S

Yurii Stabovy

Jaroslaw Stachiw

Stabovy, Yurii [Stabovyj, Jurij], b 2 April 1894 in Kozelets, Chernihiv gubernia, d 10 July 1968 in Kiev. Film director, screenwriter, and playwright. He worked in the Odessa Artistic Film Studio (1924–34), where as a screenwriter he was associated with L. Kurbas's *Vendetta* (1924) and A. Lundin's *Lisovyj zvir* (A Forest Animal, 1927). He directed *Dva dni* (Two Days, 1927), *Eksponat z panoptykumu* (An Exhibit from a Panopticon, 1929), and the documentary *Vesnianyi bazar* (The Spring Bazaar, 1931) and wrote the plays *Dusha skhodu* (The Soul of the East) and *Vyr* (The Whirlpool, 1926). In 1934 he was accused of Ukrainian nationalism and arrested. After his release from prison he worked as a screenwriter in Moscow.

Stachiw, Jaroslaw (Jerry) [Staxiv, Jaroslav], b 23 May 1931 in Lviv. Ukrainian-American mechanical engineer and designer; fellow of the American Society of Mechanical Engineers (ASME) since 1983; son of M. and F. *Stakhiv. He graduated from Pennsylvania State University. He has been a researcher in the field of ocean engineering with the US Navy since 1951 and a marine materials research engineer with the ASME Ocean Engineering Division since 1970 (chairman in 1972–3). In 1970 he constructed the first transparent plastic submersible, the NEMO. He is a recognized authority on ceramic, glass, germanium, and zinc sulphide applications in the construction of structural components of external pressure housings. His design standards for acrylic plastic components were adopted in 1978 by the US Coast Guard, the American Bureau of Shipping, Det Norske Veritas, and Lloyd's Ships Register. Stachiw is the author of *Acrylic Plastic Viewports: Ocean Engineering and Other Hyperbaric Applications* (1982) and has published numerous technical papers on plastic and glass viewports for submersibles, diving bells, and hyperbaric chambers.

Stadion, Franz Seraphim, b 27 July 1806 in Vienna, d 8 June 1853 in Vienna. Austrian count and statesman. He

began his career in the Austrian government as a senior civil servant in Stanyslaviv and Rzeszów. In the last years of his life he served as governor of Trieste and Istria (1841–7) and Galicia (1847–8) and as minister of the interior (1848–9). As governor of Galicia, in April 1848, months before the imperial law abolishing serfdom was announced, he abolished serfdom and 'hereditary tenancy' in Galicia. An opponent of Polish irredentism and the Polish National Council, he encouraged the creation of the *Supreme Ruthenian Council in Lviv and supported the Uniate clergy and the Ukrainians' demands for equal rights with the Poles and official use of Ukrainian in the schools and government. The Poles accused him of 'inventing' the Ukrainians.

Stadnychenko, Yurii [Stadnyčenko, Jurij], b 15 May 1929 in Kharkiv. Poet and translator. A former civil engineer and an editor of the journal *Prapor*, he has written the poetry collections *Stezhkamy iunosti* (Down the Paths of Youth, 1957), *Moie nespokoiine serce* (My Troubled Heart, 1961), *V okeani neskinchennosti* (In the Ocean of Infinity, 1965), *Smishynky z pertsem* (Peppered Jest, 1970), *Okhorontsi vohniu* (The Fire's Protectors, 1973), *Nadiia i virmist'* (Hope and Fidelity, 1977), *Zorianyi prybii* (The Stellar Breaker, 1980), *Pidkova i iakir* (The Horseshoe and the Anchor, 1982), and *Dorooha kriz' dovhe lito* (The Road through a Long Summer, 1983). He has translated non-Russian Soviet and Polish literature into Ukrainian.

Sofiiia Stadnyk

Stadnyk, Sofiiia (Stadnykova; née Stechynska), b 13 September 1888 in Ternopil, Galicia, d 21 September 1959 in Lviv. Actress and singer (dramatic soprano); wife of Y. *Stadnyk. A teacher by training, she was an actress in the Ruska Besida Theater (1901–13), the Lviv Ukrainian People's Theater (1913–14), Sadovsky's Theater in Kiev (1916–18), Stadnyk's touring theaters (1919–39), the Lesia Ukrainka Theater (1939–41), and the Lviv Opera Theater (1941–4). In the 1928–9 season she was a guest actress in the Kiev Ukrainian Drama Theater. In 1946 she retired from the stage.

Stefaniia Stadnyk

Yosyp Stadnyk

Stadnyk, Stefaniia (Stadnykivna), b 20 September 1912 in Ternopil, Galicia, d 27 February 1983 in Lviv. Stage and film actress and singer (soprano); daughter of Y. and S. Stadnyk. She completed her education in a Warsaw drama school (1926) and then worked in Stadnyk's troupe (until 1939, with interruptions), the Lesia Ukrainka Theater (1939–41), the Lviv Opera Theater (1941–4), the Lviv Young Spectator's Theater (1944–8), the Kharkiv Ukrainian Drama Theater (1948–57), and the Lviv Ukrainian Drama Theater (1959–78). She acted in the film *Viter zi skhodu* (Wind from the East, 1941).

Stadnyk, Yarema, b 10 September 1903 in Zbarazh, Galicia, d 19 December 1946 in Lviv. Stage actor and singer; son of Y. and S. Stadnyk. He worked in various Ukrainian troupes in Galicia (1922–31 and 1935–7), the Kryve Zerkalo Theater (1932–4), the Lviv Operetta and variety theaters (1938–41), the Veselyi Lviv Theater (1942–4), and the Lviv Young Spectator's Theater (1945–6).

Stadnyk, Yosyp, b 18 March 1876 in Valiava, Peremyshl county, Galicia, d 8 December 1954 in Lviv. Theatrical director and actor. After completing a theatrical education he was an actor and director in the Ruska Besida Theater in Lviv (1894–1913), led it in 1906–13, and left it to lead his own troupe, the Lviv Ukrainian People's Theater (1913–14). He was interned by the Russian authorities during the First World War, and then worked in *Sadovsky's Theater in Kiev (1917–18) and, in 1919, led the Theater of the Western Ukrainian National Republic in Stanyslaviv. Stadnyk directed and administered the reborn *Ukrainska Besida Theater (1921–3); led various *touring theaters – the Union of Ukrainian Actors (1924–6), the co-operative Ukrainskyi Teatr (1927–31), and Stadnyk's Artistic Tour (1935–9) – in Western Ukraine; was appointed artistic director of the Lesia Ukrainka Ukrainian Drama Theater (1939–41); and worked as a director in the Tobilevych Theater (1933–5), the Lviv Opera Theater, the Drohobych Theater, and the Lviv Theater of Miniatures (1945–7). He was subsequently exiled by the Soviet authorities to Uglich, Russia (1947–54). Stadnyk played over 100 roles, mostly character roles in a realistic style, in plays by M. Starytsky, M. Kropyvnytsky, W. Shakespeare, Molière, F. Schiller, and N. Gogol. As a director he staged over 200 productions of dramas, operas, and operettas, including H. Heijermans's

Good Hope, E. Rostand's *Les Romanesques*, F. Grillparzer's *Des Meers und der Liebe Wellen*, F. Schiller's *Wilhelm Tell*, M. Lysenko's *Nocturne*, D. Sichynsky's *Roksoliana*, Ya. Lopatynsky's *Enei na mandrivtsi* (Aeneas on a Journey), J. Offenbach's *Tales of Hoffman*, K. Zeller's *Obersteiger*, F. Lehár's *Die Zigeunerliebe*, and J. Strauss's *Der Zigeunerbaron*. He translated numerous dramatic works into Ukrainian.

V. Revutsky

Georg Stadtmüller

Matvii Stakhiv

Stadtmüller, Georg, b 17 March 1909 in Bürstadt, Hessen, d 1 November 1985 in Munich. German historian of Eastern and Southeastern Europe and Byzantologist; full member of the Shevchenko Scientific Society from 1966. He was a professor at the universities of Leipzig (1938–45) and Munich (from 1950) and became director of the Eastern Europe Institute (1960–3) in Munich. From 1962 he served on the Scholarly Council and the board of trustees of the *Association for the Advancement of Ukrainian Studies in Munich. He wrote histories of Albania (1942), civil law (1951), Eastern Europe (1950), Eastern European studies (1963), and the Habsburg Empire (1966) and many other works, and received an honorary PH D from the Ukrainian Free University in 1979.

Stafiniak, Volodymyr [Stafinjak], b 1884, d 1920. Senior army officer. During the First World War he served in the Legion of Sich Riflemen as chief training officer (1915) and company commander (1917–18). In the Ukrainian Galician Army, he initially defended Rava Ruska and Uhniv against Polish forces and then commanded the Uhniv Brigade. In January 1919 he was promoted to captain, and in March he was put in charge of training. After being promoted to major in June 1919, he served as commander of the rear in the Red Ukrainian Galician Army (1920). He died of typhus.

Stage design. See Scenery, theatrical.

Stahl, Pierre-Jules (pseud of P.-J. Hetzel), b 18 January 1814 in Chartres, France, d 16 March 1886 in Monte Carlo. French children's writer and publisher. He befriended Marko *Vovchok in 1865 while she was living in Paris, and published nine of her stories in his journal *Magasin d'éducation et de récréation*. For many years Vovchok also served on the journal's editorial board and corresponded with Stahl. In 1869 Stahl coauthored *Le Chemin glissant ...* with Vovchok. The novella appeared in *Magasin* in 1871 and

then in several separate editions. In 1878 Stahl published Vovchok's French adaptation of her novella *Marusia, Maroussia*, which gained great popularity in France, was reprinted more than 100 times, and received an award from the Académie Française. A Ukrainian translation appeared in Bratislava in 1965. Vovchok's relationship with Stahl is discussed in considerable detail in B. Lobach-Zhuchenko's *Pro Marka Vovchka* (About Marko Vovchok, 1979).

Stained-glass windows. The term used for windows filled with colored glass, usually built of panels in which the pieces of colored glass are held together with strips of lead. Generally the glass has been colored by such methods as the fusion of metallic oxides into the glass, the burning of pigment into the surface of white glass, or the joining of white with colored pieces of glass. In Ukraine no stained-glass windows from medieval times have survived, but there is mention of them in the Chronicle of 1259 and in the travel accounts of Paul of Aleppo in 1654 and 1656. In the 18th and 19th centuries the art of stained-glass windows declined in Europe and in Ukraine. It was revived at the beginning of the 20th century by such artists as P. Kholodny, Sr (The Dormition Church in Lviv, 1926). In Soviet Ukraine stained-glass windows were used from the 1960s on to decorate palaces of culture, museums, metro stations, pavilions, and hotel lobbies. Among the artists working in stained glass are V. Zadorozhny (*Shevchenko Triptych*, at Shevchenko University in Kiev) and O. Dubovyk (*Wandering Wind* and *Carnival Windows*, at the sanatorium in Teodosia).

Among the Ukrainian artists in the West, P. Kholodny, Jr, designed the stained-glass windows for the Ukrainian Catholic Church of St George in New York and Ya. Surmach-Mills designed the windows for St Demetrius's Church in Toronto. M. *Zubar gained national recognition in the United States for his numerous stained-glass windows in churches, synagogues, and community centres. He experimented with special effects achieved by a sand-blasting technique used in conjunction with hand-blown glass and invented a new process of painting on glass. In Canada L. *Molodozhanyyn has designed numerous stained-glass windows for churches in Manitoba, including 30 windows for the Ukrainian Catholic Cathedral of SS Volodymyr and Olha in Winnipeg. The windows of the chapel were designed by S. Lada. R. Kowal designed the stained-glass windows for St Andrew's and the Blessed Virgin Mary Ukrainian Catholic churches in Winnipeg, as well as others in rural Manitoba.

D. Zelska-Darewych

Stakh, Ivan [Stax], b 2 July 1918 in Blackwood, Pennsylvania, d 29 June 1972 in Philadelphia. Ukrainian Catholic bishop. He studied theology in Innsbruck, Switzerland, and Washington. After he was ordained in 1943, he served as a parish priest and then as secretary to Bishop K. Bohachevsky. In August 1946 he was sent by the Ukrainian Catholic Relief Committee to Germany to assist in the resettlement of Ukrainian displaced persons in Europe. When he returned to the United States in 1952, he was made chancellor of the exarchate (subsequently, eparchy) of Stamford, Connecticut. In 1971 he was consecrated bishop and named assistant to the metropolitan of Philadelphia, A. Senyshyn.

Stakhanov, Aleksei [Staxanov, Aleksei], b 21 December 1905 in Lugova, Orel gubernia, Russia, d 5 November 1977 in Torez, Donetsk oblast. Miner. In 1927 he began working as a miner in Kadiivka (now Stakhanov, in Luhanske oblast). In August 1935 he allegedly set a personal record by mining 102 t of coal in a single shift of 5 hours and 45 minutes, thereby overfulfilling his quota by a factor of 14.5. In September of that year he set another record by mining 227 t of coal. These deeds were carefully staged by Party authorities and used extensively in propaganda to raise labor productivity (see *socialist competition). Afterward Stakhanov completed his education and occupied management positions in mining in Central Asia and, from 1957, in the Donbas.

Stakhanov [Staxanov]. V-19, DB II-5. A city (1990 pop 112,000) on the Kamyshuvakha River in Luhanske oblast. It originated in the mid-19th century, when coal mining was developed in the region, as the workers' settlement of Shubynka. From 1898 to 1978 it was called Kadiivka, and then it was renamed in honor of A. *Stakhanov. It was granted city status in 1932. Today the city has four coal mines and a central coal enrichment plant. It is also an important metallurgical and machine-building center with an iron-ore refinery, ferrous alloys plant, a machine-building factory, a railway-car plant, and a coke-chemical plant.

Stakhanovite movement. See Socialist competition.

Stakhiv, Franka [Staxiv] (née Nakonechna), b 3 October 1906 in Lviv. Civic and educational activist; wife of M. *Stakhiv and mother of J. *Stachiv. In the interwar period she was active in various Ukrainian organizations in Lviv, as secretary of the Union of Ukrainian Working Women (1931–9) and editor of its organ *Zhinochyi holos* (1931–9) and as secretary of the Samoosvita popular university (1930–9). In 1949, a refugee in Germany, she emigrated to the United States.

Stakhiv, Matvii [Staxiv, Matvij] (Stachiv, Matthew), b 30 November 1895 in Nushche, Zboriv county, Galicia, d 2 June 1978 in San Diego, California. Lawyer, historian, and political leader; full member of the Shevchenko Scientific Society from 1943. He served as an officer in the Ukrainian Galician Army (1918–20) and studied law at Prague University (LLD, 1924). After returning to Lviv he became active in the Ukrainian Radical party, in which he served as general secretary (1925–39) and editor of its weekly *Hromads'kyi holos* (1929–39). He also directed the Samoosvita popular university and edited its publications (1930–9). As a postwar émigré in Germany he lectured at the Ukrainian Free University and sat on the Ukrainian National Council. After settling in the United States (1949) he edited the weekly **Narodna volia* (1949–71), sat on the board of the United Ukrainian American Relief Committee, presided over the Shevchenko Scientific Society (1969–74), and was an executive member of the Ukrainian Congress Committee of America (1951–71) and the World Congress of Free Ukrainians (1967–72). In addition to numerous articles and pamphlets on political and historical subjects, he wrote *Zakhidnia Ukraïna* (Western Ukraine, 6 vols, 1958–61), *Ukraïna v dobi Dyrektorii UNR* (Ukraine in the Period of the UNR Directory, 7 vols, 1962–8), and *Ukraine and Russia: An Outline of History of Political and Mil-*

itary Relations (1967). He also coauthored *Western Ukraine at the Turning Point of Europe's History, 1918–1923* (2 vols, 1969, 1971) and *Ukraine and the European Turmoil, 1917–1919* (1973).

Volodymyr Stakhiv

Danylo Stakhura

Stakhiv, Volodymyr [Staxiv] (pseud: Mek), b 1910 in Peremyshl, Galicia, d 25 October 1971 in Munich. Journalist and political activist. After joining the OUN in 1929, he worked in its Berlin office and at the Ukrainian Press Service (1930s). At the same time he studied at the Berlin Polytechnical Institute and was active in the Ukrainian student movement. In mid-1941 he was in charge of external relations for the Ukrainian State Administration before being imprisoned for three years at the Sachsenhausen concentration camp. After the war he settled in Munich, where he was one of the leaders of the External Units of the OUN and a member of the External Representation of the Ukrainian Supreme Liberation Council and of the Political Council of the OUN (Abroad). He also served as president of the Ukrainian Journalists' Association Abroad and of the League of Ukrainian Political Prisoners. He worked as chief editor of the weekly **Ukrains'ka trybuna* and the biweekly *Suchasna Ukraina* and as coeditor of **Suchasnist'*.

Stakhiv, Yaroslav. See Stachiw, Jaroslaw.

Stakhovsky, Kostiantyn [Staxovs'kyj, Kostjantyn], b 1882 in Podilia gubernia, d 11 May 1959 in Prague. Sculptor and ceramicist. He studied art in Warsaw, Paris, St Petersburg, Munich, and Berlin. An interwar émigré, in 1923 he settled in Prague, where he taught at the Ukrainian Studio of Plastic Arts. A specialist in the sculpture of bronze, clay, and plaster animals and busts, he displayed his works in London (1918–19) and in Paris at the Salon des Indépendants and the Salon d'Automne (1919–22).

Stakhovsky, Lev [Staxovs'kyj], b 1911 in Vinnytsia, Podilia gubernia, d 1968 in Caracas, Venezuela. Otolaryngologist and community leader; full member of the Shevchenko Scientific Society from 1955; son of M. *Stakhovsky. A graduate of Prague University, he practiced medicine in Czechoslovakia and emigrated in 1947 to Venezuela. He was the founder and first president of the Ukrainian Hromada society in Caracas. His scientific pub-

lications included scientific articles on tuberculosis of the larynx.

Stakhovsky, Mykola [Staxovs'kyj], b 22 May 1879 in Volytsia, Starokostiantyniv county, Volhynia gubernia, d 7 December 1948 in Prague. Physician and civic activist. After graduating from Warsaw University (MD, 1904) he specialized in surgery in Kiev. During the Russo-Japanese War he served as an army surgeon in the Far East. The publisher of *Borot'ba*, an organ of the Ukrainian Social Democratic Workers' party, Stakhovsky was threatened with arrest in 1906 for writing an antigovernment article. He escaped to France. In 1908 he returned to Ukraine and opened a private practice in Vinnytsia. In 1917 he was appointed gubernial commissioner for Podilia under the Central Rada, and at the end of 1919 he headed the UNR diplomatic mission to Great Britain. In the interwar period he worked as a physician and cultural activist in Berehove, Transcarpathia.

Stakhura, Danylo [Staxura], b 19 December 1860 in Poliany, Krosno county, Galicia, d 20 December 1938 in Prague. Lawyer and civic and political leader. After graduating in law from Lviv University he worked as a lawyer in Ternopil, Peremyshl, and Sambir and was active in Ukrainian organizational life. In 1907 he was elected as a candidate of the National Democratic party to the Austrian parliament. After being deported by Russian authorities to Simbirsk in 1914, he returned to Sambir three years later and was elected mayor and member of the Ukrainian National Rada (1918–19). After emigrating to Czechoslovakia he served as judge of the provincial court in Berehove and worked with the Prosvita society in Uzhhorod. He was also a strong supporter of the Boikivskhchyna society in Sambir and provided it with a home for its ethnography museum.

Stalin, Joseph (real name: Yosif Dzhughashvili), b 21 December 1879 in Gori, Georgia, d 5 March 1953 in Moscow. Soviet political leader, first secretary of the CPSU, and absolute dictator of the USSR.

Stalin first emerged as a specialist on the nationality question. In 1914, under V. Lenin's guidance, he wrote *Natsionalnyi vopros i marksizm* (translated in 1942 as *Marxism and the National Question*), mostly a criticism of O. Bauer's and K. Renner's interpretation of nationalism, which had gained considerable popularity, especially among Georgian socialists. Because of this work and his Georgian origin he was appointed people's commissar of nationalities in the Bolshevik government (1917–22). In 1919 he also became people's commissar of state control. As commissar of nationalities, in 1920 he opposed the separation of the 'border' countries (Ukraine, Georgia, etc), which were important sources of raw materials and food for central Russia. In 1922 he rejected the concept of a union of independent and equal republics and advocated instead the incorporation of the national republics into the RSFSR as autonomous units. Although his idea was rejected, the Russian republic was made the cornerstone of the new union. Stalin relied on the Russian state bureaucracy to convert the USSR into a centralized, totalitarian empire (see *Nationality policy).

His most important post, however, was the general secretaryship of the CC of the Russian Communist Party (Bol-

shevik) (RKP[B]), which he assumed in 1922. Although his authority was damaged somewhat by Lenin's strong reservations concerning his secretaryship, Stalin used this administrative post to build a firm power base in the Party. By placing his own supporters in key positions he was able to dominate the entire interlocking Party, state, military, and police bureaucracy. After Lenin's death he created a mass personality cult that glorified first Lenin and then himself as an all-powerful and all-knowing leader. One by one he expelled his allies and potential rivals – L. Trotsky, G. Zinoviev, L. Kamenev, A. Rykov, and N. Bukharin – from the Party and then destroyed them. In the late 1920s he announced the policy of 'socialism in one country,' whereby he abandoned the *New Economic Policy and embarked on a program of rapid industrialization and *collectivization, which was enforced by means of widespread *terror. Millions of Ukrainian peasants were starved to death in 1932–3, millions of people were imprisoned in *concentration camps, and hundreds of thousands were executed by the secret police. Repeated *purges of the Party and government removed any possible source of opposition to his power. A favorite tactic was the show trials, such as those of 1936–8, in which former Bolshevik leaders confessed to treason and implicated many others in their crimes. Almost half of the Party membership was destroyed, and 139 members of the CC were executed. Of 1,966 delegates at the 17th Party Congress in 1934, 1,108 had been arrested by 1939. In the armed forces Stalin organized a major purge that destroyed most of the experienced senior officers on the eve of the Second World War.

In foreign affairs Stalin pursued an expansionist policy based, for a time, on an alliance with A. Hitler. He occupied Western Ukraine and the Baltic states, Bessarabia, and Bukovyna (see *Molotov-Ribbentrop Pact). Stalin failed to anticipate the German attack on the USSR in 1941, and the Soviets suffered heavy losses in the early stages of the war. At first many Soviet troops, including Ukrainians, had no desire to fight for the Stalinist regime and surrendered en masse. Later, taking advantage of the abominable treatment of the Soviet POWs by the Nazis and of the discontent among the nations subjugated by the Nazis, and playing up patriotism, Stalin succeeded in rallying his subjects and, assisted by the Allies, in emerging as a victor from the war. In the postwar settlement he extended Soviet influence to large new territories in Eastern Europe and the Far East and eventually turned them into Communist-ruled satellite states.

After the war Stalin encouraged the growth of Great Russian nationalism and discriminated against the other nationalities of the USSR. Some of the smaller nations, such as the Volga Germans, the Crimean Tatars, and the Chechens, were subjected to genocide for their alleged collaboration with the Germans. According to N. Khrushchev the Ukrainians were saved from mass deportation only by their large numbers. In 1939–41 and again after the war Stalin Sovietized the newly acquired Western Ukraine by deporting hundreds of thousands of people and destroying much of the intelligentsia. At the same time A. *Zhdanov imposed rigid control on Soviet cultural and intellectual life.

Stalin concentrated all political power in his own hands. From 1941 he was head of state, commissar of defence, and supreme commander of the armed forces (as-

suming the title of 'generalissimo' in 1945). He built on the traditions of Russian oriental absolutism in creating a totalitarian state cemented together by terror. At the end of his life he began a major assault on the Jews, whom he characterized as 'rootless cosmopolitans.' Stalin was not a theoretical thinker, and Stalinism was not a political doctrine; it was a political system of ruthless, unrestricted dictatorship by the Party leader over a demoralized, helpless society.

After Stalin's death Khrushchev, in his 'secret speech' at the 20th Congress of the CPSU (1956), criticized to a degree the 'cult of personality' that had arisen around the dictator. This de-Stalinization campaign continued at the subsequent congress in 1961, when it was decided to remove Stalin's embalmed body from Lenin's mausoleum, rename all the places and institutions that had been named in his honor, and dismantle his statues. With L. Brezhnev's ascension to power in 1964, however, Stalin was partly rehabilitated, and some measures recalled the excesses of his regime – the personality cult, official Russification, closed trials, and repressions. In its final years the CPSU at last admitted the crimes against humanity committed under Stalin's rule, but it did not accept its responsibility for them.

Stalinsky, Oleh [Stalins'kyj], b 16 January 1907 in Kiev, d 1991 in Lviv. Ballet dancer and ballet master. In 1920 he completed study at Z. Lange's ballet studio and choreographic training at Tsentrostudiia in Kiev. After working as an actor in Russian theaters, he danced as a soloist in the Kiev Theater of Opera and Ballet (1922–46, with interruptions in Odessa and Alma-Ata) and was a soloist and ballet master in the Lviv Theater of Opera and Ballet (1946–73).

Stamford. A city (1980 pop 102,000) at the mouth of the Rippowam River on Long Island Sound in the state of Connecticut. It is a residential suburb of New York with some industry and research laboratories. Ukrainians, who number about 400 today, began to settle there at the turn of the century. A Ukrainian Catholic parish was established in 1916. A minor seminary and high school were opened in Stamford in 1933; they were accredited and named St Basil's College and St Basil's Preparatory School respectively in 1939. The *Ukrainian Diocesan Museum of Stamford was founded in 1935. In 1942 Stamford became the seat of the auxiliary bishop of Philadelphia eparchy of the Ukrainian Catholic church, and later the seat of an ex-archate (1956) and eparchy (1958) under A. Senyshyn. At Senyshyn's promotion to the office of archbishop of Phil-

adelphia in 1961, his position was assumed by J. Schmondiuk and then B. Losten (1977). Today (1990) the eparchy has 55 parishes served by 57 priests and 20 monks.

Stamp collecting. See Ukraine-Philatelisten Verband, Ukrainian Philatelic and Numismatic Society, and Postage stamps.

Stan. In medieval Rus' a military encampment which was usually set up on elevated ground and surrounded by a makeshift barrier of carts or a palisade and sometimes by a ditch or earthworks. The term was also applied to stopover points on long routes and to places visited periodically by the prince's officials to collect tribute and to hold court over the local population. In the 19th century the *stan* was a police territorial unit within a county.

Standard of living. The goods and services enjoyed or aspired to by an individual or group. In the Soviet economy, where prices bore no relation to value, wages to labor, and consumer goods to quality of life, it was difficult to determine the real standard of living on the basis of statistical data. The task was complicated further by the fact that there were two different prices for goods, and that the buying power of the ruble varied with different categories of the population. Official statistics lacked a sound methodology and accurate measurements. Hence, the official data on the standard of living reflected propositions and tendencies rather than the real standard of living.

The standard of living is normally determined by the level of economic development or by the gross national product per capita. It is not to be confused with 'quality of life,' which also includes the cultural, spiritual, and social dimensions of life. In 1989 the gross national product of Ukraine was worth 271 billion rubles, or 29 percent of the Soviet Union's. The gross national products per capita in Ukraine and the Soviet Union were 5,211 and 3,208 rubles respectively. Ukraine's national income per capita was 2,078 rubles, whereas that of the Soviet Union was 2,281. Thus Ukraine's gross national product was 38 percent per capita higher, and its national income per capita was 9 percent lower, than the Union average.

The per capita output of basic industrial and agricultural products, such as coal, pig iron, steel, wheat, meat, milk, butter, sugar, and vegetables, in Ukraine exceeded the Union average. Soviet Ukraine's output of many products equaled that of the developed countries. Its per capita output of wheat, for example, was smaller than that of the United States and France but greater than that of Italy, the United Kingdom, and Germany. Its per capita output of butter and milk was second only to France's. Ukraine was ahead of the United Kingdom in electric power and ahead of every European country in pig iron and steel production. But in per capita consumption Ukraine lagged behind some developing countries. In 1989 the average monthly wage in Ukraine was 217.7 rubles and in the USSR, 240.4 rubles. In Ukraine expenditures from social funds were 619 rubles per person, in the USSR, 650 rubles, and in the United States, 5,200 dollars. The proportion of social consumption to the gross domestic product of the republic was 12 percent for Ukraine, 20 percent for the USSR, and 28 percent for the United States. The percentage of wages to national income did not exceed 37 percent in Ukraine, whereas in the developed countries it was 60–70 percent.

The per capita income from private plots was 11 rubles a month.

The structure of the Ukrainian population by income was as follows (1989): 3.1 million people (6 percent of the total population) received up to 75 rubles per month, 7.3 million (14.2 percent) received 75 to 100 rubles, 20.2 million (37.2 percent) received 101 to 150 rubles, 2.6 million (24.5 percent) received 151 to 200 rubles, and 3.6 million (6.9 percent) received over 250 rubles.

Until the dissolution of the USSR 75 rubles per month was regarded as the minimum living standard, but that figure was only a rough estimate without any scientific basis. According to criteria used in other countries, anyone with a monthly income of under 100 rubles, that is, 20 percent of the Ukrainian population, was below the poverty line. Another 10 million people, with an income of 100 to 125 rubles per month, were on the verge of poverty. According to the criterion of poverty adopted by the European Economic Commission of the United Nations (per capita income of under two-thirds of the country's average), 30.6 million Ukrainians, or 57.4 percent of the population, were poor in 1989 (average income = 153 rubles per month). As the economic situation in the USSR deteriorated in 1990–1, the number of people below the poverty line increased.

The group with an income of over 250 rubles per month was in the highest bracket. Those with an income of 151 to 250 rubles per month (35.7 percent of the population) could therefore have been regarded as constituting a middle class. In Japan, by contrast, the middle class consists of 90 percent of the population. In relation to private property, the well-to-do group (the equivalent of the American middle class) consists of those who own cars. In Ukraine 3.1 million people, or 6 percent of the population, belonged to that category, the same percentage that had an income of over 250 rubles a month. It was the only stratum of Soviet society that had the full range of consumer goods: an apartment or house, modern furniture, a car, and a summer cottage – all the attributes of the middle class.

The difference between Ukraine's per capita production and consumption was much higher than the Union average. The discrepancy was the result of the 'equalization' policy of the central government, which redistributed the gross national product among the unequally developed republics. The difference also reflected the structure of Ukrainian industry, in which heavy industry and the extractive and processing branches dominated the economy. The raw materials and products in those branches were priced low, and labor in them was poorly paid. The average wage in Russia was higher than that in Ukraine, not only because of regional compensations for severe climatic conditions (in the Far North or Kamchatka) but mostly because 80 percent of the defense industry was located in Russia. Income by itself does not indicate the real standard of living. It must be compared to the prices of consumer goods and to the structure of expenditures. In 1989 average Ukrainians spent a third of their income on food, another third on consumer goods, 3 percent on housing, and 20 percent on other needs, and saved about 10 percent. A family of four with two children spent 52 percent of its income on food, compared to 15.2 percent in the United States and 21 percent in Western Europe. To buy 1 kg of meat the average Ukrainian had to work 10 times longer than an American. Measured in that way, the

price of butter was 8 times higher, of bread, 2 to 3 times higher; of a woolen suit, 15 times higher; of a color TV, 20 times higher; and of a car, 5 times higher in Ukraine than in the United States.

In 1989 the per capita food consumption in Ukraine was slightly higher than in the USSR; for example, meat, 69 kg (67 in the USSR); milk, 367 kg (359); sugar, 49 kg (41); vegetables, 125 kg (98); fruits, 47 kg (43); and baked goods, 138 kg (130). But the average Soviet citizen was better provided with consumer goods than the average Ukrainian. In the USSR there were 105 TV sets per 100 families, whereas in Ukraine there were only 100. Similarly, in the USSR there were 92 refrigerators and 72 washing machines, compared to 90 and 67 in Ukraine. For every thousand inhabitants there were 60 cars in Ukraine and 56 in the USSR (510 in the United States). The average living area per person was 7.6 sq m in Ukraine, 15.8 sq m in the USSR, 49 sq m in the United States, and up to 36 sq m in Western Europe. The average floor area of a house in Ukraine was 57 sq m, compared to 130–140 sq m in the developed countries. In the USSR there were 200 separate houses or flats per 1,000 inhabitants, in the United States there are 380, in Canada 351, and in the developed European countries over 400. In 1990, 2.5 million people in Ukraine were inadequately housed by Soviet standards, with less than 5–9 sq m per family member. A wait of about 10 years was required to get the living space guaranteed by the state. Population growth outpaced the building rate of the construction industry. The construction of private housing accounts for only 1 percent of the new housing in cities and 75 percent in rural areas.

In Soviet Ukraine only 3.9 percent of the gross national product was spent on health care. In most developed countries the figure is at least twice as high. The per capita medical service provided in Ukraine amounted to a third of that provided in the United States, although Ukraine had more medical personnel (44 physicians and 118 nurses per 10,000 people).

The statistical figures just cited cannot describe the real standard of living in Ukraine, because they do not take into account three important factors: (1) the quality of the consumer goods and services, (2) the hidden price inflation, and (3) the rapidly falling supply of consumer goods. The official statistics on meat consumption (69 kg per capita per year), for example, included by-products (over 10 kg) and losses in processing and transportation (10–15 percent). Thus, the real figure was 49 kg, which amounted to only 57 percent of Ukraine's meat output. In comparison Russia consumed 66 percent and Belarus 63 percent of their meat output. Some Ukrainian economists estimated that the real rate of meat consumption in the republic was closer to 25–32.9 kg per person. The housing statistics did not show that most of the stock had not been renovated or properly maintained for many years. Few of the new rural houses had modern conveniences. Only 5 percent of Ukrainian villages had natural gas. New apartments needed repairs at a cost of 9 rubles per sq m before people could move into them. The number of people waiting for their guaranteed share of living space was two or three times higher than the official number, because various formalities made it difficult to get on the waiting list.

As to medical care, an internal poll of 11,000 doctors showed that 4 percent of the polyclinics and 7 percent of the hospitals in Ukraine were in a critical condition. A

third needed repair. Seven to 8 percent of them had no running water, and 10–14 percent had no sewage system or central heating. In 80 percent of the hospitals there were over six patients to a room. Only 2 percent of the polyclinics and 6 percent of the hospitals in Ukraine had ultrasound equipment. Over a third of Ukrainian villages did not even have first-aid stations.

The official figures on the standard of living in Soviet Ukraine did not take into account the high inflation created by the government in its last few years. In 1990 personal incomes grew by 18 percent. Most consumer goods at state-controlled prices disappeared from the shops, and prices on the collective-farm and black markets doubled and tripled. Prices were driven up also by the shortage of consumer goods and services, which intensified steadily for five years and reached alarming levels in 1990–1. Pent-up demand for goods, as well as individual savings, increased at a similar pace. The central government printed money without any backing in goods: 11 billion rubles in 1988, 18 billion in 1989, and 27 billion in 1990. In 1989 only 25 percent of the money supply was backed by consumer goods; in 1990, only 18 percent.

The causes of the sharp drop in the supply of consumer goods and the consumption level of the population in the former USSR lie primarily in the structure of the planned economy, which was designed to satisfy its own needs, not the demands of the consumer. In 1928, 60.5 percent of the industrial output was consumer goods, and 39 percent the means of production. In 1940 the proportion was 39:61, and in 1985, 25:75. Any improvement in productivity or any growth of national income, therefore, had little effect on the standard of living.

S. Voitovych

Standard Ukrainian. The standard, or literary, version of the Ukrainian *language evolved through three distinct periods: old (10th–13th centuries), middle (14th–18th centuries), and modern (19th–20th centuries). The cardinal changes that occurred were conditioned by changes in the political and cultural history of Ukraine.

Old Ukrainian is found in extant Kievan church and scholarly texts dating from the mid-11th century and the Kievan charter of 1130, in Galician church texts dating from the late 11th century, and in Galician charters dating from the mid-14th century. There are hardly any literary monuments from Chernihiv, Tmutorokan, and Pereiaslav; hence, we can only make conjectures about the literary language used in these principalities. In addition to church and scholarly texts, Old Ukrainian is represented by private letters, chronicles, and belles-lettres works. The language of all these genres is basically *Church Slavonic, with an ever-increasing admixture of local lexical, phonetic, morphological, and syntactic features. Although the language was not institutionally regulated, it remained quite stable, because of the patronage of the church and the concentration of literary life around religious centers. Thus, texts created in Kiev do not differ much from those transcribed from the Bulgarian. Some scholars, such as A. *Shakhmatov, have conjectured that this was also the koine of the most cultured intellectual strata. Hypotheses (by S. Obnorsky and, to a certain degree, L. Yakubinsky and I. Svientsitsky) about a local, urban-vernacular-based literary language that predated the widespread use of Church Slavonic have not been confirmed by known facts.

Only the language of the Galician charters reveals a local character, but data allowing us to date back that tradition do not exist.

The decline of Kievan Rus' and later the Principality of Galicia-Volhynia and the resulting annexation of most Ukrainian lands (except for Galicia, Bukovyna, and Transcarpathia) by the Grand Duchy of Lithuania interrupted the literary tradition of Old Ukrainian. This is particularly evident in the rift that occurred between the language of the church and that of government. The language of the religious genres and styles is characterized in the late 14th and 15th centuries by a renewed 'Church Slavonicization.' This so-called second wave of Church Slavonic influences stemmed from the linguistic reforms of Patriarch Euthymius of Tŭrnovo, who introduced artificial archaisms, a syntax and spelling closer to the Greek, and a rhetorical style. At the same time the language of government drew closer to the vernacular and was influenced also by the Latin, German, Czech, and Polish used in the central European chanceries. The political division of the Ukrainian lands between Poland and Lithuania led to the development of two variants of administrative language, Galician and Volhynian-Polisian. The Galician variant, which reflected the phonetics and morphology of the southwestern dialects and contained more Polonisms, became obsolete when the government adopted Latin or Polish (1433). The Volhynian-Polisian variant, with its center in Lutske, reflected the phonetics and morphology of the northern dialects and, after becoming the basis of the official language of the Lithuanian-Ruthenian state, absorbed more and more Belarusian features, especially those shared by the northern Ukrainian and southern Belarusian dialects (eg, the distinction between *e* and *ě* under stress, hardened *r*, *ž*, *č*, *š*). It became a distinctive koine which was used occasionally in Eastern Europe as a language of diplomacy.

The growth of towns, the rise of a Ukrainian burgher class, and the influence of the Reformation brought about a shift in the language of the higher genres toward the chancery and vernacular languages. There were even attempts at translating the Bible into a language approximating the vernacular (eg, the Peresopnytsia Gospel [1556-61] and Krekhiv *Apostol* [1563-72]). This trend was arrested, however, by the so-called third wave of Church Slavonicization. Polish cultural, political, and economic expansion after the 1569 Union of Lublin led to the Polonization of the Ukrainian nobility and the cultural and political decline of Ukrainian towns, thereby destroying the ground on which a vernacular-based Ukrainian literary language could rise. It was under these circumstances that the clergy assumed ideological leadership of the Ukrainian opposition and propagated the restoration and normalization of Church Slavonic as the vehicle of an older, Greco-Byzantine tradition. The *grammars and dictionaries produced by L. Zyzanii, M. Smotrytsky, P. Berynda, and others did not revive Church Slavonic in its pure form, but with an admixture of arbitrary changes and with some Ukrainian elements (eg, pronunciation of the nasal vowels *ѣ*, *ѧ* as *u*, *ja*; *g* as *h*; *ѣ* as *i*; and the nonpronunciation of *jers). The result of this policy was the opposite of what was intended: by severing the literary language from the vernacular and blocking the secularization of the literary language, the church in fact facilitated the Polonization process.

In practice even M. Smotrytsky's standards of Church Slavonic could not be maintained, and many vernacular elements and Western influences (especially Latinisms and Polonisms) crept into the literary language. Thus, an eclectic language based on Church Slavonic became the literary medium of the Cossack Hetman state of the 17th and early 18th centuries. Its variegated composition suited the prevailing style of the period, the baroque. The language was used in homiletics, scholarship, belles-lettres, and, with considerably fewer Church Slavonicisms, official communication and private correspondence. Given the artificial nature of the language, it is difficult to speak of its dialectal base; in general, however, southwestern dialectal elements prevailed over northern ones.

The decline of the Hetman state after the Russian victory at Poltava (1709) interrupted the normal development of the literary language. As baroque culture declined and became secularized, tsarist interference, as in the ukases of 1721, 1727-8, 1735, 1766, and 1772 censoring the language of Ukrainian printed books, as well as the Russification of education and the desire of certain strata of the Cossack *starshyna* and the higher Orthodox clergy to consolidate their position in the service of the Russian Empire, put an end to the printing of works in the literary language of the 17th century. In the second half of the 18th century the literary language used in Ukraine (eg, in the late Cossack chronicles, the writings of H. Skovoroda and V. Kapnist, and *Istoriia Rusov*) was, in fact, Russian. The vernacular was used only in satirical, humorous, intimate, or lyrical works, as prescribed by the classicist theory of low style. The authors of such works did not envision creating a new literary language, but merely recorded various 'Little Russian' dialects (eg, the northern in I. Nekrashevych, the Poltava in I. *Kotliarevsky, and the Kharkiv in H. Kvitka-Osnovianenko).

The attitude to the vernacular changed only with the rise of Romanticism, which in Ukraine acquired a distinctly populist flavor. Various writers, such as M. *Shashkevych, A. Metlynsky, and M. Kostomarov, raised the possibility of a serious, full-fledged literature based on the vernacular. They preferred folklore, which was associated with a historical tradition, to colloquial speech as a source of the literary language. Thus, the southeastern dialectal base of Modern Standard Ukrainian became established. But these efforts lacked historicity. Building on the achievements of his Romantic precursors from Poltava and Kharkiv, T. *Shevchenko first met the challenge of forging a synthetic, pan-Ukrainian literary language encompassing both the historical (eg, the use of archaisms and Church Slavonicisms) and the geographical dimension (the use of accessible dialects). P. *Kulish combined the same elements but in different proportions. Shevchenko's and Kulish's contemporaries and immediate successors failed to grasp the fact that historical and stylistic synthesis was the essence of language reform. The breadth of the geographic synthesis, however, secured a wide influence for the new literary language. This was the principle which gave direction to the linguistic strivings of the writers grouped around the journal **Osnova*. Later it had a determining influence on the character of B. *Hrinchenko's dictionary, which, despite its apparent dialectal nature, played a major role in normalizing the literary language.

The new literary Ukrainian began to be used in scholar-

ship and publicism in the early 1860s. This development was interrupted by P. *Valuev's circular (1863) forbidding Ukrainian-language printing within the Russian Empire. As Ukrainian publishing shifted to Austrian-ruled Galicia, the new literary language took root there, imposed the Middle Ukrainian-based literary language, and thereby undercut the attempts of local Russophiles to establish Russian as the literary language. In Galicia the new language became strongly influenced by the local vernacular. The impact of the northern dialects was not particularly evident, although they were used by writers living in Chernihiv gubernia (eg, P. Kulish, B. Hrinchenko, M. Kotsiubynsky). In the debate on Standard Ukrainian at the turn of the century, V. Mova, O. Pchilka, and M. Starytsky, and then M. Kotsiubynsky, Lesia Ukrainka, I. Franko, and M. Levytsky, favored a synthesis of the western and eastern vernaculars, while B. Hrinchenko, A. *Krymsky, and I. *Nechui-Levytsky argued for eliminating Western Ukrainian influences. When Standard Ukrainian 'returned' to Russian-ruled Ukraine after the lifting of the ban on the Ukrainian language in 1905, it already had a synthetic character. But its central Ukrainian foundation remained untouched.

The expansion of Standard Ukrainian into all social spheres and literary genres in the independent Ukrainian state of 1917–20 and in Soviet Ukraine in the 1920s necessitated its normalization and codification (see *Lexicology, *Orthography, and *Terminology). Two distinct currents of opinion arose in this regard. Supporters of a purist 'ethnographic' orientation (see *Purism), such as Ye. Tymchenko, S. Smerechynsky, O. Kurylo (at first), and V. Simovych, advocated the adoption of the popular vernacular as the standard. It was, however, the school led by O. *Syniavsky, which took into account not only tradition but also the development of the language, that gained the upper hand and determined the norms of orthography, orthoepy, morphology, and syntax.

Stalin's abolition of the policy of Ukrainization in the early 1930s and his suppression of Ukrainian national and cultural life were accompanied by bureaucratic attempts to restrict the use of Standard Ukrainian. It was totally eliminated from the military sphere and severely restricted in the scientific and technological spheres. Western Ukrainianisms and European loanwords existing in Ukrainian but not in Russian were expunged, and the language was reoriented toward the eastern Ukrainian dialects and Russian vocabulary and grammar. Changes in orthography, grammar, and lexicon were carried to such an extreme that some of them were to be rejected even in the official orthography adopted in 1946 and in the 1948 Kievan Russian-Ukrainian dictionary. The general direction of Soviet *language policy, however, has remained unchanged. Despite constantly increasing influence of the Russian language in Ukraine (see *Russian-Ukrainian linguistic relations), the general character of Standard Ukrainian as it was defined by Shevchenko and Kulish and codified by Hrinchenko, Syniavsky, and the VUAN dictionaries of the 1920s remains intact.

G.Y. Shevelov

Stanimir, Osyp, b 21 April 1890 in Ladychyn, Ternopil county, Galicia, d 13 February 1971 in Toronto. Military officer. After serving in the Austrian army during the First World War, he joined the Ukrainian Galician Army (UHA) in November 1918. During 1918–19, at the rank of captain, he commanded an infantry battalion of the Sambir Brigade. His unit was the first UHA force to enter Kiev on 30 August 1919. In the Red Ukrainian Galician Army he commanded the Third Brigade, which in April 1920 deserted the Soviet army. After escaping from Polish internment he joined the Kherson Division of the UNR Army and was briefly interned with it in Czechoslovakia. He graduated from the Commerce Academy in Vienna (1924) and was active in the co-operative movement in Galicia. After the Second World War he emigrated to Canada, where he wrote *Moia uchast' u vyzvol'nykh zmahanniakh* (My Participation in the Liberation Struggle, 1966).

Stanishevsky, Yurii [Staniševs'kyj, Jurij], b 28 October 1936 in Kharkiv. Theater historian and critic. He completed study at Kharkiv University in 1960, and since 1964 has worked in the AN URSR (now ANU) Institute of Fine Arts, Folklore, and Ethnography, from 1974 as head of the theater department. He is the author of many works on Ukrainian theater, including *Opernyi teatr Radians'koi Ukraïny* (The Opera Theater of Soviet Ukraine, 1988).

Stanislaus I Leszczyński (Stanisław), b 20 October 1677 in Lviv, d 23 February 1766 in Lunéville, France. Polish magnate and voivode of Poznań. In 1704, with the support of the Swedish king Charles XII, he replaced the deposed *Augustus II Frederick as king of Poland. As dissatisfaction with Muscovite rule increased in the Cossack Hetmanate, Stanislaus's negotiations with Hetman I. Mazepa (through Princess Anna Dolska) to ally with the Swedes in invading Russia culminated in a 1708 treaty. After Charles's defeat in the Battle of Poltava in 1709, Stanislaus left Poland for France. In 1733 he attempted, in vain, to reclaim the Polish throne. His son-in-law, Louis XV of France, granted him the Duchy of Lorraine in 1738. Stanislaus maintained relations with Hetmans P. and H. Orlyk.

Stanislaus II Augustus Poniatowski (Stanisław), b 17 January 1732 in Wolczyn, Poland, d 12 February 1798 in St Petersburg. Last king of Poland. He was elected in 1764 with the support of Catherine II of Russia, who later op-

posed his parliamentary reforms and pressed for the rights of non-Catholic religious dissenters in Polish territories. In 1768 Stanislaus faced a revolt by nobles grouped in the Confederation of *Bar, which sparked the *Koliivshchyna rebellion and the haidamaka movement in Right-Bank Ukraine. The weakened Polish state underwent partitioning by Russia, Austria, and Prussia in 1772, 1793, and 1795. Stanislaus then abdicated and lived in semicaptivity in Russia.

Stanislavivs'ki visty (Stanyslaviv News). A weekly newspaper published in Stanyславiv (now Ivano-Frankivske) from January 1912 to May 1913 (a total of 69 issues). The publisher and editor was V. Ivanytsky.

Stanislavova, Oleksandra, b 16 November 1900 in Petropavlovsk, Akmolinsk province, d 20 March 1985 in Kiev. Opera singer (dramatic soprano). A graduate of the Technical School of Music in Moscow (1930), she was a soloist on Radio Moscow, with the Saratov Theater of Opera and Ballet, and with the Bolshoi Theater in Moscow (1936) before working at the Kiev Theater of Opera and Ballet (1938–52) and the Kiev Philharmonia (1952–7). Her operatic roles included the name-parts in M. Lysenko's *Natalka from Poltava*, G. Verdi's *Aida*, and G. Puccini's *Tosca*, and Hanna in M. Verykivsky's *Naimychka* (Servant Girl) and Varvara in K. Dankevych's *Bohdan Khmelnytsky*.

Stanislavsky, Anatolii [Stanislavs'kyj, Anatolij], b 9 September 1905 in Lubni, Poltava gubernia. Architect. He began to lecture at the Kiev Institute of Communal Economy in 1936 and obtained his candidate's degree from the Kharkiv Institute of Communal Economy in 1941. From 1947 he taught at the Kiev Civil-Engineering Institute. He prepared the general plans for the reconstruction and development of Lysychanske (1933), Poltava (1934), Artemivske (1935), Yasynuvata (1936), and Kramatorske (1937); designed residential subdivisions in Poltava (1936), Slovianske (1934), and Vologda, Russia (1936); and wrote studies and articles on architecture and construction.

Stanislavsky, Vasyl [Stanislavs'kyj, Vasyl'], 1870–1927. Literary scholar. In the 1920s he published articles in VUAN serials and collections about a duma on the Sorochyntsi events during the Revolution of 1905, T. Shevchenko's *Kobzar* of 1867, the life of S. Rudansky (with A. Krymsky and V. Levchenko), the unpublished works of A. Svydnytsky, P. Myrny's letters to M. Starytsky, and memoirs of Myrny.

Stanisławski, Jan, b 24 June 1860 in Vilshana, Zvenyhorodka county, Kiev gubernia, d 6 January 1907 in Cracow. Polish impressionist painter. He studied under W. Gersonin in Warsaw, at the Cracow School of Fine Arts (1883–5), and under E. Carolus-Duran in Paris (1885–8). From 1896 he taught at the Cracow Academy of Fine Arts, where he had a significant influence on his Ukrainian students M. Burachek, I. Trush, O. Novakivsky, and I. Severyn. He visited Ukraine often and painted many Ukrainian landscapes, such as *Dilapidated Windmill* (1883), *Bila Tserkva* (1890), *The Dnieper Limans at Dawn* (1902), *St Michael's Cathedral in Kiev* (1903), *The Dnieper below Kiev* (1905), *House by the Dnieper*, *Haystacks*, *Sunflowers*, and *Windmills*.

Stankevych, Sofiia [Stankevych, Sofija], b 1862 in Ryzhiv, Zhytomyr county, Volhynia gubernia, d 1955 in Warsaw. Painter and graphic artist. She studied in Kharkiv, Warsaw, and Paris. She painted landscapes (eg, *Ukrainian Night* and *Kamianets at Night*) and still lifes. Later she created prints, including a series on the architecture of Warsaw and Pomerania.

Stankovych, Vasyl [Stan'kovych, Vasyl'], b 25 April 1946 in Irshava, Transcarpathia oblast. Fencer. He was part of the USSR teams that won silver medals at the 1968 and 1972 Olympic Games in the team foil event, and the world championships in 1969, 1970, 1973, and 1974. He was also the 1971 foil world champion and the champion of Ukraine and the USSR many times.

Yevhen Stankovych

Stankovych, Yevhen [Stankovyč, Jevhen], b 19 September 1942 in Svaliava, Bereg county, Transcarpathia. Composer. He studied under B. Liatoshynsky and M. Skoryk and graduated in composition from the Kiev Conservatory (1970). He worked as an editor at the Muzychna Ukraina publishing house in 1970–6 and was deputy head of the Union of Composers of Ukraine. He has written five symphonies and the symphonic works *Overture*, *Sinfonietta*, and *Fantasia*; a concerto for violoncello and orchestra; three symphonies for chamber orchestra; and the triptych *In the Highlands* for violin and pianoforte. He has composed three sonatas for violoncello and piano. His other compositions include the folk opera *Tsvit paporoti* (The Fern Flower, 1980); the ballets *Ol'ha* (1982), *Iskra* (The Spark, 1983), and *Prometheus* (1986); the requiem *Babyn Yar* (1991); pieces for solo voice and for choir; and film scores.

Stanove culture. A late Bronze Age culture that existed in Transcarpathia in the 14th to 12th century BC. It was named in the 1930s after a site in the region. The people of this culture lived in surface and semi-pit dwellings and had crematory burial practices. Their major economic activities included agriculture and animal husbandry, although hunting and gathering were common. Site excavations revealed bronze and gold items, including implements, armor, and horse trappings, and well-polished stone items. Some Stanove pottery was distinctively decorated with spirals and meanders. Scholars believe that the people of the Stanove culture eventually played a role in the development of the *Thracian Hallstatt culture.

Stanychno-Luhanske [Stanyčno-Luhans'ke]. V-20. A town smt (1986 pop 16,100) on the Donets River and a raion center in Luhanske oblast. The settlement of Luhanske, founded in the second half of the 17th century, was destroyed by the Tatars in 1684. It was rebuilt and, to avoid the frequent floods, moved to higher ground in 1773. From then it was known as Stanytsia Luhanska, which name was later changed to its present form. The inhabitants were Don Cossacks, who served until the end of the 18th century as a frontier guard. Today the town has a food industry and a few enterprises serving the railway industry.

Stanyslaviv. See Ivano-Frankivske.

Stanyslaviv Depression. A land formation in Subcarpathia south of Ivano-Frankivske between the Bystrytsia Solotvynska River in the northwest and the Vorona River in the southeast. The depression is a tectonic formation overlain with thick alluvial deposits. Its elevation rises in a north-south direction from approx 250 to 500 m. The Bystrytsia Nadvirnianska River runs through the depression.

Stanyslaviv eparchy. An eparchy of Halych metropoly created from the eastern part of Lviv eparchy, with its see in Stanyslaviv (now Ivano-Frankivske). Although initial requests by Metropolitans A. Anhelovych and M. Levytsky to establish the eparchy were approved by the Austro-Hungarian authorities and the pope as early as 1850, it was only in 1885 that Yu. Pelesh was ordained and enthroned as the first bishop of Stanyslaviv. He was succeeded by Yu. *Kuilovsky-Sas, A. Sheptytsky (1899-1900), and H. *Khomyshyn (1904-45), with an auxiliary bishop, I. *Liatyshevsky (1929-45). By 1939 the eparchy had 419 parishes served by 541 priests, and over 1 million faithful. Various monastic orders were active in the eparchy, especially the Basilians (in 1938 there were 47 Basilian priests and monks, and 48 nuns), Sisters Servants of Mary Immaculate (157 nuns), Myronosytsi sisterhood (59 nuns), Redemptorists, Studites, Sisters of St Vincent de Paul, and Holy Family Sisterhood. An eparchial seminary and a theological lyceum were established in 1906. The eparchy's official organ was *Vistnyk Stanyslavivs'koi ieparkhii*, published irregularly and then monthly from 1886 to 1939. The eparchy also copublished the religious quarterly **Dobryi pastyr*.

Under Khomyshyn, Stanyslaviv eparchy was the most Latinized of all eparchies of Halych metropoly. He introduced compulsory celibacy for all new priests in the eparchy in 1921 and attempted unsuccessfully to introduce the Gregorian calendar in 1916. His measures led to considerable dissension in the eparchy.

After the Second World War the territory of Stanyslaviv eparchy was incorporated into the Ukrainian SSR. The Soviet authorities arrested Bishops Khomyshyn (who was killed in a Kiev prison in 1947) and Liatyshevsky. The eparchy was forcibly converted to Orthodoxy, and A. Pelvelsky of the Russian Orthodox church was installed as bishop. The Ukrainian Catholic church survived in the underground until 1 December 1989, when it was again legalized. In 1989 S. Dmyterko was formally recognized as the ordinary of the eparchy (now called Ivano-Frankivske eparchy). He is assisted by Bishops P. Vasylyk and I. Bilyk. In March 1990 the eparchy had approx 530 parishes. At the same time the renewed Ukrainian Autocephalous

Orthodox church established its own eparchy of Ivano-Frankivske and Kolomyia.

Stanyslaviv oblast. See Ivano-Frankivske oblast.

Stanyslaviv Ukrainian Touring Theater (Ukrainskyi peresuvnyi teatr). An ensemble founded in 1920 under the directorship of I. Kohutiak, with a cast from *Sadovsky's Theater. It toured Galicia and Volhynia, where it performed mainly Ukrainian ethnographic plays - notably S. Cherkasenko's *Kazka staroho mlyna* (A Tale of the Old Mill) - and H. Sudermann's *Johannisfeuer* and classical operettas, and helped to organize numerous amateur drama groups. In 1939 it was reorganized as a resident theater in Stanyslaviv (see *Ivano-Frankivske Ukrainian Music and Drama Theater).

Stanyslavivs'ke slovo. See *Ukrains'ke slovo*.

Stanyslavsky, Mykola [Stanyslavs'kyj], b 29 August 1892 in Ozerne, Lkhvytsia county, Poltava gubernia, d ? Lexicographer. From 1926 he served as secretary of the Section of Administrative Language at the socioeconomic department of the VUAN *Institute of the Ukrainian Scientific Language. With M. Doroshenko and V. Strashkevych he compiled a normative Russian-Ukrainian dictionary of administrative language (1930). He also prepared a book of Russian-Ukrainian administrative and newspaper phraseology (unpublished) and wrote several reviews on contemporary Ukrainian orthographic and lexical issues and stylistics and an article on Ukrainian abbreviations (1930). He most likely perished during the terror of the 1930s.

Stanytsia (Russian: *stanitsa*). An administrative-territorial entity in Cossack territories within the Russian Empire (the Kuban, Don, and Terek regions) from the 18th century until 1920. A *stanytsia* consisted of several Cossack villages and *khutory*. Settlements which had fewer than 60 households were governed by **khutir* administrations. Except for persons of non-Cossack status (*inohorodni*), all the inhabitants were members of the *stanytsia* community, which was governed by an assembly of householders. The assembly distributed the Cossack lands and obligations, and it managed the community storehouses and schools. It elected the *stanytsia* administration (an otaman, deputies, and a treasurer) and the *stanytsia* court. The *stanytsia* court ruled on petty criminal and civil suits. Non-Cossack residents paid a fee per *sazhen* for their home plot and for the use of farmland, pasture, and forest.

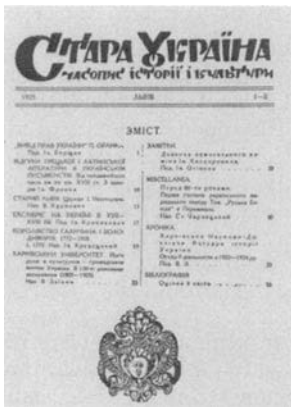

After 1929 the term *stanytsia* was used in the USSR to refer to a rural settlement on former Cossack territories. It was governed by a *stanytsia* soviet of workers' and peasants' deputies.

Stará L'ubovňa. IV-1. A village (1961 pop 2,900) on the Poprad River in the Prešov region of Slovakia, near the

border of Ukrainian ethnic territory. Twenty-six villages out of 44 in the surrounding area have a predominantly Ukrainian (Lemko) population.

Stara Sil [Stara Sil']. IV-3. A town smt (1986 pop 1,300) in Staryi Sambir raion, Lviv oblast. It was founded in 1255, and it received the rights of *Magdeburg law in 1421, when it was called Zaltsbork. For many centuries it was an important salt-mining center. At its peak in the mid-18th century it produced 39,000 barrels of salt yearly. When the reserves ran out in 1853, the town declined. The wooden Church of the Resurrection dates back to the 17th century.

Stara Syniava [Stara Synjava]. IV-8. A town smt (1986 pop 6,500) on the Ikva River and a raion center in Khmelnytskyi oblast. The town of Syniava was founded at the beginning of the 16th century, and received the rights of *Magdeburg law in 1543. In the second half of the century, after Syniava was destroyed by the Tatars, the survivors built a new town and called it Stara Syniava. It was captured by M. Kryvonis in 1648, and belonged to Bratslav regiment before being returned to Poland in 1667. In 1672–99 it was occupied, along with the rest of Podilia, by the Turks. After the partition of Poland the town was annexed by Russia and assigned to Lityn county in Podilia gubernia. A sugar refinery was built there in 1875, and the local economy grew rapidly. In 1923 Stara Syniava was granted smt status. It is an agricultural town with a sugar refinery and the ruins of a 16th-century fortress.

Stara Ukraina

Stara Ukraina. An illustrated monthly journal of history and culture, published in Lviv in 1924–5 by the Shevchenko Scientific Society. The journal was edited by I. *Krevetsky, and a total of 24 issues appeared. It featured articles by Galician and émigré authors, including the historians B. and O. Barvinsky, E. Borschak, D. Doroshenko, V. Karpovych, M. Korduba, I. Krevetsky, and I. Krypiakkevych; the literary scholars Ya. Hordynsky, I. Ohiienko, K. Studynsky, M. Vozniak, and P. Zaitsev; the art scholars M. Holubets, P. Kholodny, V. Sichynsky, and V. Zalozetsky; and other contributors such as V. Hnatiuk, I. Nimchuk, and V. Zaikin. The journal also carried previously unpublished works by I. Franko and O. Konysky. Special thematic issues were devoted to the 350th anniversary of printing in Ukraine, the grave sites of noted Ukrainian activists, Ukrainian memoir writing from the 11th to 20th centuries, and T. Shevchenko. The journal provided a

valuable chronicle of events, reviews, and bibliographies. It was the only Ukrainian historical journal in Western Ukraine. It ceased publication as a result of financial difficulties.

Stara Ushytsia [Stara Ušycja]. V-8. A town smt (1986 pop 2,200) near the junction of the Ushytsia and the Dniester rivers in Kamianets-Podilskyi raion, Khmelnytskyi oblast. It was first mentioned in the Hypatian Chronicle under the year 1144, as Ushytsia, a fortified town of Halych principality. In 1159 Ivan Rostyslavych Berladnyk laid siege to it and in 1199 it became part of the Principality of Galicia-Volhynia. Ushytsia's fortifications were dismantled on the demand of the Mongols in 1257. In the mid-14th century it fell under Lithuanian rule, and in the 1430s, under Polish rule. After being driven out by the rebellious townsmen in 1648, the Polish nobles avenged themselves by destroying the town in 1661. After the failed rebellion of 1702 many inhabitants of Ushytsia fled to Moldavia. Ushytsia was annexed by Russia in 1793, and served as a county center (1795–1826) of Podilia gubernia. It was subsequently renamed Stara Ushytsia. Its economy was dependent on farming and the river trade. The settlement was granted smt status in 1980.

Starch-and-syrup industry. A branch of industry that produces and processes starch, syrup, glucose, dextrose, and other products for use in the *food, chemical, paper, rubber, and other industries. The major raw materials for the industry are potatoes and corn, but wheat, sugar beets, sorghum, and rice are also used.

Starch has been extracted from potatoes since the 17th century and from wheat since the 18th century. Before the 1917 Revolution there were 186 enterprises producing starch and syrup in the Russian Empire. The industry has developed rapidly in the 20th century, and the USSR became the second-largest producer of starch and syrup in the world. In Ukraine in 1978 there were 18 specialized factories of the industry, the largest of which was the Verkhnodniprovske Starch-and-Syrup Complex (est in 1960). As well, some starch and syrup were produced as by-products at other food-processing plants. In total Ukraine produced 97,700 t of syrup, 57,300 t of starch, and 17,500 t of glucose. Ukraine was the second-largest producer of starch products and the largest producer of glucose in the USSR.

Starchenko, Vasył [Starčenko, Vasył'], b 20 March 1904 in Temriuk, Mariupol county, Katerynoslav gubernia, d 17 July 1948 in Kiev. Agrochemist and political figure; corresponding member of the AN URSS (now ANU) from 1945. After graduating from the Ukrainian Scientific Research Institute of the Sugar Industry he served as director and research chief of the Myronivka Research and Selection Station (1934–8). From 1938 he was deputy premier of the Council of People's Commissars and then of the Council of Ministers of the Ukrainian SSR. His publications deal with problems of agrotechnology and selection, particularly with problems in increasing the yield of sugar beets.

Starchenko, Yosyp [Starčenko] (Startsev, Yosyf), b and d ? Ukrainian architect and builder in the 17th century. He worked in Moscow for Peter I during the 1680s and was recorded as a noted architect. On the special invitation of

Hetman I. Mazepa he came to Kiev, where he constructed the baroque cathedrals at the *Kiev Epiphany Brotherhood Monastery (1690–3) and the *Saint Nicholas's (so-called Military) Monastery (1690–6).

Starchuk, Orest [Starčuk], b 6 November 1915 in Toprivtsi, Bukovyna, d 14 February 1971 in Edmonton. Slavist; member of the Shevchenko Scientific Society. He graduated from Chernivtsi University (LLD, 1938). He emigrated to Germany in 1941 and worked for the British occupational administration in Hannover (1945–8). He settled in Canada in 1948, where he taught Russian and developed a program of Slavic studies emphasizing Ukrainian language and literature at the University of Alberta. He became the first chairman of the department of Slavic languages there in 1964. Starchuk was a founding member of the Canadian Association of Slavists and its president in 1958–9.

Stare Lake. VIII-14. One of the saltwater *Perekop lakes in the northern part of the Crimea. The lake is 6 km long and 2.5 km wide, with a prevailing depth of 0.2–0.45 m in the summer and 0.6–0.8 m in the spring. Its salinity averages about 28 percent. The deposits around the lake are used for extracting salts, calcium, bromine, and the like. The town of Krasnoperekopske is situated along the lake's southern shore.

The castle in Stare Selo

Stare Selo. IV-5. A village (1968 pop 2,300) in Pustomytsi raion, Lviv oblast. It was first mentioned in historical documents in 1442. It was destroyed by the Turks in 1498 and by the Tatars in 1648. A fortress was built there by A. Prykhylny for the Ostrozky family in 1584–9 and was renovated in 1642 and 1654 in the late Renaissance style. Its walls (14–16 m high) and three towers are well preserved.

Starkov, Arsenii, b 1874 in the Voronezh region, d 18 December 1927 in Vienna. Anatomist. After being educated at Moscow University and abroad, he taught at Moscow and Kiev (from 1917) universities and was a member of the UAN in 1918. When the Soviets occupied Ukraine, he fled west. He served as a professor of biology at the Ukrainian Higher Pedagogical Institute in Prague (1923–5) and the Riga Polytechnic. Shortly before his death he was elected a fellow of the Ukrainian Scientific Institute in Berlin. He wrote the textbook *Zahal'na biolohiia* (General Biology, 1924).

Starkova, Mariia, b 1 August 1888 in Odessa, d 8 June 1970 in Odessa. Pianist and educator. After graduating from the St Petersburg Conservatory (1912), she lectured at the Odessa Conservatory, where she became a professor in 1926. In 1933 she was one of the organizers of a 10-year music school there, and in 1963 she became a consulting professor in its piano department. She was particularly noted for her methodological work in piano instruction.

Starling (Ukrainian: *shpak*). A chunky, metallic black, vocal bird of the family Sturnidae, especially *Sturnus vulgaris*, with a long, sharp bill, a body length reaching 20 cm, and a weight of 65–85 g. Starlings are found throughout Ukraine in thinned forests, orchards, and parks, where they nest in tree hollows, rock crevices, or ground holes, as well as in man-made bird houses. Starlings feed on insects on the ground and fly in tight flocks. They have been known to damage fruit and grain crops. The pink starling (*Pastor roseus*) can be found in Ukraine's southern steppes.

Starobesheve [Starobeševe]. VI-19, DB I-5. A town smt (1986 pop 7,400) on the Kalmiuss River and a raion center in Donetsk oblast. It was settled in 1779 by Greeks from the Crimea, who called it Besheve. The name was changed in 1896, when Novobesheve was founded nearby. In 1958 it attained smt status. The town is the center of an agricultural region. A thermoelectric power station (2,300,00 kW) was built nearby in 1954–8.

Starobilske [Starobil's'ke]. IV-19, DB I-5. A city (1989 pop 24,800) on the Aidar River and a raion center in Luhansk oblast. The site of the *sloboda* Bilska, founded in the 16th century, became deserted and was resettled by Cossacks from Ostrohozke regiment in 1683. The settlement was wiped out by the Russian army during K. Bulavin's rebellion in 1709. The new *sloboda*, established in 1732, was called Stara Bila. In 1797 it was promoted to city status, renamed Starobilske, and designated a county center in Slobidska Ukraine. From 1835 it was a county center in Kharkiv gubernia. Today the city has a food industry, a reinforced-concrete plant, a furniture factory, and a regional museum.

Starodub. I-13. A town (1975 pop 16,000) in the northern Chernihiv region and a raion center in Bryansk oblast, RF. In medieval times it was a fortress on Siverianian territory. It was first mentioned in the Hypatian Chronicle under the year 1096, when it was part of Chernihiv principality. In 1239 it was destroyed by Batu Khan, and thereafter it was ruled successively by Lithuania, Poland, and Russia. In 1648 the town was taken by B. Khmelnytsky's Cossacks, and in 1654 *Starodub regiment was set up, first within Nizhen regiment and then (from 1663) separately. The town was destroyed in 1660 by the Tatars and in 1663 by the Poles. From 1782 Starodub was part of Novhorod-Siverskyi vicegerency, and then a county center of Little Russia (1797–1802) and Chernihiv gubernias. In the 19th century it was a major trading town dealing mostly in furs, honey, wax, oil, and hemp. By the end of the century its population was 26,000. During the revolutionary period (1917–18) Starodub was included in the territory of independent Ukraine. Today, the town has a food and a tobacco industry. Its chief architectural monuments are the Church of St John the Baptist (1720) and the Cathedral

of the Nativity of Christ (built in 1617, burned down in 1677, and renovated at the end of the 17th century).

Starodub regiment. An administrative territory and military formation of the Hetman state. Before becoming a separate regiment in 1663, the Starodub region was an autonomous unit within Nizhen regiment. The regiment started with 7 companies and by the mid-18th century had 11 companies. Its male population in 1721 was 15,800, including 4,100 registered Cossacks. According to the 1764 census it had 172,800 male inhabitants, including 25,200 Cossacks. Its population had not experienced the Cossack rebellions of the 17th century; hence, it offered less resistance to enserfment than did other regiments. It was also under stronger Russian influence than the population of the rest of the Hetman state. A number of Starodub colonels rose to prominent offices in the Hetman state: I. Skoropadsky (1706–8) became hetman, and M. Myklashevsky (1689–1706) and H. Karpovych (1678–80) served on the general staff.

Starodubov, Kyrylo, b 19 April 1904 in Moscow, d 8 October 1984. Metallurgist; full member of the AN URSR (now ANU) from 1957. He studied at the Dnipropetrovske Mining Institute, and worked at the Dnipropetrovske Metallurgical Plant (1928–38). He held the chair of the thermal treatment of metal at the Dnipropetrovske Metallurgical Institute (1938–79) and headed a department at the ANU Institute of Ferrous Metallurgy (1948–74). During the Second World War he developed and put into operation in Magnitogorsk a highly efficient method of casting large metal parts.

Remains of the castle in Starokostiantyniv

Starokostiantyniv [Starokostjantyniv]. IV-8. A city (1989 pop 33,200) on the Sluch River and a raion center in Khmelnytskyi oblast. It was founded in the 1560s by K. *Ostrozky, who fortified Kolyshchentsi village and raised it to the status of a city with the rights of *Magdeburg law. Until the beginning of the 17th century the town was known as Kostiantyniv or Kostiantynivka. In the 16th and 17th centuries it was a major center of *Socinianism in Volhynia. Many battles between Cossack and Polish armies, especially during B. Khmelnytsky's rule, were fought in the vicinity of Starokostiantyniv. After the partition of Poland in 1793, the town was annexed by Russia. In the 19th century it was a county center of Volhynia gubernia and a manufacturer of tobacco products, oil, soap, beer, bricks,

and potash. By 1911 its population was about 20,000, including 11,800 Jews, 7,200 Ukrainians, and 1,200 Poles. During the war for Ukrainian independence the Ukrainian Galician Army fought the Bolshevik army near the town (13–14 August 1919), and later that year the UNR Army broke through the Bolshevik front there to launch its Winter Campaign. Today the city's main industries are food processing, machine building, and metalworking. Its architectural monuments include the remains of the old fortress (1571) and a 16th-century church.

Starokursnyky. See Russophiles.

Starokyivska Hora. A historically significant area of Kiev, situated on the plateau between the Dnieper and the Lybid rivers and the Khreshchatyi ravine, with an area of about 80 ha. It was settled fairly early in history (late Paleolithic), probably because of its naturally protected setting. The northwestern section is purported to be the site of the so-called Kyi's city, established in the late 6th century. By the late 10th century the hill was the location of the upper town, known as Volodymyr's city (approx 8 ha), where the prince's palace and the Church of the Tithes stood. In the 11th century all of Starokyivska Hora was settled as the upper town expanded and the city of Yaroslav the Wise was built up. It was encircled by high ramparts, which were 3.5 km in length and were studded with towers and gates. The Golden Gate, the St Sophia Cathedral, and St Michael's Golden-Domed Monastery were among the notable structures of the period. The district was almost completely destroyed by the Tatars in 1240. A partial reconstruction of it was effected in the 17th century, and since the 19th century it has been known as the Old Town district of Kiev. In 1945 it was declared a historical Preserve.

Starosilia archeological site. A Paleolithic Mousterian culture cave site along the Churuk-Su River near Bakhchesarai, Crimea. Excavations in 1952–6 uncovered a variety of flint tools and bones of wild animals (including mammoths). The site is best known for the recovery of a Neanderthal burial, one of a dozen such burials known worldwide.

Starosolska, Dariia [Starosol's'ka, Darija], b 3 January 1881 in Lviv, d 28 December 1941 in Georgievka, Kazakhstan. Musician and civic activist; daughter of V. and H.

Dariia Starosolska

Uliana Starosolska

*Shukhevych and wife of V. *Starosolsky. After studying piano at the Lviv Conservatory she taught at the Lysenko Higher Institute of Music (1907–40). She was a founding member and president of the Circle of Ukrainian Women in Lviv and editor of its journals *Meta* (1908) and *Nasha meta* (1919–20). She was also active in the Ukrainian Social Democratic party. Her articles, sketches, and verses appeared in the journal *Nasha khata* and the paper *Dilo*. In 1940 she was deported by the Soviet authorities to Kazakhstan, where she perished.

Starosolska, Uliana [Starosol's'ka, Uljana] (pseud: U. Liubovych), b 31 March 1912 in Lviv. Journalist and writer; daughter of V. Starosolsky and D. Starosolska. In 1936–9 she edited the Lviv periodicals *Nova khata*, *Na slidi*, and *Hospodars'ko-kooperatyvna chasopys*. In April 1940 she, her mother, and her brother Ihor were exiled by the Soviet authorities to Kazakhstan. After being released in May 1946, she was allowed to live in Poland, from which she emigrated to the United States in 1967. There she published her memoirs, *Rozkazhu vam pro Kazakhstan* (Let Me Tell You about Kazakhstan, 1969); edited the women's monthly *Nashe zhyttia* (1972–84, 1987–90); and contributed stories, essays, and sketches to the émigré press.

Ihor Starosolsky

Volodymyr Starosolsky

Starosolsky, Ihor [Starosol's'kyj], b 3 August 1908 in Lviv, d 10 February 1988 in Lviv. Engineer and restorer; son of V. *Starosolsky and D. *Starosolska. A graduate of the Lviv Polytechnic, he was deported to Kazakhstan in May 1940 together with his mother and sister. In 1943–6 he was imprisoned in a labor camp in Siberia. He returned to Lviv in 1946, where he became an assistant in the department of urban construction at the Polytechnical Institute. In the fall of 1949 he was arrested for visiting his uncle, O. Shukhevych (father of R. *Shukhevych), and he languished in labor camps until June 1956. After his release he returned to Lviv. In 1957 he initiated the creation of a planning department for the restoration of architectural monuments, which eventually became a branch of the Kiev-based Ukrainian Restoration Planning Institute. He was involved in or supervised the restoration of many edifices, including churches in Drohobych, Lavriv, Lviv, Kamianka-Buzka, Potylych, Chervonohrad, Peremyshliany, Pidhirtsi, Horodok, Sambir, and Radekhiv; the castles in Nevytske, Olesko, Pidhirtsi, Svirzh, and Mukachiv; and the Maniava Hermitage.

Starosolsky, Volodymyr [Starosol's'kyj], b 8 January 1878 in Jarosław, Galicia, d 25 February 1942 in Mariinsk, Siberia. Lawyer, sociologist, and civic and political leader; member of the Shevchenko Scientific Society from 1923. He was a founding member of the Moloda Ukraina society and the editor of its journal. In 1902 he helped organize the *secession of Ukrainian students from Lviv University and the massive agrarian strike in Galicia. He belonged to the External Committee of the Revolutionary Ukrainian party and was a leading member of the *Ukrainian Social Democratic party. After completing his law studies in Vienna, Berlin, Graz, and Heidelberg he practiced law in Lviv and defended political activists (including M. *Sichynsky) in court. He was one of the organizers and the first president of the paramilitary Ukrainian Sich Rifleman society (1913). During the First World War he was a member of the Supreme Ukrainian Council, served on its Combat Board as liaison with the Sich Rifleman units at the front, and co-operated with the Union for the Liberation of Ukraine in Vienna. In 1918 he became a member of the Ukrainian Military Committee. In the fall of 1919 he was appointed deputy minister of foreign affairs in I. Mazepa's UNR government and served at the same time as a professor at the Ukrainian State University in Kamianets-Podilskyi. In the 1920s he lived as an émigré in Vienna and Prague, and taught state law at the Ukrainian Free University in Prague and the Ukrainian Husbandry Academy in Poděbrady. After returning to Lviv in 1927, he reopened his law office and gained prominence defending OUN members. During the Soviet occupation he was appointed a professor at Lviv University, but by December 1939 he had been arrested and sentenced to 10 years of hard labor in Siberia, where he perished.

In his scholarly work Starosolsky advocated the sociological approach to legal and political developments. His chief works include *Das Majoritätsprinzip* (1916), *Teoriia natsii* (Theory of the Nation, 1921), *Metodolohichna problema v nauksi pro derzhavu* (The Methodological Problem in the Study of the State, 1925), *Do pytannia pro formy derzhavy* (On the Question of the Forms of the State, 1925), *Bohdan Kistiakowskyj und das russische soziologische Denken* (1929), and the textbook *Derzhava i politychne pravo* (The State and Political Law, 2 vols, 1925).

Starosolsky, Yurii [Starosol's'kyj, Jurij], b 28 February 1907 in Lviv, d 21 October 1991 in Washington, DC. Lawyer and civic activist; son of V. Starosolsky; full member of

Yurii Starosolsky

the Shevchenko Scientific Society from 1949. After graduating from the law faculty of Lviv University (1931), he practiced law in his father's office in Lviv and was active in various political and civic organizations. He completed his doctorate at the Ukrainian Free University (UVU) in Prague (1940) and then taught criminal and procedural law. A displaced person in Germany after the Second World War, he emigrated to the United States in 1950, where he studied political science at the American University in Washington, DC (MA, 1953), lectured on the Soviet social and political system at the Institute of Adult Education of the Catholic University in Washington, DC, and was the longtime head of the Washington branch of the Ukrainian Catholic University. He was elected *nachalnyi plastun* (Head Scout) of the *Plast Ukrainian Youth Association in 1972. He wrote textbooks on criminal procedure (1947) and commercial law (1947); a monograph on Soviet criminal law (1954); numerous entries on law in the *Encyclopedia of Ukraine*; and *Velyka hra* (The Great Game, 1948), a scouting guide for Plast.

Starosta. In Kievan Rus' the starosta was a lower government official, usually in charge of a certain department of the princely household. In the Grand Duchy of Lithuania and Poland the starosta was a representative of the king or grand duke in a voivodeship. In Galicia and Podilia the general starosta was in charge of a whole voivodeship. By the end of the 16th century, as the power of the gentry had increased, the authority of the starosta diminished. In the Russian Empire the village starosta was the head of the lowest administrative unit, the village community. He was elected for three years by the village assembly. In Galicia and Bukovyna during Austrian rule a starosta was a county captain who supervised the county administration, conducted elections to the county council and the diet, headed the county school council, and oversaw the collection of direct taxes. Under the Hetman government in 1918, gubernial and county starostas were appointees of the central administration. In Polish-ruled Western Ukraine during the interwar period (1919–39), the starosta was an official of the state in the county and the head of the local administration. In Transcarpathia in 1919–39, the starosta was a village head or a city mayor. In addition, elected or appointed officers who conducted the affairs of any type of community (church, artel, etc) were known as starostas.

Starostenko, Yurii, b 16 August 1931 in Odessa. Painter, graphic artist, and scenery designer. After graduating from the Kharkiv Art Institute in 1958, he began teaching there. He has designed scenery for the Kharkiv Ukrainian Drama Theater and decorative wall panels for public buildings in Kharkiv and created line engraving series, such as 'The Carpathians' (1963), 'People and the Sea' (1962), and 'Capital Cities' (1967); engravings of Kharkiv; and book illustrations.

Starostvo. An administrative-territorial and economic unit of state lands in medieval Poland and the Grand Duchy of Lithuania and their Ukrainian and Belarusian territories. It usually included one or more cities or towns and some villages and was administered by a starosta, who was a high official of noble birth. In Western Ukraine under Austrian (1772–1918) and Polish (1919–39) rule, the starostvo was equivalent to a county.

Starostvo estates (*starostynski mairynosti*). In medieval Poland and Lithuania (14th–18th centuries), sections of crownlands granted by the ruler to magnates, nobles, or state officials for a fixed period or in perpetuity as a reward for services to the crown. The estates formed a part of the starostvos – hence their name. All income from the estates belonged to the starostas. Such estates were abolished in Left-Bank Ukraine after B. Khmelnytsky's uprising (1648), in Galicia after its annexation by Austria (1772), and in Right-Bank Ukraine after its annexation by Russia (1793).

Starostvo peasants (*starostynski seliany*). A category of peasants in Poland and Lithuania during the 14th to 18th centuries who were bound to *starostvo estates. They were obliged to fulfill various obligations to their lords. In the 16th century the crown established a special court to deal with their grievances, but that measure gave them little protection against their masters. With the abolition of the starostvo estates in Ukraine under Austrian and Russian rule, the starostvo peasants became either private or state serfs.

Marharyta Starovoit: woodcut (1974) of a wooden church built in 1724 in Loni (now in Peremyshliany raion, Lviv oblast)

Starovoit, Marharyta [Starovojt], b 9 June 1922 in Orenburg, Russia. Printmaker. A graduate of the Lviv Institute of Applied and Decorative Arts (1950), she has worked mostly in wood engraving, in which art she has produced bookplates, prints, and print series, such as 'Soviet Lviv' (1953–7), 'The Industrial Lviv Region' (1958–60), and 'The Hutsul Region under the Soviet Sun' (1962).

Starowolski, Szymon (Starovolsciuss), b 1588 in Starovolia, Brest county, Belarusia (then part of the Grand Duchy of Lithuania), d 6 April 1656 in Cracow. Polish writer and historian. A graduate of the Cracow Academy (1618), he traveled extensively in Europe, took part in the battles near Khotyn in 1620–1, and wrote approx 60 works on historical, political, theological, and other themes. His monographs on Polish history, notably a 1616 biography of Sigismund I and a 1632 survey history, give a favorable picture of the Zaporozhian Cossacks and their defense of the southeastern frontiers of the Commonwealth against the Crimean Tatars and the Ottoman Empire.

Michael Starr

Tymofei Starukh

Starr, Michael (Starchevsky), b 14 November 1910 in Copper Cliff, Ontario. Ukrainian-Canadian politician. Starr was an alderman (1944–9) and mayor (1949–52) of Oshawa, Ontario, before his election in 1952 to the federal House of Commons as the Progressive Conservative (PC) member for Oshawa constituency, which he represented until 1968. He was minister of labor (1958–63) in the J. Diefenbaker administration, the first Ukrainian to serve in a federal cabinet. Starr was PC House leader (1965–8) and a candidate for the PC party leadership in 1967. He was defeated in the 1968 general election. He served as a citizenship court judge (1968–72) and chairman of the Ontario Workers' Compensation Board (1973–80).

Starsha Mohyla. A kurhan located in a burial ground near Pustoviitivka, Romen raion, Sumy oblast. Excavated in 1888–9 by D. *Samokvasov, it revealed the remains of a Scythian chieftain under the 21 m mound. Among the grave goods recovered were a large number of weapons (sword, spears, dagger, gold coat of mail), 16 horse bits cast with Scythian-style zoomorphic figures, and objects of cult significance.

Starshyna. See Cossack *starshyna*.

Start. The main sports magazine in Ukraine, published monthly in Kiev since 1957 as the organ of the Committee on Physical Culture and Sports of the Council of Ministers. It succeeded the Russian magazine *Vestnik fizicheskoi kul'tury* (1922–9) and Ukrainian *Visnyk fizychnoi kul'tury* (1929–30) in Kharkiv, *Fizkul'turnyk Ukraïny* in Kharkiv (1931–4) and Kiev (1934–6), and *Sport* (1936–41) in Kiev. Until 1965 it was called *Fizkul'tura i sport*. Its circulation increased from 73,000 in 1965 to 109,000 in 1980.

Startsev, Yosyf. See Starchenko, Yosyp.

Starukh, Antin [Starux], b 1856 in Berezhnytsia Vyzhnia, Lisko county, Galicia, d 9 January 1938 in Berezhnytsia Vyzhnia. Farmer and civic and political activist; brother of T. *Starukh. He was elected as a candidate of the National Democratic party to the Galician Diet in 1901 and 1908. In 1918–19 he sat on the Ukrainian National Rada of the Western Ukrainian National Republic and served as commissioner of Lisko county.

Starukh, Tymofei [Starux, Tymofej], b 27 November 1860 in Berezhnytsia Vyzhnia, Lisko county, Galicia, d 21 April 1923 in Berezhany, Galicia. Civic and political activist. After serving in the Austrian army and gendarmerie he retired to a farm near Berezhany and became active in local Ukrainian organizations, such as the Prosvita society, and in the National Democratic party. He was elected to the Austrian parliament in 1907 and 1911 and to the Galician Diet in 1908 and 1913. In 1915, during the Russian occupation, he was arrested and deported to Siberia. After returning home through Kiev in 1917, he became a member of the Ukrainian National Rada (1918) and mayor of Berezhany. In January 1919 he attended the Labor Congress in Kiev. In 1920 he was arrested by the Poles, but he was released in January 1921 because of a serious illness.

Yaroslav Starukh

Starukh, Yaroslav [Starux, Jaroslav] (pseud: Stiah, Stoian, Yaran), b 1910 in Berezhnytsia Vyzhnia, Lisko county, Galicia, d 17 October 1947 near Liubachiv, Jarosl w voivodeship, Poland. OUN political activist, insurgent, and publicist; son of T. *Starukh. He joined the OUN in 1930 and became a member of its executive committee in Galicia (and, later, Volhynia and Podilia) and a political instructor for its youth wing. At the same time he was an editor of several nationalist publications, notably the Lviv weekly *Nove selo*. In 1939 he was sentenced to a 13-year term during a major political trial of 23 Ukrainians

which took place in Rivne. During the German occupation of Ukraine he was an OUN organizer in the Zhytomyr and Kiev regions, and S. *Bandera's chief of propaganda. He was arrested in Lviv by the Gestapo in December 1942, but in the fall of 1943 he was sprung from prison by OUN members and put to work as director of an underground OUN radio station located in the Carpathian Mountains. In 1945 Starukh (under the code name Stiah) became OUN regional chief for *Zakerzonnia and also led UPA troops in that area. He published *Opyr fashyzmu* (The Specter of Fascism), which was translated into Polish and English and widely distributed. He died in his command bunker after refusing to surrender to Polish military forces during *Operation Wisła.

Starunia [Starunja]. A village (1972 pop 1,900) on the Lukva River in Bohorodchany raion, Ivano-Frankivske oblast. It was first mentioned in historical documents in 1476. At the beginning of the 20th century an ozocerite mine operated there, in which well-preserved remains of a mammoth and a hairy rhinoceros were discovered in 1907 and 1928 respectively. They are displayed at the zoological museums in Cracow and Lviv.

Starushych-Oksenovych, Ihnatii. See Oksenovych-Starushych, Ihnatii.

Staryi Chortoryisk [Staryj Čortoryjs'k]. II-6. A village (1970 pop 2,600) on the Styr River in Manevychi raion, Volhynia oblast. It was first mentioned in the chronicles under the year 1100, when it was a fortified settlement called Chortoryisk. In 1228 it was taken by Danylo Romanovych, and 20 years later it was destroyed by the Mongols. From 1340 it belonged to Lithuania, and then to the Czartoryski family of Polish magnates (1442–1601) and Voivode K. Pac, a militant Roman Catholic who built a church and a Dominican monastery (1639) there. In 1795 it was annexed by Russia, and belonged to Lutske county of Volhynia gubernia. With the construction of the Kovel–Sarny railway line at the end of the 19th century, the station of Novyi Chortoryisk was built, and the old village was renamed Staryi Chortoryisk.

Staryi Krym [Staryj Krym]. VIII-16. A city (1989 pop 10,400) in Kirovske raion, Crimea. Artifacts dating back to the last few centuries BC have been found at the site of an ancient settlement called Kariia. In the 6th century it was known as Surkhat or Solkhat. Under the rule of the Golden Horde it was called Krym or Kerym and was the residence of the khan's viceregent. When the capital of the Crimean Khanate moved to Bakhchesarai in the 15th century, Krym declined and became known as Eski Krym (Old Crimea). It was annexed by Russia in 1783, was raised to city status in 1784, and was known as Levkopol for a few years thereafter. Today the town manufactures reinforced-concrete products, footwear, and furniture. A health resort just outside the town treats tuberculosis. The main architectural monuments are the remains of a 14th-century mosque, Armenian monastery, and caravansary.

Staryi Krym graphite deposits. Graphite deposits located on the right bank of the Kalchyk River near Staryi Krym, near Mariupil, Donetsk oblast. The graphite is found in veins 500 m long and 40–50 m wide in Precambrian gneisses. The deposits were discovered in 1881. In

1981 the recoverable reserves of graphite were estimated at 3.4 million t.

Staryi Sambir [Staryj Sambir]. IV-3. A city (1989 pop 6,200) on the Dniester River and a raion center in Lviv oblast. It was founded in the second half of the 11th century as Sambir and served as a residence of Lev Danylovych. After its destruction in 1241 and the founding of Novyi Sambir, it became known, toward the end of the 14th century, as Staryi Sambir. It was granted the rights of *Magdeburg law in 1553 (1500, according to some sources), when it was under Polish rule. The town was known for its manufacturing trades, particularly weaving. In the 16th century it also became a busy trading center: duty on livestock passing through the town on its way to markets in Peremyshl and Breslau (now Wrocław) was collected there, and strong economic ties with Transcarpathia, then under Hungary, were developed. In the second half of the 17th century the town declined. After the partition of Poland in 1772, it was annexed by Austria. In the interwar period (1919–39) it belonged to Poland. Today the city has a linen plant, a furniture-manufacturing complex, a lumber mill, and a branch of the Boryslav Sewing Consortium.

Staryi Sambir oil field. An oil field located near Staryi Sambir, Lviv oblast, at the edge of the *Drohobych-Boryslav Industrial Region. The field is approx 5.2 km long and 1.75 km wide. The oil, which dates from the Eocene and Paleocene epochs, is high in paraffin and resin. The field was discovered in 1969 and has been exploited since then. The oil is refined in Drohobych.

Steven Staryk

Staryk, Steven, b 28 April 1932 in Toronto. Violinist, concertmaster, and pedagogue of Ukrainian descent. He studied at the Royal Conservatory of Music in Toronto and then in New York with M. Mischakoff, O. Shumsky, and A. Schneider. Staryk has played as concertmaster with the Royal Philharmonic in London (1956–60), the Concertgebouw in Amsterdam (1960–3), the Chicago Symphony (1963–7), and the Toronto Symphony (1982–7). He has taught at the Amsterdam Conservatory (1960–3), at Northwestern University and the American Conservatory in Chicago (1963–7), at the Oberlin College Conservatory in Ohio (1968–72), and in a succession of Canadian cities (Victoria, Ottawa, London, and Toronto in 1973–8). Since 1987 he has been a professor at the University of Washington. His repertoire ranges from the baroque masters to works of contemporary composers. He has premiered the violin concertos of G. Fiala, T. Kenins, S.I. Glick, P. Hoffert, and L. Klein and has recorded more than 45 albums on a variety of labels.

Starykov, Mykola (Starikov, Nikolai), b 2 April 1897 in Edrovo, Novgorod gubernia, Russia, d 4 June 1961 in Kiev. Mining engineer; full member of the AN URSS (now ANU) from 1951. He studied in Leningrad and worked in Kryvyi Rih and in the Urals. He taught at mining institutes in Sverdlovske, Kryvyi Rih, and Dnipropetrovske and headed a laboratory of the ANU Institute of Mining (1958–61). His main contributions were methods of finding new metal-ore deposits, particularly at very great depths, and fire fighting in mines, especially copper mines.

Starynkevych, Yelysaveta [Starynkevych, Yelysaveta], b 21 April 1890 in St Petersburg, d 1 December 1966 in Kiev. Literary critic and translator. She graduated from the historical-philological faculty of the Higher Courses for Women in Moscow (1917) and then moved to Ukraine. From 1945 she worked as a senior researcher for the Institute of Literature of the AN URSS (now ANU). She wrote on theoretical and practical translation and critical literary essays in journals and newspapers, mainly on issues of Ukrainian Soviet dramaturgy. Her published monographs include *Ukrains'kaadians'ka dramaturhiia* (Ukrainian Soviet Dramaturgy, 1941), *Dramaturhiia Ivana Kocherhy* (The Dramaturgy of Ivan Kocherha, 1947), *Oleksander Korniiuchuk* (1954), and *Ukrains'kaadians'ka dramaturhiia za 40 rokiv* (40 Years of Ukrainian Soviet Dramaturgy, 1957).

Mariia Starytska

Liudmyla Starytska-Cherniakhivska

Starytska, Mariia [Staryc'ka, Marija] (stage name: Yavorska), b 31 May 1865 in Kiev, d 20 December 1930 in Kiev. Actress, director, and theater pedagogue; daughter of M. Starytsky. She began her theatrical career in her father's troupe (1885), completed her theatrical education in the St Petersburg Theater College (1894, O. Fedotov's class), and played on the Russian stage in St Petersburg, Moscow, and Kiev. From 1898 she worked as a director and pedagogue in Ukrainian drama circles at regional People's Homes and in the Kiev Literary Artistic Society. She headed the drama faculty in the Lysenko Music and Drama School in Kiev (1904–18), participated in the organization of the Ukrainian National Theater (1917), and taught in the Lysenko Music and Drama Institute (1918–27). As director she premiered Lesia Ukrainka's play *Iohanna – zhinka Khusova* (Joanna, the Wife of Chuza).

Starytska-Cherniakhivska, Liudmyla [Staryc'ka-Cherniakhivska, Ljudmyla], b 29 August 1868 in Kiev, d 1941 on the way to exile in Kazakhstan. Writer, literary critic, and community activist; daughter of M. *Starytsky and sister of M. Starytska and O. Steshenko. Starytska-Cherniakhivska was a friend of Lesia Ukrainka, and together with other Ukrainian writers they took part in the activities of the literary group *Pleiada (1888–93). Starytska-Cherniakhivska began publishing her work in 1887 in the Lviv almanac *Pershyi vinok*, and then published in *Zoria*, *Pravda*, *Literaturno-naukovy vistykyk*, and *Zhyt'ie i slovo*. Her poetry was published in *Skladka* and other almanacs, in the anthology of recitations *Rozvaha* (Divertissement), and in the poetry anthologies *Akordy* (Chords) and *Ukrains'ka muza* (The Ukrainian Muse). Starytska-Cherniakhivska's poetic works are similar to Lesia Ukrainka's in style and motif. She also wrote prose and drama, translated, and wrote literary criticism. Her most noteworthy dramatic works include *Het'man Petro Doroshenko* (1908), *Kryla* (Wings, 1913), *Ostannii snip* (The Last Sheaf, 1917), *Rozbiinyk Karmeliuk* (The Robber Karmeliuk, 1926), and *Ivan Mazepa* (1927). She also wrote many literary critical essays and memoirs, in particular about M. Kotsiubynsky (1913), L. Yanovska (1909), and H. Barvinok (1911).

One of Starytska-Cherniakhivska's best memoirs is 'Khvylyny zhyt'ia Lesi Ukrainky' (Moments from the Life of Lesia Ukrainka, 1913). Noteworthy are her essays on the history of theater, 'Dvadtsiat'-p'iat' rokiv ukrains'ko-ho teatru' ('25 Years of Ukrainian Theater,' *Ukraina*, 1907 nos 10–12). In 1917 Starytska-Cherniakhivska was elected to the Central Rada. In 1919 she was cofounder and deputy president of the National Council of Ukrainian Women in Kamianets-Podilskyi. In 1930 she was arrested in connection with the *Union for the Liberation of Ukraine trials and sentenced to five years of imprisonment, but after a few months she was released and exiled to Yuzivka instead. In 1936 Starytska-Cherniakhivska returned to Kiev. She was rearrested by the NKVD together with her sister, O. Steshenko, on 4 June 1941.

P. Odarchenko

Starytsky [Staryc'kyj]. A family of Cossack *starshyna* and Russian imperial nobility in the Poltava region. It was founded by Semen Starytsky in the early 17th century. His son, Luka Starytsky, was the archpriest of Poltava (1665–71). Luka's son, Zakhar Starytsky (d 1714), was a captain in Poltava regiment (1711–14). Zakhar's great-grandsons, Hryhorii (b 1731) and Vasyl (1737–95) Starytsky, founded two branches of the Starytsky family line. One branch was centered in Poltava; it included Heorhii (Yehor) Pavlovych Starytsky (b 27 November 1825, d 31 May 1899), a leading proponent of the 1864 judicial reform. He was an imperial senator (1867), a member of the State Council (1879), and head of the Department of Laws (1883–5). The other branch of the Starytsky family line was centered in Myrhorod; it included Mykhailo *Starytsky and his daughters, Mariia *Starytska and Liudmyla *Starytska-Cherniakhivska.

Starytsky, Mykhailo [Staryc'kyj, Myxajlo], b 14 December 1840 in Klishchyntsi, Zolotonosha county, Poltava gubernia, d 27 April 1904 in Kiev. Writer and theatrical and cultural activist. Orphaned in childhood, Starytsky was raised by his uncle, the father of M. *Lysenko. He studied at the Poltava gymnasium (until 1856) Kharkiv

Mykhailo Starytsky

Myroslav Starytsky

University (1858–60), and Kiev University (1860–6). From 1867 he lived in Kiev and worked with Lysenko. Starytsky collected and transcribed folk songs, which he published with music arranged by Lysenko. He wrote librettos for many of Lysenko's operas, such as *Harkusha*, *Chornomortsii* (The Black Sea Cossacks), *Rizdviana nich* (Christmas Night), *Taras Bul'ba*, and *Utoplana* (The Drowned Maiden). Owing to official tsarist hostility to his work after the Ems Ukase was introduced, Starytsky was forced to emigrate in 1878 and live abroad for some time. He returned to Ukraine in 1880 and resumed his publishing activities and theater work. In 1883 he headed the first Ukrainian professional theater. In 1885 he founded a new troupe with young actors. In 1895 he ceased his theatrical work altogether and devoted himself to literature.

Starytsky was first published in 1865. His translations of the tales of H.C. Andersen were published under the pseudonym Starchenko in Kiev in 1873. Also published in Kiev were his translations of Serbian folk dumas and songs (1876), the collection of poetry *Z davn'oho zshytku: Pysni ta dumy* (From an Old Notebook: Songs and Dumas, [2 parts, 1881, 1883]), and other works. Particularly noteworthy is his translation of W. Shakespeare's *Hamlet* (1882). An important part of Starytsky's literary legacy is his poetry on social issues, which is characterized by populist and patriotic motifs, glorification of the Ukrainian past, and protests against tsarism. Starytsky also wrote lyric poetry, exemplified by 'Monolohy pro kokhannia' (Monologues on Love.) Some of the lyric poems became folk songs, such as 'Nich iaka, Hospody, misiachna zoriana' (Lord, What a Moonlit, Starry Night). Starytsky's contribution to Ukrainian dramaturgy was large. He began by reworking prose for the stage and rewriting dramatic works, and proceeded to write many of his own, the most notable of which are the social dramas *Ne sudylos'* (It Was Not Destined, 1883), *U temriavi* (In the Darkness, 1892), and *Talan* (Destiny, 1894). His drama *Oi ne khody, Hrytsiu, ta i na vechornytysi* (Don't Go to Parties, Hrytsi!, 1892) became very popular. His historical dramas: *Bohdan Khmel'nyts'kyi* (1897) and *Marusia Bohuslavka* (1899) merit particular attention.

During the last years of his life Starytsky wrote the historical novel *Obloha Bushi* (The Siege of Busha, 1891), the novels *Pered bureiu* (Before the Storm, 1894) and *Razboinik Karmeliuk* (The Robber Karmeliuk, 1903), and other works in Russian. Collections of his works were published under

the titles *Poezii* (Poems, 1908), *Dramatychni tvory* (Dramatic Works, 1907–10), *Vybrani Tvory* (Selected Works, 1954 and 1959), and *Tvory v vos'my tomakh* (Works in Eight Volumes, 1963–5).

Starytsky, Myroslav [Staryc'kyj] (Miro Skala-Starycky), b 13 June 1909 in Skala, Borshchiv county, Galicia, d 16 February 1969 in Paris. Opera and concert singer (lyric tenor), and teacher. He studied voice under A. Didur and L. Ulukhanova in Lviv and received a diploma from the Vienna Academy of Music (1942). He sang leading roles at theaters in Strasbourg (1943–4), Zurich (1950), Brussels (1954–7), and Paris (from 1949). He premiered the role of Igor in G. Bizet's opera *Ivan IV* in Le Grand-Théâtre in Bordeaux (1951) and toured throughout Europe and North America. His most famous roles were the name-part in C. Gounod's *Faust*, Rodolfo in G. Puccini's *La Bohème*, and the Duke of Mantua in G. Verdi's *Rigoletto*. In 1963 he founded a music-drama studio in Paris, where he taught until his death. He recorded several albums of art songs and of Ukrainian folk song arrangements.

Stas, Anatolii [Stas', Anatolij], b 5 May 1927 in Sushvalivka, Hlobyne raion, Poltava oblast. Writer and journalist. He has worked for the newspapers *Molod' Ukraïny*, *Robitnycha hazeta*, and *Literaturna Ukraïna* and the Moscow magazine *Ogonëk*. Since 1950 he has published essays, stories, and literary criticism, the novels *Pidzemnyi fakel'* (The Underground Torch, 1960), *Tovarysh Oleksa* (Comrade Oleksa, 1972), *Zelena pastka* (The Green Snare, 1972), *Sribliaste marevo* (The Silvery Phantom, 1974), and *Vulytsia cheroonykh troiand* (The Street of Red Roses, 1977), and the prose collection *Taiemnytsia Ardel't-verke* (The Secret of Ardel't-Werke, 1970).

Stashevsky, Yevhen [Staševs'kyj, Jevhen], b 2 September 1884 in Zinkiv, Podilia gubernia, d 1938. Historian and economist. After graduating from Kiev University he lectured there as well as at the Kiev Commercial Institute and the Higher Courses for Women. After the Revolution of 1917 he served as a professor at the Kamianets-Podil'skyi Ukrainian State University, as director of the All-Ukrainian Agricultural Museum in Kiev (1924–33), and as research associate of the Institute of Ukrainian History of the AN URSR (now ANU; 1936–7). He was arrested in 1938, and died in prison. Stashevsky's chief works deal with Russian political history and Ukrainian economic history: *Ocherki po istorii tsarstvovannia Mikhaïla Fedoroviča* (Outlines of the History of Mikhail Fedorovich's Reign, 1913), *Smolenskaïa voïna 1632–4* (The Smolensk War of 1632–4, 1919), *Sil's'kohospodars'kyi rynok Pravoberezhnoi Ukraïny za peredreformnoi doby* (The Agricultural Market of Right-Bank Ukraine in the Prereform Period, 1929), and *Istoriia dokapitalisticheskoi renty na Pravoberezhnoi Ukraïne v XVIII-pervoi polovine XIX vv.* (The History of Precapitalist Rent in Right-Bank Ukraine from the 18th to the First Half of the 19th Century, 1968), which was unfinished and was published posthumously.

Stashynsky trial. The trial of Bohdan Stashynsky in Karlsruhe, West Germany, on 8–19 October 1962 for the assassination of the Ukrainian political figures L. *Rebet on 12 October 1957 and S. *Bandera on 15 October 1959. Stashynsky (b 1931 in the village of Borshchiv, near Lviv) confessed to killing the two nationalist leaders on the orders of the KGB chief A. Shelepin and provided a detailed account of how he had been recruited into the secret police and had carried out the assignments. He was sentenced to eight years' imprisonment. The trial was widely covered in the world press.

Stasiuk, Ihor [Stasjuk], b 29 September 1938 in Berezhany, Galicia. Theoretical solid-state physicist. A graduate of Lviv University (1958), he is a professor of physics there and head of the quantum statistics section of the Lviv division of the AN URSR (now ANU) Institute of Theoretical Physics. His extensive research covers several branches of solid-state theory, in particular the theory of phase transitions, theoretical electro-optics and piezo-optics, and superconductivity.

Stasiuk, Mykola [Stasjuk], b ? in the Katerynoslav region, d ? Political and co-operative leader. After studying at the St Petersburg Mining Institute (1903–5) he organized peasant associations and propagated populist socialism in Katerynoslav gubernia. He was active in the co-operative movement in Katerynoslav and Kiev. In 1917 he became a member of the Central Rada and the Little Rada, vice-president of the Peasant Association, and general secretary of food supplies in V. Vynnychenko's first cabinet. In 1919 he was put in charge of supplies for the UNR Army. In 1931 he was arrested by the NKVD, and disappeared. His articles on Ukraine's economy appeared in *Zapysky Naukovoho tovarystva v Kyievi* and *Literaturno-naukovyi vistnyk*.

Stasiv, Iryna. See Kalynets, Iryna.

Ivan Stasiv

Stasiv, Ivan, b 12 July 1895 in Liubachiv, Galicia, d 15 June 1986 in Paris. Community and political leader. He studied law at the university in Budapest (1922–4) and was cofounder of the Ukrainian Student Association in that city (1922). He was a diplomatic attaché and then secretary to the UNR diplomatic mission in Budapest (1919). From 1924 he lived in France. There he was closely involved with the Ukrainian Hromada (1924–8) and was an executive member of the Ukrainian National Union

(1932–40). During the German occupation (1941–4) he headed the French equivalent of the *Ukrainian Institution of Trust in the German Reich.

The State Banduryst Kapelle of Ukraine

State Banduryst Kapelle of Ukraine (Derzhavna kapelia bandurystiv Ukrainy). *Bandura ensemble of Ukraine. The group was formed in 1946 in Kiev from the remaining members of an earlier national bandura ensemble – the State Exemplary Banduryst Kapelle (the majority of whose members had emigrated to the United States and formed the *Ukrainian Bandurist Chorus in Detroit). Its conductors and directors have included O. Mikhnovsky (1946–74), H. Kuliaba (1974–7), and M. Hvozdz (since 1977), and its repertoire consists of folk and historical songs, dumasy, adaptations of classical or operatic works, and Soviet compositions. The ensemble helped to develop and adapt a chromatic bandura. It has also combined varieties of the bandura and tsymbaly, double-basses, and other instruments into a diverse orchestral section. The ensemble has traveled mainly in the Soviet Union and Eastern bloc countries, and it toured Japan in 1969 and North America in 1988.

State Dance Ensemble of Ukraine (Derzhavnyi akademichnyi ansambl tantsiu Ukrainy im P. Virskoho). A dance company, popularly called the Virsky Ensemble af-

Members of the State Dance Ensemble of Ukraine performing the hopak

ter P. *Virsky, who founded it in 1937 and was its artistic director to 1940 and again from 1955 to 1975. The company has attained international acclaim for its sophisticated choreography of traditional and modern Ukrainian and other dances, which it has performed throughout Europe and North America. The ensemble has a troupe of more than 80 dancers and an orchestra. Besides Virsky, V. Vronsky (1952–4), L. Chernyshova (1954–5), K. Vasylenko (1977–9), O. Homon (1979–80), and M. Vantukh (since 1980) have served as artistic director.

State Drama Theater (Derzhavnyi dramatychnyi teatr). A theater created on the initiative of N. *Doroshenko in Kiev by the Hetman government in August 1918. With O. Zaharov and B. Kryvetsky as artistic directors, the State Drama Theater debuted in the fall of 1918 with the premiere of Lesia Ukrainka's *Lisova pisnia* (The Forest Song). It performed modern Ukrainian and Western European plays by dramatists such as V. Vynnychenko, H. Ibsen, G. Hauptmann, and C. Goldoni. Its main cast was forced to merge with the State People's Theater in the spring of 1919 to form the *Shevchenko First Theater of the Ukrainian Soviet Republic.

State Duma. See Duma, State.

State farm (Ukrainian: *radianske hospodarstvo* or *radhosp*; Russian: *sovetskoe khoziaistvo* or *sovkhoz*). A state farming enterprise. According to Soviet theory the state farm was the highest and most fully socialist form of agricultural organization. State farms were agricultural 'factories,' where all the means of production were nationalized, and the labor was hired. In the latter respect state farms differed from other forms of socialist farming, including *collective farms, *associations for the joint cultivation of land, and *artels.

State farms were first introduced in the USSR in 1919–20, during the period of War Communism. The Bolshevik authorities forcibly took back the landowners' estates and equipment that had been divided among the peasants. By the summer of 1919 there were 1,256 state farms in Ukraine, with 1.3 million ha of land, more than in the Russian republic. Another 1.3 million ha had been taken over by sugar manufacturing and alcohol distilling enterprises. In practice the state farms were able to work only one-half of their land, because they lacked workers and other resources. The introduction of state farms was resisted strongly by the peasantry. Their resistance led the Party to adopt, at the Seventh Party Conference in December 1919, a slower tempo for establishing state farms throughout the USSR. Many state farms were also dissolved after that time. By the end of 1920 there were only 571 state farms, with 409,300 ha, in Ukraine. The decline continued, so that by 1923 there were only 423 farms, with 242,000 ha, or 0.65 percent of all arable land, in Ukraine. During the NEP period state farms were combined into large agricultural trusts. In addition some 100 state farms belonged to large factories and supplied their workers with food. Many of those farms were still plagued by a shortage of manpower and resources. In 1925 the Ukrainian State Farm Trust leased out, in return for one-half of the harvest, over 20 percent of its land to peasants, because it could not work the land on its own. In 1927, state farms accounted for only 1.8 percent of the capital funds in agriculture, 0.9 percent

of the livestock, and 4.9 percent of the farm inventory. But the regime favored the farms and gave them priority access to tractors and other machines, hoping to turn them into model farms.

During the *collectivization the political sections of state farms helped to force the peasants into joining collective farms. The Party considered transforming the collective farms into state ones but did not carry through the plan. By the beginning of 1934 there were 768 state farms organized into trusts, and many more belonged to various enterprises and institutions. In 1934, state farms in Ukraine owned 3.4 million ha of seeded land, 11,828 tractors, 309,000 draft animals, 703,000 cattle (including 292,000 cows), 1.2 million hogs, and 631,000 sheep and goats. Later, special suburban state farms were established to provide food for the urban population. Some state farms established by the NKVD were worked by prisoners.

State farms continued to operate in Ukraine under the Nazi occupation during the Second World War. In 1945 there were 784 state farms, with 1,172,000 ha of land, 198,000 workers, and 6,400 tractors. Their number continued to grow: to 902 in 1960, 1,605 in 1970, 2,110 in 1980, and 2,514 in 1987. Although state farms were usually much larger than collective farms, their average size was declining: whereas in 1958 the average farm had 6,500 ha of land, of which 4,200 ha were under cultivation, by 1980 the respective figures were 4,600 ha and 3,400 ha. On average they were approximately one-third larger than collective farms. State farms were most common in southern Ukraine and, after that, in central Ukraine; they were least common in Polisia and western Ukraine.

In 1987 approx 19.7 percent of the total land area and 23.9 percent of the agricultural land in Ukraine belonged to state farms. State farms had some 7.4 million ha under cultivation. Of that area, 3.5 million ha were seeded with grain crops; 0.6 ha with industrial crops; 0.3 ha with potatoes, vegetables, and melons; and 3 million ha with feed crops. In addition they owned 5 million head of cattle (including 1.6 million milk cows), 3.4 million hogs, and 1.9 million sheep and goats. State farms produced 0.9 million t of meat, 4.6 million t of milk, 7.9 billion eggs, and 6,800 t of wool. In total they employed 1.4 million people, including 1.1 million in agriculture. In 1970, when state farms accounted for over 21 percent of the agricultural land, they provided only 14.9 percent of the gross agricultural product in Ukraine. Productivity was somewhat higher than on collective farms, but much lower than on the small private plots. State farms supplied a higher proportion of their output to the state: in 1970 they turned over 38 percent of their grain to the state, compared to 33 percent for collective farms. More important, the state paid state farms lower procurement prices than other farms and thus realized a higher profit on the sale of their products. In response to the problems faced by collective farms, in the 1960s the average wage of their members was raised considerably and allowed to surpass the wage of state farm workers. The latter generally worked shorter hours, however, and were guaranteed a certain daily wage.

The prices of machinery, fuel, building materials, and fertilizer for state and collective farms were equalized in the 1960s. Since procurement prices for state farms remained a little lower than for collective farms, state farms ran larger deficits in their operation. The economic position of state farms was improved somewhat through

greater specialization. Most state farms began to specialize in milk and beef production, fruit and vegetable growing, poultry farming, or grain growing.

State farms were much more common and important in the RSFSR than in Ukraine. There they accounted for over 53 percent of all agricultural land in 1970. They were paid higher prices by the government than state farms in Ukraine, and their workers were paid higher wages. There was no economic rationale for such discrimination.

State inspectorates (*derzhavni inspektury*). In the UNR, organs of political supervision established in the larger military units in 1919. The government assigned representatives of the political parties to army units. The chief state inspector at the staff of the UNR Army was V. Kedrovsky. The UNR State Inspectorate was abolished in December 1919.

In the Soviet Union state inspectorates were special control organs within government bodies, such as ministries and state committees. Their purpose was to supervise the implementation of laws and special regulations pertaining to working and living conditions, sanitation, safety, and commercial activity. Officials of the state inspectorates had the unrestricted power to inspect the operations and records of any organization, enterprise, or institution and, in some cases, of individuals as well. Anyone guilty of violating regulations could be punished by the inspectorates with a fine, suspension of occupational rights, or dismissal from work.

State Library of Ukraine (*Derzhavna biblioteka Ukraïny*). Founded in Kiev in 1866 as the Kiev Municipal Public Library, it was renamed the State Library of the Ukrainian SSR in 1957. Its holdings number over 3 million items, including 200,000 periodicals, and its manuscript division contains the collected works of T. Shevchenko, I. Franko, Lesia Ukrainka, P. Myrny, M. Kotsiubynsky, and others, as well as V. Modzalevsky's valuable collection of archival documents pertaining to 17th- and 18th-century Left-Bank Ukraine. The library also has a large catalog of Ukrainica in foreign publications and periodicals.

State loans. Moneys borrowed by the state from the population or private corporations and repayable within a specified time, usually with interest. Such loans are called internal. Loans from foreign states or banks are called external.

The tsarist government in the Russian Empire began to make internal loans in the 1860s and external loans in the 1870s. The latter were used to finance commercial and industrial enterprises. By the end of the 19th century the indebtedness of the imperial government exceeded 5 billion gold rubles, the equivalent of the government's budget for three years. Russia was the largest debtor state of the time.

To pay off its foreign debt the state encouraged a positive trade balance by exporting raw material. A significant portion of foreign loans was used for constructing a railroad network. That undertaking spurred the growth of Ukraine's industry, particularly of its coal and metallurgical industry, and promoted the export of Ukraine's grain and sugar.

Between 1908 and 1912 the tsarist government issued 5.2 billion rubles' worth of securities: 3.7 billion for sale at home and 1.5 billion for sale abroad. Land mortgage credit constituted 44 percent of domestic securities, which were used by the peasantry to purchase land from the gentry, who in turn were able to pay off their own mortgage debts.

In January 1918 the new Soviet government canceled all foreign debts. Internal state loans began in 1922 and reached their peak during the First Five-Year Plan. Each bond issue was identified with a particular economic campaign, such as the Loan of Economic Restoration, the Five-Year-Plan-in-Four-Years Loan, and the Loan to Strengthen the Peasant Economy. Bonds were purchased by individuals and, to a lesser extent, by savings banks and enterprises. Political and administrative pressure was used to sell the bonds, including direct deductions from workers' wages and seizures of enterprises' bank accounts. In effect the bonds were a form of taxation that diverted part of the purchasing power of the population into the state budget. Wage and salary workers were the main individual purchasers of government bonds: by 1933 they owned 69 percent of the bonds. Initially the peasantry played a minor role, in purchasing only 5 percent of the first industrialization loan; but, under pressure, by mid-1931 they had subscribed 25 percent of the bonds. At the same time the interest paid on the loans declined, from 12 percent during the mid-1920s to 4 percent and even 2 percent by the early 1930s, and the repayment term increased, from between 2 and 8 to 10 and even 20 years.

Between 1927 and 1932 the population of Ukraine invested 1.3 billion rubles, or 23 percent of the all-Union total, in state loans. The vast majority of revenues were retained by the central Union budget; the Ukrainian state budget retained only 10.8 percent of such revenue. During that period revenue from USSR state loans constituted 13 percent of all budgetary revenues from Ukraine. In the following decades Ukraine's participation in the Union state debt remained at approx 19 percent. In 1957 compulsory bond sales were abandoned, but a 20-year moratorium was placed on the repayment of state loans. In 1960, state loans raised from the population, mostly in the form of lotteries, constituted 453 million rubles, or 1.2 percent of the state revenues of the Ukrainian SSR. By 1988 such state loans had declined to 128 million rubles, or 0.4 percent of Ukraine's state revenues. Since 1989, with the advent of economic reform, the importance of domestic government bonds has increased.

Foreign debt has always been a monopoly of the Union government in Moscow. By 1990 the USSR had a hard-currency foreign debt (owed to Western state and commercial institutions) estimated at over 60 billion dollars. That year hard currency requirements for debt servicing were estimated at up to 11 billion dollars. From 1988 individual republican enterprises were free to establish foreign trade ties, but hard currency obligations still had to be arranged with the central State Bank in Moscow.

B. Somchynsky

State peasants (*derzhavni seliany*). A category of 'free persons' introduced by Peter I in the early 18th-century Russian Empire. Also known as treasury peasants, they lived on and farmed lands owned by the state, in exchange for which they were obliged to pay *quitrents, *poll taxes, and road taxes to the state treasury. They were also required to build and maintain roads and to perform other duties on demand. After the abolition of the Hetman state and the partition of Poland during the reign of Catherine II, peasants in Ukraine who lived on the former properties of the Polish crown, *economic peasants, free farmers, *Cossack helpers, rank-and-file Cossacks, foreign military colonists, single-homestead servitors (**odnodvirtsy*) who could not prove noble descent, and Jewish farmers were all classified as state peasants. In Right-Bank Ukraine many state-owned lands were leased out to the gentry, and the state peasants on those lands (150,000 males during the reign of Paul I) were thus forced to perform corvée, and became serfs. From 1801, state peasants could buy uninhabited land from the state and have full property rights over it. Many were too poor to meet their steadily increasing financial obligations and were forced to migrate to Southern Ukraine in search of work or to hire themselves out to the landed gentry. Those unfortunate enough to become *work people in state-owned industrial enterprises or to live on lands incorporated into the *military settlements of Slobidska and Southern Ukraine in 1817–25 were brutally exploited. In 1837 corvée by state peasants was abolished, and the newly created Russian Ministry of State Domains under Count P. Kiselev introduced quitrent, tax, land-equalization, land-redistribution, administrative, and judicial reforms to improve the peasants' lives. Between 1839 and 1859, peasants who had been leased to the gentry were gradually transferred to paying cash quitrents to the state instead. By the mid-19th century the over four million male state peasants in Russian-ruled Ukraine made up 41 percent of all male peasants there. Sixty-seven percent of them were in Left-Bank Ukraine, 16 percent were in Right-Bank Ukraine, and 16.5 percent were in Southern Ukraine. In 1863 the state peasants in Right-Bank Ukraine were reclassified as proprietary peasants and forced to assume 49-year-term *redemption payments for their land allotments. In 1866 all other state peasants were allowed to purchase their allotments in full immediately, at grossly inflated prices, or to rent them permanently. In 1885 compulsory redemption payments were imposed on all peasants.

State People's Theater. See People's Theater.

State Planning Committee of the Ukrainian SSR (*Derzhavnyi planovyi komitet URSR*, or *Derzhplan URSR*). A Union-republican economic agency (est 1921) subordinated to both the Council of Ministers of the Ukrainian SSR and the USSR State Planning Committee. Its two chief functions were planning the economy of Ukraine and monitoring the implementation of the plans.

Its organizational structure consisted of three groups of departments, summary functional, summary resource, and branch. The summary functional departments set one

or several plan targets (eg, labor investment) for all branches of the economy. The summary resource departments drafted material balances and plans for the distribution of material inputs and equipment. The branch departments were organized according to either the branch principle (coal, machine building, food) or the sector principle (agriculture, construction). The department heads were members of the committee, and the heads of the biggest departments, along with the committee chairman and deputy chairman, were members of the committee's collegium. The most important matters were discussed and decided by the collegium.

The *Derzhplan* drafted economic plans for the republic on the basis of control figures specifying the goals and constraints for a given period. Those figures were set by the USSR Planning Committee after consultations with the republican committees and ministries. The *Derzhplan* in turn communicated with the relevant ministries or directly with their enterprises and organizations. Its specialists were well acquainted with the methods, capacities, and technology used by the enterprises. Because of the traditional Soviet emphasis on material production, most of the committee staff were engineers and technicians, not economists.

Annual and five-year plans drafted by the *Derzhplan* were published in dozens of volumes, specifying outputs, investment, wages, employment, consumption, and so forth. Upon approval by the CPU Central Committee and Ukraine's Council of Ministers each plan was submitted to the USSR Planning Committee, which then drafted the plan for the Soviet economy as a whole. As a result the plan approved for Ukraine could differ significantly from what had been proposed by the republic.

Decision-making in the USSR economy was centralized according to the vertical branch principle. The republics had a significant say in planning their social development but not their industrial production. The *Derzhplan* controlled material and financial flows only for the economic units subordinated to Ukraine's Council of Ministers: the enterprises of local industry, agriculture, and forestry, some enterprises of the construction, transportation, and communications industries, trade and public catering, and the 'nonproductive' sectors (education, medicine, etc). Enterprises of the oil, gas, chemical, and machine-building industries came only under the Union ministries. Enterprises of the coal, electric power, metallurgical, paper, construction-materials, light, and food industries were subordinated to both Union and republican ministries.

The economic restructuring begun in the last few years of the 1980s diminished the role of the Union and republican planning committees. Industrial enterprises became increasingly independent of government control, but at the same time republican governments assumed more and more powers formerly held by the Union authorities. (See also *Economic planning.)

F. Kushnirsky

State Publishing House of Ukraine (*Derzhavne vydavnytstvo Ukrainy* [DVU], or *Derzhvydav*). The official publishing house of the Soviet Ukrainian state, founded by the All-Ukrainian Central Executive Committee in Kharkiv in May 1919 as the All-Ukrainian Publishing House (*Vseukrvydav*). It was renamed the All-Ukrainian State Publishing House in 1920, and DVU in 1922. In the

second half of the 1920s, under the direction of Yu. Voitsekhivsky and S. Pylypenko, DVU was the largest and most important publisher in Soviet Ukraine – it produced over half of all its books – and the second-largest publisher in the USSR. It played a major role in the implementation of the *Ukrainization policy by publishing several hundred schoolbooks; several series of Ukrainian literary classics; works by contemporary Soviet Ukrainian authors; translations of European classics; political propaganda; sociopolitical, technical, and children's books; and 38 periodicals, including the literary journals *Chervonyi shliakh*, *Zhyttia i revoliutsiia*, *Literaturnyi iarmarok*, *Hart*, *Nova generatsiia*, *Ukraina*, and *Pluh*. It also ran a Central Bibliographic Division (it became part of the Ukrainian *Book Chamber in 1922) and a network of 28 okruha branches, 75 bookstores, 15 kiosks, and 73 agencies. Its editorial staff was led by V. Shcherbanenko and included prominent writers, such as M. Khvylovy, M. Kulish, P. Panch, V. Svidzinsky, and P. Tychna. From 1926 DVU came under increasing state control; in that year it was ordered by the CP(B)U Politburo to prepare and publish a scholarly edition of V. Lenin's works and to increase its output of political propaganda for the masses. In the period 1920–8 DVU published 6,624 titles with a combined pressrun of 81,471,000; 4,487 of the titles were in Ukrainian and had a pressrun of 63,254,000 copies. Approx 65 percent of the output consisted of schoolbooks. By 1929, 94 percent of its publications were in Ukrainian. In August 1930 DVU was replaced by the State Publishing Alliance of Ukraine (DVOU), an association of specialized publishers that was abolished in March 1934.

State purchase prices. See Prices.

State Secretariat of the Western Ukrainian National Republic (Derzhavnyi Sekretariat Zakhidno-Ukrainskoi Narodnoi Respubliky). The executive organ of the government of Western Ukraine, established on 9 November 1918 as a provisional secretariat by the Ukrainian National Rada. Its first members were K. Levytsky, president and secretary of finance; V. Paneiko, secretary of foreign affairs; L. Tsehelsky, internal affairs; D. Vitovsky, the armed forces; S. Holubovych, justice; O. Barvinsky, education and religious affairs; S. Baran, agrarian affairs; Ya. Lytvynovych, trade and industry; I. Myron, highways; O. Pisetsky, post and telegraph; I. Makukh, public works; A. Chernetsky, labor and social welfare; I. Kurovets, public health; and S. Fedak, supplies. The first secretariat by its political composition was a coalition: all Galician parties were represented in it, although the National Democratic party was dominant. On 4 January 1919, after the reorganization of the Ukrainian National Rada in Stanslaviv, a new secretariat was put together. Holubovych took over the presidency, finances, and trade and industry, and Paneiko, foreign affairs; Tsehelsky became acting secretary of foreign affairs (while Paneiko was at the Paris Peace Conference); Makukh took over internal affairs, Vitovsky, military affairs, O. Burachynsky, justice, A. Artymovych, education and religion, M. Martynets, agrarian affairs, Myron, highways and post and telegraph, and M. Kozanevych, public works. Some of the secretaries were

nonpartisan experts. In February 1919 Vitovsky and Tsehelsky left; V. Kurmanovych became secretary for military affairs, and P. Bubela became his deputy. M. Lozynsky was appointed deputy secretary of foreign affairs, and when he left for Paris in April 1919, the secretariat was directed by S. Vytvytsky. That secretariat functioned until June 1919, when the government of the Western Province of the Ukrainian National Republic was vested in the dictator Ye. Petrushevych. The secretariat's functions were taken over by a government consisting of the dictator's plenipotentiaries.

State Senate (Derzhavnyi Senat). The highest judicial body in the court system of the *Hetman government of P. Skoropadsky. It was set up by an act of 8 July 1918 to replace the *General Court, which had functioned during the period of the Central Rada. The State Senate was organized on the model of the Russian State Senate, and it functioned temporarily according to the Russian procedural rules. There were 45 appointees to the Senate. The hetman appointed M. Vasylenko as president, and the chairmen of the general courts were D. Nosenko (administrative court), Husakivsky (civil court), and M. Chubynsky (criminal court). The Senate and each general court had its own procurator.

Stations of young naturalists (*stantsii yunykh naturalistiv*). Extracurricular educational institutions in the USSR which attempted to develop and encourage a love of nature, animal husbandry, and agriculture in the members of the Pioneer movement. The stations had groups of young plant scientists, stockbreeders, horticulturists, agricultural engineers, and the like.

Stations of young technicians (*stantsii yunykh tekhnikov*). Extracurricular educational institutions in the USSR which increased the technical knowledge of Pioneers and young people in general. Stations helped the school system entrench the technical education of students, instill in them an interest in the subject, and encourage and develop young people's talents in construction. There were subgroups in the stations for those with interests in electronics, aeromodeling, photography, and the like.

Statistics. The gathering and analyzing of numerical data for the purpose of making inferences about mass phenomena, particularly social processes. Quantitative analysis has a long history, but it emerged as a modern science only in the 19th century and acquired important practical applications in science, economics, medicine, and other fields. The most common use of statistics is in the conduct and analysis of *censuses.

Statistically useful data began to be collected in Ukraine in the 16th and 17th centuries, when registries of the population of the Polish-Lithuanian state were compiled for the purposes of taxation. They contained general information on the population and real property. In the Hetman state more detailed surveys of economic life were compiled in census books (most notably in 1666), some of which have survived until today. From 1723 regular *re-

vizii were conducted, and the *Rumiantsev census of 1765–9 enumerated the entire population of the Hetmanate. Another important source of statistical data was the birth and death records which began to be kept by the Orthodox church in the first quarter of the 18th century.

In Russian-ruled Ukraine the Statistical Committee of the Police Ministry (est 1811) gathered some social statistics. In 1834 it was replaced by a statistics office of the Interior Ministry, which in 1858 was reorganized into the Central Statistical Committee. The purpose of the committee was to collect, with the help of its gubernial, county, and municipal committees, and to publish statistical materials. It issued several series, yearbooks, collections, and other publications. In 1897 it also administered the first general census of the Russian Empire. Various ministries and government departments and gubernial and municipal statistical offices also collected statistical data. Their publications contained much information about Ukraine, although they did not treat Ukraine as a separate entity.

From the first half of the 19th century gubernial committees and offices in Ukraine often published their materials in annual collections. The most prolific statistical offices were those of Kiev gubernia and Kuban. Eventually those of Poltava, Chernihiv, and Kherson gubernias gained recognition. The most important statistical publications on Ukraine in the 19th century included W. Marczyński's *Statystyczno-topograficzne i historyczne opisanie gub. Podolskiej* (Statistical-Topographic and Historical Survey of Podolia Gubernia, 2 vols, 1831), M. Arandarenko's *Zapiski o Poltavskoi gubernii, sostavlennye v 1846 godu* (Notes on Poltava Gubernia Taken Down in 1846, 3 vols, 1848–52), A. Skalkovsky's *Opyt statisticheskogo opisaniiia Novorossiiskogo kraia* (An Attempt at a Statistical Description of the New Russia Region, 2 vols, 1850, 1853), and D. *Zhuravsky's *Statisticheskoe opisanie Kievskoi gubernii* (A Statistical Description of Kiev Gubernia, 3 vols, 1852). The commission for the study of the Kiev school district published four volumes of statistical materials and was active from 1851 to 1864. The Russian Army General Staff published its own statistical studies of the Ukrainian gubernias from the mid-19th century. At the same time the *Southwestern Branch of the Imperial Russian Geographic Society, the Free Economic Society (founded in St Petersburg in 1765), various church eparchies, and other organizations collected and published statistics on Ukrainian life.

In the mid-19th century chairs of statistics were established at Ukrainian universities (instruction in the discipline had been introduced earlier). The first statistics professor in Ukraine was O. Roslavsky-Petrovsky at Kharkiv University. Zhuravsky's *Ob istochnikakh i upotreblenii statisticheskikh svedenii* (On the Sources and Applications of Statistical Information, 1846) was an important contribution to the methodology of statistics.

After the emancipation of the peasants and the land reforms of the 1860s the zemstvos set up statistical offices to study the state of agriculture and the socioeconomic changes in their rural localities. Such offices were established by the Kherson (1873) and Chernihiv (1875) and then the Poltava, Kharkiv, Katerynoslav, and Tavriia zemstvos. The offices conducted censuses of peasant households and workshops and peasant cadastres. Initially the zemstvo statisticians studied entire peasant communities, but later they focused on selected aspects of

small groups of representative households. Many noted Ukrainian statisticians and cultural figures worked in the zemstvo statistical offices in Ukraine. They tried to inform the government about the social and economic problems of the countryside. The work of the Chernihiv zemstvo statistical office, which was directed by O. *Rusov and staffed by P. *Chervinsky, V. *Varzar, M. Kotsiubynsky, and O. *Shlykevych, was particularly well known. It concentrated on land use and productivity, whereas the Moscow zemstvo office was interested mostly in demographic studies. When the Chernihiv statisticians showed that the local nobility had avoided taxes, the nobles succeeded in closing their office for several years. Moreover, statisticians were often accused of fomenting revolution among the peasantry. The charge was false, although many zemstvo staff were involved in political activities to raise the political and national consciousness of the common people. In the 1870s Shlykevych compiled combined statistical tables that were a major contribution to the statistical methodology of the time.

The statistical office of the Pereiaslav zemstvo, directed for a time by G. Rotmistrov, made some important contributions. It was one of the first institutions in the world to publish a survey of peasant household budgets (in 1898). Thanks to its efforts *Statisticheskii spravochnik po Iugu Rossii* (A Statistical Handbook for the South of Russia, 1890), which encompassed the Don Cossack province and Bessarabia as well as the nine Ukrainian gubernias, came out. Besides those already mentioned, the noted zemstvo statisticians in Ukraine included V. *Vasylenko, L. *Padalka, and F. *Shcherbyna. Altogether zemstvo statistical offices published over 100 volumes of materials on agriculture, cottage industries, peasant property, health care, and education. Most of the studies were restricted to individual gubernias or even counties. Only a few covered the entire Ukrainian territory – for example, *Statisticheskii spravochnik po Iugu Rossii* and *Ves' Iugo-Zapadnyi Krai* (The Entire South-Russian Region, 1913), supervised by M. Dovnar-Zapolsky, edited by A. Yaroshevych, and published by the Southwestern Branch of the Russian Export Chamber. Besides those already mentioned, the chief contributors to statistical research on Russian-ruled Ukraine in the late 19th and early 20th centuries were K. *Vobly, L. Lichkov, I. Myklashevsky (professor of statistics at Kharkiv University), S. *Podolynsky, V. Postnikov, H. Tsekhanovetsky, A. Borynevych, and M. *Ptukha.

In the Ukrainian territories of the Austro-Hungarian Empire, statistical research in the early 19th century was conducted by the Directorate of Administrative Statistics of the Ministry of Trade, Industry, and Public Works. In 1863 it was succeeded by the Central Statistical Commission in Vienna. Those agencies from 1842 through 1917 published statistical yearbooks that give information on population, agriculture and animal husbandry, industry, and commerce, broken down by crownland (and initially by circle as well). Later editions also provided data on education and the press. Several serials published by those bodies, including *Mitteilungen aus dem Gebiete der Statistik* (1852–74), *Monatsschrift* (1875–1917, 43 vols), and *Österreichische Statistik* (1882–1916, 111 vols), provided detailed and up-to-date statistical information. The Crownland Statistical Bureau for Galicia (est 1874) published a reference book titled *Rocznik Statystyki Galicyi* (Statistical Annual for Galicia, 1886–1900) and then *Podręcznik Statystyki*

Galicyi (Statistical Handbook for Galicia, 1901–13), which contained in addition to demographic and economic data considerable information on Ukrainian organizations and institutions, and the journal *Wiadomości statystyczne o stosunkach krajowych* (Statistical Information on Crownland Relations, 25 vols, 1874–1918), *Rocznik Statystyki Przemysłu i Handlu Krajowego* (Statistical Annual of Crownland Industry and Trade, 1885–93), and a special statistical serial devoted to the city of Lviv. The Crownland Statistical Bureau for the Duchy of Bukovyna published 17 volumes of *Mitteilungen des statistischen Landesamtes der Herzogthums Bukowina* (1892–1913). Previously the Bukovyna Chamber of Commerce had published several volumes of statistical materials, in 1851–72. Statistical information on Transcarpathia was published by the Hungarian statistical administration in Budapest from 1874.

Some statistical studies in Western Ukraine were conducted by Ukrainian institutions and scholars. The Statistical Commission of the Shevchenko Scientific Society published three volumes of *Studii z polia suspil'nykh nauk i statystyky* (Studies in the Field of Social Sciences and Statistics, 1909–12), which included articles on statistical theory, on social relations in Russian-ruled Ukraine, and on the economy and society of Western Ukraine. Ukrainians who published statistical research included V. Navrotsky, I. Franko, M. Pavlyk, V. Okhrymovych, S. Dnistriansky, M. Korduba, and S. Rudnytsky. Polish scholars who made contributions to the statistical study of Galicia included J. Buzek, J. Kleczyński, and T. Pilat. S. Tomashivsky and V. Hnatiuk studied Ukrainian society in Transcarpathia. In 1914–20 several statistical surveys were published by the Union for the Liberation of Ukraine and other political and social organizations.

Centralized government statistical offices were established in Poland, Czechoslovakia, and Rumania in the 1920s. In the interwar period the Chief Statistical Office of Poland published much data relating to Galicia in its various serials and yearbooks, including *Statystyka Polski*, *Wiadomości Statystyczne*, and *Rocznik Statystyczny*. The Crownland Statistical Bureau for Galicia was abolished and replaced by several local statistical bureaus, which were not very active. The Shevchenko Scientific Society's Commission for the National Economy, Sociology, and Statistics issued two volumes of papers. The Ukrainian Scientific Institute in Warsaw published several statistical studies on Soviet Ukraine. Statistical works on Ukrainian demography and society were published by V. Kubijovyč, T. Olesiuk, and V. Sadovsky; K. Kobersky, Yu. Pavlykovsky, and I. Vytanovych studied economic statistics. From 1933 the Ukrainian Economic Bureau in Warsaw published four yearbooks under the editorship of Kubijovyč, L. Lukasevych, and Ye. Glovinsky. The Polish scholars A. Krysiński and M. Feliński also wrote on Ukrainian topics. At the Ukrainian Free University in Prague and the Ukrainian Technical and Husbandry Institute in Poděbrady, Czechoslovakia, statistics courses were offered by Shcherbyna and L. Shramchenko. In the early 1920s Shcherbyna wrote several textbooks on statistical methodology and history.

The history of statistics in Soviet Ukraine, as in the entire USSR, can be divided into several periods. In the 1920s, statistical research was widely decentralized and well developed. The major institution was the Central Statistical Administration of Ukraine (TsSUU), directed by M. Avdi-

ienko. It published several periodicals and collections of statistical information (see *Central Statistical Administration of the Council of Ministers of the Ukrainian SSR). Its statistical studies and analyses were highly sophisticated for the time, and much important material on Ukrainian demographic, social, economic, and cultural topics was compiled. For the first time the essentially Ukrainian regions were treated as a single unit for statistical purposes. The USSR Central Statistical Administration in Moscow also published data on Ukraine, as did some local institutions. The VUAN Demography Institute, directed by the prominent demographer Ptukha, published 14 volumes of demographic materials. The main contributors to statistical research in the 1920s were the economists-statisticians Vobly, V. Kosynsky, H. Kryvchenko, Y. Paskhaver, and I. Shymonovych; the demographers Ptukha, O. Korchak-Chepurkivsky, Yu. Masiutyn, P. Pustokhod, S. Tomilin, M. Tratsevsky, and A. Khomenko; and the mathematicians M. Kravchuk and Ye. Slutsky. Annual all-Ukrainian conferences of statisticians were held from 1922 and congresses from 1925.

The second major period in Soviet statistical history lasted from approx 1930 to the late 1950s. In 1930, in connection with the introduction of the five-year plans and general economic planning, the TsSUU and its all-Union counterpart were abolished, and their functions were assumed by the All-Union State Planning Committee (Gosplan). In 1931 a special body in Gosplan, the USSR Central Economic Survey Administration, with its republican branches was given responsibility for gathering statistics. In reality, however, that body was hardly active, and statistical research was discontinued. In two major purges (1930–1 and 1937–8) many of the leading statisticians and related scholars, including Avdiienko, were imprisoned and even killed. Almost no statistical data on Ukraine were published in that period. In the mid- to late-1930s only a few guides or collections, edited by O. Asatkin, were issued, by the Ukrainian branch of the Central Economic Survey Administration: *Narodne hospodarstvo URSR* (The Economy of the Ukrainian SSR, 1935), a review of the results of the First and Second Five-year plans; *URSR v chyslakh* (The Ukrainian SSR in Figures, 1936); the highly propagandistic *Sotsialistychna Ukraina* (Socialist Ukraine, 1937); and *Pratsia v URSR* (Work in the Ukrainian SSR, 1937). The quality of those works was poor. All of them contained little useful demographic information, because of attempts to hide the demographic costs of the 1932–3 famine and the terror. Typical for the period was the fact that the results of the 1937 census were completely suppressed, and only selected data from the 1939 census were released.

The revival of the All-Union Statistical Administration in 1941 did not lead to any practical changes. In 1948 it was separated from Gosplan and placed under the authority of the USSR Council of Ministers. The restored TsSUU was placed under the jurisdiction of the All-Union Statistical Administration, not under the Ukrainian government. Neither body published any detailed statistics. Some data were released occasionally in press articles or the speeches of Party leaders, but the information was not scientifically verified and was used mostly for propagandistic purposes.

A new period of statistical research in Ukraine began after J. Stalin's death. N. Khrushchev's decentralization of

economic planning and administration required reliable statistical data. The TsSUU was reorganized to make it more responsible to the Ukrainian government, and statistical information began to be published again in 1957. An annual statistical yearbook containing the latest data and comparisons with earlier years was introduced in 1959. The All-Union Statistical Administration also began to publish Ukrainian statistical data, including the results of the 1959 census.

In general, statistical research in the USSR had a very specific character. The entire system of gathering, checking, and analyzing data was designed to monitor the fulfillment of state economic plans, the development of the economy and culture, changes in the standard of living, the expansion of productive forces, the introduction of technology, and the level of material and labor reserves in the economy. The state had a monopoly on statistical research, which played an important role in economic planning and political-economic administration. In the USSR all institutions and organizations filed standardized statistical reports according to a regular and specified schedule. Data fabrication was a typical feature of Soviet statistics and was especially prevalent in the 1930s to 1950s. The linkage of statistics with political and economic control induced enterprises to overstate production, understate resources, and hide the true state of affairs in other ways. Inconsistent pricing policies and changes in record-keeping and computing methods made it difficult to compare data from different years. Growth indexes of real domestic earnings, retail trade and commerce, labor productivity, and, to a certain degree, overall industrial and agricultural output were often unreliable. Demographic statistics were also unreliable and sometimes falsified, especially data on nationality, which tended to understate the number of non-Russians. As a rule, statistics were used as propaganda to exaggerate positive developments and downplay negative ones. Soviet authorities did not gather information that did not seem to have a direct political or economic purpose, and they published only a small part of the collected data. In the 1920s, for example, some data on morality (including crime) were published, but this stopped in the 1930s. Most data were classified as a state secret and not released to the public or to foreign scholars.

Statute for the Armenians of Lviv. A legal code that defined and regulated Armenian self-government in Lviv, Lutske, Ternopil, Sniatyn, Stanyslaviv (now Ivano-Frankivske), and other cities with large Armenian communities in Polish-ruled Ukraine. Based on an earlier Armenian code, it was adopted by the Diet in 1519 and ratified by King Sigismund I. In the second half of the 16th century a section on procedural law compiled in Lviv was added to the code. The statute remained in force until 1780–1.

Statute of the Higher Administration of Ukraine (Statut vyshchoho upravlinnia Ukrainy). The working constitution of autonomous Ukraine, adopted by the Little Rada on 29 July 1917. It arose out of an agreement between the *Central Rada and the Russian *Provisional Government, reached on 16 July, and it was consistent with the Second Universal of the Central Rada. According to this constitution the highest governing body (executive) in Ukraine was the *General Secretariat of the Central Rada, which was formed by the Executive Committee (the Little Rada) of the Central Rada and approved by the Provisional Government. The secretariat, composed of 14 general secretaries (ministers), controlled all the government organs of Ukraine and determined which of them would have direct relations with the Provisional Government. A state secretary for Ukrainian affairs, appointed by the Provisional Government and approved by the Central Rada, was to represent Ukraine's interests within the Provisional Government.

The statute further specified that the General Secretariat was responsible for obtaining the approval of the Provisional Government for laws and budgets passed by the Central Rada. The secretariat's activities were controlled by the Central Rada and (between its sessions) the Little Rada, and a nonconfidence vote by the Central Rada had the power to dissolve the secretariat. All bills passed by the Central Rada or Little Rada were countersigned by the secretariat. Laws passed by the Provisional Government became valid in Ukraine after being published in Ukrainian in the official government bulletin, **Vistnyk Heneral'noho Sekretariatu Ukrainy*. All laws and administrative decrees were to be published in Russian, Hebrew, and Polish as well as Ukrainian.

Among those who prepared the Statute of the Higher Administration of Ukraine was O. Shulhyn. It was approved by the Little Rada and presented to the Provisional Government by a delegation of the secretariat consisting of V. Vynnychenko, Kh. Baranovsky, and M. Rafes (who represented the national minorities). The statute was reviewed by representatives of the Provisional Government (including N. Nekrasov) and rejected. Instead the Provisional Government issued the 'Provisional Instruction to the General Secretariat' on 17 August 1917.

Statute of Volodymyr Monomakh. See Volodymyr Monomakh's Statute.

Statutory deeds (*ustavni hramoty*). Legal documents that indicated the relationship between peasants and landowners in the Russian Empire after the abolition of serfdom in 1861. Statutory deeds set out the obligations of the peasants and designated the amount of land allotted for their own use. The deeds were written up by the landlords, and their provisions were enforced by locally elected judicial representatives. The provisions often proved

impossible to satisfy, and they were one of the main causes of the peasant rebellions throughout the empire during the 1860s, of which 660 took place in Ukraine.

Stauropigion (*stavropihiia*). Initially a Greek term referring to the placement of a cross by a bishop, symbolizing his approval of the construction of a church or monastery on the site. Later the term designated an autonomous Orthodox church body (church, monastery, brotherhood) that did not come under the jurisdiction of local hierarchs but was responsible directly to the patriarch (or the Holy Synod in the Russian Empire after 1721). The institution enjoyed special privileges, such as control over the local clergy and, in some cases, even over the local bishop.

In Ukraine stauropigion was conferred by the patriarchs of Constantinople (to 1686) and Moscow (to 1721) and then by the Holy Synod. It benefited many Orthodox *brotherhoods, which, during the religious struggles of the early 17th century, defended Orthodoxy and struggled against the corruption of local bishops and priests. The church hierarchy was generally opposed to the granting of stauropigion, and Archbishop M. Smotrytsky convinced the patriarch of Constantinople to issue a decree in 1626 canceling stauropigion status throughout Kiev metropoly. This decree, however, was later contradicted by new grants of stauropigion. In Ukraine institutions that were granted the right of stauropigion included the Kievan Cave Monastery and the Lviv Dormition Brotherhood (1586), the Kiev Epiphany Brotherhood and the Maniava Hermitage (1620), the Lutske Brotherhood of the Elevation of the Cross (1623), and the Mezhyhiria Transfiguration Monastery (1687). In the late 17th century stauropigion status lost its significance. The Lviv Dormition Brotherhood benefited from it longest, in that it remained Orthodox even after the conversion of the entire area to the Uniate church; the brotherhood finally accepted the union in 1709. It became the basis for the *Stauropigion Institute.

A. Zhukovsky

Stauropigion Institute (*Stavropihiiskyi instytut u Lvovi*). A cultural-educational institution in Lviv; it remained the only such institution in Galicia until the mid-1800s. It was founded in 1788 on the directive of Emperor Joseph II on the basis of the *Lviv Dormition Brotherhood. During the second half of the 19th century the institute was taken over by *Russophiles. It was under the control of Ukrainophile populists for a short time after 1915. In 1922 Polish control was established in Galicia, and the directorship of the institute was restored to the Russophiles, who were willing to support the Polish government.

The institute was well endowed, with parcels of land and buildings in Lviv. It had its own press, bindery, and bookstore. It was active in the fields of education, scholarship, and publishing. In 1788 the Stauropigion Institute reopened the *Lviv Dormition Brotherhood School and established a scholarship fund for elementary and secondary school students. In the early 19th century the institute published textbooks for elementary and secondary schools (including a spelling primer in 1807 and a Ukrainian grammar textbook) and for students of the *Studium Ruthenum.

The institute's museum and archives were a valuable resource for scholars. The museum was opened in 1889, through the efforts of A. *Petrushevych and I. *Shara-

nevych. Artifacts and documents dealing with the *Dormition Church in Lviv, the archives of the brotherhood, and monastic life in Galicia formed the basis of the museum's holdings. The most valuable of these were original manuscripts: the *Krystynopil Apostol* (see *Horodyshe Apostol [12th century]), the *Buchach (13th century) and Peremyshl (16th century) Gospels, the Nomocanon (15th century), P. Mohyla's *Knyha dushy, narytsaemaia zloto* (The Book of the Soul Named Gold), the *Lviv Chronicle, and **Perestoroha*. Other holdings of the museum included the archives of the Lviv Dormition Brotherhood; the original documents of Władysław Opolczyk (1375); grants, patents, and charters of Polish kings from the years 1522–1767; documents and letters of Moldavian princes concerning the Dormition Church in Lviv and the Lviv Dormition Brotherhood School and press from the years 1558–1694; charters of the patriarchs of Constantinople from the years 1586–1670; old printed books (of special note were church books from the 15th–17th centuries, and the grammar **Adelphotes*, published in 1591); and objects of religious art. The museum's holdings were described by I. Sviientsitsky (1908) and I. Sharanevych (*Ruskie Muzeum Instytutu Stavropigijskiego we Lwowie*, 1937).

The institute gained control of the Lviv newspaper **Zoria halytska* in 1850 and continued to publish it until 1854, when it was once again taken over by Ukrainophiles. It published the valuable Ukrainian historical source *Vremennik Stavropigiskogo instituta ...* (1864–1915, 1923–39) and the *Zbirnyk Lvivskoi Stavropihii* (1921). In the 19th century, publications of the Stauropigion Institute were written in **yazychiie*; in the 20th century, in Russian.

The institute was administered by a council headed by a senior. I. Bachynsky (1801–16), I. Khomytsky (1861–6), V. Kovalsky (1871–84), and I. Sharanevych (1885–1901) were among those who headed the institute. The total membership of the Lviv Dormition Brotherhood and the Stauropigion Institute for the entire period of its existence was 726.

The institute did not survive the Soviet occupation of 1939–41. In 1940 the holdings of the institute's museum were transferred to the *Lviv Historical Museum, and its archives were taken over by the Central State Historical Archives of the Ukrainian SSR in Lviv.

Stavka. See *Ukrains'ka stavka*.

Stavnychy, Ivan [Stavnyčyj] (pen name: Ivan Radyslavych), b 6 July 1891 in Tovste, Zalishchyky county,

Ivan Stavnychy

Galicia, d 2 October 1973 in Cleveland. Cultural and educational figure. In addition to translating G. Gama's textbook on folklore (1909), V. Hugo's *Quatrevingt-treize* (1913), and K. Hamsun's *Unter hoststjoernen* (1937) he worked as an editor and journalist. In 1909 he edited the weekly *Stanislavivs'ki visty*. During the period of Ukrainian independence he edited the semiweekly *Stanyslavivs'kyi holos* and the monthly *Prolom*. In the 1930s he edited *Fakhovyi vistnyk* (1933) and *Stanyslavivs'ki visti* (1937) and set up the Universalna Biblioteka publishers. Under the German occupation he was director of the Shevchenko Library in Stanyslaviv. Having fled to Germany in 1944, in 1950 he emigrated to the United States, where he was active in the Shevchenko Scientific Society and the Ridna Shkola society.

Roman Stavnychy

Stavnychy, Roman [Stavnyčyj], b May 1889 in Kuropatnyky, Berezhany county, Galicia, d 14 September 1959 in Buffalo. Choir conductor, teacher, and lawyer. He studied at Lviv University and at the Lysenko Higher Institute of Music, then became an Austrian army (then Ukrainian Galician Army) judge. In the 1920s he conducted the Boian choir in Kolomyia and taught at the local branch of the Lysenko Higher Institute of Music and in other schools. In 1944 he emigrated to Berchtesgaden, Germany, where he taught music theory and conducted the Boian choir (which was noted in Bavaria for its renditions of the religious music of D. Bortniansky and others). In 1949 he settled in Buffalo, where he continued to conduct and teach at the Ukrainian Music Institute of America.

Stavnytsky, Semen [Stavnyč'kyj], b ?, d 1697 in Lviv. Printer and writer. He directed the Lviv Dormition Brotherhood Press (1662–8, 1677–97) and Univ Press (1670–3, 1680), where he set and edited books and wrote introductions to them. He is also the author of a versified panegyric to Prince Volodymyr the Great, which is an adaptation of a poem by H. Smotrytsky from the Ostrih Bible. After Semen died his son Vasyl became director of the brotherhood press.

Stavnytsky, Vasyl [Stavnyč'kyj, Vasyl'], b ?, d 1730 in Lviv. Printer; son of S. Stavnytsky. He directed the press founded by Bishop Y. Shumliansky at St George's Cathedral in Lviv (1687–8). He then worked with his father at the Lviv Dormition Brotherhood Press and succeeded him as director in 1697.

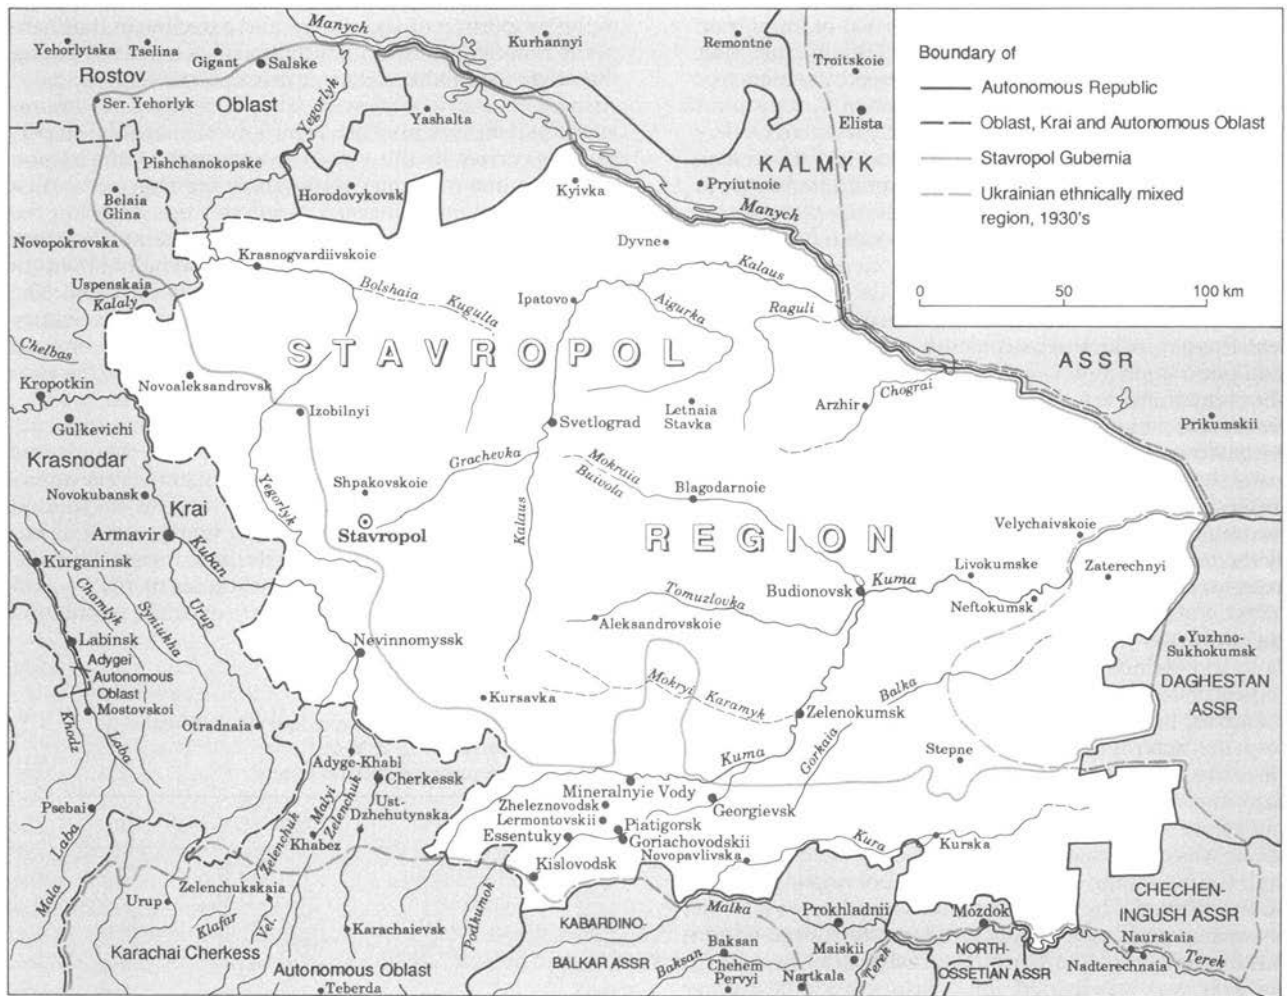

Stavropol. VIII-23. A city (1989 pop 318,000) in the Stavropol Upland and the capital of Stavropol krai, RF. A fortress was built at the site in 1777 to defend the Russian Empire's southern borders. In 1822 it became the capital of Caucasia gubernia, and in 1847, of Stavropol gubernia. The main postal route linking Europe with Caucasia ran through Stavropol. According to the census of 1926, Ukrainians accounted for 10 percent of the city's population. The city was known as Voroshilovsk in 1935–43. Since then it has been the administrative, cultural, and economic center of Stavropol krai. The city is an industrial and transportation center. It has a large machine-building and chemical industry, a meat packing plant, a winery, a dairy, and leather and furniture factories. There are four higher educational institutions in Stavropol.

Stavropol krai. An administrative district in the RF that encompasses the central portion of the northern Caucasus region. The krai has an area of 80,600 sq km. It incorporates the historical *Stavropol region as well as the Karachai-Cherkess Autonomous Republic. Its population (1990) is 2,889,000, of whom 54 percent are urban dwellers. It has 34 raions, 22 cities and towns, 17 town smts, and almost 300 villages. Census figures show that Ukrainians formed approx 35 per cent of the Stavropol krai population in 1926 but only 2.3 per cent in 1979. A high degree of linguistic assimilation is indicated in the 1989 census, which shows that only 48.3 percent of the Ukrainians in the region claimed Ukrainian as their mother tongue.

Stavropol region. A historical-geographic region located in the central part of Subcaucasia, between the Kuban River (and region) to the west, the *Terek region to the southeast, the Don region to the north, the Kalmyk AR to the northeast, and the lands of the Caucasian mountain peoples to the south and southwest. The Stavropol region essentially corresponds in territory to the former Stavropol gubernia (within its 1861–1920 boundary, 59,500 sq km) and the present Stavropol krai, less the Karachai-Cherkess Autonomous Oblast (66,500 sq km). Until the 1930s the Stavropol region was settled by both Ukrainians and Russians, and constituted a part of contiguous, albeit mixed, Ukrainian ethnographic territory.

Physical geography. The major portion of the Stavropol region is occupied by the Stavropol Upland; the minor portion has parts of the Caspian Lowland in the east, the Kuma-Manych Depression in the north, and the foothills of the Caucasus Mountains in the southwest. The climate of the Stavropol region is transitional, from temperate continental in the west to drier and more continental in the east. The rivers in the region belong to the Sea of Azov and the Caspian Sea drainage basins. The larger ones include the Yegorlyk (which flows into the Manych), the Kalas, the Kuma, and the Kuban and its upper tributaries, the Velykyi Zelenchuk and the Malyi Zelenchuk. River water is used for irrigation. Small, mostly saline lakes abound; the largest is the narrow but 160-km-long Lake Manych-Gudilo (Ukrainian: Manych-Hudylo).

The soils in the western and central part of the Stavropol region are various chernozems and chestnut soils; to the east and northeast they become light chestnut. The natural vegetation also changes eastward with declining humidity, from meadow fescue–feather grass steppe to dry fescue–feather grass steppe and then semidesert

vegetation of wormwood, dry fescue, and feather grass. In the more humid part of the Stavropol Upland and in the Caucasus foothills the natural vegetation is forest-steppe with oak-hornbeam-beech forests. Today both the steppe and the forest-steppe are almost completely cleared for agriculture.

History. In the mid-16th century the Caucasus and the Stavropol region began to come into contact with Muscovite colonization. In the 16th and 17th centuries Subcaucasia experienced the beginnings of Cossack colonization (the Don Cossacks in the west and the Terek Cossacks in the east). Nevertheless the centrally located Stavropol region remained sparsely inhabited by the nomadic Nogay Tatars (a Turkic-speaking people) and Kalmyk people (a Mongol-speaking group), who together numbered about 80,000. Caucasian mountain peoples, the Karachai and the Cherkess, lived in the foothills of the region.

At the beginning of the 18th century the Stavropol region nominally became part of the Russian Empire. Permanent settlements, however, were not established until the last quarter of the century, when, in 1777–80, the Russian government built a line of forts, the Mozdok-Azov line, with headquarters at Stavropol, to contain the Caucasian mountain peoples. By 1785 the Stavropol region formed part of Caucasus oblast, which was redesignated a gubernia in 1802. Following several name changes it was

designated as Stavropol gubernia in 1847. Its boundaries were finally fixed in 1861, when it was separated from Terek oblast. In contrast to Kuban oblast and Terek oblast, Stavropol gubernia (since 1898) was not part of Caucasus krai.

The Russian government promoted the rapid colonization of the Stavropol region in order to establish a base for military campaigns in the Caucasus. Part of that aim was achieved by the granting of choice tracts of land to Russian noblemen, who settled them with their serfs. A more significant factor in colonization, however, was the spontaneous settlement by state peasants who were unimpeded by the central authorities. In fact the imperial government legalized extant claims with the ukase of 1804 and provided support to those who had settled in the Stavropol region. By the end of the 1850s the population of Stavropol gubernia had increased to 340,000 (5.5 persons per sq km). Its only city, Stavropol, grew from about 3,000 residents in 1800 to 17,600 residents in 1853. The most densely settled areas were the steppes between the Yegorlyk and the Kalaus rivers and the Kalaus River valley. The population of Stavropol gubernia (together with Terek oblast) in 1853 consisted of 48.7 percent Cossacks, 32 percent state peasants, 16.2 percent nomadic herders, and 3.1 percent serfs and others.

The region's population continued to grow after the ab-

olition of serfdom in 1862 with the arrival of immigrants from Ukraine, particularly Left-Bank Ukraine and Katerynoslav gubernia. They were soon joined by settlers from the mixed Russian-Ukrainian gubernias of Voronezh and Kursk and then from the predominantly Russian Orel gubernia. By the beginning of the 20th century Ukrainians constituted 49.5 percent of all the immigrants to the Stavropol region, and Russians made up 36.6 percent. Stavropol gubernia's population had grown from 340,000 in 1867 to 873,000 by 1897 and to 1,150,000 by 1914. According to the 1897 census 9 percent of the population was urban. The ethnic composition was recorded as 55.3 percent Russian; Ukrainians constituted 36.6 percent of the total population and 39.9 percent of the rural population. The remaining 8.1 percent were mostly the pastoral Nogay, Kalmyk, and other Turkic peoples, who had been relegated to the dry eastern and northeastern steppes.

As the population grew, the area under the plow increased even faster, with the three-field system of cropping becoming a norm. The export of foodstuffs was facilitated by the construction of the railroads, notably the main line from Moscow through Rostov and Vladikavkaz to Baku (1875), a branch line from Kavkazskaia (renamed Kropotkin in 1921) to Stavropol (1897), and another from Pelagiada to Vinodelnoe (1916). Industry was poorly developed, and consisted almost exclusively of food processing.

During the civil war that followed the Revolution of 1917 the Stavropol region remained politically passive. Nevertheless, from the end of 1917 until the beginning of 1920, the region served as a battleground for Bolshevik and White forces. In January 1918 the Stavropol Soviet Republic was established as part of the RSFSR; from mid-1918 until the beginning of 1920 the Stavropol region was held by the Whites. The region finally was taken as a Soviet possession and became part of a large territorial-administrative region called North Caucasian krai. In 1924-30 the krai was subdivided into okrugs, and the former Stavropol gubernia became Stavropol okrug and parts of Terek, Armavir, and Salske okrugs. In 1937-43 the Stavropol region was the principal part of Ordzhonikidze krai, and in 1943 Stavropol krai was formed, to which the Karachai-Cherkess Autonomous Oblast was added as a subordinate part. After the Second World War the Stavropol region developed along much the same lines as other areas of the Soviet Union in general and the RSFSR in particular. A notable development was the rise to political prominence of one of the region's native sons, M. Gorbachev, who became the last leader of the USSR.

Population. After major population losses in 1917-20 and during the famine of 1922-3, the Stavropol region surpassed the prewar (1914) 1.15-million mark only in 1926 with a population of 1.2 million. The urban population, according to the 1926 census, remained at 8 percent; ethnic composition changed little, but there was a slight increase

in the proportion of Ukrainians and a decline in the share of the non-Slavic (other) population (see table 1). Among the other nationalities there were 21,000 Germans, 7,000 Armenians, and 3,000 Greeks. The distribution of Ukrainian settlement was uneven. Their lowest shares (5-10 percent) occurred in the southwestern part of the region along the line of former forts where the Don and Volga Cossacks and other Russian servitors were settled in the 18th century. Their largest presence, in the northeastern part, was established largely in the second half of the 19th century, when Ukrainian immigration was prevalent. The main basis for population growth in the early 20th century was natural increase, for immigration scarcely exceeded emigration. Among the immigrants, according to the 1926 census, the majority came from Ukrainian lands.

Demographic changes after 1926 in the Stavropol region indicated trends that were similar to though less pronounced than those in other Ukrainian regions: an average population growth until 1931 and in the period 1935-40 (reduced from high growth by the arrest of kulaks and by political purges), a decline during the man-made famine of 1932-3 and the hostilities of 1942-5, and revived growth after 1945. The share of urban population grew continuously (see table 2).

TABLE 2
Population changes in Stavropol krai (excluding the Karachai-Cherkess AO), 1926-90
(thousands; percentage in parentheses)

Year	Total	Urban	Rural
1926	1,500	226 (15.2)	1,274
1939	1,513	312 (20.6)	1,201
1959	1,605	522 (32.5)	1,083
1970	1,961	867 (44.1)	1,094
1979	2,171	1,105 (50.9)	1,066
1990	2,467	1,348 (54.6)	1,119

Recent population growth has continued to be driven primarily by natural increase. The net migration in 1968-9 (as the 1970 census revealed) was only 14,900, or 0.76 percent of the total population. The largest number of immigrants came from other parts of North Caucasia, followed by the Volga and the Ural regions (all ethnically mixed territories).

The villages of the Stavropol region are large and populous and are located in river valleys. The greatest concentration of cities is in the region of the Caucasian mineral waters, including (1987 populations) Piatigorsk (121,000), Kislovodsk (110,000), Essentuki (84,000), Mineralnye Vody (75,000), and Georgievsk (62,000). Other, more dispersed, cities include Stavropol (306,000), Nevinnomyssk (116,000), and Budënnovsk (formerly Prikumsk, 54,000).

TABLE 1
Ethnic composition of the population in the Stavropol region, 1897-1989
(thousands; percentage in parentheses)

Nationality	1897	1926	1970	1989
Russians	482 (55.2)	700 (56.9)	1,760 (90.0)	2,024 (84.0)
Ukrainians	320 (36.7)	460 (37.4)	49 (2.5)	69 (2.9)
Others	71 (8.1)	70 (5.7)	152 (7.5)	317 (13.1)
Total	873 (100.0)	1,230 (100.0)	1,961 (100.0)	2,410 (100.0)

The current ethnic composition of the Stavropol region cannot be determined with certainty. Post-Second World War Soviet censuses claim that the Ukrainians have virtually disappeared. Statistics were manipulated to convey the impression that the contiguous Ukrainian ethnic territory did not extend beyond the borders of the Ukrainian SSR. According to the 1989 census, of the 69,200 Ukrainians in Stavropol krai, 33,400 (48.3 percent) reported Ukrainian as their mother tongue, 9,500 (13.7 percent) indicated their ability to speak it, and the remaining 26,200 (37.9 percent) did not know it.

Economy. Until the 1930s Stavropol was an agrarian region notable particularly for wheat and wool; now it has a mixed agricultural-industrial profile. Since 1914, industrial output has increased twentyfold; from 1940 to 1974 it increased twelvefold.

In the early 1950s about one-half of the land was cultivated, but during that decade more virgin steppe was broken. By 1974 plowland accounted for 63 percent of the total land area. Other land uses included pastures (22 percent), hayfields (3 percent), forests and scrublands (2 percent), orchards and vineyards (2 percent), and non-agricultural uses (10 percent). In most areas plowland accounted for 60–80 percent of total land uses. The mean annual harvest of all grains during the 1970–4 five-year period was 4.3 million t, of which 3 million t was wheat. Sunflower, occupying 70 percent of the sown area of all industrial crops, averaged an annual harvest of 206,000 t in the 1970–4 period. Orchards occupied 61,400 ha, mainly in the region's western and southwestern part; vineyards covered 17,500 ha, mostly in the Kuma valley.

The livestock sector provided 58 percent of agricultural production in 1974. The animals (in Stavropol krai outside the Karachai-Cherkess Autonomous Oblast) included 1.1 million cattle (40 percent of all standard animal units), 5.8 million sheep and goats (48 percent), 0.9 million pigs (6 percent), and nearly 10 million fowl (6 percent). Sheep raising was very important; it accounted for 11 percent of all the fine-fleeced merinos in the USSR.

Irrigation has gained great importance in Stavropol agriculture. The area irrigated increased from 44,000 ha in 1950 to 65,000 ha in 1960, 167,000 ha in 1970, and 234,000 ha in 1975. There were 1.5 million ha of water-supplied pastures.

Of the industries, food processing is the most important branch (contributing 29.3 percent of the industrial output in 1974); it is followed by light industry (21.8 percent). Since the 1950s the development of machine building and metalworking (17 percent) and the chemical branch (13.4 percent) as well as the fuel- and power-generating industries (about 3 percent in 1974) has diversified the industrial profile. In 1974 Stavropol krai produced 9,385 million kWh of electricity (compared to 58 million kWh in 1940), mostly at thermolectric power stations at Nevinnomyssk and Stavropol as well as small hydroelectric power stations elsewhere.

Gas and oil extracting began in the region during the 1950s. By 1974 gas production had reached 13 billion cu m, or 5 percent of the USSR output (mostly in the northern part of Stavropol krai), and crude oil production had attained 7 million t, or 1.5 percent of the USSR output (in the east, along the Kuma river). At first the Stavropol gas was piped through Rostov-na-Donu to Ukraine, Moscow, and even Leningrad. Now, with its declining reserves, it has been overshadowed by gas from Orenburg and Western

Siberia. Crude oil is transported by pipe from Zatrechnyi to refineries at Grozny.

The food-processing industry is spread throughout the region, with major branches consisting of meat processing (Stavropol, Piatigorsk, Kislovodsk, and other cities), milling (Stavropol, Nevinnomyssk, Georgievsk, and elsewhere), canning (Georgievsk, Essentuky, Izobilnyi), oils (Nevinnomyssk and Georgievsk), and wine making.

Light industry is represented by the textile factory in Nevinnomyssk and garment making in Stavropol, Kislovodsk, Piatigorsk, and Essentuky. Reinforced-concrete products are made in Stavropol, Piatigorsk, and Mineralnye Vody, and wall construction materials and sound-proofing in Stavropol. Woodworking and furniture making are of small, local significance. Resorts based on the Caucasian mineral waters at Kislovodsk, Piatigorsk, Essentuky, Zheleznovodsk, and Mineralnye Vody had USSR-wide significance.

The Stavropol region is not generously supplied with railway lines (846 km, just short of 1 km/100 sq km). A major electrified trunk line from Rostov-na-Donu traverses the southwestern part of the region toward Baku. It links the Stavropol region with the Kuban and Ukraine to the west and northwest.

Stavropol Upland. A geographical formation in the central part of Subcaucasia between the Kuban Lowland in the west, the Caspian Lowland in the east, the Kuma-Manych Depression in the north, and the Caucasus Mountains in the south. The upland has prevailing elevations of 300–600 m and a maximum elevation of 831 m (Mt Stryzhament). It is composed largely of limestones, clays, and sandstones and is dissected by numerous river valleys into table mountains. The lower steppe regions in the area are under cultivation; forest-steppe and broad-leaved forest can be found in the upland's higher elevations. Water for the area is supplied by the Kuban-Yegorlyk system as well as the Great Stavropol Canal.

Stavrovetsky-Tranquillon, Kyrlo [Stavrovec'kyj-Trankvylijon], b ? , d 1646 in Chernihiv. Churchman, educator, poet, scholar, and printer. He taught at the Lviv Dormition Brotherhood School in the late 1580s and moved to Ostrih and Vilnius in 1592. At the beginning of the 17th century he returned to Lviv, where he resumed his activities with the brotherhood and defended it before Patriarch Jeremiah II of Constantinople. He served briefly as hegumen of the Univ Monastery (1618) and then at the Lubartów Monastery near Lublin (1618–9) before becoming a preacher in Zamość (1621–5). Stavrovetsky established his first printing press in 1618, to publish his *Zertsalo bohoslavia* (Mirror of Theology), an exposition of the theological doctrine concerning God, and his *didactic gospels (1619), which contained a collection of his sermons. Both of those works were republished several times (in Univ, Pochaiv, and Mohyliv) and circulated widely

throughout Ukraine and Muscovy; his edition of the didactic gospels, however, was condemned in the early 1620s by a congress of Ukrainian Orthodox bishops headed by Metropolitan Y. Boretsky, and in 1627 Moscow church authorities ordered that it be burned. In 1626 Stavrovetsky joined the Uniate church and was appointed archimandrite of the Yeletskyi Dormition Monastery in Chernihiv. Just prior to his death there, he printed another collection of sermons and moralistic poems, *Perlo mno-hotsinnoie* (The Priceless Pearl, 1646).

Stavrovsky, Yulii [Stavrovs'kyj, Julij] (pseud: Popradov), b 18 January 1850 in Sulyn, Szepes county, d 27 March 1899 in Chertizhne, Ung county, Prešov region. Russophile writer and cleric. In 1875, while studying at the Budapest Theological Seminary, he was ordained a Greek Catholic priest. He worked at the episcopal chancellery in Prešov and served as a pastor in Yarabina and, from 1879, Chertizhne. He published, in Russian, many lyrical and patriotic poems, and articles on ethnography, language, history, and civic affairs in the periodicals *Svit*, *Novyi svit*, *Karpat*, and *Listok*. He also contributed to Hungarian periodicals and prepared a primer. An edition of Stavrovsky's poems, written under his pseudonym, appeared in 1928.

Stavyshche [Stavyšče]. IV-11. A town smt (1986 pop 7,500) on the Hnylyi Tikych River and a raion center in Kiev oblast. It was first mentioned in historical documents in 1622, when it was under Polish rule. In 1635 it was granted the rights of *Magdeburg law. The town joined the Khmelnytsky uprising and became a company center of Bila Tserkva regiment. In 1655 B. Khmelnytsky engaged the Tatars in battle at Stavyshche. A decade later the town was the center of the Varenytsia Uprising. Its inhabitants did not accept the town's return to Polish rule (1667) and rebelled repeatedly in the course of the next century (1702-4, 1730s, 1750s). With the partition of Poland in 1793, Stavyshche was annexed by Russia, and became part of Tarashcha county in Kiev gubernia. In the 19th century it acquired a distillery, flour mill, and brick factory. By 1900 its population had reached 8,500. Today the town has an electric-instruments plant, a construction company, and a food industry.

Stavysky, Iziaslav [Stavys'kyj, Izjaslav], b 23 May 1927 in Zinovivske (now Kirovohrad). Film director. He completed study at the Kiev Pedagogical Institute (1953) and the State Institute of Cinema in Moscow (1959) and has worked in the Kiev Studio of Popular Science Films. Among his films are *Dumy pro khlib* (Thoughts about Bread, 1972) and *Piznavaty abetku roslyn* (Identifying the Alphabet of Plants, 1981).

Steam-locomotive building. See Locomotive industry.

Steamship transportation. See River transportation and Sea transportation.

Stebelsky, Bohdan [Stebel's'kyj] (pseud: Vasyl Tkachenko, Ostap Khmurovych), b 15 March 1911 in Tomashivtsi, Kalush county, Galicia. Artist and community leader; full member of the Shevchenko Scientific Society

Bohdan Stebelsky (plaster portrait by Mykhailo Chereschnovsky, 1975)

(NTSh). Stebelsky studied at the Cracow Academy of Arts (1934-9), the Ukrainian Free University in Munich (PH D, 1959), and the University of Ottawa (MA, 1964). Prior to the Second World War he was director of the commercial art school in Yavoriv. After emigrating to Canada in 1949, he edited the literary-art page of the newspaper *Homin Ukrainy* (Toronto). He has had art exhibitions in Germany, the United States, and Canada, has headed the Ukrainian Canadian Artists' Association (1958-72), the Association of Ukrainian Cultural Workers (ADUK), and the Canadian section of the NTSh (since 1974), and has served on the national executive of the *Canadian League for Ukraine's Liberation (LVU). His works include *Pro iliustratsiiu dytichoi knyzhky* (About the Illustration of Children's Books, 1966) and essays and articles on literary and art themes.

Stebelsky, Hnat [Stebel's'kyj, Hnat], b 1748? in Volhynia, d 1805. Basilian monk and church historian. He was the author of the life of ss Evfrosiniia and Paraskeviia and of a history of the Basilian monastery in Polatsk in which they lived, *Chronologia* (Chronology). These works provide much valuable information concerning the history of the Uniate church in Ukraine and Belarus. In addition Stebelsky prepared a third work, *Przydatek do Chronologii* (An Addendum to the Chronology), which contains a wealth of information about Catholic and Orthodox church hierarchs and notable Basilians. The first two manuscripts were not published until the 1870s; the addendum was published in 1781-3 and republished in 1866-7. An expanded and edited version of the *Chronologia* (to which the author continually added information) was published in 1878 as *Ostatnie prace Stebelskiego* (Stebelsky's Final Works).

Stebelsky, Ihor [Stebel's'kyj], b 6 September 1939 in Cracow, Poland. Geographer; member of the Shevchenko Scientific Society; son of B. *Stebelsky. Since graduating from the universities of Toronto and Washington (PH D, 1967), he has taught at the University of Windsor (head of the geography department since 1982). He is a coauthor of *Eurasia: Its Lands and Peoples* (1981) and the author of book chapters, articles, and encyclopedia entries on the economic, human, and physical geography of Ukraine and

Ihor Stebelsky

Oleksander Steblianko

the USSR. Since 1985 he has been the geography subject editor of the *Encyclopedia of Ukraine*.

Stebelsky, Petro [Stebel's'kyj], b 15 July 1857 in Nemyriv, Rava Ruska county, Galicia, d 24 September 1923 in Lviv. Jurist and legal historian; brother of V. Stebelsky. A graduate of Lviv University, from 1892 he lectured there on Austrian criminal and procedural law. His lectures and some of his publications were in Ukrainian. He supervised the translation of Austrian criminal law into Ukrainian and contributed to the development of Ukrainian legal terminology. Some of his articles appeared in *Chasopys' pravnycha*. O. Ohonovsky's work on the system of Austrian private law (1897) was edited and published by Stebelsky.

Stebelsky, Stepan [Stebel's'kyj] (nom de guerre: Khrin), b 18 October 1914 in Holyn, Kalush county, Galicia, d 9 November 1949 near Pohořelice, Czechoslovakia. UPA officer. A noncommissioned officer of the Polish army, in 1934 he joined the OUN, and in 1939 he was imprisoned for his activities by the Poles in Bereza Kartuzka. In September 1945 he organized a new combat unit, the Udarnyky 5 (95a) Company, in the Lemko region, and for two years he staged daring raids and other anti-Polish actions. On 28 March 1947 his company ambushed and killed the Polish deputy defense minister, Gen K. Świerczewski. Stebelsky received the Gold Cross of Combat Merit First Class for heroism and leadership in combat. From August 1947 to August 1949 he was commander of the Drohobych Tactical Sector (Makivka 24). After being put in charge of a special courier group in September 1949, he was killed en route to the west. He wrote *Zymoii u bunkri* (Winter in a Bunker, 1950), *Kriz' smikh zaliza* (Through the Laughter of Iron, 1952), and other, unpublished, memoirs.

Stebelsky, Volodymyr [Stebel's'kyj] (pseud: Volodko St, Ivan Iskra, Ruslan, Slavych, Bohdan iz Podolia), b 31 August 1848 in Mageriv, Zhovkva circle, Galicia, d 22 December 1891 in Warsaw. Writer and publicist. The son of a Ukrainian father and a Polish mother, he became a Ukrainophile populist while at the Sambir gymnasium (1863–5) and contributed publicistic articles and poems, in the style of T. Shevchenko, to *Meta* and *Nyva*. At Lviv Uni-

versity (1866–71), however, he was a leading Russophile. From 1870 to 1875 he contributed articles, poems (eg, the Byronic 'Morton'), and prose to *Boian*, *Slovo*, *Druh*, and *Strakhopud*. Published separately were the story *Monakh* (The Monk, 1870) and the more successful autobiographical poem *Molytva* (A Prayer, 1873). In the mid-1870s he abandoned the Russophile camp and thenceforth wrote mostly in Polish. His articles and humorous and satirical poems appeared in Polish periodicals in Lviv, St Petersburg, and Warsaw. In 1882 and 1883 he wrote a few Polonophile poems and stories in Ukrainian under the pseudonym Bohdan iz Podolia. From 1887 on he lived in Warsaw. After years of dissipation this 'first decadent in Galicia' committed suicide.

Steblianko, Oleksander [Steblianko], b 24 May 1896 in Lebedyn, Sumy oblast, d 8 October 1977 in Kharkiv. Composer, pedagogue, and folklorist. A graduate in composition from the Kharkiv Institute of Music and Drama (1926) in the class of S. Bohatyrov, he taught at labor schools and the music tekhnikum (1920–30) before becoming the curator of the ethnomusical department at the Kharkiv Conservatory (1936). In 1947 he was a member of the committee that composed the Soviet Ukrainian national anthem. His works include chamber pieces, incidental music, choruses, romances, and arrangements of folk songs. He collected over 2,000 Ukrainian folk songs, wrote *Ladova struktura i khromatyzm ukrains'koi narodnoi pisni* (Modal Structure and Chromaticism of the Ukrainian Folk Song, 1946) and *Vykonannia narodnykh pisen' i ansambli narodnykh khoriv* (The Performance of Folk Songs and Ensembles of Folk Choruses, 1952), and edited *Ukrains'ki narodni pisni* (Ukrainian Folk Songs, 1965).

Stebliin-Kamensky, Rostislav [Kamenskij], b 16 July 1857 in Orel, Russia, d 29 July or 8 August 1894 in Irkutsk, Siberia. Russian revolutionary populist. In 1874 he was one of the organizers of Uniiia, a clandestine populist circle in Poltava, to which Ukrainian figures such as D. Lyzohub, P. Myrny, and D. Pylchikov belonged. Uniiia was uncovered in 1875, and most of its 70 members were imprisoned and exiled to Siberia. From 1877 Stebliin studied at the Kharkiv Veterinary Institute while doing revolutionary work in Kharkiv and among the peasants of Zolotonosha county, Poltava gubernia. He was arrested in Kiev in February 1879 and sentenced to 10 years of hard labor in Siberia, where he committed suicide.

Stebliin-Kaminsky, Stepan [Stebliin-Kamins'kyj], b 8 May 1814 in Poltava, d 29 December 1885 in Poltava. Writer and gymnasium teacher in Poltava and Zolotonosha. He published the first biography of I. Kotliarevsky (*Severnaia pchela*, 1839, no. 146) and memoirs (Poltava 1869; 3rd edn 1883) and articles about Kotliarevsky in *Poltavskii gubernskiiia vedomosti*. He also wrote historical and ethnographic articles and religious poetry.

Stebliiv. IV-12. A town smt (1986 pop 5,000) on the Ros River in Korsun-Shevchenkivskiy raion, Cherkasy oblast. In 1036 Yaroslav the Wise built a fortress at the site. Two centuries later it was destroyed by the Mongols. In the 16th century the town came under Polish rule and received the rights of Magdeburg law. In 1648 it took part in B. Khmelnytsky's uprising and became a company center

in Korsun regiment. In 1664 it was destroyed by the Poles, and in 1667 transferred to them. At the partition of Poland in 1793, it was annexed by Russia, and became part of Kiev gubernia. In 1960 it was given smt status. Today Stebliv has a cotton and paper factory and a hydroelectric station. It is the birthplace of I. *Nechui-Levytsky and has a museum dedicated to him.

Stebnyk. IV-4. A city (1989 pop 21,400) under the jurisdiction of the Drohobych city council in Lviv oblast. It was first mentioned, as Izdebynyk, in a historical document in 1440, when it was granted the rights of *Magdeburg law. Since 1521 it has been known as Stebnyk. After the partition of Poland in 1772, it was annexed by Austria. In the interwar period (1919–39) the city was under Polish rule. Standing on one of the largest reserves of potassium salts in Ukraine, Stebnyk is known for its chemical industry. On 15 September 1983 one of the greatest chemical disasters in the USSR occurred at Stebnyk: the dam of the waste reservoir of the Potassium Fertilizer Manufacturing Complex collapsed, polluting large tracts of land and the Dniester, the Tysmenytsia, and the Bystrytsia rivers with brine.

A potassium salts refinery in Stebnyk in the early 20th century

Stebnyk potassium salts deposit. One of the largest potassium salts deposits in Ukraine, located near Stebnyk, Lviv oblast, in the *Drohobych-Boryslav Industrial Region. The deposit covers a territory of 30 sq km and has estimated recoverable reserves of 230 million t (1982). The salts lie in seams at depths of 90–1,000 m. The deposit was discovered in 1854, and began to be mined in 1922. The salts are processed for use in the soda industry and the making of *mineral fertilizers at the Stebnyk Potassium Complex, which has an annual capacity of 500,000 t of potassium-magnesium concentrate. In 1983 an accidental spill of the plant's chemical wastes caused extensive environmental damage.

Stebnytsky, Petro [Stebnyc'kyj] (pseuds: P. Smutok, A. Irpensky, Malorossiiianin, Maloross, P. Khmara, P.S., S-ii), b 25 November 1862 in Horenychy, Kiev county, Kiev gubernia, d 14 March 1923 in Kiev. Community and political activist, writer, journalist, editor, and publicist. He graduated with a degree in mathematics and physics from Kiev University in 1886 and then moved to St Petersburg to work in various government positions, mainly with the finance ministry (1889–1904) and the Trade and Telegraph

Petro Stebnytsky

Agency (1904–17). He also wrote articles on economics for *Vestnik finansov*, *Torgovo-promyshlennaia gazeta*, and *Russkoe ekonomicheskoe obozrenie*. Even though he had previously been largely indifferent to Ukrainian affairs, Stebnytsky emerged as one of the leading figures of the Ukrainian community in St Petersburg. He helped organize the Society of Ukrainian Progressives and served as secretary and head of the *Philanthropic Society for Publishing Generally Useful and Inexpensive Books. He assisted with the publication of the periodicals *Ukrainskii vestnik* (1907) and *Ridna sprava-Dums'ki visti*, the first full *Kobzar (1907), the Ukrainian encyclopedia *Ukrainskii narod v ego proshlom i nastoiashchem* (The Ukrainian People: Its Past and Present, 2 vols, 1914, 1916), the monographs *Ukrainskii vopros* (The Ukrainian Question, 1914) and *Galichina, Bukovina i Ugorskaia Rus'* (Galicia, Bukovyna, and Hungarian Rus', 1915), and (at his own expense) two volumes of O. Oles's poetry. In 1906 he began contributing to *Kievskaiia starina*, *Hromads'ka dumka*, *Rada*, *Literaturno-naukovyj vistnyk*, *Ukrainskaia zhizn'*, and other periodicals.

After the February Revolution of 1917 he became head of the *Ukrainian National Council in Petrograd, a member of the Central Committee of the Ukrainian Party of Socialists-Federalists, and state secretary for Ukrainian affairs in the Russian Provisional Government from July to November 1917. In the spring of 1918 he moved to Kiev, where he joined a political commission in the Hetman government and later served as deputy leader of the Ukrainian delegation during negotiations with Soviet Russia (August 1918), senator in the administrative division of the State Senate, and minister of education in the cabinet of F. Lyzohub (19 October to 14 November 1918) as a representative of the Ukrainian National Union. While in Kiev in 1918–20, he contributed to *Nova rada*, *Literaturno-naukovyj vistnyk*, *Knyhar*, and *Nashe mynule*. He also headed the revived Kiev Prosvita society, served as the chief editor of the Chas publishing house, and sat on the Committee of the National Library of Ukraine (whose Ukrainian section he headed). In 1919 he became director of a commission for the compilation of a biographical dictionary of prominent figures in Ukraine and a member of a commission for preparing a Ukrainian encyclopedic dictionary at the All-Ukrainian Academy of Sciences.

In addition to his articles on culture and politics, Stebnytsky published *Pid steliamy Dumy* (Under the Ceilings of the Duma, 1907), *Ukraina i ukraintsy* (Ukraine and Ukrainians, 1917), *Ukrains'ka sprava* (The Ukrainian Ques-

tion, 1917), *Pomizh dvokh revoliutsii* (Between the Two Revolutions, 1918), and *Borys Hrinchenko* (1920). A commemorative volume about him was published in Kiev in 1926.

A. Zhukovsky

Stebun, Illia (pseud of I. Katsnelson), b 21 January 1911 in Horodnia, Chernihiv gubernia. Literary scholar, critic, and pedagogue. He graduated from the Chernihiv Institute of People's Education in 1930. From 1938 to 1941 he was managing editor of *Literaturna krytyka* and *Radians'ka literatura*. Until the Second World War he was considered one of the leading critics in Soviet Ukraine. In the initial stages of J. Stalin's anti-Jewish campaign against 'rootless cosmopolitans,' he was banished from Kiev. From 1959 to 1965 he worked at the Zaporizhia and Zhytomyr pedagogical institutes, and in 1966 he became a professor at Donetsk University. He wrote, among other works, studies of I. Kotliarevsky, M. Shashkevych, T. Shevchenko, M. Kotsiubynsky, I. Franko, and Lesia Ukrainka. Some of his more notable works are *Mykhailo Kotsiubyns'kyi* (1938), *Pytannia realizmu v estetytsi I. Franka* (The Question of Realism in the Esthetics of I. Franko, 1958), *Mystetstvo, humanizm, suchasnist'* (Art, Humanism, Contemporaneity, 1965), *Dzherela khudozhn'oi istyny* (Sources of Artistic Truth, 1970), and *Shevchenko pro mystetstvo* (Shevchenko on Art, 1971, 1984).

Julian Stechishin

Michael Stechishin

Stechishin, Julian [Stečyšyn, Julijan], b 30 June 1895 in Hleshchava, Terebovlia county, Galicia, d 24 February 1971 in Saskatoon. Community leader; brother of Michael and Myroslav *Stechishin and husband of S. *Stechishin. Stechishin emigrated to Canada in 1910 and graduated from the Ruthenian Training School in Brandon, Manitoba, in 1915 and the University of Saskatchewan (BA, 1926). While rector of the *Mohyla Ukrainian Institute in Saskatoon (1921-9, 1931-3) he earned a law degree from the same university (1931). Stechishin was prominent in the formation of the *Ukrainian Self-Reliance League (SUS) and served as its head (1940-2, 1952-8). He was also a member of the consistory of the Ukrainian Greek Orthodox Church of Canada (1951-74). He edited *Iuveleina knyha ukrains'koho instytutu im. P. Mohyly v Saskatuni, 1916-1941* (Twenty-Five Years of the P. Mohyla Institute in Saskatoon, 1916-41, 1945) and was the author of *Ukrainian Grammar* (1951) and *Istoriia poselennia ukraintsv u Kanadi*

(History of Ukrainian Settlement in Canada, 1975). His biography was published by Rev H. Udod in 1978 as *Julian W. Stechishin: His Life and Work*.

Stechishin, Michael [Stečyšyn, Myxajlo], b 1 March 1888 in Hleshchava, Terebovlia county, Galicia, d 16 February 1964 in Saskatoon. Judge and community leader; brother of Myroslav and J. *Stechishin. He emigrated to Canada in 1905 and completed a teacher-training course (1910) and a law degree at the University of Saskatchewan (1920). In 1947 he was appointed a district court judge in Saskatchewan. Along with his brothers, Stechishin was prominent in the formation of the Mohyla Ukrainian Institute in Saskatoon, the Ukrainian Greek Orthodox Church of Canada, and the Ukrainian Self-Reliance League (SUS). He was coauthor of the Ruthenian-English primer used in the public schools of Manitoba in 1913-14 and the author of several children's books and books on religious themes.

Myroslav Stechishin

Savella Stechishin

Stechishin, Myroslav [Stečyšyn, Myroslav], b 24 July 1883 in Hleshchava, Terebovlia county, Galicia, d 18 November 1947 in Winnipeg. Editor and community leader; brother of Michael and J. *Stechishin. He emigrated to Canada in 1902 and then moved to Rev A. *Honcharenko's commune in California until 1905. Heavily influenced by Galician radicalism, he organized the Borotba society in Vancouver (1907) and became a leading figure (together with P. Krat) in the Ukrainian socialist movement in Canada. He served on the executive of the Socialist Party of Canada and was editor of *Robochyi narod* (Winnipeg, 1909-12) before breaking with the movement in 1912. He moved on to edit *Novyny* (Edmonton) and *Narodna volia* (Scranton, Pennsylvania) before serving as secretary to the diplomatic mission of the Ukrainian National Republic in Washington, DC, in 1920. In 1921 he became editor of **Ukrains'kyi holos* in Winnipeg. He used his position (to 1946) to develop and refine the ideology of the *Ukrainian Self-Reliance League (SUS), which he had helped to establish in 1927. Stechishin was also a longtime member of the consistory of the Ukrainian Greek Orthodox Church of Canada.

Stechishin, Savella [Stečyšyn, Savelja] (née Vavryniuk), b 19 August 1903 in Tudorkovychi, Sokal county, Galicia. Pedagogue and community leader; wife of J.

*Stechishin. After being educated at the normal school in Saskatoon (1924) and the University of Saskatchewan (1930), Stechishin became a school teacher and taught Ukrainian classes at the University of Saskatchewan and the *Mohyla Ukrainian Institute in Saskatoon. A driving force behind the establishment of a Ukrainian women's movement in Canada, she was a founding member and the first president (1926–36) of the *Ukrainian Women's Association of Canada (SUK). She was also instrumental in promoting the presentation of Ukrainian folk art traditions in Canada and in the establishment of the *Ukrainian Museum of Canada in 1936. For many years she edited the women's page of *Ukraïns'kyi holos*. She is the author of *Traditional Ukrainian Cookery* (1957; 11th edn 1980). She received the Order of Canada in 1989.

Stechynska, Eleonora [Stečyns'ka] (née Blomberg), b 18 August 1852 in Cluj, Rumania, d 13 November 1924 in Lviv. Stage actress; wife of A. Stechynsky and grandmother of S. and Ya. Stadnyk. She worked in the Ruska Besida Theater in Lviv (with interruptions, 1879–1913), in Y. Stadnyk's troupe (1913–14), and in Yu. Kasinenko's and I. Moroz's troupes in Ukraine and Moscow (1896–7).

Stechynsky, Andrii [Stečyns'kyj, Andrij] (real surname: Muzhyk), b 16 December 1849 in Khreniv, Kaminka-Strumyl'ova county, Galicia, d 5 April 1896 in Zolochiv, Galicia. Actor, stage director, and playwright. His theatrical career began in the Ruska Besida Theater (1867–96, with interruptions). Then he toured with O. Bachynsky's and A. Molensky's troupes in eastern Ukraine (1868–9) and worked in T. Romanovych's troupe (1881–3). In 1893 he became a director in the Ruska Besida Theater, and in 1894–5 he was its administrative director. He is the author of the dramas *Mishchanka* (The Bourgeoise) and *Psotnytsia* (The Mischief Maker) and wrote librettos to I. Vorobkevych's operettas *Sadahurs'kyi diak* (The Precentor from Sadhora), *Vesillia na obzhynkakh* (A Wedding at Harvest), and *Dovbush*, an adaptation of V. Lozynsky's story *Chorny Matvii* (Black Matthew). He also translated some vaudeville acts and N. Gogol's plays.

Col Mykola Stechyshyn

Stechyshyn, Mykola [Stečyšyn], b 19 December 1890 in Novosiiatske, Kherson region, d 7 August 1977 in Munich. Army officer and military writer. As an officer of the 105th Infantry Division of the Russian army, in 1917 he was active in its Ukrainianization. During 1918–20 he served in

various staff positions of the UNR Army, including chief of staff of the Northern Group (1919), the Mohyliv Insurgent Group, and the Third Iron Rifle Division. During the interwar period he was active in émigré Ukrainian veterans' organizations, particularly in the Union of Ukrainian Veterans and the Union of Ukrainian War Invalids. His articles on military history appeared in *Tryzub*, *Za derzhavnist*, and *Ukraïns'kyi invalid*. He also contributed entries to *Entsyklopediia ukraïnoznavstva* (Encyclopedia of Ukraine, 1955–88).

Stechyshyn. See Stechishin.

Ihor Stecura, architect: the Ukrainian Catholic Church of the Nativity of the Mother of God in Niagara Falls, Ontario

Stecura, Ihor, b 8 April 1932 in Lviv. Architect. A post-war émigré in Canada since 1948, he graduated from the University of Toronto (B ARCH) in 1963 and founded his own architectural firm in 1973. A specialist in Ukrainian wooden church architecture, he designed the wooden chapels at the Plast camp near Grafton, Ontario (1963); the Ukrainian Youth Association camp near Acton, Ontario (1973); and the Ukrainian Catholic wooden churches of St Volodymyr in the Ukrainian Park in Pike Lake, Saskatchewan (1982), of ss Volodymyr and Olha in Cawaja Beach, Ontario (1989), and of the Nativity of the Mother of God in Niagara Falls, Ontario (1988). For his designs of the churches in Pike Lake and Niagara Falls he was awarded first prize (1984) and the merit award (1988), respectively, by the Wood Council of Canada.

Steel. See Metallurgical industry.

Stefan, b ? in Medyka, near Peremyshl, d between 1678 and 1695. Painter. He lived and worked in Drohobych, where he supervised the painting of St George's Church (1651–78). He painted some icons of its iconostasis, such as *Akathyst of the Theotokos* (1659), *St George* (1662), and *Christ* (1663), and some of the murals in the nave. He also painted the icon of St John the Baptist (1669) for the Church of the Exaltation in Drohobych.

Stefan of Kiev, b 1040, d 7 April 1094. Churchman. A follower of St Theodosius of the Caves, he is mentioned in an early Kievan chronicle (ca 1047) as one of the first

church singers in Rus'. He later became hegumen of the Kievan Cave Monastery and a bishop in Volodymyr-Volynskyi. The Ukrainian Orthodox church considers him a saint; his feast day falls on 10 May (27 April OS).

Stefanchuk, Yurii [Stefančuk, Jurij], b 17 January 1908 in Bila Tserkva, Vasylykiv county, Kiev gubernia. Scenery designer. He completed study at the Kiev State Art Institute (1931, pupil of V. Kasiian, F. Krasysky, and F. Krychevsky) and then worked in the Donbas Ukrainian Theater of Musical Comedy (1931–4) and the Zaporizhia (later Lviv) Ukrainian Drama Theater (from 1934), where he created scenery for over 120 productions. He also designed scenery for productions of the Lviv Young Spectator's Theater, including M. Kropyvnytsky's *Poshylyts' v durni* (They Made Fools of Themselves).

Stefanis, Frants, b 3 December 1865 in Odessa, Kherson gubernia, d 26 February 1917 in Kiev. Anatomist. A graduate of Kiev University (1893), he worked there (as professor from 1903) and organized an instructional museum in the anatomy department. His publications dealt with the lymphatic vessels of the abdominal organs, which he classified using a method of his own invention.

Gen Hnat Stefaniv

Klym Stefaniv

Stefaniv, Hnat, b 10 February 1886 in Toporivtsi, Horodenka county, Galicia, d 21 June 1949 in Regensburg, Germany. Senior army officer; brother of K. and Z. *Stefaniv. After being promoted to colonel he commanded the Ukrainian Galician Army from 10 November to 10 December 1918. Then he was transferred to the UNR Army, where he was chief of logistics and then commanded the marine infantry, a reserve brigade of the Third Iron Rifle Division, the Third Cavalry Regiment (in the First Winter Campaign), and the UNR Army rear area. In August 1920 he was appointed consul of the Western Ukrainian National Republic to Czechoslovakia, and headed the consulate in Uzhhorod. The UNR government-in-exile eventually promoted him to brigadier general.

Stefaniv, Klym, b 11 March 1890 in Toporivtsi, Horodenka county, Galicia, d 19 February 1963 in Yablunka, Bohorodchany raion, Ivano-Frankivske oblast. Galician civic figure; brother of H. and Z. Stefaniv. A former village teacher in Zalishchyky county and an officer in the Ukrainian Galician Army, after the First World War he was

active in the Galician co-operative and Prosvita movements, represented the Ukrainian Socialist Radical party in the Polish Sejm (1928–30), and served as a scribe and a rural district official in Porohy, Nadvirna county. Under Soviet rule he worked as a teacher in Yablunka until 1957.

Stefaniv, Zenon, b 22 July 1902 in Toporivtsi, Horodenka county, Galicia, d 1976 in Newark, New Jersey. Military historian and journalist; brother of H. and K. Stefaniv. After joining the Ukrainian Galician Army in 1918, he served in signal communications and became a platoon commander in the machine-gun company of the Uhniv Brigade. After the war he studied political science and worked as a journalist and an editor of *Zhyttia Pokuttia*. During the Second World War he served as captain in the Ukrainian National Army, and after the war he settled in the United States. He wrote a book of memoirs, *Vid Slov'ians'ka do Tukholi* (From Slovianske to Tuchola, 1935), and *Ukrains'ki zbroini sylly 1917–1921 rr.* (Ukrainian Armed Forces in 1917–21, 3 parts, 1934–5) and contributed to *Istoriia ukrains'koho viis'ka* (History of the Ukrainian Armed Forces, 1936).

Stefanivsky, Mykhailo [Stefanivs'kyj, Myxajlo], b 1878 in Buzk, Kaminka-Strumyl'ova county, Galicia, d 1945. Civic leader and trades organizer. As an independent locksmith in Lviv, he was a founder and longtime president of the Lviv Burgher Brotherhood, an insurance and mutual aid society. He was active in the Zoria trades association and a member of the Central Committee of the Ukrainian National Democratic Alliance as well as the executive committees of a number of Galicia-wide economic and cultural organizations.

Mykhailo Stefanovych

Stefanovych, Mykhailo [Stefanovyč, Myxajlo], b 14 February 1898 in Kiev, d 5 August 1970 in Kiev. Opera singer (bass), artistic director, and musicologist. A graduate of the Kiev Conservatory (1922), he studied singing under M. *Mykysha and Y. Zbruieva. His operatic career began at the Kiev Youth Opera Theater (1919), and from 1921 he was soloist of the Kiev, Odessa, Kharkiv, Perm, Saratov, and Novosibirsk opera theaters. His operatic roles included Taras Bulba, Ruslan, Boris Godunov, and Don Basilio in G. Rossini's *Il Barbiere di Siviglia*. From 1928 he was artistic director of opera theaters in Poltava, Dnipropetrovske, Kharkiv, Lviv, and Kiev (1947–54). He wrote biographies of the singers M. Donets, D. Hnatiuk, I. Patorzhynsky, and P. Bilynnyk.

Oleksa Stefanovych

Oleksander Stefanovych

Stefanovych, Oleksa [Stefanovyč], b 5 October 1899 in Myliatyn, Ostrih county, Volhynia gubernia, d 4 January 1970 in Buffalo, New York. Poet. A graduate (1919) of the Volhynia Theological Seminary in Zhytomyr, as an inter-war émigré he studied at Prague University (1922–8; PH D diss on A. *Metlynsky as a poet, 1932) and the Ukrainian Free University (1928–30). His poetry appeared in Ukrainian journals in Prague, Lviv, and Chernivtsi and was published in Prague as the collections *Poezii, zbirka I* (1923–1926) (Poems, Collection I [1923–6], 1927) and *Stephanos* (1939). Although Stefanovych belonged to the ‘Prague school’ of Ukrainian poets, the voluntarism characteristic of the works of its other members is absent in his poems. His creativity was inspired by elegiac memories of Volhynia’s landscapes, by Ukrainian historical and mythological figures, and by tragic events in Ukraine’s past and present. Paganism (with erotic overtones) and, in his later poems, Christianity (often of the mystical variety) were dominant forces in his oeuvre. His style is notable for the originality of his poetic language, with its archaisms, neologisms, and unique use of syntax. Neoromantic and symbolist elements and folklore-based imagery predominate in his early works. Later his language becomes abrupt and precise, and his rhythms frequently break in sharp, falling cadences to suggest a sense of fatalism and apocalypse. As a postwar refugee in Germany and, from 1949, Buffalo Stefanovych published a few poems in émigré periodicals. A posthumous edition of his collected works, including those previously unpublished, appeared in Toronto in 1975.

B. Boychuk

Stefanovych, Oleksander [Stefanovyč], b 17 July 1847 in Ozeriany, Stanyslaviv circle, Galicia, d 23 May 1933 in Lviv. Greek Catholic priest, educator, and civic and political leader. After completing his theological studies at Lviv and Vienna universities he served as catechist of both the men and women teachers’ seminaries in Lviv (1873–1907). He was a founder and leading member of a number of important Ukrainian organizations, such as the newspaper **Dilo* (1880), the **Ridna Shkola* pedagogical society (1881), the **People’s Council* (1885) in Lviv, and the **National Democratic party* (1899). After the First World War he was president of the Ukrainian Labor party (1922–3), and both the *Prosvita* and the *Ridna Shkola* societies elected him as an honorary member. In addition to contribut-

ing articles to *Dilo* and other newspapers he wrote a secondary-school textbook on the history of the Catholic church (1878; repr 1903) and the first prayer book in vernacular Ukrainian.

Stefanovych, Vasyl [Stefanovyč, Vasyl’], b 1697, d ca 1773. Jurist and government official of the Hetmanate. He studied at the Kievan Mohyla Academy and in Germany, Prague, Vienna, Rome, Milan, and Venice. In 1722 he obtained a master’s degree in liberal arts and philosophy from Breslau University. In 1724 he became a translator in the chancellery of Peter I and a professor of rhetoric and philosophy at the theological seminary headed by T. Prokopovych in St Petersburg. In 1729 he was summoned to Hlukhiv by Hetman D. Apostol to head (until 1734) the commission that eventually produced the **Code of Laws of 1743*. He was made a fellow of the standard, and served as a captain in Lokhvytsia (1729–51, with interruptions) and as regimental judge of Lubni (1751–73).

Stefanovych, Yakiv [Stefanovyč, Jakiv] (pseud: Dmytro Naida), b 10 December 1854 in Deptivka, Konotip county, Chernihiv gubernia, d 14 April 1915 in Krasnyi Koliadyn, Konotip county. Revolutionary populist. In 1873–4, while studying medicine at Kiev University, he belonged to the **Kiev Commune*. He went underground in 1874 and organized the first circle of **Southern Rebels* in 1875. In early 1877, using a fake charter from the tsar, he organized a conspiracy in Chyhyryn county, Kiev gubernia, in which approx 1,000 local peasants took part. The planned armed rebellion against the landed gentry and local officials was interrupted by mass arrests of the conspirators. Stefanovych was imprisoned in the Lukianivka Prison in Kiev in September 1877, but he escaped in May 1878 before his trial and fled abroad via St Petersburg. After returning to the Russian Empire in July 1879, he joined the revolutionary organization **Zemlia i Volia*, became one of the leaders of the Black Partition anarcho-terrorist splinter organization, and spread revolutionary propaganda among the workers of Odessa. He fled abroad again in January 1880 but returned in November 1881 and became a member of the Executive Committee of **Narodnaia Volia*. After being arrested in Moscow in February 1882, he was a defendant in the trial of 17 of its members held in St Petersburg in April–May 1883, at which he was sentenced to eight years of hard labor in eastern Siberia, followed (in 1890) by exile to Yakutia. After his return to Ukraine in 1905, he was politically inactive. His diary was published in St Petersburg in 1906. A detailed account of the Chyhyryn conspiracy is found in D. Field’s *Rebels in the Name of the Tsar* (1976).

Stefanovych-Dontsov, Mykhailo [Stefanovyč-Doncov, Myxajlo], b 1753 in Kozyl, near Chernihiv, d 18 March 1833 in Chernihiv. Physician. A graduate of Chernihiv College (1771) and the Medical School of the St Peterburg Military Hospital (1774), he obtained his physician’s license in 1778 and took part in efforts to control epidemics in Ukraine and Russia. He was sentenced to 10 years of hard labor for protesting against abuse of power by the landlords. He invented a device for clearing the bronchopulmonary fistula of foreign bodies. His writings, which remain unpublished, deal with the plague, traumatic epilepsy, fractures, and tarantula bites.

Stefanovych-Dontsov, Yakiv [Stefanovyč-Doncov, Jakiv], b 1752 in Tserkovyshche, Chernihiv regiment, d 1829 in Mohyliv, Podilia gubernia. Physician. A graduate of Chernihiv College (1771) and the Medical School of the Moscow Hospital (1774), he obtained his license in 1777 and served as a military doctor in Kiev (1778–84), a county doctor in Oster, a lecturer in St Petersburg (1789–97), an inspector with the Voronezh Medical Board, and a quarantine doctor in Yevpatoriia and Mohyliv (1802–29). He wrote a doctoral dissertation on mass ergot poisoning (1793), studies of inflammation of the pleura and pathological childbirth, and a medico-topographic description of Voronezh gubernia (1798).

Stefansky, Viacheslav [Stefans'kyj, V'jačeslav], b 26 September 1867 in Odessa, d 7 May 1949. Epidemiologist and microbiologist. A graduate of Kiev University (1893), he worked in the Odessa Hospital for Infectious Diseases and (from 1897) the Odessa Bacteriological Station. He taught at Odessa University (from 1908) and at the Odessa Medical Institute (from 1921). He wrote numerous works, including a textbook on infectious diseases. During his research on the plague he discovered rat leprosy and its cause. Experimenting on himself, he showed that relapsing typhoid was transmitted by the louse (*Pediculus humanus*).

Stefanyk, Semen, b 1 March 1904 in Stetseva, Sniatyn county, Galicia, d 15 March 1981 in Lviv. Political activist; son of V. *Stefanyk. After graduating in law from Lviv University (1930) he worked as a lawyer. He was appointed vice-chairman of the executive committee of the Lviv Oblast Council of the People's Deputies in 1946 and deputy premier of the Ukrainian SSR in 1953. From 1954 to 1969 he was chairman of the Lviv Oblast Executive Committee and then director of the Franko Memorial Museum in Lviv.

Theodore Stefanyk

Vasyly Stefanyk

Stefanyk, Theodore, b 1880 in Hrytsovolia, Brody county, Galicia, d 21 March 1951 in Winnipeg. Community leader. Stefanyk, an electrician in Galicia, emigrated to Winnipeg in 1898. A prominent trade unionist, he was elected president of a local of the International Association of Engineers in 1902. Stefanyk supported the Conservative party and by 1907 had become its main 'Ukrainian' lieutenant for the province of Manitoba. He received an

appointment as inspector and organizer of Ukrainian bilingual schools. He was the first Ukrainian elected to the Winnipeg city council (1912–14) and in 1913–15 was president of the Ruthenian Publishing Company, which produced a weekly called *Kanada* that was financed by the Conservative party.

Stefanyk, Vasyly, b 14 May 1871 in Rusiv, Sniatyn county, Galicia, d 7 December 1936 in Rusiv. Prose writer. In the course of his studies Stefanyk became acquainted with L. *Martovych and L. *Bachynsky, both of whom had an influence on his life: Martovych turned him to writing, and Bachynsky steered him toward community-political involvement. Later, while he was a student of medicine at Cracow University, Stefanyk was befriended by the Polish doctor W. *Moraczewski and his wife, S. Okunevska-Moraczewska, who acquainted him with contemporary European culture and literature and with the members of the then-fashionable Polish avant-garde group *Młoda Polska*, particularly with S. Przybyszewski and W. *Orkan. The hectic and interesting Bohemian life is reflected in Stefanyk's letters, in which references to the works of modernist authors, such as C.-P. Baudelaire, G. Keller, P. Verlaine, M. Maeterlinck, and P. Bourget, abound. Stefanyk's letters, full of poetic prose, lyricism, and introspection, also provide glimpses of the future master of the short story in the various narrative vignettes. Attempts to publish some of the introspective poetic prose in newspapers were unsuccessful, but in 1897 the terse narratives of scenes observed by Stefanyk appeared in *Pratsia* (Chernivtsi); they were followed by several novellas in *Literaturno-naukovyyi vistnyk* (1898) and finally by Stefanyk's first collection of novellas, *Synia knyzhечка* (The Blue Book, 1899). With its appearance came immediate literary acclaim, and other collections followed: *Kaminnyi khrest* (The Stone Cross, 1900), *Doroha* (The Road, 1901), and *Moie slovo* (My Word, 1905).

In 1901 Stefanyk was at the height of his literary career, but for the next 15 years he wrote nothing. From 1908 until the collapse of the Austro-Hungarian Empire Stefanyk was a member of the Austrian parliament, elected as a substitute for V. Okhrymovych in 1907 from the *Ukrainian Radical party in Galicia. The horror of the First World War jolted him back into writing in 1916, and he produced one more collection, *Zemlia* (Earth, 1926). During the period of the Western Ukrainian National Republic, as a former member of parliament, Stefanyk became vice-president of the Ukrainian National Rada, and in 1919 he went to Kiev for the signing of the agreement on the unification of Ukraine. In 1922 he became a district head of the Radical party. Recognizing him as the greatest living writer in Western Ukraine, the government of Soviet Ukraine decreed a life pension for Stefanyk, which he turned down in protest against the repressions in Ukraine. In addition to his five collections of novellas, Stefanyk published stories, in several editions of collected works: an edition in 1927 in Soviet Ukraine; a jubilee edition (Lviv 1933); an émigré edition edited by his son, *Yu. Stefanyk (Regensburg 1948); and the three-volume 'academic' edition, published in Ukraine (1949–54). A 1964 edition of Stefanyk's selected works, edited by V. Lesyn and F. Pohrebennyk, complemented and corrected some of the lacunae and faults of the 'academic' edition.

Stefanyk's whole literary output consisted of 59 pub-

lished novellas, most of them no longer than a couple of pages. In them he showed himself a master of a species of the short story genre, the Stefanyk novella, which is characterized by a succinct and highly dramatic form used to capture single crucial moments in the life of a hero. The dramatic quality of the novellas ensured their being successfully staged as plays by V. Blavatsky and adapted for film (*Kaminnyi khrest*, screenplay by I. Drach). The heroes of Stefanyk's stories are for the most part peasants from his native Pokutia. Against the general background of poverty or war (in the later stories) Stefanyk showed his heroes in a universal dilemma, confronting the pain at the heart of existence. Stefanyk concentrated on capturing the turbulence of the soul, the inner agon, which revealed the psychological complexity of the hero. His characterizations were achieved through the speech of the characters. Words spoken became important not only for their meaning but also for the elements of *skaz*, which throw direct light on the character's emotional state, personality, social position, and degree of literacy. The special blend of literary Ukrainian and the Pokutia dialect created a flavor not easily duplicated or translated. Nevertheless there have been several attempts to translate Stefanyk into Polish, German, and Russian. The French translation *La croix de pierre et autres nouvelles* appeared in 1975, and the following English translations have appeared: *The Stone Cross* (1971), *Maple Leaves and Other Stories* (1988), and some individual stories in anthologies.

Stefanyk, Yurii (pseud: Yurii Klynovy and Yurii Hamorak), b 24 July 1909 in Stetseva, Sniatyn county, Galicia, d 25 April 1985 in Edmonton. Writer and community leader; son of V. *Stefanyk. Stefanyk studied law at the University of Lviv (LLB, 1935) and spent 1936–7 in Canada coediting *Ukrains'ki visti* (Edmonton). After returning to Ukraine he worked on the magazine *Zhyttia i znannia* and the monthly *Novitnyi remisnyk* in Lviv. In 1940, after the Soviet occupation of Western Ukraine, he was arrested as a Ukrainian nationalist. He was released in 1941, left Ukraine in 1944, and settled in Edmonton in 1948. From 1971 he was president of the *Slovo Association of Ukrainian Writers in Exile and edited its irregular serial, **Slovo* (1970–83). He wrote *Moim synam, moim pryiateliim* (To My Sons and to My Friends, 1981); edited *Vasyl' Stefanyk: Tvory* (Vasyl Stefanyk: Works, 1942; 2nd edn 1948), *Les' Mar-*

Yurii Stefanyk

Mariia Stefiuk

tovysh: Tvory I–III (Les Martovych: Works I–III, nd), and *Nasha spadshchyna* (Our Heritage, 1979); and coedited (with J. Balan) *Yarmarok: Ukrainian Writing in Canada since the Second World War* (1987).

Stefanyshyn, Myroslav [Stefanyšyn], b 1 April 1927 in Bovshiv, Rohatyn county, Galicia. Composer, conductor, and folk song collector. After graduating from the Ivano-Frankivske Music School in 1949 and the Lviv Conservatory in 1954, he served as conductor of the Volhynia Folk Chorus and then as music director of the Volhynia Oblast Drama Theater (1959–60). He lectured at the Lutske Pedagogical Institute (1960–9) and then at the Lutske Music School. His compositions number about 400 and include songs for choir, arrangements of folk songs, and pieces for chamber orchestra. A selection of his works was published in 1966 as *Pisni onovlenoho kraiu* (Songs of a Renewed Land). As a folklorist he gathered over 1,000 Volhynian and Polisian folk songs and melodies and compiled several collections, including *Narodna tvorchist' Volyni* (The Folklore of Volhynia, 1957), *Pisni z Volyni* (Songs from Volhynia, 1970), and *Spivaiie Lesyn kraï* (Lesia [Ukrainka's] Land Sings, 1973).

Stefanytsky, Ivan [Stefanyč'kyj], b 19 March 1892 in Naluzhe, Terebovlia county, Galicia, d 24 April 1975 in Toronto. Journalist and Communist activist. After emigrating to the United States (1908) and then to Canada (1911) he became active in the *Ukrainian Labour-Farmer Temple Association, the Workers' Benevolent Association, the Communist Party of Canada (1923–75), and the Association of United Ukrainian Canadians. He edited the newspapers *Robochyi narod* and *Robitnyche slovo* (1914–18), and then *Svidoma syla*, *Ukrains'ki robitnychi visti* (1930s), *Narodnia hazeta* (1930s), *Ukrains'ke slovo* (1942–7), and *Ukrains'ke zhyttia* (1947–66). For many years he fought for an independent political line in Ukrainian pro-Communist organizations.

Stefiuk, Mariia [Stefjuk, Marija], b 16 July 1948 in Rozhnyv, Kosiv raion, Ivano-Frankivske oblast. Opera singer (lyric-coloratura soprano). A graduate of the Kiev Conservatory (1973), she studied under N. Zakharchenko and since 1972 has been a soloist of the Kiev Theater of Opera and Ballet. Her operatic roles include Marultsia in M. Lyssenko's *Taras Bulba*, Mylusha in H. Maiboroda's *Yaroslav*

the Wise, Antonida in M. Glinka's *A Life for the Czar*, Marfa in N. Rimsky-Korsakov's *The Tsar's Bride*, and Violetta in G. Verdi's *La Traviata*. She has also sung abroad, in the United States (1975), in Canada (1976), and at Milan's La Scala (1981); in recital she often sings Ukrainian folk songs. She has recorded on the Melodiya label.

Stefurak, Stepan, b 16 January 1846 in Staryi Uhryniv, Kalush county, Galicia, d 25 September 1888 in Lviv. Actor. He worked in the Ruska Besida Theater (1869–88) and was renowned for his portrayal of characters in the Ukrainian ethnographic repertoire.

Steklov, Vladimir, b 9 January 1864 in Nizhnii Novgorod, Russia, d 30 May 1926 in Haspra, Crimea. Russian mathematician and mechanician; full member of the St Petersburg Academy from 1912 and of the VUAN from 1925. A student of A. Liapunov, he graduated from Kharkiv University (1887) and taught at the university (1889–1906) and the Kharkiv Technological Institute (1893–1905). In 1902 he was elected president of the Kharkiv Mathematics Society. Then he served as professor of St Petersburg University (1906–19), vice-president of the USSR Academy of Sciences in Moscow (1919–26), and director of the Physical-Mathematical Institute in Moscow, which was renamed in 1934 in his honor. Steklov had a considerable influence in both Ukraine and Russia on the application of mathematics to natural sciences. He made fundamental contributions to mathematical physics and various natural sciences as well as to pure mathematics, including a proof for the existence of Green's function and its analytical representations, new methods for the solution of basic differential equations in mathematical physics based on the completeness of the eigenfunctions, and some refinements of the theory of approximate integration, the theory of elasticity, and the theory of algebra.

Steletska, Hanna [Stelec'ka] (pseud: Hanna Suprunenko), b 1883 in Lubni, Poltava gubernia, d May 1962 in Kiev. Poet and teacher. A graduate of the Odessa Women's Pedagogical Courses, the Higher Courses for Women in Moscow, and the Moscow Archeological Institute (1914), from 1916 she worked as a teacher and orphanage director in Lubni and its environs. Her poems appeared in *Literaturno-naukovyi vistnyk* (1905) and the literary anthologies *Rozvaha* (Amusement, 1906), *Ternovyi vinok* (Crown of Thorns, 1908), and *Ukrains'ka muza* (Ukrainian Muse, 1908). In 1923 she published the collection *Revoliutsiini pisni* (Revolutionary Songs). Manuscripts of her unpublished poetry are preserved at the ANU Institute of Literature.

Stelletsy, Mykola [Stellec'kyj], b 1862, d 1919. Priest and scholar. A graduate of the Kiev Theological Academy, he published articles on a variety of religious and philosophical topics – including the role of Kiev as a religious center, the history of Kharkiv College, and H. Skovoroda – in *Trudy Kievskoi dukhovnoi akademii*, *Vera i razum*, and other journals. He later became a professor at Kharkiv University. He was killed by the Bolsheviks in 1919.

Stelmakh, Hryhorii [Stel'max, Hryhorij], b November 1903 in Voitovychi, Pereiaslav county, Poltava gubernia. Ethnographer. After graduating from the Ukrainian Institute of Material Culture in Kharkiv (1931) he lectured at the Ukrainian Institute of Communist Education (1931–3)

and worked at the Ukrainian Institute of Material Culture (1932–4) and the Central Antireligious Museum in Moscow (1936–9). From 1946 he worked at the AN URSS (now ANU) Institute of Fine Arts, Folklore, and Ethnography. Besides articles on rural settlements and folk architecture he has written a monograph on the development of rural settlements in Ukraine (1964).

Mykhailo Stelmakh

Stelmakh, Mykhailo [Stel'max, Myxajlo], b 24 May 1912 in Diakivtsi, Letychiv county, Podilia gubernia, d 27 September 1983 in Kiev. Prose writer, poet, and dramatist; full member of the AN URSS (now ANU) from 1978. He graduated from the Vinnytsia Pedagogical Institute (1933) and taught in villages of the Kiev district until 1939. After the war he worked (1945–53) for the Institute of Fine Arts, Folklore, and Ethnography of the AN URSS. He was a deputy to the Supreme Soviet of the USSR and vice-chairman of the Council of Nationalities. His poetry was first published in 1936. His collections of poetry include *Dobryi ranok* (Good Morning, 1941), *Za iasni zori* (For the Bright Stars, 1942), *Provesin'* (Early Spring, 1942), *Shliakhy svitania* (The Paths of Dawn, 1948), *Zhyto syly nabyraiet'sia* (The Rye is Growing in Strength, 1954), *Poezii* (Poems, 1958), and *Mak tsvite* (The Poppies Are Blooming, 1968). From the 1940s he wrote mainly prose, such as the short-story collection *Berezovyi sik* (Birch Sap, 1944); the novel *Velyka ridnia* (The Large Family), published in two parts as *Na nashii zemli* (On Our Land, 1949) and *Velyki perelohy* (Large Fallow Fields, 1951); and the novels *Khlib i sil'* (Bread and Salt, 1959), *Pravda i kryvda* (Truth and Injustice, 1961), *Duma pro tebe* (A Duma about You, 1969), *Chotyry brody* (The Four Fords, 1979), *Nad Cheremoshem* (By the Cheremosh River, 1952), *Husy-lebedi letiat'* (The Geese and Swans Are Flying, 1964), and *Shchedryi vechir* (Eve of Epiphany, 1967). He wrote the plays *Zolota metelytsia* (The Golden Snowstorm, 1955), *Na Ivana Kupala* (On Midsummer's Night's Eve, 1966), *Zacharovanyi vitriak* (The Enchanted Windmill, 1967), and *Kum koroliu* (The Godfather of the King's Child, 1968).

Stelmakh wrote the script for the documentary film *Zhyvy Ukraina!* (Long Live Ukraine!, 1958). He also wrote many children's books, mainly in verse: *Zhnyva* (Harvest, 1951), *Kolosok do koloska* (Ear of Grain to Ear of Grain, 1951), *Zhyvi ohni* (Live Fires, 1954), *Burundukova sim'ia* (The Chipmunk's Family, 1963), *Tsapkiv urozhai* (The Goat's Harvest, 1967), *Lito-liteplo* (The Lukewarm Summer, 1969), and others.

Stelmakh's prose is a typical example of *socialist realism. It shows the characteristic conformism to shifting Party policy (eg, the novel *Velyka ridnia* glorifies J. Stalin throughout and was awarded the Stalin Prize in 1951; later, criticized for succumbing to the Stalinist 'personality cult,' Stelmakh rewrote it under the new title *Krov liuds'ka – ne vodytsia* [Human Blood Is Not Water, 1957]). The characteristic socialist-realist glossing over of Soviet reality is present in Stelmakh's work even of the post-Stalinist era (eg, the novel *Prauda i kryvda*). Even Stelmakh's last novel, *Chotyry brody*, is distorted by the pressure of censorship. Stelmakh's prose is exceptionally rich in its folk lexicon. Stylistically it is reminiscent of Yu. Yanovsky's lyrical prose, with the influence of O. Dovzhenko clearly evident. Stelmakh's adherence to socialist realism, as well as his tendency toward sentimentalism (also characteristic of socialist realism), guaranteed him an upper niche in the literary hierarchy of the Ukrainian SSR. His collected works have been published (6 vols, 1972–3; 7 vols, 1982–3).

