsky, Petro [Žylc'kyj], b 9 June 1920 in Kiev, d 30 April 1970 in Kiev. Architect. He graduated from the Kiev Civil-Engineering Institute (1950) and worked in Kiev. He

helped design and build the administration building in Donetsk (1954–5), the residential building for Kryvorizhstal in Kryvyi Rih (1956), the Palace of Culture in Novokononichne (1956–7), and the building of the State Construction Committee (1965) and Ukraina Palace of Culture in Kiev (1970).

Hnat Zhytetsky

Zhytetsky, Hnat [Žytec'kyj] (Ihnatii), b 15 February 1866 in Kamianets-Podilskiy, d 8 April 1929 in Kiev. Historian, literary critic, and librarian; son of P. *Zhytetsky. A graduate of Kiev University (1890), he taught in Petrograd until 1918. After returning to Kiev he worked in the National Library of Ukraine from 1921 as its senior librarian and from 1922 as director of its manuscript division. He contributed to the journal *Kievskaya starina* (KS), served as its editorial secretary in 1888, edited its Ukrainian-Russian history section in 1893–1903, and wrote many articles for the *Prosveshcheniie* edition of the *Bol'shaia entsiklopediia* (The Great Encyclopedia). In 1919 Zhytetsky established a VUAN journal of the National Library of Ukraine and edited two volumes of the collection *Knyzhnyi vistnyk*. He contributed to M. Hrushevsky's journal *Ukraina* when it was revived, and served on the historical commission of the VUAN. His works on the social and cultural history of 19th-century Ukraine include *Literaturnaia deiatel'nost' Ioanna Vyshenskogo* (The Literary Activity of Ivan Vyshensky, KS, no. 6, 1890), *Order Rumiantseva 1737 roku i reskrypt imp. Pavla 1800 roku* (Rumiantsev's Order of 1737 and the Rescript of Emperor Paul of 1800, KS, no. 11, 1886). In *Ukraina* he published articles on KS in 1883–7, while it was under the editorship of F. Lebedyntsev (1925), on the Southwestern Branch of the Imperial Russian Geographical Society in Kiev (1927), on the Hromada of Kiev in the 1860s (1928), and on efforts to organize a historical society in Kiev (1929). He also wrote essays on M. Maksymovych, M. Kostomarov, T. Shevchenko, P. Kulish, A. Svydnytsky, F. Vovk, and P. Lukashevych.

BIBLIOGRAPHY

Karachkivs'kyi, M. 'Soroklitnii iuvilei I.P. Zhytets'koho v Istorychnii sektsii VUAN,' *Ukraina* 1928, no. 4

A. Zhukovsky

Zhytetsky, Irodion [Žytec'kyj], b 20 April 1851 in Zaliuni, Kostiantynohrad county, Poltava gubernia, d 1913. Ethnographer and civic activist. After graduating from Kiev University (1875) he lectured at the Hlukhiv Teachers' Institute and was active in the Old Hromada of

Kiev. In 1878 he was expelled from the university for his involvement in student protests, which he described in his *Martovskoe dvizhenie studentov Kievskogo universiteta 1878 g.* (The March Movement of Kiev University Students in 1878, 1878), written under the pseudonym M. Tkachenko. Having been exiled to Viatka (1879–82) and then Astrakhan (1882–5) gubernias, he studied the local people and wrote two books on the Kalmyks of Astrakhan (1892, 1893). He contributed a study of nationalities in Ukraine to *Kievskaiia starina* (1883, nos 5–6, 8–9, 11).

Pavlo Zhytetsky

*Zhytie i slovo*

Zhytetsky, Pavlo [Žytec'kyj], b 4 January 1837 in Kremenchuk, Poltava gubernia, d 18 March 1911 in Kiev. Philologist and ethnographer; member of the Imperial Russian Geographic Society from 1873, the Historical Society of Nestor the Chronicler from 1879, the Shevchenko Scientific Society from 1903, the Ukrainian Scientific Society in Kiev from 1907 (first honorary member from 1908), and corresponding member of the Russian Academy of Sciences from 1898; husband of V. Zhytetska and father of H. *Zhytetsky. He studied at the theological seminary in Pereiaslav (1851–7), the Kiev Theological Academy (1857–60), and Kiev University (1860–4; M PHIL, 1878) and taught Russian language and literature in gymnasiums in Kamianets-Podilskyi (1865–8) and Kiev (1868–80), at Galagan College (1874–80, 1882–93), in military schools, at St Petersburg University (1880–2), and at the St Vladimir Cadet School in Kiev (1882–93). As a Ukrainophile and a leading member of the Old *Hromada of Kiev from the 1860s and a founding member of the *Southwestern Branch of the Imperial Russian Geographic Society (1873–6), he was kept under constant police surveillance and denied a university career. He was in charge of the Hromada's Ukrainian dictionary project, and from 1902 he was a consultant to B. *Hrinchenko on the preparation of the Ukrainian-Russian dictionary. In 1908 he received an honorary doctorate from Kiev University.

Zhytetsky's first work, an article entitled 'Russian patriotism' (*Osnova*, 1862, no. 3), argued for the viability of an independent Ukrainian literature and culture. The first historian of literary Ukrainian, he wrote (in Russian) the first complete and systematic (but soon obsolete) history of Ukrainian sounds (1876) and a pioneering survey of 17th- and 18th-century literary Ukrainian with an appendix consisting of **Synonima slavenorosskaia* (1889; Ukraini-

an trans 1941). For these books he was awarded the Uvarov Prize (1877, 1890). He also wrote a book of studies of Ukrainian folk dumas (1893; Ukrainian trans 1919); textbooks on the theory of creativity (8 edns, 1895–1911), the theory of poetry (8 edns, 1898–1913), and the history of poetry (6 edns, 1898–1913); a book on I. Kotliarevsky's *Eneida* (Aeneid) and 18th-century Ukrainian literature (1900; Ukrainian trans 1919); and studies of the Peresopnytsia Gospel (1876), W. Humboldt (1900), O. Storozhenko's stories (1903), and Ukrainian translations of the Gospels (1905). In 1883 Zhytetsky rejected M. Pogodin's and A. Sobolevsky's hypothesis that medieval Kiev was ethnically Russian, and argued that Kievan Rus' was the cradle of the Ukrainian nation, and that Ukrainian linguistic traits were already present in 12th-century literary monuments. Zhytetsky's letters were published in a 1937 Warsaw edition of the Old Hromada's correspondence with M. Drahomanov. V. Plachynda's biography of Zhytetsky and an edition of his selected works (ed L. Masenko) were published in Kiev in 1987. The valuable archive of his papers is preserved at the ANU Central Scientific Library.

R. Senkus

Zhytie (Life). An irregular socialist youth journal published in Lviv in 1912–14. It was edited by S. Danylovych. Among its contributors were O. Bordun, R. Zaklynsky, I. Franko, O. Bezpalko, and M. Pavlyk.

Zhytie i slovo (Life and Word). A bimonthly journal published in Lviv from February 1894 to June 1897. It was edited by I. Franko and published by his wife, O. Franko. *Zhytie i slovo* contained belles lettres, literary criticism, and book reviews; articles on history, politics, and culture; and materials on ethnography and folklore. It also contained translations of Western European and Russian literature and regular reports on political and intellectual developments in Russian-ruled Ukraine. After a six-month interruption, from July 1896 it emphasized political and economic issues and published commentaries and analyses from a decidedly socialist, anti-imperialist perspective. Although the journal never attracted more than 400 to 500 subscribers, the high quality of its contents made it one of the more influential Ukrainian journals of the time. An index to *Zhytie i slovo* compiled by P. Babiak and edited by M. Humeniuk was published in Lviv in 1968.

Zhytomyr [Žyatomyr]. III-9. A city (1990 pop 296,000) on the Teteriv River and an oblast and raion center. It was founded, according to local legend, by a favorite of Askold and Dyr, Zhytomyr, in 884. It is first mentioned in the chronicles under the year 1240, when the town was destroyed by the Mongols. In 1320 Gediminas annexed it to the Grand Duchy of Lithuania and fortified it against the Tatars, who besieged it in 1399, 1469, 1482, and 1606. In 1444 Zhytomyr was granted the rights of *Magdeburg law, and in 1471 it became a county center of Kiev province. In 1569 it became part of the Polish Commonwealth. Its inhabitants revolted against their Polish overlords in 1594–6, 1618, and 1648. Under B. Khmelnytsky's rule the town served briefly as a company center of Kiev regiment. In 1667 it was restored to Poland by the Treaty of Andrusovo, and in the following century it developed into an important Polish cultural center. It was the seat of a Ro-

Zhytomyr's Victory Square

man Catholic diocese and the home of a Jesuit college (1720) and monastery (1724), a Bernardine monastery (1761), and a convent of the Sisters of St Vincent (1766). Its inhabitants joined the haidamaka rebellions in 1750 and 1768. After the partition of Poland in 1793, the town was annexed by Russia, and in 1804 it was made into the administrative center of *Volhynia gubernia. In the 19th century Zhytomyr developed into a regional manufacturing and trading center. Its main industries were candle and soap making, distilling, brewing, brick-making, milling, and tanning. Toward the end of the century farm-machine building, metalworking, and tobacco manufacturing were added. The number of enterprises rose steadily, from 14 in 1834 to 33 in 1861, 46 in 1898, and 63 in 1914. A railway link to Berdychiv was completed in 1896 and to Korosten during the First World War. By 1900 the town had a boys' and a girls' gymnasium, a free public library (1896), a theological seminary, a city theater, a museum (1900), and a municipal hospital. Its population grew steadily, from 5,400 in 1798 to 16,700 in 1840, 38,400 in 1863, and 65,400 in 1897. The ethnic composition of the town at the end of the 19th century was: Jews, 36.7 percent, Ukrainians and Russians, 35.9 percent, and Poles, 13.4 percent.

At the beginning of 1918 Zhytomyr served briefly as the seat of the UNR government. In August 1919 the Second Corps of the Ukrainian Galician Army fought the Red Army in the vicinity. During the Second World War the city was occupied by the Germans, and suffered considerable damage. It was reconstructed in the postwar period. By 1971 its population had grown to 167,000 and by 1979, to 244,000.

Today Zhytomyr is a major industrial and transportation center. Its chief industries are machine building and metalworking; they include the Elektovymiriuvach instrument manufacturing consortium, the Avtozapchastyna automobile-parts plant, and the automatic machine-tool plant. The largest enterprises of light industry are the Linen Manufacturing Complex and clothing, footwear, and hosiery factories. The food industry consists of large meat-packing, confectionery, flour-milling, baking, distilling, and brewing enterprises. There are several building-materials manufacturers, a synthetic-fabrics plant, and a paper factory. The woodworking industry manufactures furniture, musical instruments, toys, and souvenirs. The city's educational facilities include a pedagogical and

an agricultural institute, a branch of the Kiev Polytechnical Institute, 10 specialized secondary schools, and 15 vocational schools. There are several research institutes, such as the Institute of Hop Growing. Besides a regional studies museum there are literary memorial museums dedicated to M. Kotsiubynsky and V. Korolenko and a memorial museum devoted to S. Korolov. The cultural facilities include a picture gallery, a puppet theater, the Ukrainian Music and Drama Theater, and a philharmonic society. The chief architectural monuments are the Jesuit monastery, a Roman Catholic church (1744), the Assumption Church (1752), the Transfiguration Cathedral (1866–74), the city hall (1789), and the circuit court (1898, now the Agricultural Institute).

Zhytomyr Agricultural Institute (Zhytomyrskiy silskohospodarskyi instytut). A higher educational institution, until 1991 under the jurisdiction of the USSR Ministry of Agriculture. It was formed in 1935 out of the Zhytomyr Agricultural Institute of Industrial Crops, which had developed out of the Volhynia Agricultural Tekhnikum (est 1920). The institute has three faculties – agronomy, zoological engineering, and economics – as well as a correspondence school. The regular program requires four years and the correspondence program 5 years. About half the enrolment (2,700 in 1979) consists of correspondence students. Some research is done at the institute's experimental farm and laboratory, particularly on farming techniques suitable for Polisia. The institute publishes research studies.

Zhytomyr Furniture Manufacturing Complex (Zhytomyrskiy meblevyi kombinat). An enterprise of the woodworking industry, established in 1933. It produces wooden chairs, tables, and beds, as well as some wooden souvenirs. In 1974 it joined the Zhytomyrderev woodworking consortium, which consists of five furniture factories and a lumber mill.

Zhytomyr kurhans. Rus' burial mounds of the 11th to 12th century located outside Zhytomyr. Excavations in 1886–7 uncovered a total of 77 small (up to 2 m) kurhans. They contained single burials housed in wooden coffins with grave goods such as tableware, iron and bronze tools, and glass, silver, and carnelian jewelry.

Zhytomyr Linen Manufacturing Complex (Zhytomyrskiy lonokombinat). A textile factory built in Zhytomyr in 1958–61. It produces linen tablecloths, napkins, bed sheets, tent cloth, and fabrics for special uniforms. In 1977 it produced over 39 million sq m of fabric.

Zhytomyr oblast. An administrative territory (1989 pop 1,545,000) formed on 22 September 1937. It has an area of 29,900 sq km and is divided into 23 raions, 9 cities, 46 towns (smt), and 543 rural councils. Its capital is *Zhytomyr.

Physical geography. The oblast is divided between the Dnieper Upland (elevations up to 300 m) in the southwest and the Polisian marshes in the north. The northwestern part is marked by the Ovruch Ridge (elevation up to 300 m). The surface slopes down toward the north and northeast. Podzolized chernozems and gray forest soils are common in the southern part of the oblast; soddy, peat,

clayey, and sandy soils are found in the north. The climate is moderate continental, with mild winters and wet summers. The average January temperature is -5.7°C , and the average July temperature is 18.9°C . The annual precipitation ranges from 600 mm in the north to 570 mm in the south. Approx 28 percent of the surface is covered with forest. In the marshy north the forests consist mostly of pine, oak, and birch. In the south oak and hornbeam prevail. The oblast is rich in mineral resources, such as coal, peat, granite, quartz, titanium, iron, and lead. The main rivers are the Teteriv, the Sluch, and the Uzh.

History. The territory was inhabited as early as the Paleolithic period. Toward the end of the 1st century AD it was occupied by the Derevlians. In the 10th to 12th centuries it was part of Kievan Rus' and then of Volodymyr-Volynskiy and Galicia-Volhynia principalities. In 1362 the Grand Duchy of Lithuania took control of the territory. After the Union of Lublin it belonged to the Polish Commonwealth. With the partition of Poland in 1793, it was annexed by the Russian Empire, and became part of Volhynia and Kiev gubernias. Soviet control was established in 1919–20.

Population. According to the 1989 census 84.9 percent of the oblast's population was Ukrainian, 7.9 percent, Russian, 4.5 percent, Polish, and 1.4 percent, Jewish. The population density was 52.1 persons per sq km; the highest density was in the southwest, and the lowest in the northwest. Slightly over half of the population (53 percent) was urban. The largest cities are Zhytomyr, *Berdychiv, *Korosten, and *Novohrad-Volynskiy.

Industry. Over 70 percent of the oblast's production is industrial. The main industries are machine building and metalworking, which have expanded rapidly in the last 30 years. Their largest plants build equipment for the chemical industry (Berdychiv, Korosten), machine tools (Zhytomyr, Berdychiv), road-building machines (Korosten), farm machinery (Novohrad-Volynskiy), tractor parts (Olevske, Malyn), and power tools and equipment (Zhytomyr, Korosten). Sugar refining is the most important branch of the food industry. Its largest refineries are in Berdychiv, Andrushivka, Chervone, and Ivanopil. Other branches, such as distilling, brewing, meat packing, dairy products, and canning, are widely distributed. Ukraine's only malt factory is located in Berdychiv. The oblast's light industry is known for its linen manufacturing. Footwear and leather (Berdychiv, Zhytomyr), musical instruments (Zhytomyr), and clothing (Zhytomyr, Korosten, Novohrad-Volynskiy, Malyn) are manufactured in the oblast. The local forests serve as a base for the paper (Zhytomyr, Malyn, Korostyshiv) and furniture industries. Building materials, such as reinforced-concrete products, brick, asphalt, and lime, are produced in Berdychiv, Malyn, Chudniv, and Cherniakhiv, and various stones are quarried in Korostyshiv, Malyn, Korosten, and Cherniakhiv raions. Glass factories are located in Romanivka and Zhytomyr.

Agriculture. In 1989 there were 419 collective farms, 87 state farms, and 3 poultry factories in the oblast. Approx 73 percent of the oblast's area was farmland. Of the farmland 78.4 percent was cultivated, 10.9 percent was hayfield, and 9.6 percent was pasture. A total of 380,100 ha of land were drained; the largest systems are located in the west and northwest. The sown area amounted to 1,312,000 ha. Much of it (40.9 percent) was devoted to grain crops, such as winter wheat, winter rye, legumes, barley, buck-

wheat, and millet. Feed crops occupied another 41.3 percent of the sown land. The rest was planted with industrial crops (8.5 percent), mostly sugar beets and flax, and potatoes and vegetables. Animal husbandry accounted for 45 percent of the agricultural output. It consists mostly of beef- and dairy-cattle raising and some hog and poultry farming.

Transportation. In 1989 the railway network consisted of 1,125 km of track. The trunk lines running through the oblast are Kiev–Lviv, Kiev–Brest, and Odessa–St Petersburg. The main junctions are Zhytomyr, Korosten, Berdychiv, Novohrad-Volynskiy, and Ovruch. The highway network had 8,100 km of road, 7,300 of which were paved. The major highways crossing the oblast are Kiev–Zhytomyr–Lviv, Kiev–Korosten–Kovel, and St Petersburg–Izmail. There is an airport in Zhytomyr.

BIBLIOGRAPHY

Istoriia mist i sil URSR: Zhytomyrs'ka oblast' (Kiev 1973)

Zhytomyr Pedagogical Institute (Zhytomyrskiy pedahohichnyi instytut im. I. Franka). A higher educational institute, under the jurisdiction of the Ministry of Education of Ukraine. Founded in 1919, the institute was named after I. Franko in 1926. It has four faculties: philology, foreign languages, physics-mathematics, and natural sciences. The institute specializes in preparing teachers for elementary education. In 1978–9 approx 3,180 students took classes there (2,215 of them full time), and the library contained nearly 300,000 titles.

Zhytomyr Regional Studies Museum (Zhytomyrskiy kraieznavchyi muzei). A museum founded in Zhytomyr in 1900 by the *Volhynia Research Society on the basis of an earlier museum created in 1865. Ecclesiastical and historical divisions with valuable artifacts, documents, and manuscripts were created there. In 1911 it was renamed the Central Volhynian Museum. Under interwar Soviet rule, as the Volhynian State Museum, it contained over 180,000 exhibit items and over 1,000 paintings (including those of the former museum [est 1893] of the Church Archeology Society of Volhynia Eparchy and others confiscated from local nobles), a botanical garden, an orangery, a laboratory, and a library with over 100,000 books (including the expropriated holdings of the Volhynia Theological Seminary Library). The museum was devastated during the Second World War and later rebuilt, and in 1979 it had nearly 60,000 exhibit items in its three divisions (natural sciences, history, and art). Memorial museums dedicated to Vladimir Korolenko (est 1973) and Serhii Korolov (est 1970) in Zhytomyr and to Lesia Ukrainka (est 1963) in Novohrad-Volynskiy are its branches. Guidebooks to the museum were published in 1972 and 1975.

Zhytomyr Ukrainian Music and Drama Theater (Zhytomyrskiy ukrainskyi muzychno-dramatychnyi teatr im. I. Kocherhy). A theater established in 1944. Its repertoire consists of world classics – including W. Shakespeare's *The Merry Wives of Windsor* and H. de Balzac's *La Marâtre* – and Ukrainian, Russian, Belarusian, and Latvian plays.

Zhyttia (Life). An irregular socialist student journal published in Prague in 1924–5. Among its editors and contributors were K. and O. Kobersky, M. Kurakh, S. Ripetsky, and M. Stakhiv.

Zhyttia (Life). A monthly organ of the Basilian monastic order in Argentina published from 1948 to 1979. It first appeared in Buenos Aires, and then moved to Apóstoles in 1950. The journal contained church news and articles on religious and other topics. The editors included Revs O. Dub, I. Patrylo, V. Zinko, and V. Kovalyk.

Zhyttia i mystetstvo (Life and Art). A monthly journal of literature, culture, and the arts, published in Lviv in 1920. It was edited by F. Fedortsiv and M. Strutynsky.

Zhyttia i pravo (Life and Law). A quarterly journal of the Society of Ukrainian Lawyers and the Union of Ukrainian Lawyers, published in Lviv in 1928–39. Edited by K. Levytsky, it published articles on Ukrainian legal history and legal theory. Its regular contributors included Yu. Zaiats, L. Hankevych, Ya. Levytsky, M. Voloshyn, A. Paventsky, M. Hlushkevych, and O. Nadruga. In 1930 its circulation was 1,000.

Zhyttia i revoliutsiia

Zhyttia i znannia

Zhyttia i revoliutsiia (Life and Revolution, or *ZhR*). A monthly journal of politics, culture, scholarship, and civic affairs for the educated reader, published in Kiev from January 1925 to 1933. It was edited by writers such as M. Bazhan, O. Doroshkevych, I. Lakyza, I. Le, Yu. Savchenko, M. Tereshchenko, and others. With its sixth issue it began publishing belles lettres, literary criticism, poetry translations, and reviews. Like its Kharkiv counterpart **Chervonnyi shliakh*, *ZhR* was a national forum for various writers, including those already established before the Soviet period (eg, M. Vorony, S. Vasylenko) and the new postrevolutionary writers belonging to writers' groups such as **MARS*, the **Neoclassicists*, and the overtly communist **Zakhidnia Ukraina* and **All-Ukrainian Association of Proletarian Writers*. *ZhR* devoted much attention to the history of Ukrainian literature, art, theater, and music and to language and literary theory and debates. It published contributions by scholars and critics such as P. Balytsky (bibliology), Doroshkevych, M. Drai-Khmara, P. Fylypovych, M. Hladky (literary language), Ye. Kyryliuk, Lakyza, A. Leites, H. Maifet, Yu. Mezhenko (bibliography), M. Mohyliansky, Yu. Mykhailiv (art), A. Muzychka, B. Navrotsky, L. Pidhainy, V. Pidmohylny, V. Pokalchuk, D. Rudyk, P. Rulin (theater), S. Rodzevych (surveys of European literature and its translation into Ukrainian), S. Savchenko (foreign literature), Ya. Savchenko, S. Shchu-

pak, Ye. Shabliovsky, Yu. Smolych (theater), I. Vrona (art), F. Yakubovsky, B. Yakubsky, T. Yakymovych (foreign literature), Ya. Yurmas (music), D. Zahul, and M. Zerov.

ZhR played a prominent role in promoting the development of new Ukrainian literature in the 1920s. Because the editors pursued a course that often diverged from the interests of the Bolshevik party, during the Stalinist campaign against Ukrainian culture that began in the late 1920s, they were increasingly forced to admit their 'errors' and to renounce their ways. Party control over the journal grew; it became the organ of the Federation of Soviet Writers of Ukraine in 1932 and the Organizing Committee of the All-Ukrainian Union of Soviet Writers in 1933. With the full-fledged onslaught of the terror in Ukraine, the journal was shut down, and most of its contributors were repressed. N. Reva's systematic (but censored) index to its contents was published in Lviv in 1970.

I. Koshelivets

Zhyttia i slovo (Life and Word). A monthly and then bi-monthly socialist newspaper, published in Drohobych in 1937–8 by I. Yurkiv and edited by R. Rozdolsky.

Zhyttia i slovo (Life and Word). A quarterly Catholic journal published in Innsbruck, Austria, in 1948–9 (four issues). It contained poetry, prose, articles on theological and cultural issues and the history of the Ukrainian Catholic church, and book reviews. The editor was O. Mokh.

Zhyttia i slovo (Life and Word). A pro-Soviet newspaper published weekly in Toronto from November 1965 to December 1991 in place of **Ukrains'ke zhyttia* and **Ukrains'ke slovo*. The organ of the **Association of United Ukrainian Canadians* (AUUC), it contained political and economic news; reports on the Communist and labor movement in Canada; laudatory articles about developments in Soviet Ukraine, particularly in the field of culture; and reports on the activities of the AUUC and the related Workers' Benevolent Association. Although the paper published articles, especially in the 1960s, criticizing Russification in Ukraine, until recently it rarely strayed from the official Soviet line on other issues and ignored topics such as the dissident movement, the famine of 1932–3, and the crimes of Stalinism. The paper was edited by a board headed by M. Hrynchyshyn; the managing editor was P. Krawchuk. In 1992 *Zhyttia i slovo* and the AUUC monthly magazine the *Ukrainian Canadian* were replaced by a biweekly, bilingual tabloid, *Ukrainian Canadian Herald*.

Zhyttia i znannia (Life and Knowledge). A monthly self-educational magazine published by the Prosvita society in Lviv from October 1927 to August 1939 (a total of 143 issues). It contained popular articles in the fields of medicine and hygiene, the natural and technical sciences, farming, geography (descriptions of foreign countries), and Ukrainian history, literature, language, theater, music, and civic life; biographies and obituaries of prominent Ukrainians; some prose and poetry; occasional travel accounts; information about Prosvita and other community institutions; and book notes. *Zhyttia i znannia* was edited by M. Halushchynsky (1927–31), I. Bryk (1931–3), and V. Simovych (1933–9). In 1930 it had a pressrun of 2,500 copies.

Zhyttia Podillia (Life of Podilia). A daily newspaper published in Kamianets-Podilskyi from December 1918 to the end of April 1919. It was initiated by the Podilia gubernia executive and local Prosvita society; its first editors were L. Biletsky and V. Sichynsky. It was soon taken over by local members of the Ukrainian Socialist Revolutionary party and was edited by M. Hrushevsky and A. Zhyvotko.

Zhyttia Pokuttia (Life of Pokutia). A newspaper published weekly and then semimonthly in Kolomyia in 1931–4. The editors were Z. Stefaniv and D. Korbutiak.

Zhyttie i znannie (Life and Knowledge). A journal of health, hygiene, medicine, and popular science, published by a local society of feldshers and midwives from June 1913 to mid-1914 in Poltava (a total of 14 issues). The editor was H. Kovalenko.

Arkadii Zhyvotko

Mykola Ziber

Zhyvotko, Arkadii [Žyvyotko, Arkadij] (pseud: A. Pukhovskyy, A. Pukhalsky), b 3 March 1890 in Pukhove, Voronezh gubernia, d 12 June 1948 in Aschaffenburg, Germany. Historian of the Ukrainian press, educator, journalist, and civic activist; full member of the Ukrainian Academy of Arts and Sciences. He graduated in 1917 from the Psychoneurological Institute in St Petersburg, where as a student he had been active in the Ukrainian Party of Socialist Revolutionaries. In 1917–18 he represented the Voronezh region on the Central Rada. When the Bolsheviks occupied Ukraine, he fled to Kremianets, where he worked as a teacher and was active in the local Prosvita. After emigrating to Czechoslovakia in 1923, he lectured at the Ukrainian Higher Pedagogical Institute in Prague and directed the archives of the Ukrainian Civic Committee in Czechoslovakia (which became the Ukrainian Historical Cabinet). After the war he was director of the Aschaffenburg branch of the Museum-Archive of the Ukrainian Academy of Arts and Sciences. In addition to poems and articles on public issues, literature, and education he wrote studies of the history of the Ukrainian press, most notably *Istoriia ukrains'koi presy* (The History of the Ukrainian Press, 1946; repr 1990).

Zhyvotovskyy, Pavlo [Žyvyotovs'kyj], b ?, d 1699. Cossack officer. He was colonel of Myrhorod regiment and supported the election of Ya. Somko as hetman at the Nizhen Council of 1661. Later he was I. Hetman Briukhovetsky's general judge (1664–9). He also distin-

guished himself in the defense of Hlukhiv from the Poles in 1664 and of Chyhyryn from the Turks in 1678.

Ziber, Mykola, b 10 March 1844 in Sudak, the Crimea, d 28 April 1888 in Yalta. Prominent Marxist economist. After graduating in law from Kiev University (1866) he continued his studies in Western Europe (1871–3). On his return to Ukraine he lectured on political economy at Kiev University, collaborated with the *Southwestern Branch of the Imperial Russian Geographic Society (for which he prepared a program for collecting statistical data), and contributed to *Kievskii telegraf*. In 1875, after the dismissal of his friend M. Drahomanov from Kiev University, Ziber resigned and emigrated to Switzerland. From there he contributed articles to Russian (eg, *Znanie, Slovo, Otechestvennyia zapiski, Vestnik Evropy, Russkaia mysl'*), French, and Swiss journals and to Drahomanov's *Hromada*, and developed close ties with younger Ukrainian intellectual and student circles in Lviv and Vienna. In 1884 he returned to the Crimea, where he died, probably of advanced syphilis of the central nervous system.

Ziber was the first popularizer of K. Marx's ideas in Ukraine and the Russian Empire. Although he agreed with Marx's theory of value and critique of capitalism, in his own works, such as his books on D. Ricardo's theory of value and capital (MA diss, 1871), primitive economic culture (1883), and the socioeconomic studies of Ricardo and Marx (1885), he stressed the evolutionary social development conditioned by changes in the relations of production. His writings exerted a great influence on Russian economic theorists well into the early 20th century. A champion of the idea of economic co-operation, in 1869 he was elected chairman of the board of the first consumer co-operative in Kiev and wrote a pamphlet on consumer societies. Two-volume editions of his works were published in Moscow in 1900–1 and 1959.

I. Vytanovyčh

Zilberfarb, Moishe (Silberfarb, Moses), b 1876 in Rivne, d 1934 in Warsaw. Jewish political activist in Ukraine. A leader of the United Jewish Socialist Workers' party, Zilberfarb became the Jewish deputy of the *Central Rada's general secretary for nationality affairs on 27 July 1917, a member of the *Committee for the Defense of the Revolution on 7 November, general secretary for Jewish affairs on 22 November, and, finally, minister for Jewish affairs on 22 January 1918; he resigned from the government as of 29 January 1918. Zilberfarb had been a long-standing proponent of Jewish autonomism before the revolution and therefore welcomed the Rada's and UNR's policies of national-personal autonomy for minorities in Ukraine; he drafted legislation regarding Jewish autonomy in Ukraine. In 1918–20 Zilberfarb headed the Jewish People's University and Cultural League in Kiev. In 1921 he left Ukraine for Warsaw. Zilberfarb published, in Yiddish, an account of the Jewish ministry and Jewish national autonomy in Ukraine (1919). His collected works were published in 2 vols (1935, 1937).

Zilbershtein, Andrii [Zil'berštejn, Andrij], b 1897, d ? Pedagogue. In the early 1930s he taught at the Kharkiv Institute of People's Education and worked as an associate of the Scientific Research Institute of Pedagogy of the Ukrainian SSR. He wrote *Systema narodnoi osvity* (The System of People's Education, 1929).

Ivan Zilynsky

Zilynsky, Ivan [Zilyns'kyj] (pseud: Ivan Korostenky), b 22 May 1879 in Krasna (Korostenka), Krosno county, Galicia, d 23 April 1952 in Prague. Phonetician and dialectologist; member of the Shevchenko Scientific Society (NTSh) from 1917, the VUAN Dialectological Commission from 1927, and the Language Commission of the Polish Academy of Arts and Sciences from 1927; father of O. *Zilynsky. Born Ivan Kobasa, he began using his mother's family name as a student at Lviv (1900–2) and Vienna (1903–7) universities. After receiving a PH D in 1907, he taught at gymnasiums in Berezhany, Stanyslaviv, and Lviv (1913–14, 1921–6) and lectured at the Lviv (Underground) Ukrainian University (1921–5) and Cracow University (1926–39), where he became a professor of East Slavic and Ukrainian linguistics in 1931. He was a member of the Commission for Research on Ukrainian-Polish Relations of the Ukrainian Scientific Institute in Warsaw and contributed to the Polish linguistic atlas of Subcarpathia (1934). During the Second World War he was in charge of cultural and educational affairs at the *Ukrainian Central Committee (1939–40) and chief editor (1940–1) and director (1941–4) of the *Ukrainske Vydavnytstvo publishing house in Cracow. From 1944 he served as a professor of Slavic philology at Prague University. Zilynsky contributed valuable studies on the Lemko, Boiko, and Sian dialects and on Ukrainian phonetics and linguistics to Western Ukrainian, Polish, and émigré Ukrainian periodicals. He devoted his energy to gathering materials for a linguistic atlas of Galicia. These materials were later edited by Y. Dzendzelivsky and M. Karas and published as *Studia nad dialektologią ukraińską i polską* (Studies in Ukrainian and Polish Dialectology, 1975). Zilynsky was also the author of booklets on the classification of Ukrainian dialects (1914, 1926) and the orthography adopted by the NTSh (1922); a map of the Ukrainian dialects (1933); and a book of Ukrainian orthography (4 edns, 1941–3), which was used by Ukrainian schools and publishers in German-occupied Galicia. His most important work, first published in Polish in 1932, was revised and translated as *A Phonetic Description of the Ukrainian Language* in 1979. K. Kysilevsky wrote a booklet about him and his work in 1962.

R. Senkus

Zilynsky, Orest [Zilyns'kyj], b 12 April 1923 in Krasna (Korostenka), Krosno county, Galicia, d ca 17 July 1976 near Vinné (Vynne), Michalovce county, Slovakia. Slavist; member of the International Commission for the Study of the Folk Culture of the Carpathians and Balkans; the son of I. *Zilynsky and husband of Ye. *Biss. From 1941 he studied Slavic philology at the Ukrainian Free University in Prague. After the Second World War he studied at Prague University under O. Kolessa and I. Pankevych (1945–9; PH D, 1949) and then taught Polish, medieval Rus' literature and folklore, and Soviet literature at Olomouc University, helped prepare teaching programs and textbooks for Ukrainian schools in the Prešov region in the early 1950s, and compiled two pioneering school anthologies of Ukrainian literature (1952).

Zilynsky was a central figure in Ukrainian literature and folklore studies in postwar Czechoslovakia. He published numerous articles (on 19th-century Ukrainian writers [especially T. Shevchenko and I. Franko], O. Oles, B.I. Antonych, Soviet Ukrainian writers of the 1920s and 1960s, Czech-Ukrainian literary relations, Ukrainian and West Slavic folk songs and games, folklore and folklorists, and Ukrainian dumas and folk ballads) in Czech, Soviet Ukrainian and Russian, and Polish scholarly serials and in Ukrainian periodicals published in Prešov and Warsaw. The foremost popularizer of Ukrainian literature in Czechoslovakia, he helped translate and wrote postscripts to Czech editions of works by M. Rylsky (1947), Yu. Yanovsky (1949, 1960, 1966), I. Kotliarevsky (1955), I. Netchui-Levytsky (1960), M. Bazhan (1963), I. Drach (1964), M. Kotsiubynsky (1964), and Ye. Hutsalo (1965); and he compiled and edited Czech anthologies of Ukrainian folk poetry (1950), Ukrainian poetry (1951), and poetry by new Soviet Ukrainian writers of the 1960s (1965), and an invaluable bibliographic compendium on 150 years of Czech-Ukrainian literary ties (1968). He also edited and published together N. *Koroleva's novels *Son tini* (Dream of the Shadow) and *1313* (1966). In addition to writing insightful articles on Ukrainian literature and writers in postwar Czechoslovakia, he edited the first synthetic compendium on that subject (1968).

Despite his contributions Zilynsky did not escape political persecution, particularly before 1954 and after the suppression of the Prague Spring in 1968. From 1969 his literary criticism was not published in Prešov's Ukrainian periodicals, and the publication of his massive annotated collection of Transcarpathian folk ballads was halted by the censors in Prešov in 1971. The circumstances of Zilynsky's death remain unclear. He was found dead in the Vihorlat Mountains of Slovakia on 17 July 1976 and was buried in Svydnyk. His valuable archive of folkloric materials is preserved at the Museum of Ukrainian Culture there. The first volume of his anthology of Ukrainian lyric poetry (to 1919) was published in Toronto in 1978. Many of his other manuscripts, including two monographs he prepared on West and East Slavic ritual games (his revised 1966 candidate's diss) and Ukrainian dumas for the Harvard Ukrainian Research Institute, have not been published. M. Mushynka's biography and bibliography of Zilynsky was published in South Bound Brook, New Jersey, in 1983.