I. Koshelivets

Stempkovsky, Ivan [Stempkovskij], b 1789 in Riazanovka, Saratov gubernia, Russia, d 18 December 1832 in Kerch. Russian archeologist and administrator. In 1814–15 he fought with the Russian forces in the Napoleonic Wars. Later he studied history and archeology in Paris (1815–19). He then returned to the Black Sea region, where he pursued a military career and worked in public administration. He was instrumental in establishing the *Odessa Archeological Museum (1825) and a regional museum in Kerch (1826). After becoming the city governor (*gradonachalnik*) of Kerch in 1828, he undertook a number of fruitful archeological expeditions at ancient Greek sites in the area. His best-known find is the *Kul Oba kurhan.

Stanisław Stempowski

Stempowski, Stanisław, b 27 January 1870 in Huta Cherlenovetska, eastern Podilia, d 11 January 1952 in Warsaw. Polish civic and political figure and writer. He developed an interest in Ukrainian affairs after meeting B. Kistiakovsky and other Ukrainian students at Dorpat University (1891). He became active in Ukrainian co-operative and educational work in Volhynia (1906–16) and was leader of the Polish Democratic Center party when it entered the Central Rada (1917). In 1920 he was minister of health

in the V. Prokopovych administration of the UNR. His memoirs were published as *Pamiętniki 1870–1914* (1953).

Sten, Anna (stage name of Anna Fesak), b 29 June 1908 in Kiev. Hollywood film and television actress of Ukrainian-Swedish origin. After appearing in Soviet and German films she moved to the United States (1932), where she made 17 films, including *We Live Again* (1934, with F. March), *The Wedding Night* (1935, with G. Cooper), and *Soldier of Fortune* (1955, with C. Gable and S. Hayward). Her last film was made in 1962.

Ukrainian stenography

Stenography, or shorthand. A method of writing rapidly by using characters, abbreviations, or symbols in place of letters, words, and phrases. In Eastern Europe, the most widely used system was F.X. Gabelsberger's cursive shorthand (1824). In Western Ukraine it was adapted for Ukrainian by O. *Paneiko (1922). A state stenographic system was adopted in the USSR in 1933 on the basis of N. Sokolov's Russian version of the Gabelsberger system. In Soviet Ukraine it was adapted by O. Hershtansky and M. Lovshyn (author of a 1948 Ukrainian shorthand textbook).

Step (The Steppe). A 391-page Ukrainian and Russian literary miscellany published by writers living in Kherson under the leadership of D. Markovych and printed in St Petersburg in 1886. It contained poems by P. Tulub, Dniprova Chaika, A. Konoshchenko (Hrabenko), and P. Zalozny; stories by D. Mordovets, I. Nechui-Levytsky, A. Brauner, D. Markovych, M. Zavoloka (Hrushevsky), and Penchukivets; I. Karpenko-Kary's drama 'Bondarivna' (The Cooper's Daughter); and articles by M. Hanenko (on peasant family property relations in Yelysavethrad county), O. Markovych (on wedding songs in Yelysavethrad county, with the texts of 119 songs), K. Shram (Ivashchenko, on the Ukrainian village in the works of M. Starytsky and M. Kropyvnytsky), and O. Rusov (on the origin of zemstvo statistics).

Step (The Steppe). A 112-page miscellany published in Odessa in 1916 under the editorship of A. Nikovsky in place of the fourth issue of **Osnova*. It included Nikovsky's obituary of V. Symyrenko, a historical article by L. Orlenko (pseud of O. Levytsky), and prose by P. Ustiak (pseud of S. Yefremov), I. Lypa, M. Pylypovych (pseud of Modest Levytsky), and Yu. Styzhavsky.

Stepan [Stepan']. II-7. A town smt (1986 pop 4,600) on the Horyn River in Sarny raion, Rivne oblast. It was first mentioned in the Hypatian Chronicle under the year 1292, as the capital of an appanage principality. It was destroyed by the Mongols and reappeared in historical documents in the 15th and 16th centuries, when it belonged to the Ostrozky family. They built a large fortress, the walls of which have been preserved, and St Michael's Monastery

(1572). During B. Khmelnytsky's uprising a large battle between the Polish army and the Cossacks took place at Stepan.

Stepanenko, Arkadii, b and d ? Political activist and member of the Central Rada. He was a member of the Ukrainian Party of Socialist Revolutionaries (UPSR) and of the Central Committee of the Peasant Association. As early as June 1917 he called on the Central Rada to secede from Russia and create an independent Ukrainian state. In December 1917 he was elected president of the All-Ukrainian Congress of Workers', Soldiers', and Peasants' Deputies, and at the beginning of 1918, vice-president of the Central Rada. He signed the bill introducing the new (Gregorian) calendar (25 February 1918). When the UPSR split into factions in May 1918, Stepanenko sided with the right wing and then the center. At the Labor Congress in January 1919 he demanded the UNR Directory's abdication and the formation of local labor councils. On 28 January he was elected to the Central Committee of the UPSR, and he acted as its representative in the Directory's government. In March 1919 he became vice-chairman of the Committee for the Defense of the Republic, and in August he joined Issac Mazepa's cabinet as minister of land affairs. In 1920 he tried to reach an understanding with the Soviet regime.

Stepanenko, Borys, b 15 March 1917 in Voitove, Pereiaslav county, Poltava gubernia. Ballet dancer. He completed ballet school in 1936 (pupil of I. Chystiakov). In 1937–8 he danced as a soloist in the Ensemble of Song and Dance of the Ukrainian SSR, and in 1939–61 he was a soloist in the Kiev Theater of Opera and Ballet.

Stepanenko, Ihor, b 10 October 1914 in Hlobyne, Kremenchuk county, Poltava gubernia. CPU and Soviet government leader. A former sugar-refinery engineer and head of the Cherkasy Sugar Trust, he served as deputy chairman of the Cherkasy Council of the National Economy (1960–1), chairman of the Cherkasy Oblast Executive Committee (1961–2) and the Podilia Council of the National Economy (1962–5), minister of the Ukrainian food industry (1965–?), deputy chairman of the Ukrainian Council of Ministers (1966–?), and CC CPU candidate (1961–6) and member (1966–?).

Stepanenko, Mykhailo, b 6 June 1942 in Semipalatinsk, Kazakh SSR. Composer, musicologist, pianist, and teacher. He graduated from the Kiev State Conservatory in the piano class of V. Nilsen and V. Tropinin (1966) and in the composition class of B. Liatoshynsky and A. Shtoharenko (1971). He has taught at the conservatory since 1967. His musical works include a symphony (1971); *Concert Allegro* (1977) for string quartet; piano and bandura compositions; pieces for flute, clarinet, and violin (all with piano); art songs; folk song arrangements; and music for theater, radio, and television. He has written articles for *Ukrains'ka radians'ka entsyklopediia* (Ukrainian Soviet Encyclopedia) and music journals and recorded works by D. Bortniansky, M. Berezovsky, O. Lyzohub, and M. Markevych for the Melodiya label.

Stepanenko, Mykola, b 6 December 1918 in Poltava, d 13 March 1993 in San Jose, California. Educator, literary scholar, and political activist; full member of the Shevchenko Scientific Society and the Ukrainian Acade-

Mykola Stepanenko

my of Arts and Sciences in the US. A graduate of the Poltava Pedagogical Institute (1938), he taught secondary school in Ukraine. A postwar refugee, after emigrating to the United States in 1949 he completed his studies at Syracuse University (PH D, 1963) and taught Slavic languages and literatures at Rutgers, George Washington, and Central Michigan universities. He coauthored a Ukrainian grammar and has contributed many articles to the Ukrainian émigré press and to Slavic studies journals. He has been active in Ukrainian émigré politics as a cofounder of the *Ukrainian Revolutionary Democratic party and the Ukrainian Democratic Youth Association, as a member of the board of directors of the Ukrainian Congress Committee of America (1950–4), and as a vice-president of the UNR government-in-exile (from 1967).

Stepanenko, Oleh, b 26 January 1916 in Chernihiv. Film set designer. He completed study in the Faculty of Architectural Design in the Leningrad Institute of Industrial Art (1934) and worked in various design firms (1935–41). From 1947 he worked as a film set designer in the Kiev Artistic Film Studio, where he designed the sets for over 20 films, including *Kyianka* (The Kiev Girl, 1958).

Stepanenko, Oleksander, b ? in Kremenchuk county, Poltava gubernia, d 1924 in Siberia. Co-operative and political leader. He joined the Revolutionary Ukrainian party (1900) and then the Ukrainian People's party (1902). After the February Revolution he became a member of the executive committee of Kiev gubernia, a representative of co-operatives in the Central Rada, and a member of the Ukrainian Party of Socialists-Independentists. Under the UNR Directory he was sent on an economic mission to Vienna. In 1922 he returned to Ukraine. During the Stalinist terror he was sent to a prison camp in Siberia. His further fate is unknown.

Stepaniuk, Boryslav [Stepanjuk], b 16 July 1923 in Kanivshchyna, Pryluka county, Poltava gubernia. Poet and translator. He graduated from Kiev University (1947) and was deputy chief editor of *Radianskyi Pysmennyk* publishers and editor of the quarterly *Poeziia*. Since 1948 he has published 20 books of lyric poetry and narrative poems, including the selected editions *Iasna dalechin'* (The Bright Distance, 1956), *Syn'ookyi mii lypen'* (My Blue-eyed July, 1973), and *Vybrani tvory* (Selected Works, 2 vols, 1983). He has translated Russian, Kirghiz, and Chuvash poetry into Ukrainian. He was awarded the first P. Tychna Prize in 1974.

Stepaniuk, Ivan [Stepanjuk], b 19 April 1903 in Tsutsniv (now Petrove), Volodymyr-Volynskyi county, Volhynia gubernia, d 29 May 1934. Writer. From 1923 to 1924 he edited the Social Democratic weekly **Selians'ka dolia* in Lutske. From 1925 on he lived in Soviet Ukraine, and in 1926 he began contributing poems, stories, and essays to journals (*Zoria*, *Zakhidnia Ukraina*) and Dnipropetrovske newspapers as a member of the All-Ukrainian Association of Proletarian Writers and the writers' group Zakhidnia Ukraina. Published separately were the poetry collection *Strumuiut' dni* (The Days Stream, 1930) and a posthumous edition of his works with the same title (1965).

Olena Stepaniv

Volodymyr Stepankivsky

Stepaniv, Olena, b 7 December 1892 in Vyshnivchyk, Peremyshliany county, Galicia, d 11 July 1963 in Lviv. Military and community figure and educator; wife of R. *Dashkevych. As a student at Lviv University she commanded a women's platoon in the Ukrainian Sich Riflemen Society (est 1913). During the First World War she joined the Legion of Ukrainian Sich Riflemen and fought in the battle for Makivka. She was decorated for bravery and promoted to second lieutenant. After being interned in a Russian POW camp in Tashkent (1915–17) she served on the legion's Supreme Military Board, which organized the November Uprising in Lviv, and commanded a platoon in the Ukrainian Galician Army (1918–19). In 1919 she was a press representative in the UNR Ministry of Foreign Affairs in Kamianets-Podilskyi. After the war she received a PH D in history and geography from Vienna University and then taught at the Basilian Sisters' gymnasium in Lviv. Forbidden to teach by the Polish authorities in 1935, she became director of the Ridna Shkola educational society's guidance department (1935–7) and director of the Secretariat of the Organizational Division of the Audit Union of Ukrainian Co-operatives. During the 1939–41 Soviet occupation she resumed teaching and headed the Statistical Administration in Lviv. In 1944–6 she lectured at Lviv University and oversaw the AN URSSR (now ANU) Sector of Economics and Industry in Lviv. Incarceration in a Mordovian labor camp for being a Ukrainian patriot (1949–56) undermined her health. Stepaniv wrote over 75 works, including memoirs of the years 1912–14 (1930; repr 1968), a reference book on health co-operatives (1930), and a book on contemporary Lviv (1943; repr 1953).

Stepankivsky, Volodymyr [Stepankivs'kyj], b 1885 in eastern Podilia, d 1957 in the United States. Political activist and journalist. He was active in the Revolutionary Ukrainian party and an executive member of the Ukrainian Social Democratic Workers' party (USDRP). After emigrating in 1907 to Switzerland and then to France and England he contributed articles under various pseudonyms to *Rada*, *Dilo*, and the organs of the USDRP. In 1909 he founded the Ukrainian Hromada in London, and in 1911 he began to inform the European public about Ukraine. With M. *Tyshkevych he organized the Ucraina Information Society in Lausanne and edited its weekly *L'*Ukraine* (1915–20) and, irregularly, *The Ukraine*. His pamphlet *The Russian Plot to Seize Galicia (Austrian Ruthenia)* appeared in the United States in 1915. In Bern he collaborated with D. *Dontsov (1916–17) in publishing the bulletin of the Bureau of the Peoples of Russia. In the mid-1920s he emigrated to the United States and withdrew from Ukrainian public life.

Stepankov, Kostiantyn, b 3 June 1928 in Pechesky, near Proskuriv (now Khmelnytskyi). Stage, film, and television actor and pedagogue. He completed study at the Kiev Institute of Theater Arts (1953, pupil of A. Buchma) and then was an actor in the Kiev Ukrainian Drama Theater (1954–68) and the Kiev Artistic Film Studio (from 1968). He acted in the films *Kaminnyi khrest* (The Stone Cross, 1968, based on V. Stefanyk's story), *Zakhar Berkut* (1971, based on I. Franko's novel), and *Duma pro Kovpaka* (A Duma about Kovpak, 1975–8). Since 1953 he has taught in the Kiev Institute of Theater Arts.

Stepanov, Dmytro, b 1800, d 1856. Porcelain decorator. After graduating from the St Petersburg Academy of Arts (1817) he managed the engraving workshop of the Mezhyhiria Faience Factory. In 1826 he began to teach drawing and engraving at the factory's trade school. He produced about 200 original engravings that were reproduced on porcelain ware, including *The Four Seasons*, *The Golden Gate in Kiev*, *Kiev University*, and Ukrainian landscapes. He also drew floral ornamentation and illustrated books.

Stepanov, Tikhon, b 1795 in Voronezh, Russia, d 1847 in Kharkiv. Russian economist. After graduating from Kharkiv University (1824) he taught history there. In 1832 he was appointed a professor of political economy, and later, the rector, at Kharkiv University. He wrote works on economics, statistics, philosophy, and law, including the first original textbook of political economy published in the Russian Empire, *Zapiski o politicheskoi ekonomii* (Notes on Political Economy, 2 vols, 1844, 1848). It was based on the works of A. Smith and D. Ricardo.

Stepanov, Vladimir, b 14 December 1913 in Shchehlivka (now part of Makiivka), Bakhmut county, Katerynoslav gubernia. Astrophysicist; corresponding member of the USSR (now Russian) Academy of Sciences since 1968 and chairman of the presidium of its Eastern Siberian branch (1972–6). A graduate of Moscow University (1937), he worked at the Tashkent Astronomical Observatory (1937–41); the Lviv Astronomical Observatory (1946–53), where he became director in 1950; Moscow University (1953–5); the Crimean Astrophysical Observatory (1955–62); and, as deputy director (1962–4) and director (1964–

78), the Siberian Institute of the Earth's Magnetism, Ionosphere, and Dispersion of Radio Waves in Irkutsk. His scientific contributions have been mostly in solar physics and solar astronomy. Stepanov developed theories and equations explaining the interactions of solar magnetic fields, radiation, and plasma; studied the rotation of solar corona; and developed new astronomical instruments (a double-reflection spectroscope and a solar magnetometer).

Stepanova, Galina. See Prozumenshchikova, Galina.

Stephanites kai Ichnelates. An 11th-century Greek version of an 8th-century Arabic collection of animal fables, *Kalilah wa Dimnah*, which itself was a translation of an originally Sanskrit work, the *Panchatantra*, written between 100 BC and 500 AD. It was named after the two jackals that figure in the first fable and narrate the following fables, and was written in the form of an emperor's conversation with a philosopher. A Bulgarian translation of the Greek, *Stefanit i Ichnalat*, circulated in Kievan Rus' in many interpolated copies from the mid-13th century on. It became a source of Ukrainian folk anecdotes and animal fables and was also used in belletristic works.

Stephen III, b 1457, d 1504. Hospodar of Moldavia. Under his rule Moldavia attained its greatest strength, and he became known as 'the Great.' He waged successful campaigns against Hungary (1467), Wallachia (1471, 1473), Turkey (1475; but he was later defeated, and conceded vassalage to the Porte), and Poland. He supported political, cultural, and economic ties with Ukraine and granted privileges to the merchants of Lviv. He also assisted in Ukrainian cultural development by arranging for Ukrainian chronicles and decrees as well as gospels from the Putna and Humora monasteries to be written in the Ukrainian variant of Church Slavonic. During his tenure several Ukrainians (Dazhboh, Andreiko, and Ya. Hudysh) were members of the Moldavian boyar council. His first wife was Evdokiia, the daughter of the Kievan prince Semen Olelkovich. During his campaigns in Pokutia in 1491 and 1502, a number of Ukrainians resettled in Moldavia. Stephen was buried in the Putna monastery in southern Bukovyna.

Stephen (István) Báthory (Polish: Stefan Batory), b 27 September 1533 in Transylvania, d 12 December 1586 near Hrodna, Belarus. Transylvanian prince (1571–6) and Hungarian king (1576–86) of Poland. One of the most forceful and ambitious monarchs in the history of Poland, he attempted to form a great state from Poland, Muscovy, and Transylvania. To defend Poland's eastern Baltic provinces against Russian incursion (eg, in the war with Ivan IV, 1579–82), he strengthened the Polish army by increasing the numbers of *registered Cossacks and granting them privileges. In 1578 he allowed them to use the *Trakhtemyriv Monastery as a hospital and refuge.

Stepniak, Myron [Stepnjak], b 1902 in Oleksandrivske (now Zaporizhia), Katerynoslav gubernia, d ? Literary scholar and critic. In the 1920s he contributed articles about poetics and Galician and Soviet Ukrainian writers, as well as book reviews, to *Chervonyi shliakh* (ChSh), *Literaturnyi zhurnal*, *Hart*, and other journals. After his article about the Galician Modernist group Moloda Muza in ChSh was attacked by Party critics, he was expelled in his

fourth year from the Kiev Institute of People's Education, and his work was no longer published. His further fate is unknown.

Sergius Stepniak

Stepniak, Sergius [Stepnjak] (pseud of Sergei Kravchinsky), b 13 July 1851 in Novyi Starodub, Oleksandriia county, Kherson gubernia, d 23 December 1895 in London. Russian populist revolutionary and writer. He edited the *Zemlia i Volia society's paper in St Petersburg in 1878. He worked as a translator and journalist in Geneva (1878–81, 1883–4) and Milan (1881–3). In Geneva he became a friend of M. *Drahomanov and a supporter of his federalist views.

In 1884 Stepniak settled in London, where he wrote most of his works and became the leading Russian revolutionary propagandist of his time. He founded the English Society of Friends of Russian Freedom (1890), its organ *Free Russia* (1890), and the Russian Free Press Fund (1891), which published, distributed, and smuggled back into the Russian Empire revolutionary and banned publications in Russian, Polish, and Ukrainian (eg, by Drahomanov, P. Myrny, S. Podolynsky, and T. Shevchenko [Stepniak's favorite author]).

Stepniak wrote populist booklets, such as *Skazka o kopeike* (Tale of a Kopeck, 1873) and *O pravde i krivde* (On Truth and Iniquity, 1875), and the books *La Russia sotterranea* (in Italian, 1882; English trans: *Underground Russia*, 1883; Ukrainian trans, 1901, 1979), *Russia under the Tzars* (2 vols, 1885), *The Russian Storm-Cloud; or, Russia in Her Relations to Neighbouring Countries* (1886), *The Russian Peasantry: Their Agrarian Condition, Social Life, and Religion* (2 vols, 1888), and *King Stork and King Log: A Study of Modern Russia* (2 vols, 1895), all of which provide information about political and social conditions in Ukraine. The most complete Russian editions of Stepniak's works were published in Petrograd (6 vols, 1906–8; 7 vols, 1917–19). Books about him have been written in Russian by L. Shishko (1903), L. Deich (1919), K. Berkova (1925), E. Taratuta (1967, 1970, 1987), and T. Maevskaia (1968), and in English by D. Senese (1987).

R. Senkus

Stepnyi burial site. An early Cimmerian and *Timber-Grave culture burial ground of the 11th to 10th century BC, found on the Stepnyi state farm near Zapovitne, Kamianka-Dniprovska raion, Zaporizhia oblast. Excavations in 1972 uncovered 14 graves in 13 kurhans. Among the objects recovered in the course of the excavations were earthenware goblets, bronze adornments, a bronze knife

with an iron handle, and some of the oldest glass jewelry found in eastern Europe.

Stepova-Karpiak, Mariia [Karpiak, Marija], b 9 November 1903 in Pynske, Minsk gubernia, d 5 July 1984 in Philadelphia. Heroic character actress. She worked in various Ukrainian touring troupes in Galicia and Volhynia (1924–32), the Zahrava Theater (1932–8), the Kotliarevsky Theater (1938–9), the Lesia Ukrainka Theater (1939–41), and the Lviv Opera Theater (1941–4). She fled from Ukraine during the Second World War and then acted in the Ensemble of Ukrainian Actors in postwar Germany. After emigrating to the United States she continued with the ensemble (1949–53).

Stepovy, Kostiantyn [Stepovyj, Kostjantyn] (aka Blakytyn, both noms de guerre of Kostiantyn Pestushenko), b 1897 in Hannivka, Kherson gubernia, d April 1921 in the Kryvyi Rih region. Partisan otaman. In 1918 he joined the Army of the UNR. When it retreated west in 1919, he returned to his native area and organized anti-Bolshevik partisan units. In May 1920 he united various insurgent units into the Steppe Division, and for the next six months he conducted guerrilla operations against the Red Army. Facing capture by a Cheka unit, he committed suicide.

Yakiv Stepovy

Dmytro Stepovyk

Stepovy, Yakiv [Stepovyj, Jakiv] (pseud of Yakiv Yakymenko), b 20 October 1883 in Pisky, near Kharkiv, d 4 November 1921 in Kiev. Composer, teacher, and music critic; brother of F. *Yakymenko. Recruited to sing with the St Petersburg court choir in 1895, he studied at the St Petersburg Conservatory in 1902–9 under N. Rimsky-Korsakov and A. Liadov. He lectured at the Kiev Conservatory from 1917 and was musical director of the Muzychna Drama theater and the State Vocal Ensemble from 1919. Stepovy played an important role in establishing a national school of Ukrainian music and is regarded (together with colleagues such as K. Stetsenko) as one of the luminaries of Ukrainian music. His compositions include numerous works for solo voice to the words of T. Shevchenko, I. Franko, Lesia Ukrainka, P. Tychna, M. Rylsky, and others; the cycles *Barvinky* (Periwinkles) to the words of various poets and *Pisni nastroi* (Songs of Mood, 1907–9) to the words of O. Oles; instrumental works such as sonatas,

rondos, a fantasia, a cycle of miniatures for piano (1909–13); and two suites for orchestra based on Ukrainian folk songs. Among his works for choir are 50 Ukrainian folk song arrangements, the children's vocal cycle *Prolisky* (Glades), a collection of songs for children to Shevchenko's *Kobzar*, and an unfinished opera based on Shevchenko's *Nevol'nyk* (The Captive). Biographies of Stepovy by M. Hrinchenko (1929 and 1959), V. Nadenenko (1950), Sh. Shvartsman (1951), T. Bulat (1980), and H. Stepanchenko (1987) have been published in Kiev.

R. Savytsky

Stepovych, Andronyk [Stepovyč] (né Dudka-Stepovyč), b July 1857 in Lebedyntsi, Pryluka county, Poltava gubernia, d 1935 in Kiev. Slavist. He graduated from Galagan College (1875) and Kiev University (1879). He worked as a school inspector in Volhynia gubernia, taught Russian literature in several Kiev gymnasiums (1879–88), and taught Slavic philology at Kiev University (1895–1917). He was also director of Galagan College (1893–1906), and in 1907 he founded a private men's gymnasium in Kiev. In the Soviet period he was a professor of Slavic studies at the Kiev Institute of People's Education (1920–4), and he taught Slavic philology to graduate students at the VUAN until 1930. As a scholar he was influenced by his teacher O. Kotliarevsky and by P. Zhytetsky. From 1877 on he published many articles and Russian encyclopedia entries on Czech, Bulgarian, Serbian, Croatian, and Slovenian literature and translated into Russian West and South Slavic literary works (eg, by A. Jirásek, J. Vrchlický, and I. Vazov), thereby playing an important role in popularizing those literatures in the Russian Empire. His major contributions were a history of Czech literature (1886) and books of essays on the history of Slavic literatures (1893) and the history of Serbo-Croatian literature (1899). He also edited the annual of Galagan College (from 1894) and a few Slavist compendiums, published materials from the Galagan College archives, and wrote many studies and reviews in the fields of Ukrainian folk music, education, philology, and social and regional history in *Kievskaja starina* and the VUAN serials *Etnohrafichnyi visnyk*, *Za sto lit*, *Zapysky Istorychno-filolohichnogo viddilju*, and *Pervisne hromadianstvo ta ioho perezhytty na Ukraini*.

R. Senkus

Stepovyk, Dmytro, b 7 October 1938 in Slobodyshche, Berdychiv raion, Zhytomyr oblast. Art historian and journalist. Since 1970 he has been a research fellow at the AN URSS (now ANU) Institute of Fine Arts, Folklore, and Ethnography in Kiev. He has written over 300 articles and reviews, and books on Ukrainian-Bulgarian artistic relations (1975); Ukrainian art (1976); Bulgarian art (1978); 16th- to 18th-century Ukrainian graphic art (1982); baroque master engravers, such as O. Tarasevych (1975), L. Tarasevych (1986), and I. Shchyrsky (1988); and Ukrainian art of the first half of the 19th century (1982). He has also edited an album of T. Shevchenko's paintings and graphic works (1984, 1986) and contributed entries to the *Encyclopedia of Ukraine*.

Steppe. A term, originally applied to the natural grasslands of *Southern Ukraine, which has been generalized to designate any natural grassland plain with a temperate, semiarid climate and chernozem or chestnut soils. The Ukrainian steppe encompasses most of the western seg-

ment of the Eurasian steppe that is known as the Black Sea (or Pontic) steppe province. The province forms a wedge, delimited by the forested foothills of the Crimean Mountains and the Caucasus Mountains in the south, the forest-steppe zone to the northwest, and the drier, more continental steppes east of the Volga. The border between the forest-steppe and the steppe is not distinct, but may be defined by the line Cahul–Tyraspol–Kirovohrad–Krasnohrad–Balakliia–Valuiky–Buturlynivka–Atkarsk–Samara. The steppe thus occupies about 240,000 sq km (40 percent) of Ukraine, nearly 300,000 sq km (40 percent) of the compact Ukrainian ethnographic territory, and 460,000 sq km (48 percent) of both compact and mixed Ukrainian national territory.

The steppe, endowed with the greatest heat resources in Ukraine, has the longest growing season, but receives the least precipitation and often suffers from drought. The mean January temperatures range from -2°C along the Black Sea coast to -10°C (Buturlynivka); the mean July temperatures are from 20°C in the north to 24°C in the eastern Stavropol region. The frost-free period ranges from 220 days in the southwest to 150 days in the northeast. The annual accumulation of degree-days above 10°C increases southward from 2,800 to 3,600, and the growing season increases from 210 to 245 days. The relatively moderate southern climate allows for the cultivation of heat-loving crops, relay cropping, and even double cropping. The annual precipitation, however, decreases southward from 450 mm along the forest-steppe margin to 300 mm at Perekop. The moisture deficit, generated by an average annual evaporation of 900–1,000 mm, is in part compensated for by an early summer precipitation maximum (when the plants need more water). Moisture accumulation in the soil is unstable, however, for the meager winter snow accumulation is often removed by thaws. The small rivers in the steppe tend to be seasonal and to dry up in the summer. The large rivers, such as the Dnieper and the Boh, carry their water in transit. The small lakes, often in *pody*, are seasonal; the large lakes are of the coastal, liman type, many with saline water.

The Ukrainian steppe is frequently differentiated according to climatic and soil conditions into three subzones, the northern steppe, the middle steppe, and the southern steppe. The northern subzone is characterized by a natural vegetation of meadow fescue and feather grass on ordinary, medium humus content (6–8 percent) chernozems. Its natural vegetation consisted of a luxuriant growth of tight-turfed, narrow-leaved grasses (such as feather grass and fescue), forbs (such as drooping sage, veronica, campion, steppe tulips), and shrubs (blackthorn, almond, steppe almond). The sandy river terraces were covered with pine forests. Some of the natural vegetation is preserved in the Luhanske Nature Reserve and the Ukrainian Steppe Nature Reserve.

The middle steppe, extending along the Black Sea coastal plain eastward toward the northern coast of the Sea of Azov, is characterized by narrow-leaved fescue and feather grass on southern chernozems (5–6 percent humus content) and dark chestnut soils (3–4 percent humus content). Its vegetation, dominated by narrow-leaved xerophytic grasses (such as feather grass, esparto grass, and several fescue grasses) with an admixture of xerophytic forbs (such as limonium) and spring ephemerals, is preserved in the Askania-Nova Nature Reserve.

The southern steppe, which straddles Perekop Bay and

Syvash Lake, consists of dry wormwood-grassland steppe on chestnut and solonetz soils (2–3 percent humus content). The vegetation, containing wheat grass and fescue grass and occasionally esparto grass and several sages, is preserved in the Azov-Syvash Game Preserve.

The present fauna of the steppe is dominated by soil-boring rodents, who find sanctuary from inclement weather underground, and by their predators. Among the rodents are rabbits, marmots, hamsters, mice, and European mole rats; the predators are the polecat, the fox, and the wolf. Birds include larks, quail, yellow bunting, partridge, windhover, and, less commonly, bustards, owls, and eagles.

The Ukrainian steppe has been almost completely modified by human activity. Of the total land area in the steppe zone of Ukraine (1981), 64.9 percent is cultivated, 2.4 percent is under perennial plantings, 0.8 percent is hayfields, 10.8 percent is pastures, 4.2 percent is woodland (mostly riverbank and shelterbelt plantings), and the remaining 16.9 percent is devoted to other uses. Grains occupy one-half of the cropped area, among which winter wheat is prevalent. Among industrial crops sunflower and to a lesser degree sugar beets in the northeast and the Kuban are important. Heat-loving melons and vegetables such as tomatoes are produced in the Donbas, near Kherson, and near Odessa (in part for consumption in the northern cities). Vineyards are particularly common west of Odessa, near Kherson, and in the Crimea. Livestock densities are not high, but sheep are dominant on the dry pastures of the southern steppe. Moisture deficit, drought, and frequent *sukhovii* and dust storms have hindered agricultural production. Attempts to counter such climatic hazards have included shelterbelt afforestation and irrigation as well as the melioration of salinized soils following improper or careless irrigation.

Steppe dialects. One of the three dialectal groups comprising the *southeastern dialects. The dialects evolved in the 17th to 20th centuries as a result of the intermingling of settlers in southern Ukraine speaking the Podilian, South Volhynian, Chernihiv, Poltava, and central Polisian dialects. They have also been influenced by the *Russian language in Ukraine. The dialects are spoken south of the line Uman–Novomyrhorod–Chyhyryn–Krasnohrad–Izium–Luhanske. They are divided into three subgroups: the western (in southern Bessarabia and Odessa and Mykolaiv oblasts between the Prut and Boh rivers), in which Podilian and Volhynian features are the most evident; the central (in Kirovohrad, Kryvyi Rih, Dnipropetrovske, and Zaporizhia oblasts); and the eastern (in Donetsk and Luhanske oblasts).

The features of the steppe dialects are (1) the softened pronunciation of consonants before *i* derived from \bar{o} (eg, *st' il su stil* 'table'); (2) the retention of *o* derived from \bar{o} (eg, *odn' imá, stójte* [SU *vidnimáje, stíjite*] 'subtracts, stand [pl impl]'); (3) simplification of the group *ždž* in verbal forms of the type *odjžžát* (SU *vid' jžžátý*) 'to depart [by vehicle]';

(4) pronunciation of the group *m'ja* as *mn'a* (eg, *mn'áty* [Standard Ukrainian (SU) *m'játyl*] 'to wrinkle'); (5) pronunciation of unstressed *o*, *e* as *u*, *i* before a subsequent stressed *u*, *i* (eg, *hudúj, min'í* [SU *hodúj, mení*] 'feed [sing impl, to me]') and in endings of the type *slúxajiš* (SU *slúx-ajěš*) 'you listen'; (6) hardened pronunciation of *c'* in forms of the type *prósycca, prós'acca* (SU *prósyt'sja, prósjat'sja*) '(s)he/they plead', particularly in the west; (7) pronunciation of the type *d'it, t'ašké* (SU *did, tjažké*) 'grandfather, heavy'; (8) influence of the endings of hard nouns on those of soft and mixed nouns (eg, *kon'óvi, koval'óm, nožóm, zem-l'ój(u), dušój(u)* [SU *konévi, kovalém, nožém, zemléju, dušéju*] 'horse (dat), blacksmith, knife, land, soul (inst)'); (9) the endings *-oj/-ej* (in addition to *-uju/-uju*) in instrumental singular feminine nouns and *-iv* in genitive plural feminine and neuter nouns (eg, *žinkíu, nočíu, jáblukiú, poros'atiú* [SU *žínók, nočěj, jábluk, porosját*] 'women, nights, apples, piglets'), and, sporadically, forms such as *na ruk'í, na noh'í* (SU *na ruci, na nozi*) 'on the arm, on the leg' in dative and locative singular feminine nouns; (10) pronominal forms of the type *do jóho, kolo jéji, z jim, bez jix* (SU *do n'óho, kolo néji, z nym, bez nyx*) 'to him, near her, with him, without them'; (11) verbal forms of the type *krut'ú, xod'ú, voz'ú, pokósynyj, pytá, pytát', pytác'c'a, pytájus', pytálas', pytáús'* (SU *kručú, xodžú, vozú, pokóšenyj, pytáje, pytáty, pytátysja, pytájusja, pytálasja, pytávsja*) 'I turn, I walk, I drive, mown, he asks, to ask, to enquire, I enquire, she enquired, he enquired'; (12) levelling of the *-y/-ji-* and *-e-* conjugations in root-stressed verbs (eg, *krúte, krút'ut'* [SU *krútyt', krútjat'*] 'he turns, they turn'); (13) remnants of the archaic type of agreement of predicates with collective nouns used as subjects (eg, *naród zbihlýs', mólođiž pišlý* [SU *naród zbihsja, mólođ' pišlá*] 'the people gathered, the youth went').

Lexical *Turkisms are widespread, particularly in fishing and gardening terminology. *Rumanianisms are found in the western subgroup's shepherding and gardening terminology. In the eastern subgroup, in southeastern Donetske oblast along the Azov littoral, the Russian influence has been quite strong and has resulted in mixed Ukrainian-Russian dialects. The Ukrainian dialects spoken in Rostov oblast, the Kuban, and the Stavropol region of Subcaucasia are similar to the steppe dialects.

The steppe dialects have been studied by linguists such as A. Berlizov, Y. Dzendzelivsky, A. Moskalenko, L. Tereshko, V. Drozdovsky, A. Mukan, T. Zavorotna, V. Karpova, Ya. Nahin, S. Samiilenko, V. Vashchenko, O. Horbach, and I. Matviias. Their grammatical and lexical elements can be found in the belletristic works of I. Tobilevych, V. Vynnychenko, and Yu. Yanovsky.

O. Horbach

Steppe Ukraine. See Southern Ukraine.

Stepura, Hryhorii, b 1881, d 1939 in Rivne, Volhynia. Civic and political activist. While practicing law in Kamianets-Podilskyi he was active in various local organizations. In 1917 he became a member of the Central Rada and gubernial commissioner for Podilia. From 1920 he lived in Rivne, where he was arrested and executed by the Soviets.

Stercho, Petro [Sterčo, Petro], b 14 April 1919 in Kuzmyne, Bereg county, Transcarpathia, d 18 June 1987 in Narberth, Pennsylvania. Economist, historian, and civic leader; full member of the Shevchenko Scientific Society. A graduate of the Ukrainian Higher School of Economics

Petro Stercho

Metropolitan Volodymyr Sterniuk

in Munich (PH D, 1949), he emigrated to the United States in 1950 and taught at St Vincent's College (1955–63) while studying political science at the University of Notre Dame (PH D, 1959). From 1963 he lectured in economics at Drexel University in Philadelphia. He was a leading member of many Ukrainian organizations, such as the United Ukrainian American Relief Committee, the Ukrainian Congress Committee of America, the Ukrainian American Coordinating Council, the Carpathian Sich Brotherhood, and the *Ukrainian American Association of University Professors (president, 1967–71). Besides numerous articles in history and economics, he wrote *Carpatho-Ukraine in International Affairs, 1938–1939* (1959), *Karpato-ukraíns'ka derzhava* (The Carpatho-Ukrainian State, 1965), *Diplomacy of Double Morality: Europe's Crossroads in Carpatho-Ukraine, 1919–1939* (1971), and (with M. Stakhiv) *Ukraine and the European Turmoil, 1917–1919* (1973).

Sterlet (*Acipenser ruthenus*; Ukrainian: *sterliad, chechuha*). A fish of the *sturgeon family Acipenseridae, up to 125 cm in length and 16–17 kg in weight, with a life span of up to 22 years. In Ukrainian waters sterlet is found in the Black Sea, around the Danube delta, and in the Sea of Azov. It is a valuable commercial fish and is a source of caviar. Changing ecological conditions have diminished the number of sterlets, and artificial breeding and acclimatization are being experimented with in an attempt to increase their numbers. A productive hybrid crossed with white sturgeon (beluga) was recently obtained.

Sterniuk, Volodymyr [Sternjuk], b 12 February 1907 in Pustomyty, Lviv county, Galicia. Ukrainian Catholic metropolitan. He studied philosophy and theology in Belgium, where he entered the Redemptorist order in 1927. He was ordained a priest in Leuven in 1931 by Bishop V. Ladyka of Canada. After completing his theological studies in 1932, he returned to Galicia to do missionary work in Volhynia and the Ternopil and Stanyславiv (now Ivano-Frankivske) regions, and then moved to Lviv, where he was consultant. In 1945 he was arrested in Lviv and exiled to Siberia. After being released in 1952, he returned to Lviv, where he worked in menial jobs and continued to be active in the underground church. In July 1964 he was consecrated bishop of Peremyshl by Bishop V. Velychkovsky, and in 1973 he was named deputy to Cardinal Y. Slipy and acting archbishop of Lviv and Halych metropolity. In August 1989, after the legalization of the Ukrainian Catholic church, he called a congress of all bish-

ops of Halych metropoly. He has participated in negotiations with the Russian Orthodox church and the Vatican concerning the return of churches, monasteries, and other institutions confiscated from the Ukrainian Catholic church in 1946 and has helped preside over the rebirth of the church.

Iryna Steshenko

Ivan Steshenko (1873-1918)

Steshenko, Iryna [Stešenko], b 5 July 1898 in Kiev, d 30 December 1987 in Kiev. Actor and translator; daughter of I. and O. *Steshenko and granddaughter of M. *Starytsky. She graduated from the Higher Courses for Women (1918) and the Lysenko Music and Drama Institute (1920) in Kiev and performed in prominent roles with the Shevchenko First Theater of the Ukrainian Soviet Republic (1920-3) and *Berezil (1923-33) theater troupes under the direction of L. Kurbas in Kiev and Kharkiv. She gave up acting in 1949. Steshenko began translating in 1920. Her translations include comedies by Molière and C. Goldoni, several plays by W. Shakespeare, J.W. von Goethe's *Egmont*, F. Schiller's *Don Carlos*, F. Crommelynck's *Tripes d'or*, A. Berg's *Wozzeck*, Mark Twain's *Adventures of Huckleberry Finn*, and works by Jack London, M. Gorky, G. de Maupassant, and H. Ibsen. Several of her translations were used in Berezil's productions.

Steshenko, Ivan [Stešenko] (pseud.: I. Serdesny, I. Sichovyk, I. Svitlenko, I. Stepura), b 24 June 1873 in Poltava, d 30 July 1918 in Poltava. Civic and political figure, literary scholar, writer, and translator; member of the Shevchenko Scientific Society from 1917; husband of O. and father of Iryna and Ya. Steshenko, and son-in-law of M. *Starytsky. While he was a student at Kiev University (1892-6), he was active in the Literary Hromada (the successor to *Pleiada). He published his first literary articles, poems, and translations in Lviv's *Prauda*, *Zoria*, and *Dzvinok*. He graduated from the historical-philological faculty (1896) and became a teacher at the Kiev women's gymnasium. Steshenko became politicized by M. Drahomanov's writings and through his friendship with M. Kovalevsky. In 1896, together with Lesia Ukrainka and others, he formed the first Ukrainian social-democratic circle and wrote the drama *Mazepa*. In 1897 he was imprisoned for four months, exiled from Kiev for three years, and prohibited from teaching. He occupied himself by preparing a Ukrainian dictionary (which was never published). He wrote the first book about I. Kotliarevsky's poetry (1898), published the poetry collections *Khutorni sonety* (Farmstead Sonnets, 1899) and *Stepovi motyvy* (Steppe Motifs,

1900), and began publishing articles and reviews in *Kiev-skaia starina*.

Steshenko returned to Kiev in 1900 and became a leading figure in the Ukrainian national movement. He was elected a member of the Hromada of Kiev, and collaborated with the General Ukrainian Non-Party Democratic Organization and its successor, the Society of Ukrainian Progressives. Steshenko continued publishing in many periodicals, delivered lectures in Kiev and elsewhere, and became secretary of the Kiev Literary-Artistic Society until its abolition in 1905. In 1902 he published the first major critical biography of I. Kotliarevsky. In 1905 he copublished the satirical magazine *Sheršen'*. In 1906 he was reinstated as a teacher, and from 1907 until 1917 he taught literature at the First Commercial School in Kiev, the Higher Courses for Women, and the Lysenko Music and Drama School. He was secretary and deputy head of the Ukrainian Scientific Society, published a history of Ukrainian drama (1908) and edited the monthly *Siavo* (1913-14), and directed a gymnasium for war refugees (1915-17).

After the February Revolution of 1917 Steshenko was elected a member of the Kiev Civic Executive Committee. He cofounded and headed the *Society of School Education and became a delegate to the Central Rada. He was appointed the UNR government's general secretary (June-December 1917) and minister of education (January-February 1918). He directed the Ukrainization of the national school curriculum and pedagogical education and founded the Ukrainian State Academy of Arts and the Ukrainian Pedagogical Academy. He was murdered by unknown assailants while on vacation. Steshenko was given a state funeral and buried in the Baikove Cemetery in Kiev.

Steshenko wrote many literary articles in addition to his books on Kotliarevsky and Ukrainian drama. He also contributed the chapter on 14th- to 18th-century Ukrainian literature to the encyclopedic compendium *Ukrainskii narod v ego proshlom i nastoiashchem* (The Ukrainian People: Its Past and Present, 2 vols, 1914, 1916) and translated works by Ovid (*Metamorphoses*), F. Schiller (*Die Jungfrau von Orleans*), G. Byron, A. Pushkin, F. Coppée, and P.-J. de Béranger into Ukrainian.

R. Senkus

Steshenko, Ivan [Stešenko] (Steshenko), b 24 January 1894 in Lebedyn, Kharkiv gubernia, d 3 May 1937 in Moscow. Opera and concert singer (bass). He studied at the Petrograd Conservatory and in Italy and won first prize in an international competition in Parma (1914). A soloist of the Kiev Opera (1917-21), he toured Poland, England, France, and Italy and in 1922-31 sang in American opera houses (Chicago, Philadelphia, Washington, DC, New York, and Boston), where he appeared with the conductors L. Stokowski and E. Goossens. After returning to Ukraine he was a soloist of the Kharkiv Opera (1931-4) and the Kharkiv Philharmonia (1934-7). His main roles were Zarastro in W. Mozart's *Die Zauberflöte*, Basilio in G. Rossini's *Il Barbiere di Siviglia*, Galitsky in A. Borodin's *Prince Igor*, and the name-parts in M. Lysenko's *Taras Bulba*, M. Mussorgsky's *Boris Godunov*, and A. Boito's *Mefistofele*. In recitals he performed art songs by M. Lysenko, Ya. Stepovy, and K. Stetsenko.

Steshenko, Oksana [Stešenko], b 1875 in Karpivka, Kremenchuk county, Poltava gubernia, d 1941. Writer; daughter of M. *Starytsky, and wife of Ivan and mother of Iryna and Ya. Steshenko. She compiled the children's an-

thology *Ridni kolosky* (Native Sheaves, 1924; 2nd edn, *Kolosky zhyttia* [Sheaves of Life, 1925]) and wrote the children's story collection *Iak Iurko podorozhuovav na Dni-provi porohy* (How Yurko Travelled to the Dnieper Rapids, 1929; rev edn 1942) and *Heroi zv'iazku* (Heroes of Communication, 1930). She also wrote literary criticism and translated Russian literature into Ukrainian. Steshenko and her sister, L. *Starytska-Cherniakhivska, were arrested by the NKVD. They were deported to Kazakhstan and died (were shot?) en route.

Steshenko, Serhii [Stešenko, Serhij], b 5 July 1902 in Nova Vodolaha, Valky county, Kharkiv gubernia. Scenery designer. He completed study at the Kharkiv Institute of Fine Arts (1929, pupil of S. Prokhorov and I. Padalka) and became a specialist in scenery and costumes for puppet theaters, particularly the Lviv Puppet Theater. He also designed for the Volhynian Ukrainian Music and Drama Theater.

Steshenko, Yaroslav [Stešenko, Jaroslav], b 6 April 1904 in Kiev, d 11 March 1939. Bibliographer; son of I. and O. *Steshenko. He graduated from the Kiev Institute of the National Economy (1928), and from 1929 he worked at the Ukrainian Scientific Institute of Bibliology in Kiev. He wrote articles on questions of bibliography and bibliology, on H. Narbut, and on S. Maslov and compiled several bibliographies, including an important systematic catalog of VUAN publications (1930, with M. Ivanchenko).

Fedir Steshko

Osyp Stetkevych

Steshko, Fedir [Steško], b 16 September 1877 in Kamianka, Sosnytsia county, Chernihiv gubernia, d 31 December 1944 in Prague. Musicologist. A lawyer by training, he worked as a judge for the Russian military court in Vladivostok before emigrating to Prague in 1920. There he completed his studies in musicology (PH D, Charles University, 1936) and lectured at the Ukrainian Free University and the Ukrainian Higher Pedagogical Institute. His published works include *Dzherela do istorii pochatkovoï doby tserkovnoho spivuv v Ukraïni* (Sources for the History of the Early Period of Religious Singing in Ukraine, 1929) and *Českí hudebníci v ukrajinské církevní hudbě* (Czech Musicians in Ukrainian Church Music, 1935) as well as articles on the history of Ukrainian music.

Stetkevych, Osyp [Stetkevyč] (Stetkewicz, Joseph), b 12 January 1876 in Plotycha Velyka, Berezhany county, Galicia, d 23 January 1942 in New York. Teacher, journalist, and civic figure. He completed study at a teachers' seminary and taught for several years until forced to emigrate to the United States in 1904 because of persecution by the Polish Galician authorities. He was active in Ukrainian educational work in the United States (he urged the development of nationwide structures and standard texts) and worked for an extended period with the newspaper *Svoboda* as an editor (1910 and 1912–19) and associate. He was also a cofounder of the American Ruthenian National Council.

Hryhorii Stetsenko's icon of the Theotokos in Roman

Stetsenko, Hryhorii [Stecenko, Hryhorij], b April 1710 in Romen, Lubni regiment, d 11 February 1781 in Romen. Painter. In the 1740s he painted murals at the mansion of K. and O. Rozumovsky on their estate, Pokorshchyna, near Kozelets. He painted murals and icons in the Church of the Resurrection (1748) in Hlukhiv and the Church of the Nativity of the Mother of God (1758) in Kozelets, and the iconostasis in the Transfiguration Cathedral in Pochep (1758–9). In the 1750s he served as Hetman K. Rozumovsky's official painter in Hlukhiv and painted portraits of the hetman and his brother Oleksii in 1753. He also painted other icons, such as the *Romen Theotokos*, John

the Theologian, and *Lying in the Coffin*. In many of his icons he used typically Ukrainian figures in contemporary settings. He was promoted to the status of fellow of the banner in the Lubni Cossack Regiment in 1766 and lived thenceforth in Romeni.

Kyrylo Stetsenko

Stetsenko, Kyrylo [Stecenko], b 24 May 1882 in Kvitky, Kaniv county, Kiev gubernia, d 29 April 1922 in Vepryk, Vasytkiv county, Kiev gubernia. Composer, conductor, teacher, and community activist. Stetsenko's musical talents were recognized while he was studying in Kiev by I. Apolonov, director of the St Michael's Golden-Domed Monastery choir. In 1899 he joined the Lysenko choir. After graduating from the Kiev Theological Academy in 1903 he began teaching music at the pedagogical institute and conducting church and secular choirs, continued studying composition under H. Liubomyrsky at the Lysenko Music and Drama School, and participated with leading Ukrainian musical figures in an unsuccessful attempt to establish an independent music publishing house. At the same time he compiled the songbook *Luna* (Echo). His activities led to his arrest and exile (1907–10) to a town in the Donbas, where he taught music in a local school. A year later he moved to Bila Tserkva, where he taught music in the gymnasium, and then to Tyvriv in the Vinnytsia region. Ordained in 1911, he became a pastor in a Podilian village near Tomashpil. He ceased virtually all his creative work until 1917, when he was recruited to the music department of the UNR Ministry of Education. Although many of his activities involved organizing and teaching (including the establishment of major choirs such as the *Ukrainian Republican Kapelle and Dniprosoiuz [later DUMKA]), he also returned to composing and conducting.

Stetsenko's compositions and pedagogical work continued the Ukrainian national music tradition established by M. *Lysenko. Rich melodies and harmonies are characteristic of his musical language. Songs for solo voice (more than 30) and settings of words of T. Shevchenko, I. Franko, Lesia Ukrainka, O. Oles, and others form a major part of his creative work. His compositions for choir are diverse in form: religious works (two liturgies, a requiem), cantatas, choral works both a cappella and with piano accompaniment, and arrangements of Ukrainian folk songs (including carols). He wrote scores for the plays *Svatannia na Honcharivtsi* (Matchmaking at Honcharivka, 1909) by H. Kvitka-Osnovianenko, *Pro shcho tyrsa shelestila* (What the Feather Grass Murmured About, 1916) by S. Cher-

kasenko, and *Buval'shchyna* (A True Tale) by A. Velisovskyy. His operatic works include the unfinished *Polonianska* and *Karmeliuk* and the dramatic scene *Ifigeniia v Tavrii* (Iphigenia in Tauris, 1921), based on Lesia Ukrainka's play. He composed music to T. Shevchenko's poem *Haidamaky* (1919–21) and wrote two children's operas, *Lysychka, kotyk i pivnyk* (The Vixen, the Cat, and the Rooster, 1910) and *Ivasyk-Telesyk* (1911). Stetsenko also compiled songbooks for school and home use.

W. Wytwycky

Stetsenko, Vasyl [Stecenko, Vasyl'], b 27 December 1901 in Kozatske, Zvenyhorodka county, Kiev gubernia, d 9 December 1971 in Kiev. Graphic artist. In 1930 he graduated from the Kiev State Art Institute, where he studied under V. Kasiian and S. Nalepinska. He made posters, prints, and book illustrations, using mostly wood engraving. He did the print series 'The Dnieper' (1940) and a series of pencil sketches 'Crossing the Danube' (1943), and designed editions of the poetry of M. Rylsky, P. Tychnyna, Lesia Ukrainka, A. Svydnytsky, and V. Samiilenko (1957); books of folk wisdom (1959), old Ukrainian humor and satire (1959), and contemporary Ukrainian humor (3 vols, 1960); and bookplates.

Stetsenko, Yurii [Stecenko, Jurij], b 11 April 1945 in Kiev. Canoeing competitor. World champion in doubles (with O. Shaparenko) at 1,000 m in 1966, and four-man canoes in 1970 and 1971 at the same distance. He was a gold medalist at the 1972 Olympics in the four-man 1,000 m. An eleven-time champion of the USSR, he was also champion of Ukraine many times over.

Stetsiuk, Hryhorii [Stecjuk, Hryhorij], b 13 October 1892, d autumn 1948 in Galicia. Galician journalist and community figure. He was chief editor of the Lviv newspaper *Nash prapor* (1932–9) and of *Visti* (1942–4), a paper published in Berlin for Ukrainians forced to work in Germany. He was arrested by the Soviet police in 1944 and imprisoned in a concentration camp in Kazakhstan until 1948. He died soon after returning home.

Stetsiuk, Kateryna [Stecjuk], b 23 November 1905 in Shpytka, Kiev county. Historian. A graduate of the Kiev Institute of People's Education (1928), she worked at the AN URSS (now ANU) Institute of History (from 1938) and taught at the Kiev Pedagogical Institute and the CC CPU Higher Party School (1938–53). She wrote *Vplyv povstannia Stepana Razina na Ukraïnu* (The Influence of S. Razin's Uprising on Ukraine, 1947), *Pereiaslavs'ke povstannia 1666 r.* (The Pereiaslav Uprising of 1666, 1958), and *Narodni rukhy na Livoberezhnii i Slobids'kii Ukraïni v 50–70-kh rokakh xvii st.* (Popular Movements in Left-Bank and Slobidska Ukraine in the 1650s to 1670s, 1960) and contributed to the collective works *Istoriia Ukraïns'koi RSR* (History of the

Ukrainian SSR, 2 vols, 1967) and *Istoriia selianstva Ukraïns'koi RSR* (History of the Peasantry of the Ukrainian SSR, 2 vols, 1967).

Vasyl Stetsiuk

Stetsiuk, Vasyl [Stecjuk, Vasył'] (Steciuk, Basil), b 18 March 1910 in Hnylychky, Zbarazh county, Galicia, d 9 April 1975 in Jersey City, New Jersey. Classical philologist and pedagogue; member of the Shevchenko Scientific Society (NTSh) from 1950. He studied at Lviv University (1933; M ED, 1936). He lectured at the Ukrainian Free University in Munich after obtaining his PH D there (1946). After emigrating to the United States in 1950, he taught at the Ukrainian Technical Institute in New York (1955–63) and at Seton Hall University (1958–75). He was head of the NTSh Linguistic Commission and secretary of its Supreme Council (1970–5). He wrote a historical grammar of Latin (2 vols, 1950, 1953) in Ukrainian, a booklet on the Greek lexical fund in the Ukrainian language (1958), and various articles on classical philology.

Stetsiuk, Yakiv [Stecjuk, Jakiv], b 9 December 1922 in Mokre, Novohrad-Volynskyi okruha, Zhytomyr gubernia, d 15 October 1980 in Lviv. Writer. A former editor of *Zhovten'* (1951–5) and secretary responsible for the Lviv branch of the Writers' Union of Ukraine (1965–?), from 1952 on he published over 20 collections of stories and novelettes, the most recent of which are *Viriu* (I Believe, 1974), *Spalakh* (The Blaze, 1976), and *Des' tam syni zori* (Somewhere There Are Blue Stars, 1980). He also wrote the novels *Sovist'* (Conscience, 1964), *Zelenyi kut* (The Green Corner, 1965), and *Maidan* (The Square, 1970) and the historical novels *Honta* (1969) and *Ivan Pidkova* (1971). An edition of his selected works appeared in 1982.

Stetsko, Dmytro [Stec'ko], b 28 November 1943 in Polonna, Sianik county, Galicia. Avant-garde painter and sculptor. Since graduating from the Lviv School of Applied Art (1971) he has worked in Ternopil. His paintings are an amalgam of folk-art, Renaissance, and modernist influences. They include *Sunflowers* (1970), *Mowers* (1972), the triptych *Buckwheat Honey* (1980), the diptych *Cathedral* (1989), and the series 'Seasons of the Year' (1974–5), 'Sonata for Ciurlonis' (1978), 'Landmarks of History' (1981–90), and 'Peasant Frescoes' (1983); portraits of historical and cultural figures, such as Prince Volodymyr the Great (1984), Princess Olha (1987), T. Shevchenko (1986), Lesia Ukrainka (1986), I. Franko (1986), and D. Vyshnevetsky (1990); portraits of his mother (1976) and his wife (1978);

Dmytro Stetsko (self-portrait, oil, 1986)

and the self-portraits *Benefit* (1981), *White Portrait* (1984), and *Black Self-Portrait* (1985). More recently he has created cubist and abstract sculptures. He has also painted murals in several schools and institutes in Ternopil. The first solo exhibitions of Stetsko's works were held in Lviv and Kiev in 1989.

Slava Stetsko

Yaroslav Stetsko

Stetsko, Slava [Stec'ko] (née Muzyka), b 14 May 1920 in Romanivka, Ternopil county, Galicia. Political leader and journalist; wife of Ya. *Stetsko. She studied at Lviv University and the Ukrainian Free University. She was a co-founder of the Red Cross units serving the Ukrainian Insurgent Army during the Second World War. She was imprisoned during the German occupation of Ukraine, and remained in Germany as an émigré in 1944. Stetsko

became a member of the CC of the *Anti-Bolshevik Bloc of Nations (ABN). She edited the German edition of **ABN Correspondence* (1948), the quarterly *Ukrainian Review*, and other ABN periodicals, and she organized and participated in a number of international anticommunist congresses. She served as a member of the central executive of the Ukrainian Youth Association (1948–53). From 1968 she was head of the external affairs sector of the OUN (Bandera faction). She was a co-organizer of the European Council of Liberty and became its vice-president in 1985. In 1986 she became president of the ABN and an executive member of the *World Anti-Communist League. In 1991, at the Seventh Great Assembly of the OUN, Stetsko was elected leader of the OUN Bandera faction.

Stetsko, Yaroslav [Stec'ko, Jaroslav] (pseud.: Z. Karbovyh, E. Orlovsky, S. Osinsky, B. Ozersky, and Y. Pidlesetsky), b 19 January 1912 in Ternopil, d 5 July 1986 in Munich. Political leader and ideologue of the Ukrainian nationalist movement. As a youth he joined the underground Ukrainian Nationalist Youth organization and subsequently the *Ukrainian Military Organization and the *Organization of Ukrainian Nationalists. In 1932 he was appointed to the OUN executive with responsibility for ideology. The Polish authorities arrested him several times for his activities; in 1936 he was sentenced to five years' imprisonment, but he was released under a general amnesty in 1937. He was responsible for the preparations for the Great Assembly of the OUN held in Rome in 1939. He became one of the members of the Revolutionary Leadership of the OUN, which emerged in 1940 and was headed by S. *Bandera. At the Cracow Great Assembly he was elected Bandera's second-in-command. He participated in the organization of OUN expeditionary groups on the eve of the German-Soviet War. He prepared the *proclamation of Ukrainian statehood of 30 June 1941; at the National Assembly in Lviv where the renewal of Ukrainian statehood was officially proclaimed, he was chosen premier of the *Ukrainian State Administration. For refusing to annul the proclamation of statehood Stetsko was arrested by the Gestapo on 12 July 1941; he was first taken to Berlin and then incarcerated in the *Sachsenhausen concentration camp, until the fall of 1944. After his release he settled in Munich.

In 1945 Stetsko was elected to the Leadership of the OUN (Bandera faction). After the war he was active in the world anticommunist movement. In 1946 he was elected head of the *Anti-Bolshevik Bloc of Nations (ABN); he remained president of that organization until his death. In 1946 he was also chosen to head the foreign policy sector of the external units of the OUN. As head of the ABN Stetsko signed an agreement of co-operation with the Chinese Anti-Communist League in Taiwan (1955), which resulted in an ABN mission (1957–60) and later representation (until 1971) in Taipei. He also served on the executive of the *World Anti-Communist League (est 1967) and was a founder and life member of the honorary presidium of the European Freedom Council. At the Fourth Great Assembly of the Bandera faction in 1968, he was elected head, a position he retained until his death. A number of his works were published posthumously in *Ukraïns'ka vyzvol'na kontsepsiia* (The Ukrainian Liberation Concept, 1987) and *Ukraine and the Subjugated Nations: Their Struggle for National Liberation* (1989). He left an account of the events surrounding

the proclamation of Ukrainian statehood, *Trydtsiatoho chervonia 1941* (The 30th of June 1941, 1967).

B. Folusiewicz

Stetsura, Ihor. See Stecura, Ihor.

Stiah (Banner). A monthly journal of the Ukrainian Evangelical Church of the Augsburg Confession published in Stanyslaviv in 1932–9. It was published and edited by Pastor T. Yarchuk.

Stieber, Zdzisław, b 7 June 1903 in Szczakowa, Chrzanów county, Poland, d 12 October 1980 in Warsaw. Polish linguist and Slavic philologist; member of the Polish Academy of Sciences from 1954. After graduating from Cracow University (PH D, 1929), he conducted fieldwork on the Lemko and with S. Hrabec on the Boiko dialects (1934–9) and served as a professor at Lviv (1937–9, 1944–5), Łódź (1945–52), and Warsaw (1952–66) universities. He wrote numerous works on the history, dialects, and structure of Common Slavic, Polish, and other Slavic languages, including a number of important works in Ukrainian linguistics: a book on the toponomastics of the Lemko region (2 parts, 1948–9); a dialectal atlas of the Lemko region (8 fascicles with 416 maps, 1956–64), based on fieldwork in 72 settlements in 1934–5; and a posthumously published book on the phonetics and phonology of the Lemko dialect (1982). Many of his articles were reprinted as *Świat językowy Stowian* (1974). Articles about him and a bibliography of his works were published as *Zdzisław Stieber (1903–1980)* in 1982.

Stih. v-4. The tallest peak (elevation 1677 m) in the Svydivets Ridge in Transcarpathia oblast. It is composed largely of sandy clay deposits. Its northern slope is covered with coniferous forest, and the higher elevations have sloping meadows. Landscape formations caused by glaciation are evident on the mountain.

Stilske fortified settlement. A 10th-century Rus' fortress near Stilske, Mykolaiv raion, Lviv oblast. Discovered in 1984, the fort encompassed an area of approx 250 ha, and the total length of its defensive structures was nearly 10 km.

Stilt, black-winged (*Himantopus h. himantopus*; Ukrainian: *khodulychnyk*). An Old World shorebird of the family Recurvirostridae (order Charadriiformes), with long, thin, pink legs and a long, slender, black bill. In Ukraine it is found on the shores of the Black Sea and the Sea of Azov. There is also an island colony of stilts in the Poltava region. Stilts are listed as rare birds in Ukraine. Their fossils date back to the Pleistocene era.

Stobensky [Stobens'kyj]. A family of 17th- and 18th-century wood carvers and wood sculptors from Zhovkva, Galicia. Hnat (d 1742) learned his craft in the carpentry and wood carving guilds of Zhovkva. He carved the iconostases in the Trinity Church in Zhovkva with Yu. Shymanovych, S. Putiatytsky, and V. Sokovych and in the churches at the Krekhiv, Mezhyhiria, and Krasnopushcha monasteries. His son, Ivan (d after 1775), learned his craft from his father and helped him carve the iconostases in Zhovkva, Krekhiv, and Krasnopushcha. In 1746 he moved

to Kiev, where he took part in rebuilding the campanile at the St Sophia Cathedral. Hnat's younger brother, Stepan (d late 18th century), was also taught by Hnat, and helped his nephew do the decorative carvings in the St Sophia campanile. In the 1750s he took part in the building of the Dormition Church in Poltava.

Stock and commodity exchanges (*birzhi*). Special markets for the sale and purchase of securities, such as stocks, shares, and bonds, or of commodity contracts. In Western Europe such exchanges arose in the 15th and 16th centuries. In the Russian Empire the first exchange opened in St Petersburg in 1703. The exchange, however, was not popular with the Russian merchants, who preferred to do business in the old manner. The second exchange opened in Odessa in 1796; it was followed by ones in Kiev (1815) Kharkiv (1818), and Kremenchuk (1834). The exchanges dealt primarily in commodities, particularly agricultural produce and raw materials, and often sold to foreign merchants. Only in the mid-19th century did exchanges in the Russian Empire begin to handle stocks and bonds. Stock trading grew rapidly with the rise of large joint-stock companies, especially in the railway, mining, and metallurgical industries. In Ukraine the first stock exchanges were set up in Odessa (1848), Kiev (1865), and Kharkiv (1868). In the Soviet period commodity exchanges with departments handling securities were permitted to operate under the NEP in Kiev, Kharkiv, and Odessa. In the early 1930s all exchanges were closed down.

Stockholm. The capital of Sweden (1990 pop 672,187, metropolitan area 1.2 million). References to Ukrainians in Stockholm before the First World War are sporadic. In 1654 Daniel Oliveberg de Graecani Atheniensis, an emissary of Hetman B. Khmelnytsky, arrived at the court of Charles x Gustav. P. Orlyk lived in the city with an entourage of 24 men in 1715–20, and some of his correspondence with Swedish officials has been preserved in the local state archive.

During the First World War O. Nazaruk headed a representation of the Union for the Liberation of Ukraine in the city. In 1916 a Ukrainian press bureau headed by V. Stepanivsky was established there. In 1918–21 B. Bazhenov and then K. Losky headed the UNR mission in Stockholm. Its secretary, the painter O. Maidaniuk, later remained in the city. M. Menzinsky sang with the Stockholm Royal Opera in 1904–10 (usually as a first tenor), returned to perform in 1914–17, and then settled in Stockholm in 1926. O. Myshuha was another leading operatic tenor to perform in the city, where he also taught (1919–21).

The small Ukrainian community grew largely after the Second World War. At its height it numbered about 200; today it stands at approx 50. The Ukrainian Hromada in Sweden was established in 1947 and has been headed successively by V. Fedorchuk, V. Butko, K. Harbar, and B. Zaluha (since 1979). In 1949–55 the Ukrainian Press Bureau was headed by B. Kentzhytsky. He also published *Stokholms'kyi visnyk*. In 1950–60 Yu. Borys headed the Ukrainian Academic Club, and in 1948–61 the Hetman P. Orlyk Ukrainian Hromada was headed by V. Dekhtiar.

A. Zhukovskyy

Stoianov, Andrii [Stojanov, Andrii], b 1830, d 15 June 1907. Jurist and legal historian. After graduating from Kharkiv University (MA, 1859) he studied abroad for two years and completed a doctoral dissertation on the history of the legal profession (1865). He taught legal history, international law, and Roman law at Kharkiv University (1865–85) and served as dean of the law faculty (1876–86). Besides articles on Western legal institutions, he wrote a book of recollections of D. Kachenovsky (1872) and *Ocherki istorii i dogmatiki mezhdunarodnogo prava* (Outlines of the History and Dogmatics of International Law, 1875).

Bishop Oleksander Stoika

Stoika, Oleksander [Stojka], b 16 October 1890 in Karachyn, Transcarpathia, d 31 May 1943 in Uzhhorod. Greek Catholic bishop. He studied theology in Budapest and was ordained in 1916, and then worked in the Transcarpathian church administration before being consecrated bishop of Mukachiv in 1932. He worked to improve the economic situation of his followers and initially patronized the 'Ru-thenian movement' in culture. After the Hungarian occupation of Transcarpathia in 1938, he moved his see to Uzhhorod and supported Hungarian policies and Magyarization.

Stoika, Yosyp [Stojka, Josyp], b ? in Chumaleve, Transcarpathia, d 1711. Orthodox bishop. He was a parish priest in Chumaleve and Bychkiv before he entered a monastery near Stryi. He was consecrated as the first bishop of Maramureş in 1690, after the eparchy was separated from Mukachiv eparchy because of fears that the entire region would be converted to the Uniate faith. Stoika was influenced by Calvinism and therefore met considerable opposition from the local Ukrainian and Rumanian clergy. He managed to retain his position for a time with backing from the Protestant Hungarian nobility but was finally deposed in 1705. His Rumanian successor proved totally unacceptable, and Stoika was returned as bishop in 1710. He died not long thereafter.

Stoiko, Mykola [Stojko], b 1881, d 1951. Pulmonary surgeon. A graduate of Odessa University (1909), he worked there until 1928. From 1932 he was director of the surgical clinic of the USSR Central Scientific Research Institute of Tuberculosis, and from 1939 he was a professor of surgery at the Central Institute for the Upgrading of Physicians (1939–51). His works include *Khirurgicheskoe lechenie legochnogo tuberkuleza* (The Surgical Treatment of Pulmonary Tuberculosis, 1949).

Stojković, Atanasije (Stoikovich, Afanasii), b 20 September 1773 in Ruma, Serbia, d 2 June 1832 in Kharkiv. Serbian novelist, physicist, and philosopher; one of the main representatives of Serbian sentimentalism and the author of the first systematic monograph on physics in Serbian (3 vols, 1801–3). After receiving his PhD from Göttingen University (1804) he became the first professor of physics at Kharkiv University (1805–13) and served as its rector (1807–8, 1811–13). He wrote books in Russian on the foundations of physics and physical astronomy.

Stokhid River [Stoxid]. A right-bank tributary of the Prypiat River that flows for 188 km through Volhynia oblast and drains a basin area of 3,125 sq km. The general width of the river is 5–15 m (60 m at its widest point). It is fed mainly by meltwaters, and freezes over from December to March. A large number of creeks and small tributaries flow into the river – hence its name, which can be understood literally as meaning ‘one hundred ways.’ During the First World War the Stokhid was the demarcation line between the Austro-Hungarian and Russian fronts from June 1916 to August 1917.

Stoliarov, Yakiv [Stoljarov, Jakiv], b 9 November 1878 in Moscow, d 3 December 1945 in Kharkiv. Scientist in the field of applied mechanics. He studied at the Kharkiv Polytechnical Institute and taught there and at other institutes in Kharkiv. He made contributions in the fields of construction mechanics, the strength of materials, and the theory of machines. He was a specialist in reinforced concrete and one of the scientists who first developed methods of calculating the breaking strength of reinforced-concrete structures.

Stoliarsky, Petro [Stoljars'kyj], b 30 November 1871 in Lypovets, Kiev gubernia, d 29 April 1944 in Sverdlovsk, Russia. Teacher and violinist. He studied at the Warsaw Conservatory with S. Barcewicz and at the Odessa Music School with E. Mlynarski and Y. Karbulka (graduated in 1898). He then played in the Odessa Opera orchestra (1898–1914) and taught at his private music school. His exceptional ability as a teacher earned him a position at the Odessa Conservatory in 1920. In 1933 he founded the first 10-year special music school for talented children in the USSR. Stoliarsky is considered one of the founders of a noteworthy school of violin playing in the former USSR. His method of teaching children the whole range of professional and artistic skills that they would use as performers achieved striking results, as is illustrated by the list of his students, which includes D. Oistrakh, N. Milstein, and E. Gilels.

Stolypin agrarian reforms. A series of measures introduced by P. Stolypin, the head of the Council of Ministers of the Russian Empire, between 1906 and 1911 in order to restructure the peasant land tenure system. They were instituted in the wake of the Revolution of 1905 in an effort to deal with the ongoing agrarian problem.

The legislation in which the reforms were introduced included the ukase ‘Concerning the Fulfillment of Certain Existing Laws on Rural Land Ownership and Land Use’ (22 November 1906) and a law passed by the State Duma on 27 June 1910. Those removed restrictions on landholding imposed by the peasant commune (**obshchina*). All

peasants were given the right to leave such communes along with the lands apportioned to them. Peasants also gained the right to demand that their allotments be consolidated into an integrated landholding, which could be farmed as a **khutir* (if the household were settled on the property) or a *vidrub* (if the household remained in a village). The latter right marked a radical departure from the common practice of farming small, scattered strips of land. The Peasant Land Bank provided loans for the purchase of land to establish *vidrub* or *khutir* holdings. The last reform was the Statute on Land Organization of 11 June 1911, which set a definite agenda for the land settlement commissions (at the gubernia and district volost levels) created by the ukase of 1906. In the Russian Empire in 1907–15 approx 26 percent of the total *obshchina* membership (2.5 million householders) took advantage of the reforms to acquire about 16.9 million desiatins of land (15 percent of total communal holdings).

In Ukraine the secession from communes was even more thoroughgoing, although it was also uneven because of the near-total absence of the *obshchina* in Right-Bank Ukraine and the Poltava region. As a result of the reforms about 42 percent of commune householders seceded in Southern Ukraine, 16.5 percent in Left-Bank Ukraine, and 48 percent in Right-Bank Ukraine. In Right-Bank Ukraine and Poltava gubernia virtually all of the land used by the peasantry became privately owned; in Chernihiv gubernia, the majority; and in Katerynoslav, Kharkiv, Kherson, and Tavriia gubernias, about half. In 1907–11 approx 225,000 Ukrainian householders established private *vidruba* and *khutory* consisting of 1.8 million desiatins of land. The most marked growth of such holdings occurred in the steppe gubernias and in Volhynia. Largely as a result of loans extended by the Peasant Land Bank peasants bought 385,000 desiatins of nobles' lands in 1906–9. By 1916 some 500,000 households in the nine Ukrainian gubernias, with 3.7 million desiatins of land, had been reorganized by land settlement commissions.

The new system encouraged peasants to show initiative and to improve their households. Assistance was provided by the Land Bank, agricultural associations, co-operatives, and zemstvo agronomists. Because of advancements in agricultural techniques (the alternation of crops) crop yields also improved (by 20 percent in 1904–12), and the value of farmsteads rose.

The intent of Stolypin's reforms was to improve the position of the wealthier peasantry and establish it as a base of support for the troubled imperial regime. Accordingly the reforms benefited only about 25 percent of the households. Poor and some middle-income peasants could not buy land because of high prices (400 to 700 rubles per desiatin in Right-Bank Ukraine) and were not given credit by the Land Bank. A substantial number of such peasants finally emigrated beyond the Urals to Asiatic Russia, a practice also encouraged by Stolypin to reduce rural overpopulation. Ultimately the reforms gave rise to an even greater social differentiation among peasants, with the largest peasant households growing larger and the number of middle-sized holdings shrinking. Stolypin's reforms were therefore harshly criticized by V. Lenin as well as by Russian and Ukrainian socialist parties.

Stomatology or Dentistry. A branch of medicine dealing with the structure, functions, and diseases of the mouth and adjacent sections of the face and neck. In the Soviet Union dentists were known as stomatologists.

In 17th-century Ukraine barber-surgeons (*tsyrylnyky*) treated ailing teeth and performed minor surgical procedures. One of the first textbooks on dentistry in the Russian Empire, dealing with the diseases of the mouth and adjoining areas, was written by P. *Zablotsky-Desiatovsky. Schools for the treatment of teeth were established at the end of the 19th century in Odessa (1892), Kiev (1897), and Kharkiv (1897). The Odessa Scientific Research Institute of Stomatology was founded in 1928. Dentists are trained at 34 departments of stomatology in various *medical education institutions throughout the country. The status of a dentist in Ukraine is on a par with that of a physician. Dentists receive equal training plus training in oral surgery, for a total of five years.

Stone Age. The earliest phase of human development preceding the manufacturing and common use of metals, lasting in Ukraine from ca 300,000 to 2500 BC. The Stone Age in Ukraine is commonly divided into three phases – the *Paleolithic Period (300,000–8000 BC), the *Mesolithic Period (8000–5000 BC), and the *Neolithic Period (5000–2500 BC). The definition of the periods is based largely upon technological progress (nature of dwellings and number, function, and quality of implements) and social development (introduction of agriculture and permanent settlements, expansion of population and social groupings, growth of esthetic and religious consciousness). Each period can be further defined in terms of eras or individual cultural groupings. The periodization of this age is also closely linked with major geological changes, particularly the final retreat of glaciers from Ukraine (coinciding with the end of the Paleolithic), which increased temperatures, caused a change in fauna, and made agricultural activity (marking the start of the Neolithic) possible. The peoples of Stone Age Ukraine experienced social and technical development at differing paces and commonly coexisted at varying levels of development.

Stone baba (*kamiana baba*). An anthropomorphic stone statue, 1 to 4 m in height, found in the steppe belt of Europe and Asia from the Dniester River in the west to Mongolia in the east. Commonly used as grave markers, the *baby* were connected with cults of the dead among nomadic peoples. Those erected in Ukraine were left by Scythian and Sarmatian tribes of the 7th to 4th century BC and by Turkic peoples of the 6th to 13th century, particularly the *Cumans (Polovtsians). The figures are commonly in standing or sitting positions. In steppe Ukraine most of the *baby* are female figures that differ from their Asiatic counterparts in their more complex and varied dress. A large number of these monuments have been preserved in museums throughout Ukraine, and there is one at the *Niagara Falls Art Gallery.

A stone *baba*

Stonecrop (*Sedum*; Ukrainian: *ochytok, zaiacha kapusta*). A herbaceous-to-woody plant of the family Crassulaceae, 18 of the 250 species of which are found in Ukraine, in arid sandy regions and on cliffs. The most common is orpine (*S. telephium*), with pink or purple flowers, which was formerly used in folk medicine. The bitter stonecrop (*S. acre*) is an excellent nectariferous plant. Some *Sedum* species are cultivated as ornamentals.

Stopa. See Weights and measures.

Stork (*Ciconia*; Ukrainian: *leleka, buzko, chornohuz*). Large birds with long necks and legs of the family Ciconiidae (order Ciconiiformes). Storks range from about 60 cm to over 150 cm in height and weigh up to 4.5 kg. They are migratory birds that breed in Europe and winter in southern Africa. While breeding they nest on trees or, as in Ukraine, on buildings where a wagon wheel has been set up to serve as the base of the nest. Two species predominate in Ukraine: *C. nigra* or black stork (black with a white spot on the belly and red legs and bill) in the Carpathians and in Polisia, and *C. ciconia* or white stork (white with black wing feathers, a dark red bill, and reddish legs), found over the whole of Ukraine. Storks have become an endangered species and are now protected by law.

According to Ukrainian and other European folk belief the stork possesses magical powers to protect and help humans. A family with a stork's nest on its farm will live in peace, prosperity, and good health. A village with many storks can count on a bountiful harvest. The bird is believed to be capable of predicting the weather: restless behavior indicates the approach of bad weather, standing on one leg, cold weather, and clacking of the beak, a sunny day. In folktales and legends the stork always plays the role of a helper of humans.

Storozhenko [Storoženko]. A Cossack *starshyna* family, known from the early 17th century. Andrii Storozhenko was 'senior colonel of the Zaporozhian Army' in 1610. His descendant (possibly a grandson) Ivan Storozhenko (d 15 February 1693) was captain of Ichnia company (1670–87) and colonel of Pryluka regiment (1687–92); he was the first of a Storozhenko 'dynasty' of captains in the Cossack *company system. Among the Storozhenko captains of Ichnia company were Andrii Storozhenko (captain from 1700, d 1715); Andrii's son, Hryhorii Storozhenko (captain 1715–41, d 1745), who was often sent on diplomatic missions to Moscow (1722, 1727, 1729) and served on the commission that prepared the Code of Laws of 1743 (1735–7); and Andrii's grandson, Andrii Storozhenko (d 1753). Among the Storozhenko captains of Yabluniv company were Stepan Storozhenko (d 20 January 1758) and his son, Ivan Storozhenko. Among the Storozhenko captains of Ivanytsia company were Ivan Storozhenko (captain 1719–28, d 1733) and Hryhorii Storozhenko (captain 1770–81, d 16 June 1810 in Irzhavets, near Ichnia).

In the 19th century the Storozhenko family line included many civic and cultural leaders, notably the writer Oleksa *Storozhenko; the historian Andrii *Storozhenko (1791–1858) and his grandsons, the historians Andrii *Storozhenko (1857–?) and Mykola *Storozhenko (1862–1942); and the literary historian Mykola *Storozhenko (1836–1906). The Storozhenko family archive, partially published as *Storozhenki: Famil'nyi arkhiv* (The Storozhenkos: A Family Archive, 8 vols, 1902–10), is preserved in the Central State Historical Archives of Ukraine in Kiev.

A. Zhukovsky

Storozhenko, Andrii [Storoženko, Andrij] (pseud: Andrei Tsarynny), b 8 March 1791, d 4 July 1858 in Kiev. Historian and writer. He worked for the Russian Military Administration in Poland (1832–49) and became a senator (1842) and the director of internal and religious affairs (1845) there. Storozhenko possessed a large collection of Ukrainian antiquities and historical documents of the 17th and 18th centuries, including the original 1649 registers of the Zaporozhian Army. He wrote a history of Southern Russia (3 vols, unpub) which has not been preserved, as well as essays on B. Khmelnytsky and I. Mazepa and memoirs, of which fragments were published. His 1832 pseudonymous article 'Mysli malorossiianina' (Thoughts of a Little Russian) in the journal *Syn otechestva* criticized N. Gogol's *Vechera na khutore bliz Dikan'ki* (Evenings on a Farm near Dykanka). He wrote poetry in Ukrainian and Russian and the operetta *Zaporozhian Sich*. His literary works were published by his grandson, M. *Storozhenko (1836–1906), in *Kievskaiia starina* (1886, nos 15–16). Storozhenko was a friend of T. Shevchenko, Ye. Hrebinka, P. Kulish, and O. Bodiansky. He was buried in Chevelcha, Lubni county, Poltava gubernia.

Storozhenko, Andrii [Storoženko, Andrij], b 24 August 1857 in Velyka Krucha, Pyriatyn county, Poltava gubernia, d ? Historian, ethnographer, and literary scholar. He studied at Kiev University (1879) under V. Antonovych. He worked as head of the Pereiaslav county zemstvo administration (1886–92), speaker of the Pereiaslav and Pyriatyn zemstvo assemblies (1892–1912), and marshal of the nobility in Pereiaslav county (1912–16). Storozhenko was a member of the Kiev Archeographic Commission,

vice-president of the Historical Society of Nestor the Chronicler, and associate of the journal *Kievskaiia starina*, in which he published many documentary articles and notes. His main scholarly works examined the history of Ukraine and Poland from the 15th to 18th centuries. With his brother, M. *Storozhenko (1862–1942), he edited and published the Storozhenko family archives (8 vols, 1902–10), which included the first two volumes of V. Modzalevsky's *Malorossiiskii rodoslovnik* (Little Russian Genealogical Register; the two final volumes were also published by them, in 1912 and 1914).

Storozhenko sided with the conservative Ukrainian nobility in civic and political affairs. In his youth he was a liberal and a Ukrainophile, but later his position changed to one of Russian nationalism and anti-Ukrainianism, largely in reaction to 20th-century left-wing Ukrainian politics. He became one of the leaders of the Kiev Club of Russian Nationalists, and he wrote the anti-Ukrainian work *Proiskhozhdenie i sushchnost' ukrainofil'stva* (The Origin and Essence of Ukrainophilism, 1911). Storozhenko opposed the rebirth of Ukrainian statehood in 1917. He edited the collection of essays *Malaiia Rus'* (Little Rus', 1917), and after emigrating, he published the pseudonymous anti-Ukrainian booklet *Ukrainskoe dvizhenie* (The Ukrainian Movement, 1926).

A. Zhukovsky

Mykola Storozhenko
(1836–1906)

Storozhenko, Mykola [Storoženko] (Nikolai), b 22 May 1836 in Irzhavets, Pryluka county, Poltava gubernia, d 25 January 1906 in Moscow. Literary scholar; corresponding member of the Russian Academy of Sciences from 1899. He graduated from Moscow University (1860) and taught at the Alexandrian Military School and the First Moscow Gymnasium. He was the first professor of the history of world literature at Moscow University (from 1872). He was also chief librarian at the Rumiantsev Museum (1893–1902) and chairman of the Society of Devotees of Russian Literature (1894–1901). An adherent of the cultural-historical school, he wrote on Western European, Russian, and Ukrainian literature and was the first Shakespearean scholar in the Russian Empire. Among his many works are books on J. Lilly and C. Marlowe (1872), R. Greene (1878; English trans 1881), and W. Shakespeare (1902), and 11 articles about T. Shevchenko, most of them in *Kievskaiia starina*. A book of his selected literary articles and lectures appeared in Moscow in 1902, and an early Ukrainian version of his popular history of Western European literature to the end of the 18th century (1908; 4th edn 1916) was published in Lviv in 1905. A festschrift in his honor (1902)

has a bibliography of his works. I. Borozdin's book about Storozhenko was published in Moscow in 1916.

Storozhenko, Mykola [Storoženko] (pseud: M. Tsarinny), b 29 May 1862 in Velyka Krucha, Pyriatyn county, Poltava gubernia, d 1942. Historian and pedagogue. He studied under V. Antonovych at Kiev University. He was a member of the Kiev Archeographic Commission and the Historical Society of Nestor the Chronicler and an associate of the journals *Kievskaiia starina*, *Istoricheskii vestnik*, *Russkaia mysl'*, and others. He worked as a public school inspector in Chernihiv and Kiev gubernias (from 1889), as principal of Kiev gymnasiums No. 4 (from 1895) and No. 1, and as a zemstvo official in Pyriatyn county. Storozhenko wrote many works on the history of Ukraine in the 17th and 18th centuries, which were published in **Arkhiv Iugo-Zapadnoi Rossii*, *Kievskie universitetskie izvestia*, and, especially, *Kievskaiia starina*. He also contributed historical, political, and pedagogical essays to *Istoricheskii vestnik*, *Russkaia mysl'*, and *Tserkov' i narod* and published the monograph *Zapadno-russkie provintsial'nye seimiki* (Western Russian Provincial Dietines, 1888). With his brother, A. *Storozhenko (1857-?), he edited and published the Storozhenko family archives (8 vols, 1902-10). He was a member of the Hromada of Kiev, a friend of P. Kulish, V. Horlenko, I. and P. Rudchenko, and O. Levytsky, and the pseudonymous author of the Ukrainian poetry collection *Litni krasny* (Summer Beauties, 1884).

After the Revolution of 1917 Storozhenko championed the Ukrainian cause and published works in Ukrainian in *Zbirnyk Istorychno-filolohichnoho viddilu VUAN*. He edited *Stoletie Kievskoi i gimnazii* (Centenary of Kiev Gymnasium No. 1, 3 vols, 1911) and published *Malorossiiskii rodoslovnik* (Little Russian Genealogical Register, 4 vols, 1902-14). While living as an émigré in Yugoslavia he wrote his memoirs (unpub), which remain a valuable source for the history of Ukrainian culture and of the Ukrainian movement in the later 19th century. The manuscript was housed in the Museum of Ukraine's Struggle for Independence in Prague.

A. Zhukovsky

Storozhenko, Mykola [Storoženko], b 24 September 1928 in Viazove, Konotip raion, now in Sumy oblast. Painter, mosaicist, and graphic artist. A graduate of the Kiev State Art Institute (1956), he has taught there since the early 1970s. He has created easel paintings and illustrated over 30 books, including Ye. Hutsalo's *Olen' Avhust* (Elk Avhust, 1965) and a 1987 edition of Ukrainian folk tales. He is best known for his mosaic wall panels *Kievan Academy and Science and Culture of the 16th and 17th Centuries* (1969-72), inside the building of the AN URSR (now ANU) Institute of Theoretical Physics, and his huge encaustic mural depicting over 20 of the world's most famous physicists, *Illuminated by Light* (1978-82), inside the building of the ANU Institute of Physics.

Storozhenko, Oleksa [Storoženko], b 24 November 1805 in Lysohory, Pryluka county, Poltava gubernia, d 19 November 1874 in Horishyn *khutir*, Brest county, Belarus. Writer, ethnographer, and artist. He began writing in Russian in the 1850s, by drawing on folktales, particularly those of the Zaporozhian M. Korzh, and on his military

Part of the mural by Mykola Storozhenko inside the ANU Institute of Physics

Oleksa Storozhenko

service (1824-50). His short stories were published in the journals *Severnaia pchela* and *Biblioteka dlia chteniia*. The latter was the vehicle for *Rasskazy iz krest'ianskogo byta malorossiian* (Stories from the Peasant Life of Little Russians, 1858) and the historical novel *Brat'ia bliznetsy* (Twin Brothers, 1857). When the journal **Osnova* first appeared, Storozhenko began writing in Ukrainian, and in 1863 he published a two-volume collection of stories titled *Ukrain-s'ki opovidannia* (Ukrainian Stories). The majority of his works consist of anecdotes, proverbs, and folktales, and their titles reflect their folkloric content and style: 'Vchy linyvoho ne molotom' (Teach the Lazy Man Not by Hammer but by Hunger), 'Mezhyhorods'kyi did' (The Old Man from Mezhyhorod), 'Vusy' (The Moustache), and 'Holka' (The Needle). A few of his stories were based directly on ethnographic and historical material, such as 'Matusyne blahoslovennia' (Mother's Blessing), 'Zakokhanyi chort' (A Devil in Love), and 'Marko Prok-liatyi' (Damned Marko). His works are marked by earthy Ukrainian humor, a knowledge of folk myths, and picturesque language.

P. Odarchenko

Storozhova Mohyla. A *Pit-Grave culture kurhan of the late 3rd millennium BC near Stari Kodaky, Dnipropetrovske raion. Excavations in 1949 by A. *Terenzhkin uncovered three corpses covered with red paint and buried in a crouched position. One of the graves also contained the first two-wheeled cart unearthed in Ukraine.

Storozhuk, Oleksander [Storožuk], b 1 January 1924 in Ivanivka, near Stavyshe, in Kiev gubernia, d 7 August 1988 in Kiev. Economist; corresponding member of the All-Union Academy of Agricultural Sciences. After graduating from the Kiev Finance and Economics Institute in 1951, he joined the staff of the AN URSS (now ANU) Institute of Economics and then of the Ukrainian Scientific Research Institute of the Economics and Organization of Agriculture, which he eventually headed. In his research Storozhuk specialized in the economics of agricultural production. He wrote a number of monographs, including *Rol' ekonomicheskikh stimulov v povyshenii kachestva sel'skokhoziaistvennoi produktsii* (The Role of Economic Stimuli in Raising the Quality of Agricultural Production, 1984), and helped edit a Russian dictionary of the agricultural industry (1981).

Storozhynets [Storožynec']. v-6. A city (1989 pop 13,700) on the Seret River and a raion center in Chernivtsi oblast. The town was first mentioned in historical documents in 1448, when it was part of the Moldavian principality. In the 16th century it was under Turkish rule, and from 1774, under Austria. By the end of the 19th century the town had developed into a small manufacturing and trading center with a population of 7,000. In 1904 it was granted city status. After the First World War the city was occupied by Rumania, and in 1940 it was annexed by the Ukrainian SSR. Today it has a lumber-manufacturing complex and a large dendrological park.

Stovbur, Oleksander, b 1943 in Zaporizhia. Painter and muralist. He graduated from the Odessa Art School in 1971 and has lived in Odessa since then. His works were not exhibited publicly until 1986. They reveal the influence of medieval Rus' and Ukrainian icons. Stovbur has experimented with predominantly white compositions. His works include the semiabstract *Empress* (1984) and the nonobjective *Composition with Black Spot* (1983). He has also painted murals in Odessa, including ones in the Odessa Literary Museum and the Olimpiets sports complex.

Stove (*pich*). Among the Slavs the stove replaced the open hearth probably in the 4th or 5th century AD. The traditional peasant stove in Ukraine was large and rectangular – 1.50 to 1.80 m long, 1.40 to 1.6 m wide, and 1.0 to 1.2 m high – and occupied up to a quarter of a room. Two of its sides backed onto the room's walls, and two were free-standing. Built of clay, and, later, also of stone or brick, it was decorated on the outside in some regions with painted patterns or ceramic tiles. The opening (*cheliusty*) to the fire chamber, in which the fire was laid, was rectangular or semicircular. In front of it was a ledge (*prypik*), and

A peasant stove from the Dnipropetrovske region

above it was a smoke hood (*dymar*) consisting of a watted frame covered with clay. From the hood the smoke was led by a duct (*tsivka*) through a wall into the antechamber, from which it escaped upward through a chimney. The stove was used for heating, baking bread, cooking meals, lighting the room, and drying fruits and mushrooms. In addition it provided a warm sleeping place on a ledge where the stove met the walls. Originally, food was cooked in pots placed next to the fire in the chamber. Later a small supplementary stove (*pudprypik*) with hot plates was built into the main stove. In recent times that cooking device has been replaced by an iron stove.

Because of its vital role in domestic life the stove occupied a prominent place in Ukrainian folkways. When a family moved to a new home, it often dismantled and took the stove with it. The mother blessed the stove before going to bed and upon rising. In the distant past the stove played an important role in the birth rites. Until recent times a midwife knocked on the stove to make the birth process easier, and a newborn infant was touched against the stove. A symbol of family unity, the stove figured prominently in wedding ceremonies. Before departing from her family the bride cuddled up to the stove and broke off several chips from it. The bridegroom's stove had to be cleaned and painted before the bride's arrival. The custom of touching the stove upon returning from a funeral was originally a purification ritual. The Hutsuls celebrated the feast of the stove on New Year's Eve.

Strabo, b ca 64 BC in Amaseia, Pontus (in present-day Turkey), d ca 23 AD. Greek geographer and historian. Although not widely traveled, he prepared a 17-volume *Ge-*

ography that encompassed most of the territories known in the ancient world. In volumes 11 and 14 he describes the tribes that inhabited the Crimea and the steppes along the northern coast of the Black Sea – their way of life and their commercial ties with the Greek city-states. The Ukrainian classical scholar H. Mishchenko translated the work into Russian (1879).

Strakhopud

Strakhopud (Scarecrow). A Russophile journal of satire and humor. It appeared first irregularly and then semi-monthly in Vienna in 1863–8, under the editorship of Y. Livchak. It was revived in Lviv and published with interruptions by I. Arsenych and V. Stebelsky (1872–3), S. Labash (1880–2), and O. Monchalovsky (1886–93); from 1887 it also issued a literary supplement, *Besida*. A journal with the same name was published as a supplement to *Russkoe slovo* in 1912 by H. Hanuliak.

A 1931 poster by Adolf Strakhov

Volodymyr Strashkevych

Strakhov, Adolf [Straxov, Adol'f] (real name: Braslavsky), b 18 October 1896 in Katerynoslav, d 3 January 1979 in Kharkiv. Graphic artist, sculptor, and painter of Jewish origin. A graduate of the Odessa Art School (1915), he drew satirical sketches for Bolshevik newspapers in Katerynoslav (1919–22) and Bolshevik propaganda posters (eg, the lithograph series 'Alphabet of the Revolution' 1921). In 1919 in Katerynoslav he designed a triumphal arch with a 6 × 30 m poster dedicated to the Red Army and

an 8 × 40 m panel for a monument to those who died in the revolution. In 1922–5 he designed over 250 book covers for the State Publishing House of Ukraine and Proletar publishers in Kharkiv. In 1928 he designed decorative murals with folk-art motifs for the V. Blakytyny Building in Kharkiv. From 1933 he worked also as a sculptor and created a popular bust of T. Shevchenko (1933), monuments to M. Glinka in Zaporizhia (1955) and S. Kirov in Makiivka (1959), and several monuments to V. Lenin. S. Raievsky has written two books about Strakhov's posters (1936, 1967).

Strakhov, Tymofii [Straxov, Tymofij], b 4 February 1890 in Luchki, Kursk gubernia, Russia, d 11 October 1960 in Kharkiv. Mycologist and phytopathologist; corresponding member of the AN URSR (now ANU) from 1948. A graduate of Kharkiv University (1916), he worked at the Kharkiv Agricultural Research Station (1913–30, from 1919 as department head), the Ukrainian Scientific Research Station of Plant Conservation (1930–2), and the ANU Institute of Genetics and Selection (1949–56). He lectured at the Kharkiv Agricultural Institute (from 1918) and at Kharkiv University (from 1921). He proposed a theory about the pathological process in plants and developed a number of immunization measures.

Strakhsoiuz (full name: Ukrainyskyi kooperatyvnyi strakhovyi soiuz, or Ukrainian Co-operative Insurance Union). A central organization set up in the fall of 1918 in Kiev to organize insurance co-operatives. Its equity fund consisted of shares bought by various co-operatives and associations. Strakhsoiuz insured the property of co-operatives against fire and theft, transported goods against damage and theft, farm produce and crops against spoilage and damage, and farm animals against disease. The union planned to organize health and veterinary services, fire-fighting units, and the manufacture of fireproof building materials. Strakhsoiuz was dissolved by the Soviet authorities in 1922, but it was revived soon afterward with the introduction of NEP. It operated under its new name, Kooptstrakh, or the All-Ukrainian Insurance Union, until 1930.

Strashkevych, Volodymyr [Straškevyč] (pseud: V. Plotchnyl, V. Hamma, Ester), b 1875 in Vyshnevychi, Kiev gubernia, d ? Civic figure, writer, and lexicographer. A member of the Old Hromada of Kiev, in the 1900s and 1910s he worked for the Vik publishing house and contributed to *Literaturno-naukovyi vistnyk* and the Kiev periodicals *Svitlo*, *Kievskiiia otkliki*, *Hromads'ka dumka*, and *Rada*. Under the UNR he was deputy director of a department in the Ministry of Religious Faiths. From 1926 he headed the professional (*dilova*) language section of the economics department at the *Institute of the Ukrainian Scientific Language. Together with M. Doroshenko and M. Stanyslavsky Strashkevych compiled the institute's Russian-Ukrainian dictionary of professional language (15,000 words and phrases, 1930). A defendant in the 1930 Stalinist show trial of the *Union for the Liberation of Ukraine, he was sentenced to three years in a labor camp. His subsequent fate is unknown.

Stratii, Yaroslava [Stratij, Jaroslava], b 1 September 1947 in Mukachiv, Transcarpathia oblast. Philosopher. After graduating from Lviv University she began working at

the AN URSR (now ANU) Institute of Social Sciences in Lviv and received a candidate of philosophical sciences degree in 1978. A specialist in the history of Ukrainian philosophy, she has written *Problemy naturfilosofii v filosofskoi mysli Ukrainy XVII v.* (Problems of Natural Philosophy in the Philosophical Thought of 17th-Century Ukraine, 1981), cocompiled a collection of descriptions of the philosophy and rhetoric courses read by professors of the Kievan Mohyla Academy (1982), contributed two chapters to the first volume of the ANU history of philosophy in Ukraine (1987), and coauthored a book on humanistic and Reformation ideas in Ukraine (1990).

A bookplate by Mykola Stratilat

Stratilat, Mykola, b 6 June 1942 in Makiivka, Nosivka raion, Chernihiv oblast. Artist. He completed his studies in graphic arts at the Ukrainian Printing Institute (1966–72). Since 1976 he has been art editor for *Molod' Ukrainy* and, subsequently, *Narodna tvorchist' ta etnografia*. Besides illustrations to numerous books, including M. Rylsky's *Iabluka dospilyi, iabluka chervoni* (Ripe Apples, Red Apples) and V. Sosiura's *Iakyi ia nizhnyi-takyi tryvoznyi* (I Am So Gentle – So Skittish), he has done such graphic series as 'Song about Kiev' (1980–1) and 'In Memory of T.H. Shevchenko' (1985). His main strength, however, lies in the art of designing bookplates, which he fills with Cosack motifs, especially various representations of Kozak-Mamai.

Mykola Strazhesko

Strazhesko, Mykola [Stražesko], b 29 December 1876 in Odessa, d 27 June 1952 in Kiev. Internal medicine specialist; full member of the AN URSR (now ANU) from 1934, of the USSR Academy of Sciences from 1943, and of the USSR Academy of Medical Sciences from 1944. A graduate of Kiev University (1899), he worked under V. Obratstov in the university's department of special pathology and in-

ternal medicine, studied in clinics in Paris, Berlin, and Munich, did research under I. Pavlov at the St Petersburg Military Medical Academy (1902–4) and wrote a dissertation on the physiology of the digestive tract, and worked in the clinic of internal medicine at Kiev University. He was a professor at the Kiev Women's Medical Institute (from 1907), Odessa University (1919–22), where he headed the internal medicine department, and the Kiev Medical Institute (1922–36). He was a fellow at the ANU Institute of Clinical Physiology (1934–6) and the founding director of the Ukrainian Scientific Research Institute of Clinical Medicine (1936, from 1952 the Ukrainian Scientific Research Institute of Cardiology).

Strazhesko published numerous works in clinical and theoretical medicine, dealing with angina pectoris, myocardial infarction, heart failure, rheumatic fever, and sepsis. He also prepared a classic manual on the physical diagnosis of abdominal diseases (1924). He described a number of symptoms associated with diseases of the digestive and circulatory organs, including the so-called cannon tone that results from heart blockage (1906). With Obratstov he gave the first clear clinical description of coronary thrombosis (1909), thereby enabling practicing physicians to diagnose myocardial infarction. In 1934 he proved the streptococcal etiology of rheumatic fever. With V. Vasylenko he proposed a classification system of congestive heart failure (1935). The founder of a school of Ukrainian internal medicine specialists, Strazhesko also contributed to the development of functional cardiology in the former USSR. His collected works were published in two volumes (1957).

Streetcar. See Urban transit.

Strelbytska, Oleksandra [Strel'byc'ka], b 19 November 1905 in Odessa, Kherson gubernia, d 2 March 1980 in Kiev. Construction mechanics scientist. She studied at the Kiev Civil-Engineering Institute and taught there (1934–41). She also worked at the AN URSR (now ANU) Institute of Mechanics (from 1933). She studied the physics of the plastic deformation of metal structures and developed equations for predicting failures in such structures, and performed theoretical and experimental studies of thin-walled frames and trusses and of membranes under transverse loading.

Strelbytsky, Ivan [Strel'byc'kyj], b and d ? Copper engraver. From 1695 to 1709 he worked in Kiev and Chernihiv, where he created many portrait, mythological, and panegyric engravings. His works include portraits of Hetman P. Doroshenko, Archimandrite M. Vuiakhevych of the Kievan Cave Monastery (1695), Archimandrite M. Lezhaisky (with a view of the Novhorod-Siverskyi Cathedral), and Metropolitan V. Yasynsky (1707). He illustrated I. Maksymovych's alphabet in rhymes (1705) and created 23 engravings for B. Hefden's *Tsarskii put' kresta Hospodnia* (The Royal Way of the Lord's Cross, 1709).

Strelbytsky, Teodor [Strel'byc'kyj, Teodor], b and d ? Copper engraver of the late 18th and early 19th centuries, in Pochaiv. He engraved icons, such as *Apostles Peter and Paul Carrying a Model of the Pochaiv Church*, *The Pochaiv Theotokos*, and *The Chernihiv Theotokos*. He also made the wood engraving *St John the Baptist* (1802) and copper-engraved prints in the folk style, including *The Knight and*

Death and Two Paths of Life. The influence of classicism is evident in his work.

Strelkov, Iliia [Strjel'kov, Il'ja], b 9 August 1898 in Arkhangel'skaia, Kuban, d 23 February 1954 in Kharkiv. Chemist; AN URSS (now ANU) corresponding member from 1948. A graduate of the Kharkiv Technological Institute (1925), he taught organic chemistry at various institutes in Kharkiv until 1941 and directed the Kharkiv Chemical-Technological Institute (1933–9) and the Kharkiv Technological Institute of Building Materials (1944–54). He also served as secretary of the Ukrainian Council of People's Commissars (CPC, 1921–4), as learned secretary to the CPC chairman (1924–30), and as learned secretary and then vice-chairman of the CPC committee in charge of the chemization of the national economy (1928–38). Strelkov's research dealt with thermochemistry and the thermodynamics of organic reactions. He introduced a simple method for approximating the entropy of organic compounds in liquid or solid phase.

Volodymyr Strel'nikov in his studio in Munich

Strel'nikov, Volodymyr [Strel'nikov], b 25 October 1939 in Odessa. Painter. He studied briefly at the Odessa Art School but was mostly self-taught. He worked as a muralist in Odessa and participated in and organized some of the exhibitions of nonconformist art there. Strel'nikov has experimented with reduced shapes and the interrelationship between figures and architecture. In his later pictures architecture and figures have been reduced to simplified patterns within the larger contained form, so that a tension is sustained between the detailed, intricate shapes and the surrounding smooth areas of warm color (eg, *Autumnal* [1977]). Strel'nikov participated in the 1975 and 1976 Moscow exhibitions of Ukrainian nonconformist artists and was consequently harassed by the Soviet authorities. In 1978 he was allowed to emigrate to Austria, and in 1979 he settled in Munich. Since that time he has exhibited in Western Europe, the United States, and Canada. He abandoned figuration in the late 1980s in favor of non-representational compositions based on the interrelationship between form and color.

Strel'sky, Viacheslav [Strel's'kyj, Vjačeslav], b 28 September 1910 in Kursk, Russia, d 11 August 1983 in Kiev.

Historian. After graduating from the Historical-Archival Institute in Moscow (1935) he was director of oblast archives and a teacher at the pedagogical institute (from 1937) in Mykolaiv. During the Second World War he worked in the NKVD archival division in Omsk and published two studies of Siberian political history. From 1944 he worked at Kiev University as archives director, head of the chair of archival studies at the department of history, and editor in chief of the university's scholarly collection *Naukovi zapysky Kyjivs'koho universytetu* (14 vols) and its historical series of *Visnyk Kyjivs'koho universytetu*. He wrote *Dzhereloznavstvo istorii SRSR* (A Study of Sources for the History of the USSR, 1958; Russian edn 1962) and coauthored *Derzhavni arkhivy Ukraïns'koi RSR* (State Archives of the Ukrainian SSR, 1972).

Striatyn Press (Striatynska drukarnia). One of the earliest presses in Ukraine, established in Striatyn near Rohatyn, Galicia, by Bishop H. Balaban of Lviv and his nephew F. Balaban. From 1602 to 1606, under the direction of P. Berynda, it printed *Khyrotoniia: Poučeniie novostavlenomu iierieivi* (Chirotony: Instructions for a New Hierarch, 1602), a Missal (1604), a Euchologion (1606), and a few other books. The books are fine examples of Renaissance book ornamentation. The press's equipment was acquired by Ye. Pletenetsky and used to begin work at the Kievan Cave Monastery Press.

Strichka, Ivan [Strička], b ca 1800 in Berezivka, Pryluka county, Poltava gubernia, d ca 1833. Kobzar. The descendant of a long line of kobzars, he was one of the first to be studied seriously. His dumas about S. Kishka and I. Udovychenko-Konovchenko and his other dumas were written down and published by P. *Lukashevych.

Strichka. Part of the female folk dress, consisting of a wide band of patterned material in bright colors. It was worn differently in different parts of Ukraine. In the Kiev region, Right-Bank Ukraine, and most other regions the *strichky* were attached to a wreath and allowed to drop along the wearer's back. In the Chernihiv region they were worn like a cape, dropping down the back from a ribbon tied around the neck, and in the Poltava and Kharkiv regions they were inserted into a girl's braids and draped down the back. In Right-Bank Ukraine the *strichky* tended to be many-colored and decorated with woven designs; those in Left-Bank Ukraine were of one color and free of design.

Strike. A work stoppage by workers to enforce demands or protest against an act or condition, usually accompanied by demonstrations. Some strikes involve political demands. Local strikes are limited to one factory or region; general strikes can encompass an entire country.

In Russian-ruled Ukraine the earliest strikes were staged by serfs, who worked in tar, potash, saltpeter, and salt mines, distilleries, and fulling mills owned by landlords or the state. One of the most important strikes occurred in 1798 at the Hlushytsia manufactory. Some 9,000 workers and possessional serfs demanded higher wages and reduced feudal obligations. The protest was suppressed by troops, and its organizers were sentenced to long terms of forced labor. Other major strikes were staged by printers of the Kievan Cave Monastery (1805)

and by the working peasants of the Pysarivka (1817) and Mashiv (1823) woolen-cloth manufactories.

After the emancipation a large strike took place in 1868 at the Horodok sugar mill in Kamianets-Podil'skyi county. In 1870 the construction workers of the Kharkiv railway station went on strike. Strikes in the 1860s and 1870s were concerned with economic questions – low wages and poor working conditions. In 1860–79 there were 52 strikes in Ukraine, involving almost 16,000 workers. Industrial development meant an increase in strikes. In 1880–4 there were 26 strikes, involving 9,000 workers; in 1886–94, 71 strikes, with 20,000 workers; and in 1895–9, 212 strikes, with 120,000 workers. At first the work stoppages were localized, but in time they grew in geographical scope despite police repression. As political opposition to the regime grew, strikers began to raise political demands. The first strike in the Russian Empire to display political slogans took place in Ukraine in 1872.

The economic crisis of 1900–3 resulted in labor unrest that culminated in the first general strike in the Russian Empire. The so-called South Russian general strike demanded the introduction of the eight-hour workday and wage increases. In July and August 1903 it paralyzed almost all Ukraine and involved 150,000 workers. Some 100 workers were killed, 500 were injured, and over 2,000 were arrested. During the 1905–7 revolutionary period strikes took place throughout Ukraine, and many of them demanded democratic reforms. In December 1905, political strikes in the Donbas escalated into armed revolts. The biggest of them occurred in Horlivka on 30 December 1905.

The peasant strikes that engulfed Poltava and Kharkiv gubernias in 1902 were particularly serious. They were provoked by high redemption payments, excessive taxes, and the land shortage and were suppressed by troops. Over 800 peasants were arrested and sentenced to prison terms, and 800,000 rubles in fines were transferred to landlords as compensation. During those strikes demands for Ukraine's autonomy were also raised.

Strikes in the period of reaction 1907–10 did not have a mass character. They were mostly protests against deteriorating labor conditions and the erosion of gains won in 1905–7. There were 221 strikes in Ukraine, involving 98,000 workers. The economic recovery, which began in 1910, increased workers' confidence, and the number of strikes rose. In 1910–14 there were 958 strikes, with 323,000 participants.

With the outbreak of the First World War repression against the workers' movement increased, and strikes became rarer. As economic conditions deteriorated and impatience with the war grew, workers resorted to strikes. In 1916 there were 218 strikes in Ukraine, involving over 196,000 workers, mostly in metallurgy and mining. In the summer of 1917 strikes took place throughout Ukraine. As the Russian Empire disintegrated, strikes subsided. The all-Ukrainian railway strike against the German occupation of Ukraine in 1918 was a remarkable political action.

Under the tsarist regime strikes were illegal. An 1845 law treated strikes as revolts against established authority. A secret circular of 6 June 1870 authorized governors to deport strike organizers and leaders to remote parts of the empire. A secret circular of 1897 removed the requirement to allow such cases to be heard in court. Nevertheless, strikes were widely employed to improve working condi-

tions and to force political change. The right to strike was won by the trade-union movement in Ukraine during the 1917 Revolution.

In Western Ukraine the first strikes took place in the 1870s. They were peasant protests against inadequate wages on estates. By 1902, peasant strikes had taken on a mass character. They were organized by Ukrainian political parties and were the first mass peasant strikes in Europe. Smaller strikes took place in 1901–2 in Transcarpathia and Bukovyna (see *Peasant strikes in Galicia and Bukovyna). Because Western Ukraine was underdeveloped, urban strikes were rare. The first strikes among urban workers were the printers' strike in Lviv in 1870, the bakers' strike in 1874, and the saddle makers' strike in 1875. In 1895–9 there were 35 strikes in Galicia, involving 3,500 people. The other significant industrial strikes were the 1904 strikes of oil workers in Boryslav and construction workers in Bukovyna. In the interwar period strikes in Western Ukraine (then divided among Poland, Czechoslovakia, and Rumania) were rare, because the urban working class was small, and there was widespread unemployment. The largest labor action in that period was the 1921 railway workers' strike in Galicia. There were work stoppages in some Lviv factories in 1929 and 1936 and a strike of forestry workers in Transcarpathia.

In Soviet Ukraine, although there were no laws against strikes, the militarization of labor under War Communism ruled out the right to strike. The Bolshevik-controlled trade unions worked to prevent any attempts to strike. It was argued that it was illogical for workers to strike against their own state. Yet strikes did take place under the Bolshevik regime in Ukraine. In many cases they were led by Mensheviks, who had led the Ukrainian trade unions before they were merged into all-Russian organizations by the Bolsheviks. In 1920–1 the Bolsheviks unleashed a wave of repression against their opponents within the working class and expelled over 200,000 people from the trade unions.

Under the NEP, strikes were allowed, and trade unions were instructed to obtain a speedy settlement. But Party members could not support strikes. As J. Stalin consolidated his power and the regime became totalitarian, strikes were banned as anti-Soviet actions, although there was no legislation against strikes. The Draconian labor laws of the 1930s ruled out any possibility of a strike. The official position was that in the USSR, where the state was controlled by the workers and acted in their interest, there was no social basis for strikes.

After Stalin's death a wave of strikes swept the labor camps of Norilsk (7 May to 2 August 1953), Vorkuta (July–August 1953), and Termir-Tau. Ukrainian political prisoners played a leading role in the strikes. The strikers demanded a shorter workday, of 9 instead of 12 hours, proper food, the removal of informers from the camps, unlimited correspondence with relatives, and guarantees against the arbitrary shooting of prisoners by guards. The strikes were brutally suppressed by the army.

Despite the massive apparatus for repressing discontent and opposition, there were surprisingly many strikes in Ukraine. The regime tended to accept quickly the demands of the strikers to avoid an escalation of the struggle. But once the strike was defused, its organizers were arrested and sentenced to long prison terms. If immediate concessions did not end the strike, force was used. The

largest industrial action during N. Khrushchev's regime occurred in 1962. It started in Novocherkassk, RSFSR, and spread quickly to Ukrainian cities, such as Donetsk and Zhdanov (Mariupol). Its immediate cause was the announcement of price increases on meat and dairy products. Troops and KGB detachments were called in to suppress the strike, and scores of people were killed. In 1967 the workers of the Kharkiv Tractor Plant walked out, and a workers' protest in Pryluky raised political and national demands. The 1969 strike at the Kiev Hydroelectric Station was extensively reported in Ukrainian samvydav. During the 1970s many strikes were reported in Ukraine. The largest included actions in Dnipropetrovske and Dniprodzerzhynske in September and October 1972. Workers of several factories in Dnipropetrovske demanded higher wages, better food and living conditions, and the right to choose one's job. In Dniprodzerzhynske workers rioted and attacked police and Party headquarters in response to police repression. At the end of the 1970s, groups of workers in Ukraine attempted to establish free trade unions. The Association of Free Trade Unions (est 1978) was led by V. *Klebanov. One of its central demands was the right to strike. The activists of the group were arrested and incarcerated in special psychiatric hospitals or labor camps.

With the growth of the national and democratic movement in Ukraine in the late 1980s, the regime learned to tolerate strikes. As the economic and political crisis deepened, strikes became a common occurrence. From January to July 1990, 10 million man-days were lost through strikes in the USSR. In the summer of 1989 the workers at many Donbas mines went on strike. The strike committees that led and co-ordinated the actions became the nuclei of new trade unions. The strikers set forth a wide range of demands: higher wages, better food, improved safety, and the removal of Party organizations from the workplace. From 1989, strikers in Ukraine also raised political demands. Workers in Western Ukraine used strikes to defend democratic rights and national independence. Strikers demanded radical changes in labor legislation, including guarantees of the right to strike. In August 1989 the USSR Supreme Soviet passed the first law on strikes. That highly restrictive law permitted strikes only after the conciliation commission and the court of labor arbitration had failed to settle disagreements between labor and management. Strikes had to be approved by a majority of the general meeting consisting of at least three-quarters of the workers' collective. Management had to be given five days' notice of a strike. The Union or a republican supreme soviet or its presidium could postpone a strike or suspend it for a period of up to two months. Strikes in support of unconstitutional demands were illegal. Strikes in 'essential' sectors of the economy were not allowed. Strikers were entitled to state social insurance and pay from strike funds. Although the law did not permit political strikes, work stoppages in support of national and democratic demands occurred. In October 1990 strikes against the signing of a new union treaty took place in many cities of Ukraine. The strikers also demanded military service only on Ukrainian territory; the immediate closure of the Chernobyl Nuclear Power Station; the removal of the Party and the KGB from the army, government, and factories; workers' ownership of the factories and enterprises; and the nationalization of the Party's property.

B. Krawchenko

Strikha, Edvard. See Burevii, Kost.

Strilets' (Rifleman). A weekly paper for soldiers of the Ukrainian Galician Army, published in Stanyslaviv, Stryi, Kamianets-Podilskyi, and Borshchiv, from 1 January to 16 November 1919. A total of 95 issues appeared, some with a pressrun of 16,000 copies. The editors were V. Pachovsky, I. Krevetsky, H. Myketei, and O. Nazaruk.

Rev Yeronim Striletsky

Vasyl Striltsiv

Striletsky, Yeronim [Strilec'kyj, Jeronim], b 1732, d 1804. Basilian priest and scholar. He was raised in the Brody region and served in Zamość, Pidhirtsi, and Pochaiv after finishing his studies in Rome in 1761. From 1776 he was in Vienna as chaplain at the Barbareum and then as the first parish priest at St Barbara's Church (from 1784). He also served as a liaison between Ukrainian Catholic hierarchs and the imperial government in Vienna and the papacy. He wrote several religious studies and a Ukrainian grammar (in Polish). His extensive book collection later became the basis for eparchial libraries in Peremyshl and Lviv.

Striletskyi Steppe [Strilec'kyj step]. A division of the Luhanske Nature Reserve located in Milove raion, Luhanske oblast. The land was brought under administrative control in 1936 so that a remaining area of the Starobilske steppe and wild steppe fauna would be preserved. The reserve is 479 ha in area. It contains nearly 600 species of plants and nearly 200 types of birds and animals; most notably it provides shelter for the largest colony of marmots in Ukraine.

Striletskyi Teatr. See Theater of the Legion of Ukrainian Sich Rifleman.

Striltsiv, Vasyl [Stril'civ, Vasył'], b 13 January 1929 in Zahvizdia, Stanyславiv county, Galicia. Political prisoner. At the age of 15 he was sentenced in Stanyславiv by the NKVD to 10 years in labor camps in the Soviet Arctic, for alleged contact with the Ukrainian Insurgent Army. After being freed in 1954 and rehabilitated in 1956, he studied at Chernivtsi University and then taught English in Ivano-Frankivske oblast. When his brother Pavlo was imprisoned for political reasons in 1972, he suffered persecution by the Soviet authorities. After losing his job in Dolyna, in September 1977 he renounced his Soviet citizenship, and in October he joined the *Ukrainian Helsinki Group. In January 1979 he was sentenced to three months' corrective labor without imprisonment for striking and applying to emigrate to England. He was arrested in October 1979 and sentenced in November in Dolyna to two years in a strict-regime labor camp in Poltava oblast. Before his sentence ended, he was rearrested in October 1981 and sentenced in April 1982 to six more years in a camp. He was released in 1987.

Striltsov, Zosym [Stril'cov], b 29 April 1831 in Slovianoserbske, Katerynoslav gubernia, d 27 May 1885 in Kharkiv. Embryologist. A graduate of Kharkiv University (1854), he practiced medicine in Katerynoslav gubernia and Katerynoslav (1857–74) and spent a year abroad working in pathological anatomy. From 1874 he worked in the department of embryology, histology, and comparative anatomy at Kharkiv University. His publications, in Russian, German, and French, dealt with the effects of ether on the animal organism, blood circulation, and the embryonic development of bone tissue.

Stroev, Pavel, b 27 July 1796 in Moscow, d 5 January 1876 in Moscow. Russian historian and archeographer; full member of the Russian Academy of Sciences from 1849. He studied at Moscow University (1812–16) and worked for the Imperial Russian Archeographic Commission. In 1828–34 he was in charge of its research expeditions to the libraries and archives of monasteries, which collected approx 3,000 items, including ancient monuments of *instructional literature, such as the **Izbornik* of Sviatoslav (1073), Ilarion's *Slovo o zakoni i blahodati* (Sermon on Law and Grace), the *Sudebnik* of 1497, and works by Cyril of Turiv. Stroev also assisted in the preparation and publication of *Polnoe sobranie russkikh letopisei* (The Complete Collection of Russian Chronicles, 1843–71; repr 1908–10, 1962).

Stroitel'stvo i arkhitektura (Construction and Architecture). A Russian-language monthly organ of the State Committee for Construction of the Council of Ministers of Ukraine and the Union of Architects of Ukraine, published in Kiev from 1953. Until 1957 the journal was published six times a year and was called *Arkhitektura i budivnytstvo*. Until 1959 it appeared in both Russian and Ukrainian. The journal contained articles on urban planning, construction management, and the history and theory of architecture. In 1980 it had a pressrun of 5,500 copies.

Strokach, Tymofii [Strokač, Tymofij], b 4 March 1903 in Belotserkovka, Primorskaia oblast, in the Far East, d 15 August 1963 in Kiev. Senior NKVD and MVD official. Hav-

ing served in the border guards for many years, in 1941 he was appointed deputy commissar for internal affairs of the Ukrainian SSR, and in 1942 chief of staff of the Ukrainian Partisan Headquarters. After being promoted to brigadier general (1943) and major general (1944) he returned to his deputy commissar's post (1945–6) and then rose to minister for internal affairs of the Ukrainian SSR (1946–56) and deputy minister for internal affairs of the USSR (1956–7). As chief of the MVD in Ukraine, he was responsible for the suppression of the UPA and the OUN underground after the war. His memoirs are titled *Nash pozhyonyi – Svoboda* (Our Call Is Freedom, 1975).

Nina Strokata

Strokata, Nina, b 31 January 1926 in Odessa. Political prisoner. A graduate of the Odessa Medical Institute (1947), she worked there as a microbiologist from 1952. From the mid-1960s she was persecuted by the KGB for her defense of her imprisoned husband, S. *Karavansky. She was fired from her job in May 1971, arrested in December, and sentenced in May 1972 to four years in a labor camp for women in the Mordovian ASSR for her active defense of political prisoners. In the camp she went on hunger strikes and participated in several prisoners' protests. In May 1974 she was elected a full member of the American Society for Microbiology. After her release in December 1975, she was forbidden to live in Ukraine and forced to settle in Tarusa, Kaluga oblast, RSFSR, where she was further persecuted and abused. In November 1976 she became a founding member of the *Ukrainian Helsinki Group. In November 1979 she and Karavansky were expelled from the Soviet Union, and received refuge in the United States. There she has remained active in the defense of human rights in Ukraine, and has compiled *Ukrainian Women in the Soviet Union: Documented Persecution* (1980), *A Family Torn Apart* (1981), and pamphlets about individual Ukrainian women political prisoners (1985).

Stronin, Oleksander, b 4 March 1826 in Rakitina sloboda, Belgorod county, Kursk gubernia, d 10 February 1889 in Yalta, Tavriia gubernia. Historian, sociologist, educator, and civic leader. After graduating from the philosophy faculty of Kiev University (1848) he taught secondary school (1848–62) in Kamianets-Podil'skyi, Novhorod-Siverskyi, and Poltava. He had a significant influence on M. Drahomanov, who was his student. In Poltava he was active in the local hromada and organized Sunday schools. In 1862 he was arrested for 'disseminating Little

Russian propaganda,' held in the Peter and Paul Fortress in St Petersburg, and exiled to Arkhangel'sk gubernia. After his release (1869) he held a government job in St Petersburg and then presided over the Lublin gubernia conference of civil judges and acted as a legal consultant to the Ministry of Communications in St Petersburg. He wrote a number of historical-sociological studies, such as *Istoriia i metod* (History and Method, 1869), *Politika kak nauka* (Politics as a Science, 1872), and *Istoriia obshchestvennosti* (History of Society, 1885), as well as some popular books for the masses under the pseudonym Ivanov, including *Priroda i liudi: Rasskazy o zemle i o nebe* (Nature and Men: Stories about the Earth and the Heavens, 1896). His memoirs (1826–62) and diary for 1848–88 have not been published, but extensive extracts from them appeared in the journal *Byloe* (vol 7) in 1907.

A. Zhukovsky

Ivan Stronsky

Danylo Husar Struk

Stronsky, Ivan [Strons'kyj], b 20 October 1864 in Zaraisko, Sambir county, Galicia, d 20 July 1935 in Lviv. Educator and civic leader. After graduating from the teachers' seminary in Lviv (1882) he worked as a teacher and principal in various villages of Lviv county (1891–1927). He was a founding member and president of the *Ukrainian Teachers' Mutual Aid Society and edited its organ **Uchytel's'ke slovo* (1925–9). He represented Ukrainian teachers at conferences of the Union of Slavic Teachers, the International Federation of Teachers' Associations, and the Federation of Teachers' Unions of Slavic Nations.

Structural mechanics (*budivelni nauky*). Before 1917, research in structural mechanics (or construction science) was conducted by S. *Timoshenko, O. Dynnyk, K. Siminsky, and S. *Prokofiev, in bridge building, by Ye. *Paton, and in building materials, by K. Dementiev. In 1919 the Institute of Technical Mechanics was founded within the Ukrainian Academy of Sciences. In 1929 it was renamed the Institute of Structural Mechanics, and in 1959, the *Institute of Mechanics of the AN URSR (now ANU). Other research institutions that dealt with construction were the *Institute for Problems of Materials Science, the *Institute of Electric Welding, and the Academy of Construction and Architecture of the Ukrainian SSR (1956–64). Research institutes specializing in construction included the Institute of Building Production of the State Committee for Construction (Derzhbud URSR), the Kiev branch of the All-

Union Scientific Research Institute of New Materials, the Institute of Typical and Experimental Design of Residential and Civic Buildings, and the Ukrainian Roads and Transportation Institute of the Ukrainian Ministry of Automotive Transport and Highways. Construction research is also conducted by the relevant faculties of various higher schools, civil-engineering institutes in Kiev, Kharkiv, and Odessa, and railway-engineering institutes in Kiev and Kharkiv. Ukrainian scientists have made some important contributions in the field, among them B. *Lysin, P. *Budnikov, H. *Pysarenko, Yu. Kozub, Yu. Rodychev, and H. *Slobodianyuk. They studied the use of raw materials such as silicates and kaolins in the manufacture of glass, cement, ceramics, perlite, and slag pumice. Reinforced concrete was studied by Ya. *Stoliarov, V. *Yaryn, Y. Ulytsky, and I. Kyreienko (see *Reinforced concrete industry). F. *Bieliankin and M. Afanasiev studied covering for industrial buildings; S. *Serensen and Afanasiev researched repeated-changing loads, M. *Kornoukhov, B. Gorbunov, I. Amiro, M. Dluhach, V. Zarutsky, and V. Yatsenko analyzed the strength and stability of skeletal systems and rib cylindrical coverings; and Gorbunov, D. Vainberg, V. *Chudnovsky, and O. *Strelbytska calculated frame estimates. Budnikov, O. Harmash, and O. *Nerovetsky applied assembly line methods in the *construction industry, and P. *Neporozhnyi and P. *Slipchenko developed the mechanization of constructing hydraulic structures. In sanitation technology Ukrainian scientists researched the aeration of industrial buildings, ventilation, air conduction, new heating systems, and air-conditioning (B. Lobaev), the heating and gasification of cities (P. Kolobkov), water purification and water supply (L. *Kulsky), and hydromechanics (M. *Lavrentev and H. *Sukhomel). In transportation construction O. Burulia, O. Frolov, M. Volkov, and Gorbunov proposed new bridge designs, rails, and road surfacing. The different branches of construction science have had their own periodicals, among them *Budivnychi materialy i konstruksii*, *Stroitel'stvo i arkhitektura*, *Promyshlennoe stroitel'stvo i inzhenernye sooruzheniia*, *Sil's'ke budivnytstvo*, *Mis'ke hospodarstvo Ukrainy*, and the bimonthly of the ANU Institute of Mechanics *Prikladnaia mekhanika* (which in 1955–65 came out in Ukrainian as *Prykladna mekhanika*).

Struk, Danylo Husar, b 5 April 1940 in Lviv. Literary scholar; member of the Shevchenko Scientific Society since 1988 and foreign member of the ANU since 1992; son of E. *Struk. A graduate of Harvard University (1963) and the universities of Alberta (1964) and Toronto (PH D, 1970), he has taught Ukrainian language and literature at Toronto since 1967 (full professor since 1981). He has been managing editor (1982–90) and, since 1989, editor-in-chief of the *Encyclopedia of Ukraine*. Struk is the author of *A Study of Vasył Stefanyk: The Pain at the Heart of Existence* (1973), the textbook *Ukrainian for Undergraduates* (1978; 2nd edn 1982; 3rd edn 1988), and articles on Ukrainian writers (M. Khvylovy, V. Vynnychenko, E. Andrievska, I. Kalynets, H. Chubai, and others) in North American scholarly journals and collections, *Suchasnist'*, *Novi dni*, and other émigré periodicals. He wrote many literature entries for the *Encyclopedia of Ukraine*. His Ukrainian poems have appeared in *Suchasnist'* and *Pivnichne siaivo* and in the collection *Gamma Sigma* (1963). Struk has translated Ukrainian writers (Stefanyk, L. Kostenko, V. Symonenko, Chubai, Vynny-

chenko) into English and T.S. Eliot, W. Kinsella, and T. Galay into Ukrainian.

Struk, Evstakhii (Stanko), b 22 September 1909 in Synnevidsko Vyzhnie, Stryi county, Galicia, d end of June 1941 in Lviv. Civic leader; father of D.H. Struk. After completing a business and trade degree at Lviv University (1936) he worked for *Tsentrosoiuz in Lviv. For his activities as a member of the OUN he was arrested by the Polish authorities in 1939 and incarcerated in the Bereza Kartuzka concentration camp. He was sentenced to be shot, but escaped en route to the execution. After the Soviet occupation of Galicia Struk became director of the Medical Institute in Lviv and continued to serve as a clandestine liaison officer for couriers from the OUN leadership abroad. Because he ordered that the students of the Medical Institute detained by Soviet security forces be set free, he was arrested by the NKVD. His brutally mutilated body was later discovered in the cellars of Lontskyi prison, among those of thousands of other Ukrainians murdered by the Soviet secret police on the eve of Soviet-Nazi hostilities.

Strukhmanchuk, Yakiv [Struxmančuk, Jakiv], b 10 August 1884 in Rosokhovatets, Pidhaitsi county, Galicia, d 1933. Graphic artist and portraitist. He studied at the Cracow Academy of Fine Arts (1906–10) and L'École des beaux arts in Paris (1911–19). He contributed caricatures to satirical magazines, such as *Zerkalo* and *Zhalo*, in Lviv and illustrated books, such as M. Arkas's history of Ukraine (1908), O. Makovei's *Revun* (The Bawler, 1910), and works by P. Kozlaniuk. In 1920 he moved to Kiev, where he joined the literary and artistic group Zakhidnia Ukraina. There he painted portraits of the group's members (V. Atamaniuk, D. Zahul, M. Kozoris, M. Kichura, M. Marfiievych, and A. Turchynska). He also wrote articles on art for *Dilo* (1909–12) and *Svit* (1926–9) and published his recollections in *Zakhidnia Ukraina*. He was arrested under P. Postyshev's Stalinist regime in Ukraine, and perished in prison.

Struminsky, Bohdan [Strumins'kyj] (pseud: Demonodor Baiursky), b 7 March 1930 in Bialystok, Poland. Linguist and philologist. He studied Polish and Ukrainian philology at Warsaw University (PH D, 1974). Since his arrival as a refugee in the United States (1975), he has taught Ukrainian at Harvard University and has been a research fellow, translator, and editor at the Harvard Ukrainian Research Institute. He has contributed numerous articles and reviews to Polish and North American scholarly periodicals, such as *Slavia Orientalis*, *Harvard Ukrainian Studies*, and *Journal of Ukrainian Studies*, and to the *Encyclopedia of Ukraine* and Ukrainian periodicals in Poland and abroad. He is the author of *Pseudo-Meleško: A Ukrainian Apocryphal Parliamentary Speech of 1615–1618* (1984), satirical and humorous short prose, and literary translations into Polish, Ukrainian, and English.

Strusiv. IV-6. A village (1973 pop 1,800) on the Seret River in Terebovlia raion, Ternopil oblast. The village of Pidbohorodyshe, which is mentioned in 15th-century documents, began to be called Strusiv (after its owner, the Strus family) at the end of the 16th century. A castle built there in the 16th century has been lost, but a palace of the 18th century has been preserved. There was a Basilian monas-

tery with a grotto church and stone altar near the village. In the 18th century St Michael's Church was built above the grotto. The monastery burned down in 1893.

Mariia Strutynska

Mykhailo Strutynsky

Strutynska, Mariia [Strutyns'ka, Marija] (pseud: V. Marska), b 9 September 1897 in Dolyna, Galicia, d 6 May 1984 in Philadelphia. Writer, journalist, translator, and civic figure; daughter of Rev V. Navrotsky and wife of M. *Strutynsky. In Lviv she worked as a teacher and was a member of the national executive of the Union of Ukrainian Women (1922–39). She published articles and prose in Lviv periodicals (eg, *Dilo*, *Novyi chas*), coedited the union's biweekly *Zhinka* (1935–8), and edited the union's monthly *Ukrainka* (1937–9) and the Lviv literary monthly *Nashi dni* (1941–4). In the 1930s she also contributed translations of French literature (eg, R. Rolland) to *Vistnyk*. As a postwar refugee she lived in Austria and, from 1950, Philadelphia. A founding member of the *Slovo Association of Ukrainian Writers in Exile and a member of its presidium, she published articles, prose, translations, and plays in Ukrainian-American periodicals and was a coeditor of *Notatky z mystetstva*. Published separately were her reportage novel *Buria nad L'ovovom* (The Storm over Lviv, 1944; 2nd edn 1952), the story collection *Pomyłka doktora Varets'koho* (Dr Varetsky's Mistake, 1964), the play *Amerykanka* (An American Woman, 1973), and the book of autobiographical stories, reminiscences, and diary notes *Daleke zblyz'ka* (The Distant Close Up, 1975).

Strutynsky, Mykhailo [Strutyns'kyj, Myxajlo], b 3 December 1888 in Pidmykhailia, Kalush county, Galicia, d end of June 1941 in Lviv. Journalist and civic and political leader; husband of M. *Strutynska. He studied at Vienna and Lviv universities and was active in Galician politics as an executive member of the National Democratic party, Ukrainian Labor party (1922–5), and Ukrainian National Democratic Alliance. In 1928 he was elected to the Polish Sejm, and he served on its communications committee. He edited or helped edit many Galician papers or journals, among them *Shliakhy*, *Zhyttia i mystetstvo*, *Dilo*, *Nash prapor*, and *Novyi chas* (1930–9). He also held important positions in Ukrainian organizations: he was a member of the board of trustees for Ukrainian postsecondary schools, member of the presidium of Ridna Shkola, and executive member of the Shevchenko Scientific Society. He was executed by Soviet security forces retreating from the invading German army.

Strutynsky, Mykola [Strutyns'kyj], b 1898, d 22 March 1943 in Hrubeshiv, Kholm region. Civic and political activist. He practiced law in Buzk and then Hrubeshiv. After being elected president of the Ukrainian Relief Committee in Hrubeshiv in 1943, he was instrumental in establishing a regional defense force called *Samooborona. He was murdered by Polish partisans.

Strutynsky, Vilen [Strutyns'kyj], b 16 October 1929 in Danylova Balka, now in Ulianivka raion, Kirovohrad oblast. Theoretical physicist; AN URSR (now ANU) corresponding member since 1972. A graduate of Kharkiv University (1952), he worked at the Atomic Energy Institute in Moscow (1953–70). Since 1970 he has headed the theoretical physics department of the ANU Institute for Nuclear Research in Kiev. Strutynsky has made significant contributions to the theory of nuclear structure and nuclear-reaction mechanisms. For his contribution to the understanding of the shell structure of deformed nuclei, in 1978 he was awarded the Tom W. Bonner Prize of the American Physical Society.

Struve, Liudvig (Ludwig), b 1 November 1858 in Pulkovo, St Petersburg gubernia, d 4 November 1920 in Symferopil, Crimea. Astronomer. A graduate of Dorpat (Tartu) University (Ph D, 1887), he was a professor at Kharkiv University from 1897 and director of the Kharkiv Astronomical Observatory from 1898. His main contributions were in the area of binary stars. He also developed a method of measuring the moon's radius using stellar occultations by the lunar disk.

Struve, Otto, b 12 August 1897 in Kharkiv, d 6 April 1963 in Berkeley, California. Astronomer; member of the Royal Society (London) from 1952. He studied at Kharkiv University and emigrated to the United States in 1920, where he worked at the University of Chicago. From 1932 to 1962 he headed a series of important American astronomic observatories, including the Yerkes Observatory in Wisconsin, the McDonald Observatory in Texas, and the National Radio Astronomy Observatory in Green Bank, West Virginia. He served as vice-president (1948–52) and president (1952–5) of the International Astronomical Union. His main scientific contributions were in the field of stellar spectroscopy, particularly the interactions of close binary stars. Many of his scholarly articles were published in *Astrophysical Journal* and *Astronomical Journal*; he also contributed to *Popular Astronomy*.

Strviash River. See Stryvior River.

Stryboh. The pagan god of the wind, one of the chief gods worshiped by early Ukrainians and other Eastern Slavs. He was the counterpart of the Greek god Aeolus. Stryboh is mentioned in early monuments of Ukrainian literature, including the Primary Chronicle and *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign). The cult of Stryboh left many traces in Ukrainian toponymy – the village of Strybizh, in the Zhytomyr region, for example, and the Strybizka River, in the Kiev region. There are different theories concerning the etymology of the name Stryboh. It may have come from *strybaty* 'to leap' or from *sterty* 'to erase.' Some scholars contend that the first syllable (*stry-*) shares a common root with the universal Slavic word *strila*

or *strika* 'arrow', which relationship suggests that an ancient poetic trope comparing the wind to an arrow may be reflected here.

Stryhun, Fedir, b 1 November 1939 in Tomashivka (now in Uman raion, Cherkasy oblast). Stage and film actor. He completed study at the Kiev Institute of Theater Arts (1961, class of V. Nelli) and joined the Zaporizhia (later Lviv) Ukrainian Music and Drama Theater, where he was leading actor from 1965 and artistic director from 1987. His stage roles varied from that of Don Juan in Lesia Ukrainka's *Kaminnyi hospodar* (The Stone Host) to the title role in Shakespeare's *Richard III*. He also acted in the films *Khaziain* (The Master, 1976, based on I. Karpenko-Kary's drama) and *Poizd nadzvychnoiho pryznachennia* (The Train of Special Designation, 1979).

Stryi [Stryj]. IV-4. A city (1990 pop 67,000) on the Stryi River and a raion center in Lviv oblast. It was first mentioned in historical documents in 1385, when Galicia was under Polish rule. In 1460 the town was granted the rights of *Magdeburg law. Stryi's economic development can be attributed largely to its strategic location on the main trade route to Mukachiv through the Carpathian Mountains. Under Austrian rule (1772–1918) Stryi became a county center and the seat of a circuit court. It developed into an industrial and commercial town, and its population grew from 8,000 in 1843 to 12,600 in 1880, 23,200 in 1900, and 30,900 in 1910.

The town hall in Stryi

By the end of the 19th century Stryi was an important center of the Ukrainian national movement in Galicia. The town's chief civic leaders were Ye. Olesnytsky and O. Nyzhankivsky. Stryi was one of the first centers of the Ukrainian women's movement: the first women's rally was held there in 1891, and the first edition of the women's almanac *Nasha dolia* (Our Fate, 1893) was published there. Stryi was an important center of the Ukrainian cooperative movement: the Provincial Dairy Union (later *Maslosoiuz) was founded there in 1907, and the first Ukrainian provincial exhibition was held there in 1909. A Ukrainian gymnasium was opened in Stryi in 1906, and the newspapers *Stryis'kyi holos* (1894–5), *Hospodar i promyslovets* (1909–11), and *Pidhirs'ka rada* (1910–11) appeared there. During the Ukrainian-Polish War in 1919,

the headquarters of the Third Corps of the Ukrainian Galician Army were located in Stryi.

Under Polish occupation (1919–39) the city's economy hardly grew, and by 1931 its population was only 30,900. In 1939 about 28 percent of the inhabitants were Ukrainian, 34.5 percent were Polish, and 35.6 percent were Jewish. Stryi became a leading center of Ukrainian resistance: its cells of the Ukrainian Military Organization and the OUN were among the most active in Galicia. The Ukrainian state gymnasium (1918–23) was replaced by Ukrainian departments in the Polish gymnasium, but a private Ukrainian women's seminary and a gymnasium run by the *Ridna Shkola* society were opened in the 1920s. After Lviv, Stryi had the largest Plast organization in Galicia. A branch of the Lysenko Higher Institute of Music, the Verkhovyna Museum (est 1932), and many other cultural institutions served the Ukrainian community. The city's Ukrainian newspapers included *Stryis'ka dumka* (1933–9) and *Ukrains'ka muzyka* (1937–9).

Under the Soviet regime the city's industry was developed rapidly. Large machine-building, metalworking, and reinforced-concrete plants were set up. Light industry (fur and footwear) and the food industry were expanded. The city became an important railway and highway junction. The city's population grew to 36,200 in 1959 and 48,000 in 1970, and its ethnic profile changed sharply: in 1959, 68 percent of the population was Ukrainian, and 30 percent was Russian. There is a regional studies museum in Stryi.

Prichaska, A. *Historja miasta Stryja* (Lviv 1926)

V. Kubijovyč, Ya. Padokh

Stryi Brigade of the Ukrainian Galician Army (*Stryiska* [11] *brygada UHA*). A unit in the Third Corps of the UHA, organized in June 1919 from some units previously assigned to the Krukenychi and Hlyboka combat groups. It consisted of four infantry battalions, one artillery regiment, and reserve units. Its peak strength, in August 1919, was 2,400. Under Maj K. Schlosser's command the brigade became a leading fighting unit. In August 1919 it was assigned to the UNR Army to assist its Third Iron Rifle Division against the 45th and 47th Red Army divisions. In February 1920 it was reorganized into the Ninth Infantry Regiment of the Red Ukrainian Galician Army, and in late April it joined other UHA units in Polish internment camps.

Stryi Regional Studies Museum Verkhovyna (*Stryiskyi kraieznavchyi muzei 'Verkhovyna'*). A museum founded in Stryi in 1932 through the efforts of R. Dombchevsky, I. Siletsky (its principal collector), O. Bachynska, T. Zalesky, and I. Maksymchuk. In 1937 it had 2,000 items on exhibit. It was nationalized by the Soviet occupying authorities in 1939 and reorganized after the Second World War. The museum has natural science and history divisions and holds 14,000 artifacts (1971), including local archeological finds, 15th- to 20th-century historical documents, 17th- and 18th-century Cossack and opryshok weapons, 14th- to 16th-century coins, late-19th- to early-20th-century Boiko and Hutsul Easter eggs, 19th-century folk musical instruments, 18th- to 20th-century traditional clothing, and 19th- and 20th-century books and periodicals.

The Stryi River

Stryi River [*Stryi*]. A right-bank tributary of the Dniester River that flows for 232 km through southern Lviv oblast and drains a basin area of 3,055 sq km. The river originates in the High Beskyds and initially has a mountainous character. It is 30–50 m wide in its upper reaches and up to 150 m wide downstream. The river is fed by meltwater and has been known to flood. It is used for industrial and water-supply purposes. A hydroelectric station and water reservoir (200 million cu m) have been built on the waterway. Some major centers located along the river are Turka, Stryi, and Zhydachiv.

Stryi Ukrainian Music and Drama Theater (*Stryiskyi ukrainskyi muzychno-dramatychnyi teatr*). A theater founded in 1944 as a *touring theater on the basis of the Kiev troupes under I. *Sahatovsky and K. *Luchytska. It was joined by actors from the Sambir Touring Theater in 1948 and was active until 1964. It performed mostly Ukrainian classical dramas and toured Moldavia and the Russian SFSR. Luchytska was the director, and V. Borysovets was the stage designer; among the actors were S. Koval and Ye. Khoroshun.

Stryis'ka dumka (*Stryi Thought*). A newspaper in Stryi, published twice a week in 1933–5, and then twice a month to 1939 as *Dumka*, by A. Kozak. The newspaper carried mostly news from and information about Subcarpathia, the Boiko region, and Pokutia. Among the contributors were Ya. Padokh, J. Rudnyckyj, and Z. Lysko.

Stryisky, Ivan [*Stryjs'kyj*], b 1884, d 28 January 1935 in Chernivtsi, Bukovyna. Civic and political leader in the Kitsman region. A practicing lawyer, he was active in politics as deputy leader (from 1927) of the Ukrainian National party in Rumania. He contributed articles on legal issues and other matters to Ukrainian papers, such as *Ridnyi kraj* and *Chas*.

Stryjek, Dmytro, b 5 November 1899 in Lanivtsi, Borshev county, Galicia, d 7 March 1991 in Saskatoon. Painter; one of the most prominent primitive artists in Canada. A resident of Canada since 1923, he began painting seriously after his retirement in 1965. After moving to

Dmytro Stryjek: *Butterfly*

Saskatoon in 1967, he began exhibiting and attracted the attention of curators and art historians. His subjects include landscapes, flowers, birds, and religious and historical events, often those remembered from his youth in Ukraine. His portraits include some famous Ukrainians, such as T. Shevchenko, Lesia Ukrainka, Hetman I. Mazepa, S. Petliura, and Cardinal Y. Slipy, and world leaders, such as Queen Elizabeth II, I. Ghandi, and P.E. Trudeau. Although Stryjek has lived most of his life in Canada, his vision is deeply rooted in his Ukrainian environment and the Ukrainian community in Saskatoon. His paintings are astonishingly inventive and hauntingly lyrical (eg, the series 'Hill of Flowers'). A brilliant colorist, Stryjek achieves a freshness that seems inexhaustible, and challenges accepted ideas of untutored painting as separate from mainstream art. A monograph about him by P. Millard was published in 1988 in conjunction with a cross-Canada traveling exhibition of Stryjek's paintings.

D. Zelska-Darewych

Strykowski, Maciej (Matys Strycovius; pseud: Oso-
stevitius), b ca 1547 in Stryków, near Warsaw, d ca 1582–
93. Polish historian and poet; author of the first printed
history of Lithuania. He studied at the Cracow Academy
(1567–70) and worked in the Lithuanian military and dip-
lomatic service. He used Lithuanian, Polish, Ukrainian,
and Russian chronicles and other records collected during
his travels to prepare *Kronika polska, litewska, z̄mudzka i
wszystkiej Rusi* (Chronicle of Poland, Lithuania, Samogitia,
and All of Rus'), which covered events until 1572. Written
in Polish, in places in an epic style, it provided an over-
view history of Lithuania with a Lithuanian political atti-
tude and interpretation of events. It was published in 1582
in Königsberg and translated into Belarusian (1584) and
Russian (17th century); some of its original sources have
since then been lost. The chronicle was used by Ukrainian
(S. Velychko, H. Hrabianka, T. Safonovych), Polish (A.
Mickiewicz, J. Slowacki, J. Kraszewski), and Lithuanian
(A. Kojelavičius) writers and historians.

Strypa River. A left-bank tributary of the Dniester River
that flows southward for 147 km through Ternopil oblast
and drains a basin area of 1,610 sq km. The river is gener-
ally approx 30 m wide and has a sharply defined valley.

Its waters are used for industry and agriculture. A small
water reservoir has been built on it. The major centers lo-
cated along the river include Zboriv and Buchach.

Hiiador Strypsky

Mykola Stsiborsky

Strypsky, Hiiador [Stryp's'kyj, Hijador] (pseud: Yador
Bilenky, Beloň Rusinský), b 19 March 1875 in Shelestove,
Bereg komitat, Transcarpathia, d 9 March 1949 in Buda-
pest. Civic figure, ethnographer, librarian, and publicist;
member of the Hungarian Academy of Sciences from 1913
and the Shevchenko Scientific Society from 1914. After be-
ing educated in Budapest, Lviv, and Cluj he worked as a
librarian at the Transylvanian Museum in Cluj (1888–
1908) and as a curator at the National Museum in Buda-
pest (from 1910). He associated with V. Hnatiuk, I. Franko,
and A. Voloshyn, contributed to the publications *Nauka*
and *Selo* (1907), and published the journal **Ukránia* (1916–
17) in Budapest. In 1918 he was appointed section head of
Ruthenian affairs in the Hungarian Ministry of Culture
and Education and adviser to the Ministry of National Mi-
norities. In 1919 he organized a chair of Ruthenian studies
at Budapest University. Among his scholarly publications
are *Starsha rus'ka pys'mennost' na Uhorshchyni* (Old Ruthenian
Writing in Hungary, 1907), *Naistarshyi rumuns'kyi
druk latynkoiu* (The Oldest Rumanian Incunabula in the
Latin Alphabet, 1913), and *Gde dokumenti starshoi istorii
Podkarpatskoi Rusi?* (Where Are the Documents of the An-
cient History of Subcarpathian Ruthenia?, 1924), as well as
an ethnographic description of Hungarian Ruthenia
(1911), translations of Ukrainian literary works into Hun-
garian, and an annotated edition of M. Teodorovych's
1791 guide to home management and etiquette (1919).

Stryvior Museum. A museum founded in Peremyshl
in 1932 on the initiative of O. Kulchytsky and through the
efforts of I. Shpytkovsky (its custodian) and B. Za-
haikevych (its director). In 1937 it had 2,500 archeological,
historical, religious, and ethnographic artifacts in its ex-
hibits, including many rare icons. After the Second World
War many of its holdings that were not destroyed or sto-
len were transferred to the Polish Regional Museum in Pe-
remyshl.

Stryvior River (also Strviazh). A left-bank tributary of
the Dniester River. It is 94 km long and drains a basin area
of 955 sq km. The river originates in the Middle Beskyds
and flows through Poland and Ukraine (Lviv oblast). Part
of it is used for industrial purposes.

Strzałków. A town in Poznań voivodeship, Poland, which after the First World War was the site of an internment camp. In 1919–20 almost 7,000 Ukrainians from Galicia were held in the camp, and in 1921–3 UNR Army internees were transferred there from Łańcut. The latter group brought with them a number of educational programs that had been set up in Łańcut (a popular university with four faculties, a gymnasium, and a primary school for children), several cultural societies (a Ukrainian language association, a choir, an opera, and three drama groups), a sports gymnasium supported by the YMCA, a chess club, and several papers (*Nasha zoria*, *Budiak*, *Zaporozhs'ka dumka*, *Blokha*, *Promin'*, and *Students'kyi vistnyk*).

Strzyżów culture. An Early Bronze Age culture that existed in western Volhynia and the upper Buh region. It was named after a Polish site excavated in the 1930s. The people of this culture, a subgroup of the Corded-Ware Pottery culture, engaged in agriculture, animal husbandry, hunting, and fishing. In addition, they had a well-developed flint industry that produced items for trade. They lived in semi-pit dwellings and buried their dead both in pit graves and in kurhans. An extensive flint inventory and bronze, stone, and bone items were found at excavation sites. In addition, pottery decorated with distinctive rope impressions and bladefike lines was also common. The Strzyżów culture eventually had a role in the development of the *Komariv and *Trzcinec cultures.

Stsiborsky, Mykola [Scibors'kyj] (pseud: Zhytomyrsky, Orhansky, Rokosh), b 28 March 1897 in Zhytomyr, d 30 August 1941 in Zhytomyr. Nationalist publicist and ideologue. A captain in the UNR cavalry during the Ukrainian-Soviet War, he was interned in 1920–2 with other UNR soldiers in a Polish camp, where he received special training and was promoted to the rank of lieutenant colonel. In 1922 he emigrated to Bohemia. There he was one of the leaders of the *League of Ukrainian Nationalists (1925–9) and studied engineering at the Ukrainian Husbandry Academy in Poděbrady. A member from 1926 of the Leadership of Ukrainian Nationalists (PUN) in charge of organizational affairs and then propaganda, and a founding member of the clandestine OUN (est 1929), from 1930 he lived in Paris and organized OUN branches in Ukrainian émigré centers in Central and Western Europe.

Stsiborsky elaborated the ideology of 'solidarism' and state corporatism in official OUN publications, contributed many articles to nationalist periodicals, such as *Derzhavna natsiia*, *Rozbudova natsiï*, *Samostiina dumka*, *Surma*, *Ukraïns'ke slovo*, and *Proboiem!*, and coauthored the 1940 OUN draft constitution for an independent Ukrainian state. Published separately were his book *Natsiokratiiia* (Nationalism, 1935, 3 edns) and brochures and booklets on the OUN and the peasantry (1933), the OUN and the working class (1935), Bolshevik nationality policy in Ukraine (1938; trans into English [*Ukraine and Russia: A Survey of Soviet Russia's Twenty-Year Occupation of Eastern Ukraine*, 1940], French, and German), democracy, Stalinism (1938, 1941, 1947), Ukraine and Soviet nationality policy (1944), the land question (1939), and Ukraine's population and economy (1940; German edn 1944). Stsiborsky's article 'La question ukrainienne' appeared in *La revue économique internationale* (March 1940).

After moving to Cracow in late 1939 to run the clandestine

OUN political training school, Stsiborsky compiled the OUN white book on the 1940 split and remained loyal to A. Melnyk. He and O. *Senyk organized and initially led the *OUN expeditionary groups of the Melnyk faction that penetrated into central and eastern Ukraine during the Nazi invasion of the USSR in 1941. They were assassinated by B. Kozii, a member of the rival OUN Bandera faction and a former Communist.

R. Senkus

Stubazka River (also Stubelka or Stubla). A left-bank tributary of the Horyn River that flows northward for 86 km through southern Rivne oblast and drains a basin area of 1,350 sq km. The river is about 5 m wide at mid-course and has a valley that is 4 km wide. It supplies water for industrial purposes and is used as part of a regional drainage system. The old Rus' city of Peresopnytsia was once situated in its valley.

Stubla River. See Stubazka River.

Students'kyi visnyk. See *Students'kyi visnyk*.

Student. A Ukrainian-Canadian student newspaper published irregularly from 1968 to the late 1980s. Established as the official publication of the *Ukrainian Canadian Students' Union (SUSK), the newspaper dealt with the concept and politics of multiculturalism, community affairs, the defense of human rights in Ukraine, and contemporary Ukrainian cultural phenomena in a spirited and occasionally provocative manner. Its most notable years of publication were in 1977–82, when it came out of Edmonton under the editorship of N. Makuch and became the first ethnic student newspaper to be accepted into the Canadian University Press association. From 1982 *Student* was formally independent of SUSK but maintained a working arrangement with it.

Student Battalion (Studentskyi kurin im. Ukrainskykh sichovykh striltziv). A military unit organized in Kiev during January 1918 to defend Kiev and the Central Rada against Bolshevik insurgents within the city and the approaching Red Army. It consisted of university and senior secondary-school students, with a total of about 550 volunteers. After only one week of military training one of its companies left Kiev to reinforce the cadets of the Khmelnytsky Officer School. Thirty of its soldiers died in the Battle of *Kruty. The other units of the battalion remained in Kiev to resist the Bolsheviks. Most of the battalion's surviving soldiers later joined the Haidamaka Battalion of Slobidska Ukraine.

Student fraternities (*korporatsii*). Student organizations for the promotion of patriotism, fortitude, and discipline within small groups held together by friendship and enjoyment. Fraternities appeared in Germany during the Napoleonic Wars and inculcated a high concept of honor which demanded dueling as a response to insult. Eventually members of fraternities developed an inclination for a carefree and even dissipate life. Among Ukrainian students the first fraternities were organized in 1906, but they became popular only in the interwar period, particularly among students studying abroad. The Ukrainian fraternities were based on the original forms and ideas of honor,

freedom, and fatherland. The richest traditions were developed by the fraternities in Chernivtsi, which adopted Cossack names – *Zaporozhe (1906–40) and *Chornomore (Black Sea 1913–40). In Danzig (now Gdańsk) Ukrainian fraternities were founded in 1924 (Chornomore, Halych, and Zarevo); they spread from there to other Ukrainian student centers, such as Lviv, Vienna, Prague, Berlin, Rome, Warsaw, Poznań, and Cracow. Fraternities of the same name from various centers formed associations, with their own ideological principles and statutes. After the Second World War Zaporozhe branches were re-established in New York, Vienna, and Munich, and Chornomore branches in Philadelphia and Montreal.

Student movement. See Students, postsecondary.

Student press. The first Ukrainian-language student periodicals were handwritten and circulated clandestinely among members of the Kiev Student Hromada: 'Samostaine slovo' (1861–2), which defended the Ukrainian culture, and the humorous 'Pomyinytsia' (1863–4). The first printed publications put together primarily by students were **Druh* (1874–7) and **Hromads'kyi druh* (1878) in Austrian-ruled Lviv; both were under the influence of M. Drahomanov and socialist in orientation. Also published in Lviv decades later were the first exclusively student journal, **Moloda Ukraina* (1900–3); **Shliakhy*, the literary-cultural organ of the Ukrainian Student Union in 1913–14; and the journal **Vidhuky* (1913), which advocated that students undergo military training in preparation for war. In the early 20th century there were attempts to establish Ukrainian student papers in the Russian Empire; these included *Vistnyk Ukraïns'koi kyïvs'koi students'koi hromady* (one issue in 1903, two in 1905) in Kiev and *Ukraïns'kyi student* (two issues in 1913, one in 1914) in St Petersburg.

During the First World War and the subsequent struggle for Ukrainian independence, conditions did not allow a student press to develop. Only a few periodicals appeared: *Sterno* (1917) in Kiev, *Vistnyk Drahomaniv's'koi orhanizatsii* (1917) in Lviv, and *Nova dumka* (1920) in Kamianets-Podilskyi.

Under Soviet rule, student newspapers in Ukraine were completely subordinated to the regime and their function as carriers of new ideas has been replaced by their adherence to and advocacy of the Party line. The first journal to appear was the short-lived Russian-language *Studentcheskii vestnik* (1919) in Kiev. The most important journal of the interwar period was the Central Union of Proletarian Students' **Student revoliutsii* (1922–33). Student journals at institutes of people's education, such as *Molodi zahony* in Kiev and *Robotnyk osvity* and *Studenty zhovtnia* in Kharkiv, were published or copublished by the Communist Youth League of Ukraine (Komsomol) and were therefore directed at a much wider audience of young people than just students. Since the Second World War the only republican periodical directed specifically at students has been *Students'kyi hart* (est 1969), a supplement (30 times a year) to the Komsomol paper *Molod' Ukrainy*. Only since the late 1980s has a student press not controlled by the regime been able to develop. In neighboring Poland, Ukrainian students in Warsaw have published the quarterly *Zustrichi* since 1984.

In interwar Lviv in the early 1920s, the lithographed periodicals *Nash shliakh* (1922), *Students'ki visty* (1923, 1926),

Informatsiinyi lystok (organ of the Ukrainian Provincial Student Council), and *Istorychnyi visnyk* (1923) were circulated secretly. They promoted the Lviv (Underground) Ukrainian University and Ukrainian political aspirations. The sanctioned Catholic monthly **Postup* (1921–30) was called a student herald until 1927. Russophile students published four issues of the semiannual *Razsvet* (1923–4, ed B. Trush and Ya. Knitsikevich) in Russian.

Many student journals were established in the major centers of Ukrainian émigré life in the 1920s, especially in Czechoslovakia. Their number in that country was a reflection of the dynamism of Ukrainian student and political life there, which was not subject to the restrictions imposed by the Polish authorities in Western Ukraine. **Students'kyi visnyk* (1923–31), the monthly organ of the Central Union of Ukrainian Students, was published in Prague. The Ukrainian Academic Hromada in Prague published the journal *Ukraïns'kyi student* (1920–5). Students at the Ukrainian Higher Pedagogical Institute in Prague published a student hromada bulletin and the journal *Spudei* (1925–6, ed B. Homzyn). The Democratic Alliance of Students there issued *Ob'iednannia*; socialist students published the irregular **Zhyttia* (1924–5) and *Vartovyi* (1926–9). Soviet citizens studying in Prague published *Vpered*. Students at the Ukrainian Husbandry Academy in Poděbrady published the annual *Zapysky Ukraïns'koi akademichnoi hromady* (1923–5), the semimonthly *Nasha hromada* (1923–35), the humor magazine *Podiebradka* (1923–4), and the bibliographic journal *Ukraïns'ke knyhoznavstvo* (4 issues, 1922–?). The nationalist Group of Ukrainian National Youth, a student organization, issued the monthly **Natsional'na dumka* (1924–7) in Prague. In Brno the Ukrainian Student Association published *Hurtom* (1925–6).

In Berlin students published four issues of **Spartak* (1926–8), the organ of the youth wing of the Communist Party of Western Ukraine, which was smuggled into Western Ukraine. Ukrainian student journals in Vienna included the monthly *Molode zhyttia* (1921), the pro-communist *Nash stiah* (1921–3?, ed R. Rozdolsky) and *Novyi shliakh* (1924–6), and the satirical *Ieretykon* (1924–5). *Dumka* (1924–?) appeared briefly in Graz, and the humorous *Smikholet* (1924) was published by students at the Danzig Polytechnic. In Warsaw the Ukrainian Student Hromada published *Na chuzhyni* (1924–5), **Students'kyi holos* (1927–31), and the irregular *Chornomore* (1928–33). Transcarpathian students in Prague published four short-lived Russophile journals in the 1920s and the nationalist **Proboiem* (1933–44). In Bukovyna repression by the Rumanian authorities retarded the development of a Ukrainian student press. Ukrainian students were, however, involved in the publication of the literary monthly **Pro-min'* (1921–3). Later the Union of Ukrainian Student Organizations in Rumania published *Students'ki visty* (1935–7) as a supplement to the paper *Chas* and then the journal *Samostiinist'*. In Canada students living at the Mohyla Ukrainian Institute in Saskatoon issued the bimonthly journal *Kameniar* (1918–19).

The Ukrainian student movement, and with it the student press, declined in Central and Western Europe in the 1930s, owing to the Depression and the consequent lack of a stable community of university students. As a result Lviv re-emerged as the center of the student press. Published there were **Students'kyi shliakh* (1931–4), the

monthly organ of the Union of Ukrainian Student Organizations under Poland and then of the Central Union of Ukrainian Students, and its successor, **Students'kyi visnyk* (1935–9); they were closely allied with the OUN. Both were banned after the 1939 Soviet occupation of Galicia. During the Second World War, under the German occupation **Students'kyi prapor* (1943–4) was published in Lviv as the monthly organ of the Labor Alliance of Ukrainian Students, and the Nationalist Organization of Ukrainian Students published *Biuletyn' NOUS-u* (1942–3, ed V. Rudko) for students in Germany.

After the war, over 20 student periodicals were established by Ukrainian refugees studying in Germany and Austria; most were published in Munich. They included *Students'kyi shliakh* (1945–7), *Stezhi* (1946–7), *Students'kyi visnyk* (1947–8), *Visti TseSUSu* (1948–55), and *Visnyk TseSUSu* (1946–7), all of them organs of the Central Union of Ukrainian Students; *Students'kyi informator* (1945), *Student* (1945–6), *Students'ki visti* (1946–7), *Students'ki obrii* (1946–7), and *Students'ke zhyttia* (1949–50); *Students'ka dumka* (1946–7) in Augsburg; *Students'ka dumka* (1946–8) in Regensburg; *Students'kyi shliakh* (1945–7) in Innsbruck; *Students'kyi prapor* in Graz; the journal *Bohoslov* (1948–9) of the Student Society at the Theological Academy of the Ukrainian Autocephalous Orthodox church; *Biuletyn'* (1949–56) of the Ukrainian Student Society of Mikhnovsky; the Catholic journal *Obnova* (1947–9); *Seminariini visti* (1946) at the Greek Catholic Seminary in Hirschberg; the Zarevo Ukrainian Student Organization's monthly journal *Zarevo* (1949–50); *Iunats'ka borot'ba* (1947–8), the student organ of the Ukrainian Revolutionary Democratic party; and the satirical wall gazette *Elita* (1947–51) at the Ukrainian Student Center in Louvain, Belgium.

After the mass resettlement of the refugees in other Western countries, student periodicals were established there. **Feniks* (1951–74) was published by the pro-OUN (Bandera faction) Ukrainian Student Organization of Mikhnovsky, and the pro-OUN (Melnyk faction) **Smoloskyp* organization and **Zarevo* issued *Smoloskyp* (1950–68) and **Rozbudova derzhavy* (1949–57) respectively; all three were begun in Europe and moved to the United States. The Federation of Ukrainian Student Organizations of America published a regular page in the newspaper *Svoboda* (130 issues in 1954–72), the annual *Horizons* (1956–68), and irregular newsletters. The bilingual (Ukrainian and English) and often provocative *Student* (est 1968) was the longest-running Ukrainian student organ, although it did not always appear regularly. In the early 1990s a new student paper, *Studenets'*, edited by S. Bandera, Jr, surfaced in Toronto. The Union of Ukrainian Student Societies in Europe has published an irregular bulletin. In Argentina the Union of Ukrainian Students published *Students'ke zhyttia* (20 issues, 1959–61). In Australia the Ukrainian Student Hromada in Victoria published *Students'ke oko* (25 issues, 1969–73). In Brazil students at the Basilian seminary in Curitiba have published the irregular magazine **Tsvirkun* since 1945. Local student groups have issued various ephemeral periodicals. Notable among them was *New Directions* (1969–74) in New York and *Vitrazh* (1977–80?) in London. (See also *Press.)

Student revoliutsii (Student of the Revolution). A student journal published in Kharkiv in 1922 in Russian and in 1924–33 in Russian and Ukrainian as the organ of the Central Bureau of Proletarian Students. It appeared six to eight times a year until 1929, semimonthly in 1930, and then three times a month until March 1933. Edited by E. Rabkin, it published articles on political and academic affairs, prose, and poetry.

Students, postsecondary. From the mid-14th century on, before there were universities in Ukraine, Ukrainians studied at European universities, particularly at Cracow (800 were educated there in the 15th and 16th centuries) and Prague (there was a special residence for Lithuanian and 'Ruthenian' students there). They also studied at the universities of Heidelberg, Leipzig, Königsberg, Göttingen, Köln, Wittenberg, Halle, Kiel, Vienna, Paris, Strasbourg, Basel, Leiden, Oxford, Rome (theology students), Padua, and Bologna and at Polish Jesuit academies and colleges in Poland, Ukraine, Belarus, and Lithuania.

The first postsecondary school in Ukraine was the Orthodox *Kievan Mohyla Academy (1632–1817). Its students – the sons not only of nobles, the Cossack *starshyna*, and clerics but also of rank-and-file Cossacks, burghers, and peasants – had few liberties or prerogatives and were subjected to strict supervision and discipline, including beatings and various humiliations. Such treatment did not, however, deter them from engaging in petty theft, drinking, brawling, and even terrorizing and robbing townfolk. In the 17th century the academy rarely had more than 200 students. By 1710 their number had grown to over 2,000, but then it declined to 1,100 in 1715, not more than 800 in the 1720s and 1730s, and approx 1,100 from 1744 to the 1770s. Most of the students were from outside Kiev. In the second half of the 18th century they hailed primarily from within the Hetman state. Only those from rich families could afford private quarters, and they were treated with deference by the administration. Many (200 in the early 18th century, nearly 400 in 1765) were poor and received room and board in the academy's *bursa, and others resided with parish priests and elsewhere in Kiev. Their meager incomes derived from begging door to door, appearing in public choral and theatrical performances, and serving as preceptors, Sunday school teachers, and servants and tutors to the rich. Those who belonged to the academy's Young Brotherhood and, later, two sodalities were instilled with an Orthodox zeal, and aided their needy peers. From 1701 on, Orthodox Ukrainians from Polish-ruled territories, Russians, Serbs, Bulgarians, and even Moldavians, Wallachians, and Greeks were allowed to study at the academy. In the second half of the 18th century the largest group of students were the sons of clerics.

Ukraine under Russian rule, 1805–1917. Increasingly more students received higher education in Ukraine after the opening of Kharkiv University (1805), the Kiev Theological Academy (1819), the Nizhen Lyceum (1820), Kiev University (1834), the Richelieu Lyceum in Odessa (a post-secondary school from 1837), and Odessa University (1865). Many postsecondary professional and technical

schools were opened in the second half of the 19th century, and many postsecondary schools for the *education of women arose after the Revolution of 1905. In 1914–16 there were 26,700 students in Ukraine: approx 10,000 at universities, 13,000 at professional and technical schools, and 4,000 in higher courses for women.

The rights and obligations of students in the Russian Empire were defined by a general statute on universities. The 1804 statute formally guaranteed self-government to universities and academic freedom to students. The 1835 statute that replaced it put universities under the supervision of trustees and the political conduct of students under the control of university inspectors. In 1845, to restrict the non-gentry's access to higher education, the state raised tuition fees. In 1847 the right of unregistered persons to audit lectures was withdrawn. In 1863 university autonomy was reinstated, but students came under the jurisdiction of university tribunals. In 1872 the Ministry of Education responded to widespread student unrest in the empire by introducing stricter disciplinary rules, but they were not confirmed by the various university professorial councils. Subsequent student unrest, which began with a demonstration at Kiev University on 14 March 1878 and the expulsion of some 100 students there, and then spread to other universities, resulted in the introduction of harsher governmental restrictions. An 1884 law again rescinded university autonomy, and in 1887 tuition fees were raised fivefold. In 1899 the state introduced punitive measures subjecting participants in student unrest to military conscription. The students responded with further walkouts, boycotts of classes, and demonstrations, and in 1901 the minister of education, N. Bogolepov, was assassinated.

Members of the Kharkiv Student Hromada and guests (1899). Top row, from left: Dmytro Antonovych, L. Kuliabko-Koretsky, Dmytro Poznansky, Yevlampii Tyshchenko, Oleksander Kovalenko, Bonifatii Kaminsky, Yurii Kollard, K. Rumnytsky; middle row: Dmytro Drobiazko, Oleksandra Matsiievych, K. Matsiievych, K. Kotliarova, Mykola Levytsky (guest), Mykola Mikhnovsky; bottom row: Mykhailo Rusov, Lev Matsiievych, Severyn Pankivsky (guest), Oleksander Stepanenko

In 1855 universal access to higher education was introduced. Consequently the number of students in Russian-ruled Ukraine grew from 3,141 in 1855 to 38,853 in 1916, and the proportion of students whose parents were nobles or civil servants fell from 65 percent in 1855 to 36 percent

in 1914. In 1894, of the 4,016 students at Kharkiv, Kiev, and Odessa universities, 59.7 percent were Orthodox (of whom half, approx 1,200, were Ukrainians), 25.3 percent were Jewish, 12.8 percent were Roman Catholic Poles (mostly at Kiev University), and 2 percent were Protestants. Students' living conditions were poor. In the 1880s and 1890s fewer than 15 percent of them were exempted from paying tuition, and few received state stipends. They were all obliged to wear prescribed uniforms.

Ukrainians also studied at imperial universities outside Ukraine, mostly in Moscow (20.4 percent of students at Moscow University in 1891 were from Ukraine), St Petersburg, and, from 1896, when the Ministry of Education allowed the graduates of theological seminaries to enter university, Warsaw, Tartu, and Tomsk.

For many years ethnic Ukrainian student organizations did not exist. Instead students were active in various Russian and Ukrainian underground and semilegal organizations (eg, the *Cyril and Methodius Brotherhood), in local *hromadas (especially the Hromada of Kiev), in various revolutionary populist organizations, and in the *Brotherhood of Taras. From the late 19th century they belonged to general Russian student organizations, which championed academic freedom, autonomy, and corporate rights (ie, the right to have meetings, assemblies, student tribunals, and mutual aid savings banks). At the 'all-Russian' student congresses 23 of 98 delegates were Ukrainians.

The first Ukrainian student organizations date from the second half of the 19th century, when semilegal *zemliastva*, which united students from the same region studying in a particular city, were founded. Those groups chose delegates to student executives at universities and institutes. Later, clandestine Ukrainian student hromadas were created in Kiev (1893), Kharkiv (1897), Moscow (1898), St Petersburg (the *Ukrainian Student Hromada in St Petersburg, 1898), Tartu (1898), Warsaw (1901), and Odessa (1902). The involvement of many of their members in various Russian and Ukrainian revolutionary *parties brought about expulsion, police persecution, imprisonment, and even exile to Siberia. After the Revolution of 1905 the student hromadas tried to operate independently of the parties and concentrated on professional and academic activities. Consequently they were legalized, and their combined membership grew from approx 260 at the beginning of the century to approx 1,000 in 1908. Hromada membership grew from 22 to 250 in Moscow, from 50 to 150 in Kharkiv, from 68 to 130 in Kiev, from 20 to 98 in Tartu, from 30 to 64 in Odessa, to approx 120 in Warsaw, to approx 100 in St Petersburg, and to 40 each in Tomsk and at the Kiev Higher Courses for Women.

The work of the student hromadas was co-ordinated by secret congresses of delegates, which were convened in Kiev in 1898, 1899, and 1908, in Poltava in 1901, and in St Petersburg in 1904. In 1913 a Supreme Council of Ukrainian Students was created (it published irregularly the miscellany *Ukrains'kyi student* in 1913–14). From the 1890s on, the hromadas had contacts with Western Ukrainian student organizations. Delegates from the Sich student society of Vienna and the Academic Hromada of Lviv took part in the 1898 congress in Kiev; hromada representatives visited Galicia and Bukovyna; students from Russian-ruled Ukraine attended summer courses in Lviv and Chernivtsi; and student excursions were jointly organized.

Western Ukraine under Austrian rule, 1772–1918.

Western Ukrainian students attended the Barbareum Greek Catholic seminary in Vienna (1774–84) and Lviv University (est 1784) and its theological Studium Ruthenum (1787–1809), the Polytechnic (est 1814), Agricultural School (est 1855), and Veterinary Academy (est 1881) in Lviv, and Chernivtsi University (est 1875). In those institutions they made up 10–25 percent of the total number of students. Small numbers of Western Ukrainian students also studied at the universities of Vienna, Budapest, and Cracow and elsewhere in the Austrian Empire. All post-secondary schools in the empire, as elsewhere in Western and Central Europe, were self-governing. The students' 'academic freedoms,' however, were subject to local government control during the period of absolutism (until 1860). Theology students were also subject to ecclesiastical sanctions.

The first Western Ukrainian student organizations and the largest number of them were founded in Lviv: the populist Sich (1861–3), Akademichna Besida (1870–1), Druzhnyi Lykhvar (1871–82), and Vatra (1892–6) societies; the Russophile *Academic Circle (est 1870); the Ukrainophile socialist *Academic Brotherhood (1882–96); the *Academic Hromada (1896–1921), which arose from the amalgamation of the Vatra society and the Academic Brotherhood; and the *Osнова society (1897–1939) at the Lviv Polytechnic. In Chernivtsi the initially Russophile but from 1879 Ukrainophile-dominated *Soiuz society (1875–1902, 1904–22), the Russophile Bukovyna (1888–94) and Karpat (est 1894) societies, the Moloda Ukraina (1900–2) and Sich (1902–23) student societies, and the *Orthodox Academy's theology students' society (1907–23) were established. Elsewhere in the Austrian Empire, Ukrainian students founded the Society of SS Cyril and Methodius (est 1864) and the *Sich student society (1868–1947) in Vienna, the Academic Hromada (1887–95) in Cracow; the Rus' mutual aid association (1895–1910) and Sich student society (1902 to ca 1947) in Graz, and the Ukrainian Hromada (1902–14) in Prague.

To co-ordinate their activities the existing organizations convened congresses in Kolomyia in 1881 and 1884. In 1889 the students first lent their support to the public campaign for the creation of a Ukrainian university in Lviv. Later they organized secret political cells and advocated Ukrainian independence in their journal **Moloda Ukraina* (1900–3, 1905). An influential factor in the students' political development was their contact with their peers in Russian-ruled Ukraine, particularly those belonging to the *Revolutionary Ukrainian party. The failure of the campaign for a Ukrainian university resulted in the *secession of Ukrainian students from Lviv University in 1901–2. After their return the militant struggle between Ukrainian and Polish students in Lviv became even more acute (it resulted in the murder of A. *Kotsko in 1910), and the clandestine Committee of Ukrainian Youth (KUM) was created to spearhead it. The first 'all-student' congress took place in Lviv in 1909 with the participation of delegates from Russian-ruled Ukraine. At the second congress in 1913, an umbrella organization, the Ukrainian Student Union, was created. Headed by Mykola Zalizniak, in 1913–14 it had in Galicia 1,786 members in 38 chapters, which conducted cultural-educational work among the peasantry and published the journal **Shliakhy*.

The first Ukrainian *student fraternities modeled on the

German *Burschenschaften*, *Zaporozhe (est 1906) and *Chornomore (est 1913), were founded at Chernivtsi University. Later chapters were created in Lviv, Warsaw, Prague, Vienna, Cracow, and Gdańsk (Danzig), where they survived until 1940. Another fraternity, Roksolianiiia, was created in Lviv.

The students of Western Ukraine had various class origins (in the 1880s, 40 percent of them were sons of priests). Because many of those from the peasantry and working class were poor, charities, such as Lykhvar, were established to support them, and a publicly funded residence, the Academic Home, was founded in Lviv in 1907 with the substantial financial support of Ye. *Chykalenko.

In 1912–13 there were 1,868 Ukrainian postsecondary students in the Austrian Empire: 1,287 studied in Lviv (constituting approx 17 percent of all students there), 187 in Chernivtsi (16 percent; in 1914, 300, or 25 percent), 166 in Vienna, 55 in Cracow, 97 in Stanyslaviv (theology students), 28 in Peremyshl (theology students), and 48 elsewhere. Of the total number, 843 were studying law; 430, theology; 271, humanities; 129, medicine and pharmacology; 85, technical sciences; 45, agronomy; 32, veterinary medicine; 17, commerce; and 5, art.

1914–17. After the outbreak of the First World War most students were conscripted. Many Galician and Bukovynian students served in the *Ukrainian Sich Riflemen and *Ukrainian Galician Army. After the February Revolution of 1917, students took part in the creation of the Central Rada in Kiev (student representatives in the Rada included V. Boiko, M. Samoilovych, A. Zhuravel, Yu. Okhrymovych, O. Sevriuk, M. Saltan, M. Chechel, and M. Yermiiv). They became active in various political parties, particularly the Ukrainian Party of Socialist Revolutionaries, whose leadership was overwhelmingly student-based, and were involved in the UNR diplomatic corps (eg, at negotiations of the Peace Treaty of Brest-Litovsk), military, and civil service. In March 1917 a Supreme Ukrainian Student Council was formed in Kiev. It organized three all-Ukrainian student conferences and published a journal, *Sterno* (1917). Students at Kiev University formed the *Student Battalion that was decimated by the Red Army in the Battle of *Kruty in January 1918.

Western Ukrainian and émigré students, 1920–45. The greatest Ukrainian student achievement in the interwar period was the establishment of the *Central Union of Ukrainian Students (TseSUS) in Prague in 1922. By 1924 TseSUS had 22 constituent organizations in nine countries outside Soviet Ukraine: 1,324 members were in Galicia and elsewhere in Poland; 1,442, in Czechoslovakia; 160, in Rumania; 237, in Germany; and 201, in Austria. In 1924 pro-communist and Sovietophile students in Galicia quit TseSUS and created their own umbrella, the *Working Alliance of Progressive Students, which was affiliated with the Central Bureau of Proletarian Students in Kharkiv, and survived until the late 1920s.

In Polish-occupied Western Ukraine native Ukrainian émigrés from Soviet-occupied Ukraine encountered obstructions from the new Polish government, which allowed only Polish army veterans (thereby excluding veterans of the UNR and Ukrainian Galician armies) to enroll at Lviv University and other postsecondary schools in Poland from November 1919, abolished the Ukrainian chairs at Lviv University, and outlawed the Academic Hromada in 1921. The Ukrainians tried to overcome the

impediments by attending the *Lviv (Underground) Ukrainian University (over 1,500 students) and *Lviv (Underground) Ukrainian Higher Polytechnical School (64 students) in 1921–5 and the *Greek Catholic Theological Seminary in Lviv, and by studying abroad, especially in Czechoslovakia. They established the underground Ukrainian Provincial Student Organization, renamed the Professional Organization of Ukrainian Students (PROFORUS, 1921–5). Headed by P. Gan (also the first president of TseSUS) and a council in Lviv, it had 10 district and 50 county branches, totaling 1,252 members in 1924. PROFORUS sponsored the Third Congress of Ukrainian Students in Western Ukraine in 1925. Students were also active in 34 student sections of local Prosvita societies.

Emigrés from Soviet-occupied Ukraine in Warsaw, Cracow, and Polish *internment camps established Ukrainian student hromadas in Warsaw (1921–39) and Cracow (1924–39; 300 members in 1928, 271 in 1933, and 83 in 1938) and the Union of Ukrainian Student Emigrés in Poland in 1923 (five affiliates with 157 members in 1923 and 68 in 1924).

From the second half of the 1920s, after Ukrainians returned to Polish schools, student life centered around the Academic Home and the newly created Student Hromada in Lviv. The Ukrainian students in Lviv (1,506 in 1929–30) and elsewhere were divided into mutually hostile nationalist and pro-communist camps (the latter lost much of its support in 1926–7). Ukrainians also studied at Polish universities and other schools in Cracow (389 students in 1929–30), Warsaw (approx 200 students), Poznań, Vilnius, and Lublin, where they did not encounter administrative hindrances, and established student clubs. According to official statistics on religious affiliation, under Polish rule there were 3,000 Ukrainian students in 1927–8, 2,800 in 1933–4, and 2,500 in 1937–8, not counting Greek Catholic theology students in Lviv, Peremyshl, and Stanyslaviv. Organized activity was revitalized after the creation of the semilegal, pro-OUN *Union of Ukrainian Student Organizations under Poland (1931–9), which united 2,500 students at five universities and 27 societies (18 in Lviv, 5 in Cracow, 2 in Poznań, 1 in Vilnius, 1 in Warsaw) with 65 county affiliates. The students' revolutionary activities resulted in the imprisonment of many of them during the 1920s and 1930s.

Participants at the Second Student Congress (Lviv, 1931)

In Rumanian-occupied Bukovyna the Soiuz, the Sich, and the Orthodox Academy student societies were banned after 1922–3. Only the fraternities Zaporozhe (it was also banned in 1926–8) and Chornomore and their Fraternal Union (est 1929) were allowed to function. Their activity was co-ordinated by the clandestine Committee of Ukrainian Students of Bukovyna (1921–5), linked to TseSUS. Small groups of Ukrainians studying elsewhere in Rumania established new societies: Zoria (1921–6) and Bukovyna (1926–44) in Bucharest and Hromada (ca 1928 to ca 1936) in Iași. From 1929 to 1937 the activity of all existing societies (totaling 160 members in 1929) was co-ordinated by the *Union of Ukrainian Student Organizations in Rumania. Rumanian oppression, like Polish oppression in Galicia, politicized the students, who became active in clandestine nationalist and left-wing organizations, and the overtly pro-OUN *Zalizniak society (1934–7) was created by former members of Chornomore and Zaporozhe. Because of discrimination many Ukrainians were forced to study abroad. Whereas in 1920 there had been 239 Ukrainian students at Chernivtsi University alone (14 percent of the student body), in 1939 there were only 80 Ukrainian students in all of Rumania.

Because there were no postsecondary schools in Czechoslovak-ruled Transcarpathia, Transcarpathian students (350 by the late 1930s) studied in state schools in Prague, Brno, and Bratislava, at the *Ukrainian Free University (UVU) and *Ukrainian Higher Pedagogical Institute in Prague, and at the *Ukrainian Husbandry Academy (UHA) and its successor, the *Ukrainian Technical and Husbandry Institute (UTHI), in Poděbrady. From 1921 those with a populist orientation belonged to the *Union of Subcarpathian Ukrainian Students (164 members in 1931). Russophile students belonged to the Vozrozhdenie society (est 1920), which published the monthly *Molodaia Rus'* (1930–1), and the Central Union of Carpatho-Russian Students (est 1927). In 1939–40 there were about 600 students from Transcarpathia studying in Czechoslovakia, most of them in Prague.

In the 1920s and 1930s many émigré veterans of the UNR and Ukrainian Galician armies and Western Ukrainians studied abroad. Their largest concentration was in Czechoslovakia, where from 1921 to 1931 the state provided them with stipends, clothing, medicine, textbooks, and instruments (distributed by a Czech-Ukrainian Committee) and subsidized the UVU and UHA. The students also received aid from the European Student Relief Fund. In 1924 there were 1,896 Ukrainian émigré students in Czechoslovakia: 1,255 in Prague, 382 in Poděbrady, 170 in Brno, 83 in Příbram, and 6 in Bratislava. The largest Ukrainian student organization in Czechoslovakia was the *Ukrainian Academic Hromada in Prague, which had 1,258 members in 1922 but declined to 321 members in 1923, after ideological splits resulted in the creation of the 249-member Hromada of Students from Great Ukraine (ie, Soviet-ruled Ukraine), the 222-member socialist Hromada Student Society, the 55-member Union of Student Emigrés from the Northwestern Lands of Ukraine (ie, Polish-ruled Volhynia, the Kholm region, Podlachia, and Polisia), and other nationalist, socialist, and communist groups. Dozens of other associations based mostly on fields of study were also formed.

In the early 1920s a sizable group of Ukrainians studied briefly in Austria, particularly in Vienna (there the Sich society fell from 327 members in 1922 to 46 in 1931), Graz

(about 50 students), and Leoben (about 25 students). Most of them completed their studies at the UVU and UHA.

In interwar Germany about 200 Ukrainians studied in Berlin, where in 1921 they formed the *Ukrainian Student Association in Germany and the small Academic Hromada and Osнова society. Over 200 others studied at the Gdańsk (Danzig) Polytechnic, where they founded the *Osнова Union of Ukrainian Students (1922–45), a student co-operative in 1925, the fraternities Chornomore, Halych, and Zarevo in 1924–5, the socialist Ivan Franko Society, and the Sovietophile Drahomanov Hromada. The students in Gdańsk hosted the first TseSUS congress (1923) and published the irregular humorous bulletin *Smikhomet* (1923–38). Upon graduation they played key roles in the Galician co-operative movement and industry. Smaller numbers of students studied in Königsberg, Kiel, Göttingen, and Wrocław (Breslau) and elsewhere. Organizational activities were co-ordinated by the *Union of Ukrainian Student Organizations in Germany and Danzig (SUSOND, 1924–41), which was reconstituted as the *Nationalist Organization of Ukrainian Students in Germany (NOUS, 1941–7).

Elsewhere in Europe, small numbers of Ukrainians studied in Zagreb, Ljubljana, Paris, Leuven, Liège, Sofia, Geneva, Rome, Budapest, and other cities, where they founded student societies. Societies were also founded in the United States: the Ukrainian Academic Hromada in Philadelphia (est 1923), the Society of Ukrainian Youth in New York City (est 1924), the Ukrainian Student Hromada in Chicago, and, in the 1930s, student clubs in Detroit, Pittsburgh, Scranton, Cleveland, and other cities. An estimated 700 Ukrainians had received master's degrees and doctorates in the United States by 1936. In Canada Ukrainian students founded the Kamenari club in Saskatoon in 1917 (135 members in 1926), other clubs in Winnipeg, Yorkton, Brandon, Edmonton, Regina, and Toronto, and a student federation with over 400 members in 1929.

1939–45. During the Soviet occupation of Western Ukraine in 1939–41, all existing student organizations were abolished. In the Nazi-occupied countries the activity of TseSUS was restricted, and the German-supervised SUSOND and NOUS co-ordinated the activities of 600 students belonging to the Sich societies in Vienna (200 members in 1942–3) and Graz (50 members), the Ukrainian Academic Hromada in Prague (164 members), the Mazepynets society in Berlin (91 members), the Chornomore society in Wrocław (Breslau, 27 members), the Osнова union in Gdańsk (Danzig, 20 members), the Baturyn society in Munich (10 members), and other student groups in Dresden, Leipzig, Freiburg, Göttingen, and Innsbruck.

The German authorities hindered the reactivation of student life in Nazi-occupied Galicia in the fall of 1941. Nonetheless, the teaching of postsecondary professional courses was allowed in Lviv in 1942, and the Ukrainian Central Committee (UTsK) created the *Labor Alliance of Ukrainian Students, which united 1,355 medicine, 441 technical science, 192 veterinary science, 184 forestry, 182 pharmacology, 121 agronomy, and 93 theology students. Student aid was provided by the *Ukrainian Students' Aid Commission (KoDUS) of the UTsK in Cracow; in 1943–4 it granted 530 scholarships to students in Galicia and 213 to Ukrainians studying elsewhere in the Third Reich and Bohemia. Additional support came from the Humboldt Foundation.

After Germany invaded the USSR in 1941, in the Reichskommissariat Ukraine the Nazis closed down all postsecondary schools and deported most students as **Ostarbeiter* to the Third Reich. In Bukovyna the Rumanian regime expelled all Ukrainian students from Chernivtsi University, and in Transnistria it Rumanianized Odessa University. Only in Hungarian-occupied territories were some 300 Transcarpathian students allowed to attend postsecondary schools (mostly in Budapest and Debrecen, where the Society of Ruthenian Students of Transcarpathia was allowed to function).

Soviet Ukraine. After the consolidation of Soviet rule in Ukraine a new educational system was introduced. Existing postsecondary schools were reorganized into institutes and *tekhnikums (transformed in the 1930s into secondary special schools), and their autonomy, student councils, and academic freedom were abolished. Access to higher education was denied persons with 'non-working-class origins,' and in order to register, all aspiring students had to get recommendations from Party, Komsomol, or trade-union committees. In the 1920s Soviet Ukraine's student body was repeatedly purged of those who had concealed their social origins or lacked 'work service,' that is, whose relatives had been repressed as political opponents of the regime, *kulaks, or clerics. As a result a dramatic decline in the number of students occurred (see table 1).

To increase the proportion of students with proletarian and poor-peasant backgrounds, from 1921 to 1940 so-called *workers' faculties (10 in 1921, 30 in 1925, 78 in 1929) provided workers and peasants with two years of preparatory courses. Consequently the social composition of Ukraine's students changed dramatically, from 22.5 percent working class and 20.5 percent peasant in 1924–5 to 28.5 percent and 42 percent respectively in 1926–7. By 1936, persons with working-class origins constituted 44.4 percent of all postsecondary students and 39.7 percent of all university students; those with professional-class origins, 9.5 percent and 16.3 percent; those with civil service origins, 24 percent and 28 percent; those with collective farmer origins, 19.6 percent and 12.9 percent; those with private farmer origins, 2.8 percent and 2.3 percent; and those with other origins, 0.7 and 0.8 percent.

In the early 1930s all postsecondary schools were reorganized, and traditional forms of education were partly reintroduced. From 1936 less attention was paid to students' social backgrounds, and many more students received stipends. Thenceforth *ten-year-school graduates had the right to pursue a postsecondary education, although the ability to pay newly introduced tuition fees limited the admission of many children of peasants and

TABLE 1
Students at Soviet Ukraine's postsecondary institutes and tekhnikums, 1921–9

	Institutes	Tekhnikums
1921	56,915	20,215
1922	48,233	42,100
1923	37,538	30,688
1924	29,474	29,967
1925	27,205	25,631
1926	27,909	24,122
1927	28,207	29,319
1928	33,406	26,896
1929	40,890	26,778

workers. Consequently, by the 1950s the children of functionaries, professionals, and Party bureaucrats constituted 42 percent of all students.

In the post-Stalin period, particularly after the introduction of the 1958 law 'On the Strengthening of the Link between the School and Life and on the Further Development of Public Education in the USSR,' the usual prerequisite for admission to postsecondary schools was two years of 'productive' employment, and higher education was subordinated to the needs of the economic sector. The years 1959-65 saw the greatest growth in the number of such full-time employees studying part-time. Whereas in 1940-1 they had constituted 31 percent of all students and in 1960, 52.4 percent, in 1965-6 they constituted 61 percent (15 percent in evening programs, 46 percent in correspondence programs). From 1964 less emphasis was placed on the employment prerequisite (in 1988, only 19 percent of full-time students had worked at least two years), and the proportion of full-time students increased. In 1987-8 they constituted 53.3 percent, whereas evening students constituted 10.4 percent and correspondence students, 36.3 percent. Concurrently, the disadvantage experienced by rural youths grew markedly. In 1969, for example, only 16 percent of all USSR students were from collective farms, whereas 39 percent were from the urban working class. Because in Ukraine almost half of all Ukrainians live in rural areas, that disadvantage could also be viewed as ethnic discrimination. It was reflected statistically: whereas in Soviet Ukraine for every 10,000 inhabitants there were 47 students in 1940, 54 in 1950, 97 in 1960, 170 in 1970, and 166 in 1988, the corresponding numbers in the RSFSR were 43, 77, 124, 204, and 190. Discrimination could also be seen in the way stipends were distributed in favor of the privileged social strata. Of all students in Soviet Ukraine, 48 percent in 1928, 78.6 percent in 1936, 80.5 percent in 1958-9, and 79 percent in 1988-9 received stipends. Of the total number of stipends granted in the USSR in 1988-9, 17.3 percent were allotted to students in Ukraine, but 56 percent to students in the RSFSR. A large proportion of Ukraine's students (33.4 percent in 1988-9) lived in near poverty in student residences.

In the Soviet period the number of postsecondary students in Ukraine grew considerably. The growth was not a balanced one, however. The first significant increase, from 57,526 students in 1927 to 97,500 students in 1933, occurred because fulfillment of the First Five-Year Plan required a considerably larger number of educated cadres. Further growth was constant (with the exception of the wartime years 1941-4 and those immediately following), but it took place at the expense of the development of correspondence and evening studies. The number of students in Ukraine more than doubled between 1960 and 1980, but from 1980 it declined (see tables 2 and 3). The percentage of female students increased from 10 percent before the Revolution of 1917 to 29.9 percent in 1925, 38.1 percent in 1936, 41.7 percent in 1960, and 55.2 percent in 1987.

The ethnic composition of Ukraine's students did not correspond to that of Ukraine as a whole. Jews (in the 1920s and 1930s) and Russians (in the postwar period) constituted disproportionately large percentages of the total number of students in relation to their weight in the total population (see table 4). That the USSR Ministry of Higher and Secondary Special Education discriminated against ethnic Ukrainians in regard to admission to post-

TABLE 2
Number of postsecondary schools and students in Ukraine, 1914 to 1990-1

	Schools	Students

secondary schools can be shown statistically. In 1965, for example, for every 10,000 inhabitants in the USSR there were 127 Ukrainian students and 174 Russian students. In Ukraine there were two graduate students for every 10,000 inhabitants, whereas in the RSFSR there were four. Until recently Ukrainian students were also subjected to *Russification pressures. Outside Ukraine and, in most cases, within Ukraine students could write entrance

examinations only in Russian, and most teaching in Ukraine's postsecondary schools was conducted solely in Russian. After graduating, many Ukrainians were sent to work in other republics, and graduates from other republics were sent to Ukraine.

In 1984-5, 576,300 students in Ukraine, or 66 percent of all students there, were ethnic Ukrainians. An additional 134,400 ethnic Ukrainian students (20 percent of all ethnic Ukrainian students in the USSR) were studying in other republics, primarily in the RSFSR. In 1971-2 there were 6,084 foreign students in Ukraine: 3,451 from communist countries (1,423 from North Vietnam, 933 from East Germany, 337 from Bulgaria, 260 from Hungary, 163 from Cuba, and 156 from Mongolia); 1,253 from Africa; 1,203 from Asia; 95 from South America; and 82 from noncommunist European countries.

Soviet student organizations underwent change. In the 1920s and early 1930s the Central Bureau of Proletarian Students in Kharkiv, attached to the All-Ukrainian Council of Trade Unions, organized congresses and published the monthly **Student revoliutsii*. In the 1930s the bureau was abolished, and all student councils came under the direct control of the Party and Komsomol, through such agencies as the Student Division of the Antifascist Committee of Soviet Youth (1941-55) and the USSR Student Council (since 1955). Student membership in the Komsomol increased from 18.2 percent in 1928 to 32.6 percent in 1935 and 95 percent in 1974. Students in the USSR had no independent organization or periodicals, with the exception of the Moscow journal *Studencheskii meridian*. As under tsarism, Soviet students, particularly those at special institutes, wore uniforms, until the late 1960s. From the late 1950s they were assigned additional tasks, such as working during summer vacations in 'voluntary' student brigades, especially in Soviet Asia (eg, building the Baikal-Amur Trunk Railway and working Kazakhstan's 'virgin lands'). The voluntary scholarly, sports, and other mass associations that students took part in were closely monitored by Party, trade-union, and Komsomol organizations and the administrations of individual schools. Student clubs at individual schools (eg, Kiev's Hlobus club) co-ordinated the activity of various sports, travel, art, drama, music, and atheism circles and sections. Over 25 percent of all students belonged to different student research societies, worked in design offices, and took part in republican and Union competitions. In 1957 the all-Union Burevestnik voluntary student sports society was created. In 1984 it claimed to have 560,000 members in Ukraine (see **Burevisnyk*).

Many, if not most, students were dissatisfied with the sanctioned forms of student activity and spoke out against being sent to do 'voluntary' summer work. From the 1960s those who studied in Kiev and were involved in the *dis-

sident movement organized annual gatherings in May at the Shevchenko monument in Kiev. In the 1970s they published the samvydav journals *Postup* (ed Z. Popadiuk) and *Koryto*. Those who became involved in the dissident movement and 'clubs of creative youth' suffered expulsion, persecution, and even imprisonment. Students at Lviv University, in particular, were victimized in 1973. That year a secret directive instructed schools in the western oblasts not to accept more than 25 percent of its students from among the local population.

Beginning in 1988, Ukrainian students founded independent, noncommunist organizations (eg, the Association of Independent Ukrainian Youth in Lviv, Kiev, and Bukovyna, the Association of Ukrainian Youth in Kharkiv, the Hromada society at Kiev University, and the Student Brotherhood at Lviv University), initiated the revival of the Plast scouting organization, and joined en masse the Ukrainian Language Society, the Popular Movement of Ukraine (Rukh), the Zelenyi Svit Ukrainian Ecological Association, the **Lev Society*, and other **neformaly* and new political parties that promoted Ukrainian as an official language, de-Russification, democratic and national rights, Ukrainian independence, and cultural and environmental protection. Many students were allowed to study in the West. Ukraine's student cohort became a political force to be reckoned with. From 2 to 17 October 1990, for example, a large group of students held a 'camp-in' and hunger strike in the center of Kiev. Two weeks into the strike, 120,000 students in Kiev walked out of their classes to show sympathy with the strikers. The strike ended only after the Communist majority in the Supreme Council agreed to discuss the students' demands. Those included removing V. Masol as chairman of the Supreme Soviet, not signing the new, Kremlin-sponsored Union treaty, transferring all CPSU and Komsomol property in Ukraine to organs of local government, allowing military service outside Ukraine only on a voluntary basis, and holding a referendum on new elections to the Supreme Soviet. Soon after a Union of Ukrainian Students was formed. In October 1992, the union organized another hunger strike in Kiev, but failed to achieve its goal of convincing the Ukrainian government to leave the Commonwealth of Independent States and to call new national elections.

Ukrainian students in the postwar West. In the years 1945-51 around 2,000 Ukrainian displaced persons in Germany, 500 in Austria, and 200 in other Western European countries pursued higher educations. The main center of émigré activity, Munich, where the UVU and UTHI were re-established and the United Nations Relief and Rehabilitation Administration (UNRRA) University was founded, had 800 Ukrainian students. Innsbruck had 250, Graz 200, Erlangen 170, and Regensburg 120. Many students took part in the political conflicts and rivalry between the OUN Bandera and Melnyk factions, and only in 1947 did TseSUS manage to reunite the 31 social, political, and religious student organizations existing after the war. Organizations founded or revived in that period include the Melnyk-faction **Zarevo* Ukrainian Student Association, the Bandera-faction **Ukrainian Student Organization* of Mikhnovsky, the **Obnova* Society of Ukrainian Catholic Students (est 1930 in Lviv), the Alliance of Orthodox Students, the National Union of Ukrainian Students in Belgium, the Representation of Ukrainian Student Societies in Austria (PUSTA), and the Association of Ukrainian Stu-

dents in Paris. New student clubs were founded in Heidelberg, Hirschberg, Frankfurt am Main, Aachen, Stuttgart, Augsburg, Freiburg, Salzburg, Innsbruck, Leuven, Madrid, Rome, Switzerland, and England, and the number of periodicals in the Ukrainian *student press increased. Most students lived in the poor conditions of the UNRRA and International Refugee Organization camps and the Ukrainian student residence in Munich, and received financial support from KoDUS. Most Ukrainian refugees completed their studies and emigrated to North America and Australia in the late 1940s. By 1950 there were only 660 Ukrainian students at West German universities.

A new period in émigré student life began in the 1950s. Postwar Ukrainian refugees in the Americas and Australia pursued and completed postsecondary degrees, as did Ukrainians already born on those continents, and founded branches of existing émigré student societies and new university clubs. With the creation of five umbrella organizations – the *Federation of Ukrainian Student Organizations of America and the *Ukrainian Canadian Students' Union in 1953, a central federation of Ukrainian student societies in Australia (active from 1959 until approx 1968), and the *Union of Ukrainian Student Societies in Europe and Union of Argentinian-Ukrainian Students in 1963 – the co-ordinating function of TseSUS was by and large eclipsed.

Since the 1960s, Ukrainian student organizations in the West have consisted overwhelmingly of people born and educated there, for whom local and national issues are much more relevant than ideological differences. Since the 1970s the defense of Soviet political prisoners and national and democratic rights in Ukraine, and the preservation and development of the Ukrainian identity, language, and culture in both Ukraine and the host countries, have been key issues for the more politicized and radicalized members of student organizations, particularly in Canada and the United States. Certain student periodicals – particularly *Student in Canada* (1968 to late 1980s), *New Directions* in New York (1970–4), *Vitrazh* in London (1977 to early 1980s), and *Apprendre ou à laisser* in Paris (1977–80) – have offered alternative views and criticized the émigré status quo and nationalist politics.

Ukrainian students in postwar Eastern Europe. In Czechoslovakia, Rumania, and Yugoslavia indigenous Ukrainian students did not have their own organizations. They were, however, active in national student and Ukrainian umbrella organizations there and organized unauthorized gatherings and events. Such was the case also in Poland until 1981, when, in the wake of the Solidarity movement, Ukrainian students tried but failed to gain official recognition for an independent, self-governing organization, the Association of Ukrainian Students in Poland (SUSP). They succeeded, however, in getting the Ukrainian Cultural Section officially registered as part of the Socialist Union of Polish Students in Olsztyn voivodeship. Since that time Ukrainian students in Poland have championed Ukrainian cultural and minority rights and organized youth fairs, hiking camps in the Lemko region, folk-music festivals, and the restoration of Ukrainian churches and cemeteries. In 1984 they initiated the creation of the General Polish Cultural Council of National Minority Students within the Union of Polish Students and began publishing the council's organ, *Zustrichi*, in Warsaw. In October 1989, students in Gdańsk initiated the creation of

the Union of Ukrainian Independent Youth, linked up with new fraternal organizations in Ukraine. In 1990, after the 'velvet revolution,' Ukrainian students in Prague organized themselves into the Ukrainian Studies Student Society (SUT). The society's primary aim is to enrich and further Ukrainian studies; its activities have consisted mostly of organizing lectures, especially by scholars from outside Czechoslovakia.

Students'kyi holos (Student Voice). A monthly organ of the Ukrainian Student Hromada in Warsaw, published in 1927–31 and edited by E. Chekhovych.

Students'kyi prapor (Student Flag). A monthly organ of the Labor Alliance of Ukrainian Students, published in Lviv from July 1943 to June 1944 (a total of 12 issues). The chief editor was B. Lonchyna.

Students'kyi shliakh (Student Path). A monthly journal of the *Union of Ukrainian Student Organizations under Poland and, from 1933, the *Central Union of Ukrainian

Students'kyi shliakh

Students, published in Lviv from March 1931 to October 1934 (a total of 42 issues). It was edited by M. Duzhy, V. Yaniv (1932–4), and O. Matla (1934). The journal promoted OUN ideology among Ukrainian students, popularized Ukrainian nationalist heroes, and published works by the *Lystopad writers' group. It was closed down by the Polish authorities and was succeeded by the semilegal *Students'kyi vistnyk* (8 issues, 1935–9), edited by V. Rudko and M. Prokop.

Students'kyi visnyk (Student Herald). A monthly (from 1929 irregular) organ of the *Central Union of Ukrainian Students (TseSUS), published in Prague in 1923–31. It was edited by an editorial board until 1929, when TseSUS president V. Oreletsky became the official editor and publisher. Until 1924 the journal was lithographed, and dealt almost exclusively with student issues. Later it was printed as a general journal of literature, culture, scholarship, and politics. It had a wide range of contributors, among them scholars, writers, publicists, and political activists in Prague and elsewhere. *Students'kyi visnyk* generally remained nonpartisan and published articles reflecting the opinions of a broad spectrum of Ukrainians, primarily of the younger generation.

Students'kyi vistnyk. See *Students'kyi shliakh*.

Studenytzia River [Studenycja]. A left-bank tributary of the Dniester River that flows southward for 85 km through southern Khmelnytskyi oblast and drains a basin area of 477 sq km. The river is 5–10 m in width.

Studio of the Oral Arts. See Krushelnytska, Lidiia.

Studite Fathers (*studyty*). An Eastern Christian monastic order founded in Constantinople in 463. Its adherents followed an entirely contemplative life, living by the Gospels and singing daily all the offices. The eminent theologian St Theodore Studite (759–826) compiled the **Typikon* or basic monastic book of rules. The Studite *Typikon* was later adopted by monasteries on Mount Athos and in the Slavic East. St Theodosius of the Caves introduced the Studite *Typikon* at the Kievan Cave Monastery in 1070, and from there its use spread to most monasteries in Kievan Rus'. In addition to prayer, the monks practiced charity, painted icons, copied books, and wrote chronicles.

In the early 20th century Metropolitan A. *Sheptytsky wrote a new *Typikon* and renewed the Studite order in

Western Ukraine, and also became archimandrite of the order. In 1901 he transferred the first group of novices from Olesko to the village of Vulka, near Lviv, and in 1904 to Sknyliv. Their monastery there, which housed 30 monks, a fine library, and a school for preceptors, was destroyed during the First World War. In 1919 the Studites were re-established at Sheptytsky's summer residence in Univ. The order grew: monasteries were founded in Zaryanytsia (1921), Lviv, Luzhky, and elsewhere, and missions in Podlachia, Polisia, and even the Ukrainian settlement at Kamenica, Bosnia (1908–24). From 1917 K. *Sheptytsky assisted his brother in administering the order; he eventually succeeded him as archimandrite. They worked on the Studite *Typikon* together, and completed a major revision in 1936.

Studite monks farmed; ran workshops, orphanages, and boarding schools; engaged in icon painting and book-binding (in Univ); and administered the Studion library in Lviv. In 1935 they began to publish the monthly *Iasna put'* for Studites and *Prominychk sentsia liubovy* for a popular readership. By 1939 there were 8 Studite monasteries, 3 missions, and 225 monks.

The Studite monastery in Castel Gandolfo (painting by Mykhailo Moroz)

After the Soviet occupation of Western Ukraine the Studite order was suppressed. Some monks who had managed to flee founded monasteries in Buche and Krefeld-Traar (West Germany) and in Woodstock, Ontario (1951); for a time (1974–84) there was also a Studite monastery in Paraguay. In 1965 Cardinal Y. Slipy founded a Studite monastery, the Studion, in Castel Gandolfo, near Rome. Today, Studite Fathers work as icon painters, scholars, and printers. A contemporary Studite iconographer, Yu. Mokrytsky, painted the iconostasis of the St Sophia Cathedral in Rome. In 1978 the hieromonk L. *Huzar was consecrated by Cardinal Slipy as archimandrite for Studites outside Ukraine.

Studite Sisters (*studytky*). An order of nuns who follow the Studite rules. Originally centered in Yaktoriv, Peremysliany county, Galicia, the sisters maintained residences near Lviv and Ternopil as well as in Pidhaitsi. They ran child-care facilities and orphanages in addition to farming, sewing, and making church goods. Before the Second World War a total of 72 sisters belonged to the order. All of them remained in Ukraine following the Soviet occupation of Galicia, but the order was dissolved, and their superior, Sister Yosyfa, was sentenced to 30 years in a forced labor camp. Today the Studite Sisters maintain small communities in Krefeld-Traar and Altenbeken, Germany, and Dundalk, Ontario.

Studium Ruthenum. A Greek Catholic seminary founded by Emperor Joseph II in Lviv in 1787 for the education of candidates to the priesthood who did not speak Latin. The language of instruction at the Studium Ruthenum was **yazychiie*. The Studium was affiliated with **Lviv University*, and its professors were adjunct professors of the university. The program of study duplicated that of the parallel Latin-language Studium Latinum: two years of philosophy followed by four or five years of theology. Students of both institutes were housed in the **Greek Catholic Theological Seminary in Lviv*. The faculty at the Studium Ruthenum included I. Zemanchyk and P. Lodii in the philosophy department and M. Harasevych, I. Lavrivsky, M. Levytsky, I. Mokhnatsky, and I. Yavorsky in the theology department. The Studium was always considered to be an interim institution created to provide access to education for Ukrainians until enough Ukrainian students were able to be integrated into mainstream Latin, German, and Polish institutions. By the beginning of the 19th century the Studium had outlived its usefulness, and between 1803 and 1809 it was gradually phased out. A total of 470 students were educated at the Studium.

Kyrylo Studynsky

Yurii Studynsky

Studynsky, Kyrylo [Studyns'kyj], b 4 October 1868 in Kypiachka, Ternopil county, Galicia, d 1941. Literary scholar and community activist; member of the Shevchenko Scientific Society (NTSh) from 1899; full member of the VUAN from 1929. He was dismissed from the VUAN in 1934 for 'counterrevolutionary activities,' but was readmitted to the AN URSR (now ANU) in 1939. He studied at Lviv and

Vienna universities, where he focused on V. Jagić. After completing his studies he worked as a researcher at Berlin University, under the guidance of A. Brückner. From 1897 to 1899 he was a docent at Cracow University, and then he became a professor at Lviv University (1900–18, 1939–41), where he also served as vice-rector (1939–41). Studynsky was one of the leading members of the Christian Social party in Galicia and coedited its organ *Ruslan*. He was head of the Teachers' Hromada (1916–20) and of the Ukrainian National Council (1921–2). He was head of the NTSh (1925–31) and was instrumental in establishing close relations between the NTSh and the VUAN in Kiev. During the first Soviet occupation of Western Ukraine in 1939, he headed the People's Assembly of Western Ukraine; then, in 1940, he was a deputy to the Supreme Soviet of the Ukrainian SSR. His influential positions enabled him to intervene and save many Ukrainians from Soviet repressions. During the evacuation of the Red Army from Lviv in June 1941, he was deported. The circumstances of his death are unclear.

Studynsky is the author of over 500 works, mainly scholarly works on literature, in which he generally employed sociological and comparative methods. He published writings on polemical literature, such as *Perestorooha* (Warning, 1895), *Pam'iatky polemichnoho pys'menstva kintsia XVI i pochatku XVII viku* (Monuments of Polemical Literature of the Late 16th and Early 17th Centuries, 1900), *Pierwszy wystep literacki Pocięja* ([I.] Potii's Literary Debut, 1902), *Antigrafe, polemichnyi tvir M. Smotryts'koho* (Antigraph, a Polemical Work of M. Smotrytsky, 1925); works on the cultural and literary movement in Galicia, such as *Geneza poetycznych utworów Markiana Szaszkiewiczza* (The Genesis of Markian Shashkevych's Poetry, 1896; Ukrainian trans 1910), *Korespondentsiia Ia. Holovatsky'koho* (The Correspondence of Ya. Holovatsky, 2 vols, 1905, 1909), *Kopitar i Zubryts'kyi* (1918), and *Materiialy do istorii kul'turnoho zhyttia v Halychyni v 1795–1857 rr.* (Materials on the History of Cultural Life in Galicia, 1795–1857, 1920); works on folklore, such as *Lirnyky* (Lirnyks, 1894); works on relations between Galicia and Russian-ruled Ukraine, such as *Do istorii vzaïemyn Halychyny z Ukrainoiu* (On the History of Relations between Galicia and Ukraine, 1906) and *Z lystiv P. Kulisha do Om. Partyts'koho* (From the Letters of P. Kulish to O. Partytsky, 1908); works on 19th-century Ukrainian literature, such as *Kotliarevs'kyi i Artemovs'kyi* (1901), *Literaturni zamitky* (Literary Notes, 1901), and *V piat'desiatylytie smerty T. Shevchenka* (On the 50th Anniversary of T. Shevchenko's Death, 1911); and works on Ukrainian-Polish relations, such as *Pol'ska konspiratsiia sered rus'kykh pytomtsiv i dukhovenstva v Halychyni v rokakh 1831–1848* (The Polish Conspiracy among Ruthenian Seminarians and Clergy in Galicia in 1831–48, 1908) and *Lysty ministra Fl'oriiana Ziemiakovs'koho do iepyskopa Ivana Stupnyts'koho* (Letters of Minister Florian Ziemiakowski to Bishop Ivan Stupnytsky, 1908). Studynsky also wrote poetry and short stories, which he published in the Ukrainian press under the pseudonyms K. Viktoryn, I. Lavryn, K. Zorian, and others.

D. Shtohryn

Studynsky, Yurii [Studyns'kyj, Jurij], b 9 December 1903 in Lviv, d 24 February 1965 in Munich. Economist and publicist; son of K. **Studynsky*. After graduating from the universities of Graz (JD, 1926) and Paris (JD, 1930)

he worked as the Paris correspondent for the Lviv newspapers *Novyi chas* and *Dilo*. After the Second World War he taught economics, political science, and history at the Ukrainian Free University in Munich and served as dean of the Faculty of Law and Social Sciences. He was president of the *Central Representation of the Ukrainian Emigration in Germany (1950–1, 1957–61). Besides articles he wrote *Le problème agraire en Ukraine* (1930), based on his doctoral dissertation, and translated three books on co-operation by C. Gide and G. Fauquet, which were published by the Audit Union of Ukrainian Co-operatives.

Stukovenkov, Mikhail, b 17 September 1842 in St Petersburg, d 14 March 1897 in Kiev. Dermatologist and venereologist. A graduate of the Medico-Surgical Academy in St Petersburg (1866), during the Russo-Turkish War (1877–8) he was in charge of sanitation in Plevna, Bulgaria. From 1883 he lectured on dermatology and syphilis at Kiev University (professor from 1887). His publications dealt with the treatment of various skin diseases. He introduced a new method of treating syphilis with mercury. Stukovenkov was the founding president of the Kiev Physico-Medical Society.

Stundists. Adherents of a religious revival movement in Southern Ukraine in the latter half of the 19th century that gave impetus to the formation of a variety of Protestant-oriented religious denominations. Stundism never constituted a formal religious body. It started in the early 1860s as a movement of Ukrainian peasants in Kherson gubernia who gathered for communal readings of the Scriptures and hymn-singing, in the manner of the German colonists in the region; the name 'Stundist' was derived from the German *Stunde* 'hour,' and was a reference to their participation in fellowship hours of readings and hymn-singing.

The movement first appeared in the village of Osnova, northeast of Odessa (in present-day Berezivka raion, Odessa oblast), and soon spread to surrounding settlements. As it grew, it came under investigation by civil and ecclesiastical authorities, and the Stundists were harassed with fines, confiscation of religious books, and imprisonment. Rather than deterring the movement, the harassment strengthened the resolve of its adherents, who found it increasingly difficult to reconcile themselves to the sacerdotal nature of the Russian Orthodox church and by 1870 openly broke with it. In the 1870s the movement spread into Kiev, Katerynoslav, and Tavriia gubernias, and by the end of the decade there were approx 3,000 Stundists in Kherson gubernia and 2,000 in Kiev gubernia. By the end of the 1880s these figures had doubled, and the official estimate of the number of Stundists stood at 20,000. The catalyst for the growth of the Stundists was the presence of German and Mennonite colonists in southern Ukraine who had prospered as farmers and were known for their social decorum. Many neophyte Stundists adopted the tenets of thrift, hard work, and sobriety underlying Protestant beliefs and subsequently improved their economic well-being. But they were not overtly political, posed no challenge to the secular authorities, and tended to be prosperous farmers and regular taxpayers. For these reasons the civil authorities initially refrained from any concerted actions against the 'sectarians.' Stundists were granted some rights in 1883, along with other sectarian

groups, but their most vehement opponent was the director general of the Russian *Holy Synod, K. *Pobedonostsev. Along with other Russian Orthodox hierarchs, he saw the Stundists as heretics, and he had them declared an especially dangerous sect and brought the forces of the Ministry of the Interior against them. A sustained campaign of persecution followed, as the rights of 1883 were revoked, and meetings in prayer houses prohibited; Stundist schools were closed, adherents were denied internal passports, and the law was used to harass them in every conceivable manner.

The campaign against the Stundists continued until 1905, when new legislation was passed guaranteeing certain religious freedoms. A number of Stundists had emigrated to the United States, particularly North Dakota, and Canada, where in 1921 they formed separate Ukrainian congregations under P. Kindrat. By that time, however, most Stundists had affiliated themselves with one of a number of growing Protestant religious denominations, including *Baptists, *Evangelical Christians, *Adventists, and Pentecostals.

A. Makuch

Bohdan Stupka

Stupka, Bohdan, b 27 August 1941 in Kulykiv, Nesterov raion, Lviv oblast. Stage and film actor. His repertoire includes roles from farce, satirical comedy, contemporary Soviet and other plays, and tragedy (including such roles as W. Shakespeare's Richard III and Edmund in *King Lear*). He completed study in the drama studio at the Lviv Ukrainian Drama Theater (1961–7) and worked there as a lead actor (until 1967 and in 1973–7). In 1968–73 he was a student in the Faculty of Theater Studies at the Kiev Institute of Theater Arts, and in 1978 he joined the Kiev Ukrainian Drama Theater. He acted in the films *Bilyi ptakh z chornoju oznakoiu* (A White Bird with a Black Mark, 1972), *Dudaryky* (The Pipers, 1980), and *Chervoni dzvony* (The Red Bells, 1982).

Stupnytsky, Ivan [Stupnyc'kyj], b 1816, d 1890. Ukrainian Catholic bishop of Peremyshl in 1872–90. He warded off attacks made by Polish authorities against the Ukrainian Catholic church for which the pretext was a Russophile orientation in the church. He also used his position in the Galician Diet to obtain a Ukrainian-language class in the Polish gymnasium in Peremyshl in 1888, the first step

toward the state-supported Ukrainian-language gymnasium that was created in that city in 1895.

Stupnytsky, Ivan [Stupnyc'kyj], b 7 July 1928 in Bala-banivka, Uman okruha. Economist. A graduate of Kiev University (PH D, 1965), he has taught there as a docent (from 1956), dean of the economics faculty (since 1967), and chairman of the political economy department (since 1971). His publications, which focus on the political economy of socialism and the technological base of communism, include the monographs *Produktyonist' pratsi ta shliakhy ii zrostannia u promyslovosti* (Labor Productivity and Ways to Its Growth in Industry, 1958) and *Rozvytok material'noho vyrobnytstva u protsesi rozshyrenoho sotsialistychnoho vidtvorennia* (The Development of Material Production in the Process of the Expanded Socialist Re-Creation, 1965).

Stupnytsky, Leonid [Stupnyc'kyj] (nom de guerre: Honcharenko), b 1891? in Volhynia, d 30 July 1944 near Ostrih, Rivne oblast. Senior UPA officer. As a lieutenant colonel in the UNR Army, he commanded a cavalry brigade in the Second Winter Campaign (November 1921). In the interwar period he was a community leader in Volhynia and then was imprisoned by the NKVD (1939–41). Under the German occupation he organized and commanded a militia regiment in Rivne and then directed a school for paramilitary guards. In April 1943 he joined the UPA as an instructor, and in August he was appointed chief of staff of the UPA-North. He was killed in combat with NKVD units and posthumously promoted to brigadier general.

Stupnytsky, Vasyl [Stupnyc'kyj, Vasyl'], b 2 January 1879 in Mykhailivka, Kharkiv gubernia, d 1945? Composer, folk song collector, conductor, and teacher. A graduate of Kharkiv University, he conducted the DUKH kapelle, organized traveling concerts, and undertook pioneering research into the music ethnography of the Kharkiv area. He emigrated to the West in 1944 and disappeared in Berlin the following year. His compositions include choral works to texts by T. Shevchenko, church music, and folk song arrangements: *Pisni Slobidskoï Ukraïny* (Songs of Slobidska Ukraine, 1929) and the posthumously published *Slobozhanski narodni pisni* (Folk Songs of Slobidska Ukraine, 1962) and *Muzyka dlia ditei* (Music for Children, 1978).

Sturgeon (Ukrainian: *oseter*). Any of the sharklike fishes of the family Acipenseridae, most belonging to the genus *Acipenser*. They are valuable for their flesh, roe (for caviar), and swim bladder (for isinglass). In some areas fishing for sturgeons is restricted. A number of species live in the Black Sea and the Sea of Azov – common sturgeon (*A. sturio*), sterlet (*A. ruthenus*; see *Sterlet), beluga (*Huso huso* or *A. huso*), and *A. stellatus*. These species migrate up rivers to spawn. There are also some nonmigratory, freshwater sturgeons living in lakes. Pollution, the construction of electric-power plants, and overfishing have resulted in a drastic decrease in the number of migratory sturgeons in recent years.

Stus, Vasyl, b 8 January 1938 in Rakhnivka, Haisyn raion, Vinnytsia oblast, d 4 September 1985 in Soviet

Vasyl Stus

strict-regime concentration camp no. 389/36-1, Perm oblast, RSFSR. Dissident poet. Stus studied at the pedagogical institute in Donetsk and began his graduate work at the Institute of Literature of the AN URSR (now ANU) in 1964. A year later, because of his protests against the secret arrests and closed trials which were becoming prevalent, he was expelled from the institute, and in 1972 he was arrested. He was sentenced to five years of strict-regime labor camp followed by three years of exile. While in exile he joined the *Ukrainian Helsinki Group, and for that he was rearrested in 1980 and sentenced to 10 years of strict-labor camp and 5 years of exile. A man of uncompromising principles, Stus refused to kowtow to the regime and was subjected to constant persecutions, which finally were responsible for his death. After facing repeated refusals and bureaucratic impediments, family and friends received permission to transfer his body to Ukraine. On 19 November 1989 a procession of over 30,000 mourners attended the interment of Stus and two other dissidents (O. Tykhy and Yu. Lytvyn) at the Baikove Cemetery in Kiev. The event became a manifestation of national solidarity and censure of the repressive regime.

Stus began writing poetry as a student, and some of his poems appeared in the journals *Dnipro* and *Zmina* in 1963–5. Because of his activities in the dissident movement, his first collection of poems was not printed. Although he continued to write while he was incarcerated, the KGB systematically confiscated and destroyed his work. Up to 600 poems and translations from J.W. von Goethe, R.M. Rilke, R. Kipling, and C. Baudelaire were destroyed in 1976. Some poems miraculously survived and were smuggled out to the West, where Stus's poetry appeared in several collections. The first collection, *Zymovi dereva* (Winter Trees, 1970), was followed by *Svicha v svichadi* (A Candle in a Mirror, 1977) and the posthumous *Palimpsesty: Virshi 1971–1979 rokiv* (Palimpsests: Poems of 1971–9, 1986). The first collection to appear in Ukraine was an underground samvydav collection, *Povernennia* (The Return), which appeared in Ivano-Frankivske in 1990. Final 'acceptance' came also in 1990, with the publication of the first official edition of his poetry, *Doroha boliu* (The Road of Pain). In 1992 two collections were published in Ukraine: *Vikna v pozaprostir* (Windows into Beyond-Space), containing his poetry, articles, letters, and diary excerpts, and *Zolotokosa krasunia* (The Golden-Braided Beauty), containing Stus's poetry found in the KGB archives.

Traditional in form, Stus's poetry began as 'lyricism of actuality,' in the manner in which the poets of the 1970s

responded to the realities of the day. Content prevailed over form, message over myth, and the satire found in the poetry of the 1960s often turned to scorn, anger, and abuse. The poetry written behind bars, however, is more serene; it expresses a longing, philosophical contemplation of life, nature, man the prisoner, and man the jailer, and reveals Stus's attempt to come to some synthesis with respect to the contradictions of the human experience.

D.H. Struk

Stvyha River. A right-bank tributary of the Prypiat River that flows for 178 km through eastern Rivne oblast as well as southern Brest and Homel oblasts (Belarus) and drains a basin area of 5,440 sq km. The river is 2–4 m wide near its source and 30–50 m wide in its lower course. Over 40 percent of its basin area is wetland. It provides a channel for a drainage system developed in the region and is also used for log rafting.

Stylistics. The study of the expressive devices of language and of various elements of literary style. Stylistics developed in the 19th and 20th centuries out of the study of rhetoric. In Ukraine, Latin and Polish baroque versions of the theory of Greek and Roman rhetoric and *poetics were taught at Orthodox brotherhood schools and the Kievan Mohyla Academy. The traditional rhetorical concepts of euphony, rhythmicity, rhyme, figures, and tropes, which form the core of stylistics, had already been discussed in M. Smotrytsky's Slavonic grammar (1619). Combined with the rules of poetics and *versification (eg, A. Baibakov's book of poetic rules [1774]), they became part of the secondary-school curriculum in the 19th century. The first textbooks of Ukrainian stylistics and rhetoric were published by the Galician gymnasium teacher V. Dombrovsky in the early 1920s.

Modern Ukrainian stylistics was developed in the 1920s in Soviet Ukraine by proponents of *purism, such as O. Kurylo, O. Syniavsky, M. Hladky, M. Sulyma, A. Nikovskyy, S. Smerechynsky, B. Tkachenko, T. Sikirytsky, H. Maifet, M. Osypiv, and Z. Veselovska, and in Warsaw, Prague, and Lviv by I. Ohienko, V. Simovych, and O. Panko. Accepting the folk vernacular as the basis of *Standard Ukrainian and rejecting Church Slavonic, Russian, Polish, and German calques, they produced studies of the stylistics of Ukrainian folklore, 19th-century writers who wrote in the vernacular, and non-belletristic, non-vernacular genres.

Ukrainian stylistics has grown considerably since the Second World War. In the 1950s statistical methods began to be used by V. Perebyinis and others. Textbooks of Ukrainian normative stylistics ideas have been written by V. Vashchenko, A. Koval, and I. Cherednychenko. The course on contemporary Ukrainian edited by I. Bilodid includes a volume on stylistics (1973). Books have been published on the style of the Ukrainian press (by M. Zhovtobriukh, 1963, 1970), the style of dialogue and monologue (D. Baranyk, 1961, 1969, and P. Dudyk, 1972), scientific style (A. Koval, 1970), phonostylistics (V. Shyprykevych, 1972), the style of 14th-century official documents (M. Peshchak, 1979), and the stylistic functions of grammatical parallel forms (V. Vashchenko, 1956).

Research in literary stylistics has been limited to the works of officially sanctioned writers. Studies on the style of premodern Ukrainian authors (by Z. Veselovska, I.

Svientsitsky, A. Hensorsky, A. Nizhenets, L. Batiuk, Ye. Markovskyy, V. Krekoten, V. Sych, V. Mykhtas, V. Kolosova, P. Yaremenko) have been few. In modern Ukrainian literature, studies have been produced on the language of I. Kotliarevskyy, Ye. Hrebinka, H. Kvitka-Osnovianenko, M. Vovchok, T. Shevchenko, A. Svydnytsky, I. Tobilevych, P. Myrny, I. Nechui-Levytsky, P. Hrabovskyy, I. Franko, L. Hlibov, Lesia Ukrainka, O. Kobylanska, M. Kotsiubynskyy, V. Stefanyk, A. Teslenko, M. Cheremshyna, L. Martovych, P. Tychyna, M. Rylsky, V. Sosiura, P. Panch, I. Mykytenko, O. Vyshnia, M. Yohansen, A. Holovko, Yu. Yanovskyy, M. Bazhan, I. Kyrylenko, O. Korniiuchuk, I. Kocherha, O. Dovzhenko, L. Pervomaisky, A. Malysheko, O. Honchar, H. Tiutiunyyk, N. Rybak, and M. Stelmakh.