R. Senkus

Col Petro Zilynsky-Sodol

Osyp Zinkevych

Zilynsky-Sodol, Petro [Zilyns'kyj-Sodol'], b 14 July 1893 in Vyrva, Radomyshl county, Kiev gubernia, d 18 May 1987 in Albany, New York. Army officer and community leader. An officer of the Russian army, he received four awards for bravery during the First World War and in October 1917 joined the UNR Army. He was a company commander in the Zaporozhian Corps, commander of the 41st Infantry Regiment, a battalion commander in the Sich Riflemen Corps, garrison commander in Yampil, and a participant in the First Winter Campaign (1919–20). After escaping from Polish internment in 1921, he lived in Galicia. During the Second World War he was an instructor in the OUN officer school in Lviv (July–August 1941). He emigrated to the United States in 1949, where he was active in the hetmanite movement and founded and headed the Bolbochan Society of Zaporozhians. He was promoted to colonel by the UNR government-in-exile.

Zimorowicz, Józef Bartłomiej (pseud of Józef Ozimek), b 20 August 1597 in Lviv, d 14 October 1677 in Lviv. Polish poet and historian of Armenian origin; brother of S. Zimorowicz. From 1620 he held several positions in Lviv's municipal government, and from 1648 he served as burgomaster a number of times. In 1672 he organized Lviv's defense during the Turkish siege. He is the author of the satirical narrative poem *Żywot Kozaków Lisowskich* (The Life of the Lisovsky Cossacks, 1620), the poetry collection *Sielanki nowe ruskie* (New Ruthenian Idylls, 1663), in which he depicted Hetman B. Khmelnytsky's siege of Lviv, and several Latin works on the history of Lviv, including *Leopolis triplex* (Polish trans 1835). He introduced the haidamaka theme into Polish poetry.

Zimorowicz, Szymon (pseud of Szymon Ozimek), b 1608 or 1609 in Lviv, d 21 June 1629 in Cracow. Polish poet of Armenian origin; brother of J. Zimorowicz. In 1629 he wrote a famous cycle of 69 baroque love poems celebrating his brother's marriage, *Roxolanki, to jest ruskie panny* (Roxolankas, That Is, Ruthenian Maidens, pub 1654). In their form and structure they indicate the strong influence of the Ukrainian folk song.

Zinchenko, Petro [Zinčenko], b 14 July 1903 in Nikolaevskaia Sloboda, Astrakhan gubernia (now Nikolaevsk, Volgograd oblast, Russia), d 17 February 1969 in Kharkiv. Psychologist. He graduated from the Kharkiv Institute of People's Education (1930), taught in postsecondary schools, and worked at research institutions in Kharkiv and Kiev, including the Scientific Research Institute of Psychology in Kiev. From 1960 he headed the department of psychology at Kharkiv University. A leading authority on the psychology of memory, he wrote *Neproizvol' noe zapomnianie* (Involuntary Memorization, 1961, based on his 1958 doctoral dissertation at Moscow University) and co-authored a book on memory development (1965).

Zinchyshyn, Vasyl [Zinčyšyn, Vasyl'] (Zinchesin, William), b 11 January 1919 in Sheho, Saskatchewan, d 21 March 1966 in Toronto. Community leader. Zinchyshyn graduated with a medical degree from the University of Toronto in 1945. Active in Ukrainian Orthodox community life, he was a driving force behind the construction of the St Volodymyr Cathedral in Toronto and the initiator of the purchase of the Kiev community property in Oakville. In 1954 Zinchyshyn founded the So-Use Credit Union in Toronto; he guided its successful development during his eight years as president.

Zinina, Olena (née Maksymovych), b 11 February 1867 in Lubni, Poltava gubernia, d 24 October 1943 in Kiev. Stage actress. She began her career in M. Starytsky's troupe (1887) and then worked in Saksahansky's troupe (1893–5), M. Yaroshenko's troupe (1896–1914, with interruptions), and the Zankovetska Theater in Dnipropetrovske and Zaporizhia (1925–35).

Zinkevych, Osyp [Zinkevyč] (Zinkewych), b 4 January 1925 in Mykulyntsi, Sniatyn county, Galicia. Chemist, editor, and publisher. Having been active in the OUN underground during the war, he emigrated to the United States after the war and completed his education at the Ecole supérieure de chimie (BS, 1956) in Paris. He became a prominent figure in émigré Ukrainian student life (vice-president and general secretary of the Central Union of Ukrainian Students in 1950–6 and an executive member of the *Zarevo Ukrainian Student Organization in 1954–64). In 1957 he settled in the United States. In 1968 he set up the *Smoloskyp publishing house and the Smoloskyp Ukrainian Information Service, which he has served as president and chief editor. In addition to compiling and editing many important collections of materials on the Ukrainian human rights movement, the Ukrainian Catholic and Orthodox churches, and the student movement, he has written a book about the critics I. Dziuba and I. Svitlychny, *Z generatsii novatoriv* (From the Generation of Innovators, 1967), and *Ukrainian Olympic Champions* (1968; 3rd edn 1984).

Zinkiv [Zin'kiv]. III-15. A town (1989 pop 12,100) on the Tashan River and a raion center in Poltava oblast. It was first mentioned in a historical document in 1604. After B. Khmelnytsky's uprising it was fortified, and became a company center in Poltava and then Hadiache regiment. For a while it was a regiment center (1660–71) before returning to the status of a company town of Poltava regiment (1671–1764). In the mid-18th century Elizabeth I

granted the town to Hetman K. Rozumovsky. M. Zaliziak's haidamakas were active in the area in 1768. In the 19th century Zinkiv was a county center in Poltava gubernia and a flourishing manufacturing and trading town. Today the town has a food industry, a brick factory, and a workshop of the Poltavchanka handicrafts consortium.

St Michael's Church (1769) in Zinkiv (Khmelnyskyi oblast)

Zinkiv [Zin'kiv]. IV-8. A village (1972 pop 3,600) on the Ushytia River in Vinkivtsi raion, Khmelnytskyi oblast. It was first mentioned in a document in 1404. A fortress was built there, and in 1458 the town was granted the rights of *Magdeburg law. Its inhabitants joined B. Khmelnytsky's uprising in 1648 and rebelled against the Polish overlords in 1702 and 1734. In the 18th century Zinkiv was one of the larger and more prosperous towns of Podilia. It was known for its pottery and handicrafts. At the partition of Poland in 1793 it was annexed by Russia, and in the 19th century it was part of Letychiv county in Podilia gubernia. Today it is an agricultural settlement with a brewery and a machinery repair shop. Remnants of the old triangular fortress as well as the oldest three-nave stone church in Ukraine (1521), a Roman Catholic church (1450), and a synagogue in the Renaissance style have been preserved.

Zinkiv regiment. An administrative territory and military formation in Left-Bank Ukraine. In 1648 Zinkiv became a company center in Hadiache regiment, and in 1649, in Poltava regiment. From 1662 to 1672 it was the center of a regiment consisting of 12 companies. Then Zinkiv returned to being a company center in Poltava regiment.

Zinkivsky, Trokhym [Zin'kivs'ky], Troxym] (pseud: Horlytsia, T. Zvizdochot, T. Pevny, P.Z., T.Z., M. Tsupky), b 4 August 1861 in Berdianske, Tavriia gubernia, d 21 June 1891 in Berdianske. Populist writer. He graduated from the higher military law academy in St Petersburg and was active in the St Petersburg Ukrainian Hromada. While working for the Kiev Military District court he published poems, fables, stories, literary criticism, publicistic articles about the necessity for Ukrainian autonomy, and the play 'Sumlinnia' (Conscience) in the Lviv periodicals *Zoria* and *Pravda*. Published separately were his story collections

Trokhym Zinkivsky

Maliunky spravzhn'oho zhyttia (Pictures of Real Life, 1889), *Baiky M. Tsupkoho* (M. Tsupky's Fables, 1889), and *Verba i zirka* (The Willow and the Star, 1890). A posthumous edition of his works (2 vols, 1893, 1896) edited by B. Hrinchenko appeared in Lviv; it includes a major study of the Stundists in Ukraine.

Zinovev, Grigorii [Zinovjev, Grigoriij] (pseud of Ovsel Radomyslsky), b 23 September 1883 in Yelysavethrad, Kherson gubernia, d 25 August 1936 in Moscow. Revolutionary and Soviet government official. A follower of V. Lenin from 1903, he was a member of the first Politburo. As general secretary of the Communist International (1919–26) he opposed giving the *Borotbists and the Ukrainian Communist party the status of separate members and succeeded in forcing them to join the CP(B)U. In 1923, when Lenin became incapacitated by a stroke, Zinovev, J. Stalin, and L. Kamenev formed a triumvirate that ruled the Party and state until 1926. The United Opposition of Zinovev and L. Trotsky against Stalin was defeated quickly, and the two leaders had been expelled from the Party by the end of 1927. Zinovev recanted and was readmitted to the Party, only to be expelled again in 1932. After S. Kirov's murder in December 1934, Zinovev was imprisoned on charges of complicity. In 1936 he was tried for treason, condemned, and executed.

Zinovivske. See Kirovohrad.

Zionist movement. A Jewish political movement formed in the last quarter of the 19th century for the purpose of bringing Jews back to Zion (ie, Jerusalem, the land of Israel). Zionism was born in Ukraine and flourished there despite Soviet persecution.

The first Jewish organization intent on systematic settlement of Palestine, then part of the Ottoman Empire, was established in Kharkiv in the wake of the pogroms that followed the assassination of Alexander II. A group of students created BILU (the Hebrew acronym of Isaiah 2:5, 'House of Jacob, Let us Go') and in the summer of 1882 sent a band of settlers to Palestine, where the newcomers founded Rishon L'Tzion and G'dera. Another movement, known as Hibbat Zion (Love of Zion), also became popular in Ukraine. Odessa was a center of Zionist activity. Important early Zionists in Ukraine include L. Pinsker, an Odessa physician who wrote the classic *Autoemancipation*, and Ahad Ha'am (Hebrew for 'One of the People,' pseud

of A. Ginsberg), the founder of Cultural Zionism. Ukrainian Zionists played a decisive role in defeating the so-called Uganda scheme, a plan to settle East Africa instead of Palestine. M. Ussishkin organized a conference in Kharkiv in 1903 to protest the Uganda plan.

Under T. Herzl's leadership Zionism soon became popular in Western Europe. A wide range of Zionist ideologies were represented in Ukraine. After the fall of the tsar several world Zionist parties flourished in Ukraine, and Zionism was the most popular ideology of the politically conscious elements of Ukrainian Jewry. Besides the so-called General Zionists, Ukrainian Jews supported Mizra-chi ('East,' a religious Zionist party), Zeire Zion ('Young Zion,' a socialist-oriented Zionist party), and *Poale Zion ('Workers of Zion'). During the revolutionary period the Zionists participated in the Central Rada, yet their bitter conflict with Jewish socialist parties precluded their involvement in higher levels of government. The left-leaning Poale Zion co-operated with the Jewish socialists, however, and several Jews from that party (S. Goldelman, A. Revusky) were influential in the Ukrainian National Republic.

Under the Soviets Zionism was mercilessly attacked as a 'tool of British imperialism' and decried as Jewish bourgeois nationalism. According to Soviet nationality policy Soviet Jews were not part of world Jewry and could have no desire to emigrate to a non-Soviet Jewish land. Furthermore, their immigration represented a security risk for the Soviet Union. To divert the Zionist aspirations of Ukrainian Jewry a Jewish autonomous region (Birobidzhan) was carved out of the RSFSR in the Far East, and Soviet Jews were encouraged to settle there. In the terror of 1937–8 Zionists and reputed Zionists were increasingly isolated and persecuted.

Except for a brief respite in 1948–9, when the Soviet Union officially supported the establishment of the state of Israel, Zionism continued to be suppressed. Jews who expressed Zionist sympathies were discriminated against, particularly the so-called Refuseniks (Jews who had been refused exit visas to emigrate to Israel). In 1982 there were an estimated 2,574 Refuseniks in Ukraine.

During the 1980s Ukrainian Jews continued to press for permission to emigrate to Israel and other countries and achieved increasing success. In late 1989 and early 1990 relaxed emigration laws allowed an unprecedented number of Jews to leave Ukraine for Israel.

H. Abramson

Ziritz, Gustav, b 15 February 1872 in Szatmár, Hungary (now Satu Mare, Rumania), d August 1920 in Moscow. Ukrainian military officer of Hungarian origin. During the First World War he served as chief of staff of the 43rd and 29th infantry divisions and the Second Corps of the Austrian army. In February 1919 he became, at the rank of colonel, the deputy state secretary for military affairs of the Western Oblast of the UNR in Stanyslaviv, and in November, at the rank of brigadier-general, chief of the General Staff of the Ukrainian Galician Army. In February 1920 the Supreme Revolutionary Committee of the Red Ukrainian Galician Army handed him over to the Bolsheviks. He refused to serve in the Red Army and was executed, along with Gen O. Mykytika, by the Cheka.

Zirka (The Star). A weekly republican newspaper published from 1925 to 1991 by the CC of the Communist

Youth League and the Republican Council of the Pioneer Organization in Kharkiv (to 1934) and Kiev. Until 1941 it was called *Na zminu*. Russian-language equivalents of the paper have been published under the titles *Iunyi spartak* (1922–4), *Iunyi leninets* (1924–8 and since 1944), and *Iunyi pioner* (1938–41). In 1960 *Zirka* had a pressrun of 1,000,000, and *Iunyi leninets*, one of 500,000; in 1980 the respective pressruns were 1,454,000 and 1,456,000.

Yosyf Zisels

Zisels, Yosyf, b 2 December 1946 in Tashkent. Jewish dissident and political prisoner. A graduate of Chernivtsi University (1969) and an employee of Chernivtsi television, he was expelled from the Komsomol for his human rights activities in 1972. He joined the *Ukrainian Helsinki Group in October 1978, was arrested in December, and was sentenced for 'anti-Soviet agitation and propaganda' in April 1979 to three years in a labor camp in Chernivtsi oblast. After being released in December 1981, he was re-arrested in Chernivtsi in October 1984, and sentenced in April 1985 to three more years in a camp. He was amnestied in 1987, and since that time he has been active in the Ukrainian Helsinki Union and has promoted Ukrainian-Jewish co-operation.

Zisman, Marko, b 19 March 1909 in Odessa, d 12 January 1985 in Kiev. Poet and translator. He graduated from the Ukrainian Institute of Linguistic Education (1933) and worked as a journal and newspaper editor in Kiev and Lviv. He wrote three poetry collections in the 1930s and *Riznolittia* (Various Ages, 1973) and *Riast* (Corydalis, 1979). From 1934 on he translated into Ukrainian Russian, Belarusian, Polish, Bulgarian, German, and Yiddish literary works, among them works of M. Lermontov, A. Tolstoi, Ya. Kupala, J. Słowacki, I. Vazov, J.W. von Goethe, H. Heine, F. von Schiller, and B. Brecht.

Zlataia tsip (Golden Chain). A collection of original and translated sermons popular in medieval Ukraine. Several different editions of the manuscript have survived. Topics covered in the sermons include faith, love, fasting, and refraining from usury. *Zlataia tsip* had an important impact on the development of Ukrainian *homiletics.

Zlatnyk. The first gold coin minted in Kievan Rus'. It was in circulation in the late 10th and early 11th centuries.

Zlatopil. See Novomyrhorod.

Zlatostrui (Golden Stream). A collection of sermons attributed to *St John Chrysostom. It is believed to have been translated into Old Church Slavonic under Tsar Simeon of Bulgaria in the 10th century. The oldest manuscripts copied in Ukraine, dating from the 12th century, suggest that the language and content of the sermons had been considerably revised. Their poetic qualities made the sermons popular in Ukraine, and they had an important influence on early Ukrainian literature. Two editions of the *Zlatostrui* are known, a full edition with 138 sermons and an abridged version with 67 sermons.

Zlatoust (Chrysostom). A compilation of popular sermons attributed to St John Chrysostom, which had been circulated widely in Ukraine by the 16th century. The standard compendium consisted of Old Church Slavonic translations of 112 sermons. Other editions included an abridged version for Lent; a 'Pentecost' edition, which was a slightly expanded version of the Lenten *Zlatoust*; and a 'study' version of the standard compendium, which provided expositions to the sermons. Some versions of the *Zlatoust* included sermons by local preachers, notably Cyril of Turiv.

Zlenko, Petro, b 1891, d ? Emigré bibliographer in interwar Bohemia. He worked as a librarian at the Slavonic Library in Prague and edited the Prague weekly **Ukrains'kyi tyzhden*'. He contributed to the bibliological journals *Knyholiub* (KL, Prague) and *Ukrains'ka knyha* (UK, Lviv). He was secretary of the Library-Bibliographic Commission of the Ukrainian Society of Bibliophiles in Prague, and he compiled valuable bibliographies of Revolutionary Ukrainian party publications (KL, 1930, no. 1), scholarly works by Ukrainian émigrés published in 1920–31 (1932; repub by the Canadian Institute of Ukrainian Studies [Research Report No. 39]), materials on the Ukrainian Sich Riflemen (*Za derzhavnist'*, vols 5–7 [1935]), and periodicals published in central Ukraine in 1918 (UK, 1938, nos 6–7). He wrote surveys of Ukrainian publications in Bohemia (KL, 1930, no. 4) and 11th- to 18th-century Ukrainian private libraries (UK, 1937, nos 1–10), and articles in Ukrainian encyclopedias published in Lviv (1939) and Munich (1949).

Zlobyn, Mykola, b 1874, d 1933. State and military figure. He held a number of posts in the government of the UNR, particularly the Ministry of Marine Affairs, and served as head of the Military Naval Board.

Zlochevsky, Petro [Zločevs'kyj], b 25 May 1907 in Kiev, d January 1988. Scenery designer. He studied with F. Krychevsky, K. Yeleva, and V. Tatlin at the Kiev State Art Institute (1927–31) and worked at the Voroshylovhrad Music and Drama Theater (1931–41). From 1944 he worked at the Odessa Opera and Ballet Theater, where he designed sets for S. Hulak-Artemovskyy's *Zaporozhian Cossack beyond the Danube* (1945), K. Dankevych's *Bohdan Khmelnytsky* (1954) and *Nazar Stodolia* (1960), A. Borodin's *Prince Igor* (1967), and M. Lysenko's *Taras Bulba* (1971).

Zlotsky, Teodosii [Zloc'kyj, Teodosij], b 11 October 1846 in Osii, Bereg komitat, Transcarpathia, d 1926 in Draho, Transcarpathia. Ukrainian writer, folklorist, and ethnographer. After completing his theological studies he served as a village priest and contributed articles on popular superstitions, rites, customs, legends, folk games,

songs, tales, charms, and proverbs to journals such as *Svit*, *Novyi svit*, *Kelet*, and *Etnographia*. For his work he was elected to the Hungarian Ethnographic Society. He founded a Ruthenian branch of the society in Uzhhorod. A book of selected verses by Zlotsky appeared in 1923. Most of his work remains unpublished, including a historical grammar of the Carpatho-Ruthenian language (written in 1883). His collection of proverbs was published in 1955.