Articles are published in the journals *Movoznavstvo* and *Ukrains'ka mova i literatura v shkoli* and in the annual *Kul'tura slova*. Emigré scholars who have contributed to the study of stylistics include D. Chyzhevskyy, G.Y. Shevelov, I. Bezpechnyy, and D. Nytychenko.

O. Horbach

Styr River. A right-bank tributary of the Prypiat River that flows for 483 km through Lviv, Rivne, and Volhynia oblasts as well as Brest oblast (Belarus) and drains a basin

area of 13,100 sq km. The banks of its lower reaches are particularly muddy. The river is used for industrial and water-supply purposes and as an output channel for a regional drainage system. In addition a water reservoir and hydroelectric station have been built on it. The largest center on the river is Lutske, from which point it is navigable on its lower course.

Styranka, Mariia (née Fitsalovych), b 1 March 1922 in Lypytsia, Rohatyn county, Galicia. Painter. A postwar émigré, she has lived in Canada since 1955. In 1965 she graduated from the Ontario College of Art. She paints mostly watercolor still lifes and landscapes. Solo exhibitions of her works have been held in Toronto (six times, 1967–80), Paris (1976), Brussels (1977), New York (1978), and Edmonton (1982).

Styranka, Myroslav (pseud.: O. Zelenetsky, M. Petrovych), b 27 October 1910 in Hovyliv Malyi, Kopychyntsi county, Galicia. Journalist. From the mid-1930s he contributed to various nationalist periodicals in Galicia. As a postwar émigré he was a member of the CC of the Ukrainian Revolutionary Democratic party, published the newspaper *Ukrains'ki visti* in Neu-Ulm, and worked as an editor for the Ukrainian Press Service (1946–9) and the newspaper *Ukrains'ka trybuna* in Munich. Later he worked for Radio Liberty (1954–64) and coedited the weekly *Shliakh peremohy* (1965–8) in Munich before becoming coeditor of the Paris-based *Ukrains'ke slovo* in 1969. He was chief editor of that paper from 1977 to 1992. He has also contributed regularly to the newspaper *Novyi shliakh* in Toronto.

SUB. See Association of Ukrainians in Great Britain.

Serafim Subbotin

Subbotin, Serafim, b 3 May 1906 in Kazan, Russia, d 16 January 1976 in Kiev. Geophysicist; AN URSR (now ANU) full member from 1961. A graduate of Kazan University (1931), he worked for the Ukrainian Geological Administration (1931–40), and as a researcher at the ANU Institute of Geological Sciences in Kiev (1944–5) and Lviv (1945–50) and at the Institute of Geology of Useful Minerals (1951–60) in Lviv. From 1960 until his death he directed the ANU Institute of Geophysics in Kiev. He also taught at the Dnipropetrovske Mining Institute, Lviv University, and the Lviv Polytechnical Institute. His research included studies of the forces responsible for tectonic movements, gravimetry, and the structure of the earth's core and its outer

mantle. He developed a new theory of tectogenesis and made key contributions to the geophysical knowledge of Ukraine. The ANU Institute of Geophysics is now named in his honor.

Subbotin, Viktor, b 13 March 1844 in Pryluka, Poltava gubernia, d 29 September 1898 in Kiev. Hygienist. A graduate of Kiev University (1867), he completed a doctoral dissertation (1869) and specialized abroad. From 1872 he was a professor in the departments of hygiene, forensic medicine, medical geography, and statistics at Kiev University, and from 1884 he was dean of the medical faculty. He was an active member of the Society of Kiev Physicians and a founder of the Russian Society of Public Health (1887). He took part in efforts to control cholera and typhus epidemics in Kiev. His publications, written mostly in German, dealt with food hygiene, community hygiene, epidemiology, questions of physiology, and the organization of health care. His textbook on hygiene was printed in 1882.

Subcarpathia (Pidkarpattia). A physical-geographic region located between the Carpathian Mountains to the southwest, the Pokutian-Bessarabian Upland to the east, the Podolian Upland with its subregion, Opilia, to the northeast, and the Roztochia plateau to the north. To the northwest Subcarpathia passes into the Sian Lowland. The length of Subcarpathia (excluding the Sian Lowland) is 250 km; the width varies from 30 km in the southeast to 60 km in the northwest, for an approximate area of 10,000 sq km. Subcarpathia occupies approx one-fifth of the historical regions of Galicia and Bukovyna and has a population of about 1.4 million.

Physical geography. From a geological-tectonic standpoint Subcarpathia represents a portion of a large foredeep that formed during the Miocene epoch in front of the folding Carpathian Mountains. The outer zone of the foredeep has as its foundation the Podolian Platform; the inner zone consists of severely dislocated flysch deposits. The foredeep itself is filled with thick Miocene deposits of clays, argillites, calcareous clays, and sandstones covered by diluvial and alluvial deposits. At the end of the Pliocene epoch Subcarpathia was an accumulative-denudational peneplain covered by fluvial deposits of sand, silt, and clay originating from the Carpathians. As a result of an uplift at the end of the Pliocene and the beginning of the Pleistocene epoch the rivers intensified their erosion and sculpted into the surface a number of wide valleys, lowlands, and intervening ridges. The uplift of Subcarpathia was not uniform, however, and the relief features are partly of tectonic origin. In the Dnieper glacial phase the northeastern part of Subcarpathia was occupied by a lobe of the European continental glacier, and the meltwaters temporarily ponded. By the end of the Pleistocene epoch Subcarpathia was covered by deposits of loess. At present the rivers from the Carpathian Mountains, most notably the Stryi, carry silt and sand on to Subcarpathia and deposit them in their floodplains.

Intervalley ridges, with elevations of 300–500 m above sea level (asl), rise 80–120 m or more above the general surface of the lowland. The highest, Mt Tsetsyna, near Chernivtsi, attains 537 m asl. Some are relatively smooth; others are dissected, with a number (up to eight) of terraces of various ages along their sides. The major intervalley ridges are the Drohobych Ridge (300–400 m asl, dissected

relief), the Middle Subcarpathian Ridge (between the Stryi and the Bystrytsia rivers, with elevations of 350–450 m asl or more and slopes dissected by a network of gullies and ravines), the Southern Pokutian Ridge (300–500 m asl, with buttes near Sloboda-Rungurska consisting of Miocene deposits rising to 780 m asl), the Seret-Prut Ridge (a deeply dissected chain of hills with elevations of up to 550 m asl), and the Bukovyna Ridge. Of the lowlands, the Sian Lowland and the adjacent northwestern part of the Upper Dniester Basin were covered by the glacier, and thus acquired distinct landscape attributes of the moraine-fluvioglacial lowlands; the rest of the Upper Dniester Basin is an alluvial-outwash plain. The remaining lowlands include the Halych-Bukachivtsi Basin, the Kalush Basin, the Stanyslaviv Depression (with an accumulative relief), the Kolomyia-Chernivtsi Basin along the Prut River (an alluvial-terraced valley), and the Seret Basin.

The soils of Subcarpathia are related to the relief and the recent geological past. The interbasin ridges and slopes are dominated by the gray-brown luvisols; in the valley bottoms are alluvial soils (gleysols). On the loess loams of both western and eastern parts of Subcarpathia are the gray forest and podzolized chernozem soils.

The climate of Subcarpathia is temperate continental, with increasing continentality from the northwest to the southeast. The mean annual temperatures range from 7°C to 8°C, the mean January temperatures, from –4°C in the west to –5°C in the east, and the mean July temperatures, from 18°C to 19.5°C. The number of days with temperatures above 15°C increases toward the southeast (95 at Sambir, 117 at Chernivtsi). The mean annual precipitation increases from 600 mm in the east to 800 mm at the higher elevations to the southwest. Three-quarters of the annual precipitation occurs from April to October, with 45 percent concentrated in June, July, and August. Locally the climate varies from the relatively cooler and more humid uplands to the warmer (notably in the summer) and drier basins.

The rivers of the region are right-bank tributaries of the Dniester. With their sources in the Carpathian Mountains, they form a well-developed network. They include the *Stryvior (Strviazh), the Tysmenytsia, the *Stryi, the *Svicha, the *Limnytsia, and the *Bystrytsia Solotvynska and the *Bystrytsia Nadvirnianska (which combine into one before joining the Dniester). In southeastern Subcarpathia the main rivers are the *Prut, the *Cheremosh, and the *Seret. The rivers of Subcarpathia flow swiftly over their stony river beds but freeze during the winter for two to two-and-one-half months. Rainfall and melting snow feed the rivers, which flood in the spring when the thaw combines with rainfall, or in the summer following downpours in the mountains.

The vegetation of Subcarpathia belongs to the Central European broad-leaved forest zone. In the uplands two basic types of forest are found, the oak forest (with an admixture of hornbeam, ash, elm, and sometimes aspen, birch, linden, and other trees) and the beech forest (with an admixture of hornbeam, maple, oak, and, at higher elevations, fir and spruce). The thickets are represented by the hazel, maple, honeysuckle, buckthorn, wild rose, and other shrubbery. Large areas in the uplands have been deforested and are now occupied by meadows (where the prominent grasses are meadow fescue, bent grass, mat grass, and many others) with intrusions of scrub. In the Upper Dniester Basin pine forests occur. Lowland vegeta-

tion is represented by riverbank groves (consisting mainly of alder, with an undergrowth of currants, osier, and other shrubbery) and sedge meadows. In the warmer reaches of southeastern Subcarpathia some steppe plants characteristic of the forest-steppe occur. Natural vegetation has been altered by human activity. Forests now constitute 25 percent of the area (ranging from 20 to 40 percent in the uplands and from 5 to 20 percent in the lowland basins); hayfields, meadows, and pastures cover 30 percent; and plowland (mostly in the basins) occupies 40 percent.

Population. Subcarpathia is one of the most densely populated areas of Ukraine. It supports 220 persons (including 80 rural residents) per sq km. For every rural resident there is about 0.5 ha of plowland and less than 0.8 ha of all agricultural land. Moreover, the distribution of population is uneven. The interbasin uplands and the Upper Dniester Basin are less densely settled, with 75 persons per sq km, whereas the basins and valleys, notably the Stryi Basin, the Stanyslaviv Basin, the Prut Basin (over 200 persons per sq km), and especially the Drohobych-Boryslav Industrial Region (where the local concentration exceeds 300 persons per sq km), are densely settled. Urban population made up almost 25 percent of the population in the 1930s; it has grown to 43 percent (1987). The cities are located along major land routes (along the foothills and in the basins) parallel to the Carpathian Mountains at points of intersection with major routes crossing the Carpathians into Transcarpathia. The towns in the Carpathian foothills are generally small: Dobromyl (5,300), Khyriv (4,000), Stryi Sambir (3,800), Boryslav (41,800), Bolekhiv (10,700), Dolyna (21,200), Nadvirna (11,900), Deliatyn (7,900), Kosiv (7,100), Kutly (4,800), Vyzhnytsia (4,300), and Storozhynets (14,000). The larger cities are located at some distance from the Carpathians: Sambir (27,000), Drohobych (76,000), Stryi (63,000), Kalush (67,000), Ivano-Frankivske (225,000), Kolomyia (63,000), Sniatyn (6,400), and Chernivtsi (254,000). All the larger cities have possessed administrative, trade, and industrial functions for a long time. The historical influence of some of the cities as Ukrainian cultural-educational centers extended well beyond their immediate areas, notably in the case of Sambir, Stryi, Ivano-Frankivske, Kolomyia, and, especially, Chernivtsi, the main city of Bukovyna. Drohobych and Boryslav were industrial centers. Today all the larger cities are also centers of industry.

At the end of the 18th century Ukrainians made up 90 percent of the population of Subcarpathia. As a result of the influx of Poles, Jews, and Germans, mainly into the cities and the Drohobych-Boryslav Industrial Region, the proportion of Ukrainians declined. By 1939 they constituted 70 percent of the population (81 percent of the rural population, but only 27 percent of the urban population). Poles, the dominant minority, represented 13 percent of the population, and the associated *latynnyky* (Ukrainian-speaking Roman Catholics), 3 percent. Jews formed 11 percent, Germans 2 percent, and others (mostly Rumanians in Bukovyna) 1 percent. The largest Polish concentrations were in Sambir and its vicinity, the Drohobych-Boryslav Industrial Region, Stanyslaviv (now Ivano-Frankivske), Kolomyia, and Stryi. The Germans were concentrated in Chernivtsi (the administrative center of Bukovyna) and rural colonies in the vicinity of Stryi and Drohobych. The Jews constituted a relative majority in almost every city.

The events of the Second World War and the subse-

quent resettlement of population changed Subcarpathia's population and its ethnic composition. Census figures from 1959 show that Ukrainians made up about 89 percent of the population (96 percent of the rural and 73 percent of the urban population); Russians, now the dominant minority, represented 5 percent; Jews had declined to 3 percent; Poles were down to 1 percent; and Rumanians remained at about 1 percent. The largest concentrations of minorities were recorded in Chernivtsi (58 percent), Ivano-Frankivske (33 percent), and Stryi and Drohobych (30 percent each). For the 1979 census year the approximate composition was as follows: Ukrainians, 87 percent; Russians, 6 percent; Jews, 2 percent; Poles, 1 percent; Rumanians, 3 percent; and others, 1 percent.

Economy. Most of the Subcarpathian population is employed in agriculture in spite of the fact that the region, with its acidic soils and surplus moisture, does not have the best natural conditions for crop growing. At the beginning of the 1960s nearly one-half of the sown area was occupied by grains: wheat (nearly 20 percent), rye (nearly 15 percent), corn for grain (mostly in the southeast), oats, leguminous grains, and barley. Potatoes occupied 20 percent, feed crops approximately 25 percent, and industrial crops (sugar beets, flax, and hemp) almost 10 percent, of the sown area. By the late 1980s the share of the grains had declined to about 40 percent (especially rye and oats), potatoes and vegetables had declined to about 11 percent, technical crops remained at approximately 10 percent, and feed crops had increased to about 39 percent, of the sown area. Animal husbandry, in fact, has become more important than crop production. Specializing in meat and milk production, it is supported by a strong feed base consisting of natural pastures and hayfields as well as feed crops.

The raw materials for industry consist not only of agricultural products and the Carpathian forests but also of the numerous mineral deposits found in the Subcarpathian foredeep. They include oil (near Boryslav and Dolyna), natural gas (deposits at Rudky, Opary, Uherske, Dashava, Kosiv, and elsewhere), ozocerite (at Boryslav), common salt (Stebnyk, Truskavets, Dobromyl, Deliatyn), potash (Stebnyk, Kalush), native sulfur (Tovmach), and lignite (near Kolomyia). Despite the base of raw materials, industries were poorly developed in Subcarpathia, and simple extraction was emphasized. Hydroelectric energy resources likewise were scarcely tapped. Industrial development has increased since the 1960s. Today the main industrial branches of Subcarpathia are petroleum extraction and/or refining (Boryslav, Drohobych, Dolyna, Nadvirna, and Chernivtsi), the chemical processing of potash and natural gas, at Stebnyk (fertilizers) and Kalush (fertilizers and vinyl chloride), paints and enamels (Boryslav and Chernivtsi), woodworking (Chernivtsi, Ivano-Frankivske, Kolomyia, Dolyna, Bolekhiv, Rozhniativ, Nadvirna, Dobromyl, Vyzhnytsia, Berhomit, Storozhynets, and other places), food processing (Chernivtsi, Kolomyia, Ivano-Frankivske, Stryi, Drohobych, Sambir, and other places), light industries (Chernivtsi, Kolomyia, Ivano-Frankivske, Bolekhiv, Stryi, Drohobych, and other places), construction materials (Chernivtsi, Stryi, Kalush, and other places), and machine building (Chernivtsi, Kolomyia, Ivano-Frankivske, Stryi, Drohobych, and Sambir).

Subcarpathian Lignite Region. A region of lignite deposits in the Carpathian foothills of Chernivtsi and Ivano-Frankivske oblasts. Although the lignite is of a high quality with a capacity of 5,000-8,000 kcal/kg, the limited reserves (1970 estimate: 9.3 million t), the small size of the coal lignite veins, and other factors make intensive mining uneconomical. Lignite was discovered in the area in the mid-19th century, and some mining was conducted irregularly until the Second World War. Immediately after the war three mines were sunk in the largest deposit; the last of them closed in 1968.

Subcarpathian Petroleum and Natural Gas Region. A major oil and gas region covering some 14,800 sq km in Lviv, Ivano-Frankivske, and Chernivtsi oblasts. The oil is concentrated in Paleocene sand, and the gas is usually found in Jurassic limestone and Upper Cretaceous and Miocene sands. The major oil deposits are found at depths of 1,000-4,500 m, and the gas, at depths of 800-1,800 m. The oil in the region is low in sulfur; the gas is high in methane (95-99 percent). Oil has been extracted in the area since 1881, and gas since 1920. Extensive geological research after the Second World War has identified 26 oil, 7 oil-gas, and 27 gas deposits, including the *Dolyna oil field and the *Rudky natural gas field.

Subcarpathian Ruthenia (Pidkarpatska Rus'). The historical-geographic name used in the 19th and early 20th centuries to designate the territory of Transcarpathian Ukraine; also called Hungarian Ruthenia. Later it became the official name of the eastern and central parts of *Transcarpathia, which was a separate province of Czechoslovakia (CSR) in 1920-38. The Treaty of *Saint-Germain (1919), which joined Transcarpathia to the CSR, described 'the Ruthenian territory south of the Carpathians' as Subcarpathian Ruthenia, and that was the name used in the CSR constitution at the end of 1919. From 1920 individual laws and administrative orders used the name Subcarpathian Ruthenia, and from 1928 the name Subcarpathian-Ruthenian Land (Podkarpatoruská Zem) was also in use. Although Subcarpathian Ruthenia was officially supposed to be autonomous, the promised territorial and national autonomy was realized only in 1938, when the new autonomous government of the land changed the name to *Carpatho-Ukraine. Subcarpathian Ruthenia did not include western Transcarpathia (Ukrainian parts of eastern Slovakia, ie, the Prešov region) or the narrow Ukrainian ethnographic territory near the border in the Rumanian Maramureş region.

V. Markus

Subcarpathian Scientific Society (Russian: Podkarpatskoe obshchestvo nauk; Hungarian: Kárpátaljai Tu-

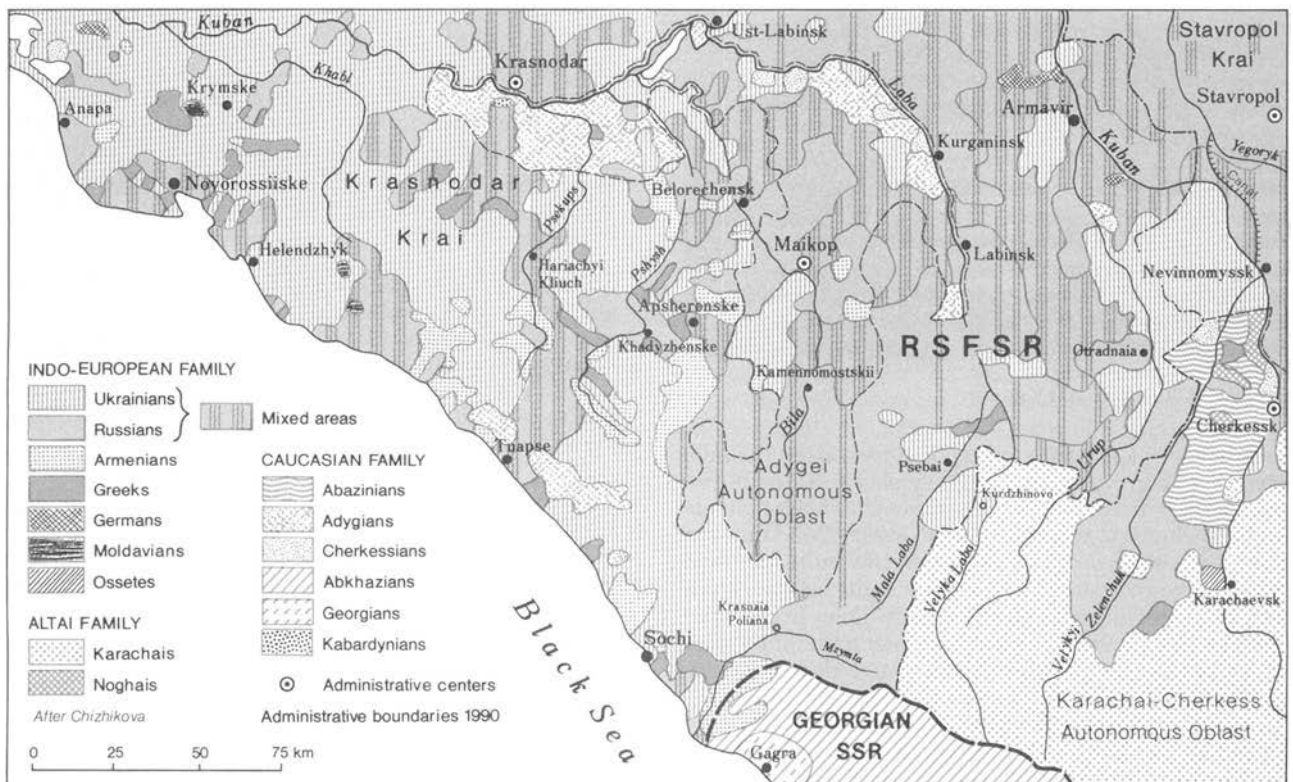

dományos Társaság). A scholarly institution in Uzhhorod, created and supported by the Hungarian occupational regime in the years 1941–4. Its goal was to counter the influence of the Transcarpathian Russophiles by fostering an independent, pro-Hungarian 'Ruthenian' national identity, culture, and language. The society had 35 scholarly members (some of them Hungarians nominated by the regime) in three sections, science, literature and linguistics, and art and ethnography. Its presidents were A. Hodinka (in Budapest) and Rev O. Ilnytsky, and the de facto director and editor in chief was I. Haraida. Using *etymological spelling the society published the semimonthly *Lyteratura nedilia* (1941–4), the monthly *Rus'ka molodezh* (1942–4), I. Haraida's officially sanctioned Ruthenian school grammar (1940), 29 books of short stories, 8 children's books, 2 agricultural almanacs, a bibliography of Transcarpathia (1944), a few collections of folktales and folk songs, and popular educational books and translations of world classics by Transcarpathian writers (eg. of W. Shakespeare's *Richard III* [1942]). Using the local Transcarpathian dialect and Hungarian it also published the bilingual scholarly quarterly **Zoria-Hajnal* (1941–3). To acquaint the Hungarian public with Ruthenian culture, it also published a few monographs and an anthology of Transcarpathian short stories (1943) in Hungarian translation.

Subcarpathian Sulfur Basin. One of the largest concentrations of sulfur in the world, located in parts of Lviv, Ivano-Frankivske, and Chernivtsi oblasts and extending into Rumania and Poland. In Ukraine it covers an area approx 300 km long and 10–30 km wide and extends from the northwest to the southeast in the Dniester and Prut

river basins. The sulfur is found primarily in limestone deposits of the Miocene epoch. The veins of sulfur ore are up to 30 m wide and located at depths of 3–500 m. The sulfur content of the ore is up to 25 percent. The sulfur deposits were discovered in 1950 and have been exploited by open-pit mining since 1958. Some 20 separate deposits have been identified, in Rozdol, Nemyriv, Yavoriv, Liubyni, Yaziv, Soroky, Humenets, Zhydachiv, and Podorozhnie, in Lviv oblast, and Tovmach, in Ivano-Frankivske oblast. The sulfur from the basin is processed at the *Rozdol Sirka Manufacturing Consortium and another facility in Shklo.

Subcaucasia (Peredkavkazzia). The northern section of Caucasus, situated between the Great Caucasus Range in the south and the Kuma-Manych Depression in the north. Subcaucasia is divided into three parts: the *Kuban Lowland and the Taman Peninsula in the west, the *Stavropol Upland (with its outlier elevations near Mineralnye Vody) in the central reaches, and the Terek-Sunzha Upland and the Terek-Kuma Lowland to the east. The western and central areas of Subcaucasia represent a geographical extension of the lowland formations of Southern Ukraine. Its eastern reaches are part of the Caspian Lowland. Western Subcaucasia is situated largely in Ukrainian ethnic territory; the central and eastern regions fall in a mixed settlement area. Subcaucasia encompasses a large section of the *Kuban, the *Stavropol region, and the *Terek region.

Most of northwestern and central Subcaucasia sits on the Scythian Platform, which has a Hercynian foundation and Cretaceous (Chalk), Paleogene, Neogene, and Quaternary layers covered with loess, loam, and clay. The region's relief consists of low-lying (up to 150 m) plateaus in

NATIONALITIES IN SOUTHERN SUBCAUCASIA

the west and east and the wavelike Stavropol Upland (elevations up to 600–800 m). The most varied relief can be found in the foothill regions near the Great Caucasus Range. The region has a mild continental climate in the west and a continental climate in the east. The average annual temperature is 8–12°C, with a January average of –2°C in the west and –7°C in the east and a July average of 22°C in the west and 25°C in the east. The greatest precipitation (600–800 mm) is found in the higher reaches of the Stavropol Upland foothills; the western part of Subcaucasia generally receives 400–600 mm and the east about 200–300 mm of precipitation. The soils consist of arable chernozem in the west and dark and light chestnut types in the east. At one time virtually all of Subcaucasia was open steppe. Today most of it is under cultivation, with the exception of the more arid reaches of the east and a forest-steppe belt in the south.

V. Kubijovyč

Subotin, Stojan, b 1 March 1921 in Jakovo, Srem, Serbia, d 9 August 1977 in Belgrade. Yugoslav Slavist. He received his PH D from Belgrade University and taught there from 1959. Among his works are a book on Polish-Yugoslav literary relations (1969) and articles about T. Shevchenko and Ukrainian literature in Yugoslav journals. His Slovenian translation of Yu. Yanovsky's *Vershnjky* (The Horsemen) was published in 1965.

St Elijah's Church (1653) in Subotiv

Subotiv. IV-13. A village (1972 pop 1,700) on the Tiasmyn River in Chyhyryn raion, Cherkasy oblast. At the beginning of the 17th century Subotiv was a *khutir* belonging to M. *Khmelnysky, and after 1622, to his son Bohdan. After coming to power in 1648, B. Khmelnysky built a fortified palace there and established Subotiv as the hetman's residence. The town was destroyed by the Poles in 1664 and was annexed by Poland three years later under the Treaty of Andrusovo. In 1793 the village was ceded to Russia, and became a part of Bratslav vicegerency and, from 1797, Kiev gubernia. B. Khmelnysky and his son, Tymish, were buried in St Elijah's Church (built in 1653) in Subotiv. A fortified settlement from the 9th century BC has been excavated nearby.

Subotiv fortified settlement. A multi-occupational Bronze to early Iron Age fortified settlement located near Subotiv, Cherkasy oblast. Founded in the 9th century BC as a *Chornyi Lis culture center, Subotiv consisted of a 0.5 ha fortress and 1.5 ha settlement area. Excavations in 1951 and 1955 revealed both pit and semi-pit dwellings. The site is best known for producing the first iron objects in the region.

Orest Subtelny

Subtelny, Orest [Subtel'nyj], b 17 May 1943 in Cracow. Ukrainian historian; member of the Shevchenko Scientific Society and foreign member of the ANU since 1992. Together with his parents he emigrated to the United States after the Second World War, where he graduated from the University of North Carolina (1967) and Harvard University (PH D, 1972). He taught at Hamilton College in Clinton, New York (1975–82), and has been a professor of Ukrainian history at York University in Toronto since 1982. He has written *The Mazepists: Ukrainian Separatism in the 18th Century* (1981), *Domination of Eastern Europe: Native Nobilities and Foreign Absolutism, 1500–1715* (1986), *Ukraine: A History* (1988; Ukrainian trans 1991), and *Ukrainians in North America: An Illustrated History* (1991). An expanded version of Subtelny and A. Zhukovsky's article on the *history of Ukraine in *Encyclopedia of Ukraine* (vol 2, 1988) was published in Ukrainian translation in Lviv as *Narys istorii Ukrainy* (1991).

Subutai or Subodai, b and d ? A 13th-century Mongol military figure. One of Genghis Khan's ablest generals, in 1223 he commanded (together with Jebe) a large expeditionary force against the Kipchaks, which defeated a Rus'-Cuman alliance at the Kalka River. Subutai also led Batu Khan's campaigns in eastern Europe from 1236, including the sack of Kiev in 1240.

Suceava. VI-7. A city (1975 pop 54,000) on the Suceava River and a county center in Rumania. The city is mentioned in 12th-century chronicles and in a charter of 1388 as a trade center on the Lviv-Galați route. During 1375–1564 it was the capital of the Moldavian principality. In 1653 T. *Khmelnysky died during the Battle of Suceava. Under Austrian rule Ukrainians settled in the region. Today there are about 35 Ukrainian villages and nearly 40,000 Ukrainians in the northern part of the Suceava region.

Suceava, Battle of. An engagement of the armies of T. *Khmelnysky and some detachments of the Moldavian army against the Polish Wallachian leader M. Basarab, the Transylvanian György II Rákóczi, and the Moldavian army of Gheorghe Ștefan. The latter group, fearing a Ukrainian-Moldavian alliance, attacked the area controlled by the Moldavian hospodar V. *Lupu, captured Iași (the capital), and besieged Suceava. Upon Lupu's call for assistance B. Khmelnysky sent a 12,000-man force under T. Khmelnysky. In 1653 they broke through the encirclement, and for the ensuing three weeks they staged a staunch defense of the city against an attacking force of 20,000 men. T. Khmelnysky was mortally wounded on 12 September 1653, and died four days later. After his death the leadership of the Cossack contingent was taken over by I. Fedorenko, who saw no reason to continue fighting for Lupu's interests. Having secured a right of safe passage from Suceava, the Cossack force returned to Ukraine with T. Khmelnysky's body.

Suceava River [Sučava] (also Suchava). A right-bank tributary of the Seret River. It is 160 km long and drains a basin area of 3,800 sq km. The river has its source in the Bukovynian Carpathians, although most of its course is in Rumania. Its upper reaches flow along the Ukrainian-Rumanian borderland region. The river is used for log rafting.

Suchasna Ukraïna (Contemporary Ukraine). A semi-monthly paper published in Munich in 1951–60, until 1956 by the External Representation of the *Ukrainian Supreme Liberation Council (UHVR) and then by the Ukrainian Society for Foreign Studies. It contained articles on political and cultural developments in Soviet Ukraine, on the Ukrainian struggle for independence, and on international politics. The editor was V. Stakhiv. Until 1955 it published a monthly supplement, edited by Yu. Lavrinenko and I. Koshelivets, devoted to literature, culture, and the arts; in 1956 this supplement became the separate **Ukrain-s'ka literaturna hazeta*. From 1955 the paper included another supplement devoted to economics and social issues, edited by K. Kononenko. Contributors to *Suchasna Ukraïna* included members and supporters of the UHVR (eg, D. and L. Rebet, L. Ortynsky, B. Kordiuk, B. Halaichuk, Ye. Shtendera, and M. Martynets) as well as émigré academics and publicists (eg, B. Wynar, V. Holubnychy, Ye. Glovinsky, Ya. Levytsky, Ya. Pelensky, and S. Protsiuk). The paper's publishing house also issued a series of books and pamphlets on political topics and one of literary works. In 1961 the paper merged with *Ukrain-s'ka literaturna hazeta* to form the monthly **Suchasnist'*.

Suchasnist' (Contemporaneity). A monthly journal of literature, translation, the arts, history, and political, social, and economic affairs, published from 1961 to 1990 in Munich, in 1990–1 in Newark, New Jersey, and since 1992 in Kiev. It was formed through the merger of **Suchasna Ukraïna* and **Ukrain-s'ka literaturna hazeta*. The chief editors of the journal have been I. Koshelivets (1961–6, 1976–7, 1983–4), W. Burghardt (1967–70), B. Kravtsiv (1970–5), G.Y. Shevelov (1978–81), M. Skorupska (1978, 1981–3), and T. Hunczak (since 1984) and I. Dziuba (coeditor since 1992).

Although it has been closely associated with the For-

Suchasnist'

eign Representation of the *Ukrainian Supreme Liberation Council, *Suchasnist'* has reflected a wide spectrum of émigré and Western opinion. Among its contributors have been many of the most prominent émigré writers, scholars, critics, and cultural and political figures. *Suchasnist'* has been a major forum for émigré poets and prose writers, and has devoted much attention to political developments in Ukraine, especially the *dissident movement and, since the late 1980s, the democratic movement there; it has published samvydav literary works and documents, prose and poetry by the **shestydesiatnyky*, banned literary works, criticisms of Russification and national discrimination in the USSR, and news and analyses of political and social developments there. It has also published articles on international politics, culture, and intellectual life.

The Suchasnist publishing house has issued separately approx 80 poetry collections, novels, translations, monographs, memoirs, and anthologies since 1968. It has also reprinted Soviet works that were unavailable or banned in the USSR (eg, the writings of M. Skrypnyk, the collected prose of V. Domontovych [Petrov], and poetry by M. Bazhan, V. Svidzinsky, and V. Symonenko) and published samvydav works by Soviet Ukrainian dissidents and books of foreign literature translated into Ukrainian.

Sud i rozprava (Court and Trial). An important 18th-century legal monument written by the Cossack jurist F. *Chuikevych on the basis of his private compilation in 1750–8 of the laws of the Hetman state. The collection is concerned primarily with civil procedure and the court system, as well as with some family and land law. It is also an important source of legal thought in the Hetman state. Responding to the major political and social developments arising from B. Khmelnysky's uprising (1648–57), the author tried to justify changes in the court system that was established after 1648 and to promote a return to the old system based on the Lithuanian Statute. He proposed renewing the so-called statute courts, and thus separating the judiciary from the administration, and defended the independence of the Hetman courts from the interference of Russian authorities by arguing that there should be no appeal from the decisions of the General Military Court.

The collection was dedicated to Hetman K. *Rozumovsky and was influential in the judicial reform carried out under him in 1760–3. The structure of the General Military Court, for example, was changed (1760) to resemble that of the Tribunal of the Great Duchy of Lithuania, and statute laws were introduced (1763). Although it was an unofficial code, *Sud i rozprava* was extensively used by the courts of the Hetmanate, and some court decisions contain references to it. Its obvious patriotism and its literary style add to its importance beyond the legal sphere.

Sud i rozprava is divided into sections dealing with evidence, sentences, procedure, appeals, the execution of judicial decisions, and dowries. These sections were compiled between 1750 and 1752. Later additions include sections on appeals according to the Lithuanian Statute (1754), prescriptive land rights (1755), and land courts (1758). A copy of the text from the late 18th or early 19th century was published by M. Vasylenko in *Materiialy do istorii ukrains'koho prava* (Materials toward the History of Ukrainian Law, vol 1, 1929). A 1791 transcription is found in the Saltykov-Shchedrin Library in St Petersburg.

The Genoese fortress in Sudak

Sudak. IX-15. A city (1989 pop 13,900) on the Black Sea and a raion center in the Autonomous Republic of Crimea. A fortress called Sugdei was built there in 212. At the end of the 8th century it became an important seaport, which maintained economic ties with Byzantium. In documents of Rus' principality it is called Surozh. In the 13th century it became part of the Crimean Khanate, and in 1365, a Genoese trading colony called Soldaia. The Genoese built a fortress with 16 turrets and a church, remnants of which have been preserved. In 1475 Sudak was annexed by Tur-

key, and in 1783, by Russia. Sudak was granted city status in 1982. Most of the inhabitants are employed in the city's health resorts.

Sudan grass (*Sorghum sudanese*; Ukrainian: *sudanska trava*). An annual herbaceous plant of the family Gramineae, a leafy bush 50–300 cm in height. Highly drought resistant, it was introduced in Ukraine in 1912 and is now cultivated in steppe and forest-steppe regions for green fodder, hay, silage, and grazing. The popular brands in Ukraine include Odessa 25, Myronivka 10, Black Sea, and Dnipropetrovske 876. Sudan grass is planted as an after crop in mixed planting with soybean, sunflower, etc (see *Sorghum).

John Stefura's sculpture commemorating Ukrainian-Canadian pioneers in front of St Mary's Ukrainian Catholic Church in Sudbury

Sudbury. A city (1981 pop 91,800; metropolitan pop 149,900) in northern Ontario, and the world's largest nickel producer and Canada's largest copper producer. Immigrants from Western Ukraine began to work in the mines as early as 1904. In 1914 the Ukrainian Catholics built a small frame church, which was replaced in 1928 with St Mary's Church. The local branch of the Ukrainian National Federation (est 1933) maintained a Ukrainian school, the Dnipro Choir, an orchestra, a folk dance group, and, after the war, the Tryzub sports club. In 1935 the Buduchnist food co-operative, which is still the only Ukrainian food co-operative in Ontario, was organized. Sudbury's first Ukrainian credit union opened in 1944. Of organizations established after the Second World War, the branches of the Ukrainian Youth Association and the Canadian League for Ukraine's Liberation have been most active. In 1981 approx 5,300 of the residents of the Sudbury metropolitan area were of Ukrainian origin. In 1991, 1,205 inhabitants declared Ukrainian as their mother tongue.

Sudebnik. A collection of legal norms in the Grand Duchy of Lithuania and Muscovy. Such collections were used in the courts as law manuals and particularly as manuals of criminal and procedural law. The *sudebnik* of 1468 of the Grand Duchy of Lithuania was codified under Grand Duke Casimir IV Jagiellończyk and made public at

the Vilnius Diet. It was the first general, though incomplete, legal code for Lithuania, and a precursor of the *Lithuanian Statute. Focused on criminal and procedural law, it was based primarily on **Ruskaia Pravda*, customary law, and articles of later legislative acts. Some influences of Western law are also evident, such as the introduction of capital punishment, which is not found in *Ruskaia Pravda*. In Muscovy the first general legal code was the *sudebnik* of 1497, which marks the beginning of the legal enserfment of the peasantry by limiting their mobility. It was based also on *Ruskaia Pravda*, as well as on various princely decrees and customary law. It was succeeded by the *sudebnik* of 1550, which set the legal groundwork of an estate monarchy and remained in force until the major legal reform of 1649.

Sudets, Volodymyr [Sudec'], b 23 October 1904 in Nyzhno-Dniprovske, now part of Dnipropetrovske, d 6 May 1981 in Moscow. Soviet aviation marshal. During the Second World War he commanded an aviation corps and the 17th Aviation Army (1943–5). After the war he graduated from the General Staff Academy (1950) and was promoted to marshal of aviation (1955). He served in various positions, including commander of air defense forces and deputy defense minister of the USSR (1962–6). After retiring in 1966, he became an inspector-consultant to the defense ministry.

Sudiienko [Sudijenko]. A Cossack *starshyna* family from the Novhorod-Siverskyi region. Its founder was Ivan, who lived in the mid-17th century. His son, Andrii (d 1688), served as judge of Starodub regiment (1670–4) and *horodovyi* otaman of Novhorod-Siverskyi (1672–7). Andrii's son, Ivan (d 1729), was *horodovyi* otaman of Novhorod-Siverskyi (1709–25) and took part in the Chyhyryn, Perekop, and Poltava campaigns. Ivan's son, Stepan (ca 1689–1763), was *horodovyi* otaman (1727–39) and captain (1739–63) of Novhorod-Siverskyi. His son, Osyp (ca 1743–4 December 1811), was appointed to the General Postal Authority of the Russian Empire in 1784 and promoted to the rank of secret counselor in 1800. He was a friend of Prince O. *Bezborodko, who rewarded him with estates in the Novhorod-Siverskyi region. Osyp's son, M. *Sudiienko, was a historian and civic leader. Of his two sons, Yosyf (27 July 1830–5 December 1892) served as deputy governor of Chernihiv gubernia (1870) and governor of Vladimir gubernia, and Oleksander (28 July 1832–12 April 1882) was local marshal of the nobility in Novhorod-Siverskyi. Oleksander's son, Yevhen (25 May 1870–1918), was a marshal of the nobility and in 1913 was elected to the State Duma.

Sudiienko, Mykhailo [Sudijenko, Myxajlo], b 1802 in Novhorod-Siverskyi county, Chernihiv gubernia, d 8 September 1874 in Novhorod-Siverskyi (buried in the Cathedral of the Transfiguration in Chernihiv). Benefactor, historian, and archeographer; son of O. Sudiienko. He was a marshal of the nobility for Novhorod-Siverskyi in 1835–41; a patron of the gymnasiums in Novhorod-Siverskyi, Chernihiv (to which he donated 30,000 rubles), and Bila Tserkva; and head of the Kiev Archeographic Commis-

sion (1848–57) and the Chernihiv Gubernial Committee for the Improvement of the Lot of the Local Peasantry (1857–8). On his estate in Ochkynia he had a large library and a valuable collection of archival material pertaining to the 17th- and 18th-century Hetman state, which was bequeathed to Kiev University by his heirs (later housed in the Manuscript Division of the Central Scientific Library of the AN URSR [now ANU]). Sudiienko published *Materialy dlia otechestvennoi istorii* (Materials for the History of the Fatherland, 2 vols, 1853, 1855) and O. Shafonsky's *Chernigovskogo namestnichestva topograficheskoe opisanie* (A Topographical Description of Chernihiv Vicegerency, 1851) and contributed to the publication of the Chronicle of S. *Velychko (1848–55). A sympathizer of the Decembrists, he was the brother-in-law of O. *Myklashevsky and a friend of A. Pushkin (whose letters to Sudiienko were published in *Russkii arkhiv*, 1895).

A. Zhukovskiy

Sudkovsky, Rufin [Sudkovs'kyj], b 7 April 1850 in Ochakiv, Odessa county, Kherson gubernia, d 4 February 1885. Seascape painter. He studied at the Odessa Drawing School and the St Petersburg Academy of Arts (1868–73), of which he was elected a member in 1882. His works include *Ochakiv Harbor* (1881), *Calm Sea* (1883), *The Calm* (1884), *Clear Water* (1879–84), *Storm on the Sea*, *On the Bank of the Dnieper*, *View of Ochakiv*, and *Before a Storm near Odessa*.

A book-cover design by Okhrim Sudomora (early 20th century)

Sudomora, Okhrim, b 19 March 1889 in Boryspil, Pereiaslav county, Poltava gubernia, d 13 October 1968 in Kiev. Graphic artist. After studying at the Kievan Cave Monastery Icon Painting Studio (1904–7) under I. Izhakevych and at the Kiev Art School (1907–13) he worked as a book illustrator and designer for publishing houses, such as Chas, Dniprosoiuz, Dzvin, and Vernyhora. He designed the journal *Staivo* (1913–14) and numerous stories for children. In the 1920s he worked for Kiev and Kharkiv publishing houses, where he designed books, such as B. Hrinchenko's *Sam sobi pan* (One's Own Master, 1924), T. Shevchenko's *Kobzar* (1927), and O. Vyshnia's *Siisia, rodysia, zhyto, pshenytsia* (Sow and Grow, Rye and Wheat, 1929), and journals such as *Radians'ka shkola*, *Zhovten'*, and *Pioneriia*. In 1943 he moved to Lviv, where he illustrated the children's magazine *Mali druzi* and children's books for Ukrainke Vydavnytstvo publishers. After the Second World War he worked for pub-

lishing houses in Kharkiv and Kiev. He was accused by Soviet critics of formalistic deviations.

Sudost River [Sudost']. A right-bank tributary of the Desna River. It is 208 km long and drains a basin area of 5,805 sq km. Most of the river runs through Briansk oblast (RF), but its last section cuts through the northeastern corner of Chernihiv oblast. The city of Pochep is situated along the river.

Sudova Vyshnia [Sudova Vyšnja]. IV-4. A city (1989 pop 6,300) on the Vyshnia River in Mostyska raion, Lviv oblast. It was first mentioned in historical documents, as Vyshnia, in 1230. From 1349 it was under Polish rule, and in 1368 it was granted the rights of *Magdeburg law. From 1443 it was the site of dietines for nobles from Rus' voivodeship – hence the name Sudova (from *sud* 'court'), which was added to Vyshnia in 1545. From 1772 to 1918 it belonged to Austria, and in the interwar period it was under Polish rule. Today Sudova Vyshnia has a mixed-feed plant and a haberdashery factory. The remains of a fortified settlement of the 9th to 11th centuries have been preserved, and a statue to its famous son I. *Vyshensky (by D. Kravych) was erected in 1979.

Sudovshchykova, Oleksandra. See Hryhorenko, Hrytsko.

Sudyslav, b and d ? A 13th-century Galician boyar. An opponent of Prince Danylo Romanovych, he assisted Hungarian forces several times in their attempts to take over Halych. When they were routed in 1230, he retreated with them to Hungary and organized two more campaigns (1232 and 1233), which were unsuccessful.

Sudzha [Sudža]. II-16. A town (1962 pop 4,700) on the Sudzha River and a raion center in Kursk oblast, RF. It was founded in 1664 and was a company center in Slobidskyi regiment and then a county center in Kursk vicegerency (1779–97) and Kursk gubernia. According to the census of 1926, Ukrainians accounted for 30.8 percent of the town's population and 61.2 percent of the *volost's* population.

Sugar beet (*Beta vulgaris saccharifera*; Ukrainian: *tsukrovyyi buriak*). The most important industrial crop in Ukraine and the raw material base for the Ukrainian sugar industry. Its white taproot, weighing an average of 400–500 g, yields a sugar content of 16–20 percent. The by-product treacle (or sugarhouse molasses) is used for making spirit yeast, glycerin, and other products. Beet tops are used as fodder.

Sugar beets began to be cultivated in Ukraine in the 1820s. By the 1840s Ukraine was the main sugar-producing region in the Russian Empire. The area sown to sugar beets increased, from about 323,000 ha in 1880–90 to 378,000 ha in 1908–9 and 574,000 ha in 1911–12. In 1913 the 558,000 ha of sugar beets in the nine Ukrainian gubernias accounted for 82 percent of the sugar-beet area in the Russian Empire (excluding Poland). Sugar beets were grown predominantly in the forest-steppe belt – in Kiev and Podilia gubernias and in the Sumy region. The largest fields belonged to large landowners, and the next largest, to sugar-beet mills. Only 20 percent of the sugar-beet area belonged to peasants. Yields in 1913 averaged about 170 centners per ha, and harvests amounted to about 10 million t.

After the revolution the sown sugar-beet area returned to its prewar levels (630,000 ha by 1928). The sown area increased steadily until 1965, then stabilized, and then even receded slightly (see the table). By the late 1980s the Ukrainian SSR accounted for 49 percent of the sugar-beet area in the USSR. In the postwar period the sown area of sugar beets increased also in Western Ukraine, from 116,000 ha in 1940 to 396,000 ha in 1960. Sugar-beet farming was extended into the steppe (Odessa, Mykolaiv, Kherson, Dnipropetrovske, and Luhanske oblasts), where the sown area increased from 18,000 ha in 1940 to 120,000 ha in 1960. Today 77 percent of the sugar-beet fields are in the forest-steppe, 15 percent in the steppe (mostly the northern and central parts of the belt), and 7 percent in the forest belt, particularly in Subcarpathia. Over 95 percent of the sugar-beet area belongs to collective farms; the remainder belongs to state farms.

Harvests of sugar beets grew even more rapidly than the sown areas and continued to grow when the sown

Sugar beets: sown areas, yields, and harvests, 1940–87

USSR	1,226	1,308	3,043	3,604	3,582	3,527	3,745	3,506	3,404
<i>Yield</i> (centners/ha)									
Ukraine	159	177	218	198	267	268	300	259	298
USSR	146	159	191	165	228	217	237	218	266
<i>Harvest</i> (million t)									
Ukraine	13.1	14.6	31.8	34.1	46.7	46.0	53.9	43.9	49.7
USSR	18.0	20.8	57.7	59.2	81.0	76.0	88.7	76.4	90.4
<i>Ukraine's share of USSR (%)</i>									
Sown area	66.9	63.3	47.9	47.4	49.1	48.7	47.8	48.4	49.0
Yields	108.9	111.3	114.1	120.0	117.1	123.5	126.6	118.8	112.0
Harvest	72.4	70.2	55.0	57.7	57.6	60.5	60.7	57.5	55.0

area stabilized (see the table). Since yields in Ukraine were higher than in most regions of the Soviet Union, Ukraine's share of the Soviet sugar-beet harvest came close to 55 percent. With an annual output of about 50 million t (1987) Ukraine is the largest producer of sugar beets in the world.

Yield increases have been achieved by the development and use of high-quality seeds, generous quantities of fertilizer, and irrigation in dry areas and the full mechanization of seeding, cultivating, harvesting, and processing. Problems of sugar-beet farming are studied at the Scientific Research Institute of Sugar Beets in Kiev and a network of research stations. The latter have developed many sugar-beet cultivars for different regions of Ukraine, which are named after the respective research stations: the Verkhnia 031, 038, and 072, the Ivanivka 1745 (improved), the Yaltushkiv (single-seed), the Yaltushkiv (hybrid), and the Bila Tserkva 1 and 2 (polyhybrid).

Sugar industry. A branch of the *food industry that makes granular and refined sugar. It is one of the oldest and most important food industries in Ukraine. Until 1914 sugar was one of the country's major exports. Sugar in Ukraine is made primarily from *sugar beets; since the 1950s, however, a growing proportion (in 1980s over one-third) has been made from imported Cuban sugar cane. Over one-half of all sugar is consumed directly by the population; some portion is also used as a raw material in other food industries.

Before 1915. Sugar making from sugar beets began in Western Europe in the mid-18th century. In the Russian Empire the first sugar factories were established in the early 19th century. They used imported sugar cane. The first sugar factories in Ukraine were built in 1824 in the village of Troshchyn, near Kaniv, Kiev gubernia, and in Makoshyne, Chernihiv gubernia. By 1830 there were six sugar factories in Russian-ruled Ukraine. The industry expanded very quickly in the 1840s, from 52 factories in 1842 to 192 in 1848 (almost two-thirds of all the sugar factories in the empire). Initially sugar processing was limited almost entirely to nobles' estates. It expanded as commercial farming spread and as the land under commercial crops increased.

The sugar industry was most developed in Right-Bank Ukraine, specifically in the Kiev region and Podilia, which in 1848–9 accounted for over 74 percent of all Ukrainian sugar production. Chernihiv gubernia, in Left-Bank Ukraine, accounted for another 10 percent. Ukrainian sugar factories were usually quite small, with limited capacities. Until the abolition of serfdom in 1861 they relied primarily on serf labor, and production was highly labor-intensive. The sugar beets were harvested, washed, and pressed to produce juice, which was filtered, concentrated

by boiling, and centrifuged to produce crystallized sugar. Most factories operated for only 3 to 4 months in the late fall and early winter, on two 12-hour shifts. In 1848–9, of the 29,250 people employed in the industry in Ukraine, only 3,300 worked year round. In Kiev gubernia 1,990 of 15,250 workers worked year round; in Podilia gubernia, 480 of 3,970; in Chernihiv gubernia, 235 of 3,500; in Kharkiv gubernia, 350 of 3,300; in Poltava gubernia, 170 of 1,900; in Volhynia, 72 of 1,100; and in Kherson gubernia, 12 of 130. Most of the factories were located on the large estates of the Polish magnates, such as the Potockis, Branickis, and Poniatowskis.

From the 1850s the sugar industry began to modernize and grow quickly. New machinery and techniques were introduced, and production was concentrated in larger plants. Some Jews (eg, the Brodsky family) and Ukrainians became involved in the industry. The *Yakhnenko and the *Symyrenko families established a sugar refinery in the 1840s that soon grew into one of the largest sugar companies in the Russian Empire, and the *Tereshchenko family developed a major sugar enterprise after 1860. After the emancipation of the serfs in 1861, the nobility were quickly displaced by capitalists as the leading sugar refiners, although most of the sugar beets were still grown on the large estates. Total production of sugar in Ukraine increased from 200,900 t in 1881–2 to 1.1 million t in 1913–14. At that time Ukraine's output accounted for 80–85 percent of the crystal sugar and almost 75 percent of the refined sugar output of the Russian Empire. Ukraine was second only to Germany in sugar production from beets. In 1914, of the 214 sugar factories in the Russian Empire, 203 were located in Ukraine. Sugar was exported from Ukraine to the rest of the empire and abroad. In 1887 the *Syndicate of Sugar Manufacturers was established to regulate the sugar industry in the Russian Empire. It ensured high profits for the sugar manufacturers by maintaining high prices on the domestic market and low prices on the foreign market.

The sugar industry began in Galicia in the first half of the 19th century, but the factories were closed following the emergence of a single syndicate for the entire Austro-Hungarian Empire. One new factory was established in Khodoriv in 1913.

1915–40. The sugar industry declined during the First World War and was almost destroyed during the revolution and the struggle for Ukrainian independence. In 1921–2, production was only approx 4 percent of the 1913 level. The industry was rebuilt quickly, and by 1927–8 production had reached prewar levels (1.1 million t). In the first years of collectivization the area devoted to sugar beets fell sharply, and sugar output declined to 550,000 t in 1932. It rebounded again in the mid-1930s and reached 1.5 million t in 1940. Many of the older factories were reconstructed, and four especially large ones were built, including the *Lokhvitsia Sugar Refining Complex in Poltava oblast, the largest sugar complex in the USSR. Those factories were larger and more mechanized than the older factories, some of which were closed. Whereas in 1913 the average factory processed 70,000 centners of sugar beets, in 1940 the figure was 103,000 centners. In 1940, of all sugar factories in the USSR, 74.5 percent were located in Ukraine, and Ukraine's output accounted for 73 percent of the Soviet output. In the 1930s a sugar industry was established in the Kuban; in Galicia there were two factories, and in Bukovyna, three.

Since 1941. Sugar manufacturing was largely interrupted in Ukraine during the Second World War, and many factories were completely destroyed. In 1945 only 329,000 t of sugar were produced, and pre-Second World War levels were achieved only in 1954. After that, however, the industry grew quickly. Between 1955 and 1970, 38 new, highly mechanized factories were built, and many older ones were modernized. The average daily capacity of Ukrainian sugar factories increased from 860 centners in 1950 to 1,700 centners in 1970. In that period the production of sugar from sugar beets increased, from 2.2 million t in 1955 to 3.8 million t in 1960 and 5.9 million t in 1970. After stagnating somewhat in the 1970s, the industry began to grow again, and annual production reached 6.2 million t in 1985 and 7.5 million t in 1987. Since 1960 an increasing percentage of Ukrainian sugar has been produced from imported sugar cane (537,000 t in 1960, 912,000 t in 1970, 1.8 million t in 1985, and 2.2 million t in 1987). Some 60 percent of all Ukrainian sugar was exported to other parts of the USSR, but the overall importance of sugar exports in the Ukrainian economy has fallen.

In 1982 there were 191 sugar factories in Ukraine. The major centers of the industry are the Right-Bank forest-steppe region (Vinnytsia, Cherkasy, Khmelnytskyi, and Kiev oblasts), the Left-Bank oblasts of Sumy, Poltava, and Kharkiv, and the southern oblasts of Kirovohrad and Odessa. Since 1980 there has also been a rapid increase in sugar production in Lviv oblast. The development of the industry in the south is due to the increasing use of imported sugar cane, which is brought into the port of Odessa. The largest factory is the one in Lohvytsia. Granulated sugar is refined in 15 factories (the largest are in Sumy and Odessa), but overall demand for refined sugar has declined since the 1960s. Problems of the sugar industry in Ukraine are studied at the *Scientific Research Institute of Sugar Beets in Kiev (an All-Union institute until December 1991).

Sugdei. See **Sudak.**

Suite. A composite musical form of related pieces or movements. Before the mid-18th century the genre usually consisted of a set of dances. Ukrainian lutenists and torban players of this period often composed and performed their own dance suites at the courts of Polish and Ukrainian nobles. In the late 19th century the word 'suite' was revived to describe a combination of instrumental

movements forming a unified whole. One of the first Ukrainian composers to explore this genre was M. *Lysenko, whose *Ukrainian Suite* (1869) for piano used Ukrainian folk songs within the framework of baroque dance forms. The genre continued to develop in the works of V. Barvinsky and N. Nyzhankivsky. In the 20th century the programmatic orchestral suite became a favorite vehicle of Ukrainian symphonists. Notable examples are A. *Shtoharenko's *In Memory of Lesia Ukrainka* (1951), H. *Maiboroda's *King Lear* (1959), and S. *Liudkevych's *Carpathian Voices* (1962), as well as works by M. Kolessa and R. Simovych. Excerpts from ballets, musicals, and film scores in Ukraine were often arranged as suites in order to popularize the music. One of the best-known examples of this practice is B. *Liatoshynsky's orchestral suite *Taras Shevchenko* (1952), derived from the same composer's film score.

Sujkowski, Antoni, b 21 May 1867 in Zakroczym, Poland, d 12 December 1941 in Warsaw. Polish geographer. He served as a professor of geography in Warsaw and president of the Polish Geographic Society (1932–41). His works, particularly *Geografia ziem dawnej Polski* (A Geography of the Lands of Ancient Poland, 1918), contain information about Ukraine. Sujkowski also served as a Polish delegate to the Paris Peace Conference.

Suk, Vojěch, b 18 September 1879 in Prague, d 8 March 1967 in Brno. Czech anthropologist and ethnographer. After graduating from Zurich University (PhD, 1917), he lectured in anthropology and ethnography at Prague (1922–3) and Brno universities. Many of his works deal with the Ukrainian inhabitants of Transcarpathia—for example, his articles on the anthropology of the Hutsuls (1922, 1923), on cabbage and goiter in Carpathian Ruthenia (1931), on the anthropology of Carpathian Ruthenia (1932), and on Subcarpathian Ruthenians at the beginning of the 19th century (1936).

Sukachov, Leonyd [Sukačov] (pseud: Yurii Vitrenko, Omelko Bliudenko, Leonyd Hadiatsky, El Cho), b 1912 in Poltava, d 1937. Writer and literary scholar. In the 1920s he contributed stories to the children's monthly *Pioneriia*. From 1935 he was a senior associate of the Taras Shevchenko Scientific Research Institute in Kharkiv. He wrote several articles about T. Shevchenko and annotated the 1936 edition of Shevchenko's journal. A victim of the Stalinist terror, he was posthumously rehabilitated in 1955.

Sukha, Liubov [Suxa, Ljubov], b 27 July 1910 in Liubelia, Zhovkva county, Galicia, d 16 May 1988 in Lviv. Art scholar. She graduated from Lviv University in 1937 and obtained a candidate's degree in 1956. She is the author of articles on Ukrainian folk and decorative art and the monograph *Khudozhni metalevi vyroby ukraïntsv Skhidnykh Karpat druhoi polovyny XIX–XX st.* (Metal Handicrafts of Ukrainians of the Eastern Carpathians in the Second Half of the 19th and the 20th Century, 1959).

Sukhodil'ske [Suxodol's'ke]. A city (1989 pop 27,800) under the city council of Krasnodon (V-20, DB III-7) in Luhanske oblast. It originated as a mining settlement around the village of Verkhnoduvanne in the 1950s, and it was

promoted to city status in 1972. There are two coal mines and two coal enrichment plants in the city.

Sukhodolov, Mykola [Suxodolov], b 4 May 1920 in Nagutskoe, Stavropol gubernia, Kuban. Sculptor. A graduate of the Kiev State Art Institute (1951), he created the monument to M. Shchors in Kiev (1954, with M. Lysenko and V. Borodai) and several monuments to V. Lenin, including those in Zaporizhia (1964, with M. Lysenko), Ovruch (1972), Novomoskovske (1975), and Popasna (1979). He has also sculpted a marble portrait of N. Gogol (1958) and the wood composition *Female Banduryst* (1960).

Oleksii Sukhodolsky

Volodymyr Sukhodolsky

Sukhodolsky, Oleksii [Suxodol's'kyj, Oleksij], b 28 March 1863 in Kiev, d 15 April 1936 in Moscow. Stage actor, director, and playwright. He began his theatrical career as a makeup man in the Kiev Russian Drama Theater (1879) and then acted in the Ukrainian troupes of O. Vasylenko, M. Kropyvnytsky, and H. Derkach (1891–4); led a Ukrainian troupe with O. Suslov (1894–8) and his own troupe (1898–1918; in 1911 it performed in Sofia, Bulgaria); and directed in a Ukrainian troupe in Yugoslavia and at the Belgrade Opera Theater (1920–8). He returned to Soviet Ukraine in 1929, where he directed in the Hart Ukrainian touring theater (1930–2), and he acted in the Moscow Ukrainian Theater of the RSFSR (1932–3). He wrote the plays *Khmara* (A Cloud) and *Pomsta, abo Zahublena dolia* (The Revenge, or Lost Fate).

Sukhodolsky, Volodymyr [Suxodol's'kyj], b 16 June 1889 in Romen, Poltava gubernia, d 13 November 1962 in Kiev. Writer and playwright. He graduated from the St Petersburg Polytechnical Institute (1917) and worked in Leningrad and then in Ukraine as a hydroelectrical engineer. He began to publish his work in 1930. Published separately were the plays *Ustym Karmaliuk* (1937), *Tarasova iunist'* (Taras's Youth, 1938), *Dal'nia Olena* (Distant Olena, 1947), *Arsenal* (1957), the plays about collectivization *Na poriadku dennomu* (On the Daily Agenda, 1930) and *Step chekaie* (The Steppe Awaits, 1930), and many others. He published a collection of one-act plays for amateur groups, *Dvi viiny* (Two Wars, 1943), and the collected editions *P'iesy* (Plays, 1960, 1980). He also wrote a biography

of M. Zankovetska, *Narodna artystka* (People's Artist, 1961), and adapted N. Gogol's *Sorochinskaia iarmarka* (The Fair at Sorochyntsi, 1933) for the stage.

Heorhii Sukhomel

Vasyl Sukhomlynsky

Sukhomel, Heorhii [Suxomel, Heorhij], b 11 September 1888 in Mykolaivka, Berdychiv county, Kiev gubernia, d 18 July 1966 in Kiev. Hydraulics and hydromechanics scientist; full member of the AN URSS (now ANU) from 1951. He studied and taught at the Kiev Polytechnical Institute and served as director of the ANU Institute of Hydrology. He developed a mathematical model for calculating the flow of water with a free surface; specifically, he discovered and proved experimentally the possibility of there being two types of flow in open channels. He worked out practical engineering guidelines for designing hydraulic structures and wrote four major textbooks on hydraulics.

Sukhomlyn, Kyrylo [Suxomlyn], b 23 May 1886 in Krasnopillia, Krolevets county, Chernihiv gubernia, d 26 August 1938. Communist party and Soviet government leader. After the Ukrainian-Soviet War he served in Ukraine as head of the Southern Bureau of the Railwaymen's Union (1921–3), member of the Presidium of the CP(B)U Central Control Commission (CCC, 1923–5) and the CC CP(B)U (1925–38), people's commissar of labor (1925–7), CC CP(B)U Politburo candidate (1926–30) and member (1930–7), chairman of the Supreme Council of the National Economy (1927–32), deputy premier of the Council of People's Commissars (1932–3, 1935–8) and chairman of the All-Ukrainian Council of Trade Unions (1932–3), CCC chairman and people's commissar of worker-peasant inspection (1933–4), people's commissar of local industry (1935), and chairman of the State Planning Commission (1935–8). He was elected a number of times to the All-Ukrainian Central Executive Committee and its Presidium. Despite his leading role in the Stalinist industrialization drive in Ukraine, he was arrested and executed during the Yezhov terror.

Sukhomlynsky, Vasyl [Sukhomlyns'kyj, Vasyli'], b 28 November 1918 in Vasylivka, Onufriivka raion, now in Kirovohrad oblast, d 2 November 1970 in Pavlysh, Onufriivka raion. Pedagogue. He graduated from the Poltava Pedagogical Institute in 1939. In 1947–70 he was director of the Pavlysh secondary school. In 1957 he became a corresponding member of the RSFSR Academy of Pedagogical

Sciences, and in 1968 a corresponding member of the USSR Academy of Pedagogical Sciences. He wrote books and numerous articles (in both Ukrainian and Russian) devoted to questions of the education of young people, parental involvement in the educational process, and the methodology of literature and language instruction in secondary schools. He is representative of the more humanist current of Soviet pedagogical thought. Although he did not reject the collective, he emphasized the need to foster the individual development of young people. He also opposed the trend toward the vocationalization of secondary education under N. Khrushchev. Five volumes of his selected works were published in 1976–7. His best-known work is *Sertse viddaiu ditiam* (I Give My Heart to Children, 1969).

Sukhorsky, Andrii [Suxors'kyj, Andrij], b 21 August 1932 in Vilka, Sianik county, Galicia. Wood carver. He learned his trade from his father, Petro, and M. Orsyk. Since 1948 he has worked at the Lviv Arts and Crafts Complex as a carver of small figures. His works include *Poor Peasant behind the Plow* (1949), *Return from War* (1949), *The Dogs Attacked* (1949), *I Was Turning Fourteen ...* (1951), *Kobzar with Guide* (1964), *Shepherd* (1966), and *Master of the Highland* (1969).

Sukhoversky, Ihor [Suxovers'kyj] (Suchoversky), b 27 July 1927 in Chernivtsi. Engineer and executive. In 1992 he was inducted into the Academy of Engineering Sciences of Ukraine. Sukhoversky studied at the UNRRA University in Munich (1945–7), at Leuven (1947–9), and at the Federal Institute of Technology in Zurich as a specialist in mechanical and aeronautical engineering (Eng, M SC, 1951). He emigrated to Canada in 1953 and began working for Alcan Aluminum, with which company he rose to the position of president of Alcan Europe (1975–82) and then president of Alcan International (1982–9) responsible for research and development. A longtime member of the Plast Ukrainian Youth Association and an avid glider pilot, Sukhoversky was one of the first two Ukrainians to climb Mont Blanc (1947; see *Mountaineering).

Sukhoversky, Tselestyn [Suxovers'kyj, Celestyn] (Suchowersky, Celestin), b 8 May 1913 in Chernivtsi, Bukovyna. Community and political activist. While studying law and political science at Chernivtsi University (PH D, 1939) he was active in student and sports organizations, such as the Zaporozhe academic society. He joined the nationalistic movement and rose in the OUN Leadership to the position of general judge. As an émigré in Germany in 1945, he helped found the *Central Representation of the Ukrainian Emigration in Germany and helped reorganize the State Center of the UNR. After settling in Canada in 1949, he worked as a librarian of Slavic and East European studies (1960–7) and lecturer at the University of Alberta. He also served on the executives of the Ukrainian National Federation, the Ukrainian War Veterans' Association of Canada, and the Ukrainian Canadian Congress and was president of the court of the Ukrainian National Council.

Sukhovii, Petro [Suxovij] (Sukhoviienko), b 1645 in Poltava, d ? Cossack leader. He served in Poltava regiment and then became chancellor of the Zaporozhian Sich. In November 1668, at the height of Hetman P. *Doroshenko's power, he proclaimed himself hetman of Right-Bank Ukraine with the support of the Zaporozhian Cossacks.

To win the support of the Crimean Tatars he accepted the suzerainty of the Crimean khan. Sukhovii's intrigues and a Polish offensive in Right-Bank Ukraine forced Doroshenko to abandon Left-Bank Ukraine. At the end of 1668 Sukhovii and the Tatars attacked Doroshenko's domain in Right-Bank Ukraine but were defeated at Olkhivets by Doroshenko's troops and I. Sirko's Zaporozhian Cossacks. In the summer of 1669 Sukhovii, with Tatar reinforcements, attacked Doroshenko again, but Turkey ordered the Crimean khan to withdraw his support of Sukhovii. In June 1669 Sukhovii was deposed, and in July M. Khanenko, who was supported by Poland, was proclaimed hetman. After Doroshenko's victory over Khanenko at Stebliv on 29 October 1669, Sukhovii escaped to the Crimea.

Sukhovii. A dry, hot flow of air that occurs when the air temperature rises to 25°C or more with a simultaneous drop of relative humidity to less than 30 percent and a wind of 5 m/sec or more. It can cause the wilting of vegetation in a matter of hours. In the spring, when the annual plant roots are not well developed, temperatures as high as 25–28°C with a relative humidity of 19–22 percent and winds of 7–8 m/sec are sufficient to yellow the leaves of grain in 4 to 10 hours. In the summer faster increases in temperatures (2–4°C per hour), higher temperatures (35–40°C), and lower relative humidity (10–17 percent) produce conditions during which a weak wind (3 m/sec) can yellow the leaves in two hours or less. In Ukraine the *sukhovii* is most hazardous in June, before grain crops have ripened. The *sukhovii* is common in the steppe, with increasing incidence to the east and in Subcaucasia. Those areas have, on average, 15 to 30 days with the *sukhovii*, but in some years it may be present on as many as 50 or 60 days.

Dust storms are sometimes associated with the *sukhovii*. Generated by strong winds in the spring, they can blow away much dry topsoil. Powerful storms, which carried dust all the way into Poland and to the Baltic Sea, occurred in Ukraine in April and May 1892, April 1928, and March and April 1960. Excessive cultivation makes the soil particularly susceptible to such wind erosion. Methods of combating the *sukhovii* include using drought-resistant crop varieties and planting strips of crop perpendicular to the prevailing direction of the wind. Irrigation is particularly effective, in providing the plants with water and adding moisture to the atmosphere (the moisture, through evaporation, helps to cool the atmosphere). The planting of shelterbelts is most common where trees can be grown. Shelterbelts reduce the velocity of winds over the fields up to 600 m and provide for snow accumulation in winter that provides more soil moisture in the spring.

I. Stebelsky

Sukhyi Torets River [Suxyj Torec']. A left-bank tributary of the Kazennyi Torets River that flows eastward for 101 km through Kharkiv and Donetsk oblasts and drains a basin area of 1,610 km. It is generally level, with a width of 10 m and a valley of 3–4 km. Its waters are used mainly for irrigation and domestic consumption. The major centers along the river include Barvinkove and Slovianske.

Sukhyniv, Ivan [Suxyniv] (Sukhinov), b ca 1794–5 in Krasnokamianka (now Chervona Kamianka), Oleksandri-

ia county, Kherson gubernia, d 13 November 1828 in Nerchinsk county, Siberia. A Decembrist, descended from Cossack officers. He took part in the War of 1812 and the western campaigns of the Russian army in 1813–14, and served in the Chernihiv Regiment (from 1819) and as lieutenant of the Oleksandriia Hussar Regiment (from 1825). He was a member of the Society of United Slavs and the Southern Society of the *Decembrist movement, and one of the organizers and leaders of the Chernihiv regimental uprising in early 1826. He was captured, and his death sentence was commuted to lifelong hard labor. At the Zerentui mines in Siberia he planned a revolt to free Decembrist prisoners, but the scheme was discovered, and he was again sentenced to death. He hanged himself on the eve of his scheduled execution.

Sukhyno-Khomenko, Volodymyr [Suxyno-Xomenko], b 28 July 1900 in Kakhivka, Oleshky county, Tavriia gubernia, d 1966. Publicist, historian, and literary critic. In the 1920s and early 1930s he worked at the Ukrainian Institute of Marxism-Leninism, taught at the Communist University and Institute of Journalism in Kharkiv, and contributed to *Litopys revoliutsii* (LR), *Chervonyi shliakh*, and other periodicals. He was a close associate of M. Skrypnyk in researching Marxist theory in Ukraine. His teacher, M. Yavorsky, emphasized the separate historical development and the unique nature of the revolution in Ukraine. Sukhyno-Khomenko's article supporting Yavorsky's ideas, 'Z pryvodu osoblyvostei proletars'koi revoliutsii na Ukraïni' (Concerning the Peculiarities of the Proletarian Revolution in Ukraine, LR, 1928, no. 4), was severely criticized by P. Horyn in the article 'Iak ne treba pysaty istorii' ('How Not to Write History,' LR, 1928, no. 6). Although he recanted and criticized his mentor's work in *Odmyny i bankrutstvo ukraïns'koho natsionalizmu: Istorychno-politychni narysy* (The Mutations and Bankruptcy of Ukrainian Nationalism: Historical and Political Overviews, 1929), Sukhyno-Khomenko was arrested and imprisoned in 1933. After the Second World War he was rehabilitated.

Andrew Suknaski

Suknaski, Andrew, b 30 July 1942 near Wood Mountain, Saskatchewan. Poet. The son of Ukrainian-Polish immigrants, Suknaski received a diploma in fine arts from the Kootenay School of Arts (1967). In 1978 he was writer-in-residence at St John's College, University of Manitoba. Among his poetry collections are *Wood Mountain Poems*

(1972) and *In the Name of Narid* (1981). His work has also appeared in the anthologies *Canadian Literature in the 70s* (1980) and *The Oxford Book of Canadian Verse in English* (1972).

Sukovkin, Mikhail, b and d ? Civic and political leader. Prior to 1917 he was president of the Kiev gubernia zemstvo, and for several months after the February Revolution he was the Russian Provisional Government's commissioner of Kiev gubernia. He maintained friendly relations with Ukrainian political circles, and the Hetman government appointed him head of the Ukrainian mission to Turkey. He proceeded to Russify the mission. After being dismissed by the Directory of the UNR at the beginning of 1919, he made every effort to discredit the Ukrainian government in the eyes of foreign powers.

Sula region (Posullia). A historical-geographic region above the Sula River that once formed part of the *Pereiaslav principality. The towns of the Sula's upper reaches were fortified, and the area around them colonized, by Volodymyr the Great as a first line of defense against nomadic onslaughts. Those efforts were continued by Yaroslav the Wise, albeit with mixed success. By the end of the 11th century the region had been devastated by Cuman attacks. It was a century after the nomads had been routed by a combined force of Kievan princes organized by Volodymyr Monomakh in the early 12th century before the Sula region could again be settled. The colonization effort was wiped out by the Mongol invasion in the mid-13th century, and the region was revived again only in the 16th and 17th centuries.

Sula River. A left-bank tributary of the Dnieper River that flows for 310 km through Sumy and Poltava oblasts and drains a basin area of 18,100 sq km. The river is 10–75 m in width, and its valley is 1.5 to 8 km wide (15 km at its widest point). It originates on the southwestern slope of the Central Upland and empties into the Kremenchuk Reservoir. It freezes over from December to late March. The river is used for water supply, irrigation, and fishing as well as navigation (along its lower course). The cities of Romen and Lubni are situated on it.

Süleyman I Kanuni (Suleiman the Magnificent), b 27 April 1495 (other sources cite November 1494), d 6 September 1566 near Szigetvár, Hungary. Sultan of the Ottoman Empire (1520–66). He ruled during the apogee of the Ottoman Empire, marked by military campaigns and territorial aggrandizement (including forays into Persia and central and eastern Europe), as well as significant cultural achievements (notably in the field of law, for which he was named Kanuni, meaning Lawgiver). He took as his wife a Ukrainian captive, *Roksoliana, who came to have a considerable influence in the affairs of state. Their eldest son, Selim, succeeded Süleyman, who died during a campaign in Hungary.

Sulfur. A nonmetallic, highly reactive chemical element. It occurs naturally in volcanic and sedimentary deposits, in ores such as pyrite, galena, and cinnabar, and in petroleum, coal, and natural gas. Sulfur has many commercial and industrial uses, in the manufacture of gunpowder, fertilizers, insecticides, matches, paper pulp, fungicides, and sulfuric acid, and in the vulcanization of rubber.

In Ukraine large sulfur deposits were discovered in 1887 on the Kerch Peninsula. Mining began in 1928, and in the 1930s the average annual production was 600–700 t. By 1941 the reserves were exhausted. The largest concentration of sulfur in the former USSR, and one of the largest in the world, is found in the *Subcarpathian Sulfur Basin. The sulfur is processed by the *Rozdol Sirka Manufacturing Consortium and the Yavoriv Mining and Chemical Complex in Shklo. Ukraine's production of sulfur supplies its own needs, and some 70 percent of the mined sulfur was exported to other parts of the USSR (especially the RSFSR and the Baltic republics) and to Eastern and Central Europe. (See also *Chemical industry.)

Sulfuric acid industry. See Chemical industry.

Suliatytsky, Pavlo [Suljatyč'kyj], b 1884 in Velyki Sorochyntsi, Myrhorod county, Poltava gubernia, d 1932 in Warsaw. Lawyer and civic and political leader. A member of the Revolutionary Ukrainian party in his youth, he served as a civil court judge in Mariupol (1914–16) and then in Katerynodar. After the February Revolution he played an important role in the political developments in the Kuban and served as minister of justice of the Kuban People's Republic. He later emigrated to Prague and then Warsaw. He wrote *Narysy z istorii revoliutsii na Kubani* (Sketches from the History of the Revolution in the Kuban, 1926), a survey book of the Kuban in Polish (1930), and articles for *Kubans'kyi krai*.

Bishop Stephen Sulyk

Hetman Ivan Sulyma

Sulyk, Stephen, b 2 October 1924 in Balnytsia, Lisko county, Galicia. Ukrainian Catholic bishop. His studies in Sambir were interrupted by the Second World War, and he moved to the United States in 1948 and completed his training at St Josephat's Seminary and the Catholic University in Washington. He was ordained in 1952, served as a parish priest in a variety of locations, including Perth Amboy, New Jersey (1962–81), and held a number of church administrative offices before being consecrated metropolitan of Philadelphia in 1981.

Sulyma. A line of Cossack starshyna in Left-Bank Ukraine. The family name was established by Mykhailo, who lived in the 16th century. His son was Hetman Ivan *Sulyma (d 1635). The hetman's sons included Stepan (d

1659), a captain of Boryspil company, and Fedir (d 1691), a colonel of Pereiaslav regiment. Fedir's son, Ivan (d 1721), was a captain of Voronkiv company (1687) and general flag-bearer under I. Mazepa and I. Skoropadsky (1708–21). Ivan's son, Semen (d 27 May 1766), was colonel of Pereiaslav regiment (1739–66). Semen's sons included Yakym (1737–1818), a general judge in Chernihiv (1797–1818), and Khrystofor (d 18 May 1813 in the Transfiguration Monastery in Kharkiv), the bishop of Teodosiia and Mariupol (1791–9) and then of Kharkiv (1799–1813). Their nephew, Mykola (b 12 December 1777, d 21 October 1840), was colonel of the Izmail Regiment (1803), a major general (1812–16), governor-general of eastern, then western, Siberia (1834–6), and a member of the Military Council (1836). The Russian revolutionary and anarchist theoretician P. Kropotkin (1842–1921) was related to the family through the female line. The family archive was published in part by O. Lazarevsky in *Sulimovskii arkhiv: Famil'nye bumagi Sulim, Skorup, i Voitsekhovichei XVII–XVIII vv.* (The Sulyma Archive: The Family Papers of the Sulymas, Skorupas, and Voitsekhovyches in the 17th–18th centuries, 1884).

A. Zhukovsky

Sulyma, Ivan, b ? in Rohoshchi, Chernihiv region, d 12 December 1635 in Warsaw. Hetman of the Zaporozhian Cossack host in 1628–9 and 1630–5. A member of the petty gentry, he served as an estate manager for the Polish magnate S. Zółkiewski and his heirs, the Daniłowicz family, in the Pereiaslav region. For that service the villages of Sulymivka, Kuchakiv, and Lebedyn were placed under his control in 1620. He later left for the Zaporozhian Sich, where he was first elected hetman in 1628. He took part in several campaigns against the Crimea and Turkey and received a golden portrait medal from Pope Paul V in recognition of his efforts. While returning with an army of non-registered Cossacks from a campaign against Turkey in August 1635, he laid waste the Polish fortress of Kodak, which had recently been built on the Dnieper River to contain the Cossacks, and killed all of its German mercenaries and its commander. A group of registered Cossacks, wishing to curry favor with Commonwealth officials, subsequently handed over Sulyma, along with other members of the Zaporozhian leadership, to the Poles. The hetman was executed in Warsaw.

Sulyma, Mykola, b 27 August 1892 in Huliai-Pole, Zmiiv county, Kharkiv gubernia, d ? Linguist. A professor at the Kharkiv Institute of People's Education in the 1920s and early 1930s, he played a role in the establishment of Standard Ukrainian syntactic norms. He wrote a survey history of Ukrainian literature (1923), a brochure (1927) and lectures (1928) on the history of the Ukrainian language, a book on Ukrainian phrases (1928), and articles on Ukrainian syntax, word formation, phraseology, and vocabulary and on the language of T. Shevchenko, Lesia Ukrainka, A. Teslenko, and M. Khvylovy. Accused in 1934 of propagating 'Ukrainian bourgeois nationalism in syntax,' he was arrested and either shot or sent to a concentration camp, where he perished.

Sulyma, Tetiana (Bichikhina), b ca 1863 in Novopavlivka, Pavlohrad county, Katerynoslav gubernia, d ? Writer and actor. While studying in Kharkiv she began writing in Russian (her first story appeared in *Iuzhnyi krai* in 1884)

but switched to Ukrainian under the influence of her mentors, Ya. Shchokoliv, Kh. Alchevska, and A. Yefymenko. Sulyma's play *Diachykha* (The Precursor's Wife) was first staged in Katerynoslav in 1888; it proved popular and was also performed in Kharkiv, Poltava, towns and villages in Katerynoslav, Poltava, and Chernihiv gubernias, New York City, and several Russian towns. After the Revolution of 1905 her stories appeared in *Ridnyi kraj*, *Svitova zirnytsia*, and *Selo*. Published separately were *Diachykha* (1908), the ethnographic comedy *Na imenyakh* (At the Name Day Celebration, 1909), and a collection of six stories, *Narodni opovidannia* (Folk Tales, 1911).

Sulymenko, Petro, b 29 July 1914 in Katerynodar (now Krasnodar), Kuban. Painter. In 1947 he graduated from the Kiev State Art Institute, where he studied under O. Shovkunenko. Many of his paintings deal with the Second World War and the Black Sea. They include *Flag of Victory* (1949), *Black Sea* (1953), *Sevastopol Is Ours!* (1960), *Sailors of October* (1963), *Immortality* (1975), the diptych *War and Peace* (1981), *Dockers at Rest: Rangoon*, and *Pearl Divers*.

SUM. See Ukrainian Youth Association.

Sumac (*Rhus*; Ukrainian: *sumakh*). Shrubs and small trees of the cashew family Anacardiaceae, native to subtropical and warm temperature regions. In Ukraine one species grows in the wild, on rocky slopes in the Crimea and Caucasia – tanning sumac (*R. coriaria*). It is a valuable plant in that it yields tanning and medicinal reagents as well as some dyes. Staghorn sumac (*R. typhina*; Ukrainian: *otstove derevo*), smoke tree (*R. cotinus*; Ukrainian: *skumpiia, raide-revo*), and *R. javanica* are cultivated as ornamental trees.

SUMK. See Canadian Ukrainian Youth Association.

Sumny, Semen [Sumnyj], b 2 August 1897 in Letychiv, Podilia gubernia, d 9 March 1960. Writer. He graduated from the Kherson Institute of People's Education (1924). He published collections of prose, short stories, and novellas, such as *Shliakhom novitim* (Path of the New Age, 1927), *Vohni Donbasu* (Donbas Fires, 1929), *Pershyi ispyt* (The First Examination, 1931), *Peremozhena zemlia* (The Conquered Earth, 1931), *Nad Dniprom* (By the Dnieper, 1938), *Molodist' Teslenka* (The Youth of Teslenko, 1940), and *V Karpatakh* (In the Carpathians, 1945).

Sumtsov, Mykola [Sumcov], b 18 April 1854 in St Petersburg, d 12 September 1922 in Kharkiv. Folklorist, ethnographer, literary scholar, and civic figure; full member of the Shevchenko Scientific Society from 1908 and the All-Ukrainian Academy of Sciences from 1919, and corresponding member of the Russian Academy of Sciences from 1905. After graduating from Kharkiv University (1875) he studied in Germany and from 1878 lectured on Russian literature at Kharkiv University. For many years he was secretary (1880–96) and president (1897–1919) of the *Kharkiv Historical-Philological Society and director of the university's ethnography museum (1904–18).

Sumtsov's major area of interest was ethnography, particularly folklore. An adherent of the mythological school, he moved, gradually at first, toward a comparative method which drew heavily upon philology. His major ethnographic works include *Khleb v obriadakh i pesniakh* (Bread in [Folk] Rituals and Songs, 1885); articles in *Kiev-*

Mykola Sumtsov

skaia starina on carols (1886), cultural experiences (1889–90), Easter eggs (1891), and contemporary 'Little Russian' ethnography (1892, 1896); *Razyskaniia v oblasti anekdoticheskoi literatury* (Research in the Field of Anecdotal Literature, 1898); *Ocherki narodnogo byta* (Sketches of Folk Life, 1902); and *Slobozhane: Istorychno-etnohrafichna rozvidka* (The Slobidska Ukrainians: A Historico-Ethnographic Study, 1918).

He regarded his articles on I. Vyshensky, L. Baranovych, I. Galiatovsky, and I. Gizel (in *Kievskaiia starina*, 1884–5) as contributions to a systematic history of Ukrainian literature. Later he wrote articles on T. Shevchenko (1898, 1902, 1906, 1913, 1918), I. Kotliarevsky (1897, 1905), P. Kulish (1919), M. Starytsky (1908), I. Manzhuza (1893), I. Franko (1906), B. Hrinchenko (1906), O. Oles (1906, 1909), and O. Potebnia (1887, 1892, 1922). Sumtsov is known for popularizing Ukrainian culture through works such as his anthology of Ukrainian literature (1922). Following the 1905 Revolution he was the first professor at Kharkiv University to lecture in Ukrainian. He was a founder of the Kharkiv Public Library and a supporter of literature for the people.

P. Odarchenko

A view of Sumy, with the Transfiguration Cathedral (1788) in the center

Sumy. III-15. A city (1990 pop 296,000) at the confluence of the Psol and the Sumka rivers and an oblast center. It was founded in 1652 by peasants and Cossacks from Bila Tserkva regiment in Right-Bank Ukraine led by H. Kondratiev. The new settlement was soon fortified by the Muscovite voivode K. Arsenev (1656–8) to protect the ter-

ritory from the Tatars. Located on the Putyvl–Moscow trade route, the town prospered. In 1660–1732 its population grew from 2,700 to 7,700. It was the center of Sumy regiment (1658–1765) and the seat of administration for all the regiments of Slobidska Ukraine (1732–43). Then it became the center of Sumy province of Slobidska Ukraine gubernia (1765–80) and a county center in Kharkiv vicegerency (1780–96), Slobidska Ukraine gubernia (1796–1835), and Kharkiv gubernia (1835–1923). By the mid-19th century Sumy was a well-established industrial and trading town: it had a glass factory (est 1710), three tanneries, a coach works, four brick factories, four candle works, a soap factory, and four major fairs a year. In 1732 it had five schools. A state-funded school opened in 1790 was reorganized as a county school in 1806 and provided with a library in 1834. The first theater was established in 1806. In the second half of the 19th century the town's industrial base grew rapidly. In 1869 a sugar refinery was built, and Sumy became a major center of the sugar industry. The construction of the Vorozhba–Merefa railway line stimulated the development of the machine-building and metalworking industries. In 1891 a machine-building plant and in 1896 a sugar machinery plant were built. The trade in food products and metal goods expanded greatly. The town's population increased from 10,300 in 1850 to 27,600 in 1897 and 50,400 in 1913.

In the Soviet period Sumy was an okruha center (1923–30), a raion center of Kharkiv oblast, and then an oblast center (from 1939). In 1926 its population was only 44,000 (80.7 percent of it Ukrainian, 11.8 percent Russian, and 5.5 percent Jewish). By 1939 the population had reached 63,900. In the 1930s the existing plants were expanded, and an electric machinery plant was set up. A pedagogical institute and several *tekhnikums* were opened. Rapid industrial expansion began in the 1950s: a furniture factory, a superphosphate plant, two reinforced-concrete plants, and an electron microscope plant were brought into operation. The population had reached 98,000 by 1959 and 159,000 by 1970. Today Sumy is one of the chief industrial and cultural centers in northern Ukraine. Its main industries are machine building (to which belong the Machine-Building Manufacturing Consortium and the Electron Microscope Plant), the chemical industry (the Khimprom Manufacturing Consortium and a resins plant), the food industry (a distillery, a sugar refinery, and meat- and fish-processing plants), light industry (footwear, woolen-cloth, and clothing factories), and the construction-materials industry. The city has 12 vocational schools and 9 specialized high schools, a pedagogical institute, a branch of the Kharkiv Polytechnical Institute, and a branch of the Kharkiv Agricultural Institute. It is the home of two research and design institutes, one specializing in compression machinery and the other in pumps for nuclear and thermal power stations. Its cultural facilities include an art museum, a museum of decorative and applied art, a regional museum, a theater of drama and musical comedy, and a young spectator's theater. The main architectural monuments are the guildhall (17th century), the Church of the Resurrection (1702), the Cathedral of the Transfiguration (1776–88), and St Elijah's Church (1836–51).

V. Kubijovč

Sumy Art Museum (Sumskyi khudozhnii muzei). A museum established in 1920 in Sumy on the basis of nationalized private art collections. The first director was N.

*Onatsky. Until 1939 it was called the Sumy Art and History Museum. The museum was moved to a new building in 1978. It contains over 11,000 objects, divided among its departments of Ukrainian and Russian prerevolutionary art, Western European art, Soviet art, and, in the former Church of the Resurrection, decorative and applied art. Its collection contains works by painters such as V. Borovykovsky, I. Aivazovsky, T. Shevchenko, I. Sokolov, D. Bezperchy, M. Pymonenko, P. Levchenko, S. Vasylykivsky, N. Onatsky, S. Svitoslavsky, I. Repin, A. Kuindzhi, F. Krychevsky, M. Samokys, I. Trush, K. Trokhymenko, O. Shovkunenko, O. Bohomazov, P. Volokydin, M. Burachek, I. Hrabar, H. Svitlytsky, T. Yablonska, P. Sulymenko, H. Melikhov, M. Manizer, and M. Hlushchenko. The collection of decorative and applied art includes sets of *Mezhyhiria* porcelain and wares from A. Myklashevsky's factory in Volokytna. A branch of the museum is located in Lebedyn. The I. Kavaleridze Sculpture Gallery was established recently as a department of the museum. Albums of works in the museum were published in Kiev in 1981 and 1988.

Sumy Electron Microscope Plant (Sumskyi zavod elektronnykh mikroskopiv). A factory of the equipment-building industry, established in Sumy in 1959. It produces a wide range of microscopes used in scientific research and in automated manufacturing, including microscope controls for welders and lathes. The plant also produces mass spectrometers.

Sumy Khimprom Manufacturing Consortium (Sumske vyrobnyche obiednannia Khimprom). A chemical enterprise located in Sumy. It was founded in 1975 on the basis of a chemical plant that had been established in 1954 to produce superphosphates. It now produces over 40 items, including sulfuric acid, phosphate fertilizers, feed supplements, paints, and pigments. In 1971 the plant employed over 1,500 workers.

Sumy Machine-Building Manufacturing Consortium (Sumske mashynobudivne vyrobnyche obiednannia). A chemical machine-building enterprise founded in 1976 in Sumy. It is based on a plant originally built in 1896 to produce equipment and machinery for the sugar-beet, distilling, mining, railroad, and other industries. In 1926 the factory was rebuilt, and in 1930 it became the first factory in the USSR to produce equipment for the chemical industry. Previously that kind of equipment had been imported. In 1933 it built the first high-pressure compressor. After the Second World War it became one of the largest chemical machine-building plants in the USSR. Now it builds processing lines for the manufacture of chemical fertilizers, machines for extracting ethylene and propylene from petroleum and coal gas and helium from natural gas, centrifuges, various pumps and compressors, and other machines and equipment. In the 1970s the factory employed over 3,500 workers.

Sumy oblast. An administrative territory (1989 pop 1,433,000) in northeastern Ukraine, formed on 10 January 1939. It covers an area of 23,800 sq km and is divided into 18 raions, 15 cities, 355 rural councils, and 21 towns (smt). The capital is *Sumy.

Physical geography. Most of the oblast lies in the Dnieper Lowland; only the northern part is in eastern

Polisia. A spur of the Central Upland runs along its eastern and northeastern boundaries. The landscape is a rolling plain, dissected by valleys, ravines, and gorges. The southern part of the oblast lies in the forest-steppe zone and is covered by chernozems with a low humus and a moderate loam content. The forested northern part has soddy podzolized soils characteristic of Polisia. The oblast's climate is temperate continental: the average January temperature in the north is -8°C and in the south -7.3°C , and the average July temperature is 18.6°C and 20°C , respectively. The growing season is 188 to 196 days. In the north the annual precipitation is 530–600 mm, and in the south, 460–520 mm. The main rivers include the Desna, the Seim, the Psol, and the Vorskla. The natural steppe vegetation has been displaced almost everywhere by cultivated crops. Forests (mainly pine, birch, and oak in the north and linden, maple, ash, and oak in the central and southern reaches) constitute 17 percent of the oblast's territory. The oblast supports about 150 nature reserves of different kinds and sizes, including the Mykhailivka Virgin Soil Preserve and the Trostianets Dendrological Park. It is rich in natural resources, such as oil, gas, peat, and coal.

History. The territory of the present-day oblast was settled as early as the Paleolithic period. In the 9th to 11th centuries it belonged to Kievan Rus', and in the 11th to 13th centuries, to Chernihiv and Siversk principalities. It was under Tatar control until the mid-14th century, when the Grand Duchy of Lithuania expanded into the region. In the 16th century the southern and western parts of the oblast came under Polish control, and the northern parts (notably Putyvl) fell under Russian control. After B. Khmelnytsky's uprising the northern and western reaches of the Sumy region became part of the Hetman state (Nizhen and Lubni regiments), and the southern and eastern areas became part of Slobidska Ukraine (Sumy and Okhtyrka regiments). In 1802 the region was divided among Chernihiv, Poltava, and Slobidska Ukraine (from 1835 Kharkiv) gubernias. When the gubernias were abolished in 1925, the territory of the present-day oblast was divided among Sumy, Kharkiv, and Romen okruhas.

Population. According to the 1989 census, Ukrainians account for 85.5 percent of the oblast's population, and Russians, for 13.3 percent. A decade earlier the respective figures were 87.2 and 11.7 percent. About 62 percent of the population is urban. The population density in the central and southeastern areas is higher than in the swampy north. The largest cities are Sumy, *Konotip, *Shostka, *Romen, and *Okhtyrka.

Industry. The oblast's main industries are food processing (31.2 percent in 1989), machine building and metalworking (25 percent), petroleum and chemicals manufacturing (22.4 percent), and light industry (9 percent). The largest branches of the food industry are sugar refining (in Sumy, Druzhba, Chupakhivka, Mezenivka), meat packing (Sumy, Shostka, Okhtyrka, Vorozhba, Lebedyn, Hlukhiv), and flour milling (Sumy, Konotip, Shostka, and Okhtyrka). The chief plants of the machine-building and metalworking industries are in Sumy (equipment for the chemical industry, electron microscopes, pumps, heavy compressors), Konotip (fittings and automated equipment for the mining industry, pistons, and locomotive repair), Romen (printing machinery), Hlukhiv (electrical machinery), and Svesa (pumps). The largest chemical enterprises are in Shostka (film and mag-

netic tape, chemical reagents) and Sumy (fertilizers, sulfuric acid, petrochemicals). Enterprises of light industry include textile factories in Sumy and Hlukhiv, clothing factories in Sumy, Okhtyrka, Lebedyn, Romen, and Konotip, and footwear plants in Sumy, Okhtyrka, and Romen. The chief centers of the lumber and woodworking industries are Sumy, Shostka, Trostianets, Romen, and Okhtyrka. The building-materials industry is based on local deposits of kaolin, chalk, and clay.

Agriculture. The value of the oblast's agricultural output in 1990 was estimated at 1,908 million rubles (in 1983 prices, or 3.9 percent of that of Ukraine). In 1985, 320 collective farms and 71 state farms controlled 1,734,000 ha of land. Of that area 81.6 percent was cultivated, 9.4 percent was hayfield, and 8 percent was pasture. A total of 25,400 ha were irrigated, and 88,700 ha were drained. The main crops were grains (winter wheat, barley, rye, buckwheat), industrial crops (sugar beets and sunflowers), potatoes, hemp, flax, vegetables, and feed. Animal husbandry consists largely of dairy- and beef-cattle raising and pig farming. In 1990 the oblast produced 160,000 t of meat.

Transportation. In 1989 there were 823 km of railroads in the oblast. The main lines are Kiev–Moscow, Kiev–Kharkiv, Minsk–Kharkiv, Riga–Kharkiv, and Vorozhba–Kursk and the major junctions are Konotip, Vorozhba, and Khutir Mykhailivskiyi. There were 6,800 km of highway, 4,900 of which were paved. The main highways crossing the oblast are Kiev–Orel–Moscow, Kiev–Sumy–Kursk, and Sumy–Kharkiv. There is an airport in Sumy. The Urengoi–Uzhhorod gas pipeline runs through the oblast.

Istoriia mist i sil URSR: Sums'ka oblast' (Kiev 1973; Russian edn 1980)

Sumy Pedagogical Institute (Sumskiyi pedahohichnyi instytut im. A. Makarenka). An institution of higher learning, under the jurisdiction of the Ministry of Education. Founded in 1924 as an institution offering higher pedagogical courses, it became a *pedagogical tekhnikum in 1925 with the rights of a higher pedagogical institution. In 1930 it was transformed into one of the *institutes of social education, and in 1933 it became a pedagogical institute. It was named after A. Makarenko in 1955. The institute has seven faculties: philology, physics-mathematics, musical education, English and German language, history, natural sciences, and physical education. The student enrollment in 1988–9 was over 7,000. The institute has a research library of over 250,000 volumes.

Sumy regiment. An administrative territory and military formation in Slobidska Ukraine, settled by peasants and Cossacks from Right-Bank Ukraine. It was formed by the Russian authorities in 1658 to protect Russia's southern flank from attacks by Crimean and Nogay Tatars. By 1732 the regiment had a population of 86,000, including 3,700 elect Cossacks and 13,900 Cossack helpers, and was divided into 20 companies. The regiment took part in the Chyhyryn (1677, 1678), Crimea (1687, 1689), and Azov (1695–6) campaigns against the Tatars, the Northern War, and the Seven Years' War. It was abolished in 1765, and its territory was incorporated into Slobidska Ukraine gubernia.

The Sumy Regional Studies Museum

Sumy Regional Studies Museum (Sumskyi kraieznavchyi muzei). A museum founded in 1920 as the Sumy Art and History Museum. In 1939 it and the *Sumy Art Museum became independent institutions. In 1971 the museum's three exhibit sections – natural science (geology, flora, fauna), pre-Soviet history (including archeology, ethnography, and numismatics), and Soviet society – contained over 10,000 artifacts from the Sumy region, and its library contained over 12,000 volumes. The Okhtyrka and Putyvl regional museums, the Anton Chekhov Building and Memorial Museum in Sumy, and the Museum of Partisan Glory in the Spadshchanskyi Forest are branches of the museum. A guide to the museum was published in 1976.

Sumy Theater of Drama and Musical Comedy (Sumskyi teatr dramy i muzychnoi komedii). A theater established in Lubni in 1933 on the basis of the Kharkiv Workers' and Collective-Farm Theater. In 1939 it was moved to Sumy and renamed the Sumy Ukrainian Music and Drama Theater; it acquired its present name in 1980. During the war it worked in Central Asia, and in 1944 it returned to Sumy. Its repertoire has included Ukrainian and world classics by dramatists such as M. Kropyvnytsky, M. Starytsky, O. Korniiuchuk, Euripides, and W. Shakespeare. In 1984 its artistic director was I. Ravvitsky.

Sunday schools (*nedilni shkoly*). Private educational institutions for minors and adults who, because of work, could not attend regular schools. In Ukraine the first Sunday school opened in Poltava in 1858, and another in Kiev in October 1859. Eventually there were 5 in each of Kiev, Poltava, and Odessa, and schools in Kharkiv, Chernihiv, Nizhen, Yelysavethrad (Kirovohrad), and some larger vil-

The Women's Sunday School in Kharkiv. The teacher is Khrystyna Alchevska.

lages; in 1859–60 there were 68 altogether. Eventually some 111 Sunday schools operated in Ukraine. Members of the intelligentsia acted as instructors in the schools. The language of instruction was Ukrainian, a measure agreed to in Kiev by the warden of the Kiev school district, N. Pirogov, although in some schools, because of the lack of proper instructional materials, both Ukrainian and Russian were used. Teaching material included T. Shevchenko's primer *Bukvar' iuzhnorusskii* (South Russian [Ukrainian] Primer, 1861) and P. Kulish's *Hramatka* (Grammar, 1857). Several well-known personalities took an active part in the school movement – Khrystyna *Alchevska, V. *Antonovych, M. *Drahomanov, O. *Konysky, V. *Loboda, Ye. *Myloradovych, D. *Pylchikov, A. *Svydnytsky, and P. *Chubynsky, all of whom taught in the schools. M. Kostomarov and P. Pavlov were also active participants, although they did not teach. Classes lasted from one to three hours every Sunday, and the instructors usually divided their time between those with some education and those without. The subjects of study, according to the 1861 laws, were religion, reading and writing, arithmetic, and drawing. In 1862 the tsarist authorities closed the schools. They were reopened in 1864, but with heavy restrictions. Sunday school activists in Poltava experienced repression and even exile over their participation in the schools. Among the exiled were Konysky, Loboda, V. Shevych, and O. Stronin. Sunday schools were founded for a second time in the 1870s, but these schools were supported by the local *zemstvos and by the church, which in 1891 gained complete control over all Sunday schools.

O. Skrypnyk

Sundew (Ukrainian: *rosychka, rosianka*). Insectivorous, flowering plants of the family Droseraceae, usually of the genus *Drosera*. Their leaves are covered with sticky glandular hairs that entrap insects and decompose them. Of the 100 species of sundew, 3 grow in Ukraine, mostly in boggy soil – *D. rotundifolia*, *D. anglica*, and *D. intermedia*. Sundew extracts have been used in folk medicine to treat whooping cough, chronic bronchitis, asthma, and arteriosclerosis. The Venus's-flytrap is the most famous sundew.

Sunflower (*Helianthus annuus*; Ukrainian: *soniashnyk*). A plant of the family Asteraceae, native to the Americas, and brought to Europe by the Spaniards in the early 17th cen-

ture. By the mid-18th century it had been introduced in Ukraine. Today sunflower represents the principal *oil plant in the Ukrainian economy and Ukrainian agriculture. Of arable land designated for *industrial crops, 42 percent is devoted to sunflower (the second industrial crop after sugar beets); this land makes up 93 percent of the land surface devoted to the *vegetable-oil industry.

Ukraine produces approx 37 percent of the former USSR's and 19 percent of the world's sunflower. The average yield amounts to 1.2 to 1.5 t of seeds per ha and 80 to 100 t of greens. Sunflower seeds yield 47 to 67 percent oil. In addition to oil and seeds for direct food consumption (the seeds are the most popular chewing snack food in Ukraine), sunflower yields oil cakes and seed meal (high in protein) and so provides valuable fodder for farm animals. Potash is obtained from the ashes of burned greens.

There are four principal varieties of sunflower in Ukraine: fine-seed sunflower for oil production, large-seed sunflower for direct consumption, giant-fodder sunflower, and American long-seed sunflower. They are planted in crop rotation after cereal, corn, or other plants which do not use water from deep soil layers, since the sunflower's root system extends 2–3 m deep into the ground. The following brands are favored: VNYI MK 1646, 6540, and 8931; Armavir 3497; Zelenka 368; Peredovyk; and Maiak. In addition to the commercial variety, the ornamental sunflower, a good nectar bearer, is planted widely. The ubiquitous presence of the sunflower in the villages and countryside of Ukraine has made it an unofficial national symbol. It appears as such (woodcut by J. Hnizdovsky) on the cover of the *Encyclopedia of Ukraine*.

I. Masnyk

Supii River [Supij]. A left-bank tributary of the Dnieper River that flows for 144 km through Chernihiv, Kiev, and Cherkasy oblasts before emptying into the Kremenchuk Reservoir. It drains a basin area of 2,160 sq km. It is 2–8 m wide in its upper reaches (up to 20 m in its lower course) and has a valley 1.3–3 km wide. Fed mainly by meltwaters, the river is used for industry, water supply, and irrigation. It is also fished, and forms a key part of the Supii drainage system. The city of Yahotyń is situated on it.

Suprasl Chronicle (Suprasl'skiy litopys). A collection of texts assembled in the late 15th or early 16th century in Belarus, found in the Suprasl monastery near Białystok (now in Poland). It describes events from the 9th century to 1515. It includes the Short Novgorod Chronicle (which deals with events from ancient times to 1382) and the Short Kievan Chronicle (which covers the period 862–1515). The first section is a compilation of histories of Rus' before 1500, and the second, written by an unknown contemporary author, provides a detailed account of events in 1480–1512 (including the Tatar destruction of Kiev in 1482, Tatar attacks on Volhynia in 1491 and 1496, and Mykhailo Olelkovych's plot against Lithuania in 1481), a lengthy description of the Battle of Orsha (1514), and a panegyric to Prince K. Ostrozky, who defeated the great prince of Muscovy, Vasili III, in that battle. It concludes with a statement dated 1543. The chronicle was first published by M. Obolensky as *Suprasl'skaia rukopis' soderzhashchaia Novgorodskuiu i Kievskuiu sokrashchennyie letopisi*

(The Suprasl Manuscript Containing the Novgorod and Kievan Abbreviated Chronicles, 1836).

Suprasl Lexicon. A 4,000-word Church Slavonic–Polish dictionary titled *Leksykon syrech slovesnyk slavenskii* (Lexicon or Slavonic Glossary) that was printed in 1722 at the Basilian monastery in Suprasl near Białystok, Poland. It was intended for use by the clergy. Its Church Slavonic content was based almost entirely on P. *Berynda's lexicon. Its Serbian-Bulgarian orthography was modernized, however, stresses were changed, and Volhynian-Polish pronunciation was introduced (eg, the confusion of *rě/ry/ri/rbi, rja/ra, bi* with *y/i*, and *ě* with *y*). As a result, erroneous Polish versions of Berynda's Ukrainian definitions of words occurred. The lexicon was reprinted with few changes as an appendix in a book on moral theology in Pochaiv in 1751 and 1756, and separately in 1804. It was used by Y. *Levytsky in the compilation of his Slavonic-Polish dictionary (1813).

Suprematism. The first modern purely geometric and nonfigurative style of painting, launched by K. *Malevich in 1915. At first it was a one-man style: Malevich attracted new proponents only in 1919, from among his students at the Vitsebsk Institute of Fine and Applied Art in Belarus. They included I. Chasnik, E. Lissitsky, and N. Suetin. Suprematism began waning in the mid-1920s as Malevich and his disciples shifted to *constructivism. In the late 1920s, under state pressure, Malevich and other painters abandoned suprematism altogether and returned to a figurative style. In its purest form suprematism had little direct influence on Ukrainian avant-garde art. Applied suprematist design and topographic ideas, however, influenced the development of the constructivist styles of artists such as V. Yermilov.

Supreme Attestation Commission (Vyshcha atestatsiina komisiia). An all-Union organ of the Council of Ministers of the USSR which conferred all advanced education degrees and academic appointments in all branches of scholarship. Established in 1932, it began its functions in 1934 as a unit of the USSR Ministry of Higher and Secondary Special Education, and in 1975 was transferred directly to the Council of Ministers. The commission gave the Moscow center control over higher education in Ukraine and other republics. It granted permission to higher educational establishments and research institutes to engage in advanced training and to conduct public defense of dissertations for an advanced degree. It reviewed the decisions of these establishments as to the awarding of candidate's degrees and itself decided the awarding of doctoral degrees as well as appointments to advanced academic rank. It designated the fields in which each institution could conduct advanced degree training and accept dissertations. It could also revoke an advanced degree or advanced rank certification. In addition the commission was a central office where personnel files on all recipients of advanced degrees and all advanced academic teaching and research personnel were kept and processed for appointment, transfer, or reappointment purposes. In Ukraine the commission was seen as a major agency of censorship, political control over higher education, and *Russification. (At its insistence, for example, doctoral dissertations had to be written in Russian.) With the assertion of the sovereignty of non-Russian republics in recent

years, the commission's authority has been challenged. The Baltic republics, for example, no longer recognize the commission's jurisdiction over higher education. The *Popular Movement of Ukraine advanced a similar demand in its program adopted in 1989. In February 1992 the Ukrainian government created the Ukrainian Supreme Attestation Commission. I. *Dziuba was appointed its chairman.

Supreme Council of the National Economy (*Vyshcha rada narodnoho hospodarstva*, or *VRNH*). The leading republican agency which planned and guided the economy of Soviet Ukraine. In early 1918, during the first attempt to establish a Bolshevik regime in Ukraine, a Southern Council of the National Economy was formed. In January 1919 a Ukrainian Council of the National Economy was created and modeled after the Russian Supreme Council of the National Economy (*Vesenkha*). Its chairmen were E. Kviring and the Borotbist M. Poloz. Under the leadership of V. *Chubar a stable institution was formed in January 1920, named the Organizing Bureau for the Reconstruction of Industry (*Prombiuro*). On 31 December 1920 it was renamed the Supreme Council of the National Economy, and began to play an assertive and independent role in the administration of the economy. Its independence from the all-Union *Vesenkha* was formalized when the USSR was formed in 1922. In August 1926, central administrations for various branches of industry were established in the *Vesenkha*, and investment decisions for those branches were centralized. Under the new arrangement the *VRNH* ceased to participate in the preparation of control figures for Union enterprises in Ukraine. In 1932 another step in centralizing economic control was taken: the *Vesenkha* and the *VRNH* were abolished and replaced by people's commissariats of heavy and light industry. Heavy industry became the exclusive responsibility of the All-Union Commissariat of Heavy Industry. The *VRNH* was therefore succeeded only by the People's Commissariat of Light Industry of the Ukrainian SSR.

*Regional economic councils (*sovmarkhozy*) were created in 1957 as part of N. Khrushchev's attempt to decentralize the economy. Ukraine had 11, and later 14, such councils, which were subordinated to a republican Council of the National Economy in 1960. During that period 97 percent of gross industrial production was under the operational control of republican authorities, as opposed to only 36 percent in 1953. Ukrainian economists considered the period to be one of balanced growth with lower transportation costs, greater interbranch co-ordination, and higher spending on social and cultural projects. The central authorities, however, were dissatisfied with the council's tendency to favor republican over Union orders for supplies. In 1963 the *sovmarkhozy* were turned into Union-republican organs subject to increasing interference from the all-Union State Planning Committee and the Central Administration of Material and Technical Supplies. They were abolished in 1965 and replaced by a sectoral system of economic management.

B. Somchynsky

Supreme Court of the Ukrainian SSR (*Verkhovnyi sud Ukrainskoi RSR*). The highest court in Ukraine, established on 16 December 1922. It consisted of the chief justice, the deputies of the chief justice, several members, and

*people's assessors, who were elected to a five-year term by the Supreme Soviet of the Ukrainian SSR (in fact by its presidium). The court dealt with exceptionally grave criminal cases, administrative crimes of senior officials, and civil suits between state institutions of republican stature; reviewed the decisions of lower courts; and oversaw the operation of the court system. It was divided into two collegia, the criminal and the civil, whose decisions were reviewed by the court's presidium. Decisions of the Ukrainian Supreme Court could be appealed to the Supreme Court of the USSR.

Supreme Criminal Appeal Court of the Ukrainian SSR (*Verkhovnyi kasatsiyni sud URSR*). A Soviet judicial body established 16 April 1919 to review appeals against sentences passed by revolutionary tribunals. The appeal court was under the jurisdiction of the People's Commissariat of Justice and consisted of the chief judge and four members. It could annul the decisions of the tribunals and order retrials, or retry cases itself. In 1921 it was transformed into the Supreme Appeal Tribunal of the All-Ukrainian Central Executive Committee and shortly thereafter merged with the *Supreme Revolutionary Tribunal of the All-Ukrainian Central Executive Committee to form the Unified Supreme Tribunal of the Ukrainian SSR, which at the end of 1922 was abolished and replaced by the Supreme Court of the Ukrainian SSR.

Supreme Emigration Council (*Holovna emigratsiina rada*; or *Ukrainska holovna emigratsiina rada*). A federation of Ukrainian émigré organizations in Europe, established in Prague in 1929 for the purpose of representing Ukrainian interests at international forums (particularly the League of Nations) and for co-ordinating the political activities of émigré circles. Its membership consisted of 11 organizations: the Ukrainian hromadas in Belgium, Bulgaria, Luxembourg, Turkey, and Yugoslavia; the Ukrainian Central Committee in Poland; the Ukrainian Relief Committee in Rumania; the Ukrainian Alliance and the Ukrainian Republican-Democratic Club in Czechoslovakia; and the Union of Ukrainian Emigré Organizations and the Society of Former Combatants of the Ukrainian Republican Democratic Army in France. The council's head office was in Paris. Its presidents were O. Lototsky (1929-32) and O. Shulhyn. Other prominent figures included M. Slavinsky, Gen O. Udovychenko, I. Kosenko, and M. Kovalsky. The council was influenced strongly by the UNR government-in-exile.

Supreme otaman (*holovnyi otaman*). The title of the commander in chief of all Ukrainian armed forces adopted by the Directory of the UNR. On 13 November 1918 S. *Petliura was elected to the office. The Ministry of Defense, which was set up at that time and headed by Gen O. Hrekov, was placed under the jurisdiction of the supreme otaman. During the uprising against the Hetman government the insurgent army was commanded by Gen O. Osetsky as *acting otaman. On 11 August 1919, after the Army of the UNR united with the Ukrainian Galician Army, command of the joint forces was given to the Staff of the Supreme Otaman, headed by Gen M. Yunakiv. Petliura remained supreme otaman until his death.

Supreme Revolutionary Tribunal of the All-Ukrainian Central Executive Committee (Verkhovnyi revoliutsiynyi trybunal pry VUTsK). A Soviet judicial body established 15 April 1919 to deal with the gravest cases of counterrevolutionary activity referred to it by the Central Executive Committee, the Council of People's Commissars, and the People's Commissariat of Justice. Its decisions were final. From April 1921 the tribunal helped the newly formed Supreme Appeal Tribunal direct and oversee the work of all the revolutionary tribunals in Ukraine. In June 1921 the two tribunals were merged to form the Unified Supreme Tribunal of the Ukrainian SSR, which in 1922 was replaced by the Supreme Court of the Ukrainian SSR.

Supreme Ruthenian Council (Holovna ruska rada, or HRR). The first legal Ukrainian political organization in modern times, founded in May 1848 in Lviv. The HRR was established in direct response to the *Revolution of 1848–9 in the Habsburg monarchy, in particular to the formation in Galicia of the Polish People's Council (the Rada Narodowa), which declared itself the representative political body for the province. The emergence of the HRR in turn prompted the creation of yet another council, the pro-Polish *Ruthenian Congress (Sobor Ruskyi).

Encouraged by the Austrian governor of Galicia, Count F. *Stadion, over 300 Ukrainians representing various social groups (except the peasantry) met on 2 May at the chancery of St George's Cathedral under the leadership of the Greek Catholic clergy headed by Canon M. Kuzemsky. They organized a council of 30 members (eventually increased to 66) and nominated Bishop H. Yakymovych as chairman. Membership in the HRR was restricted to Greek Catholics (almost exclusively Ukrainians) born in Galicia. Its social composition was dominated by the urban clerical and secular intelligentsia, nearly one-third of its members being Greek Catholic priests, one-third civil servants, and the remainder students, teachers, lawyers, and townsmen.

The purpose of the HRR was to strengthen the Ukrainian people in Austria by encouraging publications in Ukrainian, introducing the Ukrainian language in schools and the local administration, and defending the constitutional rights of Ukrainians. At the same time it served the parallel function of upholding the interests of the Greek Catholic clergy. From the outset the HRR was loyal to the Habsburg emperor and Austrian government and maintained close ties with Galicia's governor, Stadion. To promote its views the HRR founded on 15 May the newspaper **Zoria halytska*. The first issue contained a clear statement of the national orientation of the HRR: Galicia's Ukrainians were a nationality distinct from both Poles and Russians, and they belonged to 'the great Ruthenian nation' living across the border in the southwestern part of the Russian Empire. The sense of national unity with Ukrainians in the east was complemented by an awareness of a common historical past with its once-independent state and 'perfected language.'

The HRR encouraged Ukrainians to form smaller councils throughout Galicia. They came into being in the spring and summer of 1848, and before the end of the year there were 50 local councils as well as 13 district councils. The size of the local councils ranged from a dozen members to as many as 540. Unlike the HRR, the local councils

were made up primarily of peasants, and some included Polish and Jewish members as well as Ukrainians. Although the local and district councils had independent statutes, they maintained close ties with the HRR, whose representatives frequently participated in their meetings to present the political views of the central organization. The local councils were also a valuable transmission belt through which the HRR was able to learn the views and demands of the Ukrainian rural masses.

The HRR advised the local and district councils how to select candidates for elections to Austria's new national parliament in May 1848. Nonetheless, of the 25 Ukrainian deputies elected, not one was a candidate favored by the HRR. In late 1848 through 1849 the HRR issued several memorandums to the Austrian government on behalf of peasant demands for a favorable resolution of the rural and manorial land question.

Another primary concern of the HRR was the partition of Galicia into separate Ukrainian and Polish provinces. The council issued its first memorandum to the emperor on that matter in June 1848, and it continued to call for partition until its last statement on the issue in March 1849. The HRR was more successful in its request to establish a Ukrainian national guard in Galicia. The group was especially opposed to the revolution in Hungary, and in early 1849 it called on the people in Galicia's borderland districts to arm themselves and to join the newly established *Ruthenian Battalion of Mountain Riflemen.

The HRR also interacted with fellow Slavs. It sent three delegates, including its vice-chairman, I. Borysykevych, to participate in the Slavic Congress in Prague in June 1848. Although the HRR delegates disagreed with the protocol of the congress, which did not favor the partition of Galicia, their presence made the rest of the Slavic world aware of Galicia's Ukrainians.

The HRR played an active but indirect role in cultural matters. It encouraged the development of the Ukrainian vernacular through its official organ, *Zoria halytska*, by calling for its standardized use in publications, its use as a language of instruction in schools, and its use in Galicia's civil and Greek Catholic church administrations. To further cultural goals a new organization, the *Halytsko-Ruska Matytsia, came into being in October 1848. The HRR also supported the initiative of the Austrian government to create a chair of Ruthenian (Ukrainian) language and literature at the University of Lviv (September 1848).

From its inception the HRR combined work on behalf of the Ukrainians of Galicia with unswerving loyalty to the Austrian government. Such loyalty, however, proved insufficient protection in changing political circumstances. With the end of the revolutionary era in 1849 and the onset of Austrian neoabsolutism, the HRR again followed the wishes of the state authorities and dissolved itself in 1851. Nonetheless, throughout its four years of existence it had initiated a national revival among Ukrainians in Galicia which was to guarantee their political and cultural survival.

Supreme Socialist Inspection of Ukraine (Verkhovna sotsialistychna inspektsiia Ukrainy, or VSIU). A higher administrative body set up in January 1919 by the Provisional Workers' and Peasants' Government of Ukraine. The VSIU collaborated with the People's Commissariat of State Control (NKDK); both were headed by M. Skrypnyk. On 5 May 1919 it was reorganized into an independent agency, the People's Commissariat of Socialist Soviet Inspection of Ukraine, and placed under the supervision of Commissar A. Yoffe and his deputy, V. Menzhinsky. The Higher Administrative and Political Inspection, the Higher Military Inspection, the Higher National Economy Inspection, and the Higher Highways and Communications Inspection were all placed under the VSIU. Whereas the NKDK dealt primarily with economic affairs, the VSIU ensured that the general policies of the Party were adhered to by all government institutions. In 1920 the two agencies were superseded by a single body, the People's Commissariat of Workers' and Peasants' Inspection.

The building of the Supreme Council of Ukraine (formerly Supreme Soviet of the Ukrainian SSR)

Supreme Soviet of the Ukrainian SSR (Verkhovna Rada Ukrainskoi RSR). The highest governing and legislative body in Soviet Ukraine. It was created according to the Constitution of 1937 in place of the *All-Ukrainian Congress of Soviets on the model of the Supreme Soviet of the USSR. The Supreme Soviet had the authority to change the constitution of the Ukrainian SSR, to approve state plans for the economic and political development of the country, to enact legislation, to change administrative territorial borders, and to establish the budget. It also elected the *Council of Ministers and accepted its reports, and appointed judges to the *Supreme Court. The Supreme Soviet initially met only a few weeks a year; it elected a Presidium, consisting of a chairman, 3 deputy chairmen, a secretary, and some 20 members, to act in its place between sessions. The Presidium was delegated almost complete authority by the Supreme Soviet, although some decisions had to be ratified later by the entire Soviet. The chairman of the Presidium (and of the Supreme Soviet) was legally the head of state.

Deputies were elected on the basis of universal suffrage by all citizens of Ukraine over the age of 18 (earlier, 21)

through direct, secret balloting. The number of deputies increased from 435 (in 1955) to 650 (in 1977) but subsequently decreased to 450 (in 1990). Deputies were elected from electoral districts, each with approx 110,000 inhabitants. The Communist party exercised total control over the Supreme Soviet. Only the Party or organizations it controlled could nominate deputies for elections, which were not contested, and the Party faction in the Soviet dominated the proceedings. In response to the reforms initiated by M. Gorbachev, however, a new electoral law was passed by the Ukrainian Supreme Soviet in November 1989. It liberalized somewhat the nominating procedure (although Party-dominated local electoral commissions retained inordinate power) and permitted multiple candidates to stand for elections. Despite many irregularities and official interference, over 120 supporters of the Democratic Bloc, a loose coalition of some 40 groups opposed to the Communist party, were elected in March 1990. By 1991 the Supreme Soviet had emerged as the most important forum of the struggle for democratic change in Ukraine. After the collapse of Soviet rule in 1991, the Supreme Soviet was renamed the Supreme Council of Ukraine.

B. Balan

Supreme Ukrainian Council (Holovna ukrainska rada). A body established at the outbreak of the First World War, on 1 August 1914, in Lviv by the three main Galician parties, National Democratic, Ukrainian Radical, and Ukrainian Social Democratic. It was headed by K. Levytsky, and its purpose was to decide on the general direction of Ukrainian politics in the war period and to organize the Ukrainian Sich Riflemen. The council was active until 1915, when it was reorganized into the *General Ukrainian Council in Vienna.

Supriaha. A form of peasant co-operation in Ukraine, under which two or three peasant households shared their oxen or draft animals and plows. It was especially common in those parts of Ukraine where the soil was hard, and two or three pairs of animals were needed to pull a plow. Several peasant households contributed a pair of draft animals each and then assisted in the plowing. The practice declined with the introduction of tractors.

SUPROM. See Union of Ukrainian Professional Musicians.

SUPRUHA. See Union of Ukrainian Private Office Employees.

Suprun, Oksana, b 14 October 1924 in Uman, d 1 May 1990 in Kiev. Sculptor; daughter of H. *Petrashevych. In 1951 she graduated from the Kiev State Art Institute, where she studied under her mother and M. Helman. Working in bronze, wood, marble, and plaster, she sculpted works such as *Partisan Woman* (1951), *Friendship* (1954), *The Future* (1960), *Reflections* (1964), *The Field Princess* (1966-7), *Farmer* (1969), and *Summer* (1976). With A. Bilostosky she created the composition *Before the Battle* (1954), depicting B. Khmelnytsky, I. Bohun, and M. Kryvonis on horses. She also sculpted (with A. Bilostosky) the monuments to I. Franko in Kiev (1956) and T. Shevchenko in Odessa (1966).

Oksana Suprun: *Partisan Woman* (marble, 1951)

Suprunenko, Mykola, b 17 February 1900 in Poltava, d 11 September 1984 in Kiev. Historian; member of the AN USSR (now ANU) from 1972. After graduating from the Institute of Red Professors (1937) he worked at the ANU Institute of History (as professor from 1955 and as director of the Department of the Great October Revolution and Civil War from 1960). His works include *Ukraina v period inozemnoi voiennoi interventsii i hromadians'koi viiny (1918–1920 rr.)* (Ukraine in the Period of Foreign Armed Intervention and Civil War [1918–20], 1951), *Ukraina v Velikoi Otechestvennoi voine Sovetskogo Soiuza (1941–1945 gg.)* (Ukraine in the Great Patriotic War of the Soviet Union [1941–5], 1956), and *Pobeda Sovetskoi vlasti na Ukraine* (The Triumph of Soviet Power in Ukraine, 1967 [coauthor]).

Suprunenko, Petro, b 30 June 1893 in Kremenchuk, Poltava gubernia, d 17 November 1945. Mechanics scientist; full member of the AN USSR (now ANU) from 1934. He studied and taught at the Kiev Polytechnical Institute and worked in the weighing service of the Southwestern Railway (1919–27). He served as director of the ANU Commission of Transportation Mechanics (1929–38) and held a chair at the Kiev Institute of Railroad Transport. He studied theoretical questions connected with railroad transportation and developed a method of integrating differential equations describing the movements of rail stock. He was arrested during the Soviet terror of the late 1930s.

Sura River. See Mokra Sura River.

Surgery. A branch of medicine that deals with the treatment of illness, injuries, malformations, and other disorders by manual and instrumental means. In Kievan Rus' folk medicine included operations performed by *kostopravy* (bonesetters), *rizalnyky* (cutters), and *zubovoloky* (tooth-pullers). In the late Middle Ages, in some areas up to and including the 19th century, the *tsyrulnyk* (barber-surgeon) treated people by administering ointments, bloodletting, pulling teeth, and setting broken bones, dislocations, and sprains. Guilds for *tsyrulnyky* were formed in Kiev (15th century) and Lviv (1715), the members of which had to pass a practical examination after their training. Some *tsyrulnyky* also removed urinary bladder stones, performed amputations, and did hernia repair.

The first medical-surgical schools were established in Ukraine at the time of Peter I in conjunction with the mili-

tary needs of the Russian Empire. By the end of the 19th century a noticeable development in surgery resulted when problems of anesthesia, antiseptics, and asepsis were resolved. General surgery was subdivided into many specialized branches: ophthalmology, gynecology, otolaryngology, urology, thoracic surgery, *neurosurgery, and heart surgery and organ transplants.

The early contributions made by N. *Pirogov were followed by the work of V. *Karavaiv, Yu. Shimanovsky, and O. *Yatsenko, and later of N. *Sklifosovsky, M. *Volkovych, O. *Krymov, I. *Ishchenko, O. Avilov, A. *Arutiunov, M. *Amosov, A. Romodanov, and O. *Shalimov.

Research is conducted at the Kiev Scientific Research Institute of Clinical and Experimental Surgery and the Kharkiv Scientific Research Institute of General and Emergency Surgery, as well as at departments of surgery at medical education institutes, institutes for the upgrading of physicians, and scientific societies of surgeons. The journal *Klinicheskaiia khirurgiia* is published in Russian in Kiev.

Surma (shawm). A wind instrument made of wood. Generally conical with a flaring bell, double-reed mouthpiece, and five to seven finger holes, this oboe-type instrument has a long history, stretching back to Sumer and ancient Egypt. The *surma* in Ukraine is known from the Princely period of the Kievan state. It is depicted on an 11th-century fresco in Kiev's St Sophia Cathedral. The Cossacks used it primarily as a military instrument; eventually its musical function was supplanted by the trumpet. Today the *surma* has been revived and is often featured in folk instrumental ensembles. Prominent *surma* players include H. Fedkin and V. Zuliak.

Surma

Surma (Clarion). An underground monthly organ of the Ukrainian Military Organization and, from 1929, the OUN. It was printed secretly in Berlin (1927–8) and then Kaunas, Lithuania (1928–34), from which copies were smuggled and mailed into Western Ukraine and distributed free of charge. Initially the journal was edited by I. Gyzha (no. 1) and O. Senyk (nos 2–3); from the fourth issue the chief ed-

itor was V. Martynets. At first *Surma* published political and ideological articles by nationalist leaders such as Martynets, Ye. Konovalets, R. Jary, O. Senyk, and S. Chuchman. After the formation of the OUN in 1929, it devoted most attention to military topics, and featured articles on military tactics and theory by R. Sushko, V. Kolosovsky, V. Kurmanovych, M. Kapustiansky, and others.

Surma (Clarion). A monthly organ of the External Units of the OUN (Bandera faction), published in Munich in 1949–54. Edited by S. Lenkavsky, it published political analyses, ideological articles, and news and documents of the OUN underground still operating in Ukraine.

Myron Surmach

Surmach, Myron [Surmač], b 8 January 1893 in Zhel-dets, Zhovkva county, Galicia, d 12 May 1991 in New York. Book dealer, publisher, and community figure. He emigrated to the United States in 1910 and opened his first bookstore in New York City in 1916. In 1927 he opened the Surma Book and Music Company there, the oldest existing Ukrainian bookstore in the United States. Surmach published the humorous biweekly *Lys Mykyta* (1921–2), the monthly *Bazar* (1922–3), several books, and music collections. He also produced several Ukrainian records; began and ran the first Ukrainian radio program in the United States (est 1928); and sponsored numerous Ukrainian concerts, dance performances, and balls. A volume of his memoirs was published in 1982.

Surmach (Bugler). A journal published in London by the *Ukrainian Former Combatants in Great Britain. At first (1955) it was a monthly, then a quarterly, and in the late 1960s, an annual. Its editor was S. Fostun.

Surmach-Mills, Yaroslava [Surmač-Mills, Jaroslava], b 11 July 1925 in New York City. Painter, illustrator, and educator; daughter of M. *Surmach. A graduate of the Cooper Union art school (1950), she has taught art at Manhattanville College (1950–5) and Rockland Community College (from 1970) and was art director of the children's magazine *Humpty Dumpty* (1959–69). She has illustrated many children's books with Ukrainian themes (eg, *The Mitten*, *Stocking for a Kitten*, *An Egg Is for Wishing*, *Ivanko*, and *How a Shirt Grew in the Field*); has written and illustrated *Tusya and the Pot of Gold* (1971); has written the popular booklet *Ukrainian Easter Eggs* (1957); has popularized Ukrainian Easter egg painting in the United States; and has revived the art of reverse glass painting. Her popular Christmas, Easter, and other greeting cards depicting Ukrainian genre scenes and folk traditions are reproduced from her glass paintings. She created the stained-glass windows of the St Demetrius Ukrainian Catholic Church

Yaroslava Surmach-Mills with one of her icons and one of her paintings on glass

in Toronto (1982) and the etched-glass entrance doors of the New York Senate Building in Albany. Over 20 solo exhibitions of her glass paintings have been held since 1974.

Nadiia Surovtsova

Surovtsova, Nadiia [Surovcova, Nadija], b 18 March 1896 in Uman, Kiev gubernia, d 13 April 1985 in Uman, Cherkasy oblast. Historian, translator, and civic activist. With the outbreak of the February Revolution she returned from St Petersburg University to Ukraine to take part in the movement for national independence: she worked in the zemstvo and Peasant Association branch in the Uman region, contributed to *Trybuna* and other newspapers, and headed a department in the UNR Ministry of Foreign Affairs. In 1919 she emigrated from Ukraine and settled in Vienna, where she completed a PH D in history and worked in Ukrainian publishing houses, women's organizations, and the pacifist movement. In 1925 she returned to Ukraine, where she worked at the Radio-Telegraph Agency, the All-Ukrainian Photo-Cinema Administration, and the People's Commissariat of Foreign Affairs. For refusing to collaborate with the Soviet secret police, she was arrested in 1927, charged with spying for Austria, and sent to the Gulag, from which she emerged only in 1954. She then returned to Uman, where she devoted her energies to volunteer work at the regional museum and to writing her memoirs. In the 1970s the

authorities placed her under close surveillance and confiscated her memoirs. They were published posthumously in *Nauka i kul'tura: Ukraina*, vols 24–5 (1990–1).

Surozh. See Sudak.

Surozh Sea (Surozke more). The ancient name for the Sea of Azov, used also for the Black Sea. It was derived from the name of the Crimean coastal settlement of Surozh (present-day Sudak). The sea was alternately called the Sea of Sudak.

Surplus appropriation system (Russian: *prodrazverstka*). A policy of compulsory food deliveries to the state, imposed by the Soviet regime during the period of *War Communism. It was decreed by the RSFSR Council of People's Commissars on 11 January 1919 and was introduced in the part of Ukraine under Bolshevik control in March 1919. In March 1921 the surplus appropriation system was replaced by the *tax in kind under the *New Economic Policy.

In Russia the *prodrazverstka* was adopted in response to the disruption of normal economic exchange between the city and the countryside, caused by the revolution and the civil war. The government's failure to procure enough food, especially grain, for the cities at official prices led the Bolsheviks to introduce forcible requisitioning of food supplies. In Ukraine the appropriation system was implemented by the Provisional Workers' and Peasants' Government of Ukraine (November 1918 to June 1919) and its successor (est December 1919), both of which were ordered by Moscow to expropriate as much food as possible for the Red Army and the Russian cities.

The system consisted of a state monopoly on trade. Each peasant household was ordered to deliver its surplus to the state at fixed prices. The measure amounted to outright confiscation, for the prices were very low, and practically nothing could be bought with the money. The state demanded all the food except an ill-defined minimum for the peasant family's own use. The peasants resisted by either hiding their grain or selling it on the black market or through illegal barter. Moreover, having lost any interest in producing farm surpluses, the peasants reduced their sowings: in 1920 the total sown area in Ukraine was 30 percent below that of 1913, and grain yields dropped to 452 kg per ha from 721 kg per ha. The policy was enforced by armed brigades sent into the villages to search the farms, seize grain, and punish the hoarders. Repressions were widespread and provoked peasant revolts throughout Ukraine. The Soviet regime also used the *Committees of Poor Peasants to requisition food: their members became tax farmers, who kept 10–25 percent of all collected foodstuffs for their own consumption.

Throughout 1919 the *prodrazverstka* was applied only to grain, because of widespread peasant resistance and the weakness of the Soviet regime. In March 1920 it was extended to cattle and a wide range of agricultural produce. The policy applied to all regions of Ukraine under Bolshevik control, including eastern Galicia, for a part of 1920. During 1919, 172 million kg of grain were collected under the *prodrazverstka* in Ukraine. That amount represented a mere 7.6 percent of the planned quota. In 1920, 391 million kg were requisitioned (14.8 percent of the quota), and in 1921, 1171 million kg (68.1 percent of the quota). Although

formally abandoned in March 1921, the *prodrazverstka* continued in a number of gubernias, especially in central and southern Ukraine, until July 1921. It was an important factor in bringing about the 1921–2 man-made *famine in Ukraine, and it widened the breach between the Ukrainian peasantry and the Soviet regime.

B. Krawchenko

Surrealism. A movement in art and literature that originated in interwar France. It became popular with the publication of the *Surrealist Manifesto* (1924) by the French poet A. Breton. As stated by Breton, surrealism's purpose was to unite the previously contradictory conditions of dream/fantasy and reality in 'an absolute reality, a surreality.' Surrealism was introduced in Ukraine in Lviv in the late 1920s by R. *Selsky and other members of the Artes left-wing artists' group. Renewed interest in surrealism can be seen in the early 1960s in the paintings of L. *Medvid, I. *Zavadovsky, P. *Markovych, and B. Soika; in the 1970s in the paintings of nonconformist artists, such as V. *Makarenko, I. *Marchuk, and P. Hulyn; and in the late 1980s in the paintings of O. *Tkachenko, S. *Yushkov, S. Baroians, A. Haidamaka, N. Herasymenko, and V. Pasyvenko. Surreal elements can also be found in the works of contemporary North American artists of Ukrainian origin, such as S. *Lada, A. *Lysak, V. *Yurchuk, N. *Husar, and I. Kordiuk. In Ukrainian literature the influence of surrealism is evident in the works of the émigré writers E. *Andiiivska and G. *Tarnawsky.

Surskyi-Dnieper culture. A Neolithic culture of the mid-7th to late 5th millennium BC that existed along the Dnieper River south of Dnipropetrovske. It was named after a site excavated in 1946. The people of this culture lived on islands of the Dnieper in semi-pit dwellings and engaged in animal husbandry, fishing, and hunting. Excavations revealed that their microlithic flint technology was well developed. Their pottery tended to have a sharply curved base and occasional linear-spiral meandering ornamentation. The culture was assimilated by new tribes settling in the region and played a role in forming the *Pit-Grave culture.

Surzha, Yurii [Surža, Jurij], b 3 September 1937 in Sabivka (now in Slovianoserbske raion, Luhanske oblast). Stage actor. After completing the studio course at the Kiev Ukrainian Drama Theater (1961) he worked in the Donetsk (1961–5), Cherkasy (1965–75), and Ivano-Frankivske Ukrainian Music and Drama Theaters. He has portrayed V. Lenin in contemporary Soviet plays and was acclaimed for his portrayal of the title role in O. Kolomiets's *Dykyi anhel* (The Wild Angel).

SUS. See Ukrainian Self-Reliance League.

Susha, Yakiv [Suša, Jakiv], b 1610 in Minsk, Belarus, d 1687. Uniate bishop of Kholm. He joined the Basilian order in 1626 and then studied in Prussia (1626–32) and Olomouc, Moravia (1632–6). After several postings he was brought to Kholm as a lecturer at the gymnasium and assistant to Bishop M. Terletsky. When the bishop died in 1649, he became administrator and then bishop (1651) of

Bishop Yakiv Susha

Kornylo Sushkevych

the eparchy. In the wake of the Khmelnytsky uprising, Susha proved to be an exceptional diplomat. He negotiated with Cossack leaders, and in 1664–6 he lived in Rome as delegate of the Uniate church to the papacy. There he persuaded the pope to name a new Uniate metropolitan of Kiev, healed a serious rift in the Basilian order, and obtained an agreement prohibiting Catholics from changing their rite. He also led the drive to beatify Y. *Kuntsevych. Susha's writings included biographies of Kuntsevych and M. Smotrytsky. A collection of his extensive correspondence was published in Rome in 1973–4 in *Litterae Episcoporum*, vols 2–3. I. Nazarko published Susha's biography in *Zapysky Chyna sv. Vasyliia Velykoho* (1971).

Sushkevych, Anton [Suškevyč], b 22 January 1889 in Borisoglebsk, Voronezh gubernia, Russia, d 30 August 1961 in Kharkiv. Mathematician. After completing his studies at St Petersburg University (1913) he taught at various institutions of higher learning in Kharkiv (1916–21) and at Voronezh University (1921–9). From 1929 he worked as a mathematical researcher in Kharkiv, and from 1933 he was a professor at Kharkiv University. His contributions are in the fields of number theory, algebra, and, particularly, group and semigroup theories. His major work on the theory of generalized groups was published in 1937. He also wrote textbooks on higher algebra and number theory and essays on the history of mathematics.

Sushkevych, Kornylo [Suškevyč], b 1840 in Lviv, d 8 June 1885 in Lviv. Civic and cultural leader. A lawyer by vocation, he was a leading populist in Galicia. He helped found the Prosvita society and served as its vice-president. He was the first president (1873–85) of the Shevchenko Society in Lviv, which he helped establish, as well as one of the founders of the Ruthenian Pedagogical Society (1881). The two-volume 1867 edition of T. Shevchenko's poetry was financed by him.

Sushkevych, Petro [Suškevyč], b 1844 in Lviv, d 5 December 1913 in Lviv. Physician, civic activist, and philanthropist. He was one of the founders of the Ukrainian Medical Society in Lviv and deputy director of the Lysenko Higher Institute of Music. He bequeathed most of his fortune (200,000 kronen) to the Prosvita society for scholarships for young tradesmen and relief for indigent old writers.

Sushkivka settlement. A Trypilian settlement located near Sushkivka, Uman raion, Cherkasy oblast. Excavations in 1916 and 1926 uncovered several surface dwellings with clay floors, ovens, and religious structures. Among the artifacts recovered were various types of pottery, earthenware figurines of humans and animals, and a unique clay model of the interior of a *Trypilian culture dwelling.

Sushko, Mykola, b 1909 in Vienna. Student and political activist. A lawyer by profession, he finished law school in Vienna. In 1931–2 he headed the *Sich student society in Vienna, and in 1933 he was a delegate of the Central Union of Ukrainian Students at the international student congresses. In 1938–45 he headed the *Ukrainian Institute of Trust in Berlin. After the war he settled in Salzburg and became a publisher.

Sushko, Oleksander [Suško], b 1880 in Galicia, d 1966 in Chicago. Journalist, civic figure, and teacher. He studied history in Lviv and Vienna, published articles on the 16th-century history of the Ukrainian church, and taught at the Academic Gymnasium in Lviv. He emigrated to Canada in 1913 and became an adviser to Bishop N. Budka and editor of the Ukrainian Catholic newspaper **Kanadiis'kyi rusyn* (1914–16) in Winnipeg. His writings were particularly noted for their Austrophilism. Sushko organized the first conference of Ukrainian Canadians (1915) and then worked for the Protestant monthly *Ranok* (1916) and the journal *Ukraina* (2 issues, 1918–19). After moving to the United States he lectured at the University of Chicago and Columbia University in New York and was the founding president (early 1930s) of an organization called the Ukrainian Academy of Sciences of America (in Detroit, later in Chicago).

Roman Sushko

Onysym Suslov

Sushko, Roman [Suško], b 1894 in Remeniv, Lviv county, Galicia, d 12 January 1944 in Lviv. Senior military UNR officer and OUN leader. Commanding a company of Ukrainian Sich Riflemen during the First World War, he was captured and interned by the Russians in 1916. He helped organize the *Sich Riflemen in Kiev, and as the force grew, he steadily rose from company, to battalion, regiment,

and division (1919), commander and finally was promoted to colonel of the UNR Army. In 1920 he commanded a brigade of the Sich Riflemen Division, and in 1921 he led a brigade in the Second Winter Campaign. He was a co-founder of the *Ukrainian Military Organization and its home commander during 1927–31. He took part in setting up the *Organization of Ukrainian Nationalists (OUN) and was active in its military department. He was military editor of *Surma*. In 1939 he helped organize and commanded the *Legion of Ukrainian Nationalists. He lived in Cracow in 1939–41, where he was OUN leader in the Generalgouvernement. When the internal split occurred within the OUN, he remained loyal to Col A. *Melnyk. From 1941 he was active in the OUN underground in Lviv, where he was killed by an unknown assassin.

Sushytsky, Teoktyst [Sušyc'kyj], b 1883, d 1920. Literary scholar and civic figure. A privatdocent at Kiev University, in March 1917 he was appointed director of the new Second Ukrainian State Gymnasium in Kiev. In April he chaired the Ukrainian Pedagogical Congress. He was appointed secretary of the Kiev Ukrainian People's University in October and a lecturer at the Ukrainian Pedagogical Academy in November. In October 1918 the Hetman government appointed him professor of Ukrainian literature and rector of the Kiev Ukrainian State University. He also directed a department of the Hetman government's Ministry of Education. His major work, a study of Western Rus' chronicles as literary monuments (2 vols, 1921, 1929), was published after his death by the VUAN.

Suslov, Onysym (real surname: Reznikov), b 1857 in Yelysavethrad (now Kirovohrad), Kherson gubernia, d 2 December 1929 in Odessa. Stage and film actor and director. He acted in the troupes of M. Kropyvnytsky (1888–92), P. Saksahansky (1892–3), H. Derkach (1893–4), D. Haidamaka (1909–10), and S. Hlazunenko (1910–12) and led his own troupes in 1894–1909 (1894–8 with O. Sukhodolsky) and 1913–14. In 1918–29 he led several workers' and peasants' theaters and taught in the studio at the Odessa Ukrainian Drama Theater. He acted in the films *Sumka dypkur'iera* (The Diplomatic Pouch, 1927) and *Prodanyi apetyt* (Sold Appetite, 1928).

Sutkivtsi [Sutkivci]. IV-7. A village (1972 pop 2,100) in Yarmolyntsi raion, Khmelnytskyi oblast. The remnants of a castle (16th century) and the fortified Church of the Holy Protectress, built in 1476 by the Sutkowski family, are located there. The church-stronghold is a two-story, cruciform structure with a square center and four apses that form semicircular towers. Each corner of the center is topped by a small turret. Incompetent restoration at the beginning of the 20th century changed the original appearance of the church. The interior frescoes have been covered over with plaster.

Suuksu. A burial ground of the 6th to 10th century located near Hurzuf, Crimea. Excavations in 1903–7 uncovered approx 200 graves, the majority in ossuaries. The question of whether the deceased were Crimean Goths or Hellenized Sarmato-Alans has been debated by scholars.

Suvorov, Heorhii (Georgii), b 19 May 1919 in Saratov, Russia, d 12 October 1984 in Donetsk. Mathematician;

The Church of the Holy Protectress in Sutkivtsi

corresponding member of the AN URSR (now ANU) from 1965. He completed his studies at Tomsk University in 1941 and worked there in 1946–65. From 1965 he headed a department of the Institute of Applied Mathematics and Mechanics of the ANU in Donetsk. He made significant contributions to the theory of functions, particularly to the theory of topological and metric mappings on two-dimensional domains, and obtained important results in the theory of conformal and quasi-conformal mappings. Suvorov introduced a new method for the study of metric properties of mappings with bounded Dirichlet integral.

Suvorov army cadet schools (*suvorovski viiskovi uchylyshcha*). Specialized secondary military-educational institutions in what was the USSR, named after the Russian field marshal A. Suvorov, which prepared youths for entry into higher military schools and eventually into the armed forces of the Soviet Union. They were formed in August 1943 for children orphaned by the Second World War. From 1956 the sons of retired soldiers as well as members of the general public were admitted. From 1969 the program of study was two years (the ninth and tenth years of secondary education). In 1980 there were eight Suvorov schools in the USSR, one of which was in Kiev.

SUZHERO. See Ukrainian Association of Victims of Russian Communist Terror.

Suzir'ia (Constellation). An illustrated serial published annually (1967–81) and semiannually (from 1982) in Kiev by the Dnipro publishing house. It printed translations of contemporary prose, poetry, plays, and criticism by writers from the other Soviet republics. *Suzir'ia* stressed the 'fraternity' of the nations of the USSR and the ideals of Soviet patriotism.

St Nicholas's Church (18th century) in Svaliava

Svaliava [Svaljava]. V-3. A city (1989 pop 17,300) on the Liatorytsia River and a raion center in Transcarpathia oblast. The village was first mentioned in a historical document of 1263. In the 13th century it belonged to the Principality of Galicia-Volhynia. Then for many centuries it was under Hungarian rule. In the 16th to 18th centuries it was part of the Mukachiv-Chynadiieve dominion. By the end of the 18th century Svaliava was an important economic center with a distillery, a fair, a lumber mill, and a potash and brick factories. On 8 December 1918 the Ruthenian People's Council met in Svaliava and voted to join Transcarpathia with Ukraine. The town was annexed by Czechoslovakia in 1919, recaptured by Hungary in 1939, and incorporated into the Ukrainian SSR in 1945. It attained city status in 1957. Today Svaliava is an industrial center with a lumber-manufacturing complex, a wood-chemistry complex, and a handicrafts factory. There are health resorts just outside the city. The most interesting architectural monuments are the wooden churches of St Michael (1588) and St Nicholas (1759).

Svaliava Forest Products Complex (Svaliavskiy lisokombinat). A wood-processing and woodworking plant located in Svaliava, Transcarpathia oblast. It was organized in 1950 out of several enterprises in Svaliava: a lumber factory (est 1928), a woodworking complex (est 1931), and a forest farm (est 1900). In 1970 the Svaliava Furniture Factory (est 1963) was added to the complex. The main products of the complex are lumber, flooring, furniture, and consumer goods.

Svarich, Peter. See Zvarych, Petro.

Svarnyk, Ivan, b 1 June 1921 in Lysohirka, Tahanrih county, Don Cossack province, d 13 February 1989 in

Lviv. Writer, humorist, and pedagogue. He graduated from Lviv University in 1951 and then worked as a teacher. From 1957 he was an editor in the publishing house Kameniar and for the journal *Zhovten'*. Svarnyk is the author of collections of tales and humorous stories, among them *Na chystu vodu* (Into the Calm Water, 1962), *Personal'nyi barliih* (A Personal Lair, 1966), *Baiky* (Tales, 1971), and *Zaiacha nauka* (The Rabbit's Education, 1977).

Svaroh. A major pagan deity of the Eastern and Baltic Slavs. He was the god of the sky (from the Sanskrit *swarga* 'sky'), the sun, and heavenly fire (thunder); the precursor of *Perun; and the father of *Dazhboh and *Svarozhych. According to an ancient myth 'men began to forge arms' when Svaroh threw down a pair of pliers from heaven. It can be inferred from this detail that the cult emerged at the beginning of the 1st millennium BC, at the end of the Bronze and the start of the Iron Age. The god is first mentioned by Procopius of Caesarea in the 6th century AD. The German chronicler Thietmar of Merseburg (d 1018) claimed that Svaroh (Zwarzazici) was the principal deity of the Baltic Slavs. Svaroh is mentioned in the Kievan Chronicle under the year 1114. The Byzantine chronicler John Malalas identifies Hephaestos with Svaroh and Hephaestos' son Helios with Svaroh's son Dazhboh. In the 14th century Christian churchmen censured the common people for 'praying to fire, calling it Svarozhyche' (Hypatian Chronicle). In Ukrainian the archaic nouns *svara* and *svarka*, which are related etymologically to the name of the god, mean 'conflict,' 'sharp dispute,' and even 'battle' and 'war.' It seems reasonable to assume, therefore, that Svaroh was also the god of war. M. Hrushevsky considered Svaroh to be the sole god in Slavic mythology, the god of the creative power of nature. Later Svaroh's various functions were assigned to other deities, and his cult declined. He is not mentioned in the pagan pantheon of Volodymyr the Great.

M. Mushynka

Svarozhych. A god of earthly fire and war in Western and Eastern Slavic mythology. In the Chronicle of John Malalas, Svarozhych is described as the second son of *Svaroh. He was probably a member of the early Slavic trinity: Svaroh (god of the heavens and thunder), Dazhboh (god of the sun), and Svarozhych (god of fire).

Svashenko, Semen [Svašenko], b 1 September 1904 in Derkachi (now in Lebedyn raion, Sumy oblast), d 23 November 1969 in Moscow. Stage and film actor. He studied in the Lysenko Music and Drama Institute (1922–5) and worked in Berezhil (1922–8). In the Odessa Artistic Film Studio he acted in O. Dovzhenko's films *Zvenyhora* (1928), *Arsenal* (1929), and *Zemlia* (The Earth, 1930), B. Tiahno's *Fata morgana* (1931), and H. Chukhrai's *Balada pro soldata* (A Ballad of a Soldier, 1959).

Svatove. IV-19. A city (1989 pop 22,600) on the Krasna River and a raion center in Luhanske oblast. It originated in the 1660s and was called Svatova Luchka. In 1825 the village was turned into a military settlement and became

Semen Svashenko

Yevhen Sverstiuk

known as Novokaterynoslav. When military settlements were abolished in 1857, the old name was restored. The construction of the Kupianka–Lysychanske railway line in 1895 gave the village easy access to grain markets and stimulated development. In 1923 the village was renamed Svatove and made a raion center of Kharkiv gubernia. In 1938 it was promoted to city status. Today Svatove is an industrial center with several food-processing enterprises, a machine repair plant, and a sewing factory.

Svechnikov, Serge [Svečnikov, Serhii], b 21 July 1926 in Dnipropetrovske. Solid-state physicist; AN URSS (now ANU) corresponding member since 1973 and full member since 1988. After graduating from the Kiev Polytechnical Institute in 1948, he worked there until 1961 and then joined the newly established ANU Institute of Semiconductors in Kiev. He has contributed to the understanding of the fundamental optoelectric processes of charge-carrier generation and recombination resulting from the interaction of ionizing radiation with semiconductor lattices.

Svechnikov, Vasilii [Svečnikov, Vasilij], b 6 January 1891 in Kozmodemianske (now Babino), Viatka gubernia, Russia, d 20 August 1981 in Kiev. Metallurgist; full member of the AN URSS (now ANU) from 1939. He studied in St Petersburg, worked at the ANU Institutes of Ferrous Metallurgy (1940–53) and Metal Physics (1953–75, as department head), and taught at the Kiev Polytechnical Institute (1944–66). In the field of ferrous metallurgy he studied nitrogen compounds in steel, phase transitions, and phase diagrams of various steels. He developed and established a whole new branch of metallurgy, the physicochemical analysis of refractory and rare metal alloys.

Svekla, Oleksandra, b 9 April 1902 in Valehotsulove (now Dolynske), Ananiv county, Kherson gubernia, d 1966 in Pryluka, Chernihiv oblast. Writer of Moldavian descent. She began publishing in 1924. A member of the peasant writers' group Pluh from 1925, she wrote the story collections *Nad Dnistrom* (At the Dniester, 1926) and *Podarunok i podiaka* (The Gift and the Expression of Gratitude, 1927) and the novels *Nadlomleni sertsem* (Broken by the Heart, 1930) and *Petria Slymak* (1930). She was persecuted during the Stalinist terror, and her works ceased to be published.

Sverdlovske or **Sverdlovsk** [Sverdlovs'ke or Sverdlovs'k]. V-20, DB III-7. A city (1989 pop 84,900) and raion

center in Luhanske oblast. It originated as the settlement Dovzhykove-Orlovske at the end of the 18th century and was renamed Sharapkyne later. The first coal mines were developed in the area in the 1870s. In 1938 several mining settlements were amalgamated to form the city of Sverdlovske. Today the city is an industrial center with 12 mines, 4 coal enrichment plants, a machine-building and metalworking industry, mining-equipment repair shops, and a clothes-sewing complex. It has a regional and a history museum.

Sverstiuk, Yevhen [Sverstjuk, Jevhen], b 13 December 1928 in Siltse, Volodymyr-Volynskyy county, Volhynia. Literary and social critic, publicist, and political prisoner. He did graduate work at the Institute of Psychology in Kiev and Odessa University (candidate's degree, 1965) and worked as a teacher in Ternopil oblast and the Poltava Pedagogical Institute. From 1959 he published articles and reviews in Soviet literary periodicals. Because of his criticism of Russification and other injustices, in 1965 he was blacklisted and dismissed from his job at the Ukrainian SSR Pedagogical Institute in Kiev. Thenceforth his essays were circulated in Ukrainian samvydav and published in émigré periodicals. He was fired from his job at *Ukrain's'kyi botanichnyi zhurnal* in December 1970 for his eulogy at A. Horska's funeral, and arrested in January 1972 and sentenced in March 1973, along with I. Svitlychny, for his involvement in the dissident movement and his defense of political prisoners, to seven years in strict-regime labor camps in Perm oblast and five years' exile in the Buriat ASSR, in Siberia. In the camps he participated in hunger strikes and other political protests. In April 1979 he was elected an honorary member of the International Association of Poets, Playwrights, Editors, Essayists, and Novelists (PEN). Since his release he has lived in Kiev. In the late 1980s his articles reappeared in the Soviet and émigré press. Editions of Sverstiuk's writings have been published in the United States in Ukrainian (1970, 1979, 1980) and in English translation (*Clandestine Essays*, 1976).

Svesa or **Svisa**. II-14. A town smt (1986 pop 8,800) on the Svisa River in Yampil raion, Sumy oblast. It originated in the 17th century as a *khutir* in Nizhen regiment. In the 19th century it was a village in Chernihiv gubernia. It acquired a distillery, sugar refinery, lime factory, and railway station in the second half of the century. Today it has a pump-manufacturing plant and Ukraine's only tannic-extracts plant.

Sviati Hory Dormition Monastery (Sviatohirskyy upenskyi manastyr). An Orthodox monastery situated in present-day Slovianohirske, Donetsk oblast. Although it is believed to have been founded as early as the 13th century, the first written record of it dates from 1624. In the 15th century monks began living in caves on a hill overlooking the Siverskyi Donets River and worshiping in a grotto church. Their settlement developed both as a religious community centered around the 17th-century St Nicholas's Church and as a fortified outpost on the frontier with the Crimean Tatars. Although protected by defensive walls and artillery, it was sacked by the Tatars in 1679; it was later rebuilt. Its properties were secularized in 1783.

The monastery expanded quickly in the second half of the 19th century along a terrace lower down the hill. At

The Sviati Hory Dormition Monastery (drawing by F. Dzhunkovskyy, 1845)

that time the complex came to include the Dormition Cathedral, with three naves and five cupolas (1859–60), a hospice (1877), monks' cells (1887), the supervisor's residence (1900), and an elaborate pavilion for pilgrims, in addition to several smaller chapels and buildings. By 1908 the entire complex housed 280 monks and novices and 340 retirees. Closed down by the Soviet authorities in the anti-religious terror after the revolution, in 1922 the monastery was turned into a sanatorium. The complex was severely damaged during the Second World War but was restored in 1969–80 and declared a historical preserve.

Sviatopolk I [Svjatopolk] (appellation: Okaiannyi [the Damned or the Accursed]), b 978, d 24 July 1019. Rus' prince; son of *Volodymyr the Great. In actuality Sviatopolk was probably the son of Volodymyr's brother, *Yaropolk I Sviatoslavych, whose widow, Predslava, Sviatopolk's Greek mother, Volodymyr took as his third wife; thus Sviatopolk is counted among Volodymyr's sons. He was the son-in-law of the Polish prince *Bolesław I the Brave and prince of Turiv, from which position he was ousted in 1012 because of a conspiracy against Volodymyr. Sviatopolk captured Kiev on 15 July 1015, after Volodymyr's death. According to the Primary Chronicle he ordered the death of his brothers, Borys (see *Saints Borys and Hlib), Hlib (see *Hlib Volodymyrovych), and Sviatoslav, for which the chronicler dubbed him 'Okaiannyi.' Sviatopolk planned to unite the lands inherited from his father, but his stepbrother, *Yaroslav the Wise, then prince of Novgorod, opposed him. Sviatopolk allied with the Pechenegs, but he was defeated by Yaroslav's armies at the Battle of Liubech at the end of 1016, and fled to Poland. With assistance from the Polish army Sviatopolk regained the Kievan throne on 14 August 1018; that same year, however, Yaroslav returned and banished him. Sviatopolk again enlisted the help of the Pechenegs, but he was defeated at the Alta River on 24 July 1019, and died while fleeing westward to the wilderness between Czech and Polish lands. During his reign in Kiev Sviatopolk minted a silver coin, ornamented after the style of Volodymyr's silver coins, with the inscription 'Sviatopolk na stole a se eho srebro' (Sviatopolk Is on the Throne and This Is His Silver).

A. Zhukovskyy

Sviatopolk II Iziaslavych [Svjatopolk Izjaslavyč], b 8 November 1050, d 16 April 1113 near Vyshhorod, north of Kiev. Rus' prince of Polatsk (1069–71), Novgorod (1078–88), and Turiv (1088–93) and grand prince of Kiev (1093–1113); grandson of Yaroslav the Wise. His reign was marked by feuding with the Sviatoslavych dynasty of Chernihiv princes (allied with Khan *Boniak) and by devastating attacks by Polovtsians (which he tried to allay, to no avail, by marrying Khan Tugorkan's daughter in 1094), particularly in 1093 and 1096, when they reached the outskirts of Kiev. Sviatopolk participated in the *Liubech congress of princes in 1097, after which he and Davyd Ihorevych of Volhynia captured Vasylo Rostyslavych of Terebovlia and blinded him. Sviatopolk was then pressured into leading a punitive campaign against Davyd, who was expelled from his principality in 1099. After the *Vytychiv congress of princes in 1100, Sviatopolk accompanied Volodymyr Monomakh on a series of successful campaigns against the Polovtsians (1103, 1107, and 1111). He was a benefactor of the Kievan Cave Monastery and commissioned the construction of a church dedicated to his patron, the Archangel Michael (see *Saint Michael's Golden-Domed Monastery). His oppressive administrative policies, however, sparked the *Kiev Uprising of 1113 after his death.

Sviatopolk-Chetvertynsky [Svjatopolk-Četvertyns'kyj] (often just Chetvertynsky). A Ukrainian princely family, descended from the Turiv-Pynske or Volhynia appanage princes of the Riurykide dynasty, known from the late 14th century. The village of Chetvertnia on the Styr River in Lutske county, Volhynia, was the ancestral estate of the Chetvertynsky princes. Prince Oleksander Chetvertynsky was first mentioned in documents dated 1388. Prince Fedir Mykhailovych Chetvertynsky was ambassador of the Lithuanian-Ruthenian state to Wallachia in 1492. In the 15th and 16th centuries two branches of the Sviatopolk-Chetvertynsky family developed; one settled in Stara Chetvertnia, and the other in Nova Chetvertnia. In the 16th century the Sviatopolk-Chetvertynsky family ruled over large estates in Ukraine (Volhynia, Bratslav voivodeship) and Belarus. Certain members of the family later became Catholicized, but most remained fervent Orthodox believers, and some became high church dignitaries. They founded men's and women's monasteries in Stara Chetvertnia (Prince Hryhorii Chetvertynsky founded a printery at the Transfiguration Monastery there in 1624) and a monastery in Nova Chetvertnia.

Among the members of the Stara Chetvertnia branch of the family were Prince Hryhorii Ostapovych Sviatoslav-Chetvertynsky (d 1651), the chamberlain of Lutske (1647), who participated in church affairs, particularly in the nomination of Metropolitan P. Mohyla (1632) and of S. Kosiv (1647). Hryhorii's son, Zakhar Sviatopolk-Chetvertynsky, served as an assistant judge in Lutske (1647) and company commander (1649) and was a member of A. Kysil's delegation to B. Khmelnytsky in Pereiaslav (late 1648 to early 1649). Zakhar's son, Hedeon (Hryhorii) *Sviatopolk-Chetvertynsky, was bishop of Lutske and metropolitan of Kiev. Hedeon's first cousin, Serhii Sviatopolk-Chetvertynsky (religious name: Sylvestr), was bishop of Mahiliou and of Belarus (1705–27). Hedeon's brother, Andrii Sviatopolk-Chetvertynsky, was a company commander of the Cossack standard in the Great Ruthenian principality (1660).

Andrii's sons, Yurii and Yanush Sviatopolk-Chetvertynsky, lived during the time of the Hetman state. Yurii Sviatopolk-Chetvertynsky (d ca 1717–22), the son-in-law of the former hetman I. Samoilovych, was a high-ranking administrative officer in Moscow and an opponent of I. Mazepa (although he had received estates in Galicia from him). Through the marriages of his daughters he became related to the Myklashevsky, Skoropadsky, and Kondratyev families. His brother, Yanush Sviatopolk-Chetvertynsky (d 1728), a colonel in service to the Russians, married Anna Vasylivna Kochubei, daughter of the general judge (she had been married to I. Obydovsky, colonel of Nizhen regiment and Mazepa's nephew). Another member of the Stara Chetvertnia branch of the family was Antin-Stanyaslav Sviatopolk-Chetvertynsky, the castellan of Pere-myshl (1790), an adviser to the Torhovytsia Confederacy; he was killed by Polish insurgents in Warsaw in 1794. From him is descended the line of 19th-century Sviatopolk-Chetvertynsky nobles that governed estates in Belarus and Ukraine (Kharkiv gubernia).

Among the members of the Nova Chetvertnia branch of the family were Prince Stepan Sviatopolk-Chetvertynsky (b ca 1575, d 1659), the chamberlain of Bratslav, who participated in the renewal of the Orthodox hierarchy (under Theophanes III) in 1620 and is mentioned in Mohyla's testament (1646). He was a leading member of that group of the Ukrainian Orthodox nobility that recognized the authority of the Zaporozhian Army. His son, Prince Illia Sviatopolk-Chetvertynsky (d 1641), however, a company commander, fought in the 1620s and 1630s against Cossack insurgents. A. Kalnofoisky dedicated his *Teraturgima* (1638) to him, and the rector of the Kievan Mohyla College, I. Oksenovych-Starushych, read a grave-side sermon during his funeral. Stepan's second son, Mykola Sviatopolk-Chetvertynsky (d 1659), was the castellan of Minsk and a relative of Hetman I. Vyhovsky. During the 18th century the Sviatopolk-Chetvertynsky princes of that branch served as castellans and chamberlains in Ukraine and Belarus; Oleksander Sviatopolk-Chetvertynsky (d 1769), the chamberlain of Bratslav, was an activist in the Confederation of Bar. That branch of the Sviatopolk-Chetvertynsky family became Catholicized in the late 17th and early 18th centuries; it ruled over large estates in Volhynia and Podilia until the 20th century.

O. Ohloblyn

Sviatopolk-Chetvertynsky, Hedeon [Svjatopolk-Chetvertyns'kyj] (secular name: Hryhorii), b ?, d 1690. Orthodox metropolitan. A descendant of the Riurykide dynasty, ca 1661 he was consecrated bishop of Lutske and Ostrih. He defended the rights of the Orthodox in the Polish-Lithuanian Commonwealth. When his relations with King Jan III Sobieski, the Catholic church, and Y. Shumliansky, the Orthodox bishop of Lviv, deteriorated, however, he moved to the Baturyn Monastery in the Hetmanate. In June 1685 a church sobor elected Sviatopolk-Chetvertynsky metropolitan of Kiev, and in October 1685 he went to Moscow to be installed formally by Patriarch Y. Savelov. His election and his decision to accept his installation from the patriarch of Moscow, which undermined the independence of the church and cut its historical link to the patriarch of Constantinople, were opposed by many church leaders in Ukraine. When Hetman I. Samoilovych, his main supporter, who also favored a pro-Muscovite orientation for the Ukrainian church, was replaced by I.

Metropolitan Hedeon
Sviatopolk-Chetvertynsky

Mazepa, his authority began to fall. By 1688 Mazepa had forbidden his use of the title 'Metropolitan of All Rus'.'

Sviatoshyne or Sviatoshyne [Svjatošyne]. A suburb of Kiev, 10 km west of the city center. The area was first mentioned in a charter of the Polish king Sigismund III Vasa in 1619. In the second half of the 19th century the district, with its fine pine forests, was developed into a resort area. By the end of the century it was connected to the city by a horse and then a steam tram. Today it is the home of some research institutes, sanatoriums, and rest homes.

Sviatoslav (Sviatosha) [Svjatoslav (Svjatoša)] (Pankratii), b 1080, d 14 October 1142 in Kiev. Prince of Lutske; son of *Davyd Sviatoslavych. He was ousted from Lutske in 1099 by Davyd Ihorevych, and fled to his father in Chernihiv principality. On 17 February 1106 he entered the *Kievan Cave Monastery, where he adopted Nikolai (Mykola) as his monastic name. During his 36 years as a monk and ascetic he built the Trinity Church above the main gate of the monastery, as well as a hospital with the St Nicholas's Church. He also collected many manuscripts, which he donated to the Kievan Cave Monastery, thereby initiating the large library collection there. In 1142 he negotiated for peace among his warring brothers. Sviatoslav was recognized as a saint, and his achievements were described in the *Kievan Cave Patericon. His remains were preserved in St Anthony's Cave at the Kievan Cave Monastery.

Sviatoslav I Ihorevych [Svjatoslav Ihorevyč] (appellation: Khorobryi [the Brave]), b 942?, d 972. Grand prince of Kiev (de jure from 945, de facto from 964) and noted military commander; son of *Ihor and *Olha. While he was a minor, Sviatoslav's mother was regent of the Kievan state, and he was raised by a steward, Asmud. During his reign the territory of *Kievan Rus' was greatly expanded. In his campaigns to the east (964–6) he defeated the Khazars near Itil and captured the White Tower fortress in Sarkil. He later conquered the Volga Bulgars and forced the Yassians and the Kasogians in northern Caucasia to pay tribute, thereby opening the way for Rus' merchants to the Caspian Sea coast. In 966 he subjugated the Viatichians and exacted tribute from them. The emperor of Byzantium, Nicephorus II Phocas (through the offices of the patrician Kalokir of Chersonesus), convinced Sviatoslav to attack the Balkan Bulgars; he did so in 967 (some historians say 968). He captured many cities (80, according to the chronicles), including Dorostol and *Pereiaslavets on the

Danube, an important trading center, where he planned to transfer his capital.

Threatened by his Balkan expansionism, Byzantium convinced the *Pechenegs to attack Kiev. Sviatoslav reluctantly returned and drove the Pechenegs, who already had been repelled from the city, back to the steppe. After Olha's death he consolidated his control of Rus' and appointed his sons as viceregent: *Yaropolk I Sviatoslavych in Kiev, *Oleh Sviatoslavych in the Derevlianian land, and *Volodymyr the Great in Novgorod. In July 969 Sviatoslav embarked on a second campaign in the Balkans in order to strengthen the conquered cities and to punish Byzantium for provoking the Pecheneg attack on Kiev. That time, however, he was met by stronger opposition from a combined Bulgarian and Byzantine force. The relatively small size of his army and the lack of assistance from Kiev were responsible for his defeat near Dorostol (now Silistra). He was besieged by the Byzantine army (23 April to 22 July 971) and forced to sign a peace treaty (23 July), under which he ceded his territories in the Danube region. On the way back to Kiev he was ambushed by Pechenegs (once again at the behest of Byzantium). His army was destroyed, and he was slain.

The Primary Chronicle praises Sviatoslav as a heroic figure and describes his cordial relations with his wife. It also remarks on his practice of warning the enemies he was about to attack, with the message 'Idu na vas' (I am coming at you). He is the subject of Yu. Opilsky's novel *Idu na vas* (1918) and S. Skliarenko's novel *Sviatoslav* (1959).

A. Zhdan, A. Zhukovsky

Sviatoslav II Yaroslavych [Svjatoslav Jaroslavyč], b 1027, d 27 December 1076 in Kiev. Rus' prince; son of *Yaroslav the Wise. Sviatoslav ruled in Volodymyr-Volynskyy while his father was alive and then became prince of Chernihiv (from 1054). At first the three oldest sons of Yaroslav ruled in harmony; together with *Vsevolod Yaroslavych, the prince of Pereiaslav, and *Iziaslav Yaroslavych, the grand prince of Kiev, Sviatoslav defeated the Torks in 1060 and Vseslav Briachislavych, the prince of Polatsk, in 1067. In 1068 he and his brothers took some losses from the Polovtsians on the Alta River near Pereiaslav, but later that year he himself won a significant victory over the Polovtsian forces on the Snov River in Chernihiv principality. With Vsevolod's help Sviatoslav deposed Iziaslav on 22 March 1073 and took over as grand prince of Kiev. During his rule the territory of Kievan Rus'

was greatly increased. He was a patron of education, and he sponsored the compilation of the **Izbornik* of Sviatoslav (both 1073 and 1076), which had a great influence on the further development of educational literature in Kievan Rus'. Sviatoslav also contributed to **Ruskaia Pravda*, notably a chapter called 'Pravda Iaroslavychiv' (The Law of the Yaroslavych Dynasty). He was buried in the Cathedral of the Transfiguration in Chernihiv.

Sviatoslav III Vsevolodovych [Svjatoslav Vsevolodovyč], b 1126 in Chernihiv, d 27 July 1194 in Kiev. Rus' prince; son of Vsevolod Olhovych. He reigned in the principalities of Volhynia, Turiv-Pynske, Novhorod-Siverskyi, and Chernihiv and then became grand prince of Kiev in 1181. He established a coalition among Rus' princes to fight marauding Polovtsians (Khans Boniak and Konchak) and achieved a major victory against them in 1184 at the Orel River. The effectiveness of that effort subsequently declined as the princes set off against the nomads in an uncoordinated manner (eg, the famous campaign of Ihor Sviatoslavych in 1185). Sviatoslav's later efforts to stem the Polovtsians were somewhat more successful. He was buried in St Cyril's Church.

Sviatovyt (aka Sventovit, Svantevit). A principal pagan deity of the Western Slavs in the medieval period; the god of the sun and war and the protector of crops. At the end of the harvest season each year, sacrifices were brought to him, and festivals were held in his honor. His shrine was in Arkon, on Rigen Island. Inside stood a four-faced wooden idol in the form of a warrior with an aurochs horn in one hand and a sword in the other. During a ceremony the horn was filled with wine. Some scholars consider this idol to be a version of the *Zbruch idol. According to recent studies the Zbruch idol belongs to the mythology of the Eastern Slavs and does not represent Sviatovyt.

Svicha River [Sviča]. A right-bank tributary of the Dniester River that flows for 106 km through Ivano-Frankivske and Lviv oblasts and drains a basin area of 1,490 sq km. The river originates in the Gorgany Mountains and initially has a mountainous character; it then develops a wider valley (5–6 km) along its lower course. It is used for water supply and irrigation.

Leontii Svichka

Svichka, Leontii [Svička, Leontij] (Nazarenko, Levko), b ?, d 1699. Cossack officer during the Hetmanate. He held various posts in Lubni regiment, including those of osaul

(intermittently in 1655–88), chancellor (1671), judge (1672), and colonel (1688–99). He was also the Pyriatyn town otaman in 1677 and a participant in the Muscovite Crimean (1687 and 1689) and Azov (1696) campaigns.

Svidersky, Mykola [Sviders'kyj], b 17 October 1920 in Pochaiv, Kremianets county, Volhynia gubernia, d 22 January 1987 in Sydney, Australia. Civic leader. After arriving in Australia in April 1949, he became a founding member of the Ukrainian Association in Sydney, the weekly *Vil'na dumka*, the Ukrainian Artistic Society in Sydney, the Ukrainian Dramatic Society in Australia (also a leading actor), the Ukrainian Studies Foundation in Australia, the Ethnic Communities Council in New South Wales, and the Plast Ukrainian Youth Association in Australia. He served as a state and national commissioner for Plast (1952–60), the vice-president of Plast in the West (1960–2), the organizer and choreographer of the first Ukrainian dance ensemble in Sydney (1949–60), the co-ordinator and a broadcaster of the Ukrainian-language radio program in Sydney (1976–87), a founder of the Ukrainian Senior Citizens' Club in Sydney, and a playwright for the Ukrainian Children's Theater. He also taught in Ukrainian Saturday schools for 22 years, lectured at the Ukrainian Teachers' College in Lidcombe, served on the Ukrainian Council in New South Wales for 18 years (president for 4 years), and was president of the Federation of Ukrainian Organizations in Australia (1977–9).

Svidersky, Venedykt [Sviders'kyj], b and d ? Painter. A precursor of romanticism, in the 1760s he lived and worked in Kharkiv. His works include many paintings of the Madonna, an icon of the Holy Protectress in the Church of the Holy Protectress in Romen, and the altar icon *Jacob's Dream* and the Passion cycle in the church in Mezhyrichia, near Sumy. He presented biblical themes in a manner close to that of genre painting.

Svidnik. See *Svydnyk*.

S'vidok pravdy

S'vidok pravdy (Witness of the Truth). A Baptist journal published monthly (with interruptions) from 1909 to 1925 in Toronto; the first Ukrainian-language periodical in eastern Canada. It was the organ of the Alliance of Ruthenian and Galician Baptists in Canada and the United States and was edited by I. Koliesnykov (to 1918) and M. Androv.

Svidoma syla. See *Robitnyche slovo*.

Volodymyr Svidzynsky

Vira Svientsitska

Svidzynsky, Volodymyr [Svidzins'kyj] (Svidzynsky), b 9 October 1885 in Maianiv, Vinnytsia county, Podilia gubernia, d 18 October 1941. Poet and translator. His first collection, *Lyrichni poezii* (Lyrical Poetry), was published in 1922; it was followed by *Veresen'* (September 1927) and *Poezii* (Poems, ed Yu. Yanovsky, 1940). His poems, written in 1927–36 and printed in Ukraine in the years 1937–40, were collected by O. Veretenchenko and published in Munich in 1975 in the collection *Medobir* (Honey Wood). *Poezii* (Poems, 1986) is one of the more recent editions of his work published in Ukraine. In his early collections Svidzynsky leaned toward symbolism, but in the two last collections there are elements of surrealism combined with classical forms. An important part of Svidzynsky's work is stories with folk or exotic motifs; there are also translations from the classics (Hesiod, Aesop, Ovid, Aristophanes) and from French, German, Polish, and Russian poetry. Svidzynsky died while under arrest, during the evacuation of Kharkiv in the fall of 1941. (According to eyewitness accounts, he was burned alive together with other prisoners in Saltiv, near Kharkiv. According to Soviet records, he was killed by a German bomb.)

B. Kravtsov

Sviechnykov, Anatolii [Svječnykov, Anatolij], b 15 June 1908 in Kiev, d 12 March 1962 in Kiev. Composer and pedagogue. After graduating from the Lysenko Music and Drama Institute (1932) in the composition class of L. Revutsky and V. Zolotarev, he became the musical director of drama broadcasts on Ukrainian State Radio (1936–51) and a teacher of composition at the Kiev Conservatory (1945–61). His works include the ballets *Marusia Bohuslavka* (1951) and *The Night before Christmas* (1959), the symphonic poems *Karmeliuk* (1945) and *Schors* (1949), choruses, pieces for piano, arrangements of Ukrainian folk songs, incidental music, and film scores.

Svientsitska, Vira [Svjencic'ka], b 28 August 1913 in Lviv, d 21 May 1991 in Lviv. Art scholar; daughter of I. *Svientsitsky. After graduating from Lviv University in 1938, she worked at the National Museum in Lviv. In 1947 she was arrested for co-operating with the Ukrainian underground resistance and imprisoned in a labor camp. After being released in 1956, she returned to Lviv, obtained

a candidate's degree (1966), and was placed in charge of the Department of Medieval Painting at the Lviv Museum of Ukrainian Art. She wrote many articles on Ukrainian painting and wood carving; books on 17th- to 20th-century carved hand crosses (1939), I. Rutkovych and 17th-century Ukrainian painting (1966), medieval Ukrainian painting (1976, with H. Lohvyn and L. Miliavieva), and 14th- to 18th-century Ukrainian painting in Lviv's museum collections (1900, with O. Sydor); and the chapter on 14th- to 16th-century painting in vol 2 of the AN URSR (now ANU) history of Ukrainian art (1967). She also compiled a dictionary of Zhovkva master painters and carvers, published in *Ukrains'ke mystetstvoznavstvo* (vol 1, 1967), and coauthored a book on 13th- to 20th-century Ukrainian folk painting (1991).

Ilarion Svientsitsky

Pavlyn Svientsitsky

Svientsitsky, Ilarion [Svjencic'kyj] (Sventitsky, Sviatytsky), b 7 April 1876 in Buzk, Kaminka-Strumylova county, Galicia, d 18 September 1956 in Lviv. Philologist, paleographer, museologist, art historian, and bibliographer; full member of the Shevchenko Scientific Society from 1914 and the Ukrainian Theological Scholarly Society. He graduated from Lviv University (1899) and studied at the universities of St Petersburg (1900) and Vienna (Ph D, 1902). He was editor of the Lviv Russophile journal *Zhivaia mysl'* (1902–5). He was director of the *National Museum in Lviv (1905–39, later the Lviv Museum of Ukrainian Art, 1939–41, 1944–52). He was a docent at Lviv University (1914, 1934–9) and was appointed deputy director of the scholarly section of the Kiev Municipal Museum. He was a lecturer at Kiev University (1917–18), a professor at the *Lviv (Underground) Ukrainian University (1922–5), and president of the *Mohyla Scholarly Lectures Society. In 1927 he took part in the All-Ukrainian Orthographic Conference in Kharkiv. After the Soviet takeover of Western Ukraine he headed the Slavic philology department at Lviv University (1939–41, 1944–50) and the Division of Linguistics at the AN URSR (now ANU) Institute of Social Sciences in Lviv (1944–50).

Svientsitsky studied the language of medieval East and South Slavic literary monuments. He wrote a book of essays on the history of the 11th- to 18th-century Ukrainian language (1920) and articles about the 13th-century Buchach Gospel (1912), the testaments of Yaroslav the Wise and Volodymyr Monomakh (1902), the 14th-century Lavryshevo Gospel (1913) and Novi Sad *Apostol* (1918),

the Galician-Volhynian Chronicle, 14th- and 15th-century Western Ukrainian charters, the treaties of Kievan Rus' with Byzantium, the 1229 Smolensk Charter, and Old and Middle Ukrainian literary monuments (1901). He also published two volumes of historical materials about the national revival in 19th-century Transcarpathia (1906, 1909). Among his other works are a short book on T. Shevchenko in criticism and reality (1922); a Ukrainian grammar in Polish (1922) and Russian grammars in Ukrainian (1902) and Polish (1915, 1931); a Ukrainian-Polish/Polish-Ukrainian dictionary (1920); booklets on the re-birth of Belarusian literature (1908, 1914), on the foundations of scholarship concerning the Ukrainian language (1917), on V. Vynnychenko as a writer (1920), and on M. Drahomanov and the Galicians (1922; repr 1975); and articles on various subjects. A book of his essays on the history of Bulgarian literature was published posthumously in 1957. As an ethnographer he was particularly interested in funeral *laments, and published a long article on the subject in *Etnohrafichnyi zbirnyk* (1912).

Under Svientsitsky's direction the National Museum and its library became major repositories of Ukrainian artifacts and Church Slavonic and Old Ukrainian books and manuscripts, and centers of scholarly research. He published an illustrated guide to the museum in 1913. He prepared important descriptions of the manuscript holdings of the People's Home library in Lviv (1904–5) and its A. Petrushevych collection (3 vols, 1906–11), the 12th- to 15th-century Cyrillic manuscript holdings at the National Museum (1933), and the manuscripts at the Stauropegion Institute (1908), and a catalog of Church Slavonic printed books (1908). As an art historian he produced books on the ornamentation of 16th-century Galician Ukrainian manuscripts (3 fasc, 1922–3), the beginnings of printing in Ukraine (1924), church painting in 15th- and 16th-century Galicia (1914), and the development of Ukrainian art in Western Ukraine (1944). His book on 15th- and 16th-century Galician icons (1929) remains an important illustrated source on the subject. Svientsitsky was also an enthusiastic amateur of modern Ukrainian art, and in 1931 he established a gallery for such art at the National Museum.

A bibliography of Svientsitsky's works, compiled by O. Kizlyk and R. Lutsyk, was published in Lviv in 1956.

O. Horbach, S. Hordynsky, R. Senkus

Svientsitsky, Pavlyn [Svjencic'kyj] (Polish: Świećicki, Paulin; pseud.: Pavlo Svii, Danylo Lozovsky, Pavlyn Stakhursky, S. Holod, Pevny, Liakh z Ukrainy), b 1841 in Varshytsia (now Kalynivka), Vinnytsia county, Podilia gubernia, d 12 September 1876 in Lviv. Ukrainian writer of Polish descent. He studied at Kiev University. During the Polish Insurrection of 1863, which he supported, he emigrated to Austrian-ruled Lviv. There he worked as an actor with the Ruska Besida Theater, collected folklore, and contributed to *Nyva*, *Meta*, and *Lastivka*. He also published the Polish-Ukrainian miscellany **Sioto* (1866–7) and edited the weekly *Nowiny* (1867–9). From 1869 he taught Ukrainian at the Academic Gymnasium of Lviv. In Ukrainian Svientsitsky wrote articles, stories, the novel *Kolys' bulo* (Once upon a Time; in Polish as *Przed laty*, 1865), the plays *Halia* (1866), *Mishchanka* (The Bourgeoise, 1866), and *Kateryna* (1866, based on T. Shevchenko's poem), some poems, and the fable collections *Baiky: Darunok malym*

ditiam (Fables: A Gift for Small Children, 1864) and *Baiky v nauku molodym i starym* (Fables as a Lesson for Young and Old, 1874, 1891). A book of his Polish stories based on Ukrainian history and folklore, *Opowieści stepowe* (Steppe Tales), was published in Lviv in 1871. He translated Shevchenko's and Yu. Fedkovych's poems and M. Vovchok's stories into Polish, and W. Shakespeare's *Hamlet*, Molière's *George Dandin*, and A. Mickiewicz's sonnets into Ukrainian. He also prepared a Ukrainian grammar (unpublished) and wrote a brochure on 19th-century Ukrainian literature (1871). V. Radzykevych's 119-page article about him was published in *Zapysky NTSh* in 1911, and many of his fables were reprinted in the 1971 Soviet Ukrainian anthology *Ukrains'koiu muzoiu natkhnenni* (Inspired by the Ukrainian Muse).

R. Senkus

Sviezhynsky, Petro [Svježyns'kyj], b 5 October 1911 in Usa, near Ushachy, Vitsebsk gubernia (now Belarus). Historian. A graduate of Odessa University (1939), he was a lecturer (from 1962) and head (from 1970) of the Department of the History and Theory of Co-operatives at the Lviv Trade and Economics Institute. A specialist in Western Ukrainian socioeconomic history, he published numerous works, including *Ahrarni vidnosyny na Zakhidnii Ukraini v kintsi XIX-na pochatchku XX st.* (Agrarian Relations in Western Ukraine in the Late 19th and Early 20th Centuries, 1966).

Svii, Pavlo. See Svientsitsky, Pavlin.

Svineld (Sveneld, Svindil), b and d ? 10th-century Rus' noble. He was a close associate of and vassal to the Kievan Rus' leaders Ihor, Olha, and Sviatoslav Ihorevych. He fought with the Ulychians (938–40), ruled over Ulychian and Derevlianian lands granted him by Ihor, helped Olha to suppress the Derevlianian revolt of 945 after Ihor was killed, and took part in Sviatoslav's Balkan campaigns. After Sviatoslav's death in 972, he became embroiled in the internecine Rus' struggle for power. According to some scholars Svineld was the model for the legendary folk character 'black raven Santal.'

Svistel, Frants [Svistel', Franc], b 17 July 1887 in Buchach, Galicia, d 4 July 1966 in Syracuse, New York. Lawyer and civic and political leader. After graduating in law from Lviv University (1912) he joined the Legion of Ukrainian Sich Riflemen and served as its quartermaster during the war. In 1922 he opened his own law office in Pere-myshliany and became active in local political, civic, and co-operative affairs. In 1935 he moved to Lviv, where he became director of the head office of the Ukrainian National Democratic Alliance. During the Second World War he was arrested by the Gestapo and was imprisoned for four years at Auschwitz. After emigrating to the United States from Germany in 1950, he was active in local Ukrainian organizations in Syracuse.

Svit, Ivan (Sweet, John), b 27 April 1897 in Kharkiv gubernia, d 8 March 1989 in Seattle. Journalist and community leader; member of the Shevchenko Scientific Society from 1984. In 1918 he made his way to the *Far East (Zelenyi Klyn). From there he fled from Soviet rule to *Harbin, Manchuria, where he was assistant editor of the Russian

Ivan Svit

newspaper *Kommercheskii telegraf* (1925–9), published and edited the Ukrainian **Man'dzhurs'kyi vistnyk* (1932–7), and contributed articles on Ukrainian life in the Far East to *Dilo* in Lviv and other papers. In 1942 he edited *The Call of the Ukraine* in Shanghai. As a postwar refugee in the United States from 1951, he contributed to *Svoboda* and other Ukrainian periodicals. Svit wrote several works in Russian, Ukrainian, and Japanese on Ukrainian life in China and the Far East, including *Ukrainskii dal'nii vostok* (The Ukrainian Far East, 1934), *Zelena Ukraina* (Green Ukraine, 1949), and *Ukrains'ko-iapons'ki vzaiemyny, 1903–1945* (Ukrainian-Japanese Relations, 1903–45, 1973).

Svit (World). The first Ukrainian newspaper published in Transcarpathia; the weekly organ of the Russophile *Society of St Basil the Great, published in *yazychiie in Uzhhorod in 1867–71. Edited by three teachers at the Uzhhorod gymnasium, Yu. Ihnatko, K. Sabov, and V. Kymak, it contained articles on Transcarpathian folklore, ethnography, religious and church affairs, history, economic affairs, and farming, as well as literary works. Following a split in the society and its takeover by the Magyarone faction, the newspaper was replaced by *Novyi svit* (1871–2). Edited by Rev A. Gebei, it forsook *yazychiie* and promoted the use of the vernacular.

S'vit

S'vit (World). A socialist literary, political, and scholarly monthly published in Lviv from January 1881 to September 1882. It was envisaged as a pan-Ukrainian progressive forum. I. *Belei figured as its publisher and editor, but its de facto editor and main contributor was I. *Franko. In it Franko serialized his novel *Boryslav smiietsia* (Boryslav Is

Laughing) and published several poems, a story, and many political, literary, and ethnographic articles. The magazine's polemical and satirical articles criticized the Galician populists and denounced the Russophiles. Because of its then unpopular radical politics and use of the phonetic orthography, *S'vit* attracted only about 150 subscribers. Issues 4 and 13 were held up by the Austrian authorities, and the magazine folded after 21 issues. P. Babiak's index to *S'vit* was published in Lviv in 1970.

S'vit (World). A literary and scholarly semimonthly magazine published in Lviv in 1906 (20 issues) and 1907 (17 issues; the last issue for 1907 appeared in 1908). Until October 1906 it was the organ of the Galician modernist group **Moloda Muza*. In 1907 it was subtitled 'An Illustrated Periodical for Ruthenian Families' and had ties with moderate circles in the Ukrainian Radical party. *S'vit* was initially published and edited by V. Birchak with the aid of P. Karmansky, O. Lutsky, and M. Yatskiv. B. Lepky, V. Shchurat, and V. Pachovsky were artistic advisers. Later V. Budzynovsky (nos 14–20) and M. Yatskiv (in 1907) were the editors and publishers. All of the aforementioned contributed prose, poetry, articles on literature and art, and/or reviews. Besides translations from European and American authors (eg, M. Maeterlinck, G. de Maupassant, E.A. Poe, O. Wilde, F. Nietzsche), *S'vit* was the first to publish Kobylianska's novel *Nioba*, I. Karpenko-Kary's drama *Sava Chalyyi*, and M. Starytsky and L. Starytska's novel *Pered bureiu* (Before the Storm). Its 'art for art's sake' orientation was criticized by I. Franko. Like its antecedent **Ruska khata*, it folded because of a lack of subscribers.

Svit (World). A semimonthly and, in 1929, monthly journal of politics and culture, published in Lviv in 1925–9. It was the organ of the right faction of the Ukrainian Social Democratic party and was edited by I. Kvasnytsia.

Svit dytyny

Svit dytyny (Child's World). An illustrated semimonthly and, from 1925, monthly children's magazine, published in Lviv in 1919–39. In 1923–5 it was a supplement to **Moloda Ukraina*. It was published and edited by M. *Taranko, and its contributors included some of the best writers of children's literature and teachers in Western

Ukraine. It was very popular there and among Ukrainian immigrants in North America. From 1920 the *Svit Dytyny* publishing house (est November 1919) also issued a series of some 230 illustrated children's books by foreign authors in translation and by Ukrainian writers, such as O. Wilde, J. Swift, A. Chekhov, N. Gogol, J. Verne, A. Lototsky (pseud: Ya. Vilshenko, O. Bilousenko), V. Khronovych, O. Makovei, V. Levytsky-Sofroniv, M. Pidhrianka, F. Kokovsky, and B. Lepky.

Svit molodi (World of Youth). A monthly organ of the Youth Section of the pro-Communist *Ukrainian Labour-Farmer Temple Association, published in Winnipeg from March 1927 to July 1932. It was edited by M. Irchan (1927–9), M. Lenartovych (1929–30), and J. Boyd (1930–2) and was renamed *Boiova molod'* (Militant Youth) in June 1930. It contained articles on socialism, organizational news, prose, poetry, and plays. It published harsh criticisms of capitalism, fascism, and Ukrainian nationalism, and consistently defended the USSR. In 1929 it had a circulation of approx 3,700.

Svit molodi (World of Youth). A monthly cultural and educational journal for teenage girls, published in Kolomyia in 1934–9. In 1934–5 it appeared as a supplement to **Zhinocha dolia*. The editor was I. Vilde, and contributors included U. Kravchenko, D. Vikonska, S. Yablonska, V. Simenovych, and I. Zubenko.

Mykola Svital'sky

Svital'sky, Mykola [Svital's'kyj], b 12 December 1884 in Rohizne, Sumy county, Kharkiv gubernia, d 15 September 1937. Geologist; full member the AN URSR (now ANU) from 1930. He graduated from the St Petersburg Mining Institute in 1911. He conducted geological research in eastern Siberia and worked in St Petersburg before moving to Ukraine in 1921. There he studied the Kryvyi Rih Iron-ore Basin and other geologically significant areas, and assessed their ore and oil potential. He became an associate director of the Ukrainian Geological Committee (1926), director of the ANU Institute of Geological Sciences (1934), and vice-president of the ANU (1935). His main scholarly work dealt with the structures and origins of ore deposits as well as the petrography of mountain rocks. Svital'sky died during the Stalinist terror.

Svitlo (Light). The first and only Ukrainian-language pedagogical journal in Russian-ruled Ukraine before the 1917 Revolution. It was published nine times a year by the Ukrainskyi Uchytel society in Kiev, from September 1910

to August 1914 (a total of 36 issues). The founder and first editor was H. Sherstiuk; he was succeeded after his death in 1911 by his wife, L. Sherstiuk. *Svitlo* contained articles on educational theory and preschool, elementary, secondary, and extracurricular education; prose; poetry; news; criticism; and book reviews. It advocated teaching in Ukrainian in elementary schools and worked to organize Ukrainian teachers and cultural workers. Among the contributors were prominent pedagogues, cultural figures, and writers. The journal was frequently confiscated by the tsarist authorities. It was closed down after Russia entered the First World War.

Svitlo (Light). A monthly children's journal published in Uzhhorod in 1913–14 and 1916. It was edited by Rev T. Skyba.

Svitlo (Light). An unofficial weekly organ of the Communist Party of Western Ukraine, published in Lviv in 1925–8 (a total of 139 issues). It was edited by V. *Bobytsky to April 1927. For a short time in 1927–8 it was under the influence of a faction of the more independent Ukrainian Social Democratic party, led by I. Kvasnytsia. When pro-Soviet forces re-established their control over the paper, it was closed by the Polish authorities. *Svitlo* generally supported the Soviet Union and harshly criticized Ukrainian nationalists in Western Ukraine.

Svitlo (Light). A popular journal published monthly (with interruptions) by the Prosvita society in Mukachiv in 1933–8. Edited by P. Petrychko, L. Romaniuk, and V. Kurylenko, it provided practical advice on agricultural and economic affairs.

Svitlo (Light). A Sovietophile newspaper published by the Union of Ukrainian and Belarusian Workers' Organizations in Buenos Aires semimonthly from 1935 and semi-weekly in 1942–3. The first editor was S. Valchuk. *Svitlo* contained articles on cultural and economic topics and political commentary, and strongly criticized the Ukrainian nationalist community in Argentina. It was closed down by the Argentinian government in 1943. It was revived in 1946 and succeeded by the weekly **Znannia* in 1949.

Svitlo (Light). A popular religious monthly magazine published semimonthly (1938–55) and then monthly by the Basilian order in Canada. It appeared in Mundare, Alberta, to 1949 and since then has been published in Toronto. Its editors have been Revs M. Romanovych (1938–43), A. Trukh (1943–6), I. Nazarko (1946–8), V. Dribnenky (1948–56), M. Solovii (1957–64), O. Kupranets (1964–88), and N. Svirsky (since 1988). The magazine publishes church news and articles on religious, cultural, and historical topics. Since 1940 it has also published an annual almanac.

Svitlo i tin' (Light and Shade). An organ of the Ukrainian Photographic Society, published monthly in Lviv in 1933–9. The journal's editors and contributors included Yu. Dorosh, S. Shchurat, O. Mokh, D. Figol, and Ya. Savka.

Svitlovodske or **Svitlovodsk** [Svitlovods'ke or Svitlovods'k]. IV-14. A city (1990 pop 57,000) on the Kremenchuk Reservoir and a raion center in Kirovohrad oblast. It

Svitlo i tin'

arose in 1961, when the inhabitants of Novoheorhiivske (est 1680s), Taburyshche (est 17th century), and Kryliv (est 12th century) were resettled in the workers' settlement of Kremenchukhesbud (est 1954) to make way for the flooding of the reservoir. In 1962 the city was renamed Kremhes, and in 1969, Svitlovodske. It is a river port and an industrial center with a hydroelectric station, several non-ferrous metallurgical plants, and a furniture, a ceramics, and a plastics factory.

Svitlychna, Hanna [Svitlyčna], b 20 April 1939 in Pavlohrad, Dnipropetrovske oblast. Poet of the **shestydesiatnyky*. She is the author of the collections *Stezhky nekhodzheni vesniani* (Untrodden Spring Paths, 1961), *Zolote pereveslo* (The Golden Sheaf Band, 1963), *Soniachni pry-chaly* (Sunny Docks, 1966), *Dozrivannia* (Maturation, 1969), *Kol'ory* (Colors, 1970), *Dobroho ranku* (Good Morning, 1972), *Litozbir* (The Summer Harvest, 1973), *Kordony sertsia* (Borders of the Heart, 1974), *S'ohodni i zavzhdy* (Today and Forever, 1978), *Zorom sertsia* (With the Vision of the Heart, 1980), *V siaivi kryla* (In the Wing's Glow, 1982), and *Ter-novyi svit* (The Thorny World, 1985).

Nadiia Svitlychna

Svitlychna, Nadiia [Svitlyčna, Nadija], b 8 November 1936 in Polovynkyne, Starobilske raion, Luhanske oblast. Dissident and political prisoner; sister of I. Svitlychny. She was arrested in April 1972 and sentenced in March 1973 to four years in a labor camp for women in the Mordovian ASSR, for her involvement in the Ukrainian dissident

movement, her defense of political prisoners, and her dissemination of samvydav literature. After her release in May 1976, she returned to Kiev, where she was further persecuted. In October 1978 she was allowed to emigrate to the United States with her two sons. She has been active in the *Ukrainian Helsinki Group's External Representation, published the *Herald of Repression in Ukraine* (1980–5), and edited a pamphlet on Yu. Lytvyn (1980) and an edition of V. Stus's poetry (1986).

Ivan Svitlychny

Hryhorii Svitlytsky (self-portrait, pastel and pencil, 1925)

Svitlychny, Ivan [Svitlyčnyj], b 20 September 1929 in Polovynkyne, Luhanske okruha, d 25 October 1992 in Kiev. Poet, literary critic, human rights activist, and dissident. After graduating in philology from Kharkiv University in 1952, he worked as an editor of *Radians'ke literaturoznavstvo*, a research associate of the AN URSS (now ANU) Institute of Literature, and a researcher in the dictionary department of the ANU Institute of Linguistics. In 1965 he was fired from his job and arrested for his 'nationalistic' activities, namely, smuggling abroad V. Symonenko's works. After eight months in prison he was released. In 13 January 1972 he was arrested for contributing to and distributing samvydav literature and was sentenced to seven years' hard labor and five years' internal exile. He was seriously ill in labor camp and suffered two strokes during exile. Upon his release in 1984 he returned to Kiev permanently crippled.

Svitlychny's critical articles began to appear in such journals as *Vitchyzna*, *Radians'ke literaturoznavstvo*, and *Dnipro* while he was a student. In his early works on literary theory he rejected the application of philosophical concepts to the study of esthetics and literature. He was closely identified with the *shestydesiatnyky in the 1960s, and devoted much attention to their work. He translated Czech (V. Nezval, F. Halas, J. Mahen, J. Hanzlik), Slovak (M. Rufus), and French (J. de La Fontaine, P.-J. de Béranger, C. Baudelaire) works and *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign) into Ukrainian. During imprisonment and exile he wrote poetry, some of which has appeared in the West. In the late 1980s under Perestroika some of his works and some articles about him began to appear again in the Soviet press. A collection of his poetry,

Sertse dlia kul' i dlia rym (A Heart for Bullets and Rhymes), appeared in 1991.

B. Balan

Svitlychny, Kostiantyn [Svitlyčnyj, Kostjantyn], b 5 March 1922 on the Hruzkyi state farm, now in Makiivka raion, Donetsk oblast. Humorist and satirist. A former teacher and an editor of the journal *Donbas*, he began publishing in 1948 and has written the storybooks *Rep'iakhy* (Burrs, 1957), *Z vysoty suputnyka* (From a Sputnik's Height, 1958), *Ia i Kamila* (I and Kamila, 1961), *Sterezhys' avtomobilia* (Beware of the Automobile, 1962), *Nerentabel'na liubov* (Inexpedient Love, 1965), *Serenada pid terykonamy* (Serenade below the Slag Heaps, 1970), *Humorystychni opovidannia* (Humorous Stories, 1973), and *Ne bez usmishky* (Not without a Smile, 1982), and the novelettes *Chyie ty, nebo?* (Whose Are You, Sky?, 1960), *Mizh solov'iamy* (Among Nightingales, 1963), *Lehendy Chernechoho ozera* (Legends of Cherneche Lake, 1973), *Holubooka Serhiivka* (Blue-eyed Serhiivka, 1977), and *Vit'ko Kushch – peteushnyk* (Vitko Kushch the PTU-man [vocational-technical school student], 1985).

Svitlychny, Yefrem [Svitlyčnyj, Jefrem], b 10 February 1901 in Zhykhar, Kharkiv county, d ? Socialist-realist painter and graphic artist. He studied (1922–9) and taught (1941–63) at the Kharkiv Art Institute. Most of his paintings depict Soviet Ukrainian genre scenes; they include *Tractor Column in the Field* (1933), *Hay Gathering* (1934), *On Collective-Farm Fields* (1947), and *Evening in the Field* (1960). He also designed propaganda posters and prints.

Svitlychny, Yevhen [Svitlyčnyj, Jevhen], b 24 August 1948 in Kaunas, Lithuania. Theater set designer and painter. Svitlychny was born into a Ukrainian family of artists from Kharkiv and has lived in Kharkiv since 1955. Since graduating in 1974, he has worked as an artist at the Kharkiv Theater of Opera and Ballet. His work there has inspired paintings such as *Carmen* (1983) and *Torero* (1984). More recently Svitlychny has embraced Ukrainian and Christian subject matter. His first solo exhibition was held in Kiev in 1986. He is a founding member of Panorama, an informal artists' society created in 1986 in Kharkiv. His work was published for the first time in 1989, in the journal *Kafedra* (no. 9).

Svitlytsky, Hryhorii [Svitlyč'kyj, Hryhorij], b 27 September 1872 in Kiev, d 28 July 1948 in Kiev. Realist painter and graphic artist. He studied at the Kiev Drawing School (1889–93) and under I. Repin, M. Kuznetsov, and A. Kuindzhi at the St Petersburg Academy of Arts (1893–1900). From 1918 he took part in the exhibitions of the *Peredvizhniki society, was a member of the Association of Artists of Red Ukraine (1926–9) in Kiev, and taught at the Kiev State Art Institute (1946–8). His early works are mostly portraits, genre paintings, and nocturnal landscapes, often on a musical theme, such as *Melody* (1900), *To the City* (1907), *Musicians* (1912), and *Nocturne* (1914). In 1918–20 he worked as a book illustrator and poster designer. In the Soviet period he painted portraits; genre paintings, such as *Village Council* (1918), *Flourishing Collective Farm in Bloom* (1935), and *Motherland* (1945); and lyrical landscapes, such as *Podil [District] in Kiev* (1924) and *On the Dnieper* (1939). By applying different colors with

tiny brush strokes, he achieved an effect similar to that of pointillism. B. Butnyk-Siversky's book about him was published in Kiev in 1958.

Serhii Svitoslavsky: *The Dnieper Rapids* (oil, 1885)

Svitoslavsky, Serhii [Svitoslavs'kyj, Serhij], b 6 October 1857 in Kiev, d 19 September 1931 in Kiev. Landscape painter. After studying at the Moscow School of Painting, Sculpture, and Architecture (1875–83) he returned to Kiev. From 1884 he took part in the exhibitions of the *Peredvizhniki society, and in 1891 he became a member of the society. During the 1905 Revolution he contributed to the satirical magazine *Shershen'* and helped students expelled from the Kiev Art School. His landscapes are noted for their colors. Some of his best-known works are *Dnieper Rapids* (1885), *Oxen in the Field* (1891), *Street in a County Town* (1895), *Myrhorod* (1905), *Winter* (1905), *On a River* (1909), *Ferry on the Dnieper* (1913), *Vicinity of Kiev: Winter*, *Vicinity of Kiev: Summer*, and *The Dnieper at Dusk*. His travels in Central Asia in the late 1890s gave rise to a group of landscapes, including *Steppe*, *Goat Herd in the Mountains*, and *Ships of the Desert* (1900). After his eyesight deteriorated in the early 1920s, Svitoslavsky gave up painting. Albums of his works were published in Kiev in 1955 and 1989.

Svitova zirnitsia (*Morning Star*). A newspaper for peasants published by the Polish magnate J. *Woloszynowski weekly (with interruptions) in 1906–12, semi-monthly in 1913, and irregularly in 1917 and 1920. It appeared in Mohyliv-Podilskyyi (1906–8), the village of Penkivka, in Podilia gubernia (1909–11), Kiev (1911–13, 1917), and Kamianets-Podilskyyi (1920). The paper provided practical advice on farming, beekeeping, orcharding, and the co-operative movement in Ukraine. It also published literary works by P. Hrabovsky, B. Hrinchenko, O. Kovalenko, L. Hlibov, S. Rudansky, I. Nechui-Lyvytsky, O. Kobylanska, and other writers, as well as translations of H.C. Andersen and G. de Maupassant. In 1906 the newspaper was printed in the *yaryzhka alphabet, but it soon switched to Standard Ukrainian. In 1906–7 it published the children's supplement *Chytaite, dity!*

Svito-vyd (*World Look*). A literary and art journal published semiannually since 1990 as the organ of the *New York Group and the Kiev branch of the Writers' Union of Ukraine. The aim of the journal is to manifest the unity of Ukrainian creative forces by providing a forum for writers and artists regardless of their habitat or political orientation. The editor in chief is B. *Boychuk, and the editor from Ukraine is I. *Rymaruk. *Svito-vyd* was the first Ukrai-

Svito-vyd

nian literary journal to have an editorial board composed of authors from Soviet Ukraine and from the diaspora. The journal solicits contributions of poetry, short prose, criticism, and translations from contemporary Ukrainian authors from all parts of the world. The publication is financed by M. Kots, an émigré benefactor, and is sold both in Ukraine and abroad.

Švitrigaila (Orthodox names: Oleksander and Lev; Catholic name: Boleslav), b ca 1370, d 10 February 1452 in Lutske, Volhynia. Grand duke of Lithuania (1430–2); son of Algirdas and brother of Władysław II *Jagiello. He ruled the Vitsebsk appanage (from which he was expelled by *Vytautas in 1393) and the Polish fiefdom of Podilia (1400–2). Later, supported by the Teutonic Knights, Muscovy, and Moldavia, he fought against Vytautas and Jagiello. In 1420 he made peace with Vytautas and received the Novhorod-Siverskyi and Briansk appanages. After Vytautas's death Švitrigaila was backed by Ukrainian and Belarusian magnates (who were promised high offices in the Grand Duchy of Lithuania) and by Lithuanian magnates (who wanted independence from Poland) in his appointment as grand duke of Lithuania (1430). In 1432 he fought against Poland for the control of Podilia. Jagiello's supporters instigated a rebellion against Švitrigaila in Lithuania, as a result of which he was defeated and replaced by *Žygimantas. To neutralize Švitrigaila's popularity with Ukrainian and Belarusian subjects Jagiello and Žygimantas granted the Orthodox equality with the Catholics (1432). Švitrigaila continued to fight for the throne, but he suffered a major defeat in Lithuania on 1 September 1435. For a while he preserved his control over the Ukrainian territories of the Grand Duchy of Lithuania, but after 1438 he ruled only Volhynia and eastern Podilia. He was buried in the Vilnius cathedral.

Matusas, J. *Švitrigaila* (Kaunas 1938)

A. Zhukovsky

Svoboda, Yosyf, b ?, d ca 1885. Painter and graphic artist of Czech origin. From 1838 he worked as a lithographer in Lviv, where he made portraits, landscapes, and historical prints, sometimes on Ukrainian themes (eg, *Cossacks from Chyhyryn in Istanbul*, *Sava Chaly*, and *Nastia Lisovska, Wife of Süleyman II*). He also illustrated books and magazines.

Svoboda

Svoboda (Liberty). The oldest existing Ukrainian newspaper and the most widely read in the Western world. Founded by members of the *American Circle as a semi-monthly in September 1893, it appeared weekly from March 1894 and three times a week from August 1914. Since January 1921 it has appeared five days a week. The paper was from the beginning the official organ of the *Ukrainian National Association (UNA) and has been owned by it since 1908. Until June 1895 it was published in Jersey City, New Jersey, and then in Shamokin (1895–6), Mt Carmel (1896–1900), Olyphant (1900–3), and Scranton (1903–6), Pennsylvania. Until 1903 the paper used *etymological spelling. In December 1906 it moved to New York, and since April 1911 it has again been published in Jersey City. The chief editors have been Revs H. Hrushka, N. Dmytriv, and I. Konstankevych (1895–7), S. Makar (1897–1900), and I. Ardan (1900–7), who were also the publishers; A. Tsurkovsky (1907–9, 1911–12); O. Stetkevych (1910–11, 1912–19); V. Lototsky (1919–26); O. Reviuk (1926–33); L. Myshuha (1933–55); A. Drahan (1955–78); V. Tershakivets (1979–80); and Z. Snylyk (1980–). In the interwar period the associate editors were V. Kedrovsky, E. Liakhovych, and S. Demydchuk; since the Second World War they have been I. Korovytsky, L. Lutsiv, I. Kedryn, V. Davydenko, B. Kravtsiv, and M. Sosnovsky. Many prominent Western Ukrainian and émigré journalists have been regular contributors to *Svoboda*, including, in its first decades, V. Budzynovsky, I. Franko, M. Pavlyk, K. Genik, V. Hnatiuk, M. Lozynsky, B. Lepky, O. Oleksiv, and M. Pavlyk.

From the outset, in addition to providing news, information, and analyses to a Ukrainian-speaking audience, *Svoboda* has served as an important vehicle for the Ukrainian national movement in the United States. Initially it spearheaded the fight against the Russophiles among Ukrainian immigrants and successfully discredited tsarist propaganda. It was instrumental in raising support for creation of the *American Ruthenian National Council in 1914 and the *Ukrainian Congress Committee of America in 1940. The paper covered the Ukrainian struggle for independence following the February Revolution of 1917, and expressed its support for the Central Rada, the UNR, and the Western Ukrainian National Republic. In the interwar period it raised awareness of Polish oppression and atrocities in Western Ukraine, the man-made famine of 1932–3 in Soviet Ukraine, and the Stalinist terror in the USSR. At that time it maintained close relations with several Ukrainian newspapers in Galicia. After the Second World War it led the action to bring Ukrainian displaced persons to the United States. *Svoboda* has always reported extensively on Ukrainian life in the United States and elsewhere, and also served as the main source of information for Ukrainians in Canada and Brazil before the emergence of Ukrainian newspapers there. It has contained supplements for various Ukrainian youth, community, and cultural organizations in the United States. The paper's

circulation has remained steady in recent years at approx 18,000, the largest among Ukrainian papers in the West.

At various times the *Svoboda* Press has published several series of informational and educational booklets and brochures on a variety of topics. Since 1896, together with the UNA, it has issued approx 300 Ukrainian-language books (memoirs, collections, monographs, and literary works) and over a dozen English-language works on Ukrainian history and literature (by authors such as M. Hrushevsky, D. Doroshenko, D. Dontsov [Snowyd], G. Vernadsky, S. Shumeyko, C. Manning, W. Chamberlain, L. Myshuha, J. Panchuk, and A. Drahan); was involved in the preparation and publication of the two-volume *Ukraine: A Concise Encyclopaedia* (1963, 1971); has printed the English-language quarterly *Ukrainian Juvenile Magazine* (1927–33), the **Ukrainian Weekly* (since 1933), and the children's magazines **T'svitka* (1914–17) and **Veselka* (since 1954); and published in 1897, 1901–36, 1940, 1944, 1949, and since 1951 annual calendar-almanacs containing literary works, articles on historical and cultural topics, and information about the history of the newspaper and the UNA (especially in the anniversary issues of 1936, 1944, 1953, 1963, 1973, 1978, and 1983). An index of Ukrainian-Canadian content in *Svoboda* to 1904 was prepared by F. Swyripa and A. Makuch and published in 1985. Since 1983 a selective index to *Svoboda* has been compiled by the Immigration History Research Center at the University of Minnesota; vol 1 (1893–99) was published in 1990.

B. Balan, B. Kravtsiv

Svoboda (Freedom). A newspaper of political and economic affairs, published in 1897–1919 and 1922–39; after **Dilo* one of the longest-running Ukrainian newspapers in Galicia. The organ of the *National Democratic party and, from 1925, the *Ukrainian National Democratic Alliance, it was published in Lviv except during the Russian occupation of 1915, when it appeared in Vienna, and in 1919, when it was published in Stanyslaviv (now Ivano-Frankivske). Its periodicity varied, but for most of its existence it appeared weekly. In its early years *Svoboda* devoted particular attention to rural issues and published practical advice on farming and the prices of agricultural products. It featured regular reports from correspondents throughout the countryside and reports on the activities of the Prosvita society and various co-operatives. Later it devoted more attention to international political affairs. The editors of *Svoboda* included prominent political figures, such as K. Levytsky, V. Okhrymovych, V. Budzynovsky, L. Tsehelsky, V. Bachynsky, M. Zaiachkivsky, S. Baran, M. Strutynsky, O. Kuzma, and V. Tselevych. The paper had a pressrun of 1,850 in 1897, 6,500 in 1912, 9,500 in 1913, 8,500 in 1917, and 2,350 in 1930.

Svoboda (Freedom). A weekly Ukrainophile newspaper published in Uzhhorod in 1922–38 as the continuation of **Nauka*. The editor and publisher was A. Voloshyn; V. Zheltvai and Yu. Sopko were the managing editors. The organ of the *Christian People's party in Transcarpathia from 1925, *Svoboda* was published in the Transcarpathian dialect until 1930, but afterward it appeared in Standard Ukrainian. It was succeeded by **Nova svoboda*.

SVU. See Union for the Liberation of Ukraine.

Vasyl Svyda: *To the Mountain Pasture* (wood, 1954)

Svyda, Vasyl, b 22 October 1913 in Patskanove, Transcarpathia, d 19 April 1989 in Uzhhorod. Sculptor. After graduating from a handicrafts school in Yasynia (1934) he wandered about Czechoslovakia before finding work in a church art workshop in Brno. After the Second World War he taught for many years at the Uzhhorod School of Applied Art. He worked in plaster, clay, and, particularly, wood. His works include the bas-relief series 'Seasons of the Year' (1947) and 'To School' (1949); many-figured compositions, such as *To the Mountain Pasture* (1954) and *Wedding* (1965); high reliefs, such as *Opryshoks* (1954) and *Transcarpathia* (1959–61); and majolica or terra-cotta figurines.

Svydivets [Svydivec'] (also Svydovets). The largest mountain group in the Polonynian Beskyds of the Carpathians, situated between the Teresva and the Chorna Tysa rivers in Transcarpathia oblast. The main portion of the ridge has elevations ranging from 1,400 to 1,880 m (Mt Blyznytsia). A short spur juts from its northern end, and a longer one along its southern edge. Deep, narrow valleys cut sharply into the wide, smooth mountains. Postglacial cirques, some of them now filled with lakes, can be found along the ridge's northern slopes. Fir forests up to an elevation of 1,400 m are also located there. The southern slopes of the formation are covered with beech forests up to an elevation of 1,300 m. In the higher reaches of the mountains pastures can be found as well as the seasonal dwellings of shepherds. Permanent settlement in the region is found in the river valleys, most notably at Rakhiv and Ust-Chorna.

Svydnyk (Slovak: Svidník). An administrative center (1980 pop 7,500) of the Dukla krai, in the Prešov region of Slovakia. The town arose through the merger of Vyshnii and Nyzhnii Svydnyk in 1943. It is mentioned in historical documents as early as 1330. Today Svydnyk has a gymnasium and a sewing, farming, and building tekhnikum. It has two museums, the Museum of the Dukla Battles and the *Svydnyk Museum of Ukrainian Culture. The Festival of Ukrainian Song and Dance, renamed in 1977 the *Ukrainian Cultural Festival in Czechoslovakia, has been held in Svydnyk since 1956. Writers and scholars, such as Ye. Biss, O. Pavlovykh, and J. Polívka, lived and worked

Festival time in Svydnyk

there. O. Zilynsky is buried in the local cemetery. The surrounding district includes 105 villages, 93 of which are Ukrainian (1980, 27,312 residents). Some of them (Bodružal, Dobroslava, Hunkovce, Korejovce, Krajné Čierne, Ladomirová, Myrol'a, and Nyzhny Komárnik) have wooden churches which have been declared monuments of national culture by the Czech government.

A book by Myroslav Sopolyha (1990) documenting the first 35 years of the Svydnyk Museum of Ukrainian Culture

Svydnyk Museum of Ukrainian Culture (Музей української культури у Свиднику). A state-funded museum in Slovakia, specializing in the culture, history, and contemporary life of the Ukrainian population of the *Prešov region. The museum was formerly located in Medzilaborce (1956–7), Prešov (1957–60, as part of the Prešov Regional Museum), and Krasný Brod (1960–4); in 1964 it was moved into its own building in Svydnyk. A library (24,500 vols in 1981) and manuscript, tape, photo, film,

and phonorecord archives are located at the museum. The Dezyderii Myly Art Gallery was established there in 1983, and an outdoor museum of folk architecture on the grounds of the Svydnyk open-air theater was created as part of the museum in the early 1980s. One-room museums in the villages of Čertižné and Habura and the small Oleksander Dukhnovych Museum in the village of Topol'a were branches of the museum. The museum published exhibition catalogs and 11 large volumes (1965–7, 1969–72, 1976–7, 1979–80, 1982–3) of its serial *Naukovyi zbirnyk*, containing valuable studies on the Prešov region by I. Chabyniak, M. Rusynko, S. Hostyniak, V. Lakata, M. Shmaida, M. Sopolyha, I. Chyzhmar, and other Ukrainian scholars in Czechoslovakia. An anniversary guide to the museum was published in 1981. The museum's directors have been O. Hrytsak, Chabyniak, and, since the mid-1970s, Rusynko. In 1991 the museum was renamed the Dukhnovych Museum.

Anatolii Svydnytsky

Pavlo Svyrydenko

Svydnytsky, Anatolii [Svydnyč'kyj, Anatolij], b 13 September 1834 in Mankivtsi, Lityn county, Podilia gubernia, d 18 July 1871 in Kiev. Writer, community activist, and folklorist. He began his activities as a member of the clandestine *Kharkiv-Kiev Secret Society, which set itself the task of struggling with the tsarist regime, disseminating forbidden literature, and establishing Sunday schools. During that period he wrote a number of lyric poems against arbitrary rule and national oppression, of which only 'Horlytsia' (Turtledove, 1860) was published during his lifetime. 'Koly khochesh nam dobra' (If You Wish Us Well), 'V poli dolia stoiala' (Fate Stood in the Field), and part of 'Vzhe bil'sh lit dvisti' (For More Than Two Hundred Years Now) were published in *Literaturno-naukovyi vistnyk* by I. Franko in 1901. In 'Vzhe bil'sh' Svydnytsky decries B. Khmelnytsky's signing of the Pereiaslav Treaty of 1654.

Only 'Velykden' u podolian' (Easter among the Podolians) and 'Iz Mirgoroda' (From Myrhorod) were published in *Osnova* in 1861, out of the many articles on ethnography and against tsarist absolutism which Svydnytsky wrote in 1860–2. After the tsarist ban on all Ukrainian publications he published a number of articles and stories in Russian in the newspaper *Kievlianin*.

Liuboratski is considered to be Svydnytsky's major work. It is a chronicle, to a large extent autobiographical,

of the downfall of the Liuboratsky family of clergymen over the course of three generations. It is set in the Podilia region, which was dominated by the Polish aristocracy, tsarist oppression, and the inimical official Orthodox clergy. Its far-reaching range of subject matter prompted I. Franko to designate the work as the first realist novel in Ukrainian literature. In both form and content *Liuboratski* serves as a transition between the prose of H. *Kvitka-Osnovianenko and M. Vovchok and the later epic realism of I. Nechui-Levytsky and P. Myrny. The novel had no immediate influence on contemporary writers, however, because it was published for the first time, in *Zoria* (1886), 15 years after the author's death. It has appeared in many editions since then. A collection of Svydnytsky's writing (*Tvory* [Works]) appeared in 1958.

I. Koshelivets

Svyrenko, Dmytro, b 5 November 1888 in Merchky, Valky county, Kharkiv gubernia, d 26 October 1944 in Orenburg, Russia. Botanist and hydrobiologist; corresponding member of the AN URSS (now ANU) from 1934. A graduate of Kharkiv University (1912), he taught at Dnipropetrovske (1920–3 and 1927–41) and Odessa (1923–7) universities and at the Orenburg Pedagogical and Agricultural institutes in the Urals (1941–4). He also initiated the creation of the Dnipropetrovske Scientific Research Station of Hydrobiology (est 1927).

Svyrydenko, Pavlo, b 20 March 1893 in Putyvl, Kursk gubernia, d 25 December 1971 in Kiev. Zoologist; full member of the AN URSS (now ANU) from 1948. A graduate of Moscow University (1915), he was director of the Northern Caucasian Plant Conservation Station in Rostov-na-Donu, lecturer at Moscow University (1932–41), and director of the entomology laboratory of the All-Union Scientific Research Institute of the Sugar Industry (from 1941), and the ecology department of the ANU Institute of Zoology (1947–54). His major work was on the control of agricultural pests (vermin and insects) and the conservation of mammals and birds. He was one of the initiators of aerial spraying in Ukraine.

Svystun, Mykola (nom de guerre: Yasen, Voron), b 1912 in Odriv, Radekhiv county, Galicia, d 8 December 1944 in Rivne oblast. Senior UPA officer. He joined the Ukrainian Military Organization (1928) and the OUN, and as their leading activist in Radekhiv county, he was twice arrested by Polish authorities. During 1942–3 he organized and commanded UPA units in Volhynia. In 1944 he commanded a brigade in the UPA-South and was the top UPA commander at the Battle of *Hurby. He was killed in action while performing the duties of chief of staff of the UPA-South.

Svystun, Pylp, b 15 November 1844 in Toboliv, Zolochiv circle, Galicia, d 21 July 1916 in Rostov-na-Donu. Historian, educator, and Russophile leader in Galicia. After teaching at a gymnasium in Rzeszów he served as director of the library of the People's Home in Lviv (1904–12) and editor of its organ *Vistnyk Narodnoho doma*. He was an executive member of the Stauropigion Institute and president of the *Kachkovsky Society and editor of its publications. He wrote many articles and several books on the history of Galicia, including the study of T. Shevchenko *Chem est' dlia nas'' Shevchenko* (What Shevchenko Is for Us, 1885) and *Prikarpatskaia Rus' pod'' vladaniem Avstrii*

(Subcarpathian Ruthenia under the Rule of Austria, 2 vols, 1896–7; repr 1970), which criticized both the Austrian and the Polish authorities for restricting contacts with the Russian Empire as well as aiding Ukrainian 'separatism.'

Svystun, Vasyl. See Swystun, Wasyl.

Svytiaz Lake [Svytjaz'ke ozero]. II-4. A lake situated in the northwestern part of Volhynia oblast between the Buh River and the headwaters of the Prypiat River near the town of Svytiaz. The lake is 7.5 km long and approx 4 km wide, with a total area of 24.2 sq km. It is generally about 7 m deep, albeit with a maximum depth of 58.4 m. Its shores are mainly low-lying, and it has a large supply of fish. The lake is fed by artesian sources, and its water is clean and clear. Svytiaz is a popular resort area and a focal point of the recently established (1983) Shatsk National Park.

Swallow (Ukrainian: *lastivka*). A small, long-winged bird with a deeply forked tail, belonging to the family Hirudinidae. In Ukraine swallows are migrating birds with a strong homing instinct. Three species are common, the barn swallow (*Hirunda rustica*), the urban swallow or house martin (*Delichon urbica*), and the bank swallow or sand martin (*Riparia riparia*). The barn and urban swallows nest in human settlements in cup-shaped clay nests fastened beneath eaves. The bank swallows settle in colonies along steep banks of water bodies, where they build their nests in burrows. Owing to their close contact with humans, swallows figure prominently in Ukrainian folklore, folk songs, and poetry, as symbols of beauty and family unity. Their graceful flight pattern (in search of insects) was used to predict coming rains. Swallows are beneficial birds since they protect crops and forests by destroying flying insects.

Swamps. See Wetlands.

Swan (*Cygnus*; Ukrainian: *lebid*). The largest of the waterfowl in the subfamily Anserinae, family Anatidae, measuring up to 180 cm in length and 13 kg in weight. These graceful, long-necked birds glide majestically on water, although they cannot dive, and fly with slow wing-beats. Swans are often kept in park ponds. In Ukraine only the mute swan (*C. olor*) is found, in the Danube and Dniester deltas; the trumpeter swan (*C. cygnus*) and occasionally the Bewick's swan winter during their overflights on the Black Sea shores. The swan has been listed as an endangered species in Ukraine.

Sweden. A country on the eastern side of the Scandinavian Peninsula (1990 pop 8,529,000), with an area of 449,960 sq km. The majority of its inhabitants (90.8 percent) are Swedish, and there is a notable (3.1 percent) Finnish presence. There are about 2,000 Ukrainians in Sweden.

Although Sweden does not share borders with Ukraine, it has played an important role in Ukraine's history (particularly in the Princely and Cossack periods). The initial contacts between the two countries resulted from trade along the *Varangian route in the 9th century. The influence of the *Varangians contributed to the economic, cultural, and political development of Kievan Rus'. Even-

tually, dynastic ties were formed: Yaroslav the Wise married Olof Skötkonung's daughter Ingigerth, and Mstyslav (Harald) Volodymyrovych, who became grand prince in 1125, married Christina, the daughter of the Swedish king Ingi Stenkil.

Swedish-Ukrainian contacts were re-established after a long interruption at the beginning of the 17th century with the rise of the Cossacks as a power. Gustavus II Adolphus (1611–32), one of the Protestant leaders in the Thirty Years' War, solicited Cossack help against the Poles, and eventually (in 1631) sent his envoys directly to offer them a Swedish protectorate and an alliance against Poland. These overtures were rejected by Hetman I. Petrazhysky-Kulaha and the Cossack council.

Between 1650 and 1653 Hetman B. Khmelnytsky sought an alliance with Sweden against Poland, but Queen Christina (1632–54) did not wish to embark on a war with Poland. Her successor, *Charles x Gustav (1654–60), however, helped set up a broader anti-Polish coalition consisting of Ukraine, Sweden, Transylvania, Brandenburg, Moldavia, and Wallachia. A Ukrainian delegation headed by Hegumen Daniel Oliveberg de Graecani Atheniensis was sent to Stockholm in 1654 for detailed discussion. The following year Charles attacked Poland and quickly took Warsaw and Cracow. Feeling threatened by Sweden's victory, Muscovy signed a peace agreement with Poland in Vilnius in November 1656, which led to war with Sweden. Khmelnytsky then tried to extend the anti-Polish coalition. That prospect fell apart in the summer of 1657, however, when Charles was forced to transfer his forces and his attention from the Polish to the Danish front after Denmark declared war on Sweden, and Austria came to the aid of Poland.

Hetman I. Vyhovsky revived and strengthened ties with Sweden. In October 1657 a Ukrainian-Swedish alliance was concluded in Korsun, according to which the independent Ukrainian Cossack state was to extend to the Vistula River and include the Lithuanian voivodships of Brest and Smolensk. But this treaty had no practical effect, because Sweden was tied down with the Danish war, and Vyhovsky's own position was precarious. The hetman soon severed his Swedish connections and tried to come to terms with Poland in the Treaty of Hadiache.