Zloty (Polish: *złoty* 'golden'). A Polish monetary unit, the name of which is derived from the calque for various gold ducats, florins, and guldens that circulated in the 14th- and 15th-century Polish Commonwealth, including Ukraine. From 1493 it was worth 30 silver groszy (cf German *groschen*) and had a weight value of 30 g. From 1661, zlotys were minted on a large scale in Lviv, Cracow, and Bydgoszcz as silver coins equaling one-third of a *taler. In the 18th century 1 pre-Partition zloty (*złotówka*) was worth 30 copper groszy or 4 silver groszy. From 1786, zlotys (worth 15 Austrian kreuzers) did not circulate in Austrian-ruled Galicia. In the Congress Kingdom of Poland they were worth one-sixth of a taler. In Russian-ruled Poland 1 zloty was worth 15 kopecks from 1832. Since 1924, 1 zloty has equaled 100 groszy. The zloty was reintroduced in 1924 as the chief monetary unit of Poland. In the interwar years approx 5 zloty equaled 1 US dollar.

Zlupko, Stepan, b 16 July 1931 in Dorozhiv, Sambir county, Galicia. Economic historian; full member of the Shevchenko Scientific Society since 1990. A graduate of Lviv University (candidate's degree, 1960), he has worked at the Lviv branch of the AN URSS (now ANU) Institute of Economics as a specialist in Western Ukrainian economic history and thinkers. He has written books on the ideological struggle over the agrarian question in late 19th- and early 20th-century Galicia (1960), the history of economic thought in 19th-century Western Ukraine (1969), S. Podolynsky (1990), and I. Franko (1992). In recent years he has been active in the Lviv branches of the Ukrainian Language Society and the Popular Movement of Ukraine (Rukh).

Zmah (The Competition). A weekly sports paper published in Peremyshl (February–April 1937) and then Lviv (to November 1938). The chief editor was Ye. Zyblykevych.

Zmiienko, Vsevolod [Zmijenko], b 29 November 1884 in Odessa, d 30 October 1938 in Warsaw. Senior UNR Army officer. He served as chief of staff of various divisions in

Gen Vsevolod Zmiienko

the UNR Army: the Odessa Haidamaka Division (1917), the Third Kherson Corps (1918), the First Division of Sich Riflemen (1919), and the Sixth Sich Rifle Division (1920). He was promoted to brigadier general in the UNR Army. During the interwar period he was a founder and active member of the *Ukrainian Military History Society.

Zmiievky. Amulets made of gold, silver, or bronze and worn in Kievan Rus' as charms against evil. Round or oval in shape, they had a sacred image (a saint, the Theotokos, etc) on one side and a dragon (*zmii*, hence the name *zmiievkyk*) or medusa on the other. Such medallions were discovered in archeological digs in Chernihiv and Bilhorodka near Kiev.

Zmii-Myklushyk, Yosyf [Zmij-Myklušyk, Josyf] (Miklovshii), b 20 March 1792 in Slovinky, Slovakia, d 1 December 1841. Painter. He studied at the Vienna Academy of Arts (1814–22). He painted commissioned portraits and genre scenes and attracted attention with his portrait of Francis Joseph I (1835). In 1830 he was appointed official icon painter of Prešov eparchy and began painting iconostases and murals in village churches in the Prešov region. He painted murals in the side chapels of the Prešov Cathedral in 1835.

Zmiinyi Island [Zmijnyj ostriv] (also Zmiieviyi and Fidonisi). An island within Odessa oblast situated in the northwestern part of the Black Sea, 37 km from the mouth of the Danube River. The island is 1.5 sq km in area and has a steep shoreline. It was known in Greek times as Levkoi and was the site of a temple to Achilles. A major naval battle during the Russo-Turkish wars took place near the island in 1788.

Zmiiovi Valy. A series of earthen wall fortifications whose furthest western reaches are located along a Zhytomyr–Cherkasy axis and whose eastern reaches run along the left bank of the Dnieper River south of Kiev. The walls are 8–22 m in width and approx 9 m high, with a cumulative length of at least 950 km (some estimates run as high as 2,000 km); a moat was dug out along the exterior (usually southerly-oriented) elevation. Notwithstanding their impressive size and extent, little is definitively known about these fortifications. Archeological evidence indicates that they are older than the *Trajan's Wall built further southwest in Ukraine, while historical documents indicate that Prince Volodymyr the Great (ruled 980–1015) built walls in at least the Pereiaslav-Khmelnytskyi area. It seems most likely that they were built over the course of the 2nd–12th centuries and at the time of their widest development served as frontier fortifications of the Kievan Rus' state against the incursions of steppe nomads. The walls took their name (literally meaning 'serpentine') from a folk legend that depicted them as being furrows made by a dragon that had been conquered by a Rus' warrior-hero and harnessed to a plow.

Zmiiv. See Hotvald.

Znachko-Yavorsky, Melkhsydedek [Značko-Javors'kyj, Melkhsydedek] (secular name: Matvii), b ca 1716 in Lubni, Chernihiv region, d 14 June 1809 in Hlukhiv, Chernihiv regiment. Orthodox churchman. He studied at the Kievan Mohyla Academy before being tonsured in

1738 at the *Motronynskyi Trinity Monastery, where he served as hegumen in 1753–68. From 1761 he also served as administrator of the Orthodox churches and monasteries in Polish-ruled Right-Bank Ukraine, which belonged to Pereiaslav eparchy. In this capacity he fought against exploitation by the Polish gentry and against attempts to introduce the Uniate church throughout the area. He also supported the haidamaka uprisings. In 1768 he was accused of aiding M. *Zalizniak and of stirring up the peasantry against the Poles; he was arrested, but was released on the intervention of Bishop Hervasii of Pereiaslav. Under pressure from the Polish gentry, however, the Russian government removed him from his position at the Motronynskyi Monastery in 1768 and assigned him to Left-Bank Ukraine. Znachko-Yavorsky then served as hegumen at the Pereiaslav (1769–71), Vydubychi (1771–81), Mhar Transfiguration (1781–6), and Hlukhiv (1786–1809) monasteries. In 1771–83 he was also vicar of the St Sophia Cathedral in Kiev. A biography of Znachko-Yavorsky by T. Lebedyntsev and documents relating to his life appeared in *Arkhiv Iugo-Zapadnoi Rossii* (1864).

Z-nad khmar i z dolyn (From above the Clouds and from the Valleys). One of the first anthologies of Ukrainian modernist poetry and prose, published in Odessa in 1903. It was compiled and edited by M. *Vorony, and contained works by him, I. Franko, Lesia Ukrainka, B. Hrinchenko, H. Khotkevych, P. Hrabovsky, O. Kobylanska, N. Kybalchych-Kozlovska, M. Kotsiubynsky, N. Kobrynska, P. Karmansky, M. Starytsky, M. Cherniavsky, V. Shchurat, A. Krymsky, V. Samiilenko, A. Krushelnytsky, O. Romanova, and others. It influenced the subsequent development of modernist literature in Ukraine.

Znamia kommunizma (The Banner of Communism). A Russian-language organ of the Odessa oblast and city Party Committees and Soviets, published six days a week from April 1944 to 1991. In 1960 it had a pressrun of 52,000 while its Ukrainian-language equivalent, **Chornomors'ka komuna*, had 42,000; in 1980 their pressruns were 236,000 and 80,000 respectively.

Znamianka [Znamjanka]. v-13. A city (1989 pop 28,100) and raion center in Kirovohrad oblast. It was founded in 1869 as a railway settlement on the Kharkiv–Odessa line, and got its name from the nearby village of Znamianka. The Znamianka–Mykolaiv line and the Znamianka–Fastiv line were opened in 1873 and 1876 respectively, and the town developed into an important junction. In 1938 it was granted city status. The city is a railway center with repair yards and metalworking factories. It also has a food industry.

Znannia (Knowledge). A popular magazine published by the People's Commissariat of Education in Kharkiv (1923–34) and Kiev (from 1934–5). It appeared weekly in 1923–5 and then semimonthly. Until May 1924 it was called *Znattia*, and until 1927 it appeared in both Russian and Ukrainian. Its editors included A. Prykhodko and I. Nemolovsky.

Znannia (Knowledge). A pro-Soviet weekly newspaper published in Buenos Aires from late 1949 to March 1961. It succeeded the paper **Svitlo*, which was banned by the Argentinian government. The paper popularized Soviet

achievements in politics and culture and supported Soviet actions in foreign and domestic politics. Many articles were reprinted from Soviet Ukrainian journals. *Znannia* was succeeded by *Ridnyi kraj*.

Znannia Society. A civic education and enlightenment organization based in Kiev. It was founded in 1947 as the Society for the Dissemination of Political and Scientific Knowledge, a 'voluntary' organization for the dissemination of communist and *antireligious propaganda under the guise of 'scientific knowledge' (*znannia*). A constituent member of the USSR Znanie Society, it was renamed the Znannia Society of the Ukrainian SSR in 1963. In 1979 it had 684,700 members, in 28,336 primary organizations. The society runs 24 stationary lecture halls, 10 planetariums, the Republican Building of Economic and Scientific-Technical Propaganda in Kiev, and a branch of the building in Sevastopol. It organized millions of public lectures and events throughout Ukraine, offered courses at over 7,500 *people's universities, conducted nature schools, and published the popular-educational and propaganda monthlies **Nauka i suspil'stvo* (since 1951), **Liudyna i svit* (since 1960), and **Trybuna lektora* (since 1965), the annual compendium *Nauka i kul'tura* (since 1966), and 12 brochure series. Reflecting the democratization of the late 1980s, the society reconstituted itself in November 1990 as the Znannia Society of Ukraine and adopted a new statute.

Znannia ta pratsia (Knowledge and Work). A popular science magazine for children published by the CC of the Communist Youth League of Ukraine. It appeared monthly (1929–30, 1936–41) and semimonthly (1931–5) in Kharkiv from 1929 to mid-1941, and was renewed as a monthly in Kiev from 1957 to 1991. The magazine contains articles and literary works, especially science fiction. Its pressrun was reduced from 50,000 in 1975 to 30,000 in 1984.

Znoba, Ivan, b 25 November 1903 in Novomykolaivka, Katerynoslav county, d 10 September 1990 in Kiev. Sculptor; father of V. *Znoba. In 1941 he graduated from the Kiev State Art Institute. He has done portraits of heroes of labor and created the T. Shevchenko monument in Dnipropetrovske and, with V. Znoba, *T. Shevchenko in Exile* (1958) and the liberation monument at the Slovak-Ukrainian border (1970) near Uzhhorod. An album of his works was published in 1970.

Valenty Znoba at work on a portrait of Mykhailo Yanhel

Znoba, Valenty, b 10 January 1929 in Sofiiivka, Katerynoslav okruha. Sculptor. He learned to sculpt from his father, I. *Znoba, and I. Severa and studied at the Kiev State Art Institute (1947–53) under M. Lysenko. He has sculpted portraits, including ones of O. Veresai (1954) and H. Skovoroda (1960); monuments to the Soviet hero V. Poryk, in France (1967, with H. Kalchenko), to U. Karma-liuk, in Letychiv, to those who died in the Nazi concentration camps, in Darnytsia (1968), and to I. Mechnikov, at the Pasteur Institute in Paris; the liberation monument at the Ukrainian-Slovak border near Uzhhorod (1970, with I. Znoba); the Battle for the Dnieper monument in Bukryn; and the Eternal Glory monuments in Khmelnytskyi and Kherson.

Oleksander Znosko-Borovsky

Znosko-Borovsky, Oleksander [Znosko-Borovs'kyj], b 27 February 1908 in Kiev, d 8 March 1983 in Kiev. Composer and violinist. He graduated (1932) from the Lysenko Music and Drama Institute in the composition class of L. Revutsky, served as music consultant for feature films at the Ukrainfilm studio in Kiev (1931–41), and then (1945–63) worked as music editor for the Mystetstvo publishing house. His compositions include the cantata *Our Victory* (1946) for chorus and orchestra; three symphonies (1958, 1960, and 1967) and other works for orchestra; concertos for violin (1951), cello (1968), French horn (1976), and trombone (1975); works for chamber ensemble, chorus, piano, violin, and trombone; pieces for band; art songs and folk song settings; and music for radio and films. His musicological works include brochures on A. Shtoharenko (1946), M. Mussorgsky (1949), and A. Borodin (1959), as well as articles in journals.

Zobkiv, Mykhailo, b 1864 in Galicia, d 7 December 1928 in Mostar, Yugoslavia. Jurist; full member of the Shevchenko Scientific Society from 1899. A graduate of Lviv University, he submitted his doctoral dissertation at Zagreb University (1894) and taught civil law there. He became president of the Supreme Court of Bosnia and Hercegovina in Sarajevo. His publications include *Die Teilpacht nach dem römischen und österreichischen Recht* (1894) and articles on legal issues in *Chasopys' pravnycha* and Austrian legal journals.

Zograf, Aleksandr, b 10 March 1889 in Moscow, d 17 January 1942 in Leningrad. Russian archeologist and numismatist. Upon graduating from Moscow University (1912), he worked in the Moscow Museum of Fine Arts

and then (from 1922) in the numismatics division of the Hermitage in Leningrad (from 1935 as its head). Taking part in archeological excavations in Olbia and Kerch, he studied coins excavated in the Black Sea region and developed a thorough classification scheme for them. His major work on this topic is *Antichnye monety* (Ancient Coins, 1951).

Zółkiewski. A Polish magnate family, some of whose members played an important role in Ukrainian history. Mikołaj (end of the 15th century) was voivode of Belz. His son, Stanisław (d 1588), converted from the Orthodox to the Roman Catholic faith and became voivode of Belz in 1582 and voivode of Rus' in 1586. Stanisław's son, S. *Zółkiewski, was a Polish grand hetman and chancellor. His nephew, Łukasz (b 1594, d 1636), served as voivode of Bratslav in 1636 and then as starosta of Pereiaslav. He financed a Jesuit church and college in Pereiaslav.

Zółkiewski, Stanisław, b 1547 in Turynka (near Lviv), d 7 October 1620 near Cecora, Moldavia. Polish state and military figure. His crown positions included field hetman (from 1588), grand hetman (from 1613), castellan of Lviv (from 1590), and chancellor (from 1618). He led the Polish expeditionary force that brutally suppressed the uprisings led by S. Nalyvaiko, H. Loboda, and others at the Battle of *Solonytsia in 1596. He was killed fighting the Turks at the Battle of Cecora.

Zolne burial site. The grave of an 8th- to 7th-century BC warrior located near Zolne, Symferopil raion, Crimea; excavated in 1959. The deceased had been buried in an earlier-constructed Pit-Grave culture kurhan. Items found in his grave included an iron sword, a whetstone, bronze, iron, and bone arrowheads, pottery fragments, and elegant horse trappings made of bronze and bone.

Zolochiv [Zoločiv]. IV-5. A city (1989 pop 21,300) on the Zolochivka River and a raion center in Lviv oblast. It was first mentioned in a document in 1442. By the end of the 15th century it was an important trade center in western Podolia, and in 1523 it obtained the rights of *Magdeburg law. The town was protected with a castle and walls. In 1672 it was captured by the Turks and burned to the ground. After the partition of Poland in 1772, it was annexed by Austria, and served as a county center in Galicia. In the interwar period (1919–39) it was occupied by Poland. Today it is an industrial center with a branch of the Maiak Sewing Consortium, a carton and furniture factory, a radio factory, and a sugar refinery. Its chief architectural monuments are the 16th-century castle (rebuilt in 1634–6), the Church of the Resurrection (1604), St Nicholas's Church (end of the 16th century, reconstructed in 1767), and a Roman Catholic church (1726–33).

Zolochiv [Zoločiv]. III-16. A town smt (1990 pop 12,900) on the Udy River and a raion center in Kharkiv oblast. It was founded in 1677 by Cossacks from Right-Bank Ukraine, and became a company center in Kharkiv regiment in 1685. In 1780 it became a county center in Kharkiv vicegerency. Today the town is an agricultural center with a railway station, a grain elevator, and several food-processing enterprises.

The castle in Zolochiv (Lviv oblast) and its plan

Zolochiv Brigade of the Ukrainian Galician Army (Zolochivska [4] brygada UHA). A unit of the Second Corps of the UHA, formed out of the Eastern Group in January 1919. It consisted of four infantry battalions, a cavalry machine-gun company, and two artillery regiments. In June the brigade scored victories against the Poles at Chortkiv, Terebovlia, Berezhany, and Pomoriany, and in August it marched with the UNR Army to Kiev, defeating the Bolsheviks at Proskuriv, Starokostiantyniv, Shepetivka, Zhytomyr, and Korosten. In the fall of 1919 it was deployed against A. Denikin's army, and in the spring of 1920 it fought on the Polish front. The brigade commanders were Col Didiukiv, Maj S. Shukhevych (February–May 1919), Col S. Chmelyk (May–July 1919), Maj Liaskovsky, and Maj B. Shashkevych.

Zolota Balka settlement. A large Scythian-Sarmatian trade and craft center of the 2nd century BC to 2nd century AD on the Dnieper River near Zolota Balka, Novovorontsovka raion, Kherson oblast. Excavations in 1951–63 revealed the remains of stone wall fortifications, dwellings with stone and clay outbuildings, grain storage pits, ironworks, and a pottery workshop. The settlement's inhabitants engaged in agriculture and various crafts and traded with northern Black Sea coast centers, particularly Olbia. A burial site with 86 individual and group graves without kurhans was discovered near the settlement.

Zolota Lypa River. A left-bank tributary of the Dniester River that flows southward for 126 km through Lviv, Ternopil, and Ivano-Frankivske oblasts and drains a basin area of 1,440 sq km. The river is 5–15 m in width (maximum 50 m) and 0.5–2 m in depth. It is used for water supply and irrigation and has a water reservoir. The town of Berezhany is situated on it.

Zolota Mohyla. A Scythian kurhan of the 5th century BC located near Symferopil, Crimea; also known as Zoloty Kurhan. The kurhan was built over a Bronze Age burial site that contained corpses in a flexed position with red ochre sprinkled over them. It housed a Scythian warrior in iron armor decorated in bronze, silver, and gold, as well as an iron sword, a leather scabbard, and a quiver with 180 arrows.