During the Northern War (1700–21) Russia, allied with Denmark and Poland against Sweden, compelled the Cossacks of the Hetman state to take part in the Baltic campaigns. This development set in motion secret negotiations by Hetman I. *Mazepa with *Charles XII of Sweden in 1705 and led to the creation of an anti-Russian coalition in 1708. By October 1708 the Swedish army had entered Ukraine. Otaman K. Hordiienko brought the Zaporozhian Host into the coalition as well by signing a treaty with Charles XII on 28 March 1709. On 8 July 1709 the joint Swedish-Ukrainian force was defeated at the Battle of *Poltava. About 10,000 Swedes were killed and 3,000 captured in the battle. The Swedes retreated and finally capitulated at Perevolochna, while Charles and Mazepa fled to Bendery on Turkish territory with the remnants of their troops. After Mazepa's death (22 September 1709) Charles concluded a treaty with his successor, Hetman P. Orlyk, promising to help Ukraine in the struggle against Russia. After an unsuccessful attempt to gain control of Right-Bank Ukraine, Orlyk and 24 of his supporters emigrated to Sweden (1715–20). The wife of A. Voinarovsky, Anna, lived in Tynnelsö near Stockholm at this time.

In the second half of the 19th and in the early 20th century a number of women and girls from Galicia (Galicierna) worked in Sweden as farm laborers. Some of them stayed there and were assimilated. During the same period academic ties were established. The Kiev Archeographic Commission sent N. Molchanovsky to Sweden in 1898 to collect documents (published in 1908 in *Arkhiv Iugo-Zapadnoi Rossii*) in state archives pertaining to Ukrainian history. The Swedish archeologist and honorary member of the Archeological Committee of the All-Ukrainian Academy of Sciences T. Arne wrote about La Tenne culture relics, Roman and Arab coins, Gothic fibulae, and Vikings in Ukraine in *La Suède et l'Orient* (1914). The Swedish Slavist and writer A. Jensen visited Ukraine in 1909 and met M. Kotsiubynsky, I. Franko, O. Makovei, and V. Hnatiuk; translated works by I. Kotliarevsky, T. Shevchenko, and M. Kotsiubynsky into Swedish and German; and wrote articles and a monograph (1916) on Shevchenko. The Finnish writer J. Hemmer translated Shevchenko's poetry into Swedish (1919). V. von Heidenstam dealt with Ukraine in the late 17th century in his *Karolinerna* and *Mazepa och hans ambassadör*.

During the First World War a representation of the Union for the Liberation of Ukraine (SVU) was set up in neutral Sweden. It cultivated Swedish public opinion and published L. Tsehelsky's *Ukraina kolyshnia shveds'ka soiuzyntsia* (Ukraine, the Former Swedish Ally) in 1915. The Ukrainian Information Bureau, directed by V. Stepankivsky and M. Zalizniak, was opened in Stockholm in 1916. Although Sweden did not recognize the UNR, a Ukrainian diplomatic mission for Sweden and Norway was established in Stockholm in 1918. It was headed by B. Bazhenov and, in 1919, by K. Losky. Through Losky's efforts a book on Ukrainian history, geography, literature, and culture, *Ukrainarna* (Stockholm 1921), came out in Swedish under the editorship of A. Jensen and M. Erenpreis. The Swedish economist and sociologist G. Steffen supported Ukrainian independence and wrote a brochure in Swedish and English on Ukraine's relations with Russia and Poland.

In the interwar period the Finnish historian H. Gummerus wrote articles about Ukraine in Swedish and a book of recollections about Kiev, *Orostider i Ukraina* (1931). As well, the Ukrainian singer M. *Menzinsky (who had performed in the Swedish opera in 1904–8) moved to Stockholm in 1925, where he sang in the state opera and opened his own school of singing.

During the Second World War the Ukrainian Information Bureau for Finland and Scandinavia (UIFS) was set up in Helsinki by B. *Kentzhynsky. It published a bulletin in Finnish, Swedish, and German and supplied aid to Ukrainian POWs from the Red Army. In 1944 the bureau was moved to Stockholm. Kentzhynsky later directed the Ukrainian Press Bureau in Stockholm (1949–55); Yu. Borys and B. Zaluha were on the staff. Kentzhynsky was an associate of the historical association Karolinska Förbundet, which published his works on Swedish-Ukrainian relations and, particularly, on Charles X Gustav (1956), Charles XII (1959), and I. Mazepa (1962). Works by well-known Swedish writers, such as A. Strindberg, S. Lagerlöf, and E. Lindgren, have been translated into Ukrainian.

Most of the Ukrainian newcomers to Sweden during the interwar period were refugees from the USSR who had managed to flee via Finland. Some Ukrainians who had been deported to Karelia during the collectivization drive

Members of the executive of the Ukrainian Hromada in Sweden in 1949. From left: Hryhor Pukalo, Yurii Borys, Vasyl Stasiuk, Bohdan Skobovych-Okolot, Valerian Fedorchuk, Roman Rudnyk, Kyrylo Harbar, Bohdan Kentzhynsky

of 1932–5 escaped across the border in 1944. After the war the Swedish Red Cross sponsored a group of Ukrainian inmates of German concentration camps and Ukrainian workers in Germany and Austria. Some refugees from Poland, Karelia, and Bačka ended up in Sweden. In the years immediately following the war there were approx 2,000 to 2,500 Ukrainians in Sweden. A number of them subsequently emigrated to Canada or the United States. Today most Swedish Ukrainians live in the southern or central cities of Stockholm, Malmö, Göteborg, and Örebro. At one time Lund and Borås were also significant centers. Most Ukrainians worked as laborers, although there were a number of physicians, engineers, and teachers among them. The Orthodox community was served by Rev H. Matviienko from Hamburg and occasionally by Archbishop A. Dubliansky. Catholics were tended by Bishop I. Buchko and Rev M. van de Maele, and later by Bishop P. Kornyliak.

In 1947 the Ukrainian Hromada in Sweden (Ukrainska Sällskapet, or UHSh) was founded in Stockholm. Its presidents have been V. Fedorchuk (1947–51), V. Butko (1952), K. Harbar (1953–78), and B. Zaluha (1979–). Since 1954 it has published a quarterly bulletin, *Skandynavs'ki visti*. UHSh has three local affiliates: the Ukrainian-Swedish Hromada in Örebro (est 1975; president, H. Budiak), the Ukrainian-Swedish Cultural Association in Malmö (president, H. Horyn), and the Ukrainian-Swedish Cultural Alliance in Stockholm (president, B. Zaluha). The Orlyk Ukrainian Hromada functioned independently in Stockholm under the leadership of V. Dekhtiar in 1948–61. In the 1950s and 1960s the Ukrainian Academic Club, headed by Yu. Borys and B. Zaluha, was also active in the capital. B. Kentzhynsky, who for a time published *Stokhol'ms'kyi visnyk*, was a representative of the Ukrainian National Rada for Scandinavia.

Sweet flag (*Acorus calamus*; Ukrainian: *lepekha*, *air*, or *tatarske zillia*). A tall, herbaceous perennial plant (60–120 cm in height) of the family Araceae, also known as calamus root. In Ukraine sweet flag grows in Polisia and the forest-steppe territory on riverbanks, on lakeshores, and in marshy meadows. Volatile oil is extracted from the sweet flag rhizome to be used in perfumery, flavoring, and confectionery, and in medicine to stimulate the appetite and improve digestion and as a tonic against depression of the central nervous system.

Sweet sultan (Ukrainian: *hirchak*). A perennial herbaceous plant of the family Compositae, genera *Centaurea* and *Picris* (also called *Acroptilon*), with lanceolate leaves and pink, tubular flowers. It is toxic to horses and sheep and contaminates young crops. In Ukraine the most predominant is the creeping or common sweet sultan (*C. moschata*), which infests fields in Kharkiv, Zaporizhia, and Crimea oblasts. Control measures include quarantine, deep plowing, and herbicides.

Sweet vernal grass (*Anthoxanthum odoratum*; Ukrainian: *pakhucha trava*). A fragrant annual and perennial grass of the family Poaceae, the only one of four species that grows in Ukraine. It has thin, flat leaves and narrow flower clusters; its sweet scent of freshly mown hay is derived from the coumarin present in the leaves. Sweet vernal is used as a component of hay in feeding domestic animals.

Sweetbrier (*Rosa eglanteria* or *R. rubiginosa*; Ukrainian: *shypshyna*, *dyka rozha*). A small, prickly, wild rosebush with fragrant foliage, often planted as a roadside or screening shrub; it is also known as eglantine. Its pink flowers ripen into red hips that are rich in vitamin C (4,500 mg per 100 g) as well as sugars, organic acids, carotene, and pectin. The brown sweetbrier (*R. cinnamomea*) has the greatest concentration of vitamin C. The rose hips are used for the production of vitamin concentrates to treat vitamin deficiency or arteriosclerosis, to increase the resistance to local and general infections, in folk medicine to treat liver ailments, and to make syrups, liqueurs, and herbal teas.

Sweetgrass (*Hierochloe*; Ukrainian: *chapoloch*). A creeping perennial grass of the family Gramineae. In Ukraine aromatic (*H. odorata*), steppe, and southern sweetgrasses often grow as weeds in meadows, in fields, and among bushes. It is the favorite food of the bison of the Bilovezha Forest. Sweetgrass contains the odorous compound coumarin; soaked in grain alcohol, dried sweetgrass yields the alcoholic beverage Zubrivka.

Swiderian culture. A late Paleolithic to early Mesolithic culture of the 9th to 8th century BC that existed in the Baltic

Basin, in Ukraine along the Desna River, and in the Crimea. It was named after a site near Warsaw. The people of this culture engaged in hunting, gathering, and fishing. They were quite mobile and usually established temporary shelters along river banks or on high dunes. Their flint technology was well developed and they employed a distinctive type of arrowhead. The best-known Swiderian site in Ukraine is located at *Smiach.

Święcicki, Paulin. See Svientsitsky, Pavlyn.

Święty Krzyż. A strict-regime Polish prison located at Łysa Góra, Kielce voivodeship. Formerly a Benedictine monastery, it was converted into a prison in 1825. During the interwar period (1919–39) some political prisoners were kept there, including the OUN members (S. Bandera, M. Lebed, M. Klymyshyn, Ya. Karpynets, and Ye. Kachmarsky) who were sentenced at the Warsaw Trial in 1935.

Swimming (*plavannia*). The first swimming clubs in Ukraine were established in Odessa and Mykolaiv in the early 1900s. In 1913 an all-Russian swim meet was held in Kiev. In the 1920s swimming became a part of the Soviet physical education and sports competition programs, and in Polish-ruled interwar Western Ukraine, the *Ukrainian Sports Union promoted the sport. In 1947, Soviet Ukrainian swimmers began competing in some international competitions as members of USSR teams; from 1952 they competed in the Olympic Games. The Ukrainian M. Havrysh placed sixth in the women's 200-m backstroke event in the 1952 games. In the 1964 games G. *Prozumen-shchikova of Sevastopol won a gold medal (women's 200-m breaststroke OR, 2:46.4). In the 1980 games gold medals were won by S. Fesenko (men's 200-m butterfly, 1:59.76) and O. Sydorenko (men's 400-m individual medley OR, 4:22.09); both gold medalists were trained by the Ukrainian V. Smelova-Polishchuk. In the Olympic Games since 1952, Ukrainian swimmers have captured three gold, five silver, and five bronze medals in individual events. Other Ukrainian swimmers who have done well in international competitions are T. Deviatova (1964 Olympic bronze medal, women's 4 × 100-m medley relay), V. Dolhov (1980 Olympic bronze medal, men's 100-m backstroke), L. Hrebets (1968 Olympic bronze medal, women's 4 × 100-m medley relay), Yu. Hromak (1968 Olympic bronze medal, men's 4 × 100-m medley relay), V. Nemshilov (1968 Olympic bronze medal, men's 4 × 100-m medley relay), H. Prokopenko (1964 Olympic silver medal, men's 200-m breaststroke), V. Raskatov (1976 Olympic bronze medal, men's 400-m freestyle), V. Tkachenko (1988 Olympic silver medal, men's 4 100-m freestyle relay), V. Yaroshchuk (1988 Olympic bronze medals, men's 200-m individual medley and 4 100-m medley relay), M. Yurchenia (1976 Olympic silver medal, women's 200-m breaststroke), Yu. Bocharova, S. Kopchykova, V. Lozyk, Ye. Mykhailov, N. Shibaeva, N. Stavko, I. Ustylenko, and I. Zasieda. In 1987 there were 966 swimming coaches and 419 swimming pools in Ukraine.

O. Zinkevych

Swine (*Sus scrofa domestica*; Ukrainian: *svynia*). A mammal of the Suidae family, a stout-bodied, thick-skinned, short-legged omnivorous animal domesticated since the Neolithic period. Among farm animals it is the earliest to

A Ukrainian Spotted Steppe swine

mature and the most fertile. Most modern breeds produce 10 to 12 young per furrow, twice a year (even five times in two consecutive years). Swine are raised principally for meat and lard. Pork is the most popular meat in Ukrainian traditional *foods. The skin and bristles are also valuable, and in fact almost the entire animal is used effectively: the blood yields albumin, sausages, and feed meal; the bones provide bonemeal; and the guts are used as casing for sausages.

Commercial swine breeding in Ukraine developed toward the end of the 19th century. The most popular breeds of swine are the following: (1) Ukrainian White Steppe swine, of universal use, developed in Askaniia-Nova by M. Ivanov by crossing late-maturing local sows with Large White boars. The breed, well adapted to the arid steppe climate, was confirmed in 1934. (2) Ukrainian Spotted Steppe swine, bred for universal use in Askaniia-Nova during the period 1938–61 (confirmed in 1961) by crossing black spotted swine (which appeared as a mutant during the development of the White Steppe breed) with Berkshire, Mangalitsa, and Landrace breeds. (3) Medium White swine, developed in the 19th century in Britain and crossed with Transcarpathian long-eared swine, well adapted to local conditions. They were used in breeding Myrhorod (Mirgorod) swine. (4) Myrhorod swine, developed for meat and bacon in 1940 in Poltava oblast by crossing domestic sows with Berkshire, Medium White, Large White, and Large Black boars. These are well-proportioned, strong-bodied animals. Other specifically Ukrainian regional breeds include the Transcarpathian, the Subcarpathian, and the long-eared and the black-spotted swine of the Dnieper, Chernihiv, and Podilia regions. (See also *Hog raising.)

Switto (Light). A semimonthly newspaper for peasants, published in Kolomyia in 1881–2 in the Polish alphabet. The editor and publisher was M. Korenevych.

Switzerland. A country (1990 pop 6,756,000) in the Alpine region of central Europe, covering an area of 41,290 sq km. The major languages of the country are German

(mother tongue of 65 percent), French (18 percent), and Italian (10 percent). About 48 percent of the population is Roman Catholic, and 44 percent is Protestant. Switzerland's liberal government and neutrality in the world wars made it a refuge for political émigrés, including Ukrainians. Although their number was never large, Ukrainians in Switzerland have played an important role in Ukrainian cultural and political history.

Before the 1870s. The earliest contacts between Ukraine and Switzerland were sporadic. The first Swiss visitors to Ukraine were *Socinians in the 16th century. The archives of the Reformation Library in Geneva contain the works of S. Budny and other Socinians from Ukraine. The architect Petrus Italus of Lugano built the Dormition Church (1547), a Roman Catholic church, and a number of other buildings in Lviv. Starting in the 16th century Ukrainians (registered as Rutheni, Lituani, or Poloni) studied at Basel University.

Before 1708 I. Skoropadsky, colonel of the Starodub regiment, visited Switzerland several times and corresponded with Swiss acquaintances. One of his descendants, I. Skoropadsky, built a dendrological park in Trostianets in the mid-19th century and named a section of it Switzerland. After abdicating his hetmancy K. Rozumovsky lived in Switzerland, in 1765–7. His son Hryhorii worked on an estate near Lausanne in 1783–93 and founded the Society of Physical Science there. During the first half of the 19th century N. Gogol (1837) and Prince N. Reprin, with his wife and daughter Varvara, stayed briefly (1836–9) in Switzerland. Varvara's correspondence with Swiss public figures has been preserved in libraries in Geneva and Lausanne.

In 1820–46 the Russian government supported the immigration of French-speaking Swiss from Vaud canton into southern Bessarabia. Under the leadership of L.V. Tardan from Vevey, they established the Shabo (Shaba) colony on the Dniester Estuary near Akkerman. The settlers helped develop viticulture, wine making, and fruit growing there. In the 1850s there were 300 Swiss living in Shabo. In the 1860s and 1870s they were joined by newcomers from German cantons. The colonists imported valuable varieties of grape – Cabernet, Sauvignon, Riesling, and Muscat. The Rumanian census of 1930 recorded 300 German and 250 French Swiss in Shabo. When the Soviets occupied the region in 1940, most of the Swiss colonists returned to Switzerland. The few that stayed assimilated with the Ukrainian population.

1870s–1905. Ukrainian immigrants and students began to arrive in Switzerland in the second half of the 19th century. The first important center of Ukrainian and Russian immigration was Zürich, where Ukrainian students studied at the university and the polytechnic. In 1872 a student reading hall was established, with approx 100 Ukrainian and 100 Russian members. The Ukrainian colony included S. Podolynsky, I. Chernyshov, S. Slyvynsky, and V. Nahirny (who stayed in Switzerland to work as an architect until 1882). M. *Drahomanov lived in Zürich for a few months and participated with S. Podolynsky and M. Ziber in a Ukrainian-Russian socialist conference in 1873.

After leaving Ukraine in 1876, Drahomanov settled in Geneva and devoted himself to political work and publishing until 1889. He established a socialist circle, which included S. Podolynsky, M. Pavlyk (1878–82), F. Vovk (1879–87), M. Ziber, and Ya. Shulhyn. In Geneva Drahomanov

manov published the collection *Hromada* (5 vols, 1878–82) and (together with M. Pavlyk and S. Podolynsky) *Hromada – ukrains'ka chasopys'* (2 issues, 1881). As well, he published a large number of brochures on the Ukrainian question in Ukrainian, Russian, and the west European languages. In 1876 he established the *Ukrainian Press, which was run by A. Liakhotsky (Kuzma) from 1878 to 1917.

Various Russian anarchist and revolutionary groups had branches in Switzerland, in which Ukrainians such as M. Zhukovsky, S. Stepniak, M. Kybalchych, and Ya. Stefanovych were active. Among the Ukrainians who lived in Switzerland during this period were Y. Polinkovsky (d 1935), a lecturer at the Commercial Higher School in Sankt Gallen and an opponent of M. Drahomanov, and the physician K. Yuriiv (1846–1927), a resident of Lausanne for the last 25 years of his life. Before the First World War V. Antonovych, A. Honcharenko, M. Sudzylovsky, P. Chyzhevsky, and O. Kovalenko stayed briefly in Switzerland.

1906–20. Other than M. Drahomanov's circle Ukrainian organizations in Switzerland arose late and were usually short-lived. In 1906–7 the Ukrainian *Hromada*, headed by A. Liakhotsky, was active in Geneva. Before the war T. Halushchynsky, H. Kostelnyk, and V. Laba studied at Fribourg University. With the outbreak of the First World War Ukrainians in Switzerland became more active, not only in social and cultural but also in political activities. There were about 50 Ukrainians known to be there: 20 in Geneva, 15 in Lausanne, and the rest in Zürich, Bern, and Basel. In 1915 another Ukrainian *hromada*, the *Société Ukrainienne Gromada*, was set up under the presidency of A. Liakhotsky. Unable to reconcile himself to the political engagement and independentist posture introduced by the recently arrived V. Levynsky and E. Batchinsky, Liakhotsky soon resigned from the *hromada*. On 15 May 1915 the *hromada* appealed to European public opinion to protest Russian policy in occupied Galicia and to defend the persecuted Greek Catholic churches.

During the war (1914–18) the Ukrainians in Lausanne informed the general public about Ukrainian issues. The French-language organ of the Union for the Liberation of Ukraine, *La Revue ukrainienne*, was published there. E. *Batchinsky organized a Ukrainian library and bookstore, which distributed Ukrainian publications not only in Switzerland but in all European countries. The semi-monthly *L'Ukraine* (1915–20), published by V. Stepankivsky with the collaboration of M. Tyshkevych, also came out in Lausanne. In 1918–19 its chief editor was the Swiss journalist E. Privat; his assistant was E. Batchinsky. In 1917 V. Stepankivsky organized the Ukrainian Bureau, a special representative office with information and political tasks. It had 20 employees, only 8 of them Ukrainians (including M. Tyshkevych, E. Batchinsky, O. Kovalenko, D. Manuilsky, and V. Polissadiv). The office manager was the pastor G. Neymark, and the chief secretary was J. Fortey, who later worked in the Secretariat of the League of Nations. The bureau closed down in 1921.

Because the *hromada* in Geneva became inactive, an émigré group of the Ukrainian Social Democratic Workers' party began mobilizing and published the journal *Borot'ba* (1915–16) under the editorship of L. Yurkevych. Yurkevych published the brochure *L'Ukraine et la Guerre* in 1916, in Geneva, as well as an essay criticizing Lenin's nationalities policy in 1917. In 1916–17 D. Dontsov headed the Bureau of the Nationalities of Russia in Bern and pub-

lished its bulletins (65 issues), with the assistance of F. Koroliv. In 1917 the Ukrainian General Union, which included not only Ukrainians from Galicia and central Ukraine but also Jews from Ukraine, was active for a short time in Zürich.

At the end of 1918 a Ukrainian diplomatic mission, headed by Ye. Lukasevych and then M. Vasylo, was sent to Switzerland by the Hetman government and was kept there by the Directory. A semiofficial Ukrainian consulate was opened in Lausanne and then in Bern. It was directed by E. Batchinsky and Ye. Sokovych. There was also a Ukrainian consulate in Zürich, where S. Kuoni served as honorary consul. Under the Hetman regime there was a Swiss consulate in Kiev. P. *Chyzhevsky headed a Ukrainian trade delegation that arrived in Switzerland in 1918 and then initiated the Ukrainian-Swiss Chamber of Commerce, which supplied all of Europe with information on trade with Ukraine as well as information about Ukraine's political aspirations. The Swiss diplomat Ch. Nicole was president of the chamber. With the help of S. Perepelytsia, F. Koroliv, and Ye. Tymchenko, P. Chyzhevsky founded the Ukrainian Committee in Geneva in 1919. It published a number of brochures in French and English arguing for Ukraine's independence. At the end of 1919 the Ukrainian Club, headed by P. Chyzhevsky and then by E. Batchinsky, was set up in Geneva. It collaborated with the UNR mission in Berlin, and in 1934 it was renamed the Ukrainian-Swiss Club.

In 1917–20 many Swiss visited Ukraine, and many supported Ukraine's independence or in some way helped the envoys of the Ukrainian government to Switzerland. Col Du Bois was a member of a mission sent by the political department of the Swiss government to Ukraine in the summer of 1918. In his articles in *Der Bund* and *Neue Zürcher Zeitung* Du Bois spoke out for Ukraine's independence. The editor of *Journal de Genève*, P. Du Bochet, visited S. Petliura in Vinnytsia in February 1919 and published articles favorable to Ukraine in *Tribune de Genève*. J.E. David, the editor of *Gazette de Lausanne* (1913), and Col E. Lederrey, whose reports appeared in *Tribune de Genève* and *Journal de Genève*, visited Ukraine in 1919. E. Kuhne, the editor of *Tribune de Genève*, supported Ukraine's renaissance in his numerous articles in 1917–21. The editor of *Exprès de Neuchâtel*, J. Patrie, collaborated with the UNR diplomatic mission in Bern and included articles on Ukrainian affairs in the publication. Among Swiss politicians who co-operated with the UNR mission were E. Oesch, the author of the brochure *Ukraine und Schweiz* (1918), and R. Claparède.

1920–40. In the interwar period Switzerland continued to be a haven for Ukrainian political leaders. *Geneva, which was the seat of the League of Nations and a major center for foreign diplomats, politicians, and journalists, became particularly important. The question of minority rights in Poland (and, to a lesser degree, Rumania and Czechoslovakia) was raised at the league, and the Ukrainian position was presented by Ukrainian parliamentarians from Western Ukraine – M. Rudnytska, V. Mudry, S. Baran, D. Levytsky, Z. Pelensky, V. Zalozetsky, and I. Kurtiak; the Canadian MP M. Luchkovich; and the unofficial representative of the UNR government-in-exile, O. Shulhyn. The plenipotentiary of the UNR government-in-exile for Switzerland was H. *Chykalenko-Keller. Political activists, such as Ye. Konovalts (1930–6), M. Kushnir, O.

Boikiv, and V. Paneiko, stayed in Switzerland. The 1933 man-made famine in Ukraine was extensively covered by *Le Journal de Genève*, *Gazette de Lausanne*, and *La Suisse libérale* in Neuchâtel, *La Liberté* in Fribourg, and *Neue Zürcher Zeitung*. G. Motta, a long-term member and head of the Swiss government, was particularly well disposed to Ukrainians.

From 1922 E. Batchinsky was the official representative of the Ukrainian Autocephalous Orthodox church in Western Europe and the liaison of the Ukrainian Red Cross to its parent International Committee in Geneva. The press agency Ofinor (Office of Eastern Information) was headed by M. *Yeremiiv in Geneva (1928–44). M. Trotsky ran the Ukrainian Information Bureau in Geneva from 1932. The Ukrainian student association Ukraina, which had several dozen members, was active in Geneva in 1929–35.

1940–5. During the Second World War only charitable and cultural organizational activities were permitted by the Swiss authorities. The country's Ukrainian population was increased by POWs from the Polish army (1940) and then from the Soviet army as well as by escapees from forced labor in Germany. They were interned in camps until 1945, when most of them were deported to Ukraine on the demand of the Soviet repatriation committee.

Members of the Ukrainian Hromada in Switzerland

Post-1945. After the war new Ukrainian immigrants began to arrive in Switzerland from Germany, Austria, and Italy. By the beginning of the 1950s there were almost 70 Ukrainians in Switzerland. In 1945 the Sokil Student Society (later the Academic Hromada) was organized in Bern. It was headed by M. Vus and R. Prokop. Now the Ukrainian Committee in Switzerland has its head office in Bern.

The Ukrainian Relief Committee, led by M. *Rudnytska, was active in Geneva (1946–50). The Ukrainian Relief Alliance was founded in Zürich in 1950 and was headed by V. Lytvyn and then V. Stykhar. For a while it published *Tryzub*. The Ukrainian community in Zürich included the singer I. Malaniuk, the ballet master V. Libovicki, the writer L. Semaka, and the K.G. Jung Institute lecturer P. Polishchuk.

In 1951 the Alliance of Ukrainians in Switzerland (OUSH) was formed as a central representative body. Its presidents have been A. Chernetsky, I. Porodko, I. Luchyshyn, M. Havryliuk, A. Huchkivsky, and R. Prokop. The OUSH has a membership of about 70 families or 100 individuals. In 1974 it changed its name to the Ukrainian Society in Switzerland. In 1981 the Ukrainian Women's Society in Switzerland was formed.

A number of artists and musicians worked in Switzer-

land: the pianist and composer Omelian Nyzhankivsky, the Geneva Opera singer Oleh Nyzhankivsky, the painter Z. Lisovska, the graphic artist L. Vynnyk, and the painter I. Kurakh. Other notable Swiss Ukrainians include A. Chernetsky, I. Luchyshyn, Ye. Vretsona, M. Kachaluba, S. Shutko, B. Hawrylyshyn, I. Sukhoversky, and B. Lototsky. In the 1970s and 1980s the Berlin correspondent of *Neue Zürcher Zeitung*, B. Osadchuk, informed the Swiss public about Ukrainian affairs.

Revs P. Holynsky, M. Liubachivsky, Ya. Peridon, D. Dzvonyk, O. Sydoriv, and P. Kostyuk and Bishops I. Buchko, M. Marusyn, and M. Hrynychyshyn have served the Ukrainian Catholic community in Switzerland; Revs H. Metiuk, V. Vyshnivsky, and V. Husiv have served the Orthodox. In 1955–78 E. Batchinsky was bishop of the Ukrainian Autocephalous Orthodox Church (Conciliar) in Switzerland.

The pedagogical works of J. Pestalozzi (1938) and some literary works of G. Keller (1900, 1906) and C. Meyer (1913) have been translated into Ukrainian. Of contemporary literature, some works by F. Dürrenmatt and M. Frisch have appeared in Ukrainian.

A. Zhukovskiy

Swoboda, Victor [Svoboda, Viktor] (pseuds: M. Davies, Michael Browne), b 20 February 1925 in Kompaniivka, now in Kirovohrad oblast, d 1 July 1992 in London. Writer and teacher. Displaced by the Second World War, Swoboda settled in England in 1948. He studied at the School of Slavonic and East European Studies at London University (1950–3) and was an assistant (1955–9), lecturer (1959–73), and senior lecturer (1973–83) in Russian and Ukrainian there. Swoboda is the author of articles on early Ukrainian lexicography, Ukrainian-Belarusian and Ukrainian-Yiddish linguistic relations, and T. Shevchenko. Under the pseudonym M. Davies he translated and published I. *Dziuba's *Internatsionalizm chy rusyfikatsiia?* as *Internationalism or Russification?: A Study in the Soviet Nationalities Problem* (1968). In the 1970s he contributed reports on political persecution in Ukraine to *Index on Censorship* and edited, under the pseudonym Michael Browne, *Ferment in Ukraine: Documents by V. Chornovil, I. Kandyba, L. Lukyanenko, V. Moroz, and Others* (1971). He contributed articles on Ukrainian literature and writers to *The Penguin Companion to European Literature* (1969) and *Cassell's Encyclopaedia of World Literature* (1973) and was the coauthor (with B. Nahaylo) of *Soviet Disunion: A History of the Nationalities Problem in the USSR* (1990).

Swyrydenko, Walter [Svyrydenko, Volodymyr], b 12 October 1942 in Slovianske, Staline [now Donetsk] oblast. Painter. A postwar refugee in the United States, he studied art at Kent State University and in Paris. He is an art professor and the gallery director at Lakehead Community College in Mentor, Ohio. In his oils and acrylics he

attempts to depict humankind's perpetual striving for perfection. He describes his style as figurative expressionism. Over 30 solo exhibitions of his works have been held.

Wasyl Swystun

Swystun, Wasyl [Svystun, Vasył'], b 13 January 1893 in Sorotsko, Terebovlia county, Galicia, d 25 December 1964 in Winnipeg. Community leader. After emigrating to Canada in 1913, Swystun graduated from the University of Saskatchewan (1918) and the University of Manitoba (LLB, 1930). In 1916 he helped found and was first rector (1917–21) of the *Mohyla Ukrainian Institute in Saskatoon, where his activities brought him into conflict with Bishop N. Budka of the Ukrainian Catholic church and led to the formation of the *Ukrainian Orthodox Church of Canada in 1918. He helped found the *Ukrainian Self-Reliance League (SUS) in 1927 and was its first president.

In 1935 Swystun precipitated a crisis in the Orthodox church when he openly raised questions regarding its administrative procedures and canonical status. He also turned his energies to the Ukrainian National Federation (UNF) from 1938 and emerged as a major spokesperson for it; he played a leading role on its behalf in the creation of the Ukrainian Canadian Committee (now Congress, or UCC) in 1940. Swystun abruptly resigned from his UNF vice-presidency and his UCC involvements in 1943 and withdrew temporarily from public life. He re-emerged in 1945 as an advocate of reconciliation with the existing regime in the Ukrainian SSR and in 1946 became head of the Society for Cultural Relations with Ukraine.

M. Lupul

Sycamore maple. See Maple.

Sychevsky, Vasyl [Syčevs'kyj, Vasył'], b 31 December 1923 in Khvastiv, Kiev gubernia. Writer. He graduated from the Kiev Institute of Theater Arts (1948) and has worked as deputy chief editor of *Radians'ka kul'tura*, a play director, director of the Ukrainian Studio of Chronicle-Documentary Films, chief editor of **Novyny kinoekranu*, and head of the Scenario Workshop at the Kiev Artistic Film Studio. Since 1955 he has written articles, feuilletons, humorous stories, plays, television film scripts, and the novels *Chaklunka Syn'oho vyru* (The Sorceress of the Blue Vortex, 1962), *Chornyi labirynt* (The Black Labyrinth, 1963), *Vernys'*, *Ruzhenno* (Come Back, Ruzhena, 1965), and *Karpat's'ki povisti* (Carpathian Tales, 1975). A Russian edition of his plays and film scripts appeared in 1984.

Sydiak, Viktor [Sydjak], b 24 November 1943 in Anzhera-Sudzhensk, Kemerovo oblast, RSFSR. Champion fencer. While living in Lviv he became one of Ukraine's best fencers. Since 1969 he has lived in Minsk, Belarus. He was a member of the USSR teams that won the 1968 and 1976 Olympic gold medals; the 1972 silver medal; the 1976 bronze medal; and the 1969–71, 1974, and 1975 world championships in fencing. He himself won the 1972 Olympic silver and 1976 bronze medal in the saber. He has been a Ukrainian, Belarusian, and USSR champion many times.

St Andrew's Ukrainian Catholic Church in Sydney (Lidcombe)

Sydney. The capital (1988 pop 3,596,000) of New South Wales, Australia, and one of the major ports of the South Pacific. Its Ukrainian community, numbering approx 10,000, is the largest in Australia. The first Ukrainian immigrants began to arrive in Sydney in 1947 under the International Refugee Organization resettlement program. By 1949 they had organized the Ukrainian Hromada of New South Wales, and in 1952 they acquired a Ukrainian Home in Redfern and in 1958 another in Lidcombe. Ukrainian life in Sydney consists of the Boian singing society (est 1951), with both a male and mixed choirs; a drama group established in 1950 by the Ukrainian Hromada and reorganized two years later into the Ukrainian Artistic Society; the Dnipro Ukrainian Folk Ballet (est 1957); and its successor, the Ukrainian Dance Ensemble (est 1967). Religious life centers around the Ukrainian Catholic parish of St Andrew (built in 1958) and three parishes of the Ukrainian Autocephalous Orthodox church: St Mary's (since 1949), St Athanasius's (1950), and the Church of the Transfiguration (1953). The weekly newspaper *Vil'na dumka* has been published since 1949. In 1984 the *Ukrainian Studies Center at Macquarie University was established through the efforts of the Ukrainian community.

Sydor, Vasyl (pseud: Shelest, Vyshyty, Konrad, Zov), b 24 February 1910 in Spasiv, Sokal county, Galicia, d 17 April 1949 in Perekhinske raion, Ivano-Frankivske oblast.

Col Vasyl Sydor

Hryhorii Sydorenko

Senior UPA officer. In February 1935 he was sentenced to four years' imprisonment for his OUN activities. After he was paroled in 1936, he became a member of the OUN Home Leadership and organized the OUN network in Volhynia and the Kholm region. He was imprisoned again in August 1937 and was elected spokesman of Ukrainian political prisoners in the Brygidky prison in Lviv. During the 1939–41 Soviet occupation of Galicia he was in charge of military affairs in the OUN Home Leadership. A member of the OUN Supreme Military Staff in 1941, he served in the *Legion of Ukrainian Nationalists (1941–3) until his arrest by the Gestapo on 8 January 1943. After his release he joined UPA in Volhynia and became its second chief of staff. In 1943 he was elected to the OUN Supreme Council by the OUN Third Extraordinary Grand Assembly and in January 1944, with the rank of major, assumed command of the UPA-West. He was promoted to colonel (1946) and OUN general judge (1947) and appointed OUN chief for the Carpathian region. He was killed in combat with Soviet troops in the Limnytsia Valley.

Sydor-Chartoryisky, Mykola [Sydor-Čartoryjs'kyj], b 1 July 1913 in Kamiane, Bibrka county, Galicia. Journalist and publisher. In the 1930s he studied at the Ukrainian Free University and Charles University in Prague and contributed to the Ukrainian nationalist press in Paris, Bucharest, Canada, and Transcarpathia. A postwar refugee in the United States since 1947, he edited the weekly *Narodne slovo* (1949–52), and founded the Hoverlia publishing house and bookstore in New York City in 1951. It published or reprinted 500 books and issued the bibliographic magazine *Biblos* (1955–79). Sydor-Chartoryisky has written a book on the Union of Horodlo (1951), several volumes of memoirs, the poetry collection *Inter Arma* (1949), stories for children, several booklets on children's education, and a book on the Karlsfeld and Mittenwald DP camps (1983), and translated D. Defoe's *Robinson Crusoe* into Ukrainian (1953).

Sydorenko, Hryhorii, b 1874 in the Kherson region, d 6 February 1924 in Prague. Engineer, political activist, and diplomat. A graduate in engineering (1889), he became a director of the Siberian Trunk Railway and headed the Ukrainian Hromada in Tomsk. He became a member of the Central Rada, although not affiliated with a specific party (he considered himself a nonpartisan social democrat). He was an assistant to the deputy secretary of rail-

ways and then was minister of postal and telegraph services in the UNR government led by V. Holubovych (February–April 1918). In the Hetman government he was a member of the presidium of the All-Ukrainian Union of Zemstvos and then a delegate (together with D. Antonovych) of the Ukrainian National Union in negotiations with representatives of the Entente powers in Iași (November 1918). He was leader of the UNR delegation at the Paris Peace Conference (January–August 1919) and UNR ambassador in Vienna (succeeding V. Lypynsky) in 1919–22. In 1923 he became an instructor and library director at the Ukrainian Husbandry Academy in Poděbrady, Czechoslovakia. He wrote a number of works on railway construction.

Sydorenko, Mykhailo, b 4 November 1859 in Odessa, d 28 March 1927 in Odessa. Geologist. After being sent to Siberia in 1879 for two years because of his political involvements, he returned to Odessa and completed a degree at the university there (1886). He then worked in Volhynia until 1890 and became a lecturer at Odessa University (professor in 1906). His major works concerned the lithology and mineralogy of rock formations, particularly in the Odessa region. He wrote textbooks on mineralogy and petrography and assisted with M. Komarov's Ukrainian-Russian dictionary.

Sydorenko, Oleksander, b 14 June 1907 in Osnova (now part of Kharkiv). Architect. After graduating from the Kharkiv Art Institute (1930) he designed club buildings, a flying school, airport, and clinic in Kharkiv (1930–2), and rest homes in Sviatohirske, Slovianske, and Staline (now Donetsk, 1933–4), and taught at the Kharkiv Institute of Engineers of Communal Economy (1934–41). After the Second World War he was involved in planning the reconstruction of Ternopil, Krasnodon, and Mykolaiv and taught at the Kiev Civil-Engineering Institute.

Oleksander Sydorenko

Lev Sylenko

Sydorenko, Oleksander, b 19 October 1917 in Novomykilske, Kupianka county, Kharkiv gubernia, d 23 March 1982 in Moscow. Geologist and administrator; full member from 1966 and vice-president from 1975 of the USSR Academy of Sciences (AN SSSR). He graduated from Voronezh University (1940) and then worked (1943–50) as a research associate at the Turkmen branch of the AN SSSR. He held a number of administrative and political positions, including those of chairman of the presidium of the

Kola (Murmansk oblast) branch of the AN SSSR (1952–61), USSR minister of geology and the conservation of natural resources (1962–3, 1965–76), and chairman of the USSR State Geological Committee (1963–5). His main works deal with the geology and geomorphology of deserts, the process of mineral formation in the weathering mantle, mineral evaluation, and environmental protection. He developed the lithology of metamorphosed sedimentary Precambrian strata as a field of study.

Sydorenko, Oleksandr, b 27 May 1960 in Mariupil. Swimmer. He won the 1980 Olympic gold medal in the 400-m medley (new Olympic record), was the 1981 European and 1982 world champion, and won the 1982 European Cup and several USSR championships (1978–82).

Sydorenko, Petro, b 16 May 1926 in Ternovatka, Kryvyi Rih okruha. Painter, illustrator, and teacher. A postwar émigré in Canada, he graduated from the Ontario College of Art (1955) and ran his own art school in Toronto (1959–84). He has painted portraits, landscapes, and depictions of the history of the Ukrainian pioneers in Canada, and illustrated Ukrainian books.

Sydorenko, Wasył (Vasyl), b 15 March 1960 in Toronto. Musicologist and composer. A graduate of the Royal Conservatory of Music and the University of Toronto, he studied composition under W. Buczynski. His works include *Chystyi Chetver* (Easter Thursday, 1991) for choir, *Musical Abstract* (1986) and *Reverie* (1992) for piano, the children's operetta *The Monkey King* (1974), chamber music, and songs to words by H. Chuprynka, M. Rylsky, and L. Poltava. He has contributed to the *Encyclopedia of Ukraine* and publications of the ANU.

Sydorenko, Yevheniia, b 26 December 1886 in Ivanovskoe, Kursk gubernia, Russia, d 21 February 1981 in Kiev. Stage actress. She completed study at the Moscow Drama School (1909, pupil of V. Kachalov and L. Leonov) and then acted in the State Drama Theater in Kiev (1918–19), the Shevchenko First Theater of the Ukrainian Soviet Republic (1919–23), the Franko New Drama Theater in Kharkiv (1923–6), the Dnipropetrovske Drama Theater (1927–9), the Leningrad Zhovten Theater (1930–1), and various Ukrainian theaters in Kharkiv, Odessa, and Kiev (1932–41).

Sydorenko-Maliukova, Tamara [Sydorenko-Maljukova], b 15 February 1919 in Krasne, Dnipro county, Tavriia gubernia. Composer and administrator. She graduated from the Odessa Conservatory (1946) in the composition class of S. Orfeev, and then taught music theory there from 1946 (as head of its theory and composition department from 1966). Her works include two symphonies (1950, 1971), the ballet *Charivni cherevycky* (Magical Shoes, 1982), cantatas, chamber music, pieces for piano, choruses, art songs, arrangements of Ukrainian folk songs, incidental music, and film scores.

Sydoriak, Mykola [Sydorjak], b 24 December 1922 in Velykyi Bychkiv, Transcarpathia. Writer and critic. He has worked as a journalist in Uzhhorod, an editor of *Literaturna Ukraina*, chief editor of criticism at the Radianskyi Pysmennyk publishing house, and deputy chief editor of

Vitchyzna. Since 1946 he has written publicistic articles, literary criticism, film scripts, and the novels *Zalizna trava* (Iron Grass, 1968), *Iosyf prekrasnyi* (Joseph the Beautiful, 1969), *Trukhaniv ostriv* (Trukhaniv Island, 1972), and a trilogy, *Dovirnyky* (The Trustees, 1979).

Sydorovych, Savyna [Sydorovyč], b 1895, d 1972. Pedagogue and ethnographer; member of the Sich and Plast organizations. Prior to 1940 she taught crafts in Lviv secondary schools. After the Second World War she was a researcher at the *Ukrainian State Museum of Ethnography and Crafts of the AN URSR (now ANU) in Lviv. She published articles in the museum's periodical on the development of peasant weaving in Ukraine, focusing on Western Ukraine (in *Materialy z etnografii ta mystetstvoznavstva*, vols 3–8, 1957–63). She also published *Vkaziivky dlia vedennia ruchnoi pratsi na pershomu rotsi navchannia* (Instructions for Teaching Crafts to First-Year Students, 1924) and coedited, among other works, *Ukrainski vybiiky* (Ukrainian Printed Linens, 1959) and *Tkanyiny i vyshyvky* (Weaves and Embroideries, 1960).

Syhit Marmaroskyi. See Sighetul Marmatiei.

Syla (Strength). An association of domestic and unskilled workers in Lviv, founded in 1907 by V. *Nahirny. By 1914 it had almost 1,000 members. Although it declined during the First World War, it revived in 1918 and operated until 1939, when it was dissolved by the Soviet authorities. Its presidents were Nahirny, Ye. Husar, and A. Kashtaniuk (from 1918).

Syla (Strength). An unofficial organ of the Communist Party of Western Ukraine, published weekly in Lviv from January 1930 to September 1932 (a total of 153 issues). It was edited by R. Skazynsky and P. Kozlaniuk. Several supplements to the newspaper were published, including the monthly *Masovyi teatr* (1930–2) and the irregular *Illustrovani visti* (1931). In 1930 *Syla* had a pressrun of 3,000 copies. It was frequently confiscated and finally closed down by the Polish authorities.

Sylenko, Lev (pseud: Lev T. Orlyhora), b 27 September 1927 in Bohoiavlenske (now Oleksandrivka), Kherson gubernia. Emigré writer, filmmaker, and religious leader. In postwar Germany he published publicistic pamphlets condemning the Soviet regime. In 1953 he moved to Canada, where he wrote the political novel *Budni nashoi epokhy* (The Ordinary Days of Our Epoch, 2 vols, 1953), the story collection *Heroi nashoho chasu* (Heroes of Our Time, 1959), and poetry, and made several little-known, though well-received, documentary and docudrama films in Ukrainian. In 1964 he founded the *Ukrainian Native Faith (RUNVira) church. He wrote its *Maha vira* (Great Faith, 1979) and other scriptures and has edited its monthly *Samobutnia Ukraina* (1966–). He has traveled widely to compile a Sanskrit-Ukrainian-English dictionary and to research the links between Vedic India and ancient Ukraine, an interest stemming from his research into Ukrainian pre-Christian religious beliefs.

Sylvansky, Mykola [Syl'vans'kyj], b 1806, d 1879. Orthodox priest and beekeeper. While serving as a parish priest in Slobidska Ukraine he wrote popular articles and

pamphlets on beekeeping, such as *Nastavlenie po chasti duplianochnogo pchelovodstva* (Directions for Hollow-Log Beekeeping). Using the pseudonym Lisovyk he contributed articles to P. Kulish's *Zapiski o Iuzhnoi Rusi*. He also collected folk songs.

Sylvestr [Syl'vestr], b ?, d 12 April 1123. Chronicler and bishop. He was hegumen of the St Michael's Vydubychi Monastery in Kiev and then bishop of Pereislav (from 1118). He was close to Prince Volodymyr Monomakh and advised him on church and political affairs. Sylvestr is believed to have copied and updated the *Laurentian Chronicle, the second redaction of *Povist' vremennykh lit* prepared after the death of Nestor the Chronicler, which includes an account of the years 1113–16.

Sylvestr. See Liutkovych-Telytsia, Pavlo.

Rostyslav Sylvestrov: *Portrait of a Girl* (tempera, 1966)

Sylvestrov, Rostyslav [Syl'vestrov], b 17 October 1917 in Vinnytsia. Painter. He graduated from the Kiev State Art Institute (1949), where he studied under O. Shovkunenko. He taught at the Lviv Institute of Applied and Decorative Arts (1949–59) and the Lviv Printing Institute (1961–5). His works include *Winter Landscape* (1947), *Chemical Complex in Rozdil* (1965), *Children Asleep* (1966–7), *Jockeys* (1969), and *Rain* (1970).

Valentyn Sylvestrov

Sylvestrov, Valentyn [Syl'vestrov] (Silvestrov), b 30 September 1937 in Kiev. Composer. He studied composition under B. *Liatoshynsky at the Kiev Conservatory (1958–64). Working in a modernist idiom, he quickly established a reputation as one of several innovative musicians in the 'Kiev Avant-Garde.' In many of his works he adopted the newest techniques, at the same time retaining a characteristically lyrical expression. He used a ramified tonal system, including polytonal counterpoint, also introducing 12-tone serialism. Starting in the 1970s he employed polystylistic methods in which tonality, atonality, modality, texture, and audiovisual elements all enter into dialogue with each other, forming broadly based dramatic compositions. Sylvestrov's works were criticized in the Soviet press, but he was not forced to alter his style or suspend composing. He soon started developing an international reputation, winning the International Koussevitsky Prize (USA, 1967) and the International Young Composers' Competition Gaudeamus (Holland, 1970). Some of his compositions had their world premieres at European festivals of modern music or at performances by the Las Vegas Symphony, V. Baley conducting.

Sylvestrov's works include five symphonies (1963, 1965, 1966, 1976, 1980–2); the symphonic works *Classic Overture* (1964), *Hymn* (1967), and *Poem* (in memory of B. Liatoshynsky, 1968); *Spectrum* (1965) and *Intermezzo* (1983) for chamber orchestra; *Serenade* for string orchestra (1978); *Postludium*, a symphonic poem for piano and orchestra (1984); *Meditation* for cello and chamber orchestra (1972); *Mysteries* for alto flute and percussion (1964); *Projections* for harpsichord, vibraphone, and bells (1965); *Sonata* for violin and piano (1970); *Postludium* for cello and piano (1982); *Drama* for violin, cello, and piano (1971); *Children's Music* (1973); and cantatas to texts by T. Shevchenko, A. Pushkin, M. Lermontov, J. Keats, and others. He has also scored film music.

R. Savvitsky

Sylych, Onykii [Sylyč, Onykij], b ?, d 1663. Cossack officer. A fellow (1654–6) and colonel (1657–63) of Chernihiv regiment, he was opposed to the pro-Polish orientation of Hetman Yu. Khmelnytsky and the 1660 Treaty of Slobod-

dyshche, and supported Ya. Somko and V. Zolotarenko in renouncing Khmelnytsky's initiative. He was killed in Borzna during Hetman I. Briukhovetsky's purge of opponents.

Symakovych, Vadym [Symakovyč], b 18 April 1903 in Bakhtyn, Ushytzia county, Podilia gubernia, d 12 February 1969. Writer. From 1926 to 1963 he worked as a journalist. He wrote the poetry collection *Shchodennyi rytm* (The Daily Rhythm, 1932), the novels *Maiaky* (Light-houses, 1955), *Kresy v ohni* (The Borderlands on Fire, 1960), and *Ostannia iavka* (The Last Appearance, 1968), and several plays.

Symashkevych, Mylitsa [Szymaškevyč, Mylica], b 22 July 1900 in Kamianets-Podilskyi, Podilia gubernia, d 11 December 1976. Theatrical and cinema designer. She studied in the Kiev State Arts Institute (1920–6, pupil of V. Meller and F. Krychevsky) and then worked in Berezhil (1924–8), the Odessa (1929–35) and Kiev (1935–41) Artistic Film studios, and the Ivano-Frankivske Ukrainian Music and Drama Theater (1945–65); she created designs for over 30 films and over 20 theatrical productions. Her designs were exhibited in Lviv (1970) and Kiev (1975).

Symashkevych, Mytrofan [Szymaškevyč], b 23 November 1845 in Podilia, d ? Regional historian and Orthodox hierarch. He studied at the St Petersburg Theological Seminary and taught at the Podilia Theological Seminary. His historical, geographical, and archeological studies about Podilia were published separately and in the periodical *Podol'skie eparkhial'nye vedomosti*. After 1905 he was bishop of Cheboksary and Penza (from 1907) and rector of the Don Theological Seminary.

Symbolism. A poetic movement of the second half of the 19th century that originated in France, where it attained its greatest flowering between 1885 and 1895, and exerted strong influence throughout Europe. French symbolism represented a reaction against naturalism and realism in favor of subjective and esthetic experience. Seeking analogies in music, armed with a sense of the magical power of the word, predisposed toward esoteric symbols, metaphors, and synesthesia, symbolist poets created a highly evocative, personal, and transcendental poetry.

Symbolism in Ukraine was influenced by both the French and the Russian movements (in Galicia, Polish influence was also pronounced), but it never attained the stature it did in France or Russia. Symbolist trends rather than a self-conscious organized movement existed in Ukraine, although there were periods during which symbolist or quasi-symbolist groupings were active.

The first symbolist tendencies manifested themselves during the late 1890s in a noticeable de-emphasis on civic themes, the abandonment of realist poetics, the rejection of 'utilitarian' literature, and the revival of poetry (including prose poems). In 1901 I. Franko noted that young writers were placing emphasis on psychology and mood. Pursuit of the beautiful and defense of the autonomy of poetry ('art for art's sake') became prominent leitmotifs in the literary community. Writers betraying any of those inclinations were variously referred to as symbolists, decadents, or modernists. Alarmed reactions to the new literary vogue on the part of populist and realist figures (I.

Nechui-Levytsky, S. Yefremov, Franko), a conservative reading public, and the unenviable political status of Ukraine no doubt restrained poets from moving away more decisively from their social obligations into private and personal spheres.

M. *Vorony was the first major exponent of modernist sentiments in Ukraine. The guidelines he set for contributors to the almanac *Z nad khmar i dolyn* (From Above the Clouds and Valleys, 1903) testify to a distinct symbolist orientation, and in his correspondence with Ukrainian writers he speaks explicitly of 'taking from symbolism' its best virtues. Vorony spoke out in defense of 'pure art,' a refined estheticism, and urged writers to embrace a philosophical attitude (whether pantheistic, metaphysical, or mystical) that would depict the ideal, the beautiful, and the mysterious. His own poetry fulfilled those requisites with considerable formal merit, although like a majority of his generation he never completely rejected engagé verse. Vorony's symbolist poetry was not designed to supplant the poet's civic responsibility; it was designed to serve as its complement, which would reinvigorate the poet for the challenges of the 'real' world.

Ukrainian criticism of the 1900s and 1910s linked (not always appropriately) a number of names to the symbolist or decadent trend. Among them were O. Kobylianska, N. Kobrynska, O. Pliushch, H. Khotkevych, and A. Krymsky. It is a testament to the uncrystallized nature of early Ukrainian modernism that many writers expressed indignation at those labels and renounced them.

A far more self-conscious modernist attitude, with definite symbolist overtones, was evinced by the group *Moloda Muza, founded in Lviv in 1906. Its theoretical positions (as expressed by O. Lutsky) were nearly identical to those promoted by Vorony, but the actual extent of the symbolist or decadent presence in the members' works varied considerably from author to author (V. *Pachovsky, P. *Karmansky, M. *Yatskiv, B. *Lepky, S. *Charnetsky, S. *Tverdokhlib, V. *Birchak). Those Western Ukrainian writers found kindred spirits in the celebrated poets O. *Oles and M. *Filiansky, whose works reached them from Kiev, where *Ukrains'ka khata promoted modernist tendencies (most notably through the critical writings of M. *Yevshan and the poetry of H. *Chuprynka), although the journal's shift away from 'estheticism' and 'pure art' in the direction of ideological and political commitment is noticeable.

'Symbolism' acquired wide currency in Kiev during 1918–19, when a loosely organized but coherent group of poets became associated with the name. Their identity was derived less from explicit self-definition than from opposition to the futurists and the older generation of realist writers. In their circle P. *Tychyna was the outstanding poet; others included Ya. *Savchenko, O. *Slisarenko, D. *Zahul, V. Yaroshenko, V. Kobyliansky, and K. Polishchuk. In 1918 those writers created an ephemeral association, Bila Studiia, and collaborated on *Literaturnokrytychnyi al'manakh*. In May 1919 (with the participation of M. *Zhuk, P. *Fylypovych, H. Zhurba, and others) they published *Muzahet, which, however, officially declared itself a nonpartisan publication. As an organized literary coterie the poets remained elusive; their literary credo was poorly articulated, yet their collections and periodic publications gave them a distinctive presence in the literary world. Symbolist influence extended beyond that identifiable group, to touch such diverse writers as M. *Rylsky

and H. Mykhailychenko (his *Blakytnyi roman* [The Blue Novel, 1921]). The consolidation of Soviet power in Ukraine undermined the ideological and material foundations of the movement, and it quickly declined. Some poets, such as O. Slisarenko and Savchenko, became active later in futurist organizations. For all its limitations and vagaries, symbolism played an important revitalizing role in Ukrainian literature during the first two decades of the 20th century.

O. Ihnytzkyj

Symeon. Metropolitan of Kiev (1480–8). A bishop of Polatsk, he assumed the post of metropolitan and was confirmed in his position by the patriarch of Constantinople in 1481. His tenure was hampered by the anti-Orthodox sentiments of the Polish king Casimir IV Jagiellończyk, as well as by the damage caused by the plundering of the St Sophia Cathedral and the Kievan Cave Monastery during a raid on Kiev by the Crimean khan Mengli-Girei in 1482.

Symferopil [Symferopil'] (Simferopol). IX-15. A city (1990 pop 346,000) on the Salhyr River and the capital of the Crimea. The vicinity has been inhabited since the Paleolithic period. The Scythian capital of *Neapolis occupied the southeastern part of present-day Symferopil. By the early 16th century the Tatar stronghold of Kermenchyk and settlement of Ak-Mechet had been established at the site. After annexing the Crimea Catherine II set up the fortified town of Symferopil as the capital of Tavriia oblast (from 1802, gubernia). The town developed slowly as a trading and manufacturing center. In the early 19th century it held two annual fairs. Its tobacco, brick, and lime factories and flour mills supplied the local demand. Its population increased from 7,000 in 1836 to 17,000 in 1864. The first school was opened in 1793, and a secondary school, by 1812. An amateur theater was formed in the 1820s, a printing press was set up in 1830, and the gubernia newspaper began to come out in 1838. The opening of the Kharkiv-Sevastopol railway line in 1874 ushered in rapid industrial growth. The city's population had increased to 38,000 by 1887, 49,000 by 1897, and 91,000 by 1914. New fruit- and vegetable-canning factories, a confectionery factory, two tobacco-processing factories, several steam flour mills, and a farming-implements foundry were opened. The city expanded to the other bank of the river, where a fine residential district was developed. In the absence of a safe water supply and sewage system epidemics were frequent. A number of learned societies were established: a gubernia archival commission (1887) with a museum of antiquities and a library, and a natural history museum set up by the gubernia's zemstvo (1889).

During the revolutionary period Symferopil was occupied by various armies. On 24 April 1918 the Crimean Group of the UNR Army took the city. In 1921 it became the capital of the Crimean ASSR. In 1926 its population reached 88,000, 45.6 percent of whom were Russian, 23.5 percent, Jewish, 12.6 percent, Tatar, and 8.3 percent, Ukrainian. After the Second World War Symferopil was the capital of Crimea oblast, which in 1954 was transferred from the RSFSR to the Ukrainian SSR. In 1959 the city's population was 186,000, about 70 percent of whom were Russian, and 20 percent, Ukrainian.

Today Symferopil is a transportation and industrial center. Its food industry includes two canning plants, an

The Symferopil train station

oil-manufacturing consortium, and a tobacco-curing complex. Its light industry manufactures leather goods, footwear, clothing, and knitwear. Its machine-building plants produce food-processing equipment, television sets, and farm-machine parts. The chemical industry produces plastic products and household chemicals. The power to run the industries is supplied by a thermoelectric station.

The city supports 13 vocational schools and 12 specialized high schools. Higher education is provided by a university, a medical and an agricultural institute, and a branch of the Dnipropetrovske Institute of Civil Engineering. There are a number of research institutions, including a branch of the Institute of Archeology and a seismic station. Among the city's cultural facilities are the theaters of Ukrainian music and drama and Russian drama, a puppet theater, a circus, a philharmonic orchestra, an art museum, and a regional museum. The most interesting architectural monuments are the Taranov-Belozarov residence (1822–6) and the Vorontsov palace (1827). Some of the old Tatar quarter, with its winding, narrow streets and Oriental buildings, has been preserved.

Symferopil Art Museum (Symferopilskyi khudozhnii muzei). A museum in Symferopil, established in 1920 as the cultural-historical department of the Central Museum of Crimean Studies. In 1937 it became an independent museum. Its departments of Ukrainian and Russian prerevolutionary art and Soviet art contain over 5,000 objects, including works by D. Levytsky, I. Aivazovsky, V. Tropinin, M. Yaroshenko, A. Kuindzhi, S. Svitoslavsky, V. Yanovsky, M. Murashko, S. Vasylykivsky, K. Trutovsky, M. Samokysh, I. Trush, I. Hrabar, M. Voloshin, T. Yablonska, M. Bozhii, M. Derehus, and M. Manizer.

Symferopil University (Symferopilskyi universitet). An institution of higher learning under the jurisdiction of the Ministry of Higher and Specialized Secondary Education; the first institution of higher learning in the Crimea, founded in 1918 as Tavriia University. At the university's founding, the members of the faculty included the scholars M. Andrusiv, V. Vernadsky, B. Grekov, V. Luchytsky, and O. Palladin. The physical-mathematical department in particular has thrived remarkably during its relatively brief but high-powered existence. Its physics staff has in-

cluded such world-renowned scholars as Ye. Frenkel, M.(N.) Krylov, A. Yoffe, and I. Tamm (Nobel Prize, 1958). Among the 1923 physics graduates of the Crimean University were I. Kurchatov, the pioneer of nuclear energy in the USSR (a nuclear research institute in Moscow is named after him), and K. Synelnykov, the Ukrainian designer of charged-particle accelerators and long-term (1944–65) director of the Physical-Technical Institute of the AN URSS (now ANU) in Kharkiv. In 1921 the institution was renamed Crimean University and named in honor of M. Frunze. In 1925 it was reorganized as the Crimean Pedagogical Institute. In 1972 it was renamed Symferopil University. Since 1981–2 the university has had eight faculties: history, philology, Romance and Germanic languages, sciences, geography, physics, mathematics, and physical education. The student enrollment in 1988 was 6,300. The library has over 900,000 volumes in its collection.

Symko, Stepan, b 27 July 1911 in Dakhniv, Liubachiv county, Galicia. Plant selection scientist. He studied and worked in Belgium and was an agricultural director in the Drohobych region in 1941–4. After the Second World War he worked briefly in Belgium and then emigrated to Canada, where he worked from 1949 in Ottawa for the Central Research Station of the Department of Agriculture. He developed a breed of barley that is resistant to frost.

Symonenko, Demian, b 1871 in Stolne, Sosnytsia county, Chernihiv gubernia, d 30 April 1948 in Stolne. Kobzar. He was blinded in childhood and learned to play the kobza much later under T. Parkhomenko. His repertoire included dumas, historical and comic songs, and psalms.

Symonenko, Rem, b 28 June 1928 in Kiev. Soviet historian. He studied international relations at Kiev University (1950; PH D, 1968). He began working at the AN URSS (now ANU) Institute of History in 1953 and became director of the Department of Foreign Historiography there in 1969. His publications include *Imperialistychna polityka Antanty i SSHA shchodo Ukraïny v 1919 r.* (Imperialist Policies of the Entente and the United States vis-à-vis Ukraine in 1919, 1962), *Ukraïna i kapitalistychnyi svit v period Zhovtnevoi revoliutsii i hromadians'koi viiny, 1917–1920 rr.* (Ukraine and the Capitalist World during the Time of the October Revolution and Civil War, 1917–20, 1970), and *Brest: Dvobii viiny i myru* (Brest: A Duel between War and Peace, 1970). He contradicted the historiographical work of M. Hrushevsky in *Pravda istorii – virnist' istorii* (The Truth of History Is the Faithfulness to History, 1988). Symonenko was a representative of the official Soviet line in Ukrainian historiography and one of the most active supporters of Communist rule in Ukraine and of the opponents of Ukraine's national revival in the late 1980s.

Symonenko, Vasyl, b 8 January 1935 in Biivtsi, Lubni raion, Poltava oblast, d 13 December 1963 in Cherkasy. Poet, journalist, and dissident. He graduated with a degree in journalism from Kiev University in 1957. He worked for the regional newspapers *Cherkas'ka pravda* and *Molod' Cherkashchyny* and then became a regional correspondent of *Robitnycha hazeta*. Symonenko began writing poetry while a student, but because of the harsh environment of Soviet censorship he published little. Only one collection of his poetry appeared during his lifetime, *Tysha i hrim* (Silence and Thunder, 1962). His poetry, howev-

Vasyl Symonenko

er, was popular and was widely circulated in samvydav, and it largely marks the beginning of the Ukrainian opposition movement of the 1960s and 1970s. Thematically, his verse consists of satires on the Soviet regime, such as 'Nekroloh kukurudzianomu kachanovi' (Obituary for a Corncob), 'Zlodii' (The Thief), and 'Sud' (The Trial); descriptions of the difficult life of the peasantry, such as 'Duma pro shchastia' (Duma about Happiness); condemnations of Soviet despotism, such as 'Brama' (The Gate) and 'Granitni obelisky, iak meduzy' (Granite Obelisks, Like Jellyfish); and protestations against Russian chauvinism, such as 'Kurds'komu bratovi' (For My Kurdish Brother). Of particular importance is a cycle of poems in which the poet speaks of his love for Ukraine. Selections from Symonenko's diary, *Okraitsi dumok* (The Crusts of Thoughts), were published in the journal *Suchasnist'* (1965, no. 1). Collections of his poetry appeared in the West as *Bereh chekan'* (The Shore of Waiting, 1965, 1973). His story 'Podorozh v krainu Navpaky' (A Journey to the Country of Backwards) was published posthumously in Ukraine in 1964, as was the collection of poetry *Zemne tiazhinnia* (Earth's Gravity). The collection of short stories *Vyno z troiand* (The Wine from Roses) appeared in 1965, and a selection of works, *Poezii* (Poems), appeared in 1966. The poems and novellas in the last-named selection were included in the second edition of *Bereh chekan'*, which appeared in 1973. The collection *Narod mii zavzhdy bude: virshi ta kazky* (My People Will Always Exist: Poems and Stories) appeared in 1990.

In the first decade following Symonenko's death Soviet criticism attempted to paralyze the influence of his samvydav poetry, by suppressing it and simultaneously praising it as 'irreproachably devoted to the Party line.' Later the suppression of his works became total, and they were deemed by M. *Shamota 'incompatible' with the Party line. A book about Symonenko, by A. Tkachenko, was published in Kiev in 1990.

I. Koshelivets

Symoniv, Dmytro, b ?, d 1919. Civic figure and state administrator. A leading member of the Ukrainian Party of Socialists-Independents, he was a director of the state auditing commission in the Hetman government (1918) and the state comptroller in the UNR Directory under V. Chekhivsky and S. Ostapenko (December 1918 to April 1919).

Symoniv, Matvii. See Nomys, Matvii.

Symonov, Oleksander, b 1875 in Hadiache county, Poltava gubernia, d 12 July 1957 in Gagra, Abkhazian ASSR. Painter. A graduate of the Moscow School of Painting, Sculpture, and Architecture (1901), he studied in Paris in 1907. From 1922 to 1934 he taught at the Kharkiv Art Institute. From 1948 he lived in Gagra, where a permanent exhibition of his works has been established. He painted landscapes of the Poltava region, Kharkiv, the Donbas, and Georgia, such as *The Last Shepherd* (1927), *Environs of Kharkiv* (1936), *Mine Shafts*, and *Morning in the Donbas*. An album of his works was published in Tbilisi in 1959.

Symonova, Nadiia. See Kybalchych-Kozlovska, Nadiia.

Symonovsky, Petro [Symonovs'kyj], b 1717, d 30 June 1809 in Kiev. Historian, jurist, and government official. After being educated at the Kievan Mohyla Academy (1746–7) and the universities of Halle, Wittenberg, and Königsberg (1748–51) he served as translator at the General Military Chancellery (1753), captain in Kiev regiment (1757–64), land judge of Oster county (1764), member of the General Court (1767–81), and chairman of the First Department of the Kiev Supreme Land Court (1782–97). One of the most educated figures of his day in Left-Bank Ukraine, he wrote *Kratkoe opisaniie o kozatskom malorossiiskom narode i o voennykh ego delakh* (A Short Description of the Cossack Little Russian People and Their Military Feats, 1765), which outlines the history of the Hetman period to 1750 with respect to Ukrainian statehood. It was first published by O. Bodiansky in 1847. Symonovsky took part in the topographic-economic survey of Left-Bank Ukraine (1770s and 1780s) and was the editor, and perhaps the author, of *Topograficheskoe opisaniie Kievskogo namestnichestva* (A Topographic Description of Kiev Vicegerency, 1786), which was published by the Archeographic Commission of the ANU in 1991.

Symphonic music. The most developed form of instrumental music for an orchestra. The first symphonic works by a Ukrainian composer were the *Sinfonia Concertante* and *Symphony in B-Flat Major* written by D. *Bortiansky in the late 18th century. The 19th century produced symphonic overtures by M. Verbytsky, a symphony and a fantasia by M. *Lysenko, the *Ukrainian Symphony* by M. Kolachevsky, and a symphony by P. Sokalsky. Ukrainian symphonic music reached its highest level of development in the 20th century, with works by such composers as S. *Liudkevych, P. Senytsia, L. *Revutsky, B. *Liatoshynsky, M. Verykivsky, P. Pecheniha-Uhlytsky, M. Kolessa, R. Simovych, A. Rudnytsky, M. Fomenko, K. Dankevych, H. Maiboroda, L. Kolodub, G. Fiala, L. Hrabovsky, and V. *Sylvestrov. (See also *Orchestra.)

BIBLIOGRAPHY

Hordiichuk, M. *Ukrains'ka radians'ka symfonichna muzyka* (Kiev 1969)

Symphony Orchestra of Ukraine. Established in 1937 on the basis of an orchestra that performed for Ukrainian Radio Committee broadcasts, the ensemble numbers over 100 members. It has premiered important works by Ukrainian composers and frequently records for the Melodiya

label. Its main conductors have included N. Rakhlin and K. Simeonov (1937–63), S. Turchak (1963–7), V. Kozhukhar (1967–77), and F. Hlushchenko (since 1977). The orchestra, based in Kiev, has an extensive repertoire including world classics, 20th-century Ukrainian symphonic music, and works by early Ukrainian composers.

Symyrenko (Semyrenko, Simirenko). A family line of manufacturers, sugar refiners, pioneers of shipping traffic on the Dnieper River, *orcharding experts, and patrons of Ukrainian culture. The first reliable information about the Symyrenko line concerns Stepan Symyrenko, who lived in the later 18th century. He was a Sich Cossack for over 20 years and then became a *chumak. His son, Fedir *Symyrenko, was classified a serf, reputedly for refusing to pledge allegiance to Catherine II. He purchased his freedom and became one of the first Ukrainian sugar manufacturers (1840s). Fedir's sons, Platon *Symyrenko and Vasyl *Symyrenko, were noted technologists and manufacturers and also patrons of Ukrainian culture; Platon assisted T. *Shevchenko in publishing *Kobzar* (1840). Platon's son, Lev *Symyrenko, and Lev's son, Volodymyr *Symyrenko, were noted pomologists and founders of rational orchard-growing in the Russian Empire. Volodymyr's son, Alex *Simirenko, was a sociologist in the United States.

Symyrenko, Fedir, b 1791 in Horodyshche, Cherkasy county, Kiev gubernia, d 1867. Entrepreneur; father of P. and V. Symyrenko. Descended from an enserfed Cossack family, he became one of the first industrialists in Ukraine. In the 1820s and 1830s he leased a sugar mill with his father-in-law, K. Yakhnenko, and traded in grain, livestock, and leather goods. Eventually he bought his freedom and together with the *Yakhnenko family established a sugar-manufacturing company. In 1843 in the village of Tashlyk, near Smila in Kiev gubernia, they built the first mechanized steam sugar refinery in the Russian Empire. In 1846 they set up a machine-building factory in Mliiv, which built sugar-refining equipment, and in 1848 a second sugar refinery near Mliiv. The Mliiv factory produced the first steamships used on the Dnieper.

Symyrenko, Lev, b 18 February 1855 in Mliiv, Cherkasy county, Kiev gubernia, d 6 January 1920 in Mliiv. Pomol-

Lev Symyrenko

Platon Symyrenko

ogist; son of P. *Symyrenko. A graduate of Odessa University (1879), he was arrested for political activity and sentenced to eight years of exile in eastern Siberia. During the period 1879–87 he organized greenhouses, planted decorative and fruit-bearing trees, and established a civic park in Krasnoiarsk. After returning to Mliiv in 1887, he developed one of the largest collections of fruit trees in all of Europe on his property. The orchard included apples (900 varieties), pears (889), cherries (350), gooseberries (165), plums (84), walnuts (54), apricots (36), and peaches (15). He used the varieties for *selection purposes and established an orcharding school. His major work was *Pomolohiia* (Pomology), which was not printed until 1961–3 (3 vols). Symyrenko was assassinated during the revolution, and his property was nationalized and turned into the *Mliiv Orcharding Research Station. He was rehabilitated in the late 1950s.

Symyrenko, Platon, b 2 January 1821 in Smila, Cherkasy county, Kiev gubernia, d 26 January 1863. Industrialist and philanthropist; son of F. *Symyrenko. He studied manufacturing and sugar refining in Paris in the early 1840s. When he returned to Ukraine, he helped direct his family's sugar refining and other business activities. In 1856 he established an orchard near Mliiv, in Kiev gubernia. There he developed new strains of fruit trees, especially apple trees, some of which gained great popularity throughout Ukraine; his son, L. *Symyrenko, developed the orchard into one of the most important nurseries in the Russian Empire. Symyrenko was a friend of T. Shevchenko and helped fund the publication of his *Kobzar*. He was a generous donor to various Ukrainian cultural projects.

Vasyl Symyrenko

Volodymyr Symyrenko

Symyrenko, Vasyl, b 7 March 1835, d 17 December 1915 in Kiev. Industrialist, inventor, and philanthropist; son of F. *Symyrenko. He managed his family's sugar-refining company. In the 1860s he built a sugar refinery in Sydorivka, near Kaniv, in Kiev gubernia, which was equipped with ultramodern machinery, some of it of Symyrenko's own design. It was the most productive plant of its kind in the Russian Empire. For some 40 years Symyrenko provided substantial financial support for Ukrainian cultural work. He covered the deficits of the journals *Kievskaiia starina*, *Literaturno-naukovyi vistryk*, and *Ukraina*, and the newspapers *Hromads'ka dumka*, *Rada*, and *Ukrainische*

Rundschau. He also funded the work of the Vik publishing house and supported such scholars and writers as M. Drahomanov and M. Kotsiubynsky. In 1912 he donated 100,000 rubles to purchase a new building for the Shevchenko Scientific Society in Lviv. In Sydorivka he founded and maintained one of the finest Ukrainian national theater troupes of the time. Symyrenko left his entire estate (some 10 million rubles) to Ukrainian cultural causes, but because of the First World War and the revolution his will could not be executed, and the money was lost. He was largely ignored by Soviet Ukrainian scholarship, despite his importance in Ukrainian economic and cultural history.

Symyrenko, Volodymyr, b 29 December 1891 in Mliiv, Cherkasy county, Kiev gubernia, d 15 November 1943? Pomologist and selection scientist; son of L. Symyrenko. A graduate of the agricultural faculty of the Kiev Polytechnical Institute (1915), he founded and directed the *Mliiv Orcharding Research Station (1921–30) and chaired the orcharding section of the Agricultural Scientific Committee of Ukraine. He was a key figure in the interwar reconstruction of orchards in Ukraine; in 1928 his nurseries contained 40,000 hybrids of fruit trees and berry bushes. He worked for the Ukrainian Scientific Research Institute of Orcharding (1930–3) and taught at the Uman Agricultural Institute (1932–3). His views on orchard development and heredity were in conflict with Soviet views and with those of the geneticist I. Michurin. Early in 1933 Symyrenko was arrested and given a 10-year term in prison near Kherson. He was released in 1937 but was arrested a second time, in 1938, and his subsequent fate is unknown. He was posthumously rehabilitated. Symyrenko prepared many scholarly and popular works in his field, including *Sadovyi rozsadnyk* (The Orchard Nursery, 1929) and *Plodovi sortymenty Ukraïny* (Fruit Varieties of Ukraine, 1930). A biography, by I. Rozhin, was published in Winnipeg (1960).

Syn Ukraïny (Son of Ukraine). A weekly newspaper published in Warsaw in 1920–1. Initially the organ of the UNR military mission, it later became a more general journal of political affairs, although it continued to support the UNR government-in-exile and serve as a forum for veterans of the UNR Army. *Syn Ukraïny* was edited by M. Vorony with the assistance of A. Korshnivsky and M. Bukshovany.

Syndicate of Sugar Manufacturers (Russian: *Sindikat sakharozavodchikov*). The first manufacturing syndicate established in Ukraine. It was founded on 28 April 1887 at a conference of sugar producers in Kiev with the assistance of the Russian government and was led by Polish, Russian, Jewish, and Ukrainian businessmen. The syndicate was based on a series of long-term agreements among sugar producers. It maintained a permanent office in Kiev and a branch in Warsaw, and charged a nominal membership fee, but did not issue shares or keep a common capital base. Hence, it was something between a pool and a cartel in form. At the height of its power in the early 1890s, its members owned over 90 percent of all the sugar factories in the Russian Empire.

The main goal of the syndicate was to prevent a fall in sugar prices on the domestic Russian market. That goal was supported by the government, which collected an ex-

cise tax on sugar. Although the poverty of the Ukrainian and Russian consumers kept demand low, continual modernization and growth in the sugar industry resulted in large sugar surpluses. In order to maintain high prices, the syndicate agreed to export up to 25 percent of its production. The sugar was dumped on the international market at lower than domestic prices. The measure was also supported by the government, which waived its excise tax on exported sugar. The members of the syndicate agreed to control prices for sugar but did not divide the market or set quotas for each producer, which tactic resulted in strong competition for sales among the producers. During the history of the syndicate domestic sugar prices ranged from 4.18 to 4.50 rubles per 16.38 kg (the excise tax increased from 0.85 to 1.75 rubles), and export prices ranged from 2.50 to 3 rubles. In 1895, after syndicate members had begun to quarrel over pricing, the government passed legislation to limit sugar production and assigned production quotas to individual producers. Companies that ignored the quotas were fined. The syndicate was transformed into a committee of sugar refiners, which held periodic congresses and acted as a liaison body between the government and the industry until 1917.

V. Holubnychy

Synelnikov, Ivan [Synel'nikov], b ? in Voronezh province, d 1789 in Ochakiv. Russian imperial military functionary, descended from Cossack officers of Ostrohozke regiment. He was a voivode of Poltava, Slovianske, and Kherson provinces, and he assisted A. Suvorov in resettling peasants from the Crimea in the area beyond the Sea of Azov. Suvorov recommended Synelnikov to Prince G. Potemkin, who appointed him the builder and first governor of Katerynoslav (1783–8). He received large estates in Southern Ukraine and was a friend of V. Kapnist. His descendants established ties with the Seletsky and Vyshnevsky *starshyna* families.

Kyrylo Synelnikov (Kirill Sinelnikov)

Synelnikov, Kyrylo [Synel'nykov] (Sinelnikov, Kirill), b 29 May 1901 in Pavlohrad, Katerynoslav gubernia, d 16 October 1966 in Kharkiv. Experimental physicist; full AN URSR (now ANU) member from 1948. A graduate (1923) of Crimean University in Symferopil, where he was a student of A. *Yoffe, he worked under Yoffe in the Leningrad Physical-Technical Institute (1924–8) and under Sir E. Rutherford in Cambridge, England (1928–30). In 1930 he joined the Ukrainian Physical-Technical Institute (from

1938 the ANU Physical-Technical Institute [PTI]) in Kharkiv and rapidly became one of its moving forces, particularly in the development and construction of nuclear-particle accelerators. In 1932, using accelerated protons, Synelnikov, G. *Latyshev, A. *Leipunsky, and A. *Walter became the first in the USSR to accomplish the transmutation of one stable nucleus (lithium) into another (helium), only a few months after the first-ever artificial nuclear transmutation was achieved by J. Cockcroft and E. Walton in Cambridge. Synelnikov rapidly became an unrivaled specialist in accelerator design and in associated vacuum technology. In 1937 he and A. Walter built a 2.5-MeV electrostatic particle accelerator; at the time it was the most powerful in Europe. Subsequently he was instrumental in the development and construction of a number of other linear accelerators.

In 1944 he became director of the PTI, but he continued his active involvement in nuclear and materials research and made major contributions to the application of vacuum technology in the creation of new materials and to the purification of metals by vacuum distillation (vacuum metallurgy). Under his leadership the PTI became heavily involved in controlled thermonuclear-fusion research and rapidly grew into a leading research center in plasma confinement and heating. One of its plasma confinement devices is called the Synelnikov trap. Since 1974 the ANU has awarded the Synelnikov Prize for exceptional accomplishments in physics research.

O. Bilaniuk

Synelnikove [Synel'nykove]. v-16. A city (1989 pop 36,600) and raion center in Dnipropetrovske oblast. It sprang up as a railway construction settlement in 1869 and developed into a transport junction. In 1938 it attained city status. Today it is a transportation and industrial center, with machine-building and metalworking factories serving the railway industry, a porcelain plant, a footwear factory, and several food-processing enterprises.

Sylenka-Ivanytska, Ivanna [Synen'ka-Ivanyc'ka], b 24 July 1897 in Chornokintsi, Husiatyn county, Galicia, d 28 August 1988 in Munich. Opera and concert singer (soprano). She graduated from the Prague State Conservatory (1927) and furthered her voice training in Milan (1931–2). She toured as a soloist throughout Galicia and Bukovyna, as well as to Prague, Vienna, and Berlin, and appeared on radio in Rumania, Czechoslovakia, Germany, Austria, and Italy. Her main roles included Mařenka in B. Smetana's *The Bartered Bride*, Nedda in R. Leoncavallo's *I Pagliacci*, Micaëla in G. Bizet's *Carmen*, Violetta in G. Verdi's *La Traviata*, Madame Butterfly in G. Puccini's opera, Odarka and Oksana in S. Hulak-Artemovsky's *Zaporozhian Cossack beyond the Danube*, Natalka in M. Lysenko's *Natalka from Poltava*, and Kateryna in M. Arkas's opera. Her recording legacy includes art songs and settings of Ukrainian folk songs by M. Lysenko, K. Stetsenko, D. Sichynsky, and others.

Synevir Lake [Syn'ovyrs'ke ozero] (aka Synevir). v-4. A lake situated in the southern part of the Gorgany Mountains in Transcarpathia oblast. It is up to 24 m deep, has an area of approx 0.07 sq km, sits at an elevation of 989 m, and flows into the Tereblia River. It was formed when the

Synevyr Lake

river was dammed by a landslide. Synevyr is a popular tourist site.

Synhailvsky, Mykola [Synhajivs'kyj], b 12 November 1936 in Shatryshche, Korosten raion, Zhytomyr oblast. Poet of the **shestydesiatnyky*. He graduated from Lviv University (1961) and worked as a journalist and chief editor of *Pioneria* (1974–81). Since 1958 he has published numerous poetry collections, including many for children. He has also translated modern Greek, Russian, and Polish literary works into Ukrainian. An edition of his selected works was published in 1986.

Synhalevych-Mazepa, Nataliia [Synhalevyč-Mazepa, Natalija], b 1882 in Kamianets-Podilskyyi, Podilia gubernia, d 1945. Physician and civic leader; wife of Isaak *Mazepa. As a student at St Petersburg University she belonged to the local branch of the Revolutionary Ukrainian party and the Ukrainian Social Democratic Workers' party. She worked as a bacteriologist in Katerynoslav and Volhynia. In 1923 she settled in Prague, where she did bacteriological research and contributed articles to Czech scientific journals. She also wrote a Ukrainian textbook on social hygiene.

Syniak [Synjak]. A health resort located approx 20 km from Mukachiv outside the town of Chynadiiwe. Scenically situated on a hill at an elevation of 450 m, Syniak is known for its sulfur mineral baths and health resort facilities.

Syniavsky, Antin [Synjavs'kyj], b 24 June 1866 in Bila Tserkva, Kiev gubernia, d 1951 in Symferopil. Historian and economist, teacher, and civic figure. After graduating from Kiev University he worked under V. Antonovych and continued his studies (now in law) at Odessa University and in Germany. A member of the Odessa *Hromada, he had contacts in Galicia (particularly with I. Franko) and published articles in Galician periodicals of the late 1890s (such as *Narod* and *Zoria*) under various pseudonyms (A. Katran, Kh. Skrahliuk, and others). From the begin-

Antin Syniavsky

ning of the 1900s Syniavsky was director of the commerce school in Katerynoslav and deputy head of the Katerynoslav Archival Commission as well as editor of its publication *Letopis'* (1904–15), in which he printed his own papers on the history and archeology of Southern Ukraine. He helped cofound a local Prosvita society (1906) and was a supporter of the Society of Ukrainian Progressives. In 1918–19 Syniavsky was director of the Department of Secondary Schools of the Ministry of People's Education in Ukraine. During the 1920s he was a professor (lecturing on economic geography, statistics, and other subjects) at several institutes of higher learning in Kiev, including the Institute of People's Education and the Institute of the National Economy. He was also a research associate of the All-Ukrainian Academy of Sciences (working in the historical section, the Oriental commission, and other areas and heading the Dniprelstan commission). In 1931 Syniavsky was sent by the VUAN to teach among the Ukrainian population in the Soviet Far East. Within a year his position was canceled. He then moved among appointments in the Far East (until 1934), Stalingrad, the Crimea, and Caucasia before settling down in Symferopil. Syniavsky's works include research and memoirs about Antonovych, P. Tutkivsky, L. Dobrovolsky, D. Syharevych, and others as well as articles and critical reviews in a variety of Ukrainian, Russian, and other journals.

A. Zhukovsky

Syniavsky, Oleksa [Synjavs'kyj], b 17 October 1887 in Andriivka, Berdianske county, Tavriia gubernia, d 24 October 1937. Linguist. A graduate of Kharkiv University, he was a professor of the Ukrainian language at the Kharkiv Institute of People's Education (1920–8), head of the VUAN Dialectological Commission (1928–34) and the Department of Dialectology at the VUAN Institute of Linguistics (1930–4), and lecturer on Ukrainian at Kiev University and the Kiev Pedagogical Institute (1932–7). Syniavsky played a key role in the normalization of *Standard Ukrainian and was editor of the final text of the Ukrainian *orthography adopted as the standard in 1927. In dialectology he supported the phonological principle and criticized the subjectivism of neogrammarians. He wrote a Ukrainian grammar for adults (5 edns, 1918); a survey of the Ukrainian language (1918); reference books on how to write (1918, 1923) and on the Ukrainian language (1922); a program for collecting materials on the Left-Bank Ukrainian dialects (1924); a Russian textbook of Ukrainian (5 edns, 1923–6); a textbook of Ukrainian for schools of social

education (4 edns, 1924–8); a booklet on the main rules of Ukrainian (4 edns, 1929–31); and articles on the phonic traits of literary Ukrainian (1929), the phonetic principle in Ukrainian dialectology (1929), the history of Ukrainian orthography (1931), the language of Liubech in the Chernihiv region (1934), and the language of H. Skovoroda (1924), I. Kotliarevsky (1928), and T. Shevchenko (including fundamental works based on Shevchenko's manuscripts, 1925, 1931). The results of his research were synthesized in his authoritative *Normy ukrains'koi literaturnoi movy* (The Norms of Literary Ukrainian, 1931). Syniavsky was arrested during the Stalinist terror in 1934, and perished in a concentration camp.

R. Senkus

Syniavsky, Volodymyr [Synjavs'kyj], b 18 February 1932 in Vilshana, Derkachi raion, Kharkiv oblast. Freestyle lightweight wrestler. A graduate of the Kiev Institute of Physical Culture (1962), from 1955 he won five Ukrainian and four USSR freestyle wrestling championships, the 1958 World Cup, the 1959 world championship, and the 1960 Olympic silver medal.

Syniuk, Ivan [Synjuk] (pseud: I. Berezovsky), b 1 May 1866 in Kamenka, Seret county, Bukovyna, d 1953 in Rohizna (now part of Chernivtsi). Writer and teacher. He studied in Chernivtsi and organized several pedagogical publications there. He also published articles on Ukrainian life and educational matters in German-language periodicals. From 1896 to 1909 he contributed realistic and satirical stories, sketches, and fairy tales to *Bukovyna*. The prose collections *Obrazky z pryrody* (Pictures from Nature, 1897), *Obrazky z zhyttia i pryrody* (Pictures from Life and Nature, 1899), and *Feiletomy* (Feuilletons, 1935) appeared separately. Syniuk also published works about and for children in *Dzvinok* and *Lastivka* and the plays *Muzhyky* (Peasants, 1901) and *Chesna Veronia* (Honorable Veronia, 1933). His works depict Hutsul life and nature in the Carpathians.

Syniukha River [Synjuxa]. A left-bank tributary of the Boh River, which it joins at Pervomaiske, that flows southward for 111 km through Kirovohrad and Mykolaiv oblasts and drains a basin area of 16,725 sq km. Formed by the confluence of the Hirskyi Tikych and the Velykyi Vys rivers, the Syniukha is 40–50 m wide in its upper reaches and up to 90 m wide in its lower course. The Syniukha has several areas of rapids, and a number of small hydroelectric stations are located along it. The river is used for industry, water supply, and irrigation. Its main tributaries include the Yatran, the Sukhyi Tashlyk, and the Chorny Tashlyk.

Synkevych, Yulii [Syn'kevyč, Julij], b 8 April 1938 in Kiev. Sculptor. A graduate of the Kiev State Art Institute (1962), where he studied under M. Lysenko, he has sculpted compositions, such as *Toward Freedom* (1966) and *Bird* (1970); portraits, such as *Valia* (1969) and *Irena* (1971); and, with M. Hrytsiuk and A. Fazhenko, the monument to T. Shevchenko in Moscow (1964), the monument to victims of the Nazis in Kiev's Shevchenkivskyi raion (1966–9), and the memorial complex in Melitopil to Soviet soldiers who died fighting the Nazis (1965–7).

The 1992 synod of Ukrainian Catholic bishops in Lviv's St George's Cathedral

Synod. An upper-level church administrative and decision-making body under the direction of the ecclesiastical hierarchy or a council of the Ukrainian Catholic church (UCC), comparable to a *sobor. Until the establishment of the Uniate church, all Ukrainian church gatherings were known as sobors. The UCC then increasingly used the term 'synod' to describe their ecclesiastical assemblies at various levels (eparchial, metropolitan, etc), except for general councils (ecumenical sobors). Synods are attended by the hierarchy and senior priests of the jurisdiction. The election of bishops is performed by special electoral synods.

The most significant synods of the UCC were those held at *Zamostia (or Zamość, 1720) and *Lviv (1891). A permanent Synod of the Major Archbishop was established in Rome in 1972 as the standing administrative body of the UCC. It consists of the head of the church together with four bishops – the two most senior bishops, one elected by all bishops of the church, and one designated by the head of the church or the major archbishop. It serves an administrative function in all major matters. In 1979 the pope granted the major archbishop of the UCC the right to call synods of the church outside Ukraine, with the prior approval of the pope. The first such gathering was held in Rome in 1980. Inside Ukraine, on the traditional Ukrainian ecclesiastical territory, no approval of the pope is needed to call a synod.

The Ukrainian Orthodox church did not have a standing synod of its own. It was subjugated to the Moscow-based *Holy Synod, which functioned as the executive arm of the Russian Orthodox church in 1721–1917. Attempts were made to establish a synod for the Orthodox church in interwar Poland, in Ukraine during the Second World War, and in the diaspora after the war. At present the Ukrainian Autocephalous Orthodox church is headed by a Higher Church Administration or a Church Council. In 1990 the Ukrainian Orthodox church (under the Moscow patriarchate) obtained a certain degree of autonomy, including its own synod.

Synonima slavenorosskaia (Slavonic-Ruthenian Synonyms). A manuscript dictionary of the so-called *Slavonic-Ruthenian language, compiled in the second half of the 17th century by an anonymous author. It contained approx 5,000 words (including many Church Slavonicisms, Polonisms, and Latinisms) used in Ukrainian and Belarusian scholarly, polemical, and literary works. The author, who was probably from northeastern Ukraine, based his work on P. *Berynda's Slavonic-Ruthenian lexicon of 1627, excluding its southwestern dialectal lexemes, and on the Slavonic-Latin lexicon of A. *Koretsky-Satanovsky and Ye. *Slavynetsky. A copy of the *Synonima* made from the original and containing errors was bound with M. Smotrytsky's grammar of 1619; it is now preserved at the ANU Central Scientific Library in Kiev. *Synonima* was published as an appendix to P. Zhytetsky's survey of 17th-century Ukrainian (1889; Ukrainian trans 1941) and together with a facsimile edition of L. Zyzanii's lexicon (1964). Its language has been studied by the linguists J. Janów and V. Nimchuk.

Synozhupannyky. See Bluecoats.

Syntax. The part of *grammar dealing with the way words are put together to form phrases, clauses, and sentences and with the study of the structure, types, and functions of sentences and their component parts. Scholars of the Middle Ages and the Enlightenment discussed syntax in the context of logic and philosophy. Based on contemporary Greek and Latin grammars, M. Smotrytsky's Slavonic grammar (1619) approaches syntax in this way too. Early 19th-century Galician grammarians followed the example of Polish and German grammars and of N. Grech's (1829) and A. Vostokov's (1831) Russian grammars modeled on them. A positivist approach, based on data from existing languages and partly influenced by Romanticism, was introduced by the Slovenian linguist F. Miklosich in his comparative Slavic grammar (4 vols, 1852–75). The grammars of Miklosich's Western Ukrainian disciples M. Osadtsa (1862), O. Ohonovsky (1889), and S. Smal-Stotsky (1893, 1913) were not free of the influence of logical syntax (particularly that of the Russian F. Buslaev).

New approaches to syntax were introduced by O. Potebnia in his studies of Russian grammar (4 vols, 1874, 1888, 1899, 1941; repr 1958, 1968, 1978). Combining the romantic ideas of W. Humboldt with a rigorous positivist method, he incorporated a great deal of Ukrainian data in his writings on the parts of speech, gerund, predicate phrase, and 'other inflections' in the sentence, and laid the foundations for the historical syntax of the Slavic languages. Romantic views could still be found in I. Ohienko's book on Ukrainian syntax (1936) and other studies. Description was combined with linguistic normalization in O. Kurylo's book on modern literary Ukrainian (1925), M. Sulyma's book on the Ukrainian phrase (1928), M. Hladky's study of the language of the press (1928), and S. Smerechynsky's book of studies on Ukrainian syntax (1932). Rejecting the mechanical acceptance of traditional, Russian, and Polish constructions based on Church Slavonic, Latin, German, and French patterns, they advocated the introduction of equivalent construc-

tions from the folk vernacular. A compromise position was expressed in O. Syniavsky's seminal book on the norms of literary Ukrainian (1931). K. Vossler's methodology, the structuralist linguistics of F. de Saussure and K. Bühler, and the psychological approaches of W. Wundt and A. Shakhmatov influenced certain followers of L. Bulakhovsky, such as M. Perehinets (coauthor of an advanced textbook of Ukrainian [1930]).

Most Ukrainian linguists perished during the Stalinist terror of the 1930s. Since that time, views about Ukrainian syntax that have been normative in the postwar period were initially developed by L. Bulakhovsky in the spirit of the teachings of the Russian linguists A. Shakhmatov and A. Peshkovsky. Bulakhovsky's influence is reflected in the university textbooks of Ukrainian syntax by O. Parkhomenko (1957; 3rd edn 1967), A. Medushevsky (1959), and B. Kulyk (1961; 2nd edn 1965); in the university textbooks of modern Ukrainian by M. Ivchenko (1960; repr 1962, 1965) and M. Zhovtobriukh and B. Kulyk (1959, 2nd edn 1961; 3rd edn 1965; 4th edn 1972); in B. Kulyk's book on the syntax of the complex sentence (1963); and in other textbooks. In 1972 an authoritative AN URSR (now ANU) multiauthor monograph on Ukrainian syntax edited by I. Bilodid and O. Melnychuk was published. It is also based on Russified linguistic norms, but relies even more on the approach of Russian linguists, such as A. Peshkovsky, L. Shcherba, and, in particular, V. Vinogradov.

Despite ideological constraints, important work has been done. Ukrainian historical syntax has been covered in university textbooks by O. Bezpalko et al (1957; 2nd rev edn 1962), I. Slynko (1973), and M. Zhovtobriukh et al (1980); in monographs by O. Bezpalko (1960), U. Yedlinska (1961), and I. Slynko (1968); and in the multiauthor ANU monograph on Ukrainian historical syntax edited by A. Hryshchenko (1983). Monographs have been written on Ukrainian comparative constructions (I. Kucherenko, 1959), the hypotactic complex sentence (I. Cherednychenko, 1959), adverbs (I. Chaplia, 1960), prepositions (A. Kolodiazhny, 1960; I. Vykhovanets, 1980; Z. Ivanenko, 1981), conjunctions (F. Medvediev, 1962), gerunds (L. Kots, 1964), word groups (H. Udovychenko, 1968), the syntax of poetic language (S. Yermolenko, 1969), the paratactic complex sentence (A. Hryshchenko, 1969), verbal structure (V. Rusanivsky, 1971), the syntax of the accusative case (I. Vykhovanets, 1971), the syntax of colloquial speech (P. Dudyk, 1973), the syntax of word groups and simple sentences (ed M. Zhovtobriukh, 1975), the systemic-semantic relations of Ukrainian and Russian syntax (V. Kononenko, 1976), complex asyndetic constructions (S. Doroshenko, 1980), the comparison of Russian and Ukrainian syntactic synonyms (V. Britsyn, 1980), the structural-semantic construction of sentences (H. Arpolenko, 1982), syntax and stylistic semantics (S. Yermolenko, 1982), the syntax of the simple sentence (L. Kadomtseva, 1985), complex sentences (K. Shulzhuk, 1986), and the comparison of the typology of Czech and Ukrainian simple verbal sentences (1987).

Postwar émigré scholars who have contributed to the study of Ukrainian syntax include G.Y. Shevelov (*The Syntax of Modern Literary Ukrainian: The Simple Sentence*, 1963), S. Chorny (textbook of Ukrainian syntax in Ukrainian, 1969), and P. Kovaliv (grammar [1946], and phrase construction [1946]).

Synthetic-materials industry. See Chemical industry.

Dmytro Syntsov (Dmitrii Sintsov)

Ivan Syrnyk

Syntsov, Dmytro [Syncov] (Sintsov, Dmitrii), b 21 November 1867 in Viatka, Russia, d 28 January 1946 in Kharkiv. Mathematician; full member of the AN URSS (now ANU) from 1939. After graduating from Kazan University (1890) he taught there (1894–9), at the Odessa Higher Mining School, and at Kharkiv University (1903–46). His main studies are in the theory of conics and its application to the solvability of differential equations and in the theory of nonholonomic differential geometry. In the geometry of Monge equations he introduced the notion of asymptotic line curvatures of the first and second kind. This and other geometrical contributions laid the foundation of the Kharkiv school of geometry. For many years he was the president of the *Kharkiv Mathematics Society.

Synytsky, Maksym [Synyc'kyj], b 1882, d 2 May 1922 in Kiev. Lawyer and civic and cultural organizer. He was a founder and president of the Ukrainian Club and the Prosvita society (1905–6) in Kiev. He worked as business manager of and was a contributor to the paper *Rada*. Together with V. Koroliv-Stary and Modest Levytsky he founded the *Chas publishing house in Kiev. He died from typhus.

Synytsky, Volodymyr [Synyc'kyj], b 25 August 1896 in Pokrovka, Odessa county, d 2 December 1986 in Odessa. Painter. He graduated from the Odessa Art School (1919), where he studied under K. Kostandi, and from the Odessa Art Institute (1928). His works include *At the Window: Portrait of My Wife* (1926), *Sorting Tomatoes* (1934), *Odessa: City Park* (1947), *Native Shores: Odessa's Environs* (1956), *Winter* (1962), *Near Odessa's Shore: Spring* (1964), *In the Park* (1968), and *Landscape* (1971). An album of his works was published in 1977.

Syphilis. An infectious systemic disease caused by the spirochete *Treponema pallidum*, usually transmitted through sexual contact and less frequently occurring congenitally. Advice on how to treat syphilis appears in Ukraine in 16th- and 17th-century *zelynyky* (herbaria). In 1776 S. Venechansky wrote one of the first textbooks about the prophylaxis and treatment of syphilis. In 1857 P. *Zablotsky-Desiatovsky wrote the manual *Rukovodstvo k izucheniiu i lecheniiu sifiliticheskoi bolezni* (Guide to the

Study and Treatment of the Syphilitic Malady). Independently of the two German scientists F. Schaudin and E. Hoffmann, D. *Zabolotny studied the pathogen of syphilis in 1903. The journal *Russkii zhurnal kozhnykh i venericheskikh boleznei* was published in Kharkiv by I. *Zeleniv (1901–18).

In Ukraine before 1914, syphilis was recorded at 40–150 per 10,000 population, with the most frequent occurrence in seaports and the Hutsul region. During and after both world wars it reached a rate of 300 in some cities. A venereological expedition to the Hutsul region in 1938 recorded a 20 percent infection rate in some villages. Drastic measures to contain the rapid spread of syphilis were employed in the Ukrainian SSR. The infected were forced to get treatment in hospitals, polyclinics, and venereal and skin disease dispensaries. Disclosure of the source of infection was mandatory, and a checkup with a follow-up of the health of the infected person's family was observed. Punishment under the criminal code by confinement in jail was enforced if the infected knowingly spread the disease. With the introduction of penicillin the treatment of syphilis has become simple and effective. The number of new diagnoses of all forms of syphilis in Ukraine per 100,000 population was 15.0 (19.7 in the USSR) in 1980, 7.8 (9.7) in 1985, and 5.7 (5.6) in 1987. At the end of 1987 the total recorded number of syphilis patients (ie, in treatment) in the USSR stood at 152,000, a rate of 54 per 100,000 population.

P. Dzul

Syracuse. A city (1980 pop 170,000, metropolitan area 642,000) in central New York State, and a manufacturing center for chemicals, machinery, and electronics. An estimated 7,400 Ukrainians live in the city. The first arrived from Galicia and the Lemko region at the end of the 1880s. A branch of the Ruthenian (now Ukrainian) National Association was set up in 1900, a Ukrainian Catholic parish was established in 1903, and a Ukrainian People's Home was built in 1929. In addition, branches of major Ukrainian organizations in the United States were founded there. A Ukrainian Orthodox parish arose in 1950. Ukrainian extracurricular classes have been offered by the Ukrainian churches, and the Ukrainian Catholic parish has maintained a day school.

Syrkin, Mykhailo, b 9 June 1922 in Kharkiv. Architect. A graduate of the Kiev Civil-Engineering Institute (1949), he has worked as an architect in Kiev. He collaborated on the design of the Technology Building (1950–3) and Administrative Building (1957) in Luhanske, and on the Computing Center and the Economics Institute of the State Planning Committee of the Ukrainian SSR (1968), the buildings of the AN URSS (now ANU) Institute of Superhard Materials (1969), and the Universytet (1960), Politekhnychnyi instytut (1963), and Sviatoshyne (1971) metro stations in Kiev.

Syrnyk, Ivan (Syrnick, John), b 4 May 1904 in Ethelbert, Manitoba, d 21 May 1972 in Winnipeg. Editor and community leader. A school teacher in interwar rural Manitoba, Syrnyk became rector of the Mohyla Ukrainian Institute in Saskatoon in 1943–7 and was a longtime editor of **Ukrains'kyi holos* in Winnipeg (1947–70). He was active in the Ukrainian Self-Reliance League (SUS), the consistory

of the Ukrainian Greek Orthodox Church of Canada, the Ukrainian Canadian Committee (now Congress), the Pan-American Ukrainian Conference, and the World Congress of Free Ukrainians.

Syrokomla, Władysław (pseud of Ludwik Kondratowicz), b 29 November 1823 in Smolhava, near Liuban, Belarus, d 15 November 1862 in Vilnius. Polish poet, dramatist, and translator. His Polish translation of T. Shevchenko's 1860 *Kobzar* (except 'Haidamaky' [The Haidamakas]) was published in Vilnius in 1863. Although it is considered an artistic failure, it served to popularize Shevchenko's works in Poland.

Syrotenko, Hryhorii, b 1884, d 1925. Lawyer and political activist. He was a member of the Ukrainian Social Democratic Workers' party. In 1914–17, as a representative of the Union for the Liberation of Ukraine, he organized cultural and educational programs for the internees of the Rastatt internment camp. At the beginning of 1919, under the Directory of the UNR, he served as deputy minister for military affairs in V. Chekhivsky's and S. Ostapenko's cabinets. He served as military specialist on the Committee for the Defense of the Republic in Kamianets-Podilskyi (March 1919) and then as defense minister in B. Martos's cabinet (April to 9 July 1919). In 1920 he emigrated to Poland and then Czechoslovakia.

Oleksander Syrotenko: *Rest* (1927)

Syrotenko, Oleksander, b 22 June 1897 in Vorozhba, Sumy county, Kharkiv gubernia, d 16 October 1975 in Kiev. Painter. He studied at the Kiev Art School under F. Krychevsky (1913–18), at the Ukrainian State Academy of Arts, and at the Kiev State Art Institute (1921–7). A member of the Association of Artists of Red Ukraine (1928–9) and Ukrainian Artistic Alliance (1929–31), he taught at the Kharkiv Art Institute (1931–4) and Kiev State Art Institute (1934–69). His work consists of landscapes, portraits, and genre and historical paintings, such as *Rest* (1927), *A Worker's Family* (1929), *Motherhood*, *Female Bathers* (1937), *Ustym Karmaliuk* (1937), *Chaikhan* (1947), *Field* (1949), *At T. Shevchenko's Grave* (1948), and *Above the Dnieper* (1970).

Syrotenko, Volodymyr (pseud: Did Danylo, S. Dolov, Zub), b 1892 in Chernihiv gubernia, d 1941. Early Ukrainian-American poet and artist. He emigrated to the United

States before the First World War. His poems about the plight of Ukrainian immigrants and his caricatures appeared in New York City's satirical semimonthly *Molot* (1919–23) and the daily *Ukraïns'ki shchodenni visty* (from 1920 on). Published separately were his play *Zhertvy tsaryzmu* (The Victims of Tsarism, 1917) and the poetry collection *Zmahannia* (The Struggle, 1924).

Syrotiuk, Mykola [Syrotjuk], b 9 July 1915 in Teklivka, Olhopil county, Podilia gubernia, d 29 October 1984 in Kiev. Literary scholar and writer. After finishing graduate studies at the Odessa Pedagogical Institute (1953) he taught there and was a senior research fellow at the Institute of Literature of the AN URSR (now ANU). In 1966 he became a department head at the Kiev Institute of Theater Arts, and later, a professor at Kiev University. Among his scholarly works are monographs on M. Trublaini (1956), Ukrainian historical prose (1958), I. Mykytenko (1959), the Soviet Ukrainian historical novel (1962, 1981), and Z. Tulub (1968). His literary works include the story collection *Na dorohakh ternystykh* (On Thorny Roads, 1961) and the historical novels *Sestra* (Sister, 1960), *Pobratavsia sokil* (The Falcon Took a Brother, 1964), *Zabilily snihy* (The Snows Whitened, 1970), *Sertse klykalo* (The Heart Called, 1971), *Na krutozlami* (At the Acute Break, 1980), *Velykyi blahovist* (The Great Herald, 1983), and *Turbavit'si* (1985, together with the novel 'Ostrohoz'kyi polkovnyk' [The Colonel of Ostrohozke]).

Syrotynin, Mykola (Syrotinin, Nikolai), b 26 November 1896 in Saratov, Russia, d 4 April 1977 in Kiev. Pathophysiologist; corresponding member of the AN URSR (now ANU) from 1939 and full member of the USSR Academy of Medical Sciences (AMN SSSR) from 1957. A graduate of Saratov University (1924), he worked in Kiev from 1934. He headed a department in the Ukrainian SSR Ministry of Health Institute of Experimental Biology and Pathology (1934–53), the ANU Institute of Clinical Physiology (1946–53), the AMN SSSR Institute of Infectious Diseases (1950–6), the ANU Institute of Physiology (from 1956), and the Kiev Medical Institute (1955–61). He wrote works on immunology, hypoxia, comparative pathology, and medical history and methodology.

Sysak-Cavazzi, Juliette. See Juliette.

Sysyn, Frank, b 27 December 1946 in Passaic, New Jersey. Historian. He graduated from the universities of Princeton (1968), London (1969), and Harvard (PH D,

Frank Sysyn

1976), taught at Harvard (1976–85), and was an associate director of the Harvard Ukrainian Research Institute (1985–8). In 1989 he was appointed the first director of the Peter Jacyk Centre for Ukrainian Historical Research at the University of Alberta, and has been acting director of the Canadian Institute of Ukrainian Studies since 1991. A specialist on 17th-century Ukraine, he has published *Between Poland and the Ukraine: The Dilemma of Adam Kysil, 1600–1653* (1985) and many articles.

Mykhailo Sytenko

Oleksii Sytenko

Sytenko, Mykhailo, b 12 November 1885 in Riabushky, Lebedyn county, Kharkiv gubernia, d 13 January 1940 in Kharkiv. Orthopedist; corresponding member of the AN URSR (now ANU) from 1935. A graduate of Kharkiv University (1910), he worked in the Kharkiv Women's Medical Institute (1911–14), and was chief doctor at the Kharkiv Medico-Mechanical Institute (from 1921), director of the Scientific Research Institute of Orthopedics and Traumatology (from 1926), and head of the orthopedics department at the Kharkiv Institute for the Upgrading of Physicians. He founded and edited the journal *Ortopediia i travmatologiia* (from 1927) and introduced new orthopedic instruments and operations. His publications dealt with field surgery, plastic bone surgery, and inherited deformities.

Sytenko, Oleksii (Sitenko, Aleksei), b 12 February 1927 in Novi Mlyn, now in Baturyn raion, Chernihiv oblast. Theoretical physicist; AN URSR (now ANU) corresponding member since 1967 and full member since 1982. A graduate of Kharkiv University (1949; candidate's degree, 1952), he taught theoretical nuclear physics there (1949–59) and did research at the ANU Physical-Technical Institute in Kharkiv (1955–9). Since receiving his doctorate (1959) he has been a professor at Kharkiv University (1960–1) and Kiev University (since 1963), headed the Department of Theoretical Nuclear Physics at the ANU Institute of Physics in Kiev (1961–8), organized the department of theoretical nuclear physics at Kiev University (1965) and directed it for several years, headed the Department of Nuclear Theory and Nuclear Reactions at the ANU Institute of Theoretical Physics (since 1968), and served as the institute's director (since 1988). His major contributions have been in the fields of scattering theory (he developed the Sitenko-Glauber multiple-scattering theory), nuclear-reaction theory, nuclear few-body problems, and plasma physics. He

has written or cowritten approx 300 papers and 8 monographs. His monographs *Electromagnetic Fluctuations in Plasma* (1967), *Lectures in Scattering Theory* (1971), *Lectures on the Theory of the Nucleus* (with V. Tartakovsky, 1975), *Fluctuations and Non-Linear Wave Interactions in Plasmas* (1982), and *Theory of Nuclear Reactions* (1990) have been translated and published in English.

O. Bilaniuk

Kostiantyn Sytnyk

Yevheniia Sytnyk

Sytnyk, Kostiantyn, b 3 June 1926 in Luhanske. Botanist and plant physiologist; full member of the AN URSR (now ANU) since 1973 and its vice-president since 1974. A graduate of the Voroshylovhrad Pedagogical Institute (1949), he has worked for the ANU Institute of Botany as an associate (from 1950), department head (1960–79), and director (since 1970). His major research interests include the physiology of plant growth and development, plant ecology, and phytobiology. He coedited *Biolohichnyi slovnyk* (The Biology Dictionary, 2nd edn, 1986).

Sytnyk, Mykhailo, b 6 June 1919 in Vasylykiv, Kiev gubernia, d 21 August 1959 in Chicago. Lyric poet. He began publishing in Kiev and Kharkiv journals in 1937. He was an editor of *Litavry* in Kiev in 1941, and he published two poetry collections, *Vid sertsia* (From the Heart) and *Novi obrii* (New Horizons), in Vasylykiv in 1942. As a postwar refugee in Germany he published the well-received collection *Vidlitaiut' ptytsi* (The Birds Fly Away, 1946) and a narrative poem about wartime Ukraine, *Zaliznychyj storozh* (The Railway Guard, 1947). He emigrated to the United States in the early 1950s. Unable to cope with displacement, he led a transient's life before being murdered in Chicago. Over 160 of his poems and a few feuilletons and humorous sketches appeared in émigré periodicals. A posthumous edition of his poems, *Tsvit paporoti* (Flower of the Fern, 1975), has a bibliography of his works.

Sytnyk, Oleksander, b 24 January 1920 in Baturyn, Konotip county, Chernihiv gubernia. Sculptor. A graduate of the Institute of Painting, Sculpture, and Architecture in Leningrad (1950), he has created sculptures such as *Smolnyi* (1950), *Defenders of the Brest Fortress* (1958), *The Only Son* (1960), *Life Calls* (1961), and *Heretic* (1964) and the monuments to students who died in the Second World War (1967, with K. Chekanov and V. Shchedrova) and M. Lomonosov (1970) in Dnipropetrovske.

Sytnyk, Yevheniia (née Onuferko), b 1 May 1900 near Ternopil, Galicia, d 6 February 1975 in Winnipeg. Educator and civic leader. After emigrating to Canada in 1927, she taught Ukrainian school and was active in the Ukrainian People's Home in Winnipeg. With A. Yonker she was active in the Canadian Ukrainian Women's Society and then founded the women's section of the local Ukrainian War Veterans' Association (1930). For 15 years she served on the national executive of the Ukrainian Women's Organization of Canada. In 1944 she helped found the women's section of the Ukrainian Canadian Committee (now Congress). She was one of the founders and vice-presidents of the World Federation of Ukrainian Women's Organizations. For three years she edited the women's page in *Novyi shliakh*, and she contributed many articles to the Ukrainian press.

Sytsianko, Yosyp [Sycjanko, Josyp], b ? d 1886 in Kharkiv. Physician. A graduate of Moscow University (1851), he wrote a doctoral dissertation on the treatment of relapsing fever (1856). In 1864 he was appointed docent in electrotherapy at Kharkiv University. His publications deal with the therapeutic uses of electric current. He also wrote a popular manual of daily exercises (1880).

Mykola Syvachenko

Hryhorii Syvokin

Syvachenko, Mykola [Syvačenko], b 22 November 1920 in Yampil, Zvenyhorodka county, Kiev gubernia, d 7 October 1988 in Kiev. Literary scholar; corresponding member of the AN URSR (now ANU) from 1948. He graduated from Kiev University (1947) and was a senior and later the chief associate of the Institute of Literature of the ANU (1947–64, 1973–88) and the director of the Institute of Fine Arts, Folklore, and Ethnography. He also headed the *Znannia Society. A leading authority on 19th-century Ukrainian literature, he wrote numerous works, including chapters in Soviet histories of Ukrainian literature and books on P. Myrny and I. Bilyk's *Khiba revni' voly iak iasla povni?* (Do the Oxen Bellow, When Their Mangers Are Full?, 1957), A. Svydnytsky and the origin of the Ukrainian social novel (1962), Myrny (1967), L. Hlibov (1969), S. Rudansky's humorous stories (1979), and the texts of P. Hrabovsky's poetic works (1988). Syvachenko was also chief editor of Myrny's works (7 vols, 1968–71), copublished a book of literary and folkloristic studies (1974), and published a book of essays on texts of Ukrainian writers (1985). He was awarded the I. Franko Prize for his comparative and textual studies.

Syvash Lake (Syvashs'ka zatoka). VII–14. A shallow closed-off bay connected to the western part of the Sea of Azov. Known also as the 'Putrid Sea' (Hnyle more), the lake is situated between Kherson oblast and the Crimea and is linked indirectly to the Sea of Azov by Lake Henicheske (itself connected to the Azov through a small opening off the end of the Arabat Spit). It might best be described as a loosely connected string of 11 bays, the western reaches of which run along an east–west axis and the eastern reaches along a northwest–southeast axis. Syvash has a total length of approx 200 km, a width of 2–35 km, and a maximum depth of 3.2 m. Its area (including the 100 sq km of space occupied by islands in the lake) fluctuates between 2,500 and 2,700 sq km as sections of the lake dry up during the year. The lake bottom is covered with a layer of gray and gray-green mud, 8–10 m thick in the west and up to 15 m thick in the east. Its banks are generally low-lying and covered with a layer of salt in the summer. The estimated salt reserves of the lake total approx 200 million t. They are replenished constantly by an estimated 12 million t brought in annually as the Sea of Azov feeds the lake. The lake also contains other chloride compounds, including magnesium chloride, magnesium sulfate, and traces of magnesium bromide. The compounds are processed at Perekop. Part of the lake is included in the Azov-Syvash Game Preserve.

Syvokin, Hryhorii [Syvokin', Hryhorij], b 19 August 1931 in Artemivka, Chutove raion, Poltava oblast. Literary scholar and critic. He graduated from Kharkiv University (1955) and did postgraduate work there in Old Ukrainian literature. A senior associate of the Institute of Literature of the AN URSR (now ANU), he has written many critical and theoretical articles; books on old Ukrainian poetics (1960), creative literature and the reader (1971), the artistic development of contemporary Soviet literature (1980), and Ukrainian literature and the reader (1984); and books of literary criticism (1965, 1972, 1978).

Syvulia [Syvulja]. V–5. The highest peak (elevation 1,836 m) in the Gorgany Mountains. Situated in Ivano-Frankivske oblast between the sources of the Limnytsia and the Bystrytsia Solotvynska rivers, the mountain consists largely of sandstones and shales and is marked by numerous rock deposits. Its slopes are forested to approx 1,500 m, with a ring of pines and alders above that.

Syzonenko, Oleksandr, b 20 September 1923 in Novooleksandrivka, Kherson okruha. Writer. He graduated from the Mykolaiv Pedagogical Institute (1955), and worked at the Mykolaiv Shipyard and as a scenarist at the Kiev Artistic Film Studio (1961–9). He wrote several prose collections, with the Second World War as their main theme, the first being *Ridni vohni* (Native Fires, 1951) and the most recent, *Khlib z ridnoho polia* (Grain from One's Own Field, 1978). He has also written numerous novels, such as *Bili khmary* (White Clouds, 1965), *Khto tvii druh* (Who Your Friend Is, 1972), *Step* (Steppe, 1976), *Bula osin'* (It Was Autumn, 1980), and *Meta* (The Aim, 1983). For the trilogy *Step* he was awarded the T. Shevchenko Prize in 1984. A book of his literary portraits and essays was published in 1986.

Oleksandr Syzonenko

Roman Szporluk

Szczecin (German: Stettin). A city in Poland (1989 pop 412,000), and a Baltic Sea port. First mentioned in records of the 9th century, it became the center of a voivodeship. In 1945 it was ceded to Poland by Germany, and it is now the country's most active transit port. About 10,000 Ukrainians reside in Szczecin voivodeship, most of whom were deported there during *Operation Wisła in 1947 from the Rzeszow and Lublin regions. They live mainly near the cities of Stargard, Gryfice, and Łobez. Since 1956 one of the best-organized Ukrainian Social and Cultural Society groups has been active in Szczecin, with a membership of 250, a contemporary music ensemble named 'Chumaky,' a children's section, and regular literary evenings. The local Ukrainian Catholic center is also active. In 1957–63 the local teachers' college trained about 100 teachers in Ukrainian philology. In 1956–66 a local theater group staged about 70 productions, and a banduryst kapelle was also active. Radio Szczecin carries a monthly Polish-language broadcast about Ukrainian affairs.

Szczepiórno. A town in Poznań voivodeship, Poland, that in 1921–3 was the site of an internment camp for UNR Army soldiers. The internees were transferred there from a camp in Aleksandrów Kujawski in December 1921. They continued the cultural and educational programs organized in the first camp and set up some new organizations. At the beginning of 1922 the Chief Military Council of the Brotherhoods of the Holy Protectress was set up to co-ordinate the work of the numerous brotherhoods that sprang up in various army units. The Do Svitla publishing company (est March 1922) published several books, including V. Ern's book on H. Skovoroda. The printing press of the Fourth Kiev Division printed *Religiino-naukovyi vistnyk* in the camp. A secondary school and a Ukrainian scouts school were supported by the YMCA. The

Sadovsky Drama Society was organized in 1922. The Mystetstvo literary and artistic society (est 1922) organized research, publications, and lectures, and the Philosophical Circle (est 1923) held weekly meetings with discussions. The cultural and educational work at the camp was closely co-ordinated with the program of the *Kalisz camp, which was only a few kilometers away.

Szeliga, Jan, b ?, d 1637 in Lviv. Polish printer. He operated an itinerant press in Cracow (1605–9) and the Galician towns of Dobromyl (1611–17), Yavoriv (1618–19), Jarosław (1621–6), and Lviv (1618, 1621–36), at which he printed literary works in Latin and Polish, a collection of poems by J. Herbut (1612) that included a Ukrainian song, and J. Gawatowicz's Polish drama about the death of John the Baptist (1619), which contained the first two *intermedes published in Ukraine. After Szeliga's death his press was acquired by M. Slozka.

Szlachta. See Nobility.

Szporluk, Roman [Šporljuk], b 8 September 1933 in Hrymaliv, Skalat county, Galicia. Historian; member of the Shevchenko Scientific Society and the Ukrainian Academy of Arts and Sciences. He studied law at the University of Lublin, social sciences at Oxford University, and history at Stanford University (PH D, 1965). He taught Eastern European history at the University of Michigan in Ann Arbor (as full professor since 1975). In 1991 he was appointed to the Mykhailo Hrushevsky Chair of Ukrainian History at Harvard University. He has published essays dealing with Ukrainian political thought and the nationalities question in the USSR, the handbook *Ukraine: A Brief History* (1979; 2nd edn 1982), and monograph *The Political Thought of Thomas Masaryk* (1981). He has also compiled and edited *Russia in World History: Selected Essays by M.N. Pokrovskii* (1970) and *The Influence of East Europe and the Soviet West on the USSR* (1975 and 1976).

Szreter, Tymoteusz, b 1901 in Volhynia, d 20 May 1962 in Warsaw. Metropolitan of the *Polish Autocephalous Orthodox church. The descendant of German colonists, he studied in the department of Orthodox theology at Warsaw University and then served as a military chaplain in the Lublin region. In 1938 he became bishop of Lublin. In October 1940, together with Metropolitan D. Valedinsky and the archbishop of Prague, he consecrated I. Ohiienko as bishop of Kholm and Podlachia. During the Second World War, Szreter withdrew from office and served as hegumen of the Yablochyn St Onuphrius's Monastery. He was elevated to the office of archbishop of Białystok in 1948, and to that of metropolitan of Warsaw and all Poland in 1959.

T

Tabinsky, Petro [Tabins'kyj], b 1888 in Berestechko, Dubno county, Volhynia gubernia, d 1948? Church activist. He studied at theological seminaries in Zhytomyr and St Petersburg, was ordained in 1913, and then taught at the St Petersburg Theological Academy (1913–17) and the Kamianets-Podilskyi Ukrainian State University (1918–20). He was suspended from his priestly duties by the Moscow patriarch Pimen at this time for celebrating the Liturgy and other religious services in the Ukrainian language. When the Bolsheviks occupied Ukraine, he fled to Poland, where he was interned by the authorities in 1920–2. He became a priest in Volodymyr-Volynskyi (1922–4) and rector of the theological seminary in Kremianets (1924–30). During this time he was an associate of the religious publication *Na varti* and a vocal critic of the Russian and Russified Orthodox church hierarchy in Volhynia. His conflicts with the latter led ultimately to his dismissal from the Kremianets seminary. Tabinsky then joined the Ukrainian Catholic church and moved to Lviv in 1931–2 to teach at the Greek Catholic Theological Academy. He was arrested in 1944 by the Soviet authorities and sent to a labor camp in Siberia, where he died.

Tabor (Camp). A military journal founded on the initiative of S. Petliura in the Kalisz internment camp in 1923. It appeared in 1923–4 and 1927–39 (a total of 37 issues). In 1930 its office was moved permanently to Warsaw. It contained articles on different periods of Ukrainian military history, but mostly on the recent period and on contemporary developments in military theory, weaponry, and organization. The editor was V. Kushch.

Tabouis, Georges, b 17 January 1867 in Paris, d 7 November 1958 in Bayeux, Calvados province, France. French general. In February 1917 he was assigned to the Russian general staff at the southwestern front (headed by Gen A. Brusilov) in Kamianets-Podilskyi. In December 1917 he moved to Kiev to work as a liaison officer for Gen H. Berthelot, the head of the French mission in Rumania. On 19 December France initiated diplomatic ties with the UNR, and on 28 December Tabouis became commissioner of the French republic to the UNR government. On 3 January 1918 France officially recognized the UNR, and the next day Tabouis had an audience with the head of the General Secretariat, V. Vynnychenko. He remained in Ukraine until 23 February 1918. His memoirs, 'Comment je devins Commissaire de la République Française en Ukraine,' were published in the *Pratsi* of the Ukrainian Scientific Institute in Warsaw (vol 8 [1932]).

Tadzhikistan. A republic (1989 pop 5,109,000) in Central Asia, bordering on the People's Republic of China in the east, Afghanistan in the south, Kirgizia in the north, and Uzbekistan in the west and known as the Tadzhik SSR until the end of 1991. It covers an area of 143,100 sq km, and

its capital is Dushanbe. From the 16th century it belonged to the Bukhara khanate. In the 1860s and 1870s it was annexed by the Russian Empire. In 1917–23 its inhabitants resisted the Red Army, but they were eventually conquered and forced to join the USSR. In 1924 Tadzhikistan was declared the Tadzhik ASSR, part of the Uzbek SSR, and in 1929 it was given the status of a separate republic in the USSR. In 1959 there were 31,700 Ukrainians in Tadzhikistan, in 1979, 36,000, and in 1989, 41,000. Over 90 percent of them lived in Dushanbe.

Tadzhiks. A people of Indo-European descent who call themselves Todzhik, and whose language is related to Persian. They number approx 7,651,000 (1991), of which 4,215,400 live in the territories of the former USSR (according to the 1989 census): 3,173,000 in *Tadzhikistan, 931,070 in Uzbekistan, 23,000 in Kirghizia, and 4,500 in Ukraine. They also live in northern Afghanistan and Iran. Cultural ties between Ukrainians and Tadzhiks have been manifested almost exclusively in the translation of works of literature. The first Ukrainian translator and researcher of Tadzhik literature was A. *Krymsky. Authors writing about Tadzhiks included L. Pervomaisky, V. Mysyk, and I. Kaliannyk. After the Second World War, translations of Tadzhik and Persian literature were published, including works by the 10th-century writers Rūdākī and Ferdowsī, the 14th-century poet Hāfēz, and contemporary writers, such as S. Aini and A. Lāhūti. In 1962 a Tadzhik Literature Week was held in Ukraine. There are comparatively few translations from Ukrainian to Tadzhik; among them are the works of T. Shevchenko, I. Franko, Lesia Ukrainka, M. Kotsiubynsky, P. Tychyna, and M. Rylsky. A Ukrainian Literature Week was held in Tashkent in 1961.

A. Zhukovsky

Tahaiv, Anna [Tahajiv] (née Maliieva), b 4 November 1895 in Kharkiv, d 21 December 1976 in Toronto. Stage actress and singer; wife of M. *Tahaiv. She began her theatrical career in 1918 in L. Sabinin's troupe and then worked in the Podolian Ukrainian Drama Theater (1925–7), in the People's Musical Comedy and Chervonozavodskyi Ukrainian Drama theaters in Kharkiv (1923–33), and in the Kharkiv Young Spectator's Theater (1934–41). After 1945 she and her husband, Mykhailo, were active in theaters in German DP camps. In 1951 they emigrated to Canada.

Tahaiv, Mykhailo [Tahajiv, Myxailo], b 24 January 1885 in Kharkiv, d 13 May 1972 in Toronto. Stage actor and singer (tenor). He began his theatrical career, playing mostly character and comic roles, in M. Kropyvnytsky's troupe (1905) and then worked in D. Haidamaka's troupe (1906–23), the Podolian Ukrainian Drama Theater (1925–7), the Kharkiv People's and Chervonozavodskyi Ukraini-

Mykhailo Tahaiv

Bishop Vasyl Takach

an Drama theaters (1923–33), and the Kharkiv Young Spectator's Theater (1934–41). After the Second World War he performed in Ukrainian DP camps in Germany with his wife, Anna. They emigrated to Canada in 1951.

Tahanrih (Russian: Taganrog). VI-19. A city (1989 pop 291,000) on Tahanrih Bay in the Sea of Azov in Rostov oblast, RF. It was founded in 1698 as a Russian naval base and was destroyed and annexed by Turkey in 1712. It was reclaimed by the Russian Empire in 1774. Tahanrih lost its military significance when Sevastopol was founded, but it developed as a commercial port. In the 19th century it exported grain. At the end of that century it began to develop a large metallurgical and machine-building industry. In 1887–1920 it was an administrative center of an okruha in the Don Cossack province. From 1920 to 1924 Tahanrih and its okruha were part of the territory of Soviet Ukraine. According to the census of 1926, Ukrainians accounted for 34.6 percent of the city's population and 71.5 percent of the okruha's population. Today Tahanrih is an important industrial center with metallurgical, boiler-manufacturing, and combine-building plants, ship repair yards, and metalworking factories. It has an art museum, a regional museum, and a memorial museum dedicated to A. Chekhov, who was born in Tahanrih.

Tahanrih Bay [Tahanriz'ka zatoka]. VII-18. The largest bay in the Sea of Azov. Situated in the sea's northeast corner with an entrance marked by Dovhyi Island and the Bilosarai Spit, the bay is approx 150 km long, 31 km wide (at its entrance), and 5 m deep. Its shore is generally quite high and is marked by a number of spits (such as Kryva and Yeia), shallow inlets, and coastal islands. The Don, the Kalmiius, the Miius, and the Yeia rivers empty into the bay and add several estuaries to its geographical features. The bay freezes from December to March. The largest ports on it include Tahanrih, Mariiupil, and Yeiske.

Tahanrih Bolshevik Conference. On 19–20 April 1918, during the Bolsheviks' retreat from Ukraine, 71 delegates of Bolshevik and pro-Bolshevik organizations in Ukraine (excluding those of the Donets–Kryvyi Rih Soviet Republic) met secretly in Tahanrih to discuss matters of organization, program, and tactics. There the proponents of two divergent views clashed. The Poltava delegates, headed by V. *Shakhray and Yu. *Lapchynsky, pushed for

the creation of an independent 'Ukrainian Communist party,' while the Katerynoslav delegates, headed by E. Kvirng, advocated the creation of an autonomous 'Russian Communist party (of Bolsheviks) (RCP[B]) in Ukraine,' subordinated to Moscow. In the end the compromise suggested by M. *Skrypnyk – to create a Communist Party (of Bolsheviks) of Ukraine linked to the RCP(B) through the Comintern – was adopted by a vote of 35 to 21; it was supported by G. Piatakov and other left Bolsheviks who, unlike their Moscow comrades, wanted to continue fighting the Central Powers and therefore supported for tactical reasons the notion of a party independent of Moscow. The Central Executive Committee and *People's Secretariat were abolished and replaced by the 'Insurgent Nine' (four Bolsheviks, four left Socialist Revolutionaries, and one left Social Democrat) to direct the partisan struggle in Ukraine, and an Organizational Bureau (Piatakov, Skrypnyk, S. Kosior, V. Zatonosky, Ya. Hamarnyk, A. Bubnov, I. Kreisberg) was elected to prepare the First CP(B)U Congress, to be held in July in Moscow. At the congress the independence of the CP(B)U was abolished, and it was transformed into a regional organization of the Moscow-controlled RCP(B).

R. Senkus

Taiakina, Tetiana [Tajakina, Tetjana], b 12 January 1951 in Kiev. Ballet dancer. In 1969 she completed study at the Kiev Choreography School. She then became the leading ballerina in the Kiev Theater of Opera and Ballet, notably in the ballets of P. Tchaikovsky, L. Minkus, and A. Adam and in H. Lovenskjold's version of *La Sylphide*.

Taiber, Pavlo [Tajber], b 16 February 1940 in Kharkiv. Jewish-Ukrainian painter-muralist. A graduate of the Kharkiv Industrial Design Institute (1971), in 1972 he was accused of Ukrainian nationalism for his triptych *Sedniv Motifs*, which was painted in the manner of folk art. Taiber's work is representational and employs a thick application of pigment, usually in earthy brown and ochre tones. Recurring subjects in his work include children (eg, *With a White Goat*, 1988) and the staging of puppet theaters by youngsters (eg, *A Play*, 1978; *Evening*, 1984).

Tairov, Vasili, b 1 November 1859 in Karaklis, Yerevan gubernia, Armenia, d 23 April 1938 in Odessa. Specialist in viticulture and wine making. Upon graduating from the Petrovskoe Agricultural Academy near Moscow (1884) he spent three years studying wine growing and wine making in all the major wine-producing countries of Europe. After he returned to Ukraine he founded the journal *Vestnik vinodeliia* and served as its editor (1892–1918, 1927–32). In 1899 he set up a research bureau for vine diseases. He also devoted much attention to the problem of wine adulteration and helped organize a scientific committee that worked out quality standards for wine and other foods. From 1905 to 1927 he presided over the Central Wine-Making Research Station near Odessa, which he founded, the first research institution of its kind in Ukraine. Tairov published many articles on wine growing and wine making in Russian and foreign journals, as well as a number of monographs.

Takach, Vasyl [Takač, Vasył'] (Basil), b 27 October 1879 in Vuchkove, Maramureş region, Transcarpathia, d 13

May 1948 in Pittsburgh. Greek Catholic bishop. He studied theology in Uzhhorod and was ordained in 1902. From 1911 he was administrator of the eparchial endowment fund and director of the Unii publishing company in Uzhhorod, and from 1919 he was chaplain to the eparchial seminary. In 1924 Takach was consecrated as bishop in Rome and appointed head of the exarchate created for Transcarpathian emigrants and their descendants in the United States. This creation marked the formal division of the Greek Catholic church into two separate jurisdictions, and the exarchate later became *Pittsburgh metropol. Under the influence of the Vatican, Takach introduced celibacy for the clergy of his exarchate, thereby causing several parishes to leave the church and form the independent American Carpatho-Russian Orthodox Greek Catholic church. Owing to Takach's illness, his assistant, Bishop D. Ivancho, administered the eparchy from 1946.

Talalai, Leonid [Talalaj], b 11 November 1941 in Savynsi, Balakliia raion, Kharkiv oblast. Poet. He began publishing in 1956. He has written the poetry collections *Zhuravlynyi lemish* (The Crane's Plowshare, 1967), *Vitryla tryvoh* (The Sails of Anxieties, 1969), *Osinni hnidza* (Autumn Nests, 1971), *Ne zupyniaisia, myt'!* (Don't Stop, Moment!, 1974), *Dopoky tvii chas* (As Long As It's Your Time, 1979), *Vysoke bahattia* (The High Pyre, 1981), *Hlybokyi sad* (The Deep Orchard, 1983), and *Vist'* (A Tiding, 1987). A lyrical, meditative poet, he gained prominence in the 1980s.

Talalaivka [Talalajivka]. III-14. A town smt (1986 pop 5,200) on the Olava River and a raion center in Chernihiv oblast. It was founded in 1877 as a settlement near a new railway station, and belonged to Romen county of Poltava gubernia. It attained smt status in 1958. The town has a dairy and brick and asphalt factories.

Tale of Borys and Hlib. See *Skazanie i strast' i pokhvala sviatuiu muchenyku Borysa i Hliba*.

Tale of Ihor's Campaign. See *Slovo o polku Ihorevi*.

Taler or **thaler** (*taliar*). The name of numerous 28- to 30-g silver coins issued by various European states from the 16th to 19th centuries. First minted in 1484 in the Tirol as *Guldengroschen*, the taler was issued systematically from the 1520s, beginning in Joachimsthal (whence its name), Bohemia. It was minted in the Polish Commonwealth from 1564. In the Russian Empire it was called *efimok* (from 'Joachim'). In the 17th century 1 taler equaled the value and weight of 3 Polish *zlotys or 60 Russian kopecks. Because of their intrinsic value talers (mostly from Spain, the Netherlands, and the German states) and their smaller denominations (called *lev* and *orlianka* in Ukraine) circulated as hard currency in much of Europe until the adoption of the gold standard.

Talerhof. See Thalerhof.

Taliarevsky, Yakiv [Taljarevs'kyj, Jakiv] (monastic name: Iliodor), b and d ? Wood engraver. He engraved illustrations for books of the Chernihiv printing press, such as the Anthologion of 1753, the Liturgicons of 1754 and

1763, the Sacramentation of 1754, the Psalters of 1755, 1763, 1764, 1766, and 1769, the Octoechos of 1757, and the New Testament of 1759.

Talko-Hryncewicz, Julian, b 18 August 1850 in Rukša, Lithuania, d 1936 in Cracow. Polish anthropologist and ethnographer; full member of the Polish Academy of Learning. After graduating from Kiev University (1876) he practiced medicine in Zvenyhorod (1878-91) and in eastern Siberia (1891-1908) and then served as a professor of anthropology at Cracow University. He published approx 300 works in Russian or Polish on the anthropology, archeology, and ethnography of Ukraine and eastern Siberia, including *Zarysy lecznictwa ludowego na Rusi poludniowej* (An Outline of Folk Medicine in Southern Rus', 1893) and *Szlachta ukraińska: Studium antropologiczne* (The Ukrainian Gentry: An Anthropological Study, 1897).

Talne [Tal'ne]. V-11. A city (1989 pop 18,000) on the Hirsnyi Tikych River and a raion center in Cherkasy oblast. It was founded at the beginning of the 17th century. After B. Khmelnytsky's uprising in 1648, it was part of Romanivka company in Uman regiment but was soon reclaimed by Poland. Its inhabitants took part in the haidamaka rebellions of 1738, 1750, and 1768. After the partition of Poland in 1793, the town was annexed by Russia, and from 1797 it belonged to Uman county of Kiev gubernia. By the mid-19th century it had a paper factory and sugar refinery. In 1938 Talne attained city status. Today it has a canning factory, mineral-water bottling plant, sugar refinery, and gravel quarry.

Talvi (pseud of Theresa von Jacob; married name: Robinson), b 26 January 1797 in Halle, d 13 April 1870 in Hamburg. German Slavist. While growing up in Kharkiv, where her father, L. von Jacob, taught philosophy (1806-9), she learned Ukrainian and Russian and became fond of Ukrainian folk songs and legends. She studied Slavic folklore and literatures and translated Serbian songs. After settling in the United States (1830) she wrote a *Historical View of the Languages and Literatures of the Slavic Nations with a Sketch of Their Popular Poetry* (1850), which included a brief history of Ukrainian literature, a description of Ukrainian folklore, and a translation of six Ukrainian folk songs.

Taman [Taman']. VIII-17. A stanytsia and port on Taman Bay in Temriuk raion, Krasnodar krai, RF. The earliest settlement at the site was the Greek colony of *Hermonassa (6th century BC). In the 8th and 9th centuries AD the territory was ruled by the Khazars. At the end of the 10th century it was annexed by Kievan Rus', and formed *Tmutorokan principality. From the 12th century the site was occupied by a Genoese trading post. At the end of the 15th century it fell under Turkish rule, and in 1774, under Russian rule. The Black Sea Cossacks established a stanytsia there in 1792.

Taman Peninsula [Tamans'kyj pivostriv]. VIII-17. A peninsula in the western part of Krasnodar krai, situated between the Black Sea and the Sea of Azov across from the Kerch Peninsula. Covering an area of approx 2,000 sq km, the peninsula has a low shoreline indented by many bays. It consisted of a series of islands until the 5th century AD,

when they were joined together by alluvial deposits. The former islands now form domelike ridges up to 164 m high on which 25 mud volcanoes, some still active, are located. A number of saltwater lakes lie between the ridges. The peninsula has a steppe vegetation cover and has been sown with wheat and corn. Viticulture and fruit growing constitute other agricultural pursuits. Iron-ore and mineral deposits are also found there.

Tamarisk (*Tamarix*; Ukrainian: *tamarysk*). A shrub or low tree of the family Tamaricaceae, with long, slender branches and numerous scalelike leaves. Clusters of small pink, white, and violet flowers hanging at the ends of branches create a feathery appearance. Tamarisks grow in the southern Ukrainian steppe, in the Crimean peninsula, and on the seashore sands and are planted to prevent erosion. They contain tanning and dyeing reagents and are good nectar bearers; their wood is used for fuel. The most popular species in the Ukrainian steppe, *T. ramosissima*, is also cultivated as an ornamental plant.

Tamarsky, Yurii [Tamars'kyj, Jurij], b 30 March 1903 in Podilia gubernia, d 23 January 1987 in Jersey City, New Jersey. Film director and producer. He was a member of the Free Cossacks and the Separate Cavalry Division of the UNR Army. After graduating from the Odessa Cinematography Institute (1927) he worked under O. Dovzhenko and A. Kordium at the Kiev Film Factory (now the Kiev Artistic Film Studio). During the German occupation of Ukraine he made several documentary movies. After the war he emigrated to Germany and, in 1947, to Brazil, where he set up a color film laboratory and made the first color film there (1952) and a number of documentary films on Brazil. After moving to the United States in the early 1960s, he made *Shevchenko v Vashingtoni* (Shevchenko in Washington, 1964) and *Shchob dzvonyly dzvonyly* (May the Bells Ring, 1972), both with S. *Nowytski. He wrote *Pryhody fil'mara* (Adventures of a Filmmaker, 1986).

Tana. A medieval town and trading center on the left bank of the Don River near present-day Azov. It is first mentioned in historical sources in the late 12th century. Tana came under Venetian control in 1313 and then under Genoese. The Italian merchants used it as a transit port, where the merchandise brought by caravan from China was transferred to ships. Tana was sacked in 1395–6 during Tamerlane's campaign against the Golden Horde, and never recovered its commercial importance. In 1475 it was captured by the Turks, and it soon died out.

Tanais. An ancient city near the mouth of the Tanais (later Don) River. It was established by the Greeks of the Bosphoran Kingdom at the beginning of the 3rd century BC as a trade center between the steppe nomads and the Greeks. It quickly grew into a prosperous city with a mixed population of Greeks, Sarmatians, and Maeotians. In the mid-3rd century AD Tanais was destroyed by the Goths. Although it was rebuilt, it never regained its prominence. After some nomad raids it died out in the early 5th century. Archeological research at the site started in 1853 and has been conducted systematically since 1955.

Tanais River. The ancient Greek name of the Don River. It served as a major trade link between the Greeks and the

A votive relief from Tanais

Scythians. According to Plutarch the river's earlier name was the Amazon.

Tanatar, Sevastian, b 19 October 1849 in Odessa, d 13 December 1917 in Odessa. Chemist. A graduate of the university in Odessa (1872), he taught there from 1874 and became a professor in 1896. He demonstrated in 1880 that fumaric and maleic acids produce two isomeric oxyacids upon oxidation; achieved in 1895 the thermal rearrangement of cyclopropane to propylene; and discovered several peroxy species, such as percarbonate (1899) and persulfate (1901).

Stepan Tanchakovsky

Gavriil Tanfilev

Tanchakovsky, Stepan [Tančakovs'kyj], b 1854 in Verbovets, Terebovlia county, Galicia, d 29 August 1928 in Potik Zoloty, Buchach county, Galicia. Civic and educational leader. After graduating from Lviv University he rose through the court system to become a judge. In 1896 he resigned his judgeship and became a notary public. He organized 17 Prosvita reading rooms in the Potik Zoloty region and provided them with their own buildings. He also set up a fund for building People's Homes. For his work and financial support he was elected honorary member of the Prosvita society. As a member of the National Democratic party he took part in election cam-

paigns, and in 1907 he was appointed assistant to Ye. Levytsky, who had won a seat in the Austrian parliament.

Tancher, Volodymyr [Tančer], b 20 April 1915 in Bakhmach, Konotip county, Chernihiv gubernia. Philosopher. After graduating from Kiev Pedagogical Institute (1948) and Kiev University (1949) he taught philosophy and scientific atheism at Kiev University. There he served as deputy dean of philosophy (1953–5), dean of the history and philosophy faculty (1955–7), and chairman of the department of the history and theory of atheism (from 1959). He has written over 160 works on religion and sociology; most important are his books on religious morality (1959), dialectical materialism and religion (1966), and historical materialism and religion (1967).

Tanew River (also Tanev or Tanva). A right-bank tributary of the Sian River that flows for 93 km through the Kholm region and drains a basin area of 2,300 km. Its upper reaches are in the Roztochia region; it then passes through the Sian Lowland.

Tanfilev, Gavriil, b 6 March 1857 in Revel (now Tallinn, Estonia), Estland gubernia, d 4 September 1928 in Odessa. Geographer, botanist, and soil scientist. He graduated from St Petersburg University in 1883. In 1905 he was appointed a professor at Odessa University, where he organized a geography department and later helped create an agricultural institute. He presided over the New Russia Society of Naturalists from 1911 and headed the natural history department of the Odessa Gubernia Agricultural Station (1918–26). Tanfilev continued the work of his teacher, V. Dokuchaev. He studied the geography of marshes (notably in the Polisia region) and the relationship between soil and vegetation. He attributed the treelessness of the steppe to the salinity of the soil and subsoil caused by the dry climate. He developed one of the first physico-geographic regionalization schemes for European Russia (1897) and the entire Russian Empire (1903) and wrote the four-volume *Geografiia Rossii* (Geography of Russia, 1916–26).

Taniachkevych, Danylo [Tanjačkevyc], b 18 November 1842 in Didyliv, Kaminka-Strumylova county, Galicia,

Rev Danylo Taniachkevych

Les Taniuk

d 1906 in Zakomaria, Zolochiv county, Galicia. Greek Catholic priest, publicist, and civic and political leader; honorary member of the Prosvita society. After completing his theological studies in Lviv (1867) he was appointed pastor of Zakomaria parish. He was one of the leading early populist leaders in Galicia: he organized clandestine student circles in gymnasiums, wrote numerous political pamphlets, and contributed to populist papers, such as *Vechnytsi*, *Meta*, *Nyva*, and *Pravda*. His protest letter from Ruthenian populists to the editor of *Rus'* (1867) was the first manifesto of the Galician populist movement. His work in establishing Ukrainian economic institutions was pioneering: he set up *Pravda* credit unions in Zolochiv and Brody counties as well as the first *Silskyi Hospodar society in Zolochiv. In 1897–1900 he served as deputy to the Austrian parliament.

Taniuk, Les [Tanjuk, Les'], b 8 August 1938 in Zhukove, Kiev oblast. Theater director, writer, and political activist. A pupil of M. Krushelnytsky and a proponent of L. Kurbas's method, he completed study at the Kiev Institute of Theater Arts (1963). In 1959–63 he was president of the Club of Creative Youth in Kiev and organizer of the New Kiev Theater. He also worked in theaters in Odessa and Kharkiv, where he staged M. Kulish's plays. After being heavily censored and accused by officials of abstract art and formalism in his productions, Taniuk left the Ukrainian SSR, in 1965. He directed over 50 productions in Moscow (Maiakovsky and Stanislavsky theaters), Leningrad, and Smolensk, worked for Moscow television, wrote a monograph about Krushelnytsky (1974), and translated G. Craig's *On the Art of the Theater* (1974). In 1986 he was invited to lead the Kiev Youth Theater, where he translated (with I. Drach) and premiered a controversial production of M. Shatrov's *Dyktatura sovisti* (The Dictatorship of the Conscience) and staged the works of Kurbas, W. Shakespeare, I. Franko, A. Pushkin, and V. Stus. Prior to his intended production of Kulish's *Myna Mazailo* (to have been staged in Lviv), Taniuk was removed from the Youth Theater for 'professional ineligibility' and replaced by V. Ohloblyn (1988). He became involved in the *Memorial society and the *Popular Movement of Ukraine. In 1990 he was elected to the Supreme Council of Ukraine, where he heads the parliamentary commission on culture and spiritual rebirth.

Taniuk, Nelli [Tanjuk] (family and author name: Kornienko), b 7 April 1939 in Khabarovsk, RSFSR. Theater scholar and sociologist. She graduated from Kiev University (1961) and was a member of the Club of Creative Youth (1961–3). She completed a candidate's thesis on L. Kurbas and M. Kulish at the Moscow State Art Institute (1970); coedited a translation by her husband, L. *Taniuk, of G. Craig's *On the Art of the Theater* (1974); edited a Russian-language collection of Kulish's plays (1980); and wrote *Teatr segodnia, teatr zavtra* (Theater Today, Theater Tomorrow, 1986), a chapter in the book *Les' Kurbas* (1987), and articles on the contemporary art of national minorities in the Soviet Union. She was an editor of Soviet materials for UNESCO publications (1982–1991).

Tank. A literary group of Ukrainian writers and artists of nationalist outlook, established in Warsaw in 1929. Its membership included Yu. *Lypa (its ideologist), Ye. *Malaniuk, A. *Kolomyiets, Yu. *Kosach, P. *Zaitsev, A.

Kryzhanivsky, N. *Livyt'ska-Kholodna, P. *Kholodny, Jr, O. *Babii, O. *Teliha, and A. Kara. In 1933 the group reorganized itself into the Variah publishers.

Tansky, Antin [Tans'kyj], b ?, d ca 1734–7. Cossack officer, descended from Serbian nobility; son-in-law of S. Palii. He moved to Ukraine in the 1670s and joined the Zaporozhian army. He took part in numerous Right-Bank campaigns until after the Palii rebellion in 1704. He then recognized I. Mazepa's authority and was granted lands in the Korsun region. In 1706–10 Tansky was colonel of a mercenary regiment, and in 1708 he switched his support to I. Skoropadsky. Later he was colonel of Bila Tserkva (1710–12) and Kiev (1712–34) regiments.

Tansky, Vasyl [Tans'kyj, Vasyl'], b ?, d 1763. Cossack officer; younger brother of A. Tansky. A squadron commander in the so-called Wallachian company (1708–9), he became a notable military fellow and received huge tracts of land from the Hetmanate and the Russian government (1715). He was a fellow of the standard (1725) and colonel of Pereiaslav regiment (from 1726). He was investigated for corruption in Hlukhiv (1728) and Moscow (1731), tried in 1734, and sent to Siberia (1735). He received an amnesty in 1741 and returned to Ukraine, where he was granted land in Pereiaslav regiment (including Yahotyln) and Slobid'ska Ukraine (Merefa).

Tansy, common (*Tanacetum vulgare* or *Chrysanthemum vulgare*; Ukrainian: *pyzhmo zvychaine* or *dyka horobynka*). A perennial, strong-smelling, herbaceous plant of the family Compositae, sometimes known as golden-buttons. Its leaves and heads contain volatile oils, flavonoids, tannins, and alkaloids. In Ukraine tansy grows in dry meadows, on river banks, in forest glades, and as a weed. In folk medicine tansy was used in the treatment of a variety of conditions, including bruises, sprains, cholecystitis, hepatitis, and rheumatism, and as an anthelmintic reagent. Powdered tansy is an effective insecticide. Another species of tansy, *T. balsamita*, is cultivated in Ukraine because of its painkilling properties.

Tantsiura, Hnat [Tancjura], b 10 June 1901 in Ziatkivtsi, Haisyn county, Podilia gubernia, d 12 November 1962 in Haisyn, Vinnytsia oblast. Folklore collector. While working as a teacher in his native region, he collected over 2,500 songs and melodies, about 300 tales, over 1,500 proverbs, and 600 riddles and wrote detailed accounts of the folk ways and customs of his village. Some of these materials were published in his collections *Zhinocha dolia v narodnykh pisniakh* (Woman's Fate in Folk Songs, 1930), *Tsvite kalyon'ka* (The Viburnum Is Flowering, 1965), and *Pisni Iavdokhy Zuikhy* (The Songs of Yavdokha Zuikha, 1965). The archives of the ANU Institute of Fine Arts, Folklore, and Ethnography contain his manuscripts on the history of Ziatkivtsi village (2 vols) and his unpublished collections of historical, lyrical, recruits', chumak, wedding, satirical, and Kupalo festival songs, and *vesnianky* and carols. Some of them have been included in the institute's series of folk song collections. His autobiography came out under the title *Zapysky zbyracha fol'kloru* (Notes of a Folklore Collector, 1958).

Tapestry. See Weaving.

Tarabarynov, Leonyd, b 8 November 1928 in Shalyhyne (now in Hlukhiv raion, Sumy oblast). Stage and film actor and pedagogue. He completed study at the Kharkiv Theater Institute (1955, pupil of D. Antonovych) and joined the Kharkiv Ukrainian Drama Theater. He acted in O. Dovzhenko's film *Poema pro more* (A Poem about the Sea, 1953) and has taught in the Kharkiv Institute of Arts since 1968.

Tarakanov, Mykola, b 19 December 1898 in Yelysavethrad (Kirovohrad), d 21 September 1976 in Kiev. Chorus conductor. After graduating from the Lysenko Music and Drama Institute (1926) he served as choir-master or conductor in a succession of appointments. These included the Kiev Ukrainian Opera (1926–8), the DUMKA Chorus (1928–9), the Right-Bank Ukrainian Opera in Vinnytsia (1929–32), and the theaters of opera and ballet in Kharkiv (1932–4), Kiev (1934–41), Donetsk (1954–63), and Odessa (1964–6). His conducting style is remembered for its effective interpretation of dramatic action and close attention to detail. He was involved with the premieres of many operas, including *Taras Bulba* (Lysenko-Liatoshynsky, 1937), *Perekop* (Meitus-Tits-Rybalchenko, 1939), and *Vulkan* (Yutsevych, 1963).

Taran, Anatolii, b 5 July 1940 in Myropillia, Krasnopillia raion, Sumy oblast. Writer. He graduated from the Soviet Higher Military Political School (1964) and has worked for military newspapers. He wrote the poetry collections *Ia – mil'iarder* (I'm a Billionaire, 1963), *Real'nist'* (Reality, 1966), *Rankova shybka* (The Morning Windowpane, 1969), *Aerodrom* (Aerodrome, 1976), *Kvity vohnniu* (Flowers of Fire, 1978), *Nevrachena myt'* (The Moment Not Lost, 1981), and *Soldats'ke pole* (The Soldiers' Field, 1982); a documentary novel (coauthor, 1978); and a book of documentary tales about Soviet soldiers (1988).

Andrii Taran: *At the Quarry* (1938)

Taran, Andrii, b 31 August 1886 in Nykopil, Katerynoslav county, Katerynoslav gubernia, d 5 March 1967 in Leningrad. Painter. He studied painting in Penza (1901–5), St Petersburg (1906–9), and Paris (1909–12). In 1923 he returned to Ukraine to teach at the Kiev State Art Institute, where he organized a mosaic workshop in 1937. A mem-

ber of the *Association of Revolutionary Art of Ukraine (1925–7) and *Union of Contemporary Artists of Ukraine (1927–32), he painted large industrial landscapes, such as *The Blast Furnace Begins to Smoke* (1927), *At the Dnieper Hydroelectric Station* (1929), *Kryvyi Rih Etudes* (1937), and *At the Quarry* (1938), and still lifes done in a postimpressionist style.

Taran, Liudmyla, b 2 March 1954 in Hrebinky, Vasylkiv raion, Kiev oblast. Poet. Taran completed her studies in literature at Kiev University in 1976 and has been employed as a senior researcher at the Maksym Rylsky Museum in Kiev. She is the author of several collections of intimate lyrical poetry, sensuous but with a predilection for philosophical contemplation: *Hlyboke lystia* (Deep Leaves, 1982), *Oforty* (Etchings, 1985), and *Krokvy* (Rafters, 1990). She has also written a book of literary criticism, *Enerhiia poshuku* (The Energy of the Search, 1988).

Taran, Teodosii (pseud of Honcharenko), b 1896 in Lohvytsia county, Poltava gubernia, d 1938. Soviet Ukrainian journalist. A member of the Ukrainian Social Democratic Workers' party (Independents), in 1919 he joined the *Borotbists and led one of their partisan detachments in the Kremenchuk region. He was one of P. *Liubchenko's closest associates, and in the 1920s he joined the CP(B)U and became associate editor of the central Soviet Ukrainian government newspaper, *Visti VUTsVK*. In its literary supplement, *Kul'tura i pobut*, he serialized M. *Khvylovy's polemical pamphlets. When the CP(B)U paper *Komunist* was Ukrainized in 1926, he served as its associate editor and later as its de facto chief editor. After the Party's condemnation of Khvylovyism he published Stalinist articles in *Komunist* denouncing Khvylovy, the writers' group Vaplite, L. Kurbas, and the Berezil theater and criticizing cultural trends in Soviet Ukraine. In 1933 he became chief editor of *Visti VUTsVK*. Shortly after being elected to the CC CP(B)U he was arrested together with the other CC members and executed.

Taran (*Rutilus rutilus heckeli*; Ukrainian: *tarania*). A semimigratory fish of the carp family Cyprinidae that inhabits the estuary regions of the Black Sea and the Sea of Azov and enters the lower reaches of the Dnieper, Don, and Kuban rivers to spawn. It reaches a length of up to 40 cm and weight of up to 1.5 kg. It is a valuable commercial fish, but its stocks are continuously being depleted.

Taranenko, Kornii, b ca 1895 in Kremenchuk county, Poltava gubernia, d ca 1935. Borotbist revolutionary. In 1919 he led the Borotbist faction at the UNR Labor Congress and then served as deputy chairman and chairman of the Supreme Council of the National Economy in Kh. Rakovsky's Bolshevik-Borotbist coalition government. After joining the CP(B)U in 1920, Taranenko was sent to Moscow to direct the All-Union Sugar Trust. He was arrested there during the Stalinist terror and most likely executed.

Taranets, Tymofii [Taranec', Tymofij], b 1896 in Opryshky, Kremenchuk county, Poltava gubernia, d 1941 in Staryi Saltiv, Kharkiv oblast. Soil scientist. He was a professor at the Poltava Agricultural Institute and specialized in the soils of southern Ukraine, particularly saline soils.

He was arrested by the NKVD during the Soviet retreat in 1941 and burned alive in prison.

Taranko, Mykhailo [Taran'ko, Myxajlo], b 1887 in Galicia, d 1956 in Canada. Publisher and teacher. In Lviv he founded the Svit Dytyny publishing house, which issued, under his editorship, the children's magazines **Svit dytyny* (1929–39) and *Moloda Ukraïna* (1923–6), and the Ditochka biblioteka (Children's Library) and Populiarna biblioteka (Popular Library) book series, in which over 230 titles had appeared by 1939. In the 1930s Taranko served as executive secretary of the Prosvita society in Lviv.

Hlib Taranov

Taranov, Hlib, b 15 June 1904 in Kiev, d 25 January 1989 in Kiev. Composer, conductor, and pedagogue. A graduate of the Lysenko Music and Drama Institute (1925), he studied composition with R. Glière and B. Liatoshynsky and conducting with M. Malko. He began teaching music theory and orchestration at the institute in 1925 and wrote the handbook *Kurs chteniia partitur* (A Course in Reading Music Scores, 1939). In 1945–74 he headed the Faculty of Orchestration at the Kiev Conservatory. He also taught orchestration at the Leningrad Conservatory (1941–50) and served as vice-chairman of the Union of Composers of Ukraine (1956–68). His works include the opera *The Battlefield of Ice* (1943), nine symphonies, chamber music, pieces for piano, and choruses, as well as a reorchestration and re-edition of the M. Arkas opera *Kateryna* (1956).

Taranovsky, Fedir [Taranovs'kyj], b 24 May 1875 in Płońsk, Poland, d 23 January 1936 in Belgrade. Legal historian, member of the Serbian Academy of Sciences, and corresponding member of the Bulgarian Academy of Sciences. After graduating from Warsaw and St Petersburg universities he taught at the universities of Warsaw (1899–1907), Dorpat (1908–17), and Petrograd (1919). In 1918 he became a member of the newly formed Ukrainian Academy of Sciences, where he chaired the department of comparative legal history. After emigrating to Yugoslavia in 1919, he taught at Belgrade University (1920–36). Taranovsky wrote a survey of the monuments of Magdeburg law in Ukrainian cities of the Grand Duchy of Lithuania (1897), a critical outline of feudalism in Russia (1902), a book on the Normanist theory in the history of Russian law (1909), and a book on state law in France (1911). In 1926–7 he contributed several articles on the legal history of the Polish-Lithuanian Commonwealth to *Zapysky Sotsial'no-ekonomichnoho viddilu* VUAN. In the 1920s and 1930s

he published several works on the legal history of the Slavs and Russians.

Taranovsky, Semen [Taranovs'kyj], b and d ? Kievan goldsmith of the 18th century. His extant works include a silver tabernacle (preserved at the Kiev Historical Museum) and the copper model of the silver Royal Gates in the St Sophia Cathedral in Kiev.

Stefan Taranushenko

Taranushenko, Stefan [Taranušenko], b 21 December 1889 in Lebedyn, Kharkiv gubernia, d 13 October 1976 in Kiev. Art scholar and museologist. A graduate of Kharkiv University (1916), he lectured at the Poltava Historical-Philological Faculty (from 1918) and the Poltava Ukrainian Institute of Social Sciences (from 1920), organized and directed the Kharkiv Museum of Ukrainian Art (1920–33), and was a professor at the Kharkiv Art Institute (1924–9), a sector head at the Department of the History of Ukrainian Culture in Kharkiv (1924–33), secretary of the subsection of Ukrainian art at the Kharkiv section of the Department of Art Studies in Kiev (1926–33), and inspector of the All-Ukrainian Committee for the Protection of Artistic Monuments for all of Left-Bank Ukraine (1926–30). He was arrested in October 1933 and imprisoned in a Siberian labor camp (1934–6). After his release he taught in Perm (1937) and worked at the Kursk (1939–50) and Astrakhan (1950–3) art galleries. After returning to Ukraine in 1953, he worked at the Institute of the History, Theory, and Developmental Problems of Soviet Architecture. He wrote monographs, based on the many research expeditions he undertook, on the old peasant houses of Kharkiv (1922), the artistic monuments of 17th- and 18th-century Slobidska Ukraine (1922), the Cathedral of the Holy Protectress in Kharkiv (1923), the 17th- and 18th-century art of Slobidska Ukraine (1928), and the Lyzohub Residence in Sedniv (1932), and his magnum opus on the wooden church architecture of Left-Bank Ukraine (1976). He also wrote booklets on the artists P. Martynovych (1958) and T. Shevchenko (1961) and articles on Shevchenko, V. Krychevsky, H. Narbut, O. Kulchytska, S. Gebus-Baranetska, book graphics, Easter eggs, folk architecture, interior painting, handicrafts, furniture, and kilims.

Taran-Zhovnir, Yurii [Taran-Žovnir, Jurij], b 26 June 1927 in Novomoskovske, Dnipropetrovske okruha. Metallurgist; corresponding member of the AN URSS (now ANU) since 1972. He studied and taught in Dnipropetrov-

ske, headed a department at the ANU Institute of Ferrous Metallurgy (1963–73), and has served as rector of the Dnipropetrovske Institute of Metallurgy since 1974. His main scientific contributions are in the fields of crystal formation in alloys during solidification and the metallography of cast iron. He has developed a theory of multiphase crystallization processes in eutectic alloys.

Staff members and students of the Taras Shevchenko Scientific Research Institute in 1929–30. Sitting, from left: Mykhailo Novytsky, Oleksander Doroshkevych, Serhii Pylypenko, Oleksander Bahrii, Volodymyr Miiakovsky, Borys Navrotsky; standing: Ananii Lebid, Yevhen Kyryliuk, Volodymyr Pokalchuk

Taras Shevchenko Scientific Research Institute (Naukovo-doslidnyi instytut Tarasa Shevchenka). A scholarly institute under the jurisdiction of the People's Commissariat of Education, established in Kharkiv in 1926 as the central repository and research institution of all published, archival, and artistic materials pertaining to T. Shevchenko in particular and to modern Ukrainian literature in general. Until 1932 the director was D. Bahalii. S. Pylypenko was Bahalii's deputy and the institute's managing director, and Ya. Aizenshtok was the scholarly secretary. A branch of the institute was founded in Kiev; O. Doroshkevych was its director, and B. Navrotsky was its secretary. Many other prominent scholars (eg, O. Bahrii, O. Biletsky, V. Boiko, V. Derzhavyn, P. Fylypovych, V. Koriak, Ye. Kyryliuk, A. Loboda, V. Miiakovsky, M. and O. Novytsky, V. Petrov, M. Plevako, D. Revutsky, A. Richytsky, P. Rulin, A. Shamrai, H. Sinko, B. Yakubsky, M. Yashek, S. Yefremov) taught at the institute and/or took part in its projects and publications.

Research work was divided among seven cabinets. The cabinets of pre-Shevchenko literature, Shevchenko's works, Soviet Ukrainian literature, bibliography, and history (added in the early 1930s) were in Kharkiv. The cabinets of Shevchenko's biography and post-Shevchenko literature, and sections for the study of Shevchenko's poetics and the links between Shevchenko's works and post-Shevchenko literature, were in Kiev. Work was also done by several commissions: the commission of Shevchenko's period and milieu, the commission for the study of Shevchenko's art, the commission to study the Soviet Ukrainian reading public, an archival commission, the commission for contemporary oral literature (the living word), and, in Kiev, the commission for the preparation of a dictionary of Shevchenko's language. The institute's library had a collection of manuscripts by Shevchenko, P.

Kulish, Ya. Shchokoliv, V. Samilenko, I. Nechui-Levytsky, H. Barvinok, and A. Teslenko; the archives of O. Potebnia and the Soviet Ukrainian writers' organizations Pluh and Hart; and a collection of journals, including *Chervonyi shliakh*. In 1932 the Shevchenko Literary Museum was founded at the institute; a large part of its collection of 700 of Shevchenko's paintings, drawings, and engravings was transferred to the *Shevchenko Gallery in Kharkiv in 1933.

The institute published two collections of articles titled *Shevchenko* (1928, 1930), the bimonthly journal *Literaturnyi arkhiv* (1930–1), Shevchenko's journal and correspondence (2 annotated vols), four monographs and collections of articles on Shevchenko by single authors (Navrotsky, Bahrii, Doroshkevych), four collections of articles on Shevchenko by various authors, and several popular editions of Shevchenko's individual works with commentaries. It prepared a series of memoirs about Shevchenko (eg, by P. Kulish), trained graduate students (including scholars such as H. Kostiuk, Yu. Lavrinenko, and D. Kopytsia), and organized art exhibitions, seminars, and lectures. Its holdings and research facilitated the preparation of scholarly editions and textological studies of works by Shevchenko, M. Vovchok, and other Ukrainian writers. Most of the institute's personnel fell victim to the Stalinist terror between 1930 and 1933. Under Bahalii's successor, Ye. *Shabliovskiy (1933–5), the institute was basically inactive. In 1936 jurisdiction over the institute was transferred to the AN URSR (now ANU) and it was renamed the Institute of Ukrainian Literature; that name was changed to the *Institute of Literature in 1952.

R. Senkus

Tarasenko, Ivan, b ? in Voronizh, Hlukhiv county, Chernihiv gubernia, d 28 August 1922 in Kiev. Civic and church activist. The descendant of an old Cossack family, he was a village scribe in Voronizh and a delegate from Chernihiv gubernia to the First Russian State Duma (1906). He served on the executive of the Ukrainian caucus in the First Duma and as an adviser to the caucus in the Second Duma. He also contributed articles to *Hromads'ka dumka*. With the outbreak of the revolution in 1917, he became an active promoter of the Ukrainian Autocephalous Orthodox church and served as a secretary for the First All-Ukrainian Orthodox Sobor (1921) and the First All-Ukrainian Orthodox Council. He was executed by Soviet authorities in 1922, after being arrested, together with his daughter and son, and accused of planning an anti-Bolshevik uprising.

Tarasenko, Ivan. See Savych, Oleksander.

Tarasenko, Oleksii, b 30 September 1909 in Domakha, Kharkiv gubernia, d 27 February 1991 in Sumy. Stage actor and director. He was an actor and stage director in the Kharkiv First Workers' and Collective-Farm Theater (from 1929), and from 1939 he worked in the Sumy Ukrainian Music and Drama Theater, where he played heroic and character roles, including the title role in W. Shakespeare's *Othello*.

Tarasenko, Vasyi, b 19 March 1859 in Odessa, d 25 July 1926. Geologist. He graduated from Kiev University in 1884 and then taught there and at Yurev (now Tartu) and Voronezh universities (1904–18). He took part in the

logical mapping of the Kryvyi Rih Iron-ore Basin. His research dealt with crystalline rocks in Ukraine. Tarasenko was the first geologist in Ukraine to apply the method of microscopic study and detailed chemical analysis of rocks.

Leontii Tarasevych: *Blessing of the Dormition Cathedral at the Kiev-an Cave Monastery* (copper engraving, 1702)

Tarasevych, Leontii [Tarasevyč, Leontij], b ca 1650, probably in Carpathian Ukraine, d 1710 in Kiev. Master engraver. He and his brother, O. *Tarasevych, learned engraving in Augsburg at the workshop of B. and P. Kilian. In 1680–8 he worked in Vilnius, where he engraved illustrations for the Basilian, Franciscan, and Jesuit presses there. From 1688 he worked in Ukraine, first in Chernihiv and then in Kiev under the patronage of Metropolitan V. Yasynskiy. Tarasevych engraved portraits of prominent Ukrainians, Poles, and Russians, including Hetman I. Mazepa; portrayals of the Catholic and Orthodox saints; heraldic and corporation crests; theses of scholarly disputes at the Vilnius and Kievan Mohyla academies, decorated with many symbols, allegories, and saints; and book illustrations, notably 45 engravings for the Kievan Cave Patericon printed by the Kievan Cave Monastery Press in 1702. Tarasevych helped establish the art of copper engraving in Ukraine and created some of the best works in Ukrainian baroque art. A book about him by D. Stepovyk was published in Kiev in 1986.

Tarasevych, Lev [Tarasevyč], b 14 February 1868 in Tyraspil, Kherson gubernia, d 12 June 1927 near Dresden (buried in Moscow). Microbiologist and pathologist; full

Lev Tarasevych

Oleksander Tarasevych: *St Cletus* (copper engraving, 1685)

member of the VUAN from 1926. After graduating from the medical faculty of Odessa University (1891), he continued his studies at the Medico-Surgical Academy in St Petersburg (1891–6), in Paris (1897), at Kiev University (1898–1900), and at the Pasteur Institute in Paris (1900–2). He served as a professor at Odessa (1902–7) and Moscow (1907–11) universities. He taught at the Bestuzhev Higher Courses for Women (1908–18), founded and edited *Meditsinskaia mikrobiologiia* (3 vols, 1912–15) and the influential Moscow monthly *Priroda* (1912–27), and worked with the Moscow Scientific Institute Society (1913–18). During the First World War he was active in preparing vaccines against cholera, typhus, and tuberculosis, and in 1918 he founded a bacteriological station. After the revolution he presided over the scientific medical council in the Commissariat of Public Health (1918–27), founded and directed the State Pasteur Institute for Public Health Care (1918–27), and returned to the Moscow University Medical School as a professor (1918–24).

Tarasevych, Oleksander [Tarasevyč] (Tarasovych; monastic name: Antonii), b ca 1640, probably in Transcarpathia, d ca 1727 in Kiev. Engraver and church figure; founder of the Ukrainian school of metal engraving. He and his brother, L. *Tarasevych, learned engraving in Augsburg at the workshop of B. and P. Kilian until ca 1672. He lived and worked in Hlusk, Belarus (ca 1672–9), and in Vilnius before returning to Ukraine in 1688 to take monastic vows at the Kievan Cave Monastery and direct the engraving workshop at its press. Later he served as acting archimandrite of the Svensk Monastery, near Briansk (1705–10), and the Kievan Cave Monastery (ca 1718–27). His patrons included Marshal A. Połubiński of the Grand Duchy of Lithuania, Metropolitans K. Zhokhovsky and V. Yasynsky, Hetman I. Mazepa, and rectors of the Kiev Mohyla Academy. Tarasevych masterfully executed copper engravings depicting scenes from the New Testament, heraldic compositions, and portraits of Catholic and Orthodox saints and contemporary Ukrainian and Belarusian hierarchs, Cossack colonels, and Polish and Lithuanian monarchs and nobles. The best of his works illustrate books, such as the *Rosarium* dedicated to

Połubiński (1678), *Thesaurus* (1682), *Żywoty świętych* (Lives of the Saints, 1693), and *Bozhyeiu mylostyiu* (By God's Mercy, 1688). Tarasevych engraved the title pages of theses on theological and philosophical scholarly disputes. In Vilnius and Kiev he trained many professional engravers. Books and albums from his personal library were used as instructional materials in the workshops of the Cave Monastery in the 18th and 19th centuries. A book about Tarasevych by D. Stepovyk was published in Kiev in 1975. D. Stepovyk

Tarasevych, Yurii [Tarasevyč, Jurij], b 19 March 1937 in Shostka, now in Sumy oblast. Colloid chemist. A graduate of the Kiev Polytechnical Institute (1959), he has worked at the AN URSR (now ANU) institutes of General and Inorganic Chemistry (1961–8) and Colloid Chemistry and Hydrochemistry (since 1968). His research has dealt mainly with the colloid chemistry of natural dispersed materials, the chemistry of their surfaces, and adsorption phenomena. He has optimized ways of using these materials in industry.

Tarashcha [Tarašča]. IV–11. A city (1989 pop 13,500) on the Kotlui River and a raion center in Kiev oblast. It was founded on territory belonging to Poland in 1709 and was granted the rights of *Magdeburg law in 1791. After the partition of Poland in 1793, it was annexed by Russia, and in 1800 it became a county center in Kiev gubernia. In 1957 the town was granted city status. Today Tarashcha is an agricultural town with a cheese factory, fruit-canning factory, fish farm, and mixed-feed plant. It is the home of a research station of the Ukrainian Scientific Research Institute of the Economics and Organization of Agriculture.

Tarashcha Division (Tarashchanska dyvizia). A Bolshevik military unit formed in September 1918 near Sumy as the First Soviet Ukrainian Division. Its strength was about 3,000 men, of whom only 27 percent were Ukrainians. It participated in the capture of Kiev on 5 February 1919 and then operated on the Ukrainian front in Volhynia and central Ukraine. In June 1919 it was transferred to the 12th Soviet Army and redesignated the 44th Tarashcha Rifle Division. It was commanded at the time by M. Shchors and operated mainly against the UNR Army. In 1920–2 the division was renamed the 44th Kiev Rifle Division, and fought Ukrainian partisans in central Ukraine.

Tarashcha uprising. One of several insurrections against the German occupation and the Hetman government in Ukraine. The uprising broke out on 8 June 1918, when the peasants of 24 villages of Kryvets and Stryzhavka volosts took up arms. It spread quickly to the southern part of Tarashcha county. After routing the Hetman detachments at Yanyshivka (10 June) some 4,000 rebels took Tarashcha itself (12 June) and then almost the whole county. The Germans sent two infantry and one cavalry division to crush the uprising as well as a similar outbreak in the neighboring Zvenyhorodka region. On 20 June they captured Tarashcha, but the fighting continued until the end of July. The rebels were commanded by the soldiers V. Balias and F. Hrebenko and the sailor P. Hryhorenko. Besides Bolsheviks the leadership included left Ukrainian Social Revolutionaries (later Borotbists) led by M. Shynkar. The rebels demanded revolutionary rights and privi-

leges, the restoration of the Central Rada, and the convening of a constituent assembly for Ukraine. The Zvenyhorodka uprising, begun by peasants, was supported by a kish of Free Cossacks led by L. Shevchenko.

Tarasiuk, Andrey [Tarasjuk, Andrij], b 6 December 1951 in Winnipeg. Theater, festival, and live entertainment producer. He studied at the University of Manitoba and at the Royal Winnipeg Ballet School and graduated from the National Theatre School of Canada (1976). He was the producer of the first annual *Dream in High Park* outdoor Shakespeare production in Toronto (1982) and the National Celebrations Program for the millennium of Ukrainian Christianity in Ottawa (1988), and artistic director of the Canadian Heritage Festival (1989–90). He is the artistic producer of Theatre Direct in Toronto and leads his own company, Chysta Productions.

Tarasivtsi. See Brotherhood of Taras.

Tarasovych, Vasyl [Tarasovyč, Vasyl’], b ?, d 1651. Bishop of Mukachiv. Originally from Galicia, he came to Transcarpathia in the 1620s as an assistant to Bishop I. Hryhorovych. He succeeded Hryhorovych in 1633 and started planning for a union of the traditionally Orthodox eparchy with Rome. This plan brought him into direct conflict with the secular ruler of the region, Prince G. Rákóczi, who suspected that a Catholic presence in his domain would weaken his control over the church. Accordingly, Tarasovych was arrested in 1640 and banished from the region in 1642. Tarasovych then formally adopted the Catholic faith and established himself in the western region of his eparchy. He was returned to his traditional see in Mukachiv in 1644 as part of a diplomatic settlement following a military setback for Rákóczi, but he subsequently renounced his Catholicism, returned to Orthodoxy, and refrained from taking part in the 1646 Union of *Uzhhorod, which established a formal Catholic presence in the eparchy.

Tardenoisian culture. A Mesolithic archeological culture of the 7th to 4th millennium BC that existed in Europe from France to Transcaucasia, with settlements in the Crimea and in Ukraine mainly along the Donets and Vorskla rivers. It was named after the Fère-en-Tardenois site in France. An increasingly well-developed microlithic flint technology characterized this culture. This was reflected in the numbers of small, almost standardized flint pieces found at sites. The Tardenoisians lived by gathering, fishing, and hunting (employing bows for the latter activity), and were quite mobile. They maintained a matriarchal clan order and collectively buried their dead in a flexed position. (See also *Mesolithic Period.)

Tariffs. Duties on goods that are carried across borders, or fees for the use of roads, bridges, ports, or market facilities. In the past duties were primarily a source of government income, but in recent times they have become an instrument for protecting industry from foreign competition. Duties in Ukraine are first mentioned in the 9th century. They were negotiated in treaties between Ukraine-Rus’ and Byzantium in the 10th century. The Lithuanian-Polish Commonwealth had quite a complex system of tariffs. Duties (*myto*) included various trade fees exacted by

the state, community, church, or private individuals (whether legally or not). Tariffs collected at borders from foreign traders were called customs (*tslo*). They were collected by special customs houses, which first appeared in the 13th century. Besides customs there were internal duties collected at the boundaries of localities, cities, and marketplaces.

The Hetman state of the 18th century had a more organized system of tariffs than did the princely era. Beginning with B. Khmelnytsky’s rule the state treasury collected customs duties at the borders through the military exactor or tax farmers. There were two kinds of duties, import duties (*inducta*) and export duties (*evecta*). Khmelnytsky’s universal of 28 April 1654 imposed a state duty on foreign goods and appointed a special collector. But the government exempted local traders – Ukrainians and foreigners, particularly Greeks – and even foreign merchants from those duties. Khmelnytsky also tried to free Ukrainian trade abroad from the tariffs of other governments (eg, in the treaty with Turkey at the beginning of the 1650s). Internal duties were levied by the government or by various communities – towns or monasteries – which were granted the right to levy by the government. Private duties were rather rare in the Hetman state. With some modifications the system persisted to the middle of the 18th century. Beginning with Peter I the Russian government used duties to further its imperial policies in Ukraine. A series of important changes in the Hetmanate system of duties was introduced. In 1754 the tariff border between Russia and Ukraine was abolished, and Ukraine lost its tariff autonomy.

The Russian customs law of 1767 prohibited the importation from abroad of the kind of products that were manufactured within the Russian Empire, including Ukraine, and imposed heavy duties on other imported goods. In 1850 and 1877 the customs duties were greatly lowered, and various products were imported from Europe into Ukraine. At the same time foreign competitors, especially German, undermined the development of industrial enterprises in Ukraine. In 1877 the Russian government returned to protectionist policies. From then until the revolution customs duties increased; they reached 33–100 percent of the value of the goods imported. To some extent such policies promoted the rapid growth of industry in Ukraine during the period.

In 1918 the Hetman government re-established the tariff border between Ukraine and Russia. In the first half of 1919 the government of the Ukrainian SSR officially recognized the tariff border between Ukraine and the Russian SFSR. Later the border was abolished again.

The customs duties between the Ukrainian SSR and countries not belonging to the USSR were determined by the USSR Ministry of Foreign Trade on the basis of the customs code adopted on 5 May 1964 (until then the 1928 code was in force). The duties were collected by the Main Customs Administration (Holovne mytne upravlinnia), which was in charge of the customs offices in Odessa, Lviv, Chernivtsi, Uzhhorod, Kiev, and Brest, with their departments at the border control stations.

V. Holubnychy, O. Ohloblyn

Tarkhankut Peninsula [Tarxankuts’kyj pivostriv]. VIII–13. A western extension of the Crimean Peninsula, situated between Karkinitzka Bay and the Black Sea, covering

an area of 1,550 sq km. It consists largely of rolling limestone elevations (of up to 179 m) dissected by ravines and gullies. It has a number of saltwater lakes (Donuzlav and others) and deposits of natural gas. The peninsula has a steppe vegetation cover, with brush found in its valleys.

Bishop Hryhorii Tarkovych

Marta Tarnavska

Tarkovych, Hryhorii [Tarkovyč, Hryhorij], b 8 November 1754 in Pasika, Transcarpathia, d 16 January 1841 in Prešov. Uniate bishop. Upon completing theological studies at the Barbareum in Vienna (1778), he became a professor at the Mukachiv theology school and then a parish priest in that region (1793–1803). In 1803–13 he worked as a censor of Slavic books in Budapest and represented Mukachiv eparchy in the Hungarian Diet. He was promoted to the office of vicar-general for the Prešov region in 1813. After that jurisdiction was made into a separate eparchy, he was named (1818) as its first bishop, although he was not formally installed until 1821. As bishop, Tarkovych sought to maintain traditional church rites and established the I. Kovach Eparchial Library in 1826.

Tarnavska, Marta [Tarnavs'ka] (Tarnawsky; née Senkowska), b 15 November 1930 in Lviv. Writer and bibliographer; wife of O. *Tarnavsky. She has lived in Philadelphia since the 1950s. A librarian at the University of Pennsylvania since 1967, she has compiled several bibliographies, including one on the subject of the Ukrainian national revolution in Ukrainian poetry (1969) and one on Ukrainian literature in English (in *Journal of Ukrainian Studies* and separately as *Ukrainian Literature in English Books and Pamphlets*, 1988). Her literary articles, poems, stories, and book reviews have appeared in *Nashe zhyttia*, *Kyiv*, *Suchasnist'*, and *Ukrainian Quarterly*. She is the author of the poetry collections *Khvaliu iliuziiu* (I Praise Illusion, 1972) and *Zemletrus* (Earthquake, 1981); the latter collection contains her translations of poems by Russian, German, Polish, and American women poets.

Tarnavsky, Ilarion [Tarnavs'kyj], b 1890 in Sambir county, Galicia, d ? Civic and political activist. He was deputy to the Polish Sejm in 1938–9. He was arrested by the Soviet authorities after the occupation of Western Ukraine in 1939; his subsequent fate is unknown.

Tarnavsky, Myron [Tarnavs'kyj], b 29 August 1869 in Baryliv, Kaminka-Strumylova county, Galicia, d 29 June 1938 in Lviv. Commander of the *Ukrainian Galician

Gen Myron Tarnavsky

Ostap Tarnavsky

Army (UHA). After attaining the rank of major (1916) in the Austrian army, he was given command of the Legion of *Ukrainian Sich Riflemen. He was promoted to lieutenant colonel (1918), and commanded the 16th Infantry Regiment in central Ukraine. In February 1919 he joined the UHA, and soon he became commander of the Second Corps and a full colonel. In July 1919 Tarnavsky was appointed supreme commander of the UHA and was promoted to brigadier general. He oversaw UHA operations in central Ukraine, its Kiev offensive, and its tragic demise in the so-called Quadrangle of Death. On 7 November 1919 he was relieved of duty and courtmartialled for arranging a politically unauthorized armistice with A. Denikin. After his acquittal he served briefly as acting supreme commander of the UHA.

Tarnavsky, Omelian [Tarnavs'kyj, Omeljan], b 27 May 1910 in Stanyslaviv, Galicia. Economist, journalist, and civic activist. He studied law at Lviv University and economics at the Higher School of Economics in Berlin. During the Second World War he was director of the *Ukrainske Vydavnytstvo* publishing house in Cracow (1942–4) and financial manager of the *Ukrainian Central Committee. In 1949, after several years in Germany, he emigrated to Canada. There he served as president (1951–3) and national executive member of the *Plast Ukrainian Youth Association (1949–74) and edited *Plast* journals, such as *Plastovi shliakh*.

Tarnavsky, Ostap [Tarnavs'kyj], b 3 May 1917 in Lviv, d 19 September 1992 in Philadelphia. Writer and community figure; husband of M. *Tarnavska. As a postwar refugee he lived in Austria and Philadelphia and served as executive director of the *United Ukrainian American Relief Committee (ZUADK) and secretary (1960s–1975) and head (since 1975) of the *Slovo Association of Ukrainian Writers in Exile. His first poems appeared in Lviv journals in 1935. He wrote the poetry collections *Slova i mrii* (Words and Dreams, 1948), *Zhyttia* (Life, 1952), *Mosty* (Bridges, 1956), *Samotnie derevo* (The Solitary Tree, 1960), and *Sotnia sonetiv* (A Hundred Sonnets, 1984), the literary essay collection *Podorozh poza vidome* (Voyage beyond the Known, 1965), the essay *Tuha za mitom* (Longing for Myth, 1966), a history of the ZUADK (1971), and the prose collection *Kaminni stupeni* (Stone Levels, 1979). His poems, literary articles, criticism, translations of Western poetry, and

reminiscences have appeared in *Svoboda*, *Suchasnist'*, *Lysty do pryiateliv*, *Kyiv*, *Ukrainian Quarterly*, and *Books Abroad*. A volume of collected works, *Virshi* (Poems), was published in 1992.

Tarnavsky, Yurii. See Tarnawsky, George.

Zenon Tarnavsky

George Tarnawsky

Tarnavsky, Zenon [Tarnavs'kyj] (pseud: Zhan Zhak Burvil), b 9 September 1912 in Sambir, Galicia, d 8 August 1962 in Detroit. Theater figure, writer, translator, and journalist. His first story appeared in *Novyi chas* in 1930. During the 1930s he worked as a journalist for the Lviv papers *Ukrains'ki visty* and *Bat'kivshchyna*, translated French plays into Ukrainian and adapted novels for the Zahrava and Tobilevych theaters, and wrote the play *Taras Shevchenko* (1938). During the Second World War he worked as a radio journalist, was the founder and artistic director of the *Veselyi Lviv theater (1942–4), and was director of Lviv's Literary-Artistic Club. As a postwar refugee Tarnavsky was a coeditor of *Arka* and the first editor of **Ukrains'ka trybuna* in Munich. After emigrating to the United States in 1949, he worked as an industrial artist in Detroit and was active in Ukrainian community organizations there. He translated into Ukrainian the morality play *Everyman* (and directed its premiere in Detroit in 1961), T.S. Eliot's *Murder in the Cathedral* (pub 1963), and T. Wilder's *Our Town*, and wrote or cowrote several unpublished plays (eg, 'Chai u pana prem'iera' [Tea at the Premier's], with B. Nyzhankivsky). His articles and stories appeared in the émigré periodicals *Arka*, *Ukrains'ka trybuna*, *Teatr*, *Shliakh peremohy*, and *Kyiv*. A posthumous edition of his selected prose and journalistic writings was published in 1964, and no. 8 of **Terem* (1982) was devoted to him.

R. Senkus

Tarnawsky, George [Tarnavs'kyj, Jurij] (pseud: Romulus, Yu. T.), b 3 February 1934 in Turka, Sambir county, Galicia. Linguist, poet, novelist, and translator. Tarnawsky was displaced by the Second World War, and grew up in a DP camp in Germany. He emigrated to the United States in 1952 and completed a degree in electrical engineering at the Newark College of Engineering in New Jersey (1956) and then turned to linguistics, in which discipline he was awarded a PH D from New York University in 1982. He has worked at IBM on automated language-translation projects and artificial intelligence and has pub-

lished a number of scientific papers on those subjects. He has also worked on developing a natural-language interface for the computer programming language PROLOG. Tarnawsky's linguistic studies have had a profound influence on him as a writer. In his poetry as well as in his prose he has eschewed the more usual embellished language and has sought the utmost semantic and syntactic directness, as if his creations were to enter into a one-to-one computerized relationship between word and meaning. Tarnawsky is unique in his expression, and his poems reflect well the mechanized and dehumanized contemporary world. He began writing in the early 1950s and has published several collections of verse: *Zhyttia v misti* (Life in the City, 1956), *Popoludni v Pokipsi* (Afternoons in Poughkeepsie, 1960), *Idealizovana biohrafiia* (Idealized Biography, 1964), *Spomyny* (Memories, 1964), and *Bez Espanii* (Without Spain, 1969); a collection encompassing all of the aforementioned and some new cycles, *Poezii pro nishcho i inshi poezii na tsiu samu temu* (Poems about Nothing and Other Poems on the Same Subject, 1970); and a bilingual English-Ukrainian collection, *Os', iak ia vyduzhuu* (This Is How I Get Well, 1976). A collection of his poetry, *Bez nichoho: Poezii* (Without Anything: Poems), appeared in Ukraine in 1991. He has two novels to his credit, the Ukrainian *Shliakhy* (Roads, 1961) and the English *Meningitis* (1978). Tarnawsky was one of the founding members of the *New York Group of poets and the cofounder and editor of their periodic publication **Novi poezii* (1959–71). He has translated from Spanish and English into Ukrainian (F. García Lorca and S. Beckett) as well as from Ukrainian into English (*Ukrainian Dumy*, together with P. Kylyna [P. *Warren] in 1979). His literary criticism, published in various journals, concerns modern poetry, particularly poetic translations and bilingualism.

Tarnawsky, Marta. See Tarnavska, Marta.

Walter S. Tarnopolsky

Tarnopolsky, Walter Surma [Tarnopol's'kyj], b 1 August 1932 in Gronlid, Saskatchewan. Scholar and jurist. Tarnopolsky was educated at the University of Saskatchewan (1957), Columbia University (1955), and the University of London (LLM, 1962). He was a professor of law at several Canadian universities before his appointment to the Supreme Court of Ontario (Appeals Division) in 1983. He was also president of the Federation of Canadian University Students (1957–8), a member of the United Nations Human Rights Committee (1977–83),

president of the Canadian Civil Liberties Association (1977–81), vice-president of the board of directors of the Mohyla Ukrainian Institute in Saskatoon (1964–6), and president of the Canadian Foundation for Ukrainian Studies (1976–7). The recipient of honorary doctorates from St Thomas University (1982) and the University of Alberta (1986), he is the author of *The Canadian Bill of Rights* (1966, 1975) and *Discrimination and the Law in Canada* (1982) and coeditor of *The Canadian Charter of Rights: Commentary* (1982).

Tarnovska, Mariia [Tarnovs'ka, Marija] (pseud: M. Virliana), b 8 December 1892 in Kotsiubyntsi, Husiatyn county, Galicia, d 17 May 1975 in Detroit. Ukrainian-American writer; sister of M. *Tarnovsky. She emigrated to the United States in 1909. She began publishing in 1919, and in the 1920s she belonged to the 'transoceanic' branch of the Soviet Ukrainian proletarian writers' organization Hart. Her socialist poems and stories about the plight of Ukrainian immigrant women appeared in communist periodicals such as *Robitnytsia* (Winnipeg) and *Ukrains'ki shchodenni visty* (New York City).

Tarnovsky [Tarnovs'kyj] (Tarnavsky). A family line of Cossack officers from Right-Bank Ukraine, dating from the late 17th century, when their surname was Liashko. Ivan Liashko was a military fellow of Pryluka regiment (1661), and his son, Fedir Liashko-Tarnovsky, was captain of Varva regiment (1689–93). Fedir and his older brother, Vasyl, were the originators of two lines of the Tarnovsky family, the senior, Chernihiv line and the junior, Poltava line. A number of captains of Varva regiment during the period 1689–1769 were from the junior line, including Ivan Tarnovsky (1760–9), who was also colonel of Hadiache regiment (1772–9). Members of the senior line were more prominent in Ukrainian history. Vasyl's son, Stepan Tarnovsky (stepson of D. Nesterenko, d ca 1730), was captain of Baturyn (and its defender during the sacking of 1708), a fellow of the standard, and codirector (with S. Chuikevych) of the General Military Chancellery in 1728. Stepan's son, Yakiv Tarnovsky, was a general standard-bearer (1761–79). Yakiv's sons were Vasyl Tarnovsky, a graduate of Königsberg University and the marshal of Chernihiv gubernia (1790–4), and Stepan Tarnovsky, the marshal of Kiev gubernia (1791–2). Vasyl's son, Volodymyr Tarnovsky, was a member of the Poltava general court (1818–26) and the Love of Truth Masonic lodge. Stepan's son, Hryhorii Tarnovsky (1788–1853), an art scholar and patron, owned the Kachanivka estate in Borzna county and was a friend of T. Shevchenko. Vasyl's grandson, Vasyl *Tarnovsky (1810–1866), was a leader of the peasant reform movement and also a friend of Shevchenko. The great-grandson, Vasyl *Tarnovsky (1837–1899), founded a museum dedicated to Cossack history in Chernihiv (opened in 1901). Their relative, Mykola Tarnovsky (1858–1898), a magnate in Kaniv county, was an amateur archeologist and collector of Kiev antiquities. He published a catalog of his collection of Ukrainian artifacts (1898, with an introduction by V. Antonovych). Serhii Tarnovsky (1883–?), a pianist and a professor at the Kiev Conservatory in the 1920s, was also a member of the family. It is unknown whether the colonel Ivan Tarnovsky, who commanded Cossack garrisons in Volhynia in 1657–8, belonged to the line.

O. Ohloblyn

Tarnovsky, Mykola [Tarnovs'kyj] (pseud: Ostap Ochko, M. Haliada, Yurko Slyvka, Emmanuil, M. Shcherbak, M. Naraivsky, M. Dumka, and Mykola Mykolaiovych), b 1 January 1895 in Kotsiubyntsi, Husiatyn county, Galicia, d 20 June 1984 in Kiev. Ukrainian-American and Soviet writer. He emigrated to New York City in 1910. He was active in the Ukrainian Federation of the American Socialist party, the American Communist party (from 1919), and the League of Ukrainian Americans (secretary, 1952–5, and president, 1955–8). In 1958 he returned to Ukraine and became deputy head of the *Ukraina Society. Tarnovsky began publishing poetry in the Ukrainian-American press in 1915 and was an editor of such periodicals as *Robitnyk* (Detroit), *Molot*, *Smikh i pravda*, and *Ukrains'ki shchodenni visty*. In the 1920s he belonged to the 'transoceanic' branch of the Soviet Ukrainian proletarian writers' group Hart and to Zakhidnia Ukraina. Most of his works depict the hardships of Ukrainian immigrant life. Others attack the 'bourgeois nationalists' or glorify life in the USSR. They include the poetry collections *Patrioty* (Patriots, 1918), *Shliakhom zhyttia* (Along the Road of Life, 1921), and *Velyke misto* (The Big City, 1926), the novel in verse *Emihranty* (Emigrants, 1958), and the prose collection *V zaokeans'kii hushchi* (In the Transoceanic Thicket, 1964). Several large editions of Tarnovsky's selected poems have been published in both New York City (1951) and Kiev. B. Burkatov published a book about him in 1964, and a book of his memoirs was published in 1979.

R. Senkus

Tarnovsky, Mykola [Tarnovs'kyj], b 2 May 1919 in Oleksandrivka, Bratslav county, Podilia gubernia. Writer. He graduated from the Gorky Literary Institute (1957) and has worked as a newspaper editor in Vinnytsia and Uzhhorod and as an editor of *Zhovten'*. He has written two story collections and over 20 novels, among them *Shliakhamy bratuv* (Along the Brothers' Paths, 1950), *Krutohora* (1957), *Den' pochynaet'sia nespokoiino* (The Day Begins Restlessly, 1963), *Vyrok* (The Sentence, 1965), *Kvity na morozii* (Flowers in the Frost, 1966), *Za ridnym porohom* (Beyond the Native Threshold, 1967), *Dev'iatyi val* (The Ninth Wave, 1970), *Vzaiemnist'* (Reciprocity, 1972), *Zoloti verby* (Golden Willows, 1979), *Horinnia* (Burning, 1983), and *Spynysia, khvylyno!* (Stop, Minute!, 1984).

Tarnovsky, Vasyl [Tarnovs'kyj, Vasyl'], b 26 June 1810 in Kachanivka, Borzna county, Chernihiv gubernia, d 16 December 1866. Jurist and civic figure. After graduating in law from Moscow University he taught at Zhytomyr gymnasium and then managed the family estate. He studied the economic condition of the peasantry in Kiev gubernia and wrote an article on legal practice in Russian-ruled Ukraine (1842). As an opponent of serfdom he was active in preparing the emancipation reforms: he sat on the Chernihiv Gubernia Committee for Improving the Lot of Landlords' Peasants (1858–9) and on the editing committees for the reform legislation in St Petersburg. After inheriting his uncle's estate he underwrote the publication of P. *Kulish's *Zapiski o Iuzhnoi Rusi* (Notes on Southern Rus') and *Chorna rada* (The Black Council) and supported other cultural projects.

Tarnovsky, Vasyl [Tarnovs'kyj, Vasyl'], b 1 April 1837 in Antonivka, Pyriatyn county, Poltava gubernia, d 25

Vasyl Tarnovsky, Jr (portrait by Andrii Horonovych, 1870s)

Yulii Tarnovych

June 1899 in Kiev. Civic and cultural activist; son of V. *Tarnovsky. A graduate of Kiev University, he served as marshal of Nizhen county (1875–87). Recognizing T. Shevchenko's genius he extended his friendship and help to him. He supported various Ukrainian cultural developments, particularly the publication of *Kievskaiia starina* in the 1890s, the founding of the Kiev Historical Museum, and the upkeep of Shevchenko's grave in Kaniv. He amassed a large collection of articles and documents from the Cossack era and a unique collection of Shevchenko memorabilia. A number of important books were published by Tarnovsky: a catalog of his historical collections, a photograph album of Shevchenko's etchings, and V. Antonovych and V. Bets's album of hetmans, *Istorieskie deiateli Iugo-Zapadnoi Rossii* (Historical Figures of Southwestern Russia, 1883). In 1897 he bequeathed the Museum of Ukrainian Antiquities in Chernihiv, which he had financed, to the Chernihiv zemstvo. Leading Ukrainian writers and scholars, such as M. Kostomarov, P. Kulish, M. Vovchok, O. Lazarevsky, and V. Horlenko, met at his estate in Kachanivka, in Borzna county. Among his friends Tarnovsky was called 'Hetman.'

Tarnovych, Yulii [Tarnovyč, Julijan] (pseud.: Yu. Beskyd, Yu. Zemlian, O. Zubryd), b 1 January 1903 in Rostaine, Jasło county, Galicia, d 28 September 1977 in Toronto. Journalist and writer. In Lviv he edited the *Biblioteka Lemkivshchyny* (Library of the Lemko Region) book series (1936–9) and **Nash lemko* (1934–9), a Ukrainian patriotic paper distributed in the Lemko region. During the Second World War he edited the special weekly edition of *Krakivs'ki visti* in Cracow and then the weekly *Ridna zemlia* (1941–4) in Lviv. A postwar refugee, he worked for the paper *Ukrains'ke slovo* in Regensburg, Germany, before emigrating to Canada in 1948. In Toronto he edited the newspapers *Lemkivshchyna-Zakerzonnia* (1949–53), *Ukrains'kyi robotnyk* (1950–5), and *Lemkivs'ki visti* (1964–70) and the annual *Lemkivs'kyi kalendar* (to 1969), and coedited the Catholic weekly *Nasha meta*. Tarnovych wrote many articles and stories and over 25 separate works, many of them on Lemko subjects. They include an illustrated history of the Lemko region (1936; repr 1964); a book on historical monuments there (1937); the first Lemko primer in Ukrainian (ca 1937); a book on the region's material culture (1940; repr 1941, 1972); a hiker's guide to the region's

physical and cultural geography (1940); a book on 20 years of Polish oppression of the Lemkos (1940); a booklet about the town of Sianik (1941); the prose collections *Mova stolit'* (*Lemkivshchyna v perekazakh*) (The Language of Centuries [The Lemko Region in (Folk) Legends], 1938), *Teofanova dochka* (Teofan's Daughter, 1946), and *Za rodymе pravo: Opovidannia z chasiv vyzvol'nykh zmahan' Lemkivshchyny za svoie natsional'ne zhyttia* (For the Inherent Right: Stories from the Times of the Liberation Struggle of the Lemko Region for Its National Life, 1948); the plays *Pisnia Beskydu* (Song of the Beskyd, 1938) and *Rvut'sia kaidany* (The Shackles Are Breaking, 1941); the novelette *Na rikakh vavylons'kykh* (On Babylonian Rivers, 1952); and the memoirs *Na zharyshchakh Zakerzonnia* (In the Razed Region beyond the Curzon Line, nd).

Tarnów. A city (1981 pop 107,000) on the Dunajec River and a voivodeship center in southern Poland. In 1920–3 Tarnów was the seat of a section of the UNR government-in-exile and the residence of S. Petliura. In February 1921 the *Council of the Republic was convened there. The UNR government-in-exile moved to Warsaw in 1923. Not far from Tarnów was the Wadowice internment camp for soldiers of the UNR Army. In the early 1920s the *Ukrainska Avtokefalna Tserkva* publishing house, directed by I. Ohienko, published some religious pamphlets in Tarnów.

Taromske [Taroms'ke]. v-15. A town smt (1986 pop 15,700) under jurisdiction of a city raion council of Dnipropetrovske. The village was founded in the late 18th century, and became known for its ceramics. In 1938 it attained smt status. Today it has a fish farm and two granite quarries. It is the home of the Dnipropetrovske branch of the Ukrainian Scientific Research Institute of Cattle Breeding and Artificial Insemination.

Tartakovsky, Isaak [Tartakovs'kyj], b 25 April 1912 in Volochnyske, Starokostiantyniv county, Volhynia gubernia. Painter. In 1951 he graduated from the Kiev State Art Institute, where he studied under O. Shovkunenko and V. Kostetsky. He has painted socialist-realist historical and genre paintings, portraits of L. Revutsky (1950), P. Tychna (1964), and A. Shtoharenko (1979), and the portrait *Natalka* (1966).

Tartu. A city (1986 pop 111,000) in Estonia, known formerly as Dorpat in German and Yurev in Russian. Its university, founded in 1632, was closed in 1710 and reopened in 1802. In the 19th century numerous Ukrainians studied at the university, and in the 1880s a Ukrainian student hromada was founded there. At its peak the hromada had up to 200 members. It was active until 1917, when its membership hovered between 80 and 100. Its presidents included M. Vasylenko and F. Matushevsky. At the end of the 19th century a number of Ukrainian professors lectured at the university: O. Ostrohradsky (financial law), O. Myklashevsky (political economy), A. Tsarevsky (theology), and F. Yevetsky (medicine).

Tarutynе. VII-10. A town smt (1986 pop 6,000) and raion center in Odessa oblast. It was founded in 1814 as a German colony. After the Crimean War the region belonged to Moldavia principality until 1878, when it was retaken

by Russia. Until 1940 Tarutyne was a cultural and economic center of the German minority in Akkerman county. In 1958 it attained smt status. Today most of the town's inhabitants are employed in the food industry.

Dmytro Tas

Heorhii Tasin

Tas, Dmytro [Tas'] (pen name of Dmytro Mohyliansky), b 10 February 1901 in Chernihiv, d 20 September 1942. Writer; son of M. *Mohyliansky and brother of L. Mohylianska. He began publishing poems in the Chernihiv press in 1918 and was active in Ukrainian literary life in Kiev (from 1925) and Kharkiv (from 1930). His impressionistic stories and lyrical, expressionistic poems (many on urban themes) appeared in journals, such as *Chervonyi shliakh*, *Zhyttia i revoliutsiia*, *Hlobus*, *Kino*, and *Vsesvit*. Published separately were the story collections *Vedmedi tansiuut'* (The Bears Are Dancing, 1927) and *Sad* (The Orchard, 1930). He was arrested in 1930, and perished in a Soviet labor camp. A selection of his poems was republished in *Poezii* (1986, no. 1).

Tashkent. The capital (1989 pop 2,073,000) of Uzbekistan. It was one of the largest economic and cultural centers of the former USSR. It has one of the largest Ukrainian communities in Asia, and one of the largest outside Ukraine: in 1970 there were 40,700 Ukrainians in the city (2.9 percent of its population). The other major nationalities were the Russians (41 percent), Uzbeks (37 percent), Tatars (7 percent), and Jews (4 percent). In 1867–1917 Tashkent was the capital of Turkestan general gubernia. Ukrainians began to settle there at the end of the 19th century. During the revolutionary period Tashkent became the center of Ukrainian political activity in Turkestan: the Ukrainian Hromada (est April 1917) was reconstituted as the Ukrainian Central Hromada of Turkestan, and in 1918 the Ukrainian National Council of Turkestan (complete with an executive branch) was set up. The Prosvita society was active, and the weekly *Turkestans'ka rada* was published. When the Soviet regime consolidated its power in Tashkent (1920), the Ukrainian movement died out. In the 1930s Ukrainian was still taught in a few schools, and the Pedagogical Institute maintained a Ukrainian department. During the Second World War many Ukrainians were evacuated to Tashkent, and Tashkent Radio had a Ukrainian program. A branch of the Kiev Institute of Civil Aviation Engineers was located in Tashkent.

Tasin, Heorhii (real name: Georgii Rozov), b 22 March 1895 in Shumiachi, near Roslavl, Smolensk gubernia, d 6 May 1956 in Kiev. Film director. He graduated from the Petrograd Psychoneuropathological Institute and then became a screenwriter (1920). He was administrative director of the Odessa and Yalta Artistic Film studios (1922–3) and then a film director at the Odessa studio (from 1926) and the Kiev Studio of Chronicle-Documentary Films (1944). Among his films are *Alim* (1926), *Jimmie Higgins* (1928), *Nichnyi viznyk* (The Night Coachman, 1929), *Karmeliuk* (1939), and the propagandistic *Radians'ka Ukraina* (Soviet Ukraine, 1947, with M. Slutsky) and *Pisnia pro Ukraïnu* (A Song about Ukraine, 1955).

Tatarbunary. VIII-10. A city (1989 pop 11,400) on Lake Sasyk and a raion center in Odessa oblast. It was founded in the 16th century, when the territory was under Turkish rule. During the Russian-Turkish wars in 1768–74 and 1787–91 the settlement was occupied by Russia, and some Danubian Cossacks moved there. In 1812 it was annexed by the Russian Empire. During the 19th century Bulgarian colonists and Ukrainian and Russian serfs found refuge there. From 1918 to 1940 Tatarbunary belonged to Rumania. In 1924 the town was the site of the *Tatarbunary uprising against the Rumanian occupation. In 1978 it attained city status. Today it has a woolen-cloth factory and a winery.

Participants in the Tatarbunary uprising (photographed in the Kishinev prison)

Tatarbunary uprising of 1924. A peasant uprising against the Rumanian occupation and for unification with the Ukrainian SSR which took place in *Tatarbunary and in the neighboring towns of Bessarabia. It was the result of widespread dissatisfaction with the Rumanian agrarian reforms of 1921. A famine, a drought in 1924, and social and national discrimination against the Bessarabian population were also contributing factors. Nearly 4,000 peasants (Soviet sources claim 6,000) participated. The uprising was centered in Tatarbunary and was joined by residents of Akkerman, Bendery, Izmail, and Cahul counties. It began on 16 September 1924, led by a pro-Soviet revolutionary committee. After a three-day battle with Rumanian troops, artillery, and naval forces (on Lake Sasyk, near the Black Sea) the uprising was suppressed. Many of the rebels perished, and nearly 500 were arrested.

The subsequent trial in Kishinev (1925) lasted 103 days, during which 386 of the accused were tried, of whom 86 were sentenced to prison terms ranging from 1 to 15 years. The trial drew international attention to Bessarabia and its colonial status. L. Aragon, H. Barbusse, T. Dreiser, A. Einstein, P. Éluard, R. Rolland, M. Sadoveanu and G.B. Shaw spoke out in defense of the Tatarbunary rebels.

Tatars (*tatary*). The name given to various Turkic and Mongol peoples and tribes of the 13th- to 14th-century Mongol Empire. In 1223 they invaded Rus' under the leadership of Subedei Bahadur and defeated the armies of the southern Rus' princes and their *Cuman allies at the Kalka River (see *Mstyslav Mstyslavych and *Mstyslav Romanovych). Having plundered Left-Bank Ukraine they returned to the steppes of Central Asia. After the reign of *Genghis Khan the western part of the Mongol Empire was ruled by his grandson, *Batu Khan, who expanded his realm into eastern and central Europe in 1236–43. Batu subdued the *Volga Bulgars in 1237–8 and then took the northern Rus' towns of Riazan, Kolomna, Moscow, Vladimir, Rostov, Torzhok, and Kozelsk and slaughtered the northern Rus' army at the Sit River before turning south and conquering the Cumans along the lower Don.

Batu then invaded southern Rus' and sacked Pereiaslav (3 March 1239) and Chernihiv (18 October 1239), thereby laying the path clear to Kiev. Kiev's defense was directed, in Prince *Danylo Romanovych's name, by the voivode Dmytro. Batu directed the Tatar siege himself. After taking Kiev he massacred its residents on 6 December 1240 and laid waste the city. His forces then proceeded westward and took Kolodiazhyn (by surprise), Kamianets, Iziaslav, Volodymyr-Volynskiy, Halych, and many other Ukrainian towns. In Volhynia the Tatars split into three armies. One attacked Poland, where on 9 April 1241, near Legnica, it defeated Polish, Czech, and Teutonic Knights; the second invaded Wallachia and Transylvania; and the third and largest army, headed by Batu himself, destroyed Halych before crossing the Carpathians into Hungary. There, on 12 April 1241, it annihilated the Hungarian army at the Sajó River. In the spring of 1242 the Tatars ravaged Serbia, Bulgaria, and the Black Sea littoral before returning to the Volga Basin, the center of Batu's state, known as the *Golden Horde.

The Tatars were successful in controlling their large empire because of their administrative method. It included census-taking to determine the amount of tribute; a system of enumerators, scribes, and tax collectors; the division of conquered lands into districts; and the establishment of local administrators to enforce obedience and the payment of tribute. Military service and a type of tax farming were imposed on the people. To maintain full control the Tatars resorted to almost systematic extortion, hostage-taking, and granting of patronage to local princes for faithful service. Periodic bloody raids helped to maintain fear and obedience.

The Tatars were sophisticated warriors. Accustomed to riding and archery from childhood, they were particularly

skilled at feigning retreats and luring opponents into ambushes. Such maneuvers brought them victory at the Kalka, Legnica, and the Sajó. Their success in capturing fortified towns was based on their adaptation of Chinese military technology.

The Tatars were shamanists but were tolerant of other religions. In 1261 they allowed an Orthodox bishopric to be established at Sarai, the capital of the Golden Horde, and the Rus' clergy were exempted from paying taxes. Batu's sons and successors, Sartak (1256–7) and Berke (1257–66), were themselves Christian and Muslim respectively. In the early 14th century Khan Uzbek adopted Islam as the official religion of the Golden Horde.

The Tatars were primarily nomadic herders. Merchants were highly valued by the government, and foreign traders received special privileges. The Tatars' Slavic subjects were mostly peasants and artisans. The Golden Horde's principal trading partners were the Italian colonies along the Black Sea littoral and Egypt. Its chief exports were slaves and grain.

The Tatars did not impose uniform demands on all the peoples under their yoke, but modified them according to local conditions. Of all the Ukrainian territories the Principality of Galicia-Volhynia had the shortest and least onerous experience with Tatar suzerainty. After the Tatars returned to the Volga, Prince Danylo Romanovych attempted to organize a European coalition against them and sent Metropolitan P. *Akerovych to the Church Council of Lyons in 1245 to warn of the Tatar menace. When aid from the Catholic West was not forthcoming, Danylo was forced to travel to Sarai, the capital of the Golden Horde, in 1246 to accept the khan's suzerainty. In 1253, however, he recognized the authority of the pope and was crowned a king. He fought the neighboring *Bolkhovians and other *Tatar people who had voluntarily submitted to the Tatars, and in 1252–7 he waged war against Kuremsa, the overlord of the westernmost reaches of the Golden Horde. In 1259 *Burundai, Kuremsa's successor, launched a successful campaign against Galicia-Volhynia. Even then, however, the Principality of Galicia-Volhynia did not become entirely subservient to the Tatars until the reign of *Lev Danylovych, who was forced to accept the suzerainty of Nogai, the ruler of the Black Sea littoral, in the early 1270s. Living in harmony with the Tatars enabled Lev to annex Polish and Hungarian borderlands, and he participated in Khan Teleboh's campaign against Poland in 1286–7. His son, *Yurii Lvovych, and grandsons, *Lev and *Andrii Yurii-vych, were actually independent rulers, and the latter two gained recognition in Europe as 'invincible shields against the Tatars.' The annexation of Galicia by Poland and of Volhynia by Lithuania spelled the end of the Golden Horde's influence in the western Ukrainian territories.

Other Ukrainian territories were dominated much longer and more harshly by the Golden Horde. *Ponizia, southern Podilia, and southern Pereiaslav principality were under its direct control, and Kiev and Chernihiv principalities were administered by vassals from among the Riurykide dynasty. The long duration of the Tatar yoke was catastrophic for the Ukrainian territories. They lost political independence, priceless manuscripts and art treasures perished during the sacking of cities, the decimated population was impoverished by heavy taxation, and cultural stagnation ensued. Tribute, which had earlier been used by Rus' princes for internal development, was

now taken out of Ukraine for the enrichment of the Golden Horde.

The Lithuanian grand duke *Algirdas was the first to wrest Ukrainian lands from the Golden Horde, by taking advantage of the chaos that prevailed within it in 1360–80. In 1363 he routed a Tatar army in Podilia near Syni Vody, deposed the Tatar vassal Prince Fedir in Kiev, and replaced him with his own son, Volodymyr. He also occupied the lands of Chernihiv and Novhorod-Siverskyi. Algirdas's successor, *Vytautas, resolved to make the Golden Horde his dependent. He assisted Khan Tokhtamysh in the khan's struggle for control of the Golden Horde. In return Vytautas received the Tatar title to all of Ukraine. Vytautas's military campaign in support of Tokhtamysh ended in the defeat of his Lithuanian-Ruthenian army at the Vorsklo River in 1399. He managed, however, to extend his borders to the Vorsklo and lower Dnieper rivers, thereby incorporating most of Ukraine in the Grand Duchy of Lithuania.

In the early 15th century the Golden Horde weakened and then disintegrated, and independent khanates, such as the Crimean, Kazan, and Astrakhan, emerged on its peripheries. The Great Horde (the nucleus of the former Golden Horde) proved to be the most detrimental to Ukraine: it repeatedly invaded the Kiev region, Podilia, Volhynia, and even Galicia, in 1444, 1447, 1450, and 1457. In 1482 it sacked Kiev. The eventual fall of the Great Horde came after the death of its last leader, Khan Shah-Ahmet, in 1505.

In the mid-16th century the *Nogay Tatars penetrated into Ukraine from the Volga, Ural, and Caspian steppes and established there the *Bilhorod, Yedisian, Yedichkul, and Dzhambulak hordes as vassals of the Crimean Khanate and Ottoman Turkey. In the 1770s the lands of the Nogays were annexed by the Russian Empire, and the hordes were resettled in the Kuban. In 1790 they were allowed to return to the Azov littoral, and after the Crimean War of 1853–6 they emigrated to Turkey.

The *Crimean Khanate existed as an independent state from 1449 to 1478, when it recognized the supremacy of the Ottoman Empire. Ruled by the *Girei dynasty, the Crimean Tatars behaved not unlike the Golden and Great Hordes toward Ukraine. By 1556 they had mounted more than 80 invasions of Podilia, Volhynia, Galicia, and the Kiev and Novhorod-Siverskyi regions, where they destroyed towns and villages and took slaves (more than 35,000 in 1575 alone) to sell at markets in the Crimea. The Ukrainian Cossacks, and after 1648 the Cossack Hetman state, alternated between war and alliance with the khanate (see *Crimea). In 1783 the Crimean Khanate with its population of approx 140,000 was annexed by the Russian Empire. Tsarist national, social, and religious oppression of the *Crimean Tatars continued through the 19th century, and thousands of them fled to Turkey. Over 141,000 left after the Crimean War; only 103,000 remained in the Crimea. Colonization of the Crimea by Russians, Ukrainians, Germans, Greeks, and others transformed the Tatars into a minority. A Tatar national revival was initiated in the 1880s by I. Bey Gaspirali, the mayor of Bakhchesarai in 1877–81. It promoted the use of one Turkic language for all Turkic and Tatar peoples in the Russian Empire, educational reforms, modifications in Muslim society, and the emancipation of women. From 1883 to 1914 Gaspirali's journal *Tercuman-Perevodchik* was published in Bakh-

chesarai for the Turkic and Tatar intelligentsia in the empire; it propagated pan-Islamic and pan-Turkic ideas. In the early 20th century a nationalist movement of 'Young Tatars,' led by A. Mehdi, engaged in revolutionary activity in the Crimea akin to that of the Russian Socialist Revolutionaries. Mehdi and the Young Tatars played an active part in the Russian State Duma of 1907 and co-operated with Ukrainian delegates in the *Autonomists' Union. In 1909 N. Çelebi Cihan, C. Seidahmet, and other Crimean students at Istanbul University founded a secret organization for Crimean independence, Vatan (Homeland), which became the basis for the Crimean political rebirth after the February Revolution of 1917.

From 1917 to 1920 the Crimean Tatars struggled for their own independence and took varying stances with regard to the Russian White and Bolshevik regimes and Ukrainian claims to the Crimea. After three years of civil war, terror, and slaughter, in November 1920 Bolshevik forces captured the Crimea, and on 18 October 1921 the Crimean ASSR was established as part of the RSFSR.

Under Soviet rule the Crimean Tatars continued to suffer national discrimination. In 1928, after a brief period of national-communist 'Tatarization' the chairman of the Crimean Central Executive Committee, V. Ibrahimov, and 3,500 of his Party supporters were purged as bourgeois nationalists. Some were executed, and many were imprisoned in Soviet concentration camps. In 1928–9, 35,000 to 40,000 Tatar *kulaks were arrested and deported to Siberia and Soviet Central Asia. As in Ukraine, Tatar peasants opposed collectivization, and many of them perished in the man-made *famine of 1932–3. In 1936 a campaign to Russify the remaining Tatars was begun in tandem with further terror, arrests, and purges. The number of periodicals in Tatar was reduced from 23 in 1935 to 9 in 1938. In 1938 the Latin alphabet, which had been used instead of the Arabic alphabet in Tatar education and publications since 1929, was replaced by the Russian Cyrillic alphabet, and many Arabic, Persian, and Turkish words were excised from the language and replaced by Russian words.

Between 1917 and 1933 approx 150,000 Crimean Tatars – half of their population – had been killed, imprisoned, deported to Soviet Asia, or forced to emigrate. Those who had emigrated to Turkey (eg, E. Kirimal) and Rumania remained politically and culturally active. The Tatar émigré cause was supported by the interwar Polish government through the state-funded Oriental Institute in Warsaw. Tatar émigrés collaborated with their Ukrainian counterparts in the *Promethean movement in Warsaw and Paris.

During the Second World War, from 1941 to 1944, the Crimea was occupied by the German army and ruled by a Nazi military government. Because some Tatars had fought against the Soviet partisans in the Crimea, the Soviet government accused the Tatars collectively of collaboration with the Germans, and in 1944 they were brutally deported to Siberia, Kazakhstan, and Uzbekistan. The largest Tatar center became Tashkent. Although a Soviet decree of 5 September 1967 absolved the Tatar nation of collective collaboration, they were not permitted to return to the Crimea until the late 1980s. Ukrainian dissidents spoke out in support of the Tatar community's campaign for the right to return there (eg, P. Grigorenko, S. Karavansky, and V. Chornovil).

The movement to return to the Crimea attracted international attention in the mid-1980s and resulted in the cre-

ation of the Soviet State Commission for the Review of the National Demands of the Crimean Tatars in 1987, headed by President A. Gromyko. The commission, however, rejected the Tatars' demands for the right to return and for the re-establishment of the Crimean ASSR. The Ukrainian Helsinki Association spoke out in defense of the Tatars, and in its Fundamental Principles of 7 July 1988 it demanded 'the immediate restoration of the Crimean Autonomous SSR as a part of the Ukrainian SSR, and an organized resettlement of the autonomous republic's population repressed by Stalin to places of their former residence.'

Ukrainian-Crimean Tatar relations have been studied by Ukrainian historians, such as M. Kostomarov, M. Hrushevsky, T. Sushytsky, O. Ohloblyn, D. Doroshenko, D. Olianchyn, V. Dubrovsky, M. Tyshchenko, O. Subtelny, and V. Ostapchuk. Tatar motifs have appeared in the works of Ukrainian writers, including those of M. Kostomarov, S. Rudansky, M. Kotsiubynsky, and Lesia Ukrainka. A. Krymsky wrote surveys of Crimean Tatar history and literature, and materials about the Crimean Tatars were published in the journal **Skhidnii svit* (1927-31).

After the Second World War Soviet scholars paid attention only to the Tatar ASSR (Tataria), that is, to the Tatars of the Volga Basin and the Urals, descended from the Volga Bulgars, the Golden Horde, and the Kazan Khanate.

According to the 1989 Soviet census there were 271,715 Crimean Tatars in the USSR, of whom 251,537 stated that Tatar was their native language. Of the total number only 46,807 lived in Ukraine, 43,334 of whom stated that Tatar was their native language. In 1989, 86,875 other (non-Crimean) Tatars also lived in Ukraine; only 42,489 gave Tatar as their native language, and 42,601 gave Russian.

Tatars' people (*tatarski liudy*). The inhabitants of a 13th-century settlement in eastern Podolia and northeastern Volhynia near the confluence of the Sluch, the Teteriv, and the Boh rivers. Along with the *Boloikhovians they submitted to the Tatars during Batu Khan's advance on central Europe (1240-1). Danylo Romanovych waged successful campaigns against them in 1241 and 1254-5 despite the Tatar garrisons in place to protect them. The term 'tatars' people' is used in current publicistic literature to designate the collaborators with occupying powers.

Tatarynov, Yevhen, b 2 March 1892 in Saratov, Russia, d 10 May 1950 in Kiev. Pathophysiological; corresponding member of the AN URSR (now ANU) from 1939. A graduate of Saratov University (1916), in 1931 he was appointed head of the pathophysiology department at the Kiev Medical Institute and department chairman at the Institute of Experimental Biology and Pathology of the Ministry of Health of the Ukrainian SSR. From 1934 he worked in the ANU Institute of Clinical Physiology. His publications dealt with the mechanisms of immunity and how the reactivity of an organism is affected by blood disorders, blood loss, and cancer.

Tatlin, Vladimir, b 28 December 1885 in Moscow, d 31 May 1953 in Moscow. Painter, designer, and cofounder of *constructivism. He grew up in Kharkiv and worked as a

Vladimir Tatlin's book-cover design for the poetry collection *Zustrich na perekhrestii* (1927)

merchant marine. He studied art in Penza (1905–10) and at the Moscow School of Painting, Sculpture, and Architecture (1909–10) and private studios in Moscow. There he took part in avant-garde exhibitions (eg, the Donkey's Tail, Knave of Diamonds, and Union of Youth). Around 1914 he shared his studio with O. Hryshchenko and began working on painterly reliefs and 'counterreliefs' inspired at first by P. Picasso's relief sculptures. His constructions were entirely abstract combinations of materials (wood, metals, and glass). While heading the Moscow branch of the Division of Visual Arts of the Commissariat of Education (1918–19) and chairing the Department of Material Culture at the Moscow Higher State Artistic and Technical Workshops (1919–29) he worked on his famous model of the Monument to the Third International. He then chaired the Department of Material Culture at the Academy of Arts (1920–2) and the Museum of Artistic Culture (1922–5) in Petrograd. In 1925–7 he chaired the theater, film, and photography department of the Kiev State Art Institute. While in Kiev he designed the cover for M. Semenko, G. Shkurupii, and M. Bazhan's poetry collection *Zustrich na perekhrestii* (Meeting at the Crossroad, 1927) and established ties with the *Nova Generatsia futurist group in Kharkiv, and these ties he maintained after his return to Moscow. He was a major exponent of avant-garde art and design of the 1910s and 1920s. His intuitive constructivism is similar to that of V. *Yermilov and of the set designs of A. *Petrytsky and V. *Meller.

N. Mykytyn

Tatomyr, Kostiantyn, b 16 March 1900 in Yelysavethrad (now Kirovohrad), Kherson gubernia, d 4 March 1979 in Kiev. Mining engineer and scientist; corresponding member of the AN URSS (now ANU) from 1939. He studied in Dnipropetrovsk and worked there in the mining concern Shakhtobud and at the ANU Institute of Mining (1938–63). He taught at the Dnipropetrovsk Mining Institute (1929–41, 1945–50). He headed departments at the Donetsk Coal Scientific Research Institute (1963–5) and the ANU Institute of the Economics of Industry (1965–79). He developed a basic theory for complex calculations of optimal cross sections of mining tunnels, which led to the theory of the optimal planning of mines.

Tatomyr, Volodymyr, b 1902 in Stryi county, Galicia, d 1962 in Philadelphia. Engineer and youth and education activist. He was an inspector for the *Prosvita society in Lviv and an organizer of Young Prosvita societies. In 1941–3 he headed the youth section of the Cracow-based Ukrainian Central Committee. He emigrated to the United States after the Second World War. He wrote *Iunatstvo v oboroni ridnoi zemli* (Youth in Defense of Their Native Land, 1960).

Tatomyr, Yuliiian, b 3 January 1883 in Sprynia, Sambir county, Galicia, d 26 March 1946 in Salzburg. Civic and political activist and Ukrainian Catholic priest. After completing his studies in Peremyshl in 1908, he became a priest in Sambir. There he worked with the Prosvita society, set up a credit union, and served as director of the

Rev Yuliiian Tatomyr

Ryznytsia church-goods store. In 1918 he organized an action to take control of the region for Ukrainians, and through the 1920s he set up co-operatives, cultural groups, and People's Homes in the district. In 1928 he was elected to the Polish Senate from the Ukrainian National Democratic Alliance, and in 1939–41 he headed the Ukrainian Aid Society in Peremyshl. From 1944 he was a refugee in Austria.

Tatsii, Oleksii [Tacij, Oleksij], b 1903 in Poltava, d 12 March 1967 in Kiev. Architect. In 1930 he graduated from the Kharkiv Technological Institute. He designed the Exhibition Pavilion (1932) and Red Army Building (1932–3) in Kharkiv; residential buildings in Kiev (1930s), the Donbas (1929–35), and Poltava (1932); the building of the Kryvyi Rih City Council (1933–4); the Ukrainian Pavilion at the All-Union Agricultural Exhibition in Moscow (1939, with M. Ivanchenko); and the Kyiv Cinema in Kiev (1952, codesigner).

Taurians (*tavry*). An ancient tribe of unknown origin that inhabited the mountainous regions of the Crimea in the 1st millennium BC. They engaged primarily in animal husbandry, some agriculture in the river valleys, and fishing along the coast. Although technologically less advanced than their neighbors, they defended themselves from encroachment by Chersonesus and the Bosporan Kingdom. At the end of the 3rd century BC the Scythians retreated south from the Sarmatians and intermixed with the Taurians; references to Tauroscythians and Scythotaurians thereupon appeared in the ancient Greek writers. In the late 2nd century BC the Taurians came under the Pontic Kingdom, and in the 1st century AD they were Romanized. Eventually they were assimilated by the Alans, the Goths, and other invaders. The last historical references to them date from the 4th century.

Tavriia. The ancient Greek name for the territory inhabited by the Taurians was Taurica. From the 16th century the term Tavriia, a Slavic derivative of the Greek name, was widely used for the Crimean Peninsula. From the beginning of the 19th century the term was used to refer to the Crimea and the adjacent steppes north of it, which area constituted *Tavriia gubernia until the 1920s.

Tavriia gubernia. An administrative territory of the Russian Empire set up in 1802. It included the entire Crimean

Peninsula, Dnipro (Oleshky) and Melitopil counties, which had previously belonged to New Russia gubernia, and Tmutorokan county, which was separated from the gubernia in 1820. Its administrative center was Symferopil. In its Crimean counties (Symferopil, Teodosiia, Perekop, Yevpatoriia, and Yalta), which had a population of 740,000 in 1914, Ukrainians were in a minority, but in the steppe counties (Dnipro, Melitopil, and Berdianske), with a population of 1,760,000, Ukrainians formed a majority. In the 1920s the steppe counties were incorporated into the Ukrainian SSR, and the Crimea was set up as the Crimean ASSR under the RSFSR.

Tavriia Learned Archival Commission (Tavriiska uchena [naukova] arkhivna komisiia). A gubernial commission established in 1887 in Symferopil to collect, study, and preserve historical and archeographic documentary materials and to protect monuments of antiquity in Tavriia gubernia. The commission's permanent chairman was A. Markevich. Among its approx 300 members were prominent scholars, such as V. Gorodtsov, A. Krymsky, Yu. Kulakovsky, and N. Veselovsky. The commission conducted archeological excavations in the Crimea and the Black Sea littoral region, established the Symferopil Museum of Antiquities (1887), and published 57 volumes (1887–1920) of its Russian-language serial *Izvestiia*, which contained the texts of almost all the 419 lectures delivered at its 260 meetings. In 1920 the commission's valuable historical archive (10,000 items) was transferred to the Crimean Central Archive (later the Crimea Oblast State Archive). In 1921 its museum holdings became part of the Tavrida Central Museum (now the Crimean Regional Museum) in Symferopil, and the Commissariat of Education took over its functions regarding the protection of monuments. In 1923 the commission was transformed into the Tavriia Historical, Archeological, and Ethnographic Society, under which name it published three additional volumes of *Izvestiia* (1927–9). In 1929 the society ceased to exist. P. Nikolsky's detailed description of the senate files in its archive was published in 1917.

Tavrika Library. A historical and regional studies library in Symferopil, established in 1881 by A. Steven (son of the founder of the Nikita Botanical Garden), consisting of the library holdings of the Tavriia gubernia zemstvo, the Tavriia Learned Archival Commission, and several personal libraries and archives. In 1891 it had 734 volumes of books, maps, and other materials pertaining to Tavriia gubernia and southern Ukraine. In the late 19th century the papers of P. Köppen and his family were deposited there. In 1922 the library (3,500 vols) became part of the Tavrida Central Museum (later the Crimean Regional Museum). In 1971 the library had over 30,000 volumes pertaining to the Crimea, including some rare 16th- to 19th-century publications. A catalog of the library (1903) and supplements (1911–12) were published in Symferopil.

Tax farming (*orendarstvo, vidkup*). Private leasing of the right to collect taxes and other state revenues. The practice was introduced in Ukraine after the Union of Lublin in 1569. The state also leased its exclusive rights to sell liquor, tobacco, and salt. To maximize their profits the private leaseholders imposed exorbitant rates and applied various pressures, including force. Their conduct aroused

popular indignation and stirred unrest. Nevertheless rulers often resorted to tax farming as a quick and easy way of obtaining revenues. In the first half of the 18th century half the budget of the Hetman state was derived from its leasing of its liquor monopoly. In 1754 the Russian government began to replace tax farming by excise taxes, but the leasing of the right to sell liquor was not discontinued until a century later. (See *Propination.)

Tax in kind (*prodpodatok*). A system of agricultural taxation adopted at the 10th Congress of the Communist Party of the USSR in March 1921 in place of the *surplus appropriation system. Although taxes were collected in produce, as under the previous system, the rates were much lower than before, and more food was left for domestic consumption and private sale. The tax in kind was a major step in re-establishing a market economy in the USSR (see *New Economic Policy). It was necessitated to some extent by the weakness of the monetary system at the time. It led to a great improvement in the rural economy. The tax in kind was replaced in 1924 by a monetary agricultural tax, which remained in force until the collectivization of agriculture began in 1929.

Taxation. The imposition of compulsory levies by governments to obtain revenues for their expenditures. Today taxes also have other purposes, economic (promoting employment, growth, stability) or social (income redistribution). Taxes are either direct or indirect: the first are levied on individuals, their income, or property, and the second on goods and are passed on to the consumer.

The medieval system of feudal taxation operated in Ukraine until the mid-17th century, and some elements of it survived until the 19th century. A great number of different taxes were levied by different authorities. The sums were arbitrary and were not collected regularly. Often the duties were discriminatory against certain religious, social, or national groups and bore no relation to ability to pay. Tax collectors had a direct interest in the sum collected, and no distinction was made between the state treasury and a ruler's personal income. The oldest form of direct taxation was the *tribute, which was collected by the prince or his special appointees for the upkeep of his court and retinue. The tribute took various forms in Kievan Rus': besides gifts in goods or money, such as the *poklon* (bow), *pochest* (salute), and *stan* (estate), services, such as transport (*povoz*) and labor on fortifications and road construction, were required. The obligations were imposed on the **dvoryshche* or **hromada*, and the community was often responsible for dividing and collecting the tax from each house (*podymne*) or plow (*pososhne* or *popluzhne*). In the late 13th and early 14th centuries the Tatars set up their own taxation system in some parts of Ukraine and conducted periodic censuses of the population and property. They divided their territories into districts of about 10,000 taxpayers each. The payments were made in goods, money, services, or human beings (young boys, recruits, concubines, or slaves). The old tax system of Kievan Rus' was preserved in Western Ukraine under Polish rule until the mid-15th century and in central and eastern Ukraine under Lithuanian rule until the second half of the 16th century. The system became more decentralized and complex as special categories of military, administrative, labor, and cash taxes were introduced.

Monetary payments became the practice in the towns.

In the mid-16th century the Polish system of taxation was introduced in Ukrainian territories. The gentry (from 1374) and the Roman Catholic church (from 1381) were exempted from taxes. The Polish kings renounced the rights to tax and limited their treasury to duties from the rural and urban population, income from royal estates, and contributions from self-governing cities under Magdeburg law. The peasants and some town residents had to perform *corvée* labor and pay various fees to their lords.

General levies could be approved only by gentry diets to meet special military expenditures. They were imposed on certain estates for a limited term and a specific purpose. Their character and base was specified: a poll, field, and house tax; an urban income tax, or *shos*; a beer, mead, and liquor tax, or *chopove* (spigot); and a *hiberna* tax for the winter support of troops. In the second half of the 16th century special diets approved levies of over 600,000 zlotys. The field tax was usually collected from the peasants', not the lord's, land. The *shos* was initially an income tax and then a real-estate tax (usually 4.16 percent of assessed value). Besides a poll tax the Jews paid a double *shos*: their **kahal* divided the tax among the families and collected it. Apart from the *shos* and emergency taxes imposed by the diets, the townsfolk paid duties on different types of income and for various services to the town treasury: a window tax, visiting tax, weights-and-measures tax, warehouse tax, city security tax, fortification tax, road and bridge tax, and sanitation tax.

A religious and national bias in the division of the tax burden and abuses in its collection often resulted in social and national conflicts in the towns. The Orthodox, for example, were taxed to support the Roman Catholic clergy. The patricians in cities often tried to transfer the tax burden from themselves to the common people. Efforts to reform the tax system did not succeed. The practice of leasing out tax-collecting only increased the inequities and abuses in the system (see **Tax farming*).

After the Cossack uprising of 1648 the former royal and other large estates and income from them were transferred to the Cossack military treasury. A large part of the royal estates was distributed among the Cossack *starshyna*. The Cossacks and their officers claimed exemption from taxes on the basis of their military service. Economic competition from the Cossacks impeded the growth of the burgher estate. The number of free peasant households declined steadily. The Cossack treasury derived little revenue from direct taxation. Its principal source of income was import and export tariffs and indirect taxes on mills, foundries, mines, tobacco, tar, and saltpeter. Those taxes were inherent in a form of state monopoly: the owners of such enterprises could not sell their products retail but had to deliver them at fixed prices to leaseholders, who paid the government fixed tax. Conflicts often arose between the municipal authorities and the Cossack administration over local taxes from tradesmen, hostels, bath-houses, and market fees.

After the Pereiaslav Treaty of 1654 the tsar's envoys in Ukraine interfered in the financial affairs of the Hetman state. Hetman I. Briukhovetsky consented to transfer all the direct taxes from the common people and townsfolk to the tsar's treasury. After I. Mazepa's defeat at Poltava in 1709, the Little Russian Collegium (est 1722) introduced more and more taxes in Ukraine. The Russian government

and its military representatives in the Hetman state exacted taxes (known as *portsii*) to support the Russian garrisons in Ukraine, requisitioned grain, livestock, and horses, and conscripted labor for constructing defense lines and canals. Hetmans P. Polubotok and D. Apostol protested against those measures.

Under Russian rule. In 1765–9, following the abolition of the Hetmanate in 1764, the **Rumiantsev* census was conducted to bring Left-Bank Ukraine into the imperial taxation system. Taxes in kind were eliminated in favor of a monetary household tax (*podvirnyi*). In 1783 that tax was replaced by the **poll* tax, which was extended to Right-Bank Ukraine in 1795. At first the tax was distributed evenly, but eventually, regional disparities arose; in Ukraine the tax was 40–50 percent higher than in Russia. At first the poll tax accounted for 50 percent of the Russian imperial revenues. When it was abolished in 1887, it constituted only 10 percent of the revenues.

Prior to the emancipation of 1861 the drinking duty from the liquor trade was a leading source of revenue in the imperial budget. In 1819–27 the trade was a government monopoly, and later, trading licenses were sold. The price of liquor was 5 to 10 times the cost of production, and the licensees, most of whom were Russian, made enormous profits. In 1863 the system was replaced with a regular excise tax on liquor. By 1913 the tax accounted for 88 percent of the price of liquor. In 1848–52 an excise tax on sugar was introduced, and then a tax on salt, gas, matches, tobacco, and cigarette paper. The excise tax was paid by the producer or wholesaler. Since sugar, tobacco, and liquor were produced mainly in Ukraine, 30–40 percent of the excise revenues were raised in Ukraine. The burden of the tax, however, fell ultimately on the consumers, that is, the peasants. The excise tax became the principal source of government revenue.

Direct taxes did not play an important role in the imperial budget. In 1875 a land tax was introduced. Its rates on peasant holdings were substantially higher than on landowners' estates. In 1899 the average rate paid by peasants in Left-Bank Ukraine was 1.80 rubles per *desiatin*, and by landowners, 0.70 ruble. In Right-Bank Ukraine the average rates were 1.06 and 0.18 respectively; in Southern Ukraine, 1.70 and 0.29 respectively. In addition peasants had to pay *zemstvo* contributions and various local taxes and had to buy compulsory fire insurance. Direct taxes accounted for 40 percent of a peasant's net income. The tax burden on small landholders exceeded their ability to pay.

From 1863, urban residents paid a property tax. Merchants paid 10 percent of their declared capital. New taxes were introduced: in 1885 a capital income tax of 5 percent of the income from investment capital and securities, in 1894 a tax on housing, and in 1899 an industrial tax. Joint-stock companies paid an equity tax of 0.15 percent, and enterprises with profits above 3 percent paid a slight gains tax. Despite this array of taxes, the middle class was not overburdened. After numerous attempts an income tax was introduced in 1917.

Using the tax system, the tsarist government exploited Ukraine: it took in much more than it spent in the Ukrainian gubernias. According to M. Yasnopolsky's estimate based on budget balance sheets, in 13 years (1868–81) taxes in Ukraine brought in 2,899.2 million rubles, whereas state expenditures in Ukraine were 1,749 million rubles. M. Porsh's estimate of revenues and expenditures in

Ukraine for 1895–1910 was 3,289.6 million rubles and 2,605.2 million rubles respectively. The tsarist treasury in this way stripped the Ukrainian gubernias of their trade surplus and artificially lowered Ukraine's standard of living, which had been higher than Russia's. Tax revenues were spent outside of Ukraine, mostly on wars in the East, on interest payments for state loans, and for financing industrial development.

Under Austrian rule. After Austria's annexation of Western Ukraine in 1772, the government gradually extended its tax system to the new provinces. To strengthen the peasant tax base, the regime reduced the *corvée* obligations and separated peasants' and landlords' landholdings. The land tax on landowners' estates was almost 6 percent of their net income; peasant lands were taxed at a somewhat lower rate. In 1785 the land tax in Galicia generated 1.3 million zlotys. The state had a huge income from its monopolies on salt, tobacco, and the lottery. After the agrarian reforms of 1848 the largest part of the tax paid by the peasantry consisted of the redemption payment to the landowners. The cost of compensating the landowners for their loss of the alcohol monopoly in 1898 was recovered through taxes.

In 1910 Galicia paid 34.3 million crowns, or 58.5 percent of its tax contribution, in direct taxes. That sum accounted for 8.85 percent of Austria's direct taxes, whereas Galicia's population accounted for 28.1 percent of the empire's. The land tax yielded the largest part: 8.9 million crowns, or 14.3 percent of Austria's land tax revenues. Next in importance was the residence tax: together the two taxes accounted for 58.8 percent of the revenues from Galicia. In 1911 Galicians paid another 21.9 million crowns above the direct taxes: consumption taxes accounted for 33.7 percent of the Galician provincial budget. Additional levies were imposed to cover country and communal needs. In 1913 Galicia contributed 195.9 million crowns to the Austrian budget. According to estimates by Galician economists, 16 to 20 million crowns of its annual contribution never returned to Galicia.

In the interwar period Western Ukrainian territories were divided among Poland, Rumania, and Czechoslovakia and came under their tax systems. For Ukrainians the greatest burden was the land tax, and then the various indirect taxes. Under the Polish regime the state had a monopoly on salt, alcohol, tobacco, and matches and taxed some food products, such as sugar, yeast, tea, and coffee. Poland and Rumania treated their Ukrainian territories as second-class provinces and spent virtually nothing on their economic development. Most of the government expenditures in those regions were on administration. The situation in Transcarpathia was different: the Czechoslovak treasury supported local cultural and economic development.

The period of Ukrainian statehood (1917–20) was too brief for a regular tax system to be developed. The main source of revenue, while supplies lasted, was the sugar excise tax. There was also a tax on flour milling. Budget deficits were handled by the printing of more money. The governments of the UNR and the Western Ukrainian National Republic planned to introduce a graduated income tax.

Soviet Ukraine. At their Sixth Party Congress in the summer of 1917 the Bolsheviks proposed a tax policy based on a direct property tax, an indirect luxury tax, and

a progressive income tax. During their first years in power, however, they resorted to special taxes on the 'exploiting classes.' Instead of monetary taxes a 'surplus appropriation system was introduced in 1919 and was replaced by a *tax in kind in 1921. In 1923 the latter was replaced by a uniform farm tax, which set high rates for the kulaks and exempted the poor peasants. Contrary to the recommendations of the 11th Congress of the Russian Communist Party (Bolshevik) in 1922, indirect taxes remained the main source of state revenues. In Ukraine the percentage of tax revenues raised indirectly even increased, from 63 in 1913 to 68 in 1940 and 73 in 1950, and then declined, to 63 in 1956 and 50 in 1967 (compared to 17 in the United States). In 1930 all excise taxes were consolidated in a single general indirect tax known as the turnover tax. J. Stalin used the tax to form the capital needed for the rapid expansion of heavy industry and the military buildup. In 1932 a uniform tax rate was replaced by a differentiated one. The tax base consisted mostly of goods produced by light industry and the food industry, although for a time even some means of production were subject to the tax. The effect on consumers, who had to pay the tax with every article purchased, was to undercut their buying power and lower their living standard.

The turnover tax was a universal excise tax that did not exist in other countries. In the Soviet economy it was used as the chief means of capital formation at the consumer's expense. The tax was collected for the state not by the retailer but by the producer of manufactured goods and the wholesaler. Although after Stalin's death the tax was reduced somewhat so that the standard of living would improve, it continued to function as the main brake on the expansion of consumer production. The share of output appropriated by the state by means of the turnover tax is given in table 1.

TABLE 1
Share of the turnover collected through the turnover tax in 1961 prices, 1940–65 (in million rubles)

Year	Turnover	Revenues from turnover tax	% of tax to turnover
1940	3,202.8	2,120.1	66.2
1950	5,731.2	3,407.7	59.5
1960	13,346.8	5,441.7	40.8
1965	18,503.7	6,789.4	36.6

In the 1960s the tax share in the retail prices of consumer goods was as follows: beer and liquor, cigarettes, and cosmetics, 95–99 percent; salt and wine, 85–90 percent; sunflower oil, leather footwear, cloth, bicycles, automobiles, gasoline, and records, 50–75 percent; flour, sugar, matches, electricity, and gas, 50–65 percent; cutlery, bowls, nails, sewing machines, televisions, radios, and writing paper, 33–65 percent; lard, butter, eggs, tea, and peas, 20–40 percent.

Light industry and the food industry generated 70–75 percent of tax revenues; agricultural procurements, 10–11 percent (compared to 30–40 percent in the 1930s and 1940s); and heavy industry, 10 percent. The rest came from co-operatives, restaurants, cafeterias, and the like. No less than 90 percent of the tax burden, therefore, was carried by consumers.

The turnover tax was applied in a discriminatory way. The 'closed' stores, restaurants, and other enterprises of the defense ministry, the KGB, the militia, the writers' union, and academic and cultural institutions were exempted from the tax. The tax did not apply to export goods, to goods transferred to state reserves, or to fuel and construction materials for state farms. From 1959 the central Ministry of Finance set the tax targets for each republic, and from 1964 for individual enterprises.

The second-largest source of state revenues in the USSR was the direct tax on the net profits of enterprises, which until 1966 was known as the 'deduction from profits.' Introduced in 1931, it was applied annually to each state enterprise at an individual rate of 10–99 percent of the enterprise's net profits and was added to the production plan as a compulsory indicator. Sixty-four percent of all profits produced in Ukraine were appropriated in this way by the central USSR budget in 1958, 71 percent in 1967 (in the United States the maximum tax on corporate profit was 52 percent). Co-operatives paid 35 percent of their profits in taxes, and public organizations, trade unions, and sports clubs paid 25 percent. But no enterprises belonging to the Party or the Komsomol were taxed.

In the tax law of 5 July 1991 taxes on profits from various enterprises were raised to 35 percent; co-operatives engaged in the role of 'middleman' were to be taxed at 65 percent, and those engaged in the growing of food products, only 1.5 percent. Still other enterprises, such as research institutes, were to pay only 10 percent on profits. Student groups and artistic collectives, as well as enterprises located in the radioactive zone, were exempt from taxation.

Beginning in 1987, enterprises were formed in Ukraine in which part of the capital came from outside Ukraine. In 1990 there were about 113 such 'joint ventures.' The enterprises were to be taxed like all others unless the foreign capital exceeded 30 percent. If the enterprise was more than 30 percent foreign-owned, however, there were no taxes for the first two years after the first profit was generated, and a rate of 30 percent thereafter. The dividends of such joint ventures were also taxable (at 15 percent if they were to be paid out outside Ukraine).

The third major source of revenue was the personal income tax, which in 1989 brought in 3,224 million rubles, or 92.4 percent of the revenues from personal taxes in Ukraine. In developed countries the income tax has been an instrument for equalizing incomes; in the USSR the income tax was not progressive, and favored the bureaucracy. In 1970 a monthly wage of 100 rubles was taxed at 8.2 percent, and any sum over 100 rubles, regardless of the size, at 13.6 percent. Wage earners of under 60 rubles a month and members of the armed forces or the KGB were exempted, but some classes were taxed differently from others: in 1970, for example, wage and salary workers, writers, and artists earning up to 1,500 rubles per year were taxed at 9.16 percent; artisans, doctors, and lawyers with a private practice, at 21.46 percent; and priests and home owners who rented rooms, at 28.44 percent. Inventors, prospectors, and families with many children were taxed at lower rates. Interest on savings or government bonds, prizes, pensions, and lottery winnings were not taxed. Prior to 1934 the income tax was more differentiated and progressive. In 1931–41, besides income tax, everyone had to pay a levy of about 7 percent of personal income for the construction of residential and public

buildings. A special direct tax on unmarried and childless people was introduced in 1944. Its rate was 0.4–0.6 percent of personal income. Inheritances were taxed at 5 percent for the first 1,000 rubles and 10 percent for the rest.

The tax laws of 1991 also affected personal income. In an attempt to make the tax system more progressive the rate of taxation was varied according to income (eg, no tax on income of up to 161 rubles per month, 12 percent on income of between 161 and 1,000 rubles per month). A progressive three-tier scale was to be applied to income above 1,000 rubles per month, up to a maximum of 30 percent. According to the new tax laws all income for tax purposes is considered equal, but some categories of taxpayers are to be exempt from tax (invalids, veterans, etc).

Another direct tax was the income tax on collective farms and their workers, which came to 1–2 percent of the USSR's budget in the 1960s and more in Stalin's time. A tax of 12 percent was levied on a farm's net income plus 8 percent of its workers' wages. Collective farms whose profit margin was less than 15 percent, and whose workers earned less than 60 rubles per month, were exempt. A compulsory insurance on the livestock, crops, and buildings against fire and natural disasters (from which state farms were exempt) was a form of direct taxation. Agricultural procurements were another form of direct taxation. An agricultural tax was also levied on the *private plots of collective-farm workers: 0.50–1.20 rubles per 0.01 ha in eastern Ukraine, and 0.20–0.60 in western Ukraine. If worker's did not meet their quota of *workdays, their tax was doubled. Furthermore, from 1933, holders of private plots had to deliver high quotas of meat, milk, eggs, potatoes, and wool to the state. In 1951 the quota per household was 45 kg of meat, 160 L of milk, 130 eggs, and 1 kg of wool. In 1958 those deliveries were formally abolished, but compulsory 'purchases' of any private-plot 'surpluses' by the state continued.

Taxes increased steadily in the Soviet period. In 1913 each inhabitant of Ukraine's present territory paid an average tax of 3.74 gold rubles, or about 3 percent above the average in the rest of the empire. In 1924–5 the amount was 7.03 gold rubles, or 28.4 percent above the average in the rest of the USSR. Agricultural taxes per capita were 70 percent higher in Ukraine than in the rest of the USSR. Ukrainian economists pointed out that the Ukrainian peasant was being exploited. After collectivization the tax burden became much greater. At 1961 prices the tax per capita in Ukraine rose to 43 rubles in 1940, 107 rubles in 1950, 144 rubles in 1960, and 193 rubles in 1965. Most of the taxes were paid by the urban population: its wages had increased, but so did the income tax in the 1930s and 1940s. As prices on consumer goods fell in the 1950s, the turnover tax decreased, and the tax burden shifted from the city to the countryside. In 1970, according to some estimates, the average Ukrainian worker worked the tax equivalent of 3 to 3.5 months per year (2 months in the United States). In the RSFSR taxes per capita were 10–15 percent higher, but incomes were higher as well.

The growth of the tax burden is evident when one compares the tax revenues with the national income, as in table 2. The government's appropriation of a huge share of the national income has stunted economic growth.

The central government in Moscow, like its imperial predecessor, used the tax system to exploit Ukraine financially. It extracted much more revenue from the republic than it spent there. It has been estimated on the basis of

TABLE 2
Share of tax revenues in the national income of Ukraine, 1924-5 to 1965

Year	National income (billions of rubles)	Total taxes (billions of rubles)	% of tax in national income
1924-5	3.1	0.2	6.4
1940	9.7	2.3	23.8
1954	19.7	6.2	31.7
1960	27.0	10.6	39.2
1965	37.9	16.8	44.3

Ukraine's budgets that in the four fiscal years 1923-4 to 1926-7 the state treasury in Moscow received 2,378.8 million rubles from Ukraine and spent only 1,906.8 million rubles in Ukraine. The respective figures for 1928-9 to 1932 (the First Five-Year Plan) were 16,789 million and 11,790 million, and for 1959 to 1961, 15,015 million and 3,287 million. Such tax discrimination wiped out Ukraine's favorable trade balance with the other Union republics and depressed its standard of living below Russia's by the mid-1950s.

Although the USSR was considered to be a federated state, Moscow had the exclusive power to levy and allocate taxes. The budget of the Ukrainian SSR was assigned a certain percentage of the taxes collected in its territory (eg, 29.5 percent of its turnover tax). Only some taxes with insignificant returns, such as the income tax on collective farms and co-operatives, were handed over to the republican budget by Moscow.

Municipal and rural governments derived their revenues from local taxes, which were levied on private buildings (0.5-1.0 percent of the assessed value), cars and motorcycles, and commercial space at markets. Those revenues were usually inadequate for maintaining buildings, roads, and public baths. Only villages had a strictly circumscribed power to levy taxes for the construction of schools, roads, bridges, and wells. The share of tax revenues in the state budget of Ukraine for 1960-90 is given in table 3.

Although new tax laws were adopted from the time of the proclamation of sovereignty on 16 July 1990, it was the declaration of Ukraine's independence on 24 August 1991 that set the legal foundation for a new and independent tax system.

TABLE 3
Share of different tax revenues in the budget of Ukraine, 1960-90 (in million rubles; percentages in parentheses)

	1960	1970	1980	1985	1990
1. Total revenues	7,545	13,550	24,674	31,978	45,120
2. Turnover tax	1,509 (20.0)	2,524 (18.6)	8,061 (32.7)	12,257 (38.3)	12,686 (28.1)
3. Income tax from enterprises and organizations	2,695 (35.7)	26,468 (47.7)	9,083 (36.8)	12,257 (35.8)	12,686 (24.2)
4. Income tax from collective farms and co-operative and public enterprises and organizations	453	292	344	498	747
5. Personal taxes	591 (7.8)	1,174 (8.7)	2,069 (8.4)	2,462 (7.7)	4,045 (9.0)

Tbilisi. The capital (1989 pop 1,260,000) of Georgia, known from the Russian transcription as Tiflis until 1936. The city was founded in the 5th century AD and was subject to Russian rule from 1801 to 1917. From the mid-19th century a small Ukrainian colony existed in Tbilisi, and the city often hosted Ukrainian theater troupes, beginning with M. Starytsky's troupe in 1889. In 1917 the Ukrainian Military Congress of Transcaucasia took place in Tbilisi and set up the Transcaucasian Ukrainian Council. The council published its *Visty* and then *Ukrains'ki visty Zakavkazzia*. In 1918 a general consulate of the UNR was established in Tbilisi, and then a Ukrainian legation headed by I. *Krasovsky. According to census figures, there were 10,600 Ukrainians in Tbilisi in 1970.

Tchaikovsky, Peter [Čajkovskij, Petr], b 7 May 1840 in Votkinsk, Viatka gubernia, Russia, d 6 November 1893 in St Petersburg. Composer and conductor. A descendant (on his father's side) of an old Cossack family (Chaika), Tchaikovsky first visited Ukraine in 1864 and thereafter often spent his summers there in Kamianka (Chyhyryn county) at the home of his sister and in Nyzy (Sumy county), where he lived during 1876-9. He is commonly regarded as one of the greatest 19th-century Russian composers, but at least 30 of his works have Ukrainian subjects or incorporate Ukrainian folk melodies. Among these are the operas *Mazepa* (based on A. Pushkin's poem), *Little Shoes*, and *Night before Christmas* (or *Vakula the Smith*, based on N. Gogol's story); symphonies no. 2 (*Little Russian*), no. 4, and no. 7 (finished and edited by S. Bogatyrev); the *Concerto for Piano and Orchestra no. 1 in B-flat Minor*; the *1812 Overture*, the opening of which is based on the first mode of the *Kievan chant; the transcription for piano solo of A. Dargomyzhsky's orchestral fantasy *Kozachok*; and songs to Russian translations of T. Shevchenko, such as 'Sadok vyshnevii' (Cherry Orchard). Tchaikovsky also edited 10 volumes of D. Bortniansky's sacred choral works, which were published in Moscow in 1882.

Studies of Tchaikovsky's Ukrainian connections have been published in Kiev, edited by A. Olkhovsky (1940), H. Tiumenieva (1955), and N. Semenenko (1989).

Tcherikower, Elias, b 1881 in Poltava, d 1943. Jewish historian. He published numerous works about Ukrainian Jewry and became one of the founding members of the YIVO Institute for Jewish Research. His archives were evacuated from Vilnius to New York at the start of the Second World War. The Elias Tcherikower Archives of the YIVO Institute constitute one of the most important sources of information in the world on the history of Ukrainian Jewry.

Tchoubar, Bianca [Čubar], b 22 October 1910 in Kharkiv, d 24 April 1990 in Paris. Organic chemist. She studied at the Sorbonne (doctorate, 1946). In 1946 she joined the Centre National de Recherche Scientifique, where in 1955 she attained the rank of director of research. She retired in 1978 but continued to be active in research and publishing until 1988. Tchoubar was a pioneer in the study of organic reaction mechanisms and made major contributions to the understanding of rearrangement reactions. In the 1960s she collaborated with E. *Shilov of the Institute of Organic Chemistry of the Academy of Sciences of Ukraine. Among the most important of her publications are *Reaction Mechanisms in Organic Chemistry* (1960) and *Salt Effects in Organic and Organometallic Chemistry* (1988).

The chief executive of the Teachers' Hromada in 1924-5. Standing, from left: Ivan Rybchyn, Mykola Panchuk, Hryhorii Myketei, Volodymyr Kycher; sitting: Ivan Sitnytsky, Ivan Bryk, Sydir Hromnytsky, Ivan Rakovsky

Teachers' Hromada (Uchytelska hromada). A Lviv-based professional organization for teachers of Ukrainian secondary and postsecondary schools, active in Western Ukraine in 1908-39. Formed through the initiative of Yu. Stefanovych in 1908, the group established branches in the major eastern Galician cities and towns with Ukrainian institutions of secondary education (a total of 11 by 1914). It sought the establishment of new Ukrainian state gymnasiums in the larger centers of Galicia, the Ukrainization of bilingual (Polish-Ukrainian) gymnasiums, and an upgrading of the status of Realschule education to gymnasium level. The group also lobbied for a supervisor of Ukrainian schools under the education ministry and pro-

tested against the Polonization of Lviv University. The failure of these efforts, however, led to the group's involvement with private educational undertakings, including the organization of private secondary schools and gymnasium preparatory courses.

The Teachers' Hromada remained active after the First World War, albeit at a significantly reduced level. It continued in its efforts to Ukrainize education in Galicia, by fighting against the Polonization of Ukrainian gymnasiums; working toward the development of a Ukrainian-language curriculum in fields such as Ukrainian language (co-ordinated by Ya. Bilenky), history (O. Terletsky), and geography (O. Dashkevych); and publishing organizational journals - *Nasha shkola* (1909-14), *Svitlo* (1921-2), and *Ukrains'ka shkola* (1925-39). As well, the group engaged in several mutual-aid ventures, such as the establishing of a relief fund for the families of war victims, the unemployed, and the widows or orphans of teachers, and the building of vacation centers and retreats for teachers. In its organizational activity the group worked in conjunction with the *Ridna Shkola and *Prosvita societies. By 1939 the Teachers' Hromada had 12 branches, with nearly 500 members; the group was disbanded that year, following the Soviet occupation of Western Ukraine.

Some of the outstanding figures involved with the Teachers' Hromada were K. Studynsky, S. Hromnytsky, S. Karkhut, V. Radzykevych, L. Salo, S. Nedilsky, K. Kysilevsky, I. Rybchyn, and S. Levytsky.

A. Makuch

Teachers' Hromada of Subcarpathian Ruthenia (Uchytelska hromada Pidkarpatskoï Rusy). A teachers' society founded in 1929, with its headquarters in Uzhhorod. Its membership consisted of disaffected members of the Russophile Teachers' Society of Subcarpathian Ruthenia. The Hromada campaigned for the Ukrainization of Transcarpathian Ruthenian schools and was active in many facets of Ukrainian cultural and educational life. It published the monthly **Uchytel's'kyi holos* and advocated the use of Ukrainian-language books in schools. The leading members of the organization were A. Voloshyn, Yu. Revai, and A. Shtefan. The Hromada was soon supported by the overwhelming majority of Ukrainian teachers in Transcarpathia, and claimed a membership of 1,650 in 1938. It was dissolved following the Hungarian occupation of Transcarpathia in 1939.

Teachers' institutes (*uchytelski instituty*). In Ukraine, pedagogical institutions which prepared teachers for the middle grades of general secondary-education schools. These institutes were first established in the Russian Empire in 1817 for the training of teachers for *county and *parochial schools, and from 1912 they undertook the training of teachers for urban and higher-elementary schools. The first teachers' institute in Ukraine was founded in Hlukhiv in 1874. In 1917 there were 11 such institutes in Russian-ruled Ukraine (there were 47 in the entire Russian Empire). They were abolished in the early period of Soviet rule in Ukraine and re-established in 1934 in conjunction with the introduction of the *seven-year school. Teacher's institutes were affiliated with *pedagogical in-

stitutes. Graduates of teachers' institutes were considered to have incomplete pedagogical education and were assigned to teach grades five to seven of the seven-year schools. In 1955 there were 33 teachers' institutes in Ukraine. In the 1950s, as a result of the growth and development of the secondary-school system and the ensuing increase in the training required of teachers, teachers' institutes were reorganized into pedagogical institutes or *pedagogical schools.

Teachers' seminaries (*uchytelski seminarii*). Pedagogical institutions which prepared teachers of elementary schools. They first appeared in the Russian Empire in 1779; the first teachers' seminary in Ukraine was established in Kiev in 1869 (and moved in 1873 to Korostyshiv, now in Zhytomyr oblast). In the 1870s teachers' seminaries were founded in Kherson, Pereiaslav, Vovchanske, and Ostrih. A zemstvo teachers' seminary in Chernihiv was also founded at that time. Graduates of 'two-class' (five-year) elementary schools could enrol in the teachers' seminaries, where the program of study was three to four years. In 1917 there were 26 teachers' seminaries in Ukraine (171 in the Russian Empire).

In Western Ukraine under Austrian rule, teachers' seminaries were established in the wake of the educational reform of 1869. They had a four-year program of instruction and were the only institutions preparing teachers for elementary schools. In Galicia there were 10 state teachers' seminaries, with Ukrainian and Polish as languages of instruction (7 for men and 3 for women). In addition there were three private Ukrainian-language teachers' seminaries. Bukovyna had three state teachers' seminaries (one Ukrainian), and Transcarpathia three, albeit with Hungarian as the language of instruction. In Galicia under Polish rule, teachers' seminaries were reorganized into pedagogical lyceums with a three-year program of study. In Transcarpathia in 1938, there were five teachers' seminaries (of which four were Ukrainian-language institutions). During the Second World War, in the Ukrainian parts of the *Generalgouvernement there were nine teachers' seminaries.

B. Krawchenko

Teachers' Society of Subcarpathian Ruthenia (*Uchytelskoe tovaryshchestvo Podkarpatskoi Rusy*). A teachers' organization founded in Uzhhorod in 1920. It soon developed a Russophile orientation, which caused a split in the society in 1929 and the formation of the Ukrainophile *Teachers' Hromada of Subcarpathian Ruthenia. The society campaigned for the introduction of Russian as the language of instruction in the schools of Subcarpathian Ruthenia and attempted to organize a broad cultural program and support for students and teachers. It published the monthly **Narodnaia shkola* (1921–38). Among the leading activists in the society were V. Shpenik (the first head), M. Vasylenkov, and P. Fedor. After 1929 the society declined, together with the entire Russophile movement in Transcarpathia, and most teachers joined the Teachers' Hromada; unlike the Hromada, however, it was not closed down following the Hungarian occupation of Transcarpathia, and it continued its activities until the end of the Second World War.

Teaching gospels. See Didactic gospels.

Teatr (Theater). An illustrated journal of the arts administration at the Council of People's Commissars of the Ukrainian SSR, published bimonthly (1936–40, ed A. Borshchahivsky) and then monthly (1940–1, ed I. Kocherha) in Kiev (a total of 41 issues). It commented on the activities of professional and amateur theaters and featured memoirs and letters from the history of Ukrainian theater. Its successor was **Ukrains'kyi teatr*.

Teatr u Piatnytsiu. See Ukrainian Theater in Philadelphia.

Teatral'ne mystetstvo (Theatrical Art). A monthly journal published by H. Hanuliak in Lviv in 1922–5 (a total of 35 issues) with the literary supplement *Teatral'na biblioteka* (edited by F. Dudko). It contained information on the history of Ukrainian theater in Galicia, biographies of theatrical workers, criticism, texts of original Ukrainian and translated dramas, and instructions for amateur groups.

Teatral'ni visty (Theatrical News). A weekly journal of the Theatrical Committee under the auspices of the UNR government, published in Kiev from April to October 1917. Edited by L. Kurbas, it contained articles on the development of Ukrainian professional and amateur theater, parts of Kurbas's translation of G. Lessing's *Hamburgische Dramaturgie*, and O. Wilde's theatrical aphorisms.

Technical journals. The earliest technical journals published in Ukraine were financed by branches of the Imperial Russian Technical Society (IRTO, est 1866 in St Petersburg). The Kiev branch published *Zapiski Kievskogo otdeleniia Imperskogo russkogo tekhnicheskogo obschestva po svetskoi promyshlennosti* (1871–1916), *Tekhnicheskii listok* (1878–81), and *Inzhener* (1882–1916). Similar *Zapiski* were published by the Kharkiv (1881–1908), Odessa (1885–1916), Mykolaiv (1904–5, 1914, 1916), and Katerynoslav (1902–16) IRTO branches. The journals dealt with scientific and technical problems in various branches of industry. The first specialized technical journals were devoted to mining: *Iuzhno-russkii gornyi listok* (1880–7, 1888–1909), which was continued as *Gornozavodskoe delo* (1910–16), and *Novosti tekhniki i promyshlennosti* (1908–13), which was continued as *Iuzhnyi inzhener* (1914–16). Journals such as *Vestnik iugozapadnykh zheleznykh dorog* (1903–16) and *Vestnik Ekaterininskoi zheleznoi dorogi* (1907–16) dealt with railway construction; *Listok inzhenernogo kruzhka* (1901–12) dealt with civil engineering.

Ukrainian-language technical journals appeared under the Soviet regime in the 1920s. The most important was the monthly *Naukovo-tekhnichnyi visnyk* (1926–36), published by the *Kharkiv Scientific Society. Its specialized supplements eventually became separate journals: *Problemy teplotekhniki* (1927–31), *Sil's'kohospodars'ka mashyna* (1928–38), *Ukrains'ki sylykaty* (1929–32), *Budivnytstvo* (1929–35), and *Kharchova ta sil's'kohospodars'ka promyslovist'* (1930–4). In the late 1920s a number of technical research institutions, such as the Kiev Polytechnical Institute, the Institute of Technical Mechanics, and the Kharkiv Technological Institute, published their own transactions, and collections of papers were issued at irregular intervals by the Institute of Welding (40 vols in 1932–9), the Institute of Chemical Technology (13 vols in 1929–39), and the Institute of Chemistry (9 vols in 1934–48). With the suppression of Ukrainian culture, Ukrainian journals were

discontinued gradually in the 1930s, and Russian technical journals, such as *Energetika* (1930–7), *Novyi gorniak* (1929–41), *Stal'* (1931–40), and *Koks i khimiia* (1931–41), were started. A few popular magazines were published in Ukrainian (*Tekhnika masam*, 1929–37, and *Radio*, 1930–41) or Russian (*Rabochii metallurg*, 1931–5). During the 1930s, besides journals and collections, a number of technical books came out in Ukrainian. Whereas Ukrainian publishers in the social sciences were completely dismantled in 1934–9, those in technical fields and some in mathematics and the natural sciences were left untouched until 1948. During the Zhdanov period practically all technical publications in Ukraine were converted to Russian.

Ukrainian-language technical journals began to come out again only in the 1950s. The AN URSR (now ANU) published *Avtomatika*, *Prykladna mekhanika*, and *Narysy z istorii tekhniky*. Many irregular collections by technical institutes appeared, mostly in Ukrainian. In the mid-1960s, interdepartmental republican collections began to appear regularly, of which about 50 series were devoted to technology. Only a few of them came out in Ukrainian: *Detali mashyn*, *Mekhanika tverdoho tila*, *Pidiomno-transportne ustakuvannia*, and *Hihiena naselennykh mist'*. In the 1970s there were *Avtomobil'ni shliakhy i shliakhove budivnytstvo*, *Nauka i tekhnika v mis'komu hospodarstvi*, *Polihrafiia i vydavnycha sprava*, and certain series of the *Visnyk* of the Lviv and Kiev polytechnical institutes (up to eight issues annually). By the end of 1977 the only Ukrainian-language technical journal in Ukraine was *Avtomatika*.

After 1978 only the bimonthly *Narysy z istorii pryrodovoznavstva i tekhniky* has appeared in Ukrainian. About 30 technical journals published in Ukraine have come out in Russian, including *Tekhnologii i organizatsiia proizvodstva*, *Energetika i elektrifikatsiia*, *Mekhanizatsiia i avtomatizatsiia upravleniia*, *Ugol' Ukrainy*, *Iskusstvennye almazy*, *Kibernetika*, *Radioelektronika*, *Problemy prochnosti*, *Upravliaiushchie sistemy i mashyny*, *Prikladnaia mekhanika*, *Poroshkovaia metallurgiiia*, *Stroitel'stvo i arkhitektura*, and *Fiziko-khimicheskaia mekhanika materialov*. The scientific level of the technical journals published in Ukraine is high, and some of the thematic collections of the 1970s are unequaled, among them *Mekhanika tverdoho tela* (on the mechanics of solids), *Tochnost' i nadezhnost' kiberneticheskikh sistem* (on cybernetics systems), *Problemy mashinostroeniia* (on machine building), *Teoriia sluchainykh protsessov*, *Kibernetika na morskoi transporte* (on naval cybernetics), *Ergaticheskie dinamicheskie sistemy upravleniia*, and *Narysy z istorii pryrodovoznavstva i tekhniky* (on natural and technological history).

Outside of the Ukrainian SSR the most important Ukrainian technical journal was **Tekhnichni visty*, published in Lviv in the interwar period. In Czechoslovakia the *Ukrainian Technical and Husbandry Institute published *Visty UTHI*, and after the war the institute published *Visti* and *Biuletyn'*. In the United States the *Ukrainian Engineers' Society has published *Visti ukrains'kyh inzheneriv* since 1950.

S. Protsiuk

Technical schools (*tekhnichni uchylshcha*). Educational establishments founded in 1954 in the USSR and the Ukrainian SSR. Only students with a complete secondary education were eligible for admission to the schools. The mandate of the technical schools was to train skilled workers in some 600 professions, from all branches of the economy. In 1959–64 they existed within the network of urban

and rural *vocational-technical schools. In 1966 technical schools were established in large industrial and construction enterprises, state farms, and other organizations. Technical schools had a program of study that varied from one to three years. In 1984 there were 242 technical schools in Ukraine, with an enrollment of 146,000.

Techno-Artistic Group A (*Tekhnomystetska hrupa A*). A writers' group in Kharkiv, founded by M. *Yohansen in 1928. Like the Russian constructivists, Yohansen and the group's other members, among them Yu. Smolych, L. Kovaliv, O. Dovzhenko, and O. Slisarenko, sought to combine art and literature with the achievements of technology and industrialization. The group ceased functioning ca 1930 and had little impact.

Technological sciences. A group of disciplines including the traditional branches of engineering and agricultural sciences and the modern fields of space, computers, and automation. The technological sciences are related closely to the natural sciences of physics, chemistry, geology, and biology, as well as to mathematics and practical engineering. They draw upon scientific knowledge to solve technological problems.

In Ukraine technological research for scientific purposes began at the end of the 18th century. During the 19th and the early 20th centuries researchers focused on improving the technology of metals production, machine building, and mining. Until the First World War the technological sciences developed mostly in higher schools, such as Kiev and Kharkiv universities, the Kharkiv Technological and the Kiev and Lviv polytechnical institutes, and the Katerynoslav (later Dnipropetrovske) Mining Institute. After the imposition of Soviet rule progress in the technological sciences became a priority. From the mid-1930s the Soviet government's science policy favored the technological sector.

Research institutes in the technological sciences were frequently reorganized. They were consolidated or separated and transferred from the control of the people's commissariats to the Academy of Sciences and back. In the 1920s and 1930s most of them came under the jurisdiction of Ukrainian republican centers. Ukrainian scientists achieved significant success in their research, and Ukraine's contribution in technological sciences won increasing recognition around the world. The technological sciences in Ukraine suffered irredeemable setbacks with the Stalinist terror, the increasing bureaucratization and centralization of the Soviet system, and the Second World War. Postwar reconstruction required more time than expected; it lasted in some respects until the mid-1950s.

New institutes were set up in the 1960s and 1970s. Besides traditional branches of the technical sciences, new ones were instituted, in cybernetics, nuclear and power engineering, radio communications, space engineering, aeronautical engineering, high-temperature (plasma) and low-temperature (cryogenics) technologies, materials science, and the chemistry of giant molecules. At the end of 1973 approx 200 of 348 scientific research institutes in Ukraine belonged to different branches of industry. Almost all technological institutes were tied to industries, and 62 belonged to the institutional system of the AN URSR (now ANU). In 1977 approx 105,000 of 178,000 scientific personnel in Ukraine worked in the technological sciences. Owing to the policy of Russification nearly all the

*technical journals were published in Russian. (See also *Agricultural machine building, *Agricultural technology, *Construction industry, *Cybernetics, *Electric power, *Hydrology, *Machine science, *Materials science, *Mechanics, *Metallurgy, *Mining science, *Radio technology, *Rocket, *Space travel, *Structural mechanics, and *Welding.)

S. Protsiuk, A. Zhukovsky

Teisseyre, Wawrzyniec, b 10 August 1860 in Cracow, d 2 April 1939 in Lviv. Geologist. From 1925 he served as a professor at the Lviv Polytechnical Institute and conducted oil explorations in Galicia and Rumania. His works deal with the tectonic formations of the Carpathian Mountains, Subcarpathia, and Podilia. They include a geological atlas of Galicia (1900).

Tekhnichni visty (Technical News). A journal of the *Ukrainian Technical Society in Lviv, published from 1925 to 1939. It came out monthly (1925–6, 1937–9), quarterly (1927–30, 1935–6), and bimonthly (1931–4). Its editors were Ya. Stefanovych (1925–30), I. Kondiak (1930–2), S. Pasternak (1932–8), and A. Figol (1938–9). The journal was distributed to the society's members throughout Western Ukraine and the diaspora; it was discontinued with the Soviet occupation.

Tekhnikum. The name given to educational institutions in the USSR, in the Ukrainian SSR, and now in Ukraine which train personnel for industry, agriculture, construction, transport, and communication by offering a program of *secondary special education. The first institutions called tekhnikums appeared in Russian-ruled Ukraine at the beginning of the 20th century. Their equivalent in Western Ukraine could be considered to be the technical *lyceums. In 1922–30 in Soviet Ukraine, unlike in Russia, tekhnikums had the status of institutions of higher education and trained specialists in various narrow technical fields.

During the 1920s tekhnikums were Ukrainized. Whereas in 1922 only 16 percent of the students in these institutions were Ukrainians, by 1928 the figure had risen to 62 percent. In 1928 there were 145 tekhnikums in Ukraine, 80 of which offered Ukrainian-language instruction. In 1931 tekhnikums in Ukraine were reorganized along Russian lines into secondary schools offering vocational education, and the Ukrainization was reversed, in favor of Russian-language instruction. With industrialization the network of tekhnikums expanded, from 165 schools and 89,000 students in 1932 to 693 schools and 196,200 students in 1940. Tekhnikums were under the jurisdiction of various industrial commissariats. Today the program of study can last up to three years for those with complete secondary education, and up to four for those entering with eight years of schooling. Students gain practical work experience and can enroll for full- or part-time study. In 1990–1 there were 742 tekhnikums in Ukraine, with 757,000 students.

B. Krawchenko

Telegraph communications. The transmission of encoded messages by electric impulses. The first telegraph line in Ukraine was built in 1838; it linked St Petersburg and Warsaw through Kiev. In the 1840s a telegraph line between Lviv and Vienna was established. In 1854 the

Kiev-Moscow line was opened. In the 20th century the telegraph network in Ukraine developed rapidly. In 1913 some 9.2 million telegrams were sent (within the present boundaries of Ukraine). In 1928 the figure was 4.5 million; in 1932, 15.6 million; in 1940, 23.3 million; and in 1970, 58.0 million. Reliance on the telegraph declined as telephones became more available: the number of telegrams decreased from 84 million in 1980 to 70 million in 1987. But the number remains higher in Ukraine than in the developed Western countries, where telephone and facsimile transmission have all but supplanted telegraph communications.

Telephone communications. The transmission of speech by electrical impulses. In 1880 G. Ignatev successfully tested a system of simultaneous telegraph and telephone transmission in Kiev. The first telephone lines in Ukraine were laid in Odessa (1882), Lviv (1884), Kiev (1886), and Kharkiv (1888). The first intercity communications were established between Odessa and Mykolaiv and between Kharkiv and Katerynoslav (1910–12). The first rural line was built in Lebedyn county, Kharkiv gubernia. In the 1920s direct lines were laid between Kharkiv and Petrograd, Moscow and Katerynoslav, and Kharkiv and Kiev.

The number of intercity telephone calls in the Ukrainian SSR increased from 3.7 million in 1928 to 19.1 million in 1940 and 567 million in 1988. Telephone ownership expanded from 187,000 in 1940 to 6 million in 1987. Most telephones (85 percent in 1988) are located in urban centers; the rural areas have inadequate service. Only 4.1 million telephones are in private homes. Ukraine, like other former Soviet republics, lags far behind Western countries in per capita telephone ownership; in the United States, for example, there were 90 telephones per 100 people, compared to 10 in the former USSR (1988). The quality of telephone service in Ukraine is poor, and the equipment is outdated. The lack of a modern telephone network has prevented the society from entering the information age and hampered the development of the economy.

D. Goshko, B. Krawchenko

Teleshok, Kyrilo [Teleşek], b 31 March 1894 in Kozelshchyna, Kremenchuk county, Poltava gubernia, d 7 August 1974 in Kharkiv. Economist. A graduate of the Kharkiv Institute of the National Economy (1928), he taught in various higher educational institutions. He was assistant director of the Kharkiv Zootechnical Institute and from 1945 chaired the Department of Economics and Agricultural Administration at the Kharkiv Agricultural Institute. His works on Ukrainian agriculture include *Problema sil's'ko-hospodars'koho osvoiennia Nyzhn'odni-provs'kykh piskiv* (The Problem of Agricultural Reclamation of the Lower Dnieper Sands, 1948).

Television. In the 1920s P. *Hrabovsky's son, Borys, experimented with electronic transmission of images over space, and in 1928 he demonstrated a crude transmission in Tashkent. The unsophisticated state of the Soviet electronic industry at the time left Hrabovsky's invention unutilized. The first television broadcast in Ukraine was a short telecast in Kiev in 1939, which was based on the so-called mechanical system. The transmission lasted 40 minutes and consisted of televised portraits and signs. The first television center was built in Kiev only in 1949. The

first telecasts made with high-clarity pictures appeared in Kiev in 1951 and in Kharkiv in 1955. The television network spread to the Donetsk and Odessa oblasts (1956), Lviv (1957), Dnipropetrovske and Luhanske (1958), Symferopil, Kherson, Zaporizhia, and Mykolaiv (1959), and, later, Sumy, Chernivtsi, and Uzhhorod. Since 1962 television programs have been retransmitted from Kiev to Chernihiv, Zhytomyr, Bila Tserkva, Pryluka, Vinnytsia, and other cities in Ukraine. In 1962 a second channel was added, from Moscow. A unified 'Ukrainian' program began to be telecast in 1965 and was limited to 200 broadcast hours weekly. In 1968 telecenters in Ukraine began to receive color telecasts from other centers, and in 1969 the Kiev telecenter began its own color broadcasts (Lviv in 1976). All telecasting is done through a comprehensive common-carrier network consisting of centers, studios, and retransmission stations using relay systems (eg, Kiev with Kishinev) or cable (eg, Kiev and Lviv). In 1975 a powerful telecommunications terminal outside Lviv became a part of the international telesystem Intelcat.

More than 90 percent of the population can receive two-channel programming. Kiev has had four channels since 1982, with 60 hours of broadcasting per day. In 1991 there were more than 15 million television sets, of which more than half were color sets. Only some programs on oblast and republic levels were in Ukrainian; most were in Russian, and many of them were broadcast directly from Moscow (or prepared in Ukraine but approved by the State Committee), the role of Ukrainian television having been quite insignificant. Republic and oblast broadcasts included local informative reports and propaganda but mostly consisted of entertainment of different genres: musical films, film concerts, teledrama, and tele-almanacs, including performances of the Kiev Ukrainian Drama Theater, the Lviv Ukrainian Drama Theater, and the Kiev Young Spectator's Theater. The majority were produced by Ukrtefilm, the Kiev Artistic Film Studio, and the Odessa Studio of Chronicle-Documentary Films.

Television sets are manufactured by plants in Kiev, Lviv, Symferopil, Dnipropetrovske, and Kharkiv and distributed throughout the former USSR and abroad. In 1988 there were 350 television stations in Ukraine, and 306 television sets for every 1,000 inhabitants.

V. Revutsky, D.H. Struk

Teliha, Mykhailo, b 1900 in Okhtyrskyyi, Kuban oblast, d February 1942 in Kiev. Civic activist and banduryst; husband of O. *Teliha. He took part in the struggle for Ukrainian independence in 1917-20 and then emigrated to Czechoslovakia. In 1929 he moved to Warsaw. A forester by profession, he was active in the Union of Ukrainian Emigrant Engineers and Technicians in Poland. Toward the end of 1941 he accompanied his wife, a member of an OUN expeditionary group, to Kiev, and he was arrested with her by the Gestapo on 9 February 1942. He was executed a few days later in prison.

Mykhailo Teliha

Olena Teliha

Teliha, Olena b 21 July 1907 in St Petersburg, Russia, d 21 February 1942 in Kiev. Poet, publicist, and nationalist leader; daughter of I. *Shovheniv. Teliha emigrated with her parents to Czechoslovakia in 1922, where she studied at the Ukrainian Higher Pedagogical Institute in Prague. The intellectual milieu of the Ukrainian émigrés after the failure of the struggle for Ukraine's independence and especially the Ukrainian student life in Prague in the 1930s had a profound influence on Teliha's development. She married M. *Teliha and moved to Warsaw (1929-39), where she taught at a Ukrainian school and was active in the Ukrainian community. From 1933 she contributed to the nationalist journal **Vistnyk* (Lviv). In Cracow from 1939 to 1941, she headed the literary-artistic society Zarevo and together with O. *Olzhych worked in the cultural sector of the Leadership of Ukrainian Nationalists (see *Organization of Ukrainian Nationalists). With the outbreak of the war between Nazi Germany and the Soviet Union she moved to Lviv and then left with the *OUN expeditionary groups for Kiev in 1941. There she became head of the Writers' Union and editor of the literary weekly **Litavry*. When the Nazi regime closed down *Litavry's* parent newspaper, *Ukraïns'ke slovo*, and replaced it with the pro-regime *Nove Ukraïns'ke slovo*, Teliha refused to cooperate. She was arrested by the Gestapo and shot, together with other Ukrainian nationalists.

Teliha's poems were published mainly in the nationalist *Vistnyk* and were collected posthumously in *Dusha na storozhi* (The Soul on Guard, 1946). That collection was augmented by her prose and republished as *Prapory dukha* (The Banners of the Spirit, 1947), and then *Olena Teliha: Zbirnyk* (Olena Teliha: Collection, 1977). Her poems also appeared in English, translated and edited by O. Prokopiv, as *Boundaries of Flame* (1977). Firmly rooted in the nationalistic poetry of the interwar period, her lyrical poetry draws strength more from sincerity than from formal sophistication and reflects the oxymoron of 'soft firmness' that Teliha espoused for the contemporary Ukrainian woman, whom she saw as integral to and an equal partner in the struggle for Ukraine's independence. In February 1992 a cross was erected to her memory in *Babyn Yar in Kiev.

O. Shtul, D.H. Struk

Telishevsky, Kostiantyn [Teliševs'kyj, Kostjantyn], b 1851, d 1913. Civic and political activist in Galicia. A notary public in Turka, he served as a deputy in the Galician Diet (1889–95) and the Austrian parliament (1891–7). He was one of the advocates of the *New Era policy.

Telizhyn, Daria [Teližyn, Darija], b 31 March 1960 in Toronto. Pianist and educator; daughter of O. Telizhyn. A graduate of the University of Western Ontario and the Peabody Conservatory of Music, she has appeared in recital in Toronto, London, Paris, Brussels, Amsterdam, Frankfurt, and Washington. The British recording company Claudio Records has released CDs of her renditions of works by F. Liszt and P. Tchaikovsky. She is on faculty at the Levine School of Music, Washington.

Telizhyn, Omelian [Teližyn, Omeljan] (Telizyn, Emil), b 18 January 1930 in Rakiv, Dolyna county, Galicia. Painter, sculptor, and scenery designer. A postwar refugee, he studied at the Ukrainian Art Studio in Aschaffenburg, Germany (1947–9), and at the Ontario College of Art in Toronto. From 1965 to 1987 he worked for the CFTO and CBC television stations in Toronto as a designer. A member of the amateur Zahrava Theater troupe in Toronto since 1953, in 1987 he established his own design company. As a commercial artist he has produced many enamels, bronzes, and paintings.

Stanislav Telniuk

Telniuk, Stanislav [Tel'njuk], b 26 April 1935 in Iskrivka, Yakymivka raion, Zaporizhia oblast, d 2 September 1990. Writer, literary critic, book editor, and translator. He graduated from Kiev University in 1959. He worked as an editor of *Literaturna Ukraïna* (1962–6) and as secretary of the Literary Criticism and Theory Commission of the Writers' Union of Ukraine. He wrote the poetry collections *Lehenda pro budni* (Legend of Workdays, 1963), *Zalizniaky* (The Zalizniaks, 1966), *Opiivnichne* (Around Midnight, 1972), *Lehenda pro tr'okh sester* (Legend of Three Sisters, 1972), *Robota* (Work, 1976), *Doloni svitu* (Palms of the World, 1983), *Myt'* (Moment, 1985), and *Suzir'ia liubovi* (Constellation of Love, 1987); the novelettes *Tudy, de sontse skhodyt'* (There, Where the Sun Rises, 1967) and *Pavlo z Mukunhy* (Paul from Mukunga, 1981); and the prose collection *Bilyi kamin'* (White Rock, 1984). The second part of his best-selling novel set in Cossack times, *Hraie synie more* (The Blue Sea Roars, 1971), was unpublished, for political reasons, until 1985, when it appeared under the title *Strily*

nad stepom (Arrows above the Steppe). Telniuk published three books (1968, 1974, 1989) and a biographical novel (1979) about P. Tychna and translated into Ukrainian the novel *Taras na Arali* (Taras [Shevchenko in Exile] near Lake Aral, 1975) by the Karakalpak author U. Bekbulov. Together with L. Horlach he wrote in Russian three documentary books about Siberia and the Far East. In the 1960s his satirical poems about Russification were circulated in samvydav. His poems and stories have been translated into 14 languages.

R. Senkus

Tema (Theme). An official publication of the Saskatchewan Teachers of Ukrainian (a special subject council of the Saskatchewan Teachers' Federation), published quarterly since 1968. *Tema* includes articles of professional interest about Ukrainian language education and multicultural issues; reviews of multimedia resource materials, teaching strategies, and classroom activities; and items of general interest to teachers of Ukrainian. The journal's editors have included C. Kachkowski, G. Zerebecky, S. (Cipywnyk) Morris, N. Labiuk, R. Franko, V. Labach, and N. Prokopchuk.

Ludmilla Temertey: monument in Edmonton to the victims of the 1932–3 famine in Soviet Ukraine

Temertey, Ludmilla [Temertej, Ljudmyla], b 21 August 1944 in Košice, Slovakia. Ukrainian-Canadian painter. From 1962 to 1969 she studied at Sir George Williams School of Fine Arts and the School of Fine Arts in Montreal, and the Royal Academy of Fine Arts in Brussels. She has worked as an illustrator for Canadian magazines and as associate art director of *Chatelaine* magazine. Solo exhibitions of her work have been held in Montreal (1974, 1978) Toronto (1975, 1982) Detroit (1976), Ottawa (1977), Edmonton (1977), the Ukrainian Cultural Heritage Village in Alberta (1981), and Philadelphia (1983). Commissioned portraits constitute a major part of her work. Her paintings can be found at the Museum of Civilization in Ottawa and the Kiev Museum of Ukrainian Art. Temertey designed the monument to the 1933 famine in Ukraine erected in front of Edmonton's city hall in 1983. She has also done colored-pencil drawings, temperas, and pastels noted for their delicate lines and shading. Many depict a beautiful female figure dressed in an embroidered Ukrainian costume.

Temnytsky, Omelian (Milon) [Temnyc'kyj, Omeljan], b 1882 in Husiatyn county, Galicia, d 14 August 1918 in Odessa. Civic and political figure; brother of V. *Temnytsky. He was a Galician political activist involved with the Ukrainian Social Democratic party and a contributor to several newspapers (*Volia, Zemlia i volia, Vpered,* and *Naprzód*) until he was arrested and sent to Siberia by invading Russian forces in 1915. With the outbreak of the revolution he escaped to Odessa, where he was editor of the daily newspaper *Vistnyk Odesy*, a financial commissioner and fellow of the city council, and head of the local Ukrainian Social Democratic Workers' party.

Volodymyr Temnytsky

Temnytsky, Volodymyr [Temnyc'kyj], b 1879 in Shydlyvtsi, Husiatyn county, Galicia, d 26 January 1938 in Lviv. Lawyer, journalist, and civic and political leader. He studied law at Lviv University and, after the secession of Ukrainian students in 1902, at Cracow and Vienna universities. He was one of the organizers of the 1902 peasant strike in Galicia. A lifelong member of the *Ukrainian Social Democratic party (USDP), he served as its leader in 1914–21. During the First World War he was a member of the Combat Board of the Ukrainian Sich Riflemen and of the Supreme Ukrainian Council in Vienna and collaborated with the Union for the Liberation of Ukraine. He was appointed deputy minister of foreign affairs in the UNR Council of National Ministers in December 1918 and minister of foreign affairs in April 1919. From May 1919 he coordinated the efforts of UNR diplomatic missions in Europe to gain recognition and military support for the UNR. After returning to Galicia in 1922, he resumed his political activities. Together with L. Hankevych he attempted to revive the USDP in the 1930s. He also contributed political articles to various Galician papers and was a member of the Lviv City Council.

Temperance movement. An organized effort to secure complete abstention from alcoholic beverages or to ensure moderation in their use. The late 18th and early 19th centuries witnessed an increasing interest in North America and Europe in problems connected with the abuse of alcohol. Moves to promote temperance spread from the United States to Ireland, where the earliest temperance organization in Europe was founded in 1818. It and other temperance societies provided models for subsequent Ukrainian activities. Their characteristic features included the identification of distilled spirits as a prime enemy and the voluntary pledging of temperance or abstinence by members. Leadership was usually provided by the clergy.

Western Ukraine. The earliest Ukrainian temperance movement was begun in Galicia in the 1840s. Modeled on Irish temperance missions and societies, it was part of a wider sobriety campaign supported by the Catholic church in many parts of Europe. The sobriety movement of the 1840s was under the patronage of the governor of Galicia and had the full support of Metropolitan M. Levytsky. Many village and town sobriety brotherhoods were formed at that time, their purpose more to foster moderation than to bring about abstinence. By the 1850s, however, the movement had faltered.

The impetus for the movement's revival was provided by the publication in 1869 of Rev S. *Kachala's pamphlet *Shcho nas hubyt' i shcho nam pomochy mozhe* (What Is Destroying Us and What Can Help Us) and by two pastoral letters from Metropolitan Y. Sembratovych in 1874 on the harmful effects of alcohol and the need for sobriety missions. Priests began to encourage temperance from their pulpits, and the best orators from among the clergy went among the general population and proclaimed the sobriety message. Their activity gave rise to an upsurge in missions, the goal of which was the establishment of sobriety brotherhoods. Those largely religious events tended to follow a definite pattern. They lasted several days and included religious services, special homilies rich in appropriate imagery, and prayers led by the most talented missionary priests. The focal moment was the taking of the vow to abstain from alcohol or from the use of distilled spirits. Total abstinence was usually the goal in the 1870s and 1880s. People who took the vow solemnly signed their names (or made their marks) in a 'golden book.' The statute of the brotherhood was then read. Typically that document would give the name of the brotherhood and of the parish with which it was connected, and stipulate the need for a monthly brotherhood service and a festive but nonalcoholic brotherhood celebration every six months. Between the monthly services each member was to observe the behavior of the others and to encourage them to keep to their oaths. A prayer for the brotherhood ended the mission. Special crosses were often erected afterward to commemorate sobriety missions. The *Prosvita and *Kachkovsky societies contributed further to the spread of sobriety through the provision of temperance literature and the engagement of occasional speakers on the topic.

The Greek Catholic church wished to retain control over the temperance movement in eastern Galicia. In 1886 the consistory systematized the operations of church sobriety brotherhoods, which were required to send periodic reports to a special consistory commission. In 1895 a pastoral letter of Metropolitan S. Sembratovych reformulated the regulations for the brotherhoods: the priest was the true head of each brotherhood, and only he had the right to accept new members into it; vows were to be binding either for life or for a specified period; breaking a vow was a venial, not a mortal, sin and could be cause for expulsion from the brotherhood; except for those on military service, release from vows could be obtained only from the ordinariate; drinking distilled spirits for medicinal purposes was permitted; and there were to be special certificates and prayers for members of such 'canonical' brotherhoods.

There are many indications that the temperance movement of the 1870s and 1880s was effective. The fact that women were permitted to join the sobriety brotherhoods may well have boosted their prospects. By 1888 three-

quarters of all Greek Catholic parishes in Galicia had temperance brotherhoods. In some instances membership was very large, and even encompassed all the adults in a community. The Terebovlia deanery alone had 13,353 members. The number of taverns decreased. Some brotherhoods forswore alcohol altogether; in others the vow specified distilled spirits, and the people drank beer, mead, and homemade fruit wines, or tea with rum, instead of vodka. In 1894 Prof N. Cybulski of Cracow University concluded that there had been a definite decline in the consumption of vodka, and that in some counties of eastern Galicia one-third or even one-half of the people did not drink vodka at all.

The number of church-related sobriety brotherhoods remained fairly constant into the 20th century. Not until after Galicia fell under the rule of the new Polish state were the ties with the church markedly weakened. New secular temperance associations emerged in the 1920s. The most prominent was the *Vidrodzhennia (Rebirth) society, headed by the physician and writer S. Parfanovych in the later 1920s. Intellectual leaders and students contributed significantly to the interwar temperance campaigns by encouraging thrift and highlighting the amounts of money spent on alcohol as well as promoting the playing of sports as a substitute for drinking. For reasons that are not entirely clear the campaigns were not as effective as those prior to the First World War.

Central and eastern Ukraine. A widespread temperance movement never developed in Russian-ruled Ukraine, and those efforts that existed were usually either localized or part of a broader campaign in the Russian Empire or the Soviet Union. In the mid-19th century the Europe-wide temperance movement began to have a minor influence in Ukraine, where it resulted in the establishment of some private, church-supported sobriety brotherhoods. Particularly from the 1870s on, the drinking of tea instead of vodka was encouraged by concerned private citizens. Not until excessive drinking by the working population of the empire had started to become an obvious impediment to industrial development did the imperial government begin to concern itself with temperance, in the 1890s. A state monopoly on liquor production and sale was proclaimed in 1894; by 1901 it was in force throughout the empire, including Ukrainian lands. The government also gave financial support to temperance societies called Wardens of Public Sobriety. Those efforts, however, failed to produce a decline in the per capita consumption of alcohol.

In 1897 a group of medical and social scientists in St Petersburg, concerned with problems stemming from the overconsumption of alcohol, founded the Russian Society for the Protection of Public Health. The society provided a focal point for the establishment of the special Commission on the Question of Alcoholism, the printing of the periodical *Trezvost' i berezhlivost'*, and petitions to the government for socioeconomic reforms to combat drunkenness. In turn, the government established a department in the Ministry of Finance popularly known as the Guardianship of Public Sobriety, which was largely ineffectual and was regarded as suspect by the general public. An Anti-Alcohol Commission was established by the First State Duma. Partly because of differences in approach between scientists and politicians no effective temperance legislation was enacted. The scientists convened a national congress in St Petersburg in December 1909, to which

reform-minded persons (but no government representatives) were invited. Although the congress drew attention to much-needed reforms in housing, education, and labor conditions, the government in 1912 proceeded with restrictive legislation that aimed to reduce production and increase the price of alcohol. From 1911 on, however, the tsarist authorities provided some financial assistance to certain temperance activities, especially those supported by the Holy Synod and the Ministry of Public Education. Existing church temperance societies were reorganized and expanded. With the outbreak of war in 1914, total prohibition was introduced, initially for the period of mobilization, but soon it was extended for the duration of the war. In theory the measure brought compulsory temperance to all lands in the Russian Empire, but it is clear that from 1915 on there was much illicit drinking.

The Soviet period. In 1918 the Bolshevik regime established a ban on the manufacture and sale of alcoholic beverages. The prohibition was difficult to enforce. New measures in 1925 reintroduced a state monopoly on the production and sale of alcohol. The All-Union Council of Anti-Alcohol Societies co-ordinated temperance activities in the Soviet Union until it was disbanded in 1930. Women's groups also organized lectures on the harmful effects of alcohol during the 1920s. From 1930 until 1971 state and party bodies, and state medical personnel, were responsible for anti-alcohol propaganda. Cultural-educational measures were undertaken, without any obvious central co-ordination, by workers' clubs, reading halls, women's groups, the Communist Youth League, and the media.

Alcohol consumption increased after 1945, and there was an attendant rise in alcohol-related illness, birth defects, deaths, and crime and a lowering of labor productivity, all of which drew attention again to the need for enhanced temperance activities. A decree of the Supreme Soviet in 1972 to combat drunkenness produced little change. By 1980 it was estimated that each person over the age of 15 in the Soviet Union consumed, on average, 16–17 L of pure alcohol annually. Two CPSU general secretaries, Yu. Andropov and M. Gorbachev, demonstrated considerable concern about alcohol abuse. Gorbachev's efforts had their counterpart in the Ukrainian SSR with the 1985 decree 'On Measures to Step Up the Struggle against Drunkenness and Alcoholism and to Eradicate Home Brewing.' It was a serious anti-alcohol campaign, in which leading roles in promoting temperance and abstinence were to be played by Communist party and Communist Youth League members, who were also to serve as examples to others. An All-Union Voluntary Temperance society was created; it had its own press organ, *Trezvost' i kul'tura* (Sobriety and Culture), the first issue of which appeared in January 1986. Reduced production of alcohol, restrictions on its sale, and educational and preventative programs were other aspects of the government-initiated temperance campaign. From the state's point of view the results were disappointing, for there was widespread resentment, passive resistance, and a significant increase in home distilling. In 1989 the campaign was quietly and unofficially brought to an end.

S. Hryniuk

Temriuk [Temrjuk]. VIII-18. A city (1979 pop 31,900) on the Kuban River near the Sea of Azov and a raion center in Krasnodar krai, RF. It was founded in the mid-19th century. Today it has a seaport 4 km away and a food industry. According to the census of 1926, Ukrainians accounted for 26.2 percent of the city's population and 71.9 percent of the raion's population.

Temriuk Bay [Temrjuc'ka zatoka]. VIII-18. A bay situated in the southeastern part of the Sea of Azov near the mouth of the Kuban River. The bay is 60 km wide at its entrance, 27 km long, and nearly 10 m deep. Near the shore the water is quite shallow and overgrown with reeds. The bay is connected to the Kurchanskyi and the Akhtanyzovskyyi estuaries. It freezes over from mid-January to March. The city of Temriuk is located by the bay.

Borys Ten

Borys Teneta

Ten, Borys (pseud of Mykola Khomychevsky), b 9 December 1897 in Derman, now Ustenske Druhe, Zdolbuniv raion, Rivne oblast, d 13 March 1983 in Zhytomyr. Poet and translator. His first published work appeared in 1923. He wrote a collection of sonnets, *Zoriani sady* (Starry Orchards, 1970), but he is known primarily for his translations of classical texts, such as Homer's *Iliad* and *Odyssey* and the works of Aeschylus, Aristophanes, and Aristotle. He also translated works by W. Shakespeare, F. Schiller, A. Mickiewicz, A. Pushkin, and L. Tolstoy. He was one of the leading translators of the middle and late 20th century, and he contributed greatly to the enrichment of Ukrainian cultural expression and the Ukrainian lexicon.

Tendiuk, Leonid [Tendjuk], b 3 March 1931 in Volodymyrivka, Kirovohrad raion. Writer. He graduated from Kiev University (1956) and has traveled widely in the Pacific and Indian oceans as a Soviet sailor. He began publishing in 1950 and has written several poetry collections, the first being *Pole moie, polechko* (O My Field, Little Field, 1961), and the most recent, *Holos moria i stepu* (The Voice of the Sea and the Steppe, 1981); travel-sketch books based on his experiences at sea (1964, 1965, 1968); novels, including *Zemia, de pochynaiut'sia dorohy* (The Land Where Roads Begin, 1972) and *Holova Drakona* (Draco's Head, 1985); and the prose collections *Vohnyky v okeani* (Fires in the Ocean, 1974), *Dyvovyzhna ryba murena* (Moray the Odd Fish, 1977), and *Na koralyovykh atolakh* (On the Coral Atolls, 1977).

Tendriv Bay. VII-12, 13. A Black Sea bay situated off the southwestern corner of Kherson oblast. This shallow bay is nearly 45 km long, 7 km wide, and up to 6 m deep. It is set off from the Black Sea by the long Tendriv Spit and contains a number of islands. It freezes over in the winter. A section of the bay is situated within the Black Sea Nature Reserve, which is responsible for its overall maintenance.

Tendriv Spit. VII-12. A long, narrow strip of land situated off the southwestern corner of Kherson oblast in the Black Sea. The spit is nearly 65 km long and up to 1.8 km wide. It consists mainly of sand deposits and provides a sanctuary and wintering ground for birds. It also separates Tendriv Bay from the Black Sea.

Teneta, Borys (pseud of Borys Hurii), b 1903 in the Donbas, d 6 February 1935. Writer. His poetry was first published in 1924 in the journal *Chervonyi shliakh*. He contributed to the periodicals *Zoria*, *Nova hromada*, *Zhyttia i revoliutsiia*, and *Hlobus*. He was a member of the literary organization MARS and is best known for his prose, such as the collections of short stories *Lysty z Krymu* (Letters from the Crimea, 1927), *Harmoniiia i svynushnyk* (Harmony and the Pigsty, 1928), *Desiata sekunda* (The Tenth Second, 1929), *Budni* (Ordinary Days, 1930), *Nenavoyst'* (Hatred, 1930), and *P'ianytsi* (Drunkards, 1930). He was arrested in 1935, and committed suicide in prison.

Tenianko, Petro [Tenjanko], b 27 June 1884 in Sorochyntsi, Myrhorod county, Poltava gubernia, d 7 March 1957 in Winnipeg. Poet, teacher, and journalist. While teaching in Pyriatyn county he published his first poems in the almanac *Persha lastivka* (The First Swallow, 1905), in *Literaturno-naukovyi vistnyk*, and in other almanacs. His collection *Do raiu zlotosiainoho* (Toward Glittering Paradise) appeared in 1917. An interwar émigré in Poland and Czechoslovakia, he was a teaching assistant at the Ukrainian Higher Pedagogical Institute in Prague, where he received his doctorate; later he became a professor at the Ukrainian Gymnasium in Czechoslovakia. After the Second World War he emigrated to Winnipeg, where he taught theology at St Andrew's College and contributed to *Ukrains'kyi holos*.

Tenner, Hryhorii, b 13 October 1889 in Akkerman (now Bilhorod-Dnistrovskyyi), Bessarabia gubernia, d 31 October 1943 in Ufa, Bashkir ASSR. Sculptor. He studied at the St Petersburg and Munich (1914) academies of arts. From 1932 he taught at the Odessa Art Institute. A member of the Association of Revolutionary Art of Ukraine (1925-32), he sculpted the bas-reliefs on the 40-m obelisk in memory of those who died during the revolution in Katerynoslav (1919), designed the monuments to T. Shevchenko in Katerynoslav (1921) and Kharkiv (1925), created the monument to V. Lenin in Dnipropetrovske (1925), and sculpted busts of A. Herzen (1927), G. Plekhanov (1930), O. Shovkunenko (1933), and M. Skrypnyk and compositions depicting Lenin (1930), A. Pushkin (1935), and K. Marx (1935-6).

Tennis (*tenis, sytkivka*). Lawn tennis was introduced in Ukraine by British merchants, who founded tennis clubs in Odessa and Tahanrih in 1890. In 1913, all-Russian championships were held in Kiev. In the 1920s the sport

was revived in Soviet Ukraine, and exhibition games were held in Odessa. In 1930, competitions for the championship of Soviet Ukraine were introduced. The USSR Tennis Section (est 1923) was reorganized into the USSR Tennis Federation in 1956, and that year it became a member of the International Tennis Federation. Ukrainian women players have won the amateur European tennis championship: M. Kroshyna (1972, 1977), O. Yelyseienko (1980, 1981), and L. Savchenko (1983). N. Medvedeva won the 1987 women's Satellite Tournament in Great Britain. Savchenko captured first place in women's doubles at Wimbledon in 1991.

Tennis was introduced in Galicia under Austrian rule, and the first clubs appeared in the 1890s. The sport was promoted by the *Sokil societies and student sports clubs. I. *Bobersky wrote the first tennis manual (1911) and the Ukraina sports society in Lviv organized the first competition in 1911. In 1924 the Lviv Tennis Club was founded; until 1939 it owned its own courts and held competitions for the championship of Western Ukraine. In the postwar United States and Canada the sport has been promoted by the Ukrainian Sports Federation of the USA and Canada, which has held annual competitions since 1955.

E. Zharsky

Ten-year school (*desiatyrychka*). The popular name given to the 10-year *secondary general-education school, established in the Ukrainian SSR in 1934. Graduation from the 10-year schools gives pupils complete secondary education and makes them eligible for entry into institutions of *higher education. As of 1986, 10-year schools are gradually being transformed into 11-year schools in connection with the extension of complete secondary education by one year.

Teodor, A. b and d ? Kievan wood engraver. From the early 1690s he engraved illustrations for the Kievan Cave Monastery Press, which were printed in the press's *Apostol* (1695), *Octoechos* (1699), and *Gospel of Christ's Passion* (1704).

Teodoro. A medieval fortified town in the Bakhchesarai region of the Crimea. The fortress was built in the 6th century, and it is possible that the town was the capital of the Gothic state or the seat of the Gothic bishops. In the 13th century, when the Tatars invaded the Crimea, Teodoro was the capital of the Gothic principality of Mangup. For two centuries it resisted Genoese and Tatar attacks. The principality remained independent until 1475, when it was destroyed by the Turks. The town of Teodoro burned down in 1592, but the fortress continued to be used as a refuge by the Tatar khans. Today only the ruins of the fortress and palace are left.

Teodorovych, Ananii [Teodorovyč, Ananij], b 16 December 1900 in Bilyn, Kovel county, Volhynia gubernia, d 3 November 1971 in Jamaica, New York. Orthodox church leader. After completing theological studies in Zhytomyr and Kamianets, he served as a parish priest in the Rivne area. A postwar refugee in Germany, he emigrated to Australia in 1948. There he helped organize the Ukrainian Autocephalous Orthodox church and served as head of the church's consistory and administrator. He died while taking part in a sobor in the United States and was buried in Sydney.

Metropolitan Ioan
Teodorovych

Teodorovych, Ioan [Teodorovyč, Joan], b 6 October 1887 in Krupets, Dubno county, Volhynia gubernia, d 3 May 1971 in Philadelphia. Orthodox metropolitan. He was ordained in 1915, during the First World War, and worked for the Red Cross on the southwestern front. In 1918 he served as divisional chaplain for the Graycoats and other units of the Army of the UNR in Kholm, Kiev, and Podilia regions. In 1920 he joined the newly formed *Ukrainian Autocephalous Orthodox church (UAOC), and in 1921 was consecrated bishop of Podilia and metropolitan by V. Lypkivsky. At the request of Orthodox Ukrainians in North America and at the behest of the All-Ukrainian Orthodox Church Council, he was sent in 1924 to the United States. In June 1924 he was elected bishop of the *Ukrainian Orthodox Church in the USA (UOC-USA), and in July 1924 he was elected bishop of the *Ukrainian Orthodox Church of Canada (UOCC; most of that church's affairs were administered by its consistory, because Teodorovych had settled in Philadelphia). In the 1930s and 1940s Teodorovych worked to unite the two major Ukrainian Orthodox jurisdictions in the United States, the UOC-USA and the *Ukrainian Orthodox Church of America (UOCA). He faced opposition from leaders of the UOCA, who questioned the canonicity of his episcopal consecration in the UAOC. In 1949 he was reconsecrated by the ex-arch of the patriarch of Alexandria in the United States, and the next year most parishes of the UOCA accepted his leadership. His negotiations with the UOCA jurisdictions were opposed by the leadership of the UOCC, however, and in 1947 he was forced to resign as bishop of that church. *U velyke nevidome* (Into the Great Unknown, 3 vols), a collection of Teodorovych's sermons, popular theological works, meditations, and fiction, was published in 1968–70.

A. Zhukovsky

Teodorovych, Mykola [Teodorovyč], b 1755 in Dubrynych, Transcarpathia, d ca 1820 in Korytniany, Transcarpathia. Greek Catholic priest, cultural and educational leader, and writer. After completing his theological studies in Vienna, he served as an administrator in Mykhailivtsi and then as parish priest in Korytniany. He wrote a handbook on home management and etiquette (1791; published 1919) and translated a Hungarian handbook on home medical care (unpublished). His account of the Korytniany parish (written in Latin) contains source material on the cultural and educational movement in Transcarpathia at the beginning of the 19th century, as

does his short autobiography, which was published in *Podkarpats'ka Rus'* in 1934.

Teodorovych, Mykola [Teodorovyč], b 1856 or 1859, d ? Historian. After graduating from the St Petersburg Theological Academy he served as a school inspector in Siedlce, Podlachia. He compiled many studies of Volhynia, particularly of its church history, and published a description of Volhynia's cities, towns, and villages (5 vols, 1840), an essay on the Orthodox and Protestant doctrines of original sin (1886), a historical and statistical description of the churches and parishes of Volhynia eparchy (5 vols [incomplete], 1888–99), an analysis of Volodymyr-Volynskyi in relation to the history of the Volhynian hierarchy (1893), and a history of the Volhynian Theological Seminary (1901).

Teodorovych, Petro [Teodorovyč] (monastic name: Pavlo), b 23 April 1894, d 1946. Basilian priest; brother of Ye. Teodorovych. After completing studies in Rome (1923) he became a professor of philosophy at the Greek Catholic Theological Seminary in Lviv (1924–5) and then head of the novitiate (1928–39) at the Krekhiv monastery and, later, hegumen of the Buchach monastery. He was arrested in 1945 after the Soviet occupation of Galicia and died the following year in a labor camp.

Rev Yefifan Teodorovych

Teodorovych, Yefifan [Teodorovyč, Jepifan] (Theodorowych, Epiphanius), b 12 May 1881 in Ivanykivka, Stanyславiv county, Galicia, d 3 February 1958 in Glencove, New York. Basilian priest; brother of P. Teodorovych. He edited the journal **Misionar* in Zhovkva (1908–12) and compiled a *Lives of the Saints* (1912) before being sent to Canada as a missionary in 1921 and then to the United States in 1927. A strong supporter of Bishop K. Bohachevsky, he edited the newspaper *Katolyts'kyi provid* (1927–32) in Chicago and later served as a parish priest there and elsewhere. Teodorovych published a collection of sermons titled *Katolyts'ke zhyttia* (Catholic Life, 2 vols, 1946, 1948).

Teodosii Pecherskyi. See Saint Theodosius of the Caves.

Teodosiia [Teodosija] (aka Feodosiia). VIII-16. A city (1990 pop 85,000) on the coast of the Black Sea in southeastern Crimea. It originated in the 6th century BC as a colony of the Greek city-state of Miletus and developed into

The Mufti-Jami Mosque (1623) in Teodosiia

an important trading center. From 355 BC it was part of the *Bosporan Kingdom. In the 4th century AD Teodosiia was sacked by the Huns, and at the end of the 6th century it was captured by the Khazars. During the second half of the 1st millennium the city had close ties with Byzantium. The Genoese established a trading post called Kaffa on Tatar-held territory in the 13th century. In 1475 it was captured by the Turks, who developed it into the largest slave market in the Crimea. The Zaporozhian Cossacks sacked Kaffa and freed the slaves in 1616, 1628, and 1675. During the Russian-Turkish War the town was captured by the Russian army, in 1771, and annexed by the Russian Empire in 1783. It reassumed its ancient name of Teodosiia, and it became a county center of Tavriia gubernia in 1802. The completion of a railway line (1892) and new port facilities (1895) stimulated economic development: the number of factories in the town increased from 13 in 1891 to 30 in 1894. By 1904 the population had reached 30,600. The main exports were grain and tobacco. Under Soviet rule Teodosiia was part of the Crimean ASSR from 1921. Its population declined from 35,400 in 1921 to 28,700 in 1926. Under the five-year plans Teodosiia developed into a manufacturing and health resort center. Most of its inhabitants are occupied in the sanatoriums, mud baths, rest homes, and children's resorts. Its industrial base consists of a tobacco factory (est 1861), a machine plant, a building-materials manufacturing complex, a furniture factory, and several food-processing plants. It has the Aivazovsky Art Gallery (est 1880) and a regional museum. Its main architectural monuments are the remaining walls and tur-

rets of the Genoese fortress (14th–15th century), a 13th- to 15th-century church, and a 17th-century mosque.

Teofipil or **Teofipol** [Teofipil' or Teofipol']. IV-7. A town smt (1986 pop 6,200) on the Polkva River and a raion center in Khmelnytskyi oblast. It was first mentioned in historical documents in 1420, as the Lithuanian fortress of Kamin. Later the town was called Chovhanskyi Kamin and Chovhan and was owned by Polish magnates. It was destroyed by the Tatars in 1593, 1618, and 1649. Its inhabitants supported B. Khmelnytsky's uprising in 1648 but were soon subjugated by the Poles. In 1740 the town was renamed after its new owner, Princess Teofilia Jabłonska. After the Second Partition of Poland in 1793, Teofipil was annexed by the Russian Empire, and became a volost center in Starokostiantyniv county, Volhynia gubernia. In the second half of the 19th century the town acquired a brewery, a potash and soap factory, and a printing press, and its trade expanded. By the end of the century its population had reached 5,000. After the First World War Teofipil became a border town in Soviet Ukraine. Today it is an agricultural center with a sugar refinery, cheese factory, farm-machinery repair shop, and brick factory and its own airport.

Teplohirske [Teplohirs'ke]. A city (1989 pop 18,900) under the jurisdiction of the Stakhanov city council in Luhanske oblast. A mining settlement, it was granted city status in 1977. It has a coal mine, a coal-enrichment plant, and a mining-equipment manufacturing plant.

Teplov, Grigorii, b 20 November 1717 in Pskov, d 30 March 1779 in St Petersburg. Russian state and cultural figure; honorary member of the Russian Academy of Sciences. He was a personal aide to and manager for K. Rozumovsky before becoming an adviser to Catherine II after she assumed power in 1762. He prepared a memorandum (ca 1763) about the 'disorders in Little Russia' which criticized political, economic, and (particularly) legal practices in the Hetmanate. He asserted that Ukraine was actually an ancient Russian area that had developed distinctive institutions and ways only because of its long period of Polish rule. His recommendation for more direct Russian rule influenced Catherine's decision to abolish the Hetmanate.

Teplyk. V-10. A town smt (1986 pop 6,100) at the junction of the Teplychka and the Ssynarka rivers and a raion center in Vinnytsia oblast. It originated in the 15th century as a fortified border settlement of the Grand Duchy of Lithuania. In 1569 it became part of the Polish Commonwealth. By the 18th century it was a small manufacturing and trading town owned by the Potocki family. Its inhabitants took part in the haidamaka uprisings of 1750 and 1768. The town was annexed by Russia in 1793 and assigned to Haisyn county in Podilia gubernia. Under the Soviet regime it became a raion center in 1923 and obtained smt status in 1956. It is an agricultural town with a powdered-skim-milk factory and a mixed-feed factory.

Teplytsky, Vasyl [Teplyc'kyj, Vasyl'], b 14 January 1902 in Avramivka, Yelysavethrad county, Kherson gubernia. Economic historian. After graduating from the Institute of Red Professors in 1936, he worked at the AN URSR (now ANU) Institute of Economics. He edited several collected

works on Ukrainian economic history and wrote many articles and the monograph *Reforma 1861 roku i ahrarni vidnosyny na Ukraïni (60–90-ti roky XIX st.)* (The Reform of 1861 and Agrarian Relations in Ukraine [1860s to 1890s], 1959).

Tereblia River [Tereblja]. A right-bank tributary of the Tysa River that flows for 91 km through Transcarpathia oblast and drains a basin area of 750 sq km. With its source at Lake Synevyr, the river is fed by streams from the southern slopes of the Gorgany Mountains. It is notable for its deep valley (up to 350 m). A section of the river is dammed and some of its water diverted, by means of a 3.6-km tunnel (built in 1949), into the adjacent Rika River through the Tereblia-Rika Hydroelectric Station.

Terebovlia

Terebovlia [Terebovlja]. IV-6. A town (1989 pop 14,700) on the Hnizna River and a raion center in Ternopil oblast. It was first mentioned in the Hypatian Chronicle under the year 1097, when it was the center of a separate principality. Then it became part of Halych and Galicia-Volhynia principalities. The town was annexed by Poland in 1349, fortified with a new castle in 1366, and granted the rights of *Magdeburg law in 1389. As a frontier town Terebovlia was subject to frequent attack and destruction by the Tatars (1453, 1498, 1508, 1516) and Turks (1675, 1688). In 1772 it was annexed by Austria. At that time its population was only 2,100. It grew slowly as a manufacturing and trading center. In 1918–19 it was briefly part of the Western Ukrainian National Republic, and then it came under Polish rule. From 1939 it was part of Soviet Ukraine. Today its industry consists of footwear, canning, and powdered-milk factories. The town's architectural monuments include the remains of the fortress, which was destroyed and rebuilt several times between the 14th and 17th centuries, the 16th-century St Nicholas's Church, and the Carmelite monastery and church (1635).

BIBLIOGRAPHY

Vynnyts'kyi, I. (ed). *Terebovel's'ka zemlia: Istorychno-memuarnyi zbirnyk* (New York–Paris–Sidney–Toronto 1968)

Terebovlia principality. A southeastern appanage principality of Kievan Rus', the capital of which was *Terebovlia. Its territories included parts of southeastern Galicia, Bukovyna, and western Podilia. It bordered on Kiev principality to the east, Zvenyhorod (later Galician) principality to the west, and parts of Volodymyr-Volynskyi, Lutske, and Peresopnytsia principalities to the north.

It was established as an appanage principality ca 1084 and was given to *Vasylko Rostyslavych (his brothers, Volodar and Riuryk, ruled Zvenyhorod and Peremyshl respectively). Vasylko extensively colonized the territories southeast of Terebovlia by employing Turkic peoples (Bereudeys, Torks, and Pechenegs), and he annexed Ponyzia, thereby securing it against nomadic raiders. Halych gained importance as a political and economic center; other important cities and fortresses included Terebovlia, Mykulyyn (now Mykulyntsi), Chern (now Chernivtsi), Vasylyv, Onut, Kuchelemyn, Bakota, Ushytsia, and Kalius. After Vasylko's death in 1124, Halych principality seceded, and by 1141 Terebovlia principality had become a part of the Principality of *Galicia-Volhynia. After the Rostyslavych dynasty died out, it was briefly an appanage principality under Iziaslav Volodymyrovych.

Terek region (Tershchyna). A historical-geographic land located in eastern Subcaucasia, between the Kuban to the west, the Stavropol region to the northwest, Dagestan to the east, and the Caucasus Mountains to the south. In a specific sense the Terek region (about 30,000 sq km) was the land of the Terek Cossack Army, which was settled mostly by Russians and Ukrainians and constitutes one of the furthest reaches of the mixed Russian-Ukrainian ethnographic territory. In a broader sense the term refers to the entire former Terek oblast (72,900 sq km).

The southern part of the Terek region is occupied by the Caucasus Mountains. North of the mountains is a belt of steppe foothills, now almost completely plowed for crops. Beyond it is the semidesert Terek-Kuma Lowland. The mountains and a narrow portion of the adjoining foothills are settled by the Caucasian mountain peoples (the Chechens, the Ingushes, the Kabardians, and the Ossetes). The remaining part of the foothills and much of the Terek-Kuma Lowland are settled by Russians and Ukrainians. Some of the eastern parts of the Terek-Kuma Lowland are settled by the peoples of Dagestan (the Avars, the Dargins, the Nogays, and the Kumyks).

The colonization of the sparsely settled steppe portions of the Terek region by Slavs began at the end of the 15th century, when runaway serfs and frontier Cossacks from Riazan (Upper Don) established themselves along the Terek River and formed the Grebensk Cossacks. The Cossacks, however, were unable to deal decisively with the local populations, and the region remained a battleground for hundreds of years. The ongoing struggle against the mountain peoples finally ended in the 1860s with their subjugation. At the same time the emancipation of the serfs in the Russian Empire (1861) brought with it a flood of Slavic settlers to the sparsely settled region, most notably from Ukraine.

According to the census of 1897 Terek oblast had a population of 934,000. Its ethnic composition was as follows: 271,000 (29 percent) Russians, 42,000 (4.5 percent) Ukrainians, 375,000 (40.2 percent) Caucasian mountain peoples, 97,000 (10.4 percent) Ossetes, 98,000 (10.5 percent) Nogays (Tatars), 12,000 (1.3 percent) Armenians, 9,000 (1 percent) Germans, and 30,000 (3.2 percent) others. Of the townships of Terek oblast Piatigorsk had the largest number of Ukrainians (25,000, or 13.8 percent). The assumption is that the census understated the number of Ukrainians because the Cossacks, who numbered 170,000 and made up 18.2 percent of the total population or 53 percent of all the 'Russians' in 1897, in fact included large numbers of

Ukrainians. The population of the Terek region grew continuously and by 1916 had reached 1,360,000 (an increase of 46 percent over 1897), among whom there were 255,000 Cossacks (18.8 percent of the population).

The history of the Terek region in 1917–20 resembles that of the Don and Kuban regions. Like the other two regions, the Terek expressed its desire for autonomy within a federated Russian republic and for close co-operation with the two other Cossack armies. Late in 1917, following the October Revolution, the newly established governments of the Terek army and the Union of the United Caucasian Mountain Peoples established a Terek-Dagestan government, with its seat in Vladikavkaz. As an opposing measure the Terek Soviet Republic within the RSFSR was established in March 1918. Ukrainians in the Terek region did not undertake any pro-Ukrainian political activity during the struggle for independence in Ukraine (1918–20).

The Soviet government split the Terek region into the predominantly Slavic Terek gubernia and the Mountain Peoples' ASSR (which was subsequently subdivided into a number of autonomous oblasts and ASSRs). During the period 1924–9 Terek gubernia was divided into Terek and Sunzha okrugs, which formed part of a much larger administrative unit known as North Caucasian krai. Terek as an administrative-territorial unit thereupon ceased to exist. The former Terek oblast now occupies the southern part of Stavropol krai and the following ARS: Kabardino-Balkaria, North Ossetia, Checheno-Ingushetia, and the northern part of Dagestan.

The Soviet administrative structure precluded the calculation of precise numbers of Ukrainians in the Terek region as given by the post-Second World War censuses. An approximation by I. Stebelsky indicates 41,300 in 1970 and 43,100 in 1979 in the ARS – about the same number as recorded for that part of the Terek region in 1926. Most of the Ukrainians now living in those areas, however, are urban and probably represent a subsequent immigration to assume administrative and industrial positions in the cities (rather than being the descendants of the earlier Ukrainian settlers). Of the 56,600 Ukrainians indicated by the 1979 census as living in Stavropol krai (53,500 in 1970), perhaps one-third (some 20,000) are concentrated in the Piatigorsk area, which was part of Terek oblast before 1920 and hence also part of the Terek region. Altogether some 60,000 Ukrainians, mostly newcomers, have been identified by the 1970 and 1979 censuses in the Terek region, only one-half the number counted in 1926.

Terekh, Oleksandr [Terex], b 8 December 1928 in Kiev. Translator. He graduated from Kiev University (1952) and has worked in Kiev as a book editor, English teacher, and section editor of *Vsesvit*. He has translated into Ukrainian R. Bradbury's *Martian Chronicles* (1962), R.M. Ballantyne's *Coral Island* (1966), J. Galsworthy's *The Forsyte Saga* (1975), J.F. Cooper's *The Deerslayer*, and other English and American works (eg. by J. Joyce, J.D. Salinger, and K. Amis).

Yosyp Terelia

Terem (cover design by Jacques Hnizdovsky)

Terelia, Yosyp [Terelja, Josyp], b 27 October 1943 in Transcarpathia. Dissident and political prisoner. He was first sentenced to four years in Uzhhorod prison in 1962. For repeated escapes or attempts at escape, in 1963, 1965, 1967, and 1969, he was sentenced to additional terms of five, seven, eight, and three years, respectively, in labor camps in the Mordovian ASSR and in the Vladimir prison near Moscow. He was 'diagnosed' as mentally ill in 1972 and incarcerated in psychiatric prisons in Berehove, Sychevka, Cheliabinsk, Vinnytsia, and Dnipropetrovske. In the camps and prisons he was brutally abused. In 1976 he wrote an open letter protesting his and other inmates' treatment to the KGB chief, Yu. Andropov, which was published as *Notes from a Madhouse* (1977) in the United States. After being released in 1980, he returned to Transcarpathia and became active in the clandestine Ukrainian Catholic church. In September 1982 he founded and headed the Initiative Group in the Defense of the Rights of the Faithful and the Church in Ukraine, for which he was sentenced to a year in prison. In 1984 he renounced his Soviet citizenship and began publishing **Khronika Katolyts'koi tserkvy na Ukraini*. He was rearrested in February 1985, and sentenced in August to seven years in labor camps in Perm oblast and five years' exile. In the spring of 1987, however, he was released, and in September allowed to emigrate to Canada with his family. In Canada he has published the journal *Khrest*.

O. Zinkevych

Terem (Tower). An irregular illustrated cultural serial published from 1962 to 1975 in Detroit by the Institute of Ukrainian Culture, and since 1979 in Warren, Michigan, by the Association for the Advancement of Ukrainian Culture. By 1990, 10 issues had appeared. The chief editor has been Yu. *Tys. Each issue of *Terem* has been devoted to a specific subject: the archeologist Ya. Pasternak (1962); postwar modernist literature (1966); the artists M. Dmytrenko (1968), J. Hnizdovsky (1975), and L. Hutsaliuk (1981); the writers B. Nyzhankivsky (1971), V. Barka (1979), Z. Tarnavsky (1982), and H. Luzhnytsky (1984); and the artist and writer S. Hordynsky (1990).

Teren, Teodor. See Yuskiv-Teren, Teodor.

Terenozhkin, Aleksei [Terenožkin, Aleksej], b 26 November 1907 in Nikolaevsk (now Pugachev), Saratov oblast, Russia, d 19 May 1981 in Kiev. Russian archeologist. A graduate of Moscow University (1930), from 1949 he headed a department of the AN URSS (now ANU) Institute of Archeology. He established a workable chronology of development in the Scythian and pre-Scythian eras. His major works include *Predskifskii period na dneprovskom Pravoberezh'e* (The Pre-Scythian Period on the Dnieper's Right Bank, 1961) and *Kimmeriitsy* (The Cimmerians, 1976); he was also an editor and coauthor of *Akheolohiia Ukrain's'koi RSR* (Archeology of the Ukrainian SSR, 3 vols, 1971–5).

Tereshchenko [Tereščenko]. A Cossack-burgher family in the Hlukhiv region that became ennobled in 1870. The founder of the line was Artem Tereshchenko (d 1873), who made a fortune during the Crimean War by supplying the army with bread and boat timber and then turned to sugar refining and other manufacturing industries. After the agrarian reform of 1861 he and his sons, Mykola, Fedir, and Semen, accumulated estates in Ukraine and Russia. By the turn of the century they owned 140,000 desiatins (approx 153,000 ha) and were among the largest landowners in the Russian Empire. In 1911–12 they also owned 10 large sugar refineries. Mykola Tereshchenko (1820–1903) and his sons, Ivan and Oleksander *Tereshchenko, were well-known patrons of the arts; Mykola was a financial supporter of the Kiev and Hlukhiv art museums, and Ivan supported the Kiev Drawing School. Mykola's collections later formed the basis of the Ukrainian and Russian art museums in Kiev. His daughter, Varvara, and her husband, B. *Khanenko, financed the Museum of Western European Art in Kiev. She also promoted artisanship and organized embroidery workshops in the Kiev region. Mykola's grandson, Mykhailo Tereshchenko (1888–1956), was a prominent figure in Russian politics. He was a member of the Fourth State Duma, chairman of the War Industry Committee in Kiev (1915–17), minister of finance (March–May 1917) and of foreign affairs (May–October 1917) in the Provisional Government, and a participant in negotiations with the Central Rada. After the October Revolution of 1917 he emigrated to Monaco.

A. Zhukovsky

Tereshchenko, Kalenyk [Tereščenko], b 11 August 1879 in Popivka, Zvenyhorodka county, Kiev gubernia, d 3 June 1969 in Zvenyhorodka, Cherkasy oblast. Sculptor. After graduating from the Shtiglits School of Technical Drawing in St Petersburg (1908) he worked in V. Beklemishev's studio (1908–14) and took part in decorating the tsar's palaces in Peterhof and Tsarskoe Selo. He designed busts for the monuments to T. Shevchenko at Shevchenko's grave in Kaniv (1923), and in Shpola (1926), Moryntsi (1927), and Kyrylivka (now Shevchenkove, 1930).

Tereshchenko, Marko [Tereščenko], b 19 January 1894 in Kovalykhka, near Smila, Cherkasy county, Kiev gubernia, d 18 August 1982 in Kharkiv. Stage and film director and actor. He completed study at the Lysenko Music and Drama School (1914) and then worked as an actor in Molodyi Teatr (1916–19), founded and led Tsentrostudiia (later the *Mykhailychenko Theater, 1921–5), and was artistic director of the Odessa Ukrainian Drama Theater (1925–7, 1929–31), the Kharkiv Theater of the Revolution

Marko Tereshchenko

Bishop Kyrylo Terletsky

(1931–5), and the Ternopil Franko Ukrainian Drama Theater (1940–1). He also worked as guest director in Kiev, Chernihiv, Poltava, and Okhtyrka theaters (1935–40). In 1927 he directed the films *Mykola Dzheria* and *Navzdohin za doleiu* (Pursuing Fate). He wrote *Mystetstvo diistva* (The Art of the Performance, 1921) and *Kriz' let chasu* (Through the Flight of Time, 1976) and taught in the Kharkiv Institute of Culture (1945–76).

Tereshchenko, Mykola [Tereščenko], b 13 September 1898 in Shcherbynivka, Zolotonosha county, Poltava gubernia, d 30 May 1966 in Kiev. Poet and translator. His first published work appeared in 1918. He belonged to Komunkult and the All-Ukrainian Association of Proletarian Writers and edited the journal **Zhyttia i revoliutsiia*. His collections of poetry include *Laboratoriia* (The Laboratory, 1924), *Kraina roboty* (The Land of Work, 1928), *Ryshtuvannia* (Scaffolding, 1930), *Poryv* (Impulse, 1932), *Poemy* (Poems, 1935), *Divchyna z Ukrainy* (A Girl from Ukraine, 1942), *Verbariasna* (The Fulsome Willow, 1943), *Uzhynok* (Reaped Grain, 1946) and *Sertse liuds'ke* (The Human Heart, 1962). He translated verse, particularly from French (J.-P. Béranger, V. Hugo, E. Poitier, L. Aragon, and others) and published the anthology *Suzir'ia frantsuz'koï poezii* (A Constellation of French Poetry, 2 vols, 1971). He also translated the works of A. Mickiewicz and of Russian and Belarusian poets.

Tereshchenko, Oleksander [Tereščenko], b 1806 in Zinkiv, Poltava gubernia, d 1865. Ethnographer and archeologist. He was an associate of the Russian Imperial Archeological Commission and a collector of ethnographic materials. His chief works, *Byt russkogo naroda* (The Folkways of the Russian People, 1848) and *Ocherki Novorossiiskogo kraia* (Sketches of New Russia, 1854), contain much information about Ukrainians. He wrote one of the first biographies of I. *Kotliarevsky (published in *Osnova*, 2 [1861]). His study of the burial mounds and stone *baby* in Katerynoslav and Kherson gubernias was published posthumously by the Society of History and Antiquity Lovers.

Tereverko, Yurii (Heorhii), b 5 May 1888 in Vilshana Slobidka, Uman county, Kiev gubernia, d 3 February 1912 in Tbilisi, Georgia. Pilot. A pioneer in gliding (see *Soaring or gliding) in the Russian Empire, in the years 1910–12 he made numerous flights in gliders he built himself, set a flight record (1 min, 33 sec), and was the first to fly with a passenger. He died from injuries sustained in a crash.

Terletsky, Ipolit Volodymyr [Terlec'kyj] (Terlecki, Hipolit Vladimir), b 1808 in Starokostiantyniv county, Volhynia gubernia, d 17 January 1888 in Odessa. Religious and Pan-Slavist figure. A scion of a Polonized noble family in Volhynia, he studied at the Kremianets Lyceum and Vilnius University (1825–30). After being expelled with other émigrés in 1836, he settled in Montpellier, France, and became part of Prince A. Czartoryski's Hôtel Lambert circle in Paris. In 1839 Terletsky moved to Rome, where he joined the Polish Resurrectionist Order, was ordained a priest in 1842, and obtained a doctorate in theology in 1843. In 1846 and 1848 he submitted memorandums to Pope Pius IX elaborating a program for unification of the Catholic and Orthodox churches, which included a proposal for the creation of a Ukrainian patriarchate. To that end and with Pius's permission Terletsky became a Byzantine rite priest and initiated the creation of the Oriental Society for the Union of Churches (1847).

Terletsky published his anonymous historical and militant Catholic treatise *Słowo Rusina ku wszej braci szczepu słowiańskiego o rzeczach słowiańskich* (A Word of a Ruthenian to All the Brothers of the Slavic Branch about Matters Slavic, 1849). In it he developed the idea of a Slavic federation based on Christian-democratic principles, in which the Ukrainian nation would be an equal partner. In 1850 he became rector of ss Cyril and Methodius church, the first Byzantine rite church in Paris. With the support and participation of the archbishop of Paris he established the Oriental Society for the Union of All Christians of the East and an institute for the education of missionary priests. Having fallen out of favor with the Polish émigrés and the Vatican bureaucracy, in 1855 he closed down the institute and donated its books, archives, and possessions to the People's Home in Lviv.

In 1857 Terletsky moved to Lviv, but he was forced to leave by Gov A. Gofuchowski, and settled in Transcarpathia. There he entered the Basilian order, contributed occasionally to the Lviv newspaper *Słowo*, became a close friend of O. Dukhnovych, and served as hegumen of the Basilian monasteries in Malyi Bereznyi and Krasný Brod. In the 1860s he inspired a clerical movement to purge the Greek Catholic liturgy and rituals of Latin accretions, translated into Ukrainian a book of B. Zaleski's poems (1861) and T. à Kempis's *Imitation of Christ* (1862), and wrote in Ukrainian an account of his travels in the Near East (1861) and a collection of sermons (1862). He was arrested for his Pan-Slavist activities by the Hungarian authorities (1871) and, having been accused of spying for Russia, he was expelled in 1872. After being allowed to return to the Russian Empire he converted to Russian Orthodoxy, lived in St Michael's Golden-Domed Monastery in Kiev, and wrote in Russian a book about the rebirth of Ruthenian national consciousness in Hungarian-ruled Transcarpathia (1874). He then served as the private chaplain at Prince P. Demidov's estate near Florence (1874–9), and he lived from 1881 in Odessa as an archimandrite. His reminiscences were published posthumously in *Russkaia starina* (vols 63 [1889], 70–1 [1891]).

I.L. Rudnytsky

Terletsky, Kyrylo [Terlec'kyj], b ?, d 1607. Bishop. He was born into a Ukrainian gentry family and became Orthodox bishop of Pynske-Turiv (1572–85) and then Lutske-Ostrih (from 1585). He was a leading proponent of union with the Catholic church, and in 1595 he traveled to

Rome with I. Potii to negotiate the terms of a union agreement and to set forth the confession of faith. The following year Terletsky took part in the sobor that led to the proclamation of the Church Union of *Berestia, which formally established the Uniate church.

Terletsky, Liubomyr [Terlec'kyj, Ljubomyr], b 16 May 1922 in Skoviatyn, Borshchiv county, Galicia. Sculptor and medallionist. After serving a 10-year sentence in the Soviet Gulag for 'Ukrainian nationalism,' he returned to Lviv in 1957 and graduated from the Lviv Institute of Applied and Decorative Arts in 1966. Terletsky's sculptures and medallions are marked by vivid individual specificity, and combine classical tradition with elements of schematization and improvisation. In the 1960s, by choosing the chief designer of the Soviet space effort, S. *Korolov, as a subject of his sculptures and representing him and his rockets as distinctly Ukrainian Kievan warriors waiting to be launched, Terletsky ran afoul of his Soviet art mentors, and his work was removed from the Lviv Museum of Ukrainian Art. Only after executing 'patriotic' sculptures and medallions ('Soldier with Child,' 'The Great War for the Fatherland') was Terletsky again permitted to accept commissions for his sculptures. In the mid-1980s he became incapacitated by a serious chronic illness. His sculptures were readmitted to the Lviv Museum of Ukrainian Art only after the collapse of the USSR.

Markiiian Terletsky

Omelian Terletsky

Terletsky, Markiiian [Terlec'kyj, Markijan], b 1 November 1885 in Polniatycki, Jaroslaw county, Galicia, d 2 May 1963 in Bayside, New York. Pedagogue, community activist, and historian; brother of Omelian Terletsky. He taught in a gymnasium in Peremyshl in 1908–18. In 1923–6 he was a professor of ancient history at the Ukrainian Higher Pedagogical Institute in Prague, where he also served as vice-dean of the Faculty of History. After his return to Galicia he served as director of the *Ridna Shkola gymnasia in Yavoriv and Stanyslaviv. In 1934–9 he was inspector of Ridna Shkola secondary schools. He was editor of the biweekly *Ridna shkola (1936–9). In 1940 he became director of the Ukrainian gymnasium in Jaroslaw, a post he held until 1944. He lived in the United States from 1952. Terletsky wrote a popular short history of Ukraine and various historical essays.

Terletsky, Metodii [Terlec'kyj, Metodij], b ? in Terlo, near Sambir, Galicia, d 1649. Uniate bishop. A Basilian hi-

eromonk in Kholm (to 1626), he completed a doctorate of divinity in Vienna and undertook missionary work in Transcarpathia and Croatia. As bishop of Kholm (1630–49) he sought to improve the educational standards of the clergy and established a seminary in Kholm. He was a fervent believer in the Church Union of *Berestia and devoted his energies to incorporating the remaining Orthodox Ukrainians into the union. In the 1640s he acted as an intermediary in discussions between the Orthodox metropolitan P. Mohyla and A. Kysil concerning the creation of a Kiev patriarchate in union with Rome.

Terletsky, Omelian [Terlec'kyj, Omeljan], b 2 December 1873 in Kramarivka, Jaroslaw county, Galicia, d 13 February 1958 in Lviv. Pedagogue and historian; full member of the Shevchenko Scientific Society from 1921; brother of M. Terletsky. He taught in gymnasiums in Ternopil and Chortkiv and at the Academic Gymnasium in Lviv. In conjunction with the *Union for the Liberation of Ukraine he worked among Ukrainians who had been captured by the Central Powers and were being held in Germany. He was a long-standing member of the executive of the *Ridna Shkola society (twice its head, 1923–4 and 1926–8), a member of the Lviv branch of the Prosvita society, and a member of the Teachers' Hromada in Lviv (acting head in 1923–4 and 1926–8). After the Second World War Terletsky worked at the Lviv branch of the Institute of Ukrainian History of the Academy of Sciences of the Ukrainian SSR and at Lviv University. He wrote works which were published in ZNTSh and various monographs, including *Politychni podii na Halyts'kii Rusi v 1340* (Political Events of 1340 in Galician Rus', 1896), *Kozaky na Bilii Rusi 1654–56* (The Cossacks in Belarus, 1654–56, 1897), *Istoriia Ukrain's'koi hromady v Rashtati 1915–18* (History of the Ukrainian Community in Rastatt, 1915–18, 1919), *Istoriia Ukrain's'koi derzhavnosti* (History of Ukrainian Statehood, 2 vols, 1923–4), *Ukraina zaborolom kul'tury i tsyvilizatsii pered stepovykamy* (Ukraine as the Bastion of Culture and Civilization against the Peoples of the Steppe, 1930), and *Het'mans'ka Ukraina i Zaporizhs'ka Sich* (The Hetman [State of] Ukraine and the Zaporozhian Sich, 1935).

Terletsky, Ostap [Terlec'kyj] (pseud: V. Kistka, I. Zanevych, R. Mak), b 5 February 1850 in Nazirna, Kolomyia county, Galicia, d 22 July 1902 in Lviv. Civic and political leader, and literary scholar. A graduate of the humanities faculty at Lviv University (1872) and the law faculty at Vienna University (1883), he played a key role in the development of a populist socialist movement among Galician Ukrainians. In Vienna he served as president of the *Sich student society (1874–7) and was strongly influenced by the political ideals of M. Drahomanov and S. *Podolynsky, whom he helped to publish four influential socialist pamphlets in Ukrainian. He also wrote economic and political articles for the Ukrainian press, including a blistering attack on old-line Galician populists in *Pravda* (1874). He was arrested in 1877 along with I. Franko, M. Pavlyk, and others and convicted of membership in a secret society. Subsequently he devoted much of his energy to his law career and his literary research. He published several short surveys of 19th-century Galician Ukrainian literature and wrote economic and political articles. He aided a radical circle in Stanyslaviv in the mid-1880s and

Ostap Terletsy

Stefan Terlezki

became a founding member of the Ruthenian-Ukrainian Radical party in 1890.

Terletsy, Sydir [Terlec'kyj], b 7 June 1892 in Chernivtsi, Bukovyna, d 8 February 1953 in Bad Salzofleu, West Germany. Actor and stage director. He worked as an actor in the Ruska Besida Theater and the Lviv Ukrainian People's Theater under Y. Stadnyk (1911–14) and then led the Ukrainian Drama Theater at the People's House in Chernivtsi (1918–28) and acted in amateur theaters in Bukovyna (1928–39) and the Chernivtsi Oblast Ukrainian Music and Drama Theater (1940–1). He was arrested in August 1943 and sent to Nazi concentration camps in Auschwitz and Buchenwald. He was released in 1945.

Terletsy, Teofil [Terlec'kyj, Teofil'], b 1870 in Lviv, d 14 March 1902 in Munich. Graphic artist. After studying at the Cracow School of Fine Arts (1890–3) he moved to Munich. From there he contributed caricatures to Ukrainian, Polish, and German papers, such as *Zoria*, *Tygodnik ilustrowany*, *Jugend*, and *Fliegende Blätter*. His translations of I. Turgenev's prose poems were published in *Zoria*. He also did portrait studies (eg, a grandmother and a youth with a guitar) and the ink drawing *Burial of a Soldier* (1894). He died destitute, from tuberculosis.

Terlezki, Stefan [Terlec'kyj], b 29 October 1927 in Antonivka, Tovmach county, Galicia. Businessman and politician. Having emigrated to England after the Second World War, he graduated from the Cardiff College of Food Technology and Commerce (1952) and then became active in public affairs. He was a member of the Hotel and Catering Institute (1965–80) and the Welsh Tourist Council (1965–80) and press officer of the Cardiff Chamber of Commerce (1970–83). In 1973 he was chairman of the Keep Britain in Europe campaign. He was the Conservative representative of Cardiff West in the House of Commons (1983–7), the first British MP of Ukrainian origin. In 1992 he was appointed Commander of the Order of the British Empire for his political and public service.

Terminology. The set of words or expressions that have specific meanings in science, arts, or the professions. They differ from common words by their semantic precision. A special term is created in a language by (1) changing the

meaning of a common word, (2) coining a neologism, or (3) borrowing a term from another language.

To the 19th century. The earliest extant source of Ukrainian terminology is the **Izbornik* of Sviatoslav (1073). It contained Church Slavonic glosses of little-understood words (mainly calques from the Greek) and 27 literary figures and tropes found in the Scriptures and Georgios Chiroboschos' article on images. **Ruskaia Pravda* shows that legal terminology was highly developed in 11th- to 12th-century Rus'. **Adelphotes* (1591) systematically used Greek calques in the Ukrainian redaction of Church Slavonic for Greek grammatical and literary-stylistic terms. Its terminology set the standard for the terminology used in the Slavonic grammars of L. **Zyzanii* (1596) and M. **Smotrytsky* (1619). The earliest examples of Ukrainian medical terms are found in a preserved fragment from a late 16th-century pharmacotherapeutic tract, and scientific terms can be found in a textbook translated from the German, *Lutsidarii* (1636). I. Velychkovsky was the first to explain terms of figurative versification in his collection *Mleko* (Milk, 1691).

1850–1914. Ukraine's national rebirth in the 19th century and the concurrent growth of science and technology made Ukrainians aware of the need for Ukrainian terminology. Under Polish, Russian, Austrian, and Hungarian rule the scientific and technical educational institutions in Ukraine used either Polish, Russian, or German. In the Austrian Empire, where there were fewer restrictions on the Ukrainian language, the Ukrainian members (Ya. Holovatsky, H. Shashkevych, Yu. Vyslobotsky) of a government commission for the compilation of Slavic legal terminology published *Juridisch-politische Terminologie für die slavischen Sprachen Österreichs ... Deutsch-ruthenische Separatausgabe* (17,000 words, 1851). I. Verkhratsky collected popular Ukrainian natural-science nomenclature and published it with equivalent Latin and German terms in seven fascicles (Lviv, 1864, 1869, 1872, 1879, 1908). He also prepared a list of Ukrainian botanical terms (1892). A new German-Ukrainian legal and administrative dictionary was compiled by K. Levytsky (1893; 2nd edn 1920). It contained terms based on the folk vernacular, neologisms, and borrowings from other Slavic languages. In 1894 the Shevchenko Scientific Society (NTSh) appealed to the reading public to collect popular terms in 'the trades, the cottage industry, agriculture, commerce, and folk medicine' because 'scholars ... frequently are forced to borrow them from other Slavic languages or to create them sometimes ... very unsuccessfully and counter to the spirit of our language.' Beginning in the mid-1890s, materials on Ukrainian terms in mathematics, physics, and chemistry (by V. Levytsky, 1895–6, 1903), geography (S. Rudnytsky, 1908, 1913), mineralogy (I. Verkhratsky, 1909), and botany (M. Melnyk, 1922) were published in NTSh serials. I. Zatserkovny published a list of legal terms in *Chasopys' pravnycha i ekonomichna* (1902, nos 4–5).

In the Russian Empire, M. Levchenko, the author of the first Russian-Ukrainian dictionary (1874), first wrote of the need to develop Ukrainian terminology on the basis of the folk vernacular and provided a glossary of his translations of several dozen internationally used terms (*Osnova*, no. 7 [1861]). In reply, P. Yefymenko added a number of new terms (*Osnova*, no. 8 [1862]). Because of tsarist restrictions on the use of the Ukrainian language (see **Ems Ukase* and P. **Valuev*), only a few contributions to Ukrai-

nian terminology were published: a glossary of vernacular plant names by O. Rohovych and a Latin-Ukrainian list of 1,000 plant names by F. Vovk in *Zapiski Iugo-zapadnago otdela Russkago geograficheskago obshchestva* (1873); a list of agricultural terms by S. Vengrzhynovsky in *Kievskaiia starina* (1898, nos 7–8); and V. Vasylenko's dictionary of technical (handicrafts and agriculture) terms from Poltava gubernia (Kharkiv 1902). After the Revolution of 1905, conditions improved with the lifting of restrictions. *Zapysky Ukrain's'koho naukovooho tovarystva u Kyievi* (18 vols, 1908–18) provided terminological indexes to every study published therein. Ukrainian student circles or commissions at the Kiev Polytechnical Institute, the Moscow Agricultural Institute, and the Kvitka-Osnovianenko Society in Kharkiv began compiling terminological materials from literary and folk sources. In 1913 the Ukrainian Scientific Society in Kiev (UNTK) assumed the task of co-ordinating this work and received the materials – several thousand cards of agricultural, natural-science, and technical terms – collected by the circles and commissions.

1917–20. The First World War interrupted the research on terminology. In January 1917 O. Yanata, predicting the imminent opening of Ukrainian schools, called upon linguists to devise a terminology based on the popular vernacular and literary materials before technical language became polluted with artificial terms. In March 1917 M. Hrushevsky spoke out against extreme 'ethnographism' and urged that previous work in the field be used in preparing new educational and popular scientific literature. That task was taken up jointly by the newly created Society for School Education and the UNTK, and in 1917 the first short drafts of geographic, grammatical, arithmetical, geometric, and algebraic dictionaries were published. At the time at least 12 terminological dictionaries were published by various institutions and societies in Kiev, Poltava, Kobeliaky, Mohyliv-Podil'skyi, Hadiache, Vinnytsia, and Kamianets-Podil'skyi. The most important ones were I. Zhyhadlo's short Russian-Ukrainian legal dictionary (3 edns, 1917–19), L. Padalka's Russian-Ukrainian administrative dictionary (2 edns, 1917–18), and V. Leontovych and O. Yefymov's Russian-Ukrainian legal dictionary (2 edns, 1917, 1919).

In the autumn of 1917 the UNR General Secretariat of Education and Ministry of Justice asked O. *Kurylo of the UNTK Terminological Commission to prepare terminological glossaries for schools and the courts. In 1918 Kurylo published a brief dictionary of Ukrainian medical terms in *Ukrain's'ki medychni visty* and, together with H. Kholodny, a draft dictionary of Ukrainian physics terms. The VUAN Russian-Ukrainian legal dictionary edited by A. Krymsky (1926) was based on Kurylo's materials. In August 1918 the Terminological Commission of the UNTK and in 1919 the VUAN Orthographic and Terminological Commission were established. By the end of 1920 the UNTK commission had collected over 200,000 cards of materials from published sources. In 1917–19 many small dictionaries of mathematical, physics, chemical, medical, natural-science, zoological, geographic, and meteorological terms appeared, but most of them were inadequately and amateurishly prepared.

Soviet Ukraine. In the first three years of Soviet rule only three terminological dictionaries were published, the most important of which was M. Halyn's Russian-Ukrainian medical dictionary (1920). From 1921 the VUAN *Insti-

tute of the Ukrainian Scientific Language (IUNM) under the direction of A. *Krymsky and, later, H. *Kholodny co-ordinated all terminological work in Soviet Ukraine with the aim of developing a national terminology based on the vernacular and neologisms. In 1923–30 the IUNM published 20 of the planned 34 Ukrainian-Russian terminological dictionaries (with German and French or Latin equivalents), many of them in association with the NTSh. The most important of them were in the fields of chemistry (O. Kurylo, 1923), geology (P. Tutkovsky, 1923), anatomy (Latin-Ukrainian, ed F. Tsheshkivsky and O. Cherniakhivsky, 1925), mechanics (T. Sekunda, 1925), mathematics (F. Kalynovych, 1925), ornithology (M. Sharleman, 1925), pathology (Latin-Ukrainian, O. Korchak-Chepurkivsky, 1926), theoretical mechanics (F. Kalynovych, 1926), technical sciences (M. and L. Darmoros, 1926; I. Sheludko and T. Sadovsky, 1928), vertebrate zoology (M. Sharleman and K. Tatarko, 1927), manufacturing (F. Lokhanko, 1928), natural science (Kh. Polonsky, 1928), botany (Latin-Ukrainian, O. Yanata and N. Osadtsa, 1928), public services (K. Turkalo and V. Favorsky, 1928), electrical engineering (I. Sheludko, 1928), invertebrate zoology (I. Shchoholiv and S. Panochini, 1928), mechanics (ed V. Favorsky, 1929), administration (M. Doroshenko et al, 1930), construction (S. Bulda, 1930), music (1930), and surveying (Yu. Trykhvyliv and I. Zubkov, 1930).

In 1930 the leading figures at the IUNM were implicated in the Stalinist show trial of the *Union for the Liberation of Ukraine, and the IUNM was dissolved. Its surviving associates were transferred to the Division (later Sector) of Terminology and Nomenclature at the newly created VUAN Institute of Linguistics, where by 1933 they managed to publish 10 terminological dictionaries in fields such as mining (P. Vasylenko and I. Sheludko, 1931), economics (H. Kryvchenko and V. Ihnatovych, 1931), human geography (A. Nosov, 1931), astronomy (F. Kalynovych and H. Kholodny, 1931), transportation and communications (I. Sheludko, 1932), physics (ed V. Favorsky, 1932), botany (V. Vovchanetsky and Ya. Lepchenko, 1932), and agriculture (1933).

During the early Soviet period about 70 terminological dictionaries came out in Ukraine, including medical (V. Kysilov, 1928; V. Kramarevsky et al, 1931), financial (1924), legal (S. Veretka and M. Matviievsky, 1926; ed A. Krymsky et al, over 67,000 words, 1926), accounting and statistical (A. Girzhel and D. Rin, 1926), transportation (V. Zhurkovsky, 1926), administration (Ye. Linkevych et al, 1926), pedagogical, psychological, and school administration (P. Horetsky, 1928), military (S. and O. Yakubsky, 1928), agricultural (P. Sabaldyr, 1931), manufacturing (I. Sheludko, 1931), and biological (S. Panochini, 1931) dictionaries. After P. *Postyshev's arrival in Ukraine in the spring of 1933, the Institute of Linguistics was purged. The surviving linguists were ordered to eliminate the puristic elements (see *Purism) from already-published dictionaries and to replace them with words common to both Ukrainian and Russian. Thus, five terminological bulletins (1934–5) with corrections were issued. Also, 21 Russian-Ukrainian terminological dictionaries that were being prepared or printed at the time had to be vetted. Only I. Kyrychenko's medical dictionary (1936) was published by the institute. With the terror of 1936–7, terminological work at the institute ceased for two decades. From late 1933 to 1935 ten Russified terminological dictionaries

for elementary and secondary schools and in 1948 M. Knipovych's Ukrainian-Russian medical dictionary were published outside the institute.

Terminological research was resumed only in 1957 with the creation of a Dictionary Commission at the AN USSR (now ANU) Institute of Linguistics. Since then over 20 specialized Russian-Ukrainian dictionaries have been published, mostly by the academy, in fields such as geology (S. Holovashchuk and I. Sokolovsky, 1959), machine science and machine building (V. Khilchevsky and V. Shashlov, 1959), physics (V. Heichenko et al, 1959), mining (O. Kovshulia et al, 1959), chemistry (Ye. Nekriach et al, 1959), hydraulics (H. Shvets et al, 1960), mathematics (F. Hudymenko et al, 1960), medicine (Latin-Ukrainian-Russian, H. Kazier et al, 1960), engineering (M. Matiiko et al, 1961), electrical engineering (Yu. Velychko et al, 1961), botany (D. Afanasiev et al, 1962), thermal and gas engineering (I. Sheludko et al, 1962), agriculture (A. Biloshtan et al, 1963), physiology (B. Yesypenko and M. Kondratovych, 1963), veterinary science (Ya. Yarema et al, 1964), welding (A. Potapievsky, 1964), social sciences and economics (S. Vorobiova and T. Molodid, 1966; rev edn 1976), metallurgy (V. Chekhranov and V. Meleshko, 1970), anatomy (M. Netliukh, 1972), sports (N. Firsell and V. Kaliuzhnaia, 1973), mineralogy (Ukrainian-Russian-English, Ye. Lazarenko and O. Vynar, 1975), and law (ed B. Babii, 1985). The puristic approach of the 1920s had been abandoned, and the dictionaries were based on the Russian language. Only in exceptional cases were all synonyms for a term provided, and then one of them – the one identical or similar to the Russian – recommended.

Outside Soviet Ukraine. In interwar Galicia, only one terminological dictionary – of musical terms, by Z. Lysko (1933) – was produced. In Cracow the Polish scholar S. Makowiecki published a major Latin-Ukrainian botanical dictionary (1936). In the interwar period émigré scholars affiliated with the *Ukrainian Husbandry Academy in Poděbrady, Bohemia, and the *Ukrainian Scientific institutes in Warsaw and Berlin prepared and published several specialized dictionaries in fields such as the strength of materials (S. Ryndyk, Prague 1924), mathematics (Ukrainian-Russian-German, M. Chaikovsky, Berlin 1924), medicine (Latin-Ukrainian, M. Halyn, Prague 1926; German-Ukrainian, P. Oesterle with Z. Kuzelia, Berlin 1944), anatomy (Ye. Lukasevych, Warsaw 1926), agriculture (Russian-Ukrainian, ed Ye. Chykalenko, Poděbrady 1927), forestry (German-Ukrainian, ed Ye. Chykalenko, Poděbrady 1931), aeronautics (German-Ukrainian, I. Ilnytsky-Zankovych, Berlin 1939), and military science (German-Ukrainian, I. Ilnytsky-Zankovych, 20,000 words, Berlin 1939). Their work has been continued since the war in the United States by the *Research Society for Ukrainian Terminology and the *Ukrainian Terminological Center of America, and in Europe by the *Ukrainian Technical and Husbandry Institute. The work of these institutions resulted in such publications as an *American-Ukrainian Nautical Dictionary* (W. Stepankowsky, 1953); *A Selective English-Ukrainian Dictionary of Science, Technology, and Modern Living* (A. Wowk, 1982); the *English-Ukrainian Dictionary of Color Names and Color Science* (A. Wowk, ed B. Struminsky, 1986); a German-Ukrainian electrotechnical dictionary (M. Savchuk, 1981); and the reprints of M. Halyn's medical dictionary (1969), A. Krymsky's legal dictionary of 1926 (1984), M. Knipovych's medical dictionary (1985),

and P. Oesterle's German-Ukrainian medical dictionary (1986).

Ternivka. v-17. A city (1969 pop 13,200) on the Ternivka River in Pavlohrad raion, Dnipropetrovske oblast. A village was founded at the site in 1775. The first mine was opened there in 1964. In 1976 the village was granted city status. Today it has four coal mines and a coal-enrichment factory.

Ternivka. vi-13. A town smt (1986 pop 9,300) on the Inhul River in Mykolaiv oblast, 9 km from Mykolaiv, under the administration of its city council. The first houses at the site were built in 1791-2 by the Russian navy for its shipbuilding workers. In 1801 some Bulgarian refugees settled there and developed grain and fruit farming. In 1949 the village attained smt status. Today most of its residents work in Mykolaiv.

Ternopil

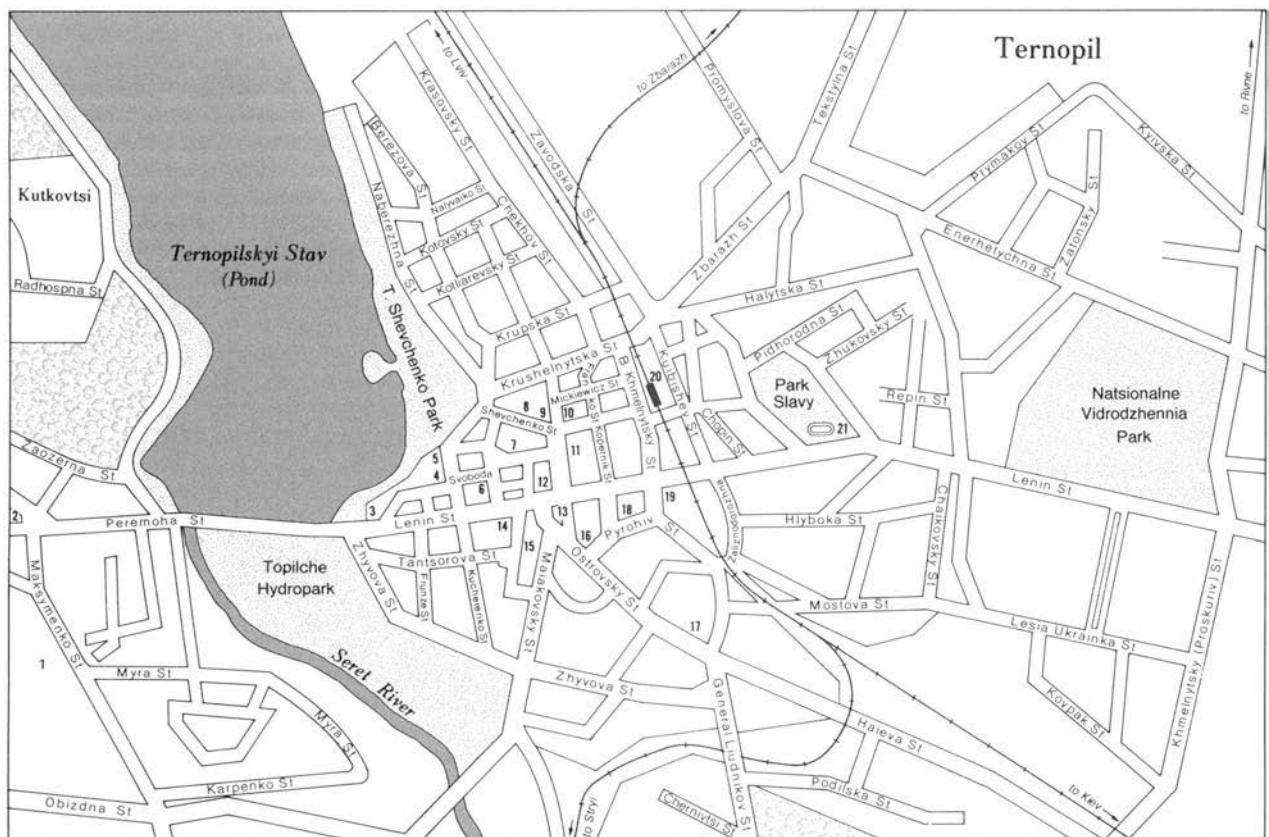

Ternopil [Ternopil']. iv-6. A city (1990 pop 212,000) on the left bank of the Seret River and a raion center and the capital of Ternopil oblast. In 1540 the Polish magnate J. Tarnowski built a fortress there against Tatar attacks, and in 1548 the town was granted the rights of *Magdeburg law. In 1570 it became the property of Prince K. Ostrozky,

who set up a hospital foundation and a church brotherhood. Subsequently it was owned by other magnates. In spite of frequent Tatar attacks (1544, 1575, 1589, 1618, 1672, 1694) Ternopil developed as a manufacturing and trading center. In 1648 and 1655 it was captured by B. Khmelnytsky's army. In 1675 the Turks dismantled its fortifications. By 1672 Ternopil had a population of 2,400, composed of Ukrainians, Jews, and Poles (mostly soldiers of the garrison). The Jews increased in number steadily and gained control of the trade; they pushed the Ukrainian burghers into the suburbs and *khutory* outside the town. In the 17th century there were three Orthodox churches, a Catholic church, and several synagogues in Ternopil. In the 18th century, although the Tatar and Turkish attacks had ceased and there was relative calm, the town's, and Podilia's, economy declined. The Confederation of *Bar inflicted widespread suffering, and a cholera epidemic in 1770 took a heavy toll (40 percent of the population).

In 1772 Ternopil was annexed by Austria and was chosen as an administrative center of a circle. In 1809–15 it was held by Russia. By the mid-19th century it had become the largest city of Galician Podilia, mainly because of its trade in farm products and the transit trade between the Russian Empire and Europe. The construction of a

railway line to Pidvolochyske in 1870 strengthened Ternopil's position as a commercial center. Its population grew steadily, from 10,200 in 1817 to 20,100 in 1869, 30,415 in 1900, and 35,200 in 1914. It was one of the wealthier and cleaner cities in Galicia.

At the beginning of the 20th century there were five secondary schools in Ternopil, including a state gymnasium (est 1898) in which Ukrainian was the language of instruction (principals, O. Kalytovsky and O. Savytsky). It was the only major Galician city in which Ukrainians outnumbered the Poles and Ukrainian burghers had attained substantial wealth and influence. In 1900, 28.3 percent of Ternopil's residents were Ukrainian, 27.1 percent were Polish, and 44.3 percent were Jewish. In the 1860s the Ukrainian national movement began there under the leadership of O. *Barvinsky and V. *Luchakovsky. The newspapers *Podil's'ke slovo* (1909–12) and *Podil's'kyi holos* (1904–8) were published there. Under the Russian occupation of Ternopil (August 1914 to July 1917) all Ukrainian public life was suspended. Only in 1916 did the Russian authorities permit the Ternopilski Teatralni Vechory theater to open. Then they allowed Ukrainian to be introduced in the schools. After the February Revolution of 1917 Ukrainian cultural and political life in Ternopil revived quickly. Association with Galician Ukrainians re-

sulted in a national awakening among the Ukrainian officers of the Russian army stationed in the area.

From 1 November 1918 until July 1919 Ternopil was part of the Western Ukrainian National Republic, and from 21 November 1918 to 2 January 1919 it served as the republic's provisional capital. In June 1919 the Ukrainian and Polish armies fought for control of the city. Except for an interval (26 July to 20 September 1920) when it was held by Soviet forces and served as the base of the Galician Revolutionary Committee, Ternopil remained under Polish control until September 1939. The sealing of the eastern border reduced trade and hurt the city's economy, although Ternopil became the administrative center of a voivodeship. Its population grew slowly, from 30,900 in 1921 to 34,000 in 1931. As a Polish administrative center the city served as the base of a concerted Polonization campaign, which included measures such as the introduction of Polish colonies in Podilia, inducements to religious conversion, the closing of Ukrainian schools (Ternopil gymnasium in 1930), and organized violence (see *Pacification). The campaign resulted in greater changes in Ternopil's national profile than in that of other Galician towns: by 1939, 39.7 percent of the city's 37,500 residents were Poles, 39.3 percent were Jews, and only 19.2 percent were Ukrainians. Nevertheless, Ternopil remained the largest Ukrainian center in Podilia. It had a Ukrainian Catholic parish, four churches, a Redemptorist monastery, two Ukrainian gymnasiums, and a branch (est 1925) of the Lysenko Music Society of Lviv. Its main Ukrainian cultural organizations were the Burgher Brotherhood, the Boian musical society, a branch of the Prosvita society, and the Ostrozky Foundation. It was the base of a number of Ukrainian economic institutions, such as the Podilia Union of Co-operatives and the Kalyna guild. Several local factories were owned by Ukrainians. The newspaper *Podil's'kyi holos* resumed publication in 1928–30. In the interwar period the leading political and civic activists in Ternopil were S. Baran, I. and S. Brykovich, S. Chumak, N. Hirniak, Ya. Mykolaievych, R. Tsehelsky, V. Vitoshynsky, and Ya. Yarema.

During the Second World War Ternopil was occupied by the Soviets (September 1939 to July 1941) and the Germans (to May 1944). The Soviet authorities arrested and deported many Ukrainian activists and murdered 640 prisoners just before abandoning the city in 1941. In March and April 1944 over half of the city was destroyed before it was recaptured by the Soviet army. By 1946 there were only 12,000 inhabitants. The city was rebuilt according to a general plan adopted by the government in August 1945. As industrial development progressed, the population increased, from 26,000 in 1950 to 52,000 in 1959, 85,000 in 1970, and 139,000 in 1978. In Western Ukraine Sovietization meant a profound change in all areas of life – economic, cultural, civic, and private. There was also a marked shift in Ternopil's ethnic composition. In 1959, 78 percent of the population was Ukrainian, 15 percent Russian, and 5 percent Polish; in 1989, 91.2 percent of the population was Ukrainian, 7.2 was Russian, and 0.6 percent was Polish.

At the end of the 1980s the city became one of the leading centers of the national revival in Ukraine. Democrats were voted into power in the municipal and oblast councils, and a strong branch of the Popular Movement of Ukraine was set up. The city's publications now include

the journal *Ternopil'* and the newspapers *Zakhidna Ukraina*, *Vil'ne zhyttia* (Oblast Council), *Ternystyi shliakh* (Ukrainian Republican party), and *Ternopil' vechirni* (City Council).

Today Ternopil is one of the major industrial centers of western Ukraine. The major branches of industry are food processing, including a sugar-refining complex (built in 1937, reconstructed in 1954–8), a meat-packing plant, a dairy, and a brewery; light industry, including one of the largest cotton-cloth manufacturing complexes in Ukraine and a synthetic leather and sewing factory; the building-materials industry, including a reinforced-concrete plant and the Budindustriia complex; and the machine-building industry, which produces electric armatures and farm machinery. There are six vocational schools and four specialized secondary schools in the city. Higher education is provided by the city's medical, pedagogical, and financial-economic institutes. There are also several local branches of large educational institutes, such as the Lviv Polytechnical Institute. The chief cultural institutions are the theater of Ukrainian music and drama, the puppet theater, the oblast philharmonic orchestra, the regional studies museum, and the picture gallery.

The chief architectural monuments of the city are the castle (built in 1540–8, destroyed in 1675 and restored in the Renaissance style, renovated in the 19th century, and rebuilt after each world war), the Church of Christ's Na-

The Church of Christ's Nativity (1602–8) in Ternopil

tivity, with a defense tower (1596–8), the Church of the Elevation of the Cross (1540), the SS Peter and Paul Church of the Dominican monks, built in the baroque style (1749), and the Dormition Church (1632, destroyed by the Soviet authorities in 1962). The section of the municipal cemetery reserved for the Ukrainian Sich Riflemen was destroyed by the Soviets in 1976.

The city's layout was completely changed during post-war reconstruction. Some of the streets were designed differently and widened. The buildings were enlarged to three or four stories. A series of new public buildings and squares was designed. Whole new residential districts were put up in the eastern section and west of the Seret River. The Zahrobelia suburb was expanded. The central core of the city lies outside the old quarter, as it did before the war.

A hydroelectric station in Borshchiv raion, Ternopil oblast

Ternopil oblast. An administrative territory (1990 pop 1,171,500) in Western Ukraine, formed on 4 December 1939. Its area is 13,800 sq km, divided among 16 raions, 16 cities, 21 towns (smt), and 458 rural councils. The capital is *Ternopil.

Physical geography. The oblast occupies the western part of the Podolian Upland. It consists largely of a plateau with an elevation of 300–400 m sloping southward to the Dniester River. The Kremianets Mountains cut through the northern part of the oblast; the Opilia Upland runs along its southwestern border. The main rivers in the oblast are left-bank tributaries of the Dniester – the Zolota Lypa, the Koropets, the Strypa, the Seret, and the Zbruch, which marks its eastern border. The oblast has a temperate continental climate: the average January temperature is -5.5°C in the north and -4.5°C in the south, and the average July temperature is 18°C and 19°C respectively. The annual precipitation ranges from 520 mm in the southeast to 700 mm in the northwest. The soils are mostly chernozems and gray forest soils. The oblast's vegetation belongs to the forest-steppe belt. Almost 13 percent of the

Cossack graves near Kremianets, Ternopil oblast

oblast's surface is forested; the prevalent forests are hornbeam, hornbeam and oak, beech, and pine.

History. The territory of the oblast has been inhabited since the Paleolithic period. In the 9th to 12th centuries it was part of Kievan Rus', and in the 13th and 14th centuries, of Galicia-Volhynia principality. Except for a brief interval during the B. Khmelnytsky period, the territory was dominated by Poland from the mid-14th century until the First Partition of Poland. In 1772 most of the territory was annexed by the Austrian Empire. The northern part, including Kremianets and Zbarazh, was taken by Russia in 1793. Austria ceded the so-called Ternopil krai to the Russian Empire in 1809, but got it back at the Congress of Vienna in 1815. For more than a century the Zbruch River defined the border between Austrian- and Russian-ruled Ukrainian territories. In 1918 the Ternopil region became part of the Western Ukrainian National Republic, but soon thereafter it was occupied by Poland. In September 1939 it was occupied along with the rest of Galicia by Soviet troops, who were driven out by the Germans in June 1941, and returned in July 1944. Since 1944 the territory has been part of Ukraine.

Population. The overwhelming majority of the oblast's population is Ukrainian: according to the 1989 census, 96.8 percent is Ukrainian, 2.3 percent is Russian, and under 1 percent is Polish. The figures represent a radical departure from the national composition of the area before the Second World War. For centuries substantial Jewish and Polish minorities lived in the region, and even predominated in the towns. In 1989, 41 percent of the population was urban. The major cities in the oblast are Ternopil, *Chortkiv, *Kremianets, *Berezhany, *Buchach, *Terebovlia, *Zbarazh, and *Borshchiv.

Industry. The oblast's main industries are food processing (40.2 percent of the output in 1983), light industry (26.9 percent), machine building and metalworking (17.7 percent), and building-materials manufacturing (4.2 percent). The food industry is distributed throughout the oblast: the chief sugar refineries are in Borshchiv, Buchach, Zbarazh, Kozova, Khorostkiv, Kremianets, Lanivtsi, Chortkiv, and Ternopil; the largest meat-packing plants are in Ternopil and Chortkiv; the major fruit-canning factories are in Zalishchyky and Berezhany; the main distilleries are in Kremianets, Borshchiv, Khorostkiv, and

Monastyryska; and the creameries and dairies are in Borschiv, Kremianets, Berezhany, Zalishchyky, and Ternopil. Light industry manufactures textiles in Ternopil (cotton) and Zalishchyky, clothing in Ternopil and Chortkiv, footwear in Ternopil and Terebovlia, and leather goods in Ternopil and Vyshnivets. Machine-building enterprises producing farm machinery are concentrated in Ternopil and Zbarazh. Buchach is known for its metal products. Building-materials plants are based on local resources and are located mainly in Ternopil, Berezhany, Skala-Podilska, and Monastyryska. Woodworking plants, mostly furniture factories, are found in Ternopil, Berezhany, Kremianets, and Mykulyntsi.

Agriculture. In 1989 there were 339 collective farms and 20 state farms in the oblast. Of 1,059,000 ha of farmland, 90.4 percent was cultivated, 5.5 percent was hayfield, and 2.6 percent was pasture. Drained land accounted for 126,200 ha. The major crops are the grains (winter wheat, spring barley, legumes, and corn), industrial crops (sugar beets, flax, and tobacco), potatoes, vegetables, and fodder crops. Fruit growing is extensively practiced in the Dniester region. Animal husbandry consists mostly of dairy- and beef-cattle raising, hog farming, and sheep breeding. It accounts for almost half of the agricultural output. Poultry farming, beekeeping, and fish farming are supplementary enterprises.

Transportation. In 1989 there were 574 km of railroads. The trunk lines that cross the oblast are the Kiev-Zhmerynka-Ternopil-Lviv-Chop, Kiev-Shepetivka-Ternopil-Chernivtsi, and Yarmolyntsi-Ternopil-Khodoriv lines. The main railway junctions are Ternopil and Chortkiv. There are 5,500 km of highways, of which 4,700 are paved. The main highways crossing the oblast are Vinnytsia-Lviv-Krakovets, Kamianets-Podilskyi-Chortkiv-Ivano-Frankivske, Brest-Lutske-Ternopil-Chernivtsi, and Ternopil-Stryi. An airport is located in Ternopil. The Dniester is navigable, and Zalishchyky serves as the oblast's major river port. The Soiuz gas pipeline passes through the oblast.

Ternopil Ukrainian Music and Drama Theater (Ternopils'kyi ukrainskyi muzychno-dramatychnyi teatr im. T. Shevchenka). A theater established in 1939 as the Ternopil Franko Ukrainian Drama Theater on the basis of O. Karabinevych's *Sadovsky Ukrainian Drama Theater, M. Komarovskiy's Promin Theater, and a touring operetta troupe. In 1940-1 its director was M. *Tereshchenko. In 1945 it merged with the Okhtryka Shevchenko Ukrainian Workers' and Collective-Farm Touring Theater (est 1930) and acquired its present name. Its repertoire has included works by M. Kropyvnytsky, M. Starytsky, I. Mykytenko, O. Dovzhenko, M. Gorky, and B. Brecht. In 1984 its artistic director was P. Zahrebelny.

Ternopil'ski Teatralni Vechory (Ternopil Theatrical Evenings). The first Western Ukrainian stationary theater, organized in Ternopil by L. *Kurbas in September 1915. In March 1916 Kurbas departed for *Sadovsky's Theater in Kiev, and M. *Bentsal took over the directorship of Teatralni Vechory. Its repertoire consisted mostly of populist-

The Ternopil Ukrainian Music and Drama Theater

ethnographic plays, some works by S. Vasylenko and S. Cherkasenko, and Ukrainian musicals. Among its actors were H. Yurchakova, F. Lopatynska, Ya. Bortnyk, F. Lopatynsky, M. Krushelnitsky, I. Rubchak, and A. Osy-povycheva. Teatralni Vechory performed for Ukrainian soldiers in the Russian army, and was active until June 1917.

Ternovsky, Pylyp [Ternovs'kyj], b 1838 in Moscow, d 23 May 1884 in Kiev. Church historian. He graduated from the Moscow Theological Seminary (1862) and then taught the history of 'Rus' at the Kiev Theological Academy and general church history at Kiev University (from 1869), and contributed to *Kievskaiia starina*, *Trudy Kievskoi dukhovnoi akademii*, and *Novoe vremia*. He was dismissed in 1883 for 'not moving in accordance with the spirit of Orthodoxy' and for having 'a tendency towards the opinions of Protestant historians.' A specialist in Byzantine and Ukrainian church history, he wrote monographs on sermonizing in 'South Russia' in the 16th and 17th centuries (1869) and on the history of Kiev eparchy in the 18th century (1879), as well as articles on Metropolitan S. Yavorsky and his writings, the participation of ancient Russian archpriests in social issues, the archpriest of Kiev's St Sophia Cathedral, I. Levanda (with S. Golubev), Metropolitan P. Mohyla, the lifestyle of Little Russian monks in the late 18th century, and Serapion.

Ternovsky, Serhii [Ternovs'kyj, Serhij], b 1848 in Moscow, d ? Church historian; brother of P. *Ternovsky. He graduated from the Kiev Theological Academy and then taught Hebrew and biblical archeology at the Kazan Theo-

logical Academy and worked for the Kiev Archeographic Commission. His monograph 'Issledovanie o podchinenii Kievskoi mitropolii Moskovskomu patriarkhatu' (Research on the Subordination of Kiev Metropoly to Moscow Patriarchate) appeared as an introductory essay to a collection of archival documents, edited by him, which was published in *Arkhiv Iugo-Zapadnoi Rossii* (Archives of Southwestern Russia, pt 1, vol 5 [1872]), for which he received a master's degree in theology. He also wrote an outline of biblical archeology (2 vols, 1891, 1895; repub as *Bibleiskaia starina* [Biblical Antiquity], 1900), a history of the Greek-Eastern church during the period of the ecumenical councils (1883), and a study of the first three centuries of Christianity (1878).

Ternovy, Kostiantyn [Ternovyj, Kostjantyn], b 16 April 1924 in Odessa. Orthopedist and traumatologist; full member of the AN URSS (now ANU) since 1982. A graduate of the Odessa Medical Institute (1949), he worked at the Odessa Oblast Hospital and the Odessa Medical Institute (1953–70) and in 1970 was appointed deputy minister of health and head of the clinical division of the Kiev Scientific Research Institute of Orthopedics. His publications deal with the interrelationships of transplantation and regeneration of bone tissue, growth disorders, the chemical composition of bones, inflammatory diseases of the skeletal system, and bone-joint tuberculosis.

Arystarkh Ternychenko

Ternychenko, Arystarkh [Ternychenko, Arystarx], b 15 April 1882 in Okhtyrka, Kharkiv gubernia, d 1 February 1927 in Kiev. Agronomist and publisher. Before graduating from the Kiev Polytechnical Institute (1914) he edited and published the first popular Ukrainian-language agricultural periodical, **Rillia* (1910–14), for which he also wrote most of the material, and contributed to the weekly **Selo* (1909–11). His brochures, posters, and farmers' almanacs (1912–14), which came out as supplements to *Rillia*, were popular among Ukrainian peasants. He was president of the Ukrainskyi Ahronom society (est 1913) and became the publisher of *Rillia*. He served as agriculture minister in the Council of National Ministers of the UNR (February–April 1918) and then headed the Kiev branch of the **Agricultural Scientific Committee of Ukraine* and edited its journal *Ahronom* (1923–6) as well as the journals *Trudove hospodarstvo* (1920) and *Selo* (1922). In 1922 he was appointed a lecturer and then a professor at the Veterinary-Zootechnical and Agricultural institutes in Kiev. He wrote a number of textbooks, on animal husbandry

(1918), land cultivation (3 pts, 1918–22), and hayfield improvement (1923).

Teron, William, b 15 November 1932 in Gardenton, Manitoba. Business executive and developer of Ukrainian origin. The owner of a land and housing development company, Teron won the National Award for Community Design for the Ottawa suburb of Kanata. As president and chairman of the Canada Mortgage and Housing Corporation (1973–9) he was the first Canadian of Ukrainian descent to head a crown corporation in Canada. He served as secretary to the federal minister of state for urban affairs (1976–9) and became an officer of the Order of Canada in 1982.

Ter-Ovanesian, Ihor, b 19 May 1938 in Kiev. Long jumper of Armenian origin. He was the European champion in 1958, 1962, and 1969 and the Olympic bronze medalist in 1960 and 1964. He set world records in the long jump in 1962 and 1967 and was a Ukrainian and USSR champion many times. As a track-and-field coach in Moscow, he launched a campaign against drug-taking in Soviet sports after the 1988 Olympic Games.

Terpylo, Danylo. See Zeleny, Danylo.

Territory, national and ethnic. Ethnic territory is the territory inhabited compactly by a given people or nation, such as by Ukrainians; national territory is the territory held by a given nation-state. The dimensions of the Ukrainian national and ethnic territory have undergone many changes in the past millennium. Whereas in the north, west, and southwest the changes were relatively small, in the south and southeast, along the steppe frontier and the Black Sea coast, the fluctuations were dramatic. At the beginning of the 13th century the Cumans pushed back from the Black Sea the Ukrainian tribes of the Ulychians and Tivertsians, who lived between the Dniester and the Dnieper rivers, and thereby reduced the Ukrainian ethnic territory to about 400,000 sq km. The Tatar invasion (1239) reduced the Ukrainian ethnic territory in the steppe and most of the forest-steppe, and left a little over 250,000 sq km, mostly in the forest belt, under the control of Ukrainian princes. Under Lithuanian rule the Ukrainian ethnic territory had nearly doubled by the end of the 14th century, but it contracted again, to some 280,000 sq km, at the end of the 15th century, when the Tatars resumed their attacks. Intensive Ukrainian colonization, which began at the end of the 16th century in the forest-steppe on the right bank of the Dnieper, soon expanded eastward to **Left-Bank Ukraine*, **Slobidska Ukraine*, and the **Zaporizhia*. As a result the Ukrainian ethnic territory had increased to about 450,000 sq km by the mid-18th century. In the 19th century, after the steppe, the Black Sea littoral, and the Kuban Lowland had been settled by Ukrainians, the Ukrainian ethnic territory reached nearly 700,000 sq km. The eastern **Kuban*, **Terek*, and **Stavropol* regions were settled by Ukrainians and Russians. Thus a large mixed Ukrainian-Russian ethnic territory arose to the southeast of the Ukrainian ethnic territory. Although it expanded to the south and east, the Ukrainian ethnic territory lost small areas in the west to encroaching Polish, Slovak, and Hungarian settlements.

The first accurate estimates of the size of the Ukrainian

UKRAINE'S NATIONAL AND ETHNIC TERRITORY

ethnic territory were made at the beginning of the 20th century, following the publication of the results of the first Russian population census of 1897. By counting all the counties with a rural population over 50 percent Ukraini-

Constituents of the Ukrainian ethnic territory (1,000 sq km)

Total, compact Ukrainian ethnic territory	720.8
Total, compact and mixed Ukrainian ethnic territory	944.9

an, O. Rusov computed the size of the Ukrainian ethnic territory within the Russian Empire to be 576,600 sq km. At the same time V. Okhrymovych (for Galicia and Bukovyna) and S. Tomashivsky (for Transcarpathia) calculated the Ukrainian ethnic territory within Austria-Hungary to be 74,000 sq km. In 1918 M. Korduba delineated the Ukrainian ethnic territory even more precisely: the part within the former Russian Empire was 664,600 sq km, and the part within Austria-Hungary, 74,500 sq km. S. Rudnytsky estimated the Ukrainian national territory at two levels: its minimal area was 905,000 sq km, and its maximal area (which included the mixed and sparsely settled territories to the southeast), 1,056,000 sq km.

On the basis of the first Soviet census in 1926 and other data, V. Kubijovyč estimated the Ukrainian ethnic territory at 930,500 sq km, including the predominantly Ukrainian part of 718,300 sq km, and the mixed part of 212,200 sq km (eastern Subcaucasia, the Crimea, and the northern Chernihiv, Kholm, and Podlachia regions).

After the Second World War the compact Ukrainian ethnic territory diminished in the west as a result of the forced resettlement of Ukrainians from lands assigned to Poland (about 19,500 sq km). The dispersion of Ukrainians throughout the USSR and their Russification outside the Ukrainian SSR also contributed to the diminishment of the Ukrainian ethnic territory. Even within the Ukrainian SSR, the Donets Basin has evolved into a mixed territory, because of the influx of Russians in the cities. The present constituents of the Ukrainian ethnic territory are listed in the table.

Terror. An instrument of political rule that consists in inducing fear and helplessness in subjects of the state through arbitrary violence. In the 20th century, state terror has played a key role in thwarting Ukraine's aspirations to independence and subjugating the Ukrainian people to Russian domination under the Soviet regime. This fact accounts for the caution and ethnic tolerance with which Ukrainians approached national independence during the disintegration of the Communist regime in the late 1980s and early 1990s.

Nowhere have the techniques of terror been developed to a higher degree and applied on a wider scale than in the USSR. The repertoire consisted of secrecy, ruthless violence, unpredictable targeting, and irrational destructiveness. It was implemented by a vast network of secret agents and informers, which seemed to be omnipresent, omniscient, and omnipotent. No person could be certain that even his or her most intimate thoughts expressed to closest friends or relatives were not monitored and analyzed for political loyalty by the police. Arrests were carried out, usually in the dead of night, without forewarning or explanation. People simply disappeared from their homes, and their families were not informed where and how long they would be held. No one could know who would be arrested next. Even whole villages or categories of the population were uprooted and deported to distant, unannounced regions. Besides beatings, week-long deprivation of sleep, and other forms of physical torture, threats, blackmail, and promises were used to extract false confessions of treason and to implicate others. Elaborate show trials of noted political leaders deflected attention from the real causes of society's failures and sowed universal suspicion and fear. Most of the detainees were condemned without trial to be shot or to die slowly in remote labor camps. Very few inmates survived and returned home. Those who did were forced to remain silent about their imprisonment. Compulsory participation in elections and mass demonstrations of support gave the government an aura of invincibility and implicated everybody in its crimes. The end result was the disintegration of civil society: universal mistrust, corruption, guilt, and dehumanization.

Beginning with V. Lenin's Red Terror, terror was a permanent instrument of the Soviet state, but its intensity and scale varied. In the decade 1929–39 Ukraine was subjected to three particularly horrendous waves of terror: the *collectivization and dekulakization campaign (1929–32), the terror-*famine of 1932–3, and the Great Terror of 1936–8. The collectivization drive, with the deportation of over a million of the most productive 'kulak' peasants, and the state-made famine, with the loss of 6 to 10 million lives, destroyed the Ukrainian peasantry as the base of aspirations to national independence and resistance to the central government. The recurrent *purges of Ukrainian Communist party and government cadres as well as of Ukraine's intellectual and cultural elite left the nation leaderless and totally under Moscow's control.

In Western Ukraine, which was annexed by J. Stalin in

1939 as a result of the *Molotov-Ribbentrop Pact, Soviet rule was introduced deliberately by means of terror. A manipulated election gave overwhelming support to the region's incorporation into Soviet Ukraine. Hundreds of thousands of Ukrainians and Poles were deported from the territory to Siberia. When the Germans launched their offensive against the USSR in mid-1941, thousands of political prisoners in Western Ukraine were force-marched eastward or slaughtered in their jail cells.

The survivors of Nazi rule in Soviet territories that had been captured by the Germans were suspected of wholesale collaboration with the enemy. In the 1940s eight ethnic minorities, including the Crimean Tatars, were deported en masse, with heavy losses, from their traditional homelands. According to N. Khrushchev, had there been enough railway cars, Stalin would have deported the Ukrainian people too. Ruthless terror was used against the Ukrainian population in Western Ukraine to overcome the resistance put up by the *Ukrainian Insurgent Army.

After Stalin's death Khrushchev partially renounced terror as an instrument of rule. Although Soviet leaders tried to distance themselves from the Stalinist heritage of terror, the basic doubt about the legitimacy of Communist rule that was raised by the use of terror in the past was not resolved. The Party's attempt to place all blame on Stalin, and its 'rehabilitation' of victims of the terror, were grossly inadequate responses to the problem.

Hryn Tershakovets

Tershakovets, Hryn [Teršakovec', Hryn'], b 15 February 1877 in Yakymchytsi, Rudky county, Galicia, d 28 July 1959 in Lviv. Civic and political leader. A farmer by vocation, he set up various Ukrainian organizations in his home village and in Rudky county – a Prosvita reading room, Raiffeisen credit unions, dairy co-operatives, a branch of Silskyi Hospodar, and a Sokil society. He was active among the peasants in election campaigns and in 1913, as a candidate of the National Democratic party, won a seat in the Galician Diet. During the First World War he was captured by the Russians and deported to Central Asia. After returning to Lviv in 1918, he became a member of the Ukrainian National Rada and attended the Labor Congress in Kiev in 1919. After the war he was one of the founders of the Ukrainian National Democratic Alliance and a member of its Central Committee. He was repeatedly elected to the Polish Sejm (1928, 1930, 1935). The Silskyi Hospodar and Prosvita societies elected him as an honorary member. In September 1939 he was arrested by

the NKVD and sentenced to hard labor. He was released in 1947 but arrested again in November 1948 and imprisoned until 1956.

Mykhailo Tershakovets

Zinovii Tershakovets

Tershakovets, Mykhailo [Teršakovec', Myxajlo], b 11 June 1883 in Klitsko, Rudky county, Galicia, d 6 February 1978 in Philadelphia. Slavist and pedagogue; member (from 1914) and honorary member (from 1974) of the Shevchenko Scientific Society (NTSh). He studied at the Academic Gymnasium of Lviv (1894–1902) and at the universities of Lviv (1902–5, 1906–7) and Vienna (1905–6). He then taught Ukrainian and classical philology for many years (1906–12, 1913–39, 1941–4) at the Academic Gymnasium and briefly (1940–1) at Lviv University. As a postwar refugee he taught Ukrainian at Vienna University (1945–7), where he received his PH D in Slavic philology in 1948. In 1949 he emigrated to Philadelphia.

Tershakovets's first scholarly article, a study of M. Shashkevych which was published in *Zapysky NTSh* in 1904 and was based on pioneering archival research at the library of the People's Home in Lviv, resulted in his election to the NTSh while he was still a student. In Vienna's archives he discovered many valuable documents illuminating the Western Ukrainian national revival of the 1830s and 1840s, which he published as a book in 1907. In 1908 he published a separate monograph on the revival. He also published articles, in *Zapysky NTSh* and elsewhere, on M. Shashkevych's biography and his translation of the *Králové Dvůr* manuscript, Ukrainian and South Slavic folk songs, V. Kopitar, the censorship of Slavic publications under Austrian rule, *Rusalka Dnistrovaia* (The Dniester Nymph), D. Zubrytsky, K. Studynsky, the legend of Kyi, Shchek, Khoryv, and their sister Lybed, Metropolitan Ilarion, Prince Volodymyr Vasylykovich, T. Shevchenko, and V. Ilnytsky. His postwar monograph on Shashkevych has not been published.

R. Senkus

Tershakovets, Zinovii [Teršakovec', Zinovij] (nom de guerre: Fedir), b 19 August 1913 in Yakymchytsi, Rudky county, Galicia, d 4 November 1948 in Lviv oblast. Senior OUN leader. An attorney by profession, he was one of the principal leaders of the anti-Soviet underground: leader of the OUN (Bandera faction) in Drohobych oblast (1944–5), deputy leader of the OUN in the Carpathian region (1945–6), and OUN leader for the Lviv region (1946–8). He was killed in battle with MVD troops.

Tesla, Ivan. See Teslia, Ivan.

Arkhryp Teslenko

Ivan Teslia

Teslenko, Arkhryp, b 2 March 1882 in Kharkivtsi, Lokhvytsia county, Poltava gubernia, d 28 June 1911 in Kharkivtsi. Writer. He studied in the church school for teachers in Kharkivtsi, from which he was expelled for 'freethinking.' In 1905 Teslenko was arrested for taking part in peasant riots, and in 1906 he was arrested a second time and exiled to Russia, at first to Vologda gubernia and then to Viatka gubernia. He returned from exile to his native village in 1910. He began to write poetry in Russian in 1902, and then in Ukrainian. His first short stories, written in 1904, were printed in 1906 in the journal *Nova hromada* and the newspapers *Hromads'ka dumka* and *Rada*. Later Teslenko published his short stories and other writings about peasant life in the newspaper *Selo* and the periodical *Svitlo*. Many of his short stories are on the subject of the poverty of Ukrainian peasants and their lack of rights under tsarist rule. His autobiographical short stories cover similar concerns; among them are 'Nemaia matusi' (Mother Is Gone, 1910) and 'Pohaniai do iamy!' (Drive into the Ditch!, 1910). He wrote of his prison experiences in 'Na chuzhyni' (In Foreign Lands, 1910) and 'V tiumri' (In Prison, 1910). One of Teslenko's best works is the novel *Strachene zhyttia* (A Wasted Life, 1910). The critics of the time commented on Teslenko's talent and his animated narrative style, in which there are discernible Ukrainian literary influences (M. Vovchok in particular) and elements of impressionism. His prison stories and other tales are similar to V. Vynnychenko's early short stories in language and narrative style. The works of Teslenko have been published many times; the more complete editions are *Z knyhy zhyttia* (From the Book of Life, 1912, 1918, 1925), *Povne zibrannia tvoriv* (Complete Works, 1928 and 1967), and *Tvory* (Works, 1956 and 1977). A Teslenko literary memorial museum has been created in Kharkivtsi.

I. Koshelivets

Teslenko, Oleksandr, b 1 January 1949 in Donetsk, d 1990. Science fiction writer and anesthesiologist. He graduated from the Kiev Medical Institute (1975) and was senior prose editor for the journal *Dnipro*. Editions of his works have been published under the titles *Dozvol'te na-*

rodytysia (Let Me Be Born, 1979), *Kut paralel'nosti* (Angle of Parallelism, 1982), *Koryda* (Corrida, 1983), *Vykryvlenyi prostir* (Curved Space, 1985), and *Kam'iane iaitse* (Stone Egg, 1988). He died prematurely after working voluntarily in a hospital in the zone contaminated by the Chernobyl nuclear disaster.

Teslia, Ivan [Teslja] (Tesla), b 19 August 1902 in Nastasiv, Ternopil county, Galicia. Demographer and scholar; full member of the Shevchenko Scientific Society since 1949. Teslia was educated at Lviv University (PH D, 1939), where he served as a research associate in the Institute of Geophysics and Meteorology (1932–9). During the Second World War he headed the school section of the *Ukrainian Central Committee in Cracow. A lecturer at the Ukrainian Free University on climatology and meteorology, he emigrated to Canada in 1948, where he helped to organize the Shevchenko Scientific Society and became a specialist in the demography of the Ukrainian population in Canada. He is the author of *Heohrafiia Ukraïny* (Geography of Ukraine, 1938), *Nasha bat'kivshchyna* (Our Fatherland, 1942), *Ukraïns'ke naselennia Kanady* (The Ukrainian Population of Canada, 1968), and *The Ukrainian Canadians in 1971* (1976), as well as a coauthor of *Istorychnyi atlas Ukraïny* (A Historical Atlas of Ukraine, 1980).

Mykhailo Tesliuk

Hetman Pavlo Teteria

Tesliuk, Mykhailo [Tesljuk, Myxajlo] (pseud.: Ernest, Horyn, Led, Masalsky), b 12 November 1899 in Kaminka-Strumylova, Galicia, d 19 February 1985 in Lviv. Galician Communist figure. A founding member of the *Communist Party of Western Ukraine (KPZU) in 1919, he organized Party cells in Kaminka-Strumylova, Radekhiv, and Buzke and from 1921 served as the secretary of its committees for Kaminka-Strumylova and the Drohobych, Stryi, and Lviv districts. For his activities Tesliuk spent time in Polish prisons (1919, November 1921 to February 1923, October 1923 to June 1924). As a KPZU CC secretary (1924–8) and a candidate (1925–6) and member (1926–8) of its Politburo, he was in charge of the party's trade-union, rural, and Jewish work. A member of the Vasylkiv faction, which supported O. Shumsky in his Ukrainian policies, he was removed from the CC in 1928 but remained active in the Lviv organization. In 1932 he was called to Soviet Ukraine, where he worked as a lecturer in Kharkiv and was arrested in 1933 along with many other national-communists. In 1949 he was released from the concentration

camps in the far north and sent to cultivate the virgin lands in Central Asia. After being amnestied and rehabilitated in 1956, he returned to Lviv and worked as a researcher at the Lviv Oblast Archive. His memoirs appeared in 1979 and were republished in 1988.

Tetelbaum, Semen, b 7 July 1910 in Kiev, d 24 November 1958 in Kiev. Radio engineer and scientist; corresponding member of the AN URSR (now ANU) from 1948. He studied and taught at the Kiev Polytechnical Institute. He worked at the ANU Institute of Electrodynamics (from 1945) and held the chair of radio-transmitting electronics at the Kiev Polytechnical Institute. He made contributions to the development of television and radio networks, ultra-high-frequency generators, efficient methods of modulation, and wireless power transmission methods over long distances. He wrote numerous technical papers.

Teteria, Pavlo [Teterja] (Morzhkovsky), b ? in Pereiaslav, d ca 1670 in Adrianopolis, Turkey. Hetman of Right-Bank Ukraine. He studied at the Kievan Mohyla College and was a member of the Lviv Dormition Brotherhood. He married Kateryna (Olena), the daughter of B. Khmelnytsky, in 1660. Until 1648 he was city-court secretary of Volodymyr-Volynskyi, and in 1649 he was appointed chancellor of Pereiaslav regiment. In 1653 he became colonel of the regiment, and in March 1654 he was a member of the Ukrainian mission to Moscow to negotiate the Pereiaslav Treaty. In 1657–9 he was general chancellor to Hetman I. *Vyhovsky, and in 1658 he participated (with Yu. Nemyrych) in the negotiations aimed at uniting Ukraine with the Polish-Lithuanian Commonwealth. He then became openly pro-Polish and (with S. Bieniewski) attempted to have the fundamental concept of the Grand Principality of Rus' stricken from the Treaty of Hadiache. Teteria eventually opposed Vyhovsky and was instrumental in the execution of Vyhovsky and I. Bohun by the Poles. He is suspected by some historians (M. Kostomarov) of having accused Metropolitan Y. Neliubovych-Tukalsky and his brother-in-law, Yu. Khmelnytsky, of treason, which accusation resulted in their imprisonment in the Marienburg Fortress (1664).

Teteria was the hetman of Right-Bank Ukraine in 1663–5. In late 1663 and early 1664 he participated in Jan II Casimir Vasa's campaign in Left-Bank Ukraine. He assisted S. Czarniecki's Polish and Tatar forces in fighting against Cossack-led peasant uprisings in Right-Bank Ukraine. In 1665 the leader of the rebellion, B. Drozdenko, destroyed Teteria's army near Bratslav and forced him to resign the hetmancy. Teteria seized the military war chest, the state archive, and the state insignia and fled to Poland, where he converted to Catholicism and was given high administrative posts in Polatsk and the counties of Bratslav, Nizhen, and Chyhyryn. Soon thereafter he became embroiled in disputes with Polish magnates and fell upon misfortune. Unable to obtain support from the Polish government, he left for Turkey (via Iași, in Moldavia) and began plans for an attack on Poland, which was pre-empted by his death.

A. Zhukovsky

Teteriv River. A right-bank tributary of the Dnieper River which empties into the Kiev Reservoir after flowing northeast for 385 km through Zhytomyr and Kiev oblasts and draining a basin area of 15,300 sq km. In its upper

The Teteriv River

reaches the river and its valley are narrow and winding. It becomes 40–90 m wide with a valley of 4 km in its navigable lower course in Polisia. The river is used for industrial water supply, fishing, and irrigation. Granite and marble deposits occur in the river's basin. The major centers along the Teteriv include Zhytomyr, Korostyshiv, and Radomyshl. The ancient Rus' town of Horodske was also on the river.

Tetiana. A lively and humorous folk dance related to the *hopak*. Performed in 2/4 time, it enacts the story of an attractive, vivacious woman who is courted by many. The words of the song accompanying the dance vary from region to region.

Tetiiv [Tetijiv]. IV-10. A town (1989 pop 15,200) on the Roska River and a raion center in Kiev oblast. It was founded in the 12th century and razed by the Mongols. It is mentioned in a document in 1514 as the property of Lithuanian nobles. In 1569 it became part of Bratslav voivodeship, and in 1596 it was acquired by Prince K. Ostrozky, who moved the village to the other side of the river and fortified it. In 1601 it received the rights of *Magdeburg law. After being taken by the Cossacks in 1648, Tetiiv was recaptured by Poland in 1667. In 1793 it was annexed by Russia and became a volost center of Tarashcha county, Kiev gubernia. Today Tetiiv is an agricultural town with several food-processing enterprises, a brick factory, and a branch of the Bila Tserkva Haberdashery Sewing Consortium.

Teutonic Knights (*khrestonostsi*; German: Kreuzritter). A German order of knights established in 1198, during the Third Crusade, with the aim of liberating the Holy Land from Turkish rule. When the Turks regained control of Palestine, the knights stayed in Transylvania (1211–25) on the invitation of the Hungarian king, Andrew II. After a proposition by the Polish prince, Konrad of Mazovia, they resettled in the Baltic territories in order to defend Mazovia from attack by the pagan Prussians. The Teutonic Knights soon conquered Prussia and grew increasingly more powerful. The Galician prince Danylo Romanovych maintained good relations with them and participated in a joint campaign with them against the Yatvingians. The last Galician-Volhynian princes, Andrii and Lev II (1316), and Yurii II Boleslav entered into anti-Tatar alliances with them. Commercial relations between the Teutonic Knights and the Galician-Volhynian state were brisk; the Toruń–Lviv trade route originated in their territory and passed through the border town of Dorohychyn (a large number of lead seals usually affixed by state customs officers on imported German goods have been found there).

After the annexation of Ukrainian territories by Lithuania and Poland Ukraine's history continued to be linked with that of the Teutonic Knights. In a battle at the Vorsklo River (1399) a company of Teutonic Knights assisted a Ukrainian-Lithuanian force in fighting the Tatars. Later, in 1410, a combined Lithuanian, Polish, Belarusian, and Ukrainian force defeated the Teutonic Knights at the Battle of Tannenberg (Grunwald). After that defeat the order declined, and in 1466 it became a vassalage of Poland. In 1525 the Teutonic Knights converted to Protestantism, became secularized, and established an aristocratic Prussian duchy headed by the Hohenzollern dynasty.

Textile industry. A branch of *light industry that processes plant (cotton, flax, hemp, jute, kenaf, ramie), animal (wool, silk), and synthetic fibers into thread, woven and nonwoven fabrics, sack, rope, and other products. The textile industry in Ukraine includes the *wool, *cotton, *silk, *jute-hemp, *linen, and *knitwear industries.

As a cottage industry, weaving has been practiced in Ukraine since the Neolithic period. During the medieval period cloth was produced not only by peasants for their own use but also by craftsmen for the market. Kiev became an important center of textile manufacture and trade of textiles: silk and brocade were imported from Byzantium and Persia, and woolen cloth from Western Europe. During the Tatar period, as Kiev declined, the center of the textile industry moved west to Volhynia and Galicia. In the 16th and 17th centuries Lviv, Lutske, Kremianets, and Volodymyr-Volynskyi became the main centers of the industry. In the mid-17th century the industry spread to Left-Bank Ukraine. As trade guilds arose, the technology improved and the industry expanded. The Hetman state encouraged its development by means of protective tariffs. When Ukraine lost its autonomy in the

18th century, the industry declined. The mercantile policies of the Russian government favored the textile industry in central Russia and emphasized production for military purposes. The Ukrainian textile industry was cut off from foreign markets by the ban on the export of linen and hemp products (1714) and wool and yarn (1720) and the import of woven cloth, silk, and hosiery (1721). Moreover, Russian companies bought up the Ukrainian products at low prices and sold them in Moscow or abroad at high prices. In 1757, tariffs between Ukraine and Russian were abolished. A new tariff introduced in 1822 gave Russian textiles a monopoly in Ukraine. A special duty (1830) restricted the import of Polish woolen products into Ukraine.

At the end of the 17th century two chief forms of textile manufacturing were established in Ukraine: landowner or estate manufacturing based on the unpaid labor of serfs, and merchant or capitalist manufacturing based on hired labor. The owners of textile enterprises were the Cossack *starshyna*, Russian and Polish landowners, merchants (mostly Russians), and the imperial government. Almost all of the enterprises produced woolen cloth. They varied in size from shops with 15 workers to manufactories with 1,000.

The first large textile enterprises in Ukraine included the manufactories in Hlushytsia, near Putyvl (est 1719), and in Riashky, near Pryluka (est 1722). Both were owned by landlords. The first was one of the largest woolen-cloth factories in the Russian Empire: in 1797 it produced 145,400 m of cloth and employed 9,478 workers. By the end of the 18th century there were 12 cloth manufactories in Ukraine, producing 216,600 m of woolen cloth per year, or 14 percent of the empire's output. Almost all the cloth produced in landowners' manufactories was purchased by the state; merchant shops sold their output on the free market. The wool industry was closely tied to sheep farming. Only a small part of the wool produced in Ukraine was processed there: most of it, particularly that from Southern Ukraine, was exported to Russia. By 1859 there were 160 textile enterprises in Ukraine, with an output of 1,256,000 m of woolen cloth and a work force of 15,370. Their total production was worth 3.1 million rubles. Although Ukraine's textile industry grew, its share in the imperial output fell to 12 percent, and in the textile work force, to 20 percent (1859). Its geographical distribution changed somewhat during that period. In the first half of the 19th century many small enterprises appeared in Right-Bank Ukraine, particularly in Volhynia. By mid-century 69 percent of all woolen-cloth manufactories were located in Podilia and Volhynia, but their output was only 26 percent of Ukraine's total. The industry elsewhere was

on a larger scale: in Chernihiv gubernia only 9.6 of Ukraine's enterprises produced 25.8 percent of the total output, and in Kiev gubernia 5 percent of the enterprises produced 17.8 percent of the output. The gradual but irreversible mechanization of the industry, which began in the 1830s, resulted in its being concentrated in fewer and larger factories. The largest of them was in Klyntsi, in northern Chernihiv gubernia. In 1860 it manufactured 47.5 percent of the woolen cloth produced in Ukraine and accounted for 92 percent of the merchant-enterprise output.

Other branches of the textile industry, such as the linen and silk industries, were of secondary importance. The cotton industry, which held first place in the Russian textile industry, did not exist in Ukraine.

The emancipation of the serfs put an end to estate manufacturing, which in 1860 accounted for 47 percent of the textile production in Ukraine. Large capitalist enterprises did not replace the landowners' factories, and the textile industry declined in the second half of the century: by 1900 it consisted of only 51 enterprises, employing 4,469 workers. The decline cannot be attributed to natural factors: Ukraine possessed a supply of wool, flax, and hemp and could easily import other raw materials (cotton and jute), and it had a large labor base and a sizable home market. The decline was the result of the government's colonial policy, which treated Ukraine as a source of raw materials and a market for Russian manufactured goods. Of the various branches of the textile industry cotton and silk manufacturing hardly existed, and the linen and hemp industries were poorly developed, in Ukraine. The wool-processing industry accounted for 3.4 percent of the empire's wool output. The woolen-cloth industry consisted of small enterprises in the Dunaivtsi region of Podilia gubernia and the large factories in Klyntsi, on the edge of Ukrainian territory. The jute-hemp industry in Ukraine fared better: at the end of the century it accounted for 20 percent of the empire's output. In 1914 there were only six large textile factories in Ukraine: two wool-washing and a sack-weaving factory in Kharkiv, a sack-and-rope and a jute factory in Odessa, and the Luhanske felt factory. They accounted for only 0.6 percent of the total industrial output of Ukraine and employed only 14,800 workers (4 percent of the industrial work force). Ukraine's textile production accounted for only 1 percent of the empire's output, and Ukraine had to import textiles: in 1910-13 Ukraine spent 188.6 million rubles per year (40.4 percent of the total value of imports) on cotton and linen products from Russia and on woolen products from Poland.

During the First World War a number of small textile enterprises moved from Russia and Poland to Ukraine.

Output of the main branches of Ukraine's textile industry, 1940-88 (in million sq m; percentage of USSR output in parentheses)

	Knitwear*	Cotton	Woolen	Linen	Silk
1940	42.3 (22.7)	13.8 (0.3)	12.0 (10.0)	2.1 (0.7)	- (0.0)
1960	128.6 (22.1)	94.9 (1.5)	19.1 (5.6)	27.0 (5.2)	40 (4.0)
1970	217.9 (17.7)	238.0 (3.9)	66.0 (10.3)	61.0 (8.6)	88 (7.7)
1980	293.7 (18.1)	481.0 (6.8)	75.0 (9.8)	82.0 (11.9)	258 (14.5)
1985	319.6 (18.5)	534.0 (7.0)	67.0 (10.0)	96.0 (12.0)	283 (14.6)
1988	346.5 (18.3)	558.0 (6.9)	71.0 (10.0)	103.0 (10.7)	299 (14.1)

* In million items

After 1917 the textile industry collapsed: in 1920 its output was only 28.9 percent of the 1915 output, and even then most of it was designated for military use. The civilian population turned to homemade products. The New Economic Policy improved the economic situation: 65 percent of the small factories were leased by private business. Under the first two five-year plans several new branches sprang up: a knitwear industry in Odessa, Kharkiv, and Kiev and plant-fiber-processing industry in Odessa, Mykolaiv, and Dnipropetrovske oblasts. The other branches of the industry were restructured and expanded, particularly the wool industry. The value of Ukraine's textile production rose from 34.6 million in 1913 to 69.2 million rubles in 1927-8 (at fixed 1926-7 prices). Nevertheless, Ukraine's textile industry remained underdeveloped compared to the rest of the USSR. Ukraine continued to export materials in exchange for finished textile products from Russia. Ukraine accounted for only 1.3 percent of the Union textile production and employed 1.6 percent of the industry's labor force. In the First Five-Year Plan the Ukrainian industry was to receive only 2.3 percent of the USSR capital investment in the textile industry.

By 1940 Ukraine's textile output was valued at 797.4 million rubles. The knitwear industry by then was the most productive branch: it accounted for nearly 39 percent of the value of all textile production. Next came the jute-hemp industry (11 percent), and then the wool industry. Other branches, such as the linen and cotton industries, were less developed. With the exception of knitwear products, Ukraine continued to import finished textile goods from Russia.

The Second World War destroyed the textile industry in Ukraine, and its reconstruction was not completed until the mid-1950s. In the 1960s and 1970s new plants, such as the large *Kherson Cotton Textile Manufacturing Complex and smaller cotton factories in Ternopil, Chernivtsi, Lviv, Kiev, and Novovolynske, were built. The wool industry was expanded, with new factories in Stryi, Donetske, and Chernihiv. Silk factories were built in Kiev, Darnytsia (Kiev), and Cherkasy. New synthetic-fiber plants in Chernihiv, Cherkasy, and Kiev reduced the industry's dependence on natural fibers. During the 1980s Ukraine's textile industry continued to grow, although at a somewhat slower pace than other industries, such as machine building, chemicals, and food processing. Within the textile industry itself, knitted fabrics continued to be the fastest-growing branch. Cotton, linen, and silk manufacturing expanded at moderate rates; the woolen industry declined. The Ukrainian textile industry is still underdeveloped in the manufacture of consumer goods and cannot meet the demand for certain types of clothing.

B. Somchynsky, B. Wynar

Thalerhof. A village near Graz, Austria, where an internment camp was located during the First World War. Austria-Hungary's initial military failures and the Russian offensive on the eastern front in August and September 1914 resulted in widespread panic and paranoia in the Austro-Hungarian Empire. Thenceforth hundreds of Galician and Bukovynian *Russophiles suspected of being Russian sympathizers and fifth columnists were denounced by neighbors and savagely beaten by local mobs and soldiers (especially Hungarian troops). Many were murdered, and many others were court-martialed as trai-

The entrance to the Thalerhof internment camp

tors and summarily hanged or shot. Thousands of others were arrested and imprisoned or deported to several camps in Austria and Hungary. The arrests were abetted by the Polish-dominated civil service in Galicia, which exploited Austrian fears to undermine the organized Western Ukrainian community. Consequently not only Russophiles but also many nationally conscious Ukrainians were interned. The first 2,000 prisoners at Thalerhof, the largest camp, arrived on 4 September 1914, and by late 1914 the camp held 8,000 prisoners, 5,700 of them Ukrainians. In November 1916 it had 2,717 prisoners; 85 percent were Ukrainian, 76 percent were peasants, and 7 percent were Greek Catholic priests. Between 1914 and 1916, 14,000 internees passed through the camp. Its strict regime, the authorities' arbitrary actions, the starvation rations, the extremely unsanitary conditions, and various outbreaks of typhus and other diseases resulted in a high mortality rate among the prisoners. Although 1,767 deaths were registered, it can be assumed that there were many more; between 17 January and 31 March 1915 alone, 524 people died. The camp was closed down in May 1917. In the interwar years Galicia's Russophiles propagated the cult of 'Thalerhof martyrs.' The Thalerhof Committee in Lviv organized two reunions (1928, 1934) and published four volumes (1924-5, 1930, 1932; repr, Trumbull, Conn 1964) of eyewitness accounts of the repressions, deportations, and life in the camp. A Ukrainophile perspective is found in V. Makovsky's 1934 book of memoirs and documents about Thalerhof.

R. Senkus

Theater. Elements of theatricality can be traced in Ukrainian *folk customs and rites, *games, *folk oral literature, and *folk dances back to pre-Christian *pagan traditions and rituals. They are especially evident, even today, in the spring **vesnianky-hahilky*, the summer *Kupalo festival, and the winter *carols and above all in the ceremony of the Ukrainian *wedding. Theatrical entertainment and participation in many rituals was provided by **skomorokhy*. With the acceptance of Christianity in Ukraine, the Divine Liturgy took on elements of theatricality, and the church adopted or converted many pagan rituals for its own purposes. The recorded history of nonritual Ukrainian theater begins in 1619 with two *intermedes staged between the acts of a religious drama. The further development of Ukrainian theater was influenced by European medieval theater, the Renaissance, and classicism in the court (see

*Rozumovsky's Theater) and in *school drama, particularly at the Kievan Mohyla Academy. The prohibition of school performances at the academy by Metropolitan S. Myslavsky in 1765 resulted in many of its students contributing to the development and popularization of **vertep* puppet theater, which was portable so that those involved were less likely to be prosecuted. *Vertep* performances consisted of two parts, religious and secular, and were the prevailing form of theatrical entertainment in rural areas. Also common was a folk drama consisting of a one-act play based on a local event – for example, *Koza* (The Goat), *Mlyn* (The Mill), *Did i baba* (Old Man and Old Woman), and *Pip i smert'* (The Priest and Death). Eventually more historical portrayals evolved – *Tsar Maksymilian*, *Tsar Herod*, and *Lodka* (The Boat); these were the archetype of 19th-century ethnographic theater.

Ukrainian secular theater became popular during the 19th century, beginning with the staging of the first Ukrainian-language plays of I. Kotliarevsky and H. Kvitka-Osnovianenko by the *Poltava Free Theater in 1819. From the end of the 18th century, Ukrainian landlords organized *serf theaters at their estates, where Ukrainian plays were sporadically performed. Ukrainian performances were also staged by Russian-Polish troupes. The pioneering Ukrainian actors were K. Solenyk, M. Shchepkin, and L. Mlotkovska. In Western Ukraine, Ukrainian performances (particularly by H. Yakhymovych in Lviv), such as the dramatization of a Ukrainian wedding in 1835, first occurred in theological seminaries. Amateur secular performances began at the end of the 1840s in Kolomyia, Peremyshl, and Ternopil with adaptations of Kotliarevsky's dramas and with plays by European dramatists, such as J. Korzeniowski, A. Kotzebue, and Molière.

A scene from Marko Kropyvnytsky's *Po revizii* (After the Audit) staged by Kropyvnytsky's troupe in the 1880s. From left: Mykola Sadovsky, Hanna Zatyркеvych-Karpynska, Panas Saksahansky, Kropyvnytsky, and Mariia Zankovetska

In Russian-ruled Ukraine many amateur and *touring theater groups were active by the end of the 1850s. In Kiev the leader in setting up amateur troupes was M. *Starytsky, and in rural areas, I. *Karpenko-Kary. Although the 1863 tsarist government circular prohibited

the use of the Ukrainian language on stage, the development of Ukrainian amateur theater continued. It reached its apex in the performance in 1873 of M. Lysenko's opera *Rizdviana nich* (Christmas Eve, based on N. Gogol's story), directed by Starytsky in a populist-ethnographic style.

The first professional Ukrainian theater was a touring troupe in Austrian-ruled Galicia and Bukovyna under the auspices of the Ruska Besida Society (see *Ukrainska Besida Theater). Founded in 1864, it is an important landmark in the evolution of modern Ukrainian theater, and notable for its productions, in Ukrainian only, directed by O. Bachynsky. The Ruska Besida Theater reached the height of its popularity under I. Hrynevetsky and was active until 1914.

In contrast to the more liberal circumstances in Western Ukraine, the 1876 *Ems Ukase completely prohibited Ukrainian performances in Russian-ruled Ukraine, thereby paralyzing Ukrainian theatrical life there until 1881, when the first touring theater in eastern Ukraine was founded, under M. *Kropyvnytsky. Touring theaters led by Starytsky (1885) and M. *Sadovsky (1888) and *Saksahansky's Troupe (1890) followed. Their repertoire consisted mostly of populist-romantic and realistic plays by Kropyvnytsky, Starytsky, and Karpenko-Kary. Censorship did not permit performances of plays with historical and social themes and completely prohibited the staging of plays translated from other languages. Each performance had to include at least one Russian play, and the territory of the touring theaters was limited to Russian-ruled Ukraine. In 1897 Starytsky, Sadovsky, M. *Zankovetska, and P. Saksahansky attended the First All-Russian Conference of Stage Workers in Moscow, presented Karpenko-Kary's *Zapyska* (Memorandum), and spoke out against the restrictive conditions imposed on Ukrainian theater.

In 1905 censorship eased, and Sadovsky was able to organize the first resident Ukrainian theater in Kiev in 1907 (see *Sadovsky's Theater). He successfully produced Ukrainian operas as well as melodramas and comedies of manners in translation. His staging of the new Ukrainian repertoire, including psychological dramas by V. Vynnychenko and Lesia Ukrainka and impressionistic études by O. Oles, was less successful. Populist-ethnographic theater gave way to the realistic-psychological style of acting of I. *Marianenko and the *Society of Ukrainian Actors (1916), the *State Drama Theater (1918), and the *People's Theater (1918, under Saksahansky).

In March 1917 the fledgling Central Rada endorsed the creation of a Theatrical Committee. The committee began publishing **Teatral'ni visty* and organized the *Ukrainian National Theater, under I. Marianenko, M. Hrushevska, M. Vorony, and O. Koshyts, which was active until July 1918 and performed in a realistic style.

Undoubtedly, the boldest innovations in the modernization of Ukrainian theater were initiated by L. *Kurbas, whose early work developed at *Ternopilski Teatralni Vechory (1915) and *Molodyi Teatr (1917–19). At Molodyi Teatr Kurbas experimented with a varied repertoire, including psychological-realistic performances of Vynnychenko's plays, a stylized *vertep*, and a nascent expressionism in Sophocles' *Oedipus Rex* and in stagings of T. Shevchenko's poetry, particularly 'Ivan Hus (Jan Hus).' In 1920 Kurbas produced an adaptation of Shevchenko's poem *Haidamaky* (Haidamakas) for the *Shevchenko First

Theater of the Ukrainian Soviet Republic, M. *Tereshchenko founded the leftist Tsentrostudiia (see *Mykhailychenko Theater), and H. *Yura founded the Franko New Drama Theater (see *Kiev Ukrainian Drama Theater). The leading new Ukrainian theaters after 1917 also included the Zankovetska Theater in Kiev (see *Lviv Ukrainian Drama Theater) and the Odessa Derzhdrama (see *Odessa Ukrainian Music and Drama Theater). The core of Molodyi Teatr formed the nucleus of Kurbas's *Kyidramte (1920) and *Berezil (1922).

The Berezil Artistic Association (1922–33) was an avant-garde theater of European significance. Here Kurbas developed his method of 'transformed gestures' and trained a whole generation of theater artists. Berezil was composed of six studios and had a staff of directors and many committees. It was first located in Kiev (1922–6), and there Kurbas staged European expressionistic plays, adaptations, and new interpretations of world classics. Later it moved to Kharkiv (1926–33), where Kurbas's most important productions were of new Ukrainian plays by M. *Kulish – *Narodnii Malakhii* (The People's Malakhii), *Myna Mazailo*, and *Maklena Grassa*. For contravening the principles of *socialist realism Kurbas was removed from Berezil in October 1933 and was later arrested.

A scene from W. Shakespeare's *Hamlet* performed at the Lviv Theater in 1943 (director: Yosyp Hirniak). In front, from left: Bohdan Pazdrii (King Claudius), I. Lisnenko, Voldodymyr Zmii, V. Melnyk, Volodymyr Blavatsky (Hamlet), S. Kryzhanivsky, S. Dubrovsky (Laertes); in the rear, Bezkorovaina, Vira Levytska (Queen Gertrude), T. Nahirniak, V. Kalyn

In Western Ukraine in 1919, some Ukrainian theaters were attached to the Galician military units (see *Theater of the Legion of Ukrainian Sich Riflemen, *Lviv Ukrainian Independent Theater, and *New Lviv Theater). The Theater of the Western Ukrainian National Republic was led by K. *Rubchak. In Lviv in 1922 the *Ukrainian Drama School was founded, and the journal **Teatral'ne mystetstvo* appeared. Many touring theaters – notably those under Y. *Stadnyk, I. Kohutiak, O. Karabinevych, and S. Terletsky as well as *Nova Stsena and the *Ruthenian Theater of the Prosvita society – were active in Galicia, Volhynia, Bukovyna, and Transcarpathia. Berezil's ideas were adopted by the experimental *Zahrava Theater (1933–8), led by V. Blavatsky, and by the moderate *Tobilevych Theater, led by M. Bentsal. In 1939 both were forcibly united to form the first Soviet theater in Western Ukraine, the *Lesia Ukrainka Theater, and, under the Nazi occupation (1941–

4), the drama section of the Lviv Opera Theater. By the Second World War there was also noticeable theatrical activity in Bukovyna and Transcarpathia – the *Ruthenian Theater of the Prosvita Society in Uzhhorod, for example. In 1934 the musical-drama theater Nova Stsena was founded.

After the institution of Soviet rule all Ukrainian theaters fell under state control. In 1919 the All-Ukrainian Theater Committee set out to 'implement reforms': it nationalized theaters, sponsored competitions for revolutionary plays, organized touring theaters for the Soviet army (eg, the Poltava Ukrainian Drama Society), founded workers' and peasants' theaters (see *Workers' and collective-farm theaters), and forced many theatrical workers to participate in *agitprop theaters.

In 1934 socialist-realism, the 'most progressive method of portraying reality,' was applied to Ukrainian theater. It affected every aspect – *theater arts education, *scenery design, *drama, *theater studies, and even *film and *television. The insistence upon socialist realism resulted in the dominance of contemporary Soviet drama and an almost complete absence of new contemporary European repertoire (approved repertoire was published in **Masovyi teatr*), the subjugation of all theaters to the Stanislavsky method of acting and directing, a negation of all stylistic variation in performances, and the suppression of any experimentation whatsoever. Its major effects have been a dearth of contemporary Ukrainian dramaturgy, a drastic reduction in the number of spectators, and a sense of frustration among Ukrainian theater workers, not unlike that of a century ago. The partial rehabilitation of Kurbas and his followers in 1961 brought about no significant improvements, and neither did the introduction of perestroika in 1986. In recent years, however, new Ukrainian theaters – among them the Kiev Experimental Theater-Studio, the Kiev Youth Theater (est 1979) led by L. *Taniuk, the political cabaret-style Ne Zhurys Theater in Lviv, and the *Lviv Ukrainian Youth Theater-Studio – have attained remarkable theatrical success.

The Soviet regime, assisted by Party-backed organizations such as the *Ukrainian Theatrical Society (which publishes **Ukrains'kyi teatr*) and the Union of Theatrical Workers of Ukraine (est 1987), closely monitored and regulated the activity of Ukrainian theaters. They were classified according to status – municipal, oblast, state, *puppet, amateur, or *young spectator's – and profile – Ukrainian, Russian, drama, musical-drama, *opera, comedy, small forms, and so on. The number of theaters in Ukraine was reduced from 81 in 1950 to 60 in 1964 – 42 drama (many have become musical-drama), 5 opera, and 13 young spectator's (8 in 1987). In 1988 there were 38 Ukrainian, 51 Russian, and 24 bilingual theaters in Ukraine. Only half the theaters in Kiev are Ukrainian; two are Jewish. The Kiev Museum of Theater, Music, and Cinema Arts and the Museum of Literature of Ukraine have outstanding theatrical exhibits.

In the West after the Second World War, the *Ukrainian Theater Artists Association was formed to co-ordinate theaters in the DP camps. Among these were the Ensemble of Ukrainian Actors (see *Ukrainian Theater in Philadelphia) and the *Theater-Studio of Y. Hirniak and O. Dobrovol'ska.

In the diaspora, Ukrainian communities have not been sufficiently concentrated to support professional theater.

Olimpiia Dobrovolska and Yosyp Hirniak in 'Maty i ia' (Mother and I; script by Yurii Lavrinenko and Ivan Koshelivets based on Mykola Khvylovy's stories) staged by their Theater-Studio in New York on 9 October 1949

Nevertheless, amateur theaters have sporadically performed in most cities where Ukrainians have settled, and Ukrainian church, school, and youth organizations, such as Plast, have staged theatrical performances. In Toronto the Zahrava Theater has been active since 1953, and the Avant-Garde Ukrainian Theater (est 1983) was notable for its staging of contemporary dramas by S. Mrožek, S. Beckett, and I. Kostetsky as well as a production of a *zhyyvy vertep*. Since the 1970s, theatrical and film activists, such as J. Karasevich, H. Kuchmij, L. Mykytiuk, T. Shipowick, and S. Wodoslawsky, have brought productions on Ukrainian themes into the mainstream of Canadian culture. In Australia there are Ukrainian theaters in Sydney and Melbourne. In Detroit the Ukrainian Theatrical Society was founded in 1960. In New York L. Krushelnyska has headed the Ukrainian Theater Ensemble since 1965. Also in New York the Yara Arts Group, led by V. Tkacz, has created theater pieces (in English) based on Ukrainian drama, poetry, and documentary material since the late 1980s.

V. Revutsky

Theater, amateur. In the 1920s the number of amateur theaters in Soviet Ukraine performing works by local authors and professional playwrights for millions of spectators was estimated at 7,000. Some of their repertoire was taken from the journal *Sil's'kyi teatr* (later *Masovyi teatr*). From 1930 amateur theaters were regulated by central

registration and instruction facilities. During periodic performing competitions held by the Ukrainian Ministry of Culture and republican trade-union councils, a few amateur theatrical circles (eg, 58 from approx 10,000 in 1964) were granted the higher designation Amateur People's Theater, with a drama, opera, ballet, or musical comedy profile. These theaters were also responsible for preparing cultural-educational programs for *tekhnikums*. Because of their controlled activity and restricted repertoire and the dominance of Russian-language performances, amateur theaters did not have a positive impact in Ukraine.

Theater arts education. Early theatrical training in Ukraine took place from the late 18th century in schools attached to the *serf theaters on estates. In the 19th century private theatrical schools became popular. During this time M. *Shchepkin, who lectured in theaters in Kharkiv and Poltava, helped develop a more realistic style of acting. His methods were developed by the noted Ukrainian directors M. Kropyvnytsky, M. Strytsky, M. Sadovsky, and P. Saksahansky.

Professional theater arts education in Kiev began in 1904 with the opening of a drama department at the *Lysenko Music and Drama School in Kiev, under the directorship of M. *Strytska. The curriculum included drama, dance, fencing, makeup, history and theory of drama, and history of costumes. The main goal of the department was to train young actors for work in a contemporary Ukrainian theater. In 1918 the school was reorganized as the Lysenko Music and Drama Institute; it existed until 1934. Its director, L. *Kurbas (assisted by H. Ihnatovych), trained the students in his method of 'transformed gestures.' In 1934 the Lysenko Institute was abolished, and the *Kiev Institute of Theater Arts was formed in its place, with training based on K. Stanislavsky's method. The Berezil theater (1922–33), at first in Kiev and then in Kharkiv, also held educational workshops and lectures. In Kharkiv the Music and Drama Institute was formed in 1923, and until 1934 the training was based on Kurbas's method. In 1939 it became the *Kharkiv Theater Institute (since 1963 the *Kharkiv Institute of Arts). Its theater program includes stage acting, directing, puppetry, and *theater studies. In Lviv there was a theatrical school in 1922–44 led by the former Berezil actors Y. *Hirniak and O. *Dobrovolska. In Odessa the Theater Arts and Technology Institute (est 1945) teaches stage and scenery design, makeup, lighting, and costume and prop making. The Dnipropetrovske Theater Academy teaches drama and puppetry. Theatrical *scenery education is offered by the Kiev State Art Institute and the Kharkiv Industrial Design Institute. Theater administration is taught at the institutes of culture in Kiev, Kharkiv, and Rivne and in other cultural education schools. (See also *Music education.)

V. Revutsky

Theater of the Legion of Ukrainian Sich Riflemen (Striletskyi teatr). A touring theater (est 1916) under the artistic directorship of K. *Rubchak, consisting mostly of female actors from the *Ukrainska Besida Theater, that enjoyed the protection of senior Ukrainian officers in the Austrian army and employed actor soldiers for the male roles in its productions. For official purposes it used the name *Ukrainska Besida Theater*. Ye. Kokhanenko and M. Bentsal were stage directors; among the male actors were

Y. Hirniak, V. Kossak, P. Soroka, A. Nyzhankivsky, and I. Rubchak; among the female actors, besides Rubchak, were K. Pylypenko, A. Osypovycheva, and N. Levytska; Ya. Barnych was composer and conductor. The theater's productions – Ukrainian ethnographical plays, Western classical operettas, and the operas *Halka* by S. Moniuszko and *Kateryna* by M. Arkas – were staged throughout Galicia and along the front until November 1918.

Theater of the Supreme Command of the Ukrainian Galician Army. See Lviv Ukrainian Independent Theater and New Lviv Theater.

Theater studies. A field of study established in Ukraine in the 20th century. From the 1860s, individual articles on Ukrainian theater appeared in Ukrainian, Russian, and Polish periodicals. In his historical survey *Rus'ko-ukraïns'kyi teatr* (Ruthenian-Ukrainian Theater, 1894) I. Franko was the first to separate theater studies from literature studies. A substantial review of the previous 25 years of Ukrainian theater was made by L. Starytska-Cherniakivska in *Ukraïna* (nos. 10–12, 1907), and M. Vorony published *Teatr i drama* (Theater and Drama, 1913). From 1917 research on Ukrainian theater was concentrated in Kiev, at the *Lysenko Music and Drama Institute, the theater history department of the AN URSR (now ANU), and the Theater Museum. With the crackdown on Ukrainian culture during the 1930s, this research was drastically reduced. Important histories were published, however, including those by O. Biletsky (1923), O. Kysil (1918, 1920, 1925), K. Solenyk (1928), P. Rulin (1927, 1929), Ye. Markovsky (1929), D. Antonovych (1925), H. Khotkevych (1924), S. Charnetsky (1934), and O. Biletsky and Ya. Mamontov (1941); M. Sadovsky's (1933, 1956) and P. Saksahansky's (1935) memoirs; and A. Borshchahivsky and M. Yosypenko's *Shevchenko i teatr* (Shevchenko and Theater, 1941). Among theatrical critics of that period were H. Aleksandrovsky, K. Burevii, V. Chahovets, D. Hrudyna, V. Khmury, Yu. Mezhenko, Ya. Savchenko, Y. Shevchenko, Yu. Smolych, and, in Western Ukraine, V. Levytsky, H. Luzhnytsky, I. Nimchuk, M. Rudnytsky, and O. Tarnavsky.

After the Second World War the center of theatrical studies became the Department of Theater (until 1963 the Department of Music and Theater) at the AN URSR (now ANU) Institute of the History of Arts, Folklore, and Ethnography and the *Kiev Institute of Theater Arts, but little was published until the 1950s. The first important postwar history was I. Marianenko's *Mynule Ukraïns'koho teatru* (The Past of Ukrainian Theater, 1953). Tendentious descriptions of the activities of Berezil, Zahrava, and other experimental theaters were given in I. Piskun's *Ukraïns'kyiadians'kyi teatr* (Ukrainian Soviet Theater, 1957) and *Ukraïns'kyi dramatychnyi teatr* (Ukrainian Drama Theater, vol 2, 1959). Biographies and memoirs written by or about M. Zankovetska (1955), S. Tobilebych (1957), V. Chahovets (1956), L. Linytska (1957), P. Saksahansky (1958), F. Levytsky (1958), P. Kovalenko (1962), L. Bilotserkovsky (1962), M. Rudnytsky (1963), H. Yura (1965), H. Zatyrevych-Karpynska (1966), I. Marianenko (1968), and O. Zaharov (1969) were published, as were monographs about theaters – Sadovsky's Theater (1962), the Ruthenian People's Theater (1960), and the Kharkiv Ukrainian Drama Theater (1979). Works were published also on *ballet,

on *opera, on the stage directorship of Marian Krushelnitsky (1969), V. Vasylo (1980), and L. Kurbas (1987, 1988, 1989), and on *scenery design. Periodical literature includes the annual *Teatral'na kul'tura* and the bimonthly **Ukraïns'kyi teatr*. Works on Ukrainian theater in the West have been written by Y. Hirniak (1954, 1982), the Ukrainian Theater Artists' Association (OMUS, 1975), B. Boychuk (1975), and M. Radysh (1966). Theatrical critics in the diaspora include V. Haievsky, I. Kostetsky, H. Luzhnytsky, I. Nimchuk, Yu. Sherekh, O. Tarnavsky, and L. Onyshkevych. R. Bahry and V. Tkacz have written in English on the work of L. Kurbas.

V. Revutsky

Theater-Studio of Y. Hirniak and O. Dobrovolska. An actors' studio established by Y. *Hirniak and O. *Dobrovolska in 1946 in Landeck, Austria. It was based in Mittenwald, Germany, and staged over 250 performances throughout West Germany until 1949. It resumed its activities that year in New York and was dissolved in 1951; its successor was the *Ukrainian Theater in America. The Theater-Studio synthesized modern elements and traditional Nativity plays in I. Cholhan's satirical revues, such as *Zamotelychene telia* (The Confused Calf), *Blakytyna avantura* (The Blue Adventure), and *Son Ukraïns'koi nochi* (A Dream of a Ukrainian Night); adapted the old ethnographical repertoire, such as M. Kropyvnytsky's *Poshylyts' u durni* (They Made Fools of Themselves); introduced modernist Ukrainian plays, such as Lesia Ukrainka's *Orhilia* (The Orgy); adapted for the stage M. Khvylovy's *Maty ia* (Mother and I) and *Zaivi liude* (Superfluous People); and staged Western European classics such as C. Goldoni's *The Servant of Two Masters* and H. Ibsen's *Ghosts*. Among the actors were V. Zmii, S. Zalesky, B. Khabursky, T. Pozniakivna, A. Kryvetsky, L. Krushelnitska, V. Lysniak, and M. Cholhan.

Boichuk, B. *Teatr-studiia Iosypa Hirniaka Olimpïi Dobrovol's'koi* (New York 1975)

Theoctistos, b ?, d 6 August 1123 in Chernihiv. Bishop. He was the sixth hegumen (from 1103) of the Kievan Cave Monastery, where he lived from the 1070s. During his period in office, construction of the refectory was concluded (1108). In 1108 he led the movement for the canonization of *St Theodosius of the Caves. In January 1112 he was consecrated bishop of Chernihiv. He is believed to have been buried in the Kievan Cave Monastery.

Theodosius of the Caves. See Saint Theodosius of the Caves.

Theodosius the Greek (Teodosii Hrek). Hegumen of the Kievan Cave Monastery (1142–56). A Byzantine monk, he arrived in Kiev in the first quarter of the 12th century and became a close friend of the princely monk *Sviatoslav (Sviatosha) and an emissary of Grand Prince *Iziaslav Mstyslavych. For Sviatoslav he translated into Church Slavonic the famous *Dogmatic Letter* of Pope St Leo I to Patriarch St Flavian and wrote an epilogue and prologue to it.

Theognostos, b ?, d 1353 in Kiev. A Greek who was ordained as metropolitan of Kiev in 1328 in Constantinople

by Patriarch Isaiah, and served until 1353. He resided in Moscow and attempted to suppress the rival Halych and Lithuanian metropolitans, who also claimed jurisdiction over eparchies of Kiev metropolity. In 1342 he was interned by the Tatars, but later the church's privileges were restored. He was canonized by the church.

Theologica Societas Scientifica Ukrainorum. See Ukrainian Theological Scholarly Society.

Theological Academy of the Ukrainian Autocephalous Orthodox Church (Bohoslovska akademiia Ukrainskoi Avtokefalnoi Pravoslavnoi Tserkvy). A theological academy founded in 1946 in Munich to provide Orthodox priests and hierarchs in the diaspora with higher education, and to develop Ukrainian theological studies and church historiography. In addition to its faculty of theology, until 1947 it included a pedagogical faculty (called the Theological-Pedagogical Academy) that was to train teachers and scholars. Archbishop M. Khoroshy (1946–9) and Bishop B. Malets (from 1949) were the trustees of the academy, and P. Kovaliv (1946–9) and H. Vashchenko (1950–2) served as rectors. The professors included P. Kalynovych (dean of the theology faculty), V. Petrov, P. Kurinny, O. Ohloblyn, N. Polonska-Vasylenko, V. Derzhavyn, Ya. Moralevych, M. Markevych, I. Vlasovsky, and P. Dubytsky. The academy published a bulletin (6 issues, 1946–9) edited by V. Ivashchuk, and its students' association published its own organ, *Bohoslov* (Theologian), as well as texts of lectures read at the school. The academy offered regular courses until late 1950, by which time most Ukrainian refugees had settled in North America. It then offered correspondence courses until it closed in 1952.

Theological education. See Theological seminaries.

Theological Scholarly Society. See Ukrainian Theological Scholarly Society.

Theological seminaries. Educational institutions for spiritual formation and instruction on religious doctrine and rite, largely or exclusively for future clergymen. Seminaries were first established in Ukraine in the 18th century. Before that, prospective clergymen obtained their theological education in a variety of formal and informal settings, mostly through schools affiliated with a church or monastery run by clerics. From Rus' times to about the 17th century, religious instruction was the major part of any general education. Candidates for the priesthood usually supplemented their formal studies with a period of apprenticeship to a senior priest. Religious training could also be acquired through private studies or study abroad; following such a study a person who could demonstrate to a bishop or his designate that he was literate and qualified could be admitted to the priesthood. The growth of new educational institutions in Ukraine in the 16th and 17th centuries, such as the brotherhood schools, the Ostrih Academy, the Zamostia Academy, and the Kievan Mohyla Academy, increased the options available to prospective clerics for gaining a general education and rudimentary theological training.

The first seminaries in Ukraine were established on the basis of Orthodox colleges and cathedral theology

schools. *Chernihiv College, established in 1700, was reorganized as a theological seminary in 1776. *Pereiaslav College, established in 1738, soon became a seminary. Sometimes referred to as the 'Little Russian seminary,' it was active until 1862. A theological seminary existed in Novhorod-Siverskyi from 1785 until 1797, when it was transferred to Poltava. It closed down in 1819 and was not reopened until 1862. *Kharkiv College was initially (1722–34) an eparchial seminary before growing into a more general college; it reverted to its original role in 1817. Other seminaries were created in the late 18th and early 19th centuries in Zhytomyr, Sharhorod (1797, moved to Kamianets-Podilskyi in 1806), and Kiev (1817).

Through the 19th and early 20th centuries a full system of Orthodox theological seminaries under the control of the Russian *Holy Synod was established in Ukraine as part of a general overhaul of theological training in the Russian Empire. Each eparchy set up a seminary to train candidates for the priesthood. The course of studies consisted of four years of general studies followed by two years of theological studies, with the language of instruction being Russian. If a seminarian wished to continue his studies, he could enter a theological academy; other options were available after 1896, when the universities of Warsaw, Dorpat, and Tomsk were opened to seminarians. Theological academies (eg, the *Kiev Theological Academy) also trained professors for the seminaries. The eparchial seminaries were also charged with overseeing lower-ranking theological schools at the county level which prepared candidates for seminaries. By 1911 the seminary system was fully in place, and institutions could be found in Kiev, Kamianets-Podilskyi, Zhytomyr, Kharkiv, Odessa, Katerynoslav, Symferopil, Yelysavethrad (now Kirovohrad), Poltava, Chernihiv, and Kholm. In the early 1920s the Soviet regime liquidated the theological seminaries. Only after the Second World War were seminaries reopened in Ukraine, in Kiev, Odessa, and Lutske.

In the interwar period some Ukrainian priests were trained at the seminary of the Polish Autocephalous Orthodox church in Kremianets. There was a department of Orthodox theology, with such prominent Ukrainians as O. Lototsky and V. Bidnov on the staff, at the University of Warsaw. In Bukovyna limited training was provided for Ukrainian priests at the residence of the metropolitan of Bukovyna in Chernivtsi. In Canada, Ukrainian Orthodox theological training has been centered at *St Andrew's College in Winnipeg; in the United States the St Sophia Seminary was established at South Bound Brook, New Jersey, in 1975.

A systematic approach to theological education for Catholic Ukrainians was not developed until the late 18th century. A good number of prospective clergymen were schooled in Catholic cathedral schools or Jesuit-run colleges with a Latin rite orientation. In the 18th century a network of approx 50 schools modeled on Jesuit counterparts and run largely by Basilian monks was established in Right-Bank Ukraine. The majority of their pupils were Polish or Polonized gentry, although the schools provided a basic education for future Uniate clerics as well. Some efforts were made to establish Uniate theological seminaries during the 17th century, but these institutions, such as those found in Zhytomyr, Radomyshl, and Kamianets-Podilskyi, were usually short-lived. A number of private

seminaries also sought to meet the demand for qualified Uniate clergymen. Nevertheless, the majority of Uniate clergymen ultimately received their education in Roman Catholic institutions. Many of them, particularly future hierarchs, even studied outside of Poland, at schools in Rome, Vienna, Prague, or elsewhere.

Following the incorporation of Galicia into Austria, demands were made by both secular and ecclesiastical authorities for an improvement in the qualifications of the Uniate clergy. Subsequently a Greek Catholic seminary called the *Barbareum was formed in Vienna, in 1774. It was succeeded by the *Greek Catholic Theological Seminary in Lviv in 1783, which provided theological training for future clergymen until 1944. The program was supplemented by courses, some of them taught in Ukrainian, offered by the theology department of Lviv University. During the interwar period difficulties emerged in maintaining the Ukrainian presence in the theology department because of hindrance from Polish authorities. A theology faculty was thereupon added to the seminary, and in 1928 it was expanded into the separate *Greek Catholic Theological Academy. A higher education in theological studies could also be obtained by prospective Uniate clergymen at Lviv University or at a number of other Catholic religious study centers, particularly in Rome, Vienna, Innsbruck, Budapest, and Warsaw. For a period after the establishment of the Lviv seminary, the *Studium Ruthenum (1787–1809) offered a remedial means of providing upper-level theological training for Ukrainian seminarians not fluent in Latin.

Other eparchies in Western Ukraine also established Ukrainian Catholic theological seminaries. A seminary existed in Peremyshl in 1780–3. In 1845 it was revived, but offered only a fourth and final year of study. It became a full seminary in 1912. Stanyslaviv eparchy opened its own seminary in 1907. Two seminaries were established in Transcarpathia, one in Uzhhorod (1778) and the other in Prešov (1880). As well, a Jesuit-supported Catholic seminary was opened in Dubno, Volhynia, in 1931 in order to shore up the *Neounion church movement. All these institutions were liquidated by the Soviet authorities, starting in 1939, with the first occupation of Western Ukraine, and continuing after 1945, with the annexation of the region into the Ukrainian SSR. With the renewed religious tolerance in the last years of the USSR seminaries were opened in 1990 in Lviv, Uzhhorod, and Ivano-Frankivske.

Ukrainian Catholic seminaries have also been established outside of Ukrainian territories. *Križevci eparchy operates a small seminary in Zagreb. In the United States St Josaphat Seminary was founded by the Philadelphia exarchate in 1942; it was moved to Washington in 1950. A second seminary (Cyril and Methodius) for Transcarpathian Ukrainians was established in 1951 in a suburb of Pittsburgh. A seminary was founded in Hirschberg, Bavaria, in 1946 and moved in 1949 to Culemborg, Holland, where it functioned until 1951. The Holy Spirit Intereparchial Seminary was opened in Ottawa in 1981. The oldest Ukrainian Catholic seminary in the West remains *St Josaphat's Ukrainian Pontifical College in Rome, which was established in 1897. Its program of theological studies was augmented and completed by the formation of the Ukrainian Catholic University of St Clement the Pope, in Rome in 1963.

Candidates for the priesthood commonly receive part of their training in other institutions, such as theological

institutes, the theology faculties of universities, or colleges. Particularly significant are the *minor seminaries established by the Ukrainian Catholic church in Galicia during the interwar era and in the West. Basilian monasteries also have trained many people for the priesthood in their novitiates.

Theology (*teolohiia, bohosloviie, or bohosloviia*). The study of religious, especially Christian, faith, practice, and experience, including subjects such as God, his relation to humankind and the world, and eschatology.

The origins of Christian theology in Ukraine date from the period of Kievan Rus'. From the reign of Yaroslav the Wise on, many Byzantine scriptures and homiletic collections were transcribed and translated: eg, the *Shestodnev* (Hexaemeron) of St Basil the Great, the *Zlatostrui* (Golden Ray) of St John Chrysostom, *Zlatoust* (Chrysostom), *Zlataia tsip* (Golden Chain), *Izmarahd* (Emerald), and *Pchela* (Bee). The first Old Ukrainian theological homilies and epistles were written in the 11th and 12th centuries by the Kievan metropolitans Ilarion, Nicephorus I, and Klym Smoliatykh; by St Theodosius of the Caves; and by Bishop Cyril of Turiv. Klym Smoliatykh advocated the use of ancient texts in philosophical education and the symbolic method of explicating the Bible. A certain revival in scholarly theology occurred after the 1439 Church Union of *Florence, as reflected in the 1476 epistle of Metropolitan M. Pstruch of Kiev to Pope Sixtus IV.

In the 16th century, conflict developed between the Ukrainian supporters of the Christian West and the Orthodox; it culminated in bitter polemics around the 1596 Church Union of *Berestia between P. Skarga and I. Potii on the Catholic side and S. Zyzanii, Kh. Filalet, Ostrozkyi Kliryk, H. Smotrytsky, Yu. Rohatynets, and I. Vyshensky on the Orthodox side. In his treatment of a number of general religious and religious-social problems, Vyshensky voiced his opposition to contemporary philosophical and theological teaching methods. The second half of the 16th century saw the rise of a group of translators of and commentators on the Bible (eg, Hegumen Hryhorii of the Peresopnytsia Monastery, V. Nehalevsky, V. Tsiapinsky), the writing of many *didactic gospels, and the gathering of a group of theologians in Ostrih (eg, H. Smotrytsky, V. Surazky, M. Broniewski, Ostrozkyi Kliryk, M. Smotrytsky). The supporters of Western Christianity based their views in dogmatics on the Greeks, but used the methodology and certain theological theses of the Roman church.

In the first half of the 17th century, religious polemics became more sophisticated and theological. The leading exponents were Z. Kopystensky, M. Smotrytsky (to 1627), L. Karpovych, K. Stavrovetsky (to 1626), A. Muzhylovsky, and, later, P. Mohyla, I. Gizel, I. Galiatovsky, and L. Baranovych on the Orthodox side, and I. Potii, P. Arkudii, Y. Rutsky, M. Smotrytsky (from 1627), L. Krevza, I. Dubovych, and A. Seliava among the Uniates. Despite

confessional differences, both sides together constituted what could be called a 'Kievan theological school.' In the second half of the 17th century, the 'school's' teachings were introduced by Ye. Slavynetsky and S. Polotsky in Muscovy; the influence they exerted there evoked a strong negative reaction. In his attempts to reform the Russian church, Tsar Peter I turned to the writings of Ukrainian theologians serving in Russia, such as T. *Prokopovych, who was sympathetic to Protestant ideas; S. *Yavorsky, whose works were rife with Catholic principles and the methodology of scholasticism; and D. *Tuptalo.

In the first half of the 18th century, systematic courses in theology were taught at the *Kievan Mohyla Academy by Y. Krovovsky, I. Popovsky, Kh. Charnutsky, Y. Volchansky, I. Levytsky, S. Kuliabka, V. Liashchevsky, S. Liaskoronsky, and T. Lopatynsky. Lopatynsky later introduced similar courses at the Moscow Theological Academy and wrote a book on theology (1706–10). In the second half of the 18th century, theology in Kiev was guided primarily by Prokopovych's Protestant-influenced theological system and teachings, the followers of which included S. Myslavsky and I. Falkovsky. Over time, elements of the Latin church and scholasticism propagated by the 'Kievan school' became obsolete, as the Ukrainian church was Russified. Theological works produced in Polish-ruled Ukraine in the 18th century included *Bohosloviia nravouchytel'naia ...* (Moral Theology ..., 1751) and *Narodovishchanie ...* (Public Tidings ..., 1756), both published at the Basilian Pochaiv Monastery Press; A. Zavadovsky's work on the Holy Eucharist; T. Basarabsky's book of theological writings (1771); and Yu. Dobrylovsky's book of parish teachings for Sundays and holy days (1792).

Throughout the 19th century and until 1917, Russian 'synodal' theology held sway in Russian-ruled Ukraine. It was directed against the earlier Ukrainian teachings and system at the same time that theology in general was being destroyed by means of various Russian ecclesiastical and administrative sanctions. Ukrainians who contributed to the development of 'synodal' theology included S. Malevansky in dogmatics, M. Olesnytsky and M. Steltsky in moral theology, and V. Pevnytsky in homiletics. The main center of theological thought from 1819 to 1917 was the *Kiev Theological Academy, which published many theological writings in its *Trudy Kievskoi dukhovnoi akademii* (1860–1917). A major philosophical-theological thinker outside those strictures was P. *Yurkevych. During the 1920s the Ukrainian Autocephalous Orthodox church (UAOC), led by Metropolitan V. Lypkivsky, developed its own theological thought, but the suppression of the UAOC in 1930 cut the development short.

In Austrian-ruled Western Ukraine the major centers of Greek Catholic (Uniate) theology were the Greek Catholic Theological Seminary in Lviv (est 1783); Lviv University; and the seminaries in Uzhhorod (est 1778), Peremyshl (est 1845), and Stanyslaviv (est 1907). Ukrainian Catholic theology was also cultivated at the Barbareum in Vienna (1774–84) and at the Greek-Ruthenian (est 1845) and St Josephat's Ukrainian Pontifical (est 1897) colleges in Rome. Prominent Western Ukrainian theologians included O. Bachynsky, I. Bartoshevsky, I. Dolnytsky, M. Harasevych, M. Malynovsky, Y. Milnytsky, Yu. Pelesh, A. Petrushevych, K. Sarnytsky, S. Sembratovych, I. Snihursky, and H. Yakhymovych.

In the interwar period the main center of Ukrainian

Catholic theology was Lviv, especially after the *Ukrainian Theological Scholarly Society (est 1923) and *Greek Catholic Theological Academy (est 1928) were created. Active in those institutions were theologians such as Metropolitan A. Sheptytsky; Bishop Y. Botsian; Rev Professors Y. Slipy, I. Buchko, I. Chorniak, D. Dorozhynsky, Yu. Dzerovych, I. and V. Figol, A. Ishchak, S. Karkhut, T. Halushchynsky, L. Hlynka, V. Laba, Ya. Levytsky, L. Luzhnytsky, B. Lypsky, T. Myshkovsky, S. Rud, S. Sampara, P. Tabinsky, and I. Tsehelsky; and Prof M. Chubaty. The center of Orthodox theology was Warsaw University, where a department of Orthodox theology was created. Ukrainians affiliated with the faculty were Rev (later Metropolitan) N. Abramovych, V. Bidnov, O. Lototsky, I. Ohienko, and I. Vlasovsky.

In the postwar West the *Ukrainian Catholic University (est 1963) in Rome has been the main center of Ukrainian Catholic theology; Revs Yu. Fedoriv, I. Khoma, M. Liubachivsky, I. Muzychka, and P. Pavlyk, and the lay scholars B. Kazymyra and W. Lencyk, have taught theology there. The Theological Academy of the Ukrainian Autocephalous Orthodox church functioned for several years in Munich after the war. Since then the main centers of Ukrainian Orthodox theology have been *St Andrew's College in Winnipeg (theology has been taught there by Metropolitan I. Ohienko and Revs O. Krawchenko, A. Teterenko, S. Yarmus, R. Yereniuk, and M. Yurkiwsky) and the seminary of the Ukrainian Orthodox Church in the USA. With the revival of the Russian Orthodox church in the USSR after the Second World War, its theological academies in Zagorsk, Leningrad, and Odessa dominated theological thought in Ukraine. With the revival of the Ukrainian churches in Ukraine after 1989, new Ukrainian Catholic and UAOC seminaries have been established. (See also *Theological seminaries.)

I. Khoma, S. Tyshkevych, A. Velyky

Theophanes III. Patriarch of Jerusalem in 1608–44. In 1618, during a journey to Moscow, he stopped in Ukraine and stayed in a Polish-Cossack military camp. In 1620–1, on his return, he spent several months in Ukraine. He had been empowered by the patriarch of Constantinople to decide all religious affairs in eparchies belonging to the jurisdiction of the patriarch of Constantinople in Poland. In Kiev he consecrated a new hierarchy for the Orthodox church in Ukraine, which had been left with only one bishop following the conversion of most bishops to the Uniate church. The new hierarchy consisted of Metropolitan Y. Boretsky and Bishops I. Kopynsky, M. Smotrytsky, I. Boryskovych, Ye. Kurtsevych, and P. Ipolytovych. He also granted stauropigion to the *Kiev Epiphany Brotherhood. Later he organized a congress of church dignitaries and priests to proclaim formally the re-establishment of the hierarchy. He stayed at the Trakhtemyriv Monastery

until January 1621, when he left for Busha (Podilia) escorted by 3,000 Cossacks led by P. Sahaidachny. There he participated in a local sobor and called on the Cossacks to fight against the Turks and to live in peace with other Orthodox peoples. He then traveled to Moldavia. His person and activities were the subject of controversy in the polemical literature of the period.

Theotokis, Nicephorous, b 1731, d 1800. Orthodox bishop of Greek origin. He came to Ukraine in 1776 (probably from Corfu) and served as bishop of Kherson and Slovianske, with his see in Poltava, in 1779–86. He established a seminary in Poltava, which was moved to Katerynoslav in 1786. He left several writings in Greek and Russian, most notably an epistle to the Old Believers in his eparchy.