Zolota Mohyla. A burial mound of a 4th-century BC Bosporan Kingdom nobleman located near Kerch, Crimea. It was excavated in 1832. The kurhan was approx 21 m high and 240 m long with stone blocks placed around its base. A long, narrow corridor led to three stone burial vaults which had been robbed prior to excavation. The largest of the burial vaults had stone block walls that gradually closed in overhead to form a high (approx 9 m) dome.

Zolotarenko. A family line of Cossacks from Korsun that later resettled in Nizhen, in Left-Bank Ukraine. Its notable members included the brothers Vasyi *Zolotarenko, Ivan *Zolotarenko, and Tymish Zolotarenko, all of whom served as colonels of Nizhen regiment; their sister, Hanna Nykyforivna, the third wife of B. Khmelnytsky (married in 1651), who entered a nunnery after his death; Vasyi's son, Ostap (Evstafii) Zolotarenko (Vasiutenko), who was the Kish otaman of the Zaporozhian Sich (1667) and colonel of Nizhen regiment (1669–70); and Yakiv Zolotarenko (d 1721), a captain of Pryluka regiment (1690–1709), who was exiled to Moscow in 1717 for supporting I. Mazepa. Yakiv left some of his estate to the Hustynia Trinity Monastery.

Zolotarenko, Ivan, b ?, d 15 November 1655 in Staryi Bykhau, Belarus. Cossack leader. He served as colonel of Nizhen regiment (1652–5), and in 1654 he led an army of 20,000 Cossacks to Smolensk to join with a Muscovite army led by Tsar Aleksei Mikhailovich in a campaign to wrest Belarus from Polish control. Most of Lithuania fell to the Muscovites, and Zolotarenko occupied southern Belarus (1654–5), where he established a Cossack administration. His doing so put him in direct conflict with Moscow, which had designs on the territory, and he was killed during a siege of Staryi Bykhau.

Zolotarenko, Vasyi, b ?, d 28 September 1663 in Borzna, Chernihiv region. Colonel of Nizhen regiment (1655–6, 1659–63). He was a leader of the mutiny that deposed Hetman I. Vyhovsky in 1659. He secured Left-Bank Ukraine with Ya. *Somko and handed it over to Prince A. Trubetskoi upon his arrival in Nizhen. Zolotarenko's ambition for the hetmancy made him envious of Somko, on whom he informed to the Russian tsar. At the **Chorna rada* in 1663, the newly elected hetman I. Briukhovetsky ordered the execution of both Somko and Zolotarenko.

Zolotarev, Aleksandr, b 1880, d ? A leader of the Jewish Social Democratic *Bund in Ukraine. After the February Revolution of 1917 he was elected a Bund representative to the Central Rada. In July 1917 he was appointed a member of its Little Rada. In January 1918 he replaced M. Rafes as the Bund representative in the UNR General Secretariat, in which he spoke out against a separate UNR peace treaty with the Central Powers. After the proclamation of Ukraine's independence he was appointed UNR state comptroller but was ordered to resign by the Bund, which opposed Ukrainian independence. Later he joined the Bolshevik party. He was arrested during the Stalinist terror of the 1930s and probably executed.

Zolotarev, Vasili, b 7 March 1872 in Tahanrih, d 25 May 1964 in Moscow. Russian and Ukrainian composer and educator. A graduate of the St Petersburg Conservatory (1900) in the composition class of N. Rimsky-Korsakov, he was professor at the conservatory in Odessa (1924–6) and the Lysenko Music and Drama Institute in Kiev (1926–31). He also taught at the Minsk Conservatory (1933–41). His works include the opera *Khvesko Andyber* (on Ukrainian themes, with a libretto by M. Rylsky, 1928); the *Shevchenko Suite* for chorus and orchestra (1909); art songs to texts by I. Franko, O. Oles, and others; and 30 *Little Pieces*, a cycle of Ukrainian songs for piano four hands. Among his students were K. Dankevych, V. Femelidi, and K. Dominchen.

Zolotcha. A locality on the left bank of the Dnieper River opposite Kiev, where the princes of Kievan Rus' met in conference in 1101. The purpose of the conference was to work out a plan for a common campaign against the Cumans.

Zolote. V-19, DB II-5. A city (1989 pop 23,600) on the Komyshevakh River in Luhanske oblast. It was founded in 1878 as a mining settlement. In 1938 it was granted city status. Today Zolote has five coal mines and an enrichment factory.

Zolotnyk. See Weights and measures.

Zolotnytsky, Illia [Zolotnyc'kyj, Illja], b 22 July 1870 in Poltava gubernia, d 5 November 1930 in Warsaw. Judge and state figure. In 1918–20 he filled a number of legal positions, including head of the Supreme Military Tribunal (at the rank of colonel), head of the General Administration of Prisons, and associate of the Ministry of Justice. He later emigrated to Warsaw, where he was active in Ukrainian community affairs.

Zolotnytsky, Volodymyr [Zolotnyc'kyj] (also Vasyi), b 1741, d ? Military figure, writer, and philosopher. A graduate of the Kievan Mohyla Academy and Moscow University, he worked as a cadet school teacher and translator. He returned to army service in 1771 as colonel of the Dnieper Engineering Regiment. His works include translations of Seneca and philosophical studies about ethics, the immortality of the soul, and natural law.

Zolotonosha [Zolotonoša]. IV-13. A city (1989 pop 30,900) on the Zolotonoshka River and a raion center in Cherkasy oblast. It was first mentioned in a document in

1576, as a fortified town. In 1640 it was acquired by J. Wiśniowiecki. After throwing off Polish rule in 1648, Zolotonosha became a company center in Cherkasy and, in the 1660s, in Pereiaslav regiment. In 1781 it was given city status and made a county center of Kiev vicegerency. In the 19th century it was part of Poltava gubernia. By 1885 there were 30 manufacturing enterprises in the city. The Bakhmach–Krasne railway (1897) ran through Zolotonosha and gave it access to agricultural markets. Today its main industry is food processing. It also has a large building-materials factory, a perfume factory, and a sewing plant. Its chief architectural monument is the Church of the Transfiguration (1760–7), built by I. Hryhorovych-Barsky.

Zolotonoshka River [Zolotonoška] (also Zolotonosha). A left-bank tributary of the Dnieper River that flows southward for 88 km in Cherkasy oblast before emptying into the Kremenchuk Reservoir. It drains a basin area of 847 sq km. The river, approx 5 m in width, has a valley which is marshy in places. It is used for water supply, irrigation, and pisciculture. The city of Zolotonosha is situated on it.

Zolotov, Grigorii, b 24 January 1882 in Pervoe Plesno, Voronezh gubernia, Russia, d 15 April 1960 in Pavlohrad, Dnipropetrovske oblast. Painter and graphic artist. He studied under M. Pymonenko and I. Seleznov at the Kiev Drawing School (1913–16) and at H. Narbut's studio in Kiev (1919). Besides portraits and historical and genre paintings, such as *Peter I Making a Print* (1912), *Triumph of Victory* (1945), and *Harvest Festival* (1945), he did murals in the church in Bilousivka, Podilia gubernia (1914), in workers' clubs in Pavlohrad (1920–3), and in the Pioneer Palace in Dnipropetrovske (1934). He did illustrations to T. Shevchenko's poem 'Kateryna' and P. Tychna's poem 'Na maidani' (In the Square, 1934) and designed the magazines *Iskusstvo i pechatnoe delo* (1909), *Iskusstvo. Zhivopis'. Grafika. Khudozhestvennaia pechat'* (1911), and *Iskusstvo v Iuzhnoi Rossii* (1913).

Zolotova, Yevheniia, b 12 December 1928 in Synelnykove (now in Dnipropetrovske oblast). Stage director. Since completing study at the Kiev Institute of Theater Arts (1950) she has worked in the Chernivtsi Oblast Ukrainian Music and Drama Theater. Among her notable productions was B. Brecht's *Mutter Courage und ihre Kinder* (1965).

Zoloty Potik [Zolotyj Potik]. v-6. A town smt (1990 pop 2,500) in Buchach raion, Ternopil oblast. It was founded at the end of the 14th century. Called Zahaipole at first, it was renamed in 1570. Today it has a branch of the Ternopil Cotton-Spinning Complex and a branch of the Monastyrська Sewing Consortium. The remains of a 17th-century fortress and a Roman Catholic church are tourist attractions.

Zolozova, Tetiana (née Andrushchak), b 1 December 1941 in Kiev. Musicologist. She studied violin at the Kiev Conservatory (1960–5) and then musicology (1965–70). Since 1969 she has taught at the Kiev Conservatory (professor from 1991). Her numerous works, mostly articles, are in the area of music history and theory; they include a monograph on the instrumental music of postwar France.

Zoogeography. See Zoology.

Zoological gardens and parks. Cultural and educational establishments in which wild and sometimes domesticated animals are kept for display, scientific research, and reproduction. The only difference between gardens and parks is in their size and the extent of their collections. In recent times zoological gardens have become responsible for the preservation and even breeding of rare or endangered species of animals; others have undertaken the task of acclimatizing animals to new geographic environments, research on various diseases and their prevention, and so on. In Ukraine the first zoological park was organized in 1875 in what is now the *Askaniia-Nova Nature Reserve. Others followed in Kharkiv (1896), Mykolaiv (1901), Kiev (1908), Odessa (1936), the city of Mena in Chernihiv oblast (1977), and Cherkasy (1979). The largest of these is the zoological park in Kiev, covering an area of 40 ha, where over 1,600 animals representing more than 240 species are kept. In Kharkiv 300 elephants were bred in captivity, and in Mykolaiv 300 lions are regularly bred. (See also *Nature preserves.)

Zoological museums. Institutions in which animal collections are assembled for scientific, educational, and cultural purposes, for exhibition and research. The oldest Ukrainian zoological museum (est 1919) is in Kiev, under the auspices of the AN URSR (now ANU) *Institute of Zoology. Other museums have been established at the universities in Lviv, Odessa, Kharkiv, Dnipropetrovske, and Chernivtsi. Zoological museums carry out extensive research on topics such as taxonomic descriptions of *fauna, zoogeography, the history of the animal world, and comparative anatomy. Expeditions are organized to enrich current knowledge of zoology. The staff is often involved in consultations on medical, agricultural, forestry, or hunting problems concerning various specimens of the local fauna.

Zoology. A complex biological science that studies the diversity of animals, their relationship to the environment, their activities, their evolutionary development, and their interaction with the human species.

There are three identifiable periods in the development of zoology in Ukrainian history: (1) the period of isolated early works, (2) the period of systematic studies of Ukrainian fauna, and (3) the modern period, which reflects the political upheavals of the 20th century.

Early treatises on Ukrainian *fauna by local writers and foreign travelers, supplemented by ancient chronicles of the Kievan Rus' period, provide a wealth of information about Ukrainian animals – wild bull, bison, elk, stag, chamois, wild boar, bear, lynx, fox, beaver, ermine, otter, swan, crane, black grouse, hazel grouse, wild horse, and others, some of them now extinct species. Some animals were drawn on pottery or on building walls. There is little material from the period between the end of the Halych principality and the 18th century except for the memoirs and diaries of Western European travelers. During that time yearly Turkish and Tatar raids on Eastern Europe had a detrimental effect on any scholarly ventures.

Toward the end of the 18th century the first systematic studies of Ukrainian natural sciences began to appear, spearheaded by graduates of the Kievan Mohyla Academy – A. *Prokopovych-Antonsky, P. *Prokopovych, and

M. Terekhovskiy – as well as by G. Zhonchynsky, H. Yunker, F. Herman, B. *Hacquet, and others. The tsarist government began to support expeditions to catalog the fauna of its empire, including Ukrainian territory. The treatises of S. Gmelin, J. *Güldenstädt, and P. *Pallas provided valuable data on the animals of the steppe zone, the Crimea, and Caucasia. The fauna of Western Ukraine was studied by the faculty at the Kremianets Lyceum, A. *Andrzejowski, W. *Besser, F. Bauer, K. Eichwald, A. Behr, A. Demidov, J. Blazius, and G. Belke.

The establishment of Ukrainian universities gave fresh stimulus to Western methods of investigating various zoological problems in Ukraine. Numerous scholars did research: at Kiev University, K. Kessler (birds, reptiles, amphibians, and fish of the Kiev region), O. Kovalevsky (embryology and physiology; in 1871 he established the first marine hydrobiological station, in Sevastopol), K. Rumshevych (the embryology of the development of the eye), M. *Bobretsky (the embryology of invertebrates), V. *Bets (anatomy), L. Artemovsky (the histology of bone marrow), A. *Walter (the nerves regulating circulation of blood), A. Korotniv (lower marine animals), and S. Kushakevych (the simplest animals); at Kharkiv University, I. *Krynytsky (spiders and birds of Ukraine), A. *Chernai (fauna of the Kharkiv region and southeastern Ukraine), whose students included O. *Maslovsky (histology and embryology), V. Yaroshevsky (dipterology), V. Reinhardt (histology), P. Stepaniv (parasitology), and I. *Mechnikov, and the physiologists V. *Danylevsky, M. Biletsky, I. Kalynychenko, O. Nykolsky, P. Sushkin, N. Somov, and T. Tymofiiiv; at Odessa University, where research centered on Black Sea fauna along with that of the Crimea and the nearby steppes, O. Nordman, V. Shmankevych, V. Zalensky, O. *Brauner, and the ornithologists B. Walch, I. Podushkin, and H. Borovikov.

A special role in the development of zoology in Ukraine was played by research associations organized in the 1870s – the *Kiev Society of Naturalists (which established the Dnieper River Biological Station in 1909), the *Kharkiv Society of Naturalists, and the Odessa Society of Naturalists, which studied the fauna of the Black Sea and its estuaries.

In Western Ukraine the development of zoology was centered at Lviv University and, to some extent, at the Dzieduszycki Museum and the Copernicus Society of Naturalists in Lviv. At a later stage the mathematical-natural sciences-medical section of the Shevchenko Scientific Society in Lviv took over the leadership in those efforts. Individual scientists active during the period were A. Zavadsky (vertebrates of Galicia and Bukovyna), R. Kner (local fish life), Z. Syrsky (the reproductive organs of eels), B. Dybovsky (morphology and anatomy), J. Nusbaum-Hiliarovych (animal histology), the cytologists and embryologists Ya. Hirshler, K. Sembrat, Ya. Poliushynsky, and M. Monne, and the entomologists M. Novytsky, M. Lomnytsky, H. Kinel, R. Kuntse, and Ya. Noskevych. Significant contributions to Ukrainian terminology were made by I. *Verkhratsky.

After the First World War the Ukrainian Academy of Sciences (UAN) gave a significant impetus to the development of modern zoology in Ukraine, especially with its *zoological museum (est 1919). A number of zoological organizations, museums, and institutions were established. Several journals were published by the UAN – *Zoolohichnyi zhurnal Ukraïny* (1921–3), *Zbirnyk prats' Biolohichnoho insty-*

tutu (1926–32), *Zbirnyk prats' Zoolohichnoho muzeiu* (1926–63), and *Zbirnyk prats' Dniprov's'koï biolohichnoi stantsii* (1926–31), renamed *Trudy hidrobiolohichnoi stantsii* (1934–40), and *Trudy Instytutu hidrobiolohii/Trudy Instituta gidrobiolohii* (1947–61).

During the 1920s and 1930s the number of Ukrainian zoologists increased greatly in the Ukrainian SSR. The following is a partial list of investigators who were active: in the field of physiology, N. Bordzylovska, M. Zelynska, K. Kzhyshkovsky, V. *Radzymovska, V. *Pravdych-Nemynsky, and O. *Skovoroda-Zachyniaiev; in cytology, B. Aleksenko, M. *Bilousiv, S. Velish, and S. Shakhiv; in genetics, T. Dobzhansky, M. *Vetukhiv, and H. Karpechenko; in pathophysiology, O. *Bohomolets; in comparative anatomy, I. *Shmalhauzen, D. *Tretiakov, V. Balynsky, and M. *Voskoboinykov; in the simplest animals, S. Kushakevych and S. *Krashenninnikov; in zooplankton, H. Vereshchagin, Yu. Markovsky, V. *Roll, and H. *Melnykov; in sponges, M. Hrymailivska; in insects, S. Paramoniv, I. Bilanovsky, V. Gross-Haim, F. *Kyrychenko, V. Sovynsky, Yu. *Kleopov, V. Khranevych, L. *Sheliuzhko, H. Artobolevsky, S. Medvediev, V. *Karavaiv, and O. Makariv; in beetles, D. *Zaitsiv, M. Taran, H. Petrushevsky, and Ye. Savchenko; in mollusks, S. Panochini and V. Lindholm; in ichthyology, D. Beling, M. *Ovchynnyk, Ye. *Slastenenko, F. Velykokhatko, P. Balabai, F. Ovsianynkov, K. Tatarko, O. Isachenko, and I. Syrovatsky; in amphibians and reptiles, F. Sukhov and B. Voliansky; in birds, M. *Sharleman, O. Kistiakivsky, V. Herchner, M. Burchak-Abramovych, L. Portenko, M. Shcherbyna, M. Havrylenko, and V. *Artobolevsky; and in mammals, V. Khranevych, I. Tarnani, V. *Averin, O. *Myhulin, I. Barabash-Nikiforov, Ya. Zubko, B. Bilsky, and I. *Pidoplichko.

The terror of the 1930s and ensuing Second World War arrested the further development of Ukrainian science in general, including zoology. The autonomous Ukrainian scientific organizations were subordinated to the USSR All-Union Academy of Sciences in Moscow; publication of most of the professional journals was terminated. Many leading scientists were committed to hard-labor camps or executed.

In Western Ukraine entrance to Lviv University was closed for Ukrainians by the Polish government. Active scientific programs were initiated only after 1945, when Western Ukrainian territories were incorporated into the Ukrainian SSR.

The postwar period witnessed a switch to practical applied zoology, with a concentration on agricultural problems, *veterinary science, and evolutionary issues. Scientists worked in the following fields: leguminous plant pests, O. Petrukha; sugar beet pests, M. Ulashkevych, O. Zhytkevych, B. Bilsky, and Ye. Zvirozomb-Zubovsky; parasitology, O. Stankov, N. Shchupak, M. Pyvynsky, O. Prendel, R. Reinhardt, and O. *Markevych; comparative anatomy and morphology, V. *Kasianenko, B. Dombrovsky, K. Tatarko, and P. Balabai; histology, O. *Leontovych, D. Tretiakov, Ye. Malovichko, and V. *Rubashkin; regeneration, E. Umansky, M. *Savchuk, H. Mashtaler, and N. Shevchenko; and zoogeography, M. Sharleman, O. Myhulin, V. Zhadin, and O. Kistiakivsky.