Thietmar of Merseburg (Dietmar, Dithmar), b 25 July 975 in Hildesheim, Germany, d 1 December 1018 in Merseburg, Germany. Chronicler and bishop of Merseburg (from 1002). In 1012–18 he wrote an eight-part chronicle based on German annals dating from 908 to 1018, and was the first to use the term Teuton to distinguish Germans within the Holy Roman Empire. He accompanied Henry II on military campaigns in eastern Europe and noted events from that region in his writings, including the attack of *Sviatopolk I and the Polish king Bolesław on Kiev. Thietmar's chronicle was published in Polish as *Kronika Thietmara* (1953).

Third (Berezhany) Brigade of the Ukrainian Galician Army (Berezhanska [3] brygada UHA). A military unit formed in January 1919 out of the Navariia Group. As part of the Second Corps of the UHA it besieged Lviv from the south during the Volukhiv Operation in February–March 1919. The brigade participated in the Chortkiv offensive in June 1919 and together with the Seventh Brigade broke through the Polish front at Chortkiv. Subsequently it fought against Soviet troops in Proskuriv, Starokostiantyniv, and Korosten. Its remnants were reorganized into the Third Infantry Regiment of the First Brigade of the Red Ukrainian Galician Army. On 10 May 1920 the regiment surrendered to the Poles. The commanders of the brigade were Lt Col A. Wolf, Maj O. Lesniak, and Capt P. Bakovych.

Third Iron Rifle Division of the Army of the Ukrainian National Republic (Tretia zalizna striletska dyviziia Armii UNR). A division formed in June 1919 out of the infantry unit led by Col M. Shapoval, the battalions under Col V. Olshevsky and Col P. Shandruk, and the Bukovynian Battalion under Capt O. Kantemyr. The division consisted of three infantry regiments (7, 8, and 9), a cavalry regiment, a light artillery regiment of Sich Riflemen, a technical unit, and reserves. Its commander was Col O. *Udovychenko, and his deputy was Col V. Olshevsky. At its peak in August 1919, the division had 2,200 infantry and 150 cavalry. For its bravery and endurance in combat against the 14th Soviet Army in August 1919, the division officially received the name Iron. During the autumn of 1919 it sustained heavy casualties in battles with

A. Denikin's forces. Commanded by Col V. Trutenko in the First Winter Campaign, it was decimated by typhus, and crushed by the Whites on 25 December.

In March 1920 Col O. Udovychenko revived the division in Mohyliv and renamed it the Second Rifle Division. Together with the Sixth Polish Army it fought against the Red Army. After the reorganization of the UNR Army the division's old name was restored (9 June 1920). It continued to fight the Red Army until it was forced to retreat across the Zbruch River on 21 November and was disarmed by the Poles.

Third Rome. A Russian ideological concept created in the 16th century during the consolidation of Muscovy as a major power in eastern Europe and the early phases of its development into an empire. It was based on the doctrine that Muscovy was the spiritual successor to the legacy of ancient Rome and Byzantium (the Second Roman Empire). Religion played an important role in the formula, and the decline of the Byzantine Empire (with respect to both its perceived fall from grace by the Church Union of *Florence and the capture of Constantinople by the Ottoman Turks in 1453) helped to shape the notion that Muscovy remained the only true bastion of Orthodox Christianity.

The earliest articulation of the concept of the Third Rome is attributed to Filofei, a hegumen of the Eleazar Monastery, who sent a series of missives to the grand princes of Moscow in the early 16th century (the exact dates are a subject of debate, although they likely fall between 1510 and 1530) and established the classic formulation of the doctrine: 'Two Romes have fallen, the third one stands, and a fourth will never be.' The concept was not without precedent. The second Bulgarian Kingdom, under Simeon (925–7), had pretensions to having assumed the legacy of Byzantium. The notion was carried by priests and monks of Balkan origin through Ukraine to Novgorod and Pskov (where it was regarded favorably) and finally to Moscow. The doctrine of Moscow as the Third Rome was further developed in writings such as *The Tale of the White Cowl* (later 16th century) and *The Tale of the Origin of Moscow* (early 17th century).

The idea of the Third Rome had been embraced by both the secular and the ecclesiastical authorities in Muscovy by the mid-16th century (by the time of the coronation of Ivan IV in 1547). It received further sanction from Metropolitan Makarii and was mentioned in the articles establishing the Moscow patriarchate (*Ulozhennaiia gramota*, 1589). Although the doctrine was not adopted as an official state policy, it proved an influential guiding principle; it also complemented the claim to the historical legacy of the Kievan Rus' state that Muscovy was developing. The concept was particularly well suited to the needs of an autocratic and expansionist power: it buttressed the position of the grand prince (now tsar) by making him not only the personification of the state but also the defender of the Orthodox faith and a figure who could invoke a lineage stretching (albeit indirectly) to ancient Rome; it elevated Muscovy relative to the states surrounding it; and it provided an ideological justification for Muscovy's quest to acquire the lands of the former Rus' state from Poland-Lithuania (the 'reunification' of an Orthodox realm).

The doctrine of Moscow as the Third Rome had broad circulation until the fall of the Russian Empire in the early

20th century. It also carried with it the notion that the Muscovite realm was a unique entity with a special destiny, which was largely transmuted into the broader notion of Holy Russia. Echoes of those ideas can be noted in Russian literature, publicistic writings, and politics of the 17th to 20th centuries (eg, the writings of F. Dostoevsky or the ideas of the *Slavophiles). In the 20th century the idea of Holy Russia has been retained by Russian conservative thinkers, such as A. Solzhenitsyn. Some observers have claimed that the idea of Moscow as a Third Rome was reflected in the messianic zeal of the Bolshevik regime that succeeded the Russian Empire.

Third Section (Russian: Trete otdelenie sobstvennoi ego imperatorskogo velichestva kanstseliarii). The organ of political intelligence-gathering and investigation in the Russian Empire, established under Nicholas I in 1826 with the aim of combating revolutionary movements, opposition movements and organizations, and national movements. Its executive branch was a corps of gendarmes (est 1827). The Third Section oversaw the hearings of political cases and supervised political prisons, and until 1865 it also controlled censorship. It conducted the arrests and investigations of the *Cyril and Methodius Brotherhood (1847) and, specifically, T. *Shevchenko (1847 and 1850). The Third Section was liquidated in 1880, and its functions were taken over by the newly created police department of the Ministry of Internal Affairs. Its activities were chronicled by S. Monas in *The Third Section: Police and Society in Russia under Nicholas I* (1961).

Thirty Years' War. An extended European conflict (1618-48) between two shifting coalitions, the Catholic Habsburg bloc and the largely Protestant anti-Austrian bloc. The Zaporozhian Cossacks took part as mercenaries in all four phases of the war, sometimes against the orders of the Polish crown. At the outbreak of the Bohemian rebellion Emperor Ferdinand II sent recruiting agents to the Cossacks. In 1619, Cossack detachments fought in northern Hungary. In the following year six expeditionary forces numbering 12,000 to 14,000 light Cossack cavalry fought on the Habsburg side in Moravia, Silesia, and Lower Austria. In 1622 they campaigned under Archduke Leopold in Germany, and in 1623 they helped defend Moravia from a joint Hungarian, Turkish, and Tatar inva-

sion. In the Danish phase of the war (1625-8) 5,000 Cossack mercenaries fought under Col G. Pappenheim in northern Italy, where they laid siege to Genoa and repelled the French army. In the following year 4,000 Cossacks were hired to pacify Silesia. About half of the force joined the regular imperial cavalry and stayed in the West. In the Swedish phase (1630-8) 6,000 Cossacks led by Cols Herbertstein and W. Butler helped capture Frankfurt-on-the-Oder and then fought the Swedes in Saxony. In 1633 about 500 Cossacks died at Strehlen. In 1635 Capt P. Noskowski raised an expeditionary force of 6,000, which he led across Europe to northern France. With their swift raids behind the front, the Cossacks paralyzed the French army. In the following year they scored several victories in Hesse. Another Cossack force invaded Picardy with Gen J. Werth's army. The French realized the value of the Cossack cavalry and after several failed attempts commissioned B. Khmelnytsky to recruit an expeditionary force for them. In August 1646, 2,000 to 2,500 men under the command of Cols I. Sirko and Soltenko sailed from Danzig to Calais. They arrived in time to take part in the siege of Dunkirk. After campaigning in Lorraine some of them switched to the Spanish side, and others enlisted in the French cavalry. Their experience in the West had a profound influence on the Cossacks. They restructured their army from a defensive, predominantly infantry, force into an offensive cavalry. But most important, having won recognition as an independent military power from the Western states, the Cossacks began to aspire to full independence and to a state of their own.

Thistle (Ukrainian: *osot*). A prickly leaved weedy plant of the family Astevaceae (Compositae), especially the genera *Cirsium* and *Carduus*. Of its 150 species Ukraine has 20, of which the most common is the creeping or Canada thistle (*Cirsium arvense*; Ukrainian: *polovyi* or *rozhevnyi osot*), a perennial, soboliferous weed found in the Right-Bank forest-steppe, Polisia, and the Carpathian Mountains. Thistles choke out crops and reduce harvests; they are difficult to eradicate. To control them, crop rotation is practiced, along with early and deep autumn plowing, tilling, the use of herbicides, and proper fertilization.

Thracian Hallstatt culture. An early Iron Age culture of the late 2nd to early 1st millennium BC that existed in the Carpathian-Danube region. It has been studied intermittently since the late 19th century. Scholars regard the people of this culture as a proto-Thracian tribe. They engaged primarily in agriculture and animal husbandry; their metal-working was well developed. Approximately 30 sites of this culture have been found in Ukraine, including Holihrad, *Mahala, Zalishchyky, and the *Mykhalkiv hoard.

Three Saints, Church of the (Trokhsviatytelska tserkva). A church, originally called St Basil's, built near the wall of the upper city of Kiev during the reign of Grand Prince Sviatoslav III Vsevolodovych, in 1183. The small Romanesque structure had three naves, a façade divided by pilasters, and a dome supported by four columns. It

was typical of the architecture of the late 12th century. In the 17th century Metropolitan P. Mohyla placed the church under the jurisdiction of the Kiev Epiphany Brotherhood Monastery, and it was restored and rededicated to SS Basil the Great, Gregory the Theologian, and John Chrysostom. The church was heavily damaged by Muscovite shells in 1658–60. Its reconstruction, in the baroque style, was begun under Metropolitan V. Yasynsky in the 1690s and completed by General Judge V. Kochubei in 1707. Two of its original pillars were removed, and a hexagonal narthex was added. In the mid-18th century the Zaporozhian Host added a small chapel to the southern wall and installed a new rococo iconostasis. The church was dismantled by the Soviet authorities in 1935 to make room for a large government building.

Thrush (Ukrainian: *drizd*). A songbird of the family Turdidae, which includes approx 300 species in 45 genera. Thrushes are up to 30 cm in body length. They live in pairs or colonies in deciduous or mixed forests, parks, and orchards. The songs of the males are beautiful, rich and varied. In Ukraine thrushes are found in Polisia, in the forest-steppe, and in the Carpathian and Crimean mountains. The most common is the European blackbird (*Turdus merula*; Ukrainian: *kis*).

Thunder Bay. A city (1986 metropolitan area pop 122,000) on the western shore of Lake Superior in northern Ontario, created in 1970 by the amalgamation of Port Arthur and Fort William. Its main industries are forest products, transportation, and tourism. In 1981 its total Ukrainian population was 14,015. Ukrainians began to settle in the area in the early 1900s. In 1911 approx 60 percent of Ontario Ukrainians (1,856 of 3,078) lived there. This ratio dropped over time, although the city's Ukrainian population increased to 2,394 in 1921, 5,156 in 1931, 8,235 in 1941, and 11,004 in 1951. In 1989, 2,225 inhabitants claimed Ukrainian as their mother tongue.

The first Ukrainian organization, a branch of the Prosvita society in Fort William (est 1906), is still active. Two other Prosvita branches were organized in 1909, one in Port Arthur and the other in West Fort William. A branch of the Ukrainian National Federation arose in Fort William in 1938, and by 1947 it had built its own hall. A Ukrainian Catholic parish was established in Fort William in 1909, and by 1918 it had built the Church of the Transfiguration. A second Catholic parish, dedicated to the Ascension of Our Lord, arose in 1911, and in 1968 a third parish, of the Elevation of the Holy Cross, was created. The Church of the Holy Protectress was built in Port Arthur in 1966. The first Ukrainian Orthodox parish, of the Ascension of the Holy Virgin, was founded in Fort William in 1924, and another, St Volodymyr's parish, was formed in 1935 by 200 former members of the Catholic parish of the Ascension. The Ukrainian Credit Union (est 1949) had over 1,100 members and assets of 3,683,000 dollars by 1985. The local branch of the Canadian League for Ukraine's Liberation (est 1950), along with the fraternal organizations, bought its own building in 1961.

Thuja (*Thuja*; Ukrainian: *tuia*). Aromatic, evergreen trees and bushes of the family Cupressaceae. These beautiful trees grow to up to 20 m in height and live up to 100 years or more. Their pyramidal crown is easily trimmed, so they

are popular ornamental trees in parks and gardens. Most widespread in Ukraine is the American arborvitae (*T. occidentalis*), cultivated since the 19th century throughout Ukrainian territory. It has a light wood suitable for the construction of boats; the trunks are also used as power and telegraph poles. Extracts from the thuya were used as folk remedies to treat warts and tapeworm.

Tiachiv [Tjačiv]. VI-4. A city (1989 pop 9,800) on the Tysa River and a raion center in Transcarpathia oblast. It was founded in the mid-13th century and granted the status of a crown city by the Hungarian king in 1329. For centuries the town was under Austro-Hungarian rule. In the inter-war period it belonged to Czechoslovakia. In 1939 it was seized by Hungary, and in October 1944 it was captured by the Red Army. In 1961 Tiachiv was promoted to city status. Since the 1870s the region has been known for its apple orchards. The city has canning, brick, and handicrafts factories. Its chief architectural monument is a Roman Catholic church built in the Gothic style in the 15th and 16th centuries.

Tiahnii, Sofia [Tjahnij, Sofija], b 10 April 1927 in Kiev. Handgun markswoman. She was the 1964 women's world champion in paper-target shooting, the USSR champion five times (1962, 1964–5), and the Ukrainian champion many times. Since the late 1970s she has coached the Kiev Dynamo shooting team.

Borys Tiahno

František Tichý

Tiahno, Borys [Tjahno], b 23 August 1904 in Kharkiv, d 18 January 1964 in Lviv. Stage and film director and pedagogue. He completed study at the Lysenko Music and Drama Institute (1923) and worked in *Berezil (1923–9), where he first directed *Sekretar profspilky* (The Secretary of the Trade Union, 1924). He worked in the Odessa and Kiev Artistic Film studios (1929–32) and then was artistic director of the Kharkiv Theater of Working Youth (1932–7), the Dnipropetrovske Ukrainian Drama Theater (1938–40), the Dniprodzerzhynske Russian Drama Theater (1940–4; from 1941 in Kazakhstan), the Odessa Ukrainian Drama Theater (1944–7), and the Lviv Ukrainian Drama Theater (1948–62). He taught in the drama studios of Berezil (1926–9) and the Lviv Ukrainian Drama Theater (1948–62). Among his films are *Okhoronets' muzeiu* (The Guardian of the Museum, 1930) and *Fata morgana* (1931).

Tiahnyhore, Dmytro (real name: Sidletsky), b ? , d 1945 in Iracema, Brazil. Ukrainian Orthodox priest and church organizer in Brazil. A former officer of the UNR Army, he emigrated to Poland, Cuba, and then the United States (1924–30). In 1931 Archbishop I. Teodorovych appointed him to head a Ukrainian Orthodox mission to Brazil. His work proved fruitful, and he had helped to establish approx 20 parishes and outposts by the end of the 1930s. Tiahnyhore also actively promoted the Molode Kozatstvo society.

Tiasmyn fortified settlement. A Chorni Lis culture settlement of the 8th to early 7th century BC near Velyka Andrusivka, Svitlovodske raion, Kirovohrad oblast. Excavations in 1956–7 uncovered the remains of a round fortress, approx 60 m in diameter, with defensive walls built on wooden foundations which were flanked by ditches. The remains of deep rectangular pit dwellings with posts and wooden walls, pottery, and items of daily use were found in the settlement area.

Tiasmyn River [Tjasmyn]. A right-bank tributary of the Dnieper River that flows for 161 km through Kirovohrad and Cherkasy oblasts before emptying into the Kremenchuk Reservoir. It drains a basin area of 4,540 sq km. It is 5–20 m in width and has a valley of 1–4 km. Fed mainly by meltwater, the river is used for industry, domestic water consumption, and irrigation. Several reservoirs are located on it, as well as the cities of Kamianka, Smila, and Chyhyryn.

Tichý, František, b 21 May 1886 in Chyňava, near Beroun, Bohemia, d 31 April 1968 in Chyňava. Czech philologist, writer, translator, and pedagogue. He graduated from Prague and Leipzig universities and taught in Bohemia until 1922, when he became the director of a gymnasium in Prešov. That year he published the first book of O. Dukhnovych's poetry. In 1923 he became chief editor of the newspaper **Rusyn* in Uzhhorod. In 1934 he settled in Prague, where he published in Czech a book on the development of the literary language of Transcarpathia (1938) and a Ukrainian-language textbook (1939). In the early 1950s he was forced to live in Beroun. From the 1920s on he published articles and Czech encyclopedia entries on Transcarpathian literary figures and monuments, folk songs, theater, history, and education, on the folklore and dialect of the Bačka Ruthenians, on Ukrainian language and literature, and on Ukrainian-Czechoslovak relations. He also translated into Czech T. Shevchenko's *Jan Hus* (1918), a comedy by I. Korytniansky (1922), a book of tales from Transcarpathia (1930), a booklet of poems dedicated to T. Masaryk by various Ukrainian poets (1936), and poems by Lesia Ukrainka, I. Franko, O. Oles, Dukhnovych, and other Ukrainians. His manuscript on 500 years of Transcarpathian literature (1404–1904) and correspondence with I. Pankevych are preserved at the Svydnyk Museum of Ukrainian Culture.

R. Senkus

Timber-Grave culture. A Bronze Age culture of the late 2nd to early 1st millennium BC that existed in Ukraine along the Dnieper River and in the Black Sea and upper Donets River regions. It was first identified by V. *Gorodtsov in the early 20th century. The culture had similar-

A burial of the Timber-Grave culture excavated in a kurhan in Orikhiv (1), a vertical view of the burial chamber (2), and bronze-and-wood articles (3, 5) and pottery (4) found therein

ities with tribal groupings from the Dniester River in the west to the Caspian Sea in the east, leading to a scholarly debate as to whether a single or several cultures existed in this area. The defining characteristic of the Timber-Grave culture was its use of wooden vaults in graves. Bodies were commonly placed into these in a flexed position. Settlements in which the inhabitants lived in semi-pit or surface dwellings and engaged in agriculture, animal husbandry, and metal-working were located in raised areas near major waterways. Excavations there revealed large numbers of bronze items (particularly implements and weapons), pottery decorated with geometric designs and a rounded lip under the crown, bone implements, and molds and remains from metal workshops. Scholars have divided the Timber-Grave culture into an early (14th–12th century BC) *Sabatynivka culture phase and a later (11th–9th century BC) Bilozerka culture phase. Its people eventually assimilated into the Scythian tribal structures of the latter 1st millennium BC.

Timofeev, Boris, b 18 October 1915 in Petrograd. Mathematician specializing in systems analysis; full member of the AN URSR (now ANU) since 1978. A graduate of the Georgian Industrial Institute (1937), he worked at the Tbilisi Hydroenergetics Institute (1937–9, 1944–59) and the ANU Computing Center and Institute of Cybernetics (1960–4, deputy director in 1962–4). Since 1964 he has been director of the USSR Automation Institute in Kiev. His work deals with surface effects of ferromagnets, automation-systems, and information theory and technology.

Timofeevsky, Aleksandr [Timofeevskij], b 20 February 1887 in Moscow, d 15 September 1985 in Moscow. Russian pathophysiological and oncologist; corresponding member of the AN URSR (now ANU) from 1939 and full member of the USSR Academy of Medical Sciences (AMN SSSR) from 1945. A graduate of Tomsk University (1912), he directed a department of the Kharkiv Roentgeno-Oncological Institute (1934–41), laboratories of the ANU Institute of Clinical Physiology (1941–53) and Institute of Physiology (1953–5), and a department of the AMN SSSR Institute of Experimental Clinical Oncology in Moscow (1956–63). He wrote numerous works in experimental hematology and oncology. In 1912 he was one of the first scientists in Russia to use a new method of cultivating cells and tissues. He described the malignancy of tissues affected by carcinogenic substances and tumorigenic viruses.

Stephen Timoshenko

Vladimir Timoshenko

Timoshenko, Stephen [Tymošenko, Stepan], b 23 December 1878 in Sopotivka, Konotip county, Chernihiv gubernia, d 29 May 1972 in Wuppertal, West Germany. Mechanical engineer and scientist; founder of the field of the strength of materials; full member (and cofounder) of the Ukrainian Academy of Sciences (UAN, now ANU) from 1918, the USSR Academy of Sciences from 1929, the Ukrainian Academy of Arts and Sciences in the US, the Shevchenko Scientific Society, and many international academies of science, including the Royal Society of London. He graduated from the St Petersburg Institute of Civil Engineers (1901) and taught at the Kiev Polytechnical Institute (1907–20, with interruptions in 1911–17, because of his political activity). He served as director of the UAN Institute of Mechanics (1919–20). He emigrated via Yugoslavia (1920) to the United States (1922) and worked at the Westinghouse Co. In 1927–36 he taught at the University of Michigan, and in 1936–60 at Stanford University. In 1960 he retired and moved to West Germany. Timoshenko's main contributions were in the area of the mechanics of solids and structures. He developed the mathematical basis for the discipline the strength of materials; formulated equations for calculating bending, twisting, deformation, vibrations, and collisions of solid deformable bodies, beams, membranes, trusses, and so forth; solved problems of stress concentrations around corners and apertures; and provided methods for calculating the load strengths of bridges, retaining walls, rails, gears, and so forth. His equations form the basis of all modern designs in mechanical and civil engineering. Timoshenko wrote numerous monographs in English, including *Strength of Materials*

(1930; 6th edn 1965), *Theory of Structures* (1945; 2nd edn 1965), *Theory of Elasticity* (1934; 3rd edn 1970), *Mechanics of Materials* (1972), and *Vibration Problems in Engineering* (1937; 5th edn 1990). His *Collected Papers* were published in 1953. His textbooks are widely used in universities around the world, and his handbooks are considered standard in the field. In 1957 the Society of American Mechanical Engineers inaugurated the Timoshenko Medal, awarded for major accomplishments in applied technological sciences.

L. Onyshkevych

Timoshenko, Vladimir (Tymošenko, Volodymyr), b 25 April 1885 in Bazylivka, Konotip county, Chernihiv gubernia, d 15 August 1965 in Menlo Park, California. Economist and economic historian; member of the American Economic Association, the Royal Economic Society, the Shevchenko Scientific Society, and the Ukrainian Academy of Arts and Sciences in the US; brother of S. *Tymošenko. After graduating from the St Petersburg Polytechnical Institute (1911) he worked in the economics department of the imperial ministries of Railroads, Agriculture, and Commerce and Industry. In December 1917 he returned to Ukraine and became a consultant to the Ukrainian Ministry of Finance and director of the UAN Institute of Economic Conjuncture. In 1919 he was appointed economic adviser to the Ukrainian delegation to the Paris Peace Conference. In that capacity he prepared several memorandums on the Ukrainian economy and Ukrainian economic relations with Russia and France, which were published in French and English.

After the fall of the UNR he remained in the West. He taught economic geography at the Ukrainian Free University and the Ukrainian Husbandry Academy in Poděbrady and published the textbooks *Vstup do vchennia pro svitovyi rynok* (An Introduction to the Study on the World Market, 1923) and *Vchennia pro svitove hospodarstvo* (Study on the World Economy, 1923). In 1925 he won a Rockefeller Fellowship to continue his studies in the United States. After completing his PH D at Cornell University in 1927, he taught economics there and at the University of Michigan (1928–34). He was the senior agricultural economist at the US Department of Agriculture in Washington in 1934–6 and then a professor at Stanford University (1936–50).

Most of Timoshenko's published works dealt with agricultural economics, international trade, Soviet agriculture, and the theory and function of markets. His English-language monographs include *The Role of Agricultural Fluctuations in the Business Cycle* (1930), *Agricultural Russia and the Wheat Problem* (1932; repr 1972), *The Soviet Sugar Industry and Its Postwar Restoration* (1951), and *The World's Sugar: Progress and Policy* (1957, with B. Swerling). He also published some articles on subjects such as the Ukrainian economy and on the theories of M. Tuhon-Baranovsky.

B. Wynar

Timothy (*Phleum*; Ukrainian: *tymofiivka*). An annual or perennial grass of the Poaceae family that provides excellent forage. There are 15 species, 9 of which are found in Ukraine. One of the best perennial hay and forage grasses is *P. pratense*, which is widely distributed outside the chernozem belt. Other common species are *P. alpinum*, which grows in the Carpathians, *P. montanum* C. Koch, which grows in the Carpathians and in the Caucasus, and *P. phleoides* L. Karsten, which grows in the steppes and in dry meadows.

Tiraspol. See Tyraspil.

Tiritaka. An ancient Greek city of the Bosporan Kingdom, located immediately south of Panticapaeum. The town was founded in the 6th century BC at the site of a former Cimmerian settlement. It developed into a small trading center. In the 4th century AD it was destroyed by the invading Huns. Archeological excavations conducted intermittently in 1932–52 by V. Haidukevych have uncovered the remains of fortifications, homes, and a temple to Demeter, hoards of coins, and various tools and farm implements.

Cardinal Eugène Tisserant

Tisserant, Eugène, b 24 March 1884 in Nancy, France, d 21 February 1972 in Albano, Italy. Cardinal and Orientalist. After being ordained in 1907, he studied at the Sorbonne and in Jerusalem and then taught in Rome and worked in the Vatican Library. He was made a cardinal in 1936 and dean of the College of Cardinals in 1951. As prefect of the *Congregation for Eastern Churches (1936–59) he visited Ukrainian Catholic communities in North America in 1947 and 1950, and supported the creation of Ukrainian Catholic metropolies in Canada and the United States, and exarchates or vicariates in Australia, Western Europe, and South America. He also founded the St Josaphat's Ukrainian Pontifical Seminary in Lourdes. Tisserant defended the right of churches to maintain the Eastern rite, and warned against universal Latinization. In later years, however, he was seen as an opponent of the patriarchate movement and a supporter of the Vatican's *Ostpolitik*. He also supported various Ukrainian community institutions, including the Shevchenko Scientific Society in Sarcelles and the Ukrainian Free University.

Tisza culture. A Neolithic culture of the late 5th to early 4th millennium BC that existed along the Tysa River basin in Transcarpathia and in the adjacent Hungarian and Slovak borderlands. It was studied initially in the late 19th century and then in the interwar period. The people of this culture engaged in agriculture, animal husbandry, fishing, and hunting. They lived in permanent surface houses (sometimes in temporary semi-pit dwellings) and buried their dead on their sides in a flexed position in shallow graves. Excavations at culture sites revealed pottery, earthenware figurines of humans, and large flint and stone inventories, including scrapers, axes, and arrowheads.

Titanium ores. Titanium is a metal of great economic and technological value. Because of its strength and resistance to corrosion, it is used extensively in the building of airplanes, rockets, and equipment for the chemical and nuclear power industries.

Ukraine is rich in titanium. The first deposits were discovered in the early 1950s. Titanium ores are found throughout the Ukrainian Crystalline Shield, especially in eastern Volhynia (the Irshanske deposit) and the Dnieper Basin (the Samotkan deposit – the largest in Ukraine). The ores in Ukraine are mostly ilmenite or rutile. Exploitation of the titanium deposits in Ukraine began soon after their discovery. In 1956 the first titanium-processing plant was opened in Zaporizhia. It refines ilmenite from the Irshanske Mineral Enrichment Complex in Zhytomyr oblast and elsewhere. Another major facility for the processing of titanium ore is the *Verkhnodniprovske Mining and Metallurgical Complex. Ukraine produces much titanium sponge, an intermediary product from which titanium ingots are made, some of which is exported. Some titanium alloys are produced at the Dnieper Hard Alloys Factory in Svitlovodske, Kirovohrad oblast. Problems of the industry are studied at the (until 1992 all-Union) Scientific Research and Planning Institute of Titanium in Zaporizhia. The titanium refining process is dangerous and produces toxic by-products. Besides being used in alloys titanium is used in paint, pigments, lacquers, and other products.

S. Protsiuk

Tithe (*desiatyna*). A type of church tax in medieval Ukraine. Originally the tithe was a donation granted by a prince to a bishop, amounting to one-tenth of the prince's annual income. Volodymyr the Great donated one-tenth of his income toward the building and maintenance of the Church of the *Tithes in Kiev. Later this tax was collected from the whole populace and used to support the parish clergy. In the Lithuanian-Ruthenian state the tithe ceased to be a regular source of income for the Ukrainian clergy. In the 17th and 18th centuries the tithe disappeared, but periodic donations to the clergy continued to be made by the community or parishioners. In Transcarpathia monetary fees or payments in kind to the clergy were called tithes until the First World War.

Tithes, Church of the (*Desiatynna tserkva*). The first and largest stone church in Kiev and the burial place of the Kievan princes. Dedicated to the Dormition, it was built by Byzantine and Rus' artisans between 989 and 996 amid the palaces of Grand Prince Volodymyr the Great, who set aside a tithe of his income for its construction and maintenance (hence the name). The church was besieged and ruined in 1240 by Batu Khan's Mongol horde. In the early 17th century, under Metropolitan P. Mohyla, the smaller, wooden St Nicholas's Church was built on a portion of the site. Between 1828 and 1842 the Russian administration leveled the remaining ruins and erected a new stone church that occupied half the original area. Its Russian style had nothing in common with that of the original structure. In 1928 Soviet authorities dismantled the 19th-century church.

The church built on the site of the Church of the Tithes during the time of Metropolitan Petro Mohyla

The church on the site of the Church of the Tithes in the 19th century

The floor plan of the original Church of the Tithes

A sarcophagus excavated at the site of the Church of the Tithes

Excavations of the foundations of the original church indicate that it was a three-nave structure with six pillars and wide, covered galleries on the sides. It occupied an area of approx 1,700 sq m. Its numerous cupolas in cruciform arrangement – a feature recorded in a 14th-century

source – distinguished it from Byzantine prototypes and made it a model in the further development of Ukrainian architecture. The plan and surviving fragments of the mosaic floor, marble column, capitals, ceramic tiles, ornamental slate, frescoes, and sarcophagi (eg, of Volodymyr the Great and his grandmother, Olha) testify to the artistry of the early period of Ukrainian architecture. The artifacts collected on the site of the church are preserved in the St Sophia Museum in Kiev.

Titmouse. One of the small, active, woodland and garden birds of the family Paridae, divided into the subfamilies Parinae and Remizinae, and widely distributed throughout Ukraine. The *Parus* genus (*synytsia*) has seven species in Ukraine, including the great tit (*P. major*), the blue tit (*P. caeruleus*; Ukrainian: *lazurivka*), the crested tit (*P. cristatus*), and the marsh tit (*P. palustris*). The penduline or Old World titmice (*Remiz*; Ukrainian: *remez*) have yellow, reddish, or brown plumage and a long, sharp beak. The common penduline titmouse (*R. pendulinus*) nests close to water; it suspends its nest on fine branches often just above it. In folklore titmouse nests were believed to possess miraculous healing power. Because they feed primarily on insects, titmice are beneficial and desirable birds.

Titov, Teodor (Khvedir, Fedor), b 1864 in Kursk gubernia, d 1922 in Hrehetek monastery in Srem, Yugoslavia. Church historian, theologian, and archpriest. After graduating from the Kiev Theological Academy in 1890, he lectured there and in 1905 became professor of Russian church history. He was editor of *Kievskie eparkhial'nye vedomosti* and a contributor to *Trudy Kievskoi dukhovnoi akademii* (TKDA). During the First World War he served as assistant chaplain in the Russian army at the southwestern front. At the All-Ukrainian Church Sobor in 1918 he was elected to the All-Ukrainian Higher Holy Council. When the Bolsheviks occupied Kiev in 1919, Titov emigrated to Yugoslavia.

Titov was one of the more productive scholars of the Kiev Theological Academy; his main interest was the history of the Kievan Mohyla Academy. He compiled and edited the third section of *Akty i dokumenty, otnosiashchiesia k istorii Kievskoi akademii, 1796–1869* (Acts and Documents Pertaining to the History of the Kiev Academy, 1796–1869, 5 vols, 1910–15), wrote a monograph on the academy, which came out under the title *Stara vyshcha osvita v Kyivs'kii Ukraïni: XVI–pochatok XIX v.* (Old Higher Education in Kievan Ukraine: The 16th to the Beginning of the 19th Century, 1924) in the collection series of the VUAN Historical-Philological Division, and published a string of articles on the academy and its graduates in TKDA: an outline of its history (1898), its role in the Russian church and culture in the 17th and 18th centuries (1906), D. Tuptalo as a student of the academy (1909), the academy's graduates at the Kievan Cave Monastery (1911–12), the relation of the Romanov dynasty to the Kiev Theological Academy (1913), the Kiev Theological Academy in the reform period (1910–15), and the memory of Prince Volodymyr at the Kiev Theological Academy (1916). He was also the author of the three-volume work *Russkaia Pravoslavnaiia Tserkov' v Pol'sko-Litovskom gosudarstve v XVII–XVIII vv.* (The Russian Orthodox Church in the Polish-Lithuanian State in the 17th–18th Centuries, 1905) and the editor of the collection

Materiialy dlia istorii knyzhnoi spravy na Ukraïni v XVI–XVIII vv. (Materials on the History of Book Publishing in Ukraine in the 16th–18th Centuries, 1924; repr, Köln–Vienna 1982).

A. Zhukovsky

Tits, Mykhailo [Tic, Myxajlo], b 8 March 1898 in St Petersburg, d 12 October 1978 in Kharkiv. Composer, pianist, and pedagogue. A student of S. Bohatyrov (composition) and P. Lutsenko (piano), he graduated (1924) from the Kharkiv Music and Drama Institute (later Conservatory) and then taught music theory and composition there. In 1943–71 he headed the Faculty of Music Theory and Composition at the conservatory. Among his students were P. Haidamaka, L. Kolodub, V. Siechkin, and O. Zhuk. His works include the operas *Perekop* (1939) and *The Haidamakas* (1941; based on the poem by T. Shevchenko), both authored with Yu. Meitus and V. Rybalchenko; symphonic and chamber music; and works for piano, choruses, songs, and incidental music. He also wrote *Pro suchasni problemy teorii muzyky* (Regarding Current Problems in Music Theory, 1976).

Tiuleniev, Mykola [Tjulenjev], b 17 April 1889 in Hannyvka, Tyraspil county, Kherson gubernia, d 2 December 1969 in Kiev. Soil scientist; corresponding member of the AN URSR (now ANU) from 1948. A graduate of the Kiev Polytechnical Institute (1914), he worked at the Rudnia-Radovelska marsh research station in the Zhytomyr region (1923–32), the Ukrainian Scientific Research Institute of Hydro-Technology and Melioration (1932–41 and 1956–69), and the ANU Institute of Plant Physiology and Agrochemistry (1949–55). His works deal with soil drainage and the reclamation of peat bogs for agricultural purposes.

Tiumenieva, Halyna [Tjumenjeva], b 7 January 1908 in Poltava. Musicologist. She graduated (1936) in music history and theory from the Kharkiv Conservatory and then taught there (assistant professor from 1947, full professor from 1979). Her main works include *Chaikovs'kyi i Ukraïna* (Tchaikovsky and Ukraine, 1955) and *Gogol' i muzyka* (Gogol and Music, 1966). She has also written articles in books and collections, edited two collections of works by M. Koliada (1964), and contributed to encyclopedias.

Tiutiunnyk, Hryhir [Tjutjunnyk], b 5 December 1931 in Shylyvka, Zinkiv raion, Poltava oblast, d 7 March 1980 in Kiev. Writer; brother of Hryhorii *Tiutiunnyk. He graduated from Kharkiv University in 1962 and then worked on the editorial board of *Literaturna Ukraina* and *Molod'* and as a screenwriter for the Kiev Artistic Film Studio. He was first published in 1961. His works include the collections of short stories *Zav'iaz'* (The Bud, 1966), *Derevii* (Yarrow, 1969), *Bat'kivs'ki porohy* (Parents' Thresholds, 1972), *Kraïnebo* (Horizon, 1975), and a number of stories, 'Obloha' (The Siege), 'Den' mii subotnii' (My Day of Rest), and 'Zhytjie Artema Bezikonnoho' (The Life of Artem Bezikonny [Windowless]), which were published posthumously. Tiutiunnyk did not conform to the dictates of *socialist realism and left a gallery of portraits of his contemporaries that shed light on both their negative and their positive qualities. His vivid renderings of psycholog-

Hryhir Tiutiunnyk

Hryhorii Tiutiunnyk

ical types, frequently punctuated by a wry humor that reached into biting satire, made his works stand out amid the mediocre efforts of his contemporaries. In general, Soviet critics were ill-disposed to his works because of their divergence from the official style. In response to the hostility of the critics, Tiutiunnyk committed suicide. The value of his work was recognized only posthumously, during the period of democratization of the 1980s, when an edition of his *Tvory* (Works, 2 vols, 1985) was published. A selection of his stories, *Cool Mint*, was published in English translation in 1986, and a book about him, by L. Moroz, appeared in 1984.

I. Koshelivets

Tiutiunnyk, Hryhorii [Tjutjunnyk, Hryhorij], b 6 May 1920 in Shylyvka, Zinkiv county, Poltava gubernia, d 29 August 1961 in Lviv. Writer and pedagogue; brother of Hryhir Tiutiunnyk. He graduated from Kharkiv University in 1946 and worked as a teacher in Galicia. From 1956 he contributed to the journal *Zhovten'*. He began writing verse in his student days and then switched to prose. A collection of his short stories, *Zorani mezhi* (Plowed Boundaries, 1951), and a novel, *Khmarka sontsia ne zastupyt'* (A Small Cloud Won't Blot Out the Sun, 1956), have been published. His major work, one of the most outstanding contributions to Soviet Ukrainian postwar prose, was his novel *Vyr* (The Vortex, 1960–2), in which a collective farm and the events of the Second World War are realistically portrayed. A collection of his poetry, *Zhuravlyni kliuchi* (Skeins of Cranes, 1963), was published posthumously. Books about Tiutiunnyk have been written by L. Volovets (1967) and I. Semenchuk (1971), and an edition of his works (2 vols) appeared in 1970.

Tiutiunnyk, Vasyl [Tjutjunnyk, Vasyl'], b 1882 in Yenky, Khorol county, Poltava gubernia, d 20 December 1919 in Rivne, Volhynia gubernia. Senior UNR Army officer. He joined the Army of the UNR in 1917 as a colonel of the General Staff. During 1917–18 he served at the General Staff as chief of the operations department. In 1919 he was deputy chief of staff of the UNR Army, its supreme commander, and then its chief of staff. He died of typhoid.

Gen Vasyl Tiutiunnyk

Gen Yurii Tiutiunnyk

Tiutiunnyk, Yurii [Tjutjunnyk, Jurij], b 20 April 1891 in Budyshcha, Hlukhiv county, Chernihiv gubernia, d 1929 in Moscow. Senior UNR Army officer. In 1917 he organized Ukrainian military units in Symferopil and Zvenyhorodka. He was a member of the Central Rada and chairman of the Kiev Revolutionary Committee, which prepared the anti-Hetman uprising. From February 1919 he was chief of staff of N. *Hryhoriiiv's partisan force in southern Ukraine. Having broken through the Bolshevik front, he rejoined the Army of the UNR, and was appointed commander of the Kiev Group in the Kiev offensive in August 1919. During the First *Winter Campaign (1919–20) he was commander of the *Kiev Division and deputy commander of the UNR Army. He was promoted to brigadier general. In 1921 he organized and led the Second Winter Campaign. In 1923 he returned to Soviet Ukraine, where he taught at the Kharkiv Red Officer School and wrote film scripts for the All-Ukrainian Photo-Cinema Administration until he was arrested and executed by the GPU. His memoirs appeared in *Literaturno-naukovyj vistnyk* and *Zahrava*, and his political and military essays were published in the collections *Zymovyj pokhid 1919–1920* (The Winter Campaign, 1919–20, 1923), *Z poliakamy proty Vkrainy* (With the Poles against Ukraine, 1924), and *Revoliutsiina stykhiia* (The Revolutionary Force, 1937).

Tivertsians (*tivertsy*). An East Slavic tribe that lived between the Dniester, the Prut, and the Danube rivers and southeast from there to the Black Sea, and whose primary activity was agriculture. They are first mentioned in the Primary Chronicle in the 9th century as one of the *tribes that 'lived on the Dniester, in close proximity to the Danube.' They participated as allies of the Kievan Rus' princes Oleh (907) and Ihor (944) in their campaigns against Byzantium. In the mid-10th century they became part of *Kievan Rus'. Under pressure from the Pechenegs and Polovtsians in the 10th to 12th centuries, they moved northward and mixed with neighboring Ukrainian tribes. During the 12th and 13th centuries their territories belonged to the Halych principality. Their descendants became *Ukrainians, and some were Rumanianized. Historical information on the Tivertsians has been gleaned from the chronicles and from archeological artifacts of their settlements and town sites between the Dniester and the Prut rivers. Excavations of the sites, including the

Alchedar settlement and the ancient town of Ekimautsy in the Rezina region of Moldavia, began in 1950.

Tkach, Dmytro [Tkač], b 24 September 1912 in Orlyk, Kobeliaky county, Poltava gubernia. Socialist-realist children's writer. He worked for newspapers in Kryvyi Rih and Dnipropetrovske, was deputy chief editor of *Dnipro*, chief editor of Molod publishers, and director of Veselka publishers. He began publishing in 1932. Among his works (many of them on Soviet naval themes) are the prose collections *Moriaky* (Sailors, 1948), *Zhdy, liuba divchyno* (Wait, Beloved Girl, 1959), *Malen'ki mriunyyky* (Little Dreamers, 1972), *Sadivnyk* (The Orchardist, 1978), and *Pomsta Sapun-hory* (The Revenge of Sapun Mountain, 1987), and the novels *Kruta khvyliia* (The Steep Wave, 1954), *Plem'ia duzhykh* (The Tribe of the Powerful, 1957), *Arena* (Arena, 1960), *Shtorm i shtyl'* (The Storm and the Calm, 1978), and *Doroha v lasne* (The Road to Yasne, 1980). He was awarded the 1981 Lesia Ukrainka Prize for *Shtorm i shtyl'*. A two-volume edition of six other previously published novelettes appeared in 1982.

Tkach, Mykhailo [Tkač, Myxajlo], b 26 November 1932 in Lukachany, Bukovyna. Writer. He graduated from the Chernivtsi Medical Institute (1957) and the Gorky Literary Institute (1961) and has worked for the Cinematography Committee of the Ukrainian SSR Council of Ministers. He has written several poetry collections, the first being *Idemo na verkhovyni* (We're Going to the Highlands, 1982), and the most recent, *Krok za obrii* (A Step across the Horizon, 1982) and *Nebo tvoikh ochei* (The Sky of Your Eyes, 1982); the prose collection *Soniachnyi poluden'* (A Sunny Midday, 1979); the novel *Khlib z dobrykh ruk* (Bread from Good Hands, 1981); song lyrics; and film scripts for Soviet Ukrainian feature and documentary films. He received the 1973 T. Shevchenko Prize for his script for the documentary film *Soviet Ukraine*.

Tkach, Yurii [Tkač, Jurij], b 17 February 1954 in Melbourne, Australia. Ukrainian-Australian publisher and translator. An engineer by training, he has been a full-time translator and publisher since 1979 for his own company, Bayda Books in Melbourne. His translations include *Before the Storm: Soviet Ukrainian Fiction of the 1920s*, A. Dimarov's *Across the Bridge*, D. Chub's *So This Is Australia*, O. Honchar's *The Cathedral*, I. Kachurovsky's *Because Deserters Are Immortal*, and *On the Fence: Ukrainian Prose in Australia*.

Tkachenko, Borys [Tkačenko], b 1899, d? Linguist and translator. A student of L. Bulakhovsky and O. Syniavsky, in the 1920s and 1930s he lectured at the Kharkiv Institute of People's Education and was a member of the VUAN Dialectological Commission. In 1925–7 he was a member of the special state commission that regulated Ukrainian orthography. He wrote a study of Ukrainian stylistics (5 fasc, late 1920s–early 1930s) and a few articles on Ukrainian lexicology and dialectal morphology, and was the coauthor of a Russian-Ukrainian dictionary (with M. Yohansen, K. Nimchynov, and M. Nakonechny, 1926) and a book of five lectures on the Ukrainian language for teachers (with M. Yohansen, 1928). He also translated foreign literature into Ukrainian. In 1937 he was imprisoned in a

Soviet labor camp, where he perished (in 1940, according to unconfirmed Soviet sources).

Tkachenko, Ivan [Tkačenko], b 10 June 1892 in Semenivka, Izium county, Kharkiv gubernia, d ? Literary scholar. In the 1920s he taught the history of Ukrainian literature at the Kharkiv Institute of People's Education and was an associate of the Taras Shevchenko Scientific Research Institute. He compiled a bibliography of Slobidska Ukrainian writers and researched the life of M. Drahomanov and the works of P. Myrny. He published articles on Myrny in *Chervonyi shliakh* and *Literaturnyi arkhiv*, on I. Franko in *Chervonyi shliakh*, and on P. Kulish's poetry in *Zapysky Istorychno-filolohichnoho viddilu VUAN*. Tkachenko also edited, with an introduction, the 1928 and 1929 editions of Myrny's works (vols 1–2, 5) and wrote biographical booklets about Franko (1926) and Kulish. He was arrested during the Stalinist terror, and most likely died or was killed in a labor camp.

Mykhailo Tkachenko: *Spring* (oil, 1907)

Tkachenko, Mykhailo [Tkačenko, Myxajlo], b 1860 in Kharkiv, d 1916 near Slovianske, Bakhmut county, Katerynoslav gubernia. Painter. He studied at the St Petersburg Academy of Arts and then under F. Cormon at the Académie des beaux arts in Paris (1888–92). He remained in Paris until 1914 and from there visited Ukraine each year. A specialist in landscapes and seascapes, he created canvases such as *Landscape in Kharkiv Gubernia*, *Donets River*, *By the Road*, *Village Cemetery* (1887), *Sunset on the Sea* (1901), *Incoming Waves* (1902–6), and *Spring* (1907). His works, many of which depict Ukraine, were exhibited in Paris (solo exhibition in 1909) and have been preserved in museums in Kharkiv, Lviv, Paris, Liège, and Toulon. He also painted a landscape mural for the library of the Poltava Zemstvo Building and other canvases there (1903–8). A monograph about him was published in 1963.

Tkachenko, Mykhailo [Tkačenko, Myxajlo] (pseud: Khvyliia), b 1879 in Starodub county, Chernihiv gubernia, d 1920 in Moscow. Civic and political activist; husband of N. *Romanovych-Tkachenko. A lawyer by profession, he was a member of the Revolutionary Ukrainian party

Mykhailo Tkachenko
(1879–1920)

(1902–4) and then of Spilka and the *Ukrainian Social Democratic Worker's party (USDRP). He became one of the leading ideologues of the USDRP, as well as its representative to the Central Rada. He was the Rada's secretary general (1917), and in the UNR he served as minister of justice (November 1917 to March 1918) and the interior (to April 1918). From January 1919 he led the left, Independentist faction of the USDRP, which in 1920 established the *Ukrainian Communist party (UCP). He died during negotiations for the legalization of the UCP.

Tkachenko, Mykola [Tkačenko], b 4 January 1893 in Talne, Cherkasy county, Kiev gubernia, d 7 November 1965 in Kiev. Historian and literary scholar. A graduate of Kiev University (1916), he worked at the VUAN (from 1919) on the Historical-Geographical Commission and as head of the Archeographic Commission. He also worked at the AN URSR (now ANU) institutes of History and Literature and studied the socioeconomic history of 17th- and 18th-century Ukraine. He wrote *Istoriia revoliutsiinoi borot'by u Kyievi v XIX ta na pochatku XX st.* (A History of the Revolutionary Struggle in Kiev in the 19th and Early 20th Centuries, 1930), *Narysy z istorii selian na Livoberezhnii Ukraini v XVII–XVIII st.* (Essays in the History of the Peasantry in Left-Bank Ukraine during the 17th–18th Centuries, 1931), and *Litopys zhyttia i tvorchosti T.H. Shevchenka* (A Chronicle of the Life and Works of T. Shevchenko, 1961); coauthored the collective work *Istoriia Kyieva* (History of Kiev, 1959–60); and coedited the complete collection of Shevchenko's works (6 vols, 1963–4).

Tkachenko, Nadiia [Tkačenko, Nadija], b 9 September 1948 in Kremenchuk, Poltava oblast. Pentathlete. The 1973–5 and 1978 USSR and 1974 European champion and the 1977 European Cup winner, she set a world record in 1977. In 1980 she won the Olympic gold medal and set another world record.

Tkachenko, Ninel [Tkačenko, Ninel'], b 21 November 1928 in Kharkiv. Opera singer (lyric-dramatic soprano). In 1958 she completed study at the Kharkiv Conservatory. She then appeared as a soloist in Lviv and Minsk before joining the Odessa Theater of Opera and Ballet in 1968. Her main roles were Lisa in P. Tchaikovsky's *The Queen of Spades*, Mavka in V. Kyreiko's *The Forest Song*, and the name-part in G. Verdi's *Aida*.

Oleksandr Tkachenko: *Flowering Cactus* (mixed media, 1988)

Tkachenko, Oleksandr [Tkačenko], b 15 May 1952 in Kryvyi Rih. Painter. A graduate of the Dnipropetrovske Art School (1971), he has made a living as a commercial artist. His mixed-media paintings on an etched surface consist of watercolors and pen-and-ink line drawings. They are surrealistic, dreamlike visions of the fantastic intertwined with reality. Tkachenko's first solo exhibitions were held in Dnipropetrovske in 1989 and in Warsaw and Toronto in 1990.

Tkachenko, Orest [Tkačenko], b 10 December 1925 in Kharkiv. Linguist; son of B. *Tkachenko. He studied at Kharkiv (1945–7) and Kiev (1947–50) universities and completed his graduate work in Slavic linguistics under L. Bulakhovsky at the AN URSR (now ANU) Institute of Linguistics (1950–3, doctorate in 1982). After joining the institute as a researcher, he chaired the Terminological Commission of the Ukrainian Committee of Slavists (1965–8) and helped compile the dictionary of Slavic linguistic terminology. Tkachenko has written articles in the fields of Slavic, Finno-Ugric, Romance, and Indo-European linguistics, sociolinguistics, and interlinguistics (Esperanto); on Ukrainian language stability; and on Oriental studies in Ukraine. His monographs (in Russian) deal with the comparative-historical phraseology of the Slavic and Finno-Ugric languages (1979), the Meri language (1985), and the theory of the linguistic substratum (1989). He is also the coauthor of a book in Ukrainian on the comparative-historical study of the Slavic languages (1966) and a coeditor and coauthor of the ANU Ukrainian etymological dictionary (7 vols, 1982–).

Tkachenko, Valentyna [Tkačenko], b 6 March 1920 in Koriukivka, Chernihiv gubernia, d 19 December 1970 in Kiev. Lyric poet. After the Second World War she worked as an editor at the republican radio committee and for the publishing house Molod. She published 16 poetry collections, including *Zelena storona* (The Green Side, 1940), *Vesniani vitry* (Spring Winds, 1950), *Liryka* (Lyricism, 1956), *Zhyttia iednaie ruky* (Life Joins Hands, 1960), *Zemlia radiie sontsiu* (The Earth Is Glad of the Sun, 1962), *Skoro bude vesna* (Soon It Will Be Spring, 1963), *Ne mynaie molo-dist'* (Youth Doesn't Pass, 1966), and *Zelene peredzym'ia* (The Green Prewinter, 1970). She also wrote two books of articles, both titled *Rozмова pro liubov* (A Talk about Love, 1960, 1964), and four books of poetry for children.

Tkachenko, Yuliia [Tkačenko, Julija], b 25 July 1928 in Kiev. Stage actress. She completed study at the Kiev Institute of Theater Arts (1950) and was a leading actress in the Kiev Ukrainian Drama Theater, acclaimed for playing the title role in Lesia Ukrainka's *Kassandra* and *Inhiherda* (Ingigerth) in I. Kocherha's *Iaroslav Mudryi* (Yaroslav the Wise).

Tkachenko-Halashko, Petro [Tkačenko-Halaško], b 2 January 1879 in Syniavka, Sosnytsia county, Chernihiv gubernia, d 3 January 1919 in Syniavka. Kobzar. He was blinded at a young age and learned to play the kobza from T. Parkhomenko. His repertoire included the dumasy about a brother and sister, the widow, and the captives' lament, as well as historical songs and musical adaptations of T. Shevchenko's verses. He wandered through much of Ukraine and the Kuban region.

Archimandrite Dionysii
Dmytro Tkachuk

Ivan Tkachuk

Tkachuk, Dionysii Dmytro [Tkačuk, Dionysij Dmytro], b 9 November 1867 in Kniahynyn, Stanyslaviv county, Galicia, d 24 January 1944 in Rome. Basilian priest. He instructed novices and headed the Basilian monasteries in Buchach, Lavriv, Dobromyl, and Krekhiv. In 1931 he was appointed the first superior general of the Basilian order following the reforms of 1882. From then he lived in Rome and directed the order's activities.

Tkachuk, Ivan [Tkačuk] (pseud: Ivan Chornobyl), b 25 September 1891 in Piadyky, Kolomyia county, Galicia, d 9 October 1948 in Lviv. Writer and journalist. After being released from a Russian POW camp following the February Revolution of 1917, he joined the Bolshevik party and remained in Soviet Ukraine. He edited the newspapers *Chervona pravda* (Kiev, 1920), *Selians'ka pravda* (Katerynoslav, 1921–3), *Zirka* (Katerynoslav, 1923–4), and *Radians'kyi step* (Melitopol, 1924), and the journal **Zoria* (Dnipropetrovske, 1925–9). From 1925 to 1933 he belonged to the writers' group Zakhidnia Ukraina. His stories and articles on political, literary, and cultural topics appeared in Soviet Ukrainian and Ukrainian communist periodicals in Lviv, the United States, and Canada. Published separately were his prose collections *Pomsta* (Revenge, 1927), *Smerekovi shumy* (The Spruces' Murmuring, 1929), *Nezakinchenyi lyst* (An Unfinished Letter, 1930), *Na vkradenii zemli* (On the Stolen Land, 1930; 2nd edn 1933), *Prostrilenyi dekret* (The Plugged Decree, 1930), *Ukrainci za okeanom* (Ukrainians across the Ocean, 1930), *Straik* (Strike, 1931), and *Za Kavkaz'kymy khrebtamy* (Beyond the Caucasian Ranges, 1932). He also coauthored (with M. Skrypnyk and Ye. Cherniak) a book of essays on contemporary Western Ukrainian literature (1930) and wrote a short book about revolutionary proletarian literature in Western Ukraine (1932). He was arrested in 1933, and was imprisoned in a Soviet labor camp. When he was released and settled in Lviv after the Second World War he was a very sick man. Posthumous editions of his works were published in 1955, 1962, and 1968.

R. Senkus

Lukian Tkachuk

Virlana Tkacz

Tkachuk, Lukian [Tkačuk, Lukjan], b 28 October 1902 in Nemyryntsi, Berdychiv county, Kiev gubernia, d 20 June 1981 in Kiev. Geologist; full member of the AN URSR (now ANU) from 1972. He graduated in 1926 from the Kiev Institute of People's Education and then taught at institutes of higher education in Kiev. He was director of the petrography laboratory of the ANU Institute of the Geology and Geochemistry of Fossil Fuels in Lviv (1945–61) and at the same time chaired the mineralogy and petrography department at the Lviv Polytechnical Institute. He moved to Kiev in 1961, where he became head of the lithology department at the ANU Institute of Geologi-

cal Sciences and then of the Department of the Geology and Geochemistry of Lithogenesis at the Institute of the Geochemistry and Physics of Minerals. His research centered on the lithology of sedimentary and sedimentary-vulcanogenic formations in the Ukrainian part of the Carpathian Mountains and the southwestern part of the East European plate, as well as on the petrography of magmatic and metamorphic rocks of the Ukrainian Crystalline Shield.

Tkachuk, Olha [Tkačuk, Ol'ha], b 6 January 1913 in Zhubrovychi, Ovruch county, Volhynia gubernia, d 9 June 1983. Writer and teacher. She graduated from Warsaw University and then worked as a teacher. From 1954 on she contributed articles, sketches, stories, and novels to Soviet periodicals. Published separately were her novels *Nazustrich voli* (Meeting Freedom, 1955) and *Pereorani mezhi* (Plowed-over Boundaries, 1973) and the prose collections *Maty* (Mother, 1960) and *Stezhky zhyttia* (Life's Paths, 1967).

Tkachuk, Stepan [Tkačuk], b 13 January 1936 in Dănila, Suceava county, Bukovyna. Ukrainian writer in postwar Rumania. An engineer in Bucharest, since 1954 he has contributed poems, translations of Rumanian poetry, and articles to the Bucharest Ukrainian paper *Novyi vik*. Published separately have been numerous poetry collections, the first being *Rozkolote nebo* (The Cloven Sky, 1971), and the most recent, *Smikh i plach sliv* (The Laughter and Crying of Words, 1986); the story collections *Suzir'ia pred-kiv* (Constellation of the Ancestors, 1974) and *Kaleidoskop* (Kaleidoscope, 1985); and the novel *Nichyia pora* (Nobody's Time, 1979). Tkachuk has also written two poetry collections in Rumanian. Since 1979 his poems, stories, and literary profiles have appeared in the Bucharest almanac *Obrii* (Horizons). He has also translated into Rumanian poetry collections by L. Kostenko, I. Drach, D. Pavlychko, and B. Oliinyk and an anthology of contemporary Soviet Ukrainian poetry. In 1990 Tkachuk was elected the first head of the Union of Ukrainians of Rumania.

Tkachuk, Vasyl [Tkačuk, Vasyl'], b 13 January 1916 in Ilyntsi, Sniatyn county, Galicia, d ? Writer. A self-educated peasant, he wrote novellas in the manner of V. *Stefanyk. They appeared in Galician periodicals of the 1930s, such as *Zhinocha dolia*, *Narodnia sprava*, *Nedilia*, *Nash prapor*, *Novyi chas*, *Dilo*, *Nazustrich*, and *Dazhboh*. Published separately were the collections *Syni chichky* (Blue Florets, 1935), *Zoloti dzvinky* (Golden Bells, 1936), and *Zymova melodiia* (A Winter Melody, 1938). Tkachuk disappeared in 1944 without a trace.

Tkacz, Virlana [Tkač], b 23 June 1952 in Newark, New Jersey. Theater director. Tkacz received degrees in literature and drama from Bennington College in Vermont (1974) and theater directing from Columbia University (1983). Based at the La Mama theater in New York since 1985, she has directed *Three Moons* (1984) and *An Altar to Himself* (1989). In 1990 she founded the Yara Arts Group, for which she created and directed 'A Light from the East,' based on L. *Kurbas's diary and P. *Tychyna's poetry (translated by Tkacz and the African-American poet W. Phipps). Tkacz toured Ukraine with the group (1991), de-

veloped a bilingual version of the show, and conducted theater workshops in Kiev, Lviv, and Kharkiv. She has written articles in English on L. Kurbas, and together with L. and N. Taniuk and R. Bahry she founded the International Kurbas Society (1989).

Tlumach. See Tovmach.

An 11th-century stone icon of St Hlib from Tmutorokan Sofia Tobilevych

Tmutorokan [Tmutorokan']. A city of Kievan Rus', at the site of the ancient Greek colony of *Hermonassa (now Taman village, Krasnodar krai) in the Taman Peninsula. From the 6th century the territory was under Byzantine rule. The earliest reference to Tmutorokan (Tamantarcha in Greek) appears in an early 8th-century list of the eparchies of the Byzantine patriarchate. The eparchy came under Dorus metropoly in the Crimea. In the 10th century it was elevated to the status of an archeparchy under the jurisdiction of the patriarch of Constantinople. In the 8th and 9th centuries the whole Taman Peninsula belonged to the Khazar kaganate. After Sviatoslav the Conqueror's decisive defeat of the Khazars in 965, Tmutorokan emerged as the center of an appanage principality of the Kievan state. Through Tmutorokan Kiev maintained political and economic contacts with the Byzantine Empire and northern Caucasia. The remote principality also provided refuge for princes who had been defeated in the power struggles at the center. When the Cumans gained control of the steppes, Tmutorokan became cut off from the rest of Rus', but it preserved its independence until the late 11th century. Thereafter it was dominated by the nomads, the Byzantine emperors, the Genoese merchants (13th century), and the Golden Horde. In the 15th century it was recovered by Genoa, and at the end of the century it was razed by the Turks and Tatars.

Major excavations of the site in 1824–45 (led by A. Tarasenko), 1930–1 (O. Miller), and 1952–5 (B. Rybakov) showed that the city had been encircled with a brick wall, its streets had been paved with stone, and the houses had been built of brick and covered with tiled roofs. The foundations of the Church of the Theotokos, built in 1023 by Mstyslav Volodymyrovych in gratitude for his victory over Rededia, and of the monastery founded by *Nykon in 1061 have been unearthed. The *Tmutorokan plate was discovered in the vicinity.

Tmutorokan plate. A marble plate with the Slavonic inscription 'In the Year 6576 [ie, 1068] Prince Hlib Measured the Sea by Ice from Tmutorokan to Korch [Kerch] at 14,000 *sazhni* [approx 28 km].' It was discovered in 1792 on the eastern shore of Kerch Strait and has been preserved at the Hermitage in St Petersburg since 1851.

Tmutorokan principality. An appanage principality of Kievan Rus' in the 10th and 11th centuries. It encompassed the Taman and Kerch peninsulas, and its capital was *Tmutorokan. The principality arose and became part of the Rus' state in the mid-10th century, after Sviatoslav the Conqueror's defeat of the Khazars. It is first mentioned in the chronicles under the year 988, when Volodymyr the Great granted the principality to his son, Mstyslav (988–1036), who added Chernihiv principality to his possessions in 1024 after defeating his brother, Yaroslav. For Rus' Tmutorokan served not only as a strategic stronghold but also as a trading center and access point to the Near East. At Mstyslav's death in 1036, the principality became part of the unified state ruled by Yaroslav the Wise. At his death (1054) it was inherited by his son, Sviatoslav, the prince of Chernihiv, who placed his son, Hlib, on the Tmutorokan throne. But Hlib was deposed immediately by his cousin, Rostyslav Volodymyrovych, who had been expelled from Halych. When Rostyslav was poisoned in 1067 by the Byzantine authorities, Hlib Sviatoslavych returned to Tmutorokan. Then the brothers Roman and Oleh Sviatoslavych, from Chernihiv, contested Tmutorokan with Vsevolod and Iziaslav Yaroslavych. The Cumans, Khazars, and Greeks became involved in the struggle. In 1079 Roman was killed by the Cumans, and Oleh was captured by the Khazars and handed over to the Greeks. With Greek military support Oleh captured the principality in 1083. Ten years later he won control of Chernihiv principality and left Tmutorokan for good. After 1094 the chronicles are silent about Tmutorokan, which was cut off from Rus'. Some historians believe that the principality continued to exist under the domination of the Cumans and Byzantium until it was destroyed by the Mongols in the 13th century.

M. Zhdan

Toad (*Bufo*; Ukrainian: *ropukha*). A squat, rough-skinned, tailless amphibian of the family Bufonidae. Its stout body and short legs give it a characteristic hopping gait. Toads possess poison-secreting glands on the back and behind the eyes. Of the more than 150 species of true toads (*Bufo*) there are 3 in Ukraine, the European toad (*B. bufo*; Ukrainian: *ropukha sira*), the green toad (*B. viridis*), which inhabits mostly the Crimean Peninsula, and the natterjack toad (*B. calamita*; Ukrainian: *ropukha ocheretiana*), a protected species living in western Ukraine. As consumers of agricultural pests they are considered beneficial animals.

Toad, European spadefoot (*Pelobates fuscus*; Ukrainian: *chasnychnytsia*). A relatively smooth-skinned, tailless Old World amphibian of the family Pelobatidae. It is a nocturnal animal. Its body is gray to yellowish gray on top and

white on the bottom, and it has a broad projection from the inside of each hind foot adaptable for burrowing. In the spring the spadefoot emanates a garlicky smell – hence the Ukrainian name, ‘garlic toad.’

Tobacco (*Nicotiana*; Ukrainian: *tiutiun*). An annual or perennial leafy herb of the family Solanaceae, including true tobacco (*N. tabacum*) and Indian tobacco (*N. rustica*; Ukrainian: *makhorka*). Tobacco is a widely cultivated narcotic that is no longer found in the wild state. It was introduced into Cossack Ukraine through Turkey during the 17th century. The Pereiaslav regiment was authorized by King Władysław to distribute tobacco throughout Poland, but export to Muscovy was forbidden by a provision of the *Hlukhiv Articles of 1687. Peter I introduced tobacco into Muscovy in the early 18th century, and the first tobacco factory in the Russian Empire was established (1718) in Okhtyrka, a regimental center in Slobidska Ukraine. The crop was suited to large estates with an enserfed population. Chernihiv and Poltava gubernias emerged as major centers of tobacco production; they accounted for approx 60 percent of the empire’s tobacco in the 1860s and 1870s outside Caucasia. Tobacco products are smoked, snuffed, chewed, and extracted to produce nicotine. Ukraine produces large-leaf tobacco and *makhorka* (shag) for cigars and cigarettes; the yield is 4–6 t of leaves per ha. The following types are popular: Hostrolyst B2474, Soboltskiy, Amerykan 572, Diubek 44, and Peremozhets 83. Tobacco is also used to produce citric acid and pesticides.

Tobacco industry. A branch of industry that manufactures tobacco goods, such as cigarettes, cigars, and pipe tobacco. The first tobacco factory in the Russian Empire was a state-owned enterprise established on the orders of Peter I in Okhtyrka, Slobidska Ukraine, in 1718. Until the 1860s the tobacco grown in the Ukrainian gubernias was either processed on the plantations where it was grown, or exported to Russia or Holland for processing. After the abolition of serfdom the number of small tobacco factories in Ukraine increased rapidly. At the beginning of the 20th century a number of joint-stock tobacco companies arose in Russian-ruled Ukraine. In 1913 a monopolistic tobacco consortium achieved control of 75 percent of the cigarette market. There were 109 tobacco factories in the Ukrainian gubernias at that time. They employed about 6,000 workers and produced 3.1 billion cigarettes (12 percent of the empire’s output). In 1911 1,883 t of *makhorka* (shag) and 194 t of tobacco were produced in Ukraine. The lower-grade *makhorka* was usually processed by small enterprises located close to the source of the raw material, and the higher-grade tobacco was shipped to the larger manufacturing centers in Ukraine, such as Odessa, Kiev, Kremenchuk, and Teodosiia. The large factories used not only Ukrainian-grown but also imported tobacco, and their products were shipped to other parts of the empire and abroad.

In Galicia the Austrian government established a state monopoly on tobacco and tobacco products in 1778. By the end of the 18th century large tobacco factories had been built in Vynnyky, near Lviv, and Manastyryska, and by the end of the 19th century, in Yaholnytsia, Zabolotiv, and Borshchiv. The factories used domestic and imported tobacco. The profits on tobacco sales rose steadily, from approx 34 million kronen in 1848 to 340 million kronen in

1913. On the eve of the First World War the tobacco industry in Galicia employed nearly 4,000 people (over 1,500 in Vynnyky alone). Most of the prewar tobacco factories continued to operate in the interwar period.

Under the Soviet regime tobacco factories were nationalized, and the industry was concentrated in the larger cities. By 1940 there were only 15 enterprises in Ukraine. Their output consisted mostly of cigarettes, the production of which in 1940 totaled 22.3 billion. After the Second World War the industry was modernized. Today there are 10 tobacco factories in Ukraine. The largest ones are in Lviv, Kiev, Cherkasy, Pryluka, and Kharkiv. There is a similar number of tobacco fermentation plants, the largest of which are in Zhmerynka, Symferopil, Berehove, and Borshchiv. In 1982 the Ukrainian SSR produced 77.9 billion cigarettes.

After Ukraine’s declaration of independence in 1991 R.J. Reynold’s Tobacco International purchased 70-percent ownership in two of the largest tobacco factories in Ukraine (in Lviv and Kremenchuk), which produce a quarter of the 80 billion cigarettes consumed by Ukrainians annually.

Tobilevych [Tobilevyč]. A family of distinguished theater activists of the late 19th and early 20th centuries that greatly influenced the development of Ukrainian theater and drama. The brothers were known by their pseudonyms – the actor and playwright Ivan *Karpenko-Kary and the actors and troupe directors Mykola *Sadovsky and Panas *Saksahansky. Their sister, M. *Sadovska-Barilotti, was an actress and singer. Karpenko-Kary’s wife, Sofiia *Tobilevych, was an actress, translator, and author of memoirs.

Tobilevych, Ivan. See Karpenko-Kary, Ivan.

Tobilevych, Sofiia [Tobilevyč, Sofija] (née Ditkovska), b 15 October 1860 in Novoselytsia, Lityn county, Podilia gubernia, d 7 October 1953 in Kiev. Character actress, writer, and ethnographer; wife of I. Karpenko-Kary. She sang in M. Lysenko’s choir (1880–3) and in the choir in M. Starytsky’s troupe (1883–4) and then acted in the troupes of P. Saksahansky (1890–1907) and M. Sadovsky (1888–90) and in Sadovsky’s Theater (1908–16), the Franko New Drama Theater (1920–2), and the Shevchenko First Theater of the Ukrainian Socialist Republic (1924). She toured with Saksahansky and Sadovsky (1926–30). In 1935 she appeared on stage for the last time, as Natalka’s mother in I. Kotliarevsky’s *Natalka Poltavka* (Natalka from Poltava). Tobilevych translated many plays into Ukrainian (mostly from French and Polish) and wrote *Zhyttia Ivana Tobilevycha* (The Life of Ivan Tobilevych, 1945) and her memoirs, *Moï stezhky i zustrichi* (My Paths and Meetings, 1957).

Tobilevych Theater (Teatr im. I. Tobilevycha). One of the foremost theaters in Western Ukraine, established in 1928 as a stationary theater in Stanyslaviv, with a cast from a drama circle (active in 1919–28) and a predominantly musical repertoire. In 1929–30 it became a touring theater under M. *Bentsal and V. *Blavatsky. Bentsal was a director of the realistic school, and Blavatsky was a proponent of the *Berezil experimental style. Besides Ukrainian classics of the 19th century, contemporary European dramas, and operettas the Tobilevych Theater successful-

ly staged new heroic-romantic plays, including *Mazepa* (an adaptation of B. Lepky's trilogy), *Hory hovoriat* (The Mountains Speak, based on U. Samchuk's novel), and Yu. Horlis-Horsky's *Kholodnyi iar*. Blavatsky departed with part of the cast in 1932 to form the *Zahrava Theater, and the Tobilevych Theater continued under Bentsal and Y. Stadnyk (1933–5) until 1938, when it and Zahrava combined to form the Kotliarevsky Theater (later the *Lesia Ukrainka Theater).

Tochylo, Mykola. See Koliiankivsky, Mykola.

Tochylo (Grindstone). A monthly humor magazine published in Winnipeg from January 1930 to December 1947. It satirized Ukrainian political, religious, and community life in Canada. *Tochylo* was published and edited by S. Doroshchuk and then I. Andrusiak.

Todorov, Mykhailo, b 6 June 1915 in Odessa. Artist. He studied at the Institute of Painting, Sculpture, and Architecture in Leningrad (1939–41, 1945–9) and taught at the Odessa Art School (1951–7). He has painted landscapes, portraits, still lifes, and canvases on athletic and sports themes. They include *Bilhorod-Dnistrovskiy Fortress* (1958), *Swallow* (1960), *Near Odessa's Shores* (1960, 1964), *Midday* (1964), *Shevchenko Park in Odessa* (1964), *White Cloud* (1964), *Kabuki Theater in Tokyo* (1964), *A Partisan Land: Kodyma Forests* (1964), *Young Sportsman* (1964), *Crimea: Sudak* (1965), *Red Trees* (1965), *Above the Precipice* (1966), *Morning: Odessa* (1965–7), *Olympic Fire* (1966–7), *Youths* (1970–1), and portraits of the Olympic athletes M. Avilov (1975) and Yu. Riabchynska (1977).

Tohobichny, Ivan. See Shchoholiv, Ivan.

Tokarevsky, Makarii [Tokarevs'kyj, Makarij], b ? in Ovruch, Volhynia, d 13 September 1678 in Kaniv. Orthodox monk. He was forced out of his position as archimandrite of the Ovruch Monastery when the Uniates gained control of the monastery, and he became hegumen of the Dormition Monastery in Kaniv in 1671. He was tortured and killed by the Turks during a raid on the city and came to be regarded as a martyr for his faith. His remains were at a later time moved to Pereiaslav, where they eventually came to rest at the Ascension Monastery. The Ukrainian Orthodox church considers him a saint; his feast day is 20 September (7 September OS).

Tokarevsky, Mykhailo [Tokarevs'kyj, Myxajlo], b 19 November 1884 in Mashivka, Kostiantynohrad county, Poltava gubernia, d ? Co-operative and civic activist in the Poltava region. He studied at the Moscow Commercial Institute and was a member of the Ukrainian Social Democratic Workers' party until his arrest in 1911. His three-year term of exile was served in Ostrohozke. He was an executive member of the Poltava Association of Consumer Co-operatives, and in 1917–18 he was president of the executive of the Poltava gubernia zemstvo. In the Soviet period he worked for the All-Ukrainian Association of Consumer Co-operative Organizations as deputy director of its Co-operative Institute in Kiev and then head of its Co-operative Museum. Twice arrested (1929 and 1936) and twice released, he led a precarious existence in Kharkiv through the 1930s. He disappeared completely

Mykhailo Tokarevsky

Jan Tokarzewski-Karaszewicz

after his arrest in 1943 for active involvement in the co-operative movement (considered as collaboration) that revived in the region following the Soviet retreat in 1941.

Tokarzewski-Karaszewicz, Jan (Tokarzhevsky-Karaszhevych), b 24 June 1885 in Chabanivka, Ushytsia county, Podilia gubernia, d 18 November 1954 in London (buried in Bound Brook, New Jersey). Ukrainian diplomat and heraldist, descended from Polish nobility (the Janiszewski family). He obtained a doctorate at Fribourg University in Switzerland. In 1911–18 he worked in the Poltava gubernial and zemstvo administrations and was general comptroller of the zemstvo Red Cross Committee. He served as an adviser to the UNR missions in Vienna (June 1918 to June 1919) and Istanbul (August 1919 to March 1920) and as consul general in Istanbul (to December 1921). In January 1922 he became director of the Ministry of External Affairs for the UNR government-in-exile. In Paris (from 1924) he headed the International Heraldic Institute and supported the Promethean movement; in Rome (from 1936) he worked in the archives of the Vatican; and in London (from 1948) he was a leading member of the Anti-Bolshevik Bloc of Nations. His writings included numerous articles in Polish, French, Italian, German, and English on Ukrainian history, literature, and heraldry, as well as the unpublished monograph *Istoriia ukrains'koi dyplomatii* (A History of Ukrainian Diplomacy).

Tokmak. VI-16. A city (1989 pop 45,800) on the Molochna River and a raion center in Zaporizhia oblast. It originated in 1784 as a settlement of state peasants from Poltava gubernia. The village prospered: by 1861 it had 8,000 inhabitants, and that year it was renamed Velykyi Tokmak. In 1882 a farm-machinery shop was set up. The construction of the Velykyi Tokmak–Fedorivka railway line (1910) stimulated industrial development. In 1938 the town was given city status, and in 1962 its original name was restored. Today Tokmak is an industrial center that produces sheet metal, diesel engines, agricultural machinery, canned and baked goods, granite, and furniture.

Tolba, Veniamin [Tol'ba, Venjamin], b 12 November 1909 in Kharkiv. Conductor and pedagogue. A graduate of the Kharkiv Institute of Music and Drama (1932), he studied score reading with D. Shostakovich and conducting with Y. Rosenstein. In 1931–44 he conducted the Kharkiv Opera and lectured at the Kharkiv Conservatory.

He then went on to the Kiev Opera (1944–59) and Kiev Conservatory (1946–73), where he lectured and conducted its opera studio. He premiered a number of works, including M. Verykivsky's opera *The Servant-Girl* (1943), H. Maiboroda's opera *Arsenal* (1960), and H. Zhukovsky's ballet *Rostyslava* (1955). He also orchestrated M. Lysenko's opera *Nocturne* and edited L. Revutsky's *Second Symphony*.

A mural by Zinovii Tolkachov in the Komsomol Club in Kiev (1921)

Tolkachov, Zinovii [Tolkačov, Zinovij], b 25 February 1903 in Shchadryn, Rahachou county, Mahiliou gubernia, Belarus, d 30 August 1977 in Kiev. Painter and graphic artist. He studied at the Moscow Higher Artistic and Technical Workshop (1919–20) and the Kiev State Art Institute (1928–9). He painted murals in Communist Youth League clubs in Kiev (1921–2); created the lithograph series 'Lenin – the Masses' (1924–8), 'The Trypilia Tragedy' (1937), 'Occupiers' (1941–3), 'Majdanek' (1944–5), and 'Auschwitz' (1945); painted portraits of political and literary figures (eg, Artem, V. Blakytny, V. Chumak); illustrated editions of works by O. Korniiuchuk (1939) and M. Vovchok (1950); designed posters; and drew caricatures for *Perets'*. A book about him was published in 1933, and an album of his 'Auschwitz' series came out in 1965.

Tolkovaia paleia (Explanatory Old Testament). An Old Church Slavonic literary monument of the 10th to 13th centuries. It contains stories from the Old Testament with commentaries, most of which are used to illustrate the faults of Judaism; apocrypha; and parts of the *Hexaemeron* of Basil the Great as translated and revised by the Bulgarian John the Exarch. Fifteen copies of the manuscript have survived, in several redactions. The *Tolkovaia paleia* had a great influence on the original literature of Kievan Rus' and was one of the sources used in the compilation of the Primary Chronicle.

Tolochko, Petro [Toločko], b 21 February 1938 in Prystromy, Pereiaslav-Khmelnytskyi raion, Kiev oblast. Archeologist; full member of the AN URSS (now ANU) since 1990 and vice-president of ANU since 1993. A graduate of

Petro Tolochko

Kiev University (1960), he has worked at the ANU Institute of Archeology since 1961, as director since 1988. He has played a prominent role in recent archeological excavations in Kiev that have revealed a clear picture of the city's growth. Tolochko is a strong proponent of the theory that the state of Rus' was formed at the same time that Kiev was founded in the late fifth century. He has written or edited many works, including *Istorychna topohrafiia starodavn'oho Kyieva* (The Historical Topography of Ancient Kiev, 1970), *Starodavnii Kyiv* (Ancient Kiev, 1975), *Arkheolohichni doslidzhennia starodavn'oho Kyiva* (Archeological Research on Ancient Kiev, 1976), *Kiev i Kievskaiia zemlia v epokhu feodal'noi razdroblennosti XII–XIII vv.* (Kiev and the Kievan Land during the Period of Feudal Fragmentation in the 12th and 13th Centuries, 1980), and *Drevniaia Rus': Ocherki sotsial'no-politicheskoi istorii* (Ancient Rus': Surveys of Social-Political History, 1987).

Viktor Tolochko: *In the Feather-Grass Steppe* (oil, 1982)

Tolochko, Viktor [Toločko], b 22 October 1922 in Melitopil, Tavriia gubernia. Painter. He graduated from the Kharkiv Art Institute (1957), where he studied under O. Kokel and O. Liubymyky. A resident of Donetsk, he has painted landscapes, still lifes, and depictions of the Second World War. They include *Moonlit Night in Crimea* (1960), *Lilac and Tulips* (1964), *Old Dock* (1969), *Azure Landscape* (1971), *In the Artist's Studio* (1975), *Still Life with Cacti* (1977), *Fishermen's Nets* (1978), *Sevastopol* (1980), *The Almond Blooms* (1981), *In the Feather-Grass Steppe* (1982), *Par-*

tisans (1982), *Cliffs by the Sea* (1982), *Rains* (1982), *In Memory of the Soldier* (1983), and *The Storm Passed* (1985). An album of his works was published in 1987.

Tolochynov, Mykola [Toločynov], b 8 March 1838 in Starodub, Chernihiv gubernia, d 23 May 1908 in Kharkiv. Obstetrician and gynecologist. A graduate of the St Petersburg Medico-Surgical Academy (1864), he completed a doctoral dissertation in 1867 and specialized in Vienna. He lectured at Kiev (1870–85) and Kharkiv (1885–1902) universities and in 1902 became director of the zemstvo childbirth center in Kharkiv. His publications dealt with asepsis and antisepsis in obstetric practice, the mechanisms of birth, extrauterine pregnancy, and the history of obstetrics and pediatrics.

Tolok, Volodymyr, b 25 December 1926 in Uman, now in Cherkasy oblast. Experimental physicist; AN URSR (now ANU) corresponding member since 1972. A graduate of Kharkiv University (1951), since 1952 he has worked at the ANU Physical-Technical Institute in Kharkiv. Considered to be one of the top experts on the high-frequency heating of thermonuclear plasma for controlled fusion, he has made significant contributions to the design and construction of particle accelerators and experimental controlled thermonuclear devices.

Tolopko, Leon (pseud: M. Pilny), b 11 August 1902 in New York, d 20 January 1991 in New York. Ukrainian-American journalist and community leader. In 1908 he moved with his parents to Galicia, where he completed study at the Lviv Teachers' Seminary. Afterward he worked as a teacher in Poland. He returned to the United States in 1927, and from the 1930s he was active in the Communist party there. From 1956 to the mid-1980s he edited the pro-Soviet newspaper *Ukrains'ki visti*, and in 1980 he became president of the League of American Ukrainians. Tolopko wrote several propagandistic plays about Ukrainian life in the United States and about the USSR, which were staged by amateur Ukrainian theater groups in North America, and a history of Ukrainians in the United States (2 vols, 1984, 1991).

Tolpyho, Kyrilo (Tolpigo, Kirill), b 3 May 1916 in Kiev. Theoretical physicist; AN URSR (now ANU) corresponding member since 1965. A graduate of Kiev University (1939), he worked at the ANU Institute of Physics (1945–59), chaired the department of theoretical physics at Kiev University (1960–6), headed a department at the ANU Physical-Technical Institute in Donetsk (from 1966), and chaired the department of theoretical physics at Donetsk University (1967–70). His major contributions are in solid-state theory, where he developed a quasimolecular model of covalent crystals. He has written over 120 works, including a monograph on thermodynamics and statistical physics (1966).

Tolstoi, Dmitrii [Tolstoj, Dmitrij], b 13 March 1823 in Moscow, d 7 May 1889 in St Petersburg. Russian imperial official; president of the Imperial Russian Academy of Sciences from 1882. He was procurator of the Holy Synod (1865–80) and minister of public education (1866–80). A reactionary, he opposed the development of any form of Ukrainian national consciousness. With A. Pazukhin he

prepared the draft of the *Ems Ukase (1876), and in 1884 he placed further restrictions on Ukrainian theater troupes and known Ukrainophiles.

Fedor Tolstoj (etching by Taras Shevchenko, 1860)

Vsevolod Tolubynsky

Tolstoj, Fedor [Tolstoj], b 21 February 1783 in St Petersburg, d 25 April 1873 in St Petersburg. Russian sculptor and graphic artist. He attended the St Petersburg Academy of Arts, was elected an honorary member (1809), and served as its vice-president (1828–59). In 1835 he met T. Shevchenko, and from 1855 he worked for his release. The Tolstois were the first family Shevchenko visited when he returned to St Petersburg in 1858. In 1860 Shevchenko did an etching of Tolstoj.

Tolstoy, Leo [Tolstoj, Lev], b 28 August 1828 at Yasnaia Poliana, Russia, d 7 November 1910 at Astapovo railway station. Russian novelist and thinker, author of *War and Peace* (1863–9), *Anna Karenina* (1873–7), *The Death of Ivan Illich* (1886), *Resurrection* (1899), and numerous religious-philosophical essays and treatises. His ethical precepts entailed a belief in the passive resistance to evil, the rejection of private property, the abolition of government and church authority, a personal God, and the supremacy of love in all spheres of life. His writings influenced many authors and intellectuals in Russia and abroad, including major figures such as G.B. Shaw, Gandhi, R. Rolland, and G. de Maupassant.

Tolstoy exerted a significant influence on several Ukrainian authors. The majority of them assimilated his literary techniques and devices but rejected Tolstoy's weltanschauung. In 'Autobiography,' I. Franko acknowledged Tolstoy's influence on his prose of the 1870s. O. Kobylanska also stated that under the influence of Tolstoy she wrote a number of stories and the novels *Zemlia* (Land, 1901) and *Cherez kladku* (Over the Footbridge, 1911). Quite prominent was Tolstoy's influence on Ukrainian historical novels written in the 20th century. They include *Nalyvaiko* (1940) and *Khmel'nyts'kyi* (1957) by I. Le, *Semen Palii* (1954) by Yu. Mushketyk, *Homonila Ukraïna* (Ukraine Was Astir, 1954) by P. Panch, and *Pereiaslavs'ka rada* (The Pereiaslav Council, 1948) by N. Rybak. Tolstoyan influences can also be discerned in some novels presenting recent or contemporary events: *Myr khatam – viina palatsam* (Peace to Houses, War on Palaces, 1958) and *Reve ta stohne Dnipro shyrokyi* (The Broad Dnieper Roars and Groans, 1960) by

Yu. Smolych, and *Praporonostsi* (The Standard-Bearers, 2 vols, 1947–8), *Liudyna i zbroia* (Man and Arms, 1960), and *Tronka* (The Sheep's Bell, 1963) by O. Honchar.

The first translation of Tolstoy into Ukrainian was his trilogy *Childhood, Boyhood, and Youth*, which appeared in 1894 in Lviv. Owing to Franko's efforts the following works of Tolstoy were published in Ukrainian: *Resurrection* (1901), *The Kreuzer Sonata* (1902), *The Death of Ivan Illich* (1903), *The Cossacks* (1906), and a host of essays and short stories. Under the Soviet regime Ukrainian translations of Tolstoy's works were published frequently, but they consisted mostly of reprints or writings for children. Translations of Tolstoy's major novels were issued with great delays. A translation of *Anna Karenina* appeared only in 1935, and a complete edition of *War and Peace* was not available until 1953. A 12-volume Ukrainian edition of Tolstoy's complete works was first published in 1960. The most accomplished translations of Tolstoy into Ukrainian were by O. Kundzich.

Of the abundant studies of Tolstoy's influence on Ukrainian literature, the majority are articles dealing with his influence on individual authors, his translations into Ukrainian, or certain literary processes; they offer no detailed examination of his influence on Ukrainian literature. Much more comprehensive, although not exhaustive, are the monographs, including N. Krutikova's study of Tolstoy and Ukrainian literature (1958), which is confined to the Ukrainian reception of Tolstoy in the 19th century, and A. Sakhaltuev's *L.M. Tolstoi i ukrains'ka literatura* (L.M. Tolstoy and Ukrainian Literature, 1963), which outlines Tolstoy's influence on the writers of the 19th and 20th centuries and provides a brief outline of Ukrainian translations of his works.

W. Smyrniw

Tolubynsky, Vsevolod [Tolubyns'kyj], b 27 March 1904 in Tartak, Olhopil county, Podilia gubernia. Thermodynamics and thermal energy specialist; full member of the ANU (formerly AN URSS) since 1964. He studied and taught at the Kiev Polytechnical Institute, where he held a chair in 1938–64. From 1939 he also worked at the ANU Institute of Technical Thermodynamics, where he served as director. He contributed to research on thermal exchange, particularly in two-phase systems. He developed practical methods of designing steam turbines, heat exchangers, and evaporators and analyzed heat exchange in nuclear reactors. He wrote handbooks and numerous technical papers.

Tołwiński, Konstanty, b 7 January 1877 near Vitsebsk, Belarus, d 15 May 1961 in Cracow, Poland. Geologist; full member of the Polish Academy of Sciences (from 1938). After spending several years in exile in Siberia for his political activities, he studied at Zurich University. He later became a specialist in the geology of the Carpathians and director (1919–39) of the Carpathian Institute of Petroleum Geology in Boryslav. After the Second World War he lived and worked in Poland. Among his major works is *Geologia polskich Karpat Wschodnich od Boryslawia do Prutu* (The Geology of the Polish Eastern Carpathians from Boryslav to the Prut, 1927).

Tołwiński, Mikołaj, b 1857, d 7 December 1924 in Warsaw. Architect. He designed many buildings in Odessa,

including the university library, the anatomy building, the laboratory and clinic of the medical faculty, the magnetic and meteorological observatory, schools, and the Kuialnyk baths. In 1917 he was appointed professor of the Polytechnical Institute in Warsaw.

Tomakivka. VI-15. A town smt (1986 pop 7,400) on the Tomakivka River and a raion center in Dnipropetrovska oblast. It was settled in 1740 by the families of Khortytsia dockworkers. An influx of colonists and refugee serfs brought its population to 6,200 in the mid-19th century. In 1956 the village was granted smt status. The town's main industry is food processing.

Tomakivka Sich. A Zaporozhian Cossack fortification on Tomakivka Island, in the Dnieper River near Marhans, 60 km south of Khortytsia Island. It was a *kish* of the Zaporozhian Sich; reportedly it stood from 1540 to 1593, when it was destroyed by the Tatars. After 1593 the Zaporozhians built the *Chortomyk Sich. Later the site of the Tomakivka Sich served as a rendezvous point and refuge for Hetman B. Khmelnytsky and assorted Cossack-peasant rebel groups during the Cossack-Polish War (1648–57). Even in the 18th century it was used by imperial Russian army divisions and Cossack companies during their campaigns in Southern Ukraine. Tomakivka Island now lies under the waters of the Kakhivka reservoir (flooded in 1955).

Tomara. A family line of Cossack officers that originated in Greece in the 17th century. Ivan (Jan) Tomara was a wealthy merchant in Pereiaslav who served as a military inductor in the 1660s. During the tenure of Hetman P. Doroshenko he moved to Kaniv. His sons served in the court of Hetman I. Samoilovych: Stepan Tomara (d 1715) was a captain of Domontov company (1689) and colonel of Pereiaslav regiment (1706–15), who initially supported I. Mazepa but later went over to I. Skoropadsky; and Vasyl Tomara (d 1726) was a captain of Vybli company (1704–15) and the judge of Chernihiv regiment (1715–26). Stepan's son, Vasyl Tomara, studied in Germany and served as colonel of Pereiaslav regiment (1735–9). Stepan's grandson, Vasyl Tomara (1746–1819), was a student of H. Skovoroda in 1753–9 (some items of their correspondence from 1772 and 1788 have been preserved); he later served as a Russian diplomat (imperial representative to Constantinople in 1802–9) and as a senator. He was also a friend of V. Kapnist and a notable Mason. In the 18th and 19th centuries the Tomara family controlled massive estates in Poltava and Katerynoslav gubernias and held high administrative positions in Ukraine and Russia. Lev Tomara (b 1839) was governor of Kiev gubernia and later a senator.

Tomasevych, Stepan [Tomasevyč], b 1859 in Mykulynsi, Sniatyn county, Galicia, d 1932. Painter and graphic artist. He learned to paint from a church painter in Zbarazh and studied at the Cracow School of Fine Arts (1886–7). He painted portraits, such as *Man with a Beard* (1892) and *Portrait of Dukevych* (1896); genre paintings, such as *Don't Go to Parties*, *Hryts*; *Hahilky*; and *Village Lesson*; historical canvases, such as *Tatars Attacking a Church*; and landscapes. In the 1890s he painted the murals in the church in Butyny, near Zhovkva, with K. Ustyianovych.

He also designed scenery for the Ruska Besida Theater in Lviv and contributed illustrations and caricatures to *Strakhopud* in Lviv.

Tomashevsky, Serhii [Tomaševs'kyj, Serhij], b 18 October 1854 in Krolevets, Chernihiv gubernia, d 21 March 1916 in Kiev. Dermatologist and venereologist. A graduate of the Medico-Surgical Academy in St Petersburg (1876), from 1897 he was professor of syphilology at Kiev University. He organized and directed (1906–16) the medical division of the Higher Courses for Women in Kiev and was the founding director of the Kiev Society of Dermatologists and Venereologists (1900–16).

Toma Tomashevsky

Stepan Tomashivsky

Tomashevsky, Toma [Tomaševs'kyj], b 15 May 1884 in Stetseva, Sniatyn county, Galicia, d 4 February 1969 in Edmonton. Ukrainian-Canadian journalist and publisher. After emigrating to western Canada in 1900, he was active in Ukrainian socialist and community organizations there and coedited the weekly *Nova hromada* (1911) in Edmonton. Later he adopted an anticommunist, social-democratic position and supported the United Farmers of Alberta and, eventually, the Commonwealth Co-operative Federation (CCF). His leanings were clearly reflected in the weekly newspapers he edited: *Postup* (1915–17) in Mundare, Alberta; *Prauda i volia* (1920) in Vancouver; and *Nash postup* (1922–9) and *Farmers'kyi holos* (1932–3) in Edmonton. In Edmonton he also published a temperance journal, *Vidrodzhennia* (1930), and coedited the satirical journal *Harapnyk* (1921–35). Later, to preserve the legacy of Ukrainian pioneers in Canada, he published and edited the quarterly *Ukrains'kyi pionir* (1955–60) and cofounded the Ukrainian Pioneers' Association of Alberta.

Tomashivsky, Stepan [Tomašivs'kyj], b 9 January 1875 in Kupnovychi, Rudky county, Galicia, d 21 December 1930 in Cracow. Historian, publicist, and politician; member of the Shevchenko Scientific Society (NTSh) from 1899 and an active member of the National Democratic party and the Prosvita society. After receiving a PhD from Lviv University he worked in 1900–10 as a gymnasium teacher in Berezhany and Lviv and in 1910–14 as a docent of Austrian history at Lviv University. A founding member of the *Teachers' Hromada, he edited its journal *Nasha shkola* in 1913. During the First World War he was a member of the Combat Board in charge of charity work, propaganda, and publishing for the Ukrainian Sich Riflemen. In 1919 he

was an adviser to the UNR and Western Ukrainian National Republic (ZUNR) delegations at the Paris Peace Conference, and in 1920 he headed the ZUNR mission in London. From 1921 to 1925 he lived in Berlin and worked for the conservative Berlin papers *Ukrains'ke slovo* and *Litopys polityky, pys'menstva i mystetstva* (1924). After returning to Lviv he edited *Polityka* (1925–6) and coedited *Literaturno-naukovyi vistnyk* and *Nova zoria*. From 1928 until his death he was a docent of Ukrainian history at Cracow University. He was a prolific conservative Catholic publicist throughout the 1920s; some of his articles and lectures were reprinted as the collections *Pid kolesamy istorii* (Under the Wheels of History, 1922; 2nd edn 1962), *Pro idei, heroiv i polityku* (On Ideas, Heroes, and Politics, 1929), and *Desiat' lit ukrains'koho pytannia v Pol'shchi* (Ten Years of the Ukrainian Question in Poland, 1929).

Tomashivsky published most of his studies in NTSh serials; edited vols 116–24 of its *Zapysky NTSh*, vols 4–6 of its *Zherela do istorii Ukraïny-Rusy* (1898, 1902, 1913), and vol 4 of its *Ukrains'ko-rus'kyi arkhiv* (1909); and served as its vice-president and acting president (1913–18). He published official documents about popular rebellions and the Ruthenian dietines in Galicia in 1648–51 (in vols 4–6 of *Zherela*); the reports of papal nuncios about Ukraine in 1648–57 (vol 16 of *Zherela*); and Polish and Austrian archival materials on the history of the period of Hetman I. Mazepa (in *ZNTSh*).

In his later scholarly investigations, particularly on the period of Hetman Mazepa, Tomashivsky became concerned with the problem of state-building in Ukrainian history. That concern is reflected in his articles (1906–9) and in his book on the history of the Mazepa period (1910). The influence of such ideas can also be found in his later articles (1913, 1927) on the Khmelnytsky period. In his 1919 book (repr 1948) on the history of ancient and medieval Ukraine he provided a synthetic survey of Ukraine under the Rus' princes and the Lithuanian-Ruthenian state. He singled out the role of the Western Ukrainian lands and discussed the Principality of Galicia-Volhynia as the first Ukrainian nation-state. The evolution of Tomashivsky's views from populism to statism deepened the philosophical, political, and personal differences between him and M. Hrushevsky but also assured him a prominent place, alongside V. Lypynsky, in the 'statist' school of Ukrainian *historiography.

Tomashivsky's research into the history of Ukrainian statehood was closely linked to his studies of Ukrainian church history. He published a pamphlet on the religious aspect of the Ukrainian question (1916), various articles, and longer studies on P. Akerovych, the metropolitan of Rus' in 1241–5 (1927), and on the history of the church in Ukraine to 1169 (1932) in *Zapysky Chyna sv. Vasylia Velykoho*. Tomashivsky also made important contributions to the study of Transcarpathia. His analysis of the Hungarian census of 1900 and calculation of the number of Ukrainians in Transcarpathia, published together with a detailed ethnographic map of Transcarpathia by the Russian Academy of Sciences in 1910, was the first scholarly exposition of ethnographic relations in Transcarpathia. In 1915 the Union for the Liberation of Ukraine published his political-historical outline of Galicia (German trans: *Die weltpolitische Bedeutung Galiziens*). A bibliography of his works is found in *ZNTSh* (vol 151 [1931]), and a booklet about him was written by I. Krypiakievych (1932).

A. Zhukovsky

Tomashpil [Tomašpil']. v-9. A town smt (1986 pop 6,300) on the Tomashpil River and a raion center in Vinnytsia oblast. It was first mentioned in historical documents in 1616, when it was part of the Polish Commonwealth. During the Cossack-Polish War the village belonged to Yampil company in Bratslav regiment. Tomashpil was returned to Poland in 1667 and destroyed by the Turks in 1672. In 1793 it was annexed by Russia, and became part of Yampil county in Podilia gubernia. Toward the end of the 19th century a winery, a brick and a soap factory, and a steam flour mill were built there. By 1908 the town had a population of 8,000. Today Tomashpil has a sugar refinery, a bakery, and a furniture factory.

Tomaszów Lubelski (Ukrainian: Tomashiv). III-4. A town (1989 pop 19,800) on the Solokiia River in the southern Kholm region and a county town in Zamość voivodeship, Poland. It is on the border of Ukrainian ethnic territory. In 1931 Ukrainians represented 6.3 percent of the town's population, Jews, 54.3 percent, and Poles, 38.1 percent. But in Tomaszów county Ukrainians accounted for 43.6 percent of the population in 1905, 23.8 percent in 1921, and 26.8 percent in 1931. In 1946-7 the remaining Ukrainian inhabitants of the county were forcibly resettled.

Tomato (*Lycopersicon*; Ukrainian: *pomidor*, also *tomat*, *bak-lazhan chervonyi*). A cultivated fruit plant of the family Solanaceae, closely related to the potato and the eggplant, native to South America. It was introduced in the Crimea from Turkey toward the end of the 18th century and spread rapidly. Tomato fruit is roundish, soft, and succulent, red or yellow in color, and rich in vitamins, provitamin A, carbohydrates, mineral salts, and organic acids. Tomatoes are consumed fresh, canned, cooked, marinated, in sauces, pastes, purees, and so on. Several Ukrainian varieties (Slyvovydneyi maiak 12/20-4, Donets 312-1, Pervenets 190, Kiev 139, and Brekodli) have been developed and popularized.

Mykhailo Tomchaniï

Tomchaniï, Mykhailo [Tomčaniï, Myxajlo], b 16 July 1914 in Horiany (now part of Uzhhorod), Transcarpathia, d 19 January 1975 in Uzhhorod. Writer. He began publishing stories in Transcarpathian periodicals in 1934. Beginning in 1950 he wrote several prose collections and the novels *Nasha sim'ia* (Our Family, 1953), *Terezka* (1957), *Vit-chym* (The Stepfather, 1962), *Skrypka – ioho molodist'* (The Violin Is His Youth, 1968), *Zhmeniaky* (The Zhmeniaks,

1964), *Tykhe mistechko* (The Quiet Town, 1969), and *Braty* (Brothers, 1972). In his works he introduced Transcarpathian rural and urban themes into Soviet Ukrainian literature. He also translated Hungarian and Czech literary works into Ukrainian.

Hryhorii Tomenko: *Guests from Transcarpathia* (oil, 1960)

Tomenko, Hryhorii, b 16 November 1915 in Velyka Rohozianka, Kharkiv county, Kharkiv gubernia. Painter and graphic artist. He graduated from the Kharkiv Art Tekhnikum (1938) and the Kharkiv Art Institute (1942) and taught at the Kharkiv Commercial Arts and Design Institute (1947-53). He has painted landscapes and genre and historical paintings, such as *Future Farmers* (1960), *Above the Dnieper* (1964), *Favorite Verses* (1965), *May Morning* (1969), *Wide Field* (1974), and *Rainbow in the Field* (1975). He also created propaganda posters and etchings. An album of his works was published in 1975.

Tomilin, Serhii, b 19 October 1877 in Suwałki, in Poland, d 19 July 1952 in Kiev. Hygienist, sanitation statistician, and medical historian. A graduate of Moscow University (1901), he headed the statistical department of the People's Commissariat of Public Health of the Ukrainian SSR (1919-30), chaired the Department of Community Hygiene at the Kharkiv Medical Institute (1924-34), and worked at the AN URSR (now ANU) Institute of Demography and Sanitation Statistics (1934-8) and the Ukrainian Scientific Research Bureau of Sanitation Statistics (1932-52). He wrote numerous works on sanitation in Ukraine, the spread of venereal diseases, infant mortality, and the use of medicinal plants.

Tomsk. An oblast and raion center (1989 pop 502,000) of Russia, located on the right bank of the Tom River in western Siberia. Founded in 1604, it was a gubernia capital in 1804-1924. With a university (est 1888) and technological institute (1900), it has been a major cultural center of Siberia. A small Ukrainian colony, including a student hromada (40 members in 1908), formed in Tomsk before the 1917 Revolution. The city subsequently became one of the centers of Ukrainian life in Siberia: the Ukrainian District Council and a Ukrainian military formation were organized there, and the weekly *Ukrains'ke slovo* was published. In 1926, 1,200 of its residents were Ukrainian, and in 1970, 9,000.

Tomson, Aleksandr (Thomson), b 3 June 1860 near Dorpat (now Tartu), Estonia or in Pskov, Russia, d 27 November 1935 in Odessa. Russian and Ukrainian linguist; corresponding member of the Russian (later USSR) Academy of Sciences from 1910. A graduate of the universities of St Petersburg (1882) and Moscow (PH D, 1892), he was a professor of comparative Indo-European grammar and Sanskrit at Odessa University (1897–1920) and the Odessa Institute of People's Education (1920–30). At the university he set up the first laboratory of experimental phonetics in Ukraine. In the Soviet period he was a member of the All-Ukrainian Learned Association of Oriental Studies. He wrote books on Russian syntax and semasiology (1903) and general linguistics (1906; rev edn 1910) and studies on the Sanskrit, Armenian, and Slavic languages, including articles on Ukrainian phonetics.

William Tomyn

Oleksander Topachevsky

Tomyn, William (Vasyl), b 4 September 1905 in Warwick, Alberta, d 5 October 1972 in Edmonton. Politician and community activist. After graduating from teachers' college in Calgary, he worked as a teacher and principal for two decades. A member of the Social Credit party, he served 29 years in the Alberta legislature, representing the electoral districts of Whitford (1935–40), Willingdon (1940–52), and Edmonton Norwood (1959–71). He was active in the Ukrainian Canadian Committee (now Congress) and the Ukrainian People's Home in Edmonton. He supported the introduction of Ukrainian as a subject in Alberta public schools and defended the rights of new immigrants to Canada after the Second World War.

Tongue twister (*skoromovka, skrohovorka, spotykanka*). A genre of children's folklore, its examples consisting of words and word combinations that are difficult to pronounce. Such phrases, which lack any deeper meaning, figure in word games by means of which children learn to articulate the sounds of their language: *Sydyt' Prokop, kypyt' okrop, / Pishov Prokop, kypyt' okrop. / Iak pry Prokopovi kypiv okrop, / tak i bez Prokopa kypyt' okrop.* 'Prokop sits, water boils / Prokop leaves, water boils. / As it boiled when Prokop was there / So it boils when Prokop's not.' Others are like proverbs: *Sune sova svoi slova. / Iaka sova, taki i slova* 'An owl speaks her words. As is the owl, so are the words.'

Toniuk [Tonjuk]. A family of master wood carvers of the Hutsul region. Yakiv (b 1903 in Richka, Kosiv county,

Galicia, d 1958 in Richka) carved household articles, caskets, trays, powder boxes, and drinking vessels, which he decorated with flat carved ornaments and inlays. His products were exhibited outside Galicia, and some have been preserved in Ukrainian museums. His son, Vasyl (b 7 August 1928 in Richka), learned his craft from Yakiv. Both Yakiv and Vasyl taught their relative, Dmytro (b 29 July 1924 in Richka, d 17 January 1977 in Kosiv), who combined geometric Hutsul ornamentation with thematic pictures. His works can be found in museums in Kiev, Ivano-Frankivske, and Kolomyia.

Topachevsky, Oleksander [Topačevs'kyj], b 13 March 1897 in Bobrivka *khutir*, Tarashcha county, Kiev gubernia, d 1 December 1975 in Kiev. Botanist and hydrobiologist; full member of the AN URSS (now ANU) from 1972. A graduate of the Kiev Institute of People's Education (1930), he worked at Kiev University (1935–59) and the ANU Institute of Botany (1932–52), directed the ANU Institute of Hydrobiology (from 1959), and headed the Ukrainian Hydrobiology Society (from 1964). His research interests included the morphology, systematics, and phylogeny of algae, as well as problems in sanitary and technical hydrobiology.

Topachevsky, Vadym [Topačevs'kyj], b 16 July 1930 in Cherkasy. Zoologist; corresponding member of the AN URSS (now ANU) since 1978; son of O. *Topachevsky. A graduate of Kiev University (1953), he has worked since 1956 at the ANU Institute of Zoology, from 1973 as its director. His work centers on the systematics, phylogeny, ecological morphology, and zoogeography of fossil and living mammals. He is one of the founders of micropaleontology theory in Ukraine.

Toplia River [Toplja] (Slovak: Tepla). A right-bank tributary of the Ondava River that flows for 130 km through eastern Slovakia and drains a basin area of 1,500 km. Its source is in ethnic Ukrainian territory.

Topography. The science which studies the earth's surface, plots and measures its features in their geometric relationship to one another, and devises methods of their representation on maps.

The first maps of Ukrainian territories based on topographical surveying were commissioned by the Polish Commonwealth, which controlled Ukraine in the early 17th century. Both the map of Lithuania (published by H. Gerritsz in Amsterdam in 1613 on four sheets at a scale of 1:1,300,000) and the map of the Dnieper (1:1,300,000) were prepared by T. Makowski. Makowski's map of Lithuania covered the Ukrainian territories only slightly east of the Dnieper and did not extend south of the line Sniatyn–Kamianets–Podilskiyi–Bratslav–Cherkasy. The French cartographer G. de *Beauplan, commissioned by the Polish government, surveyed Ukraine from 1630 to 1647.

Topographical maps were often supplemented with topographical drawings or paintings. Those were detailed panoramas of cities, towns, or other sites of interest. An early example is a view of Lviv (in H. Braun's *Villes du monde*, 1618) engraved by A. Hohenberg on the basis of a painting by A. Pasarotti, an Italian engineer who designed fortifications for the Lviv suburbs. In 1651, topographic drawings of Kiev were made by the Dutchman A. Westersfeld, court painter to the Lithuanian duke, who was in

Kiev for one month during the Cossack-Polish War. The Dutch topographer J. Bruce prepared a map of western and southern Russia, published in Amsterdam in 1679, which showed not only Left-Bank Ukraine but also the Kiev and Bratslav regions of Right-Bank Ukraine. Shortly thereafter a series of maps titled *Sketch (Chertezh)* of Ukrainian and *cherkasy towns from Moscow to the Crimea was prepared, probably in conjunction with the 1687 campaign against the Khanate of Crimea. Hetman I. Mazepa commissioned topographical surveys of individual Cossack regiments.

With the abolition of the Hetmanate, detailed surveys were commissioned to describe Ukrainian lands textually, cartographically, and statistically for the purpose of facilitating the administrative reorganization (1775) of Left-Bank Ukraine from Ukrainian Cossack regiments into standard Russian provinces (vicegerencies, later gubernias). Written reports described the history, the way of life, and the economic development of each province. By 1784 the General Staff had compiled a set of atlases for the vice-regencies with maps showing rivers, lakes, roads, settlements, fortifications, factories, foundries, and wooded areas, and two tables, one of distances between settlements and the other of population data.

The Ukrainian territories annexed by Austria in the 1770s were surveyed and mapped toward the end of the 18th century in unprecedented detail. In 1779–83 Mieg prepared a manuscript map in 413 sheets at a scale of 1:28,000. It was later used by the Military Geographic Institute of the Austro-Hungarian Empire as a source for their topographic map series at a scale of 1:75,000 (1873–89) and 1:25,000 (1867–88). By that time modern survey methods were also being employed in Russia to produce increasingly more accurate and detailed topographic maps. On the basis of those surveys and previous maps the Russian Military Topography Corps published maps of European Russia (1:420,000) in 60 sheets (1832–44), Eastern Europe (1:420,000) in 158 sheets (1864–71), western Russia (1:126,000) in 435 sheets (1845–63), and, again, the area west of the Kiev–Odessa line at a scale of 1:84,000 (1845–82 and 1907–17). The most accurate maps were produced on the basis of new surveys of the Crimea, the Taman Peninsula, the Donbas, and the territories west of Kiev (1:42,000) in 84 sheets (1855) and, especially, of the western borderlands (western Volhynia, the Kholm region, and Podlachia) and the Crimea at a scale of 1:21,000.

Despite increasingly precise surveying and comprehensive topographic mapping, topographic painting of settlements became popular in the 18th century and continued into the 19th. Also common were detailed plans of cities and towns, drawn to various large scales, identifying main topographical features, street patterns, and main buildings and their names. As well the General Staff put together a compendium titled *Materialy dlia geografii i statistiki Rossii* (Materials on the Geography and Statistics of Russia), which provided brief histories, geographical descriptions, and statistical data for each gubernia together with maps, charts, or drawings.

During the First World War the Germans reproduced the Russian topographical maps (1:84,000 and 1:126,000 series) and reissued them at a scale of 1:100,000. They also published the first aviation map of Kiev (1:26,600), in 1916. With the establishment of the Ukrainian state, the Chief Geodesic Administration in Kiev revised and issued the

Russian general topographic maps for Ukraine (54 sheets at a scale of 1:420,000) and two versions of a map of Kiev (6 sheets at 1:21,000) in 1918. It also produced two maps of Ukraine (4 sheets at 1:1,050,000 and a wall map at 1:1,680,000 by the Ukrainian geographer P. Tutkovsky).

In the Soviet period work began in 1924 on a new set of topographical maps based on conic projections and metric units. Revisions were made with the help of air photography. Fundamental to the topographic maps was the series at the scale of 1:100,000, with coverage extending eastward to the Volga River until 1941. With that as a base, more detailed maps were prepared at scales of 1:50,000, 1:25,000, and even 1:10,000, and more general aviation charts at a scale of 1:1,000,000. Meanwhile the Military Geographic Institute in Warsaw prepared topographic maps at scales of 1:25,000, 1:100,000, and 1:300,000, and aviation charts at scales of 1:500,000 and 1:1,000,000 that included Ukrainian territories in Poland. The government of Czechoslovakia produced topographic map series at scales of 1:25,000, 1:75,000, 1:200,000, and 1:750,000 that included Transcarpathia. The Rumanian government also prepared topographical maps at scales of 1:100,000 (1926–39), 1:200,000, 1:300,000, and 1:500,000 that included the Ukrainian-settled Bukovyna, Bessarabia, and Maramureş region.

During the Second World War the Germans quickly revised Polish topographical maps (using air photography) and added German nomenclature. In addition the Luftwaffe produced detailed maps of Ukrainian cities based on air photography. After the war the Soviet Union issued a new set of topographical maps (at scales of 1:25,000, 1:50,000, 1:100,000, 1:200,000, 1:300,000, 1:500,000, and 1:1,000,000) based on Krasovsky's ellipsoidal and the Gauss projection. Again, air photography was used to revise details. Meanwhile the United States Army Map Service issued its 1:250,000 topographical map series, based on captured German topographical maps, and updated details with data collected from air photographs (gathered on U-2 flights) and satellite imagery.

Geographic nomenclature on the territory of Ukraine was determined by the Chief Administration of Geodesy and Cartography and by the government in Moscow. It has ignored traditional Ukrainian toponymy. Topographic maps produced elsewhere (as in the United States) that cover the territory of Ukraine observe the official nomenclature used on the topographical maps of those countries (ie, USSR, Poland, Czechoslovakia, and Rumania). As a result traditional Ukrainian toponymy has been absent from modern topographical maps. (See also *Cartography.)

BIBLIOGRAPHY

Gospodinov, G.; Sorokin, V. *Topografiia* (Moscow 1974)

I. Stebelsky

Topolnisky, George [Topol'nyc'kyj], b 13 August 1929 in Pakan, Alberta. Politician and high-school teacher. Educated at the University of Alberta (B ED), Topolnisky was mayor of Andrew, Alberta, before his election to the legislature of Alberta in 1971 as the Progressive Conservative member for the constituency of Redwater-Andrew. He was the minister responsible for rural development in 1971–5. He was re-elected in 1975, 1979, and 1982 but did not run in the 1986 election.

Vasyl Topolnytsky

Topolnytsky, Vasyl [Topol'nyč'kyj, Vasyl'], b 3 April 1893 in Serafyntsi, Horodenka county, Galicia, d 7 November 1978 in Winnipeg. Civic leader and co-operative organizer in Canada. A veteran of both the Austrian army and the Ukrainian Galician Army, he graduated from Prague's Higher Commercial School in 1926. The following year he emigrated to Canada and settled in Winnipeg, where he organized the head office of the *Ukrainian War Veterans' Association (1930), and its *Kalyna consumer co-operative (1930). He went on to set up the first Ukrainian credit union in Canada in 1939 (Nova Hromada or New Community in Saskatoon) and then the Carpathia (1940), Dnipro, and Steppe credit unions in Winnipeg. He served on the board of directors of the Association of Credit Unions in Manitoba and as coeditor of *Novyi shliakh* (1946–8). He taught courses and wrote some brochures on co-operation, including *De pomich dlia nas* (Where Is There Help for Us, 1944).

Toponymy. The study of place-names or toponyms, sometimes called toponomastics. Crossed by many migratory peoples in the 1st millennium AD, Ukraine is an important region for the study of hydronyms – names of rivers and other bodies of water. Hydronyms change much less than other toponyms and therefore better reflect ethnohistorical changes. The data for Ukrainian hydronymy are found in P. Mashtakov's Russian registers of rivers in the Dnieper Basin (1913), the Dniester and Boh basins (1917), and Don Basin (1934); in H. Shvets, N. Drozd, and S. Levchenko's catalog of Ukraine's rivers (1957), which is unfortunately very Russified; and in *Wörterbuch der russischen Gewässernamen* (1960–73), edited by M. Vasmer.

The linguistic study of Ukraine's hydronyms began only after the Second World War. The AN URSR (now ANU) Institute of Linguistics began work on a hydronymic atlas in 1960, and in 1979 it published a dictionary of over 20,000 of Ukraine's hydronyms (with 24,000 variants) edited by A. Nepokupny, O. Stryzhak, and K. Tsiuiko. Monographs have been written by J. Rozwadowski (on Slavic hydronyms [1948]), O. Stryzhak (river names of Poltava oblast [1963] and of Zaporizhia and Kherson oblasts on the lower Dnieper's Left Bank [1967]), I. Muromtsev (word-forming types of hydronyms in the Donets River Basin [1966]), O. Trubachev (river names of Right-Bank Ukraine [1968] and, with V. Toporov, a linguistic analysis of hydronyms of the upper Dnieper Basin [1962]), A. Korepanova (word-forming types of hydro-

nyms in the lower Desna Basin [1969]), J. Rieger (hydronyms of the Sian Basin [1969]), V. Loboda (toponyms of the Dnieper-Boh basins [1976]), Ye. Otin (hydronyms of eastern Ukraine [1977]), Z. Franko (the grammatical structure of Ukrainian hydronyms [1979]), and L. Masenko (hydronyms of western Podilia [1979]). Yu. Karpenko edited a book on the hydronyms of the lower Dniester Basin (1981), and O. Stryzhak edited a book on the interlingual and interdialectal aspects of Ukrainian hydronyms (1981).

Hydronyms have been less subject to political manipulation and cultural fashion than names of mountains (oronyms) and inhabited places. In Russian-ruled Ukraine, the latter were Russified from the 18th century on. The ancient settlement Polovytisia, for example, became the city of Katerynoslav (Ekaterinoslav), named in honor of Catherine II, and in the Soviet period it was renamed Dnipropetrovsk(e) in honor of the Bolshevik leader H. Petrovsky. Russian lexical forms, such as the suffix *-sk*, were imposed on many places. In Southern Ukraine, the late 18th-century Russian classicist vogue for things Hellenic resulted in such city names as Yevpatoriia (former Tatar, G'ozlev, Ukrainian Kozliv) and Kherson.

Monographs dealing wholly or partly with Ukrainian toponymy have been written by V. Chubenko (toponyms on the territory of the Donets Ridge [1939]), J. Rudnyckyj (toponyms of the Boiko region [1939; repr 1962]), S. Hrabec (toponyms of the Hutsul region [1950]), S. Rospond (a structural-grammatical classification of Slavic geographic names [1957], a work on Slavic place-names with the suffix *-sk* [1969], and a stratigraphy of Slavic toponyms [1974]), A. de Vincenz (*La toponymie des Carpates du Nord* [1959]), Yu. Karpenko (toponyms of the mountain, central, and eastern raions of Chernivtsi oblast [1964–5] and toponyms of Bukovyna [1973]), V. Šmilauer (a handbook of Slavic toponomastics [1970]), V. Loboda (the interaction of the East Slavic languages in Ukrainian toponymy [1976]), Yu. Kruhliak (the origins of the names of Ukraine's cities and towns [1978]), and O. Kupchynsky (the oldest Slavic toponyms of Ukraine as a source of historical and geographic research [1981]). Yu. Karpenko edited a book on toponyms in northeastern Odessa oblast (1975). Ukrainian toponyms outside Ukraine's political borders are treated in books by Z. Stieber (toponyms of the Lemko region [2 vols, 1948–9]), A. Yashchenko (toponyms in Kursk oblast [1958]), S. Warchoł (town names in the Lublin region [1964]), E. Pawłowski (place-names in the Nowy Sącz region [2 vols, 1971, 1975]), A. Yereimia (Moldavian place-names [1970]), V. Prokhorov (a historical-toponymic dictionary of Voronezh oblast [1953]), and M. Kondratiuk (place-names in the southeastern Białystok region [1974] and Baltic elements in the toponyms and microtoponyms [names of uninhabited places] of the Białystok region [1985]). Books on microtoponyms have been written by A. Petrov (mid-19th to early 20th-century Transcarpathia [1929]), M. Lesiv (the Lublin region [1972]), E. Pawłowski (the Nowy Sącz region [1984]), and E. Cherepanova (Chernihiv-Sumy Polisia [1984]). M. Vasmer's *Iranische Ortsnamen in Südrussland: Untersuchungen über die ältesten Wohnsitze der Slaven* (1923) is a valuable contribution on the linguistic substratum of Ukrainian toponymy. Toponyms of Kievan Rus' is the subject of E. Barsov's geographic dictionary of 9th- to 14th-century Rus' (1865) and of his book on the geography of the Primary Chronicle (1874; 2nd edn 1885), as also of V. Nerozniak's recent book

on the names of the ancient Rus' cities (1983), and of the Ukrainian etymological dictionary of place-names in Southern Rus' found in the Rus' chronicles (1985), edited by O. Stryzhak. In the United States, A. Vlasenko-Bojczun wrote a study of Ukrainian place-names in the United States (1977; English trans 1984), and S. Holutiak-Hallick Jr produced a Ukrainian toponymic atlas of the United States (1982).

Data on Ukrainian toponyms can be found in Ya. Holovatsky's geographic dictionary (1884); the geographic dictionary of the Polish Kingdom and other Slavic countries (15 vols, 1880–1904) edited by F. Sulimierski, W. Walewski, and B. Chlebowski; M. Yanko's toponymic dictionary and handbook of Soviet Ukraine (1973); the Russian geographic dictionary (11 vols, 1964–88) edited by M. Vasmer and H. Bräuer; and M. Bodnarsky's Ukrainian dictionary of geographic names (1955; rev edn 1959 adapted from the Russian). Lists of place-names in Ukraine by oblast and raion are found in reference books of the administrative-territorial division of Soviet Ukraine (most recently published in 1973). Ukrainian textbooks on toponymy have been written by B. Bezvenglinsky (1938) and S. Babyshyn (1962). Interlingual toponymic concordances can be found in J. Rudnycky's Ukrainian-German/German-Ukrainian dictionary of place-names (1943), A. Kara-Mosko and M. Tokarsky's Russian-Ukrainian dictionary of geographic names (1953), H. Batowski's dictionary of Central and East European place-name changes (1964), V. Nezhnyapa's Ukrainian-Russian dictionary of geographic names in Soviet Ukraine (1964; rev edn 1971), and L. Dezső's monograph on the history of the Transcarpathian dialects (1967).

R. Senkus, B. Struminsky

Torban. A music society founded in Lviv in 1869 by A. *Vakhnianyn. The group was dedicated to the advancement of musical education and sensibility among the general population. It established a school of music in Lviv and sponsored concerts throughout Galicia. Prominent members included the singers O. Myshuha and Yu. Zakrevsky. Lacking finances and a facility of its own, the society dissolved in 1871.

Torban. A music publishing house in Lviv. Established in 1905 by Ya. Yaroslavenko, who directed the company with (initially) D. Sichynsky and Ya. Lopatynsky, Torban had published almost 350 scores and songbooks by 1939. It issued mostly works by Western Ukrainian composers, including K. Stetsenko, Ya. Stepovy, M. Verbytsky, A. Vakhnianyn, V. Matiuk, O. Nyzhankivsky, and Rev D. Rozdolsky, as well as by conductors and prominent composers from Russian-ruled Ukraine, such as M. Lysenko.

Torban. A musical string instrument that is plucked. The Ukrainian *torban* is closely related to the shorter-necked Paduan theorbo as described by M. Praetorius (*Syntagma musicum*, 1618), but differs from the Western European instrument in that it has three sets of courses instead of two. In addition to the diapason and stopped strings, the *torban* has high-pitched *prystrunky* (accompaniment strings) which run along the deck of the instrument. In total the *torban* has 25 to 60 strings. During the 17th century the *torban* was the instrument of the Ukrainian nobility. It spread into Poland and Russia but remained in use until the end

A torban

of the 19th century only in Ukraine. Well-known torbanists included I. Koshovy, I. Oleksandrov, and members of the Vidort family.

Torez. v-19; III-5. A city (1989 pop 87,900) in Donetsk oblast. It originated in the 1770s as a settlement of runaway serfs and was first called Oleksiivka. In 1840 it was renamed Oleksiieve-Leonove, and in 1867, Chystiakove. Since the discovery of anthracite deposits in the 1860s, a large mining industry has developed in the region. By 1907 the settlement had been linked by railway to Debal'tseve. In 1932 Chystiakove was granted city status, and in 1964 it was renamed Torez in memory of M. Thorez (1900–64), the leader of the French Communist party. Today the city has 10 mines and 4 coal enrichment factories, an electric-machine plant, a hard-alloys foundry, a concrete shaft-reinforcing parts plant, and a food industry.

Torhovlia i promysl (Trade and Manufacturing). A semimonthly organ of the *Union of Ukrainian Merchants and Entrepreneurs, published in Lviv from November 1934 to August 1939 (a total of 118 issues). It published business and political news and reports on the activities of the union. A separate page in the paper was devoted to Volhynia, and another to the skilled trades. The chief editor was V. *Nesterovych, and contributors included S. Baran, S. Biliak, T. Hlynsky, M. Derevianko, V. Ostrovsky, D. Koniukh, Yu. Krokhmaliuk, A. Milianych, and Ya. Skopliak.

Torhovytisia Confederacy. An alliance of Polish magnates, led by K. Brancicki, S. Potocki, and S. Rzewuski (all of Right-Bank Ukraine), against the liberal reforms of the Four-Year Sejm and the 3 May Constitution of the Polish state. With the support of Catherine II and the participa-

Torhovlia i promysl

tion of the Russian government they conspired to have Russian armies occupy Poland in mid-1791. The confederacy was proclaimed on 14 May 1792 in Torhovytisia, a border town (now a village in Kirovohrad oblast). Russian armies then moved into Poland, and their occupation touched off a Russo-Polish war. After the alliance managed to attract the Polish king, Stanislaw Poniatowski, to its cause, the movement spread throughout Poland. Eventually its actions resulted in the second partition of Poland in 1793.

Torks (*torky*). The name given in chronicles to the Turkic tribes of *Oghuz. In the late 9th and early 10th centuries they lived as nomads in the northern steppes between the Aral and Caspian seas, ranging all the way to the Volga Delta. In the late 10th century they migrated closer to the Sea of Azov. In one chronicle Torks are said to have participated in Volodymyr the Great's campaign of 985 against the Bulgars. In the 11th century, when they were pressed by the Polovtsians (see *Cumans) from the east, larger waves of Torks swept over the Black Sea steppes and sent the Pechenegs westward. In 1054 Torks attacked the Pereiaslav region but were defeated by the army of the prince of Pereiaslav, Vsevolod Yaroslavych. They continued to invade Rus', however, and only in 1060 were they decisively defeated by a coalition of Iziaslav III (the son of Davyd Sviatoslavych) of Kiev, Vsevolod of Pereiaslav, Sviatoslav of Chernihiv, and Vseslav II (the son of Vasylo Sviatoslavych) of Polatsk. In 1116 an army of Torks and Pechenegs was annihilated by the Polovtsians, and the defeat caused some Torks to resettle in the Balkans. Others obtained the permission of Ukrainian princes to settle on the right bank of the Dnieper, in the Ros and the Rosava basins, and in southern Pereiaslav principality along the Sula River. There they mixed with the remaining Pechenegs and Berendeys and became known as the *Chorni Klobuky. The duties imposed on them by the Ukrainian princes included defending the southern borders of Rus' against Polovtsian attack and participating in offensive military campaigns, in which they proved to be loyal allies. During the raids of Batu Khan in 1240, particularly during the siege of Kiev, many Torks were killed, and the Tatars resettled many others in the Volga region. The rest assimilated completely with the local inhabitants. Torks introduced a Turkic element into the anthropological features of the population along the banks of the Dnieper.

They also contributed to the toponymy of Ukraine, in the names of the rivers Torets and Torch, the Torskyi route along the Tetliha River, and the towns Torets, Torky, Torkiv, Toretske, and Torchyn.

M. Zhdan

Toronsky, Oleksii [Torons'kyj, Oleksij], b 1838, d 1899. Galician pedagogue and Greek Catholic priest. He taught religion at various gymnasiums and wrote textbooks on literature and religion for secondary schools. He coedited *Ruskii Sion* (1874–9, 1883) and wrote the novel *Hantsia* (1862), which dealt with the daily life of the inhabitants of the Lemko region. He also translated works from Polish and German into Ukrainian and wrote articles for various periodicals.

Toronto. The capital (1986 metropolitan pop 2,976,000) of Ontario, and the largest industrial, trade, and financial center in Canada. With 71,730 residents of Ukrainian origin in 1981, it has one of the largest Ukrainian communities in Canada, and one of the most important Ukrainian communities outside Ukraine. In 1989, 24,605 inhabitants claimed Ukrainian as their mother tongue.

Ukrainian immigrants began to settle in Toronto early in the 20th century. The social structure of the Ukrainian community has changed considerably over the years. The first immigrants were mostly unskilled, low-paid laborers, single men and women from Western Ukraine attracted by jobs on the railways, in factories and construction, and in domestic service. During the First World War a stratum of skilled workers, tradesmen, and small businessmen emerged. After the Second World War a significant number of Ukrainian veterans, many of them with a professional education, settled in Toronto. By 1971 the social profile of the Ukrainian community almost matched that of the general community. About 30 percent were employed in the manufacturing industries, 25 percent in the service industries, 14 percent in trade, 7 percent in transportation, 6 percent in administration, and 4 percent in construction. The professional group grew rapidly after the Second World War: by 1978 there were over 200 lawyers, 100 physicians, 50 dentists, 200 engineers, and a few hundred teachers and librarians of Ukrainian origin. Relatively few Ukrainians are found among university professors, top financiers, and civil servants.

Ukrainians have developed strong economic institutions in Toronto. They have organized 16 credit unions, the oldest and largest of which is the *Ukrainian Credit Union (est 1944), and the Community Trust Co. They own large development firms (such as Prombank Investments) and trade companies (such as the UBA Trading Company), real estate and insurance companies, dozens of hotels, and hundreds of stores. The Ukrainian Professional and Business Club of Toronto (est 1935) has over 500 members and plays a leading role in Ukrainian economic and cultural affairs.

The first Ukrainian institutions to be established in the city were churches and schools. A Greek Catholic parish was founded in 1906 in the west end, and St Josaphat's Church was built in 1913–14. In the interwar period two more parishes were formed. Today there are eight parishes in the city. In 1948 the eparchy of Toronto, covering Eastern Canada, was set up. Its weekly paper, *Nasha meta*, is published in Toronto. The Basilian order runs a parish

in the city and in nearby Mississauga and publishes the monthlies *Svitlo* and *Beacon* at its own publishing house. Another parish is run by the Redemptorist Fathers.

The first Ukrainian Orthodox parish was organized in 1931, and in 1948 St Volodymyr's Cathedral was consecrated. Two more parishes were founded, one in 1940 and another in 1950. Since 1953 Toronto has been the seat of the Orthodox eparchy of Eastern Canada. St Vladimir Institute, organized by the Orthodox community, maintains a student residence, library, and museum. The main Orthodox lay associations are the Ukrainian Self-Reliance League, the Ukrainian Women's Association of Canada, and the Canadian Ukrainian Youth Association. There are five Ukrainian Protestant churches and three Protestant periodicals (*Ievanhel's'kyi ranok*, *Ievanhel's'ka pravda*, and *Ievanhelyst*) in Toronto.

The first secular associations in the city were the St Nicholas Mutual Benefit Society (est 1906), renamed the

The statue of Lesya Ukrainka (sculptor: Mykhailo Chereshnovsky) in Toronto's High Park

Holy Eucharist Ukrainian Catholic Church (architect: Radoslav Zuk) in Toronto

Ruthenian National Benefit Society (est 1910), and the Shevchenko Prosvita Reading Room (est 1914), which in 1928 was reorganized into the Ukrainian People's Home. In 1924 supporters of the hetmanite movement founded the United Hetman Organization. Former soldiers of the Ukrainian armies (1918–20) formed the Ukrainian War Veterans' Association of Canada in 1928, which became the nucleus for the Ukrainian National Federation, the Ukrainian Women's Organization of Canada, and the Ukrainian National Youth Federation of Canada. The postwar immigration reinforced the existing Ukrainian organizations or set up new organizations, such as the Canadian League for Ukraine's Liberation, the Plast Ukrainian Youth Association, the Ukrainian Democratic Youth Association, the Ukraina and Trident sports associations, a number of veterans' associations, and several professional associations (engineers, teachers, lawyers). The head offices of practically all recently formed national organizations are in Toronto. The office of the *World Congress of Free Ukrainians is also found there. A strong branch of the pro-Communist Ukrainian Labour-Farmer Temple Association was active in Toronto between the wars. Reconstituted as the *Association of United Ukrainian Canadians, the group moved its head office to Toronto after the Second World War.

The Future Bakery and café in Toronto

The larger civic organizations run elementary and secondary Ukrainian classes on Saturdays, and four Catholic schools have a heritage language program in Ukrainian. The independent H. Skovoroda courses on the secondary-

school level, directed by O. Kopach (1951–78), made a major contribution to education. The Tsiopa Paliiv co-operative Saturday school (est 1972) offers a 12-year program, and an accredited language course is available at Humber College. The University of Toronto and York University provide courses in Ukrainian language, literature, and history. The Chair of Ukrainian Studies at the University of Toronto (est 1980) is devoted to history. A *Ukrainian Canadian Research and Documentation Centre was established in 1982. Besides the university libraries, the richest collections of Ukrainian books and journals are found at the library of the former Ukrainian People's Home, the Ukrainian National Federation, the Ukrainian Youth Association, and St Vladimir Institute. Since 1950 the Patronage of the Shevchenko Scientific Society has raised funds for *Entsyklopediia ukraїnoznavstva* (Encyclopedia of Ukrainian Studies), and since 1975 the Toronto publications office of the Canadian Institute of Ukrainian Studies has been preparing the *Encyclopedia of Ukraine* at the University of Toronto.

Toronto is the most important Ukrainian publishing center in Canada. The Ukrainian press published in Toronto includes the weekly papers **Nasha meta*, **Homin Ukrainy*, **Novyi shliakh*, **Zhyttia i slovo*, and **Ukraina i svit*; the biweekly **Bat'kivshchyna*; the monthly magazines **Novi dni*, **Ukrainian Canadian*, **Svitlo*, and **Zhinochyi svit*; the bimonthly **Visti kombatanata*; and the quarterly *Plastovyi shliakh*. There are two daily radio programs and two weekly Ukrainian TV shows.

A number of musical institutions are active in Toronto: the Lysenko Music Institute, the Canadian Ukrainian Opera Association (est 1978), and the Ukraine Millennium Foundation (est 1983). Besides numerous church choirs, there are several concert choirs: the male Prometheus and Burlaka choirs, the female Dibrova and *Vesnivka choirs, the chamber choir of *Musicus Bortnianskii, and the *Lysenko Chorus. Of the various drama groups that were active after the war the *Toronto Zahrava Theater continues to perform, and the Avant-Garde Ukrainian Theater has staged experimental plays since 1984. A number of well-known Ukrainian artists work in Toronto. The Focus Gallery, St Vladimir Institute, and the *Ukrainian Canadian Art Foundation exhibit the works of Ukrainian artists from around the world.

Toronto Zahrava Theater. An amateur troupe established in 1953 by Yu. Belsky, V. Dovhaniuk, and A. Ilkiv. Its repertoire has consisted of world and Ukrainian classical and contemporary plays, including Canadian plays. Zahrava has participated in the festivals of the Canadian Multicultural Theatrical Society, toured Canada and the United States, and performed in Ukraine (in 1990). Among its leading members have been Z. Turzhansky, M. Levytska, O. Telizhyn, M. Levytsky, N. Mykolenko, N. Tarnovetska, and M. Lialka.

Torysyn. See Zubrytsky, Dionisii.

Torzecki, Ryszard, b 20 March 1925 in Łódź, Poland. Polish historian. A graduate of Warsaw University (PH D, 1970), since 1971 he has worked at the Institute of History of the Polish Academy of Sciences. He has written on the Ukrainian problem in the policies of the Third Reich in 1939–45 (PH D diss; pub 1972) and the Ukrainian question

in Poland in 1923–9 (habilitation diss, 1983; pub 1989), as well as on the history of Western Ukraine and Ukrainian-Polish relations in the years 1918–45.

Totska, Nina [Toc'ka], b 12 May 1923 in Ozerna, Bila Tserkva district, Kiev oblast. Linguist. A graduate of Kiev University (1947), she taught Ukrainian language there (1950–87) and oversaw an experimental phonetics laboratory (1964–84). In 1987 she joined the Ukrainian language department at the Vinnytsia Pedagogical Institute. She has published works on experimental research in Ukrainian phonetics, such as on the articulatory and acoustic characteristics of vowels, sound reduction, the acoustical properties of stress, accentual and rhythmic structure of words, and interlinguistic interference. She has also published texts and manuals for secondary and postsecondary schools for foreign students.

Totsky, Ivan [Toc'kyj], b 24 April 1896 in Buianychni, Mahiliou county, Belarus, d 16 December 1957 in Odessa. Opera singer (bass) and actor. A graduate of the Kiev Conservatory (1925), he was a soloist of the Kharkiv (1925–7), Odessa (1924–41, 1946–51), and Leningrad (1943–5) opera theaters.

Touring theaters (*peresuwni teatry*). Touring theaters in Ukraine evolved in the 18th century from *serf and amateur theaters and (except for *Sadovsky's Theater in Kiev) were the only form of Ukrainian theater until 1917. At the beginning of the 19th century there existed mixed Ukrainian-Russian-Polish troupes, such as those under I. Shtein, L. Mlotkovska, A. Zmiievsky, P. Rekanovsky, O. Bachynsky, and H. Kvitka-Osnovianenko. The first professional Ukrainian theater was the touring Ruska Besida Theater (see *Ukrainska Besida Theater), established in 1864 under O. Bachynsky.

After the ban on theater performances was lifted in Russian-ruled Ukraine, in 1881, leading troupes led by M. Kropyvnytsky, M. Starytsky, and M. Sadovsky, *Sakshansky's Troupe, and others also became touring theaters. Some toured outside Eastern Europe; H. Derkach's troupe, for example, toured France in 1893–4. Because of severe censorship their repertoire consisted mainly of populist-ethnographical plays, and only after 1905 were translated dramas occasionally performed. By this time there were approx 300 touring theaters in Ukraine. In the face of censorship and the tsarist ban on resident Ukrainian theaters they were the vanguard of the Ukrainian theater movement, and they developed an impressive number of outstanding performers, including M. Zankovetska, H. Borysohlibska, I. Marianenko, D. Haidamaka, K. Luchytska, O. Petliash, H. Yura, and I. Zamychkovsky. They also spawned an antipodal genre, the fringe-grotesque *Lubok theaters.

In 1916–18 the *Theater of the Legion of Ukrainian Sich Riflemen toured throughout Galicia and along the front. The *New Lviv Theater toured under the auspices of the Ukrainian Galician Army in 1919–20. In Vinnytsia the touring Franko Ukrainian Drama Theater was founded by H. Yura in 1920. During 1920–39 touring theaters were active in Western Ukraine in Galicia (the *Zahrava Young Ukrainian Theater, the *Tobilevych Ukrainian People's Theater, Y. Stadnyk's Union of Ukrainian Actors, the Ukrainskyi Teatr Co-operative, Stadnyk's Artistic Tour, I.

Kohutiak's Ukrainian Touring Theater, and O. Karabinevych's *Sadovsky Ukrainian Drama Theater), in Volhynia (N. Boyko and O. Mitkevych's troupes), in Bukovyna (a drama section in the Bukovynian Kobzar Association and S. *Terletsky's troupe), and in Transcarpathia (the *Ruthenian Theater of the Prosvita Society and, later, *Nova Stsena Theater). A Western Galician touring theater, Melpomena, headed by M. Aidariv, successfully toured throughout Poland in 1933-7, including Cracow, Kielce, Łódź, and Warsaw voivodeships in its tour. In eastern Ukraine, for the first few years after 1917, agitprop theater existed as a form of touring theater, whose activities consisted mostly of concert-meetings under the auspices of the Soviet army. In the 1920s there appeared workers' and peasants' touring theaters (since 1929 *workers' and collective-farm theaters), which also sponsored touring displays on housekeeping, educational, and sanitary topics and were subordinated to the larger resident theaters. There were also touring theaters of small forms, such as Veselyi Proletar in Kharkiv, the *Poltava Chervonyi Perets Theater, touring contemporary variety theaters, and the Siiach touring theater from Poltava (1923-7). Since 1961 oblast-level theaters have been responsible for touring to towns, workers' settlements, and collective farms.

V. Revutsky

Tourism. Recreational travel and tourism developed fairly recently in Ukraine. Tourism includes sight-seeing and various forms of leisure activity (such as hiking and skiing). Initially tourism in Ukraine, as in other countries, was limited to the wealthy and privileged classes. Only in the 20th century, with the general rise in the standard of living and the development of modern forms of communication and travel, has tourism become a major industry.

In the Ukrainian SSR organized tourism went through several stages of development. In the 1920s the Soviet Tourist Society was organized under the Council of People's Commissars of the Russian republic. Its Ukrainian branch was known as Ukrtura. The Society for Proletarian Tourism was founded in 1928 and merged with the All-Union Voluntary Society of Proletarian Tourism and Excursions in 1930. In 1936 this body was dissolved and the task of promoting tourism, hiking, and mountain climbing was left to various trade-union and physical education organizations. At the same time a tourism and expeditions administration was formed at the All-Union Central Council of Trade-Union Organizations. It controlled 150 tourist buildings and complexes. There were not enough tourist facilities in Ukraine to satisfy local demand. All these tourist organizations handled tourism only within the USSR and only for Soviet citizens. In the interwar period most tourists were groups of workers visiting resorts or sanatoriums run by various government ministries or trade unions. Popular destinations included the Black Sea coast, Crimea, and Kuban. Building hotels and other facilities for tourism was not a priority, and little was done to encourage or even permit tourism other than for workers. Trips to resorts were used by the authorities to reward loyal workers and build allegiance to the Party. Under the system of totalitarian control there was little individual travel even within the USSR and virtually none outside the Union.

That situation prevailed throughout the postwar Stalin-

ist period. Only in 1962 was a Central Council for Tourism with republican branches formed, under the trade-union movement. The regime came to realize the value of tourism and travel for building Soviet patriotism and improving the health and morale of the population. The council, which was renamed the Central Council for Tourism and Excursions in 1969, organized individual and especially group tours, trained guides and excursion leaders, and administered recreational facilities and events. In 1963 there were 43 tourist bases or resorts and over 320 other facilities (camping grounds, hotels) that offered accommodation for tourists in Ukraine. By the mid-1970s over 2,000 separate excursions (usually bus tours) had been developed by the council, which at that time employed 1,700 full- and 3,000 part-time guides. Many of the excursions were designed to strengthen Party loyalty or build patriotism: tourists were taken to historical sites highlighting Soviet achievements, model factories and state farms, and so forth. Trains and buses for overnight trips to points of interest were organized. The most popular destinations were large cities and cultural centers, such as Kiev, Kharkiv, Odessa, and Lviv. T. Shevchenko's grave in Kaniv drew many tourists. Since 1965, boat tours on the Dnieper River and the Black Sea have been available. Skiing is popular in the Carpathian Mountains, and the Ukrainian Association of Hunters and Fishermen maintains camps for hunting and fishing.

The system of *health resorts and sanatoriums in Ukraine is an important component of the tourist industry. Besides providing recuperative mud baths and mineral waters they offer recreational activities and simple relaxation. The most popular resort areas in Ukraine are the Crimea (over 8 million visitors annually), the Black Sea coast near Odessa, the northern and eastern coasts of the Azov Sea, and the Carpathian Mountains. Those areas drew visitors from the whole USSR. Many resorts are affiliated with specific enterprises, institutes, or ministries and are reserved for workers from those institutions. The writers', composers', and artists' unions maintain their own facilities.

Foreign touring groups and individual tourists visiting Ukraine were administered by the all-Union organization, *Intourist, which had branches in Ukraine.

Special programs for student-tourists were organized by the Ukrainian branch of the Sputnik International Youth Travel Agency, established in 1958 with headquarters in Moscow. It ran exchanges with student travel groups throughout the Soviet bloc, and with pro-Soviet student organizations in foreign countries. In 1987 it had 54 offices in Ukraine. During vacation periods the organization was allocated hotel rooms and student residences along with food services, transportation, and other services. In the 1980s, Sputnik in Ukraine handled approx 1.3 million students, including 130,000 foreigners, and arranged over 50 specialized excursions. The Pioneer Organization of Ukraine maintained its own system of campgrounds and organized excursions for its members.

In general the tourist industry in Ukraine is underdeveloped. There are too few hotels and other facilities to satisfy demand, and the general quality of accommodations and services, compared to those in the West, is poor. The most popular destinations on the Black Sea face a serious shortage of fresh water, which restricts their future development. Foreign tourists had been discouraged from

visiting Soviet Ukraine by strict visa requirements, restrictions on their travel in Ukraine to designated cities and resorts, and exploitive fiscal policies. Nonetheless, large numbers of tourists, especially of Ukrainian descent, have traveled each year to Ukraine. Many of them have done so to see relatives. Today the major problems are shortage of hotel space, inadequate transportation, and inferior service.

Kostiantyn Tovkach

Tovkach, Kostiantyn [Tovkač, Kostjantyn], b 1883 in Poltava gubernia, d after 1930 in Yaroslavl, Russia. Ukrainian Orthodox church figure. A graduate of the Poltava Theological Seminary and the law faculty of Kharkiv University, he worked as a judge and was a member of the Society of Ukrainian Progressives and the Ukrainian Party of Socialists-Federalists. From 1920 he was active in the rebirth of the Ukrainian Autocephalous Orthodox church, and he became head of its Poltava regional council. He was arrested in 1929 and sentenced in the show trial of the *Union for the Liberation of Ukraine in 1930 to a five-year term in extreme isolation. He died in the Yaroslavl solitary confinement prison for political prisoners.

Tovmach [Tovmač] (aka Tlumach, from the Polish variant). v-5. A town (1989 pop 7,500) on the Tlumachyk River and a raion center in Ivano-Frankivske oblast. It was founded in the 12th century and named after the translators (*tovmachi*) who served at Prince Yaroslav Osmomysl's customs post. It is mentioned in the Hypatian Chronicle under the year 1213. From the 14th century the town belonged to Poland. In 1448 it was granted the rights of *Magdeburg law. It was destroyed by the Tatars in 1594 and 1678 and then fortified with earthworks and stockades. Tovmach changed hands several times during the Cossack-Polish War and suffered heavy losses. After the partition of Poland in 1772, the town was annexed by Austria. It was linked by rail to the larger cities of the Austrian Empire in 1886 and subsequently became an exporter of farm products and livestock. In the interwar period Tovmach was a county center in Polish-ruled Galicia. In 1939 it was incorporated into the Ukrainian SSR. Today

the town has a food-processing industry and a folk-art museum.

Tovstiuk, Kornii [Tovstjuk, Kornij], b 22 March 1922 in Mamaivtsi, Bukovyna. Specialist in the field of semiconductors and semiconductor materials, corresponding member of the ANU (formerly AN URSR) since 1978. He studied and taught at Chernivtsi University, where he held a chair from 1956 to 1967. In 1968–9 he held a chair at Lviv University. He served as assistant director of the ANU Institute of Semiconductors (1969–77) and headed its Chernivtsi branch, and he was appointed to the position of assistant director of the ANU Institute for Applied Problems of Mechanics and Mathematics (1977–81). Since 1981 he has been assistant director of and department head at the ANU Institute for Problems of Materials Science. He has researched the properties of anisotropic and layered semiconductors, magnetic and physical phenomena in semiconductors, the physics of semiconductor materials, and other topics.

Tovstolis, Dmytro, b 20 September 1877 in Chernihiv, d 28 July 1939 in Kiev. Forester. He graduated from the St Petersburg Forestry Institute (1902) and from 1912 taught at the Higher Agricultural Courses for Women in St Petersburg. He was appointed to the positions of professor at the Belarusian Agricultural Institute (1923–5) and chairman of the Department of Forest Appraisal at the Kiev Agricultural Institute and the Kiev Institute of Forest Management (from 1925). Among his publications are a number of monographs, such as *Opyt izucheniiia sistem lesnogo khoziaistva* (An Attempted Study of the Systems of Forest Management, 1929).

Tovstolis, Mykola, b 21 March 1872 in Andronyky, Sosnytsia county, Chernihiv gubernia, d ? Lawyer and political figure; member of the Imperial Senate before 1917 and of the Hetman State Senate (1918). In the 1920s he was a professor at the Kiev Institute of the National Economy and a research associate of the VUAN Commission for the Study of Ukraine's Customary Law. A number of his works were published in the commission's *Pratsi*, including articles on discovery under Lithuanian-Ruthenian law (1926) and on the history of cus-tomary law (1928). He was arrested in 1933, and disappeared in Stalin's concentration camps.

Tovstonos, Vitalii (pseuds: V. Vital, V. Zabhai-Tovstonis, V. Tal), b 5 April 1883 in Znamianka, Oleksandriia county, Kherson gubernia, d 11 February 1936 in Hadiache, Poltava oblast. Writer. From 1908 on he published stories in *Rada*, *Ridnyi kraj*, *Selo*, and, in the Soviet period, *Pluh*, and other periodicals. In the years 1917–27 he published 13 plays; he also wrote three novels, *Liubi brodiahy* (Beloved Tramps, 1927), *Nezvychaini pryhody bursakiv* (The Unusual Adventures of the Boarding-School Students, 1929), and *U svit* (Out into the World, 1930). He belonged to the peasant writers' group *Pluh* from 1925 to 1932.

Tovt, Aleksei (Toth, Alexis), b 18 March 1854 in Gelnica, Slovakia, d 7 May 1909 in Wilkes-Barre, Pennsylvania.

Russian Orthodox church figure in the United States. A Greek Catholic clergyman and professor of canon law at the Prešov seminary, he was sent to North America in 1889 as a missionary priest for the St Mary's parish in Minneapolis. He converted to Russian Orthodoxy (together with 365 of his charges) in 1891 after an acrimonious confrontation with the Roman Catholic bishop of St Paul, J. Ireland. He became a leading figure in establishing Russian Orthodox parishes in the United States and brought approx 20,000 converts into the church's fold, many of them immigrant Ukrainians. He also organized the Russian Orthodox Mutual Aid Society in Wilkes-Barre in 1895. For his tireless devotion and proselytizing Tovt was labeled the father of American Russia.

Tovt, Nikolai, b 10 August 1833 in Mukachiv, d 21 May 1882 in Prešov, Slovakia. Transcarpathian church figure. He studied theology at the Budapest Central Seminary and in Vienna. He was ordained in 1857, and after receiving a D TH in 1860, he was a professor at the Uzhhorod Theological Seminary and at Budapest University (1870–5). He was appointed a canon and rector of the seminary in Uzhhorod in 1873 and bishop of the Greek Catholic Prešov eparchy in 1876. He founded the Prešov Theological Seminary in 1881 and introduced Ukrainian (the Prešov dialect) as the language of instruction in the eparchy's parochial schools.

Tovtry (also Medobory Mountains). A belt of limestone ridges extending northwest–southeast across the Podolian Upland for nearly 250 km from Brody in the north to Stelianivtsi, on the Prut River in Moldova, in the south. Originally formed as barrier reefs and atolls in a Neogene sea the Tovtry are marked by karst features. They provide a picturesque, albeit harsh, landscape of blue-gray and white cliffs and gullies. They reach a height of roughly 350–400 m (430 m at the tallest point) and stand 50–100 m above the surrounding plateau. The Tovtry slopes and tops are covered with forests of oak, beech, hornbeam, hazel, and other trees, in sharp contrast to their surrounding farmland areas. The western slopes of the elevations tend to be much steeper than the eastern ones. A number of notable caves (including Dovbush, Perlyn, Tatar, and Karmaliuk) are situated in the mountains.

Town Cossacks (*horodovi kozaky*). Cossack garrisons in fortresses in the steppes along the Dnieper River (especially in Kaniv, Vinnytsia, Cherkasy, Khmilnyk, Bratslav, and Bar), set up in the 16th and 17th centuries by the Lithuanian and, later, Polish authorities to defend the southern borders of the Commonwealth against Tatar raids. The town Cossack units were organized by local starostas, and the Polish government introduced a register in the second half of the 16th century to control their number and activities (see *Registered Cossacks).

Some historians also use the term 'town Cossacks' to refer to the Cossacks of the *Hetman state in Left-Bank Ukraine from the second half of the 17th century until the early 1780s. They were organized into *regiments, which were named after their chief towns, and formed the bulk of the Hetmanate's military force. The regiments differed in size of territory and population and number of Cossacks. At the beginning of the 18th century there were 40,000 to 50,000 town Cossacks altogether, divided into companies, with 8 to 20 companies per regiment. Each

*company was to consist nominally of 200 to 250 Cossacks, but actually numbered 700 to 750. The companies were further divided into *kurins.

Town Cossacks were exempted from taxes and labor services but were obliged to do military duty without pay. Each man had to equip himself with a horse, arms, uniform, and supplies. Between campaigns the town Cossacks lived at home. According to an ukase of 1735 of the Governing Council of the Hetman Office, which was approved by the Senate in Moscow, a new list of Left-Bank regiments was drawn up. It included 30,000 wealthy Cossacks, who became known as *elect Cossacks; most of the rank-and-file Cossacks were stripped of their privileges and turned into *Cossack helpers, who were required to supply the Cossack army with forage and provisions and to defend the estates of the elect Cossacks during campaigns. In 1789 all Cossack privileges were abolished by imperial decree, the status of the Cossacks was degraded to that of state peasants, and they became known as Little Russian Cossacks. Some of them were conscripted into *lancer regiments.

A. Zhukovsky

Towns. See Cities and towns.

Townpeople. See Burghers, Cities and towns, and Urbanization.

Toxic plants and animals. Organisms containing natural products which upon contact with humans or animals cause allergic or toxic reactions, in extreme cases death. Their toxicity is a chemical rather than physical means of natural defense.

Toxic plant substances common in Ukraine can be categorized according to the organic processes they affect: the central nervous system (ben-bane, Indian poke, greater celandine, colchicum), the respiratory and digestive system (*nasturtium and yellow *rhododendron), the gastrointestinal system (milkwort, water dropwort, cockle, *nightshade, spurge flax, and some *mushrooms), the cardiovascular system (digitalis, foxglove, and lily of the valley), the liver (ragweed and heliotrope), and cellular respiratory processes (flax, almonds, and various sensitizers, including buckwheat and St-John's-wort). Some naturally toxic plants serve as sources for medicinal preparations (see *Medicinal plants). Many modern drugs were first discovered through *folk medicine therapies based on various herbs.

There are few life-threatening toxic animals in Ukraine; only some snakes and some Black Sea fish (eg, ruff) are truly toxic. The bites of other animals – scorpions, tarantulas, *Scolopendra* centipedes, *bees, wasps, hornets – may be very painful and may cause excessive swelling but rarely result in death. The venom of some animals has medicinal value.

I. Masnyk

Track-and-field sports (*lehka atletyka*). Competitive athletic events performed on a running-track or on an adjacent field. Twenty-four such events for males and 18 for females constitute a large part of the *Olympic Games and other international, continental, national, and regional championships. Track-and-field sports are also a basic part of *physical education.

In Ukraine the first documented track-and-field meet

TABLE 1
World records in track-and-field sports set by Ukrainian athletes

Athlete	Event	Record	Place and year
Synyska, Zoia	women's discus throw	74.23 m	Kiev 1937
Pletneva, Nina	women's 800-m run	2:12.0	Minsk 1951
		2:08.5	Kiev 1952
		2:07.3	Moscow 1953
Kuts, Volodymyr	5,000-m run	13:56.6	Berne 1954
		13:51.2	Prague 1954
		13:46.8	Belgrade 1955
		13:35.0	Rome 1957

Yashchenko, Volodymyr	men's high jump	2.31 m	Richmond, VA 1977
		2.33 m	Richmond, VA 1977
		2.34 m	Tbilisi 1978
Olizarenko, Nadiia	women's 800-m run	1:53.50	Moscow 1980
Sedykh, Yurii	hammer throw	80.38 m	1980
		86.74 m, 6th WR	Stuttgart 1986
Bubka, Serhii	pole vault	5.81 m	Bratislava 1984
		6.06 m	Nice 1988
		6.08 m, 11th outdoor WR	Moscow 1991
		6.12 m, 15th indoor WR	Grenoble 1991
Bryzhina, Olha	women's 4 × 400-m relay	3:15.18	Seoul 1988
Pinihina, Mariia	women's 4 × 400-m relay	3:15.18	Seoul 1988

took place in June 1858 in Mykolaiv, where 52 sailors and soldiers took part in races. The first amateur athletics club in Ukraine was established in 1905 in Katerynoslav (now Dnipropetrovske), and others were soon founded in Chernihiv, Kiev, Kharkiv, Melitopil, Mykolaiv, Odessa, and Zhytomyr. In Austrian-ruled Galicia, track-and-field sports were among the activities of the *Sokil and *Plast associations, and constituted an important part of their jamborees in the years preceding the First World War. At the Russian Imperial Games held in October 1912, the Kiev athlete K. Veshke won the 100-m run with a time of 12.0 seconds and the broad jump with a distance of 6.19 m. In September 1912 the first athletic meet on Ukrainian territory in this century took place in Kharkiv. In September 1913 the first All-Russian Olympiad took place in Kiev. Ukrainians took 7 gold, 12 silver, and 13 bronze medals in 25 events and set 11 All-Russian records (7 of them by Kiev athletes). On the eve of the First World War, in June

1914, a Kiev-Moscow intercity competition took place; Kiev athletes won most of the events. Other track-and-field clubs were founded at the time, such as Feniks in Kharkiv and Sporting-kliub, Sokol, and Makkabi in Odessa. At the second All-Russian Olympiad in July 1914 in Riga, the Kiev athletes M. Orlov, M. Sokolov, and K. Veshke won various events.

After the First World War, track-and-field sports gained mass popularity in the Ukrainian SSR, Polish-ruled Galicia, and émigré communities. In August 1921 the first Soviet All-Ukrainian Olympiad was held in Kharkiv. In 1923 sports clubs in Soviet Ukraine were incorporated into the Spartak association, and annual all-Ukrainian competitions were thenceforth called Spartakiads. That year the Higher Council for Physical Education at the Presidium of the All-Ukrainian Central Executive Committee was established. In 1928 the Ukrainian Spartakiad was replaced by an all-Union Spartakiad. At it the Ukrainian runners M.

TABLE 2
European records in track-and-field sports set by Ukrainian athletes

Athlete	Event	Record	Place and year
Denysenko, Petro	pole vault	4.42 m	Kiev 1952
		4.44 m	Moscow 1953
		4.46 m	Kiev 1954
Ter-Ovanesian, Ihor	men's broad jump	8.01 m	Moscow 1959
		8.04 m	Rome 1960
Brumel, Valerii	men's high jump	2.17 m	Moscow 1960
		2.18 m	Odessa 1960

Borzov, Valerii	men's 100-m	10.0	Kiev 1969

Pidhaietsky and V. Spiridonova set new records. In all-Soviet competitions of the 1930s and 1940s, Ukrainian athletes, such as I. Anysymov (hurdles), O. Bezrukov (hurdles), Z. Borysova (discus throw and shot put), Yu. Bulanchyk (hurdles), N. Dumbadze (discus throw), O. Kanaki (shot put, decathlon, and hurdles), V. Pizhurina (running), H. Raievsky (pole vault and decathlon), P. Savelev (running), V. Sydorko (high jump), Z. Synytska (discus throw, ball throw, shot put, triathlon), and K. Shylo (running), placed first and set new records.

From the end of the Second World War, all sports competitions in Ukraine were conducted in accordance with

Serhii Bubka, the Olympic gold medalist and world-record holder in the pole vault

centralized regulations issued from Moscow. From 1949, Ukrainians were part of USSR teams in international competitions. In August 1951, N. Pletneva from the Donbas became the first Soviet Ukrainian athlete to set a postwar world record in a track-and-field event (women's 800-m run, 2:12). In 1952, 25 athletes from the Ukrainian SSR were part of the first USSR Olympic team sent to the Olympic Games in Helsinki. Of the 11 who competed in track-and-field events, three secured 4th place, one 5th place, and one 6th place. At the 1956 Olympic Games in Melbourne, V. Kuts became the first Ukrainian athlete to win a gold medal in a track-and-field event. At the 1960 Olympic Games in Rome, four track-and-field athletes from Ukraine won gold medals, V. Holubnychy, V. Krepkina, L. Lysenko, and V. Tsybulenko; in 1964, V. Brumel and I. and T. Press; in 1968, V. Holubnychy; in 1972, M. Avilov, V. Borzov, A. Bodnarchuk, and F. Melnyk; in 1976, Yu. Sedykh; in 1980, V. Kyselov, N. Olizarenko, Yu. Sedykh, N. Tkachenko, T. Prorochenko, and N. Ziuskova; and in 1988, H. Avdiienko, S. Bubka, O. Bryzhina, T. Samolenko, V. Bryzhin, and M. Pinihina. After Ukraine regained its independence in 1991, Ukraine's athletes participated in the 1992 Summer Olympic Games as members of the 'Unified Team' of the former Soviet Republics. T. Dorovsykh (women's 3,000-m run) and I. Kravets (women's long-jump) won silver medals for Ukraine and the gold in world championships in Toronto in 1993. S. Bubka (pole vault) did not qualify at the Summer Games but subsequently set his 32nd world record by jumping 6.13 m (Tokyo, 1992).

Tractor industry. A branch of the machine-building industry that produces various types of tractors, tractor and combine motors, parts, and equipment. Tractors are used in agriculture, heavy industry, construction, forest management, and other sectors of the economy. They have replaced much human and animal labor and have raised productivity in many branches of the economy.

Before the Revolution of 1917 there were no tractor factories in Ukraine. Only in the late 1920s did mass production of tractors begin in the USSR. Until then draft animals and a very small number of imported tractors were used. Some small tractors were built in Tokmak, in Zaporizhia oblast, from 1923. The first specialized tractor plant in Ukraine, the *Kharkiv Tractor Plant, opened in 1931. Initially it produced the SKhTZ tractor, which was an effective machine but somewhat underpowered. Tractor building became an important priority for the regime following the collectivization of agriculture, when many draft animals died or were slaughtered, and the introduction of *machine-tractor stations, which were to promote the mechanization of agriculture and Party control over the peasantry. Total output of the industry in Soviet Ukraine increased from 2,000 tractors in 1928 (15 percent of total Soviet production) to almost 41,000 in 1934 (26 percent of Soviet production). In 1937 output dropped to 10,600, but the tractors then built were much larger and more powerful. Ukraine accounted for 21 percent of the

Soviet output. In 1940 some 10,400 tractors, or one-third of the Soviet total, were built in Ukraine.

At the outset of the Second World War many of the industry's plants were converted to military production and then evacuated to the east. The industry was reconstructed after the war, and since then much has been done to improve the quality of Ukrainian tractors. Ukraine's output of tractors steadily increased from 22,600 tractors (19 percent of total USSR production) in 1950 to 147,500 (32 percent) in 1970; production leveled off during the 1980s, 135,600 were built in 1980, 140,000 (25 percent) in 1986, and 130,900 in 1987. Several specialized tractors have been developed, including small garden tractors and both wheel-driven and caterpillar machines. Today the most popular tractors built in Ukraine are the T-150, a 150-hp tractor available in both wheel-driven and caterpillar versions and introduced in 1971; the T-25, a small garden tractor; the T-16, for hauling; and the all-purpose T-74. In 1982 there were 25 tractor factories in Ukraine. Almost all of the finished tractors were still being produced at the Kharkiv Tractor Plant; the other enterprises, located mostly in the Donets Basin, provided parts, equipment, engines, or semifinished machines. In the last years of the USSR, the tractor industry in Ukraine stagnated, although the total Soviet output continued to grow. The most powerful new models (eg, the K-700) are being built in the RF.

Trade. The branch of the national economy that deals with the flow of goods from the producer to the consumer. In the narrow sense trade consists of the wholesale and retail distribution of consumer goods (including prepared food). In Ukraine prior to 1992 trade included two more branches of the Soviet economy, material and technical supply (known in the West as the wholesale trade in the means of production) and state procurement of farm products. Besides internal trade there was also external or foreign trade and economic relations with other republics of the USSR. Statistics on those two forms of exchange began to be collected only at the end of the 1980s.

The weight of internal trade in Ukraine's national economy is indicated in table 1. Ukraine's income from external trade in 1989 was 6.4 billion rubles, or 5.85 percent of the national income produced (NIP).

TABLE 1
The share of the different branches of trade in Ukraine's national income and in the work force in 1989 (percentages)

	National income produced (in real prices)	Number of wage & salary workers
All branches	6.93	8.80
Retail trade & food services	5.34	7.58
Material & technical supply	0.88	0.73
State procurement of farm products	0.71	0.49

Every branch of trade in Ukraine has been poorly developed, a state of affairs that hampered the other branches of the economy and caused social tension. Demand for almost every commodity in wholesale and retail trade greatly exceeded the country's capacity to produce or import such commodities. The network of trade enterprises, particularly modern ones such as department stores, was

inadequate. Stores and businesses were poorly equipped with modern cash registers, computers, and communications machines. The assortment of goods, particularly since 1990, has been limited. Food-services enterprises for the general public and commercial space have been in short supply. Most of the workers in the various branches of trade have been poorly trained and motivated, and customer service has therefore been low. Because of poor organization customers have had to put up with long queues.

In the last few years new trade enterprises – co-operatives and joint ventures – have appeared alongside the established organizations. In 1991 the first stock exchanges were set up. Collective-farm markets, which sell farm produce, and flea markets, which sell manufactured and mostly imported goods, have been opened in almost all cities and towns. The prices there are unregulated and much higher than state prices. In 1989, 5.1 percent of consumer goods were bought at these markets.

Material and technical supply and sale. Organizationally distinct, this branch of trade supplies raw materials and fuel to various branches of the economy and markets the industrial output, except for consumer goods. In 1990 there were 2,170 independent enterprises of this branch in Ukraine; their annual turnover was 63.34 billion rubles. The largest share of the output in this branch – 20.765 billion rubles' worth, or 32.8 percent of the total – was produced by the organizations that had previously come under the State Committee for Material and Technical Supply. The second-largest output came from the organizations under the State Committee of the Coal Industry: 14.89 billion rubles' worth, or 23.5 percent of the total. The former State Agroindustrial Committee oversaw a large network of supply organizations with an output of 9.74 billion rubles, or 15.4 percent of the total, and the state Committee for Petroleum Products had a network with an output of 7 billion rubles, or 11.1 percent of the total. For many years the material and technical supply system was used not for conducting wholesale trade but for distributing production according to fixed and usually low prices set by the state. When many kinds of products were in short supply, priority was given to the needs of the defense industry and heavy industry. The system was too large and centralized to ensure an efficient use of resources. In 1987 the first steps were taken to change gradually from a centralized division of material resources to their wholesale marketing and to direct long-term ties between producers and consumers. But under the existing conditions the plan could not be carried out. In 1990–1 the supply of resources declined seriously. At the same time the first commodity exchanges with free-market prices appeared.

Agricultural procurement. The state purchased farm products for further processing and consumption by the population. In 1989 the government bought 31.94 billion rubles' worth of farm products, or 58.6 percent of Ukraine's gross agricultural output (including seed and feed). Ninety-six percent of the procurements came from collective and state farms and other agricultural enterprises, and 4 percent from private plots. The breakdown by product is given in table 2.

In the last few years of the Soviet Union, in spite of higher procurement prices, the collective and state farms turned away from procurement organizations to sell their

TABLE 2
Agricultural procurement in Ukraine in 1990 (at 1989 prices)

Product	1,000 tonnes	Million rubles	% of total

products to other purchasers at better prices or to barter their products for farm machinery, trucks, or building materials. The difficulty in obtaining deliveries at state prices was largely due to unbalanced price reforms, which raised industrial prices at a greater rate than farm prices. (See also *Agricultural procurement and *Grain procurement.)

Retail trade and food services. These branches sold goods directly to the consumer and represented the final stage of commodity turnover. In 1989, 79.8 percent of personal consumption was handled by these two branches. The basic statistics on them are given in table 4.

Since 1980 the growth rate of food sales in the retail trade, including the food services industry, has fallen behind that of nonfood sales, and the increase in the food services turnover has lagged behind the growth rate of the total turnover (see table 3). The division of retail sales between state and co-operative trade (including food services) shifted slightly in favor of the first, from 70.1 percent in 1980 to 71.7 percent in 1989.

In 1989 the Ukrainian Ministry of Trade controlled 45.2 percent of the total turnover, the consumer co-operatives 28.4 percent, the organizations of the State Agroindustrial Committee 2.7 percent, and various Union and republican ministries the rest. In the few years before that the network of state consignment stores had grown; in 1989 their turnover was 1,873 million rubles, or 2.7 percent of the total turnover. They resold used cars (60.5 percent of their turnover) and imported goods, such as clothes and underwear (10.6 percent) and radios (4.3 percent). Co-operative stores began to be organized in 1988. In 1989 they accounted for only 0.46 percent of the turnover.

Until 1990 the official state and co-operative retail price indexes did not reflect real price changes, particularly on nonfood products. In 1989 the official price index for all

Basic growth indicators of Ukraine's retail trade, 1960-89

	1960	1970	1980	1985	1989
Total retail trade, state & co-operative, in real prices (in million rubles)	13,347	27,548	46,742	55,427	68,649
Food services	1,360	2,966	4,426	5,081	5,832
Goods reserves at year's end in real prices (in million rubles)	3,111	6,554	8,847	11,939	10,021
Average annual work force in retail trade (in 1,000s)	399	716	871	894	936
in food services (in 1,000s)	18	384	478	488	481
Number of enterprises in retail trade (in 1,000s)	121.8	148.2	143.7	142.0	145.9
Commercial space in stores (in 1,000 sq m)	-	-	9,134	10,195	11,129
Number of food-service enterprises (in 1,000s)	26.1	47.7	56.0	59.4	62.3
Seating places in food-service enterprises (in 1,000s)	-	2,042	3,458	4,054	4,436

goods amounted to 109 percent of the 1980 figure: food prices were 117 percent higher than in 1980, alcohol prices 209 percent higher, and nonfood prices only 104 percent higher.

At the end of 1990 special coupons were introduced to stem the outflow of goods from Ukraine to the other Soviet republics. Ukrainian residents received coupons corresponding to 70 percent of their personal income and used them to purchase most kinds of consumer goods.

At the beginning of April 1991 retail prices on almost all consumer goods, except alcoholic beverages and petroleum, were raised. Prices in the second quarter of 1991 were 1.93 times higher than a year earlier: food prices went up by a factor of 1.84, clothes prices more than

doubled, and durable goods prices went up by a factor of 1.9.

Interrepublican and foreign trade. In 1913 Ukraine exported 789 million rubles' worth of goods to other countries and parts of the Russian Empire and imported only 261 million rubles' worth. Some data on Ukraine's *foreign trade were collected when the economy was under territorial control, and the councils for the national economy were active. It was only in 1987 that the foreign ties of some branches of the national economy began to be monitored. The basic data about Ukraine's foreign trade in 1989 are summarized in table 5. The most important commodities that Ukraine must import are petroleum (under 10 percent of the demand can be met by domestic produc-

TABLE 5
Ukraine's imports and exports according to branches of the economy in 1989 at internal prices (in million rubles)

Branch	Imports		Exports	
	from Soviet republics	from foreign countries	to Soviet republics	to foreign countries
<i>Total</i>	39,969	14,569	40,464	7,596

<i>Other forms of material production</i>	726	17	347	189

tion), natural gas (20–25 percent), lumber, and cotton. Ukraine produces a surplus of ferrous metals and certain foodstuffs. In 1987–9 the average annual imports came to 17.7 percent of Ukraine's gross social product (in real internal prices). Of that, 12.9 percent was imported from other Soviet republics, and 4.8 percent from abroad. At the same time Ukraine consumed 83.8 percent of its output and exported 13.8 percent of it to other Soviet republics and only 2.4 abroad. In 1990, 78 percent of Ukraine's exports abroad consisted of raw materials and consumer goods; 16 percent, of machines and equipment; and 6 percent, of equipment and materials for construction projects supported by the USSR. About two-thirds of the inter-republican trade was with the RSFSR, and a similar proportion of the foreign trade was with former Comecon members.

For many years Ukraine had a favorable trade balance with the other Soviet republics. With the dissolution of the USSR and the introduction of world prices the situation changed, because of the high cost of petroleum and natural gas. In regard to foreign trade, Ukraine's imports have always outweighed its exports, in 1987 by almost 7 billion rubles.

A. Revenko

Trade and Industry Chamber of the Ukrainian SSR (Torhovelno-promyslova palata URSR). A republican commercial institution formed in 1973 out of the Ukrainian branches of the USSR Trade and Industry Chamber in Kiev, Odessa, and Kharkiv. It represented Ukrainian state, cooperative, and communal enterprises and promoted international trade by exchanging commercial information, arranging exhibitions, and testing the quality of industrial products. It informed foreign companies about products made in Ukraine and Ukrainian enterprises about foreign products, translated technical instructions, and prepared advertisements. The chamber had 9 interoblast departments, 16 oblast branches, and 24 municipal product-testing offices.

Trade unions (*profsoiuzy* or *profspilky*). Mass voluntary organizations of workers according to occupation. In the Ukrainian SSR trade unions (TU), according to their statutes, accepted the authority of the CPSU. They were formed and developed within the framework of the all-Russian trade-union movement. Under the Soviet regime Ukrainian TU functioned as organizationally subordinate parts of all-Soviet TU.

To 1917. Associations of workers and tradesmen began to appear in Western Europe with the beginning of industrialization in the late 18th century. They were opposed by employers and government. Great Britain was the first country to grant at first partial (1824) and then full (1871) legal status to TU. Next TU were legalized in France, and then in other Western European countries. In the Russian Empire they were legalized only after the Revolution of 1905.

In Russian-ruled Ukraine the demand for workers' organizations and unions began to grow after the emancipation of the serfs in 1861 and the rapid growth of industry in the Donets Basin and some other parts of the country. Working conditions in the mines and factories of the Donbas Basin were especially difficult and gave rise to worker opposition, initially in the form of spontaneous work

stoppages and then in the form of organized strikes. The number of strikes increased quickly, from 52 in 1860–79 to 71 in 1885–94 and 212 in 1895–9. They were led by illegal strike committees, which later became the nuclei of the developing trade unions. From the 1880s some legally recognized workers' benevolent societies were formed to represent and aid workers.

The first formal workers' organization in Ukraine was the illegal South Russian Union of Workers, founded in Odessa in 1875 and headed by E. Zaslavsky. It consisted of nine groups of 15 to 20 workers each. Although the union was soon disbanded by the authorities, it had a great influence on the workers' movement throughout the empire. In 1901–5 the tsarist authorities attempted to organize proregime TU under the control of the police. The movement was initiated by the head of the Moscow secret police, S. Zubatov (hence, the movement was often referred to as *zubatovshchina*). It had only limited success in Russia and even less success in Ukraine, where a few small unions were established for a short time in Kiev and Odessa. Illegal TU sprang up in Ukraine toward the end of the 19th century. They grew quickly in number and size during the Revolution of 1905, and attracted particularly workers in small factories and shops, printers, bakers, tailors, and clerks. TU were officially recognized by the Temporary Regulations on Trade Unions in 1906, which were intended also to limit union activities and impede the proliferation of unions by permitting the authorities to refuse registration to any union they chose. Nonetheless, by 1907 there were 281 TU in Ukraine, or 40 percent of the total in the Russian Empire. They were small local unions that did not represent all the workers of either a region or a specific occupation. The political reaction and economic crisis that began in 1907 resulted in a rapid decline in TU: by 1909 the number of TU in Odessa had declined from 55 to 2, in Katerynovslav (Dnipropetrovske), from 30 to 6, and in Kharkiv, from 16 to 5. Illegal political parties (Ukrainian, Russian, and Jewish) attempted to find support among the TU and to politicize them. Most TU, however, refrained from political action and limited themselves to economic issues and the defense of individual workers. The Mensheviks advocated such a role for the TU and enjoyed the greatest influence on them.

The TU movement in Western Ukraine was concentrated in eastern Galicia. Workers' organizations and benevolent societies began to appear there in 1869. Initially they represented mostly Polish artisans in Lviv. Ukrainians were most active in the unions of tobacco and railway workers. A Ukrainian branch of the Austro-Hungarian union of railway workers was set up, and a separate Ukrainian workers' paper was published. That organization also attracted members in Bukovyna, where the *Ukrainian Teachers' Mutual Aid Society and *Union of Ukrainian Private Office Employees were active, as also in Galicia. In Galicia some local Ukrainian unions were under the influence of Ukrainian socialists, such as M. Pavlyk and O. Terletsky.

1917–45. The February Revolution of 1917 opened the way for the spontaneous growth of mass TU, in Russian-ruled Ukraine. By May 1917 in Kiev there were 30 TU, with almost 40,000 adherents; in Odessa, 40, with 35,000 members; in Kharkiv, 35, with 45,000 members; and in the Donbas, 45, representing almost half of all the workers in the region. At the same time several central TU associations

and co-ordinating councils were formed. The unions attracted workers of all nationalities. Ukrainians were particularly active in the railway union, which published a Ukrainian-language organ and maintained close ties with Ukrainian railway workers in Western Ukraine (see *All-Ukrainian railway workers' congresses). The *Peasant Association (est 1917) defended the interests of farmers and farm workers.

Many Ukrainian workers and TU supported the Ukrainian national cause and opposed the Bolsheviks. The First *All-Ukrainian Workers' Congress, which was dominated by the Ukrainian Social Democratic Workers' party, recognized the authority of the Central Rada. The mood of the First All-Ukrainian Congress of Trade Unions, which was held in Kiev in May 1918, and elected the All-Ukrainian Central Council of Trade Unions (Utsentprof), was also anti-Bolshevik. It passed resolutions condemning political interference in TU activities. The Second All-Ukrainian Workers' Congress, held in Kiev in July 1917, attracted mostly Russian and Jewish workers. Yet it too supported Ukrainian independence and the principles of the Central Rada and condemned the Hetman government. Russian-dominated Menshevik TU along with Ukrainian railway workers organized mass strikes to stop the export of foodstuffs to Germany and thus contributed to undermining the Peace Treaty of Brest-Litovsk. In that period Bolsheviks had little influence over TU in Ukraine. They gained control over the unions only after they had consolidated political power in the country.

TU had considerable influence in the Western Ukrainian National Republic (ZUNR). Their representatives (A. *Chernetsky, O. Pisetsky, and M. Parfanovych) sat on the Ukrainian National Rada and State Secretariat. As in the UNR, the railway workers in Galicia were particularly active and well organized; they even created their own battalion under the command of I. *Siiak.

In April 1919 a Bolshevik-sponsored all-Ukrainian congress of TU was held in Kharkiv. It rejected the Utsentprof and began to bring the TU movement in Ukraine under Moscow-based central TU organizations. In 1920 a Bureau for the South of Russia, consisting of A. Andreev, D. Shvartsman, and V. Storozhenko, was established by the Bolsheviks; it reinforced the subordinate status of Ukrainian TU. Although the body was soon renamed the Ukrainian Bureau of the All-Union Central Council of Trade Unions, it remained ineffective, because most local TU remained under Menshevik control. The Bolshevik policy of War Communism was designed to bring TU under complete state control and even to reorganize them into *labor armies with strict military discipline and centralized control by Communist functionaries. The workers opposed that tendency.

In the first few years of Soviet rule a major debate took place in government and Party circles on the role of TU in the Soviet system. The so-called Workers' Opposition, headed by A. Kollontai and A. Shliapnikov and supported widely by workers and TU functionaries, argued that TU and the workers should have control over much of the economy and production and should be free of Party intervention. The other faction, led by L. Trotsky and N. Bukharin, viewed the TU as a means of increasing productivity and enforcing worker discipline and demanded their complete subordination to the Party. A compromise position advocated by V. Lenin that TU should both de-

fend workers' interests and serve the goals of the state was adopted at the 10th Congress of the Russian Communist Party (Bolshevik) (RCP[B]) in March 1921. In Ukraine the Workers' Opposition was led by I. Perepichka and M. Lobanov; prominent figures such as Kh. Rakovsky and G. Piatakov were associated with the Trotskyist position. Initially the followers of Lenin were a minority in Kharkiv and the Donbas. In Odessa, Luhanske, and other cities there were workers' demonstrations against the Party. After the Party consolidated its power over TU in Ukraine, it conducted a major purge directed primarily at Mensheviks, Socialist Revolutionaries, and 'nationalists' in the TU. Total TU membership in Ukraine had dropped from 1,370,500 to just 794,300 by October 1922. The members of some of the higher TU bodies were dismissed and replaced by functionaries appointed from Moscow. In 1922 the 11th RCP(B) Congress passed a resolution stating that all leading posts in TU had to be held by Party members. Lenin himself argued that TU should be seen as 'transmission belts' from the Party to the masses and should be used to ensure workers' compliance with Party dictates. TU leaders increasingly saw themselves as representatives of the Party or state, not of the workers. The *All-Ukrainian Council of Trade Unions (VURPS) was established only in 1924 and was treated as a branch of the All-Union Central Council of Trade Unions (VTsSPS) in Moscow. Mass purges of TU activists were carried out in 1929-30 and 1937-8.

In the 1930s the rights and responsibilities of TU were reduced gradually. In 1929 the Party declared strikes to be unproductive and antiproletarian. Since then TU have not organized any major work stoppages. To settle disputes enterprise-level commissions composed of union and management representatives were established, but they sided with management rather than with the workers. In the mid-1930s, provisions for collective bargaining were abolished in the USSR. The regime's uncompromising commitment to rapid industrialization overrode the unions' traditional concern for safe working conditions. The TU were used increasingly to exploit and control the workers. *Production conferences and *socialist competition were used to mobilize workers. All leading positions in the unions were reserved for Party members. From 1932 to 1948 no TU congresses were held in Ukraine. In 1937 the VURPS and all republican TU bureaus were disbanded in an attempt to ensure the total subordination of Ukrainian TU to Moscow.

In the interwar period most independent Ukrainian TU in Polish-ruled Ukraine were disbanded by the regime or absorbed into Polish unions. Ukrainian participation in the international TU movement was restricted. Only the Union of Ukrainian Private Office Employees and some teachers' associations were allowed to operate. The *Union of Peasant Associations, which was controlled by the Ukrainian Radical party, represented the interests of the Ukrainian small farmer. The Ukrainian Social Democratic party published *Professional'nyi vistnyk* (1920-1) to stimulate the Ukrainian TU movement, and the Communist Party of Western Ukraine published **Profesiini visty* (1926-8). A repressive labor law adopted in 1929 put an end to trade-union activities in Poland. No independent Ukrainian unions were allowed to exist in either Transcarpathia or Bukovyna in the interwar period.

After 1945. The first TU congress in Ukraine after the

Second World War, and the first since 1932, was held in 1948. It set up the *Ukrainian Republican Council of Trade Unions (URRPS). The four congresses held up to 1956 were called conferences, a term that underscored their limited importance. Since 1958 there have been nine congresses. The structure of Soviet TU was determined by their statute, which was ratified at TU congresses held every five years. Their organization was based on three principles: the production principle, according to which all workers and managers in a given branch of the economy must belong to a single union; the principle of democratic centralism, which ensured the strict subjugation of lower bodies to higher ones; and the principle of subordination, which placed the unions under the direction of the Communist party. Soviet TU had to adhere to communist ideology and accept instructions from the Party. Any decision of the VTsSPS could be overruled by the CC CPSU. In the mid-1980s there were 20 TU in Ukraine organized by sectors: aviation, highways and automotive transport, construction and construction materials, coal industry, geological research, state trade and consumer co-operation, civil service, electrical services, transportation, municipal services and housing, cultural services, forestry and paper products, health care, metallurgy, oil and gas, education and academics, agriculture, textiles and light industry, food services, and chemicals and petrochemicals. There were trade-union councils in every oblast and in the city of Kiev. Although formally membership was voluntary, in fact almost all workers and collective and state farmers belonged to a union. Every union had its own elected leadership. At the lowest level the system consisted of enterprise committees, elected for one year. Above them rose the raion- or city-level committees, then the oblast committees, the republican committees, the central Union committees in Moscow, and finally the VTsSPS. According to that structure, TU in Ukraine were subordinated in theory both to their central committees in Moscow and to the URRPS, but in reality the latter had little authority.

According to their statutes the basic goals of TU were to inculcate communist ideology, to ensure fulfillment and overfulfillment of plans, to raise labor discipline, efficiency, and quality of work, to monitor work safety, to administer social security programs, to monitor compliance with labor laws, and to defend the interests of the workers before plant administrators. They also had a supervisory role in the fields of housing construction, trade, and consumer services. TU organized recreational, cultural, and educational activities for the workers and ran their own press organs, theaters, cinemas, clubs, libraries, sports facilities, tourist bases, rest homes, and sanatoriums. Unions also sponsored large sports associations that provided not only physical-education programs for union members but also training for top-ranking athletes and professional teams. There were 15 republican (the largest was *Avanhard) and 2 all-Union (Lokomotyv, associated with the railway union, and Vodnyk, associated with the river and sea transport union) sports associations in Ukraine.

Leading union functionaries were trained at two higher schools, located in Moscow and Leningrad. Since the Second World War there have also been two schools for training lower-level union workers in Lviv and Kharkiv. In recent years almost all the central organs as well as the particular unions have been headed by people with a higher specialized education.

Union membership in Ukraine has increased steadily. In 1950 it was 5.02 million, or about 92.1 percent of the total work force. In 1960 it was 10.31, or 95.5 percent; in 1972, 18.43, or almost 100 percent; and in 1987, over 26, 100 percent. TU activities were funded by membership dues (which came to 1 percent of a worker's wages), income from cultural-social and sporting events, and contributions from enterprises and factories.

The TU of Ukraine participated in international labor organizations, primarily Soviet-bloc ones, only through their all-Union offices. Their international activities included exchanges of labor delegations and cultural and sports groups.

Ukrainian unions outside Ukraine. Ukrainians in the United States and Canada did not form separate TU. Immediately after the Second World War Ukrainian sections were formed in some British TU to serve the needs of Ukrainian workers. The Union of Ukrainian Workers in Belgium was short-lived, but the *Union of Ukrainian Workers in France was active for 25 years.

Trajan's Walls. A series of defensive walls in southwestern Ukraine built by the Roman emperor Trajan in the late 1st to early 2nd century AD in order to prevent steppe nomads from descending on the recently conquered (and colonized) province of Dacia. Slavic tribes (particularly the Antes) used the walls in the 3rd to 4th centuries as a defense against incursions into their lands. For this purpose they filled in the ditches along the northern elevations of the walls and dug out ditches along their southern portions. Remains of the walls can be found today in Vinnytsia, Khmelnytskyi, and Ternopil oblasts. Similar walls of uncertain origin, known as *Zmiiovi Valy, were built in the Dnieper region.

Trakhtemyriv fortified settlement. A fortified settlement of the 6th century BC near Trakhtemyriv, Pereiaslav-Khmelnytskyi raion, Kiev oblast. Excavations in 1964–8 revealed 44 dwellings, including one that housed a sacrificial altar. Iron and bronze implements, articles of adornment, and local and imported pottery (the latter from northern Black Sea trading centers) were also found at the site. The inhabitants practiced agriculture, animal husbandry, and various crafts (including bronze casting).

Trakhtemyriv Monastery. An Orthodox monastery that was located near the town of Trakhtemyriv and the

village of Zarubyntsi (hence, it is also known as the Zarubyntsi Monastery) on the right bank of the Dnieper River near Kaniv (now Pereiaslav-Khmelnytskyi raion, Kiev oblast). Little is known of its early history. In 1578 the Polish king Stephen Báthory gave the monastery to the Registered Cossacks for use as a hospital; wounded and ill Cossacks were treated by the monks, and often retired to live in the area. It was also used as a staging area for Cossack military campaigns, and the town served almost as a capital for the Zaporozhian Host. Ruined by a Polish army following the rebellion led by P. Pavliuk in 1637, it was rebuilt under B. Khmelnytsky, who granted it land and villages on the condition that it continue to aid Cossacks. It was destroyed by a Turkish attack in 1678, and most of the people in the surrounding villages fled the area. The Trakhtemyriv hospital remained an important symbol of Cossack autonomy, and as late as 1710 (in the *Bendery Constitution) the Cossacks were demanding that it be returned to them.

Tranquillon, Kyrylo. See Stavrovetsky-Tranquillon, Kyrylo.

Transbuh region (Zabuzhzhia; also Zabuzka Rus'). A historical-geographic region on the left bank of the Buh River that includes the Kholm region and Podlachia.

Transcarpathia or Transcarpathian Ukraine (Zakarpattia). A historical-geographic region in southwestern Ukraine, incorporating the southern slopes of the Carpathian Mountains and a portion of the adjoining Tysa Lowland.

Territory. Transcarpathia is the only part of Ukraine located beyond the Carpathian Mountains that makes up part of the Pannonian Basin. Accessible to the main territory of Ukraine through numerous mountain passes, it joins Ukraine with that part of East-Central Europe. Moreover, along the southern rim of the Carpathians and the upper Tysa (the Maramureş Basin) a route connects Transcarpathia with Czechoslovakia to the west and with Transylvania and Moldova (within Rumania) to the east. As a small region located off major routes Transcarpathia constituted a marginal province of Hungary for many centuries. Moreover, it was subdivided into a number of counties (Hungarian names: Máramaros, Ugocsa, Bereg, Ung, Zemplén, Sáros, Szepes) that incorporated parts of Hungarian, Slovak, and Rumanian ethnographic territories.

Until 1919 Transcarpathia denoted that part of *Hungary where Ukrainians lived, and the synonymous terms Hungarian Ruthenia (Uhorska Rus') and Hungarian Ukraine (Uhorska Ukraina) were widely used. Bounded by the ethnographic boundary with Rumanians and Hungarians in the south and Slovaks in the west, the region encompassed 15,600 sq km.

After the First World War Transcarpathia was separated from Hungary, and the bulk of its territory was formed into an autonomous region within Czechoslovakia called Subcarpathian Ruthenia (Pidkarpatska Rus') or Carpatho-Ukraine. A small part of Transcarpathia, located south of the Tysa River within the drainage basin of the Vyshava River (Vişeu in Rumanian), became part of Rumania (see *Maramureş region); in Transcarpathia's western reaches, the Prešov region was allocated to Slovakia. A narrow

strip of Hungarian ethnographic territory was added to Carpatho-Ukraine with the intent of securing an east-west railroad link (Košice–Chop–Khust–Rakhiv) for direct communication with the rest of Czechoslovakia and a connection, via a branch line, to Rumania. Transcarpathia's status for the 1918–38 period with respect to area and population is summarized in table 1.

TABLE 1
Territories and population of Transcarpathia, 1930
(area in sq km; population in thousands)

Territory	Area	Population
Carpathian Ukraine within ethnographic limits	11,400	616
Prešov region	3,500	118
Transcarpathia in Rumania	700	26
Total ethnographic Transcarpathia	15,600	760
Carpathian Ukraine within its administrative borders	12,600	725

Within Czechoslovakia Transcarpathia played an important geopolitical role as the bridge linking Czechoslovakia with Rumania (the territorial axis of the Little Entente). At the same time it separated Hungary from its traditional ally, Poland. Later, Transcarpathia provided the USSR with a foothold in the Pannonian Plain.

Beginning in 1938 the borders of Carpatho-Ukraine underwent a number of changes. After the *Vienna Arbitration, Carpatho-Ukraine was transferred as a dependency to Hungary, with a compensation (1,050 sq km, 41,000 people) made in the west at the expense of Slovakia. Consequently, the administrative territory of Transcarpathia within Hungary in 1939–44, according to 1941 data, encompassed 12,060 sq km and contained 622,000 residents. Within the borders of Ukraine Transcarpathia occupies almost the same territory as it did within prewar Czechoslovakia, with a slight increase in the southwest around Chop. It constitutes a separate administrative unit, Transcarpathia oblast, with a territory of 12,800 sq km and a population of 1,252,000 (1989).

Physical geography. Transcarpathia encompasses two different natural regions, the *Tysa Lowland (now also

Hikers in the mountains of Transcarpathia

called the Transcarpathian Lowland) and the southern watershed of the Ukrainian Carpathians. The Carpathians in Transcarpathia have a banded structure common to the rest of the Eastern Carpathians, consisting of alternating parallel ridges and valleys. The parallel ridges are cut occasionally by the tributaries of the Tysa, which join the entire region into a unified whole. The western part of Transcarpathia (the Prešov region) in Czechoslovakia lies mainly in the *Low Beskyd and the West Beskyd.

The Carpathian Nature Preserve in Transcarpathia

The climate of Transcarpathia is temperate continental. Sheltered by the Carpathians from cold, northern winds, it is warmer than other parts of Ukraine at similar latitudes. In the Tysa Lowland and the foothills the climate is conducive to the cultivation of orchards, vineyards, and even some subtropical plants. Uzhhorod, at an elevation of 115 m, has a mean January temperature of -3.1°C and July temperature of 20.5°C . Its mean annual precipitation is 800 mm. At higher elevations in the mountains the climate gets colder and damper. In Yasinia, at an elevation of 645 m, the mean January temperature is -5.9°C and the mean July temperature 16.0°C , and the mean annual precipitation is 955 mm. Even more noticeable is the influence of elevation on vegetation zones, which progress from the forest-steppe in the lowland (105–200 m), where the forest groves consist of English oak (*Quercus robur*) with hornbeam and, less frequently, ash, through the broad-leaved forests in the foothills (200–600 m), where Durmast oak (*Quercus petraea*) with hornbeam and, occasionally, beech is common, to the mountain slopes, which range from beech forests (800–1,000 m) to mixed beech-spruce forests (1,000–1,300 m, with admixtures of ash, maple, and elm), coniferous forests (1,200–1,600 m, spruce, with occasional beech and maple), and stunted forest (up to 2,000 m, consisting of maple, beech, alder, spruce, juniper, and mountain pine). Alpine meadows prevail on exposed slopes and at higher elevations.

Prehistory and early history. The oldest remains of human activity in Transcarpathia indicate the presence of the Acheulean culture (300,000 years ago) of the Lower Paleolithic period. From that time people (including the Mousterian culture of the Lower Paleolithic) have inhabited Transcarpathia. During the Neolithic there was trade in-

volving the export of obsidian artifacts from Transcarpathia across the Carpathian Mountains to the Dniester Valley. In the Bronze Age (ca 1800 BC) Transcarpathia maintained continuity in its painted pottery style of the Stanove culture but gained metalworking skills (swords, knives, sickles, axes) as a result of the arrival of Thracian tribes from Transylvania. Subsequently Transcarpathia came under the control of the Celts, who arrived from the west and brought with them iron-smelting (ca 400–200 BC); the first local coins were minted in the 3rd century BC. Of the eastern nomadic peoples the earliest to influence Transcarpathia were the Iranian-speaking Scythians (expressed locally from the 6th century BC in the *Kushtanovytsi culture) and then the lazyges, a Sarmatian tribe confronting the Romans in Dacia (50 AD); their influence was followed by the invasions of the Turkic-speaking Huns (380 AD), the Avars (558 AD), and, finally, the Ugro-Finnic Magyars (896 AD). In the 2nd century AD neighboring Dacia (Transylvania) became a Roman province, and Roman merchants visited Transcarpathia. In the early Middle Ages Transcarpathia was traversed by Germanic tribes. Remnants of the Ostrogoths (the Gepidae) remained in neighboring Transylvania until the 10th century.

The Slavic colonization of Transcarpathia began in the 2nd century, with migration from the north across the mountain passes. By the 8th and 9th centuries the lowlands of Transcarpathia were fairly densely peopled by *White Croats (at the time inhabiting both the north and the south side of the Carpathians). The Slavs in the upper Tysa and in Transylvania were subject to the Avars (6th–8th centuries) and later to the Bulgarian kingdom (9th–10th centuries). With the collapse of Bulgaria in the second half of the 10th century, Transcarpathia came under the sphere of influence of Kievan Rus'. The Kievan chroniclers noted the participation of the White Croats in the campaigns on Byzantium. Following the incorporation of the White Croats by Prince Volodymyr the Great into his realm, the name Rus' or Ruthenia became entrenched in Transcarpathia.

11th to 15th centuries. King Stephen I joined Transcarpathia to Hungary while his son, Imre (Emeric), was titled Prince of the Ruthenians. From that time until the beginning of the 20th century Transcarpathia remained within the Hungarian state as its border province in the northeast. Through Transcarpathia passed a fortified defense line consisting of stockades and wooden forts manned by the local Slovak and Ruthenian population (the Ruthenian March). It was completely destroyed during the Tatar campaign against Hungary (1241), when the invaders made their way through the mountain passes. In the 13th and 14th centuries stone castles capable of withstanding a long siege were built in place of wooden stockades. Feudalism developed as well, and royal domains were transformed into gentry latifundia, which in part survived into the 20th century. Simultaneously Transcarpathia was subdivided according to a new *komitat, or territorial-administrative structure.

Ukrainians constituted a minority element among the feudal aristocracy in Transcarpathia. Initially the Mukachiv dominion was granted in succession to two Rus' sons-in-law of the Hungarian king Béla IV (1235–70), Prince Rostyslav Mykhailovych of Chernihiv and Prince Lev Danylovych of Galicia (Halych). In the period from 1315 to the 1320s a group of nobles from northern Hunga-

The small town of Yasinia on the Chorna Tysa River in Transcarpathia

ry, hostile to the Anjou dynasty, even attempted to invite to the Hungarian throne one of the Yuriiovych brothers, Andrii or Lev II. In 1393–1414 the lord of the Mukachiv dominion was Prince Fedir Koriiatovych, a Ukrainianized Lithuanian who was instrumental in the Ukrainian colonization of Transcarpathia. By the first half of the 15th century, however, the Mukachiv dominion was being ruled by the Serbian ‘despot’ princes, S. Lazarević and D. Branković. After that the Slavic and Orthodox element completely disappeared from the aristocracy of Transcarpathia. The indigenous Ukrainian population was reduced to serfdom, and only occasionally did one of its members achieve the status of petty gentry or clergy.

From the middle of the 13th century until the end of the 15th century, Transcarpathia was affected by two colonizing movements, the Wallachian movement from the east and the German-Slovak movement from the west. The Wallachians in Transcarpathia were not exclusively Rumanians but consisted of Rumanian and Ukrainian pastoralists who had transplanted themselves first to Transylvania and then to the valleys of both sides of the Carpathians. German colonization came on the heels of the Tatars and built up the area with a number of towns with German (Magdeburg) law – Prešov, Bardejov, Berehove, Sevlush, Khust, and others.

Deprived of a political structure and social elite the Transcarpathian Ukrainians preserved their ethnic identity principally through their religious distinction. Eastern rite Christianity began to spread in Transcarpathia probably in the 9th and 10th centuries, when the region was part of Bulgaria. Factual accounts about church life did not appear until later. By the 14th century several monasteries had been established in Transcarpathia, among them two of outstanding importance, the St Nicholas Monastery near Mukachiv and St Michael’s Monastery at Hrushiv, in the Maramureş (Marmarosh) area. The latter obtained the right of stauropegion in 1391. Mukachiv was the seat of an Orthodox eparchy (first mentioned in 1491), the religion of which was merely tolerated in Hungary, and the clergy and monasteries of which were dependent on the goodwill of the local gentry.

16th and 17th centuries. In the early 16th century the Transcarpathian population participated in the uprising

led by G. Dózsa (1514) of Transylvania, which was brutally repressed. It also suffered as a result of its opposition to Austrian hegemony. The enserfment of the peasantry was ultimately formalized through I. Verböczy’s codex, which remained the basis of Hungarian law until 1848.

After the defeat of Hungary by Turkey at the Battle of Mohács (1526) and its partition among the Ottoman Empire, Austria, and Transylvania, the history of Transcarpathia was marked by a constant threat from the Turks and by an ongoing rivalry between Austria and Transylvania. The lowland parts of Transcarpathia frequently suffered from Turkish raids, and the population of western Transcarpathia, under the jurisdiction of the Habsburgs (Prešov, Uzhhorod regions), was commonly called upon for organized defense. Eastern Transcarpathia, under Transylvanian control, became a battlefield in the 17th century between the native Hungarian aristocracy (headed by Transylvania) and pro-Austrian forces (with Hungarian adherents). Transcarpathian Ukrainians took a particularly active part in the insurrection of Ferenc II Rákóczi, which in its incipient stages resembled a social revolution. They formed a personal guard for the prince and thus earned from him the title ‘most trusted people’ (*gens fidelissima*). As a result of the constant wars in Transcarpathia the region was economically devastated, and the German cities declined. Serfdom, too, weakened its hold, and in the mountains it was never introduced. As a consequence there was an influx of new settlers from the Galician side, where the effects of serfdom were more strongly felt.

From the mid-17th century a struggle began in Transcarpathia between the Orthodox and the Uniates. It had not only a religious but also a political basis stemming from a dynastic struggle between Catholic and Protestant factions in Hungary. The Orthodox church of Transcarpathia was in a state of decline. The clergy lacked proper education and like their congregations were enserfed; the bishops of Mukachiv were dependent on the Hungarian Calvinist lords, who tried to bring about Reformationist changes in the Orthodox parishes. At the same time the Counter-Reformation movement that began in Hungary supported Uniate conversions among the Orthodox. The first (unsuccessful) attempt to establish the Uniate church was made in 1612 by the bishop of Peremyshl, A. Krupetsky, in western Transcarpathia, the domain of the Catholic, royalist Drugeth family. The Uniate effort then gained support from V. Tarasovych, the renegade Orthodox bishop of Mukachiv (who became a Uniate and fled to Uzhhorod), and P. Partenii. The outcome of their efforts was the *Uzhhorod Union of 1646. Much effort into strengthening the Uniate Church was expended by the Greek-born bishop J. de Camillis. Under the protection of the Rákóczis, however, the Orthodox continued their activity. Until the end of the 18th century the bastion of Orthodoxy in Transcarpathia remained the Maramureş area, which belonged to Transylvania until 1720. After the death (ca 1728) of the last Orthodox bishop, Dosytei, the Uniate Church prevailed throughout Transcarpathia.

Despite its political separation the spiritual contacts of Transcarpathia with other Ukrainian lands were close. Liturgical and theological books published in Kiev and Lviv were used widely in Transcarpathia and in the 17th and 18th centuries a local religious literature developed there, resembling in character Ukrainian baroque literature,

St Parasceve's Church (1643) in Oleksandrivka, Khust raion, Transcarpathia oblast

with minor Hungarian and Slovak influences. The common forms included bibles for teaching purposes, legends and apocrypha, collections of sermons, polemical writings and apologia (including those of the most interesting religious polemicist of the end of the 17th century, M. *Andrella), chronicles (such as the Huklyvyi Chronicle), tales of the Middle Ages, and poetry. Transcarpathian literature of the 17th and 18th centuries used the vernacular. Most writings were disseminated in manuscript form; the first printed books for Transcarpathia within the Austrian Empire were produced in Trnava, Slovakia. Like education, which was provided by monastery-run schools, popular literature was permeated with a religious character.

18th to mid-19th century. The rule of Maria Theresa and Joseph II, representatives of enlightened absolutism in Austria and Hungary, was marked by concessions to the peasantry and a number of other reforms. After abolishing personal servitude in Hungary in 1785, Joseph II wanted to go even further. But his death made possible the return of old gentry privileges, and serfdom continued until 1848. The Hungarian gentry strongly opposed the liberal measures of Vienna. The revived serfdom at the end of the 18th century brought about a rebellious movement of *opryshoks in Transcarpathia, which was comparable to the haidamaka uprisings in Right-Bank Ukraine.

The Uzhhorod Union did not bring about improvement in church relations. The bishops of Mukachiv were reduced to the role of vicars for the Roman Catholic archbishops of Hungary. The situation improved after Maria Theresa intervened on behalf of the Greek Catholic church, and in 1771 the Mukachiv eparchy was freed from its subordination to the Hungarian Roman Catholic archbishops. The second half of the 18th century was marked by the achievements of the bishops M. Olshavsky, I. Bra-

A boulevard in Uzhhorod, Transcarpathia

dach, and, especially, A. Bachynsky in both ecclesiastical and cultural areas as well as in the improved well-being and education of the priests. The seat of the eparchy was moved to Uzhhorod (1780), a seminary was established there, and a new Prešov eparchy was formed (1816).

During the late 18th and early 19th centuries a number of Transcarpathian intellectuals who had graduated from foreign universities but could not employ their skills in their homeland went to work in Galicia or the Russian Empire. P. Lodii and I. Zemanchyk, for example, were professors at the Lviv Studium Ruthenum; M. Baluhiansky (Baludiansky), I. Orlai, Yu. (Hutsa) Venelin, K. Pavlovych, M. Bilevych, and others gained high civil service or academic positions in Ukraine and Russia. The nature of Transcarpathian literature also changed, in that it began to reflect its authors' greater degree of schooling. Writing now diverged from the folk language, in making use of the fashionable Latin and Old Church Slavonic. Among the literati of the period were the author of a Ukrainian grammar, A. *Kotsak; the first historian, Y. *Bazylovych; the linguist I. Fogarashii; the poet and philosopher V. Dovhovych; and, above all, the linguist, historian, and church activist M. *Luchkai (1789–1843).

1848–1918. The *Revolution of 1848–9 in the Habsburg monarchy partially touched Transcarpathia. The chauvinist nature of the Hungarian movement, however, repelled the Slavic peoples and caused them to side with Vienna. Among the Ukrainians who opposed the Hungarian revolution were two of the most outstanding persons of Transcarpathia in the 19th century, the writer and educator Rev O. *Dukhnovych (1803–65) and the energetic politician and publicist A. *Dobriansky (1817–1901). Under the influence of Dobriansky the *Slavic Congress of 1848 in Prague proposed the creation of an autonomous Slovak-Ukrainian province within Hungary. In April 1849 Dobriansky proposed to the Supreme Ruthenian Council in Lviv a program of unifying Galicia with Transcarpathia in a separate autonomous crownland within the Austrian Empire. Then he headed a delegation from the Transcarpathian Ukrainians to the Emperor Francis Joseph I requesting the creation of a Ruthenian province with national-territorial and cultural autonomy within the borders of Hungary. The project was never realized, and the only specific action toward it was the appointment of Dukhnovych and other Transcarpathian activists to administrative posts in their region.

With the strengthening of absolutism in Austria and the growth of Hungarian nationalism, the Transcarpathian

intelligentsia began to gravitate toward external forces: some succumbed to Magyarization, and the rest began to share Russophile sympathies. The orientation to Moscow was fanatically propagated by Rev I. Rakovsky, editor of the government-published *Tserkovnaia gazeta* (1856–8). The development of the pro-Moscow orientation was assisted by the traditional views among the clergy of Transcarpathia about the need for an all-Slavic written language: the role of Old Church Slavonic was now being supplanted by Russian or a macaronic **yazychiie*. Moreover, the Russian troops, invited by Austria to put down the Hungarian revolution in 1849, also left a deep impression. As exemplified by Dobriansky, Russophilism in Transcarpathia did not negate loyalty to the Habsburgs, but in time it turned even more toward Russia. The Russophile tendency in Transcarpathia, unlike that in Galicia, was not counterbalanced by a populist Ukrainophile movement and thus became prevalent. At the same time the Russophile orientation led to a cleavage between the intelligentsia and the peasantry and failed to provide the latter group with an effective countermeasure to Hungarian influences.

The political compromise between Austria and Hungary in 1867 that formed the Austro-Hungarian dual monarchy left the national minorities at the mercy of a now-dominant Hungarian oligarchy. The Hungarian government gained the right to name the Transcarpathian bishops. Ukrainian parish schools ceased to exist; newspapers (*Svit*, 1867–71; *Novyi svit*, 1871–2; *Karpat*", 1873–86; and *Listok*, 1885–1903) led a precarious existence; and the activity of the educational **Society of St Basil the Great* declined. Transcarpathia became more and more isolated from Galicia. Transcarpathian authors of the second half of the 19th century (O. Pavlovykh, A. Kralytsky, I. Silvai, Ye. Fentsyk, O. Mytrak, Yu. Stavrovsky-Popradov, and others) continued to write in the *yazychiie*. Moreover, their works were commonly far removed from the vital social, economic, and cultural interests of the local population.

The later 19th century was marked also by the growth of new social and economic problems. As a result of population growth and subdivision of properties with slow urbanization and industrialization, land hunger soon be-

came evident. Alcoholism, usury, and poor harvests in the 1890s exacerbated the situation. The chronic difficulties provided an impulse for emigration to the United States, and beginning in the 1880s such emigration became massive. Movement was most intense from western Transcarpathia, where there was a long tradition of seasonal labor migration. In the western provinces of Sáros, Zemplén, and Ung emigration canceled the entire natural increase of the population, and in 1905–7 it was twice the size of the natural increase.

The period 1900–14 was marked by three important processes: increased Hungarian pressure for assimilation, a new wave of Russophile propaganda, and the emergence of a populist Ukrainophile movement. The Apponyi Laws of 1902 and 1907 introduced the Hungarian language into the remaining Greek Catholic church schools, thereby Magyarizing all the schools. With regard to church matters, a number of parishes from the Mukachiv and Prešov eparchies were combined in 1912 to form the new **Hajdúdorog* eparchy, where Hungarian was introduced as the language of liturgy. The bishop of Prešov, I. Novak, introduced the Gregorian calendar (to correspond with that used by the Roman Catholic Church) and the Ministry of Education in 1916 adopted the use of the Hungarian alphabet for Ukrainian publications. From 1900 the fate of Transcarpathia began to interest the Russian Pan-Slavists in St Petersburg and the Russophiles in Galicia. With the support of Count V. Bobrinsky in St Petersburg, a campaign was started to demand the return of Orthodoxy in Transcarpathia. It found fertile ground among victims of the Hungarian denationalization policies, but it was quickly stifled by the Hungarian authorities at a show trial in Sighetul Maramației (December 1913 to March 1914).

The worsening conditions of Transcarpathia, on the one hand, and the example of Galician Ukrainian populism, on the other, prompted a call to action by a group of young secular and clerical intelligentsia. The first representative of modern Ukrainianism, M. Drahomanov, was much concerned about the fate of Transcarpathia and visited it twice in 1875–6. Beginning in the 1890s a number of Galician-Ukrainian scholars became interested in Trans-

Transcarpathian shepherds

Girls in traditional Transcarpathian dress

TRANSCARPATHIA IN 1919-45

carpathian topics, among them I. Franko (historical literature), V. Hnatiuk (ethnography), I. Verkhtsky (dialectology), and S. Tomashivsky (history and statistics). Under their influence local scholars, such as Yu. Zhatkovych (history) and H. Strypsky (literature), began to collaborate in the publications of the Shevchenko Scientific Society. In the area of language and literature the populist movement was started by L. *Csopey, who wrote Ukrainian-Hungarian primers and a dictionary based on the vernacular of Transcarpathia. A notable educator of the first half of the 20th century was Rev A. *Voloshyn. His grammar of the Ukrainian language (in Hungarian, 1907) became the standard. He published the newspaper *Nauka* and compiled a number of popular handbooks, calendars, and educational books. Although not massive, the populist movement became deeply rooted before the First World War. With the fall of the Habsburg monarch in 1918, it assumed an overtly political role.

Since 1918. The independentist efforts of Galician Ukrainians influenced Transcarpathians to embark on a similar path. Town and village councils were convened, and on 8 November 1918 a *Ruthenian People's Council was held in Stará L'ubovňa. It was the first of several gath-

erings (notably in Svaliava on 8 December 1918 and Sighetul Maramației on 18 December 1918) that attempted to come to grips with the region's political future. A grand congress of 'all Ukrainians living in Hungary' involving 400 delegates was convened in Khust on 21 January 1919. Chaired by the brothers M. and Yu. Brashchaiko, the gathering expressed its will to join the Ukrainian National Republic. A different council met in Uzhhorod on 8 May 1919, established the *Central Ruthenian People's Council, and chose to seek regional autonomy within the newly created state of Czechoslovakia. That council was influenced and supported by the activity of Transcarpathian émigrés in the United States, whose representatives were negotiating with Czechoslovak politicians to include Transcarpathia in the future republic on a federative basis. A plebiscite carried out among the Transcarpathian communities in the United States yielded a two-thirds majority vote in favour of the union. As a result of those acts of the popular expression of political will and of diplomatic measures of the Czechoslovak politicians, the Paris Peace Conference sanctioned (through the Treaty of *Saint-Germain) the transfer of Transcarpathia and guaranteed its autonomous status within Czechoslovakia.

Czech rule in Transcarpathia was distinguished by a number of reforms, most of which had positive results. Nevertheless a number of measures were taken which contradicted the desires of the Transcarpathian Ukrainians for self-administration. The administrative-political organization of the region was defined by the statutes of the Prague government (1919, 1920), which contravened the Treaty of St-Germain and the Czechoslovak constitution concerning autonomy. Transcarpathia was established as a separate administrative region, Subcarpathian Ruthenia. But the western boundary was so defined that approx 100,000 Ukrainians, living mostly in the Prešov region, were placed within Slovakia. The boundary issue and questions about the degree of Subcarpathian Ruthenia's autonomy led the appointed governor of the province, H. *Zhatkovych, to resign in protest after 1921. The second governor, A. *Beskyd (1923-33), had only nominal powers; the actual executive power was wielded by a Czech vice-governor (A. Rozsypal), who presided over an administration composed mostly of Czechs. Administrative reorganization in 1925 and 1927 involved greater centralization: Subcarpathian Ruthenia as a whole was given equal status with four other provinces of Czechoslovakia, the subdivision of the region into *zhupas* (komitats) was abandoned, and the self-administration of the rural communities (hromadas) was limited. Only in 1937, with the creation of the governor's council during the governorship of K. Hrabar (1935-8), was a first step toward actual autonomy taken. The council was substantially broadened in the autumn of 1938 during the reorganization of the Czechoslovak Republic.

The political life of the region centered initially around the activity of two people's councils, one pro-Ukrainian and the other Russophile. In time 10 political parties emerged in Transcarpathia, mostly branches of Czech parties. Although the emergence of the parties promoted broader political participation, it also diffused the local efforts for regional development. The elections of 1924 and 1925 gave a majority in Transcarpathia to the Communists; only in 1928 and 1935 were majorities of noncommunist members of parliament and senators elected. Even then Ukrainians constituted a minority of the elected politicians. The greater social and political freedom afforded Transcarpathia under Czechoslovak than under Hungarian rule provided an impetus for increased civic life. At the same time, however, it brought forward problems related to the national self-identification of the people in the region. Three orientations were articulated in the interwar era, Ukrainophile, Russophile, and Rusynophile. The Ukrainophiles continued to take their cues from their counterpart movement in Galicia. Centered around institutions such as the *Prosvita (which had grown to include 14 branches with 232 reading rooms by 1936), the Teachers' Hromada, the national theater and choir in Uzhhorod, the Plast Ukrainian Youth Association, and the newspaper *Nauka* and then *Svoboda*, the movement included figures such as A. Voloshyn, A. *Shtefan, M. and Yu. *Brashchaiko, Yu. and F. *Revai, S. Klochurak, and Rev V. Hadzhega.

The pro-Russian activists belonged to the Dukhnovych Society and the Orthodox church, organized by Russian émigrés and supported by the Czech government to counterbalance the Greek Catholic church (which included a significant number of Magyarone clergymen). In 1936-7

the pro-Russian activists tried to gain control of schooling by organizing so-called school plebiscites concerning the language of instruction. The Rusynophile orientation, adhered to by some individuals, developed a specific institutional form only with the creation of the *Subcarpathian Scientific Society in 1941. Viewing themselves as *Ruthenians, a people distinct from Ukrainians, the Rusynophiles promoted a local patriotism that invoked the spirit of Dobriansky and Dukhnovych. The Rusynophiles remained the least developed of the three orientations throughout the interwar period. Yet a strong current of Rusynophilism developed among the region's Greek Catholic clergy during the 1930s as it purged itself of the Magyarism that had entrenched itself deeply during the many decades of Hungarian rule. The Russophiles remained quite active in the 1920s but faltered in the 1930s. The Ukrainophile orientation enjoyed official support in the 1920s and had developed a dynamic institutional network by the mid-1930s.

During two decades of Czech government in Transcarpathia, considerable progress was made in improving the infrastructure and social organization of the region (such as in the building of new roads, the modernizing of the cities, the construction of community buildings, hospitals, and clinics, and the founding of assistance schemes for poor highlanders). But the chronic unemployment of the Transcarpathian poor increased as a number of local industrial enterprises closed, unable to compete with Czech industry. Migration for seasonal labor, emigration, and government financing of public works only partly alleviated the difficult conditions of the mountain folk. The depression in the early 1930s caused hunger in Transcarpathia, and massive unemployment gave rise to worker unrest. Communists proclaiming pro-Soviet slogans in favour of the USSR and the Ukrainian SSR attained considerable support in the region.

Anti-Czech sentiments began to grow in the 1930s as a response to the increasingly centralist policies of Prague and the presence of a large number of Czechs in Transcarpathia (30,000 in 1930), 70-80 percent of whom were part of the administrative apparatus. The sentiments added impetus to the calls for an autonomous government in Transcarpathia. *Carpatho-Ukraine was established on 11 October 1938 in the wake of the restructuring of Czechoslovakia brought on by the *Munich Agreement. A. *Brodi served as the first premier. After being discredited as an agent of Hungary and arrested for treason he was replaced (26 October 1938) by Voloshyn.

The new political-legal status of Transcarpathia was defined by a constitutional law dated 22 November 1938, which stipulated a separate autonomous government with its own legislature consisting of an elected Carpatho-Ukrainian Diet. After the Vienna Arbitration, which allocated to Hungary the southern part of Transcarpathia, along with the cities of Uzhhorod, Mukachiv, and Berehove, the capital was transferred to Khust. On 12 February 1939, elections to the first parliament of Carpatho-Ukraine took place. The *Ukrainian National Alliance party won a resounding victory.

International events interfered with the normal development of Carpatho-Ukraine. Hungary and Poland agitated for a common border at the expense of Transcarpathia and sent groups of agents to raise turmoil and disorder. Tension between the Czechs and the Ukrainians

also increased with the appointment of a Czech minister to Khust, General L. Prchala. Simultaneously with the Nazi German occupation of Bohemia and Moravia on 14 March 1939, Hitler entrusted Hungary with the occupation of Transcarpathia. On 15 March 1939, before the Hungarians had overrun Transcarpathia, the Carpatho-Ukrainian Diet in a symbolic gesture declared independence, approved a constitution, and elected Voloshyn president. Subsequently the government of Carpatho-Ukraine and many activists fled abroad to escape Hungarian repressions.

The Hungarian occupation of Transcarpathia was connected with terror and repressions directed against Ukrainian activists. Instead of the autonomy initially promised, the Hungarians allowed for a narrow-based self-rule while conducting a policy of Magyarization in cultural life and administration. Budapest promoted the development of a Ruthenian language and culture and tolerated the activities of the Russophiles but prosecuted Ukrainophile activism. The Subcarpathian Scientific Society and Rusynophile publications were supported by the government. Political organizations were forbidden. The reaction to the pressure was a massive escape on the part of Transcarpathian youths across the mountains to the Ukrainian SSR in 1940–1 and growing activity on the part of the Ukrainian nationalist underground. The Hungarians failed to gain support from the local population during their administration in 1939–44.

The arrival of the Soviet armed forces in Transcarpathia in the autumn of 1944 was regarded by most of the population as liberation. Transcarpathia was quickly brought under Soviet control. On 26 November 1944 the Communist party organized a congress of people's committees of Transcarpathian Ukraine in Mukachiv which expressed its desire for the unification of Transcarpathia with the Ukrainian SSR. The Communist-dominated *People's Council of Transcarpathian Ukraine led the local effort toward that goal. An agreement between Czechoslovakia and the USSR sanctioning the transfer of Transcarpathia from Czechoslovakia to the Ukrainian SSR was concluded on 29 June 1945. By January 1946 the Transcarpathian oblast organs of Ukraine had been established. *Transcarpathia oblast, corresponding in territory to the Subcarpathian Ruthenia of 1919–38, underwent a social, economic, and cultural development in the post-Second World War period similar to that of the rest of the Ukrainian lands within the Ukrainian SSR. The *Prešov region remained in Slovakia.

In its first years of power the new regime nationalized all enterprises, and in 1949–50 it collectivized agriculture. The Soviet education system was introduced, and in 1946 Uzhhorod University was established. The Greek Catholic church was persecuted, and Bishop T. Romzha was assassinated (1947); in 1949 the church was formally liquidated.

The new administration also pursued a definite cultural policy of Sovietization and Ukrainization, which ultimately integrated the Transcarpathian region into the mainstream of Ukrainian civic life. That integration was reflected in the December 1991 referendum on Ukrainian independence, in which the residents of the oblast, notwithstanding their unique history, voted 92.5 percent in favor of independence (with a voter turnout of 82.9 percent). Rusynophile sentiment, already eroding by the 1930s, continued to decline in the postwar period. A

Rusynophile consciousness, however, developed to a greater extent among Transcarpathian émigrés (or their descendants) in the United States, who established an institutional base around a separate eparchy of the Greek Catholic church and a variety of civic organizations and became endowed with a scheme of history through the writings of the historian P. *Magocsi.

Population. The population of Transcarpathia is distributed according to the topography and is therefore uneven. The mean population density of Transcarpathia is 98 persons/sq km (1989). The most densely and completely settled areas are the Tysa Lowland along with the foothills of the Volcanic Carpathians (120–145 persons/sq km) and the Maramureş Basin (75–95 persons/sq km). In the mountains (with densities of 35–45 persons/sq km) the population is concentrated in the two bands of lower elevations and, to some extent, in the perpendicular valleys. The high mountainous areas are almost devoid of permanent settlement, although in the summer their alpine meadows support a considerable number of shepherds tending their flocks.

Urbanization in Transcarpathia is relatively low. In 1989 some 41 percent of the population was urban (tied with Ternopil oblast for the lowest in Ukraine). That percentage represents an increase, from 23 percent in 1956 and 20 percent in 1930. Transcarpathia (1987) has 2 major cities, Uzhhorod (1989 pop 117,000) and Mukachiv (85,000), as well as 8 larger towns (Berehove, Khust, Vynohradiv, Rakhiv, Svaliava, Tiachiv, Irshava, and Chop) and 28 town smts. For a long time the region's cities had an exclusively commercial-administrative profile; more recently they have also acquired an industrial aspect. They emerged on the crossroads of routes parallel and perpendicular to the mountains, the largest ones being located on the border between the mountains and the Tysa Lowland.

The population of Transcarpathia has grown rapidly since the last quarter of the 19th century, despite a relatively large transoceanic emigration, because of a high natural increase and relatively small population losses during both world wars. In the Prešov region the natural increase was the same as in Transcarpathia, but the actual population growth was lower because of sizable emigration.

About 100,000 Ukrainians from Transcarpathia (together with the Slovak-speaking Greek Catholics from the Prešov region) emigrated, almost exclusively to the United States, before 1914. In the 1920–38 period the number of emigrants fell to approx 40,000. That emigration rate (per thousand residents) was higher than in any other region of Ukraine. Accordingly, in 1988 in the United States there were an estimated 450,000 persons of Transcarpathian origin, who make up about 30 percent of all Transcarpathian Ukrainians (or 45 percent of all western Transcarpathian Ukrainians).

The ethnic composition of Transcarpathia's population in 1930, within the Ukrainian ethnographic limits and, separately, within the administrative limits of Subcarpathian Ruthenia and Transcarpathia oblast, is summarized in table 2. The largest minority was and continues to be the Hungarian, which constituted a majority in a narrow southern strip of the administrative unit and was also concentrated in the larger cities. Within Ukrainian ethnographic territory the Jews were the largest minority, not

Total	725 (100.0)		920 (100.0)	1,057 (100.0)	1,156 (100.0)	

only in the cities (26 percent in 1930) but also in the villages (11 percent). The Germans had seven small colonies in the mountains, and the Rumanians were concentrated in four large villages to the north of Sighetul Maramaţiei. Itinerant Gypsies were not uncommon. After the Second World War the proportion of minorities declined, especially the Jews, Germans, and Czechs (the last group being replaced by Russians). Consequently the share of the Ukrainian population increased to more than 75 percent.

Economy. The development of the Transcarpathian economy reflected the region's natural resources and the policies of the countries to which it belonged. The mountainous part of Transcarpathia, occupying 80 percent of the region, was dominated by forestry and animal husbandry, whereas the lowlands and foothills were the domain of field crops, orchards, and vineyards. Extractable minerals included salt, lignite, building materials, and some metal ores, and there were numerous sources of mineral water.

Those natural resources were little developed during the long Hungarian rule. Agricultural development was impeded by the minute size of peasants' plots, and industrial development was inhibited by competition from the Hungarian heartland. Capital was in non-Ukrainian hands (mainly Jews and Hungarians), and the Ukrainian peasantry could not improve its own well-being because of lack of schools and administrative controls. Of the various branches of the economy the most developed was forestry. Hungary, generally devoid of trees, had a need for lumber and firewood. The Ukrainian peasantry supplemented its household budgets with earnings from for-

estry and seasonal (harvest) work on distant Hungarian estates.

The incorporation of Transcarpathia into Czechoslovakia raised the economic level of the region. An agrarian reform was implemented, the yields improved significantly (on average by 50 percent), a road network was constructed, a school system was developed (including trade schools), co-operatives began to flourish, and a middle class began to emerge. The Czech government, however, did not favor the industrialization of Transcarpathia, but preferred that it serve as a market for Czech industry. The economy was also hindered by the distance to the Czech heartland and the border that separated Transcarpathia from the Pannonian Plain, which complicated the marketing of lumber and wood products. Land shortage among the peasantry continued (45 percent of the households did not have even 2 ha of land, 30 percent had 2–5 ha) while earnings from forestry declined, seasonal harvest work in Hungary was curtailed, and emigration to North America slowed down during the depression. All that contributed to the increased pauperization of the Ukrainian peasantry, particularly in the mountains.

Under Soviet rule Transcarpathia became an integral part of the economy of the Ukrainian SSR and the USSR as a whole. Existing industries were developed (forestry, food processing, salt mining), and new ones were started (lignite mining, light industry, and, most recently, machine building and metallurgy). Agriculture was collectivized, and more intensive branches (grapevine cultivation, orcharding, tobacco growing, and livestock raising) were developed.

Agriculture, until recently the main economic sector, employed (1987) approx one-third of the labor force. Agricultural lands, however, occupy only 35.8 percent of the total land area, with 17.9 percent in hayfields and pastures, 15.1 percent in cultivated land, and 2.8 percent in vineyards, orchards, and other planting; another 3.8 percent is in household gardens. About 52 percent of the land is forested. The total sown area in 1987 was 197,000 ha (down from 211,000 in 1956); grains accounted for 64,000 ha (98,700 ha in 1956), or 32.5 percent of all the crops sown. The leading grain in 1974 was winter wheat (41,000 ha, or 57 percent of all grains); it was followed by corn for grain (13,000 ha, or 18 percent). Oats, barley, buckwheat, and other grains were of less importance. Fodder crops in 1987 occupied 96,000 ha (49 percent of the sown area), potatoes and vegetables, 30,500 ha (16 percent), and technical crops, mainly tobacco and sunflower, less than 6,000 ha (3 percent). The lowlands and foothills remain the domain of wheat and corn; in the mountains the prevalent crops are oats, rye, and potatoes. The total sown area has declined from what it was in the pre-Second World War period by about 16 percent, and the grain area by 58 percent; the feed crop area has increased fourfold. Vineyards, which are of considerable significance, produce for export (mainly in Berehove, Uzhhorod, Mukachiv, Serednie, and Vynohradiv) both table grapes and white wine. The vineyard area increased from 2,900 ha in 1936 to 6,700 ha in 1956 and reached 12,300 ha in the 1970–5 period. The area of orchards and berry plantings increased from 4,000 ha in 1936 to 18,500 ha in 1956 and 56,100 ha in 1966, and declined to 41,200 ha in 1975. Among industrial crops the most important is tobacco (3,000 ha in 1956). All productive livestock except horses increased in number from the pre-Second World War period (1937): horses declined from 41,300 to 32,000 in 1956, but cattle increased from 219,500 to 244,000 in 1956 and 354,000 in 1987; hogs, from 82,000 to 196,000 in 1956 and 302,000 in 1987, with fluctuations down to 188,700 in 1976; and sheep and goats, from 132,000 to 309,000 in 1956 and 1966, with a slow downward adjustment to 304,400 in 1987. Livestock husbandry was intensified with the introduction of more productive breeds. In the lowlands and foothills animal husbandry is closely related to crop production; in the mountains the livestock feed base consists of mountain meadows and natural hayfields.

Transcarpathia's greatest source of wealth is the forest, which occupies about 628,000 ha, or 49 percent of the land area. The main tree species are beech (58 percent of the forest area), fir (29 percent), oak (7 percent), and spruce (4 percent). In 1956, the *lumber industry and woodworking, the basic industries of Transcarpathia, provided 53 percent of the industrial output in the region and employed 29,000 persons, or 57 percent of the industrial labor force. At that time the lumber industry produced 2.6 million cu m of wood and 0.7 million cu m of sawn timber. Since then the industry has been modernized, and its capacity increased, but its share of the total industrial output had declined to 20 percent by 1985. Almost all the timber is processed locally in numerous woodworking establishments, scattered throughout Transcarpathia. The largest ones are located in Svaliava (logging, milling, furniture, and wood chemicals), Teresva (logging and milling), Rakhiv (logging and cellulose-paper and cardboard manufacturing), Velykyi Bychkiv (logging and wood chemicals), Muka-

chiv (logging, milling, and furniture), Uzhhorod (logging, milling, furniture, and other wood-based industries), Perechyn (logging and wood chemicals), Velykyi Bereznyi (logging, milling, and furniture), Khust (logging and furniture), and Berehove (milling and furniture). Beech is the principal raw material for furniture.

The hydroelectric power potential of the mountain region is only partially developed. Two small hydroelectric power stations on the Uzh River were in operation before the Second World War. During the Soviet period the Tereblia-Rika system, brought into production in 1956, together with a large thermoelectric power station between Uzhhorod and Mukachiv, became the major regional source of electricity. The mining of lignite was begun after the Second World War; it had reached considerable production (460,000 t) by 1955 but it subsequently declined to about 150,000 t per year (1985). Two gas deposits of commercial volume have been tested, and there is potential for more. The *Solotvyna rock-salt deposits have been mined for a long time. During the Czech regime the mine was modernized, and production was raised to 170,000 t per year (it was the main source of salt within Czechoslovakia). Subsequently the output was raised even more (to 332,000 t by 1956 and 837,800 t by 1980). There is a broad diversity of metal ores (iron, manganese, lead, zinc, mercury, gold, silver, alunite, and bauxite) and barites (for white pigments), but the deposits are usually small. Of considerable importance is the building-materials industry, including the mining of andesite, tufa, and marble, the extraction of chalk and clay for cement, and the making of brick and tiles in larger cities.

The food-processing industry, second in the share of value of production (28 percent of all industry in 1956, 22 percent in 1985), is concentrated mostly in the larger cities. Meat packing is located in Uzhhorod and Mukachiv; dairy, flour milling, confectionery, and macaroni-making, in Mukachiv; wine-making, in Vynohradiv; fruit preserving, in Solotvyna; and tobacco-packing, in Mukachiv. Light industry, developed mostly after the Second World War, continued to increase its share of the industrial output, from 12 percent in 1956 to 18 percent in 1970, where it remained until 1985. The cottage industry of folk arts, notably embroidery and wood carving, is important even today, especially in the eastern, Hutsul, part of the region. Modern industries, specifically machine building and chemicals, have grown most rapidly in the postwar period (from 2.3 percent in 1956 to 33 percent in 1985). They are concentrated almost exclusively in the two major cities of Transcarpathia (equipment and machine building in Uzhhorod and Mukachiv and chemicals in Uzhhorod), and so give rise to even greater differentiation in the level of economic development between the lowland urban centres and the backwoods mountain areas. The major industrial centres are Uzhhorod, Mukachiv, Berehove, and Khust.

Transcarpathia has 652 km of standard-gauge railway (excluding narrow-gauge) and 3,400 km of hard-surface roads (1987), both of which provide a higher-density network than has Ukraine as a whole. The railway lines with most significance today are those connecting Transcarpathia with the rest of Ukraine across the Carpathians: the Uzhhorod–Lviv line via the Uzhok Pass, the Mukachiv–Lviv line via the Volovets Pass, and the Rakhiv–Diliatyn line via the Tatar Pass. The line traversing the length of Transcarpathia from Prešov (now in Slovakia) through

Chop and Khust (with a short stretch in Rumania) to Rakhiv has diminished in importance: in 1920–45 the main line of Transcarpathia, it is now a connector of regional importance. Automobile transport has grown rapidly and is particularly significant in Transcarpathia, where it supplements the railway, notably in the mountain valleys. The most important segments of the road network include the major highway from Uzhhorod through Mukachiv and then past Svaliava to Lviv, the Mukachiv–Khust–Tiachiv–Rakhiv–Yasinia highway, the Chop–Uzhhorod–Perechyn–Velykyi Bereznyi route to Sambir and Lviv, and the Chop–Berehove–Vynohradiv–Khust–Mizhhiria route to Kalush and Ivano-Frankivske.

As an economic region Transcarpathia generates a surplus of lumber and forest products, wine, fruit and vegetables, and tobacco. The mineral springs and picturesque landscapes still represent a largely undeveloped potential that is rapidly gaining popularity as an area for resorts and tourism.

Transcarpathia oblast. An administrative territory (1989 pop 1,252,000) in the southwest corner of Ukraine, formed on 22 January 1946. It covers an area of 12,800 sq km and is divided into 13 raions, 10 cities, 28 towns (smt), and 269 rural councils. It encompasses most of the territory of the historic region of *Transcarpathia. The oblast capital is *Uzhhorod.

Physical geography. The oblast encompasses the southwestern slopes of the Ukrainian Carpathian Mountains. Several mountain ridges, running through the oblast from the northwest to the southeast, cover approx 80 per cent of its area. Their highest elevation is 2,061 m. The ridges are separated by longitudinal valleys. The southwestern corner of the oblast consists of the Transcarpathian Lowland, which has an elevation of 105–120 m and is part of the Middle-Danubian Lowland. Protected by the mountains from the cold northern winds, the oblast has a temperate continental climate. The average January temperature ranges from -2°C in low areas to -7°C in the mountains, and the average July temperature, from 20°C to 8°C . The annual precipitation varies from 600 mm in low areas to 1,400 mm in the mountains. The growing season ranges from 230 days in the valleys to 90 days in the highlands. The main rivers are all tributaries of the Tysa: the Teresva, the Tereblia, the Rika, the Borzhava, the Liatorytsia, and the Uzh. The soils in the lowlands are peat, podzolized, and clayey; in the foothills, podzolized brown soils; and in the mountains, brown forest, podzolized mountain, and mountain meadow soils. Almost 50 per cent of the oblast is forested, mostly with oak-hornbeam forests in the lowlands, oak and oak-beech forests in the foothills, and coniferous (fir or pine) forests in the mountains, up to 1,500 m. Higher up, the slopes are covered with subalpine meadow vegetation.

History. The territory of the oblast has been inhabited since the Paleolithic period. In the 9th and 10th centuries it was under the control of the Bulgar Kingdom, and in the 10th and 11th centuries, under Kievan Rus'. King Stephen I annexed Transcarpathia in the 11th century, and it remained under Hungarian rule until the 17th century. Even under the Austrian regime the Hungarian influence in the territory remained strong, particularly after the reorganization of the empire in 1867. After the First World War much of the oblast was incorporated into the newly formed Czechoslovakian state. After a brief interval of autonomy in 1938–9, the territory was occupied by Hungary until 1944 and incorporated into the Ukrainian SSR in 1946.

Population. According to the 1989 census, the national composition of the oblast is 78.4 percent Ukrainian, 12.5 percent Hungarian, 4 percent Russian, under 2 percent Rumanian, and under 1 percent Jewish. The average population density in 1984 was 93.5 persons per sq km. In 1989, 41 percent of the population was urban. The major cities are Uzhhorod and *Mukachiv.

Industry. The main industries in the oblast are machine building and metalworking (28.9 percent of the industrial output in 1983), food processing (21.5 percent), forest products, woodworking, and paper manufacturing (19.2 percent), and light industry (16.7 percent). The machine-building and metalworking enterprises are concentrated in Uzhhorod, Mukachiv, and Irshava, and produce machine tools, stripping, planing, and sanding machines, lathes, and hydraulic presses. The main branches of the food industry are wine-making (Irshava), fruit canning (Tiachiv, Teresva Vynohradiv, Mukachiv), meat packing (Mukachiv, Uzhhorod), and dairying (Uzhhorod, Mukachiv, Rakhiv, Berehove, Khust). The largest forest products manufacturing complexes are in Svaliava and Ust-Chorna, and the largest woodworking complex is in Teresva. Cardboard is manufactured in Rakhiv, and furniture in Uzhhorod, Svaliava, Mukachiv, Berehove,

The Ust-Chorna Forest-Products Manufacturing Complex in Transcarpathia oblast

Teresva, Khust, and Irshava. Various wood chemicals are extracted in Svaliava, Perechyn, and Velykyi Bychkiv. The main branches of light industry are footwear manufacturing (Uzhhorod, Khust, Vynohradiv, Vylok), clothing (Uzhhorod, Mukachiv, Vynohradiv, Berehove), and knitwear (Mukachiv). The oblast is rich in mineral resources, such as coal, marble, and rock salt.

A vineyard in Vynohradiv raion, Transcarpathia oblast

Agriculture. In 1989 there were 106 collective farms and 52 state farms in the oblast. Of 458,000 ha of farmland 41.6 percent was cultivated, 28.2 percent was pasture, and 20.7 percent was hayfield. Of the farmland 173,400 ha were drained, and 14,600 ha were irrigated. The tilled land was devoted to grain crops, such as winter wheat and corn (37 percent), fodder (42), tobacco and other industrial crops (4), and potatoes, grapes, and fruits (17). Animal husbandry represented 59.2 percent of the agricultural output. The most productive branches are beef- and dairy-cattle raising, hog farming, and sheep and goat raising. Grain farming and animal husbandry are concentrated in the lowland areas and viticulture and fruit growing in the foothills region. Sheep graze in the highlands.

Transportation. There were 617 km of rail track in the oblast in 1989. The trunk lines running through the oblast include Chop–Uzhhorod–Uzhok–Lviv, Chop–Mukachiv–Lavochne–Lviv, and Chop–Solotvyna. There were 3,400

km of highway, of which 3,300 were paved. The major highways running through the oblast are Uzhhorod–Mukachiv–Khust–Ivano-Frankivske, Mukachiv–Svaliava–Stryi, and Uzhhorod–Perechyn–Uzhok–Lviv. Uzhhorod has an airport.

Istoriia mist i sil URSR: Zakarpats'ka oblast' (Kiev 1969)

Transcarpathian Art Museum (Zakarpatskyi khudozhnii muzei). A museum established in 1947 as a branch of the *Transcarpathian Regional Studies Museum. It is housed in the castle in Uzhhorod and has permanent exhibitions of Western European, prerevolutionary Ukrainian and Russian, and Soviet art. It contains a fine collection of works by Transcarpathian artists, such as Y. Bokshai, A. Erdeli, F. Manailo, Z. Sholtes, A. Kotska, A. Kashshai, V. Svyda, E. Kontrtovych, and H. Hliuk.

Transcarpathian dialects. Archaic variants of the *Boiko dialect spoken in Transcarpathia. The dialects are divided into four groups: Uzh, Borzhava, Maramures, and Highland (*verkhovyna*). The Highland subdialects, which are spoken as far south as the line Velykyi Berezhnyi–Mizhhiria–Synevyr, are transitional to the Boiko dialect. In the west, along the Laborets River, the dialects border on the southern *Lemko dialects, whose southeasterly expansion in the 16th to 18th centuries created transitional belts along the Tsirokha and Uzh rivers. In the east, along the Shopurka River, they border on the *Hutsul dialect, whose 17th- to 18th-century expansion resulted in mixed dialects along the Ruskova River and Hutsul features as far west as the Teresva River. West of Uzhhorod, as a result of Slovak expansion, mixed 'Sotak' dialects (named after the pronunciation of *shcho* 'what, who' as *so*), which are transitional to the East Slovak dialects, evolved.

The features of the Transcarpathian dialects are: (1) retention of *dž* < *dj* (eg, *molódžyj* [Standard Ukrainian (SU) *molódšyj*] 'younger'); (2) retention of soft *r* before a consonant and at the end of a word (eg, *ver'x*, *pýsar* [SU *verx*, *pýsar*] 'top, scribe'); (3) retention of the difference between *yi* and *y* (eg, *riiba*, *nytki* [SU *rýba*, *nytký*] 'fish, threads'); (4) hardened *š*, *ž*; (5) softened *dž* west of the Liatorytsia River and softened *č* west of the Borzhava River, accompanied by the mixing of the groups *č'k* and *šk* (eg, *káš'ka*, *dóc'ká*, *č'kóda* [SU *káčka*, *dóška*, *škóda*] 'duck, board, harm'); (6) appearance of the tense-positional variants *ô*, *ê* of the phonemes *o*, *je* before a palatal consonant and before *i*, *u*, *ü*, *ô*, *ê* (eg, *cér'kôu*, *na dôró'zi*, *dên'* [SU *cérkva*, *na dorózi*, *den'*] 'church, on the road, day', in which *ê* can change to *y*); (7) in newly closed syllables the change of *ô*, *ê* into *ú*, *ü/jü* between the Laborets and Liatorytsia and between the Rika and Shopurka rivers (eg, *kún*, *n'ús*, *vjúx* [SU *kin'*, *nis*, *viu*] 'horse, nose, he led', in which *-x* < *-f/-v*), or into *ü*, *ü/jü* between the Liatorytsia and Rika (eg, *kün'*, *n'üs*, *vjúx*), or into *i*, *i* in the Highland dialects (eg, *kin'*, *n'is*, *viu/viü*); (8) forms of the type *yrstýty*, *kýrve*, *jáblyko*, *žít'a*, *z'il'a*, *tôû dôbrôû rukôû*, *má(v)u* [SU *xrystýty*, *króvy*, *jábluko*, *zyttjá*, *zillja*, *tóju dôbroju rukóju*, *máju*] 'to christen, of the blood, apple, life, herbs, with that good hand, I have'); (9) stress peculiarities, ie, frequent stress on the prefix (eg, *názad*, *zácvyte*, *nájstaršyj*, *né znaje* [SU *nazád*, *zacvité*, *najstáršyj*, *ne znáje*] 'back [adv], will bloom, oldest, does not know'), but also stresses such as *veselýj*, *pér'sá*, *idó mni* (SU *veselyj*, *péřsa*, *do méne*) 'happy, the first, to me'; (10) frequent archaic

endings in nouns (eg *brýťôü*, z *cêr'kvoe*, u *cêr'kvy*, na *zemlý*, *vôüicy*, *dvóme majstróve*, *vôlum/-lym/lym*, z *týma malýma psóma*, v *l'isóx*, na *kôn'ox*, *dva sêla* [west of the Uzh], *dvi sêla* [east of the Uzh], *trijélčetyré brát'a* [SU *brýťva*, z *cêrkvy*, u *cêrkvi*, na *zemlí*, *vovký*, *dva májstry*, *volám*, z *týmy malýmy psámy*, v *lisáx*, na *kónjax*, *dva selá*, *trylčotýry bráty*] 'razor, from church, in church, on land, wolves, two masters, oxen (dat), with those little dogs, in forests, on horses, two villages, three/four brothers'); (11) influence of hard-declension endings on the soft (eg *kôn'óvy*, *kôn'óm*, *pól'om*, *vólós'om*, *zém'l'óü*, *cêr'kôü'l'óü*, *mójeü* [SU *konévi*, *koném*, *pólem*, *volossjam*, *zemléju*, *cerkvoju*, *mojeju*] 'horse (dat and instr), field, hair, land, church, my (instr); (12) adjectival endings such as *ním'isn'yj*, *násoje*, *dóbroje*, *dóbroj* (in the west), *tóty* (SU *nýnišnij*, *náše*, *dóbre*, *dóbryj*, *ti*) 'today's, our, good (neut), good (masc), those'; (13) enclitic pronominal forms, eg, (*m'n'a*, *t'a*, *s'a*, *ho*, *jujji*, *mn'i*, *tylt'i*, *sy*, *mu*, *jáj/jüj*, na *n'um/n'üm*, *oná*, *n'ôü/nêü*, na *n'üü/n'yü* (SU *mené*, *tebé*, *sebé*, *johó*, *jijí*, *mení*, *tobí*, *sobí*, *jomú*, *jij*, na *n'omú*, *voná*, *néju*, na *nij*) 'me, you, oneself, him, her (acc), me, you, oneself, him, her (dat), on him, she, with her, on her'; (14) numeral forms such as *dvásto*, *šíst'sto*, *samodružij*, *piüdrúha* (SU *dvístá*, *šístsót*, *vdvox*, *pivtorá*) 'two hundred, six hundred, two (both), one and a half'; (15) verb forms such as *močý*, *verécy*, *móhú*, *móhut'*, *čýtam*, *-aš*, *-at'*, *-ame*, *-ate*, *-ávut'*, *kupíju/-ýju*-*ýju*, *nós'u*, *xodýjém*, *-jês'*, *xodýlys'me*, *-s'te*, *ož jem ukráü*, *pl'üx*, *vjúx*, *mjúux*, *mu čytaty*, *ja byx maü*, *id'*, *id'ím(e)* (SU *mohýtý*, *kýnuty*, *móžu*, *móžut'*, *čýtáju*, *-jês'*, *-je*, *-jemo*, *-jete*, *-jut'*, *kupúju*, *nošú*, *ja xodýv*, *ty xodýv*, *my xodýly*, *vy xodýly*, *ščo ja vkrav*, *pliv*, *viv*, *miv*, *büdu čýtáty*, *ja mav by*, *idý*, *idímó*) 'to be able to throw, I can, they can, I read, you (sing) read, he reads, we read, you (pl) read, they read, I buy, I carry, I went, you (sing) went, we went, you (pl) went, what I stole, I wove, I led, I could, I will read, I should have, go (2nd sing imp), let us go'; (16) word forms such as *mórkôü*, *jablýnča* [SU *mórkva*, *jáblunja*] 'carrot, apple tree'; (17) many lexical archaisms and Hungarian, Rumanian, German, and Slovak loanwords.

The dialects have been studied by S. Bonkáló, O. Broch, N. Durnovo, G. Gerovsky, V. Hnatiuk, P. Lyzanets, I. Pankevych, I. Verkhrastry, Y. Dzendzelivsky, and others.

O. Horbach

Transcarpathian Folk Chorus (Zakarpatskyi narodnyi khor). A professional performing troupe founded in Uzhhorod in 1945. The group consists of a mixed chorus, an instrumental section, and a dance ensemble. Its repertoire

includes the folk songs and dances of the Transcarpathian region, contemporary works, classical music, and modern choreography, in addition to requisite state pieces. Its artistic and musical directors have been P. Myloslavsky (1945–54), M. Krechko (1954–69), and M. Popenko (since 1969). The chorus has performed in Czechoslovakia, Hungary, Poland, and Rumania, as well as throughout the former USSR.

Transcarpathian Museum of Folk Architecture and Folkways. See Museums of folk architecture and folkways.

Transcarpathian Regional Studies Museum (Zakarpatskyi kraieznavchyi muzei). A museum founded in Uzhhorod in 1945 on the basis of the holdings of the Tivadar Lehoczky (T. *Lehotsky) Regional Museum (est 1911) and the Uzhhorod Ethnographic Museum (est 1933). In 1950 the holdings of the Mukachiv Historical Museum were also deposited there. The museum is housed in the 14th- to 17th-century Uzhhorod Castle. In 1979 its three exhibit sections (natural science, pre-Soviet history, and Soviet history) contained over 60,000 items. The museum's manuscript collection contained some of the former holdings of the Uzhhorod Prosvita society's museum and library, the Uzhhorod Greek Catholic Eparchial Library, and the Chernecha Hora Basilian monastery in Mukachiv, and historical documents and photographs pertaining to Transcarpathia. Branches of the museum are the *Transcarpathian Art Museum and historical museums in Mukachiv, Vynohradiv, and Svaliava. V. Mykytas's description and catalog of old books in the museum was published in 1964, and guides to the museum were published in 1969 and 1972.

Transcarpathian Ukraine. See Transcarpathia.

Transcarpathian Ukrainian Music and Drama Theater (Zakarpatskyi ukráinskyy muzychno-dramatychnyi teatr). A theater established in 1946 in Uzhhorod under the artistic direction of H. *Ihnatovych. Its repertoire has consisted of Ukrainian and Russian classics and contemporary plays, such as O. Dovzhenko's *Nezabutnie* (The Unforgettable), as well as some Western classics. The theater toured Czechoslovakia in 1958. In 1974–85 its artistic director was Ya. Helias.

Transcaucasia. See Caucasia.

Transdnieper region (Zadniprovia). A term used mostly in the 16th and early 17th centuries to designate Ukrainian lands on the left bank of the Dnieper River. At that time those territories were sparsely settled and came under the control of Lithuania (from 1569, Poland) and Muscovy. (See also *Left-Bank Ukraine and *Slobidska Ukraine.)

Transfiguration (*Preobrazhennia Hospodnie* or *Spas*). A church and ritual holiday observed on 19 August (6 August OS). This feast, which commemorates a demonstration by Jesus Christ of his divinity before three apostles on the top of Mt Tabor, was in practice a celebration of the

transition from summer to fall. The most obvious folk tradition relating to the day consisted of the blessing of fruits (particularly apples and pears), wreaths of wheat or rye (by women), a variety of grains, and herbs. A social proscriptio existed against eating fruits before the feast day, when they could be properly blessed. The wreaths were used in conjunction with practices related to *harvest rituals. The grains were believed to possess magical qualities and were kept in homes to guard the inhabitants from bad weather and ill health. The herbs were commonly placed in the coffin of deceased family members, usually under the head. The importance of the Transfiguration as a feast day was underlined by its frequent use in colloquial conversation as a standard for measuring time.

The Cathedral of the Transfiguration in Chernihiv

Transfiguration, Cathedral of the (Spaso-Preobrazhenskyi sobor). One of the oldest stone buildings in Ukraine and the finest extant monument of the medieval Chernihiv principality. Its construction was begun in 1036, during the reign of Prince Mstyslav I Volodymyrovych the Great, and completed about 30 years later, during the reign of Sviatoslav II Yaroslavych. The cathedral stood at the center of the palace buildings in Chernihiv and served as the mausoleum of the Chernihiv princely dynasty. It was a rectangular three-nave, three-apse structure with a narthex, five domes, burial chapels against the side walls, a three-apse one-story baptistery on the southern side, and a circular tower on the northern side. In 1791–9 and later the church was thoroughly reconstructed: the chapels were replaced with tambours with decorative baroque fronts, the original tower was extended, the baptistery was replaced by a second tower, and both towers were topped by spires. A new iconostasis, designed by I. Yasnyshyn, was carved and installed in 1793–8; it con-

tains 62 icons painted by T. Myzko and O. Murashko. Some parts of the original building have been preserved: the carved slate parapets in the choir balconies, fragments of 11th-century frescoes and oil paintings, impost capitals and the base of marble columns, and inlaid slate floor plates. Some of the rich gold and silver church vessels have been preserved in the Chernihiv State Historical Museum. In 1967 the cathedral became part of the Chernihiv Architectural and Historical Preserve.

S. Hordynsky

Transfiguration Church (Preobrazhenska tserkva). A monument of baroque architecture in Velyki Sorochyntsi (now in Poltava oblast), built in 1732. Its construction and decoration were funded by Hetman D. Apostol. Built on a cruciform plan, the original church had nine domes. After a fire in 1811 the four corner domes were dismantled. The central dome rests on a 12-sided cylinder surrounded by four octagonal and four square chambers. The pilasters, cornices, and fronts are decorated with carved classical and folk designs. Apostol's coat of arms is painted on the vestibule wall. The carved wooden iconostasis contains over 100 icons, which are rich in genre elements.

The Transfiguration Church in Berestove

Transfiguration Church in Berestove (Tserkva Spasa na Berestovi). A medieval architectural monument built probably in the early 12th century during the reign of Prince Volodymyr Monomakh in the village of Berestove (now part of Kiev). It was a typical three-nave, three-apse church with a single dome resting on six pillars. First mentioned in the Rus' chronicles under the year 1072, it served as the mausoleum of the Monomakh dynasty (including Grand Prince Yurii Dolgorukii). The church was de-

stroyed by Khan Mengli-Girei in 1482. A new church was built on its ruins under Metropolitan P. Mohyla in the Cossack baroque style in 1640–2 and decorated in 1644. The interior (including a portrait of Mohyla) was painted by Greek masters, the ground plan was changed to form a cross, and four domes were added. The church was renovated in 1751–2 and again in 1813–14, when F. Korobka carved an elaborate altar, and A. Melensky designed a campanile in the classicist style. Of the original structure only the western part, with the narthex and choir, has been preserved. In the early 1970s a 12th-century fresco was uncovered in the church. The church is part of the Kievan Cave Historical-Cultural Preserve.

Transhoryn region (Zahorynnia). The colloquial name for the marshiest reaches of Polisia. The region is situated to the east of the Horyn River in the northern corners of Rivne and Zhytomyr oblasts and southern Belarus. It includes the lands on both sides of the Lva, the Stvyha, and the Ubort rivers.

Translated literature. As distinct from Ukrainian *literature in translation, translated literature is literature translated into Ukrainian from other languages. The introduction of Christianity into Kievan Rus' (988) and the decision to forgo Greek in favor of Slavonic gave rise to translations of the Gospels and various texts necessary for religious celebration (the Epistles, Psalter, etc). Parallel and analogous to those translations were numerous collections of saints' lives (prologues, Patericons) and collections of the works of the Fathers of the Church. Especially popular were the sermons of St John Chrysostom (**Zlatostrui*, **Zlatoust*) and other excerpts and aphorisms from the Bible, apocrypha, tales, and the like, collected in miscellanies, such as *Pchela*, in the two *Izborniki* of Sviatoslav (1073 and 1076), and in compendiums of the more wondrous and 'scholarly' nature, such as the chronicles of John Malalas, Georgios Hamartolos, and Georgios Synkellos. Also popular were translations of secular tales, such as **Varlaam i Ioasaf*, **Aleksandriia*, the Story of Troy, the Story of the Kingdom of India, and various historical compilations (eg, *History of the Jewish Wars* by Josephus Flavius). Such translated literature was typical of the 10th to 14th centuries and reached its high point during the reign of Yaroslav the Wise in the 11th century.

In the second half of the 14th century similar translations were common, but often they were no longer translations of the primary source but of Bulgarian or Serbian adaptations (eg, *Zlataia tsip* [Golden Chain] and *Izmarahd* [Emerald]). At that time translations of Latin tales appeared (via Poland and Bohemia), such as the stories of the Three Kings (the Magi) and new versions of the tales of St Alexis, of the *Aleksandriia*, and of the Trojan War. In the 16th and 17th centuries attempts were made at translations of the New Testament into Ukrainian and Belarussian (the Peresopnytsia Gospel, the Gospels of V. Tsiapinsky, V. Nahalevsky, and others). The Ostrih Bible appeared in Church Slavonic. In the 17th and 18th centuries tales of chivalry circulated either indirectly through Polish or Czech translations or directly from Italian (Tristan and Isolde, Prince Bova, the Seven Wise Men, Attila, Emperor Otto, and the like). All of those were reworkings far removed from the original and often adapted to specific Ukrainian customs. Simultaneously G. Boccac-

cio's *Decameron* became known in Ukraine, as well as T. Tasso's *Jerusalem Delivered* (an adaptation from a Polish translation). Other translations of tales, anecdotes, and fables abounded. The translations were loose at best, most often transformations and adaptations. That type of adaptive translation finally led to I. Kotliarevsky's travesty 'translation' of Virgil's *Aeneid*.

In the first half of the 19th century translated literature in Ukraine followed Kotliarevsky's success. Travesties of classical works were attempted by P. Hulak-Artemovsky, Ye. Hrebinka, K. Dumytrashko, and P. Biletsky-Nosenko. Even in the second half of the 19th century translation as 'rendering in Ukrainian' with elements of travesty continued in S. Rudansky's *Iliad* (1872–7), in P. Nishchynsky's (P. Baida) *Odyssey* (1890), *Iliad* (1902–3), and *Antigone* (1883), and in the numerous translations by O. Navrotsky. No longer travesties but far from real translations were the Ukrainianized versions done by the Romantics L. Borovykovsky (poems of A. Pushkin, A. Mickiewicz, V. Zhukovsky), A. Metlynsky (German poems), M. Shashkevych (Serbian and Polish poems), and M. Kostomarov (G. Byron and W. Shakespeare). The artistic height reached in such transformational translation can be seen in T. Shevchenko's 'Psalms of David.'

The pioneer of proper translations was Shevchenko's friend and contemporary P. *Kulish. Translation became a prime activity of his mature life, as in his arduous translation of the Bible, which he began in 1868 with renderings of the 'Psalms of David' and completed only just before his death. The final edition of his translation of the Bible came out in 1903, with I. Puliui and I. Nechui-Levytsky as cotranslators. Kulish's *Shekspirovi tvory: Z movy brytans'koi movoiu ukrains'koiu perekladav* P. Kulish, T. i. *Otello; Troil ta Kressyda; Komediiia pomylok* (Shakespeare's Works: From the British Language Translated into the Ukrainian Language by P. Kulish, vol 1, *Othello; Troilus and Cressida; The Comedy of Errors*) published by the Shevchenko Scientific Society in Lviv in 1882 was followed by translations of G. Byron's *Don Juan* (1890–91), excerpts from J.W. von Goethe, H. Heine, and F. von Schiller (1885–6), and posthumous publications of other Shakespearean plays: *Hamlet* (1899), *The Taming of the Shrew* (1900), *Macbeth* (1900), *Coriolanus* (1900), *Julius Caesar* (1901), *Romeo and Juliet* (1901), *Much Ado about Nothing* (1901), *Antony and Cleopatra* (1901), *Measure for Measure* (1902), and *King Lear* (1902). All the posthumously published translations of Shakespeare's plays were edited and introduced by I. *Franko, who also contributed to the store of translated literature by translating over 60 authors (Sappho, Sophocles, Horace, Ovid, M. de Cervantes, Dante, E. Zola, G. Flaubert, V. Hugo, P. Verlaine, J.W. von Goethe, H. Heine, W. Shakespeare, G. Byron, R. Burns, Mark Twain, N. Gogol, V. Solovev, A. Mickiewicz, J. Neruda, K. Havlíček-Borovský, H. Ibsen, A. Strindberg, and many others).

Others who worked in the field of translation at the beginning of the 20th century were V. *Samilenko (one song of the *Iliad* [1887], the 'Inferno' from Dante's *Divine Comedy* [1892–1902], some Molière, B. Hart, Byron, P.-J. de Béranger, and other authors), and Lesia *Ukrainka (H. Heine's *Buch der Lieder* [1892], translated with M. Stavynsky], some of N. Gogol, I. Turgenev, V. Hugo, G. Hauptmann, and M. Maeterlinck). Quite prolific as translators were P. Hrabovsky (Byron's *Childe Harold's Pilgrimage* [1895], E.A. Poe's 'Raven' [1897], some poems by A. Lord

Tennyson, and about 270 poems by other poets) and M. Starytsky (Tales of H.C. Andersen [1873], I. Krylov's *Fables* [1874], Serbian epic songs [1876], and poems by A. Pushkin, G. Byron, H. Heine, A. Mickiewicz, and others). V. Shchurat's translation of the 11th-century French epic *Chanson de Roland* (1895) has yet to be surpassed and has been republished (1957, 1962). Shchurat also adapted into contemporary Ukrainian the Old Ukrainian epic *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign, 1907) and translated works by many authors, such as S. Petőfi, K. Tetmajer, J. Słowacki, N. Nekrasov, N. Aksakov, A. Pushkin, E.A. Poe, and V. Hugo. A. Krymsky translated from Persian, Turkish, Arabic, Russian, and German. Translation into Ukrainian was also part of the program of the literary group *Pleiada. In Ukraine under Russian rule translating activity was greatly hindered by the *Ems Ukase (1876), which prohibited the printing and distribution of all Ukrainian-language original and translated works. As a result translated works could be published only in Galicia or Bukovyna.

In Western Ukraine in the first decades of the 20th century, translated literature was much in vogue in such publications as *S'vit*, the magazine of the modernists *Moloda Muza, and in the series *Biblioteka naiznaimenyshykh povistei* (The Library of the Best Novelettes, 74 vols), published by the newspaper *Dilo*. The quality of the translations in that series was poor because works were often translated from Polish, Russian, or German translations of the original text. Much more precise were the translations published by the Ukrainian-Ruthenian Publishing Company under the editorship of I. Franko, V. Hnatiuk, and M. Hrushevsky. Through the efforts of the editors as well as other contributors (eg, P. Karmansky, Ye. Tymchenko, O. Cherniakhivska, I. Krevetsky) many works from various literatures appeared in Ukrainian translation. In addition to the Finnish epic *Kalevala* (translated by Ye. Tymchenko, 1901) and the Shakespearean plays (translated by P. Kulish) the company published translations of the works of G. de Maupassant, K. Hamsun, H. Pontopidan, G. Hauptmann, V. Korolenko, K. Gutzkow, W. Orkan, K. Havlíček-Borovský, H. Heine, N. Gorky, A. Chekhov, E. Zola, G. Byron, L. Tolstoy, U. Sinclair, and others. A similar contribution to translated literature came from **Literaturno-naukovyi vistnyk*, which systematically published good translations of world classics and contemporary works. The *Novitnia biblioteka* (New Library) book series, published in Lviv 1912–23 and edited by F. Fedortsiv, included many of the aforementioned works and also the works of L. Andreev, S. Żeromski, E.A. Poe, A. France, and E.T.A. Hoffmann. *Ukrainska Nakladnia* (a publishing house established as *Halytska Nakladnia* in 1903 by Ya. Orenshtain) published the works of Aesop, J. de La Fontaine, F. Nietzsche, R. Kipling, B. Bjørnson, H. Ibsen, and others in the *Zahalna biblioteka* (General Library) book series. The publishing house *Vsesvitnia Biblioteka*, founded by I. Kalynovych in 1913–14 in Lviv, published the works of F. von Schiller, J.W. von Goethe, and A. Pushkin, which were translated and edited, for the most part, by I. Franko.

Translating activity increased after the hiatus created by the First World War, although neither was the activity planned nor was the translation always from original languages directly into Ukrainian. Some translations done by the better translators from the prewar years were the ex-

ception. Most notable were V. Samiilenko's translation of Molière's *Tartuffe* (1917) and stories by V. Blasco Ibáñez (1926) and Khrystia Alchevska's translations of V. Hugo. Although many authors engaged in sporadic translation, there were several who excelled, and whose activity greatly contributed to the store of translated literature. The *Neoclassicist group of poets were all engaged in translation. P. Fylypovych translated mainly from Russian poets (eg, A. Pushkin, V. Briusov, and E. Baratynsky). M. Draikhmara, in addition to translating Russian (eg, Pushkin, M. Lermontov) and Czech (J. Machar, J. Hora) poets, translated the Belarusian poet M. Bahdanovich (*Vinok* [Wreath, 1929]). His work on the *Kalevala* and the *Divine Comedy* was interrupted by his arrest. Yu. Klen (then still O. Burghardt) translated primarily German but also French and English poetry (eg, *Zalizni sonety* [Iron Sonnets, 1926]). M. Zerov translated the sonnets of the French poets J.-M. de Heredia and C.-M.-R. Leconte de Lisle, and J. Słowacki's *Mazepa* (staged in 1922). He collaborated with P. Fylypovych and M. Rylsky on the translations of A. Pushkin (his translation of *Boris Godunov* appeared in 1937 under the name of B. Petrushevsky) but concentrated mainly on Latin poets (*Antolohiia rymy 'koi poezii* [Anthology of Roman Poetry, 1920]). M. Rylsky was the most prolific of the Neoclassicist translators. He translated throughout his life and is credited with rendering works from more than 20 literatures into Ukrainian, among them Belgian (C. Van Lerberghe's *Pan* [1918], M. Maeterlinck), French (T. Gautier, J.-M. de Hérédia, P. Verlaine, S. Mallarmé, F. Jammes, H. de Régnier, J. Bédier's *Le Roman de Tristan et Iseult* [1928; 3rd edn 1972], G. de Maupassant, G. Flaubert's *Salammô*, P. Corneille's *Le Cid* [1931], Molière's *Le misanthrope* [1931], J. Racine's *Phèdre* [1931], N. Boileau's *L'art poétique* [1931], Voltaire's *La pucelle d'Orléans* [1934], E. Rostand's *Cyrano de Bergerac* [1947]), English (W. Shakespeare's *King Lear* and *Twelfth Night* [1958]), Armenian (Sayat-Nova, A. Isaakian), Georgian (H. Tabidze), Belarusian (Ya. Kupala, Ya. Kolas), Russian (M. Lermontov, F. Tiutchev, A. Fet, A. Blok, and most of A. Pushkin), Polish (primarily A. Mickiewicz but also J. Słowacki, K. Tetmajer, J. Tuwim, C. Norwid). Rylsky's translation of A. Mickiewicz's *Pan Tadeusz* (first version published in 1927, but reworked several times during Rylsky's life) was awarded the prize of the Polish PEN club for the mastery of the translation in 1949.

Other important translations were D. Zahul's from German literature (H. Heine [1918–19], J.W. von Goethe's *Faust* [1925], F. Schiller's ballads [1927], German ballads [1929]), I. Kulyk's *Antolohiia amerykans 'koi poezii* (Anthology of American Poetry, 1928), V. Svidzinsky's comedies of Aristophanes (1939), and M. Bazhan's translations from Armenian and Georgian, most notably of S. Rustaveli's *The Knight in the Tiger Skin* (1937). V. Pidmohylny concentrated on translating French prose (eg, A. France's stories [1925], *Thais* [1927], *La pâtisserie de la Reine Pédauque* [1929] – he also edited the first 8 vols of a 24-vol collection of France's works [1930] – Voltaire's *Candide* [1927], P. Mérimée's *Colomba* [1927], H. de Balzac's *Le Père Goriot* [1927], *Les parents pauvres* [1929], G. de Maupassant's *Fort comme la mort*, *Bel-Ami*, and *Mont-Orliol* [published separately and as part of the 10-vol works, 1928–30], and D. Diderot [2 vols, 1933]). M. *Tereshchenko's lifelong interest in translating French poetry began with his volume of E. Verhaeren's verse (1927) and culminated in the posthu-

mous publication of the anthology of French verse *Suzir'ia frantsuz'koi poezii* (The Constellation of French Poetry, 2 vols, 1971).

Devoted specifically to literary translation were translators such as M. Ivanov (Cervantes's *Don Quixote* [1927], some C. Dickens, R. Kipling, Mark Twain, A. Conan Doyle [2 vols in 1928], and other works), H. Kasianenko (some J. Conrad, A. Conan Doyle, J. Dos Passos, and J. London), and K. Lubensky (Aristophanes' *Lysistrata* [1928]). The flurry of translation activity included the founding of **Vsesvit* in 1925, a journal dedicated to opening worldwide literary horizons. During the 1930s the wholesale destruction of Ukrainian cultural life under Stalinism also brought an end to most of the translation activity. Only a trickle continued. The most notable translations were an anthology of world literature (of which only the third volume was published, 1931) and an anthology of ancient literature (1938), both edited by O. Biletsky, in which, indicative of the times, the names of repressed translators (eg, M. Zerov, V. Pidmohyl'ny, I. Steshenko, and D. Zahul) were intentionally left out. The increased interest in Spain resulting from the civil war there justified some translation of Spanish poetry, but on the whole only pro-Soviet authors were translated. The only regular translation activity before the Second World War consisted of translation from the literature of the various nationalities in the Soviet Union, from Russian in particular.

In Western Ukraine and among émigrés, however, translation activity continued between the two world wars. Translations, mainly from classical, Old Ukrainian, French, Scandinavian, Italian, and English literature, were done by authors such as O. Babii, S. Hordynsky, P. Karmansky, M. Rudnytsky, V. Sofroniv-Levytsky, and V. Shchurat. Of special note were the editions from Ya. Orenshain in Berlin in the *Zahalna biblioteka* book series and in separate volumes of translations of G.B. Shaw, A. Schnitzler, Plato, F. Mistral, A. France, R. Rolland, and V. Korolenko. From 1921 to 1924 the Chaika publishing house in Vienna, under the editorship of O. Hrytsai, published 13 volumes of translations done by V. O'Connor-Vilinska, M. Shrah, N. Surovtsova, B. Chorny, M. Trotsky, and S. Pashchenko of V. Hugo, T. Gautier, C. Dickens, A. Daudet, G. Ebers, G. de Maupassant, A. de Musset, Stendhal, L. Tolstoy, and G. Flaubert.

The end of the 1950s, after the 20th Congress and N. Khrushchev's 'thaw,' brought about the revival of *Vsesvit*, in 1958, with a mandate to introduce its readers within the Soviet Union to foreign literature. Foremost translators who had made their debuts in the 1930s and had managed to survive the Stalinist terror now came forth with excellent translations. B. *Ten, who published his translation of Aeschylus' *Prometheus Bound* in 1949 and the comedies of Aristophanes in 1956, made his greatest contribution in his translations of Homer's *Odyssey* (1963) and *Iliad* (1978). I. *Steshenko concentrated on drama and translated comedies by Molière and C. Goldoni, several plays by W. Shakespeare (in the 3-vol edn of 1964), J.W. von Goethe's *Egmont*, F. von Schiller's *Don Carlos*, F. Crommelynck's *Tripes d'or*, and A. Berg's *Wozzeck*. V. Mysyk became a leading translator of English, American, German, and Persian literature, in particular of the poetry of R. Burns (1932), Rūdakī (1962), Omar Khayyām (1965), J. Keats (1968), Ḥāfeẓ (1971), and Firdousi (1975). Ye. *Drobiazko translated from Russian, French (particularly H. de Balzac and Molière), German (eg, H. Heine, J.W. von Goethe, F.

Some recent Ukrainian editions of translated literature

von Schiller), and Polish (J. Słowacki and J. Tuwim). His greatest achievement was a full translation of Dante's *Divine Comedy* in 1976.

The 1960s in Ukraine saw an outburst of literary activity (see **Shestydesiatnyky*) including a renewed interest in translations. New translators appeared, such as O. Terekh, R. Dotsenko, A. Perepadia, Ye. Popovych, O. Seniuk, M. Pinchevsky, V. Mytrofanov, and Yu. Lisniak. They gathered around *Vsesvit*, where the first translations of F. Kafka, W. Golding, E. Hemingway, W. Faulkner, and other modern authors appeared. The decade also marked the first of the translations of two master translators, M. *Lukash and H. *Kochur. The two collaborated on a translation of P. Verlaine's poetry in 1968. The appearance of Boccaccio's *Decameron* in 1964 (repr 1969 and 1985), translated by Lukash with proper rendition in Ukrainian of the nuances of Boccaccio's language, was a cultural landmark in the struggle for the development of the Ukrainian language under the constant pressure of Russification. At that time the works of J. London appeared in 12 volumes, including translations done in the 1920s by repressed translators. The eight volumes of G. de Maupassant (1969–72) also included translations done by V. Pidmohyl'ny. Translations of literature for children, outside of the normal fairy tales, legends, and myths, were published by the Veselka publishing house; *Braty Maugli* (1967), a translation of R. Kipling's *The Jungle Book*, is an example.

In the 1970s, however, new waves of repression began against Ukrainian culture, including literature and translation. The use of dialectal words, especially from Western Ukraine, was deemed a subversive act by which the translator was attempting to keep the Ukrainian language from a 'merger with the brotherly Russian tongue.' M. Lukash and H. Kochur were expelled from the *Writers' Union of Ukraine. R. Dotsenko and A. Perepadia were especially persecuted for the use of dialectal words and were prevented from working. The editor of *Vsesvit*, D. *Pavlychko, was removed in 1978, and the journal itself was severely criticized. Yet some translations continued to appear, of F. Villon (1973) by L. Pervomaisky and of R.M. Rilke (1974) by M. *Bazhan. Only Bazhan's personal authority prevented complete censorship of his translation, which was severely criticized. Other noteworthy translations that appeared at that time were volumes of works by A. France (4 vols, 1976–7), B. Prus (5 vols, 1978–9), and E.

Hemingway (4 vols, 1979–81), H. Hesse's *Das Glasperlenspiel* (translated by Ye. Popovych and L. Kostenko, 1978 and 1983), J. Galsworthy's *The Forsyte Saga* (translated by O. Terekh, 1976; repub 1982, 1988), D. Defoe's *Robinson Crusoe* (1965; repub 1976, 1978, and 1985), L. Carroll's *Alice's Adventures in Wonderland* (translated by H. Bushyn, 1976), J. Swift's *Gulliver's Travels* (translated by Yu. Lisniak, 1976; repub 1983), K. Vonnegut's *Slaughterhouse Five* (translated by P. Sokolovsky, 1976), H.G. Wells's *War of the Worlds* and other novels (translated by D. Palamar-chuk and M. Ivanov, 1977), T. Capote's collection (translated by V. Mytrofanov, 1977), J. Baldwin's *If Beale Street Could Talk* (translated by L. Honchar, 1978), works by W. Faulkner (translated by R. Dotsenko, 1978) and E. Waugh (1979), J. Carol Oates's collection of stories (1979), Aristophanes' comedies (a reissue of the translations by B. Ten and V. Svidzinsky, and new ones by A. Sodomora, 1980), and C. Brontë's *Jane Eyre* (translated by P. Sokolovsky, 1971; repub 1983 and 1987). Yet G. Apollinaire's poetry as translated by M. Lukash in the 1970s had to wait until 1984 to be published. With the fall of L. Brezhnev, the situation began to improve. Lukash's unique talents as a master translator were recognized with the establishment of a translation prize in his name in 1989 for the best translation in a given year to appear in *Vsesvit* (the first recipient was V. Shovkun, for his translation of G. Vidal's *Creation*). Lukash died before finishing his translation of Cervantes's *Don Quixote*, which was being finished by A. Perepadia.

Interest in South American literature produced translations of the works of G. Amado, J. Cortázar, M. Vargas Llosa, G. García Marquez, J.L. Borges, A. Carpentier, and others. Of special significance was a six-volume edition of W. Shakespeare (1983–6), in which the best of both previous and new translations were collected. The 1980s produced some notable translations, among which the following stand out: an anthology of Greek tragedies (translated by B. Ten, 1981), the tragedies of Sophocles (by B. Ten and A. Sodomora, 1989), two volumes of G. Flaubert (1987), Ovid's *Metamorphoses* (by A. Sodomora, 1985), E.T.A. Hoffmann's stories (by Ye. Popovych, 1987), P. Lagerkvist's *Marianna* (by O. Seniuk, 1988), L. de Camões's *Os Lusíadas* (by M. Lytvynets, 1987), F.S. Fitzgerald's *The Great Gatsby* (by M. Pinchevsky, 1982), W. Thackeray's *Vanity Fair* (by O. Seniuk, 1983), H. Melville's *Moby Dick* (by Yu. Lisniak, 1984), G. Byron's *Don Juan* (by S. Holovanivsky, 1985), J. Conrad's *Lord Jim* (by L. Honchar, 1985), and J.R.R. Tolkien's *The Hobbit* (by O. Mokrovolsky, 1985). Of interest is the newly established series *Svitova proza 20 st.* (World Prose of the 20th century), established in 1988, in which works such as J. Heller's *Catch 22* (1988), J. Updike's *The Centaur of the Farm* (1988), and W. Somerset Maugham's *The Moon and Sixpence* and *The Razor's Edge* (1989) have appeared. In 1990 an edition of Aeschylus' *Tragedies* was published (cotranslated by A. Sodomora and B. Ten).

The numerous professional translators in Ukraine form a school of literary translation; at the present time the most important translator is H. Kochur. But translation also continues to be done by literary scholars specializing in various foreign literatures, such as D. Zatonsky, T. Denysova, K. Shakhova, Yu. Pokalchuk, O. Pakhlovskaya, S. Pavlychko, and V. Kukhalashvili. There is a special commission at the Writers' Union of Ukraine for translations of literature. Most translated works are published by the

Dnipro publishing house, where several book series have been established, such as *Biblioteka svitovoi klasyky* (World Classics Library, since 1967), *Perlyny svitovoi liryky* (Pearls of World Lyric Poetry, since 1965), and *Svitova proza 20 st.* (World Prose of the 20th Century, since 1988). Most recently Dnipro published an edition of selected poems by T.S. Eliot (several translators; edited by S. Pavlychko, 1990). Important work in the theory of literary translation has been done by M. Rylsky, O. Kundzich, Y. Bahmut, B. Ten, Z. Bilenko, S. Kovhaniuk, and H. Kochur. Since 1972 a yearly bibliographic survey of translations into Ukrainian has been provided by the journal *Vsesvit*.

Translation has also continued in the emigration since 1945, mainly in drama and poetry. Translations were done mostly by authors who augmented their own literary output with translations. Most prolific was M. *Orest, who translated S. George (1952), M. Dauthenday (1953), R.M. Rilke, H. Hofmannsthal, and C.-M.-R. Leconte de Lisle (1956), and prepared anthologies of German (1954), French (1954), and European poetry (including Italian, English, Spanish, Portuguese, Russian, and Polish, 1959) and a collection of German novellas (1962). V. Vovk prepared an anthology of Portuguese and Brazilian poetry, *Zelene vyno* (Green Wine, 1964), S. Hordynsky compiled *Poety zakhodu* (Poets of the West, 1961), and W. Burghardt edited *Poeziia Kvebeku* (Poetry of Quebec, 1972). V. Vovk and W. Burghardt collaborated on *Four Plays of F. Garcia Lorca* (1974). I. *Kostetsky did much to expand the store of translations into Ukrainian and his publishing house, Na Hori, published some of the finest translations in the post-war emigration: selected poems of F.G. Lorca (edited by I. Kostetsky and translated by members of the *New York Group, 1958); T.S. Eliot's *Murder in the Cathedral* (translated by Z. Tarnavsky, 1963); S. George's two volumes, rendered into Ukrainian and other Slavic languages by I. Kostetsky and O. Zuievsky (1968–71); P. Claudel's *L'annonce faite à Marie* (translated by M. Kalytovska, 1962); selections of E. Pound (by I. Kostetsky, 1960), and W. Shakespeare's *Macbeth*, *Henry IV* (by T. Osmachka, 1961), and *King Lear* (by V. Barka, 1969). I. Koshelivets translated D. Diderot's *Jacques le fataliste et son maître* (1970) and F. Kafka's stories (1989). Selected poems of J. Keats were translated by Ya. Slavutych (1958), some Japanese haiku by I. Shankovskiy (1966), and S. Beckett's *Waiting for Godot* and *Krapp's Last Tape* by B. Boychuk (1972). An interesting collaboration between émigré poets and poets from Ukraine is the translation of S. Kunitz's *This Garland, Danger* (1977), in which B. Boychuk, V. Burghardt, I. Drach, V. Lesych, and G. Tarnawsky collaborated.

Transliteration. The representation of the letters of one alphabet by those of another. Phonetically, the most accurate form of transliteration is the International Linguistic (IL) system used by linguists. The one most commonly used by library catalogers and non-linguistic scholars in the English-speaking world is the Library of Congress (LC) system. Both systems, as well as a modified LC system, are used in this encyclopedia (see vol 1, pp xi-xii). There is no universally accepted transliteration system of Cyrillic. Consequently, when the Ukrainian Cyrillic alphabet is transliterated to the various European languages whose orthography is based on the Latin alphabet, phonetic ambiguities for speakers unfamiliar with other languages sometimes arise. The surname 'Ševčenko' (IL)/'Shevchenko' (LC), for example, is spelled 'Chevtchenko' in the French alphabet, 'Schewtschenko' in the German alphabet, and 'Szewczenko' in the Polish alphabet.

A universally acceptable system for transliterating foreign languages to the Ukrainian Cyrillic alphabet also does not exist. The official orthographic rules of 1928-9, 1933-46, and 1960 regulated only the phonetic assimilation of foreign words by the Ukrainian language, not transliteration. In the Russified system of Soviet Ukrainian orthography, the use of the grapheme 'g' had been banned until 1990, and the spelling of foreign names is determined by their spelling in Russian, which lacks the phoneme (and grapheme) 'h'. Consequently, certain foreign names are distorted; eg, the name 'Hemingway', which would have been spelled 'Hemingvej' (IL) according to the 1928-9 orthography, is instead spelled 'Xeminhvej' under the impact of the Russian spelling 'Xemingvej'.

R. Senkus

Transnistria. An artificial name, meaning 'beyond the Dniester,' for southwestern Ukraine that was introduced at the beginning of the 20th century by Rumanian historians to bolster Rumanian claims to the territory. In 1924 a part of Transnistria was assigned to the Moldavian ASSR. During the Second World War Transnistria was an administrative territory that the Germans had placed temporarily under Rumanian civil authority on 30 August 1941. It covered an area of 40,000 sq km between the Dniester and the Boh rivers as far north as the Liadova and the Riv rivers. It was divided into 13 counties (Mohyliv, Tulchyn, Yampil, Rybnytsia, Balta, Dubosari, Ananiv, Kryve Ozero, Tyraspil, Ovidiopil, Berezivka, Odessa, and Ochakiv) and 65 volosts. Its population was 2.25 million. The governor of Transnistria was G. Alecsianu (1941-4); his capital was Tyraspil and then Odessa. He was subject to the Military-Civilian Cabinet for the Administration of Bessarabia, Bukovyna, and Transnistria, which came under the Rumanian Council of Ministers. The administration of Transnistria was staffed with newcomers from Rumania. Special Rumanianization commissions, known as Directoratul de Romanizare, substituted Rumanian place-names for the existing Ukrainian ones. The official languages were Rumanian, German, and Russian. The Rumanians treated Transnistria like a colony for economic exploitation. In late 1941 about 101,400 Jews from Bessara-

TRANSNISTRIA

bia and Bukovyna were transported to Transnistria, where many of them perished. In April 1943, 3,000 Ukrainians were deported from Rybnytsia to Ochakiv county, and the villages were repopulated with Rumanian colonists. In July 1943 the Rumanian government deported 23,300 Gypsies from Rumania to Transnistria, where almost half of them died.

In the schools (1,300 four-grade schools, 700 seventh-grade, and a few secondary schools in 1943) the languages of instruction were Ukrainian, Rumanian (10 percent), Russian, and German. In Odessa there were 12 Russian but only 1 Ukrainian lyceum. At the postsecondary (university) level the language of instruction was Russian. Ukrainian cultural activity was banned. At first the state and collective farms were left intact. In March 1942 they were reorganized into labor communes, which were divided into brigades of 20 to 30 families and were assigned 200-400 ha of land. Industrial or commercial concerns were handed over to officials or to Rumanian state co-operatives. The Orthodox population was placed under the authority of the Rumanian patriarchate in Bucharest, which set up the Rumanian Orthodox Mission in Transnistria. It was headed by Archimandrite J. Scriban, Metropolitan V. Puiu (1942), and Bishop A. Nica (1943). Local priests of the Ukrainian Autocephalous Orthodox church and the Tikhonites and Renovationists of the Russian Orthodox church continued to be active. In all there were 12 monasteries and 300 to 400 churches, with 600 priests.

When the eastern front approached in early 1944, the administration of Transnistria was turned over to the Rumanian military (Gen Potopianu) and then to the German military authorities. In March 1944 Transnistria was occupied by Soviet forces.

Transportation. Transportation plays a vital role in the production process of any society. It serves as an intermediary, transferring materials and products from one branch of the economy to another and people from one location to another. By linking regions and countries into one market transportation stimulates economic activity and raises the people's standard of living. Ukraine's transportation system was a part of the larger Union system. It was not a competitive but a complementary service, centrally planned and state owned. The Soviet transportation system consisted of universal modes, such as *railroad, *motor vehicle, *sea, *river, *air, and *urban transit, and specific modes, such as electronic, *pipeline, and high-voltage transportation. All of them are well established in Ukraine and have different degrees of efficiency. The size of the basic transportation networks is given in table 1.

The most basic mode remains the railroad. Although its share of the total transportation output has been declining gradually, it is still the most reliable mode of long-distance freight transportation. Between 1940 and 1986 the growth of railroads was low, and quite inadequate for the country's needs. River and sea transportation recovered slowly after the Second World War. To meet the rapidly growing demand for transportation large investments were made in the motor vehicle transport system. The

Air	6.4	7.7 (120.3)	13.9	18.5 (133.1)

highway network expanded fivefold in 1940-86, and the freight and passenger output increased by 44 and 111 times respectively. Starting in the mid-1960s the share of other forms of transportation increased. The railroad output continued to decline in relative terms, and the motor vehicle output grew at a slower rate than before. The slowdown in motor vehicle transport is related to the growth in the number of personal cars (in 1987, 105 cars per 1,000 people), a lower level of employment search, and lower mobility.

The significant differences between Ukraine's share of the former USSR's freight output (see table 6) and of the USSR freight volume (see table 7) in all modes of transportation (except sea transportation) are attributable to the difference in the average haul distance. The hauls become longer as one moves eastward through the former USSR. Ukrainian territory is better suited to intensive surface traffic than many regions in Siberia. Population density together with the intensity of economic activity is responsible for the relatively higher growth rate of motor vehicle

TABLE 6
Freight output of different modes of transportation, 1940–86 (in billion Tkm*;
percentage of USSR output in parentheses)

Mode	1940	1970	1980	1986
Rail	71.9 (17.1)	380.2 (15.2)	469.6 (13.7)	506.2 (13.2)
Motor vehicle	1.7 (18.8)	41.6 (18.9)	70.1 (16.2)	73.3 (14.8)
River	1.1 (3.1)	6.1 (3.5)	10.7 (4.4)	12.7 (4.8)

Air	– –	0.2 (11.1)	0.3 (10.0)	0.3 (9.4)
Pipeline (oil only)	– –	22.1 (6.6)	101.6 (10.7)	124.2 (11.2)
Total	397.2	3,940.6	5,572.9	6,117.7

TABLE 8
Passenger volume for different modes of transportation, 1940–86 (in million
passengers; percentage of USSR volume in parentheses)

Mode	1940	1970	1980	1986
Rail	242.6 (17.6)	506.4 (15.1)	648.9 (16.0)	635.5 (14.6)
Motor vehicle	29.4 (5.0)	5,060.9 (18.5)	7,801.1 (18.5)	8,228.2 (16.9)
River	6.8 (9.3)	21.4 (14.8)	24.8 (18.0)	21.0 (15.4)
Sea	13.7 –	19.8 (50.8)	28.5 (54.8)	28.7 (56.3)
Air	– –	9.7 (13.7)	12.5 (12.0)	12.8 (11.0)
Total	292.5	5,618.2	8,515.8	8,926.2

output in Ukraine (see table 2). The slow but constant drop in rail traffic relative to other modes may indicate that rail cargo has been rerouted to trucks or that the density of the railway network has not kept up with increases in economic activity (see table 3)

After the war passenger traffic in Ukraine grew rapidly but at a slower rate than in the Baltic republics. In the mo-

tor vehicle sector the growth in passenger output and volume was sharp between 1940 and 1970, and rose to 180 and 160 percent respectively between 1970 and 1986 (see tables 4 and 8). Passenger traffic would be much higher today had both railroads and highways grown at faster rates, and had significant improvements been made in the frequency of services. The dynamics of passenger traffic is shown in tables 5 and 9.

The performance of Ukrainian transportation is less

TABLE 9
Share of passenger volume in total volume, 1970 and 1986
(percentages; 1986 as percentage of 1970 in parentheses)

Mode	Ukraine		USSR	
	1970	1986	1970	1986

Other modes (ie, urban transportation)	2.0	2.4	2.9

than desirable for a country with a large industrial base. Under the last three five-year plans Ukraine's share of the USSR fixed capital and capital investments in transportation fell below its share in the USSR industrial output. Its share of fixed capital and investment declined with time (see tables 10 and 11). The distribution of fixed capital among various branches of Ukraine's transportation system was discriminatory against the railways, where larger investments were crucial for industrial growth (see table 12).

E. Bej

Transylvania (Rumanian: Transilvania, Ardeal; Hungarian: Erdély; Ukrainian: Semyhorod, Transylvaniiia, Zalissia). A historical land, until 1918 mainly within the borders of Hungary. Since 1918 it has been part of *Rumania. Transylvania has an area of approx 99,600 sq km. The *Maramureş and *Banat regions have usually been considered part of Transylvania. In ancient times Transylvania was settled by the Dacians. From 106 to 271 it was a Roman province, and its population was partly Romanized. Later it was conquered by the Goths, Getae, Avars, and Bulgarians. Slavs began settling in Transylvania in the 6th century, and from the 9th century *Vlachs settled there. In the 10th century Magyar colonization by freemen known as Szeklers began, and in the 12th century Saxon and other German colonists arrived, who gave the land the name Siebenbürgen (hence, the Ukrainian name Semyhorod).

From the late 9th century Transylvania was under Hungarian rule. In the early 11th century it became part of the Hungarian kingdom but continued to enjoy a high degree of autonomy. After the fall of Hungary and the Battle of Mohács (1526) an independent Transylvanian principality arose. From 1541 to 1687 it was an Ottoman vassal-state. In the 17th century Transylvania was the object of Ottoman-Habsburg contention. In 1699 it became an Austrian crownland. From 1867 until it became part of Rumania it was ruled by the autonomous Hungarian kingdom. In

1940 northern Transylvania was occupied by Hungary, but in October 1944 Rumania regained that area. Rumania's claim was confirmed in the 1947 Treaty of Paris.

Medieval Ukrainian colonization of Transylvania is evidenced by place-names in the region (eg, Rusz, Reusdorf, Russdorf, Ruseşti). The earliest extant documentation of such settlement is a 1220 charter, which refers to the mountain Ruscia and the town Forum Ruthenorum. In the 15th century there were sizable Ukrainian colonies in Transylvania, but they were later assimilated by the Magyars or Vlachs. The 1930 Rumanian census identified only 2,100 Ukrainians in Transylvania outside the Maramureş and Banat regions, most of them in Oradea county.

Ukrainian-Transylvanian cultural and political relations began during the Cossack era. Cossacks serving in the Wallachian army helped Prince Michael the Brave to unite Transylvania with Wallachia and Moldavia (1593–1601). In 1628 Prince Gábor Bethlen supported the idea of Ukraine's secession from Poland as a separate state. Hetman B. Khmelnytsky maintained diplomatic relations with the princes György *Rákóczi I (1630–48) and György *Rákóczi II (1648–60), and he signed an anti-Polish military pact with the latter prince in 1656. In the early 18th century the hetman-in-exile P. *Orlyk maintained relations with Prince Ferenc Rákóczi II. In 1699 some of I. *Galiovsky's homilies were translated into Rumanian and published in Alba Iulia. In 1757 the Transylvanian D. Braşoveanul modeled the first Rumanian grammar, *Grammatica românească*, on M. *Smotrytsky's grammar; he also translated into Rumanian several Slavonic (ie, Ukrainian) books, which were printed in 1792 in Sibiu. Since the Second World War Ukrainian migrants have lived in Cluj, Braşov, and Oradea, and a Ukrainian Orthodox vicariate of the Rumanian metropolity of Transylvania has ministered to parishes where liturgies are celebrated in Church Slavonic.

A. Zhukovsky

Tratsevsky, Mykhailo [Tracevs'kyj, Myxajlo], b 3 January 1897 in Liubinichy, Babruisk county, Minsk gubernia, d 1979. Demographer and statistician. After graduating from the Kiev Institute of the National Economy (1924) he worked at the VUAN Demographic Institute. He wrote a historical study of the populations of Ukrainian towns from 1825 to 1926 (unpublished) and published an analysis of Kiev's population (1929) and infant mortality in Ukraine (1936). In 1937 he was arrested with his colleagues and sent to Siberia.

Travesty. A form of humorous poetry in which a work of serious or heroic content is made comic. The classic example of travesty in Ukrainian literature is I. *Kotliarevsky's *Eneida*, based on Virgil's *Aeneid*, in which the characters (gods and heroes) were dressed in traditional Ukrainian folk garb and amusingly portrayed against the background of daily Ukrainian life. Kotliarevsky's epigones (K. Dumytrashko and others) also wrote in the genre, which came to be known as *kotliarevshchyna*. Travesties also played an important role in the Ukrainian renaissance of the late 18th and early 19th centuries, when literature sought to get closer to the daily language of the people.

Treasurer (*pidskarbi*). A senior court functionary in the Grand Duchy of Lithuania and the Polish Kingdom (15th–18th centuries), who managed the state treasury. The officeholder was also known as the great, crown, or land treasurer, and from 1590 there was also a court treasurer to oversee the personal finances of the king. Until the 18th century the treasurer was not remunerated, a state of affairs which led to persistent corruption. In Lithuania the income of the grand duke was managed by court treasurers until 1569, when the treasurer's position was transferred to the Polish Senate. The Hetman state had a *general treasurer, who was a member of the General Officer Staff (mid-17th to late 18th centuries).

Treaties. Bilateral or multilateral agreements between states or other subjects of international law that set forth the rights and obligations of the signing parties. They are the standard method for establishing international relations and the main source of international law. The parties to treaties are sovereign states, sometimes partly sovereign entities, and international organizations. In the course of its history Ukraine has concluded many treaties. It has often been the object of treaties drawn up by other states.

The Princely era. Kievan Rus' concluded treaties with many states. The texts of Oleh's (911), Ihor's (945), and Sviatoslav I Ihorevych's (971) treaties with Byzantium have been preserved. Those treaties put an end to hostilities and set the conditions for political and economic relations between the states. They also included articles on the legal status and the criminal liability of a state's subjects on the other signatory's territory. In the chronicles there are frequent references to treaties with other states, such as Poland, Bohemia, Hungary, and Bulgaria, but their texts have been lost. There is some information about a defensive alliance against Poland, Lithuania, and the Tatars concluded by the Principality of Galicia-Volhynia and the Teutonic Knights between 1308 and 1316. To some extent the agreements among the princes of the Kievan and Galician-Volhynian states can be regarded as treaties, since the constituent principalities were somewhat autonomous.

In the 14th and 15th centuries the northern and western Ukrainian territories were often the subject of treaties among neighboring states. In 1339 Hungary and Poland reached a compromise on their control of Galicia, and in 1352 and 1366 Poland and Lithuania divided western Ukraine between them. In the Grand Duchy of Lithuania, as in Kievan Rus', both the grand prince and the appanage princes had the power to make treaties. But the appanage princes could sign agreements affecting only their own lands, and under the supervision of the grand prince. Political treaties affecting the whole state were entered into by the grand prince in consultation with the Council of Lords; trade agreements could be concluded by the prince alone. The most important Lithuanian-Polish treaties affecting Ukrainian territories were the unions of *Krevo (1385), *Horodlo (1413), and *Lublin (1569). In the 15th to 17th centuries there were also some agreements between Muscovy on the one side and Lithuania and Poland on the other that dealt with Ukrainian territories.

The Cossack period. From the mid-16th century, when the Zaporizhia became a separate military-political entity, its leaders concluded military agreements with the rulers of Poland, Lithuania, the Austrian Empire, Muscovy, Moldavia, the Don Cossacks, and the Crimean Khanate. Issues

such as the Cossack register, Cossack privileges, and the political and religious rights of the Ukrainian people were settled by negotiation between the *starshyna* of the town Cossacks and the Polish crown. Agreements such as the *Kurukove (1625) and *Pereiaslav (1630) treaties were somewhat less than full-fledged international treaties.

Upon setting up an independent Cossack state Hetman B. Khmelnytsky established a wide range of diplomatic contacts. He entered into a number of military-political alliances with the Crimean Khanate (1648), Turkey (1648 and 1651), Poland (the *Zboriv and *Bila Tserkva treaties), Moldavia (1653), Muscovy (the *Pereiaslav Treaty of 1654), Sweden (the military convention of 1655), and Transylvania (1656). The further development of Ukraine's relations with those countries was marked by new treaties. The more important treaties with Poland were those of *Hadiache (1658) and *Slobodyshe (1660) and I. Mazepa's secret alliance with Stanislaus I Leszczyński (1708). Ukraine's gradual subjugation by Muscovy is reflected in the so-called Hetman articles, consisting of the *Pereiaslav (1659 and 1674), *Moscow (1665), *Hlukhiv (1669), *Konotip (1672), and *Kolomak (1687) articles. Hetmans I. Vyhovsky (1657) and I. Mazepa (1708, 1709) entered into military alliances with Sweden. P. Doroshenko (1668), Yu. Khmelnytsky (1677), and P. Orlyk (1712) signed treaties with Turkey, and P. Ivanenko (1692) and P. Orlyk (1711) made agreements with the Crimean Tatars.

Ukraine's neighbors fought among themselves for control over Ukrainian territories and divided the spoils in a number of treaties. The more important ones were the Treaty of *Andrusovo (1667) and the *Eternal Peace of 1686 dividing Ukraine along the Dnieper River between Poland and Muscovy, the *Buchach Peace Treaty of 1672 between Poland and Turkey recognizing Turkey's protectorate over Doroshenko's state, and the peace treaties of *Küçük Kaynarca (1774), Iași (1791), and *Bucharest (1812), by which Turkey surrendered control of the northern coast of the Black Sea to Russia. In the three partitions of Poland, Prussia, Austria, and Russia agreed to hand Galicia (1772) and the Kholm region with southern Podlachia (1795) to Austria and Right-Bank Ukraine (1793) and Volhynia (1795) to Russia. By a separate agreement between Austria and Turkey in 1775, Bukovyna was acquired by Austria. In the Paris Peace Treaty (1856) ending the *Crimean War Russia surrendered the Danube Estuary and its right to keep a navy on the Black Sea.

Ukrainian statehood, 1917–20. On 9 February 1918 the UNR signed the Peace Treaty of *Brest-Litovsk with the Central Powers. It was followed by a series of international treaties with the Central Powers and other neighboring countries. Economic agreements were reached with Germany, Austria-Hungary, and Rumania, and trade and communications conventions with the Don krai, the Kuban, and Georgia. The preliminary peace treaty (12 June 1918) and the agreement on communications with Russia did not, however, culminate in a final peace treaty. On 21 April 1920, after long negotiations, the UNR signed the Treaty of *Warsaw with Poland.

In a formal sense the agreement on the unification of the UNR and the Western Ukrainian National Republic, concluded on 1 December 1918 at Khvastiv and ratified by the Directory of the UNR on 4 January and the Labor Congress on 22 January 1919, was an international treaty, since the signatories were separate states.

Soviet Ukraine. The Soviet government of Ukraine signed a number of fundamental treaties regulating its relations with Soviet Russia: the economic and military union among Soviet republics of 1 June 1919 (in the form of a resolution of the All-Russian Central Executive Committee), the so-called workers' and peasants' union treaty of 28 December 1920 between Ukraine and Russia, and the founding treaty of the USSR on 30 December 1922, signed by the RSFSR, the Ukrainian SSR (URSR), the Belorussian SSR (BSSR), and the Transcaucasian SFSR.

In 1919–23 the URSR exercised its power to conduct foreign relations and signed, alone or together with other Soviet republics, over 50 international treaties with non-Soviet states. The most important of them was the Peace Treaty of *Riga, signed on 18 March 1921 by Poland, the RSFSR, and the URSR. The other international treaties fall into four groups. Political treaties granting formal recognition, providing for diplomatic and consular exchanges, and rejecting interference in internal affairs were signed with Poland, Estonia, Latvia, Lithuania, Austria, Czechoslovakia, Germany (an extension of the Rapallo Treaty), and Turkey (21 January 1922). Special agreements on legal issues, such as option procedure, resettlement, citizen status on foreign soil, the resolution of jurisdictional conflicts, and border arrangements, were concluded with the Baltic countries and Poland. Ukraine entered into some social and humanitarian treaties (agreements on exchange of war prisoners, internees, and refugees and on sanitation) with Germany, Austria, Hungary, Italy, Turkey, Poland, and the Baltic states and a special agreement with the Epidemiological Commission of the League of Nations. Special communications agreements on rail transportation and postal services were made with Poland and the Baltic countries. Economic issues were mentioned in the peace treaty with Poland, the Rapallo Treaty, and the provisional agreements on diplomatic relations with Austria and Czechoslovakia. There are also many treaties to which the URSR was a partner with the RSFSR or other Soviet countries. Some of them were signed by the Russian government on Ukraine's behalf under the pretext of the so-called diplomatic union of Soviet republics. Some of the international treaties of the URSR were ratified by its constitutional organs; others came into effect without ratification. With the creation of the USSR Ukraine's treaty obligations were assumed by the Union institutions according to diplomatic notes from the URSR government (16 June 1923) and the USSR People's Commissariat of External Affairs (21 July 1923) to foreign governments.

From 1923 to 1944 the URSR did not have the power to conduct its own foreign policy and to conclude treaties. The constitutional changes of 1 February 1944 restored its right 'to have direct relations with other countries, enter into treaties with them, and exchange diplomatic and consular representations' (Art 15b, URSR Constitution). But that was not an exclusive or indivisible right, for the USSR reserved for itself the same right. The republics exercised the right only under the supervision of the Union organs. The only bilateral treaties signed by the URSR after 1944 were the resettlement agreement with the Polish Committee of National Liberation (9 September 1944) and the cooperation and relief agreement with the United Nations Relief and Rehabilitation Administration (18 December 1945). All other treaties affecting Ukraine's territory and economic and cultural relations with other countries were

concluded by the USSR, not by the URSR – Czechoslovakia's surrender of Transcarpathia (26 June 1945), for example, and the settlement of the Ukrainian-Polish border (18 August 1945). The URSR was a separate participant with its own delegation in many multilateral treaties, however. It was a signatory of the *Paris Peace Treaties of 1947 with Bulgaria, Italy, Rumania, Hungary, and Finland. On 18 August 1948 it signed the Belgrade Convention on the use of the Danube River, but it turned down a seat on the Danube Commission.

The URSR signed and ratified the statutes of various *international organizations, such as the United Nations and its special bodies. As a member of those organizations the URSR signed many multilateral conventions. In 1953 it joined the convention on UN privileges and immunities, in 1958, the convention on slavery, and in 1948, the convention of the World Meteorological Organization. By 1956 the URSR had ratified 18 conventions (out of 110) of the International Labor Organization dealing with labor and social security. By the end of 1983 it had adopted 43 such conventions. The representatives of the URSR participated in the conferences of the World Health Organization and signed several treaties and protocols on health (1946). By signing the respective conventions the URSR became a member of the Universal Postal Union (1947) and the International Telecommunication Union (1947). In the 1950s the URSR joined several conventions on social questions: the Convention on the Political Rights of Women (1953), the Convention on the Prevention and the Punishment of the Crime of Genocide (1948, ratified by the URSR in 1955), the Supplementary Convention on the Abolition of Slavery, the Slave Trade, and Institutions and Practices Similar to Slavery (1956), and the Convention on the Nationality of Married Women (1957). The URSR was party to two important human rights treaties adopted in 1966 and put into effect in 1976: the International Covenant on Civil and Political Rights and the International Covenant on Economic, Social, and Cultural Rights. In that field Ukraine also signed the International Convention on the Elimination of All Forms of Racial Discrimination (1965) and a convention against apartheid (1974). Having become a member of UNESCO in 1954, the URSR participated in the preparation of its Convention on the Preservation of Cultural Property in the Event of Armed Conflict and adopted the convention along with the supplements. In the 1970s the URSR signed three conventions drafted by UNESCO as well as several technical conventions prepared by the Universal Postal Union and the International Telecommunication Union. In 1970 and 1971 the URSR ratified two conventions on the prevention of airplane hijacking, which were prepared by the International Civil Aviation Organization. The URSR was also party to three conventions proposed by the International Maritime Organization dealing with the improvement of maritime shipping (1965), the prevention of marine pollution by dumping waste and other matter (1972), and the safety of life at sea (1974). The URSR participated in the Red Cross conference in Stockholm that drafted a number of conventions dealing with the relief of the wounded and sick in armies of the field, the treatment of prisoners of war, the adapting of the principles of the Geneva convention of 1906 to maritime warfare, and the protection of civilians in wartime. Those conventions were ratified by the URSR in 1954. As a participant in the UN Conference on the Law of the Sea in

1958, the USSR helped codify and adopted three laws: on territorial sea and the contiguous zone, on the high seas, and on the continental shelf. In 1982 also it was a party to the UN Convention on the Law of the Sea. It participated in the codification of other branches of international law, such as the Vienna Convention on Diplomatic Relations (1961) and the Vienna Convention on Consular Relations (1963). The USSR was a signatory of several arms-limitation treaties: the Moscow treaty banning all but underground nuclear testing (August 1963), the treaty dealing with the principles of the activity of states in the exploration and use of outer space, the moon, and other celestial bodies (1967), the treaty prohibiting the emplacement of nuclear weapons and other weapons of mass destruction on the seabed and ocean floor (1971), and the convention against developing, producing, and stockpiling bacteriological and chemical weapons (1972).

The USSR Constitution did not stipulate who had the power to ratify or annul international treaties. Following the practice of the USSR government the Presidium of the Supreme Soviet of the USSR made those decisions. The peace treaties of 1947 were ratified only by the Presidium of the Supreme Soviet of the USSR, which noted that 'the ratification extends also to the USSR and the BSSR.' Ukraine's power to negotiate and ratify international treaties was exercised in fact by the USSR government, which decided when and how the USSR could pose as a separate entity in foreign affairs. It used the fiction of Ukraine's sovereignty to bolster Soviet influence in international diplomacy.

Independent Ukraine. After the referendum of 1 December 1991 confirming Ukraine's independence Ukraine won quick recognition from other countries and began to establish diplomatic relations with them. The United States exchanged notes with Ukraine on full diplomatic relations on 23 January 1992; it was followed by Canada on 27 January. By February 102 countries had recognized Ukraine, and 41 of them had exchanged notes on diplomatic relations. In the next three months Ukraine signed a treaty of friendship and co-operation with Turkey, agreements on economic and political co-operation with Iran, and agreements on unrestricted diplomatic travel, economic co-operation, and co-operation on environmental protection with the United States (see also *International legal status of Ukraine).

Pages from the *Trebnyk* of Metropolitan P. Mohyla (1646)

Trebnyk. A liturgical book that contains the services and prayers used for all the sacraments except Holy Orders and the Holy Eucharist. Called a Book of Needs or Sacramentation, it is one of the most essential *liturgical books. The first translations into Church Slavonic were made in the 9th century. The most complete edition of the *trebnyk* includes the ritual for the blessing of a church, its furnishings, and appointments; the ritual for the blessing of holy objects; and blessings and prayers for specific needs. The shorter version contains the rituals for the administering of sacraments (baptism, marriage, anointing with oil, penance), the offices for the dead, and certain blessings used during the year.

The definitive version of the *trebnyk* used in the Ukrainian Orthodox Church was prepared by P. *Mohyla and published in 1646 (republ in Paris in 1988). This edition contains some 20 rituals not performed in other Eastern churches – eg, services for the uncovering of holy relics and for the blessing of monasteries – that were of local origin.

Tree of heaven (*Ailanthus altissima*; Ukrainian: *ailant vysokyj* or *kytaiskyj yasen*). A rapid-growing tree of the family Simaroubaceae, also known as the copal tree or the varnish tree. In Ukraine it is found in the southern and southwestern territory as a decorative tree in parks and as a protector against erosion for steep banks, ravines, and gullies.

Treecreeper (*Certhia*; Ukrainian: *pidkoryshnyk*). Small, slender, valuable birds of the family Certhiidae or Climacteridae, with downcurved bills. Some treecreepers migrate in the winter, depending on the latitude. The birds nest behind loose tree bark or in tree cracks and feed on insects and spiders found in the trees. In Ukraine the common treecreeper (*C. familiaris*) inhabits the territory of Polisia, the forest-steppe, and the Carpathian and Crimean mountains; the short-toed creeper (*C. brachydactyla*) is found in Transcarpathia.

Trefilov, Viktor, b 6 August 1930 in Baku, Azerbaidzhan. Physicist and metallurgist; AN USSR (now ANU) corresponding member since 1973. A graduate of the Kiev

Viktor Trefilov

Polytechnical Institute (1952), he worked at the ANU Institute of Metal Physics (1955–73). Since 1973 he has directed the ANU Institute for Problems of Materials Science, and in 1974 he was elected a vice-president of the ANU. Trefilov has contributed to the physics of metals, materials science, the theory of the strength of materials, the theory of the plasticity of materials, and powder metallurgy. As a member of the CC CP(B)U in 1976–86, he influenced science policies and strove to impose the Russian language in all scientific communications in Ukraine.

Trehubov, Yelysei, b 1848 in Poltava, d 4 December 1921. Teacher and journalist. A graduate (1872) of Kiev University, he taught in Hlukhiv, Kursk, and Sumy before settling in Kiev in 1876. There he taught at the Galagan College, was involved with the Old Hromada, and worked closely with V. Naumenko in the publishing of *Kievskaiia starina*. In 1918 he became involved in the early work of the Ukrainian Academy of Sciences.

Trehubova, Valentyna, b 15 May 1926 in Brovary, Kiev okruha. Porcelain artist. A graduate of the Lviv Institute of Applied and Decorative Arts (1954), she has worked at the Korosten Porcelain Factory as a sculptor of porcelain figurines. Many have folk themes, such as *Ukrainian Wedding* (1960), *Where Are You Going, Yavtush?* (1965), *Natalka from Poltava* (1966), and *Marusia Churai* (1978).

Trembita. A publishing house in Kolomyia, owned and directed by Z. Kurylovych (pseud: Bohdan Hryhorenko). From 1922 to 1929 it published popular literature, children's books, plays, and an annual almanac. Among the works published were Yu. Tiutiunyk's memoirs of the 1919–20 Winter campaigns, A. Chaikivsky's novel *Oleksii Korniiienko*, K. Polishchuk's novel *Otaman Zelenyi*, K. Kobersky's booklet on Ukrainian populism, O. Kuzma's Esperanto textbook, K. Verbytsky's Ukrainian-Esperanto dictionary, T. Shevchenko's *Kobzar*, B. Hrinchenko's brief history of Ukraine, and Ye. Yavorivsky's book on Greek and Roman mythology.

Trembita. A professional mixed chorus founded in Lviv in 1940. The group's first artistic director and conductor was D. Kotko, who was followed by P. Honcharov, O. Soroka, M. Kolessa, P. Muravsky, V. Vasylevych, Y. Vakhniak, V. Pekar, and (since 1978) I. Zhuk. The ensemble's repertoire includes the folk songs of Ukraine, contempo-

rary choral works, and classical music. The chorus has performed throughout the former USSR and has recorded on the Melodiya label.

Trembita players and other members of a Transcarpathian folk-instrument orchestra

Trembita (alpine horn). A wind instrument made from hollowed halves of spruce wood and bound with birch bark. Generally conical, with a metal or horn mouthpiece at the narrow end, 1 to 3 meters in length, it has a musical range of over two octaves. The sound is strong and can carry over 10 kilometers. The *trembita* is found mainly in the Carpathian region of Ukraine. It has served as a means of communication for people and herdsmen in isolated mountain areas, who would use a series of predetermined signals, especially to give notice of a death, a funeral, or a wedding. Occasionally the *trembita* is included in modern symphony orchestras as an exotic instrument.

Trembovetsky, Apollon [Trembovec'kyj] (pseud: Petro Pavlovych), b 27 February 1913 in Pidzamche, Kamianets-Podilskyi county, Podilia gubernia, d 1 March 1968 in Ortanna, Pennsylvania. Journalist and civic activist. A teacher by vocation, he witnessed the *Vinnytsia Massacre during the Second World War and wrote many books and articles about it, including *Zlochyn u Vinnytsi* (A Crime in Vinnytsia, 1973). After emigrating to the United States following the Second World War, he served for many years as president of the Democratic Alliance of Formerly Repressed Ukrainians from the Soviet Union and as vice-president of the Ukrainian Congress Committee of America. He also contributed articles to *Svoboda* and wrote a number of booklets about T. Shevchenko and M. Kotsiubynsky.

Trembytsky, Isydor [Trembyc'kyj], b 1847 in Stany-slaviv, Galicia, d 23 July 1922 in Rava Ruska, Galicia. Stage actor, director, and writer. He played in the Ruska Besida Theater in the 1870s, wrote the dramas *Obloha Plevny* (The Siege of Plevna, 1878) and *Na sviatoho Andriia* (On St Andrew's Day, 1880), and founded the H. Kvitka-Osnovianenko Literary-Dramatic Society in Kolomyia (1879).

Trenton. The capital (1980 pop 92,000, metropolitan area 308,000) of New Jersey, and an industrial center on the Delaware River. In 1980 there were about 2,000 Ukrainians in the area. Immigrants from Transcarpathia began to arrive in Trenton in the 1890s. By 1900 they had established a Greek Catholic parish, and by 1919 an Orthodox parish. In 1903 a branch of the Ruthenian (now Ukrainian) National Association was set up. St Josaphat's Catholic parish was founded in 1949. A large Ukrainian-American cultural center is situated on the south side of the city.

Treshchakivsky, Lev [Treščakivs'kyj], b 1810, d 1874. Greek Catholic priest and Galician civic leader. He was a member of the Supreme Ruthenian Council and the Halytsko-Ruska Matytsia society. In 1861–6 he served as deputy to the Galician Diet. His articles appeared in *Zoria halytska* and other papers. He also wrote the first Ukrainian handbook on beekeeping (1855).

Tretiak, Józef, b 28 September 1841 in Mali Biskupychi (now Novovolynske), Volodymyr-Volynskiy county, Volhynia gubernia, d 18 March 1923 in Cracow. Polish literary scholar and historian of Ukrainian origin; member of the Polish Academy of Sciences from 1888. During the Polish Insurrection of 1863–4 he was the rebel commander of Kiev. From 1867 to 1886 he lived in Lviv, where he worked as a Polish theater critic and teacher. He received a PH D from Lviv University. From 1894 to 1911 he was a professor of Ukrainian literature and language at Cracow University. His works with Ukrainian content include a study, in Ukrainian, of A. Mickiewicz's influence on T. Shevchenko (1892); monographs, in Polish, on J. Słowacki (2 vols, 1904), B. Zaleski (3 vols, 1911–14), and P. Skarga and the Church Union of Berestia (1912); a survey of Old Ruthenian poetry (1918); and a history of the Battle and Peace Treaty of Khotyn (1921).

Tretiak, Oleh [Tretjak], b 18 January 1939 in Pidkamin, Brody county, Galicia. Computer scientist, specialist in computer image processing. He studied at the Cooper Union (New York) and at the Massachusetts Institute of Technology (ScD, 1963). Since 1973 he has been on the faculty (professor, 1984) of the Department of Electrical and Computer Engineering at Drexel University in Philadelphia. He is currently director of the Drexel University Imaging and Computer Center. Tretiak has served as managing editor of *Information and Control* and as associate editor of *IEEE Transactions on Medical Imaging*. He has made major contributions to computed tomography, biomedical image processing, and quantitative autoradiography.

Tretiak, Vasyl [Tretjak, Vasył'], b 6 December 1926 in Komarivka (now in Kursk oblast RF), d 16 April 1989. Opera singer (dramatic tenor). He graduated from the Kharkiv State Conservatory in 1958, and from 1962 was a soloist of the Kiev Theater of Opera and Ballet.

Tretiak, Vladislav [Tretjak], b 25 April 1952 in Orudovo, Moscow oblast, Russian SFSR. Soviet hockey goalkeeper of Ukrainian descent. Since 1971 he has played lead goalkeeper on Soviet hockey teams in international competitions; he won gold medals at the 1972 and 1976 Olympic Games and has won the world championship 10 times.

Tretiakov, Dmytro [Tret'iakov], b 5 November 1878 in Shumorovo, Mologa county, Yaroslavl gubernia, Russia, d 26 September 1950 in Kiev. Zoologist and morphologist; full member of the AN URSR (now ANU) from 1929. A graduate of St Petersburg University (1900), he was a professor at Odessa University (1912–41) and founder and director of its Scientific Research Institute of Zoology (1930–41). He worked at the ANU Institute of Zoology in Ufa (1941–4) and was its director (1944–8), and taught at Kiev University (1944–8). His research was in the fields of histology, comparative anatomy, and phylogeny.

Tretiakov, Robert [Tretjakov], b 26 February 1936 in Perm, Russia. Ukrainian poet of Russian origin. He graduated with a degree in journalism from Kiev University in 1985 and worked on the editorial boards of various newspapers in Kharkiv and the journal *Prapor* (now *Berezil*). His first published work appeared in 1955. His collections of verse include *Zorianist'* (Starriness, 1961), *Palitra* (Palette, 1965), *Portrety* (Portraits, 1967), *Poezii* (Poems, 1971), *Osinnie skresalo* (Autumnal Thaw, 1980), and *Poezii* (Poems, 1986).

Trial by jury. A court proceeding in which, besides a judge, a body of ordinary citizens known as the jury takes part. Trial by jury originated in England and spread from there to the United States. In the 19th century it became widely accepted in Europe. The jury does not play an active role in the trial; it follows the proceedings and, at the end, makes a judgment on the guilt or innocence of the defendant. Depending on the verdict, the judge or judges determine the punishment. Jurors do not serve continuously but only for limited terms.

Trial by jury was introduced in Russian-ruled Ukraine with the judicial reform of 1864. It was compulsory for serious criminal offenses punishable by over 10 years' imprisonment or by death, and for political and religious crimes. In the early 20th century, doubts about the institution's usefulness arose, and the powers of the jury were gradually reduced. Efforts were made to exclude the jury from political trials. One of the strongest defenders of the institution in Ukraine was O. *Kistiakovskiy.

In Austrian-ruled Ukraine, trial by jury was introduced in 1873 for political crimes, illegal publications, and other crimes punishable by over 10 years' imprisonment or by death.

In Ukrainian territories under Polish rule, trial by jury was grounded in the Polish Constitution of 1921 and the Austrian criminal law that continued to be binding in Galicia. The Polish Criminal Code of 1928 also provided for jury trials, but they were abolished a few years later, and the new constitution did not mention them.

In Rumanian-ruled Ukrainian territories, trial by jury was practiced until 1936. In Czechoslovakia, juries were also abolished in the 1930s. The abolition of trial by jury reflected the theoretical argument that jurors who are unfamiliar with the law cannot render a fair verdict.

In the USSR, trial by jury was considered to be 'bourgeois.' Citizen participation in the court system was limited to so-called *people's assessors, who sat with the professional judges on all courts of first instance. Although assessors had the same rights as judges, they were in practice dependent on them.

Trial by ordeal. A primitive way of determining the truth of a claim or accusation, based on the belief that the outcome reflects the judgment of some divine power. Usually known in Ukrainian as *sud Bozhyi* (divine trial), such trials were first mentioned in **Ruskaia Pravda*. The ordeal can take several forms. In Ukraine the most common form was casting lots, submersion in cold water, or burning by hot iron. From the 13th century the *duel was accepted as a form of trial by ordeal. Swearing an oath on the Bible or kissing a cross could also be considered a form of trial by ordeal. Ordeals were used only when it was difficult to establish a person's guilt or innocence. They were practiced in Ukraine as late as the 17th century.

Trial of the 59 (aka Trial of the Second OUN Executive in the Western Oblasts of Ukraine). The trial of a group consisting of university students (the majority of the defendants), Rev R. Berest, and several leading OUN members (A. Berezhovsky, D. Kliachkivsky, M. Kovaliuk, B. Kunytsky, I. Maksymiv, M. Matiichuk, and S. Nyrka), held in Lviv at the NKVD headquarters on 17–19 January 1941. The charges included treason and preparation for an uprising. The defendants, most of whom were active in the OUN resistance to the Soviets, had been arrested during September 1940. Their defense counsel included R. Kryshchalsky, V. Zhovnur, and I. Skybinsky. The court sentenced 42 of the defendants, including 11 women, to death and the others to 10 years of hard labor. In February the Supreme Court of the Ukrainian SSR confirmed the death sentences, but in March the Supreme Soviet of the USSR commuted the death sentences of 10 women and 11 men to 25 and 15 years of hard labor. The rest were executed. Those sentenced to labor camp were deported to Omsk in March. On 20–21 June 1941 the remaining prisoners, except for four sick women, were taken to Berdychiv. When German troops approached the town the guards set the prison on fire. The inmates broke down the doors and tried to escape but were forced back by gunfire. Two were killed; the survivors emerged from the prison after the guards had fled.

Trial of the Union for the Liberation of Ukraine. See Union for the Liberation of Ukraine.

Trianon, Treaty of. A treaty concluded on 4 June 1920 at the Grand Trianon Palace in Versailles between Hungary and the Allies. Under the terms of the treaty Hungary was compelled to cede Transcarpathia and Slovakia, which would form part of the republic of Czechoslovakia. In addition Hungary surrendered territory to Rumania, Yugoslavia, and Austria. The Treaty of Trianon became effective on 26 July 1921. After the Second World War the territorial delimitations of the Trianon Treaty were confirmed by the Paris Peace Treaty of 1947.

Triasylo, Taras. See Fedorovych, Taras.

Tribe. A group of people with a common language, culture, and way of life and a tradition of common descent. Larger societies that are unified by a state and have lost the sense of kinship are not called tribes. For many millennia before the rise of Kievan Rus', Ukraine was inhabited by various tribes. They engaged mostly in agriculture and animal husbandry and held an animistic view of the world. By the 6th century AD a number of proto-Ukrainian

tribes had emerged, including the *Polianians, *Siverianians, *Derevlians, *Dulibians (later known as Buzhanians and Volhynians), *White Croats, *Ulychians, and *Tivertsians. They traded among themselves and with their neighbors. The tribes generally were ruled by an assembly (*viche*) of all the free men and the elders elected by it. They themselves did not establish a common state. It was the foreign *Varangians who, in the mid-9th century, laid the foundation of the Rus' state by bringing the tribes under their rule. Eventually dynastic ties and a sense of national identity superseded tribal loyalties.

Tributary peasants (*seliany-dannyky*). The largest group of **pokhozhi* peasants in the Lithuanian-Ruthenian state, Volhynia, and the Kiev region during the 15th and 16th centuries. They lived on state or private lands that were mostly forested, and their primary activities were hunting, fishing, and beekeeping. They also mined ores, coal, and salt. Besides a *tribute (*danyina*) in kind (eg, furs, honey) they paid a monetary tribute (*serebshchyna*) for the use of cultivated land and performed various services for the landowner, including harvesting and tilling. In 1588 the status of tributary peasants was changed to that of state or landowner's serfs (see *Serfdom).

Tribute (*danyina*). A direct tax paid by subjects (*piddani*) to the state. In ancient times Slavic tribes paid a tribute to their conquerors. Later the tribute became a permanent ongoing duty to the state. In Kievan Rus' the units of *taxation were the household (*dym*) and the farming family (*rulo*). In the 13th century a head tribute was introduced by the Tatars, who conducted a census. Persons obliged to pay the tribute were known as *danski liudy* (tribute people) or *dannyky* (tributors); they were registered in tribute books by the volost in which they lived. The tribute was paid with money or in kind (eg, bread, honey, furs, livestock). During the period of the Lithuanian-Ruthenian state the tribute was paid to the princes and the grand dukes, who collected it by traveling around their realms (*poliuddia*). Beginning in the 15th century the tribute was exacted by landowners, and labor was added to the possible forms of tribute; peasants provided the labor, for example, for road building and maintenance. Under the Hetman state the peasants and burghers paid tribute, which was spent on the administration of the Hetmanate and local governments and was also sent to the tsar in Moscow. (See also *Land tenure system and *Quitrent.)

Trident (*tryzub*). The official coat of arms of Ukraine is a gold trident on an azure background. As a state emblem the trident dates back to Kievan Rus', when it was the coat of arms of the Riuryk dynasty. There are various theories about its origins and meaning. A trident was the symbol of Poseidon, the sea god of Greek mythology. It has been found in different societies, such as the Bosphoran and Pontic kingdoms, the Greek colonies on the Black Sea, Byzantium, Scandinavia, and Sarmatia, and has been used in various ways: as a religious and military emblem, a heraldic symbol, a state emblem, a monogram, and simply a decorative design. The oldest examples of the trident discovered by archeologists on Ukrainian territory date back to the 1st century AD. At that time the trident probably served as a symbol of power in one of the tribes that later became part of the Ukrainian people. The trident was

Depiction of a trident on a tile unearthed at the site of the Church of the Tithes in Kiev

stamped on the gold and silver coins issued by Prince Volodymyr the Great (980–1015), who perhaps inherited the symbol from his ancestors as a dynastic coat of arms and passed it on to his sons, Sviatopolk I (1015–19) and Yaroslav the Wise (1019–54). Iziaslav Yaroslavych (1054–78), Sviatopolk II Iziaslavych (1093–1113), and Lev Danylovych (1264–1301) used the bident as their coat of arms. Although the trident continued to be used by some ruling families as a dynastic coat of arms until the 15th century, it was replaced as a state emblem in the 12th century with the Archangel Michael. The trident was also used as a religious symbol in Ukrainian folklore and church heraldry.

The tridents on the various coins minted in Kievan Rus' and, in the middle, trident shapes and letters laid out to spell 'Basileus,' the Greek title used by all eastern rulers

The trident appeared not only on coins but also on the bricks of the Church of the Tithes in Kiev (986–96), the tiles of the Dormition Cathedral in Volodymyr-Volynskyy (1160), and the stones of other churches, castles, and palaces. It was also used as a decorative element on ceramics, weapons, rings, medallions, seals, and manuscripts. Because of its wide use in Rus' the trident evolved in many directions without losing its basic structure. Some of the variations include the bident, the trident with a cross on one of the arms or at the side, and the trident with a half-moon. Almost 200 medieval variations on the trident have been discovered.

At M. Hrushevsky's recommendation Prince Volodymyr's trident was adopted by the Little Rada (12 February 1918) and the Central Rada (22 March 1918) as the coat of

The tridents of the great and small coats of arms and great seal of the UNR

arms of the UNR. By that act the UNR leaders linked the modern Ukrainian state with the medieval state of Kievan Rus'. The Great and Minor state emblems of the UNR were designed by V. Krychevsky. The trident also appeared on the UNR bank notes, which were designed by H. Narbut, O. Krasovsky, V. Modzalevsky, Krychevsky, and others. It was retained as the official coat of arms by the Hetman government and the Directory. The trident with a crossed middle arm was confirmed on 18 July 1918 as the emblem of the Black Sea Fleet. On 15 March 1939 the Diet of Carpatho-Ukraine adopted the trident with a cross as its official coat of arms. On 19 February 1992, after the restoration of Ukraine's independence in 1991, the Supreme Council accepted the trident as the chief element in the state coat of arms.

The gold trident on a blue shield adopted as Ukraine's small coat of arms by the Supreme Council of Ukraine on 19 February 1992

Various versions of the trident are used by Ukrainian organizations: supporters of the Hetman regime and certain affiliates of the Ukrainian Catholic church use a trident with a cross, nationalist organizations use a trident with a sword in the middle (designed by R. Lisovsky), and the Ukrainian Native Faith church has incorporated the trident into its blazing sun emblem.

Trident Press (Vydavnycha spilka Tryzub). One of the major Ukrainian publishing houses in Canada. Originally

called the Ukrainian Publishing Company of Canada, the Trident Press was established in Winnipeg in 1909 by Ukrainian bilingual teachers to publish the newspaper **Ukrains'kyi holos*. By 1918 the newspaper and the press were identified with the nascent Ukrainian Orthodox Church of Canada. Other Trident Press publications include *Visnyk* (organ of the Ukrainian Orthodox church), *Promin'* (organ of the Ukrainian Women's Association of Canada), and books in Ukrainian and English, including many works on Ukrainian-Canadian themes. In 1973 Trident Press bought out the rival **Kanadiis'kyi farmer*.

Trier Psalter (Trirskyi psaltyr). A medieval Latin literary and artistic monument written and illuminated in the late 10th century for Archbishop Egbert of Trier. The psalter was later brought to Rus' by Gertrude, the daughter of King Bolesław II of Poland and the wife of Grand Prince Iziaslav Yaroslavych of Kiev. In 1078–87 five illuminated miniatures were added to the book: a portrayal of Iziaslav's son Yaropolk and Yaropolk's wife, Kunigunde, praying to St Peter, by one artist; depictions of Christ's Nativity, the Crucifixion, and Christ crowning (marrying) Yaropolk and Kunigunde, by another artist; and a miniature of the Theotokos, by a third artist. The miniatures were done in either Lutske, Volodymyr-Volynskyi, or, most likely, St James's Monastery on the Danube. They are similar in style and motifs to those in the **Izbornik* of Sviatoslav (1073) in their combination of folk ornamentation with the features of Byzantine-Rus' and Romanesque illumination. The psalter is now in Italy.

Trinity Cathedral (Troitskyi sobor). A monument of Ukrainian wooden architecture in Novomoskivske (formerly Novoselytsia), Dnipropetrovske oblast. It was built in 1775–80 by Ya. Pohrebniak and financed by leaders of the Zaporozhian Sich (Otaman I. Chepiha, A. Holovaty), other Cossacks, and the cathedral elders. The 27 × 27 m structure is the only wooden church in Ukraine consisting of nine sections, each topped with a three-tier dome. Its central dome is the highest (approx 65 m). It is surrounded by four slightly lower domes separated from each other by still lower domes. The church was repaired in 1830 and renovated in 1888 with some basic changes: the interior walls no longer sloped toward the center, the form of the domes and arches was simplified, and the rotten vertical planking was replaced by horizontal planking.

Trinity Church in Pakul (Troitska tserkva). A masterpiece of the Chernihiv school of wooden architecture, built by an unidentified master builder in 1710 in the village of Pakul, now in Chernihiv raion, Chernihiv oblast. The church no longer exists. Its five pine-log frames, standing on a cruciform ground plan (21.5 × 17.5 m), had two tiers and were connected internally by carved arches 10 m high. The church's height (including the crosses at the top) reached 31 m. To create the illusion of greater height the builder had sloped the interior walls inward at an incline of 5–6 cm per m of height. The door frames, cornices, and parapets of the choir balcony were decorated with carvings. The technical and artistic design of the church's inner space had no parallel among the world masterpieces of wooden architecture.

The Trinity Church in Pakul

Trinity–Saint Elijah's Monastery (Troitsko-Illinskyi manastyr). An Orthodox monastery situated in Chernihiv. It is believed to have been founded in 1069 by St Anthony of the Caves and situated beside the late 12th-century St Elijah's Church. It was sacked by the Tatars in 1239 and not rebuilt until the mid-17th century. Reconstruction of St Elijah's Church started in 1646 under the patronage of the colonel of Chernihiv, S. Pobodailo. Buildings added later included the baroque-style Trinity Cathedral in 1679–95 (funded by the Chernihiv colonel V. Dunyn-Borkovsky and Hetman I. Mazepa), refectories, the Church of the Presentation (1677), monks' cells (1670s–1680s and 1750s–1780s), a baroque bell tower (1775), and a surrounding wall (early 18th century). From 1679 the monastery housed the **Chernihiv printing press*. The monastery was closed down in 1799 and converted into the residence of the bishop of Chernihiv. It served that function until it was closed by the Soviet regime in the 1920s.

Trinkler, Mykola, b 19 November 1859 in St Petersburg, d 10 August 1925 in Kharkiv. Surgeon. A graduate of Kharkiv University (1883), he taught there (as professor from 1905) and at the Kharkiv Medical Institute (from 1921). He researched aseptic methods in surgery, traumatology, neurosurgery, and oncology. His publications include a handbook on treating syphilitic wounds of the internal organs (1926).

Title page of the Triodion printed by the Kievan Cave Monastery Press in 1640

Triodion (Ukrainian: *triod*), from the Greek word for 'three odes.' A liturgical book used in the Orthodox and Eastern Catholic churches on the 10 Sundays before Easter and on all the other days of Lent and the Easter period. It contains canons having usually only three odes instead of the regular nine – hence its name. In the Ukrainian church two triodia are used. The *triod pisna* (lenten triodion) contains religious songs, mostly of a penitential nature, that are sung during Lent. The *triod' tsvitna* (floral triodion or Pentekostarion) contains liturgical services performed from Palm Sunday to Easter Sunday, on Pentecost, and on All Saints' Sunday. Some of the oldest Slavic incunabula were triodia (eg, those printed by S. Fiol in Cracow ca 1491). They were frequently printed in Ukraine (eg, in Kiev in 1627, 1631, and 1640 and in Lviv in 1642 and after). In the 17th and 18th centuries the text of the Ukrainian triodion differed from that of the Russian.

Trisetum (Ukrainian: *tryshchetynnyk*). A widely distributed genus of perennial tufted forage grasses in the family Gramineae that grows in meadows, in glades, and on rocky slopes. Some species are valuable hay and pasture plants. In Ukraine *T. sibiricum* and *T. flavescens* are found, predominantly in the Carpathian Mountains.

Trofimenko, Swiatoslaw [Trofymenko, Svjatoslav], b 15 December 1931 in Lviv. Ukrainian-American organic and inorganic chemist. A graduate of Wesleyan (1955) and Northwestern (PH D, 1958) universities, he has held various positions at the Du Pont Co since 1959. He is a member of the Shevchenko Scientific Society and the Ukrainian Academy of Arts and Sciences in the US and chemistry editor of the *Encyclopedia of Ukraine*. His research areas include cyanocarbons, heterocycles, boron chemistry, cyclometallation (a term he coined), catalysis, and co-ordination chemistry. The author of 90 publications and 30 patents, he discovered new heterocycles (pyrazaboles) and is best known for the discovery and development of the polypyrazolylborate ligand system, which has been used worldwide.

Trofymovych, Teofan [Trofymovyč], b ?, d ca 1736. Writer. After graduating from the Kievan Mohyla Academy (1725) he taught poetics there. In 1736 he became

archimandrite of Moscow's Zaikonospasskii Monastery and rector of its Slavonic-Greek-Latin Academy. It has been conjectured that he, instead of T. Prokopovych or I. Nerunovych, is the author of **Mylost' Bozhiia Ukrainy ... svobodyushaia*.

Troian. A deity of the ancient Slavs who was worshiped in Kievan Rus'. He is mentioned alongside Khors, Perun, and Veles in old Ukrainian literature. His place in mythology has never been adequately explained. Some scholars believe that he was the god of the moon, night, and building (S. Plachynda), of the sun (Ya. Borovsky), and of war (M. Andrusiak). B. Kravtsiv claimed he was the highest deity in ancient Ukraine. Other scholars deny the existence of such a deity and hold that the name belongs to the Roman emperor Trajan (Ya. Hamza) or to the triumvirate of Rus' princes – Iziaslav, Vsevolod, and Sviatoslav (S. Pushyk).

Kornylo Troian

Troian, Kornylo [Trojan], b 26 August 1885 in Sydoriv, Husiatyn county, Galicia, d 5 March 1959 in New York. Lawyer and civic and political leader. A veteran of the Austrian army in the First World War, he completed his law studies in 1921 and opened his own law office in Khodoriv (Bibrka county) in 1924. There he also set up a branch of the Prosvita society, a county co-operative union, and a Ridna Shkola circle. As a candidate of the Ukrainian National Democratic Alliance and a member of its presidium (1925–6) he won election to the Polish Senate in 1928 and to the Polish Sejm in 1935. After the Second World War he worked as a refugee in the law department of the Central Representation of the Ukrainian Emigration in Germany. He moved to the United States in 1952.

Troisti muzyky (trio musicians). A trio ensemble of folk instruments consisting of violin, basolia (folk violoncello), and frame drum. In Western Ukraine the *tsymbaly* (cymbalom) was commonly used instead of the basolia. On occasion the *sopilka* (fipple flute) replaced the violin as the leading instrument. The trio ensemble arose after the violin was introduced into Ukraine early in the 1600s, and became widespread by the end of the 17th century. Until the beginning of the 20th century *troisti muzyky* provided most of the musical entertainment on feast days, and at weddings, birthdays, social gatherings, and fairs. Their repertoire consisted of dance music and folk songs. Today the tradition is maintained by musicians in such ensembles as the Kiev Orchestra of Folk Instruments.

Troisti muzyky

Troitske [Trojic'ke]. iv-19. A town smt (1986 pop 7,600) and raion center in Luhanske oblast. It originated in the 1740s as a small herding settlement called Kalnivka or Kalynivka. From 1815 it was known as the *sloboda* Novotroitska, and from the 1870s, as Troitske village. In 1957 it was promoted to smt status, and in 1961 it was amalgamated with Tsyhanivka village. Troitske has an oil-pressing mill, a canning factory, and a dairy.

Troitsky, Ivan [Trojic'kyj], b 22 October 1854 in Chernihiv gubernia, d 17 March 1923 in Katerynoslav. Pediatrician. A graduate of Kiev University (1878), he was a professor at Kharkiv University (1903–19), head of the pediatrics department of the Katerynoslav Medical Institute (1920–3), and the founding president of the Kiev (1900–2) and Kharkiv (1912) societies of pediatricians. He helped organize the first International Conference of Pediatricians (1912) and wrote *Kurs lektsii o bolezniakh detskogo vozrasta* (A Course of Lectures on Childhood Diseases, 1887, 1888–9) and *Gigiena detskogo vozrasta* (Childhood Hygiene, 1912).

Trokhymenko, Karpo [Troxymenko], b 25 October 1885 in Sushchany, Vasytkiv county, Kiev gubernia, d 1 October 1979 in Kiev. Painter. He studied at the Kiev Art School (1902–10), the Moscow School of Painting, Sculpture, and Architecture (1906–7), and under M. Samokysh at the St Petersburg Academy of Arts (1910–16). He worked in Kiev as an instructor for the Commission for the Protection of Historical and Artistic Monuments (1918–20) and taught at the Kiev Art School (1918–19), the Kiev Artistic-Industrial Professional School and Kiev Art Tekhnikum (1926–33), and the Kiev State Art Institute (1933–74). He belonged to the Association of Artists of Red Ukraine (1926–32) and became vice-chairman of the Arts Council of the Ministry of Education. Trokhymenko worked in watercolors, oils, and pencil. He painted mu-

Karpo Trokhymenko: *Above the Great Route* (oil, 1926)

rels in the church at the Swedish Grave in Poltava; realistic historical scenes, such as *Cossacks' Supper at Their Battle Posts* (1917); and landscapes such as *The Dnieper from Ivanova Mountain* (1926), *The Dnieper and the Museum from Chernecha Mountain* (1953), and *Barley in Bloom* (1965). He also created Soviet genre paintings. T. Shevchenko and his works inspired his canvases *Shevchenko and Engelhardt* (1939), *Kateryna* (1954), and *Shevchenko on Chernecha Mountain* (1954). Books about Trokhymenko have been written by P. Musiienko (1946) and I. Vrona (1957), and an album of his works was published in 1969.

Trokhymenko, Klym [Troxymenko], b 5 February 1898 in Pekarshchyna, Zhytomyr county, Volhynia gubernia, d 12 May 1979 in Philadelphia. Primitivist painter. After the First World War he was a businessman and art collector in Lviv. A postwar émigré, he settled in the United States in 1950. He began painting at the age of 45. His works have simplified, often nonrealistic forms and strong, clashing colors. They have been exhibited in solo and group exhibitions in Detroit (1960), Munich (1971), New York, and Toronto (1972).

Trokhymovskyy, Mykhailo [Troxymovs'kyj, Myxajlo], b 1739 in Bezuhlivka, near Nizhen, d 3 October 1813 in Velyki Sorochyntsi, Myrhorod county, Poltava gubernia. Physician; corresponding member of the St Petersburg Medico-Surgical Academy. After being educated at the Kievan Mohyla Academy (1752–61) and the Medical School of the St Petersburg Army Hospital (1761–3), he served as an army doctor in Ukraine and took part in the Russo-Turkish War (1768–74). In 1772 he was appointed physician for Myrhorod county. He maintained a hospital at his own expense. He wrote on hydrotherapy, female infertility, and Crimean flora.

Trolleybus transport. See Urban transit.

Tronko, Petro [Tron'ko], b 12 July 1915 in Zabrody, Bohodukhiv county, Kharkiv gubernia. Communist party and Soviet government leader, and historian; AN URSR (now ANU) full member since 1978. A graduate of Kiev University (1948) and the Party Academy of Social Sci-

Petro Tronko

ences in Moscow (1951), he worked as an educator (1932–7) and Komsomol leader (1937–47) and then rose in the Party to the positions of secretary in charge of propaganda and agitation in the CC CPU (1960–1) and CC member (1961–78). He has been deputy chairman of the Ukrainian Council of Ministers, head of the Soviet Ukrainian delegation at the UN General Assembly (1965), and chairman of the Ukrainian Society for the Protection of Historical and Cultural Monuments (since 1967). At the ANU he has served as vice-president (1978–9), head of the regional history department in the Institute of History, and chairman of the regional studies council (since 1982). Tronko has written books on the Ukrainian Komsomol during the Second World War (1957, 1960, 1968), on culture (1977), and on 'socialist' Kiev (1982) and over 300 articles. He was a coauthor of histories of the Ukrainian Komsomol (1967; 4th edn 1978) and of Ukraine during the Second World War (1967, 1977). He has edited collections of documents and materials on the Kiev region in 1917–20 (1957, 1962) and during the Second World War (1963), and books on the 1768 Koliivshchyna rebellion (1970) and Kiev's Arsenal plant (1986). He was chief editor of the monumental history of Ukraine's cities and villages (26 vols, 1967–74) and its Russian translation, of the journal **Pam'iatky Ukrainy* (1985–8), and of a detailed reference guide to Ukraine's historical and cultural monuments (1987).

Troparion (*tropar*), from the Greek *tropos*. A short liturgical hymn that traditionally has been sung or chanted, and now is usually recited, in the Orthodox and Eastern Catholic churches. Stanzas of the kontakion (Ukrainian: *kondak*) and canon, other types of liturgical hymns sung since the 8th century, are also called troparia. Troparia vary in length from one or two verses to long poems. Many troparia glorifying native saints (eg, St Olha, St Volodymyr) were composed in Ukraine.

Tropinin, Vasiliï, b 30 March 1776 or 1780 in Karpovo, Novgorod gubernia, Russia, d 15 May 1857 in Moscow. Russian painter. He was born a serf and was sent to study at the St Petersburg Academy of Arts (1798–1804). He then lived on his owner's estate in Kukavka, Mohyliv county, Podilia gubernia (1804–12, 1818–21), where he painted icons and portraits of Ukrainian peasants, such as *A Girl from Podilia*, *Peasant Woman*, *Ustym Karmeliuk*, *Wedding in Kukavka*, and *Young Ukrainian Peasant*. In 1823 he was given his freedom, and in 1824 he moved to Moscow and was elected a member of the Academy of Arts.

Vasiliï Tropinin: *Portrait of Ustym Karmeliuk* (oil, early 19th century)

Tropotianka (aka *tropak*). A lively folk dance in 2/4 time performed by eight or more couples. It is popular in Transcarpathia.

Troshchanovsky, Arkadiï [Troščanovs'kyj, Arkadij], b 21 January 1914 in Simianivka, Konotip county, Chernihiv gubernia, d 10 May 1986 in Zaporizhia. Heroic and character stage and film actor and director. He completed study in the drama studio at the Moscow Ukrainian Theater of the RSFSR (1934) and then worked in theaters in Rivne and Kharkiv (1935–41) and directed in the Zaporizhian Ukrainian Music and Drama Theater (1942–77). He acted in the film *Rodyna Kotsiubyns'kykh* (The Kotsiubynsky Family, 1970).

Troshchenko, Valerii [Troščenko, Valerij], b 15 May 1929 in Sreplevo, near Smolensk, Russia. Scientist in the field of mechanics; full member of the ANU (formerly AN URSS) since 1979. He studied at the Kiev Polytechnical Institute and worked in 1955–66 at the ANU Institute of Metal Ceramics and Special Alloys (now the Institute for Problems of Materials Science). Since 1966 he has been assistant director and department head at the ANU Institute for Problems of the Strength of Materials. His main contributions are in the areas of the strength of materials at high temperatures, the fatigue phenomena of materials and structures, and the reliability of machines and structures.

Troshchynsky [Troščyns'kyj]. A family line of Cossack officers and noblemen, originally from the Bila Tserkva region. At the behest of Hetman I. Mazepa they resettled in

Left-Bank Ukraine in the late 17th century. Vasyl Troshchynsky (Trushchynsky) was one of a group of noblemen from Bila Tserkva county who stayed and swore allegiance to the tsar of Muscovy in 1654. His descendant (son or grandson) Stepan *Troshchynsky was colonel of Hadiache regiment. Stepan's son, Andrii Troshchynsky, was head of the General Military Chancellery in 1716–25 and a fellow of the standard in 1725–40. Stepan's great-grandson was Dmytro *Troshchynsky. Dmytro's nephew, Andrii (b 1774, d 1852), was a general in the imperial army and a relative of N. Gogol. The Troshchynsky family line declined in the late 19th century.

Troshchynsky, Dmytro [Troščyns'kyj], b 1749 in Hlukhiv, Nizhen regiment, d 1829 in Kybyntsi, Myrhorod county, Poltava gubernia. Official of the Russian imperial government and patron of Ukrainian culture. After graduating from the Kievan Mohyla Academy he worked in the Little Russian Collegium (1766), fought in the Russo-Turkish War of 1768–74, and served on Prince N. Repnin's staff. Upon moving to St Petersburg he rose from director of Count O. Bezborodko's office (1784) to state secretary (1793) and senator. He was rewarded by Alexander I for his part in the plot against Paul I with an appointment to the State Council and the directorship of the imperial postal board. After serving as minister of appanages (1802–6) he returned to his estate and was elected marshal of the nobility in Poltava gubernia (1812–14). During Napoleon's invasion he helped raise troops and then was minister of justice (1814–17). After retiring to his Kybyntsi estate Troshchynsky turned it into a Ukrainian cultural and political center, called the Ukrainian Athens by his contemporaries. He shared the autonomist aspirations of his colleagues V. Kapnist, P. Koropchevsky, and M. Myklashevsky and supported or encouraged Ukrainian scholars such as Ya. Markovych and V. Lomykovsky, writers such as Kapnist, V. Hohol-Yanovsky, and A. Rodzianko, painters such as V. Borovykovsky, and composers such as A. Vedel. He acted through his friend O. Kamenetsky to get I. Kotliarevsky's *Eneida* (The Aeneid, 1798) published. At his estate he set up a large library of over 4,000 titles and a private theater run (from 1812) by Hohol-Yanovsky, assisted by Kapnist. According to recent research Troshchynsky headed a clandestine circle of Ukrainian autonomists in the late 18th and early 19th centuries and maintained contacts with opposition circles in the military through his relative Gen P. Bilukha-Kokhanovsky, the brothers F. and V. Lukashevych, and other participants in the Smolensk conspiracy of 1798. He assigned great importance to the organization of Ukrainian military units; hence, he supported Kapnist's project for a Cossack regiment in 1788 and the Cossack mobilization in Left-Bank Ukraine in 1812.

A. Zhukovsky

Troshchynsky, Stepan [Troščyns'kyj], b ?, d 1709 in Kiev. Cossack officer. A relative of I. Mazepa, he was a military fellow (from 1693), an official of the Hetmanate court and keeper of the Hadiache jail (1690–7), and quartermaster (1697–1704) and colonel (1704–8) of Hadiache

regiment. He undertook a number of diplomatic representations for Mazepa, including a mission to the Sich in 1693. His regiment was in Right-Bank Ukraine in 1708 and was unable to join Mazepa's forces at the start of hostilities against Russia. Troshchynsky was arrested by the Russian authorities, and died in prison.

Trostianets [Trostjanec']. III-15. A city (1989 pop 25,400) on the Boromlia River and a raion center in Sumy oblast. It was founded in the early 17th century by Cossacks from Right-Bank Ukraine. From 1780 the village belonged to Okhtyrka county of Kharkiv vicegerency, which was reorganized into Slobidska Ukraine gubernia in 1797 and into Kharkiv gubernia in 1835. From 1877 a railway line connected Trostianets with Kharkiv and Sumy and stimulated its industrial growth. In 1940 it was granted city status. Today it has an electric-appliance factory, a sugar refinery, a chocolate factory, and a lumber and woodworking plant. It is the home of a forestry research station of the Ukrainian Scientific Research Institute of Forest Management and Agroforest Amelioration.

Trostianets [Trostjanec]. V-10. A town smt (1986 pop 7,900) on the Trostianets River and a raion center in Vinnytsia oblast. It was first mentioned in historical documents in 1598, when it belonged to the Polish Commonwealth. In 1793 it was annexed by Russia, and became part of Bratslav county in Podilia gubernia. In 1957 the village was granted smt status. It has a distillery, a mixed-feed factory, a dairy, and a meat-packing complex.

Trostianets Dendrological Park [Trostjanec']. A dendrological park in Trostianets, Ichnia raion, Chernihiv oblast, 205 ha in size and administered by the ANU. The park was constructed starting in 1834 by the estate owner I. Skoropadsky (1805–87), who made its development a lifelong undertaking (he was even buried there). The original site consisted of a flat, treeless stretch of steppe valley. Local varieties of trees, pines, firs, birches, oaks, poplars, and the like, were introduced first, and from 1840, various imported trees were brought onto the site. Several theme areas were developed, including Monomakh's Hat, The Pine Bouquet, and The Crown. Work began on an area of man-made hills 20–30 m in size (called Shvaitsariia 'Switzerland') in 1858. Artificial lakes and ponds were added. No large structures were erected on the site, so that its natural features would remain prominent. Footbridges, columns, and *stone baby, however, were placed there.

By 1890 all work on the park had been completed. In 1920 the park came under the control of the local authorities, and in 1940, after being declared a nature preserve, it came under the jurisdiction of the Ukrainian SSR Council of Ministers. The ANU was placed in charge of the park in 1951. Today approx 520 types of trees and plants grow there. The park is also used as a research center.

Trostianetsky, Aron [Trostjanec'kyj], b 17 July 1914 in Zlatopil (now part of Novomyrhorod), Chyhyryn county, Kiev gubernia, d 7 November 1986. Literary scholar and critic of Jewish origin. He graduated from the Kiev Pedagogical Institute (1939) and worked as a department head for the journal *Literaturna krytyka*, secretary of the newspaper *Literatura i mystetstvo*, and, from 1947, senior associate

A Cuman stone *baba* in the Trostianets Dendrological Park

of the Institute of Literature of the AN URSR (now ANU). He began publishing articles in 1934. He wrote several booklets on V. Maiakovsky and Soviet Ukrainian poetry, critical biographies of Yu. Yanovsky (1959 in Russian, 1962 in Ukrainian), and a monograph on the consolidation of literary forces in Soviet Ukraine in the years 1917–32 (1968). He also contributed chapters to several postwar multi-author histories of Soviet Ukrainian literature and monographs. An edition of his literary criticism was published in 1985.

Trotsenko, Viktor [Trocenko], b 13 May 1888 in Nyzhnia Syrovatka, Sumy county, Kharkiv gubernia, d 4 June 1978 in Kharkiv. Architect. He acquired his knowledge of architecture as a member of the Ukrainian architecture and art department of the Kharkiv Literary and Artistic Circle organized by S. Vasylykivsky. He designed apartment buildings, schools, clubs, and hospitals in the Kryvyi Rih and Donbas regions, the Ukraine pavilion at the First All-Union Agricultural Exhibition in Moscow (1923), the workers' residences of the Kharkiv Steam Engine Plant (1923), and the Kharkiv Chervonozavodskiyi Ukrainian Drama Theater (1931–8, codesigner). He researched Ukrainian folk architecture and copublished S. Taranu-

shenko's booklets about a traditional peasant house on Yelysavetynskiy Lane in Kharkiv (1921) and old houses in Kharkiv (1922). His articles were published in *Arkhitektura Radians'koi Ukraïny*.

Trotsky, Leon [Trockij, Lev] (pseud of Lev Bronshtein), b 7 November 1879 in Yanivka, Yelysavethrad county, Kherson gubernia, d 20 August 1940 in Coyoacán, near Mexico City. Russian revolutionary, Soviet political leader, and publicist. In March 1918 he was appointed people's commissar for war and chairman of the Supreme War Council and played the leading role in organizing the Red Army into a regular, professional force. A member of the Bolshevik government, he opposed the UNR. As a theoretician Trotsky is best known for his theory of permanent revolution and his criticism of J. Stalin's theory of socialism. His *Revolution Betrayed* (1937) is one of the first Marxist analyses of the nature of Stalinism.

Trotsky was unpopular in Ukraine because in 1917–20 he had commanded the alien Red Army and had organized the Red Terror. His calls for the militarization of labor in 1920–1 and for higher taxation of the peasantry to finance industrialization diminished his popularity even further. In the 1920s and 1930s Stalin unleashed a campaign against Trotsky and his *Left Opposition within the Party. Trotsky was expelled from the party in November 1927, then exiled to Alma Ata, and finally deported from the USSR in 1929. After the Molotov-Ribbentrop Pact of 1939 Trotsky called for the formation of an independent soviet socialist Ukraine. Tens of thousands of people accused of Trotskyism were executed or sent to the labor camps.

Outside the Ukrainian SSR Trotsky's Ukrainian following was limited to a small number of revolutionary socialist intellectuals in Galicia and to a small faction of Ukrainian-Canadian Communists, who published the newspaper *Robitnychi visty* (1933–8) and Ukrainian translations of several of Trotsky's works. In the 1970s some Ukrainian students in the West, particularly in Canada, were attracted to the ideas of the Left Opposition and contributed articles about Ukraine to various Trotskyist publications. An Italian Trotskyist publishing house translated I. Dziuba's *Internationalism or Russification?*

Trotsky, Mykola [Troc'kyj] (pseud: M. Danko, Mykola Druhy, M. Slavhorodsky, M. Bradovych), b 1883 in Lutske, Volhynia gubernia, d 6 November 1971 in Geneva. Journalist, writer, and political figure. To avoid imprisonment by the tsarist authorities for political activity, he fled abroad in 1909. He was the Vienna correspondent of the Kiev paper *Rada* from 1910, and he contributed to periodicals in other cities, such as *Ukrainische Rundschau*, *Dilo*, *Nash holos*, *Moloda Ukraïna*, *Ukrainskaia zhizn'*, *Maiak*, and *Literaturno-naukovyi vistnyk*. A leading member of the *Union for the Liberation of Ukraine, he coedited its *Vistnyk Soiuzu vyzvolennia Ukraïny* and *Ukrainische Nachrichten* and wrote its brochures. He served as secretary of the UNR mission in Vienna (1918–22), published the anti-Soviet monthly *Die Völkerbrücke* (1931), and from 1932 ran the

Mykola Trotsky

Ivan Truba

Ukrainian Information Bureau in Geneva. After the war he contributed to the émigré press and published the novelle *Chuzhynoiu* (In a Foreign Land, 1947), *Na Moskvu* (Against Moscow, 1951), and *Ideia i chyn* (The Idea and the Deed, 1952) and the publicistic works *Odna natsiia – odna tserkva* (One Nation – One Church, 1950) and *Derzhava bez natsii* (A State without a Nation, 1952).

Trout (*Salmo*; Ukrainian: *pstruh*, *forel*). The name commonly given to several types of prized freshwater commercial fish of the Salmonidae family, and also, inaccurately, to char. The trout in Ukraine are the brown trout (*S. trutta*; Ukrainian: *strumkovyi pstruh*), found in the lakes and streams of the Carpathian and Crimean mountains, and the rainbow trout (*S. gairdneri*). The trout is used in fish-farming research for the *fishing industry.

Truba, Ivan, b 28 September 1878 in Homel, Mahiliou gubernia, Belarus, d 27 August 1950 in Plzeň, Czechoslovakia. Engineer and civic activist. As a student at the St Petersburg Technological Institute he was active in the Ukrainian Student Hromada there, and in 1902 he was exiled to Irkutsk for his role in student demonstrations. In 1905 he was imprisoned again for revolutionary activity. From 1909 he worked as an engineer in Katerynoslav and took part in the Ukrainian national movement. Appointed gubernial commissioner for education in 1917, he Ukrainized the school system, compiled anthologies for students, and organized Prosvita reading rooms. Later he emigrated to Czechoslovakia, where he lectured on mechanical engineering at the Ukrainian Husbandry Academy.

Trubachev, Oleg [Trubačev], b 23 October 1930 in Stalingrad (now Volgograd), Russia. Russian etymologist; corresponding member of the USSR Academy of Sciences since 1972. A graduate of Dnipropetrovske University (1952), he has worked at the academy's Russian Language Institute since 1961 and is head of its Sector of Etymology and Onomastics. He has written many articles on the etymology of Slavic (including Ukrainian) words and names and on the ancient Slavs' linguistic contacts with other Indo-Europeans, particularly on the Black Sea and Sea of Azov littorals. He is the author of books on the history of Slavic kinship terms (1959), the origin of Slavic names for domestic animals (1960), the hydronyms of the upper Dnieper Basin (1962), the Slavic terms in the crafts (1966), and the names of rivers in Right-Bank Ukraine (1968). He

is editor of the academy's multivolume Slavic etymological dictionary (1974–) and of annual collections of articles on etymology.

Trubetskoi, Nikolai [Trubeckoj] (Trubetzkoj), b 28 April 1890 in Moscow, d 25 June 1938 in Vienna. Russian philologist. He taught at Moscow (1915–17), Rostov (1918–19), and Sofia (1920–2) universities. From 1923 he was the professor of Slavic philology at Vienna University. A co-founder of the Prague Linguistic Circle and an ideologist of *Eurasianism, he wrote the linguistic classic *Grundzüge der Phonologie* (1939; English trans: *Principles of Phonology*, 1969, with his autobiographical notes and bibliography), in which he included many Ukrainian examples. A proponent of a 'common Russian' literary language (eg, in his book on the problem of Russian self-awareness, 1929; repr 1977), he nonetheless studied modern Ukrainian phonology as an independent phenomenon. In his lectures on Old Russian literature (1925–8; repr 1973) he confused Old Ukrainian and Middle Russian literature.

Trubizh Drainage and Irrigation System. A melioration system encompassing the floodplains of the Trubizh River and its main tributaries, the Karan and the Nedra rivers. The floodplains began to be drained in 1909, and the system was completed in 1954–63. It covers an area of 32,000 ha and serves 49 farms in Kiev and Chernihiv oblasts.

Trubizh River [Trubiž] (also Trubailo). A left-bank tributary of the Dnieper River that flows southward for 125 km through Chernihiv and Kiev oblasts before emptying into the Kaniv Reservoir. It drains a basin area of 4,700 sq km. It is fed by rain and groundwater and is a central feature of the Trubizh Drainage and Irrigation System. The river is also used for industry. The city of Pereiaslav-Khmelnytskyi is situated near the mouth of the river.

Trublaini, Mykola [Trublajini] (pseud of M. Trublaievsky), b 25 April 1907 in Vilshanka, Olhopil county, Podilia gubernia, d 4 October 1941. Writer. He belonged to the literary organization Molodniak and was first published in 1924. He wrote travelogues and stories, mainly for children. Among them are *Do Arkyky cherez tropiky* (To the Arctic through the Tropics, 1931), *Liudyna pospishaie na pivnich* (One Hurries to the North, 1931), *Tepla osin' 1930-oho* (The Warm Autumn of 1930, 1931), *Bii za perepravu* (The Battle for the Crossing, 1932), and *Opovidannia pro khorobrist'* (Stories about Courage, 1941). His novels include *Lakhtak* (1935), *Shkhuna Kolumb* (Schooner Columbus, 1937), and *Hlybynnyi shliakh* (The Deep Route, 1948). Posthumous collections of his work appeared as *Tvory* (3 vols, 1949–50; 4 vols, 1955–6).

Trucks. See Automotive industry.

Trud (Labor). A women's manufacturing co-operative founded in 1901 in Lviv by the Club of Ruthenian Women. Until 1914 it was known as the Women's Manufacturing Association. Trud owned a building and maintained a student residence and workshops for making dresses and undergarments. It organized sewing courses for girls over 13 years of age, which in 1929 were replaced with a three-year trade school, directed by O. *Zalizniak. Similar

women's co-operatives existed in 11 other cities in Galicia. In 1927 they held a congress in Lviv. The board of directors of Trud was headed by H. Shukhevych and Ye. Makarushka. The co-operative ceased operations during the Soviet occupation in 1939–41 and was dissolved by the Soviet authorities in 1944.

Trudosoïuz (full name: Vseukrainskyi soiuz vyrobnychkykh kooperatyv, or All-Ukrainian Union of Manufacturing Co-operatives). The central organization for manufacturing co-operatives in Ukraine, established in Odessa in 1919 by S. Borodaievsky. Its goal was to organize manufacturing co-operatives throughout Ukraine. The union was dissolved following the Bolshevik seizure of power in Ukraine in 1919.

Trudova Ukraïna (Toiling Ukraine). An irregular organ of the Central Committee of the Ukrainian Party of Socialist Revolutionaries, published in Prague in 1932–9 as the continuation of *Vistnyk UPSR*. It was edited by P. Bohatsky and N. Hryhoriiiv.

Trudy Etnograficheskoi-statisticheskoi ekspeditsii v Zapadno-russkii kraï (Works of the Ethnographic-Statistical Expedition to the West Russian Land). A seven-volume collection of materials on Ukrainian folklore and ethnography, published in 1872–9. It contains folk songs and anecdotes, proverbs, carols, riddles, spells, folk beliefs and superstitions, and the folk calendar, as well as wedding, baptism, funeral, and birth rites and statistical data on the minorities of Ukraine which were collected in 1869–70 by the members of an expedition in Russian-ruled Ukraine, Moldavia, and Belarus. The head of the expedition and the editor of the collection was P. *Chubynsky.

Trudy Kievskoi dukhovnoi akademii (Works of the Kiev Theological Academy). A Russian-language scholarly journal of the *Kiev Theological Academy published monthly in Kiev in 1860–1917 (a total of over 600 issues). It published articles on theology (dogma, general theology, moral theology, comparative theology), philosophy, church history (particularly in Ukraine), general history, pastoral theology, homiletics, liturgics, church law, and the history of Ukrainian ('Ruthenian') literature. It also contained a chronicle of activities at the academy, its library, its museum of church archeology, and the Kiev Epiphany Brotherhood. Contributors included many prominent scholars, among them M. Maksymovych, S. Golubev, M. Petrov, F. Titov, F. Rozhdestvensky, P. Orlovsky, I. Malyshevsky, V. Zavitnevych, P. Ternovsky, P. Viktorovsky, and N. Semeikin (church history); P. Yurkevych, P. Linytsky, D. Znamensky, and P. Kudriavtsev (philosophy); M. Petrov (literature); I. Balytsky (Slavic philology); Ya. Olesnytsky, K. Skvortsov, A. Khoïnatsky, S. Malevansky, M. Yastrebov, M. Olesnytsky, D. Bohdashkevsky, and V. Pevnytsky (theological studies); and V. Zavitnevych and P. Lashkarev (church law). The editors were F. Filaretov (1860–77); A. Olesnytsky, V. Pevnytsky, and V. Rubynsky (1906–10); and D. Bohdashkevsky and N. Grossu (1915–17).

Rev Hryhorii Trukh

Ivan Trush (self-portrait, oil)

Trukh, Hryhorii Andrii [Trux, Hryhorij Andrii], b 18 February 1894 in Stryi, Galicia, d 9 May 1959 in Grimsby, Ontario. Basilian priest and writer. After interrupting his theological studies in Lviv to enter the ranks of the Sich Riflemen during the First World War, he joined the Basilian order in 1920 and was ordained in 1926. He had a Kholm region posting until 1932, when he was sent to Canada. There he edited the newspaper **Svitlo* (1943–6) and wrote several popular religious books and pamphlets, including *Zhyttia sviatykh* (The Lives of the Saints, 4 vols, 1958), and a Ukrainian grammar (1947).

Trukhaniv Island [Truxaniv ostriv]. An island (area approx 450 ha) situated in Kiev on the Dnieper River. The first structures on the island were built in the 19th century, and from the 1880s it was a working-class residential area. The island started to become a popular recreational area after its beaches were developed in 1918 during the German occupation of Ukraine. After much of the island was leveled during the Second World War, it was turned into an exclusively recreational area with facilities for swimming and water sports. It is connected to the city by a pedestrian bridge constructed in 1956–7.

Trush, Ivan [Truš], b 17 January 1869 in Vysotske, Brody county, Galicia, d 22 March 1941 in Lviv. Painter, community figure, and art and literary critic; son-in-law of M. *Drahomanov. After studying at the Cracow Academy of Fine Arts (1891–7) under L. Wyczółkowski and J. Stanisławski he lived in Lviv, where he was active in Ukrainian artistic circles and community life. A friend of I. Franko, he organized the *Society for the Advancement of Ruthenian Art and the *Society of Friends of Ukrainian Scholarship, Literature, and Art and their exhibitions; co-published the first Ukrainian art magazine, **Artystychnyi vistnyk*; painted many portraits for the Shevchenko Scientific Society; lectured on art and literature; and contributed articles to *Buduchnist'*, *Literaturno-naukovyï vistnyk*, *Moloda Ukraïna*, *Artystychnyi vistnyk*, *Dilo*, and *Ukrainische Rundschau*. He traveled widely: he visited Kiev several times (he taught briefly at M. Murashko's drawing school in 1901), Crimea (1901–4), Italy (1902, 1908), and Egypt and Palestine (1912).

Trush was an outstanding Ukrainian impressionist, noted for his original use of color. A major part of his large legacy (over 6,000 paintings) consists of landscapes. They include masterpieces, such as *Sunset in the Forest* (1904),

Solitary Pine (1919), *Grain Stacks near the Woods* (1919), *Haystacks*, and *Moonlit Night by the Sea* (1925); the cycles 'The Solitary Pine' and 'The Jewish Cemetery' (1929); *St Michael's Cathedral*, and *St Andrew's Church* [in Kiev] and *T. Shevchenko's Grave in Kaniv* (1900); and landscapes of Crimea, Rome, Venice, Egypt, and Palestine. His many genre paintings are noted for their simplicity of composition; they include *Hahilky* (1905), *Hutsul Woman with Child* (1912), *Trembita Players*, *Washerwomen*, *Hutsul Women near a Church*, *Arabs on the Road*, and *Arab Women*. His gallery of 350 portraits includes ones of his wife, Ariadna, Cardinal A. Sembratovych, I. Franko, V. Stefanyk, Lesia Ukrainka, O. Konysky, I. Nechui-Levytsky, V. Antonovych, B. Hrinchenko, M. Drahomanov, M. Hrushevsky, and M. Lysenko. The first solo show of Trush's works took place in Lviv in 1899, and a large retrospective exhibition was held posthumously there in 1941. Major collections of his work are at the National Museum and the memorial museum in his former residence in Lviv. A selection of his essays on art and literature appeared posthumously in 1959.

S. Hordynsky

Trushch, Volodymyr [Trušč], b 21 April 1869 in Zolochiv, Galicia, d 6 June 1931 in Stanyslaviv. Russophile activist. A secretary of the Academic Circle while studying at Lviv University in the 1890s, he lived from 1899 in Stanyslaviv, where he was director of a Russophile student residence and head of the local People's Home. During the First World War he was imprisoned in Thalerhof. In the early 1920s he was instrumental in regrouping Galician Russophiles into the Russian People's Organization and served as its first president.

A sanatorium in Truskavets

Truskavets [Truskavec']. IV-4. A city (1989 pop 31,400) under oblast jurisdiction in the Carpathian foothills of Lviv oblast. The village has been a source of salt since the 11th century. It was first mentioned in historical docu-

ments in 1462. It belonged to the crown estates of the Polish kings until the First Partition of Poland (1772), when it was transferred to Austria. It was under Polish rule in the interwar period, was annexed by the USSR in 1939, and was incorporated into the Ukrainian SSR in 1944. The first health resorts in Truskavets were opened in 1827, and today the city is the most famous health resort center in Ukraine. Its 17 sanatoriums and 20 hotels accommodate 60,000 patients and 300,000 tourists annually. Its mineral water, known as Naftusia, is used to treat liver, gall bladder, urological, and metabolic disorders. Ozokerite began to be used in balneotherapy there in 1947 and was found to be more effective than clay or peat. The town was granted city status in 1948. It has a mineral-water bottling plant and a branch of the Scientific Research Institute of Health Resorts. Petroleum, ozokerite, salt, and other minerals are mined in the vicinity.

Trust (*trést*). The most integrated form of economic association among a number of companies. Members of a trust surrender their autonomy in production and marketing and accept a single administration. Trusts arose in Western Europe and North America in the 19th century. Eventually they came under government regulations on competition and monopoly. In comparison with other forms of *monopoly that emerged in Ukraine in the last quarter of the 19th century, such as *cartels and syndicates, trusts were relatively unimportant and underdeveloped.

Trusts were also a common form of economic organization in the USSR. Many were formed during the NEP period in an attempt to rationalize production, reduce costs, and eliminate duplication. They were usually a combination of enterprises in a single territory. The process of defining the legal status of the trusts was not systematic, and culminated in a law on trusts passed by the USSR Central Executive Committee and the Council of People's Commissars on 10 April 1923. In Ukraine trusts developed more rapidly than in other republics. The Pivdenstal trust was established in October 1921. It consisted of 3 large steel plants, in Makiivka, Yuzivka, and Petrivske, 19 smaller plants, several coal mines, and some coking plants. The other large trusts in Soviet Ukraine were Donbasvuhillia, in the coal industry; Pivdennorudnyi, in iron-ore mining; the Southern Machine-Building Trust; and Pivdennyi Silmashtrést, based in Zaporizhia, and Ukrtréstsilmas, based in Kharkiv, both in agricultural-machine building. Specialized trusts were also formed in the chemical, paper, leather, ceramics, dairy products, tobacco, sugar, electrical, textile, alcohol, glass, and flour-milling industries. Under the NEP there were, altogether, 36 regional and 24 republican trusts in Ukraine. Nominally the trusts were regulated by the Supreme Council for the National Economy (VRNH), but from 1925 some of its responsibilities were transferred to the State Planning Committee. The struggle for control of the trusts among the VRNH, the republic's Planning Committee, and the USSR people's commissariats resulted in the gradual dismantling of most trusts in 1929–30. Some were abolished outright in 1932, along with the VRNH, and enterprises were placed under the direct control of the commissariats.

Under N. Khrushchev's reforms in the early 1960s, which introduced regional economic councils throughout Ukraine and the USSR, trusts were revived. But they were no more than associations that served as a link between the ministries and the individual enterprises and helped

co-ordinate production plans. Trusts such as the coal-mining trusts Anratsyt and Chervonohradvuhillia, the manganese-mining trusts Nykopilmarhanets, the construction trusts Holovkharkivbud and Poltavaspetsbud, and the lumbering trust Lvivderevprom operated until the mid-1970s. Then they were abolished and replaced by *manufacturing consortia.

Trutenko, Valentyn, b 12 March 1881 in Zvenyhorodka, Kiev gubernia, d 30 January 1953 in Santiago, Chile. Military figure. A lieutenant colonel commanding the 175th Baturyn Regiment of the Russian army during the First World War, after the February Revolution he Ukrainianized his unit and brought it from Riga to Kiev, where it became part of the UNR Army. Under the Hetman government of 1918 he was in charge of the waterway between Sicheslav (now Dnipropetrovske) and Cherkasy. Under the UNR Directory he became director of the officer school in Mohyliv-Podilskyyi. He took part in the First Winter Campaign (1919–20) and then was interned with other UNR Army personnel in Poland. After emigrating to Bohemia in 1924, he headed the Ukrainian Military Council, the United Hetman Organization, the Ukrainian-Belarusian Society, and the Ukrainian Orthodox Parish Council in Prague. After the Second World War he lived in Germany, where he was a member of the Supreme Leadership of the Hetmanite Movement, a deputy otaman of the Ukrainian Free Cossacks, and a member of the Hetmanite Council. He emigrated to Chile in the late 1940s.

Kostiantyn Trutovsky: *Bleaching Cloth* (oil, 1874)

Trutovsky, Kostiantyn [Trutovs'kyj, Kostjantyn], b 9 February 1826 in Kursk, Russia, d 29 March 1893 in Yakovlevka, Kursk gubernia. Ukrainian painter and graphic artist. He was raised on his family's estate in Popivka, Okhtyrka county, Kharkiv gubernia. He audited classes at the St Petersburg Academy of Arts (1845–9) and in 1860 was elected a member of the academy. Having adopted the prevailing realist academic style, he specialized in genre paintings depicting life in Kursk gubernia and Ukraine. They include *Woman with Homespun Cloth* (1850s), *Carolers in Ukraine* (1864), *Kobzar on the Dnieper* (1875), *On a Moonlit Night* (1881), and *The Sick One* (1883). Trutovsky also did hundreds of pencil drawings and illustrations. *Russkii khudozhestvennyi listok* printed his illustra-

tions to M. Vovchok's stories in 1860. Other illustrations were published in **Zhivopisnaia Ukraina* (1861–2) and an album of lithographs illustrating N. Gogol's *Vechera na khutore bliz Dikanki* (Evenings on a Farm near Dykanka, 1874–6). He also did illustrations to Vovchok's stories 'Sestra' (Sister) and 'Chumak' (1860), T. Shevchenko's poems 'Haidamaky' (1886), 'Naimychka' (The Hired Girl), and 'Nevol'nyk' (The Captive, 1887), N. Gogol's stories 'Sorochinskaia iarmarka' (Sorochyntsi Fair) and 'Vecher nakanune Ivana Kupala' (St John's Eve, 1876), and I. Krylov's fables. Most of his works were within the framework of the ethnographic sentimental style fashionable at the time; some, however, touched on painful social problems. Trutovsky influenced younger painters, such as S. Vasylykivsky, I. Izhakevych, M. Pymonenko, and O. Slaktion. Books about him by A. Artiukhova (1931), L. Miliaieva (1955), A. Vereshchagina (1955), and Z. Lashkul (1974) have appeared.

S. Hordynsky

Trutovsky, Vasyl [Trutovs'kyj, Vasyl'], b ca 1740 in Ivaniv *sloboda*, Belgorod region, Russia, d ca 1810 in St Petersburg. Singer, musician, and musicologist. After training at the Hlukhiv Singing School he became (1761) a singer and *husli* player at the imperial court and later (1766) a chamber musician there. His outstanding contribution to music was the compilation of *Sobraniiie russkikh prostykh pesen s notami* (A Collection of Russian Common Songs with Notes) in four parts (1776, 1778, 1779, and 1795; repub 1953). This ground-breaking work, which included Ukrainian songs, represented the first systematic collection of 'Russian' folk music. Trutovsky also scored variations on folk songs for piano as well as choral works.

Truvor, b ?, d 864. Semilegendary Rus' prince. According to the chronicle *Povist' vremennykh lit*, Truvor and his brothers, *Riuryk and Syneus, were *Varangians. Truvor ruled the city of Izborsk, in the Novgorod region, from 862 until his death, and then Riuryk assumed control of the city.

Trybratni mohyly. Three (hence the name 'trybratni' or 'three brothers') 4th-century BC burial mounds of *Bosporan Kingdom nobility located south of Kerch, Crimea. Also known as Ych Oba, the mounds were excavated in 1966–7. Although some of the graves at the site had been looted in the past, a stone vault containing the remains of two women and numerous gold and silver adornments, Greek tableware, and amphoras was found intact. Another kurhan revealed the remains of a man and woman in a wooden sarcophagus which contained (among other items) pieces of a wooden bow.

Trybuna (Tribune). A daily nonpartisan, pro-UNR newspaper published in Kiev from December 1918 to February 1919 by Z. Bisky. It was edited by O. Salikovsky, and among its more prominent contributors were S. Petliura, V. Sadovsky, S. Yefremov, O. Kovalevsky, L. Starytska-Cherniakhivska, P. Stebnytsky, M. Kushnir, and N. Surovtsova. The newspaper had a well-organized group of regular reporters and was one of the best and most popular papers of the time; it appeared in a pressrun of 7,000 to 15,000 copies. For some time a separate Russian-language edition, *Stolichnyi golos*, was also published.

A 4th-century-BC gold and enamel earring excavated at Trybratni mohyly

Trybuna Ukraïny (Tribune of Ukraine). An irregular publication of the Ukrainian Central Committee in Warsaw in 1923. The unofficial organ of the Government-in-exile of the UNR, it succeeded **Ukraïns'ka trybuna* and was edited by O. Salikovsky.

Tryhub, Mykola (Trehub), b 20 March 1943 in Mykhailivka, Bila Tserkva raion, Kiev oblast, d 23 March 1984 in Kiev. Painter and graphic artist. He received his train-

Mykola Tryhub and his *Azure Girl* (ink and oil, 1972)

ing at a technical and art high school in Kiev and worked as a handyman at the Kiev Artistic Film Studio (until 1974) and as an artist for the AN URSR (now ANU) Institute of Archeology. Ukrainian subject matter predominated in his modernist paintings and collages (landscapes of Kiev, churches, historical subjects, and portraits of Ukrainian poets). He created over 1,000 works but was able to exhibit publicly only once during his lifetime. Most of his works are in private collections. In 1989, five years after his suicide, his friends organized exhibitions of his work in Kiev. Two hundred of his works are preserved at the Pereislav-Khmelnytskyi Museum of Folk Architecture and Folkways.

Trylisky, Oleksa [Trylis'kyj], b ca 1895, d ca 1936–7. Soviet Ukrainian official and agronomist. A former **Borotbist*, he joined the CP(B)U in 1920. In the late 1920s he was chairman of the Odessa Okruha Executive Committee. Later he served as deputy people's commissar of agriculture and chairman of the Vinnytsia Oblast Executive Committee. He was arrested and executed during the Stalinist terror.

Kyrylo Trylovsky

Trylovsky, Kyrylo [Tryl'ovs'kyj], b 6 May 1864 in Bohutyn, Zolochiv county, Galicia, d 19 October 1941 in Kolomyia, Galicia. Civic and political leader, lawyer, journalist, and publisher. After graduating from Lviv University he practiced law in Kolomyia. In Zavallia, Sniatyn county, he founded the **Sich* society (1900) and then oversaw its spread to other localities. From 1908 he was president of the Supreme *Sich* Committee, and from 1912, general otaman of the Ukrainian *Sich* Committee, which headed the alliance of *Sich* societies. Commonly known as the 'Sich father,' he had a great impact on the growth of national consciousness in Galicia, particularly in the Pokutia region. In 1913 he established the paramilitary **Ukrainian Sich Riflemen* (USS). A founder and one of the key members of the **Ukrainian Radical* party, he was elected to the Austrian parliament in 1907 and 1911 and to the Galician Diet in 1913. In parliament he made almost 1,000 motions and, during a Ukrainian filibuster, a 10-hour speech. At the outbreak of the First World War he became chairman of the Combat Board of the USS and a member of the General Ukrainian Council. In 1918 he was a member of the Ukrainian National Rada. After setting up a *Sich* committee in Vinnytsia (1919) he organized several *Sich* societies in Transcarpathia and, eventually, Vienna. As an émigré in Vienna he served on the codification

commission of the Government-in-exile of the Western Ukrainian National Republic. He returned to Galicia in 1927. Occasionally using the pen name Klym Obukh he wrote many articles and Sich songs and published a series of brochures and Sich songbooks. For many years he was a correspondent for *Svoboda* and *Narodne slovo* in the United States. He edited the monthly *Zoria* and the semi-monthly *Khlops'ka pravda*, as well as almanacs such as *Zaporozhets'* and *Otaman*. An extended excerpt from Trylovsky's memoirs was published in *Hei, tam na hori 'Sich' ide* (Hey, the Sich Is Marching on the Hill, 1965).

Trynchy, Peter [Trynčij], b 22 August 1931 in Rochfort Bridge, Alberta. Politician. A farmer and businessman, Trynchy was first elected to the Alberta provincial legislature as the Progressive Conservative member for Whitecourt constituency in 1971. He was re-elected in 1975, 1979, 1982, and 1986. He served in the cabinet as minister of recreation and parks (1979–86).

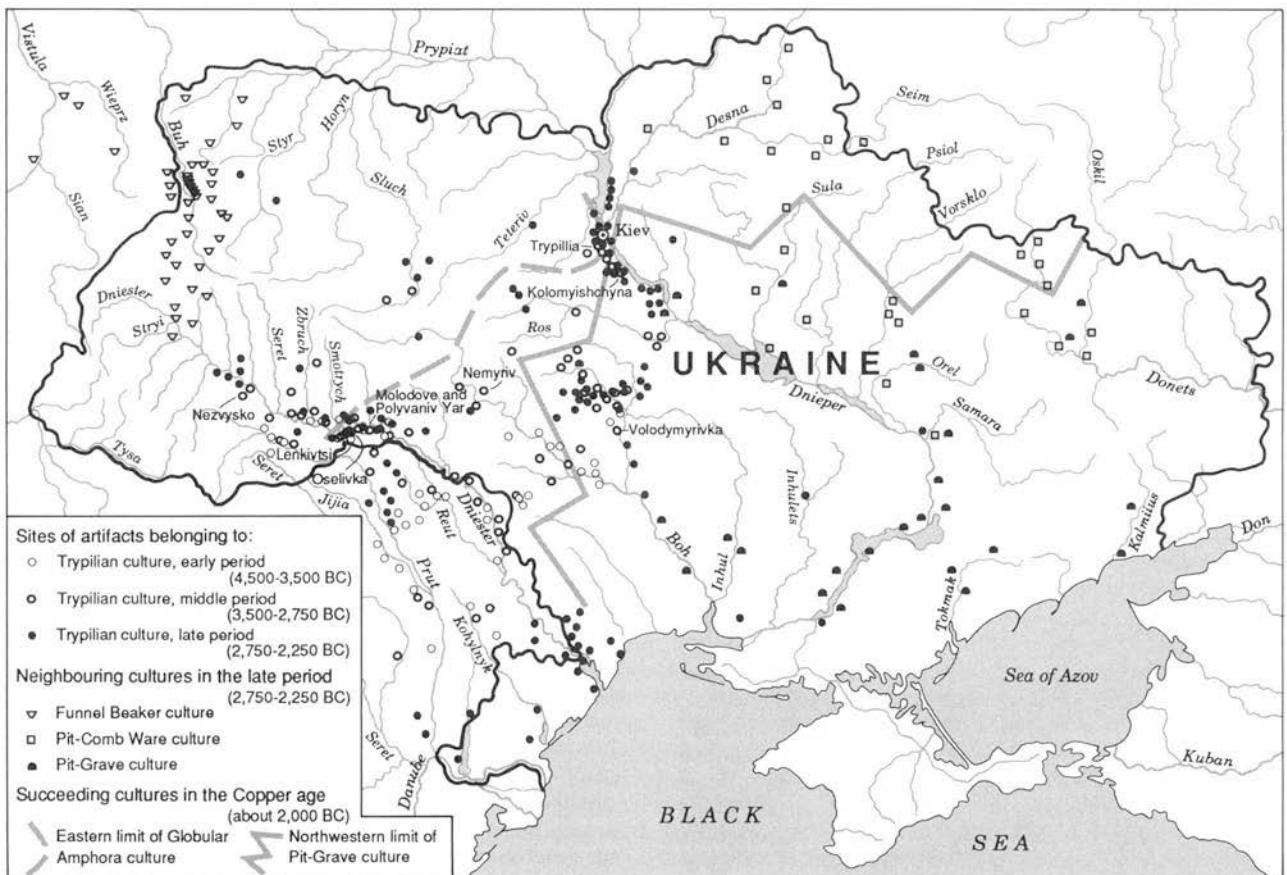

Tryndyk, Fed. See Hirny, Vasyl.

Trypilian culture. A Neolithic–Bronze Age culture that existed in Right-Bank Ukraine ca 4500 to 2000 BC. It is named after a site in the Kiev region uncovered by V. *Khvoika in 1898. The Trypilians were primitive agricultural and cattle-raising tribes that migrated to Ukraine from the Near East and from the Balkans and Danubian

Artifacts of the Trypilian culture: 1) stone ax-hammer head; 2) stone hammer head; 3) flint ax head; 4) clay spindle weight; 5) copper dagger blade; 6) and 7) copper ax heads; 8) elk-bone hoe blade; 9) elk-bone sickle with flint inlays; 10) and 11) stone cult figures; 12) and 13) painted clay pottery

regions in the east. Scholars have identified three periods in the development of this culture – early (4500–3500 BC), middle (3500–2750 BC), and late (2750–2250 BC). The differentiation of periods is characterized by an increase in population and the geographic spread of the culture: initially concentrated in the upper and middle Prut and Seret and the middle Dniester and Boh river basins, the culture spread in the middle period to include the right bank of the Dnieper, and in the late period to the left bank of the Dnieper, the southwest steppe region, and the Sluch,

TRYPILIAN CULTURE

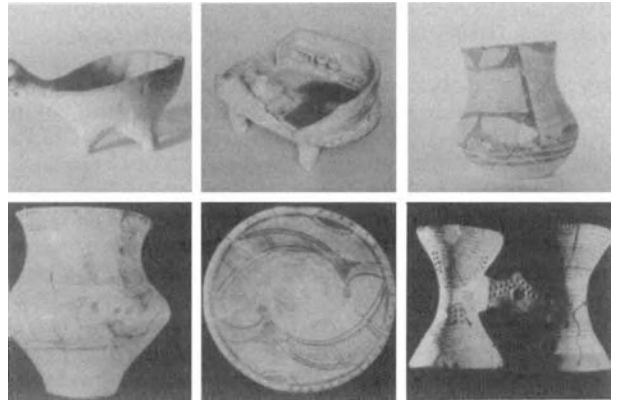

Horyn, and Styr river basins. As it spread, the Trypilian culture assimilated the cultures of existing tribes. The periods are also differentiated by changes in settlement patterns, the economy, and the spiritual life of the people.

During the 4th millennium BC, Trypilian tribes began settling in low-lying riverbank areas and on plateaus in the Dnieper and Boh river basins. They built pit and semi-pit dwellings with clay floors and hearths or ovens, and walls of wattle and dab. Rectangular surface dwellings, constructed with similar materials but on a raised log platform covered with clay and (probably) with a thatched roof, also began to appear at this time. Clay altars, usually either round or cross-shaped, were also commonly constructed in dwellings (Kolomyishchyna, Volodymyrivka). Settlements were established by clans and contained 15 to 30 dwellings. Initially, extended families usually shared a single dwelling and houses were simply enlarged to accommodate new members, but from the middle period nuclear families generally occupied their own dwellings. In the later periods of the culture, settlements were usually established on high plateaus that were drier and more defensible, sometimes by moats and walls. These settlements were generally larger than earlier ones (eg, *Volodymyrivka contained almost 200 dwellings). In later settlements houses often had a rounded floor plan, and they were arranged in a circle for defensive purposes and to pen livestock in a central enclosure.

The major economic activities of the early Trypilians were primitive agriculture and animal husbandry, supplemented by extensive hunting, fishing, and food gathering. Wheat, millet, and barley were sown on land tilled with mattocks made from antlers or with digging sticks with sharpened points. Crops were harvested using bone sickles with flint blades and the grain was ground by stone querns. Horned cattle, together with pigs, sheep, and goats, were the most-domesticated animals; deer, wild boar, and roebucks were the animals most commonly hunted. Animal husbandry emerged as the most important economic activity in the middle and late periods. This not only influenced the arrangement of dwellings in the settlement to protect livestock, but also led to the development of a pastoral lifestyle; the remains of many temporary settlements by floodplains and other grazing areas have been uncovered. The late period was also marked by the introduction of the domesticated horse. Although greater areas were brought under cultivation, agricultural techniques changed little.

The basic tools of the Trypilian culture were made of stone, bone, and flint. Some small bronze items, especially fishhooks, bracelets, and rings, have been found at Trypilian excavations. The tribes of the culture traded with peoples in the Balkans or Transylvania (the source of copper found at *Luka-Vrublivetska) and on the Aegean (this was especially true of tribes located in southern Ukraine). Weaving also developed, although the looms remained rather primitive.

The Trypilian culture is especially known for its ceramic pottery. In the early period, handbuilt large pear-shaped vessels for storing grains and various types of pots, plates, spoons, colanders, and the like were all common. Earthenware was also used to make figurines of women, scale models of homes, jewelry, and amulets. The exterior of the pottery was decorated with inscribed ornamentation in the form of spiralling bands of parallel dou-

Pottery of the Trypilian culture

ble lines. Most figurines were decorated with the same type of ornamentation. The figurines, house models, and amulets had ritual significance linked to an agrarian cult of fertility and prosperity. This cult, in turn, was linked to burials in homes. White, red, and black polychromatic spiral ornamentation was found on pottery unearthed at several early Trypillian sites (Kadiivtsi, Bavky, Kudryntsi, Nezvysko, and Frydrivtsi). Pottery-making reached an especially high level of development in the middle and late periods of the culture.

The Trypilians initially had a matriarchal-clan order in which women engaged in agricultural work, headed households, manufactured pottery, textiles, and clothing, and played a leading role in societal affairs, while men hunted, tended to cattle, and prepared tools out of flint, stone, and bone. Later, with the increase in importance of animal husbandry, a patriarchal order developed.

As a result of incursions by other cultures (particularly the *Pit-Grave culture) into Ukrainian territory in the mid-3rd to early 2nd millennium BC, many characteristic Trypilian traits changed or disappeared altogether. The technique of house construction was altered and the spiraling motif common to Trypilian pottery was replaced by corded designs. Anthropomorphic designs became schematized and older forms of pottery disappeared. Burial practices showed the influence of the Pit-Grave culture with its characteristic graves, tumuli, and patriarchal burial rites. The *Usatove tribe of the western Black Sea steppe region was assimilated by the Pit-Grave culture. The historical fate of other Trypilian tribes was varied, as evidenced by the transition of tribes of the middle and upper Dniester regions into the *Globular Amphora culture during the middle Bronze Age.

The Trypilian culture is perhaps the most investigated archeological culture in Ukraine (see *archeology). Hundreds of Trypilian sites have been excavated and studied, including major ones at *Lenkivtsi, *Nezvysko, *Oselivka, *Polyvaniv Yar, *Molodove, and *Nemyriv.

Trypilska, Yelyzaveta [Trypil's'ka, Jelyzaveta], b 31 November 1881 in Poltava, d 6 November 1958 in Baku, Azerbaidzhan. Sculptor. She studied in the studios of R. Bakh, V. Beklemishev, and L. Shervud in St Petersburg and N. Aronson in Paris. From 1922 she lived in Baku. Her works on Ukrainian themes include *Peasant, Water Spirit* (1904–9), *Chatterbox* (1910), *Ashamed* (1911), *Uncle Kryvonis* (1911), *Priest's Wife* (1911), and *Joking* (1916–17).

Tryzna, Yosyf [Tryzna, Josyf], b ?, d 1655 or 1656. Orthodox churchman. He graduated from the Kievan Mohyla Academy. In 1640–7 he was hegumen of the Vilnius Holy Ghost Monastery, and in 1647 he succeeded P. Mohyla as archimandrite of the Kievan Cave Monastery. He opposed the *Pereiaslav Treaty of 1654. A manuscript of the Kievan Cave Patericon known as the Yosyf Tryzna redaction was completed during his tenure as archimandrite, possibly by Tryzna himself. He also wrote a foreword to the *Sluzhebnyk* (Liturgicon) of 1653.

Tryzub (Trident). A weekly journal of politics, civic affairs, history, and culture, published in Paris from 15 October 1925 to 1940 (705 issues); the unofficial organ of the *Government-in-exile of the UNR. Founded on the initiative of S. Petliura, it was edited by V. Prokopovych and, in 1940, by O. Shulhyn. In 1926–7 it issued 10 extra editions covering the trial of S. Schwartzbard, Petliura's assassin. In 1938–9 it published regular supplements for women (ed Z. Mirna), young people (ed B. Olkhivsky), the Plast scouting organization (ed S. Nechai), and children (ed S. Siropolko). *Tryzub* devoted considerable attention to political and cultural developments in Soviet Ukraine (it remains an important source of information for that period) and reported on efforts by Ukrainian émigrés to promote the Ukrainian question in the West. It published regular accounts of activities in the centers of Ukrainian émigré life (Paris, Prague, Warsaw, Vienna) and several memoirs of the period of Ukrainian statehood.

Tryzub (Trident). An organ of the émigré *Ukrainian National State Union (UNDS), published in New York City bimonthly from January 1961 to December 1970 and then quarterly to 1975 (a total of 78 issues). It was preceded by the bimonthly *Biuletyn' UNDS* (1955[?]-60). Both periodicals contained organizational news and documents, articles and memoirs about events and figures of the 1917–20 struggle for Ukrainian independence, critiques of Soviet communism, and information and commentaries about émigré political life. The chief editors were A. Zubenko and Z. Ivasyshyn.

Trzciniac culture. A Bronze Age culture of the 16th to 12th centuries BC which existed in north central and north-western Ukraine and parts of eastern Poland. It was named after an archeological site in Poland. Although excavations of this culture had been made as early as the 1870s and 1880s, it was regarded as a part of the *Komariv culture and not recognized as a distinctive grouping until the 1960s. The people of the Trzciniac culture lived in semi-pit and surface dwellings and had outbuildings built on pilings for storing grain. Their funeral practices included both full body burials and cremations. They engaged in

agriculture, animal husbandry, hunting, and fishing. In addition to flint and stone implements, a wide variety of pottery, bronze adornments, and evidence of several flint workshops have been uncovered at culture sites.

Tsalai-Yakymenko, Oleksandra [Calaj-Jakymenko], b 27 March 1932 in Lubni, Dnipropetrovske (now Poltava) oblast. Musicologist. She graduated from the Lviv State Conservatory (1958) in the class of L. Umanska and S. Liudkevych, and finished postgraduate studies at the Kiev State Conservatory (1962) in the class of H. Taranov. Since 1963 she has taught at the Lviv State Conservatory. She has written numerous articles on Ukrainian musical culture of the 16th to 18th centuries for *Ukrains'ke muzykoznavstvo* and other scholarly journals, as well as reviews of the works of Lviv composers for radio, television, and the press.

Tsamblak, Gregory [Camblak, Hryhorij], b 1364 in Trnovo, Bulgaria, d ca 1419. Churchman and writer. He was probably educated in Trnovo and Constantinople. In 1401 he was sent to Suceava by the Byzantine patriarchate to improve relations with the Moldavian church. He was consecrated (on the initiative of the Lithuanian grand duke Vytautas) by several bishops from Belarus and Ukraine in Navahrudak in November 1415 and installed as metropolitan of the renewed *Lithuanian metropolity. His installation was against the wishes of Euphemius II, the patriarch of Constantinople, who opposed a division of Kiev metropolity and supported Photios, the metropolitan in Moscow. In February 1418 Tsamblak attended the ecumenical council in Constance. Subsequently he was accused of Uniate tendencies by the Muscovite church. In order to avoid persecution he abdicated, and probably died soon afterward.

Tsamblak wrote a number of sermons and panegyrics in the rhetorical style of the Trnovo school. His sermons for Palm Sunday, the Ascension, the Transfiguration, the Assumption, the Elevation of the Cross, the festival of St Demetrius, and the Confession of Faith (read on the occasion of his consecration), his panegyrics on Metropolitan Cyprian (1409) and Patriarch Euphemius, and other works are all from his Ukrainian period; a selection of his writings, edited by A. Yatsimirsky, appeared in 1904.

A. Zhukovskiy

Tsapenko, Mykhailo [Capenko, Myxajlo], b 6 November 1907 in Biliaky, Khorol county, Poltava gubernia. Architect and art scholar. After graduating from the Moscow Architectural Institute (1935) he worked as an architect in Caucasia and Moscow. After the Second World War he moved to Kiev, where he headed the AN URSS (now ANU) Institute of the Theory and History of Architecture (1951–9) and edited *Budivnytstvo i arkhitektura* (1953–8). He wrote books in Russian on Soviet architecture (1952, 1955, 1967), Bulgarian architecture (1953), and the architecture of 17th- and 18th-century Left-Bank Ukraine (1967) and a chapter on stone architecture in 17th- and 18th-century Ukraine in vol 3 of the ANU history of Ukrainian art (1968).

Heorhii Tsapok

Olena Tsehelska

Tsapok, Heorhii [Capok, Heorhij], b 1 May 1896 in Kharkiv, d 21 June 1971 in Kharkiv. Scenery designer and graphic artist. He studied at the Kharkiv Art School (1914–18). In the interwar years he designed scenery for the Kharkiv Operetta Theater, the Kharkiv First Theater for Children, the Kharkiv Theater of the Revolution, the Kiev Ukrainian Drama Theater, and the Kharkiv Russian Drama Theater. His sets of the 1920s were interesting examples of constructivist design. He also designed book covers and posters.

Tsarskyi kurhan. A 4th-century BC Bosporan burial mound located southwest of Kerch, Crimea. The tomb is an elaborate structure built of finished blocks of stone. It contains a corridor (7 m high and 36 m long) leading to a chamber, in which a king was probably buried. The corridor is vaulted in a striking manner, while the main burial chamber is a rectangular room in which the walls gradually close in overhead to form a cupola. A layer of stones and 17 m of earth were placed over the structure. Excavations in 1837 found the structure had been thoroughly looted.

Tsarychanka [Caryčanka]. V-15. A town smt (1986 pop 7,800) on the Orel River and a raion center in Dnipropetrovske oblast. It originated in 1604 as a Cossack *khutir* and was settled by Uman Cossacks in 1673. A few years later it became a company center of Poltava regiment. It was destroyed by the Tatars in 1696, but it revived and in 1765 became part of New Russia gubernia. From 1802 to 1923 it belonged to Poltava gubernia. Today it is an agricultural town with a dairy, canning factory, mineral-water bottling plant, and folk-crafts factory.

Tschezewskyj, Dmitrij. See Chyzhevsky, Dmytro.

Tsehelska, Olena [Cehel's'ka] (née Kyzyma), b 1887 in Hora, Sokal county, Galicia, d 16 September 1971 in Philadelphia. Pedagogue and writer of books for children. A teacher in a village near Zolochiv until 1939, she fled in 1940 to Germany and later emigrated to the United States. She made her debut in 1910 with a short story in the newspaper *Dilo*. Subsequently she contributed to and was on the staff of various children's journals, such as *Dzvinok*, *Svit dytyny*, *Mali druzi*, and (later) *Veselka*. Her notable works include *Hanusia ide do mista* (Hanusia Goes to Town, 1930) and *Petruseva povist* (Peter's Story, 1950).

Lonhyn Tsehelsky

Rev Mykhail Tsehelsky

Tsehelsky, Lonhyn [Cehel's'kyj, L'onhyn], b 1875 in Kaminka-Strumyl'ova, Galicia, d 13 December 1950 in Philadelphia. Lawyer, journalist, and political leader; son of Rev M. *Tsehelsky. While studying law at Lviv University he was a founder of the *Academic Hromada, co-editor of the journal *Moloda Ukraïna* (1900–2), and the author of the pamphlet *Rus'-Ukraïna i Moskovshchyna-Rosiiia* (Rus'-Ukraine and Muscovy-Russia, 1901), which had a great influence in the development of national consciousness among the people in Galicia and Russian-ruled Ukraine. He maintained ties with the Revolutionary Ukrainian party, particularly with M. *Mikhnovsky, whose *Samostiina Ukraïna* (Independent Ukraine, 1900) he published in Lviv. He was an organizer of the agrarian strike of 1902 in Galicia. While editing *Dilo* (1908), *Svoboda* (1907–8), and *Ukraïns'ke slovo* (1915–18) he was active in politics, and he was elected to the Austrian parliament in 1907 and 1911 and the Galician Diet in 1913. With the outbreak of the First World War he joined the Supreme Ukrainian Council, the Combat Board of the Ukrainian Sich Riflemen, and the General Ukrainian Council. He was active in the *Union for the Liberation of Ukraine and wrote its political pamphlets (published in several languages) and articles. In 1918 he became a member of the Ukrainian National Rada and state secretary of internal affairs for the Western Ukrainian National Republic (ZUNR). On 1 December 1918 he and D. Levytsky signed the initial agreement with the UNR Directory on the union of the UNR and the ZUNR. In January 1919 he was appointed director of the Secretariat of Foreign Affairs for the Western Province of the UNR and deputy foreign minister of the UNR. Having been sent to the United States in 1920 by Ye. Petrushevych as a representative of the ZUNR government he settled in Philadelphia and worked on the staff of **Ameryka*, of which he became editor in 1943. He was one of the founders and vice-presidents of the Ukrainian Congress Committee of America and vice-president of the Pan-American Ukrainian Conference. His memoirs were serialized in *Ameryka* and then published as *Vid legendy do pravdy* (From Legend to Truth) in 1960.

Tsehelsky, Mykhail [Cehel's'kyj, Myxajil], b 1848 in Vysotske, Brody county, Galicia, d 1944. Ukrainian Catholic priest and civic activist. A parish priest in Kaminka-Strumyl'ova from 1875 until the end of his life, he established and led local and regional branches of several Ukrainian community organizations, including Prosvita, the Ruthenian Pedagogical Society, and the Ukrainian Na-

tional Democratic party. He was taken as a hostage to Russia by the tsarist army in 1915–17. He was Metropolitan A. Sheptytsky's vicar-general for central Ukraine in 1917–18, a member of the Ukrainian National Rada in Stanyslaviv in 1919, and papal chamberlain for the region.

Roman Tsehelsky

Hryhorii Tsehlynsky

Tsehelsky, Roman [Cehel's'kyj], b 12 July 1882 in Kaminka-Strumyl'ova, Galicia, d 3 October 1956 in Lviv. Experimental physicist; full member and secretary (1926–36) of the Shevchenko Scientific Society; son of M. Tsehelsky. He studied at the universities of Lviv, Prague, and Chernivtsi (PH D, 1911), and he taught at secondary schools in Ternopil (1904–5), Chernivtsi (1905–14), and Lviv; at the Lviv (Underground) Ukrainian University; at the Lviv Pedagogical Institute (1937–9); and at Lviv University (1939–40). In 1940 he was exiled to Tomsk, in Siberia, where he continued teaching. After Stalin's death he was rehabilitated, and returned to Lviv. He is the author of Ukrainian textbooks on chemistry (1911) and arithmetic.

Tsehelsky, Yevhen [Cehel's'kyj, Jevhen], b 5 May 1912 in Chernivtsi, d 9 October 1980 in Rochester, New York. Violinist, musicologist, and teacher. He studied at the Prague State Conservatory (violin major, 1937) and Charles University in Prague (PH D in musicology) and then directed the Peremyshl school of the Lysenko Higher Institute of Music (1937–9). He toured Ukraine as a solo violinist, and he was the main organizer and artistic director of the 1942 Regional Choral Competition in Lviv. He emigrated to the United States in 1949, where he taught violin and was a member of the Rochester Community Symphony Orchestra. Among his musicological works are the monograph *Chekhy i halyts'ko-ukraïns'ka svits'ka muzyka v 19 stolitti* (The Czechs and Galician-Ukrainian Secular Music of the 19th Century, 1943) and several articles and reviews.

Tsehliar, Yakiv [Cehljar, Jakiv] (Ziegler), b 29 February 1912 in Kiev. Composer. After graduating from the Kiev Music School (1939) and the Tbilisi Conservatory (1946) he became the music editor of the Kiev Studio of Popular Science Films (1953–73). His works include the operettas *Hist' z Vidnia* (The Guest from Vienna, 1960) and *Divchyna i more* (The Girl and the Sea, 1965), the cantata *Bezsmertnomu Kobzariu* (To the Immortal Bard, 1963), and chamber music, choruses, Ukrainian folk song arrangements, and film scores.

Tsehlynsky, Hryhorii [Cehlyns'kyj, Hryhorij] (pseud: Hryhorii Hryhoriiievych), b 9 March 1853 in Kalush, Galicia, d 23 October 1912 in Vienna. Writer, teacher, and civic figure. As a student at Vienna University (1874–9) he was active in the Sich student society. After graduating he was a teacher at the Academic Gymnasium of Lviv (1880–8), the person in charge of the Ruska Besida Theater's repertoire (1882–8), editor of the Lviv biweekly *Zoria* (1887–8), and director of the *Peremyshl State Gymnasium's Ukrainian classes (1888–95) and its principal (1895–1910). In Peremyshl he helped to found the St Nicholas Bursa society, the Ukrainian Girls' Institute, the Vira and Ukrainka Shchadnytsia credit co-operatives, and the People's Home, and he prepared textbooks for use in Galicia's Ukrainian gymnasiums. In 1907 he was elected to the Austrian parliament, and became a member of the presidium of the Ukrainian Parliamentary Club in Vienna. He was buried in Peremyshl. Tsehlynsky's poems, stories, reviews, political articles, and literary criticism appeared in *Dilo* and *Zoria* in the 1880s and 1890s. In the years 1883–5 he wrote a column called 'Z teky Padury' (From Padura's Portfolio) in *Zerkalo*. For the Ruska Besida Theater he wrote the first (albeit commonplace and superficial) Ukrainian comedies about the contemporary Galician bourgeoisie, nobility, and intelligentsia: *Na dobrodiimi tsily* (For Good Causes, 1884), *Sokoluky* (The Falconets, 1885), *Tato na zaruchynakh* (Father at the Betrothal, 1885), *Lykhyi den'* (A Terrible Day, 1886), *Shliakhta khodachkova* (The Petty Nobility, 1886), *Torhoolia zhemchuhamy* (Trade in Pearls, 1895), and *Argonavy* (Argonauts, 1898). He also wrote the didactic dramas *Vorozhbyt* (The Soothsayer, 1902) and *Kara sovisty* (Punishment of the Conscience, 1903). He was the most popular playwright in Galicia in the years 1883–95.

R. Senkus

Mykola Tsehlynsky

Volodymyr Tselevych

Tsehlynsky, Mykola [Cehlyns'kyj] (Ceglinsky, Nicholas), b 1883 in Lviv, d March 1956 in New York. Journalist and community figure. He was educated in Switzerland, and emigrated to the United States around 1916. He became involved with the Federation of Ukrainian Socialist Parties in the United States (FUSP) and established a close working relationship with M. *Sichynsky. He was forced

out of his position as editor of the federation's newspaper *Robitnyk* when the group began to move ideologically toward bolshevism. He edited the Ukrainian Fraternal Association's newspaper **Narodna volia* in 1922-3, 1942-3, and 1946-7. He was one of the initiators of (1922) and leading figures in the **Oborona Ukrainy* society, but broke with that group in 1936 and established a Ukrainian Workers' Hromada that briefly published *Robitnycha hromada* in Newark, New Jersey.

Tsekhanovetsky, Hryhorii [Cexanovec'kyj, Hryhorij], b 1833 in the Chernihiv region, d 1898 in Kharkiv. Economist and statistician. A graduate of Kiev University (PH D, 1869), he taught economics there (1859-72) and then at Kharkiv University (1873-98), where he also served as rector (1881-4). He wrote *Znachenie Adama Smita v istorii politiko-ekonomicheskikh sistem* (The Importance of Adam Smith in the History of Political-Economic Systems, 1859), in which he criticized some aspects of Smith's theories and advocated a historical approach to the study of economics; *Zheleznyia dorogi i gosudarstvo* (Railroads and the State, 1869), based on his dissertation; and articles on political economy and other topics. He favored state intervention in some sectors of the economy, including railroad construction.

Tsekhnovitser, Marko [Cexnovicer], b 1890 in Staryi Oskol, Kursk gubernia, Russia, d 13 May 1945 in Moscow. Microbiologist; full member of the USSR Academy of Medical Sciences (AMN SSSR) from 1944. A graduate of Kharkiv University (1915), he worked for the Kharkiv Bacteriological Institute (from 1925 as department head, from 1932 as director), taught at Kharkiv University (from 1930), and headed the microbiology departments at the Kharkiv Institute for the Upgrading of Physicians (1930-5) and the Kharkiv Medical Institute (from 1935). In 1944 he joined the Bureau of Hygiene, Microbiology, and Epidemiology of the AMN SSSR. He researched the microbiology and immunology of tuberculosis, children's diseases, rickets, typhus, malaria, and rabies.

Tselevych, Volodymyr [Celevyč], b 1891, d ca 1944. Political leader in Galicia. A graduate in law from Lviv University, he was one of the leading Ukrainian politicians in Galicia in the interwar period. In 1919-22 he was secretary of the Ukrainian Citizens' Committee in Lviv and then general secretary of the Ukrainian National Democratic Alliance (1925-8 and 1932-7). In 1928 and 1935 he was elected to the Polish Sejm, where he served as vice-president of the Ukrainian Club. In 1930 he was imprisoned in Brest, and in 1935 he conceived the so-called Normalization policy with V. Mudry. He was chief editor of the weekly *Svoboda* from 1932 to 1935. His political articles, which appeared in *Svoboda* and *Dilo*, included items on electoral law, self-government, and municipal law. He also wrote political pamphlets, such as *Narid, natsiia, derzhava* (A People, Nation, and State, 1934). In 1939 he was arrested by the Soviets, and disappeared in a Moscow prison.

Tselevych, Yuliiian [Celevyč, Julijan], b 23 March 1843 in Pavelche, Stanyslaviv circle, Galicia, d 24 December 1892 in Lviv. Teacher and historian. After studying at the universities of Lviv (1862-5) and Vienna (1865-8; PH D,

Yuliiian Tselevych

Mykola Tsenko

1878), where he was involved in the Sich student society, he taught in Stanyslaviv and Lviv (from 1875 at the Academic Gymnasium) and wrote works on Galician history, including *Istoriia Skytu Maniavs'koho* (History of the Maniava Hermitage, 1886) and some of the first studies of the opryshoks. In 1892 he became the first head of the reorganized Shevchenko Scientific Society.

Tselevych-Stetsiuk, Uliana [Celevyč-Stecjuk, Uljana] (née Dyda), b 28 April 1915 in Chicago, d 18 August 1981 in Chicago. Political activist. In the 1920s she returned with her parents to Ukraine, where she completed her education and became active in the OUN (1933) and the cooperative movement. During the war she joined the OUN expeditionary groups. After returning to Chicago in 1948, she became active in the Anti-Bolshevik Bloc of Nations (ABN) and served for many years as vice-president of the *Ukrainian Liberation Front and the World Federation of Ukrainian Women's Organizations. She was one of the founders and a president (1967-81) of the Women's Alliance of the *Organization for the Defense of Four Freedoms for Ukraine.

Tseltner, Volodymyr [Cel'tner] (Popov), b 26 April 1926 in Kiev. Art scholar. A graduate of the Kiev Institute of Theater Arts (1950), he has written books on Soviet Ukrainian art of the 1920s and 1930s (1966, with L. Popova) and on K. Ahnit-Sledzevsky (1968), T. Yablonska (1968, with L. Popova), F. Manailo (1970), and V. Lytvynenko (1971).

Tsesmeska Bay [Cemes'ka zatoka]. IX-18. The largest bay along the east-central Black Sea coast. Located southeast of Kerch Strait, it is 9 km wide at its entrance, 15 km long, and 21-27 m deep. It does not freeze over in the winter. The city of Novorossiisk is situated at its sheltered northern corner.

Tsenko, Mykola [Cenko], b 5 May 1910 in Synevidsko Nyzhnie, Stryi county, Galicia. Civic activist. After graduating from Lviv University (1933) he practiced law and served as president of the *Vidrozhennia society in Lviv (1936-9). During the Second World War he headed the organizational department of the *Ukrainian Central Committee in Cracow and Lviv (1940-4) and obtained a doctorate of law from the Ukrainian Free University in

Prague (1943). In 1949 he emigrated to the United States, where he developed a successful real estate business and was active in several Ukrainian organizations. He is a patron of Ukrainian scholarship and the benefactor of the Cenko Prize for bibliography.

Tsentral (full name: Tsentralnyi ukrainskyi silsko-hospodarskyi kooperatyvnyi soiuz [Central Ukrainian Agricultural Co-operative Union]). A co-operative association established in Kiev in January 1918 to represent agricultural organizations and co-operatives throughout Ukraine, supply them with farm machinery, equipment, and fertilizers, organize a distribution system for agricultural produce, and promote associations for the joint cultivation of land. The Kiev Central Agricultural Society (est 1915), which had been run by P. Pozharsky as president, V. Koval as vice-president, and Rev T. Dobriansky as a member of the executive, was the predecessor of Tsentral. The Tsentral congress at the end of August 1918 elected an executive of Koval (president), K. Shemetiv, N. Filipovsky, M. Shapoval, O. Mytsiuk, and V. Domanytsky (secretary) and a board of directors headed by K. Matsiievych. By July 1919 the union represented 41 co-operative associations and 728 individual co-operatives. Its assets increased from 5,400,000 *karbovantsi* in January 1918 to 21,148,000 *karbovantsi* in January 1919 and 147,707,000 *karbovantsi* in October 1920. It maintained offices in Odessa, Kharkiv, Poltava, Katerynoslav, and Vinnytsia. In the summer of 1918 it acquired a large plow factory in Odessa and owned several sawmills. Tsentral's organ was the semimonthly *Sil's'kyi hospodar*, published in Kiev in 1918–19.

In 1920 the Soviet authorities abolished all independent co-operatives in Ukraine, including Tsentral. In 1922 they set up the government-controlled *Sil'skyi Hospodar association of farm co-operatives in its place.

Tsentrobank (full name: Tsentralnyi kooperatyvnyi bank [Central Co-operative Bank]). The main financial institution and organizational center for all Ukrainian co-operatives in Galicia. It was established in Lviv in 1898 by K. *Levytsky, S. *Fedak, and Ya. *Kulachkovsky. It was known at first as the Provincial Credit Union; its purpose was to organize credit and other co-operatives, accept deposits from and grant credit to the individual co-operatives, and oversee the development of the entire co-operative movement in Galicia. The first director, Levytsky, was succeeded by K. Pankivsky, H. Vretsona, and O. Saievych. The board of directors was chaired by H. Kuzma. Initially the union represented 17 credit and 2 trade co-operatives. By 1913 it had 906 members, including 427 co-operatives. Its assets reached 1.1 million kronen, its outstanding loans 4.3 million kronen, and its turnover 106 million kronen. In 1904 its organizational responsibilities for the co-operative movement in Galicia were transferred to the newly created *Audit Union of Ukrainian Co-operatives.

After the First World War the union was revived and reorganized. Its name was changed to Tsentrobank in 1924. The bank continued to function as the overall co-ordinating body for the rural *Raiffeisen credit co-operatives and the urban *Ukrainbank credit unions. Initially growth was slow because of the economic depression. In 1928 the membership was 565. By March 1939 the union had 1,889 members, of which 1,732 were co-operatives (in-

cluding 113 Ukrainbank branches). Tsentrobank shares were worth over 323,000 zlotys. Its reserve funds were 320,000 zlotys, its deposits 2.2 million, its outstanding loans 2.7 million, and its turnover more than 70 million zlotys. From 1924 the managing director of Tsentrobank was Levytsky; his assistants were Saievych, S. Kuzyk; and I. Olkhovy. V. Okhrymovych, L. Kulchytsky, M. Voloshyn, and then A. Mudryk served as chairmen of the board of directors. Tsentrobank ceased to function in 1939, following the first Soviet occupation of Western Ukraine. Under German occupation (1941–4) it was revived partially: it had 71 Ukrainbank branches, but its activities were limited. The second Soviet occupation put an end to its activities.

A Tsentrosoiuz store in Lviv

Tsentrosoiuz (full name: Soiuz kooperatyvnykh soiuziv [Union of Co-operative Unions]). A central association of Ukrainian agricultural co-operatives in Galicia for marketing their farm products and purchasing various commodities for them. It was established on the initiative of T. Kormosh in Peremyshl in 1899 as the Farming and Trading Association and had 40 members. In 1911 it transferred its headquarters to Lviv and affiliated itself with the *Sil'skyi Hospodar society, forming the Provincial Union of Agricultural Associations, a trade syndicate of the Sil'skyi Hospodar. By the outbreak of the First World War the union had 16 branches in the major towns and 481 members, including 66 co-operatives. Its turnover in 1912 totaled almost 11 million Austrian kronen, and its operations extended to Bukovyna, Transcarpathia, Bosnia, and the Ukrainian communities in Canada and the United States. Before the war the directors of the union included D. Korenets, Kormosh, I. Lypetsky, and S. *Herasy-movych; Ye. Olesnytsky served as chairman of the board of directors. During the war the union dissolved.

In 1921–2 co-operative associations on a regional or county level arose throughout Galicia, and the Union of Agricultural Associations was established to co-ordinate their activities. In 1924 the union adopted a new statute and changed its name to the Union of Co-operative Unions, or Tsentrosoiuz. At the time it represented 5 central co-operative organizations, 25 county or regional associations, and 1,491 primary co-operatives. Its turnover was 1.7 million zlotys. It supplied Ukrainian rural co-

BOUNDARIES OF TSENTROSOIUZ

operatives with consumer and dry goods, agricultural machinery and equipment, building materials, fuel, artificial fertilizers, and seed. Tsentrosoiuz owned and operated factories manufacturing soap, thread, and batteries and processing meat. It marketed Ukrainian agricultural produce (meat, eggs, etc) throughout Poland and even in Central and Western Europe. The farm co-operative movement grew quickly in the late 1920s before the onset of the Great Depression and then revived in the mid-1930s. By the end of 1938 Tsentrosoiuz represented 4 central co-operative organizations, 26 county or regional associations, and 143 other co-operatives. Its turnover increased from 10.6 million zlotys in 1933 to 37.5 million in 1937. Its top executives in the interwar period were Herasymovych, Yu. *Sheparovych, V. Medvetsky, M. Tvorydlo, I. *Martiuk, and O. Radlovsky; the chairman of the board of directors was Korenets and then O. Lutsky. During the Second World War the organization was directed by I. Semianchuk. When Soviet power was established in Western Ukraine, Tsentrosoiuz was dissolved.

Tsentrostudiia. See Mykhailychenko Theater.

Tsependa, Kyrylo [Cependa], b 24 December 1914 in Dzhuryn, Chortkiv county, Galicia. Conductor. In 1938–9 he studied at the Lysenko Higher Institute of Music in Lviv in the choral conducting class of M. Kolessa and theory classes of S. Liudkevych, B. Kudryk, Z. Lysko, and W. Wytwycky. He conducted the St Barbara Church choir in

Vienna (1941–2) and the Vienna Sich student chorus (1942–5). In 1946–9 he led the male chorus Trembita in Berchtesgaden, Germany. Since 1949 he has lived in the United States, where from 1955 he conducted the mixed chorus Trembita in Detroit. His conducting skill is preserved on numerous recordings.

Tsepko, Ivan [Cepko], b 11 November 1899 in Korshylyv, Zolochiv county, Galicia, d 28 October 1922. Political activist and insurgent. After serving in the Austrian and the Ukrainian Galician armies he joined the Communist party in 1920 and fought with the Red Army against Polish forces. He was a delegate to a conference of Galician and Bukovynian Communists in Kiev. In 1922, with S. Melnychuk and M. Sheremeta, he led an insurgent Communist partisan group which was active in the Ternopil region. He died in action against Polish gendarmes.

Tserkevych, Konstantyn [Cervekyč], b 25 May 1911 in Lidavo, Ostrih county, Volhynia gubernia, d 22 October 1987 in Staten Island, New York. Aeronautical engineer, economist, lexicographer, and community figure. Displaced during the Second World War, he emigrated to the United States in 1951, where he headed the New York branch of the Ukrainian Engineers' Society of America (1952–73). From 1971 he was the president of the *Research Society for Ukrainian Terminology and coeditor of its dictionary of Ukrainian synonyms (1975), orthographic dictionary (1975), handbook in Ukrainian (1982), and Russian-Ukrainian legal dictionary (1984).

Tserkovnaia gazeta (Church Newspaper). A newspaper published weekly from March 1856 to June 1858 (a total of 106 issues) in Budapest by the Roman Catholic St Stephen Society. It contained sermons, literary works, many letters and obituaries, and articles on theological issues, church rites, and historical themes. The paper was published in the *yazychiie and edited by Rev I. Rakovsky. It was succeeded by *Tserkovnyi viestnik dlia rusynov avstriiskoi derzhavy*, which appeared for 10 issues. Owing to their extreme conservatism, archaic language, and Russophile tendencies, neither paper had much support among the Transcarpathian population.

Tserkovnyi visnyk (Church Herald). A semimonthly Catholic newspaper published by the ss Volodymyr and Olga parish in Chicago since 1968. Until 1970 it was called *Visnyk*. In addition to local church news and articles on religious topics, it includes articles on the Ukrainian Catholic church in the USSR and elsewhere and on historical and cultural topics. The editors of *Tserkovnyi visnyk* have been V. Markus and (since 1971) M. Butrynsky.

Tserkva i narid (Church and Nation). The semimonthly organ of the Volhynian eparchial council of the Polish Autocephalous Orthodox church published from March 1935 to December 1938 in Kremianets. Edited by I. *Vlasovsky, the journal supported the autocephaly and Ukrainianization of the church. Ninety-one issues appeared before the journal was forced to close by the Polish authorities. The journal's press also published some 30 books and pamphlets.

Tserkva i narid (Church and Nation). An illustrated Orthodox religious monthly published in Winnipeg and Grimsby, Ontario, in 1949–51. The journal was initiated by Archbishop M. *Skrypnyk and edited by I. *Vlasovsky. It contained news of the Ukrainian Orthodox church in Canada and the United States, information on the contemporary religious situation in Ukraine, and essays on historical and political topics. It ceased publication after Skrypnyk moved to the United States.

Tserkva i zhyttia

Tserkva i zhyttia (Church and Life). The organ of the Ukrainian Autocephalous Orthodox church (UAOC), published by the All-Ukrainian Orthodox Church Council and its commission at the Kharkiv District Church Council. Published in Kharkiv in 1927–8, it was edited first by Metropolitan V. Lypkivsky and then by Archbishop I. Pavlovsky. The journal reported on the activities of the UAOC and published the minutes of meetings of the church council and documents in the history of the UAOC. It also contained articles on religious and theological topics. Among the main contributors were V. Chekhivsky, V. Yukhymovych, and Bishops K. Maliushkevych, K. Krotevych, and M. Pyvovariv. Only seven issues of the journal appeared before it was closed owing to a lack of funds and the opposition of the Soviet authorities.

Tserkva i zhyttia (Church and Life). The bimonthly organ of the Metropolitan Lypkivsky Ukrainian Orthodox Brotherhood and the unofficial organ of the *Ukrainian Autocephalous Orthodox Church (UAOC) (Conciliar), published from 1957 to 1977 in Chicago (until 1971 it was printed in Neu-Ulm, Germany). The journal contained many documents on the history of the UAOC and on Metropolitan V. *Lypkivsky (including many of his writings and sermons), and articles on the activities of the UAOC (Conciliar) and religious and political topics. The editors were M. Yavdas and A. Yaremenko, and the contributors included P. Maievsky, O. Bykovets, S. Kindzeriav-Pastukhiv, I. Hrushetsky, S. Hardansky, and V. Dubrovsky. A total of 116 issues of the journal appeared. The Tserkva i Zhyttia publishing house issued Lypkivsky's *Propovidi na nedili i sviata* (Sermons for Sundays and Feast Days, 1969) and several other books.

Tserkva i zhyttia (Church and Life). The organ of the Ukrainian Catholic apostolic exarchate (later eparchy) of Australia, New Zealand, and Oceania. It began to appear in 1960 as a quarterly, published in Lindholme and then, from 1962, in Melbourne. In 1967 it became a biweekly newspaper and in 1973 a weekly. The publication deals mainly with religious topics and church affairs, but also provides information about matters of general interest and the religious situation in Ukraine. Its editors have included Rev I. Shevtsiv, Ye. Zavalynsky, and Yu. Venhlovsky.

Tsertelev, Nikolai [Certeljev, Nikolaj] (Tsereteli), b 1790 in Khorol, Kiev vicegerency, d 20 September 1869 in Morshansk, Tambov gubernia, Russia. Ethnographer and educator; prince of Georgian descent. After graduating from Moscow University (1814) he collected and studied Ukrainian folklore. In the 1820s he worked in the schools of the Tambov and Poltava gubernias and belonged to the Free Society of Lovers of Russian Literature, which was connected with the Decembrists. His *Opyt sobraniia starinykh malorossiiskikh pesnei* (An Attempt at Collecting Ancient Little Russian Songs, 1819) was one of the first collections of Ukrainian dumas and songs. It had an important impact on Ukrainian writers and scholars such as M. Maksymovych, H. Kvitka-Osnovianenko, I. Sreznevsky, A. Metlynsky, and M. Kostomarov. He also wrote articles on Ukrainian folk poetry (1825, 1827) and old Russian tales and songs (1820).

Tsesevych, Platon [Cesevyč], b 7 December 1879 in Niahnevichy, Minsk gubernia, Belarus, d 30 November 1958 in Moscow. Opera singer (bass). He worked in the theater troupes of D. Haidamaka and O. Suslov and studied singing under Y. Liubin in St Petersburg (1902–4), before his debut at the Kharkiv Opera (1904). He sang with the opera theaters of Kharkiv, Kiev, and Odessa; at the Bolshoi and the Zymin operas in Moscow; and in France and Italy (1925–6 and 1932). In 1933–48 he concertized throughout the USSR. His operatic roles included the name-parts in M. Lysenko's *Taras Bulba* and M. Mussorgsky's *Boris Godunov*, Mephistopheles in C. Gounod's *Faust*, and Basilio in G. Rossini's *Il Barbiere di Siviglia*. I. Kozlovsky was his pupil.

Tsesevych, Volodymyr [Cesevyč] (Tsesevich, Vladimir), b 11 October 1907 in Kiev, d 28 October 1983 in Odessa. Astronomer; AN URSR (now ANU) corresponding member from 1948. A graduate of Leningrad University (1929), he worked at astronomical observatories in Dushanbe and Leningrad. From 1944 he directed the Odessa Astronomical Observatory; in 1948–50 he simultaneously directed the ANU Main Astronomical Observatory. His main field of research was variable stars (the variation in their brightness, the theory of their occultation, and the behavior of binary stars). He also studied the rotation of man-made satellites and asteroids, and worked out and published extensive tables of binaries.

Tsiluiko, Kyrylo [Cilujko], b 1908 in Pokrovske, Oleksandrivske county, Katerynoslav gubernia, d 12 October 1981 in Kiev. Linguist. After graduating from the Dnipropetrovske Pedagogical Institute (1935) he taught in Moscow and Leningrad. From 1946 he lectured at Kiev

Volodymyr Tseseyvych

Olha Tsipanova

University and worked at the AN URSR (now ANU) Institute of Linguistics. As the institute's learned secretary and deputy director, he co-ordinated onomastic research in Ukraine, oversaw work on a hydronymic atlas of Ukraine, and established a massive toponymic reference file. In 1960 he organized and thenceforth headed the *Ukrainian Onomastic Commission, and edited its *Povidomlennia* (Reports, 1966–76). Tsiluiiko wrote programs for compiling and studying Ukraine's toponyms (1950, 1954, 1962) and articles on Ukrainian toponymy, orthography, and linguistics, toponyms in Dnipropetrovske and Poltava oblasts, and hydronyms of the Samara Basin. He was the editor responsible for toponymy of the ANU series *Istoriia mist i sil* URSR (History of the Cities and Villages of the Ukrainian SSR, 24 vols, 1967–74) and chief editor of the ANU dictionary of Ukraine's hydronyms (1979).

Tsipanovska, Olha [Cipanoivs'ka, Ol'ha], b 18 December 1866 in Kozova, Dolyna county, Galicia, d 10 December 1941 in Lviv. Civic activist, pianist, and educator. After graduating from a teachers' seminary in Peremyshl she taught at a girls' school (1880–92) and at the women teachers' seminary in Peremyshl (1892–1925). She founded a Ukrainian teachers' seminary at the Girls' Institute (1920), a seamstress school, and a domestic school (1932) in Peremyshl. She gave piano recitals in Peremyshl, Lviv, Yaroslavl, and Vienna and was renowned for her rendition of M. Lysenko's music. She was a founder and the first conductor of the Boian chorus in Peremyshl (1904–5) and the founder of the local branch of the *Lysenko Higher Institute of Music, which she also directed (1925–32). She taught piano, solo and choir singing, and conducting. She was also known for her charitable work. She died of typhus, which she contracted while caring for former inmates of German POW camps.

Tsipyvnyk, Dmytro [Cipyvnyk] (Cipywnyk), b 15 April 1927 in Brooksby, Saskatchewan. Psychiatrist and community leader. After graduating in medicine from the University of Saskatchewan (1963) he set up a private practice and lectured at the university. He is a member of several medical associations, including the Ukrainian Medical Association of North America, and served as regional director of the Canadian Addiction Foundation (1977–81). He sat on the senate of the University of Saskat-

chewan (1983–6). He has been active in the Ukrainian Orthodox Church of Canada, the Ukrainian Professional and Business Club, and, most notably, the Ukrainian Canadian Committee (now Congress; Saskatchewan president, 1982–6; national president, 1986–92). He has written over 20 articles on suicide and addiction.

Tsisyk, Volodymyr [Cisyk], b 20 September 1913 in Lisky, Kolomyia county, Galicia, d 7 February 1971 in New York. Violinist, teacher, and conductor. He studied at the Prague State Conservatory and the Lviv Conservatory (graduated 1936) and in Munich and was a concertmaster (from 1935) with the Lviv symphony and opera orchestras. Emigrating to the United States after the Second World War, he led his own violin studio in New York (1950–2), organized a string quartet and conducted a string orchestra, and cofounded (1952) and taught at the Ukrainian Music Institute of America.

Tsitologia i genetika (Cytology and Genetics). A bi-monthly scientific journal published in Kiev by the *Institute of Molecular Biology and Genetics of the AN URSR (now ANU) since 1967. It contains articles on the structure and function of cells, cellular reproduction, general and molecular *genetics, the genetic principles of *selection, medical genetics, and genetic engineering. In 1988 I. Shevtsov was replaced by A. Sozinov as editor. The periodical is published in Russian and is translated into English in the United States.

Tsiupa, Ivan [Cjupa], b 29 October 1911 in Birky, Zinkiv county, Poltava gubernia. Writer. He worked as a journalist from 1933 on and was deputy chief editor of *Kolhosponyk Ukraïny* and *Vitchyzna* (1950–2) and chief editor of *Ukraïna* (1952–5). Since 1946 he has published numerous prose collections, a popular book on Soviet Ukraine (1960), several propagandistic pamphlets, and the novels *Braty* (Brothers, 1950), *Nazustrich doli* (To a Meeting with Fate, 2nd edn, 1958), *Hrozy i raiduhy* (Storms and Rainbows, 1961), *Vichnyi vohon'* (Eternal Fire, 1962), *Cherez terny do zirok* (Through the Thorns to the Stars, 1966, about Yu. Kotsiubynsky), *Kraïany* (Countrymen, 1971), *Muzhnii vershnyk* (The Brave Rider, 1974), *Homîn Dniprov's'koho kosohoru* (The Echo of the Dnieper's Slope, 1977), *Dzvony iantarnoho lita* (Bells of an Amber Summer, 1981), *U sertsî dzvoniati' holosy* (In the Heart Voices Ring, 1984), and *Rokit syn'oho moria* (The Roar of the Blue Sea, 1986). For the novel *U sertsî dzvoniati' holosy* he was awarded the Shevchenko Prize in 1985.

Tsiupko, Volodymyr [Cjupko], b 24 September 1936 in Yosypivka, Kirovohrad oblast. Painter and muralist. A graduate of the Leningrad Institute of Applied Art (1970), he took part in exhibitions in private apartments in Odessa and in the Second Exhibition of Ukrainian Nonconformist Artists (1976), held in a Moscow flat. His compositions appear abstract but in fact are often inspired by the surrounding landscape (eg, *Boats*, 1977). Tsiupko works with patches of color, which he applies with a palette knife (eg, *White Composition*, 1987). He painted the murals inside the Odessa Literary Museum, the Odessa Student Palace, and the Museum of the Tatarbunary Uprising.

Tsiurupynske [Cjurupyns'ke]. VII-13. A city (1989 pop 25,200) and port on the Konka River and a raion center in Kherson oblast. In the 10th to 13th centuries the trade and defense outpost of Oleshia stood in the vicinity of today's city. From the 15th to 18th centuries the territory was under the control of the Crimean Khanate, which permitted the Zaporozhian Cossacks to establish the Oleshky Sich there (1711–28). In 1784 the site of the Cossack fortress was settled by state peasants, and the village was named Oleshky. When Tavriia gubernia was set up in 1802, Oleshky became the center of Dnieper county. Its name was changed to the current one in 1928. Today the city is an agricultural and health resort center. It has a cellulose and paper plant, a fish-processing complex, a juice factory, and a winery. It is the home of the Lower Dnieper Scientific Research Station for Sands Afforestation and Viticulture.

Tsiutsiura, Bohdan. See Ciuciura, Theodore.

Tsiutsiura, Tymish [Cjucjura, Tymiš] (Tsytsiura, Tsetsiura), b and d ? Cossack statesman, originally from the Pereiaslav region, active during the period of the *Ruin. He was a captain in Boryspil regiment (1656–8) and the colonel of Pereiaslav regiment (1658–60). At first a follower of Hetman I. Vyhovsky, Tsiutsiura helped him to defeat the Muscovite army at Konotop in 1659. Later he planned the mutiny against Vyhovsky and maintained a pro-Muscovite policy with an eye to obtaining the hetman's post for himself. Tsiutsiura's conduct enabled Moscow to initiate proceedings against Hetman Yu. Khmelnytsky during the drawing up of the Pereiaslav Articles of 1659. In 1660 Tsiutsiura went to Moscow with his petition, and that year he participated in the Muscovite voivode V. Sheremetev's campaign against Poland as acting hetman in charge of the Left-Bank regiments (20,000 Cossacks). After the defeat of Sheremetev near Chudniv in 1660, Tsiutsiura abdicated and joined Khmelnytsky and the Poles, but he was imprisoned in Cracow nonetheless (1660–2). After his release Tsiutsiura returned to Pereiaslav, whence he was sent to Moscow and exiled to Tomsk, Siberia (1667).

Tsmokalenko, Dmytro [Cmokalenko], b 25 September 1922 in Betahy, Kremenchuk county, Poltava gubernia. Writer and government figure. In the 1950s he worked for the journal *Zhooten'*. He has been chief editor of **Literatura Ukraina* (1963–6), deputy director of the CC CPU Department of Culture (1966–72), and deputy head of the Ukrainian State Committee for Publishing, Printing, and the Book Trade (1972–84). He has written the prose collections *Zirnytsi nad Dniptom* (Auroras over the Dnieper, 1952), *Shakhtars'ka storona* (A Miner's Side, 1954), and *Pravo na druzhbu* (The Right to Friendship, 1956), the novel *Suvore povnolittia* (Severe Adulthood, 1959), and four pamphlets attacking 'Ukrainian bourgeois nationalists.'

Tsokan, Illia [C'okan', Illja], b 1887 in Storonybaby, Zolochiv county, Galicia, d 1940 in Semipalatinsk, Siberia. Senior military officer. During the First World War he was an officer in the Legion of Ukrainian Sich Riflemen. As a member of the Ukrainian Military Committee, he helped organize the *November Uprising in Lviv. In the Ukraini-

Illia Tsokan

an Galician Army (UHA) he was given command of the Zolochiv Military District and was one of the first officers to be promoted to captain. In June 1919 he was appointed commander of the Ternopil Military District, where he organized and then commanded the Ternopil Brigade of the UHA. In August he became chief logistics officer of the UHA. In the interwar period he settled in Transcarpathia and then emigrated to Soviet Ukraine. He was arrested in the 1930s and sent to a Siberian labor camp.

Tson, Vasyl [C'on', Vasył'], b 20 February 1884 in Yasenivtsi, Zolochiv county, Galicia, d 17 August 1959. Kilim designer. He graduated from the weaving school in Hlyniany (1903) and from the industrial school in Lviv (1905) and designed kilims in Lviv, using Ukrainian folk designs. He taught kilim weaving and dyeing at the Lviv Technical School (1920–38) and the Lviv School of Applied Art and Lviv Institute of Applied and Decorative Arts (1939–56).

Tsukanova, Mariia [Cukanova, Marija], 1905–? Writer. In 1944 she published the novel *Īkh taiemnytsia* (Their Secret) in Lviv, and her play *Prolisky* (Anemones) was staged in several Galician towns. As a postwar refugee in Germany (from 1945) and Argentina (from 1950) she contributed prose to *Litavry* and *Porohy*. In 1970 she moved to the United States. Published separately were her collection of five stories, *Buzkovyi tsvit* (Lilac Blossoms, 1951), and book of selected works, *Na hrani dvoikh svitiv* (On the Edge of Two Worlds, 1968).

Tsuman [Cuman']. III-6. A town smt (1986 pop 5,100) on the Putylyvka River in Kyvertsi raion, Volhynia oblast. It was first mentioned in historical documents in 1557. In 1943 the Ukrainian Insurgent Army fought the Germans and the Soviet partisans in the forests around Tsuman. In reprisal the Germans executed approx 300 inhabitants and burned the village in November 1943. Today the main industries in Tsuman are forestry and fishing.

Tsurkovsky, Antin [Curkovs'kyj] (Curkowsky, Anthony), b 24 February 1882 in Zolochiv, Galicia, d 31 July 1955 in Camden, New Jersey. Journalist and civic figure; member of the Shevchenko Scientific Society. After being educated in Berezhany he emigrated to the United States, where he edited **Svoboda* (1907–9, 1911) and **Ameryka* (1914–26). Subsequently he served as recording secretary

of the Providence Association of Ukrainian Catholics in America (1926–55). He translated some English literature into Ukrainian and wrote popular articles.

Tsurkovsky, Yaroslav [Curkovs'kyj, Jaroslav], b 1 January 1905 in Ternopil. Poet and psychologist. He graduated from Lviv (1927) and Prague (1927) universities and wrote the poetry collections *Prozolat' svitanku* (The Gilding of the Dawn, 1925), *Vohni* (Fires, 1926), *Smoloskypy* (Torches, 1926), and *Momenty i vichnist'* (Moments and Eternity, 1927); the narrative poems 'Zbentezhenyi litak' (The Confused Airplane, *Sluzhbovyk*, 1928, nos 4–6) and 'Boianovyi homin' (Boian's Echo); the novel *Bohach ta nuzhdar* (The Rich Man and the Indigent); and the drama *Teklia Moroz*. In the years 1932–9 he was director of Lviv's Institute of Psychological Research by the Integral Method. During the 1939–41 Soviet occupation of Galicia he headed the Writers' Union of Ukraine's organizing committee in Lviv and was secretary of *Literatura i mystetstvo*. After the war he organized the first Soviet Ukrainian experimental laboratory of the psychology and physiology of labor at the Lviv Forklift Plant; in 1966 it became the Central Branch Laboratory of Psychology, Physiology, and Working Conditions of the USSR Ministry of the Automobile Industry. The author of works in psychology and human engineering and the originator of the theory of psychological controllability, he invented a 'controlograph' for use in psychological diagnoses.

Tsvetkov, Viktor [Cvetkov], b 23 March 1923 in Kamenka, Kolomna raion, Moscow oblast. Russian jurist; corresponding member of the AN URSS (now ANU) since 1972. A graduate of the law faculty of Kiev University (1950) and the Academy of Social Sciences of the CC CPSU (1954), he worked in the apparatus of the CC CPU (1954–8, 1968–72) and taught law at Kiev University (1958–68). Since 1973 he has chaired the department of the legal problems of administration at the Institute of State and Law of the ANU. He has written books on Soviet state law (1969), the science of administration and local soviets (1970), social and state-legal aspects of administration in the USSR (1978), and the improvement of state administration (1982).

Tsvietkov, Hlib [Cvjetkov], b 27 June 1922 in Tyraspil, Kherson gubernia (now in Moldavia). Soviet Ukrainian historian. A graduate of Kiev University (1952), he worked there as a lecturer (from 1955, professor from 1973), prorector (1962–73), and department head (from 1969). His specialization is Soviet-American relations. He was a delegate of the USSR to sessions of the UNESCO General Conference (1968, 1980, 1982) and a member of its Executive Council (from 1981). His writings include *Shestnadsat' let nepriznaniia* (Sixteen Years of Nonrecognition, 1971) and *Politika SShA v otnoshenii SSSR nakanune vtoroi mirovoi voiny* (The Policies of the United States Regarding the USSR on the Eve of the Second World War, 1973).

Tsvikliivtsi settlement. A late Trypilian settlement (mid-3rd to early 2nd millennium BC) near Tsvikliivtsi, Kamianets-Podilskiy raion, Khmelnytskyi oblast. Excavations in 1960–1 revealed semi-pit dwellings, flint and bone tools, adornments (including copper bracelets), and pear-shaped pottery with anthropomorphic handles.

Tsvilyk, Pavlyna [Cvilyk] (née Sovizdraniuk), b 22 April 1891 in Kosiv, Galicia, d 31 March 1964 in Kosiv. Folk ceramist. Tsvilyk learned her craft from her father, and for many years she collaborated with her husband, Hryhorii. Her earthenware vases, plates, pots, cups, candlesticks, and figurines were usually decorated with Hutsul floral and faunal motifs and scenes of hunters, musicians, and dancers, painted in green, yellow, and brown on a white surface. Examples of her work are found in museums throughout Ukraine and in other republics of the former USSR.

Tsvirkun (The Cricket). An irregular magazine published by the students at the Basilian seminary in Curitiba, Brazil, since 1945. It contains information about student activities, stories and poems, games, and educational articles. By 1978, 164 issues had appeared.

Ts'vitka (Floweret). An illustrated children's monthly and, from July 1915, bimonthly magazine, published in 1914 by the Board of Education of the Little Russian National Union of America, and from 1915 to 1917 by the Ukrainian National Association in Jersey City, New Jersey. Edited by D. Andreiko and printed by the Svoboda Press, it contained poetry and stories by Ukrainian authors; folktales; songs; translations of English and American children's literature; materials on Ukrainian history, literature, geography, and folklore; and stories about American history. *Ts'vitka* did much to inculcate Ukrainian national consciousness in its readers.

Tsybenko, Pavlo [Cybenko], b 21 August 1909 in Borovytsia, Chyhyryn county, Kiev gubernia. Art historian. He graduated from the Kiev Cinematography Institute (1934) and received a doctorate in 1949. He wrote a monograph on A. Petrytsky (1951), prepared a catalog of Yu. Stefanchuk's works (1965), and wrote the chapters on theatrical scenery design in vols 4 and 5 of the AN URSS (now ANU) history of Ukrainian art (1967, 1969–70).

Tsybmal, Liudmyla [Cymbal, Ljudmyla], b 12 October 1937 in Kharkiv. Physicist; AN URSS (now ANU) corresponding member since 1988. After graduating in 1958 from Kharkiv University, she joined the ANU Physical-Technical Institute in Kharkiv, where she has served as a division head since 1981. Her research is devoted to low-temperature physics of metals.

Tsybmal, Tetiana [Cymbal, Tetjana] (née Mykhailovska), b 20 March 1900 in Bratslav, Podilia gubernia. Civic activist; wife of V. *Tsybmal. After her studies at the Kiev Polytechnical Institute were interrupted by the First World War, she joined a partisan detachment led by I. Ukhov. She later fled to Rumania, where she taught for a brief period, and in 1923 she emigrated to Argentina. There she was involved in establishing Prosvita societies in Buenos Aires and its suburb of Berisso and was active in developing Ukrainian organizational life in Dock Sud and Valentin Alsina. After the Second World War she initiated a refugee aid committee in Argentina. In 1960 she moved to the United States, where she published two albums of her husband's works and wrote a book of recollections (1978).

Viktor Tsybmal and his *Ariel* in 1962

Tsybmal, Viktor [Cymbal], b 1 May 1902 in Stupychne, Zvenyhorodka county, Kiev gubernia, d 28 May 1968 in New York. Painter and graphic artist. A soldier of the UNR Army, he was interned by the Poles in 1920. Having escaped to Czechoslovakia in 1923, he studied in Prague at the Higher Art and Industrial School and the Ukrainian Studio of Plastic Arts. He designed many book covers and bookplates and illustrated children's books, primarily for the Svit Dytny publishing house. In 1928 he emigrated to Argentina, where he designed neorealist commercial posters for Argentinian, American, and European companies and won six awards for his graphic work. Tsybmal was active in Ukrainian community organizations in Buenos Aires, designed Ukrainian-Argentinian periodicals and theatrical scenery, and painted icons for Ukrainian churches there. In 1960 he emigrated to the United States and worked as a commercial artist in Detroit (1961–6). Tsybmal also painted fantastical Patagonian landscapes and neosymbolist religious, historical, and mythical compositions, such as *People of the Stone Age*, *The Year 1933 (Famine)*, *The Dnieper, 1941*, *The Creator*, *The Immaculate*, and *Ariel*. His mezzotint portraits of T. Shevchenko, V. Domanytsky, V. Lypynsky, T. Edison, A. Toscanini, D. Skoropadsky, B. Khmelnytsky, and I. Mazepa are noted for their detail and workmanship. His political caricatures appeared in Ukrainian émigré periodicals (eg, *Ukrains'ka trybuna*, *Mitla*). Solo exhibitions of his works were held in Buenos Aires (1936, 1948, 1956, 1959), New York (1960, 1961), and Detroit (1961, 1963) and, posthumously, in Detroit, Philadelphia, and New York. An album of his graphic works and paintings (ed S. Hordynsky) was published

in New York in 1972, and an album of his caricatures (ed B. Pevny) in 1981.

S. Hordynsky

Tsybmalist, Viktor [Cymbalist], b 25 January 1930 in Chervone (now in Adrushivka raion, Zhytomyr oblast). Stage actor. He completed study at the Kiev Institute of Theater Arts (1952, class of H. Yura) and the Kiev Conservatory (1957, class of I. Patorzhynsky). In 1952 he joined the Kiev Ukrainian Drama Theater, where he has played both heroic and character roles, including Edmund in W. Shakespeare's *King Lear* (1959).

Bohdan Tsybmalisty

Yevhen Tsybmalisty

Tsybmalisty, Bohdan [Cymbalistyj], b 5 August 1919 in Bovshiv, Rohatyn county, Galicia, d 16 August 1991 in Port Jarvis, New York. Psychologist, community figure, and publicist; member of the American Psychological Association and the Ukrainian Academy of Arts and Sciences in the US. He studied at the universities of Lviv, Berlin, Göttingen (PH D, 1948), and Leuven. In 1951–9 he was an associate of the Centro de Estudios Orientales in Madrid (1951–9), editor of its journal *Oriente Europeo*, and director of the Ukrainian program on the Spanish national radio. In 1959 he emigrated to the United States. He was director of the psychology clinic at the New Jersey Training School for Boys. In 1978 he became chairman of the board of the Ukrainian Museum in New York. He published such essays as *Problema identychnosti* (The Problem of Identity, 1974), *Tavro bezderzhavnosti* (The Stigma of Statelessness, 1982), and *Growing Up in Two Cultures* (1987).

Tsybmalisty, Yevhen [Cymbalistyj, Jevhen], b 29 January 1909 in Bovshiv, Rohatyn county, Galicia, d 5 May 1967 in Munich. Conductor, composer, and teacher. He studied music at Lviv University and at the Szymanowski Conservatory in Lviv. In 1934 he moved to Berlin, where he continued his studies at the Hochschule für Musik. His works include the choral-orchestral *Suite of Traveling Songs*, *Suite of Love Songs*, and *Hunting Suite*; a cantata on the biblical text 'I Am the Beginning and the End'; and arrangements of Ukrainian and German folk songs for chorus.

Tsybalka kurhans. Two burial mounds near Velyka Bilozerka, Kamianka-Dniprovska raion, Zaporizhia oblast. Both mounds were excavated in 1867–8 by I. Zabe-

lin. The first kurhan (Velyka or Large Tsyymbalka) contained a 4th-century-BC Scythian burial which included six horses (four with silver and two with gold trappings). Among the grave goods recovered were the remains of six horses (four with silver and two with gold accoutrements) and two gold forehead adornments, one with a figure of a dragonlike goddess and the other bearing the image of two gryphons. The second kurhan (Mala or Small Tsyymbalka) contained a 9th-century-BC Bronze Age burial from which arrowheads, bronze fishing poles, and pottery were recovered.

Tsymbaly

Tsymbaly (cimbalom or hammered dulcimer). A musical instrument whose strings are struck with two small padded sticks. It consists of a shallow rectangular or trapezoidal wooden sound box with 16–35 clusters of gut or wire strings stretched lengthwise across the deck. Its range is usually three octaves. Originating in Byzantium, it was brought to Europe by the Turks. During the 1600s the *tsymbaly* became widespread throughout Ukraine, supplanting even the *husli* (psaltery) in popularity. As an ensemble instrument it entered the tradition of **troisti muzyky*. Today it remains one of the basic instruments of all folk orchestras.

Tsynkalovsky, Oleksander [Cynkalovs'kyj] (Cynkałowski), b 9 January 1898 in Volodymyr-Volynskyi,

Oleksander Tsynkalovsky

Volhynia gubernia, d 19 April 1983 in Cracow. Archeologist. After teaching gymnasium in Volodymyr-Volynskyi (1919–25), he studied at Warsaw University and then worked for museums in Warsaw, Lviv, and Kremianets. Before the Second World War he undertook many fruitful archeological digs in Volhynia and Polisia and gathered information about their history and geography. In 1944 he returned to Warsaw to work in an archeological museum, and in 1952 he moved to Cracow as a research associate of the Polish Academy of Sciences Institute of Archeology. Although he could no longer continue his fieldwork in Volhynia and Polisia, he was able to publish *Materiały do pradziejów Wołynia i Polesia Wołyńskiego* (Materials Concerning the Prehistory of Volhynia and Volhynian Polisia, 2 vols, 1961, 1963) in Poland. His *Starovynni pam'iatky Volyni* (Ancient Monuments of Volhynia, 1975) and *Stara Volyn' i Volyns'ke Polissia* (Old Volhynia and Volhynian Polisia, 2 vols, 1984, 1986), an encyclopedic guide to the geography and history of the region, were published in Canada. He wrote many scholarly articles during his career and contributed regularly to Ukrainian periodicals in Poland, including *Nasha kul'tura*, *Ukrains'kyi kalendar*, and *Tserkovnyi kalendar*, under the pseudonym O. Volynets.

Tsypola, Gizelia [Cypola, Giselja], b 27 September 1944 in Hat, Berehove raion, Transcarpathia oblast. Opera singer (lyric-dramatic soprano). A graduate of the Kharkiv Institute of Arts (1969), she is a soloist of the Kiev Theater of Opera and Ballet. Her operatic roles include Oksana in S. Hulak-Artemovskyy's *Zaporozhian Cossack beyond the Danube*, Maryltsia in M. Lysenko's *Taras Bulba*, Ingigerda in H. Maiboroda's *Yaroslav the Wise*, Tatiana in P. Tchaikovsky's *Eugene Onegin*, Desdemona in G. Verdi's *Othello*, and the name-part in G. Puccini's *Madame Butterfly*. She also appears in concert. She performed in Canada in 1990.

Tsys, Oleksander [Cys'] (Tsyss; pseud: Hurhurdiadko, (M.) Movchii, O. Ts ... batko), b and d ? Writer and cultural figure of the second half of the 19th century. The chief physician of the Odessa Military District and a member of the Old *Hromada of Kiev, he published poems in the Lviv newspapers *Meta* (1863), *Nyva* (1865), and *Pravda* (1867–8) and wrote the melodramas *Svatannia nevznachai* (A Sudden Betrothal, 1864) and *Iatryvka* (The Brother-in-law's Wife, 1864) and the drama *Hrih zadlia lykha* (Sin out of Misfortune, 1865). He also organized and participated in theatrical performances (as a member of M. Kropyvnytsky's troupe) in Kiev and Poltava and wrote a dramatized history of Ukraine, *Starodavnia Ukraina v dramatychnykh spravakh* (Old Ukraine in Dramatic Affairs, 1889).

Tsys, Petro [Cys'], b 1914 in Velyki Sorochyntsi, Myrhorod county, Poltava gubernia. Geographer. He graduated from Kharkiv University and then taught at higher educational institutions before becoming a professor at Lviv University in 1945. His major research interests include the geomorphology and physico-geographical regionalization of Ukraine.

Tsyss, Hryhorii [Cyss, Hryhorij], b 24 April 1869 in Poltava, d 1 January 1935 in Poltava. Painter. In 1900 he graduated from the St Petersburg Academy of Arts, where he studied under I. Repin. Eventually he returned to Poltava. He painted *The Sorochyntsi Tragedy* (1905) and many por-

Hryhorii Tsyss: *Portrait of a Woman* (oil, 1912)

traits. A catalog of his posthumous exhibition came out in 1956.

Tsytsaliuk, Hryhorii [Cycaljuk, Hryhorij], b 23 September 1929 in Podilske, Liatyčiv county, Proskuriv okruha. Composer, conductor, and pedagogue. A graduate of the Lviv Conservatory (1953) in the composition class of S. Liudkevych, he has been a lecturer at the Kharkiv Institute of the Arts since 1962. His works include a symphony (1968), three symphonic poems (1956, 1963, 1974), incidental and chamber music, pieces for piano, choruses, art songs, and arrangements of Ukrainian folk songs.

Tsytsurin, Fedir [Cycurin], b 23 June 1814 in Biriuch, Voronezh gubernia, d 19 December 1895 in St Petersburg. Internal medicine specialist. A graduate of Kharkiv University (1835), he did his doctorate on typhoid fever at Dorpat University (1839–41) and worked in Germany, France, and England. He was the first professor of internal medicine at Kiev University (1844–57), where he founded the medical library and served as dean of the medical faculty (1847–50). He took part in the effort to control cholera in Kiev in 1847 and coauthored a report on it. From 1857 he was president of the Warsaw Medico-Surgical Academy, and from 1862, director of the medical department of the Ministry of War. Until his retirement he served as the tsar's personal physician (1865–80), and he was also physician to N. Gogol.

Tuapse. IX-20. A city (1990 pop 63,000) on the Black Sea and a raion center in Krasnodar krai, RF. It was founded in 1838 as the Russian military settlement of Veliaminovsk, was renamed in 1896, and became a city in 1916. Its development was influenced by the construction of a port and a railway station in Armavir. Tuapse is an industrial and health resort center. It has a natural-gas refinery, machine-building plants, ship repair docks, and a food industry. According to the census of 1926, Ukrainians represented 17 percent of the city's and 32.2 percent of the raion's population.

Tuberculosis. A highly variable infectious disease caused by several species of *Mycobacterium*, or the tubercle bacillus; in humans it is usually caused by the human (*M.*

tuberculosis) and bovine (*M. bovis*) varieties of the bacillus. Tuberculosis is most prevalent and virulent where high population density, malnutrition, and poor hygiene exist side by side. Though it has steadily declined in the 20th century except during wars and other periods of catastrophe, tuberculosis is found worldwide, can be fatal, and has no safe or effective vaccine.

In Ukraine in the years just after the First World War, many dispensaries, sanatoriums, and sanitary stations were created to combat tuberculosis. The Scientific Research Institute of Tuberculosis and Thoracic Surgery was created in 1922 in Kharkiv (from 1982 the Kiev Scientific Research Institute of Tuberculosis, Pulmonology, and Thoracic Surgery). The Odessa Scientific Research Institute of Tuberculosis was founded in 1921. During and after the Second World War tuberculosis was again on a sharp increase. In the postwar years, with famine, inadequate housing, and rebuilding from the ruinous war, it was an ongoing cause of suffering and death well into the 1960s. The Lviv Scientific Research Institute of Tuberculosis was established in 1944; it includes an oblast-level dispensary. Specialized sanatoriums to treat tuberculosis in Ukraine exist on the Crimean coast and in Vorokhta and Yaremche, in the Carpathians.