The principal centers of zoological studies are the ANU (formerly AN URSR) *Institute of Zoology, *Institute of Hydrobiology, and Institute of Ecology, the Kharkiv University Institute of Biology, the Ukrainian Scientific Research Institute of Fish Farming in Kiev (est 1930), the Azov-

Black Sea Scientific Research Institute of Fish Farming and Oceanography in Kerch, and the Odessa and Sevastopol biological stations.

In Western Ukraine zoological work is carried out at Chernivtsi, Uzhhorod, and Lviv universities, and the zoological departments of some pedagogical institutes and scientific research institutions, where there is concentration on specific local fauna. Principal investigators in this group include O. Markevych, I. Andreiev, O. Kistiakivsky, M. Kucherenko, F. Strautman, V. Abelentsev, I. Sokur, and K. Tatarynov.

A number of noted zoologists emigrated from Ukraine, beginning in the 1920s and continuing after the Second World War, including T. Dobzhansky, M. Vetukhiv, F. Velykokhatko, E. *Zharsky, Yu. *Rusov, Ye. Slastenenko, A. *Granovsky, S. Paramonov, D. Zaitsiv, V. Lazorko, and S. Krashennikov. Many of them continued their work at the *Ukrainian Technical and Husbandry Institute.

Zootechny. The technology of *animal husbandry, which incorporates *selection, breeding, *genetics, *nutrition, and housing. Zootechny has existed in various forms since the advent of animal domestication, although it has been developed extensively as a scientific undertaking only in modern times. In Ukraine zootechny was practiced in the Kievan Rus' era, when the breeding of horses (commonly used for military purposes) was well developed. During the Cossack era the stables of the Kochubei family were renowned. The early 18th century witnessed considerable developments in *sheep farming in Ukraine, when experienced breeders were brought in from other countries and certain industry norms and practices were implemented.

The origins of contemporary Ukrainian zootechny can be traced to the 1860s and 1870s, when two lines of thought regarding the best method of animal breeding were proposed: the first, to mix local breeds with known Western European ones; the second, to concentrate on the maintenance, improvement, and exploitation of local breeds. Most of the research in the field was undertaken by private scholars working in institutions, such as the Kharkiv Veterinary Institute, the Kiev Polytechnical Institute, and the Askaniia-Nova Nature Reserve. (See also *Cattle raising and *Goat farming.) No single authoritative body existed to administer the zootechny practices, and local efforts on the zemstvo level were attempted. In Western Ukraine some work was done by individual scholars at the Lviv Polytechnical Institute and by the agricultural society *Sil'skyi Hospodar, but there was no systematic institutional support in Galicia.

With the establishment of a Ukrainian state in 1917–18 an animal husbandry division was formed within the *Agricultural Scientific Committee of Ukraine. It co-ordi-

nated theoretical and practical zootechnical research in Ukraine until the scientific committee was abolished in 1928. Animal husbandry virtually disappeared during the collectivization campaign and the man-made famine in Ukraine. It fully re-established itself only after the Second World War, under the auspices of the Animal Husbandry Board of the Ukrainian Ministry of Agriculture. Its major concerns include breed development, the exhibition of animals, and the maintenance of accurate pedigree records. In addition a variety of Ukrainian scientific research institutes deal with regional aspects of animal husbandry in the forest-steppe and Polisia, Western Ukraine, and the steppe regions. The major forum in Ukraine for zootechny has been the monthly journal **Tvarynnytsvo Ukraïny*.

Zoreslav. See Sabol, Sevastiian-Stepan.

Zoria. An association of Ukrainian tradesmen, manufacturers, and merchants, founded in Lviv in 1884. Continuing the traditions of the old Ukrainian brotherhoods, the association promoted vocational education and technical training. It set up a special section for young tradesmen and a residence for apprentices and vocational students (1896). The organization expanded to the larger towns in Galicia: by 1932 it had 12 branches and over 10,000 members. The founder and longtime president of Zoria was V. *Nahirny. He was succeeded by Yu. Sydorak, the director of the Dilo printing press. Zoria was dissolved in 1939, when Soviet forces occupied Galicia. It was revived briefly under the German occupation (1941–4), when it was known as the Labor Alliance of Ukrainian Tradesmen (Obiednannia pratsi ukrainskykh remisnykiv) and operated under the umbrella of the Ukrainian Central Committee.

Zoria (Lviv)

Zoria (Star). A semimonthly literary and scholarly journal published in Lviv in 1880–5 by O. Partytsky and in 1885–97 by the Shevchenko Scientific Society. One of the most important journals of its time, it was devoted to pan-Ukrainian issues and topics, and united writers and subscribers from both Austrian- and Russian-ruled Ukraine. In 1891 it switched from using etymological spelling to a phonetic orthography. *Zoria* contained literary studies by I. Franko, M. Hrushevsky, V. Kotsovsky, A. Krymsky, O. Ohonovsky, K. Studynsky, and V. Shchurat, and articles on historical, ethnographic, and economic topics by K. Zaklynsky, O. Levytsky, O. Kalytovsky, I. Sharanevych, Franko, D. Lepky, S. Zhuk, and B. Poznansky. Several bi-

ographies and memoirs, as well as the correspondence of prominent individuals, also appeared in the journal. *Zoria* was edited by O. Partytsky (to 1885), O. Kalytovsky, O. Borkovsky (1886, 1888–9, 1897), H. Tsehlynsky (1887–8), P. Skobelsky (1889–90), V. Tysovsky (1890–1), and V. Lukych (1890–7). From 1885 Franko was managing editor. *Zoria* was succeeded by *Literaturno-naukovyi vistnyk*. A systematic index to it was published in Lviv in 1988.

Zoria (Star). A popular monthly magazine published in Kolomyia in 1902–3. It was edited by K. Trylovsky and P. Olearchuk. Each issue contained a relatively long literary work by writers such as Yu. Fedkovych, T. Yanytsky, B. Lepky, and K. Ustyianovych; articles on political issues and Ukrainian history and culture; and reports on the Sich and Sokil societies and the temperance movement in Western Ukraine.

Zoria (Star). A Ukrainian-language literary journal published in March–April 1906 in Moscow (a total of eight issues). It contained works by I. Franko, O. Kovalenko, B. Hrinchenko, M. Starytsky, B. Hrinchenko, Kh. Alchevska, and I. Nechui-Levytsky; art reproductions; articles on Ukrainian history and culture; and the text of the first part of a practical course on the Ukrainian language by A. Krymsky. The editor was I. Oppokov.

Zoria (Star). The first Ukrainian newspaper in Brazil. It was published semimonthly by the Prosvita society in Curitiba in 1907–9 and irregularly in 1910. The editor was S. Petrytsky.

Zoria (Star). A semimonthly Russophile newspaper published in 1920–31 in Uzhhorod by the Subcarpathian Popular Enlightenment Union. It appeared in the Transcarpathian dialect and was edited by K. Kokhanny-Goralchuk and then P. Fedor.

Zoria (Star). A weekly newspaper published in Chernivtsi in 1923–5. Edited by V. Rusnak, it managed to attract only 250 subscribers.

Zoria (Star). An illustrated monthly journal of literature, culture, and politics, published in Dnipropetrovske from January 1925 to October 1934. From 1927 it was the organ

Zoria (Dnipropetrovske)

Zoria halytska

of the Dnipropetrovske branch of the *All-Ukrainian Association of Proletarian Writers, and in 1925–9 it was edited by P. Yefremov and I. Tkachuk. *Zoria* published works by local writers, members of the *Zakhidnia Ukraina writers' group (eg, Tkachuk, M. Irchan, and V. Bobynsky), and pro-communist Ukrainian immigrants (eg, M. Tarnovsky in the United States and A. Pavliuk in Czechoslovakia). The monthly *Shturm* appeared in place of *Zoria* from January 1935 to April 1937.

Zoria halytska (Galician Star). The first Ukrainian-language newspaper, published in Lviv weekly from May 1848, semiweekly in 1849–52, and then weekly again to 1857 (a total of 717 issues). As the organ of the *Supreme Ruthenian Council until 1850, the paper stressed the separateness of the Ukrainian nation and the ethnic unity of Ukrainians in the Austro-Hungarian and Russian empires. In 1850–4 *Zoria halytska* was funded by the *Stauropigion Institute and controlled by *Russophiles. Throughout most of this period it was called *Zoria halytskaia* and was published in the artificial Ukrainian-Russian *yazychiie. It was a journal from 1853. In late 1854 it was taken over by Ukrainophiles, but financial difficulties forced it to fold. *Zoria halytska* published news and articles on political, economic, religious, and community affairs. From 1850 it devoted much attention to literature. It was actively supported by the Greek Catholic clergy, and in 1853–4 it published a religious supplement, *Poucheniia tserkovnyia*. The paper was edited by A. Paventsky (1848–50), M. Kosak (1850), I. Hushalevych (1850–3), B. Didytsky (1853–4), S. Shekhovych (1854), P. Kostetsky (1855–6), and M. Savchynsky (1857).

Zoria/Hajnal (Star). A scholarly journal of the *Subcarpathian Scientific Society, published in Uzhhorod in 1941–3, during the Hungarian occupation of Transcarpathia, in the local Transcarpathian dialect and in Hungarian. Edited by I. Haraida, it advocated the existence of a separate 'Rusyn' (Ruthenian) nation and culture with close ties to Hungary.

Zorka, Samiilo, b and d ? According to S. Velychko he was a Cossack chronicler and a scribe at the Zaporozhian Sich, and later he became senior secretary to Hetman B. Khmelnytsky. He reportedly wrote a *Diariush* (Chronicle-Diary) of the events of 1648–57 in Ukraine, which has not been preserved, but which Velychko claims to quote in his own work. Velychko's chronicle also contains Zorka's eulogy delivered at Khmelnytsky's funeral. Certain scholars (I. Franko, V. Ikonnikov, I. Krypiakevych, M. Marchenko, and M. Petrovsky) claim that Zorka was a fictional personality, and therefore that his chronicle never existed, but others (V. Antonovych, O. Levytsky, M. Maksymovych, and K. Zaklynsky) maintain that he was a real person.

Zörnika, Adam (Zernikav), b 1652 in Königsberg, Germany, d 1691 in Baturyn, Left-Bank Ukraine. Orthodox monk and theologian. A wandering German intellectual who had lived and studied throughout Western Europe, he became convinced that he would find spiritual truth in Orthodoxy and set off for Moscow in 1679. En route he stopped in Chernihiv, where Bishop L. Baranovych baptized him into the Orthodox faith and placed him as an army engineer for Hetman I. Samoilovych. A trip to Mos-

cow in 1683 disillusioned Zörnrikau completely and persuaded him to remain in Ukraine. After the fall of Samoiloivych in 1687, he took monastic vows and settled in Baturyn. Zörnrikau is renowned for a series of tracts written in Latin in 1682 under the title *De processione Spiritus Sancti*, which argue that the Holy Spirit descended from God the Father. The work was published in 1774 in Königsberg, translated into Ukrainian in the mid-18th century by monks at the Kievan Cave Monastery, and published in Russian translation in two volumes in 1902 (Pochaiv) and 1906 (Zhytomyr).

Zorych-Kondracki, Kvitka [Zoryč-Kondrac'ka], b 9 March 1944 in Lviv. Conductor and music teacher. She emigrated to Canada with her parents in 1948. She graduated from the Faculty of Music of the University of Toronto (BM, 1968) and then taught music in secondary schools. In 1965 she founded the *Vesnivka Choir, which she has since served as conductor and musical director. She is also a founding member of the Ukrainian Canadian Choral Society.

Zorynske [Zoryns'ke]. v-19, DB III-5. A city (1989 pop 9,600) in Pereval'ske raion, Luhanske oblast. It originated in the 1930s with the merging of the railway settlement of Manuilivka (est 1878) and the Nykanor mining settlement and was called Olenivka. In 1963 the town was renamed and raised to city status. Zorynske is an industrial center with two coal mines.

Zoshchenko, Mikhail [Zoščenko, Mixail], b 10 August 1895 in Poltava, d 22 July 1958 in Leningrad. Russian writer-humorist of Ukrainian origin. He belonged to the literary association Serapion Brothers. He published a number of collections of satirical stories and novels, including the biographical novel *Taras Shevchenko* (1939). In 1946 he was criticized for political deviation and was expelled from the Soviet Writers' Union. He was rehabilitated after J. Stalin's death.

Zosymovych, Volodymyr [Zosymovyč], b 30 October 1899 in Shapovalivka, Borzna county, Chernihiv gubernia, d 18 January 1981 in Kiev. Biologist; corresponding member of the AN URSS (now ANU) from 1961. A graduate of the Kiev Agricultural School (1926), he worked at the All-Union Scientific Research Institute of the Sugar Industry (1930–60), the Central Republican Botanical Garden of the ANU (1960–3), the ANU Institute of Botany (1963–7), and the ANU Institute of Molecular Biology and Genetics (from 1967). His research centered on the cytogenetics and polyploidy of sugar beets.

ZOUNR. See Western Province of the Ukrainian National Republic.

Zozulia, Yakiv [Zozulja, Jakiv], b 31 March 1893 in Lebedyn, Kharkiv gubernia, d 6 February 1984 in New York. Jurist, publicist, and political activist; member of the Ukrainian Academy of Arts and Sciences. He began to take an active part in Ukrainian political and cultural life in 1910 and joined the Ukrainian Party of Socialist Revolutionaries. He was a member of the Central Rada (1917–18) and a departmental director in the UNR Ministry of Economic Affairs. He emigrated to Czechoslovakia and graduated in law from Charles University in Prague (1928). In

Yakiv Zozulia

1938–9 he worked on the legal commission of the government of Carpatho-Ukraine, and in 1943 he became a professor of law at the Ukrainian Technical and Husbandry Institute; he published a guidebook to the institute's regulations and curriculum in 1947. He emigrated to the United States thereafter and taught at the Ukrainian Technological Institute in New York from 1954. He served as vice-president of the Association of Ukrainian Lawyers in New York (1955–62). He compiled a chronology of events during the struggle for Ukrainian independence (February 1917 to March 1918) and published popular articles on Ukrainian émigré schools (1958) and Ukrainian statehood (1967), as well as the monograph *Hroshi ukrains'koi derzhavy* (Currency of the Ukrainian State, 1972; with B. Martos).

Zozuliak, Vasyl [Zozuljak, Vasy'l'], b 19 September 1909 in Chertizhne, Zemplén county, Transcarpathia. Writer. He graduated from the Mukachiv Teachers' Seminary (1937) and worked as a teacher. He became the cultural-educational secretary of the Ukrainian People's Council of the Prešov Region (1947–9) and the Association of Czechoslovak-Soviet Friendship (1949–52) and then served, until his retirement, as director of the publishing house of the Cultural Association of Ukrainian Workers and of the Ukrainian department of the Slovak Publishing House of Artistic Literature. He first wrote in Russian, in which language he published two books of plays (1953) and a novel (1956). From the mid-1950s he wrote, in Ukrainian, many didactic plays, collected in the book *Za chyste nebo* (For a Clear Sky, 1983); the satire, humor, and play collection *Buvaie i tak* (It Also Happens Thus, 1957); the epic novel *Neskoreni* (The Undaunted, 3 vols, 1962, 1966, 1974); the novelette collections *Na krutykh povorotakh* (On Sharp Turnarounds, 1975) and *Nezlamni kryla* (Unbreakable Wings, 1977); the story collections *Svitlo i tini* (Light and Shadows, 1971) and *Khmary i zori nad Beskydom* (Clouds and Stars over the Beskyd, 1986); and the novel *Metamorfozy* (Metamorphoses, 1979). His plays have been staged by the Prešov Ukrainian National Theater.

Zozulyntsi settlement. A multi-occupational site near Zozulyntsi, Zalishchyky raion, Ternopil oblast. Studies revealed the remains of a Paleolithic camping ground, a Trypilian culture settlement (in which zoomorphic earthenware figurines were found), an early Slavic grave site, and a Rus' settlement.

Zródła dziejowe (Historical Sources). A collection of historical materials (22 volumes in all) published by the Polish historians A. Jabłonowski and A. Pawiński in 1876–99. Several volumes, subtitled *Ziemie ruskie* (Rus' Lands), were devoted to Right-Bank Ukraine, and contained valuable materials on the settlement, administrative system, and economic life of the region under Polish rule.

Zsatkovich, Gregory. See Zhatkovych, Hryhorii.

ZUADK. See United Ukrainian American Relief Committee.

Marco Zubar: *Portrait of Maria Lalevich* (oil and tempera, 1963)

Zubar, Marco, b 31 March 1925 in Dnipropetrovske, d 28 November 1990 in Philadelphia. Sculptor and painter. A postwar refugee, he graduated from the Düsseldorf Academy of Fine Arts (1951) and then emigrated to the United States. He studied architecture at Princeton University and worked for a firm in Philadelphia as a designer of church interiors. He designed stained-glass windows at the Randolph Macon Women's College in Lynchburg, Virginia, at St Josaphat's Ukrainian Catholic Church in Rochester, New York, and at the Boys Town Chapel in Boys Town, Nebraska. He built monumental metal sculptures, such as the bronze *Eternal Flame*, added to the Tomb of the Revolutionary Soldier in Washington Square; a light-sculpture for the Beth Zion–Beth Israel Temple, and a steel sculpture in Philadelphia at the Awbury Recreation Center. He also created original ceramic icons, using a technique of his own invention, and painted modernist portraits and compositions, such as *Madam M*, *God the Son*, *Prophet*, *Girl's Dance*, and *First Flower*.

Halyna Zubchenko: *Legend about Loyalty* (tempera, watercolor, gouache, 1978)

Zubchenko, Halyna [Zubčenko], b 19 July 1929 in Kiev. Mosaicist, muralist, stained-glass artist, and painter. A graduate of the Kiev State Art Institute (1959), she has created many large-scale decorations, including the mosaic wall in the Café Lybid in Kiev (1963), the folksy ceramic-bowl wall in the restaurant of the Hotel Dnipro in Kiev (1964), the murals for School No. 47 in Donetske (1965–6, with H. Synytsia, A. Horska, V. Zaretsky, and H. Marchenko), and several mosaic walls with her husband, H. Pryshedko. The figures in her compositions tend to be heroic and idealized, in keeping with *socialist realism. Zubchenko has, however, made continuing use of Ukrainian folk-art motifs and mythology and has adapted them effectively to large architectural surfaces. The palette of her easel temperas is as radiant and intense as that of her wall decorations. She has painted a series of sensitive and ethnographically interesting portraits of Hutsuls in their native dress (eg, *Hanusia*, 1962; *Malva of the Carpathians*, 1965) and brooding landscapes of the Carpathian Mountains (eg, *Chornohora: Spring*, 1964).