Notwithstanding the continuing reduction in mortality from tuberculosis, the rate in the former USSR was 2 to 10 times higher than in other countries (combined rate of the United States, Japan, France, Germany, and Great Britain). In 1988, out of 42 (37.7 respiratory) cases first diagnosed per 100,000 population, the death rate was 7.6 (7 respiratory), or approx 20,000 of total deaths. In Azerbaidzhan, Ukraine, Turkmenia, and Kazakhstan the death rate exceeded the USSR level by 11–42 percent. At the beginning of 1990, curative institutions in the USSR had approx 603,000 patients on record as suffering from active tuberculosis. During 1981–8, however, the number of hospital beds for tuberculosis patients fell by 16 percent, and the number of medical specialists in the field decreased by 11 percent. In 1990 the supply of hospital beds in Ukraine, Estonia, Georgia, and Belarus was one-third lower than the norm, and antituberculosis dispensaries were poorly equipped, some with no fluorography or X-ray facilities.

P. Dzul

Tuchapsky, Hryhorii [Tučaps'kyj, Hryhorij], b 25 January 1877 in Krasnosilka, Chyhyryn county, Kiev gubernia, d 2 July 1956 in New York. Baritone singer and pedagogue. He studied at the Kiev Theological Seminary and the St Petersburg Conservatory (1900–3) and in Milan and Rome, and performed in operas in Moscow, St Petersburg, Kharkiv, Saratov, Baku, and Tbilisi. In 1918 he was a professor at the Lysenko Music and Drama Institute in Kiev, and in 1919 he became the singing instructor of the touring Ukrainian Republican Kapelle. From 1924 he lived in New York, where he trained many singers at his studio.

Tuchapsky, Makarii [Tučaps'kyj, Makarij], b ?, d 1549. Orthodox bishop. He served as administrator of Halych eparchy (1535–9) before being consecrated, in 1539, as bishop by Metropolitan Makarii II of Kiev, and thereby becoming the first bishop of the eparchy in 80 years. He was thrown into conflict with the Polish Catholic archbishop of Lviv, who had tried to install his own candidate in the position and exert control over the see. Tuchapsky called the Lviv sobor of 1539, which did much to improve affairs in the Lviv eparchy.

Pavlo Tuchapsky

Stepan Tudor

Tuchapsky, Pavlo [Tučaps'kyj], b 1869 in Besidka, Tarashcha county, Kiev gubernia, d 1922. Political leader. He studied at Galagan College and in higher institutions in Kiev. A supporter of M. *Drahomanov, he was one of the main founders of the Russian Social Democratic Workers' party and served as a delegate to its first congress in 1898, representing the Kiev Union of Struggle for the Liberation of the Working Class. In 1904 he was an activist and ideologue of the Ukrainian Social Democratic Association (*Spilka) and championed Ukrainian autonomy. In 1905 he edited the monthly *Pravda* in Lviv. In 1910 he quit the Bolsheviks and began working with Russian Mensheviks, which he continued to do during the struggle for Ukrainian independence (1917–20). In 1921–2 he was a librarian for the VUAN in Kiev. He wrote articles about Drahomanov in *Ukraina* (1926, no. 2–3) and a brochure initially published in the journal *Narod* (under the pseudonym 'E.S.') on T. Shevchenko's ideals and Ukrainian reality. His memoirs were published by V. Dembo in 1923.

Tuchkevych, Volodymyr [Tučkevych] (Tuchkevich, Vladimir), b 29 December 1904 in Ivanivtsi, Khotyn county, Bessarabia gubernia. Experimental physicist; full member of the USSR Academy of Sciences since 1970 and a member of its presidium since 1971. A graduate of Kiev University (1928), in 1931 he organized and then directed the All-Ukrainian Institute of Roentgenology in Kharkiv. While in Kharkiv, he also worked at the AN URSS (now ANU) Physical-Technical Institute with K. *Synelnykov and lectured at the Kharkiv Electrical Engineering Institute. In 1935 he joined the staff of the Leningrad Physical-Technical Institute, and in 1967 he became its director. Tuchkevych's major contributions are in the field of semiconductor devices, in particular semiconductor power rectifiers for long-distance direct-current power transmission.

Gen Myron Tarnavsky and other officers of the Ukrainian Galician Army in the Tuchola internment camp in 1920

Tuchola. A town (1989 pop 13,200) and county center in Bydgoszcz voivodeship, Poland. At the end of the First World War it was the site of a Polish internment camp, which held 700 officers and 500 soldiers of the Red Ukrainian Galician Army. The men had surrendered to the Poles in 1920 with the intention of helping them fight the Bolsheviks. Instead they were disarmed and imprisoned. In the summer of 1920 Gen M. Tarnavsky and other officers of the Ukrainian Galician Army were arrested in Lviv and brought to the camp. Some officers escaped to Germany, and the rest were released. In the winter of 1921 the camp was closed down.

Tudor, Stepan (real surname: Oleksiuk), b 25 August 1892 in Ponykva, Brody county, Galicia, d 22 June 1941 in Lviv. Writer. He graduated from Lviv University in 1926. He began publishing in 1925. He was persecuted by the Polish authorities for his communist agitation. He was one of the organizers of the union of Western Ukrainian revolutionary writers *Horno. In 1930 he began publishing and editing its organ, *Vikna*. A number of collections of his short stories have been published, including *Narodzhennia* (Birth, 1929), *Krok u Zhovten'* (The Step to October, 1953), and *Chervonyi usmikh* (The Red Smile, 1960). His published novels include *Mariia* (1930), *Moloshne bozhvillia* (The Insanity of Moloch, 1930), *Den' otsia Soiky* (Father Soika's Day, 1947), *Vybrane* (Selections, 1949), and *Tvory* (Works, vols 1–2, 1962). He was killed on the first day of the German-Soviet conflict, during an aerial bombardment of Lviv.

Tuftina, Halyna, b 14 October 1933 in Novosibirsk, RSFSR. Opera singer (mezzo-soprano). After graduating from the Leningrad Conservatory in 1960, she sang as a soloist with the Little Opera and Ballet Theater in Leningrad and, from 1961, with the Kiev Theater of Opera and Ballet. In 1981 she began to lecture at the Kiev Conservatory. Her main roles were Nastia in M. Lysenko's *Taras Bulba*, Solomiia in K. Dankevych's *Bohdan Khmelnytsky*, the Mother in H. Maiboroda's *Arsenal*, Liubasha in N. Rimsky-Korsakov's *Tsar's Bride*, Amneris in G. Verdi's *Aida*, and Carmen in G. Bizet's *Carmen*. She has also performed as a chamber singer.

Tuhai-Bei [Tuhaj-Bej], b and d ? 17th-century Tatar prince of Perekop. Under orders from the Crimean khan Islam-Girei III he brought 4,000 cavalry troops to the assis-

tance of Hetman B. Khmelnytsky in 1648. His forces played a significant role in Cossack victories against the Poles during the battles of *Zhovti Vodj and *Korsun.

Mykhailo Tuhai-Baranovsky

Metropolitan Yosyf Tukalsky-Neliubovych

Tuhan-Baranovsky, Mykhailo [Tuhai-Baranovs'kyj, Myxajlo], b 20 January 1865 in Solone, Kharkiv gubernia, d 21 January 1919 near Odessa. Economist, sociologist, and co-operation theoretician; full member of the Ukrainian Academy of Sciences. After graduating from Kharkiv University (1888) he received higher degrees from Moscow University (PH D, 1898) and lectured at St Petersburg University. In his first published article (1890) he presented a synthesis of the labor and the marginal-utility theories of value. His MA dissertation on industrial cycles in Britain (1894) proposed a disproportionality theory of business cycles and anticipated later discoveries of the multiplier effect. Although in the 1890s he was a proponent of legal Marxism, he rejected K. Marx's theories of the business cycle, the inevitable breakdown of capitalism, and class struggle. Under the influence of neo-Kantian ideas he turned his attention to co-operation as a vehicle of social justice and published a survey of the history of political economy (1901–2), a textbook of political economy (1907; Ukrainian translation 1919), a study of the theoretical foundations of Marxism (1905), a comparative study of contemporary socioeconomic ideals (1913), a theoretical analysis of the social foundations of co-operation (1916; abr Ukrainian version 1919), and an outline of the co-operative ideal (1918). His *Bumazhnye den'gi i metall* (Paper Money and Metal, 1917) demonstrated the limits of the quantity theory of money and anticipated J. Keynes's ideas on monetary policy. After returning to Ukraine in 1917, Tuhai-Baranovsky joined the Ukrainian Party of Socialists-Federalists and served as general secretary of finance in the UNR government (September–December 1917). He helped found the Ukrainian Society of Economists, the Ukrainian Academy of Sciences, and the Ukrainian State University in Kiev and served as chairman of the academy's socioeconomic department, dean of the university's faculty of law and social sciences, and editor of the journal *Ukrains'ka kooperatsiia. He died on his way to Paris, where he was to have represented the UNR at the peace conference. Published in English translation have

been his works *Modern Socialism in Its Historical Development* (1910, 1966) and *The Russian Factory in the 19th Century* (1970).

L. Kowal

Tukalsky-Neliubovych, Yosyf [Tukal's'kyj-Neljubovyč, Josyf], b ? in the Pynske region, d 26 July 1675 in Chyhyryn. Orthodox metropolitan and political activist. He was archimandrite of the Holy Ghost Monastery in Vilnius in 1657–8, a candidate for the office of metropolitan of Kiev (1657), and a participant in the 1657 Cossack council in Pereiaslav that elected I. Vyhovsky as hetman. He was consecrated bishop of Orsha and Mstsislau (and Belarus), and in 1663 he was elected metropolitan of Kiev at a council of clergymen, nobles, and Cossacks in Korsun. The king of Poland, favoring another candidate (A. Vynnytsky), refused to confirm his election. In the resulting administrative division of the Ukrainian church province, Tukalsky presided over Right-Bank Ukraine, Belarus, and Lithuania but not over Galicia, Volhynia, and Podilia. Hetman P. Teteria and the Polish government conspired against him, and he was imprisoned in the Marienburg fortress (1664–6). Hetman P. *Doroshenko secured his release, whereupon he resumed his post as metropolitan and took up residence near the hetman in Chyhyryn. In 1668 the Patriarch of Constantinople confirmed his position as metropolitan and named him exarch. Tukalsky was a close adviser to Doroshenko; he counseled him to enter into an alliance with the Turks, and opposed alliances with Russia and Poland. In church affairs he rejected any rapprochement with the Moscow patriarchate and staunchly defended the independence of the Kiev metropoly. He was buried in the Mhar Transfiguration Monastery, and his valuable archive was transferred to the Kievan Cave Monastery. A selection of his epistles and correspondence was published in 1884 by Bishop F. Gumilevsky.

I. Korovytsky

Tuk-tuk (Knock-knock). A monthly illustrated magazine for preschool children, published in Kharkiv from November 1929 to September 1935 (a total of 83 issues) by the People's Commissariat of Education. From 1933 it was also an organ of the Communist Youth League of Ukraine. In 1935 it was merged with **Zhovtenia*.

Tulcea. VIII-9. A city (1981 pop 70,000), district center, and fluvial port in northern *Dobrudja (Rumania), situated near the Danube Delta. An important fish-processing and shipbuilding center, it is situated at the heart of a settlement area that includes approx 26,000 Ukrainians in 20 surrounding villages, who constitute about 10 percent of the region's inhabitants. In 1950–60 there was a Ukrainian pedagogical school in Tulcea. It was converted into a Rumanian one.

Tulchyn [Tul'čyn]. V-9. A city (1989 pop 17,100) on the Silnytsia River and a raion center in Vinnytsia oblast. It was first mentioned in historical documents in 1607, as the

Tulchyn in the late 19th century

town of Nestervar. In 1648 it was liberated from Poland by M. Kryvonis and I. Hanzha, but in 1667 it was returned under the Treaty of Andrusovo. In 1672–99 Tulchyn was occupied by the Turks. A century later it rebelled against the Polish overlords. In 1787 the town was granted the rights of Magdeburg law. It was annexed by the Russian Empire in 1793 and became a county center of Bratslav vicegerency. By 1859 its population had reached 11,200, and by 1897, 23,300. At the beginning of the 20th century there were about 40 small enterprises in Tulchyn. Today it is an agricultural town with a mixed-feed factory, a canner, a meat-packing plant, a footwear factory, and a furniture factory. Its chief architectural monuments are the remains of an 18th- to 19th-century palace, the Dormition Church and its bell tower (1789), an 18th-century Dominican monastery and church, and 18th- and 19th-century residential buildings.

Tulip (*Tulipa*; Ukrainian: *tiulpan* or *tulipan*). Perennial bulbous plants of the family Liliaceae, with a hollow, erect stem that ends in a single colorful flower. Tulips were first cultivated in Turkey in the 16th century. During the following century they were imported into Holland; today tulip species number over 140. In Ukraine they are grown to beautify cities, as spring flower beds and borders.

Tulov, Mykhailo, b 20 November 1814 in Hrodna, Belarus, d 11 May 1882 in Kiev. Pedagogue, linguist, and writer. After graduating from Kiev University (1839) he taught at the Nizhen Lyceum (1844–53), was the director of the Nemyriv Gymnasium, and served as deputy director of the Kiev school district. He was forced to resign the last position after he came out in opposition to the school reforms of D. Tolstoi. He helped organize the Sunday school movement and was an associate of *Osnova* (for which he wrote under the pseudonym Lineikin). His scholarly work dealt mainly with the Russian language, although he also examined Ukrainian ('Little Russian') orthography.

Tulub, Pavlo, b 24 February 1862, d 16 March 1923. Lawyer and writer; father of Z. *Tulub. The son of a member of the Cyril and Methodius Brotherhood, he worked as a lawyer in Kiev, Bratslav, and Tahanrih and wrote poetry in Russian. In the years 1904–8 he published Russian

translations of 15 of T. Shevchenko's poems in the journal *Vestnik Evropy*. He also translated poems by Shevchenko that were forbidden by the tsarist censors; they appeared in I. Belousov's Russian edition of *Kobzar* (Moscow 1919).

Zinaida Tulub

Tulub, Zinaida, b 28 November 1890 in Kiev, d 26 September 1964 in Kiev. Writer. She graduated from the Higher Courses for Women in Kiev in 1913. She was first published in 1910 in Russian, and after the Revolution of 1917 she wrote in Ukrainian. In 1937 she was arrested and imprisoned in a labor camp in Kolyma, from which she was freed in 1947. She was allowed to return to Kiev from forced exile in Kazakhstan early in 1955. Tulub is the author of a large-scale historical novel set in 17th-century Ukraine during the time of Hetman P. Sahaidachny, *Liudolovy* (The People Hunters, 1934; repub 1937 and 1958), and of a novel based on the life of T. Shevchenko in exile, *V stepu bezkraim za Uralom* (In the Boundless Steppe beyond the Urals, 1964), which was translated into English in *The Exile* (1988). She also wrote plays and film scenarios and translated foreign literature into Ukrainian.

Tumansky [Tumans'kyj]. A family line of officers and nobility, probably of Right-Bank origin. The first generations lived in Left-Bank Ukraine and were clergymen. Hryhorii Tumansky was an archpriest (1730–50) in Basan, Pereiaslav regiment. His sons studied at the Kiev Academy: Ivan went on to the St Petersburg Academic University; Vasyl (ca 1719–1809) was the last general chancellor of the Hetmanate (from 1762), a member of the Little Russian Collegium (from 1764), and vice-governor of Novhorod-Siverskyi vicegerency (1782–96); Osyp (1731–ca 1798) was a member of the General Court (1781–2) and head of the Novhorod-Siverskyi Chamber of Criminal Court (1783–95); and Ivan (b 1740, d after 1798) was senior secretary of the Senate in St Petersburg (until 1777), a member of the Little Russian Collegium (1777–82), and head of the Kiev Civil Court (1791–6), as well as a translator from German and French. The sons of Vasyl Tumansky, Mykhailo and Ivan, studied at Königsberg University; Mykhailo was a member of the Little Russian Collegium (1778–82), cataloged its archives, and collected Ukrainian historical material (particularly the works of S. Lukomsky). Osyp Tumansky's son was Fedir *Tumansky. In the 19th century the family also included the Russian poets Vasyl Tumansky (1800–1860) and Fedir Tumansky (1801–1853, who was also imperial consul general in Belgrade) and Oleksander Tumansky (1861–1920), a scholar

of the Orient, as well as a number of magnates and zemstvo activists in the Chernihiv and Poltava regions.

O. Ohloblyn

Tumansky, Fedir [Tumans'kyj], b 1757 in Hlukhiv, d December 1810 on the Rodionivka *khutir*, near Hlukhiv, Chernihiv gubernia. Historian, ethnographer, and community activist; corresponding member of the Russian Academy of Sciences from 1779. He studied at Königsberg University (1773–7) and was elected to the Royal Prussian Society. Upon returning to Ukraine he was made a fellow of the standard (1778–9). He organized a topographical study of the Hetmanate, drew up a wide-ranging plan for cultural and research work in Ukraine, and established standards for collecting historical, geographical, economic, ethnographic, anthropological, and environmental data. The data provided the basis for the topographic descriptions of Hetmanate territories published in the 1780s by D. Pashchenko, O. Shafonsky, P. Symonovsky, and others. Tumansky presented proposals in late 1779 and early 1780 for the establishment of an academic library in Hlukhiv and an academic society in Little Russia (as the genesis of a Ukrainian academy of sciences); only the former proposal was acted upon. He then decided to write a complete history of 'Little Russia,' for which he requested that the requisite archival materials be sent to him from St Petersburg, but the Russian academy quashed his project. After the liquidation of the Hetmanate he was a tsarist censor in Riga; thereafter he set up an active literary-publishing and research concern in St Petersburg. He published a 10-volume collection of various notes and monographs on Peter I; a number of periodicals, among them *Rossiiskii magazin* (1792–4), in which important Ukrainian historical material appeared, including the Hrabianka Chronicle (see H. *Hrabianka); and the monographs *Vypiska iz zapiski 1749 g.* (Extract from Notes on the Year 1749, 1792), *Manifest getmana Bogdana Khmel'nitskogo* (The Manifesto of Hetman B. Khmelnytsky, 1793), and *Letopisets Malyya Rossii ...* (Chronicle of Little Russia ..., 1793). His glossary appendix to the last work, titled 'Iziasnenie malorossiiskikh rechenii v predshedshikh listakh' (Explanations of Little Russian Expressions in the Preceding Pages), was one of the first Ukrainian historical dictionaries; it consisted of 333 words. In 1801 he retired and settled on his homestead near Hlukhiv, but he continued his literary and publicistic activity (eg, he wrote in defense of the aristocratic rights of the Ukrainian nobility).

A. Zhukovsky

Tumbleweed (Ukrainian: *perekotypole*). A steppe and desert herbaceous plant that breaks off at the base during the time of seed maturity and, blown about by the wind, scatters its seeds across large areas of open landmass. In Ukraine the following tumbleweeds can be found: Russian thistle (*Salsola kali*), *Ceratocarpus arenarius*, snakeroot (*Eryngium campestre*), and baby's breath (*Gypsophila paniculata*).

Tuna, bluefin (*Thunnus thynnus*; Ukrainian: *tunets zvychainyi* or *t. blakytnyi*). An oceanic fish of the family Scombridae, related to the mackerel. In Ukrainian waters bluefin tuna is found in the Black Sea and the Sea of Azov. Tuna is of great commercial value as food fish. Recent measurements of high mercury levels, however, have led to a decrease in the sales of tuna.

TUP. See Society of Ukrainian Progressives.

Metropolitan Dymytrii
Tuptalo

Stepan Turchak

Tuptalo, Dymytrii (Rostovsky) (secular name: Danylo), b December 1651 in Makariv, Kiev region, d 8 November 1709 in Rostov, Russia. Saint, writer, theologian, and churchman. He studied at the Kievan Mohyla Academy in 1662–5 and entered St Cyril's Monastery in Kiev in 1668. In 1675 he was ordained a hieromonk by Archbishop L. Baranovych. During the next 30 years he was hegumen of several Ukrainian (Hustynia-Trinity, Trinity–St Elijah's, Yeletskyi Dormition, St Nicholas's in Baturyn, Novodvirsk in Volhynia, Kievan Cave) and Belarusian (Vilnius and Slutsk) monasteries. In 1701 Tsar Peter I summoned him to Moscow, where he was consecrated metropolitan on 23 March 1701. He was assigned to the Tobolsk see but did not assume the post because of ill health. Instead, in 1702 he was sent to Rostov. Tuptalo was associated with a group of Ukrainian hierarchs in the Russian church, led by Metropolitan S. Yavorsky, who fought against the Old Believers and other sects that had left the church over reforms introduced under Tsar Aleksei. This group, however, did not accept the more radical changes favored by Peter, especially the subordination of the church to the state.

Tuptalo's first published work was *Runo oroshennoie* (The Bedewed Fleece, 1680; 7 edns by 1702), a collection of stories about miracles attributed to the icon of the Mother of God at the Chernihiv Trinity–St Elijah's Monastery. His most important work is his *menaion for daily reading, a major collection of the lives of saints. It was first published by the Kievan Cave Monastery in 1689–1705; at least 10 more editions followed in the 18th century. This collection is the best example of Ukrainian hagiography of the 17th and 18th centuries; it contains the lives of many early Ukrainian saints, based on various manuscripts and on adaptations from Greek and Latin sources. Tuptalo was a well-known orator, and a collection of his sermons (some of which criticized Peter's reforms), edited by A. Titov, appeared in 1909. He also wrote polemical attacks on the schism (*Rozysk o raskolnicheskoi brynskoii vere* [An Examination of the Schismatic Brynian Sect, 1709]), theological treatises (*Zertsalo pravoslavnogo ispovedaniia* [The Mirror of the Orthodox Faith, 1805]), and historical studies (*Letopis' izhe vo sviatykh ... ot nachala mirobytiiia do Rozhdestva Khristova* [The Chronicle of Saints ... from the Beginning of Life

on Earth to the Birth of Christ, 1784)). His literary works – including the spiritual dramas *Komediia na den' Rozhdestva Khristova* (A Comedy on the Day of Christ's Birth) and *Uspenie Bohorodytsi* (The Dormition of the Mother of God) – were baroque in style and influenced by Western writing. The language Tuptalo used in his theological works was Old Church Slavonic, but it contained many Ukrainianisms. His sermons and menaion, which were intended for a popular audience, were close to the vernacular; post-humous editions of the menaion, however, were Russified by order of the Holy Synod.

Tupyi. [Tupyj]. v-4. A small mountain group in the Volcanic Ukrainian Carpathians between the Borzhava River in the northwest, the Tysa River in the south, and the Rika River and the Maramureş Lowland in the east. The tallest peak in the formation is Mount Tupyi (878 m).

Tur, Nykyfor, b ? , d 1599. Archimandrite of the Kievan Cave Monastery from 1593. In 1594 and 1595 he refused to submit to the authority of Metropolitan M. *Rahoza, basing his position on the monastery's right of stauropegion. At the church sobor in Berestia in 1596, he opposed the hierarchs who favored church union with Rome, and in October 1596 Rahoza and five bishops issued an anathema against him. Despite this pressure, which was encouraged by the Polish king, he kept the monastery Orthodox and even rejected a royal decree of November 1597 that handed the monastery over to Rahoza's jurisdiction. Tur also managed to safeguard the monastery's valuables. A monograph on Tur was written by M. Maksymovych in 1876.

Tur Lake. II-5. A low-lying lake in northwestern Volhynia oblast between the Buh River and the source of the Prypiat River. The lake is approx 13 sq km in area and has a prevailing depth of 2.6 m. It is linked to the Dnieper-Buh Canal system through the Tur and Orikhiv canals.

Turau. See Turiv.

Turbai uprising. A revolt in Turbai village, Myrhorod county, Katerynoslav vicegerency, in 1789–93, sparked by a dispute about Cossack status. Until 1727, when Hetman D. Apostol removed them from the register and listed them as his serfs, most of the town residents were Cossacks. After appealing to the colonel of Myrhorod, V. Kapnist, 76 of them were reregistered as Cossacks in 1738. In 1776 the Bazylevsky family purchased the town and raised demands on the serfs, who reacted by refusing corvée and petitioning the Russian Senate to restore their Cossack status. The Senate ruled in 1788 that the families of the 76 men who had been reregistered in 1738 possessed Cossack status. When the local authorities, prompted by the Bazylevsky family, delayed the implementation of the Senate decision, the people revolted. They stormed the manor, killed three members of the Bazylevsky family, took over Turbai and several adjacent villages, and elected their own local hetman, judge, and

secretary. Mindful of events in France, the authorities hesitated and attempted to negotiate a compromise. After long, futile talks they decided to make an example of the rebels and in 1793 moved in with a large force. The leaders of the uprising were sentenced to death (later commuted to life imprisonment in Siberia), secondary figures were subjected to public lashing, and the rest of the inhabitants (approx 2,300) were resettled in Kherson and Tavriia gubernias. The village was renamed and was known as Skorbn for almost two centuries. It is now in Hlobyne raion, Poltava oblast.

Turbiv kaolin deposits. Rich kaolin deposits located in Lypovets raion, Vinnytsia oblast. The estimated reserves of Turbiv's kaolin (1983) are 5,669,000 t. Seams of the substance 5–12 m in thickness (maximum, up to 22.8 m) are located 2.3–17.6 m underground. They were first mined in 1912. The kaolin from the region is used in the manufacture of rubber and leatherette.

Turbot, Black Sea (*Scophthalmus maeoticus* or *Rhombus maeoticus*; Ukrainian: *kalkan*). A broad-bodied, sedentary European flatfish of the family Scophthalmidae (or Bothidae), with both eyes on the left side of the head. In Ukraine it is found in the Black Sea and the Sea of Azov. It reaches a length of 1 m and a weight of 25 kg and is a valuable commercial fish.

Turchak, Stepan [Turčak], b 28 February 1938 in Matskovychi, Peremyshl county, Galicia, d 23 October 1988 in Kiev. Conductor. A graduate of the Lviv State Conservatory (1962) in the conducting class of M. Kolessa, he conducted the Lviv Theater of Opera and Ballet (1960–2), the Symphony Orchestra of the Ukrainian SSR (1963–7 and 1973–7), and the Kiev Theater of Opera and Ballet (from 1977). He also taught conducting at the Kiev State Conservatory (1966–74). As an orchestral and operatic conductor Turchak was a bold, searching, modern artist. His innovations were enthusiastically welcomed in Ukraine and during his tours of the USSR, Yugoslavia, Poland, Czechoslovakia, Hungary, Rumania, Germany, France, England, Spain, Italy, Japan, and elsewhere. His legacy includes definitive recordings of symphonic works by B. Liatoshynsky, V. Hubarenko, and H. Maiboroda.

Turchaninov, Petro [Turčaninov], b 1 December 1779 in Kiev, d 28 March 1856 in St Petersburg. Composer, conductor, and teacher. A student of G. Sarti and A. Vedel (1794–8), he became a priest in 1803 and after 1809 conducted the metropolitan's choir in St Petersburg. He subsequently taught singing at the imperial court kapelle (1827–41). As a composer of sacred choral music he followed the school of A. *Vedel. His harmonizations of melodies of Kievan, Bulgarian, and Greek monastic chants are characterized by simplicity, expressiveness, and masterly choral technique. His complete works were edited and published by A. Kastalsky (Moscow 1905–6) in five volumes. His autobiography, published in St Petersburg in 1863, is a valuable source on the life and music of his teacher Vedel.

Turchenko, Yurii [Turčenko, Jurij], b 7 November 1923 in Zhuky, Poltava okruha. Art historian and museologist; full member of the Shevchenko Scientific Society since 1982. A graduate of Kiev University (1950), he was a dep-

Yurii Turchenko

Osyp Turiansky

uty director (1950–2) responsible for scholarly work at the Kiev Museum of Ukrainian Art, a lecturer (1954–69) and professor (1969–74) in art history at Kiev University, scholarly secretary (1955–7) of the AN URSR (now ANU) Institute of Fine Arts, Folklore, and Ethnography and chairman (1960–74) of its Department of Art and Museology, editor in chief of the serial *Ukrains'ke mystetstvoznavstvo* (1967–74), and chairman (1972–4) of the Republican Scientific Council on Problems of Museology and Museum Development. He received his doctorate in 1965. Turchenko has written many articles on Ukrainian art, museology, and art education and books on M. Murashko and his Kiev Drawing School (1956), Soviet Ukrainian graphic art (1957, with V. Kasiian), O. Slastion's portraits of Ukrainian kobzars (1961), Ukrainian pre-Soviet realist graphic art (1961, with V. Kasiian), and the Ukrainian print (1964). From 1961 he was a member of the editorial board of the ANU history of Ukrainian art (6 vols, 1966–70) and the editor in charge of its sixth volume (1968). In 1974 he accepted the position of chief of the UNESCO Museums Division in Paris. In 1977 he was appointed chief of the UNESCO Section for Research and Publications on Questions of Preserving the World Cultural Heritage. In December 1979 Turchenko and his wife defected and received asylum in France.

Turchyniuk, Vasyl [Turčynjuk, Vasyl'], b 1864 in Luh, Nadvirna county, Galicia, d 25 July 1939 in Luh. Wood carver and builder. He carved decorative and household articles and made wooden furniture with carved designs. His iconostases, bas-reliefs, wooden sculptures, and carvings decorated the wooden churches in Yablunytisia (1895–1904), Maidan (1932), Strymba (1930–2), Luh (1912–39), and Vorokhta (1936–8).

Turchynovsky, Illia [Turčynovs'kyj, Illja], b 30 July 1695 in Berezan, Pereiaslav regiment, d ? A traveling precentor. He studied at the Kievan Mohyla Academy. From 1710 he traveled in Ukraine and Belarus, where he worked variously as a teacher, precentor, secretary, singer, and church choir director. Toward the end of his life he became a priest. He wrote an autobiography, which is full of the details of everyday life of his time. It was printed in *Khrestomatiia davn'oi ukrains'koi literatury* (Anthology of Old Ukrainian Literature, ed O. Biletsky, 1952).

Turchynska, Ahata [Turčyns'ka], b 11 February 1903 in Kulykiv, Zhovkva county, Galicia, d 22 August 1972 in Kiev. Poet and prose writer. She graduated from the Kiev Institute of People's Education in 1926 and belonged to the Zakhidnia Ukraina literary organization. Her collections of verse include *Izvory* (Brutes, 1929), *Urozhai* (The Harvest, 1939), *Pisnia pro druzhbu* (A Song about Friendship, 1946), *Dorohi zapovity* (Dear Testaments, 1958), and *Dumnyi potik* (The Pensive Stream, 1972). She is also the author of the short stories *Smok* (The Dragon, 1930) and *Buz'kove zillia* (The Stork's Magic Herbs, 1966), the novel *Druh mii Ashkhabad* (My Friend Ashkhabad, 1963), a libretto for H. Maiboroda's opera *Milana* (1957), and the dramatic poem *Zustrich z mavkoiu* (Meeting with a Forest Nymph, 1972).

Turgenev, Ivan, b 9 November 1818 in Orel, Russia, d 3 November 1883 in Bougival, France. Russian writer. He is the author of a number of novels that have become part of the Russian literary canon; all of them have been translated into Ukrainian. In the 1860s he became interested in Ukrainian literature and befriended T. Shevchenko (he wrote his memoirs of Shevchenko in 1876). He maintained a close friendship with M. *Vovchok and published Russian translations of her folktales (1859). Turgenev's works have been translated into Ukrainian by I. Franko, Lesia Ukrainka, M. Rylsky, and others. The many Ukrainian translations include *Poezii v prozi* (Poetry in Prose, 1903), *Vybrani tvory* (Selected Works, 1937), *Opovidannia i povisti* (Stories and Novellas, 1949), *Dvorians'ke hnyzdo* (A Nest of Gentlefolk, 1952), *Naperedodni* (On the Eve, 1954), and *Rudin* (1956).

Turiansky, Osyp [Turjans'kyj] (pseud: I. Dumka), b 22 February 1880 in Ohliadiv, Kaminka-Strumylova county, Galicia, d 28 March 1933 in Lviv. Writer and literary critic. While studying at Vienna University he published his first stories (novellas), in the 1908 almanac of the Sich student society. While working as a secondary-school teacher in Galicia he wrote an autobiographical antiwar novel, *Poza mezhamy boliu* (Beyond the Limits of Pain, 1921; English trans: *Lost Shadows*, New York 1935), the novelettes *Duma pralisu* (Duma of the Primeval Forest, 1922) and *Syn zemli* (Son of the Soil, 1933), the story collection *Borot'ba za velykist'* (The Struggle for Greatness, 1926), and the satirical comedy *Raby* (Slaves, 1927). In the late 1920s and early 1930s he contributed to the left-wing Lviv journal *Novi shliakhy*.

Turiansky, Roman [Turjans'kyj] (pseud of Roman Kuzma), b 25 May 1894 in Stryvka, Zbarazh county, Galicia, d 16 July 1940. Galician Communist leader and publicist. With O. Vasylyk and R. Rozdolsky he founded the 'Drahomanovite' International Revolutionary Social Democratic Organization in Lviv (1915) and edited its publications. In 1919 he served as a physician in the Red Army and joined the CP(B)U. After the war he served as a Party official in Berdychiv okruha, chief of the Kiev gubernia branch of the Trade Union of Educational Workers, and a member of the Kiev Gubernia Trade Union Council and taught sociology and political economy. In 1924 he was elected to the CC of the *Communist Party of Western Ukraine (KPZU). He edited its organ *Nasha pravda* and served as a member of the KPZU Politburo responsible for

Roman Turiansky

Ivan Turianytsia

propaganda and the KPZU representative to the Polish section of the Comintern. He wrote most of the resolutions adopted at the 5th to 9th conferences, the Second Congress, and CC plenums of the KPZU. Together with the KPZU leaders K. Maksymovych and O. Vasylykiv he was expelled from the party in 1928 for supporting O. Shumsky's policies. In 1932 he was sent by the Comintern to work for the trade-union press in Moscow, and in 1933 he was arrested. His later fate is unknown; he probably died in a concentration camp or was executed.

Turianytsia, Ivan [Turjanycja], b 1901 in Mukachiv, d 27 March 1955 in Uzhhorod. Transcarpathian Communist figure. The Czechoslovak Communist party secretary in Mukachiv (1928–9) and Uzhhorod (1929–30), from 1930 he studied in the USSR, where he graduated from the Kharkiv Communist Institute of Journalism (1933). From 1934 to 1939 he was a trade-union activist in Transcarpathia. He fled to the USSR in 1939, and from 1941 to 1944 he was a Party official in the Third Czechoslovak Brigade. After returning to Transcarpathia he served as head of the *People's Council of Transcarpathian Ukraine and the Communist Party of Transcarpathian Ukraine (1944–6), the first CPU secretary and administration chief in Transcarpathia oblast (1946–8), and a member of the CC CPU and the Ukrainian Supreme Soviet Presidium (1947–55).

Turiia River [Turija or Tur'ja]. A right-bank tributary of the Prypiat River that flows for 184 km through Volhynia oblast and drains a basin area of 2,900 sq km. The river is 3–4 m wide in its upper reaches and 5–10 m wide along its lower course. It has a wide marshy valley and is a central feature in a regional drainage system. The river freezes over from December to late March. The town of Turiiske and the city of Kovel, which has a water reservoir, are situated on it.

Turiiske [Turij's'ke]. II-5. A town smt (1986 pop 5,500) on the Turiia River and a raion center in Volhynia oblast. It is first mentioned in the chronicles under the year 1097. From 1340 it belonged to Lithuania, and from 1569, to the Polish Commonwealth. It obtained the rights of *Magdeburg law in 1759. After the partition of Poland in 1795, Turiiske was annexed by Russia. In the interwar period it was occupied by Poland. After the Second World War it was incorporated into the Ukrainian SSR.

Turiv (Belarusian: Turau). I-8. A port on the right bank of the Prypiat River in eastern Polisia, now a town smt (1939 pop 5,500) in Zhytkavichy raion, Homel oblast, Belarus, on the Ukrainian ethnographic border. It was a medieval center in the territory of the Drehovichians, and is first mentioned in writing in the Primary Chronicle under the year 980. In the late 10th century it became the capital of *Turiv-Pynske principality and eparchy, and in the 12th century it was the residence of Bishop *Cyril of Turiv. In the late 13th and early 14th centuries Turiv belonged to the Grand Duchy of Lithuania. From the mid-15th to the mid-16th century it was ruled by the princes of Ostrih. It was attacked by the Crimean Tatars in 1502 and 1521. It was briefly a part of B. Khmelnytsky's Hetmanate in the 17th century. In 1793 it became part of Mozyr county, Minsk gubernia, in the Russian Empire. In 1918–20 it was part of the UNR, and in 1938 it was incorporated into the Belorussian SSR. Remains of its old fortifications are still standing.

Turiv Gospel (Turivske yevanheliie). An 11th-century Church Slavonic literary monument most likely transcribed in Ukraine. From the 16th century it belonged to the Transfiguration Church in Turiv. Fragments of the gospel (10 double pages) containing two charters (1508, 1513) granting land to local priests by Prince K. *Ostrozky, the owner of Turiv, are preserved at the library of the Lithuanian Academy of Sciences. The text and I. Sreznovsky's study of it were published in *Sbornik otdeleniia russkogo iazyka i slovesnosti Imperatorskoi akademii nauk* (vol 12, 1875).

Turiv-Pynske principality. An administrative territory of the 10th to 14th centuries in central Polisia. Its capital was *Turiv. The larger, northern part was settled by Drehovichians, and the smaller, southeastern part by Derevlians. Its inhabitants, who lived by farming, hunting, fishing, and beekeeping, were protected from nomad attacks by thick forests and swamps. The land and water routes from Kiev to Poland and the land route from Kiev to Lithuania and the other Baltic countries contributed to the principality's economic and political importance. The oldest cities are mentioned in the medieval chronicles: Turiv (under the year 980), Pynske (1097), Berestia (1019), Chortoryisk (1110), Klechesk (Klets'k, 1128), Sluchesk (Slutsk, 1116), and Mozyr (1155). From the 9th century the territory was within Kiev's sphere of influence, and during the reign of Volodymyr the Great it became part of Kievan Rus'. The first ruler was Volodymyr's son, Sviatopolk I (988–1015). In the 11th century, because of its ties with the West, it was one of the more important principalities of Kievan Rus'. In 1052 Yaroslav the Wise installed his son Iziaslav there. Iziaslav was succeeded by his sons, Yaropolk (1078–86) and Sviatopolk II (1087–1113). Then the principality was ruled directly by the grand prince in Kiev until Yurii Yaroslavych, a descendant of Sviatopolk II Iziaslavych, wrested Turiv from Kiev's control (1157). In the second half of the 12th century, during Yurii's sons' reign, the principality declined and eventually was divided into appanages: Sviatopolk got Turiv, Ivan, Dubrovysia, Yaropolk, Pynske, and others, Slutsk and Klets'. In the second quarter of the 13th century those small principalities came under the influence of the Principality of Galicia-Volhynia, which was ruled by Danylo Ro-

manovych. After the Mongol invasion of 1240 the area came under the control of the Golden Horde, and in the 14th century, under Lithuanian rule. In the mid-16th century the territory became part of the Polish Commonwealth.

Turka. IV-4. A town (1989 pop 7,800) on the Stryi River and a raion center in Lviv oblast. It was first mentioned in historical documents in 1431. It was granted the right of *Magdeburg law in 1730, while it was under Polish rule. In 1772 Turka was annexed by Austria, and after the First World War it was placed under Polish rule. Since 1944 it has been part of the Ukrainian SSR. Turka is an agricultural town with a light-fixtures factory, a gravel quarry, and a branch of the Boryslav Haberdashery Sewing Complex. It has three rare examples of Boiko wooden architecture: the Higher St Nicholas's Church (early 15th century), the Middle St Nicholas's Church (1739, by D. Prokopii), and the Dormition Church (1750). In the fall of 1744 the legendary outlaw O. *Dovbush staged an opryshok rebellion in the area.

Kost Turkalo

Lev Turkevych

Turkalo, Kost, b 20 August 1892 in Nemyryntsi, Proskuriv county, Podilia gubernia, d 17 October 1979 in New York. Chemical engineer and civic and political leader. A former member of the Central Rada, he became a research associate of the All-Ukrainian Academy of Sciences and editor of the technical department of the Institute of the Ukrainian Scientific Language (1922–9). In that capacity he prepared a number of technical dictionaries, the most notable (coauthored by V. Favorsky, 1928) dealing with agriculture. He was arrested repeatedly by the NKVD and was a defendant in the Stalinist show trial of the *Union for the Liberation of Ukraine (1930), at which he was sentenced to three years of imprisonment. He managed to flee from the USSR in 1943 and emigrated to the United States in 1949. In addition to articles on linguistic, political, and community issues he wrote two collections of autobiographical essays, *Tortury* (Tortures, 1963) and *Spohady* (Recollections, 1978).

Turkestan (also Turkistan). A historical and geographic territory in Central Asia, extending from Kazakhstan (in some calculations as far as Siberia) in the north to Iran and India on the south, and from the Caspian Sea in the west to China in the east. Inhabited predominantly by Turkic peoples, it increasingly fell under the domination of China and the Russian Empire in the 19th century. In 1865 its western reaches were given a Russian administrative apparatus and designated as Turkestan. By the end of the century Russia had fully subjugated the region, and the Chinese established the province of Sinkiang in 1884 in its eastern reaches. The initial Russian policy of agricultural colonization by Cossacks was later replaced by one of settlement by peasants, including Ukrainians, who were familiar with farming in steppe terrain. Turkestan did not manage to become independent after the revolution and civil war. It was gradually absorbed by the USSR in 1918–24, as the Turkestan Autonomous SSR, and was later divided into the Tadzhik, Turkmen, Uzbek, and Kirghiz Soviet republics. Northern Turkestan was joined to Kazakhstan. Together with other peoples under Soviet rule, Turkestanis participated in the *Promethean movement of the 1920s and 1930s. For information on Ukrainians in Turkestan, see *Kazakhstan, *Kirgizia, *Tadzhikistan, *Turkmenistan, and *Uzbekistan.

Turkevych, Lev [Turkevych], b 4 May 1901 in Brody, Galicia, d 4 November 1961 in Toronto. Conductor, composer, teacher, and cellist. He graduated (1922) from the Szymanowski Conservatory in Lviv in the class of M. Soltys, and then studied composition in the class of J. Marks (1923–5) at Vienna Academy of Music and musicology at Vienna University. He conducted the Boian and Banduryst choruses in Lviv and, from 1927, conducted at opera theaters in Lviv, Warsaw, Poznań, and elsewhere. He was music director of the Lesia Ukrainka Drama Theater in Lviv (1939–41) and worked as both music director and conductor of the Lviv Opera Theater (1941–4). After emigrating to Germany he organized the male Vatra Chorus (1945), with which he successfully toured Switzerland, Germany, Austria, and North America (1946–51). From 1949 he lived in Canada, where he conducted the Chaika female chorus and the Prometheus male chorus (both in Toronto), as well as the Toronto Symphony Orchestra in a number of concerts. Turkevych's compositions include choral music, both secular and religious; new piano accompaniments to existing choral works; new orchestrations for stage works and for choral music; and independent symphonic music. A biography, by I. Bodrevych and L. Levytska, was published in Toronto in 1965.

Turkevych-Lukiiianovych, Stefaniia [Turkevych-Lukijanovych, Stefaniia], b 1908 in Lviv, d 8 April 1977 in Cambridge, England. Composer, pianist, and musicologist; sister of L. *Turkevych, wife of R. *Lisovsky, and mother of Z. *Lisovska. She studied at the Lysenko Higher Institute of Music, the University of Lviv, the University of Vienna, the Prague Conservatory, and the Ukrainian Free University in Prague (PH D in musicology, 1934). In 1935–9 she taught harmony and piano at the Lysenko Higher Institute of Music in Lviv, and in 1940–4 she was a lecturer at the Lviv Conservatory, an accompanist at the Lviv Opera, and a pianist for Lviv Radio. In 1945 she emigrated to England, where she spent most of her time com-

posing. Her works include the opera-ballet *Mavka* (The Sylph), four symphonies, a liturgy, chamber music, pieces for piano, and art songs.

Turkevych-Martynets, Iryna [Turkevych-Martynec'], b 1900 in Brody, Galicia, d 5 July 1983 in Winnipeg. Opera singer (lyric soprano); sister of L. Turkevych and wife of V. Martynets. She studied music at the Lysenko Higher Institute of Music and in Prague and Paris. In the Lviv Opera Theater she performed the name-parts in G. Bizet's *Carmen* and G. Puccini's *Tosca*. After emigrating to Canada in 1950, she was active in the Ukrainian Women's Organization and Ukrainian theater groups in Winnipeg, where she directed M. Arkas's *Kateryna* (1951) and the Ukrainian Children's Theater production of M. Lysenko's operetta *Billy Goat's Bluff*.

Turkey. A country in the Near East that occupies the peninsula of Asia Minor (97 percent of the country's territory) and a small corner of the Balkan Peninsula. It is bounded by the Black, Aegean, and Mediterranean seas, and shares boundaries with Georgia and Armenia (formerly with the USSR), Iran, Syria, Greece, and Bulgaria. It covers an area of 780,000 sq km and in 1990 had a population of 56.5 million. Turkey is Ukraine's neighbor to the south across the Black Sea. Until after the First World War it was identified with the Ottoman Empire, the multinational polity in which it played a dominant role. In some periods Turkey bordered directly on Ukraine or controlled sections of Ukrainian territory (particularly the southern steppe). Turkish vassal-states, such as the Crimean Khanate (see *Tatars), Moldavia, and Transylvania, were southern neighbors of Ukraine over the centuries. Turkey never controlled Ukrainian-inhabited territories for any extended period of time (with the exception of Bukovyna, which was part of the Ottoman-controlled *Moldavia principality in the 16th to 18th centuries).

Turkey played an important role in Ukrainian history. The rise of the *Cossacks was in part a reaction to Turkish expansion in Southern Ukraine beginning in the late 15th century. Once the Ukrainian Cossacks were established as a force in their own right, they occasionally sought to balance the power and territorial aspirations of Poland and Muscovy through alliances with Turkey. The (Islamic) Ottoman conquest of the Byzantine Empire was a critical factor in the development of Moscow's sense of mission as the Third Rome, the pre-eminent force of Orthodoxy that later was to subsume Ukraine. After the incorporation of Ukrainian lands into the Russian Empire the struggle against Turkey, now undertaken within an imperial context, became a popular cause among Ukrainians. In 1918 Turkey recognized the Ukrainian state as a signatory of the Treaty of Brest-Litovsk and established diplomatic relations with it. For several years after the inception of the Ukrainian SSR Turkey maintained separate economic and cultural relations with it.

To the mid-17th century. Over several centuries nomadic Turkic tribes worked their way westward from Outer Mongolia to Central Asia and beyond. Having adopted the Islamic faith, the Turks coalesced around the Seljuk dynasty and began to develop a territorial base in the Middle East. By the 12th century they had pushed forward in Byzantine-controlled Anatolia (present-day Turkey). The ruler of one of the numerous semi-independent

principalities (emirates) within the Turkish realm, Osman (late 14th to early 15th century), began expanding his holdings and created the nucleus of what was to become a powerful empire (Osmanli to the Turks, Ottoman in the West). The Ottomans took over many former Byzantine lands, including Asia Minor and the southern Balkans, in the 14th and 15th centuries. They finally took Constantinople in 1453, renamed it Istanbul, and turned it into the capital of their empire. In the 16th century they seized Wallachia, Moldavia (including Bukovyna), Transcaucasia, and the countries of the Near East. From the 1470s on Turkey began to control the northern Black Sea coast. In 1475 it took the Genoese colonies in the Crimea (Teodosiia, Kaffa, Balaklava, Sudak, and Kerch). In 1478 the Crimean Khanate recognized the suzerainty of Turkey; that development allowed the Turks to establish military bases in Akkerman (1484), Kiliia (1484), Ochakiv (1480s), and Izmail (early 16th century) and control the Black Sea.

In the late 15th century the Crimean Tatars began a 200-year campaign of raids on Ukrainian territories, independently or jointly with the Turks, in pursuit of booty and slaves. The slaves were sold either in the large market of Kaffa or in Turkey, particularly *Istanbul. The Turks themselves first attacked Ukraine in 1498–9 (jointly with the Tatars) to punish King Jan Olbracht for interfering in Turko-Moldavian affairs. They plundered Podilia and Galicia and advanced as far as Peremyshl.

With the rise of the *Zaporozhian Sich in the middle of the 16th century the Cossacks mounted an organized resistance to the Turks and Tatars and staged retaliatory naval raids on Turko-Tatar centers in Southern Ukraine, such as Ochakiv (1589), Akkerman (1594, 1601), Kiliia (1602, 1606), Izmail (1609, 1621), and Kaffa (1616). In the 17th century the Cossacks began organizing large campaigns against Turkish cities. They captured Varna in 1604, Trabzon in 1614 and 1625, and Sinop in 1614 and even attacked Istanbul in 1615, in 1620, and three times in 1624.

The Cossacks could not stop Tatar and Turkish slave raids. The majority of the captives became forced laborers, galley slaves, or domestic workers. Young women and girls became concubines, and strapping boys were trained as *janissaries. A few Ukrainians attained success and prominence among their captors; for example, *Roksolianna became the principal wife of Sultan Süleyman I and a major power behind the throne. Notwithstanding such exceptions a harsh fate usually awaited Ukrainian captives, and the evils of Turkish enslavement was a major theme in the Ukrainian *dumas.

Until the mid-17th century the Ukrainians maintained a largely antagonistic relationship with Turkey. In spite of their geographic proximity the two did not engage directly in trade, and only minor cultural influences passed between them (most notably the *Turkisms that entered the Ukrainian language). The antagonism was made stronger when the Cossacks emerged as the self-styled defenders of Ukrainian Orthodoxy. Hetman P. *Sahaidachny considered combating the Muslim world to be the primary duty of Cossacks and attempted to organize an anti-Ottoman coalition. At the Battle of *Khotyn (1621), for example, a 40,000-strong Cossack force under the command of Sahaidachny was a decisive factor in the victory, which proved a major setback for the Ottoman Empire. Hetmans M. *Doroshenko (in 1625–8) and M. *Fedorovych (1630) con-

tinued the anti-Turkish policy and conducted further successful naval attacks.

The Cossack state. With the establishment of the Ukrainian Cossack state Ukraine's relations with Turkey took a dramatic turn: they were guided now by the interests of a nascent state and realpolitik rather than territorial defense, religious ideology, and adventurism.

The earliest approaches were made by B. Khmelnytsky in the wake of a tentative anti-Tatar agreement between Muscovy and the Polish Commonwealth arranged by A. Kysil in 1647. Seeking an ally against Poland, Khmelnytsky signed a treaty with the Crimea in late 1647 or early 1648 that enabled him to mount his large-scale offensives. A Ukrainian diplomatic mission headed by Col F. Dzhali (himself of Turkish origin) traveled to Istanbul in 1648 and concluded a treaty with the Ottomans that recognized Ukraine as a sovereign state and forbade the Crimean khan to plunder Ukrainian territory. Later the sultan signed a naval convention with the Zaporozhian army, which set out the terms of trade between Turkey and Ukraine. The Ukraino-Turkish alliance was sundered by Crimean opposition, notably that of Khan *Islam Girei III, whose demand that Tatars be given the exclusive right to 'oversee northern Ukrainian affairs' was accepted by Sultan Mehmed IV.

Direct negotiations with Turkey resumed only in 1650, when Turkey offered to make Ukraine its protectorate – a vassal-state similar to Moldavia or Wallachia. Despite opposition from the Ukrainian nobility (Kysil) and the clerical hierarchy (S. Kosiv) Khmelnytsky accepted Turkey's offer in 1651. The agreement was never fully implemented, however, and it proved generally unpopular. Moreover the Tatars proved to be unreliable allies, and Khmelnytsky found himself in increased political isolation as his plans for a Cossack-Moldavian alliance (even union) fell apart. Consequently, he reoriented himself and Ukraine to Muscovy with the Treaty of *Pereiaslav in 1654. Certain provisions of the treaty prohibited independent relations between Ukraine and Turkey, but those relations continued uninterrupted. A new Ukraino-Turkish agreement was signed the following year.

Relations and agreements with Turkey in the ensuing years followed a familiar pattern as a succession of hetmans looked to Turkey for assistance, particularly in times of need: I. Vyhovsky (1659), P. Teteria (1670), P. Doroshenko and Yu. Khmelnytsky (especially after the Treaty of Andrusovo in 1667), and I. Briukhovetsky (1668). Doroshenko's initiative had the greatest significance, when he established an alliance with Turkey (recognizing Ottoman suzerainty) and launched a joint military campaign with the Turks. The subsequent *Buchach Peace Treaty of 1672, concluded with Poland on 5 October, ceded Podilia to the Turks and Bratslav and southern Kiev voivodeships to the Cossacks under Turkish protectorship. Doroshenko's shaky hold on the territory ended with his resignation in 1676, at which time the Turks replaced him with Yu. *Khmelnytsky. Khmelnytsky's rule proved unsatisfactory to his Muslim overlords and they executed him in 1681 and replaced him by the Moldavian hospodar G. Duca. That year the Ottomans concluded the Treaty of Bakhchisarai with Muscovy, which recognized the basic delineation of Ukrainian territories and gave the Turks the Right-Bank possessions they had obtained in 1672. Those lands, now largely depopulated by the ongoing fighting

during the *Ruin, were taken back by Poland in 1699. The Ottomans did not commit major resources to that part of the empire, in the wake of their defeat in 1683 near Vienna (a battle in which an important role was played by the Ukrainian Yu. *Kulchytsky).

The tenures of I. Mazepa and P. Orlyk as hetmans saw the last independent diplomatic efforts dealing with the Ottoman Empire. In the initial phase of his hetmancy (pre-1700) Mazepa was outspoken in his anti-Turkish sentiment, and Ukraine participated in anti-Turkish campaigns. Mazepa personally commanded victorious military actions against Turkish fortifications on the lower Dnieper. After 1701 Mazepa sought a reconciliation with Turkey and assistance for his effort to break free of Moscow. His defeat at Poltava in 1709 ended those efforts. Mazepa and K. Hordiienko then sought asylum in the Ottoman realm. Orlyk led a joint military action with Ukrainian, Tatar, and Turkish forces in Right-Bank Ukraine against Russian forces in 1711. In 1712 he sought to revive a union with Turkey. Turkey recognized his title to Right-Bank Ukraine but did not offer him the support he needed to wrest the territories from Polish control. In 1722 Orlyk was interned at Salonika. He lived out his days (until 1742) in the Ottoman Porte, vainly expecting assistance for his designs on Ukraine. His gradual disillusionment became evident in the growing anti-Islamic sentiment evident in his writings.

18th to 20th centuries. Ukrainians took part in the various struggles related to the *Russo-Turkish wars, which in the 18th century (1735–9, 1768–74, and 1787–91) resulted in the expulsion of Ottoman forces from Southern Ukraine. In 1774 the triangle between the Dnieper and the Boh rivers was wrested from Turkish control, and the Crimean Khanate was made independent of Turkey (under the Peace Treaty of Küçük-Kaynarca). After the destruction of the Zaporozhian Sich in 1775, some Cossacks petitioned Turkey for refuge and were granted a settlement near the mouth of the Danube in northern Dobrudja. There they established the *Danubian Sich, which was active as an organized military unit until 1828. In 1783 Russia annexed the Crimean Khanate, and in 1791 (under the Treaty of Iași) it acquired the territory between the lower Boh and the Dniester rivers. That development effectively ended Turkey's presence on the northern Black Sea littoral. The Ottomans' last (albeit indirect) holding in Ukrainian territory, Bukovyna (under the vassal-state of Moldavia), was annexed by Austria in 1774 while Turkey was engaged in hostilities with the Russian Empire.

During the 19th century the Russo-Turkish wars continued, in 1806–12 (with the annexation of Bessarabia by the Russian Empire), in 1828–9, in 1853–6 (the Crimean War), and in 1877–8 (the Balkan campaign). Ukrainians sided almost universally against the Turks, particularly in the Balkan campaign. Even before the beginning of hostilities Ukrainian volunteers took part in the struggle of the South Slavs (Serbs and Bulgarians) against Turkish domination. Ukrainians gathered considerable financial support for that cause and organized a medical-relief effort in the region.

On the side of Turkey, however, Polish (or Polonized Ukrainian) émigrés, notably A. Czartoryski, led an anti-Russian movement in the mid-19th century that was partially sponsored by Turkey. M. *Czajkowski, a participant in the Polish Insurrection of 1830–1, emigrated to Istanbul

in 1848, converted to Islam, and convinced the Porte to organize Cossack formations in the Turkish forces with Ukrainian volunteers from northern Dobruđa. Those units were active in the Crimean War and until 1861.

During the First World War Turkey fought on the side of the Central Powers against the Russian Empire. In November 1914 the Turkish interior minister met with a delegation from the Union for the Liberation of Ukraine (SVU) and promised support for the Ukrainian independence movement. M. Melenevsky headed an SVU mission in Istanbul, which published a pamphlet intended for Turkish servicemen (*Asker*), and *Ukrayna, Rusya, Türkiye, Mağalemer mecmu'asi* (1915), a handbook of general information.

In the spring of 1916 the Russian imperial army, which included Ukrainians, captured eastern Anatolia (centered on Trabzon), which it held until 1918. After the February Revolution of 1917 a Ukrainian Hromada was established in Trabzon, which published *Visti Ukraïns'koi hromady mista Trapezundu*, edited by H. Khymenko. In September 1917 the Central Rada appointed M. Svidersky as commissar of the Trabzon district. Entrusted with Ukrainizing local military units, he organized a military congress there in October 1917. In early 1918 the imperial army evacuated the city, and the Ukrainians returned to Ukraine.

A Turkish delegation that included the grand vizier and the minister of foreign affairs signed the Treaty of Brest-Litovsk on 9 February 1918, in which Turkey recognized the UNR as an independent and sovereign state. The treaty was ratified in Turkey on 22 August 1918, and Ukraine and Turkey set up diplomatic missions. The head of the Hetman government's mission in Istanbul was M. Sukovkin (1918), and of the UNR Directory, O. Lototsky (1919–20) and J. Tokarzewski-Karaszewicz (1920–1). Tokarzewski-Karaszewicz's aides included L. Kobylanskiy and V. Mursky (who was later the UNR government-in-exile's envoy in Turkey until 1935). The Turkish envoy to the Hetman government in Kiev was A. Mukhtar Bey. Another handbook on Ukrainians, *Ukrayna ve Türkiye* (1919), was published in Istanbul. Mursky published his monograph *Ukrayna ve istiklâl müca hedeler* in 1930.

After the Ukrainian SSR was established in January 1922, a treaty was signed with Turkey concerning political, economic, and cultural relations as well as 'friendship and brotherhood.' Soviet Ukraine, however, never had a permanent diplomatic mission in Istanbul, and from 1923, relations were conducted only on an all-Union level. In 1926 the All-Ukrainian Learned Association of Oriental Studies maintained direct contact with Turkey and devoted considerable attention to its culture. In 1928–9 a delegation of Ukrainian scholars (O. Hladstern, O. Samoïlovych, P. Tychyna, and V. Zummer) visited Turkey. In 1927–31 the association issued the journal *Skhidnii svit* (the last issue came out under the title *Chervonyi skhid*). After 1945 a Ukrainian Hromada was revived in Istanbul, headed by M. Zabillo. Diplomatic relations were once again established between Turkey and Ukraine after 1991.

Turkish-Ukrainian cultural relations were on the whole limited. There were some efforts on the part of Ukrainians to acquaint Turks with Ukrainian political and cultural concerns. Ukrainian writers translated or adapted Turkish folk or classical literature. Ukrainian publications on Turkish themes include studies by M. Drahomanov on Turkish anecdotes in the Ukrainian oral tradition and by

I. Franko on poems about the Russo-Turkish War of 1787–91; a grammar and basic language text by T. Hrunin (1930); A. Krymsky's translations of Turkish folk tales and songs (1890); Tychyna's translations of a variety of Turkish authors; and the anthology *Opovidannia turets'kykh pys'mennykiv* (Short Stories by Turkish Writers, 1955). There have been few Turkish translations of Ukrainian works. Some of T. Shevchenko's poems were translated by Krymsky and Nazim Hikmet, and translations of Tychyna's works appeared in the Turkish journal *Milliyet* in 1928. In the 1970s and 1980s several books of Turkish literature were translated into Ukrainian by H. Khalymonenko.

Until 1931 Krymsky headed the Turkological Commission of the All-Ukrainian Academy of Sciences, which published *Istoriia Turechchyny* (History of Turkey, 1924), *Tiurky, ikh mova i literatura* (The Turks, Their Language and Literature, 1930), and other titles. Other Ukrainian scholars in the field at that time and since then include L. Bykovsky, V. Dubrovsky, O. Hanusets, Kh. Nadel, O. Pritsak, O. Samoïlovych, Ye. Zavalynsky, L. Hajda, and V. Ostapchuk. The painter O. Hryshchenko worked in Turkey and published *Deux ans à Constantinople* (1930; Ukrainian trans 1961).

Turkisms. Loanwords from the Turkic languages became part of the Ukrainian vocabulary during the 10th to 18th centuries mostly as a result of the proximity of various Turkic peoples to Ukraine and their commercial, political, and cultural relations with it. Some Turkisms in the Ukrainian language were themselves originally loanwords from other languages (eg, *Iranianisms, *Hellenisms). A minority entered Ukrainian via the Polish, Russian, and other languages. The majority of Turkisms in the West Slavic languages entered them via the Ukrainian.

The earliest proto-Ukrainian-Turkic contacts took place in Common Slavic times. In the 6th century AD the Central Asian Turkic kaganate extended its influence to the Black and Azov seas. In the 7th and 8th centuries Turkic tribes that belonged to the Volga Bulgar and Khazar tribal unions penetrated into the Ukrainian steppe. It is possibly at that time that Turkisms such as *kahan* 'kagan, ruler', *bahatyr* 'hero', and *san* 'high rank' and the suffix *-cij*

to form names of persons according to their occupation (eg, *k"nih"čij* 'scribe') originated. In the 9th century, Kievan Rus' had ongoing relations with the Turkic Khazar kaganate, whose influence extended to the Dnieper. In the 9th to 11th centuries, the nomadic Turkic Pechenegs, Torks, and Black Klobuk traversed the steppe from the Don to the Danube. In the 11th to 13th centuries they were succeeded by the Turkic Cumans. It was from those tribes (most certainly the Cumans) that the Turkisms found in the Rus' chronicles and the epic *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign) were borrowed, including *bulat* and *xaraluh* (types of steel), *žemčuh* 'pearl', *kurhan* 'fortress, barrow', *šatro* 'tent', *japončycja* (later *opanca*) 'coat', *klobuk* (later *kovpak*) 'tall hat', *tovar* 'merchandise', *koščij* 'male captive', *čaha* 'female captive', *tlumač* 'interpreter', *lošad* (later *loša*) 'horse', *borsuk* 'badger', *jaruha* 'large ravine', and *jevšan* 'wormwood'.

Many Turkisms date from the 13th- to 14th-century Mongol-Tatar invasion of Europe. They include *kozak* 'free person, Cossack', *vataha* 'band, herd', *saraj* 'palace (later barn)', *čardak* 'ship's bridge', *bazar* 'bazaar', *xarč* 'food', *bašlyk* 'hood', *kalyta* 'pouch, purse', *baryš* 'profit', *čaj* 'tea', *buhaj* 'bull', and *karyj* 'black, brown, dark'. The largest number of Turkisms were borrowed in the 15th to 18th centuries as a result of Turkish and Crimean Tatar relations with and influence in Ukraine. They include herding terms such as *čaban* 'shepherd', *otara* 'flock', *tabun* 'horse herd', *arkan* 'lasso', *torba* '(feed) bag, sack', *kaban* 'boar', *haida* (a herder's call), and the horse colors *bulanyj* 'light bay, fallow' and *čalyj* 'roan'; terms of the steppe environment and way of life, such as *bajrak* 'wooded valley', *komyš* 'bulrush', *lyman* 'estuary', *tuman* 'fog', *berkut* 'golden eagle', *sarana* 'locust', *harba* 'cart', and *kurin* 'house' (later 'Cossack barrack' or 'detachment'); gardening terms such as *baštan* 'melon garden', *harbuz* 'gourd', *kavun* 'watermelon', and *tjutjun* 'tobacco'; Cossack military terms such as *kiš* 'encampment', *tabir* 'camp', *osavul* 'aide', *bunčuk* 'horse-tail standard', *čajka* 'boat', and *sa(ha)jdač* 'quiver'; clothing terms such as *haba* 'white cloth', *kuntuš* 'a kind of coat', *kaftan* 'caftan', *kobenjak* 'hooded coat', *šaravary* 'balloon pants', *štany* 'trousers', *očkur* 'rope belt', *sap'jan* 'morocco leather', *čoboty* 'boots', *postoly* 'bast shoes', *tas'ma* 'ribbon', and *serpanok* 'veil'; and commercial, manufacturing, and social terms such as *čumak* 'salt trader', *aršyn* 'arshin' (= 28 inches), *mohoryč* 'drinking to a bargain', *majdan* 'town or village square', *čavun* 'cast iron', *kazan* 'cauldron', *kylym* 'kilim', *tapčan* 'trestle-bed', *lokša* 'noodles', *kav'jar* 'caviar', *kava* 'coffee', *kobza* 'kobza' (lute), *ljul'ka* 'smoking pipe', *hajdamaka* 'brigand', *xarcyč* 'robber', *kančuk* 'whip', *kajdany* 'shackles', and *čuma* 'plague'. Many toponyms in the steppe regions of Ukraine are of Turkic origin, eg, Kremenčuk, Inhul, Izium, Kalmiuis, Samara, and Saksahan.

- Turkmen.** An ethnic group whose religion is Sunni Muslim, and whose language belongs to the South Turkic or *Oghuz group. There are a total of 3.4 million Turkmen, of whom 2,729,000 live in the territories of the former USSR (1989 census), including 2,537,000 in Turkmenistan, 92,300 in Uzbekistan, 14,000 in Tadzhikistan, and 23,000 in Stavropol krai, Russia. Some also live in Iran (approx 350,000), Afghanistan (300,000), various Arab countries (150,000), and Turkey (80,000). *Turkmenistan was incorporated into the Russian Empire in the late 19th century.
- Ukrainian-Turkmen relations have centered mainly on the translation of literary works. The works of T. Shevchenko, I. Franko, and contemporary Ukrainian writers have been translated into Turkmen, and Turkmen works by Maktumkuli, Kh. Ismailov, B. Soltanniazov, and R. Aliev have been translated into Ukrainian (by P. Tychyna, V. Sosiura, M. Rylsky, and others). In 1971 a Turkmen Literature Week was held in Ukraine, and in 1972 Ukrainian art and literature days were held in Turkmenistan. Among Ukrainian writers who have dealt with Turkmen subjects are M. Shumylo, A. Turchynska, L. Zabashta, D. Doroshko, and Ya. Shporta. The collection *Holosy Turkmenii* (Voices of Turkmenistan) was published in 1978. In 1977 there were 37,000 Ukrainians living in the Turkmen SSR.
- Turkmenistan.** A republic (1989 pop 3,534,000) in the southwestern part of Soviet Central Asia (Turkestan), covering an area of 488,100 sq km. Its capital is Ashkhabad. The territory belonged to various states in the past: in the 16th and 17th centuries a part of it came under the Bukhara and Khiva khanates and another part under Persia; in the 1880s it was annexed by Russia; in 1917–21 its indigenous peoples resisted the Soviet invaders; in 1921 it became an oblast within the Turkestan ASSR; and in 1924 it was promoted to the status of a republic and became the Turkmen SSR. With the disintegration of the Soviet Union in 1991 Turkmenistan gained independence.
- According to census figures, there were 6,780 Ukrainians in Turkmenistan in 1926, 21,000 (1.4 percent of the population) in 1959, 35,400 (1.6 percent) in 1970, and 37,000 in 1989. Its other inhabitants include (1979) 1,417,000 Turkmen, 313,000 Russians, 180,000 Uzbeks, 68,000 Kazakhs, and 36,000 Tatars. In 1970 most Ukrainians (29,500) lived in cities, 11,000 in Ashkhabad alone. Although 65 percent of the Ukrainians claimed Ukrainian as their mother tongue, only 8 percent were fluent in that language.
- Turko, Roman**, b 21 July 1906 in Starychi, Yavoriv county, Galicia, d 6 January 1984 in Toronto. Physician. A graduate of Lviv University (MD, 1934), he specialized in roentgenology at Cracow University (1938) and practiced medicine in Cherche, Yavoriv, and Stryi. In 1952 he emigrated to Canada, where he became head of the roentgen-

ological department at Veterans' Hospital in Saint John, New Brunswick. In 1962 he founded the Montreal branch of the Ukrainian Medical Association of North America.

The Turkovychi icon of the Theotokos

Yevhen Turula

Turkovychi [Turkovyčĭ]. III-4. A village in the Kholm region (now in Poland) and the site of a once-renowned monastery. According to legend, during the transfer of the famous icon of the Theotokos from Belz to Częstochowa (ca 1378) a similar icon appeared miraculously in the village. A monastery was built at the site. It was closed down in 1749, with only the small wooden church that housed the miraculous icon left. In 1901 an Orthodox nunnery with a teachers' seminary for girls and an orphanage was built there. It was closed by the Polish government in 1918: the church was leveled, and the other buildings were converted into a warehouse and a Roman Catholic church. In 1928 the Orthodox eparchy was permitted to build a wooden church in the partly intact cemetery. Until 1938, when the church was destroyed, it attracted large numbers of pilgrims from the Kholm and Volhynia regions.

Turnip (*Brassica rapa*; Ukrainian: *brukva*, *turneps*, *ripak*). A biennial plant, also called swede, of the family Cruciferae, related to *rape. It is grown in Ukraine for its fleshy edible root, principally to feed livestock. The early, round Volhynian variety is favored.

Turovsky, Mykhailo [Turovs'kyj, Myxajlo], b 8 May 1933 in Kiev. Graphic artist and painter of Jewish origin. He studied under O. Pashchenko at the Kiev State Art Institute (1954–60) and under M. Derehus at the USSR Academy of Arts (1965–7). In 1980 he emigrated to the United States. He has made several series of prints, including 'Pages of Struggle' (1960, lithographs) and 'Motherhood,' and illustrated over 200 books, including editions of V. Stefanyk's stories (1966), Lesia Ukrainka's *Lisova pisnia* (The Forest Song, 1967), and I. Franko's poetry (1969). He also painted a portrait of M. Hlushchenko. A catalog of an exhibition of his graphic works was published in Kiev in 1975. Since 1978 he has lived in the United States.

Turtledove (*Streptopelia*; Ukrainian: *horlytsia*). A reddish brown, migratory bird of the pigeon family Columbidae, up to 30 cm in body length, with a blue-gray head and a white-tipped tail. In Ukraine the only two species are the

common turtledove (*S. turtur*) and a recent arrival, the colored turtledove (*S. decaocto*), which came from the west during the 1940s and settled as far east as Poltava, Kharkiv, and Kherson. Both are considered secondary game birds.

Turula, Yevhen, b 4 January 1882 in Berezhany, Galicia, d 3 December 1951 in Winnipeg. Greek Catholic priest, choir director, and composer. Educated at the theological seminary and the Conservatory of Music in Lviv, he was ordained in 1906. He worked as a religious instructor and army chaplain before emigrating to Winnipeg in 1923. There he conducted choirs for the Prosvita Society and the Ukrainian National Federation, staged operettas, operated a school of music, and composed original works for violin, piano, and chorus. He published numerous collections of music, which included carols, and dance, war, and historical songs.

Turyn, Roman, b 2 September 1900 in Sniatyn, Galicia, d 29 August 1979 in Lviv. Postimpressionist and realist painter. He studied at the Cracow Academy of Fine Arts (1921–5) and under W. Jarocki and Yu. Pankevych in Paris (1925–7). Having settled in Lviv, he painted landscapes, still lifes, and portraits, including ones of A. Drahomanova-Trush (1946), F. Kolessa (1947), V. Stefanyk (1948), and V. Shchurat (1950). Turyn discovered the Lemko primitive painter *Nykyfor and organized an exhibition of his works in Lviv. In 1933–5 he made the documentary film *Hutsul Fragments* and another about sports in Galicia.

TUSM. See Ukrainian Student Organization of Mikhnovsky.

Tustan. A Rus' fortress of the 9th to 13th century near Urych, Lviv oblast. Built on a rocky hill which rose sharply above the surrounding area, the fortress had a stone stronghold and wooden exterior walls up to 15 m high. The interior of the fortress had living quarters (with up to five levels in places) and a well and two cisterns to supply water. Documents of the 14th to 16th centuries note Tustan as an important regional center.

Tustanovsky, Lavrentii. See Zyzanii, Lavrentii.

Tutkovsky, Mykola [Tutkovs'kyj], b 17 February 1857 in Lypovets, Kiev gubernia, d 28 February 1931 in Kiev.

Mykola Tutkovsky

Composer, pianist, and pedagogue; brother of P. Tutkovsky. A graduate of the Russian Musical Society's school in Kiev (1880) and the St Petersburg Conservatory (1881), he studied piano with V. Pukhalsky and music theory with A. Kazbyriuk. In 1893 he opened his own music school in Kiev, where he worked until 1930. From 1920 he also taught at the Kiev Conservatory. His works include the opera *Buinyi viter* (The Wild Wind), symphonic and chamber music, pieces for piano, choruses, art songs, and arrangements of Ukrainian folk songs. He also wrote a textbook on harmony in 1905.

Pavlo Tutkovsky

Ivan Tverdokhlib

Tutkovsky, Pavlo [Tutkovs'kyj], b 1 March 1858 in Ly-povets, Kiev gubernia, d 3 June 1930 in Kiev. Geologist; full member of the VUAN from 1919 and of the Academy of Sciences of the Belorussian SSR from 1928. After graduating from Kiev University in 1882, he taught secondary school and in 1914 was appointed a lecturer at Kiev University. He helped organize the All-Ukrainian Academy of Sciences and headed the physics-mathematics (1919–24) and geology departments. He was one of the founders of the academy's geological museum. He wrote numerous scientific works on mineralogy, petrography, geochemistry, paleontology, hydrogeology, geomorphology, and regional geology. He is the author of the eolian theory of loess formation and one of the founders of the micropaleontological method for studying sedimentary rocks. In 1895 he proposed a project for supplying Kiev with artesian water, which was later implemented. He wrote many textbooks of geology and geography and the first Ukrainian dictionary of geological terminology (1923).

Tuwim, Julian, b 13 September 1894 in Łódź, d 27 December 1953 in Zakopane, Poland. Polish poet, writer, book editor, and translator. During the Second World War he lived as an émigré in Brazil (1940–2) and New York City (1942–6). He translated into Polish the Rus' epic *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign), poems by M. Rylsky and Ye. Malaniuk, and N. Gogol's *The Inspector General* (1929), and he adapted Gogol's *The Overcoat* for the Polish stage (1934). His poems have been translated into Ukrainian by K. Polishchuk, Rylsky, Yu. Shkrumeliak, V. Lesych, D. Pavlychko, M. Lukash, H. Kochur, Ye. Drobiazko, and L. Yatskevych. Yu. Bulakhovska's book about him was published in Kiev in 1960, and an edition of his selected poems in Ukrainian translation appeared there in 1963.

Tvarynyntstvo Ukraïny (Animal Husbandry of Ukraine). A monthly journal of scientific production, published since 1926 (except in 1941–4) by the Ministry of Agriculture of Ukraine, initially in Kharkiv and since 1935 in Kiev. In 1926 its title was *Ukraïnske skotovodstvo*; in 1931 it was changed to *Sotsialistychne tvarynyntstvo Ukraïny*, in 1934 to *Sotsialistychne tvarynyntstvo*, and in 1964 to the current one. (In 1933 one issue was published under the title *Kolhospna tvarynynts'ka ferma*, and in 1941 six issues under the title *Naukovo-vyrobnychy zhurnal*.) In 1950 the circulation was 13,900; it grew to 51,800 in 1970 and 68,000 in 1976. In 1980 the circulation dropped to 56,900, a reflection of the conscious effort on the part of the Soviet government to reduce the circulation of periodicals published in the Ukrainian language.

The journal reports on the newest developments in livestock breeding, the production of fodder, effectiveness of herd reconstitution, pedigree stock breeding, artificial insemination, improvements in productivity, and quality of work. Other topics dealt with include the technology and mechanization of production and issues of veterinary medicine.

Tverdokhlib, Ivan [Tverdokhlib], b 24 June 1899 in Dovzhyk, Kharkiv county, d 16 October 1986 in Odessa. Character and comic stage and film actor. His roles ranged from Voznyi in I. Kotliarevsky's *Natalka Poltavka* (Natalka from Poltava) to Falstaff in W. Shakespeare's *The Merry Wives of Windsor*. He played in the Kharkiv People's Theater (1923–4), the Shevchenko First Theater of the Ukrainian Socialist Republic (1925), the Kharkiv Children's Theater (1926–7), the Kharkiv Chervonozavodskiy Ukrainian Drama Theater (1927–9), and the Odessa Ukrainian Drama Theater (from 1929, with interruptions). He acted in the films *Perekop* (1930), *Koliitshchyna* (1933), and *Dorohoiu tsinoiu* (At a High Price, 1957, based on M. Kotsiubynsky's story).

Tverdokhlib, Mykola [Tverdokhlib] (nom de guerre: Hrim), b 1911? in Petryliv, Tovmach county, Galicia, d 1951? in Stanyslaviv oblast. Senior UPA commander. A graduate of a Polish officer school, in early 1944 he became an instructor in the 'Oleni' officer school of the UPA-West. In the summer of 1945 he assumed command of the *Hovverlia (4th) Group of the UPA operating in the Fourth Military District (covering Stanyslaviv, Drohobych, and Chernivtsi oblasts). Some units of the group took part in two successful raids into Czechoslovakia (in September 1945 and April 1946) and one into Rumania (in June–July 1949). In 1948–9 Tverdokhlib commanded the last UPA units to be demobilized. In 1950 he was appointed chief of security for the Carpathian region, and a year later he was killed in battle by MVD troops.

Tverdokhlib, Sydir [Tverdokhlib], b 9 May 1886 in Berezhany, Galicia, d 16 October 1922 in Lviv. Writer and translator. After studying at Lviv and Vienna universities he worked as a gymnasium teacher in Lviv. There he belonged to the modernist group *Moloda Muza; his first poems and translations appeared in 1906 in its journal *S'vit*. A bilingual (Ukrainian-Polish) writer, Tverdokhlib published one small book of poetry, *V soichadi plesa* (In the Mirror of the River's Surface, 1908), and verse, novellas, and translations in both Ukrainian (*Nedilia, Iliustrovana Ukraïna, Dilo*) and Polish (*Krytyka, Przegląd Krajowy*,

Sydir Tverdokhlib

Pavlo Tychyna (portrait by Mykhailo Zhuk, watercolor and pencil, 1919)

Widnokreği) periodicals. Tverdokhlib's translations introduced the Polish reading public to contemporary Ukrainian literature and were favorably received by critics. Published separately were his Polish translations of three books of M. *Yatskiv's novellas (1908, 1910, 1911), an anthology of modern Ukrainian poetry (1911; 2nd edn 1913), and a book of T. Sevchenko's selected verse (1913). Tverdokhlib also translated Shevchenko's 'Haidamaky' into German and J. Słowacki's poems into Ukrainian. From 1920 he and Yatskiv headed the small, unpopular Ukrainian Agrarian party, which co-operated with the Polish occupational regime in Western Ukraine and published the government-funded weekly **Ridnyi kraj*. During the Ukrainian general boycott of the 1922 elections to the Sejm Tverdokhlib announced his candidacy and began campaigning. Consequently the underground Ukrainian Military Organization condemned him as a national traitor and had him assassinated in Kaminka-Strumyl'ova.

R. Senkus

Tverdokhlibov, Oleksander [Tverdoxlibov] (pseud: Zemliak), b 1840, d 1918. Historian. He taught in Okhtyryka, Kharkiv gubernia, and contributed historical essays and regional and ethnographic studies to the newspaper *Iuzhnyi kraj*, the journal *Kievskaia starina*, and the publications of the Kharkiv Gubernial Statistical Committee.

Tverdovsky, Petro [Tverdovs'kyj], b 1879 in the Poltava region, d ? Political leader in the Far East. After graduating from cadet school in Irkutsk, he served in the Far East as an officer in the Russian army. In 1917 he organized Ukrainian military units in Manchuria and was elected president of the Ukrainian Regional Council of Manchuria. In the spring of 1918 he was sent as the council's delegate to Kiev, where he was appointed as Ukraine's consul in Harbin. The following year he was arrested by the White forces in the Far East and transferred to Omsk, where he was released.

Tvorydlo, Mykola, b 4 April 1884 in Zashkiv, Lviv county, Galicia, d ca 1952 in Lviv. Agronomist and co-operative leader. After completing his studies in Vienna (1911) he undertook research in Germany and Switzerland. In 1912–19 he worked as an itinerant agricultural instructor for **Silskyi Hospodar*, and in 1920 he became director of an agricultural school in Mukachiv. He soon

returned to Galicia to become director of the head office of the *Silskyi Hospodar* society in Lviv (1924–7), a member of the board of directors of **Tsentrosoiuz* in Lviv (1928–39), and an active member of the Ukrainian National Democratic Alliance (UNDO). In 1938 he was elected to the Polish Senate as an UNDO representative, and during the Second World War he was an agricultural specialist for the Ukrainian Central Committee. He edited the monthly *Hospodar* in Uzhhorod (1920) and wrote two handbooks for farmers, *Shkidlyvi i korysni zviriaty v hospodarstvi* (Harmful and Useful Animals in Farming, 2 vols, pub 1681) and *Praktychnyi hospodar* (The Practical Farmer, 1928). He also wrote brochures and articles on economic questions.

Twardowski, Samuel, b ca 1595–1600 in Lutyn, near Jarocin, or in the vicinity of Skrzypna and Twardów, near Pleszew, Poland, d June 1661 in Zalesie Wielkie, Poland. Polish baroque poet. From 1633 he lived at the court of the magnate J. Wiśniowiecki. He wrote historical narrative poems about K. Zbaraski's 1622–3 diplomatic mission to the Ottoman Porte (1633), in which he took part, and about the Polish 'civil war' with the Cossacks, Tatars, Muscovites, Swedes, and Hungarians (4 pts, pub 1681). They are of value to both literary scholars and historians. The latter poem describes in detail the 1649 siege of Zbarazh and the 1651 Battle of Berestechko during the Cossack-Polish War. Part 1 of the poem was translated by S. *Savytsky; S. *Velychko translated parts 2 and 3 and used them as a source in his Cossack chronicle, as did H. Hrabianka. An edition of Twardowski's collected works was published in Wrocław in 1955.

Tychyna, Pavlo [Tyčyna], b 27 January 1891 in Pisky, Kozelets county, Chernihiv gubernia, d 16 September 1967 in Kiev. Poet; recipient of the highest Soviet awards and orders; member of the VUAN and AN URSR (now ANU) from 1929; deputy of the Supreme Soviet of the Ukrainian SSR from 1938 and its chairman in 1953–9; deputy of the Supreme Soviet of the USSR from 1946; director of the ANU Institute of Ukrainian Literature in 1936–9 and 1941–3; and minister of education of the Ukrainian SSR in 1943–8. He graduated from the Chernihiv Theological Seminary in 1913. His first poems were in part influenced by O. *Oles, M. *Vorony, and M. *Kotsiubynsky. His first extant poem is dated 1906 ('Synie nebo zakrylosia' [The Blue Sky Closed]), and the first one published ('Vy znaiete, iak lypa shelestyt'?' [You Know How the Linden Rustles?!]) appeared in *Literaturno-naukovyi vistnyk* in 1912. In 1913 Tychyna enrolled at the Kiev Commercial Institute, and while a student, he worked on the editorial boards of the newspapers *Rada* and *Svitlo*. Later he worked for the Chernihiv zemstvo administration.

His first collection of poetry, *Soniashni kliarnety* (Sunny Clarinets, 1918; repr 1990), is a programmatic work, in which he created a uniquely Ukrainian form of *symbolism and established his own poetic style, known as *kliarnetyzm* (clarinetism). Finding himself in the center of the turbulent events during Ukraine's struggle for independence, Tychyna was overcome by the elemental force of Ukraine's rebirth and created an opus suffused with the harmony of the universal rhythm of light.

During the early years of the Bolshevik occupation of Ukraine, marked by terror, ruin, famine, and suppression of the national uprising, Tychyna maintained his position as an independent poet and quickly established himself as

the leading Ukrainian poet. His pre-eminence is evident in the collections *Zamist' sonetiv i oktav* (Instead of Sonnets and Octaves, 1920), *Pluh* (The Plow, 1920) and *V kosmichnomu orkestri* (In the Cosmic Orchestra, 1921), the poem 'Skovoroda' (the first part of which appeared in *Shliakhy mystetstva*, 1923, no. 5), and *Viter z Ukraïny* (The Wind from Ukraine, 1924), dedicated to M. *Khvylovy. In 1923 he moved to Kharkiv and joined the organization Hart and, in 1927, *Vapli. His membership in the latter organization and his poem 'Chystyla maty kartopliu' (Mother Was Peeling Potatoes) provoked harsh official criticism, and he was accused of 'bourgeois nationalism.'

Soon after, Tychyna capitulated to the Soviet regime and began producing collections of poetry in the socialist-realist style sanctioned by the Party. They included *Chernihiv* (1931) and *Partiia vede* (The Party Leads, 1934). The latter collection has symbolized the submission of Ukrainian writers to Stalinism. The titles of his subsequent collections reflect the spirit of apologia for J. Stalin, including *Chuttia iedynoi rodyny* (Feelings of One Unified Family, 1938), for which he was awarded the Stalin Prize for literature in 1941, *Pisnia molodosti* (Song of Youth, 1938), and *Stal' i nizhnist'* (Steel and Tenderness, 1941). Abstract and expressionistic, his Stalinist poetry consists of kinetic iambs that push inexorably and bluntly forward, mimicking the Party line of the day.

The Second World War intensified those features of Tychyna's poetry, and gave rise to a patriotic combativeness, as manifested in *My idemo na bii* (We Are Going into Battle, 1941), *Peremahat' i zhyt'* (To Conquer and to Live, 1942), *Tebe my znyshchym – chort z toboiu* (We Will Destroy You – To Hell with You, 1942), and *Den' nastane* (The Day Will Come, 1943). The titles of Tychyna's many postwar collections suggest their content: *Zhyvy, zhyvy, krasuisia* (Live, Live, and Be Beautiful, 1949), *I rosty, i diiaty* (To Grow and to Act, 1949), *Mohutnist' nam dana* (Might Has Been Given Us, 1953), *Na Pereiaslavs'kii radi* (At the Pereiaslav Council, 1954), *My svidomist' liudstva* (We Are the Consciousness of Humanity, 1957), *Druzhboiu my zdruzheni* (By Friendship We Are Bound, 1958), *Do molodi mii chystyi holos* (My Clear Voice Speaks to Youth, 1959), *Bat'kivshchyni mohutnii* (To the Mighty Fatherland, 1960), *Zrostai, prechudovyi svite* (Grow, O Wonderful World, 1960), *Komunizmu dali vydni* (The Horizons of Communism Are in Sight, 1961), and *Topoli arfy hnut'* (Poplars Bend the Harps, 1963). He also wrote *Virshi* (Poems, 1968) and other collections.

Tychyna did not take part in the Ukrainian cultural revival of the late 1950s and early 1960s, and he even attacked the **shestydesiatnyky*. The poetry of the last decade before his death is full of glorification of the Party, of the new leader, N. Khrushchev, and of heroes of socialist labor, collective farms, and so on. During L. Brezhnev's repressive regime after Khrushchev's death Tychyna's creation sounded anachronistic and self-parodying. Occasionally, however, there were flashes of his former talent, as in the poem 'Pokhoron druha' (Funeral of a Friend, 1942) and some fragments in a collection published posthumously, *V sertsii moim* (In My Heart, 1970), and particularly in the philosophical poem *Skovoroda*, which was never completed but was published posthumously, in 1971.

Tychyna's poetry before his capitulation to the regime represented a high point in Ukrainian verse of the 1920s. It is marked by a synthesis of 17th-century baroque and

20th-century symbolist styles. Some of the greatest advances in European poetry can be found in his 'clarinetism,' in its drawing upon the irrational elements of the Ukrainian folk lyric, its striving to be all-encompassing, its pervasive tragic sense of the eschatological, its play of antitheses and parabola, its asyndeton structure of language, and other features.

I. Koshelivets

Tykhenko, Serhii [Tyxenko, Serhij], b 6 June 1896 in Shemakha, Baku gubernia, Azerbaidzhan, d 19 October 1971 in Kiev. Jurist. A graduate of the law faculty of Petrograd University (1918), he worked at the Ukrainian Institute for the Study of Crime (1928–38) and then at the Kiev Scientific Research Institute of Forensic Experts (1935–41) and the Ukrainian Institute of Juridical Sciences (1938–41). After the Second World War he taught criminal law at Kiev University. As a member of the Supreme Court of the Ukrainian SSR (1947–52) he participated in drafting the 1960 Ukrainian criminal code. His publications deal with criminal law and criminology.

Tykhomandrytsky, Matvii [Tyxomandryc'kyj, Matvij], b 29 January 1844 in Kiev, d 1921. Mathematician. After completing his studies at St Petersburg University (1865) he taught there (1879–83), at Kharkiv University (1885–1904), and at Symferopil University. His contributions to mathematics are in higher algebra, elliptic functions, Abelian integrals, and the theory of probability. He wrote several textbooks on mathematical analysis and higher algebra.

Tykhomel [Tyxomel'] (aka Tykhoml or Tykhomlia). A fortified town built in the 10th century. It was an object of contention between the principalities of Halych and Volhynia. It was first mentioned in the chronicles under the year 1152. In 1199 it was annexed by the Principality of Galicia-Volhynia. After the Mongol invasion the town lost its importance, and in the 1340s it came under Lithuanian rule. The remains of the fortress in Bilohiria raion, Kholmynskyi oblast, are believed to be Tykhomel's.

Tykhonovych, Yosyp [Tyxonovyč, Josyp], b ? in Kiev, d after 1855. Military physician. A graduate of Moscow University (1813), he worked in its medical faculty until 1828 (obtaining his doctorate of medicine in 1823), took part in the Russo-Turkish War (1828–9), practiced medicine in Kremenchuk and Lubni (1839–48), and was physician of the gubernial administration in Moscow (1848–55).

He wrote a two-volume work on health care for pregnant women and newborn infants (1825) and a description of surgical instruments (1838).

Tykhorsky, Khoma [Tyxors'kyj, Xoma], b 23 October 1733 in Domontiv, Pereiaslav regiment, d 14 February 1814 in St Petersburg. Physician; honorary member of the St Petersburg Academy of Sciences from 1798. After being educated at the Kievan Mohyla Academy (1750–6), the Medical School of the St Petersburg Admiralty Hospital (1756–9), and Leiden University (MD, 1765) he lectured on pharmacology in hospital schools in St Petersburg. He was senior physician at the St Petersburg Admiralty (1771–5) and Army (1776–1806) hospitals. He was a member of the Medical College (1779–99) and the medical council of the Moscow Police (1804–6). He translated a number of Medical Works into Russian and wrote a handbook on forensic medicine.

Tykhorsky, Yepyfaniij [Tyxors'kyj, Jepyfaniij], b ?, d 1731. Orthodox bishop. A former archimandrite of the Annunciation Monastery in Nizhen, he became the bishop of Belgorod in 1722. His tenure saw the extension of Ukrainian religious practices within the eparchy and the establishment of an eparchial seminary in 1722. The school was moved from Belgorod to Kharkiv in 1726 to become Kharkiv College.

Tykhovskiy, Pavlo [Tyxovs'kyj], b 2 January 1867 in Pokaliv, Ovruch county, Volhynia gubernia, d 1938. Literary scholar and bibliographer. In the Soviet period he was an associate of the Kharkiv Institute of People's Education's department of literature. While researching the manuscripts of 19th-century Ukrainian writers, he discovered and published O. Navrotsky's manuscripts. He also compiled a bibliography of Ukrainian translations of A. Mickiewicz's works (pub 1924) and contributed two articles to the Taras Shevchenko Scientific Research Institute's annuals, *Shevchenko* (1928, 1930). He fell silent during the Stalinist terror.

Tykhovskiy, Yuvenalii [Tyxovs'kyj, Juvenalij], b 1882, d 1919. Teacher and literary critic. He contributed to *Volynskiiia eparkhial'nyia vedomosti*. He published articles on *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign), Ukrainian folk songs, the Kiev Chronicle, and the Pochaiv Monastery Press in *Kievskaiia starina*, and an article on the Russian works of T. Shevchenko in *Ukrains'ka khata*.

Tykhyy, Ivan [Tyxyj], b 10 January 1927 in Savyntsi, Izium okruha, d 27 June 1982 in Kiev. Painter. In 1953 he graduated from the Kiev State Art Institute, where he studied under S. Hryhoriev and V. Kostetsky, and in 1964 he began teaching there. He painted landscapes and genre paintings, such as *The Happy Father* (1951), *Joining the Pioneers* (1953), *Motherhood* (1957), *Storks* (1960), *Native Land* (1963), *Eternal Fire* (1964–5), and *Greetings, Slavutych!* (1975).

Tykhyy, Naum [Tyxyj] (pen name of Naum Shtilerman), b 28 May 1920 in Yemilchyne, Novohrad-Volynskiy county, Volhynia gubernia. Poet and writer of Jewish origin. Since 1947 he has published numerous poetry collections and the novels *V dorohu vykhod' na svitanni* (Set Out for the

Road at Daybreak, 1959) and *Rakhunok za sontse* (A Bill for the Sun, 1979).

Oleksii Tykhy

Ivan Tyktor

Tykhyy, Oleksii [Tyxyj, Oleksij], b 27 January 1927 in Izhevka, Kostiantynivka raion, Donetske oblast, d 6 May 1984 in the Mordovian SSR. Dissident and political prisoner. A teacher in the Donbas, he was first arrested in February 1957, on a charge of 'Ukrainian nationalism,' and was sentenced in May to seven years in labor camps and five years' exile. After being released in 1964, he returned to the Donbas and worked there as a laborer. In November 1976 he became a founding member of the *Ukrainian Helsinki Group. He was arrested in February 1977, and sentenced in July to 10 years in a Mordovian camp and 5 years' exile. He did not survive his sentence. The transfer of his remains to Kiev and their interment at the Baikove cemetery in 1989 were accompanied by a massive procession. A collection of his dissident writings and of documents pertaining to his case was published in the United States in 1982.

Tyktor, Ivan, b 6 July 1896 in Krasne, Zolochiv county, Galicia, d 27 August 1982 in Ottawa. Publisher and community figure. In 1923 he founded in Lviv the *Ukrainska Pesa publishing company, until 1939 the largest and most important and successful Ukrainian publishing house in Western Ukraine, which supplied the Ukrainian public with several nonpartisan periodicals and approx 400 books. During the Second World War he directed the trade department of the *Ukrainske Vydavnytstvo* publishing house and ran the religious publishing house *Nove Zhyttia* in Cracow (1939–41) and Lviv (1941) and the Volyn publishing house in Rivne (1941–3). As a postwar refugee in Austria, he headed the Ukrainian Students' Aid Commission there. In 1948 Tyktor emigrated to Canada and settled in Winnipeg, where he founded the Club of Friends of the Ukrainian Book, which revised and republished several of the most important books issued by *Ukrainska Pesa* – including *Velyka istoriia Ukrainy* (The Great History of Ukraine, 1931, 1948), *Istoriia ukrains'koho viis'ka* (The History of the Ukrainian Armed Forces, 1935, 1953), and *Istoriia ukrains'koi kul'tury* (A History of Ukrainian Culture, 1937, 1964) – and approx 40 books of prose and poetry. A booklet about Tyktor and *Ukrainska Pesa* by Ye. Yavorivsky was published in Winnipeg in 1953.

Tylihul Estuary [Tylihul's'kyj lyman]. VII-12. A saltwater lake at the mouth of the Tylihul River on the Black Sea coast along the border of Odessa and Mykolaiv oblasts. The estuary is 80 km long, generally about 3.5 km wide (as narrow as 0.2 km in places), and 3 m deep (up to 21 m maximum). Its area fluctuates between 150 and 170 sq km. It is fed by the Tylihul River and by seawater which seeps through the 4 km of sand deposits at its mouth. The estuary has a salinity of up to 13 per cent and contains a layer of black mire with medicinal qualities along its bottom. It is also fished.

Tylihul River. A river that flows for 173 km through Odessa oblast before emptying into the Tylihul Estuary on the Black Sea coast. It drains a basin area of 3,550 sq km. Quite narrow in its upper reaches, it is 10–20 m wide along its lower course and has a valley up to 3 km wide. It is fed mainly by meltwater and tends to dry up in sections during the summer. Two dams are situated on the river, which is also used for irrigation. The major centers along the Tylihul are Ananiv and Berezivka.

Tylych Pass [Tylyc'kyj pereval]. IV-2. A mountain pass situated in the western part of the Lemko region along the present-day Polish-Czechoslovakian border. The pass has an elevation of 683 m. It was part of a once-important travel route between Poland and Hungary that went through Bardejov.

Tylyk, Volodymyr, b 21 July 1938 in Dnipropetrovske. Composer and administrator. A graduate of the Kiev State Conservatory (1962) in the composition class of A. Shtoharenko, he has been music editor of the journal *Mystetstvo* (from 1967), a member of the editorial board of *Muzyka* (from 1969), and editor of the Muzychna Ukraina publishing house (1971–4). His compositions include an overture; suites for orchestra; piano, bandura, and soprano concertos; String Quartet (1967) and Trio (1976); Sonata (1965), *Watercolors* (1966), and *Preludes-Songs* (1969) for piano solo; and *Dances of Poltava* (1971) for folk instrument orchestra.

Tymchenko, Marfa [Tymčenko], b 55 March 1922 in Petrykivka, Novomoskovske county, Katerynoslav gubernia. Master of *Petrykivka painting; wife of I. *Skytsiuk. She studied at the Petrykivka School of Decorative Painting (1936–8) under T. Pata and at the Kiev School of Folk-Art Masters (1938–41) and worked at the Kiev Experimental Plant of Artistic Ceramics (1954–77), where she decorated clay, porcelain, and wooden tableware, vases, and other objects. She has also designed fabric, posters, books, and murals (eg, in the Kazka toy store in Kiev). She is best known for her paintings on paper and cardboard, such as *Blue Birds* (1966), *Bear Family* (1972–3), *Rain in Sedniv* (1975), *Strength and Tenderness* (1980), *Village under a Mountain*, *Bridge*, *Holosiieve Forest*, and *Flowering Birches*. An album of her works was published in 1974.

Tymchenko, Yevhen [Tymčenko, Jevhen], b 8 November 1866 in Poltava, d 22 May 1948 in Kiev. Linguist, translator and lexicographer; member of the Shevchenko Scientific Society and the Ukrainian Scientific Society in Kiev, and corresponding member of the USSR Academy of Sciences from 1929. While working in a lands office in

Marfa Tymchenko

Kiev (1891–2), the zemstvo administration in Chernihiv (1893–8), and the library of Kiev University (1898–1908), he belonged to the *Brotherhood of Taras and was active in the Kiev Prosvita society. After completing his studies at Kiev (1909–12) and St Petersburg (MA, 1914) universities, he taught at Warsaw University (1914–16) and Don University in Rostov-na-Donu (1916–18). In 1918 he was appointed a member of the Codification Commission under the UNR Ministry of Justice. While he was a professor of Ukrainian and linguistics at Kiev University (1918–20) and the Kiev Institute of People's Education (1920–32), he also headed the VUAN Permanent Commission for the Compilation of the Historical Dictionary of the Ukrainian Language. From 1932 he was persecuted by the Soviet regime, and in 1939 he was imprisoned. Exiled to Krasnoyarsk, Siberia, in 1941, he was released in 1944 and worked at the AN URSS (now ANU) Institute of Linguistics until his death.

Tymchenko's major works are a Russian-Ukrainian ('Little Russian') dictionary (2 vols, 1897, 1899); a scholarly Ukrainian grammar (1907, 1917, 1918) and a secondary-school grammar textbook (1918); a book-length program for the collection of Ukrainian dialectal particularities (with K. Mykhalchuk, 1910); a booklet of instructions on how to record Ukrainian dialectal materials (1925); a course book on the history of the Ukrainian language (1927; 2nd edn 1930); and monographs on the genitive case in the South Russian linguistic province (1913), and the Ukrainian locative (1924), nominative and dative (1925), vocative and instrumental (1926), and accusative (1928) cases. After 1932 only his article on a dialectal trait of the use of the morpheme *sja* (1948) was published. In

his approach to modern literary Ukrainian, Tymchenko was the most typical representative of the archaizing ethnographic school, whose members propagated the notion of the independent development of Ukrainian on the basis of selectively chosen dialectal features. In studying the history of Ukrainian, he applied a neogrammarian approach. In an article on Slavic unity and the position of Ukrainian in the Slavic family (*Ukraina*, 1924, no. 3) he came out against the hypothesis of a proto-East Slavic language.

From 1894 to 1898 Tymchenko worked on the preparation of a Ukrainian-Russian dictionary. Prepared in a Russian orthography, it was later converted to the Ukrainian orthography, augmented, and published by B. *Hrinchenko (4 vols, 1907–9). From 1901 Tymchenko collected materials for a historical dictionary of 14th- to 18th-century Ukrainian. Its prototype was to be published (but was not) as an appendix to Hrinchenko's. The first two fascicles of a vastly expanded version of the historical dictionary (*A–Zh*), prepared in collaboration with E. Voloshyna, K. Lazarevska, and H. Petrenko, were finally published in Kiev in 1930 and 1932 (repr, Munich 1985). The Stalinist suppression of Ukrainian culture permanently interrupted work on the dictionary, and a subsequent fascicle was destroyed at the imprimery. The dictionary's huge file (approx 313,000 cards) is preserved at the ANU Institute of Linguistics. Tymchenko translated into Ukrainian the Finnish national epic *Kalevala* (1901; rev edn 1928); parts of the Estonian epic *Kalevipoeg*; and stories by G. de Maupassant, M. Maeterlinck, and V. Hugo.

R. Senkus

Tymchenko, Yosyp [Tymčenko, Josyp], b 15 April or 26 November 1852 in Okip, Zolochiv county, Kharkiv gubernia, d 20 May 1924 in Odessa. Inventor and self-taught mechanical engineer. He studied in the machine shop of Kharkiv University, where he obtained some training in mechanics. In Odessa he worked in the factory of the Russian Society for Steamships and Trade and then established a physical-optical machine shop at the university (1880). Among his numerous inventions were a signaling device for railroads, an apparatus for the detection of defects in rails and cranes, and various meteorological instruments (new types of barograph, seismograph, etc). He built a working model of the first telephone switching station in the world. Tymchenko's most important invention was a 'stroboscope' (with the physicist N. Liubimov and the inventor M. Freidenberg). This device for projecting 'live pictures' was demonstrated in Odessa in November 1893 and at the Ninth All-Russian Congress of Naturalists and Physicians in Moscow in January 1894. Although it was critically acclaimed by the scientists, Tsar Nicholas II refused to sponsor it, and a similar device was patented by the Lumière brothers in France in 1895 and brought to Russia in 1896. Tymchenko's students later formed Kinap, the first movie company in the Soviet Union.

Tymchuk, Roman [Tymčuk], b 19 August 1909 in Volytsia, Galicia, d 21 January 1991 in Philadelphia. Stage actor and director. He acted in the Zahrava Theater (1931–2) and the Tobilevykh Theater (1933–6), studied in the Ukrainian Drama School in Warsaw (1936–7), acted in Y. Stadnyk's troupe (1937–8), and directed in Ukrainian theaters in Stanyslaviv and Drohobych (1941–3). In 1947–50

he was a member of the Ensemble of Ukrainian Actors in Germany and the United States.

Tymchuk, Viktor [Tymčuk], b 10 October 1936 in Druzheliubivka, Kalynivka raion, Vinnytsia oblast. Writer. He has written the prose collections *Okraiets' syn'oho neba* (The Edge of the Blue Sky, 1965), *Den' bilykh kashtaniv* (Day of the White Chestnuts, 1973), *Ne huby peliustok, soniashnyku!* (Don't Lose Your Petals, Sunflower!, 1977), and *Uviidy v mii dim* (Come into My Home, 1979) and the mystery novel *Bez dozvolu na rozsliduvannia* (Without Permission to Investigate, 1982).

Tymiak, Mariia [Tym'jak, Marija], b 19 January 1889 in Kosiv, Galicia, d 1970 in Kosiv. Folk ceramist. She produced original earthenware, vases, and ram figurines decorated with geometric designs. Her works have been preserved in museums in Kiev and Lviv.

Ivan Tyminsky

Tyminsky, Ivan [Tymins'kyj], b 1852, d 1902. Bukovynian civic and political leader and government finance official. One of the region's leading populists, he helped to wrest control of the Ruska Besida (1884) and the Ruska Rada (1885) societies from the Russophiles. In 1884 he was one of the founders of the Ukrainian People's Home in Chernivtsi. He also helped to establish and edit the semimonthly **Bukovyna*, which in 1885 began publication in the vernacular. In 1890 he was elected to the Bukovynian Diet. His articles appeared in *Bukovyna* and *Dilo*.

Tyminsky, Taras [Tymins'kyj] (monastic name: Tyt), b 1858 in Piadykivtsi, Bukovyna, d 27 February 1927 in Roztoky, Bukovyna. Church and community activist; brother of I. *Tyminsky. He studied philosophy at Lviv University and theology at Chernihiv University, and served as a parish priest in Bukovyna. Before the First World War he was a leading member of several Ukrainian organizations. He defended the rights of Ukrainians in the metropoly and criticized attempts to Rumanianize the church, and contributed articles on church and community affairs to *Dilo*, *Bukovyna*, and the journal *Candela*. He also published a brochure criticizing the policies of the Rumanian metropolitan. In 1917–18 the Austrian authorities planned to divide the Bukovynian metropoly into separate Ukrainian and Rumanian eparchies. At this time Tyminsky was nominated to head the Ukrainian eparchy and made an archimandrite. With the establishment of Rumanian control over Bukovyna in late 1918, the plan was abandoned, and Tyminsky was removed from his posts. He then retired from public life.

Tymkiv, Mykola, b 26 February 1909 in Moskalivka, Kosiv county, Galicia, d 20 July 1985 in Kosiv. Master wood carver. He learned his craft from V. Devdiuk. He created wooden plates, caskets, writing instruments, album covers, and table lamps decorated with inlay or intarsia designs.

Tymkovsky [Tymkovs'kyj]. A family line of Cossack officers, established by Vasyi Tymchenko, a Cossack in Pereiaslav regiment (1740), and his grandson, Fedir Tymkovsky (1739–1790), a regimental osaul and postmaster of Pereiaslav regiment. Fedir's sons were cultural activists in Ukraine and Russia: the eldest was Illia *Tymkovsky, a scholar of classical literature; Roman Tymkovsky (1785–1820) was a philologist who taught at Moscow University, researched chronicles, and compiled and edited the notable *Letopis' Nestorova po drevneishomu spisku mnikha Lavrentiia* (The Chronicle of Nestor According to the Oldest Laurentian Manuscript, 1824); and Yegor Tymkovsky (4 May 1790–21 February 1875) was a sinologist and diplomat. Yegor's 1820–1 travelog (3 vols, 1824) was translated into French, German, and English (*Travels of the Russian Mission, through Mongolia to China, and Residence in Peking ...* by E. Timkovskii, 2 vols, 1827). His memoirs appeared in *Kievskaiia starina* (1894). Their sister, Hlikeriia Tymkovska (1788–1829), was the mother of the historian Mykhailo *Maksymovych.

Tymkovsky, Illia [Tymkovs'kyj, Illja], b 26 July 1773 in Pereiaslav, d 27 February 1853 in Turanivka, Hlukhiv county, Chernihiv gubernia. Pedagogue and writer. After completing studies at the Kiev Academy (1789) and Moscow University (1797) he taught law in St Petersburg and worked for the Ministry of Justice, where he attempted the first codification of Russian law. He then moved to Kharkiv, where he was a supervisor of the regional school district (from 1803) and a professor of law, history, and literature (1805–11) at Kharkiv University. In 1825–38 he was director of the Novhorod-Siverskyi Gymnasium. Tymkovsky was an ardent promoter of education and played a vital role in the establishment of gymnasiums and regional schools in Kharkiv, Chernihiv, Katerynoslav, Voronezh, Novhorod-Siverskyi, and Odessa. He also assisted in the founding of Kharkiv University.

Tymofieiev, Valentyn [Tymofjejev], b 21 July 1927 in Odessa. Musicologist. He graduated from the Piano Department of the Odessa State Conservatory (1951) and completed postgraduate studies at the AN URSR (now ANU; 1961). He also taught at the Odessa State Conservatory (1951–8), worked as editor in chief of the *Mystetstvo* publishing house (1961–4), and served as editor in chief of the Music Repertoire–Editing Board of the Ministry of Culture of the Ukrainian SSR (1964–78); he has taught at the Kiev State Conservatory since 1978. His works include the monographs *Bela Rudenko* (1963, 1973) and *Ukrainskii sovetskii fortepiannyi kontsert* (The Ukrainian Soviet Piano Concerto, 1972), the brochure *Vokal'na muzyka* (1962), the libretto for the opera *Kinets' kazky* (The Tale's End, after Jack London; music by A. Krasotov, 1959), miscellaneous articles, and scripts for television.

Tymofii, Petrovych [Tymofij, Petrovyč], b and d ? Engraver. He created decorative wood engravings for the Kievan Cave Monastery Press's books on St John Chryso-

stom's discourses on 14 epistles of the apostles (1623) and his discourses on the Acts of the Apostles (1624).

Tymokhin, Volodymyr [Tymoxin], b 19 June 1929 in Dmytrivka, Zinovivske okruha (now Znamianka raion, Kirovohrad oblast). Opera singer (lyric-dramatic tenor). He studied at the Moscow and Leningrad conservatories (1951–5) and graduated from the Kiev Conservatory (1975). He was a soloist of the Leningrad Opera (1953–6) and the Kiev Theater of Opera and Ballet (1956–78). His operatic roles included Andrii in M. Lysenko's *Taras Bulba*, Lensky in P. Tchaikovsky's *Eugene Onegin*, and the name-part in R. Wagner's *Lohengrin*. In 1976 he began lecturing at the Kiev Conservatory. He has concertized abroad under the auspices of Ukrkontsert.

Tymosh, Lidiia [Tymoš, Lidija], b 12 December 1918 in Mykolaiv, Kherson gubernia. Stage actress. She completed study at the Odessa Theater Arts College (1941) and in 1945 joined the Kirovohrad Ukrainian Music and Drama Theater. She has played both heroic and character roles and was acclaimed for her performance in I. Franko's *Dlia domashn'oho vohnyshcha* (For the Home Hearth, 1976).

Yurii Tymoshchuk

Oleksander Tymoshenko

Tymoshchuk, Yurii [Tymoščuk, Jurij], b 23 April 1880 in Hrabiv, Rivne county, Volhynia gubernia, d ? Farmer and political activist. After completing study at a teachers' seminary in Rivne he worked as a rural teacher and served his term in the Russian army. From 1910 he worked in local agricultural institutions and co-operatives in Hrabiv. In 1912 he ran as a candidate for the Fourth State Duma. During the First World War he was assigned an office job in the Russian military. At the outset of the revolution he returned home and organized a military detachment, which was incorporated into the UNR Army. In 1922 he was elected to the Polish Sejm, where he sat on the Labor and Public Works Committee and then on the Communications Committee.

Tymoshenko, Oleksander [Tymošenko], b 1909 in Kiev, d 1973 in Washington, DC. Architect; son of Serhii *Tymoshenko. An interwar émigré, he studied at the Prague Polytechnic (1928–32) and worked as an architect in Rivne, Warsaw, and, during the Second World War, Berlin and Prague. A postwar refugee, in 1947 he emigrated to the United States, where he worked as an architect in New York City, California, and Washington. He designed

a number of skyscrapers in New York and stations of the Washington subway. He was a founding member and president (1953–4) of the Ukrainian Engineers' Society of America and founded and headed its Washington chapter. He wrote articles on Ukrainian architecture and residential construction.

Tymoshenko, Petro [Tymošenko], b 20 June 1920 in Vilkhovets, Zvenyhorodka county, Kiev gubernia, d 29 April 1984 in Kiev. Linguist. After completing graduate studies in the Ukrainian language at Kiev University (1949) he taught Ukrainian linguistics there and received his candidate's degree in 1953. He wrote studies on subjects such as the history of the Ukrainian language and Ukrainian linguistics, and Ukrainian orthography, lexicology, phonetics, stylistics, dialectology, onomastics, and language teaching. He also compiled a methodological handbook for the study of the history of Ukrainian (1959) and an anthology of critical materials in the history of literary Ukrainian (2 vols, 1959, 1961).

Tymoshenko, Semen [Tymošenko], b 18 February 1895 in Furmanka, Odessa county, Kherson gubernia, d 31 March 1970 in Moscow. Marshal of the Soviet Union. In the interwar period he graduated from military academies and then commanded the Kharkiv (1937) and Kiev (1938) military districts. In September 1939 he was in charge of the army which occupied Western Ukraine. After being promoted to marshal of the Soviet Union (1940) he was commissar for the defense of the USSR (1940–1), deputy commissar of defense (1941), and commander of the western and southwestern fronts (1941–2). After the war he was in charge of several military districts until his retirement in 1960. In retirement he was chairman of the Soviet Committee of War Veterans and an inspector-general of the defense ministry.

Serhii Tymoshenko

Volodymyr Tymtsiurak

Tymoshenko, Serhii [Tymošenko, Serhij], b 4 February 1881 in Bazylivka, Borzna county, Chernihiv gubernia, d 6 July 1950 in Palo Alto, California. Architect and political leader; brother of V. and S. *Timoshenko. As a student at the Institute of Civil Engineering in St Petersburg he was active in the Ukrainian Student Hromada and the Northern Committee of the Revolutionary Ukrainian party. After completing his studies (1906) he worked as an architect and was noted for his Ukrainian styling. In Kovel he

built the Railway Ambulatory and the Pirogov Gymnasium, in Kiev, the Yurkevych and Lavrentiev residences, and in Kharkiv, the head office of the Northern Donets Railway Administration and the Popov and Boiko residences. He also drafted plans for three towns in Kharkiv gubernia. With the outbreak of the revolution in 1917 he became commissioner for Kharkiv gubernia and a member of the Central Rada. In 1919–20 he served as UNR minister of communications in I. Mazepa's, V. Prokopovych's, and A. Livytsky's cabinets and took part in the Second Winter Campaign. In 1921–4 he worked in Lviv, where he built churches in the suburbs and a Studite monastery in Zarvanytsia. Then (1924–9) he served as a professor of architecture at and rector of the *Ukrainian Husbandry Academy in Poděbrady and the Ukrainian Studio of Plastic Arts in Prague. In 1930 he was appointed chief architect of farm construction for Polish-ruled Volhynia. While working in Lutske he was active in the Volhynian Ukrainian Alliance, which he headed from 1935, in the Lutske Orthodox brotherhood, and in the Lesia Ukrainka Society. He was elected to the Polish Sejm in 1935 and to the Senate in 1938–9. From 1940 he lived in Lublin, and from 1944, in Germany. After emigrating to the United States in 1946, he resumed his architectural work and designed four Ukrainian churches in Canada and one in Argentina.

Tymoshenko, Stepan. See Timoshenko, Stephen.

Tymoshenko, Volodymyr. See Timoshenko, Vladimir.

Tymoshenko-Polevska, Liudmyla. See Polevska, Liudmyla.

Tymtsiurak, Volodymyr [Tymcjurak], b 18 May 1889 in Piilo, Kalush county, Galicia, d 11 November 1980 in Chicago. Lawyer and civic activist. After completing his law studies at Lviv University he served as captain in the Austrian army and then in the Ukrainian Galician Army. He headed the general department of the State Secretariat for Military Affairs of the Western Ukrainian National Republic, served as Ye. Petrushevych's adjutant, and belonged to the UNR military mission to Poland. After the First World War he was active in Ukrainian organizations in Stanyslaviv. In 1940–1 he represented the Ukrainian Central Committee in the Lublin district. After leaving Ukraine in 1945, he lived in Graz, Austria, and then emigrated to the United States in 1949.

Typhus. Epidemic typhus (Ukrainian: *vysypnyi tyf*) is an acute, human, fever-producing rickettsial disease transmitted by the body louse (*Pediculus humanus*). It is controlled by vaccination and delousing, but it still presents a potentially fatal threat to impoverished and destitute people in many parts of the world. The Ukrainian scientist Y. *Mochutkovsky studied epidemic typhus extensively and, in an 1876 experiment on himself, proved that its pathogen is found in the blood of the stricken. His contemporary G. *Minkh arrived at a similar conclusion. In Ukrainian the name *tyf* 'typhus' is also used for the endotoxic infections caused by salmonellae and spirochetes, including typhoid (*cherevnyi tyf*), paratyphoid (*paratyf*), and relapsing fever (*povorotnyi tyf*).

In the 19th century, the Napoleonic Wars, the Crimean campaign, and the Russo-Turkish wars, plus the years of

famine throughout Europe, brought on virulent typhus epidemics in Ukraine. Particularly during the First World War and shortly thereafter Ukraine was devastated by epidemic typhus and typhoid and paratyphoid fever. It has been estimated that perhaps 25 million cases of epidemic typhus occurred in the Russian Empire during the war (11.3 per 10,000 in the army in 1914, and 22.3 in 1915). Because of evacuation from the western front the rate of infection was much higher in Ukraine (21.9 per 10,000 in 1917) than the average throughout the empire (8.3 in 1916). The generally ruinous conditions during the struggle for independence in 1919–20 sparked an increase of up to 340 per 10,000 infected by epidemic typhus in Ukraine (500 per 10,000 infected by all forms of typhus). In fact, the rates of infection were much higher than those released by the Soviet authorities. In the regions of Podilia and Right-Bank Ukraine under the jurisdiction of the Army of the UNR, one-half of the civilian population and up to 90 percent of the soldiers and officers of the Ukrainian Galician Army (of whom 25,000 died) were stricken with typhus. The disaster brought about a crisis in the Army of the UNR and the deterioration of the Ukrainian front.

With the stabilization of life the incidence of epidemic typhus declined, from 158.9 per 10,000 in 1921 to 1.5 in 1933, partly as a result of the work of sanitary-epidemiological stations (of which there were 40 in 1928). Some flare-ups occurred in the 1930s, particularly during the man-made famine of 1932–3, again during the German occupation of Ukraine, and right after the Second World War. Between the two world wars epidemic typhus was endemic in the villages of Western Ukraine, especially in the Hutsul region, which also had the highest mortality rate (26 percent of those diagnosed in 1933). In the post-war period sporadic cases of typhoid and paratyphoid occurred in the USSR (16,900 in 1980, 17,600 in 1985, and 11,500 in 1988), but wholesale morbidity was eradicated through drugs, lice control, and adequate sanitary conditions. Typhoid fever occurred 20 times more often in the USSR (3.2 cases per 100,000 pop in 1987) than in the United States (0.16 cases in 1984).

P. Dzul

Typikon (Ukrainian: *Typyk*). A book containing the rules to be observed for the Liturgy and Office of all feasts in the Eastern Christian church. In Ukraine the Studite *Typikon* (from the Byzantine monastery of St Theodore Studite) was used in monasteries from the time of *St Theodosius of the Caves (d 1074). In the 15th century it was replaced by the Jerusalem *Typikon* (from the St Sava Monastery near Jerusalem). A manuscript *Typikon* was also called *Ustav* (Rubric) or *Oko tserkovnoie* (The Eye of the Church). They were first printed as appendixes to liturgical books. The Ukrainian Catholic church adopted the *Typikon* published in part in 1766 by the Pochaiv Monastery Press and then in full as *Ustav tserkovnoho peniia* (Rubric of Church Singing) in 1780. Other editions published for the Ukrainian Catholic church included those prepared by Ya. Doskovsky in Peremyshl (1852; repr 1870, 1903) and O. Mykyta in Uzhhorod (1890, 1901). The best edition was the *Typik Tserkve Rus'ko-Katolicheskiiia* (*Typikon* of the Ruthenian Catholic Church, 1899), by I. *Dolnytsky.

Typographic Gospels (*typohrafichni yevanheliia*). Two primary textual sources to the study of Old Ukrainian,

once kept at the library of the Moscow Synodal Imprimery (*tipografiia*) and now preserved at the Tretiakov Gallery and the Central Archive of Ancient Documents in Moscow. They consist of a 12th-century manuscript (252 double pages) and a 13th-century manuscript (228 double pages), both of which were transcribed from the Bulgarian in Ukraine, most likely in Kiev. Fragments of their texts and a linguistic description were published by A. Sobolevsky (1884).

Tyras (aka Tira, Tiras). An ancient Greek city-state on the right bank of the Dniester Estuary at the site of present-day *Bilhorod-Dnistrovskyyi. It was established in the 6th century BC by colonists from Miletus. By the 4th century BC it was a prosperous trading center, which even minted its own coinage. It was sacked in the mid-1st century BC by the Getae, but it revived. By the early 2nd century AD it was an important outpost on the frontier of the Roman Empire. In the late 3rd century it was destroyed by the Goths. The site was repopulated much later by the Tiverstians and Ulychians and named Bilhorod. Some preliminary archeological work was done at the site in 1927–32. Systematic excavations under the AN URSR (now ANU) Institute of Archeology commenced in 1945.

Tyras River. The ancient Greek name for the Dniester River. The city-state Tyras was built on the Dniester Estuary.

Tyraspil [Tyraspil'] (aka Tiraspol). VII-10. A city (1990 pop 184,000) and port on the Dniester River and a raion center in Moldova. It was founded in 1793 as a fortress on the site of the Moldavian settlement of Suklei. In 1806 it became a county center of Kherson gubernia. In 1924–40 it was part of the Moldavian ASSR (within the Ukrainian SSR), and from 1929, its capital. According to the census of 1926, Ukrainians represented 11.9 percent of the city's and 19.5 percent of the raion's population.

Tyravska, Nataliia [Tyravs'ka, Natalija], b 9 March 1924 in Kyvertsi, Lutske county, Volhynia gubernia. Choreographer. She was a soloist dancer with the Ukrainian Theater in Lutske (1941–4) and then a teacher-choreographer in Germany (1945–9). She emigrated to Sydney, Australia, in 1949 and established a Ukrainian dance group, which has won many awards over the years at international folk dancing competitions. She toured with the Veselka Ukrainian Dance Ensemble the United States and Canada (1986) and Ukraine (1990).

Tys, Yurii (pseud of Yurii Krokhmaliuk), b 27 October 1904 in Cracow. Writer, editor, and military historian. He graduated from the Vienna Technical Higher School (1928) and worked as an engineer in Galicia. During the Second World War he was a staff officer with the rank of major in the *Division Galizien. As a postwar refugee he was a cofounder of the Association of Ukrainian Scholars, Artists, and Litterateurs in Buenos Aires. After moving to Detroit he founded the Institute of Ukrainian Culture there, and he has been chief editor of the journal **Terem* since 1962. A major émigré author of historical fiction, he wrote the novels *Pid L'ovovom pluh vidpochyvav* (Near Lviv the Plow Rested, 1937), *Reid u nevidome: Dyvni pryhody znatnoho molodtsia pana Mykoly Predtvycha* (Raid into the

Yuriy Tys

Unknown: The Strange Adventures of the Notable Young Noble Mykola Predtvych, 1955), *Zhyttia inshoi liudyny* (The Life of a Different Person, 1958), *Konotop* (1959), *Zvidun z Chyhyryna* (The Scout from Chyhyryn, 1961), *Na svi-tanku: Biografichna povist' z zhyttia Marka Vovchka* (At Daybreak: A Biographical Novelette from the Life of Marko Vovchok, 1961), and *K-7* (1964), and the story collections *Shliakhamy vikiv* (Along the Roads of Ages, 1951) and *Markiza* (The Marquise, 1954). He also wrote the reportage collection *Symfoniia zemli* (The Earth's Symphony, 1951), the Christmas mystery play *Ne plach, Rakhile* (Don't Cry, Rachel, 1952), the humorous autobiographical *Shchodennyk natsional'noho heroia Seleпка Lavochky* (Diary of the National Hero Seleпка Lavochka, 1954; 2nd edn 1982), and the monographs *Boi Khmel'nyts'koho* (Khmelnytsky's Battles, 1954), *La Batalla de Poltava* (1960), *Guerra y libertad: Historia de la Division 'Halychyna' (d.u.1) del Ejercito Nacional Ucraino (1943-1945)* (1961), and *UPA Warfare in Ukraine: Strategical, Tactical and Organizational Problems of Ukrainian Resistance in World War II* (1972). His belletristic, historical, and political writings have appeared in émigré periodicals such as *Vyzvol'nyi shliakh*, *Visti kombatanta*, and *Estafeta*.

R. Senkus

Tysa Lowland (Potyska nyzovyna). A major lowland in *Transcarpathia that borders the foothills of the Volcanic Ukrainian Carpathians. It is a continuation of the large Pannonian Lowland and covers a territory of almost 2,000 sq km (15 percent of the total area of Transcarpathia). Only the northern part of the lowland constitutes Ukrainian ethnic territory. The south is inhabited by Hungarians (with a few Ukrainian pockets); the west is located in Slovakia and is settled mostly by Slovaks (with an admixture of Ukrainians and Hungarians).

The Tysa Lowland is a monotonous flatland at an elevation of 100–130 m. It occupies a tectonic depression (Chop–Makaliv) overlaid with Neogene deposits and then tuff, clay, and sand. The Tysa River and its tributaries (the Borzhava, the Latorytsia, the Uzh, and the Liaborets) meander through the lowland, often changing their course and forming mud holes. The flat relief and the slow flow of the rivers, high groundwater level, and large spring runoffs (often with flooding) have caused the creation of wetlands, especially between Mukachiv and Berehove. They have (in part) been drained since the late 19th century. The lowland is dotted with some volcanic hills 200–360 m and even 560 m high.

The climate of the Tysa Lowland is warm and humid.

Annual temperatures average 8.5°C (in the north) to 10°C (in the south); they reach 20–21°C in July and drop to –3°C in January. The growing season (with temperatures over 5°C) is 230 to 240 days a year. Precipitation averages 600–700 mm a year, with 400 mm falling in the summer (peaking in June). The soil is of average fertility with high acidity. Commonly found are podzolized gleys and bog soils, with some better soils near the mountains. The flora is forest-steppe, with steppe admixtures, and includes oak forests dotted with meadows. Most of the forest has been cut back (only about 10 percent of the area remains forested), and over half the territory is under cultivation – primarily wheat, corn, and some industrial crops (notably sunflower and tobacco). Garden farming and grape growing are also practiced, and about one-quarter of the land is pasture or hayfields. Dairy farming is the most common form of animal husbandry. For the entire lowland population the density is about 100 persons/sq km. The largest settlements on the edge of the lowland include Uzhhorod, Mukachiv, and Vynohradiv. Within the lowland itself Berehove and Chop are the major centers.

V. Kubijovč

The Tysa River

Tysa River. The largest left-bank tributary of the Danube River. It flows for 966 km through Ukraine (233 km) and Hungary and drains a basin area of 157,100 sq km (over 15,000 sq km of which is in Transcarpathia and 3,000 in the Prešov region). The Tysa is formed by the confluence of the Bila (White) Tysa and the Chorna (Black) Tysa, near Rakhiv. It has a typical mountain character in its upper reaches, with a drop of 4.5 m/km and a velocity of 3 m/sec. It widens out to 50–100 m, drops at 1.8 m/km, and moves at 2 m/sec or less as it flows through the Maramureş Basin. It then flows through the Ukrainian Volcanic Carpathians and eventually ends up in flatter terrain. The Tysa forms part of the border between Ukraine and both Rumania and Hungary. Rock salt, petroleum, and natural gas can be found in its basin.

Tyshchenko, Anatolii [Tyščenko, Anatolij], b 22 August 1943 in Tahanrih, Rostov oblast, RSFSR. Canoeing

champion. He was the 1970 world champion in the men's kayak singles, the 1969 European champion in the 500-m singles and the 4 × 500-m singles relay, a silver and bronze medalist at numerous world and European championships, and a champion of Ukraine and the USSR many times.

Tyshchenko, Mykola [Tyščenko], b 16 January 1893 in Velbivka, Hadiache county, Poltava gubernia, d ? Historian and archivist. A graduate of Kiev University, in the 1920s he worked for the VUAN and the Central Archives in Kiev. He studied the mercantile history of 18th-century Ukraine, as well as archival history, and his scholarly works were published in the serials of the VUAN Historical-Geographical Commission and the Historical-Philological Section. After the Second World War he worked in Kamianets-Podilskiyi. An article by him on 18th-century trade between Russia and Left-Bank Ukraine appeared in the journal *Ukraïns'kyi istorychnyi zhurnal* in 1963. Nothing further is known of him.

Yuriy Tyshchenko

Mykhailo Tyshkevych

Tyshchenko, Yurii [Tyščenko, Jurij] (pseud: Yu. Siry, Yu. Azovsky, Halaida, O. Kadylo, Yu. Soltychynsky), b 22 April 1880 near Berdianske, Tavriia gubernia, d 28 November 1953 in New York. Writer, journalist, publisher, and bookseller; full member of the Ukrainian Academy of Arts and Sciences in the US. Threatened with imprisonment for his involvement in the *Ukrainian Social Democratic Workers' party, he fled to Lviv in 1907. After returning illegally to Kiev under the assumed name P. Lavrov, he established the *Dzvin publishing house there in 1907 together with V. Vynnychenko and L. Yurkevych, ran the *Lan publishing house (1909–14), served as managing editor of *Selo (1909–11), and coedited *Zasiv* (1911–12) and *Literaturno-naukovyi vistnyk* (1911–14). He also opened bookstores in Kiev, Kharkiv, and Katerynoslav to sell publications of the Shevchenko Scientific Society, and contributed to periodicals such as *Ridnyi kraj*, *Rada*, *Ukraïns'ka khata*, *Moloda Ukraïna*, *Dzvinok*, and *Dzvin*. In 1914, before the outbreak of the First World War, Tyshchenko visited the United States and worked as an editor for the Prosvita society in Jersey City. Following the February Revolution of 1917 he published educational materials and journals (eg, *Svitlo*, *Ukraïns'ka shkola*) in Kiev and edited *Vistnyk Heneral'noho Sekretariatu Ukraïny* (1917–18), the official organ of the Ukrainian Central Rada government. In 1919 he

re-established Dzvin in Vienna and published numerous textbooks that were shipped to Ukraine and used in elementary schools until 1925, as well as a collection of his own novellas (1920). As a postwar refugee in Germany, he published a printing handbook (1948), wrote memoiristic articles, and headed the *Association of Ukrainian Writers for Young People (OPDL). He emigrated to the United States in 1950, and there he published more children's books and, together with A. Bilous, a 12-volume collection of works by Lesia Ukrainka; contributed to *Svoboda*; and again headed the OPDL.

Tyshchynsky, Oleksander [Tyščyns'kyj], b 17 July 1835 in Holubychi, Horodnia county, Chernihiv gubernia, d 9 February 1896 in Chernihiv. Civic and political activist and journalist. He was expelled from universities in Kharkiv, Kiev, and Dorpat in the latter 1850s for his political activities (as a member of the Kharkiv-Kiev Secret Society and coauthor of an 1860 Ukrainophile 'manifesto') and general insubordination. He was arrested in 1863 in conjunction with a Third Section investigation and imprisoned in the Peter and Paul Fortress. Subsequent ministerial orders gave him a bureaucratic position in Chernihiv under the watchful eye of the gubernial governor. There Tyshchynsky pressed hard for zemstvo reform. He put his ideas into practice as president of the Chernihiv county zemstvo for a nine-year period, until a conservative backlash forced him out of that post. He obtained a position as deputy director of the Chernihiv municipal bank, where he pursued a loans policy generally favorable to peasant needs. He was also active in numerous civic organizations and established a library and a bookstore in Chernihiv.

Tyshevsky, Ivan [Tyševs'kyj], b 1760 in Sachkovychi, Starodub regiment, d 19 August 1830 in Poltava. Physician. A graduate of Chernihiv College (1776–83) and the Medical School of the St Petersburg Army Hospital (1785), he served as the official doctor of Katerynoslav vicegerency (1792–4) and a county doctor in Poltava (from 1797), where he built and financed a hospital and pharmacy. From 1803 he was the obstetrician of the Poltava Gubernia Medical Board. He wrote on surgery and ergot poisoning.

Tyshkevych, Mykhailo [Tyškevych, Myxajlo] (Tyszkiewicz, Michel), b 20 April 1857 in Andrushivka, Lykovets county, Kiev gubernia, d 3 August 1930 in Zydanowo, Poznań voivodeship, Poland. Count, diplomat, publicist, artist, and patron of Ukrainian culture. A descendant of a Polonized line of Lithuanian-Ukrainian nobility, he graduated from the St Petersburg Academy of Arts and studied abroad. After settling down on his estate in 1880, he devoted himself to the welfare of the peasants and became active in the Ukrainian populist movement. He established the Mykhailo Prize at the Prosvita society for the best historical novel or drama about Ukraine (1888), supported Ukrainian and Polish artists and writers, and donated 20,000 rubles to the Ukrainian Scientific Society in Kiev on the centennial of T. Shevchenko's birth (1914). He founded several societies, such as the Catholic Union, the Union of Nobles and Landowners (1906), and the Kiev Society of Peace Advocates (1907), to promote social and national progress. As a publicist he defended Ukrainian demands in Polish and Russian papers. In 1917 he was elected president of the Union of Ukrainian Cath-

olics in Kiev. During the First World War he lived in Lausanne, where he actively supported the cause of Ukrainian independence by publishing articles in the Western press and corresponding with influential political figures of the Entente. He supported the weekly *L'Ukraine* financially and helped establish the Ucraina information service. He was president of the Ukrainian-Lithuanian Society. In 1919 the UNR government appointed Tyshkevych chief of its diplomatic mission to the Vatican and then of the delegation to the Paris Peace Conference. From 1920 he lived on his son's estate near Poznań. He financed the publication of *Documents historiques sur l'Ukraine et ses relations avec la Pologne, la Russie et la Suède (1569-1764)* (1919) and wrote the brochure *L'Ukraine en face du Congrès* (1919). Excerpts from his memoirs appeared in *Literaturno-naukovyi vistnyk* in 1928 and 1929.

Tyshynska, Evstakhiia [Tyšyns'ka, Evstaxija], b 1872, d 1944. Galician civic leader. A teacher by vocation, she was a founder and the first president of the Buduchnist domestic servants' society in Lviv. She also headed the women's section of Catholic Action and developed a plan (ultimately unsuccessful) to restructure the Union of Ukrainian Women on a religious basis.

Tysiacha. In Kievan Rus' (9th-10th centuries) a *tysiacha* ('thousand') was a military unit, commanded by a trusted appointee of the prince called the **tysiatskyi*. Each large city with its adjoining territories constituted a *tysiacha*, subdivided into *sotni* ('hundreds'). Eventually the *tysiacha* became the largest administrative-military unit; it corresponded to a land or territory and was governed by a prince's appointee.

Vasyl Tysiak

Tysiak, Vasyl [Tysjak, Vasyl'], b 21 October 1900 in Veldizh, Dolyna county, Galicia, d 5 July 1967 in Toronto. Opera singer (lyric tenor). He studied singing in Warsaw (1927-9) and under E. Carbini in Milan (1930-2), and debuted with the Polish Opera in Lviv (1929). He was a soloist in the Warsaw Opera and the Lviv Opera Theater (1941-4). In 1944 he left Ukraine and concertized in France, Belgium, Spain, Algiers, and North America, and in 1950 settled in Canada. In concert he often performed songs of the Ukrainian Sich Riflemen.

Tysiatskyi. During the Princely era a higher territorial official and the prince's viceregent, authorized to rule during his absence. He was appointed by the prince from

among his distinguished boyars. The *tysiatskyi* also headed the military levy called the **tysiacha* and executed general administrative and policing functions. In the Novgorod republic (11th-13th centuries) the *tysiatskyi* was an elected official, chosen from a council of boyars.

The Church of the Nativity of the Mother of God in Tysmenytsia (1736)

Tysmenytsia [Tysmenycja or Tys'menycja]. v-5. A town smt (1983 pop 8,500) on the Vorona River in Ivano-Frankivske raion, Ivano-Frankivske oblast. It was first mentioned in the Hypatian Chronicle under the year 1143. From the end of the 14th century the town was under Polish rule. It was an active trading and manufacturing center on a trade route from Lviv to Moldavia. In 1449 the town was granted the rights of **Magdeburg* law. It was destroyed by the Turks and Tatars in 1515 and 1676. After the partition of Poland in 1772, it was annexed by Austria, and after 1919 it was under Polish rule. In 1939 it was incorporated into the Ukrainian SSR. Today its main industries are fur manufacturing and woodworking. Its chief architectural monument is a wooden church from the 18th century.

Tysovsky, Oleksander [Tysovs'kyj] (pseud: Drot), b 9 August 1886 in Bykiv, Sambir county, Galicia, d 29 March 1968 in Vienna. Educator and biologist; full member of the Shevchenko Scientific Society from 1927. A graduate of Lviv University, he taught natural science at the **Academic Gymnasium of Lviv* (1911-39). Recognizing the shortcomings of the school system in building character, he adapted the scouting program to the needs of Ukrainian society and founded the first groups of the **Plast Ukrainian Youth Association* (1911). After serving in the Austrian army during the First World War, he served as a

Oleksander Tysovsky

Serhii Tytarenko

professor of the *Lviv (Underground) Ukrainian University (1920–4), Lviv University (1939–41), and the Higher Agronomic Courses in Lviv (1941–3). As Plast developed into a national organization, he prepared its basic scouting handbook and presided over the Supreme Plast Council (1921–30). From 1944 he lived as an émigré in Vienna. In addition to scientific articles in botany and zoology (written in Ukrainian or German) his publications include *Plast* (1912), *Zhyttia v Plasti* (Life in Plast, 1921; 2nd rev edn 1961; 3rd edn 1969), and articles on education and upbringing.

Tyssarovsky, Yeremiia [Tyssarovs'kyj, Jeremija] (secular name: Yevstafii), b ?, d 1 March 1641 in Zolochiv, Galicia. Orthodox bishop. He succeeded H. Balaban as bishop of Lviv in 1607, at which time he promised the Polish king Sigismund III Vasa that he would join the Uniate church. After his consecration by Metropolitan Anastasii of Suceava, however, he remained Orthodox. In 1610–20 he was the only Orthodox bishop in the Polish-Lithuanian Commonwealth, and the patriarch of Constantinople appointed him his exarch. Tyssarovsky maintained good relations with the Lviv Dormition Brotherhood. In 1633, together with three other bishops, he consecrated P. *Mohyla bishop in Lviv.

Tytarenko, Nadiia, b 18 April 1903 in Makedony, near Potik, Kaniv county, Kiev gubernia, d 26 January 1976 in Kiev. Heroic stage actress. She began her career in Kyidramte (1920–1) and then acted in Berezil (1922–31), the Kharkiv Theater of the Revolution (1931–40), and the Kharkiv (1941–4) and Lviv (1944–52) Young Spectator's theaters.

Tytarenko, Serhii, b 1889 in Ichnia, Borzna county, Chernihiv gubernia, d ? in the United States. Journalist and publisher. In Kiev he was editorial secretary of the pedagogical journals *Svitlo* (1910–14) and *Vil'na ukrains'ka shkola* (1917–19). In 1912 he cofounded the *Krynytsia publishing house, which he helped run until the First World War and after its revival in 1917–20. Under Soviet rule he directed the Kiev branch of the State Publishing House of Ukraine and the editorial staff of the *Knyho-spilka publishing co-operative (1924–7) and was a member of the executive of Slovo publishers (1922–6). Tytarenko wrote several children's primers and readers. He was arrested in 1929 in connection with the Union for

the Liberation of Ukraine and exiled by administrative order to Voronezh for three years. There he translated works by N. Gogol and M. Kostomarov for the State Publishing Alliance of Ukraine, which were published under the pseudonym P. Vilkhovy. In 1943 he managed to return to Kiev. A postwar refugee in Germany, he emigrated to the United States.

Bohdan Tytla: *Early Spring* (watercolor)

Tytla, Bohdan, b 23 March 1928 in Pidhaisi, Galicia. Painter and graphic artist; husband of H. Tytla. A postwar refugee, he has lived in the United States since 1950, and graduated from City University in New York (1957). He specializes in watercolor landscapes but also paints in oils and acrylics. He has designed book covers, including the collection *Pidhaisi's'ka zemlia* (Pidhaisi Land, 1980). Solo exhibitions of his work have been held in New York (1964, 1978), Washington (1973), Philadelphia (1974), Toronto (1979), and Ottawa (1982, 1984).

Halyna Tytla: icon of St Olha in the Ukrainian Catholic Church of the Immaculate Conception in Barnesboro

Tytla, Halyna (née Hrytsenko), b 28 November 1935 in Brno, Czechoslovakia. Graphic artist and iconographer; wife of B. Tytla. A postwar refugee, she has lived in the United States since 1949. She has worked as a book designer and has studied iconography under P. Kholodny, Jr. She painted the icons of ss Olha and Volodymyr in the Church of the Immaculate Conception in Barnesboro, Pennsylvania, the Good Friday holy shrouds in St Volodymyr's Church in Glen Spey and St Michael's Church in Yonkers, New York, and other icons. Solo exhibitions of her work have been held in Philadelphia (1976), Toronto (1979), and Ottawa (1982, 1984).

Tytla, William (Volodymyr), b 24 October 1904 in Yonkers, New York, d 30 December 1968 in East Lyme, Connecticut. Cartoonist. After graduating from the New York Evening School of Industrial Arts he studied sculpture in Paris. Upon returning to New York he worked as a draftsman for Paul Terry's Terrytoons and then for Walt Disney (1934–43). He was the animator of *Saludos Amigos* and *Victory through Air Power*; directing animator of *Snow White*, *Pinocchio*, and *Dumbo*; and animations supervisor of *Fantasia*. He created famous characters, such as the Seven Dwarfs, Stromboli, and Dumbo. He also did many shorts for Disney before moving to Famous Studios, Paramount, and Twentieth Century Fox, where he directed comedy series such as *Little Audrey*, *Little Lulu*, and *Popeye*. At the end of the 1950s he set up his own firm, Tytla Productions, and produced animated commercials.

Tyvrviv. IV-9. A town smt (1986 pop 5,100) on the Boh River and a raion center in Vinnytsia oblast. It is first mentioned in historical documents in 1505, when it was under Lithuanian rule. In 1569 it was transferred to Poland. After the Cossack-Polish War it was restored to Poland by the Treaty of Andrusovo. A few years later Tyvrviv was captured by the Turks (1672–99). During the 18th century its inhabitants rebelled against the Polish lords (1734, 1750). In 1793 the town was annexed by Russia and became a volost center in Vinnytsia county, Podilia gubernia. After the revolutionary period Tyvrviv belonged to the Ukrainian SSR, except for a few years of Rumanian rule (1941–4). Today the town produces bricks, reinforced concrete, baked goods, and beer.

Tyvun (aka *tiun*). In Kievan Rus' a prince's servant, who on the ruler's instructions sometimes performed administrative and judicial duties. Some of the *tyvuny* were former slaves. The *tyvun* enjoyed certain privileges, and the penalty for killing a *tyvun* was a double **vyra*. Eventually boyar and episcopal households and monasteries had *tyvuny*. In the Grand Duchy of Lithuania the *tyvun* was a *volost* administrator and belonged to the nobility or the wealthy peasantry. In some localities he was an elected representative of a village *hromada*.

U

Ubid River [Ubid']. A right-bank tributary of the Desna River that flows for 106 km through Chernihiv oblast and drains a basin area of 1,310 sq km. The river is 10–20 m wide and has a flat valley 2.5–3 km wide. It is used for water supply and serves as an outlet for a regional drainage system.

Ubot River [Ubot']. A right-bank tributary of the Prypiat River that flows for 292 km through Zhytomyr oblast and Homel oblast (Belarus) and drains a basin area of 5,820 sq km. The river is 10–20 m wide (up to 40 m in some places) and flows slowly. Its banks and the area surrounding them are quite marshy. The river is used for water supply and irrigation.

Uchytel' (Teacher). The first Ukrainian pedagogical journal in Transcarpathia, published weekly in Uzhhorod from April to December 1867 (a total of 26 issues). It published teaching materials and professional advice for teachers. *Uchytel'* was edited and published by A. *Ripai.

Uchytel' (Teacher). A newspaper published weekly in 1869–73 and then semimonthly in 1874 in Lviv (a total of 242 issues). Intended initially for teachers, it soon became a more general paper of pedagogy and enlightenment affiliated with the Russophile *Stauropigion Institute. It also published belles lettres and articles on cultural and economic affairs and the children's supplement *Lastivka*. The editor and publisher was M. Klemertovych. In 1880 publication of *Uchytel'* was renewed briefly.

Uchytel' (Teacher). A leading pedagogical journal published semimonthly and then monthly in Lviv in 1889–1914 by the Ruthenian Pedagogical Society (later *Ridna Shkola). It contained sample lessons and curricula for Ukrainian schools, articles on teaching methodology and the history of education, book reviews, and belles lettres. The journal did much to popularize pedagogical techniques developed in Western Europe and North America among Ukrainian teachers and educational theorists. It also devoted considerable attention to the development of education in Western and Russian-ruled Ukraine. In its last years it concentrated on primary education. *Uchytel'* was edited by I. Chapelsky, T. Hrushkevych (1890–2), V. Shukhevych (1893–1905), I. Kopach, V. Shchurat, O. Sushko, and I. Yushchysyn (1911–14).

Uchytel' (Teacher). A monthly organ of the School Administration of Subcarpathian Ruthenia, published in 1920–36 in Uzhhorod. It was edited by I. Pankevych, S. Bochek, and Yu. Revai. It helped to instill Ukrainian consciousness among the population of Transcarpathia.

Uchytelska Hromada society. See Teachers' Hromada.

Uchytel' (first issue, 1889)

Uchytel's'ke slovo (Teacher's Word). A pedagogical journal published by the *Ukrainian Teachers' Mutual Aid Society in Lviv in 1912–39 (with some interruptions). The journal appeared semimonthly and then monthly and was edited by I. Kazanivsky, H. Koval, I. Lishchynsky, A. Zeleny, A. Dombrovsky, I. Yushchysyn, and others. It also published the supplements *Metodyka i shkil'na praktyka* (1930–9) and **Shliakh vykhovannia i navchannia*. In 1930 *Uchytel's'ke slovo* appeared in a pressrun of 3,000 copies.

Uchytel's'kyi holos (Teacher's Voice). A monthly organ of the Teachers' Hromada of Subcarpathian Ruthenia, published in Uzhhorod and then in Mukachiv in 1930–8. It published articles on pedagogical and cultural affairs and was edited by O. Poliansky with the assistance of V. Svereniak, I. Vasko, and A. Shtefan.

Ucrania Libre. A Spanish-language quarterly and then semiannual journal, published by the Ukrainian Information and Publishing Institute in Buenos Aires from 1951 to 1960 (a total of 19 issues). Edited by Yu. *Tys, it contained articles on Ukrainian history, culture, religion, politics, and economics; on developments in Soviet Ukraine; and on Ukrainian life in Argentina. Many of the articles were translated from émigré periodicals published in North America and Western Europe.

Udai River [Udaj]. A right-bank tributary of the Sula River that flows for 327 km through Chernihiv and Poltava oblasts and drains a basin area of 7,030 sq km. The river is 5–10 m wide in its upper reaches and 20–40 m wide along its lower course. Wetlands are found in several sections of its basin. The river is used for industry, water supply, and fishing. The cities of Pryluka and Pyriatyn are situated along it.

Udoenko, Levko, b 19 August 1932 in Kiev. Film director. He completed study in the actor's (1954) and film director's (1959) faculties at the Kiev Institute of Theater Arts and became a director of popular-scientific films in the Kiev Artistic Film Studio (1959). Among them are *Nasha Ukraïna* (Our Ukraine, 1966), *Lesia Ukraïnka* (1968), and *Rushiiï prohresu* (The Promoters of Progress, 1980).

Volodymyr Udoenko

Gen Mykola Udovychenko

Udoenko, Volodymyr, b 9 July 1881 in Kiev, d 8 December 1937. Medical scientist and political prisoner. In the 1920s he was a professor at the Kiev Medical and Art institutes and a member of the presidium of the VUAN medical section. He was arrested by the GPU on 22 November 1929 and sentenced to eight years' imprisonment at the 1930 show trial of members of the so-called *Union for the Liberation of Ukraine. Three days before his scheduled release he was sentenced to death by the NKVD and shot in a concentration camp in the Soviet Arctic.

Udovychenko, Mykola [Udovyčenko], b 17 May 1885, d 21 July 1937 in Homécourt, France. Military figure; brother of O. Udovychenko. An officer in the Russian army from 1905, during the First World War he commanded a battalion of the 129th Bessarabian Regiment in Kiev and then served on the southwestern front in the topography department of the General Staff. After the February Revolution he became the Ukrainian commissioner for review on the General Staff of the southwestern front of the Russian army and chief organizer of the UNR units there. He was a member of the Ukrainian General Military Committee. In January 1918 his detachment fought the Bolsheviks in Kiev. Thereafter he served as director of the personnel department in the Ministry of Military Affairs under the Central Rada, the Hetman government, and the UNR Directory. In 1920 he was interned with other UNR Army soldiers in a camp near Kalisz, Poland. In 1924 he emigrated to France.

Udovychenko, Oleksander [Udovyčenko], b 20 February 1887 in Kharkiv, d 21 April 1975 in Maintenon, near Paris. UNR Army field commander. After completing a course at the Nikolai Military Academy in St Petersburg, he held various staff positions in the Russian army. In 1917 he chaired the Ukrainian Council of the Third Caucasian Corps of the imperial army. In October he was called to Kiev to become S. Petliura's military adviser. In January–March 1918 he served as chief of staff in the *Haida-

Gen Oleksander Udovychenko

maka Battalion of Slobidska Ukraine and distinguished himself in fighting the Bolshevik insurrection in Kiev. He was assigned to the General Staff in April 1918 and soon promoted to colonel. After serving as general quartermaster of the southwestern front (November 1918–March 1919) he commanded the *Third Iron Rifle Division. Ill with typhus, Udovychenko was captured by A. Denikin's forces. He escaped in the spring of 1920 and once again took command of the reactivated Iron Division. From November 1920 he served as general inspector of Polish internment camps for UNR soldiers. After emigrating to France in 1924, he presided over its veteran Ukrainian Military Society (1927–75) and the European Federation of Ukrainian Veterans' Organizations (1953–75) and served as vice-president of the UNR government-in-exile and its defense minister (1954–61). He was promoted to major general by the government-in-exile. He wrote *Ukraïna u viini za derzavnist'* (Ukraine in the War for Statehood, 1954) and *Tretia zalizna dyvizia* (The Third Iron Division, 2 vols, 1971, 1982).

P. Sodol

Udy River (also Uda). A right-bank tributary of the Donets River that flows for 164 km through Belgorod oblast (RF) and Kharkiv oblast and drains a basin area of 3,893 sq km. Its source is in the Central Russian Upland, and it is fed by rain and meltwater. The river is used for irrigation and for water supply. The city of Kharkiv is situated at the point where the Lopan River empties into the Udy.

UHA. See Ukrainian Galician Army.

Uhlytsky, Pavlo. See Pecheniha-Uhlytsky, Pavlo.

Uhlytsky, Teodosii [Uhlyc'kyj, Teodosij], b in the 1630s in Ulaniv, Podilia, d 5 February 1696 in Chernihiv. Orthodox churchman and saint. He studied at the Kievan Mohyla Academy and then entered the Kievan Cave Monastery. After serving as a deacon at St Sophia Cathedral he resided at the monastery near Baturyn and then became hegumen of the Korsun St Onuphrius's (1662–4) and the Kiev Vydubychi (1664–88) monasteries. In 1688 he became archimandrite of the Yelets'kyi Dormition Monastery in Chernihiv and assistant to Archbishop L. Baranovych. At the Chernihiv sobor of 1692 he was elected auxiliary bishop to Baranovych. He then traveled to Moscow to be consecrated by Patriarch Adrian. His consecration by Adrian helped to undermine the eparchy's relationship to the metropolitan of Kiev and increase the

authority of the Moscow patriarch. Uhlytsky maintained good relations with Hetman I. Mazepa, however, who assisted in building new churches and monasteries. Uhlytsky also supported the *Chernihiv printing press. After his death his remains were associated with a number of miracles and healings, and he was canonized in 1896 (his feast day is 22 September [9 September OS]).

Uhniv. III-4. A town (1989 pop 1,400) on the Solokiiia River in Sokal raion, Lviv oblast. It was first mentioned in historical documents in 1360. In 1528 it was granted the rights of *Magdeburg law. After the partition of Poland in 1772, it was annexed by Austria. In the interwar period it belonged to Poland. Today it is an agricultural town with a feed factory. A 17th-century Roman Catholic church, the Dormition Church, has been preserved there.

Uhniv Brigade of the Ukrainian Galician Army (Uhnivska [9] brygada UHA or Belzka [9] brygada UHA). Formed in April 1919 out of the Uhniv and Belz front units of the Northern Group, the brigade belonged to the First Corps of the UHA and was active in the Rava Ruska region. During the joint UHA and UNR Army offensive on Kiev in August 1919, the brigade fought at Zhmerynka, Kalynivka, and Berdychiv. Subsequently it fought against A. Denikin's army and was incorporated as an infantry regiment into the Second Brigade of the Red Ukrainian Galician Army. It ceased to exist following its surrender to the Polish army on 27 April 1920.

Uholka Nature Reserve (Uhol'skyi zapovidnyk). Established in 1964 by a decree of the Council of Ministers of the Ukrainian SSR to preserve the primeval beech forests of the Uholka Depression, the reserve covers 4,724 ha on the southern slope of Mount Menchul in the Polonynian Beskyd. In 1968 it became part of the *Carpathian Nature Reserve. Because of its unique plant species and disappearing English yew, the reserve has attracted much scientific attention.

Rev Mykola Uhorchak

Mykola Uhryn-Bezhrishny

Uhorchak, Mykola [Uhorčak] (pseud: Mykola Pohidny, Mykola Skrypa Hedeon), b 22 December 1901 in Ty-smenytsia, Tovmach county, Galicia, d 9 January 1982 in the United States. Catholic and Orthodox priest and children's writer. He studied at the Lviv (Underground)

Ukrainian University (1921-4) and the Greek Catholic Theological Seminary in Stanyslaviv (1924-8) and served as a Ukrainian Catholic priest and catechist in Kolomyia county from 1928. A postwar refugee, in 1948 he settled in the United States and converted to Ukrainian Orthodoxy. From 1931 he contributed over 60 stories, articles, and sermons to periodicals, such as *Pravda* (Lviv), *Promin'* (Winnipeg), *Tserkva i zhyttia* (Neu-Ulm and Chicago), *Veselka* (Jersey City), *Ukrains'kyi holos* (Winnipeg), and *Ukrains'ke pravoslavne slovo* (South Bound Brook). He published 10 books of children's stories, including *Pokotyhoroshok* (1946), *Het'mans'ka bulava* (The Hetman's Mace), *Sribna hryvna* (The Silver Hryvnia, 1951), and *Illia Muromets'* (1967), and a book of sermons (1959).

Uhryn-Bezhrishny, Mykola [Uhryn-Bezhrishny] (real name: Vengzhyn), b 18 December 1883 in Kupiatychi, Peremyshl county, Galicia, d 19 January 1960 in Neu-Ulm, Germany. Pedagogue, publicist, and journalist. In 1911, after studying at Lviv and Chernivtsi universities, he obtained a position at a gymnasium in Rohatyn. The experience he had gained in editing newspapers, such as *Bdzhola* (1908-9) and *Buduchnist'* (1909), and in writing prose and poetry afforded him the opportunity to work with the Ukrainian Sich Riflemen press corps and its publications. After returning to Rohatyn he resumed his teaching duties (until the 1940s), edited the local *Rohatynets'*, published *Narys istorii Ukrains'kykh sichovykh stril'tsiv* (An Outline History of the Ukrainian Sich Riflemen, 1923), and wrote plays, such as *Sofiia Halechko* (1924) and *Lytsari zaliznoi ostrohy* (Knights of the Iron Spur, 1938).

Uhryn-Huzar, Kalyna (Uhryn-Houzar, Kaléna), b 4 March 1939 in Paris. Translator and civic leader of Ukrainian origin. She was a founding member of the Organization of Ukrainian Youth in France (1956) and editor of *Bulletin franco-ukrainien* (1959-68) and *Echanges* (1971-81). She has translated many Ukrainian works into French, most notably M. Osadchy's *Cataracte* (1974), I. Dziuba's *Internationalisme ou russification?* (1980), and selections from O. Berdnyk entitled *La Confrérie étoilée* (1985). She is also the author of *La notion de 'Russie' dans la cartographie occidentale* (1975) and coauthored the monograph *Tarass Chevtchenko, sa vie et son oeuvre* (1964).

UHVR. See Ukrainian Supreme Liberation Council.

Uiomov, Avenir [Ujomov], b 4 April 1928 in Poreche, Ivanovo oblast, RSFSR. Philosopher. A graduate of Moscow University (1949), he completed postgraduate studies there under V. Asmus (1952) and taught philosophy at the Ivanovo Pedagogical Institute. Since 1964 he has chaired the philosophy department at Odessa University, and since 1973 he has headed the Department of Control Theory and Systems Analysis at the Odessa branch of the AN URSS (now ANU) Institute of Economics. The president of the Odessa branch of the Ukrainian Philosophical Society and one of the first Soviet advocates of *cybernetics as a distinct science, he has written over 300 works (10 of them monographs) on logic, the philosophy of science, cybernetics, and systems theory. His chief monographs are written in Russian and deal with logical errors (1958), things, properties, and relations (1963), the logical foundations of the modeling method (1971), logic and empirical

knowledge (1972), and the systems approach and the general theory of systems (1978).

Ukapisty. See Ukrainian Communist party.

Ukase. In the Russian Empire the term was used for a wide variety of decrees, usually signed by the tsar or his plenipotentiaries. In the USSR the ukase was a decree passed by the Presidium of the Supreme Soviet of the USSR or of a Union republic. Two types of ukase were distinguished: (1) normative, that is, decrees that introduced legal norms, and (2) individual, that is, decrees that appointed people to government positions or bestowed awards and prizes. Normative ukases acquired the force of law after they were published and ratified by the appropriate supreme soviets. Individual ukases, however, did not have to be ratified by any soviet, and acquired the force of law during the period of time specified therein. The ukases of the Presidium of the Supreme Soviet of the USSR were automatically binding on all the republics. The ukases of the Ukrainian SSR were published in *Vidomosti Verkhovnoi Rady URSR*.

Ukhiv, Ivan [Uxiv], b 24 June 1897 in Bronnytsia, Mohyliv county, Podilia gubernia, d 24 February 1974 in the United States. Military officer and civic leader. During the First World War he advanced to the rank of staff captain in the Russian army. In 1917 he commanded a unit of Free Cossacks stationed in Mohyliv, and later he served under P. Shandruk in the UNR Army. He was wounded in combat at Vapniarka and was promoted to colonel. In 1923 he emigrated to Argentina. In Berisso he was a founder of Argentina's first Prosvita society (1923), and he helped organize an Orthodox parish in Buenos Aires.

Ukhodnyky. Persons of various classes – peasants, burghers, boyars, and even magnates – who traveled in the Ukrainian steppes in the 14th to 16th centuries in search of adventure and risk and to hunt, fish, and collect honey. The *ukhodnyky* ('frontiersmen') came from the steppe borderlands around Cherkasy, Kaniv, Kiev, and Bratslav in the spring, trekked to the southern reaches of the Dnieper River, and returned to their original settlements in the winter. Sometimes they paid tithes for their booty to local voivodes. Life in the steppes was dangerous, particularly because of the risk of clashes with the Tatars. The *ukhodnyky* joined to form bands of warriors (*vatahy*), which became highly organized and increasingly more powerful, to the point where they were able to wrest back the slaves and livestock taken by the Tatars. Over time they began to remain in the steppes, chiefly in the lower Dnieper regions, and were transformed into a distinct class of the Ukrainian population known as *kozaky* (see *Cossacks). Their life was described by A. Chai-kovsky in *Na ukhodakh* (On the Frontier, 1921).

Ukoopspilka (full name: Ukrainska spilka spozhyvchykh tovarystv [Ukrainian Association of Consumer Societies]). The central co-ordinating body for Ukrainian consumer co-operatives, founded in June 1920. In 1971 it represented 25 oblast co-operative associations, 469 raion-level associations, over 3,300 local consumer societies, and almost 17 million shareholders. It organizes the distribution of manufactured goods through the local societies to

consumers, primarily in the countryside, maintains village bakeries and other small food-processing facilities, and purchases agricultural products for sale in cities. In 1977 Ukoopspilka was responsible for 31 percent of all retail trade and 25 percent of all food sales in Ukraine. Until 1991 Ukoopspilka was under the authority of Tsentrosoiuz, the Central Union of Co-operative Societies in Moscow.

Ukraina (Ukraine). A journal of Ukrainian studies, published in Kiev in 1907 (four issues). It was the continuation of *Kievskaiia starina* and the first Ukrainian-language scholarly journal in Russian-ruled Ukraine. *Ukraina* contained articles on history, literature, and culture, belles lettres, and surveys of Ukrainian literary and theatrical affairs and press. Among the contributors were I. Franko, I. Nechui-Levytsky, I. Steshenko, and V. Domanytsky. The editor and publisher was V. *Naumenko.

Ukraina (Ukraine). A weekly newspaper published in Chernivtsi from April 1913 to early 1914. Edited by Z. Kuzelia, it supported S. Smal-Stotsky in his personal competition with M. Vasylo for the leadership of the Ukrainian movement in Bukovyna.

Ukraina (Ukraine). An academic journal of Ukrainian studies that was published in Kiev from 1914 to 1930 (except in 1915–16 and 1919–23). The editor was M. *Hrushevsky. From 1914 *Ukraina* was the official publication of the Ukrainian Scientific Society in Kiev, and from 1924 it was the official publication of the historical section of the VUAN. Altogether 43 issues were published (10 in 1914–18 and 33 in 1924–30). Until 1924 the journal was a quarterly publication, and after that it appeared bimonthly, with a pressrun of 1,700–3,000.

The journal's core section consisted of columns on history, archeology, economics, folklore, ethnography, language, literature, art, and regional studies of Ukraine. Hrushevsky was chief editor of that section and also wrote editorials on prominent cultural personalities and important events in the history of Ukraine. The journal also contained annotated primary sources and documents (memoirs, correspondence, previously unpublished literary works) concerning civic and cultural life in the 19th and early 20th centuries; documents pertaining to the history of Ukraine; criticism and bibliographies of important Ukrainian-studies publications, especially foreign-language publications in the field (Hrushevsky was editor of that section also); a chronicle of scholarly events; notices of the activities of the historical-philological division of the VUAN and its historical section; obituaries of persons in the field of Ukrainian studies; and, from 1927, a bibliographical overview (edited by Y. Hermaize).

Certain issues of *Ukraina* were devoted to eminent cultural figures (T. Shevchenko, M. Kostomarov, P. Kulish, M. Maksymovych, I. Franko, O. Lazarevsky, M. Draho-manov, V. Antonovych, P. Tutkovsky), important events in the history of Ukraine (the Koliivshchyna rebellion, the Cyril and Methodius Brotherhood, the Revolution of 1905, the centenary of the Decembrist movement, the 10th anniversary of Ukraine's struggle for independence), and regional topics (Bukovyna, Galician-central Ukrainian relations, etc).

Hrushevsky edited *Ukraina* for 16 years (it was often re-

ferred to as Hrushevsky's *Ukraina*). Among its writers and editors were M. Vasylenko, M. Vozniak, O. Hrushevsky, V. Doroshenko, I. Kamanin, O. Levytsky, K. Mykhalchuk (managing editor in 1914), M. Mochulsky, Ye. Onatsky, V. Peretts, and the non-Ukrainians G. Ilinsky, F. Korsh, and A. Shakhmatov. Among those who contributed to the journal from 1924 to 1930 were D. Bahalii, Vasylenko, Vozniak, Hermaize, O. Hrushevsky, H. Zhytetsky, S. Yefremov, A. Krymsky, P. Klepatsky, K. Koperzhynsky, I. Krypiakovykh, P. Klymenko, M. Makarenko, V. Miiakovsky, Mochulsky, V. Novytsky, O. Novytsky, M. Petrovsky, Peretts, V. Romanovsky, O. Riabinin-Skliarevsky, F. Savchenko (who also served as editorial board secretary), O. Syniavsky, K. Studynsky, M. Tkachenko, P. Tutkovsky, S. Shamrai, S. Smal-Stotsky, V. Shcherbyna, V. Yurkevych, and B. Yakubsky.

Ukraina was published under onerous censorship conditions, but it overcame the difficulties to present an objective picture of Ukraine's past. Along with *Kievskaiia starina* and *Literaturno-naukovyi vistnyk*, *Ukraina* was one of the most authoritative journals in the field of Ukrainian studies, and it has remained a good source for research, especially in the area of the national-cultural processes in the 19th and early 20th centuries. Toward the end of 1930 *Ukraina* was forced to discontinue publication. The last issue (no. 44) was printed but not released. In its place the Party leadership of the VUAN began to issue a periodical titled *Ukraina*, with the subheading *Zhurnal tsyklu nauk istorychnykh* (Journal of the Cycle of Historical Sciences). Edited by P. Shuran, that journal was of a totally different ideological nature. Its aim was to oppose national Ukrainian historiography, particularly the 'school of Hrushevsky.' In 1932 there were two issues of the new, replacement *Ukraina* (no. 1–2 and no. 3); they contained essays sharply critical of M. Hrushevsky and Vasylenko (also essays by P. Kyianytsia and L. Okinshevych). Then the journal ceased publication.

A. Zhukovskiy

Ukraina (Ukraine). A daily official bulletin of the UNR Army, published at its headquarters during 1919–20.

Ukraina (Ukraine). A popular illustrated magazine published in Kiev since May 1941, as a monthly to July 1955, then semimonthly, weekly from July 1963, semimonthly in 1991, monthly in 1992, and again weekly. During the Second World War it appeared in Moscow under the editorship of Yu. Smolych. It contains articles on culture, history, politics, economics, social issues, and sports, as well as art reproductions, prose, poetry, travelogues, translations, games, humor, and special features for children. Although many of the articles had propagandistic quality and stressed the achievements of Soviet culture, science, and scholarship, in the last years of Soviet rule the magazine began to examine objectively some of the negative aspects of Soviet life; it has published articles on the 'blank spots' in Ukrainian history and on cultural and historical figures repressed by or formerly out of favor with the regime, as well as literary works that were formerly banned

Ukraina

or censored. In 1976 it was printed in a pressrun of 332,000; this figure had fallen to 230,000 by early 1980, 125,000 by 1988, and 116,000 by 1989. The current editor in chief is A. Mykhailenko.

Ukraina (Ukraine). An irregular journal of Ukrainian studies, published in Paris in 1949–53 (a total of 10 issues). It succeeded *Soborna Ukraina*, four issues of which appeared in 1947. Edited by E. *Borschak and published with the financial support of Bishop I. Buchko, the journal devoted particular attention to historical topics, including the history of Ukrainian-French relations. It featured biographies of prominent Ukrainian political and cultural figures, materials on Hetman P. Orlyk, documents relating to Ukrainian history (particularly from French archives), bibliographies, book reviews, and memoirs by E. Batchinsky, B. Krupnytsky, D. Olianchyn, N. Polonska-Vasylenko, Yu. Tyshchenko, and others.

Ukraina i svit

Ukraina i svit (Ukraine and the World). An irregular journal of cultural, literary, scholarly, and political affairs, published by I. Sapiha in Hannover, West Germany, in 1949–69 (a total of 28 issues). The journal devoted particular attention to Ukraine's cultural relationship with other nations. It published works on the archeology of the Black Sea region and on the history of Georgia, original literary contributions by contemporary émigré authors, and Ukrainian translations of European classics. V. Derzhavyn, I. Kostetsky, E. Kottmeier, M. Orest, and V. Barka were regular contributors.

Ukraina Society (aka Association for Cultural Relations with Ukrainians Abroad; Ukrainian: *Tovarystvo Ukraina*,

or *Tovarystvo kulturnykh zviyazkiv z ukrainsiamy za koronom*). An organization formed in 1960 in Kiev out of the Ukrainian division of the USSR Return to the Homeland Committee. The Ukraina Society has institutional affiliates, such as artists' unions and business enterprises, as well as individual members, including prominent Ukrainian writers and artists. To strengthen cultural ties with Ukrainians abroad and to acquaint them with cultural developments in Ukraine the society organizes performances by Ukrainian ensembles from abroad in Ukraine and of Soviet Ukrainian groups abroad, hosts foreign students, and publishes two newspapers aimed at readers abroad, *News from Ukraine* and *Visti z Ukrainy*. Until Ukraine's independence the Ukraina Society was under the central, Moscow-based Rodina Association, which was responsible for furthering cultural ties with foreign compatriots of all of the peoples of the Soviet Union. Traditionally the Ukraina Society spread pro-Soviet propaganda and emphasized contacts with so-called progressive Ukrainian groups abroad. Under the influence of M. Gorbachev's reforms this emphasis was played down. The reforms also affected the society's publications, which have begun to cover a wider range of events both in Ukraine and in Ukrainian communities abroad. The presidents of the society have been L. Revutsky, Yu. Smolych, O. Pidsukha (from 1975), and V. Brovchenko (since 1979).

Ukrainbank. Ukrainian second-level credit co-operatives in interwar Galicia. Set up in county centers, they served as savings and loan associations for urban residents and community organizations and provided support for the Raiffeisen credit co-operatives in the countryside. The central co-ordinating body for these county credit associations was *Tsentrobank. By the end of the 1930s there were 115 Ukrainbank associations, in almost every major town in Galicia. Most of them were small; only 25 had an operating capital of 100,000 zlotys. In 1937 their total deposits came to just over 4.6 million zlotys. The typical loan was 300 to 500 zlotys. A major obstacle to their growth was their exclusion from Polish state banks' credit. Ukrainbank offices were closed down by the Soviet authorities in 1939. Seventy-one of them were reopened under the German occupation (1941-4).

Ukrainbank (full name: *Ukrainskyi narodnyi kooperativnyi bank*, or Ukrainian National Co-operative Bank). The central financial co-ordinating body for Ukrainian credit and agricultural co-operatives. It was founded in 1917 in Kiev with an initial capitalization of one million rubles. At the time its shares were valued at 250 rubles and were sold only to co-operatives. In July 1918 more shares were issued, to raise the capital fund to two million rubles. By the end of 1919 the capital reserve had reached 25 million rubles. The first director was F. Kryzhanivsky, and the first chairman of the board was Kh. Baranovsky. Ukrainbank was to regulate the finances for all Ukrainian co-operatives, attract capital for co-operatives from the money market and foreign sources, provide financing for manufacturing and marketing co-operatives, and arrange state loans for co-operatives. It had branches (16 in 1919) in most larger cities in Ukraine. In 1919 it had a total turnover of 286 million rubles. From its earnings it supported Ukrainian cultural and educational institutions, including Kiev University and the Ukrainfilm film studio.

The central building of Ukrainbank in Kharkiv

The Soviet authorities dissolved Ukrainbank in December 1920 and closed down all credit co-operatives during the period of War Communism. The bank was revived in 1922 but was placed under much stricter central control. By 1926 it had organized a system of 50 regional branches and affiliates, which served almost 5,800 credit co-operatives, and by 1929 it had reserves of over 130 million rubles. Its operations were restricted gradually until they consisted mostly of financing import and export trade. Ukrainbank was placed under the authority of the all-Union Commissariat of Finances and the central bank in Moscow, and in 1936 it was closed down.

Ukraine (Ukraina). The name of the territory settled by the Ukrainian nation. It originated from the Slavic word *ukraina* (from the Indo-European root (s)krei-, 'to separate' or 'cut'). In the literary and historical documents of the 12th to 15th centuries Ukraine meant borderland or bordering country as well as country (modern Ukrainian: *krai*). The Kiev Chronicle, recounting the death of Prince Volodymyr Hlibovych of Pereiaslav during his campaign against the Cumans in 1187, noted that 'for him Ukraine mourned greatly.' It also stated that Prince Rostyslav Berladnyk arrived in 'Galician Ukraine,' referring to the Dniester Lowland. The Galician-Volhynian Chronicle said that in 1213 Prince Danylo 'reunited Brest and Uhrovesk ... and all of Ukraine,' referring to the territory west of the Buh River (Kholm and Podlachia regions). It also contained the phrase 'in Ukraine' *na Vkrainie* (1280), *na Vkrainitsi* (1282). In all those examples Ukraine meant either borderland with respect to the center of the Kiev principality or the Principality of Galicia-Volhynia, or simply land or country.

Ukraine continued to mean 'land' well into the 15th and 16th centuries and even later. Documents referred to Podilian Ukraine, Bratslav Ukraine, and Kiev Ukraine. The records of the Polish Diet in 1585 referred to Podilia as Podilian Ukraina. With the rise of the Cossack Host in the 16th century, Ukraine came to mean the Cossack territory stretching along both sides of the Dnieper River and corresponding to Kiev voivodeship of the Polish Common-

wealth. The term *Ukraina* was used in that sense in the writings of the Roman Catholic bishop of Kiev, J. Wereszczynski (end of the 16th century), the diaries of S. Bielski (1609) and S. Okolski (1638), and the letters of Hetman P. Sahaidachny and Bishop I. Kopynsky. In his letter to King Sigismund III Vasa (15 February 1622) Hetman Sahaidachny wrote of 'Ukraine, our rightful eternal homeland,' 'Ukrainian cities,' and 'Ukrainian people.' I. Kopynsky, in his letter to the patriarch of Moscow (4 December 1622), complained that 'all here, in Ukraine, in Kiev [voivodeship], are being hampered.' The concept of Ukraine was extended at that time beyond Kiev voivodeship to Left-Bank Ukraine, which was rapidly colonized by Ukrainians during the first half of the 17th century, and even to the territory of the Muscovite state (Slobidska Ukraine), which attracted Cossack settlers.

The name Ukraine acquired a specific political meaning as a result of Hetman B. Khmelnytsky's successful uprising and the rise of a Cossack state in central Ukraine. Although the official name of the new Hetman state of the 17th to 18th century was the Zaporozhian Host (in several variants), its territory was usually known in Ukrainian and Polish sources as Ukraine. The terms Ukraine, Ukrainian, and Ukrainian people were used more and more frequently in political and cultural contexts. They appear again and again in the proclamations and documents of Hetmans B. Khmelnytsky, I. Vyhovsky, P. Doroshenko, I. Samoilovych, I. Mazepa, and P. Orlyk. Doroshenko's staff secretary in a letter to the Zaporizhia (1671) wrote about 'the entire Ukraine,' 'our Ukrainian people,' and 'Ukrainian cities.' In a letter to V. Kochubei, L. Polubotok wrote (1685) of our 'fatherland Ukraine.' The anti-hetman P. Petryk declared that he concluded a treaty with the Crimean Khanate (1692) to 'free my dear homeland, Ukraine, from Muscovite rule.' In his proclamations and letters he used the phrase 'our Ukraine.' The name appears regularly in Orlyk's proclamations and letters. Both the Latin and the Ukrainian texts of the Constitution of Bendery (1710) use 'Ukraine,' 'into Ukraine,' and 'Kiev and other Ukrainian cities.' In a treaty with Crimea (1711) Orlyk styled himself 'duke of Ukraine' (*dux Ucrainae*). He and his fellow émigrés popularized the name Ukraine, which had been introduced by G. le Vasseur de *Beauplan in 1650 in Western Europe. In the 18th century the name appeared in various spellings on French, Italian, English, German, and other maps.

The partition of Ukraine between Muscovy and Poland in 1667 interrupted the evolution of the concept of Ukraine into an all-embracing national concept. To reflect the political division, adjectives such as 'this side' (*s'ohobichna*) and 'that side' (*tohobichna*) were introduced. Left-Bank Ukraine or the Hetmanate, a protectorate of Muscovy, was transformed in the 18th century into a province of the Russian Empire and became officially known in Russian as Malorossiiia (Little Russia) and in Ukrainian as Malorosii's'ka Ukraïna. Ukraine began to be used as the name of a small geographic region. In the Samovydet's Chronicle a locust infestation was reported to have occurred in 1690 'in Ukraine and near Starodub in Siveria.' In the second half of the 18th century, writers from Starodub used the name to refer to the central part of the Hetmanate, from Chernihiv and Nizhen to Pryluka, Lokhvytsia, and Hadiache.

Only in the 19th century, when the larger part of the

Ukrainian territories was unified within the Russian Empire, did the name Ukraine begin to mean the Ukrainian national territory. T. *Shevchenko associated the name Ukraine with the Cossack past and the idea of national independence, the name Malorossiiia with national humiliation and colonial status. From the beginning of the second half of the 19th century Ukraine began to be used by Ukrainians for the entire territory of the Ukrainian nation, and gradually it displaced all other names, particularly Malorossiiia. After the declarations of autonomy (20 November 1917) and independence (22 January 1918) of the Ukrainian National Republic, the Ukrainian State (29 April 1918), and the Western Ukrainian National Republic (1 November 1918) and the unification of all Ukrainian lands in the new UNR (22 [but dated 25] January 1919), Ukraine became established as the official name of the state, and Ukrainian as the official name of its people. The official adoption of the name Carpatho-Ukraine (15 March 1939) put to rest any doubts as to the national identity of that part of the Ukrainian territory (see *Transcarpathia). Under the Soviet occupation Ukraine was named the Ukrainian Socialist Soviet Republic (6 January 1919) and then (31 January 1937) the Ukrainian Soviet Socialist Republic (USSR). In the declaration of independence of 24 August 1991 the new state adopted Ukraine as its official name.

I. Stebelsky

Ukraine. An English-language illustrated magazine published quarterly from 1970 to 1980 and since then monthly in Kiev. Until 1989 it was a supplement to the magazine **Ukraïna*; since 1990 it has been published by the *Ukraina Society and the *Ukrainian Society for Friendship and Cultural Relations with Foreign Countries. *Ukraine* contains articles translated from *Ukraïna* as well as original pieces on political, historical, cultural, and social topics; art reproductions; and translations of Ukrainian literary works. Until recently it was a Soviet propaganda tool and was distributed widely, often free of charge, in the West and the Third World. It has persistently used an English transliteration based on the Russian spelling for Ukrainian names. The chief editors have been A. Bilenko, A. Mykhailenko, and V. Mokhurenko.

L'Ukraine. A monthly French-language journal published in Lausanne, Switzerland, from June 1915 to 1920. It informed the Western public about Ukrainian affairs and garnered support for the Ukrainian national movement and Ukrainian independence. *L'Ukraine* was edited

by V. Stepankivsky with the assistance of M. Tyshkevych, who supported it financially.

Die Ukraine

Ukraine, Die. An organ of the *German-Ukrainian Society in Berlin, published in 1918–26 (a total of 40 issues). It contained articles on Ukrainian studies, the political situation in Soviet Ukraine, and German-Ukrainian relations. *Die Ukraine* was edited by A. Schmidt, and among its many German contributors were P. Rohrbach, E. Nolde, and B. Hann.

Ukraine in Vergangenheit und Gegenwart. A quarterly organ of the *German-Ukrainian Society, published in Munich in 1952–7 and 1962–8 (a total of 44 issues). Edited by H. Prokopchuk, the journal informed the West German public about Ukrainian politics, culture, scholarship, and émigré life; devoted considerable attention to German-Ukrainian relations; and contained a regular chronicle of Ukrainian affairs. It featured biographies of prominent Ukrainians and Germans, literary and art criticism (with many illustrations), and articles on the history of Ukraine.

L'Ukraine libre. A French-language monthly journal of politics and culture, published in Paris in 1954–5 by the Hromada Franco-Ukrainian publishing house. It was edited by I. Siletsky.

Ukraine-Philatelisten Verband. A society founded in 1920 by German philatelists in Berlin. Its original goal was the documentation of all the trident overprinted imperial Russian *postage stamps issued by a decree of the Ukrainian government of 20 August 1918. Many of its founding members had been in Ukraine at the time of Ukrainian independence and had brought such stamps with them upon returning to Germany. After 1934 the society also devoted itself to the promotion of Ukrainian philately and to the authentication of overprints and cancels. Under its longtime (35 years) head R. *Seichter, the society published the catalog *Sonder-Katalog Ukraine* and the philatelic journal *Der Ukraine-Philatelist*.

Ukrainets (The Ukrainian). A Russian and Ukrainian miscellany edited by M. *Maksymovych, two volumes of which appeared in Moscow in 1859 and 1864. The first volume contained an article on how to read Ukrainian and Maksymovych's Ukrainian translations of the Psalms and

excerpts from *Slovo o polku Ihorevi* (The Tale of Ihor's Campaign), his recollections of the Poltava region, and his correspondence with M. Pogodin concerning B. Khmelnytsky. The second volume included Maksymovych's articles on the history of the Kiev region, Volhynia, and the Ostrozky family, an unsigned article on the Mezhyhiria Transfiguration Monastery, and several transcriptions of Ukrainian folk songs.

Ukrainets' (The Ukrainian). A weekly newspaper for Ukrainian **Ostarbeiter* in Germany, published in Berlin in 1942–5 by the *German Labor Front and edited by A. Lutsiv, B. Kravtsiv, O. Florynsky, and A. Drahan. A special page for women was edited by N. Snizhna in 1944–5.

Ukrainets' na Zelenomu Klyni

Ukrainets' na Zelenomu Klyni (The Ukrainian in the Far East). The first Ukrainian newspaper in the Far East, published weekly in Vladivostok from May 1917 to 1918 (?). It had a great impact on the development of Ukrainian political activity and national consciousness in the Far East. The publisher and editor was D. Borovyk. The paper published news and articles on political developments in the Far East, elsewhere in the former Russian Empire, and in Ukraine after the February Revolution of 1917. It printed the four universals of the Central Rada.

Ukrainets' u Frantsii (The Ukrainian in France). A nationalist newspaper published in Paris in 1945–9. Published by I. Popovych, it appeared monthly in 1945, semimonthly in 1946, and weekly from 1947 as the organ of the *Union of Ukrainian Workers in France. It was later called *Ukrainets'*, and in 1949 it merged with the newspaper *Chas* to form **Ukrainets'-Chas*.

Ukrainets' v Avstralii (The Ukrainian in Australia). A newspaper established in Melbourne in 1956 by K. Himmelreich and others. It was printed by B. Ihnativ, who later also became the newspaper's editor. Initially a four-page publication, it gradually expanded to six pages appearing fortnightly from October 1957. At the beginning of 1965 its format grew to eight pages. In addition to the news and views of the UNR government-in-exile, *Ukrainets' v Avstralii* covered Ukrainian religious and community life in Australia. Following years of financial difficulties and a transformation into a monthly magazine in the early 1980s, it ceased publication in January 1985.

Ukrainets'-Chas (The Ukrainian-Time). A newspaper published in Paris from 1949 to 1960. It was created through the merger of *Ukrainets'* (formerly **Ukrainets' u*

Frantsii) in Paris with **Chas*, a newspaper published in Fürth, Bavaria. *Ukrainets'-Chas* was edited by D. Shtykalo, D. Chaikovskiy (1952–6), and B. Vitoshynsky (1956–60). It supported the OUN (Bandera faction).

Ukrainian Academic Committee (Ukrainskyi akademichnyi komitet, or UAK). An organization created in Prague in late 1924 on the initiative of O. *Shulhyn. Until June 1926 it was an autonomous body of the *Ukrainian Historical-Philological Society. Its purpose was to unite all Ukrainian scholars outside the USSR and to represent Ukrainian scholarship in the West. It was presided over by the rector of the *Ukrainian Free University of Prague. Its members were 17 Ukrainian émigré postsecondary institutions and learned societies in Czechoslovakia, the Shevchenko Scientific Society in Lviv, the Ukrainian scientific institutes in Warsaw and Berlin, and several individuals (I. Horbachevsky, O. Kolessa, O. Lototsky, M. Slavinsky, S. Smal-Stotsky, O. Shulhyn, A. Yakovliv). The UAK was recognized by the Commission for Intellectual Co-operation at the League of Nations in Geneva and was a member body of the league's International Institute of Intellectual Co-operation in Paris until the USSR joined the League of Nations in 1934. The UAK spoke out against the Polish pacification of Galicia (1930) and the Stalinist terror in Soviet Ukraine; participated in international congresses and conferences; organized two Ukrainian scholarly congresses (1926 and 1932) in Prague (over 130 émigré and Western Ukrainian scholars took part in the Second Congress); and published an informational bulletin in French edited by B. Martos (4 issues, 1929–31), as well as Ye. Chykalenko's memoirs of 1917 (1932), D. Doroshenko's book about Chykalenko (1934), and a detailed report of the Second Congress (1934). The committee arranged for the transfer of part of the archives of the Union for the Liberation of Ukraine to the Museum of Ukraine's Struggle for Independence in Prague, financially supported the Central Union of Ukrainian Students and several scholars, and created a commission to prepare an English-language encyclopedia of Ukraine. The UAK was forced to suspend its activity in 1940, during the German occupation of Prague.

Ukrainian Academic Gymnasium. See Academic Gymnasium of Lviv.

Ukrainian Academic Hromada (Ukrainska akademichna hromada v Chekhoslovachchyni). The oldest and largest Ukrainian students' organization operating in the interwar Czechoslovak Republic (CR). It was founded in November 1919 as the Ukrainian Academic Circle in Prague, and changed its name to the Ukrainian Academic Hromada in May 1920. Immediately after the First World War all Ukrainian students at Czechoslovakian and Ukrainian schools of higher education in the CR enrolled in the Hromada, with the result that in 1922 there were 1,258 members. By 1923, however, organizations based on regional affiliations, such as the Hromada of Students from Great Ukraine and the Union of Student-Emigrés from Northwestern Ukraine, or on political orientation had broken away and left it with only 321 members. Membership continued to decline steadily and in 1937 it could claim only 40 members. During the Second World War membership increased, and in 1943 there were 164 mem-

bers. The Hromada had branches outside of Prague, in Josefov, Brno, Mělník, and Příbram. It had separate professional sections and cultural groups. By the late 1920s the Hromada had developed a nationalist orientation, the promoter of which was the *Group of Ukrainian Nationalist Youth. The Hromada formed the basis for the *Central Union of Ukrainian Students, all the presidents of which were members of the Hromada. In 1941 the Hromada was reorganized as a branch of the Nationalist Organization of Ukrainian Students in Germany, which lasted until the arrival of the Soviet army in 1945. The Hromada published the periodical *Ukrains'kyi student* (1922–4) and the literary almanac *Sterni*. The leading activists in the Hromada were I. Kharak, M. Stakhiv, O. Boidunyk, R. Sushko, B. Oreletsky, O. Boikiv, M. Masiukevych, M. Mukhyn, O. Kandyba, M. Soroka, M. Ryndyk, M. Antonovych, and V. Kunda. Antonovych wrote a history of the Academic Hromada in 1941.

O. Skrypnyk

Ukrainian Academic Press. A division of Libraries Unlimited, an American publishing house in Littleton, Colorado, owned by B. *Wynar. Since 1972 the press has issued translations of Ukrainian works: V. Pidmohylny's *Little Touch of Drama* (1972), P. Kulish's *Black Council* (1973), *Modern Ukrainian Short Stories* (ed G.S.N. Luckyj, 1973), D. Čyževs'kyj's *History of Ukrainian Literature* (1975), Ye. Sverstiuk's *Clandestine Essays* (with the Harvard Ukrainian Research Institute, 1976), and M. Kotsiubynsky's *Shadows of Forgotten Ancestors* (1981). It has also published works in English, such as D.H. Struk's *Study of Vasyli' Stefanyk: The Pain at the Heart of Existence* (1973), the second edition of J. Armstrong's *Ukrainian Nationalism* (1980), and Wynar's *Ukraine: A Bibliographic Guide to English-Language Publications* (1990).

Ukrainian Academic Society in Paris (Ukrainske akademichne tovarystvo v Paryzhi). An organization founded in 1946 on the initiative of Ukrainian students in Paris. Originally a student aid society, it sponsored many public lectures, assemblies, and conferences on scholarly, cultural, and political topics, as well as concerts and commemorative and literary events, for Ukrainians living in and around Paris. The society was headed by Yu. *Rusov (1946), O. *Shulhyn (1946–60), O. *Kulchytsky (1960), and A. *Vyrsta (from 1960). A Literary and Artistic Club was part of the society from 1955; it was headed by M. Kalytovska (1956–66) and K. Mytrovych (from 1966). The society published an account of the first 12 years of its activity in 1958, and A. Zhukovsky wrote a history of the society in 1969.

Ukrainian Academy of Agricultural Sciences (Ukrainska akademiia silskohospodarskykh nauk, or UASHN). An institution of higher learning specializing in agriculture, established in Kiev in 1956. It was the third agricultural center of a national stature, succeeding the *Agricultural Scientific Committee of Ukraine (1918–28) and the *All-Ukrainian Academy of Agricultural Sciences (1926 to mid-1930s), neither of which was mentioned in Soviet sources. The UASHN directed and co-ordinated agricultural research in various teaching and research institutes and on experimental farms. It was divided into departments for crop growing, farm mechanization and

electrification, animal husbandry, forestry, hydrotechnology and melioration, and economics and farm management. It oversaw 21 research institutes with their experimental farms and stations, 25 oblast research stations, and a central research library. It also included a teaching division that became the *Ukrainian Agricultural Academy. The staff of the UASHN consisted of 22 full members and 22 corresponding members. It published the bimonthly *Dopovidi UASHN* (from 1958) and the monthly *Visnyk sil's'kohospodars'koi nauky* (from 1957) and had its own publishing house. In 1962 the system of agricultural research was reorganized; research institutes in Ukraine were placed directly under the Ministry of Agriculture of the Ukrainian SSR, and the UASHN was dissolved.

Ukrainian Academy of Arts. See Ukrainian State Academy of Arts.

Ukrainian Academy of Arts and Sciences. The official English name of the Ukrainian Free Academy of Sciences (Ukrainska vilna akademiia nauk, or UVAN). UVAN is an academy of Ukrainian émigré scholars, founded in November 1945 in Augsburg, Germany. At its founding meeting UVAN was defined as the Ukrainian academy-in-exile, inheriting the traditions of VUAN, whose important work began in the 1920s and was quashed by the Stalinist terror (see *Academy of Sciences of the Ukrainian SSR [now the Academy of Sciences of Ukraine]). The first president of UVAN was the historian D. *Doroshenko. Initially it was made up of 17 professional groups, representing 150 scholars and scientists. It organized joint conferences and annual conferences in Shevchenko studies with the help of the Society of Friends of UVAN, directed by V. Mudry. The first UVAN publications were an informational bulletin (1946–7), a chronicle (1947–8), a book on Kiev's historical maps by P. Kurinny and O. Povstenko (1947), and a book on Hetman D. Apostol and his age by B. Krupnytsky (1948). In April 1948 the first 24 UVAN full members were elected at a conference in Regensburg.

After most postwar Ukrainian DPs and refugees emigrated from Germany to the New World in 1947–8, the UVAN center in Augsburg lost its importance. In 1949 the presidium was transferred to Winnipeg, where Doroshenko had settled, and named in English the Ukrainian Free Academy of Sciences in Canada. Doroshenko was succeeded as president by L. *Biletsky (1951–4), J. *Rudnyckyj (1954–74), A. *Baran (1974–7, 1980–3), J. *Rozumnyj (1977–80), and M. *Marunchak (since 1983). In the 1980s UVAN acquired its current English name. It was divided into social sciences, humanities, and mathematics and natural sciences sections and had its own library, archives, and Ukrainian War Museum (Gen M. Sadovsky's collection) in Winnipeg. It has published booklet series, such as *Slavistica* (begun in Augsburg, 87 issues, 1948–86), *Onomastica* (50 issues, 1951–76), *Literatura* (11 issues, 1949–70), *Litopys* (29 issues by 1983), and *Ukrainski vcheni* (19 issues, 1949–80), on Ukrainian scholars; Rudnyckyj and D. Sokulsky's annual bibliography *Ukrainica Canadiana* (1953–72); T. Shevchenko's *Kobzar* (4 vols, 1952–4), edited and annotated by Biletsky; Rudnyckyj's materials on Ukrainian-Canadian folklore and dialectology (9 fascicles, 1956–63) and *Etymological Dictionary of the Ukrainian Language* (2 vols in fascicles, 1962–75); Marunchak's *The Ukrainian Canadians: A History* (1970; rev edn 1982), studies on

The building of the Ukrainian Academy of Arts and Sciences in Manhattan

the history of Ukrainians in Canada (5 vols, 1964–80), book on Ukrainians in the USSR outside Ukraine (1974), and biographic dictionary of Ukrainian Canadians (1986); and several other publications and collections of articles. In 1989 UVAN in Canada had over 60 full members.

UVAN members who settled in the United States established their own organization (in English, the Ukrainian Academy of Arts and Sciences in the US) and foundation in New York City in 1950. UVAN groups were also organized in Detroit (1955), Denver (1955), Washington (1956), and Philadelphia (1970s). In 1961 UVAN purchased its own building in Manhattan. Its presidents have been M. *Vetukhiv (1950–9), G.Y. *Shevelov (1959–61, 1979–84), O. *Arkhimovych (1961–70), O. *Ohloblyn (1970–9), Ya. *Bilinsky (1984–90), and M. Boretsky (1990–2), and Marko *Antonovych (since 1993). The UVAN in the US has consisted of historical, ancient history, literary-philological, ethnographic, pedagogical, philosophical, bibliographic, economics-law, biological-medical, musicological, and physics-chemistry-mathematics-technology sections; a fine arts group; the Commission for the Preservation, Study, and Publication of the Heritage of V. Vynnychenko (chaired by H. Kostiuk); the Shevchenko Institute; and the Archeological-Anthropological Institute. In 1986 it had 64 full members (many of them professors at American universities), 80 corresponding members, and 23 scholarly associates. Its library (over 50,000 vols) and museum-

archive (the most valuable archive outside Ukraine) have been directed by V. *Miiakovsky (who began them in Augsburg) and V. Omelchenko (since 1972).

The UVAN in the US has issued over 90 publications, including 16 volumes of its English-language **Annals* (from 1951) and several other collections of articles; 10 issues of the annual *Shevchenko* (1952–64); O. Powstenkos's study *The Cathedral of St Sophia in Kiev* (1954); editions of V. Pidmohylny's *Misto* (The City, 1954) and M. Kulish's plays and letters (1955); Ye. Chykalenko's memoirs (1955); D. Chyzhevsky's history of Ukrainian literature (1956); editions of S. Petliura's articles and letters and documents pertaining to him (2 vols, 1956, 1979); Vynnychenko's previously unpublished works (1960, 1971–2, 1988) and diary (2 vols, 1980, 1983); editions of literary studies by M. Plevako (1961) and P. Fylypovych (1981); collections of Ukrainian folk melodies compiled by Z. Lysko (6 vols, 1964–71); books on the artists M. Radysh (1966), V. Tsymbal (1972), and P. Andrusiv (1980); I. Sonevtsky's book on A. Vedel and his musical legacy (1966); a collection of articles on the Silskyi Hospodar society (1970); O. Kosach-Kryvnyiuk's chronology of the life and work of Lesia Ukrainka (1970); an edition of O. Koshyts's religious musical works (1970); V. Pavlovsky's book on V. Krychevsky (1974); S. Pohorily's book on Vynnychenko's unpublished novels (1981); and D. Doroshenko's book on Hetman P. Doroshenko (1985). The academy has also organized lectures, seminars, conferences, commemorative events, art exhibitions, concerts, recitals, and summer seminars (near Hunter, New York).

The few UVAN members who remained in Germany after 1948 were concentrated in Munich. They were led by P. *Kurinyi until 1972, after which the European UVAN ceased activity. Yu. *Blokhyi has been the Munich representative of the UVAN in the United States since 1976.

Ukrainian Agrarian party (Ukrainska khliborobska partiia, or UAP). A numerically small liberal-democratic party representing the national and class interests of the Ukrainian peasantry, founded in Polish-ruled Galicia in 1922. Its leading members were the writers M. *Yatskiiv and S. *Tverdokhlib, Rev M. Ilkiv, and S. Danylovyh, and its organs were **Ridnyi kraj* (Lviv) and *Pravo narodu* (Kolomyia). Whereas all other Ukrainian parties and most Ukrainians in Galicia, regarding the Polish occupation of Galicia as illegal, boycotted the 1922 elections to the Polish Sejm, the UAP promoted co-operation with the Polish regime to bring about economic reconstruction and agrarian and political reforms, and, with government support, fielded candidates in the elections. While campaigning Tverdokhlib was assassinated by the underground Ukrainian Military Organization, but five UAP candidates (Rev Ilkiv, I. Dutchak, O. Zalutsky, I. Kravchyshyn, and S. Mel-

nyk) were elected to the Sejm, where they constituted the Ukrainian Agrarian Club. After the elections the party's support (primarily in Pokutia) rapidly declined. In mid-1924 the club in the Sejm split into anti- (Ilkiv, Dutchak) and pro-government (Zalutsky, Kravchyshyn, Melnyk) factions. The latter faction later left the club, and in 1926 Zalutsky and Kravchyshyn left the UAP and joined the Ukrainian People's Union (UPU), newly founded in Stanyslaviv by Danylovyh. In the 1928 elections the UPU received a paltry 8,887 votes.

R. Senkus

The forestry building of the Ukrainian Agricultural Academy in Kiev

Ukrainian Agricultural Academy (Ukrainska silskohospodarska akademiia, or USHA). An institution of higher learning, formerly under the USSR Ministry of Agriculture. It was formed in Kiev in 1954 through the merger of the Kiev Agricultural Institute, which had been established in 1922 out of the agricultural department of the Kiev Polytechnical Institute (est 1898), and the Kiev Institute of Forest Management, which had been established in 1930 out of the forest engineering faculty (est 1923) of the Kiev Agricultural Institute. In 1957 the Kiev Veterinary Institute (est 1921) was brought under the USHA. The academy has 10 departments for agronomy, agricultural chemistry and soil science, plant protection, zoological engineering, veterinary medicine, the mechanization of agriculture, the automation of agriculture, the electrification of agriculture, forest management, and economics. It has a graduate school, three research stations (agronomy, animal husbandry, and forestry), a historical museum, and a botanical garden. Its library contains approx 900,000 volumes. The enrollment in 1986 was 14,000, half of whom were

correspondence students, and the faculty members numbered close to 700. The USHA continues to publish the irregular collection *Naukovi pratsi*, inaugurated by the Kiev Agricultural Institute in 1940.

Ukrainian Agricultural Bank (Ukrainskyi silsko-hospodarskyi bank, or Ukrsilbank). A co-operative joint-stock bank established in Kharkiv in 1923 to provide financial assistance and credit for peasants and agricultural co-operatives. Its shareholders were the State Bank, the Ukrainian SSR people's commissariats of land affairs and finances, gubernia agricultural banks, the Central Agricultural Bank, and other institutions. In 1930 it was transformed into a branch of the All-Union Agricultural Co-operative Collective-Farm Bank, and in the succeeding year it was abolished.

Ukrainian Alliance in Czechoslovakia (Ukrainske obiednannia v Chekhoslovachchyni). A civic organization founded in 1928 in Prague by circles opposed to the Ukrainian Committee in Czechoslovakia. The alliance was dominated by UNR supporters, who worked closely with the *Museum of Ukraine's Struggle for Independence. It had branches in Poděbrady and Mělník. Its president until its dissolution in 1939 was A. Yakovliv.

Ukrainian American, The. A pro-Soviet monthly magazine founded in New York in 1965. In 1977 it merged with **Ukrains'ki visti*, and since then it has appeared as a monthly supplement to the paper. The editors have been E. Senuk and W. Kowalchuk.

Ukrainian American Association of University Professors (Ukrainska amerykanska asotsiatsiia universytetskykh profesoriv). A professional association of Ukrainians teaching at American universities and colleges. Founded in 1961, it grew from 45 original members to 300 in 1980 and has been headed by M. Melnyk, M. Pap, P. Stercho, Ju. Fedynskyj, M. Stepanenko, I. Kamenetsky, and L. Wynar. In 1971 the association established a publication fund for its members and began publishing an irregular newsletter, *Profesors'ki visti*.

Ukrainian American Bar Association (Asotsiatsiia ukrainsko-amerykanskykh advokativ). An organization of Ukrainian-American lawyers founded in September 1977. The organization has been involved in defending human-rights activists in Ukraine, opposing the denaturalization of wrongfully accused Ukrainians in the United States and the use of Soviet-supplied evidence in American courts, and lobbying the United States government to stop the transfer of estates to the USSR. The presidents of the organization have included V. Borowsky, M. Smorodsky, B. Porytko, and B. Shandor.

Ukrainian American Coordinating Council (Ukrainska amerykanska koordynatsiina rada, or UAKR). An umbrella organization of Ukrainian civic, cultural, and political associations in the United States, formed on 15 May 1983 by the Committee for Law and Order in the *Ukrainian Congress Committee of America (UKKA). The Committee for Law and Order was set up by the 27 organizations that walked out at the 13th Congress of Ukrainian Americans in Philadelphia (10–12 October 1980) in protest over what was regarded as an illegal seizure of

power in the UKKA by the organizations of the *Ukrainian Liberation Front. When negotiations with the new executive of the UKKA to rectify the statutory and procedural violations perpetrated at the 13th Congress broke down, the Committee for Law and Order set up the UAKR to continue the tradition of the pre-13th Congress UKKA. This decision and the council's statute were approved by member organizations on 1 October 1983. UAKR was admitted to the World Congress of Free Ukrainians in November 1983. At the First Convention of the UAKR, held in Philadelphia on 1 October 1985, delegates of 49 national organizations and 22 branches elected a new executive with J. *Flis as president.

Ukrainian American Veterans (Ukrainsko-amerykanski veterany, or UAV). A national association of servicemen of Ukrainian descent who have served in the armed forces of the United States. It was founded at the First National Convention in Philadelphia in 1948 by several independent local organizations, the first of which was the Ukrainian American Veterans' League of Philadelphia (est in the 1920s by veterans of the Spanish-American War and the First World War). The UAV lobbies for veteran programs, preserves the memory of fallen soldiers, and cooperates with Ukrainian community organizations on cultural and educational projects. It is a member of the World Council of Ukrainian Combatant Organizations and until 1980 was a member of the Ukrainian Congress Committee of America. Today UAV represents 21 local posts in four states with almost 600 members. It published the monthly *Bugler* (est 1946) and has begun publishing the quarterly *UAV Tribune* (1989). Its presidents are elected at annual conventions and have included M. Chaika (1980–2), E. Zetick (1982–4), J. Brega (1984–6), A. Kobryn (1986–8), J. Fedoryczuk, and D. Bykovetz, Jr. The UAV National Ladies' Auxiliary was organized in 1974.

Ukrainian American Youth for the Rebirth of Ukraine. See Young Ukrainian Nationalists.

Ukrainian Art Studio (Ukrainska mystetska studiia). An art school established in Philadelphia in 1952. Its creation was initiated by V. *Galan, and for its first decade

A gathering of artists at the Ukrainian Art Studio in 1964. Sitting, from left: Sviatoslav Hordynsky, Oleksa Hryshchenko, Mrs Hryshchenko; standing: Petro Andrusiv, Stepan Rozhok, A. Kyrlyuk, V. Doroshenko, R. Vasylyshyn-Harmash, Mykhailo Dmytrenko, Petro Mehyk, Petro Kapshuchenko

the studio was housed in the building of the United Ukrainian American Relief Committee. The studio's director until 1992 was P. *Mehyk. Its curriculum includes drawing, painting, printmaking, sculpture, modeling, ceramics, and art history. By 1980 it had 450 graduates, including the artists R. Luchakovska and S. Lada. Its faculty has included P. Andrusiv, A. Darahan, V. Doroshenko, P. Kapshuchenko, H. Luzhnytsky, M. Mukhyn, S. Rozhok, and V. Simiantsev. Exhibitions of works by over 75 artists and student shows have been held in the studio's building (bought in 1961). The school is supported by a group of patrons that has been headed by Rev Yu. Hirniak, B. Luchakovsky, I. Mazepa, and O. Zelinsky.

Ukrainian Artistic Alliance (Ukrainske mystetske obiednannia, or UMO). An organization of realist artists that was active in Kiev from 1929 to 1931. Its membership consisted of older artists who had left the *Association of Artists of Red Ukraine, such as F. Krychevsky, K. Trokhy-menko, I. Izhakevych, M. Kozyk, F. Konovaliuk, V. Korovchynsky, H. Svitlytsky, O. Syrotenko, T. Tymoshchuk, I. Khvorostetsky, and I. Shulha. UMO promoted 'art among the masses.' This fact did not prevent its denunciation by Stalinist critics, who forced UMO to disband.

Ukrainian Artists' Association in the USA (Obiednannia myststiv ukrainsiv v Amerytsi, or OMUA). An organization of Ukrainian émigré artists, formed in New York in 1952 to promote Ukrainian art outside Ukraine. Its Philadelphia branch (est 1952) has overseen the *Ukrainian Art Studio and published the magazine **Notatky z mystetstva/Ukrainian Art Digest*. Its New York branch (est 1954) has included the Society of Young Ukrainian Artists (est 1955) and a student section (est 1964). OMUA has organized annual group exhibitions, sometimes with the *Ukrainian Association of Creative Artists in Canada, and solo shows. It maintains a gallery on its premises in New York. In 1966 OMUA had 59 members. Its presidents have been S. Lytvynenko (1952–6 and 1963–4), S. Hordynsky (1956–63), P. Andrusiv (1964–5), L. Kuzma, and M. Cheresnovsky. Its secretaries have been R. Pachovsky (1953–65) and B. Vasylyshyn.

Ukrainian Association of Artists (Ukrainska spilka obrazotvorchykh myststiv, or USOM). An organization of Ukrainian émigré artists, established in Munich in January 1947. Most of the members were in *displaced persons' camps in Germany or Austria. They included P. Andrusiv, V. Baliias, S. Burachok (vice-president), M. Butovych, V. Diadyniuk, J. Hnizdovsky, S. Hordynsky, M. Hotsii, M. Dmytrenko, I. Keivan, E. Kozak (president), H. Kruk, Yu. Kulchytsky, V. Lasovsky, O. Liaturynska, S. Lutsyk, S. Lytvynenko, H. Mazepa, P. Mehik, M. (B.) Mukhyn, M. Novytska, A. Pavlos, L. Perfetsky, O. Povstenko, and V. Sichynsky. USOM had as its aim the preservation and cultivation of Ukrainian art forms banned under Soviet domination. It participated in the 1947 International Displaced Persons' Art Exhibition in Munich, for which it supplied 290 works by 48 artists; held several of its own exhibitions; and published the magazine *Ukrains'ke mystetstvo* (1947, 2 issues, ed Dmytrenko) and books on Ukrainian art and sculpture. USOM ceased functioning after most of its members emigrated to the New World, and it was officially dissolved in 1951.

Ukrainian Association of Creative Artists in Canada (Ukrainska spilka obrazotvorchykh myststiv v Kanadi, or USOM). An organization of Ukrainian émigré artists, established in 1955 out of the art section of the Ukrainian Literary and Artistic Club in Toronto. Branches were later founded in Montreal and Edmonton. The society has held art exhibitions, public lectures, and discussions on art. One of its founders, M. Dmytrenko, served as the first president. The other presidents have been B. Stebelsky, I. Keivan, and O. Telizhyn. In 1970 USOM had about 30 members, among them A. Kyryliuk, N. Mudryk-Mryts, D. Kravtsiv-Yemets, and M. Styranka. Most of the members lived in Toronto.

Ukrainian Association of Disabled Veterans (Ukrainska spilka voiennykh invalidiv). An organization of Ukrainian veterans founded in Kalisz, Poland, in 1920. It operated a home for disabled veterans and published the journal *Ukrains'kyi invalid*. It had over 1,500 registered members and was active until 1939.

Ukrainian Association of Marxist-Leninist Scientific Research Institutes. See All-Ukrainian Association of Marxist-Leninist Scientific Research Institutes.

Ukrainian Association of Victims of Russian Communist Terror (Soiuz ukrainsiv zhertv rosiiskoho komunistychnoho terroru, or SUZhERO). Initiated in 1950 in Toronto by S. *Pidhainy, its first head, the society consists of survivors of Soviet repression. It is dedicated to publicizing the misdeeds of the Soviet regime in Ukraine and has prepared *The Black Deeds of the Kremlin: A White Book* (2 vols, 1953) and other publications. The group has a democratic orientation and supports the UNR government-in-exile. At one time there were up to 15 branches in Canada.

Ukrainian Autocephalous Orthodox church (Ukrainska Avtokefalna Pravoslavna Tserkva, or UAOC). The national Ukrainian Orthodox church, independent (autocephalous) of all other church formations and with its own administrative structure and hierarchy.

The movement for an independent Ukrainian Orthodox church gained strength following the Revolution of 1917 and the rebirth of a Ukrainian state. The *All-Ukrainian Orthodox Church Council, with representatives of the clergy and laity from throughout Ukraine, began the process of Ukrainizing church life and establishing a permanent organizational structure for the Ukrainian church. The *autocephaly of the church was proclaimed at a May 1920 *sobor called by the All-Ukrainian Orthodox Church Council (a 1919 decree on church autocephaly by the Ukrainian National Republic had never been implemented owing to the upheavals of the Ukrainian-Soviet War). The church's leaders, however, could not find a bishop to assume spiritual leadership or consecrate a new hierarchy for the church. The difficulty was resolved only at the first All-Ukrainian Orthodox Church sobor in Kiev on 14–30 October 1921, when the delegates decided to revive an ancient Alexandrian rite, which did not require the participation of other bishops, to consecrate V. *Lypkiivsky (as the church's first metropolitan) and N. *Sharaievsky. Soon after, these two bishops elevated several other bishops to the ranks of the new hierarchy.

Hierarchs of the Ukrainian Autocephalous Orthodox church in 1926

A period of rapid growth for the UAOC began. By early 1924 the church had approx 30 bishops, 1,500 priests and deacons, and 1,100 parishes. At its peak it had as many as 6 million followers in Ukraine. It also began to spread its influence to Ukrainian communities abroad; E. *Batchinsky was designated as its representative in Western Europe, and Bishop I. *Teodorovych was dispatched to minister to Ukrainians in North America. Administratively, it was divided into okruhas, each headed by a bishop and okruha sobor. The church was strongest in Podilia, Kiev, Uman, and Cherkasy okruhas and in the city of Kiev itself. In 1927–8 it published a monthly journal, **Tserkva i zhyttia*.

The UAOC was closely allied with the Ukrainian national revival of the revolutionary period and the 1920s. It was primarily supported by the Ukrainian intelligentsia (and lower clergy) and envisioned playing a major role in raising the national consciousness of the masses. Politically it was committed to the social reforms of the UNR (V. *Chekhivsky, the most influential ideologue of the UAOC, had headed the Council of Ministers of the UNR). The theology and ecclesiology of the UAOC, as it evolved in the 1920s, was distinguished by several characteristics. One of the major tenets of the church was an insistence on the separa-

tion of church and state – largely a reaction to the state of affairs under tsarist rule, when the Orthodox church was essentially an arm of the state and a pillar of the autocratic system. Second, the leaders of the church were committed to the independence (autocephaly) of the UAOC; their argument was that the incorporation of the Ukrainian church into the Russian Orthodox church in the 17th century had been uncanonical. They called for jurisdictional independence from the Moscow patriarch and the creation of an independent hierarchy, equal to and recognized by the entire Orthodox community. A third feature of the new church was a commitment to conciliarism or *sobor rule. This concept stressed the complete democratization and decentralization of church life and the active participation of the laity in decision-making, with sobors, attended by elected delegates of lay and clergy, replacing bishops as the highest authority in the church. Another important feature of the UAOC was the Ukrainization of the church rite, including the use of the vernacular (in place of Church Slavonic) and the revitalization of Ukrainian liturgical and ecclesiastical traditions (see *Church rite). Finally, the ideology of the church stressed the Christianization of all aspects of life.

The canonical reforms adopted by the UAOC – the meth-

od used to consecrate its hierarchy, the introduction of an elected and married episcopate, the insistence on lay participation in church affairs, and so on – had tremendous ramifications for the church. These reforms, however, impeded relations with other Orthodox churches, even though the UAOC stressed its adherence to traditional Orthodoxy. The church was denounced as noncanonical by the Patriarchal Russian Orthodox church, and its leaders were ridiculed as *samosviaty* (self-consecrated). The Patriarchal church was especially concerned because the UAOC succeeded in acquiring many churches, including the St Sophia Cathedral in Kiev, and thereby posed a threat to its dominance.

From the outset the Soviet authorities sought to discredit all churches in Ukraine and limit their influence. The campaign against the UAOC involved exploiting internal divisions by supporting dissenting factions within the UAOC (eg, the Active Church of Christ) and favoring the more pro-Russian competing churches that emerged in the 1920s (eg, the *Living church, which initially sought to subsume the UAOC, and the *Sobor-Ruled Episcopal church). In 1926 a major GPU crackdown on the UAOC began, and V. Lypkivsky was arrested and placed under house arrest. At the Second All-Ukrainian Church Council he was replaced as metropolitan by M. *Boretsky. The repression was eased for a brief time but resumed in full force in 1929. The church was accused of collaborating with the *Union for the Liberation of Ukraine, and many of its leaders (including Chekhivsky) were arrested. At an extraordinary sobor held in January 1930 the UAOC formally abolished itself, although some 300 of its parishes reconstituted themselves as the Ukrainian Orthodox church under Metropolitan I. *Pavlovsky (this body was finally destroyed in 1936). The 1930s brought the physical liquidation of the entire hierarchy of the UAOC and many of its priests and faithful.

The Second World War. Although the UAOC was destroyed in Soviet Ukraine, Ukrainian Orthodoxy survived in those territories that came under Polish rule in the interwar period – Volhynia, Polisia, and the Kholm region. The *Polish Autocephalous Orthodox church, although not a specifically Ukrainian institution, permitted the use of the Ukrainian language and adherence to Ukrainian religious customs. One of its hierarchs, P. *Sikorsky, was of Ukrainian origin, and the metropolitan, D. *Valedinsky, supported the re-establishment of an independent Orthodox church in Soviet Ukraine. Following the German invasion of Ukraine in June 1941, efforts were immediately begun to revive the church there. Valedinsky assumed spiritual authority over the reborn UAOC, which was administered by Sikorsky (who was named metropolitan) and supported by Bishops I. *Ohiienko and P. Vydybida-Rudenko of the Orthodox church in Poland (within the Generalgouvernement). New hierarchs were consecrated in Kiev in February 1942 (N. Abramovych, who was designated head of the church in the Reichskommissariat Ukraine, and I. Huba) and in May 1942 (M. *Skrypnyk, M. Khoroshy, S. Haievsky, and H. Ohiichuk). The reborn UAOC, although disavowing the radical canonical reforms of its predecessor of the 1920s, made accommodations for surviving clergy of the church. It grew quickly and soon claimed some 500 parishes.

The UAOC faced competition from another church in Ukraine, the *Ukrainian Autonomous Orthodox church. Headed by Metropolitan O. *Hromadsky, this church re-

jected the UAOC of the 1920s as uncanonical and would not accept former clergy from that church unless they were reordained. The autonomous church also recognized the spiritual authority of the Moscow patriarch over Ukraine, but considered this authority suspended as long as the patriarch was under Soviet domination. In general this church appealed to the Russian and Russified population of Ukraine, while the UAOC was closely tied to the Ukrainian national movement. Although some attempts were made to unite the two jurisdictions in 1941–2, these ultimately failed.

The diaspora. With the Soviet reoccupation of all of Ukraine by mid-1944, almost all the bishops and many of the priests and faithful of the UAOC fled to the West, and all the remaining parishes were dissolved or forced to join the Russian Patriarchal church in Ukraine. The UAOC continued its activity among Ukrainian émigrés in Western Europe under the leadership of Sikorsky. By 1947 it numbered 71 parishes with 103 priests and 18 deacons. The *Theological Academy of the UAOC was established in Munich to train priests, and a theological institute was founded. The church split at the Ashchaffenburg Conference of August 1947, when a number of priests and faithful followed Archbishop H. Ohiichuk to form the *Ukrainian Autocephalous Orthodox Church (Conciliar). Followers of this church strictly adhered to the reforms of the UAOC of the 1920s, especially the principle of rule by the sobor, and rejected the authority of the Synod of Bishops of the UAOC, which had emerged as the church's highest authority.

The UAOC in Western Europe declined with the emigration of many Ukrainians to North America, where most Orthodox emigrants joined the existing *Ukrainian Orthodox Church of Canada or the *Ukrainian Orthodox Church in the USA (UOC-USA). New UAOC parishes, however, were established in Great Britain, Australia and New Zealand, and South America. Sikorsky, who died in 1953, was succeeded by N. Abramovych (1953–69) and then M. Skrypnyk, who is also metropolitan of the UOC-USA. Other hierarchs of the UAOC in the 1950s to 1980s included O. Ivaniuk (of Western Europe) S. *Haievsky, V. *Solovii, D. Burtan, I. Danyliuk (Australia and New Zealand), M. Solovii, O. Pylypenko (South America), and V. Didovych (Western Europe, Australia). In the late 1980s the UAOC had 30 parishes, 11 priests, and 8,000 faithful in Western Europe; 23 parishes, 8 priests, and 4,000 faithful in Great Britain; 15 parishes, 8 priests, and 4,200 faithful in Australia and New Zealand; and 22 parishes, 10 priests, and 30,000 faithful in South America and a hierarchy composed of Skrypnyk, Bishop A. *Dubliansky (of Western Europe), and Bishop P. Ishchuk (of South America). Church organs are **Ridna tserkva* (Germany), **Vidomosti Heneral'noho tserkovnoho upravlinnia UAPTs u Velykii Brytanii* (Great Britain), *Pratsia i zhyttia* (Australia), and *Pravoslavne zhyttia* (Belgium).

Revival in Ukraine. The political liberalization of the late 1980s permitted the rebirth of the UAOC in Ukraine. Beginning in 1987 with the parish of SS Peter and Paul in Lviv, a number of parishes and priests seceded from the official Russian Orthodox church (ROC) and re-established the UAOC. In October 1989 I. Bodnarchuk, a bishop of the ROC, announced his resignation from that church and agreed to head the UAOC. Subsequently, assisted by a retired bishop of the ROC, he consecrated several new bishops. Relations were established with the UAOC abroad,

and Skrypnyk was elected Patriarch of Kiev and all Ukraine at the first sobor of the reborn UAOC, in June 1990 (he was installed the following November). By the end of 1990 the church hierarchy was composed of Patriarch Skrypnyk, Metropolitan Bodnarchuk of Lviv, and the bishops of Ternopil and Buchach, Ivano-Frankivske and Kolomyia, Bila Tserkva and Vyshhorod, Chernivtsi and Khotyn, Lutske and Volodymyr-Volynskyyi, Uman, and Rivne and Ostrih. A seminary was established in Ivano-Frankivske in 1991, and several journals and other publications were initiated. That year the UAOC had 944 parishes in Ukraine.

A. Zhukovsky

Ukrainian Autocephalous Orthodox Church (Conciliar) (Ukrainska Avtokefalna Pravoslavna Tserkva – Sobornopravna, or UAOC[C]). A church formed in August

1947 in Aschaffenburg, Germany, following a split in the Ukrainian Autocephalous Orthodox church (UAOC). It rejected the authority of Metropolitan P. Sikorsky of the UAOC, who had disavowed many of the radical reforms adopted by the UAOC in the 1920s under Metropolitan V. Lypkivsky. Initially it submitted itself to the jurisdiction of Archbishop I. Teodorovych, but in October 1947 Archbishop H. *Ohiichuk became its ruling hierarch. It stressed its support for the reforms of the UAOC and especially the primacy of the church sobor or council as the highest authority in the church (over the episcopate). After the emigration of most of its supporters to the United States, Chicago became its center. In Great Britain six parishes, led by I. Hubarzhevsky and then Bishop I. Hrytsenko, also joined the UAOC(C), as did a few parishes in Australia (formerly led by Bishop D. Burtan) and South America. In the 1960s the church in the United States had 10 parishes served by 10 priests, and nearly 2,000 faithful. In 1973 it split into two factions, one under Ohiichuk and the other (the smaller) under Archbishop O. Pylypenko of Argentina and then Bishop P. Kolisnyk. The two factions reunited in 1983, and new bishops were ordained, but they subsequently split again. In 1989 the two factions of the UAOC(C) claimed 5 bishops, 15 parishes, 12 priests, 2 deacons, and a few thousand faithful. The official press organ of the majority faction of the church, **Pravoslavnyi ukrainets'*, was published irregularly in Germany and then in Chicago and Detroit; the opposition faction, which was grouped around the Metropolitan Lypkivsky Ukrainian Orthodox Brotherhood, published the journal **Tserkva i zhyttia* (1957–77).

Ukrainian Autocephalous Orthodox Church in Exile (Ukrainska Avtokefalna Pravoslavna Tserkva v Ekzyli). A church founded in New York in 1951 by Archbishop P. *Vydybida-Rudenko. It traced its roots to the Polish Au-

Participants in the 1976 sobor of the Ukrainian Autocephalous Orthodox Church (Conciliar) in Detroit. Sitting, in the center: Archbishop Oleksii Pylypenko and Bishop Petro Kolisnyk

tocephalous Orthodox church under Metropolitan D. Valedinsky. Vydybida-Rudenko questioned the canonicity of the Ukrainian Autocephalous Orthodox church and placed his church under the jurisdiction of the patriarch of Constantinople in 1954, thereby maintaining ties with the Standing Conference of Canonical Orthodox Bishops of America. The church based itself on the 1924 *Tomos* of the patriarch of Constantinople, which had granted autocephaly to the Orthodox church in Poland. In the 1960s it had 2 bishops (Vydybida-Rudenko and I. *Huba), 16 parishes, 25 priests, and close to 5,000 faithful, mainly postwar immigrants from Volhynia and central Ukraine. The church organ, *Zhyttia i tserkva* (1956–67), was edited by S. Kindzeriavy-Pastukhiv. After the deaths of Huba (1966) and Vydybida-Rudenko (1971), the church was administered by Kindzeriavy-Pastukhiv until 1980, when it ceased to exist and the majority of the clergy and faithful joined the Ukrainian Orthodox Church in the USA.

Ukrainian Autonomists-Federalists' Association (*Spilka ukrainskykh avtonomistiv-federalistiv*). An organization of liberal conservatives, with the largest proportion of professionals in its cadres of all the Ukrainian political parties. The association revived the program of the prewar *Ukrainian Democratic Radical party, which in 1908–17 had been a part of the Society of Ukrainian Progressives (TUP). At its congress on 7–8 April 1917 TUP transformed itself into the Ukrainian Autonomists-Federalists' Association, which took part in the early work of the Central Rada (April–June 1917) and later changed its name to the *Ukrainian Party of Socialists-Federalists. Among its leaders were S. Yefremov, A. Nikovsky, I. Shrah, O. Lototsky, and P. Stebnytsky.

Ukrainian Autonomous Orthodox church (*Ukrainska Avtonomna Pravoslavna Tserkva*). An Orthodox church jurisdiction that existed during the German occupation of Volhynia and eastern Ukraine in the Second World War. It was headed by Metropolitan and Exarch O. *Hromadsky, formerly a bishop of the Polish Autocephalous Orthodox church (PAOC). It was formed in August 1941 by a synod of bishops held at the Pochaiv Monastery. The church based itself on a 1918 statute of the Russian Orthodox church that had granted it some measure of autonomy. It accepted the canonical dependence of the Ukrainian church on the Moscow patriarchate, but considered this relationship suspended as long as the patriarch was subject to Soviet control. The Autonomous church attracted the conservative Orthodox faithful as well as the Russified segment of the population, especially the clergy. Its hierarchy (a total of 15 bishops) included bishops of the PAOC as well as several bishops consecrated by the Russian Orthodox church during the Soviet occupation of Western Ukraine (eg, P. Rudyk, archimandrite of the Pochaiv Monastery). Some monasteries of the Volhynia and the Dnieper regions also joined the Autonomous church, among them the Kievan Cave Monastery.

Throughout the war the Autonomous church competed with the *Ukrainian Autocephalous Orthodox church for predominance in Ukrainian Orthodox church life. The competition was encouraged by the German authorities, who generally favored the Autonomous church but feared the emergence of a united church. In October 1942 a joint conference of the two churches (attended by Metro-

politan Hromadsky, Archbishop N. Abramovych, and Bishop M. Skrypnyk) was held at the Pochaiv Monastery. Steps were taken to unite the two jurisdictions. Union would have involved de facto recognition of the autocephaly of the Ukrainian Orthodox church and the calling of a joint synod of Ukrainian bishops. Most Autonomist bishops, however, as well as the German authorities, were hostile to the idea, and the plans were never realized. Hromadsky was unintentionally killed in an ambush of Ukrainian partisans in May 1943, and he was replaced by Archbishop Rudyk. Tensions continued between the churches until 1944, when the Soviet army retook Ukraine. Most of the Autonomous church bishops emigrated to the West and joined the Synodal Russian Orthodox Church in Exile. Those bishops and priests who remained in Ukraine joined the Russian Orthodox church under the Moscow patriarch.

A. Zhukovsky

Ukrainian Auxiliary Police. A security force established by the German occupational regime in the Generalgouvernement. It was active from the end of 1939 (under the name Ukrainian Police) in areas with a predominantly Ukrainian population. The force was introduced into Galicia on 18 August 1941 (after the Generalgouvernement had expanded to incorporate Germany's new possessions) instead of a Ukrainian national militia. By the later phases of the war the Ukrainian Auxiliary Police numbered more than 5,000 men, including 120 officers. The intended number of 6,000 police for Galicia was never reached because of a dearth of volunteers.

The force functioned at a municipal level, and its jurisdiction was not limited to Ukrainians. Nevertheless it often found itself in conflict with other formations, such as the *Bahnschutz* or *Werkschutz*. Although it did not have a national command structure, the Ukrainian Auxiliary Police was ultimately responsible, as was the Polish militia, to the commandant of the German security police (*Ordnungspolizei*, or ORPO) at the Generalgouvernement headquarters in Cracow. At a district level *okruha* and county (*povit*) commands were created for the auxiliary police, again responsible to regional ORPO centers. The force's highest-ranking officer was Maj V. Pitulei, the district commander of Lviv; his assistant was Capt L. Ohonovsky. In Lviv a special police academy headed by Capt I. Kozak trained recruits for the Ukrainian auxiliary force.

As representatives of the German occupational regime the Ukrainian Auxiliary Police were forced to participate in unpopular, repressive measures. Among the German authorities themselves, however, the police had low prestige. They were insufficiently armed, with one rifle for two policemen and 10 cartridges per rifle. The pay was also low for both officers and policemen, and protection for their families was virtually nonexistent.

L. Shankovsky

Ukrainian Bandurist Chorus (*Ukrainska kapelia bandurystiv im. T. Shevchenka*). The beginnings of this chorus lead back to the Banduryst Kapelle founded in 1923 in Poltava, which was succeeded in 1935 by the Ukrainian State Exemplary Banduryst Kapelle. In 1941 most of the ensemble members were incarcerated for several months by the German authorities. They were then

The Ukrainian Bandurist Chorus in 1955. Sitting, first and second from the right: Hryhorii Kytasty and Volodymyr Bozhyk