Zubenko, Artem, b 2 November 1890 in Mali Budyshcha, Hadiache county, Poltava gubernia, d 26 August 1963 in New York. Engineer and community figure. After serving in the Russian army he joined the *Zaporozhian Corps and eventually was interned in Wadowice, Poland. He subsequently obtained an engineering degree in Prague (1928) and worked in Czechoslovakia (until 1945). He arrived in the United States in 1945, where he edited the bulletin of the *Ukrainian National State Union in 1952–60 and its organ **Tryzub* in 1960–3.

Zubenko, Ivan, b 1889 in Kherson gubernia, d 1940. Writer and journalist. The editor of the UNR Army paper *Zaliznyi strilets*' (1920–2) in Kalisz, Poland, from 1926 he lived in Kolomyia and coedited the women's journal *Zhinocha dolia*. His plays *Divcha z leliieiu* (Girl with a Lily) and

Orlenia (The Baby Eagle) were staged in Galicia. He wrote the novelettes *Fatum* (Fate, 1934), *Halyna* (1934), and *Kvitka na bahni* (A Flower on the Marsh, 1937) and the novella collection *Za kulisamy zhyttia* (Behind the Stage of Life, 1937).

Zuber, Rudolf, b 18 September 1858 in Orlat, Rumania, d 7 May 1920 in Lviv. Geologist. In 1896 he was appointed a professor at Lviv University. He specialized in petroleum exploration and the geology of the Carpathian Mountains. Volumes 2 and 17 of the multivolume *Atlas geologiczny Galicji* (The Geological Atlas of Galicia, 1888, 1905) were prepared by him. He was the author of *Geologia pokładów naftowych Karpat galicyjskich* (The Geology of the Petroleum Strata of the Galician Carpathians, 1899).

Zubkov, Serhii, b 25 September 1919 in Orchykova Cherneshchyna, Kostiantynohrad county, Poltava gubernia. Literary scholar. A graduate of the Kiev Pedagogical Institute (1951), he specialized in prerevolutionary Ukrainian literature and has written monographs on Ye. Hrebinka (1962), H. Kvitka-Osnovianenko (1978), and the Russian prose of Kvitka-Osnovianenko and Hrebinka in the context of Russian-Ukrainian literary relations (1979). He served as head of the manuscript and textology department of the AN URSR (now ANU) Institute of Literature (1951–74), director of the ANU Institute of Fine Arts, Folklore, and Ethnography (1974–87), and editor of *Narodna tvorchist' ta etnografia* (1974–88).

Zubkovsky, Heorhii [Zubkovs'kyj, Heorhij], b 15 August 1921 in Bekhtery, Oleshky county, Tavriia gubernia. Graphic artist. In 1951 he graduated from the Kiev State Art Institute, where he studied under I. Pleshchynsky, A. Sereda, and V. Kasiiian. He has created the oil series 'Donbas, Shaft 17–17 bis' (1951), the lithograph series 'Soviet Boryslav' (1957), and the linocut series 'On Guard for Peace' (1965) and has designed and illustrated editions of Yu. Zbanatsky's *Peredzhnyv'ia* (Preharvest Time, 1968), O. Makovei's *Iaroshenko* (1967), and a collection of Cossack songs (1969).

Zubkovsky, Panas [Zubkovs'kyj], b 1855 in Myrhorod, Poltava gubernia, d 22 December 1921 (or spring 1924) in Tomsk, Siberia. Populist revolutionary. He studied at the Poltava Theological Seminary and Kiev University and was involved in revolutionary circles close to *Zemlia i Volia and V. *Osinsky's group. He was one of the organizers of the assassination of Gov D. Kropotkin in Kharkiv in February 1879. After being arrested in Zasullia, Romen county (May 1879), he was sentenced by a military court in St Petersburg (November 1880) to 15 years of hard labor in eastern Siberia. In 1886 his sentence was commuted to permanent exile. In the 1890s he worked for the paper *Pribaltiiskii listok* in Riga, Latvia, and edited the paper *Sibirskii listok* in Tobolsk, Siberia. Under Soviet rule he worked in financial institutions in Omsk and Tomsk.

Zubrytsky, Denys [Zubryc'kyj] (Zubrzycki, Dyonizy; pseud: Denis Veniava iz Zubritsy), b 1777 in Batiatychi, Zhovkva circle, Galicia, d 16 January 1862 in Lviv. The first professional Ukrainian historian and archivist in Galicia; corresponding member of the St Petersburg Archeographic Commission from 1842 and the Russian

Denys Zubrytsky

Academy of Sciences from 1855, and honorary member of the Kiev Archeographic Commission from 1844 and the Moscow Society of Russian History and Antiquities from 1846. He graduated from a Lviv gymnasium (1795) and worked as a civil servant in Brzezowa (Sianik circle) and elsewhere in Galicia. From 1829 to 1847 he held various elected offices at the *Stauropogion Institute in Lviv, including vice-chairman and director of its press, archive, and library. In 1843–4 he was commissioned to put the Lviv municipal archive in order and to write a description of it.

Zubrytsky was greatly influenced by the Russian historian M. *Pogodin's theory of one Russian-Ukrainian nation. He in turn influenced the views of the Galician Russophile scholars. An opponent of the Polish nobility and of Polish domination in Galicia, Zubrytsky idealized the tsarist autocracy while remaining loyal to the Austrian crown. During the Revolution of 1848 he supported the Supreme Ruthenian Council but opposed the abolition of serfdom.

Zubrytsky did substantial archival research and in 1823 published a pioneering article on Galician folk songs in *Der Pilger von Lemberg*. He wrote a Polish book of historical studies on Ruthenian-Slavonic printeries in Galicia (1836), a survey history of the Ruthenian people and the church hierarchy in Galicia from 988 to 1340 (1837), a chronicle of the city of Lviv (1844), a pamphlet on the Ruthenian-Polish ethnic border in Galicia (1849; German trans 1849), and historical articles, published mostly in the Lviv journal *Rozmaitości*. Zubrytsky's Russian-language magnum opus on the history of the Principality of Galicia-Volhynia (3 vols, 1852, 1855) had a great impact on his Galician contemporaries. Instead of a fourth volume he published a book of excerpts from the medieval chronicles of Janko of Czarnków and J. Długosz with his Russian translations and critical commentaries and notes (1855).

Zubrytsky's letters appeared in editions of the correspondence of Pogodin (1880), V. Hanka (1905), and Ya. Holovatsky (2 vols, 1905, 1909). A selection of his correspondence in 1840–53 was published by K. Studynsky in *Zapysky NTSh* (vol 43 [1901]), and his correspondence with J. Kopitar was published by F. Svystun in *Vestnik 'Narodnago doma'* (vol 24 [1906]).

R. Senkus

Zubrytsky, Dionisii [Zubryc'kyj, Dionisij] (pseud: Torysyn), b 20 June 1895 in Dachiv, Prešov region, d 15 April 1949 in Prešov. Writer, artist, and publicist. He worked as a teacher and later became director of the Prešov Ruthe-

nian Municipal School. In his time he was one of the few writers in the Prešov region who wrote in Ukrainian in addition to the **yazychiie*. In the 1920s and 1930s his prose, poems, and publicistic and literary articles were published in Transcarpathian and Prešov periodicals, such as *Nash ridnyi kraj*, *Vinochok dlia podkarpats'kykh ditochok*, *Pchilka*, *Russkaia molodezh*, *Pidkarpats'ka Rus'*, *Slovo naroda*, and *Russkoe slovo* (of which he was an editor) and in the almanacs of the Prešov Prosvita society, in which he was active in the 1930s. He promoted the literary use of the vernacular and a Ukrainian identity in the Prešov region.

Zubrytsky, Mykhailo [Zubryc'kyj, Myxajlo], b 22 October 1856 in Kindrativ, Turka county, Galicia, d 8 April 1919 in Berehy Dolishni, Lisko county, Galicia. Historian, ethnographer, and Greek Catholic priest (from 1883); member of the Shevchenko Scientific Society from 1904. He attended the gymnasium in Drohobych with I. Franko and later studied at the Lviv and Peremyshl theological academies. He researched the history of Galicia in the 19th century and published a wealth of materials on the history of the Galician village (*ZNTSh*, vols 70–9 [1906–7]), the years 1846–61 in Galicia (*ZNTSh*, vol 26 [1898]), recruitment in Galicia from the end of the 18th century to the middle of the 19th century (*ZNTSh*, vol 42 [1901]), the Ruthenian clergy in Galicia in 1820–53 (*ZNTSh*, vol 88 [1909]), the village clergy in Galicia in the 17th and 18th centuries (*ZNTSh*, vol 51 [1903]), and parish libraries of the Peremyshl eparchy (*ZNTSh*, vol 90 [1909]). He also researched the ethnology of the Boiko region and contributed articles to the journals *Zhyttie i slovo* and *Dilo*.

Zubrytsky, Nykodym [Zubryc'kyj], b 1688, d 1724. Engraver. He worked for the presses in Krekhiv, Lviv (1691–1702), Pochaiv (1704), Kiev (1705), and Chernihiv (1709–24). Almost 400 of his engravings have been preserved, including 67 illustrations and ornaments etched in copper for **Ifika ieropolitika* (1712), some illustrations and ornaments for an edition of the New Testament (1717), and the print *Turkish Siege of Pochaiv* (1704). The themes of his genre prints were often taken from folk stories and legends.

Volodymyr Zubrytsky

Zubrytsky, Volodymyr [Zubryc'kyj], b 1888, d ? Pedagogue. A teacher in the Peremyshl State Gymnasium, he was an active promoter of education in the Sian region. In 1928–30 he was elected to the Polish Sejm. In 1944 he was sent to a Soviet labor camp, where he disappeared.

Nykodym Zubrytsky: engraved title page of a didactic gospel printed in Univ (1696)

Zubyk, Roman, b 1902, d 1940? Economic historian; member of the Shevchenko Scientific Society. He worked in Lviv and researched the history of prices from the 15th to 17th centuries. He was arrested in 1940, and perished at the hands of the NKVD.

Zuev, Vasilii, b 12 January 1754 in St Petersburg, d 18 January 1794. Russian natural scientist and traveler; member of the Russian Academy of Sciences from 1779. In 1768–74 he took part in research expeditions into the Urals and Siberia sponsored by the academy, and in 1781–2 he undertook a trip of his own through Ukraine. He noted his observations in the book *Puteshestvennyye zapiski ot Sankt-Peterburga do Khersona v 1781 i 1782 gg.* (Travel Notes from St Petersburg to Kherson in 1781 and 1782, 1787). Zuev provided the first descriptions of the iron-ore deposits in the Saksahan River valley in the Kryvyi Rih region and the saltwater lakes between Poltava and Kremenchuk. He also prepared a map of the Dnieper Estuary.

Zuhres. V-19, DB III-4. A city (1989 pop 23,800) on the Krynka River in Donetsk oblast, under the jurisdiction of the

Khartsyzke city council. It was founded as a workers' settlement in 1929–32 during the construction of the Zuiivka Thermoelectric Station. Today its residents work at the thermoelectric station (DRES no. 2) and its experimental center and in the city's machine-building and brick factories.

Oleh Zuievsky

Luba Zuk

Zuievsky, Oleh [Zujevs'kyj] (Zujewskyj), b 16 February 1920 in Khomutets, Myrhorod county, Poltava gubernia. Scholar and poet. Zuievsky was educated at the Kharkiv Institute of Journalism. After being displaced by the Second World War he emigrated to the United States in 1950. He completed his studies at the University of Pennsylvania (PH D, 1962) and taught Russian language and literature at Fordham University in New York (1960–3) and Rutgers University in New Jersey (1963–6) and at the University of Alberta (1966–90). Two collections of his poems were published, *Zoloti vorota* (The Golden Gates, 1947) and *Pid znakom feniksa* (Under the Sign of the Phoenix, 1958). He has translated from French, English, and German poetry into Ukrainian and has published (with I. Kostetsky) *Vybranyi Stefan George po ukraïnskomu ta inshymy, peredusim slovians'kymy movamy* (Selected Stefan George [translated] into Ukrainian and Other, Especially Slavic, Languages, 2 vols, 1968, 1971). His translation of S. Mallarmé's *Poésies*, with an introduction and notes, was published in 1990.

Zuikha, Yavdokha [Zujixa, Javdoha] (pseud of Syvak, Yavdokha), b 1 March 1855 in Kushchyntsi, Haisyn county, Podilia gubernia, d 19 January 1935 in Ziatkivtsi, Haisyn raion, Vinnytsia oblast. Folk singer. Over a period of 12 years H. *Tantsiura wrote down her repertoire of 1,008 folk songs with melodies, 400 proverbs and sayings, 156 tales, many riddles, and other ethnographic materials. His notations have been preserved in the manuscript collection of the AN URSR (now ANU) Institute of Fine Arts, Folklore, and Ethnography. The nonreligious songs (925 in all) were published in the collection *Pisni lavdokhy Zuikhy* (The Songs of Yavdokha Zuikha, 1965), and some of the remaining material appeared in the series *Ukrains'ka narodna tvorchist* (Ukrainian Folk Art).

Zuivka [Zujivka]. V-19, DB III-4. A town smt (1985 pop 5,400) on the Krynka River in Donetsk oblast, under the

jurisdiction of the Khartsyzke city council. It was founded in 1775. It is the site of the Vilkhivka Reservoir.

Zuk, Ireneus [Žuk, Irenej], b 5 August 1943 in Liubachiv, Galicia. Concert pianist and educator; brother of L. and R. Zuk. A graduate of the Peabody Conservatory in Baltimore (PH D, class of L. Fleischer, 1985), he has served on the faculties of McGill and Queen's universities in Canada. He has performed in recitals, often with his sister L. *Zuk, and as a soloist with the Montreal Symphony Orchestra, Radio-Canada CBC Orchestra, and other ensembles. His Ukrainian repertoire includes works by M. Lysenko, V. Kosenko, L. Revutsky, and A. Kos-Anatolsky.

Zuk, Luba [Žuk, Ljuba], b 5 April 1930 in Liubachiv, Galicia. Concert pianist and educator. She studied at the Graz Conservatory and in Montreal at McGill University before graduating from the Conservatory of Quebec. Since the 1950s she has taught at McGill University, and since 1965 at the Ukrainian Free University as a visiting lecturer. A popularizer of Ukrainian piano music in the West, she regularly interprets works by M. Lysenko, V. Barvinsky, F. Yakymenko, M. Verykivsky, M. Fomenko, V. Hrudyn, N. Nyzhankivsky, and I. Sonevytsky. She has appeared in piano duo recitals with her brother I. *Zuk premiering works by G. Fiala, M. Kouzan, I. Bilohrud, F. Yakymenko, and others.

Radoslav Zuk, architect: St Michael and the Angels Ukrainian Catholic Church in Tyndall, Manitoba

Zuk, Radoslav [Žuk], b 13 September 1931 in Liubachiv, Galicia. Architect and educator; brother of I. and L. Zuk. A graduate of McGill University (B ARCH, 1956) and the Massachusetts Institute of Technology (M ARCH, 1960), he has been a professor of architecture at the University of Manitoba (1960–6) and McGill (since 1976) and a designer with the Montreal firm of Gorman, Mixon, and Blood. A fellow of the Royal Architecture Institute of Canada since 1987, he has designed seven Ukrainian churches in Canada (St Michael's [1963] in Tyndall, Manitoba, Holy Family [1963] and St Joseph's [1964] in Winnipeg, St Michael's [1966] in Transcona, Manitoba, Holy Eucharist [1967] in Toronto, Holy Cross [1968] in Thunder Bay, and St Stephen's [1982] in Calgary) and two in the United States (Holy Trinity [1976] in Kerhonkson, New York, and St Josaphat's [1979] in Rochester). All of Zuk's designs have an impressive silhouette and evoke the traditional wood-

en architecture of Western Ukraine but remain contemporary and responsive to their surroundings. He received the Governor-General's Medal for Architecture for St Stephen's Church in Calgary, in which his intention was to capture the unique cultural character of the various historical periods of Ukrainian architecture mainly through volumetric articulation.

ZUNR. See Western Ukrainian National Republic.

Zvorych, Andrii [Zvoryč, Andrij] (Svarich, Andrew), b 1 October 1886 in Tulova, Sniatyn county, Galicia, d 23 May 1977 in Vegreville, Alberta. Community activist. An immigrant to Canada with his parents in 1900, he served as director of the National Co-operative Company (Ruska Narodna Torhovlia, 1910–23) and was the first Ukrainian to serve on the municipal council (1914). Active in the Ukrainian community, he was a founding member of the Ukrainian Orthodox church of Canada, the Hrushevsky Institute in Edmonton, and the Ukrainian People's Home in Vegreville.

Petro Zvorych

Zvorych, Petro [Zvoryč] (Svarich, Peter), b 24 March 1877 in Tulova, Sniatyn county, Galicia, d 30 June 1966 in Vegreville, Alberta. Community leader. He completed study at a gymnasium, emigrated to Canada in 1900, and settled in the Vegreville area after working at a variety of odd jobs for several years. In 1909 he was one of the founders of the National Co-operative Company (Ruska Narodna Torhovlia), which developed into a chain in the Ukrainian districts of east central Alberta. Zvorych became a leading figure in the Ukrainian Orthodox Church of Canada and the Ukrainian Self-Reliance League. As well, he was a strong supporter of the Mohyla Ukrainian Institute and a frequent contributor to *Ukrains'kyi holos*. The first part of his memoirs was published in 1976 as *Spomyny, 1877–1904* (Reminiscences, 1877–1904).

Zveno (Link). A journal of literature, art, and criticism, published by the Central Union of Ukrainian Students and, later, the MUR association in Innsbruck. Seven issues appeared in 1946–7 under the editorship of V. Krymsky, the later ones with the assistance of Yu. Dyvnych (Lavrinenko) and Yu. Klen. Among the contributors were prominent postwar émigré writers.

Zvenyhorod. IV-5. A village in Pustomyty raion, Lviv oblast, approx 20 km southeast of Lviv. It is also called

Zvenyhorod Halytskyi, to distinguish it from Zvenyhorod Kyivskyi, which was a town south or southwest of Kiev during the era of Kievan Rus' (probably destroyed by Tatars in 1240). The Galician village site has been settled continuously since the Paleolithic period and is one of the oldest such sites in Galicia. Zvenyhorod is first mentioned in ancient chronicles under the year 1087, when it was the seat of Prince Volodar Rostyslavych. In 1124–41 his son, Volodymyrko, governed there, and after he moved to Halych, Ivan Rostyslavych (1144) and Roman Ihorevych (1206–12) ruled there. The town derived its importance from its position at the intersection of east–west and north–south trade routes. The fortress, built on a low hill surrounded by the marshes of the Bilka River, was virtually inaccessible. After it was burned down by the Tatars in 1240, Zvenyhorod declined to an ordinary village, and its leading role passed to Lviv. Excavations were conducted at Zvenyhorod by I. Sharanevych (1885), M. Hrushevsky (1899), N. Mykyta (1907), I. Bilynkevych (1920s), L. Chachkovsky (1932), Ya. Pasternak (1937), and I. Sveshnikov (1970–81). Among the retrieved artifacts the most historically valuable are samples of Roman provincial ceramics imported from Gaul and the lead seals of Metropolitan Constantine and Prince Vasylko of Terebovlia. Some traces of a court church built of white stone have been found.

A. Zhukovsky

Zvenyhorod. A fortress somewhere to the south or southeast of Kiev that protected the capital of Rus' from nomadic hordes. To distinguish it from other medieval towns of the same name, it is usually called Zvenyhorod Kyivskyi. Its exact location has not been determined. The fortress is mentioned in the Hypatian Chronicle as the site of *Vasylko Rostyslavych's blinding in 1097, as an object of contention between Yuri Dolgorukii and Iziaslav Mstyslavych in 1150–1, and as the site of a battle with the Cumans in 1234. The fortress was probably destroyed by the Mongols in 1240.

Zvenyhorod principality. An appanage principality of Kievan Rus' that emerged toward the end of the 11th century. Its capital was Zvenyhorod, near Lviv. It was ruled by Volodar Rostyslavych and then by his son, Volodymyrko, who by 1144 had formed a unified Halych principality out of the appanage principalities of Zvenyhorod, Halych, Peremyshl, and Terebovlia. After his death (1152) Zvenyhorod principality was annexed by Terebovlia principality. In 1206 it was restored as a separate principality. During the reign of Danylo Romanovych Zvenyhorod principality became part of the Principality of Galicia-Volhynia.

Zvenyhorodka. IV-11. A city (1989 pop 22,400) on the Hnylyi Tikych River and a raion center in Cherkasy oblast. It dates back to the time of Kievan Rus'. It was destroyed by the Mongols in 1240 and, subsequently fortified, suffered from Tatar attacks in the 15th and 16th centuries. In 1648 it threw off Polish rule, but it was re-

stored to Poland under the Treaty of Andrusovo. Haidamakas captured it in 1737, 1743, and 1768. Zvenyhorod was annexed by Russia in 1793, and it obtained the rights of *Magdeburg law (1795) and became a county center of Kiev gubernia. During the revolutionary period the Zaporizhian Mazepa Regiment scored a victory over the Bolshevik forces there on 1 February 1918. Today the city has a well-developed food industry, a sanatorium, a regional studies museum, and three historical parks.

Zviahel. See Novohrad-Volynskyi.

Zviahel regiment. An administrative territory and military formation of the Hetman state in Volhynia. It was formed in 1648 out of peasants and townsmen who joined the Cossack uprising. Under Col M. Tysha its troops captured the Ostrih fortress from the Poles. The regiment was abolished in 1649 and revived for a brief period in 1657–8. It was commanded by I. Tarnavsky and had eight companies.

Zvirozomb-Zubovsky, Yevhen [Zvirozomb-Zubovs'kyj, Jevhen], b 3 March 1890 in Kiev, d 21 April 1967 in Kiev. Entomologist; corresponding member of the AN URSR (now ANU) from 1939. A graduate of Kiev University (1916), he conducted research in Kiev, Voronezh, Rostovna-Donu, and Moscow and was associate director of the ANU Institute of Zoology and associate director (1946–8), director (1949–50), and laboratory director (1950–6) of the ANU Institute of Entomology and Phytopathology. He also taught at Kiev University (1946–8) and was founding president of the Ukrainian Entomological Society (1946–56). His major published work was *Vrediteli sakharnoi svekly* (Sugar Beet Pests, 1928; 2nd edn 1956).

Karlo Zvirynsky: *Interior* (1960)

Zvirynsky, Karlo [Zviryns'kyj], b 14 August 1923 in Lavriv, Turka county, Galicia. Painter and educator. He studied at the short-lived Lviv Academy of Art in 1943 under V. Krychevsky, graduated in 1953 from the Lviv Institute of Applied and Decorative Arts, where he studied under R. *Selsky, and taught at the institute (1958–79). Zvirynsky has experimented with the formal aspects of

composition, form, line, texture, and color. Some of his works of the 1960s parallel the formal achievements of Western abstractionists. Zvirynsky has also painted semi-abstract landscapes (eg, *Forest Motif*, 1966) and complex still lifes, in which an assortment of objects fill the canvas (eg, *Small Objects*, 1982). His numerous collages and relief constructions on panels explore the formal relationships of form and color.

Zvychaina, Olena [Zvyčajna], b ?, d 8 January 1985 on Staten Island, New York. Writer. She wrote the novelettes *Zoloty potichok z holodnoho Kharkova* (A Golden Stream from Hungry Kharkiv, 1947) and *Myrhorods'kyi iarmarok* (Myrhorod Fair, 1953), the story collection *Ohlianusvshys' nazad* (Looking Back, 1954), and the novels *Selians'ka sanatoriia* (The Peasant Sanatorium, 1952), *Strakh* (Fear, 2 vols, 1957, 1958), *Voroh narodu* (Enemy of the People, 2 vols, 1966, cowritten with her husband O. Mlakovy), and *Ty* (You, 1982). All of her works are set in interwar and wartime Soviet Ukraine.

Zwoliński, Przemysław, b 26 September 1914 in Opaava, Czechoslovakia, d 4 November 1981 in Warsaw. Polish Slavist. A graduate of Lviv University (MA, 1937), he worked there as an assistant (1939–41). After the war he lectured at Wrocław (1945–6), Cracow (1947–52), and Warsaw universities. In 1953 he set up the Ukrainian philology department at Warsaw University, which he chaired until 1970. He wrote articles on the development of Ukrainian from the 14th to the 18th century (1956), I. Franko as a linguist (1956), T. Shevchenko's language (1964), P. Hulak-Artemovsky's imitation of J. Kochanowski's psalms (1965), and I. Kotliarevsky's work (1970–1) and coedited a Ukrainian-Polish dictionary (1957).

Orest Zybachynsky

Yevhen Zyblikevych

Zybachynsky, Orest [Zybačyns'kyj] (pseud: Orlan), b 15 May 1912 in Chernivtsi, Bukovyna. Political activist and publicist. He studied law at Chernivtsi University. In 1934–40 he oversaw all OUN activity in Bukovyna, Bessarabia, and the Maramureș region in Rumania. He participated in OUN expeditionary groups (Melnyk faction) and co-organized the Bukovynian detachment that was active in Southern Ukraine, OUN forces in the Donbas region (1941–2) and in Volhynia and Polisia (1942–3), and the military wing of the Oborona Ukrainy organization (1943). He emigrated to Munich in 1945, where he founded the political organization *Freedom International and

acted as its general secretary in 1946–9. In 1949 he moved to Sydney, Australia. He published collections of political essays, including *Svobodarnist'* ([combination of *svoboda* and *solidarnist'*] Freedom and Solidarity, 1955), *Integral'na revoliutsiia* (The Integral Revolution, 1960), *Renesans – Reformatsiia – Revoliutsiia* (Renaissance, Reformation, Revolution, 1968), *Svobodarnyi manifest* (Manifesto of Freedom and Solidarity, 1978), *Mech dukha* (Sword of the Spirit, 1980), *Misteriia svobody* (The Mystery of Freedom, 1985), and *Volia do svobody* (The Will to Freedom, 1988).

Zybenko, Oleksander, b 12 November 1893 in Maiorske, Mariupol county, Katerynoslav gubernia, d 7 June 1960 in Australia. Agronomist and co-operative organizer. After studying at the Kiev Polytechnical Institute he worked as an agronomist in Skvyra county (1917) and was appointed its commissioner. Under the Hetman government he was imprisoned by the Germans, but he escaped and took part in the overthrow of the hetman. Under the UNR Directory he served as deputy director of the agrarian reform department in the Ministry of Agriculture. In 1922 he emigrated to Czechoslovakia, where he completed a degree in agronomy (1927). He then worked as an auditor in the Audit Union of Ukrainian Co-operatives (RSUK) in Volhynia. In 1930 he was appointed auditor, and in 1937, inspector, of dairy unions at the head office in Lviv. During the Second World War he continued to work in RSUK in Cracow and Lviv. In 1944 he left Ukraine; eventually he emigrated to Australia.

Zyblykevych, Yevhen [Zyblykevych, Jevhen] [Ziblykevych, Evhen; pseud: K. Porokhivsky], b 20 November 1895 in Staryi Sambir, Galicia, d 16 September 1987 in Philadelphia. Galician and émigré journalist and political figure. A veteran officer of the Ukrainian Sich Riflemen, in the 1920s he was a member of the Ukrainian Military Organization and directed its activities in the Peremyshl region. He was arrested for his political activities, and spent several years in a Polish prison. After his release he edited the Peremyshl newspapers *Ukrains'kyi holos* (1926–9) and *Beskyd* (1930–3), and the sports magazine *Zmah* (1937–9). A founding member of the OUN, he soon left it and became a leading member of the hetmanite movement in Galicia. A postwar émigré, in Philadelphia he edited the newspaper *Ameryka* (1953–62) and founded and directed (from 1964) the *Lypynsky East European Research Institute.

Žygimantas (Ukrainian: Zhyhmont Keistutovych; Polish: Zygmunt; Latin: Sigismundus), b ca 1365, d 1440. Grand duke of Lithuania; younger brother of *Vytautas. After Vytautas died, Žygimantas supported his cousin, *Švitrigaila, who ascended to the throne and cultivated alliances with the Belarusians and Ukrainians in order to maintain an independence from Poland. In 1431 Žygimantas made a bid for the throne and, with the backing of Polish nobles, captured Vilnius. In 1432 he proclaimed himself grand duke. At the same time he ceded Podilia to the Poles, and in 1438, after six years of civil war, he was forced to abandon Volhynia. During his rule Žygimantas recognized the equal rights of his Orthodox subjects and introduced *Magdeburg law in Vilnius. He was assassinated by conspirators loyal to Švitrigaila.

Zygmunt. See Sigismund.

Zyla, Wolodymyr [Žyla, Volodymyr], b 25 June 1919 in Zbarazh, Galicia. Emigré literary scholar and community figure; member of the Shevchenko Scientific Society. As a postwar refugee he organized the first Ukrainian DP camp in the British zone of Austria near Villach and founded and edited the short-lived paper *Ukrains'ki visti*. After emigrating to São Paulo, Brazil, in 1948, he was a coeditor of the weekly *Nasha dumka*. In 1952 he emigrated to Canada. He graduated from the University of Manitoba (1962) and the Ukrainian Free University (PH D, 1967). From 1963 to 1986 he was a professor of Russian, German, and comparative literature at Texas Tech University in Lubbock. He has written articles and reviews in the fields of Ukrainian and comparative literature and onomastics in North American scholarly publications.

Zymivnyk. A winter homestead of the Zaporozhian Cossacks who lived outside the Sich by farming, fishing, and hunting. Many of those Cossacks were married, but some were elderly single men. There were many such homesteads along the Samara River. In 1775 there were 763 *zymivnyky*, with 8,700 Cossack settlers, on the right bank of the Dnieper River alone.

Zymne. III-5. A village (1970 pop 1,100) on the Luh River in Volodymyr-Volynskyi raion, Volhynia oblast. Archeologists have discovered evidence of settlement dating back to the 3rd millennium BC. There was a village at the site in the period of Kievan Rus'. Zymne was first mentioned in a document in 1450. The village and its old Orthodox monastery were granted to the Basilian order in 1682. In the 1890s the monastery was restored and turned into an Orthodox convent. During the First World War it was destroyed. The ruins of the fortifications from the 15th century, the Church of the Holy Trinity (1465–75), the Dormition Church (1495), and the catacombs of the monastery have been preserved.

The Zymne Monastery

Zymne Monastery. Probably the oldest monastery in Volhynia, located in the village of Zymne, 5 km south of Volodymyr-Volynskyi. Because it was built on a steep promontory atop ancient caves on the Luh River, it also had the names *sviatohirskyyi* 'holy hill' and *pecherskyyi* 'cave.' According to medieval sources, Grand Prince Volodymyr the Great had the monastery's Church of the Dormition built ca 1001; Hegumen Varlaam of the Kievan Cave Monastery died at the monastery in 1065; and the chronicler Nifont was its hegumen in the 12th century. In the 1460s Prince

O. Chartoryisky, the owner of Zymne, had parapets with five gates and corner towers built around the monastery, and in 1495 the Church of Dormition was rebuilt out of stone. In 1682 the Catholic Basilian monastic order was granted Zymne and the monastery. In the 1740s M. Czacki, the castellan of Volodymyr-Volynskiy and owner (from 1724) of Zymne, removed all of the monastery's valuables and brought about its demise. The monastery was revived by the Russian Orthodox church in the 19th century, and from 1893 it was inhabited by nuns. Extensive reconstruction of its buildings was begun in 1899, and a campanile and a subterranean church at the entrance to the caves were built. During the First World War the monastery was extensively damaged, and its library and archives vanished. It was renovated in the 1930s but again destroyed during the Second World War. Restoration of the monastery's main buildings was begun in 1975. Nothing remains of the burial crypts inside the Church of the Dormition, where many prominent Volhynian nobles were once buried.

A. Zhukovsky

Zymny, Leonid [Zymnyj] (pseud of Leonid Pysarevsky), b 18 February 1907 in Kostiantynohrad (now Krasnohrad), Poltava gubernia, d 22 May 1942. Poet. He began publishing in 1929 in *Nova generatsiia*. Published separately were his collections *Ne v dni iuvileiv* (Not on Anniversary Days, 1930) and *Pisennyk* (Songbook, 1937), the narrative poem *Shturm shakht* (The Storming of the [Mine] Shafts, 1931), and several booklets of poems and stories for children. He died in combat against the Germans during the Soviet-German War. A posthumous edition of his poems was published in Kiev in 1956.

Zymohiria [Zymohirja]. V-19, DB II-5. A city (1989 pop 12,500) on the Luhan River in Slovianoserbske raion, Luhanske oblast. It was settled in 1645–7 by Zaporozhian Cossacks invited by the Muscovite government to defend the southern frontier from the Tatars. A century later the government brought in Serbian colonists to man the defense line in the steppe. In 1764 the name of the settlement was changed from Cherkaskyy Brid to Cherkaske, and it was made a volost center in Slovianoserbske county of New Russia gubernia. In 1865 coal was discovered in the region, and small shafts were dug by the peasants. By the 1880s large mining enterprises had been set up. In 1961 the village was renamed Zymohiria and raised to city status. Today it is an industrial center with a coal mine and enrichment plant, a canning factory, and a building-materials plant.

Zynoviev, Klymentii. See Klymentii, Zinovii's son.

Zyz (Cross-eye). A semimonthly and then monthly magazine of satire and humor, published in Lviv in 1924–33. It was edited by L. Lepky and, later, E. Kozak, who was also the chief illustrator from 1926. Contributors included O. Babii, M. Vorony, V. Hirny, R. Holiiian, T. Krushelnytsky, R. Kupchynsky, A. Kurdydyk, and M. Rudnytsky. Caricatures were supplied by P. Kovzhun, M. Butovych, O. Sorokhitei, P. Kholodny, Jr, R. Lisovsky, and R. Chornii. In 1930 it had a pressrun of 1,450.

Zyzanii, Lavrentii [Zyzanij, Lavrentij] (Tustanovsky), b 1550s or 1560s in Tustan, near Halych, or Potelych, near Zhovkva, Galicia, d after 1634, possibly in Korets, Volhynia. Orthodox priest, teacher, writer, translator, and

Lavrentii Zyzanii's Slavonic grammar (1596)

grammarian; brother of S. Zyzanii. He taught in Orthodox brotherhood schools in Lviv (to 1592), Berestia (from 1592), and Vilnius (from 1595). In 1596 he published in Vilnius a Slavonic grammar, compiled on the basis of *Adelphotes* (1591), and a Slavonic primer. The primer included a lexicon of 1,061 Church Slavonic words explained in the Ukrainian vernacular; in effect, it was the first printed Church Slavonic–Ukrainian dictionary. Zyzanii's translation from Greek of Andrew of Caesarea's commentary on the Book of Revelation was published in Kiev in 1625. In 1620 Zyzanii completed an Orthodox catechism in Ukrainian; it was printed in an altered Church Slavonic translation in Moscow in 1627, and was soon ordered burned by the Muscovite patriarch Filaret as heretical, but it was retained by the Old Believers, who reprinted it in Hrodna in 1783, 1787, and 1788 and in Moscow in 1874. Zyzanii's lexicon was reprinted by M. Vozniak in *Zapysky NTSh* (vol 102 [1911]) and in separate facsimile editions edited by V. Nimchuk (Kiev 1964) and J. Rudnyckyj (Ottawa 1986). A facsimile edition of his grammar was edited by V. Nimchuk and published in Kiev in 1980. M. Botvinnik's monograph about Zyzanii was published in Minsk in 1973.

Zyzanii, Stepan [Zyzanij], b ca 1570 in Potelych, near Zhovkva, Galicia, d before 1621. Orthodox teacher and polemical writer; brother of L. Zyzanii. From 1586 he taught at the Lviv Dormition Brotherhood School, and he became its rector in 1592. From 1593 he was a teacher and secular preacher with the Orthodox brotherhood in Vilnius, where he sermonized against Catholicism and the clerical supporters of church union with Rome. In 1595 and 1596 he published several anti-Catholic polemical works and a catechism in Vilnius. He was forbidden to preach by Metropolitan M. Rahoza, and in January 1596 he was condemned as a heretic for his inflammatory sermons and writings and excommunicated by the Orthodox sobor in Navahrudak. He was exonerated later that year by the Orthodox sobor in Berestia. In 1599 he entered the Trinity Monastery in Vilnius but soon he was forced to leave by the municipal government under pressure from the crown. His further fate is unknown. His popular 1596 book distorting St Cyril's homily about the anti-Christ – in which Zyzanii developed the Protestant idea of the pope as the anti-Christ – was translated from Ukrainian into Church Slavonic and published in Moscow in 1644.
